DEPARTMENT OF HEALTH SERVICES (Expedited Rulemaking)
Title 9, Chapter 7

Amend: R9-7-1302, Table 13.1
MEETING DATE: July 6, 2022

TO: Members of the Governor’s Regulatory Review Council (Council)

FROM: Council Staff

DATE: June 13, 2022

SUBJECT: DEPARTMENT OF HEALTH SERVICES (Expeditied Rulemaking)
Title 9, Chapter 7

Amend: R9-7-1302, Table 13.1

Summary:

This expedited rulemaking from the Department of Health Services (Department) seeks to amend two rules in Title 9, Chapter 7, Article 13 related to license and registration fees. Laws 2021, Ch. 409, § 26 requires the Department to reduce revenue generated by the fees specified in Article 13 by $300,000. In this rulemaking, the Department intends to reduce the fees to be charged to categories of licensees and registrants of radiation sources.

Additionally, as part of the review for a Five-Year Review Report, the Department also identified that it is unclear under which category and type of license persons who service devices containing radioactive materials are regulated. The Department indicates these persons are currently licensed under category/type (D)(8) Health Physics Class A, but the rules would be improved by better describing the license type under which they are regulated without changing the fee currently paid by these persons.
1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

   The Department states that these changes are consistent with the purpose for A.R.S. § 41-1027(A) in that this rulemaking does not increase the cost of regulatory compliance, does not increase a fee, or reduce a procedural right of regulated persons. Instead, the Department indicates the rulemaking will not only make the rules compliant with Legislative requirements, but also reduce the regulatory burden of both persons who service devices containing radioactive materials and those who will pay the reduced fees.

   Council staff believes the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A).

2. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   The Department cites both general and specific statutory authority for these rules.

3. **Do the rules establish a new fee or contain a fee increase?**

   This rulemaking does not establish a new fee or contain a fee increase. Instead, this rulemaking reduces fees charged for Category E1-E3 registrations.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

   The Department indicates it did not receive public or stakeholder comments related to this rulemaking.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

   The Department indicates there were no changes to the rules between the Notice of Proposed Expedited Rulemaking published in the Administrative Register and the Notice of Final Expedited Rulemaking now before the Council.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

   Not applicable. The Department indicates there is no corresponding federal law directly applicable to the subject of the proposed rulemaking.
7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

   Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(11), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

   The Department indicates, according to A.R.S. Title 30, Chapter 2, Article 2, as amended by Laws 2017, Ch. 313, the Department is authorized to issue licenses and registrations for sources of ionizing radiation and those persons using these sources. The Department states this licensing and registration must be compatible with requirements in the Agreement. The Department indicates the rules refer to permits both general and specific. The general permit applies to certain levels of radioactive material, and specific permits are issued by rule for quantities and uses that are specific to the user and their training or scope of practice.

8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

   The Department did not review or rely on any study in conducting this rulemaking.

9. **Conclusion**

   The Department seeks to amend two rules to reduce fees to be charged to categories of licensees and registrants of radiation sources and clarify under which category and type of license persons who service devices containing radioactive materials are regulated.

   Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on filing with the Secretary of State.

   Council staff recommends approval of this rulemaking.
VIA EMAIL: grrc@azdoa.gov
Nicole Sornsin, Chair
Governor’s Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 7, Article 13, Expedited Rulemaking

Dear Ms. Sornsin:

1. **The close of record date: January 3, 2022**

2. **Explanation of how the expedited rule meets the criteria in A.R.S. § 41-1027(A):**
The rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of regulated persons. In a rulemaking pursuant to Laws 2021, Ch. 409, § 26, the Department is amending the rules to reduce revenue generated by the fees specified in 9 A.A.C. 7, Article 13 by $300,000, and clarifying under which category and type of license persons who service devices containing radioactive materials are regulated. This rulemaking conforms to requirements in A.R.S. § 41-1027(A)(1), (3), and (7).

3. **Whether the rulemaking relates to a five-year-review report and, if applicable, the date the report was approved by the Council:**
Part of the rulemaking for 9 A.A.C. 7, Article 13 relates to a five-year-review report approved by the Council on October 5, 2021.

4. **A list of all items enclosed:**
a. Notice of Final Expedited Rulemaking, including the Preamble, Table of Contents, and text of the rule
b. Statutory authority
c. Current rule
d. Laws 2021, Ch. 409

The Department is requesting that the rules be heard at the Council meeting on July 6, 2022.
I certify that the Preamble of this rulemaking discloses a reference to any study relevant to the rule that the Department reviewed and either did or did not rely on in its evaluation of or justification for the rule.

The Department’s point of contact for questions about the rulemaking documents is Ruthann Smejkal at Ruthann.Smejkal@azdhs.gov.

Sincerely,

Robert Lane
Director’s Designee

RL: rms

Enclosures
NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 9. HEALTH SERVICES
CHAPTER 7. RADIATION CONTROL

PREAMBLE

1. Article, Part, of Section Affected (as applicable)    Rulemaking Action
   R9-7-1302                Amend
   Table 13.1               Amend

2. Citations to the agency’s statutory authority for the rulemaking to include the authorizing statute (general) and the implementing statute (specific):
   Authorizing Statutes: A.R.S. §§ 30-654(B)(5) and 36-136(G)
   Implementing Statutes: A.R.S. §§ 30-654, 30-656, 30-657, 30-671 through 30-672.01, 30-681 through 30-689, and 30-721

3. The effective date of the rules:
   The rule is effective the day the Notice of Final Expedited Rulemaking is filed with the Office of the Secretary of State.

4. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the proposed expedited rulemaking:
   Notice of Docket Opening: 27 A.A.R. 2866, December 10, 2021
   Notice of Proposed Expedited Rulemaking: 27 A.A.R. 2976, December 24, 2021

5. The agency’s contact person who can answer questions about the rulemaking:
   Name: Brian D. Goretzki, Chief, Bureau of Radiation Control
   Address: Arizona Department of Health Services
            Public Health Licensing Services
            4814 South 40th Street
            Phoenix, AZ  85040
   Telephone: (602) 255-4840
   Fax: (602) 437-0705
   E-mail: Brian.Goretzki@azdhs.gov
            or
   Name: Robert Lane, Chief
   Address: Arizona Department of Health Services
            Office of Administrative Counsel and Rules
6. **An agency's justification and reason why a rule should be made, amended, repealed or renumbered, under A.R.S. § 41-1027, to include an explanation about the rulemaking:**

Arizona Revised Statutes (A.R.S.) § 30-654(B)(5) requires the Arizona Department of Health Services (Department) to make rules deemed necessary to administer A.R.S. Title 30, Chapter 4, Control of Ionizing Radiation. The Department has adopted these rules in A.A.C. Title 9, Chapter 7. Pursuant to A.R.S. § 30-654(B)(17), the Department has established a schedule of fees to be charged to categories of licensees and registrants of radiation sources in Article 13 of the Chapter. Laws 2021, Ch. 409, § 26 requires the Department to reduce revenue generated by the fees specified in Article 13 by $300,000. As part of the review for a five-year-review report fees, the Department has also identified that it is unclear under which category and type of license persons who service devices containing radioactive materials are regulated. These persons are currently licensed under category/type (D)(8) Health Physics Class A, but the rules would be improved by better describing the license type under which they are regulated without changing the fee currently paid by these persons. The Department believes that these changes are consistent with the purpose for A.R.S. § 41-1027 in that this rulemaking does not increase the cost of regulatory compliance, does not increase a fee, or reduce a procedural right of regulated persons. In fact, the rulemaking will not only make the rules compliant with Legislative requirements, but also reduce the regulatory burden of both persons who service devices containing radioactive materials and those who will pay the reduced fees.

7. **A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The Department did not review or rely on any study for this rulemaking.

8. **A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state.**

Not applicable

9. **A summary of the economic, small business, and consumer impact:**
Under A.R.S. § 41-1055(D)(2), the Department is not required to provide an economic, small business, and consumer impact statement.

10. **A description of any changes between the proposed expedited rulemaking, including supplemental notices, and the final expedited rulemaking:**

   Between the proposed expedited rulemaking and the final expedited rulemaking, no changes were made to the rulemaking.

11. **Agency's summary of the public or stakeholder comments or objections made about the rulemaking and the agency response to the comments:**

   The Department did not receive public or stakeholder comments about the rulemaking.

12. **All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

   a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

   According to A.R.S. Title 30, Chapter 2, Article 2, as amended by Laws 2017, Ch. 313, the Department is authorized to issue licenses and registrations for sources of ionizing radiation and those persons using these sources. This licensing and registration must be compatible with requirements in the Agreement. The rules refer to permits both general and specific. The general permit applies to certain levels of radioactive material, and specific permits are issued by rule for quantities and uses that are specific to the user and their training or scope of practice.

   b. **Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

   These rules rely on statutory authority from state statutes, not from federal regulations.

   c. **Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:**

   No such analysis was submitted.

13. **A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:**

   In R9-7-1302(D)(11): 10 CFR 61, revised January 1, 2015

14. **Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall**
state where the text was changed between the emergency and the final rulemaking packages:

The rule was not previously made as an emergency rule.

15. The full text of the rule follows:
ARTICLE 13. LICENSE AND REGISTRATION FEES

R9-7-1302. License and Registration Categories

A. Category A licenses are those specific licenses that authorize a school, college, university, or other teaching facility to possess and use radioactive materials for instructional or research purposes.
1. A broad academic class A license is any category A license that meets the specifications of R9-7-310(A)(1).
2. A broad academic class B license is any category A license other than a broad academic class A license that meets the specifications of R9-7-310(A)(2).
3. A broad academic class C license is any category A license other than a broad academic class A or B license that meets the specifications of R9-7-310(A)(3).
4. A limited academic license is any category A license that authorizes only those radioisotopes, forms, and quantities individually specified in the license.

B. Category B licenses are those specific or general licenses that authorize the application of radioactive material or the radiation from it to a human being for medical diagnostic, therapeutic, or research purposes, or the use of radioactive material in medical laboratory testing. Except for a type B6, general medical license, the Department shall not combine a category B license with a license of any other category.
1. A broad medical license is any category B license that meets the specifications of R9-7-310(A)(1) and meets the requirements of 9 A.A.C. 7, Article 7. A broad medical license may authorize any medical use other than teletherapy.
2. A medical materials class A license is any specific category B license other than a broad medical license, that authorizes the use of radiopharmaceuticals and sealed sources containing radioactive materials for a therapeutic purpose in quantities that require hospitalization of the patient for radiation safety purposes. The license may authorize other radioactive materials and other medical uses, except teletherapy.
3. A medical materials class B license is any specific category B license that authorizes the diagnostic or therapeutic use, other than teletherapy, of radioactive materials only in limited quantities such that the patient need not be hospitalized for radiation safety purposes.
4. A medical materials class C license is any specific category B license that authorizes possession of specified radioisotopes only in the form of sealed sources for treatment of the eye or skin or for use in diagnostic medical imaging devices.
5. A medical teletherapy license is a specific category B license that solely authorizes radioisotopes in the form of multi-curie sealed sources for use in external beam therapy. The Department shall not combine a medical teletherapy license with any other type of category B license.

6. A general medical license is one that authorizes the use of radioactive material pursuant to R9-7-306(D) or R9-7-306(E). A general medical license may be combined into a broad medical, medical materials class A, or medical materials class B license.

C. Category C licenses are those specific or general licenses that authorize the use of radioactive materials in any activity other than those authorized by a category A, B, or D license. Except as specifically authorized in this Section, the Department shall not combine a category C license with any other type of license.

1. A broad industrial class A license is any category C license that meets the specifications of R9-7-310(A)(1). The Department may combine a broad industrial class A license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.

2. A broad industrial class B license is any category C license other than a broad industrial class A license that meets the specifications of R9-7-310(A)(2). The Department may combine a broad industrial class B license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.

3. A broad industrial class C license is any category C license other than a broad industrial class A or B license that meets the specifications of R9-7-310(A)(3). The Department may combine a broad industrial class C license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.

4. A limited industrial license is a specific category C license that authorizes the possession of the radioactive materials authorized in R9-7-305(A), or R9-7-306(A), (C), or (F) for uses authorized in those subsections, but in quantities greater than authorized by those subsections.

5. A portable gauge license is a specific category C license that authorizes radioactive materials in the form of sealed sources for use in measuring or gauging devices designed and manufactured to be transported to the location of use. The Department may combine a portable gauge license with any broad scope industrial license or a fixed gauge class A license.

6. A fixed gauge class A license is a specific category C license that authorizes the possession of 50 or more measuring or gauging devices containing radioactive materials,
A fixed gauge class B license is a specific category C license that authorizes the possession of 1 through 49 measuring or gauging devices containing radioactive materials, where each device is permanently mounted for use at a single location.

A leak detector license is a specific category C license that authorizes the use of radioisotopes in the form of a gas to test hermetic seals on electronic packages.

A gas chromatograph license is a specific category C license that authorizes the use of radioactive materials as ionization sources in gas chromatography or electron capture devices.

A general industrial license is one that authorizes the use of a material, source, or device generally licensed pursuant to R9-7-305 or R9-7-306, except R9-7-305(B), R9-7-306(D), or R9-7-306(E).

An industrial radiography class A license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources at specific facilities identified in the license conditions or at temporary field job sites.

An industrial radiography class B license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources only at specific facilities identified in the license conditions.

An open field irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources not permanently mounted within a shielding container, for irradiation of materials.

A self-shielded irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources for irradiation of materials in a shielding device from which the sources are not removed during irradiation. The Department may combine a self-shielded irradiator license with any broad license.

A well logging license is a specific category C license that authorizes the use of radioactive material in sealed or unsealed sources for wireline services or field tracer studies.

A research and development license is a specific category C license that authorizes a licensee to utilize radioactive material in unsealed and sealed form for industrial, scientific, or biomedical research, not including administration of radiation or radioactive material to human beings.

A laboratory license is a specific category C license that authorizes a licensee to perform specific in-vitro or in-vivo medical or veterinary testing, while possessing quantities of
radioactive material greater than the general license quantities authorized in R9-7-306.

D. Category D licenses are the following specific or general radioactive material licenses. Except for type D4, general industrial; type D5, depleted uranium; type D8 and D9, health physics; and type D14, additional facilities licenses, the Department shall not combine a category D license with any other license.

1. A distribution license is one that authorizes the commercial distribution of radioactive materials or radioisotopes in products to persons holding an appropriate general or specific license. The Department shall ensure that a distribution license does not:
   a. Authorize distribution of radiopharmaceuticals or distribution to persons exempt from regulatory control, or
   b. Authorize any other use of the radioactive material. An appropriate category C license is required for possession of radioisotopes and their incorporation into products.

2. A nuclear pharmacy license is one that authorizes the preparation, compounding, packaging, or dispensing of radiopharmaceuticals for use by other licensees.

3. A nuclear laundry license is one that authorizes the collection and cleaning of items contaminated with radioactive materials.

4. A general industrial gauging device license is one that authorizes the use of a gauging device in accordance with R9-7-306(A). The Department may combine a general industrial gauging device license with a class A, B, or C broad industrial, limited industrial, portable gauge, or class A or B fixed gauge license.

5. A general depleted uranium license is one that authorizes the use of the general license authorized pursuant to R9-7-305(C) or the use of depleted uranium as a concentrated mass or as shielding for another radiation source within a device or machine. The Department may combine a general depleted uranium license with a medical teletherapy; class A, B, or C broad industrial; portable gauge; class A or B fixed gauge; class A or B industrial radiography; or self-shielded irradiator license. For licensing purposes, an applicant shall follow the requirements in R9-7-305(C).

6. A veterinary medicine license is one that authorizes the use of radioactive materials for specific applications in veterinary medicine as authorized in the license.

7. A general veterinary medicine license is one that authorizes the use of the general license authorized in R9-7-306(E) in veterinary medicine.

8. A health physics class A license is one that authorizes the use of radioactive materials for performing instrument calibrations, processing leak test or environmental samples, or
providing radiation dosimetry services or the performance of maintenance on devices containing radioactive materials.

9. A health physics class B license is one that authorizes only the collection, possession, and transfer of radioactive materials in the form of leak test samples for processing by others.

10. A secondary uranium recovery license is one that authorizes the extraction of natural uranium or thorium from an ore stream or tailing that is being or has been processed primarily for the extraction of another mineral. The Department shall not combine a secondary uranium recovery license with any other license.

11. A low-level, radioactive waste disposal facility license is a license that is issued for a “disposal facility,” as that term is used in R9-7-439 and R9-7-442, that has a closure or long-term care plan and is constructed and operated according to the requirements in 10 CFR 61, revised January 1, 2015, incorporated by reference, available under R9-7-101 and containing no future editions or amendments.

12. A waste processor class A license is one that authorizes the incineration, compaction, repackaging, or any other treatment or processing of low-level radioactive waste prior to transfer to another person authorized to receive or dispose of the waste. The Department shall not combine a waste processor class A license with any other license.

13. A waste processor class B license is one that authorizes a waste broker to receive prepackaged, low-level radioactive waste from other licensees; combine the waste into shipments; and transfer the waste without treating or processing the waste in any manner and without repackaging except to place damaged or leaking packages into overpacks. The Department shall not combine a waste processor class B license with any other license.

14. An additional storage and use site license is an endorsement, by license condition to an existing specific license, authorizing one or more additional separate facilities where radioactive material may be stored or used for a period exceeding six months.

15. A possession-only license is a license of any other category that authorizes only the possession in storage, but no use of, the authorized materials. A license that has been suspended as an enforcement action is not considered a possession-only license.

16. A reciprocal license is the general license authorized by R9-7-320. This license is subject to a special fee as provided by R9-7-1306(C) but is exempt from annual fees.

17. Reserved

18. An “unclassified” radioactive material license is one that authorizes radioisotopes, physical or chemical forms, possession limits, or uses not included in any other type of
license specified in this Section.

19. A NORM commercial disposal site license is one that authorizes the receipt of waste material contaminated with naturally occurring radioactive material from other licensees for permanent disposal, provided the concentration of the radioactive material does not exceed 74kBq (2,000 picocuries)/gram.

E. Category E registrations are those that register the possession of x-ray machine(s) under 9 A.A.C. 7, Article 2. The Department shall not combine category E registrations with any other registration.

1. An X-ray machine class A registration is one authorizing the possession of X-ray machines in a hospital or other facility offering inpatient care.
2. An X-ray machine class B registration is one authorizing the possession of X-ray machines in a medical, osteopathic, or chiropractic office or clinic not offering inpatient care; or the possession of X-ray machines in a school, college, university, or other teaching facility.
3. An X-ray machine class C registration is one authorizing the possession of X-ray machines in dental, podiatry, or veterinarian offices or clinics.
4. An industrial radiation machine registration is one authorizing the possession of X-ray machines, or the possession of particle accelerators not capable of producing a high radiation area, in a nonmedical facility.
5. An accelerator facility registration is one authorizing the possession and operation of one or more particle accelerators of any kind capable of accelerating any particle and producing a high radiation area.
6. An “other” ionizing radiation machine registration is one authorizing possession or use of an ionizing radiation machine not included in any other category specified in subsection (E).

F. Category F registrations are those that register non-ionizing radiation producing sources regulated under 9 A.A.C. 7, Article 14. The Department shall not combine category F registrations with any other registration categories that have a difference in fee per unit.

1. A tanning registration authorizes the commercial operation of one or more tanning booths, beds, cabinets, or other devices in a single establishment.
2. A Class A laser registration authorizes the operation of one to 10 laser devices subject to R9-7-1433.
3. A Class B laser registration authorizes the operation of 11 to 49 laser devices subject to R9-7-1433.
4. A Class C laser registration authorizes operation of 50 or more laser devices subject to R9-7-1433.
5. A laser light show or laser demonstration registration authorizes the operation of a laser device subject to R9-7-1441.
6. A medical laser registration authorizes the operation of one or more laser devices subject to R9-7-1440.
7. A Class II surgical device registration authorizes the operation of one or more Class II surgical devices subject to R9-7-1438. A device is designated as a Class II surgical device by the USFDA and is labeled as such by the manufacturer.
8. A cosmetic radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing cosmetic procedures.
9. A class A industrial radiofrequency device registration authorizes the operation of one to five radiofrequency devices.
10. A class B industrial radiofrequency device registration authorizes the operation of six to 20 radiofrequency devices.
11. A class C industrial radiofrequency device registration authorizes the operation more than 20 radiofrequency devices.
12. A medical radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing, non-cosmetic procedures.
13. An “other” non-ionizing radiation device registration authorizes the operation of a non-ionizing radiation device or other device not included in any other category specified in subsection (F).

ARTICLE 13. LICENSE AND REGISTRATION FEES

R9-7-1301. Definition
“Combined” means the Department has granted authorized activities contained in two or more license
types in a single license document, requiring the payment of a single license fee for the more expensive
license of the planned combination.

R9-7-1302. License and Registration Categories
A. Category A licenses are those specific licenses that authorize a school, college, university, or
other teaching facility to possess and use radioactive materials for instructional or research
purposes.
   1. A broad academic class A license is any category A license that meets the specifications
      of R9-7-310(A)(1).
   2. A broad academic class B license is any category A license other than a broad academic
      class A license that meets the specifications of R9-7-310(A)(2).
   3. A broad academic class C license is any category A license other than a broad academic
      class A or B license that meets the specifications of R9-7-310(A)(3).
   4. A limited academic license is any category A license that authorizes only those
      radioisotopes, forms, and quantities individually specified in the license.

B. Category B licenses are those specific or general licenses that authorize the application of
radioactive material or the radiation from it to a human being for medical diagnostic, therapeutic,
or research purposes, or the use of radioactive material in medical laboratory testing. Except for a
type B6, general medical license, the Department shall not combine a category B license with a
license of any other category.
   1. A broad medical license is any category B license that meets the specifications of
      R9-7-310(A)(1) and meets the requirements of 9 A.A.C. 7, Article 7. A broad medical
      license may authorize any medical use other than teletherapy.
   2. A medical materials class A license is any specific category B license other than a broad
      medical license, that authorizes the use of radiopharmaceuticals and sealed sources
      containing radioactive materials for a therapeutic purpose in quantities that require
      hospitalization of the patient for radiation safety purposes. The license may authorize
      other radioactive materials and other medical uses, except teletherapy.
   3. A medical materials class B license is any specific category B license that authorizes the
      diagnostic or therapeutic use, other than teletherapy, of radioactive materials only in
      limited quantities such that the patient need not be hospitalized for radiation safety
purposes.
4. A medical materials class C license is any specific category B license that authorizes possession of specified radioisotopes only in the form of sealed sources for treatment of the eye or skin or for use in diagnostic medical imaging devices.
5. A medical teletherapy license is a specific category B license that solely authorizes radioisotopes in the form of multi-curie sealed sources for use in external beam therapy. The Department shall not combine a medical teletherapy license with any other type of category B license.
6. A general medical license is one that authorizes the use of radioactive material pursuant to R9-7-306(D) or R9-7-306(E). A general medical license may be combined into a broad medical, medical materials class A, or medical materials class B license.

C. Category C licenses are those specific or general licenses that authorize the use of radioactive materials in any activity other than those authorized by a category A, B, or D license. Except as specifically authorized in this Section, the Department shall not combine a category C license with any other type of license.

1. A broad industrial class A license is any category C license that meets the specifications of R9-7-310(A)(1). The Department may combine a broad industrial class A license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
2. A broad industrial class B license is any category C license other than a broad industrial class A license that meets the specifications of R9-7-310(A)(2). The Department may combine a broad industrial class B license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
3. A broad industrial class C license is any category C license other than a broad industrial class A or B license that meets the specifications of R9-7-310(A)(3). The Department may combine a broad industrial class C license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
4. A limited industrial license is a specific category C license that authorizes the possession of the radioactive materials authorized in R9-7-305(A), or R9-7-306(A), (C), or (F) for uses authorized in those subsections, but in quantities greater than authorized by those subsections.
5. A portable gauge license is a specific category C license that authorizes radioactive materials in the form of sealed sources for use in measuring or gauging devices designed and manufactured to be transported to the location of use. The Department may combine a
portable gauge license with any broad scope industrial license or a fixed gauge class A license.

6. A fixed gauge class A license is a specific category C license that authorizes the possession of 50 or more measuring or gauging devices containing radioactive materials, where each device is permanently mounted for use at a single location.

7. A fixed gauge class B license is a specific category C license that authorizes the possession of 1 through 49 measuring or gauging devices containing radioactive materials, where each device is permanently mounted for use at a single location.

8. A leak detector license is a specific category C license that authorizes the use of radioisotopes in the form of a gas to test hermetic seals on electronic packages.

9. A gas chromatograph license is a specific category C license that authorizes the use of radioactive materials as ionization sources in gas chromatography or electron capture devices.

10. A general industrial license is one that authorizes the use of a material, source, or device generally licensed pursuant to R9-7-305 or R9-7-306, except R9-7-305(B), R9-7-306(D), or R9-7-306(E).

11. An industrial radiography class A license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources at specific facilities identified in the license conditions or at temporary field job sites.

12. An industrial radiography class B license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources only at specific facilities identified in the license conditions.

13. An open field irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources not permanently mounted within a shielding container, for irradiation of materials.

14. A self-shielded irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources for irradiation of materials in a shielding device from which the sources are not removed during irradiation. The Department may combine a self-shielded irradiator license with any broad license.

15. A well logging license is a specific category C license that authorizes the use of radioactive material in sealed or unsealed sources for wireline services or field tracer studies.

16. A research and development license is a specific category C license that authorizes a licensee to utilize radioactive material in unsealed and sealed form for industrial, scientific, or biomedical research, not including administration of radiation or radioactive material to
human beings.

17. A laboratory license is a specific category C license that authorizes a licensee to perform specific in-vitro or in-vivo medical or veterinary testing, while possessing quantities of radioactive material greater than the general license quantities authorized in R9-7-306.

D. Category D licenses are the following specific or general radioactive material licenses. Except for type D4, general industrial; type D5, depleted uranium; type D8 and D9, health physics; and type D14, additional facilities licenses, the Department shall not combine a category D license with any other license.

1. A distribution license is one that authorizes the commercial distribution of radioactive materials or radioisotopes in products to persons holding an appropriate general or specific license. The Department shall ensure that a distribution license does not:
   a. Authorize distribution of radiopharmaceuticals or distribution to persons exempt from regulatory control, or
   b. Authorize any other use of the radioactive material. An appropriate category C license is required for possession of radioisotopes and their incorporation into products.

2. A nuclear pharmacy license is one that authorizes the preparation, compounding, packaging, or dispensing of radiopharmaceuticals for use by other licensees.

3. A nuclear laundry license is one that authorizes the collection and cleaning of items contaminated with radioactive materials.

4. A general industrial gauging device license is one that authorizes the use of a gauging device in accordance with R9-7-306(A). The Department may combine a general industrial gauging device license with a class A, B, or C broad industrial, limited industrial, portable gauge, or class A or B fixed gauge license.

5. A general depleted uranium license is one that authorizes the use of the general license authorized pursuant to R9-7-305(C) or the use of depleted uranium as a concentrated mass or as shielding for another radiation source within a device or machine. The Department may combine a general depleted uranium license with a medical teletherapy; class A, B, or C broad industrial; portable gauge; class A or B fixed gauge; class A or B industrial radiography; or self-shielded irradiator license. For licensing purposes, an applicant shall follow the requirements in R9-7-305(C).

6. A veterinary medicine license is one that authorizes the use of radioactive materials for specific applications in veterinary medicine as authorized in the license.

7. A general veterinary medicine license is one that authorizes the use of the general license
authorized in R9-7-306(E) in veterinary medicine.

8. A health physics class A license is one that authorizes the use of radioactive materials for performing instrument calibrations, processing leak test or environmental samples, or providing radiation dosimetry services.

9. A health physics class B license is one that authorizes only the collection, possession, and transfer of radioactive materials in the form of leak test samples for processing by others.

10. A secondary uranium recovery license is one that authorizes the extraction of natural uranium or thorium from an ore stream or tailing that is being or has been processed primarily for the extraction of another mineral. The Department shall not combine a secondary uranium recovery license with any other license.

11. A low-level, radioactive waste disposal facility license is a license that is issued for a “disposal facility,” as that term is used in R9-7-439 and R9-7-442, that has a closure or long-term care plan and is constructed and operated according to the requirements in 10 CFR 61, revised January 1, 2015, incorporated by reference, available under R9-7-101 and containing no future editions or amendments.

12. A waste processor class A license is one that authorizes the incineration, compaction, repackaging, or any other treatment or processing of low-level radioactive waste prior to transfer to another person authorized to receive or dispose of the waste. The Department shall not combine a waste processor class A license with any other license.

13. A waste processor class B license is one that authorizes a waste broker to receive prepackaged, low-level radioactive waste from other licensees; combine the waste into shipments; and transfer the waste without treating or processing the waste in any manner and without repackaging except to place damaged or leaking packages into overpacks. The Department shall not combine a waste processor class B license with any other license.

14. An additional storage and use site license is an endorsement, by license condition to an existing specific license, authorizing one or more additional separate facilities where radioactive material may be stored or used for a period exceeding six months.

15. A possession-only license is a license of any other category that authorizes only the possession in storage, but no use of, the authorized materials. A license that has been suspended as an enforcement action is not considered a possession-only license.

16. A reciprocal license is the general license authorized by R9-7-320. This license is subject to a special fee as provided by R9-7-1306(C) but is exempt from annual fees.

17. Reserved
18. An “unclassified” radioactive material license is one that authorizes radioisotopes, physical or chemical forms, possession limits, or uses not included in any other type of license specified in this Section.

19. A NORM commercial disposal site license is one that authorizes the receipt of waste material contaminated with naturally occurring radioactive material from other licensees for permanent disposal, provided the concentration of the radioactive material does not exceed 74kBq (2,000 picocuries)/gram.

E. Category E registrations are those that register the possession of x-ray machine(s) under 9 A.A.C. 7, Article 2. The Department shall not combine category E registrations with any other registration.
   1. An X-ray machine class A registration is one authorizing the possession of X-ray machines in a hospital or other facility offering inpatient care.
   2. An X-ray machine class B registration is one authorizing the possession of X-ray machines in a medical, osteopathic, or chiropractic office or clinic not offering inpatient care; or the possession of X-ray machines in a school, college, university, or other teaching facility.
   3. An X-ray machine class C registration is one authorizing the possession of X-ray machines in dental, podiatry, or veterinarian offices or clinics.
   4. An industrial radiation machine registration is one authorizing the possession of X-ray machines, or the possession of particle accelerators not capable of producing a high radiation area, in a nonmedical facility.
   5. An accelerator facility registration is one authorizing the possession and operation of one or more particle accelerators of any kind capable of accelerating any particle and producing a high radiation area.
   6. An “other” ionizing radiation machine registration is one authorizing possession or use of an ionizing radiation machine not included in any other category specified in subsection (E).

F. Category F registrations are those that register non-ionizing radiation producing sources regulated under 9 A.A.C. 7, Article 14. The Department shall not combine category F registrations with any other registration categories that have a difference in fee per unit.
   1. A tanning registration authorizes the commercial operation of one or more tanning booths, beds, cabinets, or other devices in a single establishment.
   2. A Class A laser registration authorizes the operation of one to 10 laser devices subject to R9-7-1433.
   3. A Class B laser registration authorizes the operation of 11 to 49 laser devices subject to R9-7-1433.
   4. A Class C laser registration authorizes operation of 50 or more laser devices subject to
5. A laser light show or laser demonstration registration authorizes the operation of a laser device subject to R9-7-1441.

6. A medical laser registration authorizes the operation of one or more laser devices subject to R9-7-1440.

7. A Class II surgical device registration authorizes the operation of one or more Class II surgical devices subject to R9-7-1438. A device is designated as a Class II surgical device by the USFDA and is labeled as such by the manufacturer.

8. A cosmetic radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing cosmetic procedures.

9. A class A industrial radiofrequency device registration authorizes the operation of one to five radiofrequency devices.

10. A class B industrial radiofrequency device registration authorizes the operation of six to 20 radiofrequency devices.

11. A class C industrial radiofrequency device registration authorizes the operation more than 20 radiofrequency devices.

12. A medical radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing, non-cosmetic procedures.

13. An “other” non-ionizing radiation device registration authorizes the operation of a non-ionizing radiation device or other device not included in any other category specified in subsection (F).

R9-7-1303. Fee for Initial License and Initial Registration
An applicant shall remit for a new license or new registration the appropriate fee as prescribed in R9-7-1306 and Table 13.1. Table of Fees.

R9-7-1304. Annual Fees for Licenses and Registrations
A. Each license or registration issued by the Department shall identify the category by a letter and number corresponding to the appropriate subsection of R9-7-1302 or the category and type listed in Table 13.1. Table of Fees.

B. Except as specified in R9-7-1306(C), (D), and (E), each licensee or registrant shall submit payment of the annual fee in the amount prescribed in Table 13.1 Table of Fees on or before January 1 of each year. This single annual fee will cover any and all renewals, amendments, and regular inspections of the license during the forthcoming calendar year.
C. If a licensee or registrant fails to pay the annual fee by January 1, the license is not current.
D. If a licensee or registrant fails to pay the annual fee by April 1, the Department shall apply administrative sanction provisions of Article 12 of this Chapter.
E. A licensee who is required to pay an annual fee under this Article may qualify as a small entity and pay the reduced annual fee in Table 13.2 if the licensee has the following characteristics:
   1. For a business not engaged in manufacturing or a not-for-profit organization, having a three-year average of gross annual receipts of $6.5 million or less;
   2. For an entity engaged in manufacturing, having an annual average of no more than 500 employees;
   3. For a government jurisdiction, not including publicly supported educational institutions, having no more than 50,000 residents in the jurisdiction;
   4. For a publicly supported educational institution, having no more than 50,000 faculty, staff, and students; and
   5. For an educational institution that is not publicly supported, having no more than 500 faculty and staff.
F. A licensee who seeks to establish status as a small entity for the purpose of paying an annual fee in Table 13.2, rather than the annual fee in Table 13.1, shall file with the Department a certification statement annually on Department Form 333, accessed through the Department website at https://azdhs.gov/documents/licensing/radiation-regulatory/forms/ram-small-entity-form.pdf, for each license under which the licensee is billed.
G. If a licensee qualifies as a small entity and provides the Department with the certification required in subsection (F), the licensee may pay the applicable reduced annual fee shown in Table 13.2.

Small Entity Fees. Failure to file a small entity certification, according to subsection (F), in a timely manner may result in the licensee being required to pay the applicable fee in Table 13.1.

Table of Fees.
R9-7-1305. Method of Payment
A. An applicant licensee or registrant shall pay fees by check or money order, payable to the “State of Arizona” at the address shown on the application, license, registration, or renewal notice.
B. Once a license or registration has been issued, no portion of the application fee or any annual fee will be refunded.

R9-7-1306. Application Fees and Annual Fees
A. The application fee or annual fee for each category and type is shown in Table 13.1. Table of Fees.
B. The fee for a category D11 license, for a low-level radioactive waste disposal site, is $6,000,000 for years one through five. Based on data gathered during the first five years, the Department shall set a reasonable fee after consideration of the following factors:
   1. Unrecovered costs that the Department may charge under A.R.S. § 30-654(B)(18), and
   2. Actual costs incurred by the Department in regulating the licensee.

C. The fee for a category D16 license, providing reciprocal recognition under R9-7-320 of a radioactive materials license issued by the NRC or another Agreement state, is half of the annual fee for an Arizona license of the appropriate category and type. If there is no Arizona license of the appropriate category and type, the Department shall assess the “Full Cost” fee according to subsection (D) or (E), as applicable. The fee is due and payable at the time reciprocity is requested, and the general license does not become current until the fee is paid.

D. “Full Cost” for an application fee is based on professional personnel time for preparation, travel, onsite inspection, any reports, review of findings, and preparation of the license or registration or denial charged at $99 per hour and mileage charged at 44.5¢ per mile. The Department shall assess the licensee or registrant 90% of the estimated full cost of issuing the license or registration. The Department will assess for any remaining costs when it is prepared to issue the license, registration, denial, or if Department costs for the requested activity exceed $10,000.

E. “Full Cost” for an annual fee is based on professional personnel time for preparation, travel, onsite inspection, preparation of reports, review of findings, and preparation for any inspections or completion of any amendments to the license, registration or denials charged at $99 per hour and mileage charged at 44.5¢ per mile for the preceding 12 months.

R9-7-1308. Fee for Requested Inspections

A. A licensee or registrant may request an inspection of its facility at any time. The Department shall assess the licensee or registrant the full cost of the inspection, based on personnel time for preparation, travel, onsite inspection, review of findings, and preparation of a report, charged at $99 per hour and mileage charged at 44.5¢ per mile.

B. The fee specified in this Section does not apply to:
   1. Regular inspections as scheduled by the Department,
   2. Enforcement reinspections conducted to ensure the correction of violations or safety hazards, or
   3. Inspections requested by workers pursuant to R9-7-1007.

R9-7-1309. Abandonment of License or Registration Application
A. Any license or registration application for which the applicant has been provided a written notification of deficiencies in the application and for which the applicant does not make a written attempt to supply the requested information or request an extension in writing within 90 days of the date of the written notice of deficiencies, is considered abandoned and will not be processed.

B. If an applicant does not act in the time-frame specified in subsection (A), the applicant shall submit a new application with the appropriate fee.

| D9      | Health physics class B | $3,000 |
| D10     | Secondary uranium recovery | $8,000 |
| D11     | Low-level radioactive waste disposal facility | According to R9-7-1306(B) |
| D12     | Waste processor class A | $10,000 |
| D13     | Waste processor class B | $8,000 |
| D14     | Additional storage and use site | 30% of the applicable fee for each additional site |
| D15     | Possession-only | 50% of the applicable fee for the category under which storage will occur |
| D16     | Reciprocal | According to R9-7-1306(C) |
| D17     | Reserved | |
| D18     | Unclassified radioactive material | Full Cost, according to R9-7-1306(D) or (E) |
| D19     | NORM commercial disposal site | $600,000 |
| E1      | X-ray machine class A (per tube) | $195 |
| E2      | X-ray machine class B (per tube) | $145 |
| E3      | X-ray machine class C (per tube) | $95 |
| E4      | Industrial radiation machine (per device) | $95 |
| E5      | Accelerator facility | $2,500 |
| E6      | Other ionizing radiation machine | Full Cost, according to R9-7-1306(D) or (E) |
| F1      | Tanning device (per device) | $50 |
| F2      | Class A laser (1 to 10 laser devices) | $300 |
| F3      | Class B laser (11 to 49 laser devices) | $600 |
| F4      | Class C laser (50 or more laser devices) | $1,000 |
| F5      | Laser light show or laser demonstration | $500 |
| F6      | Medical laser (per laser device) | $100 |
| F7      | Class II surgical device (per device) | $100 |
| F8      | Cosmetic radiofrequency device (per device) | $100 |
| F9      | Class A industrial (1 to 5 radiofrequency devices) | $150 |
| F10     | Class B industrial (6 to 20 radiofrequency devices) | $350 |
| F11     | Class C industrial (more than 20 radiofrequency devices) | $600 |
| F12     | Medical radiofrequency (one or more device) | $100 |
| F13     | Other non-ionizing radiation device | Full Cost, according to R9-7-1306(D) or (E) |</p>

30-654. Powers and duties of the department

A. The department may:

1. Accept grants or other contributions from the federal government or other sources, public or private, to be used by the department to carry out any of the purposes of this chapter.

2. Do all things necessary, within the limitations of this chapter, to carry out the powers and duties of the department.

3. Conduct an information program, including:
   (a) Providing information on the control and regulation of sources of radiation and related health and safety matters, on request, to members of the legislature, the executive offices, state departments and agencies and county and municipal governments.
   (b) Providing such published information, audiovisual presentations, exhibits and speakers on the control and regulation of sources of radiation and related health and safety matters to the state’s educational system at all educational levels as may be arranged.
   (c) Furnishing to citizen groups, on request, speakers and such audiovisual presentations or published materials on the control and regulation of sources of radiation and related health and safety matters as may be available.
   (d) Conducting, sponsoring or cosponsoring and actively participating in the professional meetings, symposia, workshops, forums and other group informational activities concerned with the control and regulation of sources of radiation and related health and safety matters when representation from this state at such meetings is determined to be important by the department.

B. The department shall:

1. Regulate the use, storage and disposal of sources of radiation.

2. Establish procedures for purposes of selecting any proposed permanent disposal site located within this state for low-level radioactive waste.

3. Coordinate with the department of transportation and the corporation commission in regulating the transportation of sources of radiation.

4. Assume primary responsibility for and provide necessary technical assistance to handle any incidents, accidents and emergencies involving radiation or sources of radiation occurring within this state.

5. Adopt rules deemed necessary to administer this chapter in accordance with title 41, chapter 6.

6. Adopt uniform radiation protection and radiation dose standards to be as nearly as possible in conformity with, and in no case inconsistent with, the standards contained in the regulations of the United States nuclear regulatory commission and the standards of the United States public health service. In the adoption of the standards, the department shall consider the total occupational radiation exposure of individuals, including that from sources that are not regulated by the department.

7. Adopt rules for personnel monitoring under the close supervision of technically competent people in order to determine compliance with safety rules adopted under this chapter.

8. Adopt a uniform system of labels, signs and symbols and the posting of the labels, signs and symbols to be affixed to radioactive products, especially those transferred from person to person.

9. By rule, require adequate training and experience of persons using sources of radiation with respect to the hazards of excessive exposure to radiation in order to protect health and safety.

10. Adopt standards for the storage of radioactive material and for security against unauthorized removal.

11. Adopt standards for the disposal of radioactive materials into the air, water and sewers and burial in the soil in accordance with 10 Code of Federal Regulations part 20.
12. Adopt rules that are applicable to the shipment of radioactive materials in conformity with and compatible with those established by the United States nuclear regulatory commission, the department of transportation, the United States department of the treasury and the United States postal service.

13. In individual cases, impose additional requirements to protect health and safety or grant necessary exemptions that will not jeopardize health or safety, or both.

14. Make recommendations to the governor and furnish such technical advice as required on matters relating to the utilization and regulation of sources of radiation.

15. Conduct or cause to be conducted off-site radiological environmental monitoring of the air, water and soil surrounding any fixed nuclear facility, any uranium milling and tailing site and any uranium leaching operation, and maintain and report the data or results obtained by the monitoring as deemed appropriate by the department.

16. Develop and utilize information resources concerning radiation and radioactive sources.

17. Prescribe by rule a schedule of fees to be charged to categories of licensees and registrants of radiation sources, including academic, medical, industrial, waste, distribution and imaging categories. The fees shall cover a significant portion of the reasonable costs associated with processing the application for license or registration, renewal or amendment of the license or registration and the costs of inspecting the licensee or registrant activities and facilities, including the cost to the department of employing clerical help, consultants and persons possessing technical expertise and using analytical instrumentation and information processing systems.

18. Adopt rules establishing radiological standards, personnel standards and quality assurance programs to ensure the accuracy and safety of screening and diagnostic mammography.

C. The department shall deposit, pursuant to sections 35-146 and 35-147, the first $300,000 in fees collected each fiscal year pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the state general fund. The department shall deposit, pursuant to sections 35-146 and 35-147, ninety percent of the remaining monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the health services licensing fund established by section 36-414 and ten percent of the remaining monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the state general fund.

30-656. Authority for governor to enter into agreements with federal government; effect on federal licenses

A. The governor, on behalf of this state, may enter into agreements with the federal government providing for discontinuance of certain of the federal government's responsibilities with respect to sources of radiation and the assumption of the responsibilities by this state.

B. Any person that, on the effective date of an agreement entered into under subsection A of this section, possesses a license issued by the federal government shall be deemed to possess a like license issued under this chapter, which shall expire either ninety days after receipt from the department of a notice of expiration of the license or on the date of expiration specified in the federal license, whichever is earlier.

30-671. Radiation protection standards

A. Radiation protection standards in rules adopted by the department under this chapter do not limit the kind or amount of radiation that may be intentionally applied to a person or animal for diagnostic or therapeutic purposes by or under the direction of a licensed practitioner of the healing arts.

B. Radiation sources shall be registered, licensed or exempted at the discretion of the department.

30-672. Licensing and registration of sources of radiation; exemptions

A. The department by rule shall provide for general or specific licensing of by-product, source, special nuclear materials or devices or equipment using those materials. The department shall require from the applicant satisfactory evidence that the applicant is using methods and techniques that are demonstrated to be safe and that the applicant is familiar with the rules adopted by the department under section 30-654, subsection B, paragraph 5 relative to uniform radiation standards, total occupational radiation exposure norms, labels, signs
and symbols, storage, waste disposal and shipment of radioactive materials. The department may require that, before it issues a license, the employees or other personnel of an applicant who may deal with sources of radiation receive a course of instruction approved by the department concerning department rules. The department shall require that the applicant's proposed equipment and facilities be adequate to protect health and safety and that the applicant's proposed administrative controls over the use of the sources of radiation requested be adequate to protect health and safety.

B. The department may require registration or licensing of other sources of radiation if deemed necessary to protect public health or safety.

C. The department may exempt certain sources of radiation or kinds of uses or users from the licensing or registration requirements set forth in this section if it finds that exempting such sources of radiation or kinds of uses or users will not constitute a significant risk to the health and safety of the public.

D. The director may suspend or revoke, in whole or in part, any license issued under subsection A of this section if the licensee or an officer, agent or employee of the licensee:

1. Violates this chapter or rules of the department adopted pursuant to this chapter.

2. Has been, is or may continue to be in substantial violation of the requirements for licensure of the radiation source and as a result the health or safety of the general public is in immediate danger.

E. If the licensee, or an officer, agent or employee of the licensee, refuses to allow the department or its employees or agents to inspect the licensee's premises, such an action shall be deemed reasonable cause to believe that a substantial violation under subsection D, paragraph 2 of this section exists.

F. A license may not be suspended or revoked under this chapter without affording the licensee notice and an opportunity for a hearing as provided in title 41, chapter 6, article 10.

G. The department shall not require persons who are licensed in this state to practice as a dentist, physician assistant, chiropodist or veterinarian or licensed in this state to practice medicine, surgery, osteopathic medicine, chiropractic or naturopathic medicine to obtain any other license to use a diagnostic x-ray machine, but these persons are governed by their own licensing acts.

H. Persons who are licensed by the federal communications commission with respect to the activities for which they are licensed by that commission are exempt from this chapter.

I. Rules adopted pursuant to this chapter may provide for recognition of other state or federal licenses as the department deems desirable, subject to such registration requirements as the department prescribes.

J. Any licenses issued by the department shall state the nature, use and extent of use of the source of radiation. If at any time after a license is issued the licensee desires any change in the nature, use or extent, the licensee shall seek an amendment or a new license under this section.

K. The department shall prescribe by rule requirements for financial security as a condition for licensure under this article. The department shall deposit all amounts posted, paid or forfeited as financial security in the radiation regulatory and perpetual care fund established by section 30-694.

L. Persons applying for licensure shall provide notice to the city or town where the applicant proposes to operate as part of the application process.

M. Any facility that provides diagnostic or screening mammography examinations by or under the direction of a person who is exempt from further licensure under subsection G of this section shall obtain certification by the department. The department shall prescribe by rule the requirements of certification in order to ensure the accuracy and safety of diagnostic and screening mammography.

30-686. Appeal; hearing

A person who is denied licensure or registration under article 2 of this chapter or who is denied an exception from licensure or registration under article 2 of this chapter may appeal the denial by making a written request for a hearing pursuant to title 41, chapter 6, article 10. The department shall give notice of such an action pursuant to title 41, chapter 6, article 10, and the notice shall state the person’s right to make a written request for a hearing.
Adoption and text of compact

The southwestern low-level radioactive waste disposal compact is adopted and enacted into law as follows:

Article 1.

Compact Policy and Formation

The party states hereby find and declare all of the following:

(A) The United States Congress, by enacting the low-level radioactive waste policy act, Public Law 96-573, as amended by the low-level radioactive waste policy amendments act of 1985 (42 U.S.C. sec. 2021b to 2021j, incl.), has encouraged the use of interstate compacts to provide for the establishment and operation of facilities for regional management of low-level radioactive waste.

(B) It is the purpose of this compact to provide the means for such a cooperative effort between or among party states to protect the citizens of the states and the states' environments.

(C) It is the policy of party states to this compact to encourage the reduction of the volume of low-level radioactive waste requiring disposal within the compact region.

(D) It is the policy of the party states that the protection of the health and safety of their citizens and the most ecological and economical management of low-level radioactive wastes can be accomplished through cooperation of the states by minimizing the amount of handling and transportation required to dispose of these wastes and by providing facilities that serve the compact region.

(E) Each party state, if an agreement state pursuant to section 2021 of title 42 of the United States Code, or the nuclear regulatory commission if not an agreement state, is responsible for the primary regulation of radioactive materials within its jurisdiction.

Article 2.

Definitions

As used in this compact, unless the context clearly indicates otherwise, the following definitions apply:

(A) "Commission" means the southwestern low-level radioactive waste commission established in article 3 of this compact.

(B) "Compact region" or "region" means the combined geographical area within the boundaries of the party states.

(C) "Disposal" means the permanent isolation of low-level radioactive waste pursuant to requirements established by the nuclear regulatory commission and the environmental protection agency under applicable laws, or by a party state if that state hosts a disposal facility.

(D) "Generate," when used in relation to low-level radioactive waste, means to produce low-level radioactive waste.

(E) "Generator" means a person whose activity, excluding the management of low-level radioactive waste, results in the production of low-level radioactive waste.

(F) "Host county" means a county, or other similar political subdivision of a party state, in which a regional disposal facility is located or being developed.

(G) "Host state" means a party state in which a regional disposal facility is located or being developed. The state of California is the host state under this compact for the first thirty years from the date the California regional disposal facility commences operations.

(H) "Institutional control period" means that period of time in which the facility license is transferred to the disposal site owner in compliance with the appropriate regulations for long-term observation and maintenance following the postclosure period.

(I) "Low-level radioactive waste" means regulated radioactive material that meets all of the following requirements:
The waste is not high-level radioactive waste, spent nuclear fuel, or by-product material (as defined in section 11e(2) of the atomic energy act of 1954 (42 U.S.C. sec. 2014(e)(2))).

The waste is not uranium mining or mill tailings.

The waste is not any waste for which the federal government is responsible pursuant to subdivision (b) of section 3 of the low-level radioactive waste policy amendments act of 1985 (42 U.S.C. sec. 2021c(b)).

The waste is not an alpha emitting transuranic nuclide with a half-life greater than five years and with a concentration greater than one hundred nanocuries per gram, or plutonium-241 with a concentration greater than three thousand five hundred nanocuries per gram, or curium-242 with a concentration greater than twenty thousand nanocuries per gram.

"Management" means collection, consolidation, storage, packaging, or treatment.

"Major generator state" means a party state which generates ten per cent of the total amount of low-level radioactive waste produced within the compact region and disposed of at the regional disposal facility. If no party state other than California generates at least ten per cent of the total amount, "major generator state" means the party state which is second to California in the amount of waste produced within the compact region and disposed of at the regional disposal facility.

"Operator" means a person who operates a regional disposal facility.

"Party state" means any state that has become a party in accordance with article 7 of this compact.

"Person" means an individual, corporation, partnership, or other legal entity, whether public or private.

"Postclosure period" means that period of time after completion of closure of a disposal facility during which the licensee shall observe, monitor, and carry out necessary maintenance and repairs at the disposal facility to assure that the disposal facility will remain stable and will not need ongoing active maintenance. This period ends with the beginning of the institutional control period.

"Regional disposal facility" means a nonfederal low-level radioactive waste disposal facility established and operated under this compact.

"Site closure and stabilization" means the activities of the disposal facility operator taken at the end of the disposal facility's operating life to assure the continued protection of the public from any residual radioactive or other potential hazards present at the disposal facility.

"Transporter" means a person who transports low-level radioactive waste.

"Uranium mine and mill tailings" means waste resulting from mining and processing of ores containing uranium.

Article 3.

The Commission

There is hereby established the southwestern low-level radioactive waste commission.

(1) The commission shall consist of one voting member from each party state to be appointed by the governor, confirmed by the senate of that party state, and to serve at the pleasure of the governor of each party state, and one voting member from the host county. The appointing authority of each party state shall notify the commission in writing of the identity of the member and of any alternates. An alternate may act in the member's absence.

(2) The host state shall also appoint that number of additional voting members of the commission which is necessary for the host state's members to compose at least fifty-one per cent of the membership on the commission. The host state's additional members shall be appointed by the host state governor and confirmed by the host state senate. If there is more than one host state, only the state in which is located the regional disposal facility actively accepting low-level radioactive waste pursuant to this compact may appoint these additional members.

(3) If the host county has not been selected at the time the commission is appointed, the governor of the host state shall appoint an interim local government member, who shall be an elected representative of a local government of one of the party states.
government. After a host county is selected, the interim local government member shall resign and the governor shall appoint the host county member pursuant to paragraph (4).

(4) The governor shall appoint the host county member from a list of at least seven candidates compiled by the board of supervisors of the host county.

(5) In recommending and appointing the host county member pursuant to paragraph (4), the board of supervisors and the governor shall give first consideration to recommending and appointing the member of the board of supervisors in whose district the regional disposal facility is located or being developed. If the board of supervisors of the host county does not provide a list to the governor of at least seven candidates from which to choose, the governor shall appoint a resident of the host county as the host county member.

(6) The host county member is subject to confirmation by the senate of that party state and shall serve at the pleasure of the governor of the host state.

(B) The commission is a legal entity separate and distinct from the party states and shall be so liable for its actions. Members of the commission shall not be personally liable for actions taken in their official capacity. The liabilities of the commission shall not be deemed liabilities of the party states.

(C) The commission shall conduct its business affairs pursuant to the laws of the host state and disputes arising out of commission action shall be governed by the laws of the host state. The commission shall be located in the capital city of the host state in which the regional disposal facility is located.

(D) The commission's records shall be subject to the host state's public records law, and the meetings of the commission shall be open and public in accordance with the host state's open meeting law.

(E) The commission members are public officials of the appointing state and shall be subject to the conflict of interest laws, as well as any other law, of the appointing state. The commission members shall be compensated according to the appointing state's law.

(F) Each commission member is entitled to one vote. A majority of the commission constitutes a quorum. Unless otherwise provided in this compact, a majority of the total number of votes on the commission is necessary for the commission to take any action.

(G) The commission has all of the following duties and authority:

(1) The commission shall do, pursuant to the authority granted by this compact, whatever is reasonably necessary to ensure that low-level radioactive wastes are safely disposed of and managed within the region.

(2) The commission shall meet at least once a year and otherwise as business requires.

(3) The commission shall establish a compact surcharge to be imposed upon party state generators. The surcharge shall be based upon the cubic feet of low-level radioactive waste and the radioactivity of the low-level radioactive waste and shall be collected by the operator of the disposal facility. The host state shall set, and the commission shall impose, the surcharge after congressional approval of the compact. The amount of the surcharge shall be sufficient to establish and maintain at a reasonable level funds for all of the following purposes:

(a) The activities of the commission and commission staff.

(b) At the discretion of the host state, a third-party liability fund to provide compensation for injury to persons or property during the operational, closure, stabilization, and postclosure and institutional control periods of the regional disposal facility. This subparagraph does not limit the responsibility or liability of the operator, who shall comply with any federal or host state statutes or regulations regarding third-party liability claims.

(c) A local government reimbursement fund, for the purpose of reimbursing the local government entity or entities hosting the regional disposal facility for any costs or increased burdens on the local governmental entity for services, including, but not limited to, general fund expenses, the improvement and maintenance of roads and bridges, fire protection, law enforcement, monitoring by local health officials, and emergency preparation and response related to the hosting of the regional disposal facility.
(4) The surcharges imposed by the commission for purposes of subparagraphs (b) and (c) of paragraph (3) and surcharges pursuant to paragraph (3) of subdivision (E) of article 4 shall be transmitted on a monthly basis to the host state for distribution to the proper accounts.

(5) The commission shall establish a fiscal year which conforms to the fiscal years of the party states to the extent possible.

(6) The commission shall keep an accurate account of all receipts and disbursements. An annual audit of the books of the commission shall be conducted by an independent certified public accountant, and the audit report shall be made a part of the annual report of the commission.

(7) The commission shall prepare and include in the annual report a budget showing anticipated receipts and disbursements for the subsequent fiscal year.

(8) The commission may accept any grants, equipment, supplies, materials, or services, conditional or otherwise, from the federal or state government. The nature, amount and condition, if any, of any donation, grant, or other resources accepted pursuant to this paragraph and the identity of the donor or grantor shall be detailed in the annual report of the commission. However, the host state shall receive, for the uses specified in subparagraph (E) of paragraph (2) of subsection (d) of section 2021e of title 42 of the United States Code, any payments paid from the special escrow account for which the secretary of energy is trustee pursuant to subparagraph (A) of paragraph (2) of subsection (d) of section 2021e of title 42 of the United States Code.

(9) The commission shall submit communications to the governors and to the presiding officers of the legislatures of the party states regarding the activities of the commission, including an annual report to be submitted on or before January 15 of each year. The commission shall include in the annual report a review of, and recommendations for, low-level radioactive waste disposal methods which are alternative technologies to the shallow land burial of low-level radioactive waste.

(10) The commission shall assemble and make available to the party states, and to the public, information concerning low-level radioactive waste management needs, technologies, and problems.

(11) The commission shall keep a current inventory of all generators within the region, based upon information provided by the party states.

(12) The commission shall keep a current inventory of all regional disposal facilities, including information on the size, capacity, location, specific low-level radioactive wastes capable of being managed, and the projected useful life of each regional disposal facility.

(13) The commission may establish advisory committees for the purpose of advising the commission on the disposal and management of low-level radioactive waste.

(14) The commission may enter into contracts to carry out its duties and authority, subject to projected resources. No contract made by the commission shall bind a party state.

(15) The commission shall prepare contingency plans, with the cooperation and approval of the host state, for the disposal and management of low-level radioactive waste in the event that any regional disposal facility should be closed.

(16) The commission may sue and be sued and, when authorized by a majority vote of the members, may seek to intervene in an administrative or judicial proceeding related to this compact.

(17) The commission shall be managed by an appropriate staff, including an executive director. Notwithstanding any other provision of law, the commission may hire or retain, or both, legal counsel.

(18) The commission may, subject to applicable federal and state laws, recommend to the appropriate host state authority suitable land and rail transportation routes for low-level radioactive waste carriers.

(19) The commission may enter into an agreement to import low-level radioactive waste into the region only if both of the following requirements are met:

(a) The commission approves the importation agreement by a two-thirds vote of the commission.
(b) The commission and the host state assess the affected regional disposal facilities' capability to handle imported low-level radioactive wastes and any relevant environmental or economic factors, as defined by the host state's appropriate regulatory authorities.

(20) The commission may, upon petition, allow an individual generator, a group of generators, or the host state of the compact, to export low-level radioactive wastes to a low-level radioactive waste disposal facility located outside the region. The commission may approve the petition only by a two-thirds vote of the commission. The permission to export low-level radioactive wastes shall be effective for that period of time and for the amount of low-level radioactive waste, and subject to any other term or condition, which may be determined by the commission.

(21) The commission may approve, only by a two-thirds vote of the commission, the exportation outside the region of material, which otherwise meets the criteria of low-level radioactive waste, if the sole purpose of the exportation is to process the material for recycling.

(22) The commission shall, not later than ten years before the closure of the initial or subsequent regional disposal facility, prepare a plan for the establishment of the next regional disposal facility.

Article 4.

Rights, Responsibilities, and Obligations of Party States

(A) There shall be regional disposal facilities sufficient to dispose of the low-level radioactive waste generated within the region.

(B) Low-level radioactive waste generated within the region shall be disposed of at regional disposal facilities and each party state shall have access to any regional disposal facility without discrimination.

(C) (1) Upon the effective date of this compact, the state of California shall serve as the host state and shall comply with the requirements of subdivision (E) for at least thirty years from the date the regional disposal facility begins to accept low-level radioactive waste for disposal. The extension of the obligation and duration shall be at the option of the state of California. If the state of California does not extend this obligation, the party state, other than the state of California, which is the largest major generator state shall then serve as the host state for the second regional disposal facility. The obligation of a host state which hosts the second regional disposal facility shall also run for thirty years from the date the second regional disposal facility begins operations.

(2) The host state may close its regional disposal facility when necessary for public health or safety.

(D) The party states of this compact cannot be members of another regional low-level radioactive waste compact entered into pursuant to the low-level radioactive waste policy act, as amended by the low-level radioactive waste policy amendments act of 1985 (42 U.S.C. secs. 2021b to 2021j, incl.).

(E) A host state shall do all of the following:

(1) Cause a regional disposal facility to be developed on a timely basis.

(2) Ensure by law, consistent with any applicable federal laws, the protection and preservation of public health and safety in the siting, design, development, licensing, regulation, operation, closure, decommissioning, and long-term care of the regional disposal facilities within the state.

(3) Ensure that charges for disposal of low-level radioactive waste at the regional disposal facility are reasonably sufficient to do all of the following:

(a) Ensure the safe disposal of low-level radioactive waste and long-term care of the regional disposal facility.

(b) Pay for the cost of inspection, enforcement, and surveillance activities at the regional disposal facility.

(c) Assure that charges are assessed without discrimination as to the party state of origin.

(4) Submit an annual report to the commission on the status of the regional disposal facility including projections of the facility's anticipated future capacity.

(5) The host state and the operator shall notify the commission immediately upon the occurrence of any event which could cause a possible temporary or permanent closure of a regional disposal facility.
(F) Each party state is subject to the following duties and authority:

(1) To the extent authorized by federal law, each party state shall develop and enforce procedures requiring low-level radioactive waste shipments originating within its borders and destined for a regional disposal facility to conform to packaging and transportation requirements and regulations. These procedures shall include, but are not limited to, all of the following requirements:

(a) Periodic inspections of packaging and shipping practices.
(b) Periodic inspections of low-level radioactive waste containers while in the custody of transporters.
(c) Appropriate enforcement actions with respect to violations.

(2) A party state may impose a surcharge on the low-level radioactive waste generators within the state to pay for activities required by paragraph (1).

(3) To the extent authorized by federal law, each party state shall, after receiving notification from a host state that a person in a party state has violated packaging, shipping, or transportation requirements or regulations, take appropriate actions to ensure that these violations do not continue. Appropriate actions may include, but are not limited to, requiring that a bond be posted by the violator to pay the cost of repackaging at the regional disposal facility and prohibit future shipments to the regional disposal facility.

(4) Each party state shall maintain a registry of all generators within the state that may have low-level radioactive waste to be disposed of at a regional disposal facility, including, but not limited to, the amount of low-level radioactive waste and the class of low-level radioactive waste generated by each generator.

(5) Each party state shall encourage generators within its borders to minimize the volume of low-level radioactive waste requiring disposal.

(6) Each party state may rely on the good faith performance of the other party states to perform those acts which are required by this compact to provide regional disposal facilities, including the use of the regional disposal facilities in a manner consistent with this compact.

(7) Each party state shall provide the commission with any data and information necessary for the implementation of the commission's responsibilities, including taking those actions necessary to obtain this data or information.

(8) Each party state shall agree that only low-level radioactive waste generated within the jurisdiction of the party states shall be disposed of in the regional disposal facility, except as provided in paragraph (19) of subdivision (G) of article 3.

(9) Each party state shall agree that if there is any injury to persons or property resulting from the operation of a regional disposal facility, the damages resulting from the injury may be paid from the third-party liability fund pursuant to subparagraph (b) of paragraph (3) of subdivision (G) of article 3, only to the extent that the damages exceed the limits of liability insurance carried by the operator. No party state, by joining this compact, assumes any liability resulting from the siting, operation, maintenance, long-term care, or other activity relating to a regional facility, and no party state shall be liable for any harm or damage resulting from a regional facility not located within the state.

Article 5.
Approval of Regional Facilities

A regional disposal facility shall be approved by the host state in accordance with its laws. This compact does not confer any authority on the commission regarding the siting, design, development, licensure, or other regulation, or the operation, closure, decommissioning, or long-term care of, any regional disposal facility within a party state.

Article 6.
Prohibited Acts and Penalties

(A) No person shall dispose of low-level radioactive waste within the region unless the disposal is at a regional disposal facility, except as otherwise provided in paragraphs (20) and (21) of subdivision (G) of article 3.
(B) No person shall dispose of or manage any low-level radioactive waste within the region unless the low-level radioactive waste was generated within the region, except as provided in paragraphs (19), (20), and (21) of subdivision (G) of article 3.

(C) Violations of this section shall be reported to the appropriate law enforcement agency within the party state’s jurisdiction.

(D) Violations of this section may result in prohibiting the violator from disposing of low-level radioactive waste in the regional disposal facility, as determined by the commission or the host state.

Article 7.

Eligibility, Entry into Effect, Congressional Consent, Withdrawal, Exclusion

(A) The states of Arizona, North Dakota, South Dakota, and California are eligible to become parties to this compact. Any other state may be made eligible by a majority vote of the commission and ratification by the legislatures of all of the party states by statute, and upon compliance with those terms and conditions for eligibility which the host state may establish. The host state may establish all terms and conditions for the entry of any state, other than the states named in this subparagraph, as a member of this compact.

(B) Upon compliance with the other provisions of this compact, an eligible state may become a party state by legislative enactment of this compact or by executive order of the governor of the state adopting this compact. A state becoming a party state by executive order shall cease to be a party state upon adjournment of the first general session of its legislature convened after the executive order is issued, unless before the adjournment the legislature enacts this compact.

(C) A party state, other than the host state, may withdraw from the compact by repealing the enactment of this compact, but this withdrawal shall not become effective until two years after the effective date of the repealing legislation. If a party state which is a major generator of low-level radioactive waste voluntarily withdraws from the compact pursuant to this subdivision, that state shall make arrangements for the disposal of the other party states’ low-level radioactive waste for a time period equal the period of time it was a member of this compact. If the host state withdraws from the compact, the withdrawal shall not become effective until five years after the effective date of the repealing legislation.

(D) A party state may be excluded from this compact by a two-thirds vote of the commission members, acting in a meeting, if the state to be excluded has failed to carry out any obligations required by compact.

(E) This compact shall take effect upon the enactment by statute by the legislatures of the state of California and at least one other eligible state and upon the consent of Congress and shall remain in effect until otherwise provided by federal law. This compact is subject to review by Congress and the withdrawal of the consent of Congress every five years after its effective date, pursuant to federal law.

Article 8.

Construction and Severability

(A) The provisions of this compact shall be broadly construed to carry out the purposes of the compact, but the sovereign powers of a party state shall not be infringed unnecessarily.

(B) This compact does not affect any judicial proceeding pending on the effective date of this compact.

(C) If any provision of this compact or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the compact which can be given effect without the invalid provision or application, and to this end the provisions of this compact are severable.

(D) Nothing in this compact diminishes or otherwise impairs the jurisdiction, authority, or discretion of either of the following:

(1) The nuclear regulatory commission pursuant to the atomic energy act of 1954, as amended (42 U.S.C. sec. 2011 et seq.).

(E) Nothing in this compact confers any new authority on the states or commission to do any of the following:
(1) Regulate the packaging or transportation of low-level radioactive waste in a manner inconsistent with the regulations of the nuclear regulatory commission or the United States department of transportation.

(2) Regulate health, safety, or environmental hazards from source, by-product, or special nuclear material.

(3) Inspect the activities of licensees of the agreement states or of the nuclear regulatory commission.

36-136. **Powers and duties of director; compensation of personnel; rules; definitions**

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.
E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. Whenever in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for no longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.
(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fund-raising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for the preservation or storage of food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises.
and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparation of food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health
services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. For the purposes of this section:

1. "Cottage food product":
   a. Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.
   b. Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.
DEPARTMENT OF HEALTH SERVICES (Expeditied Rulemaking)
Title 9, Chapter 3

Amend: R9-3-101, R9-3-201, R9-3-202, R9-3-205, R9-3-301
MEETING DATE: July 6, 2022

TO: Members of the Governor’s Regulatory Review Council (Council)

FROM: Council Staff

DATE: June 13, 2022

SUBJECT: DEPARTMENT OF HEALTH SERVICES (Expedited Rulemaking)
Title 9, Chapter 3

Amend: R9-3-101, R9-3-201, R9-3-202, R9-3-205, R9-3-301

Summary:

This expedited rulemaking from the Department of Health Services (Department) seeks to amend five (5) rules in Title 9, Chapter 3, Articles 1-3 related to child care group homes. Specifically, the Department seeks to clarify requirements for personnel, volunteers, and others providing services for enrolled children who attend licensed child care group homes to ensure the health and safety of the enrolled children. To ensure that the Article 3 rules are not outdated, the Department states the amended rules will comply with Laws 2020, Ch. 86 and the Child Care and Development Block Grant Act of 2014 (P.L. 113-186) by specifying all child care personnel and volunteers shall have both a valid fingerprint clearance card issued and a background check conducted pursuant to P.L. 113-186 before starting employment or volunteer work. The Department indicates the current Article 3 rules contain requirements for fingerprint checks and state criminal registry verification. To ensure consistency and compliance with the P.L. 113-186, the Department plans to add requirements for background check verification that includes: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry.
1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

Pursuant to A.R.S. § 41-1027(A), an agency may only conduct an expedited rulemaking if the rulemaking “does not increase the cost of regulatory compliance, increase a fee or reduce procedural rights of persons regulated...” and meets one of several other criteria. The Department indicates that the following rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of persons regulated. Furthermore, the Department indicates that the rulemaking provides a public benefit, amends rules made obsolete by legislative action, and is expected to increase the quality of health and safety for children attending licensed child care group homes. As such, the Department indicates that the rulemaking complies with criteria for expedited rulemaking under A.R.S. § 41-1027(A)(4) and (6).

However, Council staff expressed concern that adding requirements for additional background check verification that includes the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry, may increase the cost of regulatory compliance to parties regulated by these rules. Council staff raised these concerns with the Department. In response, the Department stated,

[T]he Department does not expect the changes made to the rules to include a background check will increase a cost for a licensee or child care personnel; rather any increase cost related to obtaining a background check is the result of changes made by SB 1504 and the State’s receipt of Block Grant funds. A State that receives funds pursuant to the Block Grant shall require and conduct a criminal background check for child care personnel (including prospective child care staff members) that includes an FBI fingerprint check using the Integrated Fingerprint Identification System. Arizona is receiving Block Grant funds and thus is required to have background checks. See P.L. 113-186 § 658H. Accordingly, the rules simply codify something the State is already required to do. Notwithstanding the foregoing, the Department is currently working with DES, Department of Public Safety (DPS), and Department of Child Safety (DCS) to eliminate duplication of efforts and to ensure that child care personnel and volunteers required to obtain both FPCC and background check documentation do not incur any additional cost.

Additionally, the Department stated,

The Department does not expect the amended rules to increase costs for licensees, child care personnel, or volunteers since no fees/costs have been added or changed. The Department has considered that child care personnel and volunteers may incur a minimal cost for time taken to apply online for a background check. Many occupations require various certifications and considered a requirement necessary to ensure employment in a profession of one’s choice; the cost is cost
created by one’s choice. The Department expects the benefit of having amended child care rules that significantly increase the health and safety of Arizona children is greater than the cost of these rulemakings.

In light of the Department’s response, Council staff is still concerned that the proposed amendments in this rulemaking increase the cost of regulatory compliance, making this rulemaking ineligible for expedited rulemaking pursuant to A.R.S. § 41-1027(A). Council staff encourages the Council to discuss further with the Department whether this rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A).

2. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   The Department cites both general and specific statutory authority for these rules.

3. **Do the rules establish a new fee or contain a fee increase?**

   This rulemaking does not establish a new fee or contain a fee increase.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

   The Department indicates it did not receive public or stakeholder comments related to this rulemaking.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

   The Department indicates there were no changes to the rules between the Notice of Proposed Expedited Rulemaking published in the Administrative Register and the Notice of Final Expedited Rulemaking now before the Council.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

   The Department indicates A.R.S. § 46-811 provides the Department authority to require background checks for staff members and volunteers specified in the Child Care and Development Block Grant Act of 2014 (P. L. 113 – 186). The Department in this rulemaking adds background checks consistent with P. L. 113 – 186. The Department states it is not aware of any other federal laws applicable to the subject of this rulemaking.

7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**
Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(11), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

The Department, pursuant to A.R.S. § 36-882, is required to provide licensure for child care group homes and, pursuant to A.R.S. § 36-888, the Department retains the authority to deny, revoke, or suspend an applicant or a child care group home licensee’s ability to operate. The Department indicates it does not use a general permit. The Department states that under A.R.S. § 41-1037(A)(3) that a general permit is not applicable.

8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department did not review or rely on any study in conducting this rulemaking.

9. **Conclusion**

This expedited rulemaking from the Department of Health Services (Department) seeks to amend five (5) rules in Title 9, Chapter 3, Articles 1-3 related to child care group homes by adding requirements for background check verification that includes: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry. The Department seeks to clarify requirements for personnel, volunteers, and others providing services for enrolled children who attend licensed child care group homes to ensure the health and safety of the enrolled children.

Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on filing with the Secretary of State.

As outlined above, Council staff is concerned that adding requirements for additional background check verification that includes the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry, may increase the cost of regulatory compliance to parties regulated by these rules. Council staff encourages the Council to discuss further with the Department whether this rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A).

Nicole Sornsin, Chair
Governor’s Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 3, Expedited Rulemaking

Dear Ms. Sornsin:

1. The close of record date: January 20, 2022

2. Explanation of how the expedited rule meets the criteria in A.R.S. § 41-1027(A):
The rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of persons regulated. The rulemaking adopts requirements implementing Laws 2020, Ch. 86 and amends an outdated rule. The rulemaking provides a public benefit, amends rules made obsolete by legislative action, and is expected to increase the quality of health and safety for children attending licensed child care group homes. The rulemaking complies with criteria for expedited rulemaking under A.R.S. § 41-1027(A)(4) and (A)(6).

3. Whether the rulemaking relates to a five-year-review report and, if applicable, the date the report was approved by the Council:
The changes being made by the rulemaking are not related to a five-year-review report approved by the Council.

The Department certifies that the Preamble of this rulemaking discloses a reference to any study relevant to the rule that the Department reviewed and either did or did not rely on in its evaluation of or justification for the rule.

4. A list of all items enclosed:
a. Notice of Final Expedited Rulemaking, including the Preamble, Table of Contents, and text of the rule, and
b. Statutory authority

Douglas A. Ducey | Governor
Don Herrington | Interim Director
The Department's point of contact for questions about the rulemaking documents is Teresa Koehler at Teresa.Koehler@azdhs.gov.

NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 9. HEALTH SERVICES
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES -
CHILD CARE GROUP HOMES

PREAMBLE

1. **Article, Part, or Section Affected (as applicable)** | **Rulemaking Action**
   - R9-3-101.                         Amend
   - R9-3-201.                         Amend
   - R9-3-202.                         Amend
   - R9-3-205.                         Amend
   - R9-3-301.                         Amend

2. **Citations to the agency’s statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):**
   - Authorizing statutes: A.R.S. §§ 36-132(A)(1) and 36-136(G)
   - Implementing statutes: A.R.S. §§ 36-897.01 through 36-897.13 and 46-811

3. **The effective date of the rules:**
   - The rule is effective the day the Notice of Final Expedited Rulemaking is filed with the Office of the Secretary of State.

4. **Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the proposed expedited rule:**
   - Notice of Rulemaking Docket Opening: 26 A.A.R. 2809, October 30, 2020
   - Notice of Rulemaking Docket Opening: 27 A.A.R. 2535, October 29, 2021

5. **The agency's contact person who can answer questions about the rulemaking:**
   - **Name:** Thomas Salow, Branch Chief
   - **Address:** Arizona Department of Health Services
     Division of Licensing Services
     150 N. 18th Ave., Suite 400
     Phoenix, AZ  85007
   - **Telephone:** (602) 364-1935
   - **Fax:** (602) 364-4808
   - **E-mail:** Thomas.Salow@azdhs.gov
   - or
Name: Robert Lane, Chief
Address: Arizona Department of Health Services
         Office of Administrative Counsel and Rules
         150 N. 18th Ave., Suite 200
         Phoenix, AZ 85007
Telephone: (602) 542-1020
Fax: (602) 364-1150
E-mail: Robert.Lane@azdhs.gov

6. **An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, under A.R.S § 41-1027, to include an explanation about the rulemaking:**

   The Department licenses child care group homes under Arizona Revised Statutes (A.R.S.) Title 36, Chapter 7.1, Article 3, and has adopted rules for child care group homes in Arizona Administrative Code Title 9, Chapter 3. The Department in this expedited rulemaking clarifies requirements for personnel, volunteers, and others providing services for enrolled children who attend licensed child care group homes to ensure the health and safety of the enrolled children. To ensure that the Article 3 rules are not outdated, the amended rules will comply with Laws 2020, Ch. 86 and the Child Care and Development Block Grant Act of 2014 (P.L. 113-186) by specifying all child care personnel and volunteers shall have both a valid fingerprint clearance card issued and a background check conducted pursuant to P.L. 113-186 before starting employment or volunteer work. The current Article 3 rules contain requirements for fingerprint checks and state criminal registry verification. To ensure consistency and compliance with the P.L. 113-186, the Department plans to add requirements for background check verification that includes: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry. Amending Article 3 will make the rules consistent with A.R.S. § 46-811, eliminate confusion related to child care fingerprinting and background check requirements, and ensure the health and safety for enrolled children attending a child care group homes. The proposed amendments will conform to rulemaking format and style requirements of the Governor’s Regulatory Review Council and the Office of the Secretary of State.

7. **A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

   The Department did not review or rely on any study for this rulemaking.
8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state.
Not applicable

9. A summary of the economic, small business, and consumer impact:
Under A.R.S. § 41-1055(D)(2), the Department is not required to provide an economic, small business, and consumer impact statement.

10. A description of any changes between the proposed expedited rulemaking, including supplemental notices, and the final expedited rulemaking:
Between the proposed expedited rulemaking and the final expedited rulemaking, no changes were made to the rulemaking.

11. Agency's summary of the pubic or stakeholder comments or objections made about the rulemaking and the agency response to the comments:
No comments were received about this rulemaking.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:
There are no other matters prescribed by statutes applicable specifically to the Department or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:
The Department pursuant to A.R.S. § 36-882 is required to provide licensure for child care group homes and pursuant to A.R.S. § 36-888, the Department retains the authority to deny, revoke, or suspend an applicant or a child care group home licensee’s ability to operate. The Department does not use a general permit. The Department believes that under A.R.S. § 41-1037(A)(3) that a general permit is not applicable.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:
A.R.S. § 46-811 provides the Department authority to require background checks for staff members and volunteers specified in the Child Care and Development Block Grant Act of 2014 (P. L. 113 – 186). The Department in this rulemaking adds background checks consistent with P. L. 113 – 186. The Department is not aware of any other federal laws applicable to the subject of this Article 1 and Article 2 rulemaking.
c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:

No business competitiveness analysis was received.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable

14. Whether the rule was previously made, amended, or repealed as an emergency rules. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

The rule was not previously made as an emergency rule.

15. The full text of the rule follows:

CHILD CARE GROUP HOMES

Sections
R9-3-101. Definitions
R9-3-201. Application for a Certification
R9-3-202. Fingerprinting and Central Registry Requirements
R9-3-205. Changes Affecting a Certificate
R9-3-301. Certificate Holder and Provider Responsibilities
R9-3-101. Definitions

In addition to the definitions in A.R.S. § 36-897 and unless the context indicates otherwise, the following definitions apply in this Chapter:

1. “Abuse” has the meaning in A.R.S. § 8-201.
2. “Accident” means an unexpected occurrence that:
   a. Causes physical injury to an enrolled child, and
   b. May or may not be an emergency.
3. “Accredited” means approved by the:
   a. New England, Commission of Institution of Higher Education
   b. Middle States, Commission of Higher Education
   c. North Central, the Higher Learning Commission
   d. Northwest Association of Schools and Colleges,
   e. Commission on Colleges, or
   f. Western Association of Colleges and Schools.
4. “Activity” means an action planned by a certificate holder or staff member and performed by an enrolled child while supervised by a staff member.
5. “Adaptive device” means equipment used to augment an individual’s use of the individual’s arms, legs, sight, hearing, or other physical part or function.
6. “Adult” means an individual 18 years of age or older.
7. “Age-appropriate” means consistent with a child’s age and age-related stage of physical growth and mental development.
8. “Applicant” means an individual or business organization requesting one of the following:
   a. A certificate under R9-3-201, or
   b. Approval of a change affecting a certificate under R9-3-205.
9. “Application” means the documents that an applicant is required to submit to the Department to request a certificate or approval of a request for a change affecting a certificate.
10. “Background check certification” means results identified in searches according to A.R.S. § 46-811(A) and consistent with the Child Care and Development Block Grant Act of 2014 (Public Law 113-186):
    1. The state sex offender registry within this state and each state where a staff member resided during the preceding five years;
The state-based child abuse and neglect registries and databases within this state and each state where a staff member resided during the preceding five years;

The National Crime Information Center; and

“Business organization” has the same meaning as “entity” in A.R.S. § 10-140.

“Calendar day” means each day, not including the day of the act, event, or default from which a designated period of time begins to run, but including the last day of the period unless it is a Saturday, Sunday, or legal holiday, in which case the period runs until the end of the next day that is not a Saturday, Sunday, or legal holiday.

“Capacity” means the maximum number of enrolled children authorized by the Department to be present at a child care group home during hours of operation.

“Certificate holder” means a person to whom the Department has issued a certificate.

“Change in ownership” means a transfer of controlling legal or controlling equitable interest and authority in the operation of a child care group home.

“Child” means any individual younger than 13 years of age.

“Child care experience” means an individual’s documented work with children in:

a. A child care facility or a child care group home that was licensed, certified, or approved by a state in the United States or by one of the Uniformed Services of the United States;

b. A public school, a charter school, a private school, or an accommodation school; or

c. A public or private educational institution authorized under the laws of another state where instruction was provided for any grade or combination of grades between pre-kindergarten and grade 12.

“Child care services” means the range of activities and programs provided by a certificate holder to an enrolled child, including personal care, supervision, education, guidance, and transportation.

“Child with special needs” means:

a. A child with a documented diagnosis from a physician, physician assistant, or registered nurse practitioner of a physical or mental condition that substantially limits the child in providing self-care or performing manual tasks or any other major life function such as walking, seeing, hearing, speaking, breathing, or learning;
b. A child with a “developmental disability” as defined in A.R.S. § 36-551; or
c. A “child with a disability” as defined in A.R.S. § 15-761.

19. “Clean” means:
   a. To remove dirt or debris by methods such as washing with soap and water, vacuuming, wiping, dusting, or sweeping; or
   b. Free of dirt and debris.

20. “Communicable disease” has the meaning in A.A.C. R9-6-101.

21. “Compensation” means money or other consideration, including goods, services, vouchers, time, government or public expenditures, government or public funding, or another benefit, that is received as payment.

22. “Controlling person” has the meaning in A.R.S. § 36-881.

23. “Corporal punishment” means any physical act used to discipline a child that inflicts pain to the body of the child, or that may result in physical injury to the child.

25. “Credit hour” means an academic unit earned through an accredited college or university for completing the equivalent of one hour of class time each week during a semester or equivalent shorter course term, as designated by the accredited college or university.

26. “Designated agent” means an individual who is authorized by an applicant or certificate holder to receive communications from the Department, including legal service of process, and to file or sign documents on behalf of the applicant or certificate holder.

27. “Developmentally appropriate” means consistent with a child’s physical, emotional, social, cultural, and cognitive development, based on the child’s age and family background and the child’s personality, learning style, and pattern and timing of growth.

28. “Discipline” means the on-going process of helping a child develop self-control and assume responsibility for the child’s own actions.

29. “Documentation” means information in written, photographic, electronic, or other permanent form.

30. “Emergency” means a potentially life-threatening occurrence involving an enrolled child or staff member that requires an immediate response or medical treatment.

31. “Endanger” means to expose an individual to a situation where physical or mental injury to the individual may occur.

32. “Enrolled child” means a child:
   a. Who is not a resident; and
b. Who has been placed by a parent or guardian to receive child care services regardless of payment.

33. “Fall zone” means the surface under and around a piece of equipment onto which a child falling from or exiting from the equipment would be expected to land.

34. “Field trip” means travel for a specific activity to a location away from an area of the child care group home approved for providing child care services.

35. “Food” means a raw, cooked, or processed edible substance or ingredient, including a beverage, used or intended for use in whole or in part for human consumption.

36. “Guidance” means the ongoing direction, counseling, teaching, or modeling of generally accepted social behavior through which a child learns to develop and maintain the self-control, self-reliance, and self-esteem necessary to assume responsibilities, make daily living decisions, and live according to generally accepted social behavior.

37. “Hazard” means a source of endangerment.

38. “High school equivalency diploma” means:
   a. A document issued by the Arizona State Board of Education under A.R.S. § 15-702 to an individual who passes a general educational development test or meets the requirements of A.R.S. § 15-702(B);
   b. A document issued by another state to an individual who passes a general educational development test or meets the requirements of a state statute equivalent to A.R.S. § 15-702(B); or
   c. A document issued by another country to an individual who has completed that country’s equivalent of a 12th grade education, as determined by the Department based upon information obtained from American or foreign consulates or embassies or other governmental entities.

39. “Hours of operation” means the specific days of the week and time period during a day when a certificate holder provides child care services on a regular basis.

40. “Illness” means physical manifestation or signs of sickness such as pain, vomiting, rash, fever, discharge, or diarrhea.

41. “Immediate” or “Immediately” means without restriction, delay, or hesitation.

42. “Inaccessible” means:
   a. Out of an enrolled child’s reach, or
   b. Locked.

43. “Individual plan” means a written description of the daily activities required for an enrolled child with special needs.
“Infant” means a child 12 months of age or younger.

“Infestation” means the presence of lice, pinworms, scabies, or other parasites.

“Licensed applicator” means an individual who complies with A.A.C. R3-8-201(C).

“Mat” means a foam pad that has a waterproof cover.

“Mechanical restraint” means a device, article, or garment attached or adjacent to a child’s body that the child cannot easily remove and that restricts the child’s freedom of movement or normal access to the child’s body, but does not include a device, article, or garment:

   a. Used for orthopedic purposes, or
   b. Necessary to allow a child to heal from a medical condition.

“Medication” means a substance prescribed by a physician, physician assistant, or registered nurse practitioner or that is available without a prescription for the treatment or prevention of illness or infestation.

“Menu” means a written description of food that a child care group home provides and serves as a meal or snack.

“Modification” means the substantial improvement, enlargement, reduction, alternation, or other substantial change in the facility or another structure on the premises at a child care group home.

“Motor vehicle” has the meaning in A.R.S. § 28-101.

“Neglect” has the meaning in A.R.S. § 8-201.

“Outbreak” has the meaning in A.A.C. R9-6-101.

“Parent” means:

   a. A natural or adoptive mother or father,
   b. A legal guardian appointed by a court of competent jurisdiction, or
   c. A “custodian” as defined in A.R.S. § 8-201.

“Perishable food” means food that becomes unfit for human consumption if not stored to prevent spoilage.

“Person” has the meaning in A.R.S. § 1-215.

“Personal items” means those articles of property that belong to an enrolled child and are brought to the child care group home for that enrolled child’s exclusive use, such as clothing, a blanket, a sheet, a toothbrush, a pacifier, a hairbrush, a comb, a washcloth, or a towel.

“Physician” means an individual licensed as a doctor of:

   a. Allopathic medicine under A.R.S. Title 32, Chapter 13;
b. Naturopathic medicine under A.R.S. Title 32, Chapter 14;
c. Osteopathic medicine under A.R.S. Title 32, Chapter 17;
d. Homeopathic medicine under A.R.S. Title 32, Chapter 29; or
e. Allopathic, naturopathic, osteopathic, or homeopathic medicine under the laws of another state.

60-61. “Physician assistant” means:
a. The same as in A.R.S. § 32-2501, or
b. An individual licensed as a physician assistant under the laws of another state.

61-62. “Positioning device” means a belt or harness that prevents an enrolled infant’s movement.

62-63. “Premises” means a child care group home’s residence and the surrounding property, including any structures on the property, that can be enclosed by a single unbroken boundary line that does not encompass property owned or leased by another person.

63-64. “Registered nurse practitioner” means:
a. The same as in A.R.S. § 32-1601, or
b. An individual licensed as a registered nurse practitioner under the laws of another state.

64-65. “Regular basis” means at recurring, fixed, or uniform intervals.

65-66. “Residence” means a dwelling, such as a house, used for human habitation.

66-67. “Resident” means an individual who receives child care services and uses a child care group home as the individual’s principal place of habitation for 30 calendar days or more during the calendar year.

67-68. “Sanitize” means to use heat, a chemical agent, or a germicidal solution to disinfect and reduce pathogen counts, including bacteria, viruses, mold, and fungi.

68-69. “School-age child” means a child who attends:
a. A public school, as defined for “school” in A.R.S. § 15-101; or

69-70. “Separate” means to exclude a child from and have the child physically move away from other children, while keeping the child under supervision.

70-71. “Signed” means affixed with an individual’s signature or, if the individual is unable to write the individual’s name, with a symbol representing the individual’s signature.

71-72. “Sippy cup” means a lidded drinking container that is designed to be leak-proof or leak-resistant and from which a child drinks through a spout or straw.

72-73. “Space utilization” means the designated use of specific areas on the premises for
providing child care services.

73.74. “Staff member” means an individual who works at a child care group home providing child care services, regardless of whether compensation is received by the individual in return for providing child care services, and includes a provider.

74.75. “Supervision” means:

a. For a child who is awake, knowledge of and accountability for the actions and whereabouts of the child, including the ability to see or hear the child at all times, to interact with the child, and to provide guidance to the child;

b. For a child who is asleep, knowledge of and accountability for the actions and whereabouts of the child, including the ability to see or hear the child at all times and to respond to the child;

c. For a staff member who is not an adult, knowledge of and accountability for the actions and whereabouts of the staff member and the ability to interact with and provide guidance to the staff member; or

d. For an individual other than a child or staff member, knowledge of and accountability for the actions and whereabouts of the individual, including the ability to see and hear the individual when the individual is in the presence of an enrolled child and the ability to intervene in the individual’s actions to prevent harm to enrolled children.

75.76. “Swimming pool” has the meaning in A.A.C. R18-5-201.

76.77. “Training” means instruction received through:

a. Completion of a live or computerized conference, seminar, lecture, workshop, class, or course; or

b. Watching a video presentation.

77.78. “Week” means a seven-day period beginning on Sunday at 12:00 a.m. and ending on Saturday at 11:59 p.m.

78.79. “Working day” means the period between 8:00 a.m. and 5:00 p.m. on a Monday, Tuesday, Wednesday, Thursday, or Friday that is not a state holiday.

ARTICLE 2. CERTIFICATION

R9-3-201. Application for a Certificate

An applicant for a certificate shall:

1. Be at least 21 years of age, and

2. Submit to the Department an application packet containing:

a. An application on a form provided by the Department that contains:
i. The applicant’s name and date of birth;
ii. The name to be used for the child care group home, if any;
iii. The address and telephone number of the residence;
iv. The mailing address of the applicant, if different from the address of the residence;
v. The applicant’s contact telephone number, if different from the telephone number of the residence;
vi. The applicant’s e-mail address, if applicable;
vii. The name of the provider, if different from the applicant;
viii. The requested capacity for the child care group home;
ix. The anticipated hours of operation for the child care group home;
x. Whether the applicant agrees to allow the Department to submit supplemental requests for information;
xii. Whether the applicant or any controlling person has been denied a certificate or license to operate a child care group home or child care facility in this state or another state or has had a certificate or license to operate a child care group home or child care facility revoked in this state or another state and, if so:
   (1) The name of the individual who had the certificate or license denied or revoked,
   (2) The reason for the denial or revocation,
   (3) The date of the denial or revocation, and
   (4) The name and address of the certifying or licensing agency that denied or revoked the certificate or license;
xiii. A statement that the applicant has read and will comply with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;
xiv. A statement that the applicant has sufficient financial resources to comply with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;
xv. A statement that the information provided in the application packet is accurate and complete; and
xvi. The applicant’s signature and date the applicant signed the application;
b. A copy of the applicant’s:
i. U.S. passport,
ii. Birth certificate,
iii. Naturalization documents, or
iv. Documentation of legal resident alien status;
c. A copy of the applicant’s valid fingerprint clearance card issued, both front and back, according to A.R.S. Title 41, Chapter 12, Article 3.1;
d. A copy of the applicant’s valid background check document according to A.R.S. § 46-811(A);
d-e. A copy of the form required in A.R.S. § 36-897.03(B) for the applicant;
e-f. A document issued by the Department showing that the applicant has completed Department-provided orientation training that included the Department’s role in certifying and regulating child care group homes under A.R.S. Title 36, Chapter 7.1, Article 4, and this Chapter;
f-g. A floor plan of the residence where child care services will be provided, showing:
i. The location and dimensions of each room in the residence, with designation of the rooms to be used for providing child care services;
ii. The location of each exit from the residence;
iii. The location of each sink and toilet available for use by enrolled children;
iv. The location of each smoke detector in the residence; and
v. The location of each fire extinguisher in the residence;
e-h. A site plan of the premises showing:
i. The location and dimensions of the outdoor activity area;
ii. The height of the fence around the outdoor activity area;
iii. The location of each exit from the outdoor activity area;
iv. The location of the residence;
v. The location of each swimming pool, if applicable;
vi. The location and height of the fence around each swimming pool, if applicable; and
vii. The location and dimensions of any other building or structure on the premises, if applicable;
h-i. If the child care group home is located within one-fourth of a mile of agricultural land:
i. The names and addresses of the owners or lessees of each parcel of agricultural land located within one-fourth mile of the child care group home, and

ii. A copy of an agreement complying with A.R.S. § 36-897.01(B) for each parcel of agricultural land;

i+j. The applicable fee in R9-3-203; and

j+k. If the applicant is a business organization, a form provided by the Department that contains:

i. The name, street address, city, state, and zip code of the business organization;

ii. The type of business organization;

iii. The name, date of birth, title, street address, city, state, and zip code of the designated agent;

iv. The name, date of birth, title, street address, city, state, and zip code of each other controlling person;

v. A copy of the business organization’s articles of incorporation, articles of organization, partnership documents, or joint venture documents, if applicable; and

vi. Documentation of good standing issued by the Arizona Corporation Commission and dated no earlier than three months before the date of the application, if applicable.

R9-3-202. Fingerprinting and Central Registry Requirements

A. A certificate holder shall ensure that:

1. A staff member completes, signs, dates, and submits to the certificate holder before the staff member’s starting date of employment or volunteer service:
   a. The form required in A.R.S. § 36-897.03(B); and
   b. If required by A.R.S. § 8-804, the form in A.R.S. § 8-804(I); and

2. An adult resident completes, signs, dates, and submits to the certificate holder before the resident’s starting date of residency or the date of certification of the child care group home the form required in A.R.S. § 36-897.03(B).

B. A certificate holder shall maintain documentation of a valid fingerprint clearance card issued under A.R.S. § 41-1758.03 and documentation of a valid background check document issued under A.R.S. § 46-811.
C. Except as provided in A.R.S. § 41-1758.03, a certificate holder shall ensure that a staff member or adult resident submits a copy of:

1. A valid fingerprint clearance card, front and back, issued under A.R.S. Title 41, Chapter 12, Article 3.1; or

2. The fingerprint clearance card application that was submitted to the Department of Public Safety under A.R.S. § 41-1758.02:
   a. For the staff member, within seven working days after the staff member’s starting date of employment or volunteer service; and
   b. For the adult resident, within seven working days after before the resident’s starting date of residency or the date of certification of the child care group home.

Except as provided in A.R.S. § 41-1758.03, a certificate holder shall ensure that a staff member before starting date of employment or volunteer service and an adult resident before starting date of residency or the date of certification of the child care group homes, submits a copy of a valid fingerprint clearance card, front and back, issued under A.R.S. Title 41, Chapter 12, Article 3.1.

D. A certificate holder shall ensure that each individual who is a staff member or an adult resident submits to the certificate holder a copy of the individual’s valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed, a valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed every six years.

E. If a staff member or resident possesses a fingerprint clearance card that was issued before the staff member or resident became a staff member or resident at the child care group home, a certificate holder shall:

1. Contact the Department of Public Safety within seven working days after before the individual becomes a staff member or resident to determine whether the fingerprint clearance card is valid; and

2. Document this determination, including the name of the staff member or resident, the date of contact with the Department of Public Safety, and whether the fingerprint clearance card is valid.

F. A certificate holder shall ensure each staff member and each adult resident submits to the certificate holder documentation of the staff member’s or adult resident’s valid:

1. Background check issued under A.R.S. § 46-811(A) within 10 calendar days after stating date of employment or volunteer service; and

2. Background check each time the background check document is issued or renewed every five years.
If required by A.R.S. § 8-804, before an individual’s starting date of employment or volunteer service, a certificate holder shall comply with the submission requirements in A.R.S. § 8-804(C) for the individual.

A certificate holder shall not allow an adult individual to be a staff member or a resident if the individual:

1. Has been denied a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1, and has not received an interim approval under A.R.S. § 41-619.55;
2. Has been denied a background check document that indicates the adult individual is not eligible for employment due to violations identified pursuant to A.R.S. § 46-811;
3-4. Receives an interim approval under A.R.S. § 41-619.55 but is subsequently denied a good cause exception under A.R.S. § 41-619.55 and a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1;
3. Is a parent or guardian of a child adjudicated to be a dependent child as defined in A.R.S. § 8-201;
4. Has been denied a certificate to operate a child care group home or a license to operate a child care facility for the care of children in this state or another state;
5-6. Has had a license to operate a child care facility or certificate to operate a child care group home in this state or another state revoked for reasons related to the endangerment of the health and safety of children;
6-7. If applicable, has stated on the form required in A.R.S. § 8-804(I) that the individual is currently under investigation for an allegation of abuse or neglect or has a substantiated allegation of abuse or neglect and has not subsequently received a central registry exception according to A.R.S. § 41-619.57; or
7. If applicable, is disqualified from employment or volunteer service as a staff member according to A.R.S. § 8-804 and has not subsequently received a central registry exception according to A.R.S. § 41-619.57.

Within 30 calendar days after the day of a staff member’s or adult resident’s 18th birthday, the staff member or adult resident shall provide to the certificate holder copies of a valid fingerprint clearance card and a valid background check document specified in subsection (C).

Beginning November 1, 2021, certificate holders, staff members, and adult residents shall comply with A.R.S. § 46-811(A) and subsection (C)(2) by November 1, 2022.

Changes Affecting a Certificate

For an intended change in a certificate holder’s name or the name of a child care group home:

1. The certificate holder shall send the Department written notice of the name change at
least 30 calendar days before the intended date of the name change; and

2. Upon receipt of the written notice required in subsection (A)(1), the Department shall issue an amended certificate that incorporates the name change but retains the anniversary date of the certificate.

B. At least 30 calendar days before the date of an intended change in a child care group home’s space utilization or capacity, a certificate holder shall submit to the Department a written request for approval of the intended change that includes:

1. The certificate holder’s name;
2. The child care group home’s name, if applicable;
3. The name, telephone number, e-mail address, and fax number of a point of contact for the request;
4. The child care group home’s certificate number;
5. The type of change intended:
   a. Space utilization, or
   b. Capacity;
6. A narrative description of the intended change; and
7. The following additional information, as applicable:
   a. If requesting a change in capacity, the square footage of the outdoor activity area and the square footage of the indoor areas where child care services will be provided;
   b. If requesting a change that involves a modification of the residence that requires a building permit, a copy of the building permit;
   c. If requesting a change in space utilization that affects individual rooms:
      i. A floor plan of the residence that complies with R9-3-201(2)(f) and shows the intended changes, and
      ii. The square footage of each affected room; and
   d. If requesting a change in space utilization that affects the outdoor activity area:
      i. A site plan of the premises that complies with R9-3-201(2)(g) and shows the intended changes, and
      ii. The square footage of the intended outdoor activity area.

C. The Department shall review a request submitted under subsection (B) according to R9-3-102. If the intended change is in compliance with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter, the Department shall send the certificate holder an approval of the request and, if
necessary, an amended certificate that incorporates the change but retains the anniversary date of the current certificate.

D. A certificate holder shall not implement any change in subsection (B) until the Department issues an approval or amended certificate.

E. At least 30 calendar days before the date of a change in ownership:
   1. A certificate holder shall send the Department written notice of the change in ownership; and
   2. A person planning to assume operation of a child care group home shall obtain a new certificate as specified in R9-3-201 before beginning operation of the child care group home.

F. A certificate holder changing a child care group home’s location shall:
   1. Apply for a new certificate as prescribed in R9-3-201, and
   2. Obtain a new certificate from the Department before beginning operation of the child care group home at the new location.

G. Within 30 calendar days after the date of a change in the business organization information provided under R9-3-201(2)(j)R9-3-201(2)(k), other than a change in ownership, a certificate holder that is a business organization shall send the Department written notice of the change.

ARTICLE 3. OPERATING A CHILD CARE GROUP HOME

R9-3-301. Certificate Holder and Provider Responsibilities

A. A certificate holder shall:
   1. Designate a provider who:
      a. Lives in the residence;
      b. Is 21 years of age or older;
      c. Has a high school diploma, high school equivalency diploma, associate degree, or bachelor degree;
      d. Meets one of the following:
         i. Has completed at least three credit hours in child growth and development, nutrition, psychology, or early childhood education;
         ii. Has completed at least 60 hours of training in child growth and development, nutrition, psychology, early childhood education, or management of a child care business; or
         iii. Has at least 12 months of child care experience; and
e. Has completed Department-provided orientation training that includes the Department's role in certifying and regulating child care group homes under A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;

2. Ensure that each staff member is 16 years of age or older;

3. Ensure that each resident 12 years of age or older and each staff member submits, on or before the starting date of residency, employment, or volunteer services, one of the following as evidence of freedom from infectious active tuberculosis:
   a. Documentation of a negative Mantoux skin test or other tuberculosis screening test recommended by the U.S. Centers for Disease Control and Prevention, administered within 12 months before the starting date of residency, employment, or volunteer service, that includes the date and the type of tuberculosis screening test; or
   b. If the resident or staff member has had a positive Mantoux skin test or other tuberculosis screening test, a written statement that the resident or staff member is free from infectious active tuberculosis that is signed and dated by a physician, physician assistant, or registered nurse practitioner within six months before the starting date of residency, employment, or volunteer service; and

4. Ensure that the provider:
   a. Supervises or assigns an adult staff member to supervise each staff member who is not an adult;
   b. Maintains on the premises a file for each staff member, for 12 months after the date the staff member last worked at the child care group home, containing:
      i. The staff member’s name, date of birth, home address, and telephone number;
      ii. The staff member’s starting date of employment or volunteer service;
      iii. The staff member’s ending date of employment or volunteer service, if applicable;
      iv. The staff member’s written statement attesting to current immunity against measles, rubella, diphtheria, mumps, and pertussis;
      v. The form required in A.R.S. § 36-897.03(B);
      vi. For an adult staff member, a copy of the staff member’s valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1;
      vii. Documents required by subsection (A)(3);
      viii. Documentation of the requirements in A.R.S. § 36-897.03(C);
ix. If applicable:
   (1) The form required in A.R.S. § 8-804(I);
   (2) Documentation of the submission required in A.R.S. § 8-804(C) and the information received as a result of the submission; and
   (3) Documentation of the completion of the Department-provided orientation training specified in subsection (A)(1)(e), if applicable;

x. Documentation of the training required in R9-3-302; and

xi. Documentation of a high school diploma, high school equivalency diploma, associate degree, or bachelor degree, if applicable;

c. Maintains on the premises a file for each resident, for 12 months after the date the resident last resided at the child care group home, containing:
   i. The resident’s name and date of birth;
   ii. The resident’s relationship to the provider;
   iii. The date the resident began residing at the child care group home;
   iv. The date the resident last resided at the child care group home, if applicable;
   v. A written statement by the resident or, if the resident is a minor, the provider attesting to the resident’s current immunity against measles, rubella, diphtheria, mumps, and pertussis;
   vi. If the resident is an adult, the form required in A.R.S. § 36-897.03(B);
   vii. If the resident is an adult, the documents required by R9-3-202(C)(2) or R9-3-202(D); and
   viii. If the resident is 12 years of age or older, the documents required by subsection (A)(3);

d. Prepares a dated attendance record for each day and ensures that each staff member records on the attendance record the staff member’s start time and end time of providing child care services for the child care group home;

e. Maintains on the premises the dated attendance record required in subsection (A)(4)(d) for 12 months after the date on the attendance record;

f. Except as specified in R9-3-408, provides child care services only in areas:
   i. Designated as provided in R9-3-201(2)(f)(i) or R9-3-201(2)(g)(i) R9-3-201(2)(g)(i) or R9-3-201(2)(g)(i), or
   ii. Approved under R9-3-205(C);
g. Does not engage in outside employment during hours of operation or operate another business at or out of the residence during hours of operation;

h. Does not allow another staff member to engage in or operate another business at or out of the residence during the staff member’s assigned work hours at the child care group home;

i. Does not allow the operation of another business on the premises during hours of operation unless the operation of the business does not involve persons coming onto the premises during hours of operation because of the business; and

j. Does not allow the cultivation of medical marijuana on the premises.

B. A certificate holder shall ensure that all of the records required to be maintained by this Chapter either are written in English or, if written in a language other than English, include an English translation.

C. A certificate holder shall:

1. Secure and maintain general liability insurance of at least $100,000 for the child care group home; and

2. Maintain on the premises documentation of the insurance coverage required in subsection (C)(1).

D. A certificate holder shall ensure that:

1. While acting on behalf of the certificate holder when the provider is not present at the child care group home, an adult staff member with a high school diploma or high school equivalency certificate and one of the following is on the premises:
   a. At least six months of child care experience;
   b. Two or more credit hours in child growth and development, nutrition, psychology, or early childhood education; or
   c. At least 30 hours of training in child growth and development, nutrition, psychology, or early childhood education; and

2. At least one adult staff member, in addition to the provider or the staff member specified in subsection (D)(1), is on the premises when six or more enrolled children are at the child care group home.

E. A certificate holder shall ensure that a parent, an individual designated in writing by the parent, or legal guardian of an enrolled child is allowed immediate access during hours of operation to the areas of the premises where the enrolled child is receiving child care services.

F. A certificate holder shall:

1. Prepare a document that includes the following information:
a. The name and contact telephone number of the provider;
b. The hours of operation of the child care group home;
c. Charges, fees, and payment requirements for child care services;
d. Whether medications are administered at the child care group home and, if so, a description of what the parent is required to give to the child care group home;
e. Whether enrolled children go on field trips under the supervision of a staff member;
f. Whether the child care group home provides transportation for enrolled children to or from school, a school bus stop, or other locations;
g. The mechanism by which a staff member will verify that an individual contacting the child care group home by telephone claiming to be the parent of an enrolled child is the enrolled child’s parent;
h. A statement that a parent has access to the areas on the premises where the parent’s enrolled child is receiving child care services;
i. A statement that inspection reports for the child care group home are available for review at the child care group home; and
j. The local address and contact telephone number for the Department; and

2. Ensure that a staff member provides the document required in subsection (F)(1) to a parent of an enrolled child.

G. A certificate holder shall ensure that a staff member posts in a place that can be conspicuously viewed by individuals entering or leaving the child care group home:
1. The child care group home certificate;
2. The name of the provider;
3. The name of the staff member designated to act on behalf of the certificate holder when the provider is not present at the child care group home;
4. The hours of operation for the child care group home;
5. The weekly activity schedule required in R9-3-401(B)(4)(b);
6. The amount of time in minutes enrolled children may watch television, videos, or DVDs at the child care group home; and
7. The weekly menu, required in R9-3-406(F), before the first meal or snack of the week.

H. A certificate holder shall ensure that a staff member supervises any individual who is not a staff member and is on the premises where enrolled children are present.
I. A certificate holder shall ensure that a staff member who has current training in first aid and CPR is present during hours of operation when an enrolled child is on the premises or on a trip away from the premises under the supervision of a staff member.

J. A certificate holder shall ensure that if a staff member or resident lacks documentation of immunization or evidence of immunity that complies with A.A.C. R9-6-704 for a communicable disease listed in A.A.C. R9-6-702:
1. The staff member or resident is excluded from the child care group home between the start and end of an outbreak of the communicable disease at the child care group home, or
2. The child care group home is closed until the end of an outbreak at the child care group home.

K. Within 72 hours after changing a provider, a certificate holder shall send the Department written notice of the change, including the name of the new provider.

L. Except as provided in subsections (M) and (N), a certificate holder shall notify the Department in writing of a planned change in a child care group home’s hours of operation at least three calendar days before the date of the planned change, including:
1. The certificate holder's name;
2. The child care group home's certificate number; and
3. The current and intended hours of operation.

M. A certificate holder is not required to notify the Department of a change in a child care group home’s hours of operation when the change in the child care group home’s hours of operation is due to the occurrence of a state or federal holiday on a day of the week the child care group home regularly provides child care services.

N. When the premises of a child care group home are left unoccupied during hours of operation or the child care group home is temporarily closed due to an unexpected event, a certificate holder shall ensure that a staff member notifies the Department before leaving the child care group home unoccupied or closing the child care group home, stating the period of time during which the child care group home will be unoccupied or closed.
GRRC E-mail received June 14, 2022:

[1] How does this not increase the costs of regulatory compliance as stated in A.R.S. § 41-1027(A)?

SB 1504 (Fifty-Fourth Legislature, Second Regular Session) updated fingerprinting requirements for individuals that work with vulnerable populations, such as children. Specifically, SB 1504 added a requirement that child care personnel shall have a valid fingerprint clearance card (FPCC) pursuant to A.R.S. § 41-1758.07 before starting employment or volunteer work. Additionally, SB 1504 authorizes the Department of Economic Security (DES) and the Department of Health Services (DHS) to require background checks pursuant to the Child Care and Development Block Grant Act of 2014 (P.L. 113-186) (Block Grant) that are not included in the FPCC process under A.R.S. § 41-1758.07. The Department does not expect the rule changes related to when a licensee receives a valid FPCC to increase costs for a licensee and child care personnel since the rules do not add or change a fee, and the fee for obtaining a valid FPCC is established and required by the Department of Public Safety who issues FPCCs. Additionally, the Department does not expect the changes made to the rules to include a background check will increase a cost for a licensee or child care personnel; rather any increase cost related to obtaining a background check is the result of changes made by SB 1504 and the State’s receipt of Block Grant funds. A State that receives funds pursuant to the Block Grant shall require and conduct a criminal background check for child care personnel (including prospective child care staff members) that includes an FBI fingerprint check using the Integrated Fingerprint Identification System. Arizona is receiving Block Grant funds and thus is required to have background checks. See P.L. 113-186 § 658H. Accordingly, the rules simply codify something the State is already required to do. Notwithstanding the foregoing, the Department is currently working with DES, Department of Public Safety (DPS), and Department of Child Safety (DCS) to eliminate duplication of efforts and to ensure that child care personnel and volunteers required to obtain both FPCC and background check documentation do not incur any additional cost.

[2] How does this new requirement compare the current requirements found in Title 9, Chapter 3, Article 3 and Title 9, Chapter 5, Article 5

As stated, SB 1504 added a requirement that child care personnel and volunteers shall have and provide a valid FPCC to a licensee before starting employment or volunteer work. Additionally, SB 1504 allows DES and the Department to require that child care personnel and volunteers provide documentation of a valid background check consistent with requirement specified in the Block Grant.

To implement statutes, in the Chapter 3 rules, the Department:

- Adds a definition for “background check certification”;
- Adds a requirement for “documentation of a valid background check”;
- Adds a requirement for a “valid FPCC be provided to a certificate holder before starting date of residency or child care group home employment or volunteer work;
- Removes the requirement for staff members and adult residents to provide a copy of a FPCC application within seven working days after starting date of employment or volunteer work; and
- Amends requirements for a certificate holder to maintain and verify a valid FPCC to include a valid background check.

1 A.R.S. §§ 36-883.02 and 36-897.03 “child care personnel, including volunteers...shall have a valid fingerprint clearance cards issued pursuant...”

2 Background checks: state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry.
Similarly, in the Chapter 5 rules, the Department:

- Adds a definition for “background check certification”;
- Adds a requirement for “documentation of a valid background check”;
- Adds a requirement for a “valid FPCC be provided to a certificate holder before starting date of residency or child care group home employment or volunteer work;
- Removes requirements for staff members and adult residents to provide a copy of a FPCC application within seven working days after starting date of employment or volunteer work; and
- Amends requirements for a licensee to maintain and verify a valid FPCC to include a valid background check.

In addition to the above, the rules were amended, as necessary, to account for changes to Section titles and the renumbering of subsections and citations. The Department does not expect the amended rules to increase costs for licensees, child care personnel, or volunteers since no fees/costs have been added or changed. The Department has considered that child care personnel and volunteers may incur a minimal cost for time taken to apply online for a background check. Many occupations require various certifications and considered a requirement necessary to ensure employment in a profession of one’s choice; the cost is cost created by one’s choice. The Department expects the benefit of having amended child care rules that significantly increase the health and safety of Arizona children is greater than the cost of these rulemakings.
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

Editor’s Note: New 9 A.A.C. 3 made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1).

Editor’s Note: Chapter heading changed to “Expired” (Supp. 02-2).

ARTICLE 1. GENERAL

Article 1, consisting of R9-3-101 through R9-3-103, made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1).

Article 1, consisting of Section R9-3-101, expired on June 30, 1999 under A.R.S. § 41-1056(E) upon receipt of notice from the Governor’s Regulatory Review Council (Supp. 99-3).

Article 1, consisting of Section R9-3-101, adopted effective October 22, 1992 (Supp. 92-2).

Article 1, consisting of Section R9-3-101, adopted by emergency action effective June 16, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2).

R9-3-101. Definitions
In addition to the definitions in A.R.S. § 36-897 and unless the context indicates otherwise, the following definitions apply in this chapter:

1. “Abuse” has the meaning in A.R.S. § 8-201.
2. “Accident” means an unexpected occurrence that:
   a. Causes physical injury to an enrolled child, and
   b. May or may not be an emergency.
3. “Accredited” means approved by the:
   a. New England, Commission of Institution of Higher Education
   b. Middle States, Commission of Higher Education
   c. North Central, the Higher Learning Commission
   d. Northwest Association of Schools and Colleges
   e. Commission on Colleges, or
   f. Western Association of Colleges and Schools.
4. “Activity” means an action planned by a certificate holder or staff member and performed by an enrolled child while supervised by a staff member.
5. “Adaptive device” means equipment used to augment an individual’s use of the individual’s arms, legs, sight, hearing, or other physical part or function.
6. “Adult” means an individual 18 years of age or older.
7. “Age-appropriate” means consistent with a child’s age and age-related stage of physical growth and mental development.
8. “Applicant” means an individual or business organization requesting one of the following:
   a. A certificate under R9-3-201, or
   b. Approval of a change affecting a certificate under R9-3-205.
9. “Application” means the documents that an applicant is required to submit to the Department to request a certificate or approval of a request for a change affecting a certificate.
10. “Business organization” has the same meaning as “entity” in A.R.S. § 10-140.
11. “Calendar day” means each day, not including the day of the act, event, or default from which a designated period of time begins to run, but including the last day of the period unless it is a Saturday, Sunday, or legal holiday, in which case the period runs until the end of the next day that is not a Saturday, Sunday, or legal holiday.
12. “Capacity” means the maximum number of enrolled children authorized by the Department to be present at a child care group home during hours of operation.
13. “Certificate holder” means a person to whom the Department has issued a certificate.
14. “Change in ownership” means a transfer of controlling legal or controlling equitable interest and authority in the operation of a child care group home.
15. “Child” means any individual younger than 13 years of age.
16. “Child care experience” means an individual’s documented work with children in:
   a. A child care facility or a child care group home that was licensed, certified, or approved by a state in the United States or by one of the Uniformed Services of the United States;
   b. A public school, a charter school, a private school, or an accommodation school; or
   c. A public or private educational institution authorized under the laws of another state where instruction was provided for any grade or combination of grades between pre-kindergarten and grade 12.
17. “Child care services” means the range of activities and programs provided by a certificate holder to an enrolled child, including personal care, supervision, education, guidance, and transportation.
18. “Child with special needs” means:
   a. A child with a documented diagnosis from a physician, physician assistant, or registered nurse practitioner of a physical or mental condition that substantially limits the child in providing self-care or performing manual tasks or any other major life function such as walking, seeing, hearing, speaking, breathing, or learning;
   b. A child with a “developmental disability” as defined in A.R.S. § 36-551; or
   c. A “child with a disability” as defined in A.R.S. § 15-761.
19. “Clean” means:
   a. To remove dirt or debris by methods such as washing with soap and water, vacuuming, wiping, dusting, or sweeping; or
   b. Free of dirt and debris.
20. “Communicable disease” has the meaning in A.A.C. R9-6-101.
21. “Compensation” means money or other consideration, including goods, services, vouchers, time, government or public expenditures, government or public funding, or another benefit, that is received as payment.
22. “Controlling person” has the meaning in A.R.S. § 36-881.
23. “Corporal punishment” means any physical act used to discipline a child that inflicts pain to the body of the child, or that may result in physical injury to the child.
25. “Credit hour” means an academic unit earned through an accredited college or university for completing the equivalent of one hour of class time each week during a semester or equivalent shorter course term, as designated by the accredited college or university.
26. “Designated agent” means an individual who is authorized by an applicant or certificate holder to receive communications from the Department, including legal service of process, and to file or sign documents on behalf of the applicant or certificate holder.
27. “Developmentally appropriate” means consistent with a child’s physical, emotional, social, cultural, and cognitive development, based on the child’s age and family background and the child’s personality, learning style, and pattern and timing of growth.
28. “Discipline” means the on-going process of helping a child develop self-control and assume responsibility for the child’s own actions.
29. “Documentation” means information in written, photographic, electronic, or other permanent form.
30. “Emergency” means a potentially life-threatening occurrence involving an enrolled child or staff member that requires an immediate response or medical treatment.
31. “Endanger” means to expose an individual to a situation where physical or mental injury to the individual may occur.
32. “Enrolled child” means a child:
   a. Who is not a resident; and
   b. Who has been placed by a parent or guardian, to receive child care services regardless of payment.
33. “Fall zone” means the surface under and around a piece of equipment onto which a child falling from or exiting from the equipment would be expected to land.
34. “Field trip” means travel for a specific activity to a location away from an area of the child care group home approved for providing child care services.
35. “Food” means a raw, cooked, or processed edible substance or ingredient, including a beverage, used or intended for use in whole or in part for human consumption.
36. “Guidance” means the ongoing direction, counseling, teaching, or modeling of generally accepted social behavior through which a child learns to develop and maintain the self-control, self-reliance, and self-esteem necessary to assume responsibilities, make daily living decisions, and live according to generally accepted social behavior.
37. “High school equivalency diploma” means:
   a. A document issued by the Arizona State Board of Education under A.R.S. § 15-702 to an individual who passes a general educational development test or meets the requirements of A.R.S. § 15-702(B);
   b. A document issued by another state to an individual who passes a general educational development test or meets the requirements of a state statute equivalent to A.R.S. § 15-702(B); or
   c. A document issued by another country to an individual who has completed that country’s equivalent of a 12th grade education, as determined by the Department based upon information obtained from American or foreign consulates or embassies or other governmental entities.
38. “Hours of operation” means the specific days of the week and time period during a day when a certificate holder provides child care services on a regular basis.
39. “Illness” means physical manifestation or signs of sickness such as pain, vomiting, rash, fever, discharge, or diarrhea.
40. “Immediate” or “Immediately” means without restriction, delay, or hesitation.
41. “Inaccessible” means:
   a. Out of an enrolled child’s reach, or
   b. Locked.
42. “Individual plan” means a written description of the daily activities required for an enrolled child with special needs.
43. “Infant” means a child 12 months of age or younger.
44. “Infestation” means the presence of lice, pinworms, scabies, or other parasites.
45. “Licensed applicator” means an individual who complies with A.A.C. R3-8-201(C).
46. “Mat” means a foam pad that has a waterproof cover.
47. “Mechanical restraint” means a device, article, or garment attached or adjacent to a child’s body that the child cannot easily remove and that restricts the child’s freedom of movement or normal access to the child’s body, but does not include a device, article, or garment:
   a. Used for orthopedic purposes, or
   b. Necessary to allow a child to heal from a medical condition.
48. “Medication” means a substance prescribed by a physician, physician assistant, or registered nurse practitioner or that is available without a prescription for the treatment or prevention of illness or infestation.
49. “Menu” means a written description of food that a child care group home provides and serves as a meal or snack.
50. “Modification” means the substantial improvement, enlargement, reduction, alternation, or other substantial change in the facility or another structure on the premises at a child care group home.
51. “Motor vehicle” has the meaning in A.R.S. § 28-101.
52. “Neglect” has the meaning in A.R.S. § 8-201.
53. “Outbreak” has the meaning in A.A.C. R9-6-101.
54. “Parent” means:
   a. A natural or adoptive mother or father,
   b. A legal guardian appointed by a court of competent jurisdiction, or
   c. A “custodian” as defined in A.R.S. § 8-201.
55. “Personal items” means those articles of property that belong to an enrolled child and are brought to the child care group home for that enrolled child’s exclusive use, such as clothing, a blanket, a sheet, a toothbrush, a pacifier, a hairbrush, a comb, a washcloth, or a towel.
56. “Physician” means a physician licensed as a doctor of:
   a. Allopathic medicine under A.R.S. Title 32, Chapter 13;
   b. Naturopathic medicine under A.R.S. Title 32, Chapter 14;
   c. Osteopathic medicine under A.R.S. Title 32, Chapter 17;
   d. Homeopathic medicine under A.R.S. Title 32, Chapter 29; or
   e. Allopathic, naturopathic, osteopathic, or homeopathic medicine under the laws of another state.
57. “Physician assistant” means:
   a. The same as in A.R.S. § 32-2501, or
   b. An individual licensed as a physician assistant under the laws of another state.
58. “Positioning device” means a belt or harness that prevents an enrolled infant’s movement.
59. “Premises” means a child care group home’s residence and the surrounding property, including any structures on the property, that can be enclosed by a single unbroken boundary line that does not encompass property owned or leased by another person.
60. “Registered nurse practitioner” means:
   a. The same as in A.R.S. § 32-1601, or
   b. An individual licensed as a registered nurse practitioner under the laws of another state.
61. “Regular basis” means at recurring, fixed, or uniform intervals.
62. “Resident” means an individual who receives child care services and uses a child care group home as the individual’s principal place of habitation for 30 calendar days or more during the calendar year.
63. “Sanitize” means to use heat, a chemical agent, or a germicidal solution to disinfect and reduce pathogen counts, including bacteria, viruses, mold, and fungi.
64. “School-age child” means a child who attends:
   a. A public school, as defined for “school” in A.R.S. § 15-101; or
65. “Separate” means to exclude a child from and have the child physically move away from other children, while keeping the child under supervision.
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

70. “Signed” means affixed with an individual’s signature or, if the individual is unable to write the individual’s name, with a symbol representing the individual’s signature.

71. “Sippy cup” means a lidded drinking container that is designed to be leak-proof or leak-resistant and from which a child drinks through a spout or straw.

72. “Space utilization” means the designated use of specific areas on the premises for providing child care services.

73. “Staff member” means an individual who works at a child care group home providing child care services, regardless of whether compensation is received by the individual in return for providing child care services, and includes a provider.

74. “Supervision” means:
   a. For a child who is awake, knowledge of and accountability for the actions and whereabouts of the child, including the ability to see or hear the child at all times, to interact with the child, and to provide guidance to the child;
   b. For a child who is asleep, knowledge of and accountability for the actions and whereabouts of the child, including the ability to see or hear the child at all times and to respond to the child;
   c. For a staff member who is not an adult, knowledge of and accountability for the actions and whereabouts of the individual, including the ability to see and hear the individual when the individual is in the presence of an enrolled child and the ability to intervene in the individual’s actions to prevent harm to enrolled children.

75. “Swimming pool” has the meaning in A.A.C. R18-5-201.

76. “Training” means instruction received through:
   a. Completion of a live or computerized conference, seminar, lecture, workshop, class, or course; or
   b. Watching a video presentation.

77. “Week” means a seven-day period beginning on Sunday at 12:00 a.m. and ending on Saturday at 11:59 p.m.

78. “Working day” means the period between 8:00 a.m. and 5:00 p.m. on a Monday, Tuesday, Wednesday, Thursday, or Friday that is not a state holiday.

Historical Note

R9-3-102. Time-frames
A. The overall time-frame described in A.R.S. § 41-1072 for each type of approval granted by the Department under this Chapter is set forth in Table 1.1. The applicant and the Department may agree in writing to extend the substantive review time-frame and the overall time-frame. An extension of the substantive review time-frame and the overall time-frame may not exceed 25% of the overall time-frame.

B. The administrative completeness review time-frame described in A.R.S. § 41-1072 for each type of approval granted by the Department under this Chapter is set forth in Table 1.1 and begins on the date that the Department receives an application.

1. The Department shall send a notice of administrative completeness or deficiencies to the applicant within the administrative completeness review time-frame.
   a. A notice of deficiencies shall list each deficiency and the information or items needed to complete the application.
   b. The administrative completeness review time-frame and the overall time-frame are suspended from the date that the notice of deficiencies is sent until the date that the Department receives all of the missing information or items from the applicant.
   c. If an applicant fails to submit to the Department all of the information or items listed in the notice of deficiencies within 180 calendar days after the date that the Department sent the notice of deficiencies, the Department shall consider the application withdrawn.

2. If the Department issues a certificate or other approval to the applicant during the administrative completeness review time-frame, the Department shall not issue a separate written notice of administrative completeness.

C. The substantive review time-frame described in A.R.S. § 41-1072 is set forth in Table 1.1 and begins on the date of the notice of administrative completeness.

1. As part of the substantive review for an application for a certificate, the Department shall conduct an inspection that may require more than one visit to the child care group home or premises.

2. As part of the substantive review for a request for approval of a change affecting a certificate that requires a change in the use of physical space at a child care group home, the Department shall conduct an inspection that may require more than one visit to the child care group home.

3. The Department shall send a certificate or a written notice of approval or denial of a certificate or other request for approval to an applicant within the substantive review time-frame.

4. During the substantive review time-frame, the Department may make one comprehensive written request for additional information, unless the Department and the applicant have agreed in writing to allow the Department to submit supplemental requests for information.
   a. If the Department determines that an applicant, a child care group home, or the premises are not in substantial compliance with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter, the Department shall send a comprehensive written request for additional information that includes a written statement of deficiencies stating each statute and rule upon which noncompliance is based.
   b. An applicant shall submit to the Department all of the information requested in a comprehensive written request for additional information or a supplemental request for information, including, if applicable, documentation of the corrections required in a statement of deficiencies, within 30 calendar days after the date of the comprehensive written request for additional information or the supplemental request for information.
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

The substantive review time-frame and the overall time-frame are suspended from the date that the Department sends a comprehensive written request for additional information or a supplemental request for information until the date that the Department receives all of the information requested, including, if applicable, documentation of corrections required in a statement of deficiencies.

d. If an applicant fails to submit to the Department all of the information requested in a comprehensive written request for additional information or a supplemental request for information, including, if applicable, documentation of corrections required in a statement of deficiencies, within the time prescribed in subsection (C)(4)(b), the Department shall deny the application.

5. The Department shall issue a certificate or approval if the Department determines that the applicant and the child care group home or premises are in substantial compliance with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter, and the applicant submits documentation of corrections, which is acceptable to the Department, for any deficiencies.

Historical Note

New Table 1.1 renumbered from Table 1 and amended by exempt rulemaking at 17 A.A.R. 1530, effective September 30, 2011 (Supp. 11-3). Amended by final expedited rulemaking at 26 A.A.R. 1969, with an immediate effective date of September 2, 2020 (Supp. 20-3).

R9-3-103. Individuals to Act for Applicant or Certificate Holder

When an applicant or certificate holder is required by this Chapter to provide information on or sign an application form or other document, hold a fingerprint clearance card, or complete Department-provided orientation, the following shall satisfy the requirement on behalf of the applicant or certificate holder:

1. If the applicant or certificate holder is an individual, the individual, and
2. If the applicant or certificate holder is a business organization, the designated agent who:
   a. Is a controlling person of the business organization,
   b. Is a U.S. citizen or legal resident, and
   c. Has an Arizona address.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1). Amended by exempt rulemaking at 17 A.A.R. 1530, effective September 30, 2011 (Supp. 11-3). Amended by final expedited rulemaking at 26 A.A.R. 1969, with an immediate effective date of September 2, 2020 (Supp. 20-3).

ARTICLE 2. CERTIFICATION

Article 2, consisting of R9-3-201 through R9-3-206, made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1).

R9-3-201. Application for a Certificate

An applicant for a certificate shall:

1. Be at least 21 years of age, and

2. Submit to the Department an application packet containing:
   a. An application on a form provided by the Department that contains:
      i. The applicant’s name and date of birth;
      ii. The name to be used for the child care group home, if any;
      iii. The mailing address of the applicant, if different from the address of the residence;
      iv. The name to be used for the child care group home, if any;
      v. The applicant’s e-mail address, if applicable;
      vi. The name of the provider, if different from the applicant;
      vii. The anticipated hours of operation for the child care group home;
      viii. The requested capacity for the child care group home;
      ix. Whether the applicant agrees to allow the Department to submit supplemental requests for information;
      x. Whether the applicant or any controlling person has been denied a certificate or license to operate a child care group home or child care facility in this state or another state or has had a...
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

certificate or license to operate a child care group home or child care facility revoked in this state or another state and, if so:
(1) The name of the individual who had the certificate or license denied or revoked,
(2) The reason for the denial or revocation,
(3) The date of the denial or revocation, and
(4) The name and address of the certifying or licensing agency that denied or revoked the certificate or license;
n. A statement that the applicant has read and will comply with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;
ii. A statement that the applicant has sufficient financial resources to comply with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;
iv. The location of each fire extinguisher in the residence; and
vi. The location of each exit from the residence;
ii. A copy of the applicant’s valid fingerprint clearance card issued under A.R.S. § 41-1758.03.
2. An adult resident completes, signs, dates, and submits to the Department of Public Safety under A.R.S. § 41-1758.03(B) the fingerprint clearance card application that was submitted to the Department of Public Safety under A.R.S. § 41-1758.03(B).
D. A certificate holder shall ensure that each individual who is a staff member or an adult resident submits to the certificate holder a copy of the individual’s valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed.

E. If a staff member or resident possesses a fingerprint clearance card that was issued before the staff member or resident became a staff member or resident at the child care group home, a certificate holder shall:
1. Contact the Department of Public Safety within seven working days after the individual becomes a staff member or resident to determine whether the fingerprint clearance card is valid; and
2. Document this determination, including the name of the staff member or resident, the date of contact with the Department of Public Safety, and whether the fingerprint clearance card is valid.

F. If required by A.R.S. § 8-804, before an individual’s starting date of employment or volunteer service, a certificate holder shall comply with the submission requirements in A.R.S. § 8-804(C) for the individual.

G. A certificate holder shall not allow an adult individual to be a staff member or a resident if the individual:
1. Has been denied a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1, and has not received an interim approval under A.R.S. § 41-619.55;
2. Receives an interim approval under A.R.S. § 41-619.55 but is subsequently denied a good cause exception under A.R.S. § 41-619.55 and a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1;
3. Is a parent or guardian of a child adjudicated to be a dependent child as defined in A.R.S. § 8-201;
4. Has been denied a certificate to operate a child care group home or a license to operate a child care facility in this state or another state; or
5. Has had a license to operate a child care facility or certificate to operate a child care group home in this state or another state revoked for reasons related to the endangerment of the health and safety of children;
6. If applicable, has stated on the form required in A.R.S. § 8-804(I) that the individual is currently under investigation for an allegation of abuse or neglect or has a substantiated allegation of abuse or neglect and has not subsequently received a central registry exception according to A.R.S. § 41-619.57; or
7. If applicable, is disqualified from employment or volunteer service as a staff member according to A.R.S. § 8-804 and has not subsequently received a central registry exception according to A.R.S. § 41-619.57.

Historical Note

R9-3-204. Invalid Certificate
If a certificate holder does not submit the certification fee as required in R9-3-203(C)(2), the certificate to operate a child care group home is no longer valid, and the child care group home is operating without a certificate.

Historical Note
New Section made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1). Former R9-3-204 renumbered to R9-3-205; new R9-3-204 renumbered from R9-3-207 and amended by exempt rulemaking at 17 A.A.R. 1530, effective September 30, 2011 (Supp. 11-3).

R9-3-205. Changes Affecting a Certificate
A. For an intended change in a certificate holder’s name or the name of a child care group home:
1. The certificate holder shall send the Department written notice of the name change at least 30 calendar days before the intended date of the name change; and
2. Upon receipt of the written notice required in subsection (A)(1), the Department shall issue an amended certificate that incorporates the name change but retains the anniversary date of the certificate.

B. At least 30 calendar days before the date of an intended change in a child care group home’s space utilization or capacity, a certificate holder shall submit to the Department a written request for approval of the intended change that includes:
1. The certificate holder’s name;
2. The child care group home’s name, if applicable;
3. The name, telephone number, e-mail address, and fax number of a point of contact for the request;
4. The child care group home’s certificate number;
5. The type of change intended:
   a. Space utilization, or
   b. Capacity;
6. A narrative description of the intended change; and
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

7. The following additional information, as applicable:
   a. If requesting a change in capacity, the square footage of the outdoor activity area and the square footage of the indoor areas where child care services will be provided;
   b. If requesting a change that involves a modification of the residence that requires a building permit, a copy of the building permit;
   c. If requesting a change in space utilization that affects individual rooms:
      i. A floor plan of the residence that complies with R9-3-201(2)(f) and shows the intended changes, and
      ii. The square footage of each affected room; and
   d. If requesting a change in space utilization that affects the outdoor activity area:
      i. A site plan of the premises that complies with R9-3-201(2)(g) and shows the intended changes, and
      ii. The square footage of the intended outdoor activity area.

C. The Department shall review a request submitted under subsection (B) according to R9-3-102. If the intended change is in compliance with A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter, the Department shall send the certificate holder an approval of the request and, if necessary, an amended certificate that incorporates the change but retains the anniversary date of the current certificate.

D. A certificate holder shall not implement any change in subsection (B) until the Department issues an approval or amended certificate.

E. At least 30 calendar days before the date of a change in ownership:
   1. A certificate holder shall send the Department written notice of the change in ownership; and
   2. A person planning to assume operation of a child care group home shall obtain a new certificate as specified in R9-3-201 before beginning operation of the child care group home.

F. A certificate holder changing a child care group home’s location shall:
   1. Apply for a new certificate as prescribed in R9-3-201, and
   2. Obtain a new certificate from the Department before beginning operation of the child care group home at the new location.

G. Within 30 calendar days after the date of a change in the business organization information provided under R9-3-201(2)(f), other than a change in ownership, a certificate holder that is a business organization shall send the Department written notice of the change.

Historical Note
New Section made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1). Former R9-3-207 renumbered to R9-3-204; new R9-3-204 renumbered from R9-3-205 and amended by exempt rulemaking at 17 A.A.R. 1530, effective September 30, 2011 (Supp. 11-3). Amended by final expedited rulemaking at 28 A.A.R. 1969, with an immediate effective date of September 2, 2020 (Supp. 20-3).

R9-3-207. Denial, Revocation, or Suspension of a Certificate
A. The Department may deny, revoke, or suspend a certificate to operate a child care group home if an applicant or certificate holder:
   1. Provides false or misleading information to the Department;
   2. Is the parent or guardian of a child adjudicated to be a dependent child as defined in A.R.S. § 8-201;
   3. Has been denied a certificate or license to operate a child care group home or child care facility in any state, unless the denial was based on the individual’s failure to complete the certification or licensing process according to a required time-frame;
   4. Has had a certificate or license to operate a child care group home or child care facility revoked or suspended in any state for reasons that relate to endangerment of the health and safety of children;
   5. Has been denied a fingerprint clearance card or has had a fingerprint clearance card suspended or revoked under A.R.S. Title 41, Chapter 12, Article 3.1; or
   6. Fails to substantially comply with any provision in A.R.S. Title 36, Chapter 7.1, Article 4 or this Chapter.

B. In determining whether to deny, suspend, or revoke a certificate, the Department shall consider the threat to the health and safety of enrolled children at a child care group home based on the factors listed in A.R.S. § 36-897.06.

Historical Note
New Section made by exempt rulemaking at 16 A.A.R. 1561, effective July 29, 2010 (Supp. 10-3). Former R9-3-207 renumbered to R9-3-204; new R9-3-204 renumbered from R9-3-205 and amended by exempt rulemaking at 17 A.A.R. 1530, effective September 30, 2011 (Supp. 11-3).

ARTICLE 3. OPERATING A CHILD CARE GROUP HOME

Article 3, consisting of R9-3-301 through R9-3-315, made by final rulemaking at 10 A.A.R. 1214, effective September 1, 2004 (Supp. 04-1).

R9-3-301. Certificate Holder and Provider Responsibilities
A. A certificate holder shall:
   1. Designate a provider who:
      a. Lives in the residence;
      b. Is 21 years of age or older;
      c. Has a high school diploma, high school equivalency diploma, associate degree, or bachelor degree;
      d. Meets one of the following:
CHAPTER 3. DEPARTMENT OF HEALTH SERVICES - CHILD CARE GROUP HOMES

i. Has completed at least three credit hours in child growth and development, nutrition, psychology, or early childhood education;

ii. Has completed at least 60 hours of training in child growth and development, nutrition, psychology, early childhood education, or management of a child care business; or

iii. Has at least 12 months of child care experience; and

e. Has completed Department-provided orientation training that includes the Department’s role in certifying and regulating child care group homes under A.R.S. Title 36, Chapter 7.1, Article 4 and this Chapter;

2. Ensure that each staff member is 16 years of age or older;

3. Ensure that each resident 12 years of age or older and each staff member submits, on or before the starting date of residency, employment, or volunteer services, one of the following as evidence of freedom from infectious active tuberculosis:

a. Documentation of a negative Mantoux skin test or other tuberculosis screening test recommended by the U.S. Centers for Disease Control and Prevention, administered within 12 months before the starting date of residency, employment, or volunteer service, that includes the date and the type of tuberculosis screening test; or

b. If the resident or staff member has had a positive Mantoux skin test or other tuberculosis screening test, a written statement that the resident or staff member is free from infectious active tuberculosis that is signed and dated by a physician, physician assistant, or registered nurse practitioner within six months before the starting date of residency, employment, or volunteer service; and

4. Ensure that the provider:

a. Supervises or assigns an adult staff member to supervise each staff member who is not an adult;

b. Maintains on the premises a file for each staff member containing:
   i. The staff member’s name, date of birth, home address, and telephone number;
   ii. The staff member’s starting date of employment or volunteer service;
   iii. The staff member’s ending date of employment or volunteer service, if applicable;
   iv. The staff member’s written statement attesting to current immunity against measles, rubella, diphtheria, mumps, and pertussis;
   v. The form required in A.R.S. § 36-897.03(B);
   vi. For an adult staff member, a copy of the staff member’s valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1;
   vii. Documents required by subsection (A)(3);
   viii. Documentation of the requirements in A.R.S. § 36-897.03(C);
   ix. If applicable:
      1. The form required in A.R.S. § 8-804(I);
      2. Documentation of the submission required in A.R.S. § 8-804(C) and the information received as a result of the submission; and
      3. Documentation of the completion of the Department-provided orientation training specified in subsection (A)(1)(e), if applicable; x. Documentation of the training required in R9-3-302; and
   xi. Documentation of a high school diploma, high school equivalency diploma, associate degree, or bachelor degree, if applicable;

c. Maintains on the premises a file for each resident, for 12 months after the date the resident last resided at the child care group home, containing:
   i. The resident’s name and date of birth;
   ii. The resident’s relationship to the provider;
   iii. The date the resident began residing at the child care group home;
   iv. The date the resident last resided at the child care group home, if applicable;
   v. A written statement by the resident or, if the resident is a minor, the provider attesting to the resident’s current immunity against measles, rubella, diphtheria, mumps, and pertussis;
   vi. If the resident is an adult, the form required in A.R.S. § 36-897.03(B);
   vii. If the resident is an adult, the documents required by R9-3-202(C)(2) or R9-3-202(D); and
   viii. If the resident is 12 years of age or older, the documents required by subsection (A)(3);

d. Prepares a dated attendance record for each day and ensures that each staff member records on the attendance record the staff member’s start time and end time of providing child care services for the child care group home;

e. Maintains on the premises the dated attendance record required in subsection (A)(4)(d) for 12 months after the date on the attendance record;

f. Except as specified in R9-3-408, provides child care services only in areas:
   i. Designated as provided in R9-3-201(2)(f)(i) or R9-3-201(2)(g)(i), or
   ii. Approved under R9-3-205(C);

g. Does not engage in outside employment during hours of operation or operate another business at or out of the residence during hours of operation;

h. Does not allow another staff member to engage in or operate another business at or out of the residence during the staff member’s assigned work hours at the child care group home;

i. Does not allow the operation of another business on the premises during hours of operation unless the operation of the business does not involve persons coming onto the premises during hours of operation because of the business; and

j. Does not allow the cultivation of medical marijuana on the premises.

B. A certificate holder shall ensure that all of the records required to be maintained by this Chapter either are written in English or, if written in a language other than English, include an English translation.

C. A certificate holder shall:
   1. Secure and maintain general liability insurance of at least $100,000 for the child care group home; and
   2. Maintain on the premises documentation of the insurance coverage required in subsection (C)(1).

D. A certificate holder shall ensure that:
   1. While acting on behalf of the certificate holder when the provider is not present at the child care group home, an
A certificate holder shall ensure that a staff member posts in a

person.

A certificate holder shall:

E. A certificate holder shall ensure that a parent, an individual
designated in writing by the parent, or legal guardian of an
enrolled child is allowed immediate access during hours of
operation to the areas of the premises where the enrolled child
is receiving child care services.

F. A certificate holder shall:

1. Prepare a document that includes the following informa-
tion:
   a. The name and contact telephone number of the pro-
      vider;
   b. The hours of operation of the child care group home;
   c. Charges, fees, and payment requirements for child
care services;
   d. Whether medications are administered at the child
care group home and, if so, a description of what the
parent is required to give to the child care group
home;
   e. Whether enrolled children go on field trips under the
supervision of a staff member;
   f. Whether the child care group home provides trans-
portation for enrolled children to or from school, a
school bus stop, or other locations;
   g. The mechanism by which a staff member will verify
that an individual contacting the child care group
home by telephone claiming to be the parent of an
enrolled child is the enrolled child’s parent;
   h. A statement that a parent has access to the areas on
the premises where the parent’s enrolled child is
receiving child care services;
   i. A statement that inspection reports for the child care
group home are available for review at the child care
group home; and
   j. The local address and contact telephone number for
the Department; and

2. Ensure that a staff member provides the document
required in subsection (F)(1) to a parent of an enrolled
child.

G. A certificate holder shall ensure that a staff member posts in a
place that can be conspicuously viewed by individuals enter-
ing or leaving the child care group home:

1. The child care group home certificate;
2. The name of the provider;
3. The name of the staff member designated to act on behalf
of the certificate holder when the provider is not present
at the child care group home;
4. The hours of operation for the child care group home;
5. The weekly activity schedule required in R9-3-
401(D)(4)(b);
6. The amount of time in minutes enrolled children may
watch television, videos, or DVDs at the child care group
home; and

H. A certificate holder shall ensure that a staff member supervises
any individual who is not a staff member and is on the pre-
mises where enrolled children are present.

I. A certificate holder shall ensure that a staff member who has
current training in first aid and CPR is present during hours of
operation when an enrolled child is on the premises or on a trip
away from the premises under the supervision of a staff mem-
ber.

J. A certificate holder shall ensure that if a staff member or resi-
dent lacks documentation of immunization or evidence of
immunity that complies with A.A.C. R9-6-704 for a communi-
cable disease listed in A.A.C. R9-6-702:

1. The staff member or resident is excluded from the child
care group home between the start and end of an outbreak
of the communicable disease at the child care group
home, or
2. The child care group home is closed until the end of an
outbreak at the child care group home.

K. Within 72 hours after changing a provider, a certificate holder
shall send the Department written notice of the change, includ-
ing the name of the new provider.

L. Except as provided in subsections (M) and (N), a certificate
holder shall notify the Department in writing of a planned
change in a child care group home’s hours of operation at least
three calendar days before the date of the planned change,
including:

1. The certificate holder’s name;
2. The child care group home’s certificate number; and
3. The current and intended hours of operation.

M. A certificate holder is not required to notify the Department of
a change in a child care group home’s hours of operation when
the change in the child care group home’s hours of operation is
due to the occurrence of a state or federal holiday on a day of
the week the child care group home regularly provides child
care services.

N. When the premises of a child care group home are left unoccu-
pied during hours of operation or the child care group home is
temporarily closed due to an unexpected event, a certificate
holder shall ensure that a staff member notifies the Department
before leaving the child care group home unoccupied or clos-
ing the child care group home, stating the period of time
during which the child care group home will be unoccupied or
closed.

Historical Note
New Section made by final rulemaking at 10 A.A.R.
1214, effective September 1, 2004 (Supp. 04-1).
Amended by exempt rulemaking at 17 A.A.R. 1530,
effective September 30, 2011 (Supp. 11-3). Amended by
exempt rulemaking at 19 A.A.R. 2607, effective August
1, 2013 (Supp.13-3). Amended by final expedited
rulemaking at 26 A.A.R. 1969, with an immediate effec-
tive date of September 2, 2020 (Supp. 20-3).

R9-3-302. Staff Training

A. Within 10 calendar days after the starting date of employment
or volunteer service, a certificate holder shall provide, and
each staff member shall complete, training for new staff mem-
ers that includes all of the following:

1. Names, ages, and developmental stages of enrolled chil-
dren;
2. Health needs, nutritional requirements, any known aller-
gies, and information about adaptive devices of enrolled
children;
3. Guiding and disciplining children;
36-132. **Department of health services; functions; contracts**

A. The department, in addition to other powers and duties vested in it by law, shall:

1. **Protect the health of the people of the state.**
2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.
3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.
4. Operate such sanitariums, hospitals or other facilities assigned to the department by law or by the governor.
5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information for the promotion of good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of education of children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.
6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.
7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.
8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.
9. Encourage and aid in the coordination of local programs concerning nutrition of the people of this state.
10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.
11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.
12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.
13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local...
health agencies involved with water quality shall provide to the department any assistance requested by the
director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter
8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in the enforcement of the federal
food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Conduct continuing evaluations of state, local and district public health programs, study and appraise state
health problems and develop broad plans for use by the department and for recommendation to other
agencies, professions and local health departments for the best solution of these problems.

16. License and regulate health care institutions according to chapter 4 of this title.

17. Recruit and train personnel for state, local and district health departments.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet
wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:
   (a) Screening in early pregnancy for detecting high-risk conditions.
   (b) Comprehensive prenatal health care.
   (c) Maternity, delivery and postpartum care.
   (d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when
       medically indicated.
   (e) Perinatal education oriented toward professionals and consumers, focusing on early detection and
       adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes for persons with developmental disabilities. The
department shall issue a license to an accredited facility for a period of the accreditation, except that no
licensing period shall be longer than three years. The department is authorized to conduct an inspection of an
accredited facility to ensure that the facility meets health and safety licensure standards. The results of the
accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the
department of health services. For the purposes of this paragraph, "accredited" means accredited by a
nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government,
and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for
or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or
in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this
title, and enter into contracts with the federal government, or an agency of the federal government, and with private
donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies
made available under this section are special project grants. The department may also expend these monies to
further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The
department shall not set a fee at more than the department’s cost of providing the service for which the fee is
charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and
organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as
payors of last resort, prescription medications necessary to supplement treatment and transportation to and from
treatment facilities. The contracts may provide for department payment of administrative costs it specifically
authorizes.
36-136. Powers and duties of director; compensation of personnel

A. The director shall:
1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.
2. Perform all duties necessary to carry out the functions and responsibilities of the department.
3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.
4. Administer and enforce the laws relating to health and sanitation and the rules of the department.
5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.
6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state.
7. Prepare sanitary and public health rules.
8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly
performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. Whenever in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for no longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum
standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.
(b) Prepared at a cooking school that is conducted in an owner-occupied home.
(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.
(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fund-raising or an employee social event.
(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.
(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: “This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection.” If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply,
label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for the preservation or storage of food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparation of food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to
control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. For the purposes of this section:
   1. "Cottage food product":
      (a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.
(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-897. Definitions

In this article, unless the context otherwise requires:

1. "Child care group home" means a residential facility in which child care is regularly provided for compensation for periods of less than twenty-four hours per day for not less than five children but no more than ten children through the age of twelve years.

2. "Department" means the department of health services.

3. "Provider" means the certificate holder or a person the certificate holder designates in writing who, pursuant to applicable statutes and rules, is to be responsible for direct daily supervision, operation and maintenance of the child care group home.

4. "Substantial compliance" means that the nature or number of violations revealed by any type of inspection or investigation of an applicant for certification as a child care group home or a certified child care group home does not pose a direct risk to the life, health or safety of children.

36-897.01. Certification; application; fees; rules; fingerprinting; renewal; exemption from rule making

A. A child care group home shall be certified by the department. An application for a certificate shall be made on a written or electronic form prescribed by the department and shall contain all information required by the department.

B. If a child care group home is within one-fourth mile of agriculture land, the application shall include the names and addresses of the owners and lessees of any agricultural land within one-fourth mile of the facility. Within ten days after receipt of an application for a certificate, the department shall notify the owners and lessees of agricultural land as listed on the application. The department shall deny a certificate that affects agricultural land regulated pursuant to section 3-365, except that the owner of the agricultural land may agree to comply with the buffer zone requirements of section 3-365. If the owner agrees in writing to comply with the buffer zone requirements and records the agreement in the office of the county recorder as a restrictive covenant running with the title to the land, the department may issue a certificate to the child care group home to be located within the affected buffer zone. The agreement may include any stipulations regarding the child care group home, including conditions for future expansion of the facility and changes in the operational status of the facility that will result in a breach of the agreement. This subsection applies to the renewal of a certificate for a child care group home located in the same location if the child care group home certificate was not previously issued under this subsection.

C. The director, by rule, may establish and collect fees for child care group homes and a late filing fee. Beginning January 1, 2010, ninety per cent of the fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the health services licensing fund established by section 36-414 and ten per cent of the fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.

D. Pursuant to available funding the department shall collect annual fees.

E. Beginning January 1, 2010, subject to the availability of monies, the department may establish a discount program
9 A.A.C. 3 Child Care Group Homes

for certification fees paid by child care group homes, including a public health discount program.

F. The department shall issue an initial certificate if the department determines that the applicant and the applicant's child care group home are in substantial compliance with the requirements of this article and department rules and the facility agrees to carry out a plan acceptable to the director to eliminate any deficiencies.

G. A certificate is valid unless it is revoked or suspended or the licensee does not pay the licensure fee and may be renewed by submitting the certification fee as prescribed by the department pursuant to subsection C of this section.

H. In order to ensure that the equipment and services of a child care group home and the good character of an applicant are conducive to the welfare of children, the department by rule shall establish the criteria for granting, denying, suspending and revoking a certificate.

I. The director shall adopt rules and prescribe forms as may be necessary for the proper administration and enforcement of this article.

J. The certificate shall be conspicuously posted in the child care group home for viewing by parents and the public.

K. Current department inspection reports shall be kept at the child care group home and shall be made available to parents on request.

L. A certificate is not transferable and is valid only for the location occupied at the time it is issued.

M. An application for an initial certificate shall include:
   1. The form that is required pursuant to section 36-897.03, subsection B and that is completed by the applicant.
   2. A copy of a valid fingerprint clearance card issued to the applicant pursuant to section 41-1758.07.

N. The department of health services shall notify the department of public safety if the department of health services receives credible evidence that a person who possesses a valid fingerprint clearance card either:
   1. Is arrested for or charged with an offense listed in section 41-1758.07, subsection B.
   2. Falsified information on any form required by section 36-897.03.

O. Certificate holders may pay fees by installment payments based on procedures established by the department.

P. The department shall review its actual costs to administer this article at least once every two years. If the department determines that its administrative costs are lower than the fees it has collected pursuant to this section, it shall adjust fees.

Q. If the department lowers fees, the department may refund or credit fees to licensees.

R. Fee reductions are exempt from the rule making requirements of title 41, chapter 6.

36-897.02. Standards of care; monitoring

A. The department by rule shall establish standards of care for child care group homes. These rules shall include minimum programmatic, personnel, supervision of children, training, physical environment and financial stability standards.

B. At least two adults shall be present in the child care group home when six to ten children are cared for in the home.

C. For purposes of certification of the child care group home, the provider's own children shall not be counted.

D. The total number of children present in a child care group home at any given time for whom compensation is received shall not exceed ten.

E. The total number of children present in a child care group home at any given time, including children related to the provider, shall not exceed fifteen.

F. The department shall monitor the operation of a child care group home at least two times each year to ensure that the child care group home is meeting department standards of care.
36-897.03. Child care group homes; child care personnel; fingerprints; definition

A. Child care personnel, including volunteers, shall submit the form prescribed in subsection B of this section to the employer and shall have valid fingerprint clearance cards issued pursuant to section 41-1758.07 or shall apply for a fingerprint clearance card within seven working days of employment or beginning volunteer work.

B. Applicants, certificate holders and child care personnel shall attest on forms that are provided by the department that:

1. They are not awaiting trial on or have never been convicted of or admitted in open court or pursuant to a plea agreement committing any of the offenses listed in section 41-1758.07, subsection B or C in this state or similar offenses in another state or jurisdiction.
2. They are not parents or guardians of a child adjudicated to be a dependent child as defined in section 8-201.
3. They have not been denied a certificate to operate a child care group home or a license to operate a child care facility for the care of children in this state or another state or had a license to operate a child care facility or a certificate to operate a child care group home revoked for reasons that relate to the endangerment of the health and safety of children.

C. The provider shall make documented, good faith efforts to contact previous employers of child care personnel to obtain information or recommendations that may be relevant to an individual's fitness to work in a certified child care group home.

D. The director may adopt rules prescribing the exclusion from child care group homes of individuals whose presence may be detrimental to the welfare of children.

E. The forms required by subsection B of this section are confidential.

F. A person who is awaiting trial on or who has been convicted of or who has admitted in open court or pursuant to a plea agreement to committing a criminal offense listed in section 41-1758.07, subsection B or subsection B, paragraph 2 or 3 of this section is prohibited from being employed in any capacity in a child care group home.

G. A person who is awaiting trial on or who has been convicted of or who has admitted in open court or pursuant to a plea agreement to committing a criminal offense listed in section 41-1758.07, subsection C shall not work in a child care group home without direct visual supervision unless the person has applied for and received the required fingerprint clearance card pursuant to section 41-1758 and is registered as child care personnel. A person who is subject to this subsection shall not be employed in any capacity in a child care group home if that person is denied the required fingerprint clearance card.

H. The employer shall notify the department of public safety if the employer receives credible evidence that any child care personnel either:

1. Is arrested for or charged with an offense listed in section 41-1758.07, subsection B.
2. Falsified information on the form required by subsection B of this section.

I. For the purposes of this section, "child care personnel" means all employees of and persons who are eighteen years of age or older and who reside in a child care group home that is certified by the department.

36-897.04. Exemptions

A. This article does not apply to the care given to children by or in:

1. The homes of their own parents.
2. A religious institution conducting a nursery in conjunction with its religious services.
3. A unit of the public school system.
4. A regularly organized private school engaged in an educational program which may be attended in substitution for public school pursuant to section 15-802.
5. Any facility that provides training only in specific subjects, including dancing, drama, music, self-defense or religion.
6. Any facility that provides only recreational or instructional activity to school age children who may come to and go from that facility at their own volition.

B. If regularly organized private schools exempt under subsection A, paragraph 4 of this section provide child care beyond public school hours or for children who are not regularly enrolled in kindergarten programs or grades one through twelve, that portion of the school providing this care shall be considered a child care group home and is subject to this article.

36-897.05. Inspection of child care group homes

A. The department or designated local health departments or its agents may at any time visit, during hours of operation, and inspect a child care group home in order to determine whether it is certified and is being conducted in compliance with applicable law, this article and rules adopted pursuant to this article.
B. The department shall visit each child care group home as often as necessary to assure continued compliance with this article and the rules adopted pursuant to this article. At least one unannounced visit shall be made annually.

36-897.06. Civil penalty; collection

A. The director may impose a civil penalty on a person who violates this article or rules adopted pursuant to this article in an amount of not more than one hundred dollars for each violation. Each day that a violation occurs constitutes a separate violation. The director may issue a notice that includes the proposed amount of the civil penalty assessment. A person may appeal the assessment by requesting an administrative hearing. If a person requests a hearing to appeal an assessment, the director shall not take further action to enforce and collect the assessment until the hearing process is complete. The director shall impose a civil penalty only for those days on which the violation has been documented by the department.
B. In determining the civil penalty pursuant to subsection A, the department shall consider the following:
   1. Repeated violations of statutes or rules.
   2. Patterns of noncompliance.
   3. Types of violations.
   4. Severity of violations.
   5. Potential for and occurrences of actual harm.
   6. Threats to health and safety.
   7. Number of children affected by the violations.
   8. Number of violations.
   9. Size of the facility.
   10. Length of time during which violations have been occurring.
C. If a civil penalty imposed pursuant to subsection A of this section is not paid, the attorney general or a county attorney shall file an action to collect the civil penalty in a justice court or the superior court in the county in which the violation occurred.
D. Civil penalties collected pursuant to subsection A of this section shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.
E. The department shall develop an instrument that documents compliance and noncompliance of child care group
homes according to the criteria prescribed in its rules governing child care group home certification. Blank copies of the instrument, which shall be in standardized form, shall be made available to the public.

36-897.07. **Training program**

The director shall establish a training program to provide training for child care group homes and users of child care group home services, technical assistance materials for child care group homes and information to enhance consumer awareness.

36-897.08. **Intermediate sanctions; notification of compliance; hearing**

A. If the director has reasonable cause to believe that a child care group home is in violation of this article or a rule adopted pursuant to this article and that the health or safety of the children is endangered, on written notice to the child care group home the director may impose one or more of the following intermediate sanctions until the child care group home is in substantial compliance:
   1. Immediately restrict admissions to the child care group home.
   2. Terminate specific services that the child care group home may offer.
   3. Reduce the child care group home's capacity.

B. A child care group home sanctioned pursuant to this section shall notify the department in writing when it is in substantial compliance. On receipt of notification the department shall conduct an inspection. If the department determines that the child care group home is in substantial compliance the director shall immediately rescind the sanctions. If the department determines that the child care group home is not in substantial compliance the sanctions remain in effect. The child care group home may then notify the department of substantial compliance not sooner than fourteen days after the date of that inspection. If the department determines on the return inspection that the child care group home is still not in substantial compliance the sanctions remain in effect. Thereafter, a child care group home may notify the department of substantial compliance not sooner than thirty days after the date of the last inspection. A child care group home shall make all notifications of substantial compliance by certified mail. The department shall conduct all inspections required pursuant to this subsection within fourteen days after receipt of notification of substantial compliance. If the department does not conduct an inspection within this time period, the sanctions have no further effect.

C. On written request by a person who has been sanctioned pursuant to this section the director or the director's designee shall conduct a hearing to review the sanctions. A request for a hearing shall be made by certified mail within ten days after receipt of notice of the sanctions. The office of administrative hearings shall conduct an administrative hearing within seven business days after the notice of appeal has been filed with the office of administrative hearings.

D. A hearing conducted pursuant to this section shall comply with the requirements of title 41, chapter 6, article 10.

36-897.09. **Operating without a certificate; notice; hearing; violation; classification**

A. If the department has reasonable cause to believe that a person is operating a child care group home without a certificate, it shall notify that person to cease operation within ten days of receiving the notice. The department shall give notice either by certified mail or by personal service. The notice shall state that the person may make a written request for a hearing before the director or the director's designee pursuant to title 41, chapter 6, article 10.

B. If a person fails to cease operation, the department may request that the county attorney of the county in which the home is located enforce this article. The department may also notify the attorney general who shall immediately
seek a restraining order and an injunction against the home.

C. A person who continues to operate a child care group home without certification ten days after receiving notice pursuant to this section is guilty of a class 1 misdemeanor.

36-897.10. Pending action or sale; effect on licensure

A. The department shall not act on an application for certification of a currently certified child care group home while any enforcement or court action related to child care group home certification is pending against that group home's current certificate holder.

B. The director may continue to pursue any court, administrative or enforcement action against the certificate holder even if the group home is in the process of being sold or transferred to a new owner.

C. The department shall not approve a change in group home ownership unless it determines that there has been a transfer of legal and equitable interests, control and authority in the group home so that persons other than the transferring certificate holder, that certificate holder's agent or other parties exercising authority or supervision over the group home's daily operations or staff are responsible for and have control over the group home.

36-897.11. Injunctions; definition

A. If the department believes that a child care group home is operating under conditions that may cause serious harm to children, the department shall notify the attorney general or the county attorney of the county in which the child care group home is located who shall immediately seek a restraining order and injunction against the home.

B. For the purposes of this section, "serious harm" means a substantial physical injury.

36-897.12. Inspection of records

A. Records maintained by the department for child care group homes are available to the public for review and copying.

B. Personally identifiable information that relates to a child, parent or guardian is confidential. The department shall disclose this information only as follows:
   1. Pursuant to a court order.
   2. Pursuant to a written consent signed by the parent or guardian.
   3. To a law enforcement officer who requires it for official purposes.
   4. To an official of a governmental agency who requires it for official purposes.

C. The department shall enter into the child care group home's case file, contiguous to the form containing the reported violations, those documents that verify correction of reported violations.

36-897.13. Use of sunscreen in child care group homes

A school-age child who attends a child care group home in this state may possess and use a topical sunscreen product without a note or prescription from a licensed health care professional.

46-811. Child care providers; background check requirements
A. The department of economic security and the department of health services may conduct background checks pursuant to the requirements of the child care and development block grant act of 2014 (P.L. 113-186) that are not included in the fingerprint clearance card process established by section 41-1758.02 for:

1. Employees and volunteers of child care providers as defined in section 46-801.

2. All persons who are eighteen years of age or older and who work or reside in the home of a child care home provider as defined in section 46-801.

3. Child care personnel as defined in section 36-897.03.

4. Child care providers as defined in section 41-1967.01.

B. The department of economic security may enter into agreements with other government agencies to conduct the background checks required in subsection A of this section.
DEPARTMENT OF HEALTH SERVICES (Expedited Rulemaking)
Title 9, Chapter 5

MEETING DATE: July 6, 2022

TO: Members of the Governor’s Regulatory Review Council (Council)

FROM: Council Staff

DATE: June 13, 2022

SUBJECT: DEPARTMENT OF HEALTH SERVICES (Expedited Rulemaking)
Title 9, Chapter 5

Summary:

This expedited rulemaking from the Department of Health Services (Department) seeks to amend five (5) rules in Title 9, Chapter 5, Articles 1, 2, and 4 related to child care facilities. Specifically, the Department seeks to clarify requirements for personnel, volunteers, and others providing services for enrolled children who attend licensed child care facilities to ensure the health and safety of the enrolled children. These rules comply with Laws 2020, Ch. 86 that specifies all child care personnel and volunteers shall have a valid fingerprint clearance card issued before starting employment or volunteer work and adds clarification for background checks pursuant to the Child Care and Development Block Grant Act of 2014 (P. L. 113-186) (Block Grant). The Department indicates the current rules contain requirements for fingerprinting checks and state criminal registry verification. To make the rules consistent with the Block Grant, the Department plans to add verification of: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry. The Department believes amending these rules will make the rules consistent with A.R.S.§ 46-811, eliminate confusion related to child care fingerprinting and background check requirements, and ensure the health and safety for enrolled children attending a child care facility.
1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

Pursuant to A.R.S. § 41-1027(A), an agency may only conduct an expedited rulemaking if the rulemaking “does not increase the cost of regulatory compliance, increase a fee or reduce procedural rights of persons regulated…” and meets one of several other criteria. The Department indicates that the following rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of persons regulated. Furthermore, the Department indicates that the rulemaking adopts requirements implementing Laws 2020, Ch. 86 and amends an outdated rule. Furthermore, the Department indicates the rulemaking provides a public benefit, amends rules made obsolete by legislative action, and is expected to increase the quality of health and safety for children attending licensed child care facilities. As such, the Department indicates that the rulemaking complies with criteria for expedited rulemaking under A.R.S. § 41-1027(A)(4) and (6).

However, Council staff expressed concern that adding requirements for additional background check verification that includes the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry, may increase the cost of regulatory compliance to parties regulated by these rules. Council staff raised these concerns with the Department. In response the Department stated,

> [T]he Department does not expect the changes made to the rules to include a background check will increase a cost for a licensee or child care personnel; rather any increase cost related to obtaining a background check is the result of changes made by SB 1504 and the State’s receipt of Block Grant funds. A State that receives funds pursuant to the Block Grant shall require and conduct a criminal background check for child care personnel (including prospective child care staff members) that includes an FBI fingerprint check using the Integrated Fingerprint Identification System. Arizona is receiving Block Grant funds and thus is required to have background checks. See P.L. 113-186 § 658H. Accordingly, the rules simply codify something the State is already required to do. Notwithstanding the foregoing, the Department is currently working with DES, Department of Public Safety (DPS), and Department of Child Safety (DCS) to eliminate duplication of efforts and to ensure that child care personnel and volunteers required to obtain both FPCC and background check documentation do not incur any additional cost.

Additionally, the Department stated,

> The Department does not expect the amended rules to increase costs for licensees, child care personnel, or volunteers since no fees/costs have been added or
changed. The Department has considered that child care personnel and volunteers may incur a minimal cost for time taken to apply online for a background check. Many occupations require various certifications and considered a requirement necessary to ensure employment in a profession of one’s choice; the cost is cost created by one’s choice. The Department expects the benefit of having amended child care rules that significantly increase the health and safety of Arizona children is greater than the cost of these rulemakings.

In light of the Department’s response, Council staff is still concerned that the proposed amendments in this rulemaking increase the cost of regulatory compliance, making this rulemaking ineligible for expedited rulemaking pursuant to A.R.S. § 41-1027(A). Council staff encourages the Council to discuss further with the Department whether this rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A).

2. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   The Department cites both general and specific statutory authority for these rules.

3. **Do the rules establish a new fee or contain a fee increase?**

   This rulemaking does not establish a new fee or contain a fee increase.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

   The Department indicates it did not receive public or stakeholder comments related to this rulemaking.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

   The Department indicates there were no changes to the rules between the Notice of Proposed Expedited Rulemaking published in the Administrative Register and the Notice of Final Expedited Rulemaking now before the Council.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

   The Department indicates A.R.S. § 46-811 provides the Department authority to require background checks for staff members and volunteers specified in the Child Care and Development Block Grant Act of 2014 (P. L. 113 – 186). The Department in this rulemaking adds background checks consistent with P. L. 113 – 186. The Department states it is not aware of any other federal laws applicable to the subject of this rulemaking.
7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(11), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

The Department, pursuant to A.R.S. § 36-882, is required to provide licensure for child care facilities and, pursuant to A.R.S. § 36-888, the Department retains the authority to deny, revoke, or suspend an applicant or a child care facility licensee’s ability to operate. The Department indicates it does not use a general permit. The Department states that under A.R.S. § 41-1037(A)(3) that a general permit is not applicable.

8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department did not review or rely on any study in conducting this rulemaking.

9. **Conclusion**

This expedited rulemaking from the Department of Health Services (Department) seeks to amend five (5) rules in Title 9, Chapter 5, Articles 1, 2, and 4 related to child care facilities by adding requirements for background check verification of: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry. The Department believes amending these rules will make them consistent with A.R.S.§ 46-811, eliminate confusion related to child care fingerprinting and background check requirements, and ensure the health and safety for enrolled children attending a child care facility.

Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on filing with the Secretary of State.

As outlined above, Council staff is concerned that adding requirements for additional background check verification that includes the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry, may increase the cost of regulatory compliance to parties regulated by these rules. Council staff encourages the Council to discuss further with the Department whether this rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A).

Nicole Sornsin, Chair
Governor’s Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 5, Expedited Rulemaking

Dear Ms. Sornsin:

1. The close of record date: January 20, 2022

2. Explanation of how the expedited rule meets the criteria in A.R.S. § 41-1027(A):
The rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of persons regulated. The rulemaking adopts requirements implementing Laws 2020, Ch. 86 and amends an outdated rule. The rulemaking provides a public benefit, amends rules made obsolete by legislative action, and is expected to increase the quality of health and safety for children attending licensed child care facilities. The rulemaking complies with criteria for expedited rulemaking under A.R.S. § 41-1027(A)(4) and (A)(6).

3. Whether the rulemaking relates to a five-year-review report and, if applicable, the date the report was approved by the Council:
The changes being made by the rulemaking are not related to a five-year-review report approved by the Council.

The Department certifies that the Preamble of this rulemaking discloses a reference to any study relevant to the rule that the Department reviewed and either did or did not rely on in its evaluation of or justification for the rule.

4. A list of all items enclosed:
   a. Notice of Final Expedited Rulemaking, including the Preamble, Table of Contents, and text of the rule, and
   b. Statutory authority

Douglas A. Ducey | Governor
Don Herrington | Interim Director

NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 9. HEALTH SERVICES
CHAPTER 5. DEPARTMENT OF HEALTH SERVICES
CHILD CARE FACILITIES

PREAMBLE

1. Article, Part, or Section Affected (as applicable)  Rulemaking Action
   R9-5-101.  Amend
   R9-5-201.  Amend
   R9-5-203.  Amend
   R9-5-208.  Amend
   R9-5-402.  Amend

2. Citations to the agency’s statutory rulemaking authority to include the authorizing statute
   (general) and the implementing statute (specific):
   Authorizing statutes: A.R.S. § 36-136(G)
   Implementing statutes: A.R.S. §§ 36-883.02 and 46-811

3. The effective date of the rules:
   The rule is effective the day the Notice of Final Expedited Rulemaking is filed with the Office of
   the Secretary of State.

4. Citations to all related notices published in the Register as specified in R1-1-409(A) that
   pertain to the record of the proposed expedited rule:
   Notice of Rulemaking Docket Opening: 26 A.A.R. 2810, October 30, 2020
   Notice of Rulemaking Docket Opening: 27 A.A.R. 2536, October 29, 2021

5. The agency’s contact person who can answer questions about the rulemaking:
   Name: Thomas Salow, Branch Chief
   Address: Arizona Department of Health Services
   Division of Licensing Services
   150 N. 18th Ave., Suite 400
   Phoenix, AZ  85007
   Telephone: (602) 364-1935
   Fax: (602) 364-4808
   E-mail: Thomas.Salow@azdhs.gov
   or
6. An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, under A.R.S § 41-1027, to include an explanation about the rulemaking:
The Department licenses child care facilities under Arizona Revised Statutes (A.R.S.) Title 36, Chapter 7.1, Article 1, and has adopted rules for child care facilities in Arizona Administrative Code Title 9, Chapter 5. The Department in this rulemaking clarifies requirements for personnel, volunteers, and others providing services for enrolled children who attend licensed child care facilities to ensure the health and safety of the enrolled children. Article 5 rules comply with Laws 2020, Ch. 86 that specifies all child care personnel and volunteers shall have a valid fingerprint clearance card issued before starting employment or volunteer work and adds clarification for background checks pursuant to the Child Care and Development Block Grant Act of 2014 (P. L. 113-186) (Block Grant). Currently, Article 5 rules contain requirements for fingerprinting checks and state criminal registry verification. To make the Article 5 rules consistent with the Block Grant, the Department adds verification of: the state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry. The Department believes amending Article 5 will make the rules consistent with A.R.S. § 46-811, eliminate confusion related to child care fingerprinting and background check requirements, and ensure the health and safety for enrolled children attending a child care facility. The Department does not expect the rulemaking will increase regulatory compliance, increase a fee, or reduce procedural rights of persons regulated. The proposed amendments conform to rulemaking format and style requirements of the Governor’s Regulatory Review Council and the Office of the Secretary of State.

7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:
The Department did not review or rely on any study for this rulemaking.
8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state.

Not applicable

9. A summary of the economic, small business, and consumer impact:

Under A.R.S. § 41-1055(D)(2), the Department is not required to provide an economic, small business, and consumer impact statement.

10. A description of any changes between the proposed expedited rulemaking, including supplemental notices, and the final expedited rulemaking:

Between the proposed expedited rulemaking and the final expedited rulemaking, no changes were made to the rulemaking.

11. Agency's summary of the public or stakeholder comments or objections made about the rulemaking and the agency response to the comments:

No comments were received about this rulemaking.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statutes applicable specifically to the Department or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The Department pursuant to A.R.S. § 36-882 is required to provide licensure for child care facilities and pursuant to A.R.S. § 36-888, the Department retains the authority to deny, revoke, or suspend an applicant or a child care facility licensee’s ability to operate. The Department does not use a general permit. The Department believes that under A.R.S. § 41-1037(A)(3) that a general permit is not applicable.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

A.R.S. § 46-811 provides the Department authority to require background checks for staff members and volunteers specified in the Child Care and Development Block Grant Act of 2014 (P. L. 113 – 186). The Department in this rulemaking adds background checks consistent with P. L. 113 – 186. The Department is not aware of any other federal laws applicable to the subject of this Article 1 and Article 2 rulemaking.
c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:

No business competitiveness analysis was received.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable

14. Whether the rule was previously made, amended, or repealed as an emergency rules. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

The rule was not previously made as an emergency rule.

15. The full text of the rule follows:

ARTICLE 1. GENERAL

R9-5-101. Definitions

In addition to the definitions in A.R.S. § 36-881, the following definitions apply in this Chapter unless otherwise specified:

1. “Abuse” has the same meaning as in A.R.S. § 8-201.
2. “Accident” means an unexpected occurrence that:
   a. Causes injury to an enrolled child,
   b. Requires attention from a staff member, and
   c. May or may not be an emergency.
3. “Accommodation school” has the same meaning as in A.R.S. § 15-101.
4. “Accredited” means approved by the:
   a. New England Commission of Institution of Higher Education,
   b. Middle States Commission of Higher Education,
   c. North Central the Higher Learning Commission,
   d. Northwest Commission on Colleges and Universities,
   e. Commission on Colleges, or
   f. Western Association of Schools and Colleges.
5. “Activity” means an action planned by a licensee and performed by an enrolled child while supervised by a staff member.
6. “Activity area” means a specific indoor or outdoor space or room of a licensed facility that is designated by a licensee for use by an enrolled child for an activity.
7. “Adaptive device” means equipment used to augment an individual’s use of the individual’s arms, legs, sight, hearing, or other physical part or function.
8. “Administrative completeness review time-frame” has the same meaning as in A.R.S. § 41-1072.
9. “Adult” means an individual who is at least 18 years of age.
10. “Age-appropriate” means consistent with a child’s age and age-related stage of physical growth and mental development.
11. “Agency” means any board, commission, department, office, or other administrative unit of the federal government, the state, or a political subdivision of the state.
12. “Applicant” means a person or governmental agency requesting one of the following:
   a. A license, or
   b. Approval of a change affecting a license under R9-5-208.
13. “Application” means the documents that an applicant is required to submit to the Department for licensure or approval of a request for a change affecting a license.

14. “Assistant teacher-caregiver” means a staff member who aids a teacher-caregiver in planning, developing, or conducting child care activities.

15. “Association” means a group of individuals other than a corporation, limited liability company, partnership, joint venture, or public school who has established a governing board and bylaws to operate a facility.

16. “Background check” means results identified in searches according to A.R.S. § 46-811(A) and consistent with the Child Care and Development Block Grant Act of 2014 (Public Law 113-186):
   1. The state sex offender registry within this state and each state where a staff member resided during the preceding five years;
   2. The state-based child abuse and neglect registries and databases within this state and each state where a staff member resided during the preceding five years;
   3. The National Crime Information Center; and

17. “Beverage” means a liquid for drinking, including water.

18. “Business organization” has the same meaning as “entity” in A.R.S. § 10-140.

19. “Calendar day” means each day, not including the day of the act, event, or default from which a designated period of time begins to run, but including the last day of the period unless it is a Saturday, Sunday, or legal holiday, in which case the period runs until the end of the next day that is not a Saturday, Sunday, or legal holiday.

20. “Calendar week” means a seven-day period beginning on Sunday at 12:00 a.m. and ending on Saturday at 11:59 p.m.

21. “C.C.P.” means Certified Childcare Professional, a credential awarded by the National Early Childhood Program Accreditation.

22. “C.D.A.” means Child Development Associate, a credential awarded by the Council for Professional Recognition.

23. “Change in ownership” means a transfer of controlling legal or controlling equitable interest and authority in a facility resulting from a sale or merger of a facility.

24. “Charter school” has the same meaning as in A.R.S. § 15-101.

25. “Child care experience” means an individual’s documented work with children in:
   a. A child care facility or a child care group home that was licensed, certified, or approved by a state in the United States or by one of the Uniformed Services of the United States;
b. A public school, a charter school, a private school, or an accommodation school;

c. A public or private educational institution authorized under the laws of another state where instruction was provided for any grade or combination of grades between pre-kindergarten and grade 12; or

d. One of the following professional fields:
   i. Nursing,
   ii. Social work,
   iii. Psychology,
   iv. Child development, or
   v. A closely-related field.

25-26. “Child care services” means the range of activities and programs provided by a licensee to an enrolled child, including personal care, supervision, education, guidance, and transportation.

26-27. “Child with special needs” means:
   a. A child with a health care provider’s diagnosis and record of a physical or mental condition that substantially limits the child in providing self-care or performing manual tasks or any other major life function such as walking, seeing, hearing, speaking, breathing, or learning;
   b. A child with a “developmental disability” as defined in A.R.S. § 36-551; or
   c. A “child with a disability” as defined in A.R.S. § 15-761.

27-28. “Clean” means to remove dirt or debris by methods such as washing with soap and water, vacuuming, wiping, dusting, or sweeping.

28-29. “Closely-related field” means any educational instruction or occupational experience pertaining to the growth, development, physical or mental care, or education of children.

29-30. “Communicable disease” has the same meaning as in A.A.C. R9-6-101.

30-31. “Compensation” means money or other consideration, including goods, services, vouchers, time, government or public expenditures, government or public funding, or another benefit, that is received as payment.

31-32. “Corporal punishment” means any physical action used to discipline a child that inflicts pain to the body of the child, or that may result in physical injury to the child.

32-33. “CPR” means cardiopulmonary resuscitation.

33-34. “Credit hour” means an academic unit earned at an accredited college or university:
   a. By attending a one-hour class session each calendar week during a semester or equivalent shorter course term, or
b. Completing practical work for a course as determined by the accredited college or university.

34.35. “Designated agent” means an individual who meets the requirements in A.R.S. § 36-889(D).

35.36. “Developmentally-appropriate” means consistent with a child’s physical, emotional, social, cultural, and cognitive development, based on the child’s age and family background and the child’s personality, learning style, and pattern and timing of growth.

36.37. “Discipline” means the on-going process of helping a child develop self-control and assume responsibility for the child’s own actions.

37.38. “Documentation” means information in written, photographic, electronic, or other permanent form.

38.39. “Electronic signature” has the same meaning as in A.R.S. § 41-351(9).

39.40. “Emergency” means a potentially life-threatening occurrence involving an enrolled child or staff member that requires an immediate response or medical treatment.

40.41. “Endanger” means to expose an individual to a situation where physical injury or mental injury to the individual may occur.

41.42. “Enrolled” means placed by a parent and accepted by a licensee for child care services.

42.43. “Evening and nighttime care” means child care services provided between the hours of 8:00 p.m. and 5:00 a.m.

43.44. “Facility” has the same meaning as “child care facility” in A.R.S. § 36-881.

44.45. “Facility director” means an individual who is designated by a licensee as the individual responsible for the daily onsite operation of a facility.

45.46. “Facility premises” means property that is:

a. Designated on an application for a license by the applicant; and

b. Licensed for child care services by the Department under A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter.

46.47. “Fall zone” means the surface under and around a piece of equipment onto which a child falling from or exiting from the equipment would be expected to land.

47.48. “Field trip” means an activity planned by a staff member for an enrolled child:

a. At a location or area that is not licensed for child care services by the Department, or

b. At a child care facility in which the child is not enrolled.

48.49. “Final construction drawings” means facility plans that include the architectural, structural, mechanical, electrical, fire protection, plumbing, and technical specifications
of the physical plant and the facility premises and that have been approved by local
government for the construction, alteration, or addition of a facility.

49. “Food” means a raw, cooked, or processed edible substance, ice, beverage, or ingredient
used or intended for use or for sale in whole or in part for human consumption, or
chewing gum.

50. “Food preparation” means processing food for human consumption by cooking or
assembling the food, but does not include distributing prepackaged food or whole fruits
or vegetables.

51. “Full-day care” means child care services provided for six or more hours per day between
the hours of 5:00 a.m. and 8:00 p.m.

52. “Governmental agency” has the same meaning as in A.R.S. § 44-7002.

53. “Guidance” means the ongoing direction, counseling, teaching, or modeling of generally
accepted social behavior through which a child learns to develop and maintain the self-
control, self-reliance, and self-esteem necessary to assume responsibilities, make daily
living decisions, and live according to generally accepted social behavior.

54. “Hazard” means a source of endangerment.

55. “Health care provider” means a physician, physician assistant, or registered nurse
practitioner.

56. “High school equivalency diploma” means:
   a. A document issued by the State Board of Education under A.R.S. § 15-702 to an
      individual who passes a general educational development test or meets the
      requirements of A.R.S. § 15-702(B);
   b. A document issued by another state to an individual who passes a general
      educational development test or meets the requirements of a state statute
      equivalent to A.R.S. § 15-702(B); or
   c. A document issued by another country to an individual who has completed that
      country’s equivalent of a 12th grade education, as determined by the Department
      based upon information obtained from American or foreign consulates or
      embassies or other governmental agencies.

57. “Hours of operation” means the specific time during a day for which a licensee is
licensed to provide child care services.

58. “Illness” means physical manifestation or signs of sickness, such as pain, vomiting, rash,
fever, discharge, or diarrhea.

59. “Immediate” or “immediately” means without restriction, delay, or hesitation.
“Inaccessible” means:
a. Out of an enrolled child’s reach, or
b. Locked.

“Infant” means:
a. A child 12 months of age or younger, or
b. A child 18 months of age or younger who is not yet walking.

“Infant care” means child care services provided to an infant.

“Infestation” means the presence of lice, pinworms, scabies, or other parasites.

“Inspection” means:
a. Examination of a facility by the Department to determine compliance with A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter;
b. Review of facility documents, records, or reports by the Department; or
c. Examination of a facility by a local governmental agency.

“Lesson plan” means a written description of the activities scheduled in each activity area for a day.

“License” means the written authorization issued by the Department to operate a facility in Arizona.

“Licensed applicator” who complies with A.A.C. R3-8-201(C).

“Licensed capacity” means the maximum number of enrolled children for whom a licensee is authorized by the Department to provide child care services in a facility or a part of a facility at any given time.

“Licensee” means a person or governmental agency to whom the Department has issued a license to operate a facility in Arizona.

“Local” means under the jurisdiction of a city or county in Arizona.

“Mat” means a foam pad that has a waterproof cover and is of sufficient size and thickness to accommodate the height, width, and weight of a reclining child’s body.

“Medication” means a substance prescribed by a physician, physician assistant, or registered nurse practitioner or available without a prescription for the treatment or prevention of illness or infestation.

“Menu” means:
a. A written description of the food that a facility provides and serves as a meal or snack, or
b. The combination of food that a facility provides and serves as a meal or snack.

“Motor vehicle” has the same meaning as in A.R.S. § 28-101.
“N.A.C.” means the National Administrator Credential, a credential issued by the National Institute of Child Care Management.

“Name” means, for an individual, the individual’s first name and the individual’s last name.

“Naptime” means any time during hours of operation, other than evening and nighttime hours, that is designated by a licensee for the rest or sleep of enrolled children.

“Neglect” has the same meaning as in A.R.S. § 8-201.

“One-year-old” means a child who is not an infant and at least 12 months of age but not yet two years of age.

“Outbreak” has the same meaning as in A.A.C. R9-6-101.

“Overall time-frame” has the same meaning as in A.R.S. § 41-1072.

“Parent” means:
   a. A natural or adoptive mother or father,
   b. A legal guardian appointed by a court of competent jurisdiction, or
   c. A “custodian” as defined in A.R.S. § 8-201.

“Part-day care” means child care services provided for fewer than six hours per day between the hours of 5:00 a.m. and 8:00 p.m.

“Perishable food” means food that becomes unfit for human consumption if not stored to prevent spoilage.

“Pesticide” has the same meaning as in A.R.S. § 32-3601.

“Pesticide label” means the written, printed, or graphic matter approved by the United States Environmental Protection Agency on, or attached to, a pesticide container.

“Physical injury” means temporary or permanent damage or impairment to a child’s body.

“Physical plant” means a building that houses a facility, or the licensed areas within a building that houses a facility, including the architectural, structural, mechanical, electrical, plumbing, and fire protection elements of the building.

“Physician” means an individual licensed as a doctor of:
   a. Allopathic medicine under A.R.S. Title 32, Chapter 13;
   b. Naturopathic medicine under A.R.S. Title 32, Chapter 14;
   c. Osteopathic medicine under A.R.S. Title 32, Chapter 17;
   d. Homeopathic medicine under A.R.S. Title 32, Chapter 29; or
   e. Allopathic, naturopathic, osteopathic, or homeopathic medicine under the law of another state.
“Physician assistant” means:
   a. An individual who is licensed under A.R.S. Title 32, Chapter 25; or
   b. An individual who is licensed as a physician assistant under the law of another state.

“Private pool” has the same meaning as “private residential swimming pool” in A.A.C. R18-5-201.

“Private school” has the same meaning as in A.R.S. § 15-101.

“Program” means a variety of activities organized and conducted by a staff member.

“Public pool” has the same meaning as “public swimming pool” in A.A.C. R18-5-201.

“Public school” has the same meaning as “school” in A.R.S. § 15-101.

“Registered nurse practitioner” means:
   a. An individual who is licensed and certified as a “registered nurse practitioner” under A.R.S. § 32-1601, or
   b. An individual who is licensed or certified as a registered nurse practitioner under the law of another state.

“Regular basis” means at recurring, fixed, or uniform intervals.

“Responsible party” means an individual or a group of individuals who:
   a. Is assigned by a public school, charter school, or governmental agency; and
   b. Has general oversight of the child care facility.

“Sanitize” means to use heat, chemical agents, or germicidal solutions to disinfect and reduce pathogen counts, including bacteria, viruses, mold, and fungi.

“School-age child” means a child who:
   a. Meets one of the following:
      i. Is five years old on or before January 1 of the current school year, or
      ii. Is five years old on or before January 1 of the most recent school year; and
   b. Meets one of the following:
      i. Attends kindergarten or a higher level program in a public, charter, accommodation, or private school during the current school year;
      ii. Attended kindergarten or a higher level program in a public, charter, accommodation, or private school during the most recent school year;
      iii. Is home-schooled at a kindergarten or higher level during the current school year; or
iv. Was home-schooled at a kindergarten or higher level during the most recent school year.

101-102. “School-age child care” means child care services provided to a school-age child.

102-103. “School campus” means the contiguous grounds of a public, charter, accommodation, or private school, including the buildings, structures, and outdoor areas available for use by children attending the school.

103-104. “School governing board” has the same meaning as “governing board” in A.R.S. § 15-101.

104-105. “Screen time” means the use of electronic media to watch television or to watch a video, a DVD, or a movie at the facility or at another location or the use of electronic media or a computer for game-playing, entertainment, communication, or educational purposes.

105-106. “Semi-public pool” has the same meaning as “semipublic swimming pool” in A.A.C. R18-5-201.

106-107. “Service classification” means one of the following:
   a. Full-day care;
   b. Part-day care;
   c. Evening and nighttime care;
   d. Infant care;
   e. One-year-old child care;
   f. Two-year-old child care;
   g. Three-year-old, four-year-old, and five-year-old child care;
   h. School-age child care; or
   i. Weekend care.

107-108. “Signatory” means an individual who is authorized by a school district governing board, school district superintendent, or governmental agency to sign a document on behalf of the school district governing board, school district superintendent, or governmental agency.

108-109. “Signed” means affixed with an individual’s signature or with a symbol representing an individual’s signature if the individual is unable to write the individual’s name.

109-110. “Sippy cup” means a lidded drinking container that is designed to be leak proof or leak-resistant and from which a child drinks through a spout or straw.
“Space utilization” means the designated use of an area within a facility for specific child care services or activities.

“Staff” or “staff member” means the same as “child care personnel” as defined in A.R.S. § 36-883.02.

“Student-aide” means an individual less than 16 years of age who is participating in an educational, curriculum-based course of study; vocational education; or occupational development program and who, without being compensated by a licensee, is present at a facility to receive instruction from and supervision by staff in the provision of child care services.

“Substantive review time-frame” has the same meaning as in A.R.S. § 41-1072.

“Supervision” means:

a. For an enrolled child, knowledge of and accountability for the actions and whereabouts of the enrolled child, including the ability to see or hear the enrolled child at all times, to interact with the enrolled child, and to provide guidance to the enrolled child; or

b. For an individual other than an enrolled child, knowledge of and accountability for the actions and whereabouts of the individual, including the ability to see and hear the individual when the individual is in the presence of an enrolled child and the ability to intervene in the individual’s actions to prevent harm to enrolled children.

“Swimming pool” has the same meaning as in A.A.C. R18-5-201.

“Teacher-caregiver” means a staff member responsible for developing, planning, and conducting child care activities.

“Teacher-caregiver-aide” means a staff member who provides child care services under the supervision of a teacher-caregiver.

“Training” means child care-related conferences, seminars, lectures, workshops, classes, courses, or instruction.

“Tummy time” means a limited period-of-time no more than 20 minutes used to allow a non-crawling infant:

i. To strengthen the infant’s head, neck, and upper body muscles; and

ii. To increase the infant’s sensory perception, visual and hearing acuity, and social and emotional interaction.

“Volunteer” means a staff member who, without compensation, provides child care services that are the responsibility of a licensee.
“Working day” means a Monday, Tuesday, Wednesday, Thursday, or Friday that is not a state holiday, federal holiday, or a statewide furlough day.

ARTICLE 2. FACILITY LICENSURE

R9-5-201. Application for a License

A. An applicant for a license shall:

1. Be at least 21 years of age;
2. If an individual, be a U.S. citizen or legal resident alien and a resident of Arizona;
3. If a corporation, association, or limited liability company, be a domestic entity or a foreign entity qualified to do business in Arizona;
4. If a partnership, have at least one partner who is a U.S. citizen or legal resident alien and a resident of Arizona;
5. Submit to the Department an application packet containing:
   a. An application on a form provided by the Department that contains:
      i. The applicant’s name;
      ii. The applicant’s date of birth;
      iii. The facility’s name, street address, city, state, zip code, mailing address, and telephone number;
      iv. The requested service classifications;
      v. Whether the applicant agrees to allow the Department to submit supplemental requests for information;
      vi. A statement that the applicant has read and will comply with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter;
      vii. A statement that the information provided in the application packet is accurate and complete; and
      viii. The applicant’s signature and date the applicant signed the application;
   b. A copy of the applicant’s:
      i. U.S. passport,
      ii. Birth certificate,
      iii. Naturalization documents, or
      iv. Documentation of legal resident alien status;
   c. A copy of the applicant’s valid fingerprint clearance card, both front and back, issued according to A.R.S. Title 41, Chapter 12, Article 3.1;
   d. A copy of the applicant’s valid background check document according to A.R.S. § 46-811(A):
d. e. A copy of the form required in A.R.S. § 36-883.02(C);

e. f. A certificate issued by the Department showing that the applicant has completed at least four hours of Department-provided training that included the Department’s role in licensing and regulating child care facilities under A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter;

f. g. Except as provided in subsection (A)(5)(i)(A)(5)(j), a site plan of the facility drawn to scale showing:
   i. The drawing scale;
   ii. The boundary dimensions of the property upon which the facility’s physical plant is located;
   iii. If more than one building is used for the facility, the location and perimeter dimensions of each building;
   iv. The location of each driveway on the property;
   v. The location and boundary dimensions of each parking lot on the property;
   vi. The location and perimeter dimensions of each outdoor activity area;
   vii. The location, type, and height of each fence and gate; and
   viii. If applicable, the location of any swimming pool on the property;

h. i. Except as provided in subsection (A)(5)(i)(A)(5)(j), a floor plan of each building to be used for child care services drawn to scale showing:
   i. The drawing scale;
   ii. The length and width dimensions for each indoor activity area;
   iii. The requested licensed capacity and applicable service classification for each indoor activity area;
   iv. The location of each diaper changing area;
   v. The location of each hand washing, utility, and three-compartment sink, toilet, urinal, and drinking fountain; and
   vi. The location and type of fire alarm system;

j. k. Except as provided in subsection (A)(5)(i)(A)(5)(j):
   i. A copy of a certificate of occupancy issued for the facility by the local jurisdiction;
   ii. Documentation from the local jurisdiction that the facility was approved for occupancy; or
iii. If the documents in subsections (A)(5)(h)(i) and (ii) are not available, the seal of an architect registered as prescribed in A.R.S. § 32-121 on the site plan required in subsection (A)(5)(g) and the floor plan required in subsection (A)(5)(h) verifying compliance with current local building and fire codes, local zoning requirements, and this Chapter;

For an applicant providing child care services to three-year-old, four-year-old, five-year-old, or school-age children in a facility located in a public school, a set of final construction drawings or a school map showing:

i. The location of each school building;

ii. The location and dimensions of each outdoor activity area to be used by enrolled children;

iii. The length and width dimensions for each indoor activity area;

iv. The requested licensed capacity and applicable service classification for each indoor activity area; and

v. The location of each hand-washing sink, toilet, urinal, and drinking fountain to be used by enrolled children;

If the facility is located within one-fourth of a mile of agricultural land:

i. The names and addresses of the owners or lessees of each parcel of agricultural land located within one-fourth mile of the facility, and

ii. A copy of an agreement complying with A.R.S. § 36-882 for each parcel of agricultural land;

The applicable fee in R9-5-206;

If the applicant is a business organization, a form provided by the Department that contains:

i. The name, street address, city, state, and zip code of the business organization;

ii. The type of business organization;

iii. The name, date of birth, title, street address, city, state, and zip code of each controlling person;

iv. A copy of the business organization’s articles of incorporation, articles of organization, partnership documents, or joint venture documents, if applicable;
v. Documentation of good standing issued by the Arizona Corporation Commission and dated no earlier than three months before the date of the application; and

vi. A statement signed by the applicant stating:

(1) That each controlling person has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and

(2) That each controlling person has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children;

m-n. If the applicant is a public school, a form provided by the Department that contains:

i. The name of the school district;

ii. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals;

iii. A statement signed by the applicant stating:

(1) That each individual in subsection (A)(5)(m)(ii) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and

(2) That each individual in subsection (A)(5)(m)(ii) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children; and

iv. A letter from the school district governing board or school district superintendent designating a signatory, if applicable;

n-o. If the applicant is a charter school, a form provided by the Department that contains:

i. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals;

ii. A statement signed by the applicant stating:
(1) That each individual in subsection (A)(5)(o)(i) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and

(2) That each individual in subsection (A)(5)(o)(i) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children; and

iii. A letter from the school district governing board in which the charter school is located, the Arizona State Board of Education, or the Arizona State Board for Charter Schools, approving the applicant to operate the charter school; and

o.p. If the applicant is a governmental agency, a form provided by the Department that contains:

i. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals;

ii. A statement signed by the applicant stating:

(1) That each individual in subsection (A)(5)(o)(i) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and

(2) That each individual in subsection (A)(5)(o)(i) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children; and

iii. A letter from the individual in the senior leadership position with the agency designating a signatory.

B. The Department requires a separate license and a separate application for:

1. Each facility owned by the same person at a different location, and

2. Each facility owned by a different person at the same location.

C. The Department does not require a separate application and license for a structure that is:

1. Located so that the structure and the facility:
   a. Share the same street address, or
b. Can be enclosed by a single unbroken boundary line that does not encompass property owned or leased by another,

2. Under the same ownership as the facility, and
3. Intended to be used as a part of the facility.

R9-5-203. Fingerprinting and Central Registry Requirements

Fingerprinting and Background Check

A. A licensee shall ensure that a staff member completes, signs, dates, and submits to the licensee, before the staff member’s starting date of employment or volunteer service:
1. The form required in A.R.S. § 36-883.02(C); and
2. If required by A.R.S. § 8-804, the form in A.R.S. § 8-804(I).

B. A licensee shall maintain documentation of a valid fingerprint clearance card issued under A.R.S. § 41-1758.03 and valid background check document issued under in A.R.S. § 46-811.

B.C. Except as provided in A.R.S. § 41-1758.03, a licensee shall ensure that each staff member submits to the licensee a copy of:
1. The staff member’s valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1; or

2. The fingerprint clearance card application that the staff member submitted to the Department of Public Safety under A.R.S. § 41-1758.02 within seven working days after the staff member’s starting date of employment or volunteer service.

Except as provided in A.R.S. § 41-1758.03, a licensee shall ensure that each staff member, before starting date of employment or volunteer service, submits to the licensee a copy of the staff member’s valid fingerprint clearance card, front and back, issued under A.R.S. Title 41, Chapter 12, Article 3.1.

C.D. A licensee shall ensure that each staff member submits to the licensee a copy of the staff member’s valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed. Valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed every six years.

D.E. If a staff member possesses a fingerprint clearance card that was issued before the staff member became a staff member at the facility, a licensee shall:
1. Contact the Department of Public Safety within seven working days after before the individual becomes a staff member to determine whether the fingerprint clearance card is valid; and

2. Document this determination, including the name of the staff member, the date of contact with the Department of Public Safety, and whether the fingerprint clearance card is valid.
F. A licensee shall ensure that each staff member submits to the licensee a copy of the staff member’s valid:

1. Background check document issued under A.R.S. § 46-811(A) within 10 working days after starting date of employment or volunteer service; and
2. Background check document each time a background check is issued or renewed every five years.

E.G. If required by A.R.S. § 8-804, before an individual’s starting date of employment or volunteer service, a licensee shall comply with the submission requirements in A.R.S. § 8-804(C) for the individual.

F.H. A licensee shall not allow an individual to be a staff member if the individual:

1. Has been denied a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1 and has not received an interim approval under A.R.S. § 41-619.55;
2. Has been denied a background check document that indicates the individual is not eligible for employment due to violations identified pursuant to A.R.S. § 46-811;
2-3. Receives an interim approval under A.R.S. § 41-619.55 but is subsequently denied a good cause exception under A.R.S. § 41-619.55 and a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1;
3-4. Is a parent or guardian of a child adjudicated to be a dependent child as defined in A.R.S. § 8-201;
4-5. Has been denied or had revoked a certificate to operate a child care group home or a license to operate a child care facility for care of children in this state or another state;
5-6. Has been denied or had revoked a certification to work in a child care facility or a child care group home in this state or another state;
6-7. If applicable, has stated on the form required in A.R.S. § 8-804(I) that the individual is currently under investigation for an allegation of abuse or neglect or has a substantiated allegation of abuse or neglect and has not subsequently received a central registry exception according to A.R.S. § 41-619.57; or
7-8. If applicable, is disqualified from employment or volunteer service as a staff member according to A.R.S. § 8-804 and has not subsequently received a central registry exception according to A.R.S. § 41-619.57.

I. Within 30 calendar days after the day of a staff member’s or volunteer’s 18th birthday, the staff member or volunteer shall provide to the licensee copies of a valid fingerprint clearance card and background check document specified in subsection (C).
J. Beginning November 1, 2021, staff members shall comply with A.R.S. § 46-811(A) and subsection (F) by November 1, 2022.

R9-5-208. Changes Affecting a License

A. At least 30 calendar days before the date of a change in a facility’s name, a licensee shall send the Department written notice of the name change and the Department shall issue an amended license that incorporates the name change but retains the anniversary date of the current license.

B. At least 30 calendar days before the date of an intended change in a facility’s service classification, space utilization, or licensed capacity, a licensee shall submit a written request for approval of the intended change to the Department that includes:

1. The licensee’s name;
2. The facility’s name, street address, city, state, zip code, mailing address, and telephone number;
3. The name, telephone number, and fax number of a point of contact for the request;
4. The facility’s license number;
5. The type of change intended:
   a. Service classification,
   b. Space utilization, or
   c. Licensed capacity;
6. A narrative description of the intended change; and
7. The following additional information, as applicable:
   a. If the intended change affects an activity area, the following information about each affected activity area, as applicable:
      i. Identification of the activity area,
      ii. Current and intended square footage,
      iii. Current and intended operating hours,
      iv. Current and intended service classification,
      v. Current and intended licensed capacity, and
      vi. Whether the activity area has or will have a diaper changing area;
   b. If the intended change is to increase licensed capacity, the square footage of the outdoor activity area; and
   c. If the intended change includes an alteration or addition to the physical plant of a licensed facility, the following, as applicable:
      i. If the facility is not located in a public school or if providing child care services to infants, one-year-old children, or two-year-old children in a
facility located in a public school, the information required in R9-5-201(A)(5)(f) and (g) R9-5-201(A)(5)(g) and (h) showing the intended change; or

ii. If the facility is located in a public school and provides child care only for three-year-old, four-year-old, or five-year-old, or school-age children, a set of final construction drawings or a school map, including the information required in R9-5-201(5)(i) R9-5-201(5)(i) showing the intended change.

C. If the intended change in subsection (B) includes an increase in the licensed capacity, a licensee shall submit the fee for an increase in licensed capacity in R9-5-206(C) with the written request for approval.

D. If requesting a diaper changing area outside an infant room or indoor activity area to allow privacy for diapering an enrolled child with special needs, submit a written request for an approval; and

1. For a license application, submit physical plant documents required by R9-5-201(A)(g) R9-5-201(A)(h) that designate the location of the proposed diaper changing area;

2. For a licensed facility, submit a drawing of the proposed diaper changing area to the Department before installing the diaper changing area. Within 30 calendar days after the date of the receipt of the request, the Department shall send written notice to the licensee of approval or disapproval. If the proposed diaper changing area:
   a. Complies with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter and provides privacy for the enrolled child with special needs, the Department shall approve the proposed diaper changing area; or
   b. Does not comply with A.R.S. Title 36, Chapter 7.1, Article 1 or this Chapter or provide privacy for the enrolled child with special needs, the Department shall provide the licensee with the requirements necessary for the Department to approve the requested change; and

3. Not use a diaper changing area located outside of an activity area until the Department approves the use of the diaper changing area;

E. The Department shall review a request submitted under subsection (B) according to R9-5-202. If the intended change is in compliance with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter and any applicable fee is submitted, the Department shall send the licensee written approval of
the requested change or an amended license that incorporates the change but retains the anniversary date of the current license.

F. A licensee shall not implement any change described under subsection (B) until the Department issues an approval or amended license.

G. At least 30 days before the date of a change in ownership of a facility, a licensee shall send the Department written notice of the change. A new owner shall obtain a new license as prescribed in R9-5-201 before the new owner begins operating the facility.

H. A licensee changing a facility’s location shall apply for a new license as prescribed in R9-5-201.

I. Within 30 calendar days after a change in a controlling person, a licensee shall send the Department written notice of the change that includes:
   1. The name of the licensee;
   2. A description of the change made;
   3. The name, title, street address, city, state, and zip code of each controlling person;
   4. A statement that each controlling person has not been denied a certificate to operate a child care group home or a license to operate a child care facility for the care of children in this state or another state;
   5. A statement that each controlling person has not had a certificate to operate a child care group home or a license to operate a child care facility revoked in this state or another state for reasons that relate to endangerment of the health and safety of children;
   6. A statement that the information provided in the written notice is accurate and complete; and
   7. The signature of the licensee.

J. If the change in subsection (I) is a change in a controlling person who is a designated agent, a licensee shall include a copy of one of the following for the designated agent:
   1. A U.S. passport,
   2. A birth certificate,
   3. Naturalization documents, or
   4. Documentation of legal resident alien status.

K. Within 30 calendar days after changing a responsible party, a licensee shall send the Department written notice of the change that includes:
   1. The name of the licensee;
   2. A description of the change made;
3. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals; and

4. A statement signed by the licensee stating:
   a. That each individual in subsection (K)(3) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and
   b. That each individual in subsection (K)(3) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children.

ARTICLE 4. FACILITY STAFF

R9-5-402. Staff Records and Reports

A. A licensee shall maintain a file for each staff member containing:
   1. The staff member’s name, date of birth, home address, and telephone number;
   2. The staff member’s starting date of employment or volunteer service;
   3. The staff member’s ending date of employment or volunteer service, if applicable;
   4. The name and telephone number of an individual to be notified in case of an emergency;
   5. The staff member’s written statement attesting to current immunity against measles, rubella, diphtheria, mumps, and pertussis;
   6. The form required in A.R.S. § 36-883.02(C);
   7. Documents required by R9-5-203(A)(2) or (B) R9-5-203;
   8. Documents required by R9-5-301;
   9. Documents required by R9-5-401, if applicable;
   10. If applicable:
       a. The form required in A.R.S. § 8-804(I),
       b. Documentation of the submission required in A.R.S. § 8-804 and the information received as a result of the submission, and
       c. Documentation of training provided by a licensee as required by R9-5-403;
   11. A copy of any current license or certification required by A.R.S. Title 36, Chapter 7.1, Article 1, or this Chapter; and
   12. Documentation of the requirements in A.R.S. § 36-883.02(D).

B. A licensee shall ensure that, for a staff member who is currently working at the facility, the staff member’s information required by:
1. Subsections (A)(1) through (11) is maintained in a single location on facility premises, and
2. Subsection (A)(12) is maintained and provided to the Department within two hours of the Department’s request.

C. A licensee shall ensure that, for an individual who is not currently working at the facility, the information required in subsections (A)(1) through (12) is:
   1. Maintained for 12 months after the date the individual last worked at the facility, and
   2. Provided to the Department within two hours of the Department’s request.
GRRC E-mail received June 14, 2022:

[1] How does this not increase the costs of regulatory compliance as stated in A.R.S. § 41-1027(A)?

SB 1504 (Fifty-Fourth Legislature, Second Regular Session) updated fingerprinting requirements for individuals that work with vulnerable populations, such as children. Specifically, SB 1504 added a requirement that child care personnel shall have a valid fingerprint clearance card (FPCC) pursuant to A.R.S. § 41-1758.07 before starting employment or volunteer work. Additionally, SB 1504 authorizes the Department of Economic Security (DES) and the Department of Health Services (DHS) to require background checks pursuant to the Child Care and Development Block Grant Act of 2014 (P.L. 113-186) (Block Grant) that are not included in the FPCC process under A.R.S. § 41-1758.07. The Department does not expect the rule changes related to when a licensee receives a valid FPCC to increase costs for a licensee and child care personnel since the rules do not add or change a fee, and the fee for obtaining a valid FPCC is established and required by the Department of Public Safety who issues FPCCs. Additionally, the Department does not expect the changes made to the rules to include a background check will increase a cost for a licensee or child care personnel; rather any increase cost related to obtaining a background check is the result of changes made by SB 1504 and the State’s receipt of Block Grant funds. A State that receives funds pursuant to the Block Grant shall require and conduct a criminal background check for child care personnel (including prospective child care staff members) that includes an FBI fingerprint check using the Integrated Fingerprint Identification System. Arizona is receiving Block Grant funds and thus is required to have background checks. See P.L. 113-186 § 658H. Accordingly, the rules simply codify something the State is already required to do. Notwithstanding the foregoing, the Department is currently working with DES, Department of Public Safety (DPS), and Department of Child Safety (DCS) to eliminate duplication of efforts and to ensure that child care personnel and volunteers required to obtain both FPCC and background check documentation do not incur any additional cost.

[2] How does this new requirement compare the current requirements found in Title 9, Chapter 3, Article 3 and Title 9, Chapter 5, Article 5

As stated, SB 1504 added a requirement that child care personnel and volunteers shall have and provide a valid FPCC to a licensee before starting employment or volunteer work. Additionally, SB 1504 allows DES and the Department to require that child care personnel and volunteers provide documentation of a valid background check consistent with requirement specified in the Block Grant.

To implement statutes, in the Chapter 3 rules, the Department:

- Adds a definition for “background check certification”;
- Adds a requirement for “documentation of a valid background check”;
- Adds a requirement for a “valid FPCC be provided to a certificate holder before starting date of residency or child care group home employment or volunteer work;
- Removes the requirement for staff members and adult residents to provide a copy of a FPCC application within seven working days after starting date of employment or volunteer work; and
- Amends requirements for a certificate holder to maintain and verify a valid FPCC to include a valid background check.

1 A.R.S. §§ 36-883.02 and 36-897.03 “child care personnel, including volunteers...shall have a valid fingerprint clearance cards issued pursuant...”

2 Background checks: state sex offender registry, the state child abuse and neglect registries and databases, the National Crime Information Center, and the National Sex Offender Registry.
Similarly, in the Chapter 5 rules, the Department:

- Adds a definition for “background check certification”;
- Adds a requirement for “documentation of a valid background check”;
- Adds a requirement for a “valid FPCC be provided to a certificate holder before starting date of residency or child care group home employment or volunteer work;
- Removes requirements for staff members and adult residents to provide a copy of a FPCC application within seven working days after starting date of employment or volunteer work; and
- Amends requirements for a licensee to maintain and verify a valid FPCC to include a valid background check.

In addition to the above, the rules were amended, as necessary, to account for changes to Section titles and the renumbering of subsections and citations. The Department does not expect the amended rules to increase costs for licensees, child care personnel, or volunteers since no fees/costs have been added or changed. The Department has considered that child care personnel and volunteers may incur a minimal cost for time taken to apply online for a background check. Many occupations require various certifications and considered a requirement necessary to ensure employment in a profession of one’s choice; the cost is cost created by one’s choice. The Department expects the benefit of having amended child care rules that significantly increase the health and safety of Arizona children is greater than the cost of these rulemakings.
### TITLE 9. HEALTH SERVICES

#### CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

Heading of Chapter permanently changed from “Department of Health Services - Day Care Centers” to “Department of Health Services - Child Care Facilities” effective October 4, 1990 (Supp. 90-4).

Heading of Chapter changed by emergency action from “Department of Health Services - Day Care Centers” to “Department of Health Services - Child Care Facilities” effective July 9, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-3).

CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

ARTICLE 1. GENERAL

R9-5-101. Definitions
In addition to the definitions in A.R.S. § 36-881, the following definitions apply in this Chapter unless otherwise specified:

1. “Abuse” has the same meaning as in A.R.S. § 8-201.
2. “Accident” means an unexpected occurrence that:
   a. Causes injury to an enrolled child,
   b. Requires attention from a staff member, and
   c. May or may not be an emergency.
3. “Accommodation school” has the same meaning as in A.R.S. § 15-101.
4. “Accredited” means approved by the:
   a. New England Commission of Institution of Higher Education,
   b. Middle States Commission of Higher Education,
   c. North Central the Higher Learning Commission,
   d. Northwest Commission on Colleges and Universities,
   e. Commission on Colleges, or
   f. Western Association of Schools and Colleges.
5. “Activity area” means an action planned by a licensee and performed by an enrolled child while supervised by a staff member.
6. “Activity area” means a specific indoor or outdoor space or room of a licensed facility that is designated by a licensee for use by an enrolled child for an activity.
7. “Adaptive device” means equipment used to augment an individual’s use of the individual’s arms, legs, sight, hearing, or other physical part or function.
8. “Administrative completeness review time-frame” has the same meaning as in A.R.S. § 41-1072.
9. “Adult” means an individual who is at least 18 years of age.
10. “Age-appropriate” means consistent with a child’s age and age-related stage of physical growth and mental development.
11. “Agency” means any board, commission, department, office, or other administrative unit of the federal government, the state, or a political subdivision of the state.
12. “Applicant” means a person or governmental agency requesting one of the following:
   a. A license, or
   b. Approval of a change affecting a license under R9-5-208.
13. “Application” means the documents that an applicant is required to submit to the Department for licensure or approval of a request for a change affecting a license.
14. “Assistant teacher-caregiver” means a staff member who aids a teacher-caregiver in planning, developing, or conducting child care activities.
15. “Association” means a group of individuals other than a corporation, limited liability company, partnership, joint venture, or public school who has established a governing board and bylaws to operate a facility.
16. “Beverage” means a liquid for drinking, including water.
17. “Business organization” has the same meaning as “entity” in A.R.S. § 10-140.
18. “Calendar day” means each day, not including the day of the act, event, or default from which a designated period of time begins to run, but including the last day of the period unless it is a Saturday, Sunday, or legal holiday, in which case the period runs until the end of the next day that is not a Saturday, Sunday, or legal holiday.
19. “Calendar week” means a seven-day period beginning on Sunday at 12:00 a.m. and ending on Saturday at 11:59 p.m.
20. “C.C.P.” means Certified Childcare Professional, a credential awarded by the National Early Childhood Program Accreditation.
22. “Change in ownership” means a transfer of controlling legal or controlling equitable interest and authority in a facility resulting from a sale or merger of a facility.
23. “Charter school” has the same meaning as in A.R.S. § 15-101.
24. “Child care experience” means an individual’s documented work with children in:
   a. A child care facility or a child care group home that was licensed, certified, or approved by a state in the United States or by one of the Uniformed Services of the United States;
   b. A public school, a charter school, a private school, or an accommodation school;
   c. A public or private educational institution authorized under the laws of another state where instruction was provided for any grade or combination of grades between pre-kindergarten and grade 12;
   d. One of the following professional fields:
      i. Nursing,
      ii. Social work,
      iii. Psychology,
      iv. Child development, or
      v. A closely-related field.
25. “Child care services” means the range of activities and programs provided by a licensee to an enrolled child, including personal care, supervision, education, guidance, and transportation.
26. “Child with special needs” means:
   a. A child with a health care provider’s diagnosis and record of a physical or mental condition that substantially limits the child in providing self-care or performing manual tasks or any other major life function such as walking, seeing, hearing, speaking, breathing, or learning;
   b. A child with a “developmental disability” as defined in A.R.S. § 36-551; or
   c. A “child with a disability” as defined in A.R.S. § 15-761.
27. “Clean” means to remove dirt or debris by methods such as washing with soap and water, vacuuming, wiping, dusting, or sweeping.
28. “Closely-related field” means any educational instruction or occupational experience pertaining to the growth, development, physical or mental care, or education of children.
29. “Communicable disease” has the same meaning as in A.A.C. R9-6-101.
30. “Compensation” means money or other consideration, including goods, services, vouchers, time, government or public expenditures, government or public funding, or another benefit, that is received as payment.
31. “C.P.R.” means cardiopulmonary resuscitation.
32. “Credit hour” means an academic unit earned at an accredited college or university:
   a. By attending a one-hour class session each calendar week during a semester or equivalent shorter course term, or
55. “Health care provider” means a physician, physician assistant, or registered nurse practitioner.

56. “High school equivalency diploma” means:
   a. A document issued by the State Board of Education under A.R.S. § 15-702 to an individual who passes a general educational development test or meets the requirements of A.R.S. § 15-702(B); or
   b. A document issued by another state to an individual who passes a general educational development test or meets the requirements of a state statute equivalent to A.R.S. § 15-702(B); or
   c. A document issued by another country to an individual who has completed that country’s equivalent of a 12th grade education, as determined by the Department based upon information obtained from American or foreign consulates or embassies or other governmental agencies.

57. “Hours of operation” means the specific time during a day for which a licensee is licensed to provide child care services.

58. “Illness” means physical manifestation or signs of sickness, such as pain, vomiting, rash, fever, discharge, or diarrhea.

59. “Immediate” or “immediately” means without restriction, delay, or hesitation.

60. “Inaccessible” means:
   a. Out of an enrolled child’s reach, or
   b. Locked.

61. “Infant” means:
   a. A child 12 months of age or younger, or
   b. A child 18 months of age or younger who is not yet walking.

63. “Infestation” means the presence of lice, pinworms, scabies, or other parasites.

64. “Inspection” means:
   a. Examination of a facility by the Department to determine compliance with A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter;
   b. Review of facility documents, records, or reports by the Department;
   c. Examination of a facility by a local governmental agency.

65. “Lesson plan” means a written description of the activities scheduled in each activity area for a day.

66. “License” means the written authorization issued by the Department to operate a facility in Arizona.

67. “Licensed applicator” who complies with A.A.C. R3-8-201(C).

68. “Licensed capacity” means the maximum number of enrolled children for whom a licensee is authorized by the Department to provide child care services in a facility or a part of a facility at any given time.

69. “Licensee” means a person or governmental agency to whom the Department has issued a license to operate a facility in Arizona.

70. “Local” means under the jurisdiction of a city or county in Arizona.

b. Completing practical work for a course as determined by the accredited college or university.

34. “Designated agent” means an individual who meets the requirements in A.R.S. § 41-351(4).

35. “Developmentally-appropriate” means consistent with a child’s physical, emotional, social, cultural, and cognitive development, based on the child’s age and family background and the child’s personality, learning style, and pattern and timing of growth.

36. “Discipline” means the on-going process of helping a child develop self-control and assume responsibility for the child’s own actions.

37. “Documentation” means information in written, photographic, electronic, or other permanent form.

38. “Electronic signature” has the same meaning as in A.R.S. § 44-7002.

39. “Emergency” means a potentially life-threatening occurrence involving an enrolled child or staff member that requires an immediate response or medical treatment.

40. “Endanger” means to expose an individual to a situation where physical injury or mental injury to the individual may occur.

41. “Enrolled” means placed by a parent and accepted by a licensee for child care services.

42. “Evening and nighttime care” means child care services provided between the hours of 6:00 p.m. and 6:00 a.m.

43. “Facility” has the same meaning as “child care facility” in A.R.S. § 36-881.

44. “Facility director” means an individual who is designated by a licensee as the individual responsible for the daily onsite operation of a facility.

45. “Facility premises” means property that is:
   a. Designated on an application for a license by the applicant; and
   b. Licensed for child care services by the Department under A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter.

46. “Fall zone” means the surface under and around a piece of equipment onto which a child falling from or exiting from the equipment would be expected to land.

47. “Field trip” means an activity planned by a staff member for an enrolled child:
   a. At a location or area that is not licensed for child care services by the Department, or
   b. At a child care facility in which the child is not enrolled.

48. “Final construction drawings” means facility plans that include the architectural, structural, mechanical, electrical, fire protection, plumbing, and technical specifications of the physical plant and the facility premises and that have been approved by local government for the construction, alteration, or addition of a facility.

49. “Food” means a raw, cooked, or processed edible substance, ice, beverage, or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

50. “Food preparation” means processing food for human consumption by cooking or assembling the food, but does not include distributing prepackaged food or whole fruits or vegetables.

51. “Full-day care” means child care services provided for six or more hours per day between the hours of 5:00 a.m. and 8:00 p.m.

52. “Governmental agency” has the same meaning as in A.R.S. § 44-7002.
9. “Private pool” has the same meaning as “private residential swimming pool” in A.A.C. R18-5-201.
10. “Private school” has the same meaning as in A.R.S. § 15-101.
11. “Program” means a variety of activities organized and conducted by a staff member.
12. “Public pool” has the same meaning as “public swimming pool” in A.A.C. R18-5-201.
14. “Registered nurse practitioner” means:
   a. An individual who is licensed and certified as a “registered nurse practitioner” under A.R.S. § 32-1601, or
   b. An individual who is licensed or certified as a registered nurse practitioner under the law of another state.
15. “Regular basis” means at recurring, fixed, or uniform intervals.
16. “Responsible party” means an individual or a group of individuals who:
   a. Is assigned by a public school, charter school, or governmental agency; and
   b. Has general oversight of the child care facility.
17. “Sanitize” means to use heat, chemical agents, or germicidal solutions to disinfect and reduce pathogen counts, including bacteria, viruses, mold, and fungi.
18. “School-age child” means a child who:
   a. Meets one of the following:
      i. Is five years old on or before January 1 of the current school year, or
      ii. Is five years old on or before January 1 of the most recent school year; and
   b. Meets one of the following:
      i. Attends kindergarten or a higher level program in a public, charter, accommodation, or private school during the current school year;
      ii. Attended kindergarten or a higher level program in a public, charter, accommodation, or private school during the most recent school year;
      iii. Is home-schooled at a kindergarten or higher level during the current school year; and
      iv. Was home-schooled at a kindergarten or higher level during the most recent school year.
19. “School-age child care” means child care services provided to a school-age child.
20. “School campus” means the contiguous grounds of a public, charter, accommodation, or private school, including the buildings, structures, and outdoor areas available for use by children attending the school.
22. “Screen time” means the use of electronic media to watch television or to watch a video, a DVD, or a movie at the facility or at another location or the use of electronic media or a computer for game-playing, entertainment, communication, or educational purposes.
23. “Semi-public pool” has the same meaning as “semipublic swimming pool” in A.A.C. R18-5-201.
24. “Service classification” means one of the following:
   a. Full-day care;
   b. Part-day care;
   c. Evening and nighttime care;
   d. Infant care;
   e. One-year-old child care;
9 A.A.C. 5

CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

f. Two-year-old child care;
g. Three-year-old, four-year-old, and five-year-old child care;
h. School-age child care; or
i. Weekend care.
107. “Signatory” means an individual who is authorized by a school district governing board, school district superintendent, or governmental agency to sign a document on behalf of the school district governing board, school district superintendent, or governmental agency.
108. “Signed” means affixed with an individual’s signature or with a symbol representing an individual’s signature if the individual is unable to write the individual’s name.
109. “Sippy cup” means a lidded drinking container that is designed to be leak proof or leak-resistant and from which a child drinks through a spout or straw.
110. “Space utilization” means the designated use of an area within a facility for specific child care services or activities.
111. “Staff” or “staff member” means the same as “child care personnel” as defined in A.R.S. § 36-883.02.
112. “Student-aide” means an individual less than 16 years of age who is participating in an educational, curriculum-based course of study; vocational education; or occupational development program and who, without being compensated by a licensee, is present at a facility to receive instruction from and supervision by staff in the provision of child care services.
113. “Substantive review time-frame” has the same meaning as in A.R.S. § 41-1072.
114. “Supervision” means:
   a. For an enrolled child, knowledge of and accountability for the actions and whereabouts of the enrolled child, including the ability to see or hear the enrolled child at all times, to interact with the enrolled child, and to provide guidance to the enrolled child; or
   b. For an individual other than an enrolled child, knowledge of and accountability for the actions and whereabouts of the individual, including the ability to see and hear the individual when the individual is in the presence of an enrolled child and the ability to intervene in the individual’s actions to prevent harm to enrolled children.
115. “Swimming pool” has the same meaning as in A.A.C. R18-5-201.
116. “Teacher-caregiver” means a staff member responsible for developing, planning, and conducting child care activities.
117. “Teacher-caregiver-aide” means a staff member who provides child care services under the supervision of a teacher-caregiver.
118. “Training” means child care-related conferences, seminars, lectures, workshops, classes, courses, or instruction.
119. “Tummy time” means a limited period-of-time no more than 20 minutes used to allow a non-crawling infant:
   a. To strengthen the infant’s head, neck, and upper body muscles; and
   b. To increase the infant’s sensory perception, visual and hearing acuity, and social and emotional interaction.
120. “Volunteer” means a staff member who, without compensation, provides child care services that are the responsibility of a licensee.
121. “Working day” means a Monday, Tuesday, Wednesday, Thursday, or Friday that is not a state holiday, federal holiday, or a statewide furlough day.

Historical Note
Adopted effective December 12, 1986 (Supp. 86-6).
Amended by adding a new paragraph (16) and renumbering accordingly effective July 7, 1988 (Supp. 88-3).
Amended by exempt rulemaking at 16 A.A.R. 1564, effective September 30, 2010 (Supp. 10-3). Amended by final expedited rulemaking at 24 A.A.R. 3429, effective December 5, 2018 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 1265 with an immediate effective date of June 3, 2020 (Supp. 20-2). The reference to the statutory definition for Electronic Signature at R9-5-101(38) has been corrected at the request of the Department (Supp. 20-3).

R9-5-102. Individuals to Act for Applicant or Licensee Regarding Document, Fingerprinting, and Department-provided Training Requirements
When an applicant or licensee is required by this Chapter to provide information on or sign documents, possess a fingerprint clearance card, or complete Department-provided training, the following shall satisfy the requirement on behalf of the applicant or licensee:

1. If the applicant or licensee is an individual, the individual;
2. If the applicant or licensee is a business organization, a designated agent who meets the requirements in A.R.S. § 36-889(D);
3. If the applicant or licensee is a public school, an individual designated in writing as signatory for the public school by the school district governing board or school district superintendent;
4. If the applicant or licensee is a charter school, the person approved to operate the charter school by the school district governing board, the Arizona State Board of Education, or the Arizona State Board for Charter Schools; and
5. If the applicant or licensee is a governmental agency, the individual in the senior leadership position with the agency or an individual designated in writing as signatory by that individual.

Historical Note
New Section made by final rulemaking at 8 A.A.R. 4060, effective November 10, 2002 (Supp. 02-3). Amended by final rulemaking at 10 A.A.R. 1282, effective September 1, 2004 (Supp. 04-1). Amended by exempt rulemaking at
ARTICLE 2. FACILITY LICENSURE

R9-5-201. Application for a License

A. An applicant for a license shall:
   1. Be at least 21 years of age;
   2. If an individual, be a U.S. citizen or legal resident alien and a resident of Arizona;
   3. If a corporation, association, or limited liability company, be a domestic entity or a foreign entity qualified to do business in Arizona;
   4. If a partnership, have at least one partner who is a U.S. citizen or legal resident alien and a resident of Arizona;
   5. Submit to the Department an application packet containing:
      a. An application on a form provided by the Department that contains:
         i. The applicant’s name;
         ii. The applicant’s date of birth;
         iii. The facility’s name, street address, city, state, zip code, mailing address, and telephone number;
         iv. The requested service classifications;
         v. Whether the applicant agrees to allow the Department to submit supplemental requests for information;
         vi. A statement that the applicant has read and will comply with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter;
         vii. A statement that the information provided in the application packet is accurate and complete; and
         viii. The applicant’s signature and date the applicant signed the application;
      b. A copy of the applicant’s:
         i. U.S. passport,
         ii. Birth certificate,
         iii. Naturalization documents, or
         iv. Documentation of legal resident alien status;
      c. A copy of the applicant’s valid fingerprint clearance card issued according to A.R.S. Title 41, Chapter 12, Article 3.1;
      d. A copy of the form required in A.R.S. § 36-883.02(C);
      e. A certificate issued by the Department showing that the applicant has completed at least four hours of Department-provided training that included the Department’s role in licensing and regulating child care facilities under A.R.S. Title 36, Chapter 7.1, Article 1, and this Chapter;
      f. Except as provided in subsection (A)(5)(i), a site plan of the facility drawn to scale showing:
         i. The drawing scale;
         ii. The boundary dimensions of the property upon which the facility’s physical plant is located;
         iii. If more than one building is used for the facility, the location and perimeter dimensions of each building;
         iv. The location of each driveway on the property;
         v. The location and boundary dimensions of each parking lot on the property;
         vi. The location and perimeter dimensions of each outdoor activity area;
         vii. The location, type, and height of each fence and gate; and
         viii. If applicable, the location of any swimming pool on the property;
      g. Except as provided in subsection (A)(5)(i), a floor plan of each building to be used for child care services drawn to scale showing:
         i. The drawing scale;
         ii. The length and width dimensions for each indoor activity area;
         iii. The requested licensed capacity and applicable service classification for each indoor activity area;
         iv. The location of each diaper changing area;
         v. The location of each hand washing, utility, toilet, urinal, and drinking fountain; and
         vi. The location and type of fire alarm system;
      h. Except as provided in subsection (A)(5)(j):
         i. A copy of a certificate of occupancy issued for the facility by the local jurisdiction;
         ii. Documentation from the local jurisdiction that the facility was approved for occupancy; or
         iii. If the documents in subsections (A)(5)(h)(i) and (ii) are not available, the seal of an architect registered as prescribed in A.R.S. § 32-121 on the site plan required in subsection (A)(5)(f) and the floor plan required in subsection (A)(5)(g) verifying compliance with current local building and fire codes, local zoning requirements, and this Chapter;
      i. For an applicant providing child care services to three-year-old, four-year-old, five-year-old, or school-age children in a facility located in a public school, a set of final construction drawings or a school map showing:
         i. The location of each school building;
         ii. The location and dimensions of each outdoor activity area to be used by enrolled children;
         iii. The length and width dimensions for each indoor activity area;
         iv. The requested licensed capacity and applicable service classification for each indoor activity area; and
         v. The location of each hand-washing sink, toilet, urinal, and drinking fountain to be used by enrolled children;
      j. If the facility is located within one-fourth of a mile of agricultural land:
         i. The names and addresses of the owners or lessees of each parcel of agricultural land located within one-fourth mile of the facility, and
         ii. A copy of an agreement complying with A.R.S. § 36-882 for each parcel of agricultural land;
      k. The applicable fee in R9-5-206;
      l. If the applicant is a business organization, a form provided by the Department that contains:
         i. The name, street address, city, state, and zip code of the business organization;
         ii. The type of business organization;
         iii. The name, date of birth, title, street address, city, state, and zip code of each controlling person;
         iv. A copy of the business organization’s articles of incorporation, articles of organization, partnership documents, or joint venture documents, if applicable;
v. Documentation of good standing issued by the Arizona Corporation Commission and dated no earlier than three months before the date of the application; and

vi. A statement signed by the applicant stating:
   (1) That each controlling person has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and
   (2) That each controlling person has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children; and

m. If the applicant is a public school, a form provided by the Department that contains:
   i. The name of the school district;
   ii. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals;
   iii. A letter from the school district governing board or school district superintendent designating a signatory, if applicable;

iv. A letter from the school district governing board or school district superintendent designating a signatory, if applicable;

n. If the applicant is a charter school, a form provided by the Department that contains:
   i. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals;
   ii. A statement signed by the applicant stating:
      (1) That each individual in subsection (A)(5)(m)(ii) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and
      (2) That each individual in subsection (A)(5)(m)(ii) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children; and
   iii. A letter from the individual in the senior leadership position with the agency designating a signatory.

The Department requires a separate license and a separate application for:
1. Each facility owned by the same person at a different location, and
2. Each facility owned by a different person at the same location.

C. The Department does not require a separate application and license for a structure that is:
   1. Located so that the structure and the facility:
      a. Share the same street address, or
      b. Can be enclosed by a single unbroken boundary line that does not encompass property owned or leased by another,
   2. Under the same ownership as the facility, and
   3. Intended to be used as a part of the facility.

Historical Note

R9-5-202. Time-frames
A. The overall time-frame for each type of approval granted by the Department under this Article is listed in Table 2.1. The applicant and the Department may agree in writing to extend the substantive review time-frame and the overall time-frame. An extension of the substantive review time-frame and the overall time-frame may not exceed 25% of the overall time-frame.

B. The administrative completeness review time-frame for each type of approval granted by the Department under this Article is listed in Table 2.1 and begins on the date that the Department receives an application packet.

1. An application packet for a license is not complete until the date, provided to the Department with the application packet or by written notice, that the child care facility is ready for an onsite licensing inspection.

2. The Department shall send a notice of administrative completeness or deficiencies to the applicant within the administrative completeness review time-frame.
A.R.S. § 36-882

45

Title 9
Arizona Administrative Code 9 A.A.C. 5

CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

a. A notice of deficiencies shall list each deficiency and the items needed to complete the application packet.

b. The administrative completeness review time-frame and the overall time-frame are suspended from the date that the notice of deficiencies is issued until the date that the Department receives all of the missing items from the applicant.

c. If an applicant for a license or an approval of a change affecting a license fails to submit to the Department all of the items listed in the notice of deficiencies within 180 calendar days after the date that the Department sent the notice of deficiencies, the Department shall consider the application or request for approval withdrawn.

3. If the Department issues a license or other approval to the applicant during the administrative completeness review time-frame, the Department shall not issue a separate written notice of administrative completeness.

C. The substantive review time-frame for each type of approval granted by the Department under this Article is listed in Table 2.1 and begins on the date of the notice of administrative completeness.

1. As part of the substantive review for a license application, the Department shall conduct an inspection that may require more than one visit to the facility.

2. As part of the substantive review for a request for approval of a change affecting a license that requires a change in the use of physical space at the facility, the Department shall conduct an evaluation of the request to determine compliance with applicable rules and statutes that may include an onsite inspection.

3. The Department shall send a license, a written notice of approval, or denial of a license or other request for approval to an applicant within the substantive review time-frame.

4. During the substantive review time-frame, the Department may make one comprehensive written request for additional information, unless the Department and the applicant have agreed in writing to allow the Department to submit supplemental requests for information.

a. If the Department determines that an applicant or a facility is not in substantial compliance with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter, the Department shall send a comprehensive written request for additional information that includes a written statement of deficiencies stating each statute and rule upon which noncompliance is based.

b. An applicant shall submit to the Department all of the information requested in the comprehensive written request for additional information and documentation of the corrections required in the statement of deficiencies, if applicable within 120 calendar days after the date of the comprehensive written request for additional information.

c. The substantive review time-frame and the overall time-frame are suspended from the date that the Department issues a comprehensive written request for additional information or a supplemental request for information until the date that the Department receives all of the information requested, including documentation of corrections required in a statement of deficiencies, if applicable.

d. If an applicant fails to submit to the Department all of the information requested in a comprehensive written request for additional information or a supplemental request for information, including documentation of corrections required in a statement of deficiencies, if applicable, within the time prescribed in subsection (C)(4)(b), the Department shall deny the application.

5. The Department shall issue a license or other approval if the Department determines that the applicant and facility are in substantial compliance with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter, and the applicant submits documentation of corrections that is acceptable to the Department for any deficiencies.

6. If the Department determines that a license or other approval is to be denied, the Department shall send to the applicant a written notice of denial complying with A.R.S. § 36-888 and stating the reasons for denial and all other information required by A.R.S. §§ 36-888 and 41-1076.

R9-5-203. Fingerprinting and Central Registry Requirements

A. A licensee shall ensure that a staff member completes, signs, dates, and submits to the licensee, before the staff member’s starting date of employment or volunteer service:

1. The form required in A.R.S. § 36-883.02(C); and
2. If required by A.R.S. § 8-804, the form in A.R.S. § 8-804(I).
B. Except as provided in A.R.S. § 41-1758.03, a licensee shall ensure that each staff member submits to the licensee a copy of:
1. The staff member’s valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1; or
2. The fingerprint clearance card application that the staff member submitted to the Department of Public Safety under A.R.S. § 41-1758.02 within seven working days after the staff member's starting date of employment or volunteer service.
C. A licensee shall ensure that each staff member submits to the licensee a copy of the staff member's valid fingerprint clearance card each time the fingerprint clearance card is issued or renewed.
D. If a staff member possesses a fingerprint clearance card that was issued before the staff member became a staff member at the facility, a licensee shall:
1. Contact the Department of Public Safety within seven working days after the individual becomes a staff member to determine whether the fingerprint clearance card is valid; and
2. Document this determination, including the name of the staff member, the date of contact with the Department of Public Safety, and whether the fingerprint clearance card is valid.
E. If required by A.R.S. § 8-804, before an individual’s starting date of employment or volunteer service, a licensee shall comply with the submission requirements in A.R.S. § 8-804(C) for the individual.
F. A licensee shall not allow an individual to be a staff member if the individual:
1. Has been denied a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1 and has not received an interim approval under A.R.S. § 41-619.55;
2. Receives an interim approval under A.R.S. § 41-619.55 but is subsequently denied a good cause exception under A.R.S. § 41-619.55 and a fingerprint clearance card under A.R.S. Title 41, Chapter 12, Article 3.1;
3. Is a parent or guardian of a child adjudicated to be a dependent child as defined in A.R.S. § 8-201;
4. Has been denied or had revoked a certificate to operate a child care group home or a license to operate a child care facility for care of children in this state or another state;
5. Has been denied or had revoked a certification to work in a child care facility or a child care group home in this state or another state;
6. If applicable, has stated on the form required in A.R.S. § 8-804(I) that the individual is currently under investigation for an allegation of abuse or neglect or has a substantiated allegation of abuse or neglect and has not subsequently received a central registry exception according to A.R.S. § 41-619.57; or
7. If applicable, is disqualified from employment or volunteer service as a staff member according to A.R.S. § 8-804 and has not subsequently received a central registry exception according to A.R.S. § 41-619.57.

Historical Note

R9-5-205. Submission of Licensure Fees
A licensee shall submit to the Department, every three years and no more than 60 calendar days before the anniversary date of the facility’s license:
1. A form provided by the Department that contains:
   a. The licensee’s name,
   b. The facility’s name and license number, and
   c. Whether the licensee intends to submit the applicable fee:
      i. With the form, or
      ii. According to the payment plan in subsection (2)(b), and
2. Either:
   a. The applicable fee in R9-5-206, or
   b. One-half of the applicable fee in R9-5-206 with the form and the remainder of the applicable fee due no later than 120 calendar days after the anniversary date of the facility’s license.

Historical Note

R9-5-206. Licensure Fees
A. Except as provided in subsection (B), the fees for an applicant submitting an application or a licensee submitting licensure fees are:
CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

1. For a child care facility with a licensed capacity of five to 10 children, $1,000;
2. For a child care facility with a licensed capacity of 11 to 59 children, $4,000; and
3. For a child care facility with a licensed capacity of 60 or more children, $7,800.

B. If an applicant or licensee participates in a Department-approved program, the Department may discount the fee in subsection (A), based on available funding.

C. The fee for a licensee requesting an increase in a facility's licensed capacity is the difference between the applicable fee in this Section for the new licensed capacity and the applicable fee in this Section for the current licensed capacity, prorated from the date the licensee submitted the request for the increase for the number of months remaining before the facility's license anniversary date specified in R9-5-205.

Historical Note

R9-5-207. Invalid License
If a licensee does not submit the licensure fee as required in R9-5-205(2), the facility license is no longer valid and the facility is operating without a license.

Historical Note

R9-5-208. Changes Affecting a License
A. At least 30 calendar days before the date of a change in a facility's name, a licensee shall send the Department written notice of the name change and the Department shall issue an amended license that incorporates the name change but retains the anniversary date of the current license.

B. At least 30 calendar days before the date of an intended change in a facility's service classification, space utilization, or licensed capacity, a licensee shall submit a written request for approval of the intended change to the Department that includes:
1. The licensee's name;
2. The facility's name, street address, city, state, zip code, mailing address, and telephone number;
3. The name, telephone number, and fax number of a point of contact for the request;
4. The facility's license number;
5. The type of change intended:
   a. Service classification,
   b. Space utilization, or
   c. Licensed capacity;
6. A narrative description of the intended change; and
7. The following additional information, as applicable:
   a. If the intended change affects an activity area, the following information about each affected activity area, as applicable:
      i. Identification of the activity area,
      ii. Current and intended square footage,
      iii. Current and intended operating hours,
      iv. Current and intended service classification,
      v. Current and intended licensed capacity, and
      vi. Whether the activity area has or will have a diaper changing area;
   b. If the intended change is to increase licensed capacity, the square footage of the outdoor activity area; and
   c. If the intended change includes an alteration or addition to the physical plant of a licensed facility, the following, as applicable:
      i. If the facility is not located in a public school or if providing child care services to infants, one-year-old children, or two-year-old children in a facility located in a public school, the information required in R9-5-201(A)(5)(f) and (g) showing the intended change;
      ii. If the facility is located in a public school and provides child care only for three-year-old, four-year-old, or five-year-old, or school-age children, a set of final construction drawings or a school map, including the information required in R9-5-201(5)(i) showing the intended change.

C. If the intended change in subsection (B) includes an increase in the licensed capacity, a licensee shall submit the fee for an increase in licensed capacity in R9-5-206(C) with the written request for approval.

D. If requesting a diaper changing area outside an infant room or indoor activity area to allow privacy for diapering an enrolled child with special needs, submit a written request for an approval; and
1. For a license application, submit physical plant documents required by R9-5-201(A)(5)(g) that designate the location of the proposed diaper changing area;
2. For a licensed facility, submit a drawing of the proposed diaper changing area to the Department before installing the diaper changing area. Within 30 calendar days after the date of the receipt of the request, the Department shall send written notice to the licensee of approval or disapproval. If the proposed diaper changing area:
   a. Complies with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter and provides privacy for the enrolled child with special needs, the Department shall approve the proposed diaper changing area; or
   b. Does not comply with A.R.S. Title 36, Chapter 7.1, Article 1 or this Chapter or provide privacy for the enrolled child with special needs, the Department shall provide the licensee with the requirements necessary for the Department to approve the requested change; and
3. Not use a diaper changing area located outside of an activity area until the Department approves the use of the diaper changing area;

E. The Department shall review a request submitted under subsection (B) according to R9-5-202. If the intended change is in compliance with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter and any applicable fee is submitted, the Department shall send the licensee written approval of the requested
change or an amended license that incorporates the change but retains the anniversary date of the current license.

F. A licensee shall not implement any change described under subsection (B) until the Department issues an approval or amended license.

G. At least 30 days before the date of a change in ownership of a facility, a licensee shall send the Department written notice of the change. A new owner shall obtain a new license as prescribed in R9-5-201 before the new owner begins operating the facility.

H. A licensee changing a facility’s location shall apply for a new license as prescribed in R9-5-201.

I. Within 30 calendar days after a change in a controlling person, a licensee shall send the Department written notice of the change that includes:
   1. The name of the licensee;
   2. A description of the change made;
   3. The name, title, street address, city, state, and zip code of each controlling person;
   4. A statement that each controlling person has not been denied a certificate to operate a child care group home or a license to operate a child care facility for the care of children in this state or another state;
   5. A statement that each controlling person has not had a certificate to operate a child care group home or a license to operate a child care facility revoked in this state or another state for reasons that relate to endangerment of the health and safety of children;
   6. A statement that the information provided in the written notice is accurate and complete; and
   7. The signature of the licensee.

J. If the change in subsection (I) is a change in a controlling person who is a designated agent, a licensee shall include a copy of one of the following for the designated agent:
   1. A U.S. passport,
   2. A birth certificate,
   3. Naturalization documents, or
   4. Documentation of legal resident alien status.

K. Within 30 calendar days after changing a responsible party, a licensee shall send the Department written notice of the change that includes:
   1. The name of the licensee;
   2. A description of the change made;
   3. The name, title, street address, city, state, and zip code of each responsible party, if the responsible party is an individual, or each individual in the group, if the responsible party is a group of individuals; and
   4. A statement signed by the licensee stating:
      a. That each individual in subsection (K)(3) has not been denied a certificate or license to operate a child care group home or child care facility in this state or another state, and
      b. That each individual in subsection (K)(3) has not had a certificate or license to operate a child care group home or child care facility revoked in this state or another state for endangering the health and safety of children.

R9-5-209. Inspections; Investigations

A. A licensee shall allow the Department immediate access to all areas of the facility affecting the health, safety, or welfare of an enrolled child or to which an enrolled child has access during hours of operation.

B. A licensee shall permit the Department to interview each staff member or enrolled child as part of an investigation.

Historical Note

R9-5-210. Denial, Revocation, or Suspension of License

A. The Department may deny, revoke, or suspend a license to operate a facility if an applicant or licensee:
   1. Provides false or misleading information to the Department;
   2. Has been denied a certificate or license to operate a child care group home or child care facility in any state, unless the denial was based on the applicant’s failure to complete the certification or licensing process according to a required time-frame;
   3. Has had a certificate or license to operate a child care group home or child care facility revoked or suspended in any state;
   4. Has been denied a fingerprint clearance card or has had a fingerprint clearance card revoked under A.R.S. Title 41, Chapter 12, Article 3.1;
   5. Fails to substantially comply with any provision in A.R.S. Title 36, Chapter 7.1, Article 1 or this Chapter; or
   6. Substantially complies with A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter, but refuses to carry out a plan acceptable to the Department to eliminate any deficiencies.

B. In determining whether to deny, suspend, or revoke a license, the Department shall consider the threat to the health and safety of children in a facility based on such factors as:
   1. Repeated violations of statutes or rules,
   2. A pattern of non-compliance,
   3. The type of violation,
   4. The severity of each violation, and
   5. The number of violations.

Historical Note

R9-5-211. Repealed

Historical Note
CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

9 A.A.C. 5

Arizona Administrative Code

Title 9

School age and the licensee has obtained and verified written permission from the enrolled child’s parent.

7. A licensee shall maintain the attendance form on facility premises for 12 months after the date of attendance.

B. A licensee shall:

1. Develop, document, and implement policies and procedures to ensure that a staff member maintains daily documentation of the presence of an enrolled child in an activity area that includes a method to account for any temporary absences of the enrolled child from the activity area; and

2. Maintain the documentation of the presence of enrolled children in an activity area required in subsection (B)1 on facility premises for 12 months after the date of the documentation.

Historical Note

R9-5-307. Suspected or Alleged Child Abuse or Neglect
A licensee shall ensure that the licensee or a staff member documents and reports all suspected or alleged cases of child abuse or neglect.

1. The licensee or staff member shall report the suspected or alleged child abuse or neglect to the Arizona Department of Child Safety or to a local law enforcement agency as prescribed in A.R.S. § 13-3620. The licensee or staff member shall also send documentation to the Arizona Department of Child Safety and any local law enforcement agency previously notified within three calendar days of the initial report, and maintain documentation of a child abuse or neglect report on facility premises for 12 months after the date of a report.

2. The licensee or staff member shall report the suspected or alleged child abuse by a staff member to the Department and to a local law enforcement agency as prescribed in A.R.S. § 13-3620. A licensee or staff member shall also send documentation to the Department and to any law enforcement agency previously notified within three calendar days of the initial report, and maintain documentation of a child abuse report on facility premises for 12 months after the date of a report.

C. A licensee shall maintain on facility premises:

1. A current fire inspection report including documentation of any repairs or corrections required by the fire inspection report; and

2. If there are gas pipes that run from a gas meter to an appliance or location on the facility premises, a current gas inspection report; and

3. A gas inspection by a licensed plumber or individual authorized by the local jurisdiction that verifies there are no gas leaks in the gas pipes that run from the gas meter to any appliance or location on facility premises; and

Historical Note

R9-5-308. Pesticides
A. A licensee shall make written pesticide information available to a parent, upon a parent’s request, at least 48 hours before a pesticide application occurs on facility premises, containing:

1. The brand, concentration, rate of application, and any use restrictions required by the label of the herbicide or specific pesticide;

2. The date and time of the pesticide application;

3. The pesticide label; and

4. The name and telephone number of the pesticide business licensee and the name of the licensed applicator providing pesticide services.

B. A licensee is exempt from the provisions in subsection (A), as prescribed by A.R.S. § 36-898(C).

Historical Note

ARTICLE 4. FACILITY STAFF
CHAPTER 5. DEPARTMENT OF HEALTH SERVICES - CHILD CARE FACILITIES

R9-5-401. Staff Qualifications
A licensee shall ensure that staff members meet the following qualifications for employment or volunteer service at a facility:

1. A facility director is 21 years of age or older and provides the licensee with documentation of one of the following:
   a. At least 24 months of child care experience, a high school or high school equivalency diploma, and
      i. Six credit hours or more in early childhood, child development, or a closely-related field from an accredited college or university; or
      ii. At least 60 actual hours of instruction, provided in conferences, seminars, lectures, or workshops in early childhood, child development, or a closely-related field, and an additional 12 hours of instruction, provided in conferences, seminars, lectures, or workshops in the area of program administration, planning, development, or management;
   b. At least 18 months of child care experience; and
      i. An N.A.C., C.D.A., or C.C.P. credential; or
      ii. At least 24 credit hours from an accredited college or university, including at least six credit hours in early childhood, child development, or a closely-related field;
   c. At least six months of child care experience and an associate degree from an accredited college or university in early childhood, child development, or a closely-related field; or
   d. At least three months of child care experience and a bachelor’s degree from an accredited college or university in early childhood, child development, or a closely-related field;

2. A facility director’s designee is 21 years of age or older and provides the licensee with documentation of one of the following:
   a. At least 12 months of child care experience, a high school or high school equivalency diploma; and
      i. Three credit hours or more in early childhood, child development, or a closely-related field from an accredited college or university; or
      ii. At least 30 actual hours of instruction, provided in conferences, seminars, lectures, or workshops in early childhood, child development, or a closely-related field;
   b. At least 12 months of child care experience; and
      i. An N.A.C., C.D.A., or C.C.P. credential; or
      ii. At least 24 credit hours from an accredited college or university, including at least six credit hours in early childhood, child development, or a closely-related field;
   c. At least six months of child care experience and an associate degree from an accredited college or university in early childhood, child development, or a closely-related field; or
   d. At least three months of child care experience and a bachelor’s degree from an accredited college or university in early childhood, child development, or a closely-related field;

3. A teacher-caregiver is 18 years of age or older and provides the licensee with documentation of one of the following:
   a. Six months of child care experience; and
      i. A high school diploma or high school equivalency diploma; or
      ii. At least 12 credit hours from an accredited college or university, including at least six credit hours in early childhood, child development, or a closely-related field;
   b. Associate or bachelor’s degree from an accredited college or university in early childhood, child development, or a closely-related field; or
   c. N.A.C., C.D.A., or C.C.P. credential;

4. An assistant teacher-caregiver is 16 years of age or older and provides the licensee with documentation of one of the following:
   a. Current and continuous enrollment in high school or a high school equivalency class;
   b. High school or high school equivalency diploma;
   c. Enrollment in vocational rehabilitation, as defined in A.R.S. § 23-501;
   d. Employment as a teacher-caregiver aide for 12 months; or
   e. Service as a volunteer in a child care facility for 12 months;

5. A teacher-caregiver aide is 16 years of age or older;

6. A student-aide provides the licensee with documentation of participation in:
   a. An educational, curriculum-based course in child development, parenting, or guidance counseling; or
   b. A vocational education or occupational development program; and

7. A volunteer is 15 years of age or older.

Historical Note
Adopted effective December 12, 1986 (Supp. 86-6). Section repealed; new Section adopted effective October 17, 1997 (Supp. 97-4). R9-5-401(1)(a) has been corrected to reflect staff qualifications on file and as published in the Code Supplement (04-4). Amended by exempt rulemaking at 16 A.A.R. 1564, effective September 30, 2010 (Supp. 10-3).

R9-5-402. Staff Records and Reports
A. A licensee shall maintain a file for each staff member containing:
   1. The staff member’s name, date of birth, home address, and telephone number;
   2. The staff member’s starting date of employment or volunteer service;
   3. The staff member’s ending date of employment or volunteer service;
   4. The name and telephone number of an individual to be notified in case of an emergency;
   5. If applicable:
      a. The form required in A.R.S. § 8-804(I),
      b. Documentation of the submission required in A.R.S. § 8-804 and the information received as a result of the submission, and
      c. Documentation of training provided by a licensee as required by R9-5-403;
   6. If applicable:
      a. The form required in A.R.S. § 36-883.02(C);
      b. A vocational education or occupational development program administration, planning, development, or management;
      c. Service as a volunteer in a child care facility for 12 months;
   7. A copy of any current license or certification required by A.R.S. Title 36, Chapter 7.1, Article 1, or this Chapter; and
R9-5-403. Training Requirements

A. A licensee shall ensure that, for a staff member who is currently working at the facility, the staff member’s information required by:
1. Subsections (A)(1) through (11) is maintained in a single location on facility premises, and
2. Subsection (A)(12) is maintained and provided to the Department within two hours of the Department’s request.

B. A licensee shall ensure that, for a staff member who is currently working at the facility, the information required in subsections (A)(1) through (12) is:
1. Maintained for 12 months after the date the individual last worked at the facility, and
2. Provided to the Department within two hours of the Department’s request.

C. A licensee shall ensure that, for an individual who is not currently working at the facility, the information required in subsections (A)(1) through (12) is:
1. Maintained for 12 months after the date the individual last worked at the facility, and
2. Provided to the Department within two hours of the Department’s request.

Historical Note
Amended by exempt rulemaking at 19 A.A.R. 2612, effective August 1, 2013 (Supp. 13-3). Amended by final expedited rulemaking at 24 A.A.R. 3429, effective December 5, 2018 (Supp. 18-4).

R9-5-403. Training Requirements

A. Within 10 calendar days of the starting date of employment or volunteer service, a licensee shall provide, and each staff member who provides child care services shall complete, training for new staff members that includes all of the following:
1. Facility philosophy and goals;
2. Names and ages of and developmental expectations for enrolled children for whom the staff member will provide child care services;
3. Health needs, nutritional requirements, any known allergies, and information about adaptive devices of enrolled children for whom the staff member will provide child care services;
4. Lesson plans;
5. Child guidance and methods of discipline;
6. Hand washing techniques;
7. Diapering techniques and toileting, if assigned to diaper changing duties;
8. Food preparation, service, sanitation, and storage, if assigned to food preparation;
9. If a staff member is assigned to feeding infants, the preparation, handling, and storage of infant formula and breast milk;
10. Recognition of signs of illness and infestation;
11. Child abuse or neglect detection, prevention, and reporting;
12. Accident and emergency procedures;
13. Staff responsibilities as required by A.R.S. Title 36, Chapter 7.1, Article 1 and this Chapter;
14. Sun safety policies and procedures;
15. Safety in outdoor activity areas;
16. Transportation procedures, if applicable; and
17. Field trip procedures, if applicable.

B. A licensee shall ensure that:
1. Each staff member who provides child care services completes 18 or more actual hours of training every 12 months after the effective date of this Chapter or the staff member’s starting date of employment or volunteer service in at least two topics listed in this subsection:
   a. Child growth and development, including:
      i. Infant growth and development, which may include sudden infant death syndrome prevention;
      ii. Developmental psychology;
      iii. Language development;
      iv. Observation and child assessment;
      v. Developmentally-appropriate activities;
      vi. Child guidance and methods of discipline which may include training on the appropriate techniques to prevent a child from harm or to prevent the child from harming others; and
   b. Health and safety issues, including:
      i. Accident and emergency procedures, including CPR and first aid for infants and children;
      ii. Recognition of signs of illness and infestation;
      iii. Nutrition and developmentally-appropriate eating habits;
      iv. Child abuse detection, reporting, and prevention;
      v. Safety of indoor and outdoor activity areas; and
      vi. Sun safety policies and procedures;
   c. Program administration, planning, development, or management; and
d. Availability of community services and resources, including those available to children with special needs; and
2. As part of the required 18 hours of training in subsection (B)(1):
   a. A staff member who has less than 12 months of child care experience before the staff member’s starting date, completes at least 12 hours in one or more of the topics in subsection (B)(1)(a) in the staff member’s first 12 months at the facility;
   b. A staff member who has 12 months or more of child care experience, completes at least six hours in one or more of the topics in subsection (B)(1)(a) every 12 months after the staff member’s starting date;
   c. A staff member who provides child care services to an infant completes at least six hours in subsection (B)(1)(a) every 12 months after the staff member’s starting date; and
   d. A facility director completes at least six hours in subsection (B)(1)(c) every 12 months after the facility director’s starting date.

C. A licensee shall ensure that documentation of a staff member’s completion of training required by subsection (A) is signed by the facility director and dated.

D. A licensee shall ensure that a staff member submits to the licensee documentation of training received as required by subsection (B) to the licensee as the training is completed.

E. A licensee shall ensure that a staff member required by R9-5-301(G) meets all of the following:
1. The staff member obtains first aid training specific to infants and children;
2. The staff member obtains CPR training specific to infants and children, which includes a demonstration of the staff member’s ability to perform CPR;
3. The staff member maintains current training in first aid and CPR; and
4. The staff member provides the licensee with a copy of the front and back of the current card issued to the staff mem-
E. In addition to maintaining the required staff-to-children ratios, a licensee shall ensure that:

1. Staff members are present on facility premises to perform facility administration, food preparation, food service, and maintenance responsibilities; and
2. Facility maintenance does not depend on the work of enrolled children.

F. If a licensee conducts swimming activities at a swimming pool, the licensee shall ensure that there is a lifeguard on the premises who has current lifeguard certification that includes a demonstration of the lifeguard’s ability to perform CPR. If the lifeguard is a staff member, the staff member cannot be counted in the staff-to-children ratios required by subsection (A).

Historical Note

R9-5-404. Staff-to-Children Ratios

A. A licensee shall ensure that at least the following staff-to-children ratios are maintained at all times when providing child care services to enrolled children:

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Staff: Children</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infants</td>
<td>1:5 or 2:11</td>
</tr>
<tr>
<td>1-year-old children</td>
<td>1:6 or 2:13</td>
</tr>
<tr>
<td>2-year-old children</td>
<td>1:8</td>
</tr>
<tr>
<td>3-year-old children</td>
<td>1:13</td>
</tr>
<tr>
<td>4-year-old children</td>
<td>1:15</td>
</tr>
<tr>
<td>5-year-old children not school-age</td>
<td>1:20</td>
</tr>
<tr>
<td>School-age children</td>
<td>1:20</td>
</tr>
</tbody>
</table>

B. A licensee shall:
1. Determine and maintain the required staff-to-children ratio for each group of enrolled children based on the age of the youngest child in the group;
2. Allow a volunteer qualified as a director, teacher-caregiver, or an assistant teacher caregiver to be counted as staff in staff-to-children ratios; and
3. Not allow a student-aide or an individual qualified as a teacher-caregiver-aide to be counted as staff in staff-to-children ratios.

C. A licensee shall ensure that:
1. When there are six or more enrolled children present in a facility, the following individuals are present in the facility:
   a. A facility director or a director’s designee who meets the requirements in R9-5-401 for a director’s designee, and
   b. One additional staff member;
2. When five or fewer enrolled children are present in a facility, the facility director or director’s designee who meets the requirements in R9-5-401 is present in the facility, and an additional staff member is available by telephone or other equally expeditious means and able to reach the facility within 15 minutes after notification; and
3. When six or more enrolled children are present in a facility, an infant is not placed for supervision with a child who is not an infant.

D. A licensee shall ensure that a staff member assigned to provide child care services to enrolled children does not perform duties that may affect the staff member’s ability to provide child care services to the enrolled children.

E. In addition to maintaining the required staff-to-children ratios, a licensee shall ensure that:
1. Staff members are present on facility premises to perform facility administration, food preparation, food service, and maintenance responsibilities; and
2. Facility maintenance does not depend on the work of enrolled children.

F. If a licensee conducts swimming activities at a swimming pool, the licensee shall ensure that there is a lifeguard on the premises who has current lifeguard certification that includes a demonstration of the lifeguard’s ability to perform CPR. If the lifeguard is a staff member, the staff member cannot be counted in the staff-to-children ratios required by subsection (A).

Historical Note

ARTICLE 5. FACILITY PROGRAM AND EQUIPMENT

R9-5-501. General Child Care Program, Equipment, and Health and Safety Standards

A. A licensee shall ensure that:
1. In addition to complying with the requirements in this Chapter, the health, safety, or welfare of an enrolled child is not placed at risk of harm;
2. Except for an enrolled school-age child, drinking water is provided sufficient for the needs of and accessible to each enrolled child in both indoor and outdoor activity areas;
3. For an enrolled school-age child, if drinking water is not accessible in an indoor or outdoor activity area, drinking water sufficient to meet the individual needs of each enrolled school-aged child is available;
4. An enrolled child is placed in an age-appropriate or developmentally-appropriate group;
5. Indoor activity areas used by enrolled children are decorated with age-appropriate articles such as mirrors, bulletin boards, pictures, and posters;
6. Age-appropriate toys, materials, and equipment are provided to enable each enrolled child to participate in an activity;
7. Storage space is provided in the facility for indoor and outdoor toys, materials, and equipment in areas accessible to enrolled children;
8. Clean clothing is available to an enrolled child when the enrolled child needs a change of clothing;
9. If a staff member places an enrolled child in a feeding chair when feeding the enrolled child:
   a. The feeding chair is constructed to prevent toppling;
   b. The tray or feeding surface of the feeding chair is smooth and free of cracks; and
   c. The staff member:
      i. Cleans the feeding chair before and after each enrolled child’s use;
      ii. Sanitizes the tray or feeding surface before and after each enrolled child’s use; and
      iii. If the feeding chair was manufactured with a safety strap, fastens the feeding chair’s safety strap while the enrolled child is in the feeding chair;
10. At least one indoor activity area in the facility is equipped with at least one cot or mat, a sheet, and a blanket, where an enrolled child can rest quietly away from other enrolled children;
11. Outdoor activities are scheduled to allow not less than 75 square feet for each enrolled child occupying the facility’s outdoor activity area or indoor activity area substituted for outdoor activity area at any time;
9 A.A.C. 5 CHILD CARE FACILITIES

36-136. **Powers and duties of director; compensation of personnel; rules; definition**

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.
2. Perform all duties necessary to carry out the functions and responsibilities of the department.
3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.
4. Administer and enforce the laws relating to health and sanitation and the rules of the department.
5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.
6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.
7. Prepare sanitary and public health rules.
8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection,
9 A.A.C. 5 CHILD CARE FACILITIES

including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may depute, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. Whenever in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for no longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.
9 A.A.C. 5 CHILD CARE FACILITIES

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fund-raising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) Baked and confectionary goods that are not potentially hazardous and that are prepared in a kitchen of a private home for commercial purposes if packaged with a label that clearly states the address of the maker, includes contact information for the maker, lists all the ingredients in the product and discloses that the product was prepared in a home. The label must be given to the final consumer of the product. If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must obtain a food handler’s card or certificate if one is issued by the local county and must register with an online registry established by the department pursuant to paragraph 13 of this subsection. For the purposes of this subdivision, "potentially hazardous" means baked and confectionary goods that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled
9 A.A.C. 5 CHILD CARE FACILITIES

at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for the preservation or storage of food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparation of food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum
9 A.A.C. 5 CHILD CARE FACILITIES

standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare food for commercial purposes pursuant to paragraph 4 of this subsection.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the
9 A.A.C. 5 CHILD CARE FACILITIES

department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. For the purposes of this section, "fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-883. Standards of care; rules; classifications

A. The director of the department of health services shall prescribe reasonable rules regarding the health, safety and well-being of the children to be cared for in a child care facility. These rules shall include standards for the following:

1. Adequate physical facilities for the care of children such as building construction, fire protection, sanitation, sleeping facilities, isolation facilities, toilet facilities, heating, ventilation, indoor and outdoor activity areas and, if provided by the facility, transportation safely to and from the premises.

2. Adequate staffing per number and age groups of children by persons qualified by education or experience to meet their respective responsibilities in the care of children.

3. Activities, toys and equipment to enhance the development of each child.

4. Nutritious and well-balanced food.

5. Encouragement of parental participation.

6. Exclusion of any person from the facility whose presence may be detrimental to the welfare of children.

B. The department shall adopt rules pursuant to title 41, chapter 6 and section 36-115.

C. Any rule that relates to educational activities, physical examination, medical treatment or immunization shall include appropriate exemptions for children whose parents object on the ground that it conflicts with the tenets and practices of a recognized church or religious denomination of which the parent or child is an adherent or member.
D. The department of health services shall conduct a comprehensive review of its rules at least once every two years. Before conducting this review, the department shall consult with agencies and organizations that are knowledgeable about the provision of child care facilities to children including:

1. The department of economic security.
2. The department of education.
3. The state fire marshal.
4. The league of Arizona cities and towns.
5. Citizen groups.

E. The department shall designate appropriate classifications and establish corresponding standards pertaining to the type of care offered. These classifications shall include:

1. Facilities offering infant care.
2. Facilities offering specific educational programs.
3. Facilities offering evening and nighttime care.

F. Rules for the operation of child care facilities shall be stated in a way that clearly states the purpose of each rule.

36-883.01. Statement of services

Each child care facility shall annually furnish to the department, and make available to parents on request, an explicit and up-to-date written statement of the services it offers.

36-883.02. Child care personnel; fingerprints; exemptions; definition

A. Except as provided in subsection B of this section, child care personnel, including volunteers, shall submit the form prescribed in subsection C of this section to the employer and shall have valid fingerprint clearance cards issued pursuant to section 41-1758.07 or shall apply for a fingerprint clearance card within seven working days of employment or beginning volunteer work.

B. Exempt from the fingerprinting requirements of subsection A of this section are parents, including foster parents and guardians, who are not employees of the child care facility and who participate in activities with their children under the supervision of and in the presence of child care personnel.

C. Applicants, licensees and child care personnel shall attest on forms that are provided by the department that:

1. They are not awaiting trial on or have never been convicted of or admitted in open court or pursuant to a plea agreement committing any of the offenses listed in section 41-1758.07, subsection B in this state or similar offenses in another state or jurisdiction.
2. They are not parents or guardians of a child adjudicated to be a dependent child as defined in section 8-201.
3. They have not been denied or had revoked a certificate to operate a child care group home or a license to operate a child care facility in this or any other state or that they have not been denied or had revoked a certification to work in a child care facility or child care group home.
9 A.A.C. 5 CHILD CARE FACILITIES

D. Employers of child care personnel shall make documented, good faith efforts to contact previous employers of child care personnel to obtain information or recommendations that may be relevant to an individual's fitness for employment in a child care facility.

E. The forms required by subsection C of this section are confidential.

F. A child care facility shall not allow a person to be employed or volunteer in the facility in any capacity if the person has been denied a fingerprint clearance card pursuant to section 41-1758.07 or has not received an interim approval from the board of fingerprinting pursuant to section 41-619.55, subsection I.

G. The employer shall notify the department of public safety if the employer receives credible evidence that any child care personnel either:

1. Is arrested for or charged with an offense listed in section 41-1758.07, subsection B.
2. Falsified information on the form required by subsection C of this section.

H. For the purposes of this section, "child care personnel" means any employee or volunteer working at a child care facility.

36-883.03 Employer-subsidized child care; immunity from liability

A. An employer that subsidizes child care on a nondiscriminatory basis to its employees through a child care facility licensed pursuant to this article or through a person or facility exempt from licensure pursuant to this article but screened pursuant to section 41-1964 or 46-321 is not liable for damages as a result of an act or omission by the child care facility, person or exempt facility unless the employer is guilty of gross negligence in recommending the child care facility, person or facility or unless the employer is acting as the owner or has an ownership interest in or is an operator of the child care facility or exempt facility.

B. For purposes of this section, an employer is deemed to be subsidizing an employee’s child care costs if the employer pays, either directly or indirectly, at least twenty-five per cent of the cost of the child care service rendered to the employee by the child care facility, person or exempt facility described in subsection A of this section.

36-883.04 Standards of care; rules; enforcement

The director shall prescribe reasonable rules and standards regarding the health, safety and well-being of children cared for in any public school child care program. These rules shall be comparable to the rules and standards prescribed pursuant to section 36-883. The director shall also prescribe rules regarding the enforcement of the standards of care including penalties for noncompliance with these standards. These enforcement and penalty provisions shall be comparable to those existing for private child care facilities.

46-811. Child care providers; background check requirements

A. The department of economic security and the department of health services may conduct background checks pursuant to the requirements of the child care and development block grant act of 2014 (P.L. 113-186) that are not included in the fingerprint clearance card process established by section 41-1758.02 for:
9 A.A.C. 5 CHILD CARE FACILITIES

1. Employees and volunteers of child care providers as defined in section 46-801.

2. All persons who are eighteen years of age or older and who work or reside in the home of a child care home provider as defined in section 46-801.

3. Child care personnel as defined in section 36-897.03.

4. Child care providers as defined in section 41-1967.01.

B. The department of economic security may enter into agreements with other government agencies to conduct the background checks required in subsection A of this section.
DEPARTMENT OF PUBLIC SAFETY (Expedited Rulemaking)
Title 13, Chapter 2

Repeal: R13-2-201, R13-2-301, R13-2-402
MEETING DATE:  July 6, 2022

TO:         Members of the Governor’s Regulatory Review Council (Council)

FROM:       Council Staff

DATE:       June 20, 2022

SUBJECT:    DEPARTMENT OF PUBLIC SAFETY
            Title 13, Chapter 2

Repeal:     R13-2-201,  R13-2-301,  R13-2-402

Summary:

This expedited rulemaking from the Department of Public Safety (Department) relates to rules in Title 13, Chapter 2 regarding Private Investigators. In this expedited rulemaking the Department seeks to address issues identified in the recent Five-Year-Review Report for these rules, which the Council approved on April 7, 2020. This rulemaking would amend and repeal rules that are redundant or otherwise no longer necessary.

The Department received approval from the rulemaking moratorium to initiate this rulemaking on December 15, 2021, and final approval to submit it to the Council on April 13, 2022.
1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

Yes. The Department states that the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A) under (3) (“corrects typographical errors, makes address or name changes or clarifies language of a rule without changing its effect”); (4) (“adopts or incorporates by reference without material change federal statutes or regulations”); (5) (“reduces or consolidates steps, procedures or processes in the rules”); and (6) (“amends or repeals rules that are outdated, redundant or otherwise no longer necessary for the operation of state government”).

2. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

Yes. The Department cites both general and specific statutory authority for the rules.

3. **Do the rules establish a new fee or contain a fee increase?**

Not applicable. The Department indicates the rules do not establish a new fee or contain a fee increase.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

Not applicable. The Department indicates they received no written comments.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

No. The Department did not make any changes to the rules between the Notice of Proposed Expedited Rulemaking and the Notice of Final Expedited Rulemaking.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Not applicable. The Department indicates there is no corresponding federal law.

7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Yes. The rules require a license, however, a general permit is not applicable for these rules pursuant to the exception under A.R.S. § 41-1037(2) (“[t]he issuance of an alternative type of permit, license or authorization is specifically authorized by state statute”). A.R.S. § 32-2411 requires a person to be licensed and working for an agency that is licensed pursuant to Article 2 of this Chapter.
8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

   No. The Department did not review or rely on a study in conducting this expedited rulemaking.

9. **Conclusion**

   In this expedited rulemaking the Department seeks to amend rules that are duplicative to statute or that provide no meaningful clarification to the authorizing statute. If approved, this rulemaking would be effective immediately upon the Department filing the Notice of Final Expedited Rulemaking and Certificate of Approval with the Secretary of State. Council staff recommends approval of this expedited rulemaking.
April 13, 2022

Ms. Nicole Sornsin, Chair
The Governor’s Regulatory Review Council
100 N 15th Ave, Ste 402
Phoenix, AZ 85007

Dear Ms. Sornsin,

The Department of Public Safety submits a Notice of Final Expedited Rulemaking for Arizona Administrative Code Title 13, Public Safety, Chapter 2, Private Investigators, Sections 101 to 105, 201 to 208, 301, 302, 304, 306, 401, 402, 404 for review and approval by the Council.

The following information is provided pursuant to R1-6-201:

1. **Close of Record Date:** The rulemaking record was closed on Wednesday April 6, 2022, pursuant to the Notice of Proposed Expedited Rulemaking following a period for public comment and an oral proceeding. The oral proceeding was held on Tuesday April 5, 2022 with no attendees from the public and no written comments received. Pursuant to A.R.S. § 41-1027 the rulemaking was posted to the Department’s website on February 17, 2022. The notice was filed pursuant to A.R.S. § 41-1047 with the Arizona Rules Oversight Committee on April 13, 2022.

2. **Relation to Five-Year Review Report:** This rulemaking is related to a five-year review approved by the Council on April 7, 2020.

3. **Establishment of new fees:** This rulemaking does not establish new fees.

4. **Establishment of fee increase:** This rulemaking does not establish a fee increase.

5. **Request for immediate effective date under A.R.S. § 41-1032:** The Department is not requesting an immediate effective date.

6. **Evaluations of studies related to the rulemaking:** No external studies related to the rulemaking were evaluated.
7. **Necessity of Full-time Employees:** The rulemaking does not require an increase in full-time employees to implement the rules.

8. **List of Documents:**
   
a. *Notice of Final Expedited Rulemaking* including the Preamble and rule text.

b. Department's rulemaking waiver request letter.

c. Governor's Office rulemaking waiver approvals.

d. Copies of letters to the legislature pursuant to expedited rulemaking.

e. Evidence of posting to the website.

Sincerely,

[Signature]

Colonel Heston Silbert
Director

Enc. 10
NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 13. PUBLIC SAFETY
CHAPTER 2. PRIVATE INVESTIGATORS

PREAMBLE

1. **Article, Part, or Section Affected (as applicable)** | **Rulemaking Action**
---|---
R13-2-101 | Amend
R13-2-102 | Amend
R13-2-103 | Amend
R13-2-104 | Amend
R13-2-105 | Amend
R13-2-201 | Repeal
R13-2-202 | Amend
R13-2-203 | Amend

R13-2-404 | Amend

2. **Citations to the agency’s statutory authority to include the authorizing statute (general) and the implementing statute (specific):**

   - **Authorizing statute:** A.R.S. § 41-1713(A)(4)
   - **Implementing statute:** A.R.S. § 32-2402(D)
3. **The effective date of the rules:**

   The effective date is as prescribed in A.R.S. § 41-1027(H).

   a. **If the agency selected a date earlier than the 60 days effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**

      The Department does not select an earlier date.

   b. **If the agency selected a date later than the 60 days effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(B):**

      The Department does not select a later date.

4. **Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the proposed rule:**

   Pursuant to A.R.S. § 41-1027, the Notice of Proposed Expedited Rulemaking was posted to the Department’s website on February 17, 2022.

5. **The agency’s contact person who can answer questions about the rulemaking:**

   Name: Michelle Riley, Licensing Manager

   Address: Arizona Department of Public Safety
   POB 6638, MD1280
   Phoenix, AZ 85005-6638

   Telephone: (602) 223-2862
   E-mail: mriley@azdps.gov

6. **An agency’s justification and reason why the rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:**

   The rules qualify under A.R.S. § 41-1027(A) by (3) correcting typographical errors, makes address or name changes or clarifies language of a rule without changing its effect. (4) Adopts or incorporates by reference without material change federal statutes or regulations. (5) Reduces or consolidates steps, procedures or processes in the rules. (6) Amends or repeals rules that are outdated, redundant or otherwise no longer necessary for the operation of state
government. The exact changes to each rules are listed as follows:

R13-2-101. The incorporated by reference information in Paragraph 2 was updated and the definition statutory reference for delinquent in Paragraph 4 was updated.

R13-2-102. The rule is amended to include credit card payments. The rule change does not increase the cost of regulatory compliance, increase a fee or reduce procedural rights and amends a rule that is outdated. Outdated forms of payment include checks and cash. Updating the rule to include credit card payment facilitates online application and payment improving the licensing process for applicants.

R13-2-103. The word associate was deleted from Paragraph (A)(3) as it is duplicative to A.R.S. § 32-2425(E) which states all new associates shall submit applications on forms prescribed by the Department. In Paragraph (B), specific addresses, telephone and website information is provided.

R13-2-104. Paragraph (A) was repealed as the text is duplicative to A.R.S. § 32-2461. Portions of Paragraph (B)(1,2,3,5,7) were repealed as the text is duplicative to A.R.S. § 32-2461; only the date of birth and the employer’s agency name and license number are more specific than the statute. Paragraph (G) was amended to include a specific address and website methods of notification. Rule 104 was renumbered accordingly.

R13-2-105(C)(3). A typographical error in the rule reference was corrected.

R13-2-201 was repealed as it is not necessary. Arizona Revised Statutes are the governing documents and there is no reason to repeat the statutes in rule when the text of the rule provides no substantive clarification or additional requirements. Applicants should always rely on the statutes first and the administrative rules secondarily for clarifying information.

R13-2-202. Paragraph (A) was amended to include specific addresses and update the statutory references. Paragraph (A)(4) was amended to remove the notary requirement as it is
not possible to notarize an online submission. Paragraph (A)(6) was repealed as the text is duplicative to A.R.S. § 32-2422(C). Paragraph (A)(7)(b) was amended to remove the information related to the fingerprints and photographs as it is duplicative to R13-2-202(A)(2,5). Paragraph (C) corrects a typographical error with the rule reference.

R13-2-203. Paragraph (A) was amended as the text was duplicative to A.R.S. § 32-2425(C). With the deletion of the first and second sentences, a clarifying sentence that does not change the substantive content was added. Paragraph (B) was repealed as the text is duplicative to A.R.S. § 32-2425(C). Portions of Paragraph (D) were amended as the text was duplicative to A.R.S. § 32-2425(A) and the date was clarified to reference to the Department. Paragraph (F) was repealed as the text was duplicative to A.R.S. § 32-2425(F). Paragraph (G) was repealed as the text was duplicative to A.R.S. § 32-2425(D).

R13-2-204. A portion of Paragraph (C) was removed as the text was duplicative to A.R.S. § 32-2407(B). Paragraph (D) was repealed as the text was duplicative to A.R.S. 32-2407(B).

R13-2-205. Paragraph (A) was repealed as the text was duplicative to A.R.S. § 32-2426(A,C). Paragraph (D) was repealed as the text was duplicative to A.R.S. § 32-2453(B). Paragraph (E) was repealed as the text was duplicative to A.R.S. § 32-2425(D).

R13-2-206. Paragraph (B) was amended to remove unnecessary text. Meeting statutory and rule requirements are a given and a separate requirement. There is no reason to include extraneous text to repeatedly reference statutes or rules in all cases.

R13-2-207. Paragraph (A) was repealed as the text is duplicative to A.R.S. § 32-2401(20). A portion of Paragraph (C) was amended to remove text duplicative and redundant to A.R.S. § 32-2441.

R13-2-208. Paragraph (B) was repealed as the text is duplicative to A.R.S. § 32-2457(A)(3).

R13-2-301. The entire rule is repealed. The rule is entirely duplicative to A.R.S. § 32-2441
and does not provide any additional clarifications or requirements.

R13-2-302. Paragraph (A) was amended to include specific addresses. Unnecessary references were removed. Paragraph (B) was amended to remove the List, A, B, and C documents. The Department does not have statutory authority to verify the applicant’s status and therefore should not be prescribing a limiting list of approved forms. Substantial federal and state law on employment verification already exists and employers and applicants should follow those applicable statutes.

R13-2-304 and R13-2-306. The rule was amended to specify specific addresses and instructions to notify the Department.

R13-2-401. A portion of Paragraph A was removed as it is duplicative to text in A.R.S. §§ 32-2422(D) which grants authority to deny, 32-2441 has no authority to deny but 32-2459 covers 32-2441 and 32-2422 granting authority to deny. Paragraph (A) received clarifying language to specify and make clear it is referencing the Private Investigator and Security Guard Hearing Board without changing the substantive content of the rule. Paragraph (B)(1,2,4,5,6) were repealed as the paragraphs exceed the Department’s authority and creates conflicting hearing standards regulated by the Private Investigator and Security Guard Hearing Board in 13 A.A.C. 12. The Board has statutory authority to conduct the hearings and supersedes the Department’s rules on this issue. Paragraph (C) was repealed as the Department has difficulty enforcing this provision and does not enforce the provision. There are circumstances in which the factor causing the applicant to be unqualified; such as, necessary experience, will be cured in less than six months. There are other circumstances; such as a criminal record, which will not be cured in six months. It is the Department’s policy to suggest to the applicant the amount of time that needs to elapse before a reapplication is made. Therefore, removing the six-month requirement will ameliorate the re-application process for the applicant potentially allowing a license to be issued quicker than the restrictive six-month timeframe.

R13-2-402. The entire rule is repealed. The rule is duplicative to A.R.S. § 32-2457(F)(2). The
rule text is but one of several possible actions the Board may recommend to the Director. Additionally, text allowing a licensee to continue to operate blanketly does not meet the statutory authorization in A.R.S. § 32-2457(A,B,C,D,E) to evaluate and issue a probation that is best adapted to the particular situation limiting the Department’s ability to take action. The statute sufficiently stands on its own with no further clarification required in rule.

R13-2-404. Portions of Paragraph (A) were repealed as the text is duplicative to A.R.S. § 32-2456(B,F). Paragraph (C) was repealed as it is an unnecessary statutory reference where the paragraph provides no clarifications.

The Department received a rulemaking moratorium waiver from the Governor’s Office on December 15, 2021 and April 13, 2022 pursuant to Executive Order.

7. **A reference to any study relevant to the rule that the agency reviewed and proposes to either rely on or not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**
   The Department did not rely on any study in its evaluation of or justification for the rule.

8. **A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rule will diminish a previous grant of authority of a political subdivision of this state:**
   The rulemaking does not diminish previous grants of authority.

9. **A summary of the economic, small business, and consumer impact:**
   Under A.R.S. § 41-1027, the expedited rulemaking is exempt from this requirement.

10. **A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:**
    There are no changes between the proposed rulemaking and the final rulemaking.

11. **An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:**
    A public comment meeting was held on April 5, 2022 with no members of the public attending. Pursuant to the Notice of Proposed Expedited Rulemaking, no written comments were received by the close of record on April 6, 2022.
12. All agency’s shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

a. Whether the rule requires a permit, whether a general permit is used, and if not, the reason why a general permit is not used:
   A general permit is not used. A.R.S. § 32-2411 requires a person to be individually licensed and working for an agency that is licensed pursuant to Article 2 of the Chapter. Additionally, Article 3 specifies registration certificates for associate and employee registration.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law, and if so, citation to the statutory authority to exceed the requirements of federal law:
   There is no applicable federal law.

c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:
   The Department did not receive any such analysis.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:
   Section R13-2-101(2) incorporates by reference the latest edition of the Federal Bureau of Investigation’s applicant fingerprint card.

14. Whether the rule previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-4-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:
   The rule was not previously made, amended, or repealed as an emergency rule.

15. The full text of the rules follows:
R13-2-101. Definitions

In addition to the definitions in A.R.S. § 32-2401, the following definitions apply to this Chapter:

1. “Branch office certificate” means a document issued by the Department to the qualifying party, authorizing the qualifying party to conduct the business of private investigations in this state at a location other than the principal place of business shown on the agency license.

3. “Corporation” or “domestic corporation” has the same meaning as in A.R.S. § 10-140.

4. “Delinquent” means an application is submitted after the license expiration date but before the expiration of the 90-day grace period as described in R13-2-204(C) A.R.S. § 32-2407(B).

5. “Foreign corporation” means a corporation for profit that is incorporated under a law other than the law of Arizona.

6. “Limited liability corporation” has the same meaning as corporation.
7. “Partnership” is an association of two or more persons who are co-owners of a business for profit organized in accordance with A.R.S. Title 29, Partnerships.

8. “Probation” means a period during which an agency or individual that has violated A.R.S. Title 32 Chapter 24 is allowed to demonstrate the ability to meet licensure requirements before the Department takes another administrative action, such as suspension or revocation.

9. “Sole proprietor” means the only owner of a business operated for profit.

R13-2-102. Application and Processing Fees

A. The application and processing fees are:
   1. Original agency license application, $250;
   2. Agency license, $400;
   3. Application for renewal of an agency license, $250;
   4. Agency restructure, $100;
   5. Agency delinquent renewal application, $100;
   6. Reinstatement of agency license, $250;
   7. Associate or employee registration certificate application, $50;
   8. Associate or employee registration certificate renewal, $50;
   9. Associate or employee registration delinquency, $10;
   10. Associate or employee registration reinstatement, $25;
   11. Replacement identification card, $10;
   12. Additional employer form, $10; and
   13. Fingerprint and digital photo fee (optional), $15.

B. In addition to any fees in subsections (A)(1), (A)(3), (A)(7), (A)(8), and (A)(12) the Department shall collect a fee in an amount necessary to cover the cost of noncriminal justice fingerprint processing for criminal history record checks under A.R.S. § 41-1750(J).

C. A person shall pay a fee by cash, cashier’s check, certified check, credit card or money order made payable to the Arizona Department of Public Safety. All fees are non-refundable except if A.R.S. § 41-1077 applies.
R13-2-103. Application Forms
A. The Department shall provide and an applicant shall use application forms for:
   1. Agency license application;
   2. Agency license renewal;
   3. Employee or associate registration certificate application; and
   4. Employee or associate registration renewal application.
B. Application forms may be obtained in person at the Phoenix Licensing Unit office 2222 W
   Encanto Blvd, Phoenix, AZ 85009, by mail request to Arizona DPS Licensing Unit POB
   6638, Mail Drop 3140, Phoenix, AZ 85005-6638, the Department’s website www.azdps.gov,
   or by telephone (602) 223-2361. An applicant may duplicate application forms.

R13-2-104. Identification Cards
A. The Department shall provide a qualified applicant with an identification card for an:
   1. Agency license;
   2. Associate registration certificate, or
   3. Employee registration certificate.
B. The Department shall include on the identification card the applicant’s:
   1. Name,
   2. Photograph,
   3. Physical description,
   4. Date of birth, and
   5. Registration certificate number,
   6. Employer’s agency name and license number, and
   7. Card’s expiration date.
C. A licensee or certificate holder shall not assign or transfer an identification card. An
   identification card is valid only during the effective dates of the license or certificate under
   which the card has been issued, and for only as long as the card holder is employed by or
   associated with the agency licensee.
D. A licensee or certificate holder shall not display a badge or shield in conjunction with
   performing the duties of a private investigator.
E.D. An employee employed by more than one licensee shall obtain an identification card for each license under which the employee is employed.

F. Upon termination of employment with an agency licensee, the employee shall surrender the employee’s identification card to the agency’s qualifying party or designee. The agency’s qualifying party shall send the identification card to the Department within five business days of the employee surrendering the license. If the employee fails to surrender the card to the qualifying party, the qualifying party shall notify the Department, in writing, within five business days of the employee’s termination of employment.

G.E. If an identification card is lost or stolen, the holder of the card shall notify the Department immediately in writing by mail request to Arizona DPS Licensing Unit, POB 6638, Mail Drop 3140, Phoenix, AZ 85005-6638 or the Department’s website www.azdps.gov. The Department shall issue a duplicate identification card upon submission of the required fee.

H.F. The Department shall not approve a fictitious name for use on an identification card.

R13-2-105. Time-frames for Making Licensing and Registration Determinations

A. The Department shall make a determination on the issuance, renewal, reinstatement, or restructure of an agency license, associate or employee registration certificate, or branch office certificate within 15 business days of the submission of an application, as follows:
   1. Five days for administrative completeness review, and
   2. Ten days for substantive review.

B. The administrative completeness review time-frame, as described in A.R.S. § 41-1072(1) and listed in subsection (A)(1), begins on the date the Department receives an application.
   1. If the application is not administratively complete when received, the Department shall send a notice of deficiency to the applicant. The deficiency notice shall state the documents and information needed to complete the application.
   2. Within 45 days from the date of the deficiency notice, the applicant shall submit to the Department the missing documents and information. The time-frame for the Department to finish the administrative completeness review is suspended from the date of the deficiency notice until the date the Department receives the missing documents and information.
3. If the applicant fails to provide the missing documents and information within the time
provided, the Department shall close the applicant’s file, and the Department considers
the application suspended. The Department shall not take further action until the required
documentation or information and, if applicable, reinstatement fees are received.

C. The substantive review time-frame, as described in A.R.S. § 41-1072(3) and listed in
subsection (A)(2), begins on the date the Department determines an application is
administratively complete.

1. During the substantive review time-frame, the Department may make one comprehensive
written request for additional information. The Department and applicant may mutually
agree in writing to allow the Department to submit supplemental requests for additional
information.

2. The applicant shall submit to the Department the additional information to complete the
application within 45 days from the date of the Department’s request. The time-frame for
the Department to complete the substantive review of the application is suspended from
the date of the request for additional information until the Department receives the
additional information.

3. Unless the Department and applicant by mutual written agreement extend the 45day
period, the Department shall close the file of an applicant who fails to submit the
additional information within 45 days. An applicant whose file is closed and who wants
to be licensed or certified shall apply again under R13-2-202 or R13-2-302.

4. When the substantive review is complete, the Department shall inform the applicant in
writing of its decision whether to license or register the applicant.

   a. The Department shall deny a license or registration if it determines that the applicant
does not meet all substantive criteria required by statute and rule. An applicant who is
denied certification may appeal the Department’s decision under A.R.S. § 41-1092 et
seq.

   b. The Department shall grant a license or registration if it determines that the applicant
meets all substantive criteria for licensure or certification required by statute and rule.
ARTICLE 2. AGENCY LICENSES

Section
R13-2-201. Agency License Eligibility
R13-2-202. Submission of Application for an Agency License
R13-2-203. Issuance of Agency License
R13-2-204. Agency License Renewal
R13-2-205. Branch Office Certificate
R13-2-206. Change of Qualifying Party
R13-2-207. Restructure of an Agency
R13-2-208. Business and Employee Names

R13-2-201. Agency License Eligibility

The qualifying party for an agency license shall meet all requirements under A.R.S. § 32-2422. All other partners or corporate officers of the agency shall register as associates and meet the requirements under A.R.S. § 32-2441.

R13-2-202. Submission of Application for an Agency License

A. Applications for an agency license may be presented in person at the Arizona Department of Public Safety Licensing office at 2222 W Encanto Blvd, Phoenix, AZ 85009, or by mail to Arizona DPS Licensing Unit POB 6638, MD3140, Phoenix, AZ 85005-6638 or the Department’s website www.azdps.gov. A qualifying party submitting an application shall ensure that the application consists of:

1. A complete application form with the information required under A.R.S. §§ 32-2423, 32-2422 and the qualifying party’s notarized signature;
2. Properly completed fingerprint card with classifiable fingerprints of the qualifying party;
3. Fees prescribed in R13-2-102;
4. Legible, notarized copy of a government-issued photo identification document for the qualifying party, such as a state identification card or motor vehicle driver license;
5. Two color photographs of the qualifying party suitable for use in making an identification card, such as passport photos or 1" x 1 1/4" facial photos;
6. Exact details as to the character and nature of the qualifying party’s required experience under A.R.S. § 32-2422.

7. If other than a sole proprietorship:
   a. Partnership agreement, articles of organization, or articles of incorporation;
   b. Applications for associate registration certificates under R13-2-302 completed by all officers, members, managers, and directors of the agency accompanied by classifiable fingerprints and two color photographs suitable for use in making an identification card such as passport photos or 1" x 1 1/4" facial photos;

8. If a foreign corporation, evidence of Arizona Corporation Commission approval to transact business in Arizona;

9. The name under which the agency will do business. The Department shall not issue a license to a corporation or limited liability corporation using a DBA unless registered with the Arizona Secretary of State’s Office for approval of the trade name and the agency submits a copy of the registration to the Department.

B. Sole proprietorships and partnerships may, but are not required to, register trade names.

C. If applicable equipment and personnel are available, and if the applicant makes a request, the Department personnel shall take an applicant’s photographs and fingerprints upon submission of the application and payment of appropriate fees as listed in R13-2-102.

R13-2-203. Issuance of Agency License

A. The Department shall notify an applicant when an agency license is ready for issuance. The applicant has 90 days from the date of notification to: The application is considered complete when the applicant satisfies the following:
   1. Pay applicable license fees;
   2. Provide a complete and accurate two-year surety bond; and
   3. For those agencies that will have employees, provide a certificate of worker’s compensation insurance.

B. If the applicant does not provide the required information within 90 days, the Department shall deny the application and all fees shall be forfeited.
An applicant for an agency license or renewal may request to pick up the license at the Department’s office in Phoenix. If no request is made, the Department shall send the license to the mailing address of the applicant.

Each agency license shall contain the name and physical address of the licensed business and the number of the license. The issue date on the license is the date the two-year surety bond starts, which is not to be earlier than the Department’s date of notification under subsection (A). The license expires two years after issuance.

The licensee shall post the license in a conspicuous place in the principal business office.

A licensee shall not assign or transfer the license.

A licensee shall notify the Department in writing within 15 business days of any change of address of the principal office.

If a licensee wishes to surrender the license before the expiration date, the Department shall not refund the license fee or any part of the license fee.

R13-2-204. Agency License Renewal

A qualifying party may submit a renewal application to the Department up to 60 days before the expiration date on the agency license.

The qualifying party shall provide, with the renewal application, the information required under R13-2-202 for the renewal of registration certificates for all associates or employees of the agency.

If an agency license is not renewed before the expiration date, the qualifying party and all partners, members, officers, associates and employees shall cease performing investigative activities subject to regulation under A.R.S. Title 32, Chapter 24, until the date the license is renewed. The qualifying party shall ensure that all identification cards with the elapsed agency license number are returned to the Department within five business days of the date the license expires.

The Department shall not renew an agency license if the application is filed more than 90 days after the expiration date. If more than 90 days have elapsed, the qualifying party who wishes to resume investigative work as a licensee shall reapply under R13-2-202.
R13-2-205. Branch Office Certificate
A. An agency licensee shall obtain a branch office certificate for any place of business other than the principal place of business by request to the Department in writing.
B. A. The branch office certificate contains the name, agency license number, license expiration date, and address of the branch office.
C. B. A branch office certificate expires on the date the agency license expires and is renewed when the agency license is renewed.
D. A licensee shall post a branch office certificate in a conspicuous place in the branch office.
E. An agency shall notify the Department in writing within 15 business days of any address change for the branch office.

R13-2-206. Change of Qualifying Party
A. If a qualifying party leaves an agency, the agency shall cease operations.
B. If the agency desires to resume operations, a qualifying party shall submit an application for a new agency license under R13-2-202 and meet the requirements under R13-2-201. The Department shall grant the license if the qualifying party meets the requirements of R13-2-201.

R13-2-207. Restructure of an Agency
A. A restructure of an agency occurs when there is a change in business legal status.
B. A. If the restructure occurs at the time of renewal, the Department shall waive the restructure fee.
C. B. If the restructure occurs at any time other than time of renewal, the agency shall pay the restructure fee. An application for restructure shall be submitted for the qualifying party and any new associates. Any new associates shall register and meet the requirements under A.R.S. § 32-2441.
D. C. To change a sole proprietorship to a partnership, the applicant shall provide a partnership agreement with notarized signatures of the partners.
E. D. To change a corporation to a partnership, the applicant shall provide documentation of the dissolving of the corporation and a partnership agreement with notarized signatures of the partners.
F.E. To change a sole proprietorship or partnership to a corporation the applicant shall provide the Articles of Incorporation bearing the approval stamp of the Arizona Corporation Commission. If the change is to a foreign corporation, the applicant shall submit documentation of Arizona Corporation Commission approval for the foreign corporation to transact business in Arizona.

G.F. To change a partnership to a sole proprietorship, the applicant shall provide documentation of the dissolving of the partnership.

R13-2-208. Business and Employee Names

A. The Department shall not grant a license to an agency with a name that includes “United States,” “U.S.,” “Federal,” or “State of Arizona,” or a name that associates the business with any governmental or law enforcement agency. The Department shall not grant a license to an individual or partnership that has a name with the word “corporation,” “corp.,” “incorporated,” “Inc.,” or “L.L.C.” unless corporate or limited liability corporation papers have been filed with the Corporation Commission. The Department shall not approve a new business name that is similar to a business name of a currently licensed firm.

B. An agency licensee and the licensee’s associates and employees shall do business and present themselves under the name used on the licensee’s application and the associate’s or employee’s identification card.

C.B. An agency licensee shall do all business under the name and address that is on file with the Department and noted on the license. The licensee shall include its name and license number on all letterhead and business cards, advertising, contracts entered into with clients, and agency correspondence.
ARTICLE 3. REGISTRATION CERTIFICATES

Section
R13-2-301. Employee and Associate Registration Certificate Eligibility
R13-2-302. Application for Registration Certificate
R13-2-304. Lost or Stolen Registration Certificate or Identification Card
R13-2-306. Change in Name of Registrant

R13-2-301. Employee and Associate Registration Certificate Eligibility
An applicant for an associate or employee registration shall meet the requirements of A.R.S. § 32-2441.

R13-2-302. Application for Registration Certificate
A. Applications for associate and employee registration certificates may be presented in person at the Department’s licensing office in 2222 W Encanto Blvd, Phoenix, AZ 85009, or by mail to the Phoenix office POB 6638, MD3140, Phoenix, AZ 85005-6638 or the Department’s website www.azdps.gov.

B. The applicant’s employer shall verify all information provided by the applicant and verify proof of U.S citizenship or legal resident status with authorization to seek employment, by examining either one document from List A of U.S. DOJ Form I-9 or one document from List B and one document from List C. After verification, the employer or the applicant may submit an application.

C. In addition to providing documentation of the requirements of A.R.S. § 32-2442, the employer shall ensure that each application includes:
1. A properly completed application form,
2. Two color photographs suitable for use in making an identification card such as passport photos or 1” x 1 1/4” facial photos, and
3. One properly completed fingerprint card with classifiable fingerprints.

D. If applicable equipment and personnel are available, and if the applicant makes a request, the Department personnel shall take an applicant’s photographs and fingerprints upon submission of the application and payment of appropriate fees as listed in R132102.
E. An associate or employee registrant shall conduct business and be identified under the name used on the application and the registration certificate. The Department shall not approve a fictitious name for use on an associate or employer registration certificate.

F. If an applicant is employed by more than one agency, the applicant shall submit an application with the words “Additional Employer” written across the top of the application, submit the fee under R13-2-102, and meet the requirements of this Section. If the applicant has submitted a fingerprint card to the Department within less than 365 days, no fingerprint card is required for the Additional Employer application. If the applicant has not submitted a fingerprint card within less than 365 days, the applicant shall submit a new fingerprint card with the application. A licensee or registrant shall provide a new fingerprint card at least every two years.

R13-2-304. Lost or Stolen Registration Certificate or Identification Card

If a registration certificate or identification card is lost or stolen, the registrant shall notify the Department immediately by mail to the Arizona DPS Licensing Unit, POB 6638, MD3140, Phoenix, AZ 85005-6638, the Department’s website www.azdps.gov or by telephone (602) 223-2361 and request a new registration certificate or identification card, provide a 1” x 1 1/4” inch photo for the identification card photos as specified in R13-2-202(A)(5) and pay the fee under R13-2-102 for a replacement card.

R13-2-306. Change in Name of Registrant

A registrant whose name has changed shall notify the Department in writing within 30 days of the name change and may request a new identification card. The registrant may mail the notification to the Arizona DPS Licensing Unit, POB 6638, MD3140, Phoenix, AZ 85005-6638 or submit the notification through the Department’s website www.azdps.gov. If the registrant comes to the Department in person at 2222 W Encanto Blvd, Phoenix, AZ 85009, the registrant shall present to the Department a government-issued photo identification card with the new name or court documents recording the name change and the fees under R13-2-102. If the registrant sends a request by mail or Internet, the registrant shall mail to provide the Department certified, notarized copies of any court documents with a 4” x 1 1/4” inch photo for the identification card photo as specified in R13-2-202(A)(5) and the applicable fee under R13-2-102.
ARTICLE 4. REGULATION

Section
R13-2-401. Denial of Agency License or Registration Certificate
R13-2-402. Probation of Agency License or Registration Certificate
R13-2-404. Complaints

R13-2-401. Denial of Agency License or Registration Certificate
A. The Department shall deny an applicant for an agency license or registration certificate if the Department determines that the applicant does not meet the requirements of A.R.S. §§ 32-2422 or 32-2441, or there are grounds for denial under A.R.S. § 322459. The Department shall notify the applicant of the reason for the denial by mail to the address listed on file at the Department. The Department shall include in the notification a statement advising the applicant that if the applicant contests denial, the applicant may do so by requesting a hearing with the Private Investigator and Security Guard Hearing Board in writing within 30 days of receiving the notification letter.
B. When the Department receives a request for a hearing:
1. The applicant will be notified of the date and the time of the hearing;
2. The Department shall set the date for hearing at least 30 days after the date of the notification letter;
3. The applicant may request an informal settlement conference under A.R.S. § 41-1092.06 by submitting the request in writing within 20 days of the scheduled hearing date;
4. The hearing will be held before the Private Investigator and Security Guard Hearing Board;
5. If the applicant does not appear at the hearing, the hearing may be held in the applicant’s absence, and the applicant shall be notified by certified mail of the hearing findings; and
6. The hearing board shall prepare recommendations for the Director. The Director may adopt the recommendations in their entirety, modify them, or may decide the case upon the record.
C. A denied applicant may reapply no earlier than six months from the date of denial.

R13-2-402. Probation of Agency License or Registration Certificate
Upon recommendation of the Private Investigator and Security Guard Hearing Board, the Director may fix a period and terms of probation to protect the public health and safety and to rehabilitate or educate the licensee or registrant. A licensee may continue to operate and a registrant may continue to perform the duties of a private investigator during the period of probation, subject to the terms established by the Director.

R13-2-404. Complaints
A. A person may make a written complaint against an entity or person regulated under this Chapter by filing the complaint with the Department. If the complaint involves an alleged violation of Arizona Revised Statutes, the Department shall investigate to ascertain whether a violation of the statute has occurred. The Department may forward a copy of the complaint to the entity or person against whom the complaint has been lodged and request the person to respond to the complaint as part of the investigation.

B. At the conclusion of the investigation, the Department shall forward a copy of the complaint, upon request, to the entity or person against whom the complaint has been lodged.

C. When an investigation is concluded, the Director may take an action listed in A.R.S. § 32-2457.
41-1713. Powers and duties of director; authentication of records

A. The director of the department shall:

1. Be the administrative head of the department.

2. Subject to the merit system rules, appoint, suspend, demote, promote or dismiss all other classified employees of the department on the recommendation of their respective division superintendent. The director shall determine and furnish the law enforcement merit system council established by section 41-1830.11 with a table of organization. The superintendent of each division shall serve at the concurrent pleasure of the director and the governor.

3. Except as provided in sections 12-119, 41-1304 and 41-1304.05, employ officers and other personnel as the director deems necessary for the protection and security of the state buildings and grounds in the governmental mall described in section 41-1362, state office buildings in Tucson and persons who are on any of those properties. Department officers may make arrests and issue citations for crimes or traffic offenses and for any violation of a rule adopted under section 41-796. For the purposes of this paragraph, security does not mean security services related to building operation and maintenance functions provided by the department of administration.

4. Make rules necessary for the operation of the department.

5. Annually submit a report of the work of the department to the governor and the legislature, or more often if requested by the governor or the legislature.

6. Appoint a deputy director with the approval of the governor.

7. Adopt an official seal that contains the words "department of public safety" encircling the seal of this state as part of its design.

8. Investigate, on receipt, credible evidence that a licensee or registrant has been arrested for, charged with or convicted of an offense that would preclude the person from holding a license or registration certificate issued pursuant to title 32, chapter 26.

9. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

10. Adopt and administer the breath, blood or other bodily substances test rules pursuant to title 28, chapter 4.

11. Develop procedures to exchange information with the department of transportation for any purpose related to sections 28-1324, 28-1325, 28-1326, 28-1462 and 28-3318.

12. Collaborate with the state forester in presentations to legislative committees on issues associated with wildfire prevention, suppression and emergency management as provided by section 37-1302, subsection B.

B. The director may:

1. Issue commissions to officers of the department.

2. Request the cooperation of the utilities, communication media and public and private agencies and any sheriff or other peace officer in any county or municipality, within the limits of their respective jurisdictions when necessary, to aid and assist in the performance of any duty imposed by this chapter.
3. Cooperate with any public or private agency or person to receive or give necessary assistance and may contract for such assistance subject to legislative appropriation controls.

4. Utilize the advice of the board and cooperate with sheriffs, local police and peace officers within the state for the prevention and discovery of crimes, the apprehension of criminals and the promotion of public safety.

5. Acquire in the name of the state, either in fee or lesser estate or interest, all real or any personal property that the director considers necessary for the department's use, by purchase, donation, dedication, exchange or other lawful means. All acquisitions of personal property pursuant to this paragraph shall be made as prescribed in chapter 23 of this title unless otherwise provided by law.

6. Dispose of any property, real or personal, or any right, title or interest in the property, when the director determines that the property is no longer needed or necessary for the department's use. Disposition of personal property shall be as prescribed in chapter 23 of this title. The real property shall be sold by public auction or competitive bidding after notice published in a daily newspaper of general circulation, not less than three times, two weeks before the sale and subject to the approval of the director of the department of administration. When real property is sold, it shall not be sold for less than the appraised value as established by a competent real estate appraiser. Any monies derived from the disposal of real or personal property shall be deposited, pursuant to sections 35-146 and 35-147, in the Arizona highway patrol fund as authorized by section 41-1752, subsection B, paragraph 6.

7. Sell, lend or lease personal property directly to any state, county or local law enforcement agency. Personal property may be sold or leased at a predetermined price without competitive bidding. Any state, county or local law enforcement agency receiving personal property may not resell or lease the property to any person or organization except for educational purposes.

8. Dispose of surplus property by transferring the property to the department of administration for disposition to another state budget unit or political subdivision if the state budget unit or political subdivision is not a law enforcement agency.

9. Lease or rent personal property directly to any state law enforcement officer for the purpose of traffic safety, traffic control or other law enforcement related activity.

10. Sell for one dollar, without public bidding, the department issued handgun or shotgun to a department officer on duty related retirement pursuant to title 38, chapter 5, article 4. Any monies derived from the sale of the handgun or shotgun to the retiring department officer shall be deposited, pursuant to sections 35-146 and 35-147, in the Arizona highway patrol fund as authorized by section 41-1752, subsection B, paragraph 6.

11. Conduct state criminal history records checks for the purpose of updating and verifying the status of current licensees or registrants who have a license or certificate issued pursuant to title 32, chapter 26. The director shall investigate, on receipt, credible evidence that a licensee or registrant has been arrested for, charged with or convicted of an offense that would preclude the person from holding a registration certificate issued pursuant to title 32, chapter 26.

12. Grant a maximum of two thousand eighty hours of industrial injury leave to any sworn department employee who is injured in the course of the employee's duty, any civilian department employee who is injured in the course of performing or assisting in law enforcement or hazardous duties or any civilian department employee who was injured as a sworn department employee rehired after August 9, 2001 and would have been eligible pursuant to this paragraph and whose work-related injury prevents the employee from performing the normal duties of that employee's classification. This industrial injury leave is in addition to any vacation or sick leave earned or granted to the employee and does not affect the employee's eligibility for any other benefits, including workers' compensation. The employee is not eligible for payment pursuant to section 38-615 of industrial injury leave that is granted pursuant to this paragraph. Subject to approval by the law enforcement merit system council, the director shall adopt rules and procedures regarding industrial injury leave hours granted pursuant to this paragraph.
13. Sell at current replacement cost, without public bidding, the department issued badge of authority to an officer of the department on the officer's promotion or separation from the department. Any monies derived from the sale of the badge to an officer shall be deposited, pursuant to sections 35-146 and 35-147, in the department of public safety administration fund to offset replacement costs.

C. The director and any employees of the department that the director designates in writing may use the seal adopted pursuant to subsection A, paragraph 7 of this section to fully authenticate any department records and copies of these records. These authenticated records or authenticated copies of records shall be judicially noticed and shall be received in evidence by the courts of this state without any further proof of their authenticity.
32-2402. Administration by director; duty to keep records; rules; criminal history records checks

A. The director of the department of public safety shall administer this chapter.

B. The department shall keep a record of:

1. All applications for licenses or registrations under this chapter.

2. All bonds and proof of workers' compensation required to be filed.

3. Whether a license, registration certificate, renewal license or renewal registration certificate has been issued under each application and bond.

4. If a license or registration certificate is revoked, suspended, cancelled or denied or if a licensee or registrant is placed on probation, the date of filing the order for revocation, suspension, cancellation, denial or probation.

5. All individuals, firms, partnerships, associations or corporations that have had a license or registration revoked, suspended or cancelled or that have been placed on probation and a written record of complaints filed against licensees and registrants.

C. The department shall maintain all records kept pursuant to subsection B of this section for at least five years. The records, except the financial statement of licensees, are open to inspection as public records.

D. The director shall adopt and enforce rules that are not in conflict with the laws of this state and that are necessary to enforce this chapter.

E. The director may conduct periodic criminal history records checks pursuant to section 41-1750 for the purpose of updating the licensing and registration status of current license and registration holders.
DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 1

Amend: Table 10
GOVERNOR’S REGULATORY REVIEW COUNCIL
ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: July 6, 2022

TO: Members of the Governor’s Regulatory Review Council (Council)

FROM: Council Staff

DATE: May 31, 2022

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 1, Department of Environmental Quality - Administration

Amend: Table 10

Summary:

This regular rulemaking from the Department of Environmental Quality relates to a Table in Title 18, Chapter 1, regarding Underground Injection Control (UIC). This rulemaking is part of a series of rulemakings the Department is doing on UIC rules. The Department provides a detailed justification for this rulemaking and information about the UIC program in Arizona in its Preamble.

In this rulemaking, the Department is seeking to amend Table 10 (Water Permit Licensing Time-Frames) to add licensing time-frames for various classes of UIC permits. The Department received an exception from the rulemaking moratorium to initiate this rulemaking on May 7, 2018 and final approval to submit it to the Council on May 31, 2022.
1. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   Yes. The Department cites both general and specific statutory authority for the Table it seeks to amend.

2. **Do the rules establish a new fee or contain a fee increase?**

   This rulemaking is part of a package of related rulemakings, one of which contains a fee increase. However, this particular rulemaking that seeks to amend a Table does not establish a new fee or contain a fee increase. Rather, this rulemaking adds licensing time-frames for various types of Underground Injection Control (UIC) permits.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

   The Department did not review or rely on a study in conducting this regular rulemaking.

4. **Summary of the agency’s economic impact analysis:**

   The rulemaking addressed in the Department’s Economic, Small Business, and Consumer Impact Statement consists of 72 new sections, as well as amendments to existing sections at 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5, and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01. The Arizona statutes mandate that the Department establish the UIC program through rule. 42 U.S.C. 300h et seq. authorizes the Environmental Protection Agency to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

   The Department states that Arizona’s program adoption will allow primacy to rest with the Department, which is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow the Department to issue better permits faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

   The Department states that the purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required in A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.
6. **What are the economic impacts on stakeholders?**

The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to the Department’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Department further states that despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. The Department stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the UIC program primacy.

The Department believes that this program will protect the environment and will result in a positive impact for all stakeholders. Further, it believes that individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy and the community.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department did not make any changes to the Table between the Notice of Proposed Rulemaking and the Notice of Final Rulemaking.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

As indicated in Item 11 of the Preamble, the Department received three comments on this rulemaking. The Department adequately responded to the comments it received.

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

The Table being amended does not require a permit, although it references licensing timeframes.
10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

As the Department indicates in Item 12b of the Preamble, federal law is applicable to the UIC program, which is authorized under federal law. However, the licensing time frames that are the subject of this rulemaking do not have any corresponding federal law.

11. **Conclusion**

In this regular rulemaking, the Department seeks to amend a Table to add licensing time-frames for various types of UIC permits. The Department is seeking the standard 60-day delayed effective date for this rulemaking. Council staff recommends approval of this rulemaking.
May 17, 2022

Nicole Sornsin, Chair
Governor’s Regulatory Review Council
100 N. 15th Ave., #305
Phoenix, AZ 85007

Re: Rulemaking for Title 18. Environmental Quality, Chapter 1. Department of Environmental Quality-Administration, Article 5; Title 18. Environmental Quality, Chapter 9. Department of Environmental Quality-Water Pollution Control, Articles 1 and 6; Title 18. Environmental Quality, Chapter 14. Department of Environmental Quality-Permit and Compliance Fees, Article 1.

Dear Chair Sornsin:

The Arizona Department of Environmental Quality (ADEQ) hereby submits three (3) Notices of Final Rulemaking to the Governor’s Regulatory Review Council (GRRC) for its consideration and approval at the Council meeting scheduled for July 6, 2022. This rulemaking supports ADEQ’s primacy pursuit of the Safe Drinking Water Act’s Underground Injection Control program.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information Required by A.A.C. R1-6-201(A)

   a. The public record closed for all rules on February 14, 2022 at 11:59 p.m.
   b. The rulemaking activity does not relate to a five-year review report.
   c. The rulemaking activity does establish a new fee; please see A.R.S. § 49-203(A)(9) for authority.
   d. Fees proposed to be established through this rulemaking have no state precedent. However, the analogous Federally-administered program, unto which ADEQ is pursuing primacy over, did not have fees.
   e. An immediate effective date is not requested.
   f. The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency’s evaluation of or justification for the rule.
g. The Department's preparer of the economic, small business, and consumer impact statement will notify the Joint Legislative Budget Committee of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3)(a).

h. A list of documents enclosed under A.A.C. R1-6-201(A)(2) through (8), which are enclosed as electronic copies:
   1. This cover letter.
   2. Three Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule. The preambles contain:
      a. an economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055;
      b. comments received by the agency, both written and oral, concerning the proposed rule;
      c. the general and specific statutes authorizing the rule, including relevant statutory definitions;
   3. No analyses were submitted to the agency regarding the rule’s impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
   4. No material is incorporated by reference in this rulemaking;
   5. A list of statutes or other rules referred to in the definitions.

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov, if you have any questions.

Sincerely,

Misael Cabrera, P.E.
Director

Enclosures
NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY
ADMINISTRATION

PREAMBLE

1. Article, Part, or Section Affected (as applicable) Rulemaking Action
   Table 10 Amend

2. Citations to the agency’s statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):
   Authorizing statute: A.R.S. §§ 49-203(A)(6)
   Implementing statute: A.R.S. § 49-257.01

3. The effective date for the rules:
   [SEC. OF STATE TO FILL IN]

4. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:
   Notice of Rulemaking Docket Openings: 25 A.A.R. 2491 (September, 27, 2019)
   26 A.A.R. 2003 (September 25, 2020)
   27 A.A.R. 1592 (October 1, 2021)
   Notice of Proposed Rulemaking: 28 A.A.R. 16 (January 7, 2022)

5. The agency’s contact person who can answer questions about the rulemaking:
   Name: Jon Rezabek
   Address: Arizona Department of Environmental Quality
   Water Quality Division
   1110 W. Washington Street
   Phoenix, Arizona 85007
   Telephone: (602) 771-8219
   E-mail: rezabek.jon@azdeq.gov
   Website: https://azdeq.gov/UIC

6. An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:
   General Explanation of this Rulemaking:
   The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. §§ 49-203(A)(6) and 49-257.01(A) to adopt a permit program for underground injection control (UIC), as administered under the Safe Drinking Water Act (SDWA; 42 U.S.C. § 300h et seq.). Per the conditional enactment in proposed rule R18-9-A602(A), any UIC rules promulgated by the State of Arizona shall not have the force and effect of law until the U.S. Environmental Protection Agency (EPA) approves the transfer of primary enforcement authority (referred to herein as “Primacy”) through EPA’s publication of a final rule granting ADEQ Primacy in the Federal Register (see 40 CFR § 145.31). ADEQ first attempted this process in the late 1990s; but those efforts ultimately failed due to insufficient statutory and regulatory authority to develop the program. In 2018 Senate Bill 1494 was passed, giving ADEQ the requisite statutory authority to promulgate a state-level UIC program as required to obtain primacy approval.

   In this action, ADEQ proposes new regulatory framework to articulate compliance expectations, mandate regulatory duties, and identify certain rights of those regulated through the Arizona UIC program. On May 7, 2018, the Governor’s Office approved an exemption to the rulemaking moratorium in Executive Order 2018-02 so ADEQ can proceed with this rulemaking.

   Associated Rulemakings
The Arizona UIC program is a regulatory program with associated fees and licensing time frames (LTF). A.A.C. R1-1-103(D)(4) states, “...an agency shall file only one Chapter per notice for any rulemaking activity.” In adherence to the rule, the program component of the Arizona UIC program, which amends A.A.C. Title 18, Chapter 9, is a separate Notice of Proposed Rulemaking filed contemporaneously with this rulemaking, which amends A.A.C. Title 18, Chapter 1. Furthermore, the Arizona UIC program amendments to the ADEQ water quality fee rules (A.A.C. Title 18, Chapter 14) has also been filed contemporaneously with the program and LTF amendments.

**What is Underground Injection?**

An injection well is used to place fluid underground into porous geologic formations. These underground formations may range from deep sandstone or limestone, to a shallow soil layer. Injected fluids may include water, wastewater, brine (salt water), or water mixed with chemicals.

**What is a well?**

A well is a bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or a subsurface fluid distribution system.

**What does the Federal UIC program do?**

The UIC program protects Underground Sources of Drinking Water (USDW) through the regulation of injection wells. USDWs are:

- aquifers or portions of aquifers that:
  1. supply public water systems; or
  2. contain a sufficient quantity of ground water to supply a public water system; and
     a. currently supply drinking water for human consumption, or
     b. contain fewer than 10,000 mg/l total dissolved solids; and
  3. are not aquifers exempted under the UIC program.

**How does the UIC program protect USDWs?**

The UIC program requires injected fluids stay within the well or the intended injection zone. The program also regulates fluids that are directly or indirectly injected into a USDW by prohibiting the movement of fluid containing any contaminant into USDWs, if the presence of that contaminant may cause a violation of any primary drinking water regulation or may otherwise adversely affect the health of persons.

**What are the different well classifications in the UIC program?**

**Class I**

Class I wells are used to inject hazardous and non-hazardous wastes into deep, isolated rock formations. Class I wells are disposal wells used by the petroleum refining, metal production, chemical production, pharmaceutical production, commercial disposal, food production and municipal wastewater treatment industries (amongst others) to dispose. These deep well injections release fluids into formations below USDWs, usually formations separated by multiple geologic strata from USDWS and often times at depths thousands of feet below the surface.

**Class II**

Class II wells are used exclusively to inject fluids associated with oil and natural gas production. Class II wells fall into one of the following three categories: disposal wells, enhanced recovery wells and hydrocarbon storage wells. Class II fluids are primarily brines (salt water) that are brought to the surface while producing oil and gas. Brines are separated from hydrocarbons at the surface and reinjected into the same or similar underground formations for disposal. Enhanced recovery wells utilize fluids consisting of brine, freshwater, steam, polymers, or carbon dioxide that are injected into oil-bearing formations to recover residual oil and in limited applications, natural gas. Hydrocarbon storage wells inject liquid hydrocarbons into underground formations (such as salt caverns) where they are stored, generally, as part of the U.S. Strategic Petroleum Reserve.

**Class III**
Class III wells are used to inject fluids for the purpose of dissolving and then extracting minerals. Production wells, which bring mining fluids to the surface, are not regulated under the UIC program. Class III wells are used to mine Uranium, Salt, Copper and Sulfur. Class III injection requirements isolate fluids from underground sources of drinking water.

Class IV
Class IV wells are used to inject hazardous or radioactive wastes into or above a geologic formation that contains a USDW. In 1984, EPA banned the use of Class IV injection wells. ADEQ will continue this ban upon primacy. These wells may only operate as part of an EPA or state authorized ground water clean-up action. Less than 32 waste clean-up sites with Class IV wells exist in the United States.

Class V
Class V wells are used to inject non-hazardous fluids underground. Most Class V wells are used to dispose of wastes into or above USDWs. This disposal can pose a threat to ground water quality if not managed properly. The different types of Class V wells pose various threats. Most Class V wells are shallow disposal systems that depend on gravity to drain fluids directly in the ground. Over 20 well subtypes fall into the Class V category. There are more than 650,000 Class V wells estimated to operate in the United States. Most of these Class V wells are unsophisticated shallow disposal systems such as stormwater drainage wells, septic system leach fields and agricultural drainage wells.

Class VI
Class VI wells are used to inject carbon dioxide (CO2) into deep rock formations. This long-term underground storage is called geologic sequestration (GS). Geologic sequestration refers to technologies to reduce CO2 emissions to the atmosphere and mitigate climate change.

Stakeholder Composition
Arizona currently has five (5) individual EPA UIC program permits operating within the state boundaries (not including Indian lands), all of which are for Class III wells for the purpose of extracting salts and copper. The three companies operating the five permits are Morton Salt, Inc., Excelsior Mining Arizona, Inc. and Florence Copper, Inc.

The UIC program applies to a large number of Class V injection wells through the programs “authorization by rule.” Class V authorization by rule includes initial inventorying, operators meeting a set of criteria, including a general standard to not cause fluids to move in such a way where a USDW would receive a pollutant above the standards in Table 1. Examples of Arizona Class V wells include drywells, aquifer storage recharge wells, septic systems serving greater than 20 people per day or that have a design flow of over 3,000 gallons per day and stimulation injection wells for the purpose of inert gas extraction (See proposed rule R18-9-A604(E) in Section 13 below for more examples of Class V wells). Furthermore, through stakeholder outreach, ADEQ has become aware of Arizona municipalities that are interested in developing Class I municipal wastewater disposal wells.

What has been the stakeholder process thus far for this rulemaking?
Statutory authority for program pursuit was passed into law through Senate Bill 1494 in 2018 at A.R.S. §§ 49-257 and 49-257.01. An exemption memo was received from the Governor’s Office in May of 2018. Since those events, ADEQ has been reaching out to UIC stakeholders throughout the state in a pre-rulemaking process known internally as “informal rulemaking”. Informal rulemaking involves developing and setting internal goals for what the rulemaking should achieve. ADEQ has held nine (9) stakeholder meetings, either presenting to stakeholders, receiving stakeholder input or both. Tribal consultation presentations were conducted three times in May 2019. Tribal correspondence has been addressed throughout the informal rulemaking phase as well.

The nine stakeholder meetings were designed to inform the regulated community of ADEQ’s progress in pursuing Primacy, as well as, explaining and presenting drafts of the state rules being developed for the ultimate purpose of administering the program. In November 2019 and November 2020, stakeholders were given access to drafts of the “program rule”. Afterwards, ADEQ solicited hundreds of comments from the regulated community, addressing and analyzing each one. Some comments led to changes in rule language, while others were determined to be inapplicable or unnecessary. All comments received were considered and are
appreciated by the Agency. A repository of materials and events can be viewed on ADEQ’s “Stakeholder Materials” page for the UIC rulemaking. That webpage can be found here: https://azdeq.gov/UIC

Choosing LTFs for the UIC Program
The LTFs that are proposed in this rulemaking (pursuant to A.R.S. §§ 41-1072 et seq.) are in accordance with those established for the Aquifer Protection Permits (See Table 10. Water Permit Licensing Time-frames). UIC permit applications that ADEQ does not anticipate being significantly complicated (Classes II, III and V) are provided 35 days for the administrative completeness review and 186 days for the substantive review. This makes the overall time frame 221 days. If a public hearing is required, 45 days are added to the substantive review and the overall time frame, making 231 and 266 days, respectively. UIC permit applications that ADEQ anticipates being significantly complicated (Area Permits, Classes I and VI) are provided 35 days for the administrative completeness review and 249 days for the substantive review. This makes the overall time frame 284 days. If a public hearing is required, 45 days are added to the substantive review and the overall time frame, making 294 and 329 days, respectively. UIC Modifications are provided the same LTFs as a normal application would be allotted.

ADEQ is exploring the regulation of drywells under the UIC program as Class V wells “authorized by rule.” At primacy, ADEQ will take administrative and enforcement authority over the UIC program, including Class V regulation of drywells.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to make sure the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:
   Not applicable.

8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:
   Not applicable.

9. The economic, small business, and consumer impact statement:
   This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

   A. An identification of the rulemaking:
   The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

   Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

   Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

   Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better
permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

B. A summary of the EIS:

**General Impacts**

The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for-service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

**Specific Impacts**

While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

**Stakeholder Process**

ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

State government agencies
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

Political subdivisions
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Mines
- Mineral Extraction Companies
- Businesses which utilize drywells

The General Public
The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

2. **Part II - Individual Stakeholder Summaries/Calculations:**
This section outlines ADEQ’s analyses of the estimated costs and beneﬁts of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection.
and underground injection control.

**ADEQ**
ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule
3.2

**Political Subdivisions**
Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalinization plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.

The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**Privately-Owned Business**
Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.
However, and as mentioned above, the benefits to privately-owned businesses include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**General Public**
The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, a positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

**E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:**
ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

**F. A statement of the probable impact of the rules on small business:**
In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. **An identification of the small business subject to the rules:**
   Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventorying, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. **The administrative and other costs required for compliance with the rules:**
   Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. **A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:**
   a. Establishing less stringent compliance or reporting requirements in the rule for small businesses:
Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.

b. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:
Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.

c. Consolidating or simplifying the rule’s compliance or reporting requirements for small businesses:
Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.

d. Establishing performance standards for small businesses to replace design or operational standards in the rule:
Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.

e. Exempting small businesses from any or all requirements of the law:
Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:
As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.
Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.

H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142.

10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:
No changes.

11. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:
Comment 1: Resource Extraction Industry Member – Class VI Licensing Time Frames
What time frame is anticipated for the Class VI application?
ADEQ Response 1:
ADEQ appreciates the comment. Class VI Carbon Sequestration applications are considered to be significantly complicated in nature. In the proposed UIC Licensing Time Frame rules, Class VI applications (along with Area and Class I applications) have been allotted more licensing time than the not significantly complicated group of classes (Class II, III and V). The significantly complicated group has been allotted 35 days for administrative completeness, 249 for substantive review and 284 days for the overall time frame. The not significantly complicated group has been allotted 35 days for administrative completeness, 186 for substantive review and 221 days for the overall time frame.

Comment 2: Tribal Interest Group
The proposed Licensing Time Frame rules do not explain what is meant by “significantly complicated” versus “not significantly complicated” or how this determination was reached.

ADEQ Response 2:
ADEQ appreciates the comment. The UIC program regulates six classes of injection wells which are based on the characteristics of the fluids injected and the placement of the injectate in relation to Underground Sources of Drinking Water (USDW). Well construction, injection depth, design requirements, and operating techniques vary among well classes. Some wells are used to inject fluids into formations below USDWs, while others involve injection into or above USDWs. The proposed rules set out specific permitting and performance standards for each class of wells. In determining the licensing time frames for the prospective UIC applications, these factors were considered.

ADEQ categorized the prospective UIC applications by class into two categories, “significantly complicated” and “not significantly complicated”. Area, Class I, and Class VI wells are categorized as “significantly complicated”, while Class II, Class III, and Class Vs were determined to be “not significantly complicated”. The following facts were relied upon in distinguishing “significantly complicated” prospective UIC applications from the “not significantly complicated”:

1. Area Permits
   a. Comprised of multiple injection wells.
   b. Increased aquifer stresses induced by multiple injection wells.
   c. Larger Area of Review and zone of endangering influence due to the induced aquifer stress.
   d. Delineation of the Area of Review would likely require numerical groundwater modeling.
   e. Area Class III solution mining wells require hydraulic capture of lixiviant and pregnant leachate solution to prevent migration into USDWs.
   f. Monitoring networks are often a function of the Area of Review and complexity of the hydrogeology.
   g. Class III Area Permits may require an Aquifer Exemption and subsequent aquifer restoration for closure. This closure strategy will require sophisticated geochemical modeling and long-term closure and post closure monitoring.

2. Class I wells are typically deep wells that inject waste into formations below a USDW.
   a. Class I wells allow injection far below the lowermost USDW (injection zones typically range from 1,700 to more than 10,000 feet in depth).
   b. The well design for injection is complex due to the depth of the injection, high injection pressures, and often complex geochemical reactions associated with the injectate and formation water.
   c. In Arizona, Class I wells are authorized to inject non-hazardous industrial waste, municipal wastewater, and radioactive waste. Hazardous waste injection is prohibited in Arizona.
   d. A Class I well requires a multilayered well design to prevent fluids from entering USDWs.
   e. Operation, monitoring, and testing is critical for ensuring that injected wastewater is fully confined. These functions become more complex at greater well depths.
   f. Seismic hazards must be thoroughly evaluated due to the deeper injection zone.

3. Class VI wells are used to sequester carbon in deep geologic formations.
   a. Although CO2 is initially captured as a gas, it is compressed into a supercritical fluid (a relatively dense fluid intermediate to a gas and a liquid) before injection and remains in that state due to high pressures in the underground formation.
   b. The CO2 is injected through specially designed wells into geologic formations, typically a half a mile or more below the Earth's surface.
b. CO2 can be physically trapped in the pore space, trapped through a chemical reaction of the CO2 with rock and water, dissolved into the existing fluid within the formation, or absorbed onto organic material or go through other chemical transformations. Geologic sequestration may take place over hundreds of years after injection, ultimately resulting in permanent storage of the CO2.

c. The well design for injection is complex due to the depth of injection, high injection pressures, and often complex geochemical reactions associated with the injectate and formation water.

d. Mechanical integrity testing must be performed routinely to verify long-term well stability and operations.

e. Complex reservoir modeling must be conducted to determine the long-term storage capacity of a given geologic formation.

f. Groundwater monitoring can also be complex due to the longevity of the sequestration operations and area of influence of the injectate.

Comment 3: Tribal Interest Group
Arizona law requires strict compliance with LTFs and issues penalties for exceedances. Additionally, EPA’s current guidance (see EPA’s informational webpage on Class V wells; see also 40 C.F.R. § 146.5(e); see also 40 C.F.R. 144.81) notes that by regulation, Class V wells can actually be complex under certain circumstances. This should be reflected in ADEQ’s UIC Program as well.

ADEQ Response 3:
ADEQ appreciates the comment. Arizona law requires state agencies that issue licenses to comply with licensing time frames (LTFs) (see A.R.S. § 41-1072 et seq.). While there may be complex Class V permits, ADEQ does not feel the additional time that comes with the "complex" category is needed.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:
The following statutes contain therein prescribed matters applicable to the rules in this rulemaking: A.R.S. §§ 49-203(A)(6) and (9); 49-257; 49-257.01.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:
The subject matter of this Notice of Proposed Rulemaking does not require permits, but does reference permits. See Section 12(A) in the Notice of Proposed Rulemaking for Title 18, Chapter 9, Article 6 filed contemporaneously with this Notice of Proposed Rulemaking for a discussion on permits and general permits for Arizona’s UIC Program.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:
Federal law is applicable to the UIC program. The UIC is a program authorized under the SDWA (see 42 U.S.C. § 300h et seq.), originally administered by EPA. The UIC program administration can be transferred from EPA to a state through a delineated process known as Primacy (see 42 U.S.C. § 300h-1). However, the addition of LTFs in 18 A.A.C. 1 for the purposes of the UIC program has no corresponding federal law.

c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:
No comparative analyses were submitted.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:
No material was incorporated by reference in this rulemaking under A.R.S. § 41-1028, nor otherwise.

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:
Not applicable.

15. The full text of the rules follows:

1. A request for a public hearing allows the Department 60 days to publish the notice of public hearing and for the official comment period. Forty-five business days are added to the substantive review time-frame.

2. Each request for an alternative design, installation, or operational feature under R18-9-A312(G) to a Type 4 General Permit adds eight business days to the substantive review time-frame.

3. EPA reserves the right, under 40 CFR 123.44, to take 90 days to supply specific grounds for objection to a draft or proposed permit when a general objection is filed within the review period. The first 30 days run concurrently with the Department’s official comment period. Forty-five business days will be added to the substantive review time-frame to allow for the EPA review.

4. If a request for a variance is submitted to the Department, 40 CFR 124.62 requires that specific variances are subject to review by EPA. Under 40 CFR 123.44, EPA reserves the right to take 90-days to approve or deny the variance. Sixty-four business days will be added to the substantive review time-frame to allow for the EPA review.

5. “Major facility” means any NPDES “facility or activity” classified as such by the EPA in conjunction with the Director.

6. “Minor facility” means any facility that is not classified as a major facility.
The economic, small business, and consumer impact statement:
This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An identification of the rulemaking:
The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

B. A summary of the EIS:
General Impacts
The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.
Specific Impacts
While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

Stakeholder Process
ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

State government agencies
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

Political subdivisions
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Mines
- Mineral Extraction Companies
- Businesses which utilize drywells
The General Public

The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

D. Cost/benefit analysis

1. Part I - Cost/Benefit Stakeholder Matrix:

</tr>
</tbody>
</table>

A. State and Local Government Agencies

ADEQ
- Costs of supporting and implementing a new regulatory program
- Ensuring underground sources of drinking water supply or aquifers are better protected from pollution.
- Compliance with state and federal law.
- Support of ADEQ’s mission to protect and enhance public health and the environment.

- Moderate
- Significant

Political Subdivisions
- Tax revenues and indirect benefits of clean underground sources of drinking water supply
- Regulation of desalination disposal kept local
- Cost savings due to the elimination of duplicative regulatory programs (Federal UIC becomes State UIC, UIC permittees no longer applicable to APP)

- Significant

B. Privately Owned Businesses

Privately-Owned Business
- Cost savings due to elimination of duplicative regulatory programs (Federal UIC becomes State UIC, UIC permittees no longer applicable to APP)
- Permits and Permit Amendments issued faster

- Moderate
- Significant
Localized access to ADEQ’s expertise, personnel and customer service, as well as a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

Significant

General Public

Ensuring underground sources of drinking water supply or aquifers are better protected from pollution.

Significant

ADEQ employees developing Arizona-specific permits, leading to a better protection of the environment, which supports the economy, which supports the community.

Significant

2. **Part II - Individual Stakeholder Summaries/Calculations:**

This section outlines ADEQ’s analyses of the estimated costs and benefits of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection and underground injection control.

**ADEQ**

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule

3.2

**Political Subdivisions**

Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalination plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.

The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program
does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**Privately-Owned Business**

Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.

However, and as mentioned above, the benefits to privately-owned business include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**General Public**

The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

**E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:**

ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

**F. A statement of the probable impact of the rules on small business:**

In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. **An identification of the small business subject to the rules:**
Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventories, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. **The administrative and other costs required for compliance with the rules:**
   Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. **A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:**
   a. *Establishing less stringent compliance or reporting requirements in the rule for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.
   b. *Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.
   c. *Consolidating or simplifying the rule's compliance or reporting requirements for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.
   d. *Establishing performance standards for small businesses to replace design or operational standards in the rule:*
      Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.
   e. *Exempting small businesses from any or all requirements of the law:*
      Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. **The probable costs and benefits to private persons and consumers who are directly affected by the rules:**
   As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and
customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.

Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.

H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and
49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142. A table showing specific analogous Federal regulations to the rules in this rulemaking can be found in section 6 of the Preamble above.
when the individual is exposed to both internal and external radiation (see §20.1292).

When an individual is exposed to radioactive materials which fall under several of the translocation classifications (i.e., Class D, Class W, or Class Y) of the same radionuclide, the exposure may be evaluated as if it were a mixture of different radionuclides.

It should be noted that the classification of a compound as Class D, W, or Y is based on the chemical form of the compound and does not take into account the radiological half-life of different radioisotopes. For this reason, values are given for Class D, W, and Y compounds, even for very short-lived radionuclides.

TABLE 2
The columns in table 2 of this appendix captioned “Effluents,” “Air,” and “Water,” are applicable to the assessment and control of dose to the public, particularly in the implementation of the provisions of §20.1302. The concentration values given in columns 1 and 2 of table 2 are equivalent to the radionuclide concentrations which, if inhaled or ingested continuously over the course of a year, would produce a total effective dose equivalent of 0.05 rem (50 millirem or 0.5 millisieverts).

Consideration of non-stochastic limits has not been included in deriving the air and water effluent concentration limits because non-stochastic effects are presumed not to occur at the dose levels established for individual members of the public. For radionuclides, where the non-stochastic limit was governing in deriving the occupational DAC, the stochastic ALI was used in deriving the corresponding airborne effluent limit in table 2. For this reason, the DAC and airborne effluent limits are not always proportional as was the case in appendix B to §20.1–20.601.

The air concentration values listed in table 2, column 1, were derived by one of two methods. For those radionuclides for which the stochastic limit is governing, the occupational stochastic inhalation ALI was divided by 2.4 × 10^5 ml, relating the inhalation ALI to the DAC, as explained above, and then divided by a factor of 300. The factor of 300 includes the following components: a factor of 50 to relate the 5-rem annual occupational dose limit to the 0.1-rem limit for members of the public, a factor of 3 to adjust for the difference in exposure time and the inhalation rate for a worker and that for members of the public; and a factor of 2 to adjust the occupational values (derived for adults) so that they are applicable to other age groups.

For those radionuclides for which submersion (external dose) is limiting, the occupational DAC in table 1, column 3, was divided by 219. The factor of 219 is composed of a factor of 50, as described above, and a factor of 4.38 relating occupational exposure for 2,000 hours per year to full-time exposure (8,760 hours per year). Note that an additional factor of 2 for age considerations is not warranted in the submersion case.

The water concentrations were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3 × 10^5. The factor of 7.3 × 10^5 (ml) includes the following components: the factors of 50 and 2 described above and a factor of 7.3 × 10^5 (ml) which is the annual water intake of “Reference Man.”

Note 2 of this appendix provides groupings of radionuclides which are applicable to unknown mixtures of radionuclides. These groupings (including occupational inhalation ALIs and DACs, air and water effluent concentrations and sewerage) require demonstrating that the most limiting radionuclides in successive classes are absent. The limit for the unknown mixture is defined when the presence of one of the listed radionuclides cannot be definitely excluded either from knowledge of the radionuclide composition of the source or from actual measurements.

TABLE 3 “SEWER DISPOSAL”
The monthly average concentrations for release to sanitary sewers are applicable to the provisions in §20.2003. The concentration values were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3 × 10^5 (ml). The factor of 7.3 × 10^5 (ml) is composed of a factor of 7.3 × 10^5 (ml), the annual water intake by “Reference Man,” and a factor of 10, such that the concentrations, if the sewage released by the licensee were the only source of water ingested by a reference man during a year, would result in a committed effective dose equivalent of 0.5 rem.

</table>

Note: The table contains values for different radioactive isotopes, including Americium-241, Americium-242, and Americium-240, with specific concentrations given in microcuries per liter (μCi/L) for oral ingestion, inhalation, air, and water. The values are indicative of monthly average concentrations for releases to sewers.

- Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactivity half-life less than 2 hours
- Subversion

- Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactivity half-life greater than 2 hours
- Any single radionuclide not listed above that decays by alpha emission or spontaneous fission, or any mixture for which either the identity or the concentration of any radionuclide in the mixture is not known

434
FOOTNOTES:

1 **Submersion** means that values given are for submersion in a hemispherical semi-infinite cloud of airborne material.

2 These radionuclides have radiological half-lives of less than 2 hours. The total effective dose equivalent received during operations with these radionuclides might include a significant contribution from external exposure. The DAE values for all radionuclides, other than those designated Class "Submersion," are based upon the committed effective dose equivalent due to the intake of the radionuclide into the body and do **DO** include potentially significant contributions to dose equivalent from external exposures. The license may substitute JE-7 mCi/l for the listed DAE to account for the submersion dose prospectively, but should use individual monitoring devices or other radiation measuring instruments that measure external exposure to demonstrate compliance with the limits. (See § 20.1203.)

3 For soluble mixtures of U-238, U-234, and U-235 in air, chemical toxicity may be the limiting factor (see § 20.1201(e)). If the percent by weight (enrichment) of U-235 is not greater than 5, the concentration value for a 40-hour workweek is 0.2 milligrams per cubic meter of air average. For any enrichment, the product of the average concentration and time of exposure during a 40-hour workweek shall not exceed 1E-3 (SA) pCi/gram, where SA is the specific activity of the uranium isolated. The specific activity for natural uranium is 6.7E-7 curies per gram U. The specific activity for other mixtures of U-238, U-235, and U-234, if not known, shall be:

\[
SA = 3.6E-7 \text{ curies/gram U} \\
SA = (0.4 + 0.38 \text{ (enrichment)} + 0.0004 \text{ (enrichment)}^2) \times 6.7E-7 \text{ curies/gram U}
\]

where enrichment is the percentage by weight of U-235, expressed as percent.

NOTE:

1. If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAE for the mixture shall be the most restrictive DAE of any radionuclide in the mixture.

2. If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in this appendix are not present in the mixture, the inhalation ALI, DAE, and effluent and sewage concentrations for the mixture are the lowest values specified in this appendix for any radionuclide that is not known to be absent from the mixture; or

</table>

Example: If radionuclides "A," "B," and "C" are present in concentrations $c_A$, $c_B$, and $c_C$, and if the applicable DACs are $DAC_A$, $DAC_B$, and $DAC_C$, respectively, then the concentrations shall be limited so that the following relationship exists:

$$c_A < DAC_A, c_B < DAC_B, c_C < DAC_C$$

§ 300f

TITLED 42—THE PUBLIC HEALTH AND WELFARE

Page 964

organizations reporting any such transactions under subsection (a)(3) of this section.

(f) Rates

Nothing in this section shall be construed to confer upon the Secretary any authority to approve or disapprove the rates charged by any health maintenance organization.

(g) Annual financial statement

Any health maintenance organization failing to file with the Secretary the annual financial statement required in subsection (a) of this section shall be ineligible for any Federal assistance under this subchapter until such time as such statement is received by the Secretary and shall not be a qualified health maintenance organization for purposes of section 300e–9 of this title.

(h) Penalties

Whoever knowingly and willfully makes or causes to be made any false statement or representation of a material fact in any statement filed pursuant to this section shall be guilty of a felony and upon conviction thereof shall be fined not more than $25,000 or imprisoned for not more than five years, or both.

Amendments

1986—Subsec. (e). Pub. L. 99–660 struck out subsec. (e) which read as follows: “The Secretary shall file an annual report with the Congress on the operation of this section. Such report shall include—

(1) an enumeration of standards and norms utilized to make the evaluations required under subsection (d) of this section; 

(2) an assessment of the degree of conformity or nonconformity of each health maintenance organization evaluated by the Secretary under subsection (d) of this section with such standards and norms; 

(3) what action, if any, the Secretary considers necessary under section 300e–11 of this title with respect to health maintenance organizations evaluated under subsection (d) of this section.”

1981—Subsec. (a). Pub. L. 97–35, § 948(a), (b), in par. (2) inserted reference to copy of the report, if any, filed with the Health Care Financing Administration, and in par. (3) reorganized excluding provisions and, among revisions, inserted salaries paid to employees for services.

Subsec. (b)(1). Pub. L. 97–35, § 948(c), inserted “responsible for management or administration” after “employee”.

Subsec. (b)(4). Pub. L. 97–35, § 948(d), substituted “spouse, child, or parent” for “member of the immediate family”.

 Effective Date of 1986 Amendment

SUBCHAPTER XII—SAFETY OF PUBLIC WATER SYSTEMS

PART A—DEFINITIONS

§ 300f. Definitions

For purposes of this subchapter:

(1) The term “primary drinking water regulation” means a regulation which—

(A) applies to public water systems;

(B) specifies contaminants which, in the judgment of the Administrator, may have any adverse effect on the health of persons;

(C) specifies for each such contaminant either—

(i) a maximum contaminant level, if, in the judgment of the Administrator, it is economically and technologically feasible to ascertain the level of such contaminant in water in public water systems, or

(ii) if, in the judgment of the Administrator, it is not economically or technologically feasible to so ascertain the level of such contaminant, each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1 of this title; and

(D) contains criteria and procedures to assure a supply of drinking water which dependably complies with such maximum contaminant levels; including accepted methods for quality control and testing procedures to insure compliance with such levels and to insure proper operation and maintenance of the system, and requirements as to (i) the minimum quality of water which may be taken into the system and (ii) siting for new facilities for public water systems.

At any time after promulgation of a regulation referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation.

(2) The term “secondary drinking water regulation” means a regulation which applies to public water systems and which specifies the maximum contaminant levels which, in the judgment of the Administrator, are requisite to protect the public welfare. Such regulations may apply to any contaminant in drinking water (A) which may adversely affect the odor or appearance of such water and consequently may cause a substantial number of the persons served by the public water system providing such water to discontinue its use, or (B) which may otherwise adversely affect the public welfare. Such regulations may vary according to geographic and other circumstances.

(3) The term “maximum contaminant level” means the maximum permissible level of a contaminant in water which is delivered to any user of a public water system.

(4) PUBLIC WATER SYSTEM.—

(A) IN GENERAL.—The term “public water system” means a system for the provision to
the public of water for human consumption through pipes or other constructed conveyances, if such system has at least fifteen service connections or regularly serves at least twenty-five individuals. Such term includes (i) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (ii) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.

(III) (B) CONNECTIONS.—For purposes of subparagraph (A), a connection to a system that delivers water by a constructed conveyance other than a pipe shall not be considered a connection, if—

(1) the water is used exclusively for purposes other than residential use (consisting of drinking, bathing, and cooking, or other similar uses);

(II) in the case of a State exercising primary enforcement responsibility for public water systems, that the water, provided for residential or similar uses for drinking, cooking, and bathing is centrally treated or treated at the point of entry by the provider, a pass-through entity, or the user to achieve the equivalent level of protection provided by the applicable national primary drinking water regulations.

(III) the Administrator or the State (in the case of a State exercising primary enforcement responsibility for public water systems) determines that alternative water to achieve the equivalent level of public health protection provided by the applicable national primary drinking water regulation is provided for residential or similar uses for drinking and cooking;

(11) the term “Indian Tribe” means any Indian tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over any area. For purposes of section 300j–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).

(15) COMMUNITY WATER SYSTEM.—The term “community water system” means a public water system that—

(A) serves at least 15 service connections used by year-round residents of the area served by the system; or

(B) regularly serves at least 25 year-round residents.

(16) NONCOMMUNITY WATER SYSTEM.—The term “noncommunity water system” means a public water system that is not a community water system.

(7) The term “contaminant” means any physical, chemical, biological, or radiological substance or matter in water.

(8) The term “Administrator” means the Administrator of the Environmental Protection Agency.

(9) The term “Agency” means the Environmental Protection Agency.

(10) The term “municipality” means a city, town, or other public body created by or pursuant to State law, or an Indian Tribe.

(11) The term “Federal agency” means any department, agency, or instrumentality of the United States.

(12) The term “person” means an individual, corporation, company, association, partnership, State, municipality, or Federal agency (and includes officers, employees, and agents of any corporation, company, association, State, municipality, or Federal agency).

(13)(A) Except as provided in subparagraph (B), the term “State” includes, in addition to the several States, only the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(14) The term “Indian Tribe” means any Indian tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over any area. For purposes of section 300j–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).

(15) COMMUNITY WATER SYSTEM.—The term “community water system” means a public water system that—

(A) serves at least 15 service connections used by year-round residents of the area served by the system; or

(B) regularly serves at least 25 year-round residents.

(16) NONCOMMUNITY WATER SYSTEM.—The term “noncommunity water system” means a public water system that is not a community water system.

(17) The term “person” means an individual, corporation, company, association, partnership, State, municipality, or Federal agency (and includes officers, employees, and agents of any corporation, company, association, State, municipality, or Federal agency).

(18) (A) Except as provided in subparagraph (B), the term “State” includes, in addition to the several States, only the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(19) The term “Indian Tribe” means any Indian tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over any area. For purposes of section 300j–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).

(20) COMMUNITY WATER SYSTEM.—The term “community water system” means a public water system that—

(A) serves at least 15 service connections used by year-round residents of the area served by the system; or

(B) regularly serves at least 25 year-round residents.

(21) NONCOMMUNITY WATER SYSTEM.—The term “noncommunity water system” means a public water system that is not a community water system.
referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation.

Par. (4). Pub. L. 104–182, §101(b)(1), designated existing provisions as subpar. (A), inserted par. and subpar. headings, redesignated former subpars. (A) and (B) as cls. (i) and (ii), respectively, substituted “water for human consumption through pipes or other constructed conveyances” for “‘piped water for human consumption’ in first sentence, and added subpars. (B) and (C).

Par. (13). Pub. L. 104–182, §101(a)(2), added existing provisions as subpar. (A), substituted “Except as provided in subparagraph (B), the term” for “The term”, and added subpar. (B).

Par. (14). Pub. L. 104–182, §101(a)(3), inserted at end “For purposes of section 300–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).”

1977—Par. (12). Pub. L. 95–190 expanded definition of “person” to include Federal agency, and officers, employees, and agents of any corporation, company, etc.

1976—Par. (13). Pub. L. 94–484 defined “State” to include Northern Mariana Islands.

Pub. L. 94–517 added par. (13).

**Effective Date of 1996 Amendment**

Section 2(b) of Pub. L. 104–182 provided that: “Except as otherwise specified in this Act (enacting sections 300–7 to 300–9, 300h–8, 300I–3c, and 300I–12 to 300–18 of this title and section 1263a of Title 33, Navigation and Navigable Waters, amending this section, sections 300g–1 to 300h–6, 300h–5 to 300h–7, 300i, 300I–1, 300J to 300–2, 300–4 to 300–8, 300I–11, and 300I–21 to 300–25 of this title, sections 4701 and 4721 of Title 16, Conservation, and section 349 of Title 21, Food and Drugs, repealing section 13551 of this title, enacting provisions set out as notes under this section, sections 201, 300I–1, 300I–1, and 300I–12 of this title, section 1281 of Title 33, and section 45 of former Title 40, Public Buildings, Property, and Works, and amending provisions set out as a note under section 201 of this title) or in the amendments made by this Act, this Act and the amendments made by this Act shall take effect on the date of enactment of this Act [Aug. 6, 1996].”

**Short Title**

This subchapter is known as the “Safe Drinking Water Act”, see note set out under section 201 of this title.

**Termination of Trust Territory of the Pacific Islands**

For termination of Trust Territory of the Pacific Islands, see note set out preceding section 1681 of Title 48, Territories and Insular Possessions.

**Effect of Public Law 104–182 on Federal Water Pollution Control Act**

Section 2(c) of Pub. L. 104–182 provided that: “Except for the provisions of section 302 (42 U.S.C. 300–12 note) (relating to transfers of funds), nothing in this Act [see Effective Date of 1996 Amendment above] or in any amendments made by this Act to title XIV of the Public Health Service Act [this subchapter] (commonly known as the ‘Safe Drinking Water Act’) or any other law shall be construed by the Administrator of the Environmental Protection Agency or the courts as affecting, modifying, expanding, changing, or altering—

“(1) the provisions of the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.];

“(2) the duties and responsibilities of the Administrator under that Act; or

“(3) the regulation or control of point or nonpoint sources of pollution discharged into waters covered by that Act.

The Administrator shall identify in the agency’s annual budget all funding and full-time equivalents administering such title XIV separately from funding and staffing for the Federal Water Pollution Control Act.”

**Congressional Findings**

Section 3 of Pub. L. 104–182 provided that: “The Congress finds that—

“(1) safe drinking water is essential to the protection of public health;

“(2) because the requirements of the Safe Drinking Water Act (42 U.S.C. 300f et seq.) now exceed the financial and technical capacity of some public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements;

“(3) the Federal Government commits to maintaining and improving its partnership with the States in the administration and implementation of the Safe Drinking Water Act;

“(4) States play a central role in the implementation of safe drinking water programs, and States need increased financial resources and appropriate flexibility to ensure the prompt and effective development and implementation of drinking water programs;

“(5) the existing process for the assessment and selection of additional drinking water contaminants needs to be revised and improved to ensure that there is a sound scientific basis for setting priorities in establishing drinking water regulations;

“(6) procedures for assessing the health effects of contaminants establishing drinking water standards should be revised to provide greater opportunity for public education and participation;

“(7) in considering the appropriate level of regulation for contaminants in drinking water, risk assessment, based on sound and objective science, and benefit–cost analysis are important analytical tools for improving the efficiency and effectiveness of drinking water regulations to protect human health;

“(8) more effective protection of public health requires—

“(A) a Federal commitment to set priorities that will allow scarce Federal, State, and local resources to be targeted toward the drinking water problems of greatest public health concern;

“(B) maximizing the value of the different and complementary strengths and responsibilities of the Federal and State governments in those States that have primary enforcement responsibility for the Safe Drinking Water Act; and

“(C) prevention of drinking water contamination through well-trained system operators, water systems with adequate managerial, technical, and financial capacity, and enhanced protection of source waters of public water systems;

“(9) compliance with the requirements of the Safe Drinking Water Act continues to be a concern at public water systems experiencing technical and financial limitations, and Federal, State, and local governments need more resources and more effective authority to attain the objectives of the Safe Drinking Water Act; and

“(10) consumers served by public water systems should be provided with information on the source of the water they are drinking and its quality and safety, as well as prompt notice of any violation of drinking water regulations.”

**GAO Study**

“(A) ascertain the numbers and locations of individuals and households relying for their residential water needs, including drinking, bathing, and cooking (or other similar uses) on irrigation water systems, mining water systems, industrial water systems, or other water systems covered by section 1401(4)(B) of the Safe Drinking Water Act [par. (4)(B) of this section] that are not public water systems subject to the Safe Drinking Water Act [this subchapter];

“(B) determine the sources and costs and affordability (to users and systems) of water used by such populations for their residential water needs; and

“(C) review State and system compliance with the exclusion provisions of section 1401(4)(B) of such Act.

The Comptroller General shall submit a report to the Congress within 3 years after the date of enactment of this Act [Aug. 6, 1996] containing the results of such study.”

SAFE DRINKING WATER AMENDMENTS OF 1977

RESTRICTIONS ON APPROPRIATIONS FOR RESEARCH

Pub. L. 95–190, § 2(e), Nov. 16, 1977, 91 Stat. 1393, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to authorize the appropriation of any amount for research under title XIV of the Public Health Service Act [this subchapter] (relating to safe drinking water).”

SAFE DRINKING WATER AMENDMENTS OF 1977 AS NOT AFFECTING AUTHORITY OF ADMINISTRATOR WITH RESPECT TO CONTAMINANTS

Pub. L. 95–190, § 3(e)(2), Nov. 16, 1977, 91 Stat. 1394, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to alter or affect the Administrator's authority or duty under title 14 of the Public Health Service Act [this subchapter] to promulgate regulations or take other action with respect to any contaminant.”

RURAL WATER SURVEY; REPORT TO PRESIDENT AND CONGRESS; AUTHORIZATION OF APPROPRIATIONS

Section 3 of Pub. L. 93–523, as amended by Pub. L. 95–190, §§ 2(d), 3(d), Nov. 16, 1977, 91 Stat. 1393, 1394, directed Administrator of Environmental Protection Agency, after consultation with Secretary of Agriculture and the several States, to enter into arrangements with public or private entities to conduct a survey of quantity, quality, and availability of rural drinking water supplies, which survey was to include, but not be limited to, consideration of number of residents in each rural area who presently are using inadequately served by a public or private drinking water supply system, or by an individual home drinking water supply system, or who presently have limited or otherwise inadequate access to drinking water, or who, due to absence or inadequacy of a drinking water supply system, are exposed to an increased health hazard, and who have experienced incidents of chronic or acute illness, which may be attributed to inadequacy of a drinking water supply system. Survey to be completed within eighteen months of Dec. 16, 1974, and a final report thereon submitted, not later than six months after completion of survey, to President and to Congress.

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

TERMINATION OF ADVISORY COMMITTEES

Pub. L. 93–641, § 6, Jan. 4, 1974, 88 Stat. 2275, set out as a note under section 217a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1975.

PART B—PUBLIC WATER SYSTEMS

§ 300g. Coverage

Subject to sections 300g–4 and 300g–5 of this title, national primary drinking water regulations under this part shall apply to each public water system in each State; except that such regulations shall not apply to a public water system—

(1) which consists only of distribution and storage facilities (and does not have any collection and treatment facilities);

(2) which obtains all of its water from, but is not owned or operated by, a public water system to which such regulations apply;

(3) which does not sell water to any person; and

(4) which is not a carrier which conveys passengers in interstate commerce.

(July 1, 1944, ch. 373, title XIV, § 1411, as added Pub. L. 93–523, § 2(a), Dec. 16, 1974, 88 Stat. 1662.)

§ 300g–1. National drinking water regulations

(a) National primary drinking water regulations; maximum contaminant level goals; simultaneous publication of regulations and goals

(1) Effective on June 19, 1986, each national interim or revised primary drinking water regulation promulgated under this section before June 19, 1986, shall be deemed to be a national primary drinking water regulation under subsection (b) of this section. No such regulation shall be required to comply with the standards set forth in subsection (b)(4) of this section unless such regulation is amended to establish a different maximum contaminant level after June 19, 1986.

(2) After June 19, 1986, each recommended maximum contaminant level published before June 19, 1986, shall be treated as a maximum contaminant level goal.

(3) Whenever a national primary drinking water regulation is proposed under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be proposed simultaneously. Whenever a national primary drinking water regulation is promulgated under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be published simultaneously.

(4) Paragraph (3) shall not apply to any recommended maximum contaminant level published before June 19, 1986.

(b) Standards

(1) IDENTIFICATION OF CONTAMINANTS FOR LISTING.—

(A) GENERAL AUTHORITY.—The Administrator shall, in accordance with the procedures established by this subsection, publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for a contaminant (other than a contaminant referred to in paragraph (2) for which a national primary drinking water regulation has been
promulgated as of August 6, 1996) if the Administrator determines that—

(i) the contaminant may have an adverse effect on the health of persons;

(ii) the contaminant is known to occur or there is a substantial likelihood that the contaminant will occur in public water systems with a frequency and at levels of public health concern; and

(iii) in the sole judgment of the Administrator, regulation of such contaminant presents a meaningful opportunity for health risk reduction for persons served by public water systems.

(B) REGULATION OF UNREGULATED CONTAMINANTS.—

(i) LISTING OF CONTAMINANTS FOR CONSIDERATION.—(I) Not later than 18 months after August 6, 1996, and every 5 years thereafter, the Administrator, after consultation with the scientific community, including the Science Advisory Board, after notice and opportunity for public comment, and after considering the occurrence data base established under section 300j–4(g) of this title, shall publish a list of contaminants which, at the time of publication, are not subject to any proposed or promulgated national primary drinking water regulation, which are known or anticipated to occur in public water systems, and which may require regulation under this subchapter.

(II) The unregulated contaminants considered under subclause (I) shall include, but not be limited to, substances referred to in section 9601(14) of this title, and substances registered as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. 136 et seq.].

(III) The Administrator’s decision whether or not to select an unregulated contaminant for a list under this clause shall not be subject to judicial review.

(ii) DETERMINATION TO REGULATE.—(I) Not later than 5 years after August 6, 1996, and every 5 years thereafter, the Administrator shall, after notice of the preliminary determination and opportunity for public comment, for not fewer than 5 contaminants included on the list published under clause (i), make determinations of whether or not to regulate such contaminants.

(II) A determination to regulate a contaminant shall be based on findings that the criteria of clauses (i), (ii), and (iii) of subparagraph (A) are satisfied. Such findings shall be based on the best available public health information, including the occurrence data base established under section 300j–4(g) of this title.

(III) The Administrator may make a determination to regulate a contaminant that does not appear on a list under clause (i) if the determination to regulate is made pursuant to subclause (II).

(IV) A determination under this clause not to regulate a contaminant shall be considered final agency action and subject to judicial review.

(iii) REVIEW.—Each document setting forth the determination for a contaminant under clause (ii) shall be available for public comment at such time as the determination is published.

(C) PRIORITIES.—In selecting unregulated contaminants for consideration under subparagraph (B), the Administrator shall select contaminants that present the greatest public health concern. The Administrator, in making such selection, shall take into consideration, among other factors of public health concern, the effect of such contaminants upon subgroups that comprise a meaningful portion of the general population (such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations) that are identifiable as being at greater risk of adverse health effects due to exposure to contaminants in drinking water than the general population.

(D) URGENT THREATS TO PUBLIC HEALTH.—The Administrator may promulgate an interim national primary drinking water regulation for a contaminant without making a determination for the contaminant under paragraph (4)(C), or completing the analysis under paragraph (3)(C), to address an urgent threat to public health as determined by the Administrator after consultation with and written response to any comments provided by the Secretary of Health and Human Services, acting through the director of the Centers for Disease Control and Prevention or the director of the National Institutes of Health. A determination for any contaminant in accordance with paragraph (4)(C) subject to an interim regulation under this subparagraph shall be issued, and a completed analysis meeting the criteria of paragraph (3)(C) shall be published, not later than 3 years after the date on which the regulation is promulgated and the regulation shall be repromulgated, or revised if appropriate, not later than 5 years after that date.

(E) REGULATION.—For each contaminant that the Administrator determines to regulate under subparagraph (B), the Administrator shall publish maximum contaminant level goals and promulgate, by rule, national primary drinking water regulations under this subsection. The Administrator shall propose the maximum contaminant level goal and national primary drinking water regulation for a contaminant not later than 24 months after the determination to regulate under subparagraph (B), and may publish such proposed regulation concurrent with the determination to regulate. The Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation within 18 months after the proposal thereof. The Administrator, by notice in the Federal Register, may extend the deadline for such promulgation for up to 9 months.

(F) HEALTH ADVISORIES AND OTHER ACTIONS.—

The Administrator may publish health advisories (which are not regulations) or take other appropriate actions for contaminants not subject to any national primary drinking water regulation.

(2) SCHEDULES AND DEADLINES.—

(A) IN GENERAL.—In the case of the contaminants listed in the Advance Notice of Proposed
Rulemaking published in volume 47, Federal Register, page 9352, and in volume 48, Federal Register, page 45502, the Administrator shall publish maximum contaminant level goals and promulgate national primary drinking water regulations:

(i) not later than 1 year after June 19, 1986, for no fewer than 9 of the listed contaminants;
(ii) not later than 2 years after June 19, 1986, for no fewer than 40 of the listed contaminants; and
(iii) not later than 3 years after June 19, 1986, for the remainder of the listed contaminants.

(B) SUBSTITUTION OF CONTAMINANTS.—If the Administrator identifies a drinking water contaminant the regulation of which, in the judgment of the Administrator, is more likely to be protective of public health (taking into account the schedule for regulation under subparagraph (A)) than a contaminant referred to in subparagraph (A), the Administrator may publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for the identified contaminant in lieu of regulating the contaminant referred to in subparagraph (A). Substitutions may be made for not more than 7 contaminants referred to in subparagraph (A). Regulation of a contaminant identified under this subparagraph shall be in accordance with the schedule applicable to the contaminant for which the substitution is made.

(C) DISINFECTANTS AND DISINFECTION BYPRODUCTS.—The Administrator shall promulgate an Interim Enhanced Surface Water Treatment Rule, a Stage I Disinfectants and Disinfection Byproducts Rule, and a Stage II Disinfectants and Disinfection Byproducts Rule in accordance with the schedule published in volume 59, Federal Register, page 6361 (February 10, 1994), in table III.13 of the proposed Information Collection Rule. If a delay occurs with respect to the promulgation of any rule in the schedule referred to in this subparagraph, all subsequent rules shall be completed as expeditiously as practicable but no later than a revised date that reflects the interval in resolving the uncertainty; and use for the purposes of paragraphs (4), (5), and (6) an analysis of each of the following:

(I) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur as the result of treatment to comply with each level.

(II) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur from reductions in co-occurring contaminants that may be attributed solely to compliance with the maximum contaminant level, excluding benefits resulting from compliance with other proposed or promulgated regulations.

(III) Quantifiable and nonquantifiable costs for which there is a factual basis in the rulemaking record to conclude that such costs are likely to occur solely as a result of compliance with the maximum contaminant level, including monitoring, treatment, and other costs and excluding costs resulting from compliance with other proposed or promulgated regulations.

(IV) The incremental costs and benefits associated with each alternative maximum contaminant level considered.

(V) The effects of the contaminant on the general population and on groups within the general population such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that are identified as likely to be at greater risk of adverse health effects due to exposure to contami-
§ 300g–1

OALS AND STANDARDS.—

(A) MAXIMUM CONTAMINANT LEVEL GOALS.—Each maximum contaminant level goal established under this subsection shall be set at the level at which no known or anticipated adverse effects on the health of persons occur and which allows an adequate margin of safety.

(B) MAXIMUM CONTAMINANT LEVELS.—Except as provided in paragraphs (5) and (6), each national primary drinking water regulation for a contaminant for which a maximum contaminant level goal is established under this subsection shall specify a maximum contaminant level for such contaminant which is as close to the maximum contaminant level goal as is feasible.

(C) DETERMINATION.—At the time the Administrator proposes a national primary drinking water regulation under this paragraph, the Administrator shall publish a determination as to whether the benefits of the maximum contaminant level justify, or do not justify, the costs based on the analysis conducted under paragraph (3)(C).

(D) DEFINITION OF FEASIBLE.—For the purposes of this subsection, the term “feasible” means feasible with the use of the best technology, treatment techniques and other means which the Administrator finds, after examination for efficacy under field conditions and not solely under laboratory conditions, are available (taking cost into consideration). For the purpose of this paragraph, granular activated carbon is feasible for the control of synthetic organic chemicals, and any technology, treatment technique, or other means found to be the best available for the control of synthetic organic chemicals must be at least as effective in controlling synthetic organic chemicals as granular activated carbon.

(E) FEASIBLE TECHNOLOGIES.—(i) IN GENERAL.—Each national primary drinking water regulation which establishes a maximum contaminant level shall list the technology, treatment technique, or other means which the Administrator finds to be feasible for purposes of meeting such maximum contaminant level, but a regulation under this subsection shall not require that any specified technology, treatment technique, or other means be used for purposes of meeting such maximum contaminant level.

(ii) LIST OF TECHNOLOGIES FOR SMALL SYSTEMS.—The Administrator shall include in the list any technology, treatment technique, or other means that is affordable, as determined by the Administrator in consultation with the States, for small public water systems serving—

(I) a population of 10,000 or fewer but more than 3,300;

(II) a population of 3,300 or fewer but more than 500; and

(III) a population of 500 or fewer but more than 25;

and that achieves compliance with the maximum contaminant level or treatment technique, or other means to ensure proper operation and maintenance and compliance with the maximum contaminant level or treatment technique and equipped with mechanical warnings to ensure that customers are automatically notified of operational problems. The Administrator shall not include in the list any point-of-use treatment technology, treatment technique, or other means to achieve compliance with a maximum contaminant level or treatment technique requirement for a microbial contaminant (or an indicator of a microbial contaminant). If the American National Standards Institute has issued product standards applicable to a specific type of point-of-entry or point-of-use treatment unit, individual units of that technology shall not be accepted for compliance with a maximum contaminant level or treatment technique requirement unless they are independently certified in accordance with such standards. In listing any technology, treatment technique, or other means pursuant to this clause, the Administrator shall consider the quality of the source water to be treated.

(iii) LIST OF TECHNOLOGIES THAT ACHIEVE COMPLIANCE.—Except as provided in clause...
(v), not later than 2 years after August 6, 1996, and after consultation with the States, the Administrator shall issue a list of technologies that achieve compliance with the maximum contaminant level or treatment technique for each category of public water systems described in subclauses (I), (II), and (III) of clause (ii) for each national primary drinking water regulation promulgated prior to June 19, 1986.

(iv) ADDITIONAL TECHNOLOGIES.—The Administrator may, at any time after a national primary drinking water regulation has been promulgated, supplement the list of technologies describing additional or new or innovative treatment technologies that meet the requirements of this paragraph for categories of small public water systems described in subclauses (I), (II), and (III) of clause (ii) that are subject to the regulation.

(v) TECHNOLOGIES THAT MEET SURFACE WATER TREATMENT RULE.—Within one year after August 6, 1996, the Administrator shall list technologies known to the Administrator which meet the level or levels or treatment techniques describing additional or new or innovative treatment technologies that would result in an increase in the health risk from drinking water by—

(i) increasing the concentration of other contaminants in drinking water; or

(ii) interfering with the efficacy of drinking water treatment techniques or processes that are used to comply with other national primary drinking water regulations.

(B) ESTABLISHMENT OF LEVEL.—If the Administrator establishes a maximum contaminant level or levels or requires the use of treatment techniques for any contaminant or contaminants pursuant to the authority of this paragraph—

(i) the level or levels or treatment techniques shall minimize the overall risk of adverse health effects by balancing the risk from the contaminant and the risk from other contaminants the concentrations of which may be affected by the use of a treatment technique or process that would be employed to attain the maximum contaminant level or levels; and

(ii) the combination of technology, treatment techniques, or other means required to meet the level or levels shall not be more stringent than is feasible (as defined in paragraph (4)(D)).

(6) ADDITIONAL HEALTH RISK REDUCTION AND COST CONSIDERATIONS.—

(A) IN GENERAL.—Notwithstanding paragraph (4), the Administrator may, at any time after a national primary drinking water regulation that has been promulgated, promulgate new or innovative treatment techniques that would justify the costs of complying with the regulation. This subparagraph shall not apply if the contaminant is found almost exclusively in small systems eligible under section 300g–4(e) of this title.

(B) EXCEPTION.—The Administrator shall not use the authority of this paragraph to promulgate a maximum contaminant level for a contaminant, if the benefits of compliance with a national primary drinking water regulation for the contaminant that would be promulgated in accordance with paragraph (4) experienced by—

(i) persons served by large public water systems; and

(ii) persons served by such other systems as are unlikely, based on information provided by the States, to receive a variance under section 300g–4(e) of this title (relating to small system variances);

would justify the costs to the systems of complying with the regulation. This subparagraph shall not apply if the contaminant is found almost exclusively in small systems eligible under section 300g–4(e) of this title for a small system variance.

(C) DISINFECTANTS AND DISINFECTION BYPRODUCTS.—The Administrator may not use the authority of this paragraph to establish a maximum contaminant level in a Stage I or Stage II national primary drinking water regulation (as described in paragraph (2)(C)) for contaminants that are disinfectants or disinfection byproducts, or to establish a maximum contaminant level or treatment technique requirement for the control of cryptosporidium. The Administrator may use the authority of this paragraph to promulgate a list of technologies that meet the requirements of this paragraph for disinfectants and disinfection byproducts that are used to comply with the level, the Administrator may, after notice and opportunity for public comment, promulgate a maximum contaminant level for the contaminant that maximizes health risk reduction benefits at a cost that is justified by the benefits.

(T) TECHNIQUES THAT MEET SURFACE WATER TREATMENT RULE.—Within one year after August 6, 1996, the Administrator shall list technologies known to the Administrator which meet the requirements of this paragraph, but the Administrator may grant a variance from any specified treatment technique in accordance with section 300g–4(a)(3) of this title.
(B) Any schedule referred to in this subsection for the promulgation of a national primary drinking water regulation for any contaminant shall apply in the same manner if the regulation requires a treatment technique in lieu of establishing a maximum contaminant level.

(C)(i) Not later than 18 months after June 19, 1986, the Administrator shall propose and promulgate national primary drinking water regulations specifying criteria under which filtration (including coagulation and sedimentation, as appropriate) is required as a treatment technique for public water systems supplied by surface water sources. In promulgating such rules, the Administrator shall consider the quality of source waters, protection afforded by watershed management, treatment practices (such as disinfection and length of water storage) and other factors relevant to protection of health.

(ii) In lieu of the provisions of section 300g–4 of this title the Administrator shall specify procedures by which the State determines which public water systems within its jurisdiction shall adopt a filtration under the criteria of clause (i). The State may require the public water system to provide studies or other information to assist in this determination. The procedures shall provide notice and opportunity for public hearing on this determination. If the State determines that filtration is required, the State shall prescribe a schedule for compliance by the public water system with the filtration requirement. A schedule shall require compliance within 18 months of a determination made under clause (iii).

(iii) Within 18 months from the time that the Administrator establishes the criteria and procedures under this subparagraph, a State with primary enforcement responsibility shall adopt any necessary regulations to implement this subparagraph. Within 12 months of adoption of such regulations the State shall make determinations regarding filtration for all the public water systems within its jurisdiction supplied by surface waters.

(iv) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the authority to make the determination in clause (ii) in such State as the State would have under that clause. Any filtration requirement or schedule under this subparagraph shall be treated as if it were a requirement of a national primary drinking water regulation.

(v) As an additional alternative to the regulations promulgated pursuant to clauses (i) and (iii), including the criteria for avoiding filtration contained in 40 CFR 141.71, a State exercising primary enforcement responsibility for public water systems may, on a case-by-case basis, and after notice and opportunity for public comment, establish treatment requirements as an alternative to filtration in the case of systems having uninhabited, undeveloped watersheds in consolidated ownership, and having control over access to, and activities in, those watersheds, if the State determines (and the Administrator concurs) that the quality of the source water and the alternative treatment requirements established by the State ensure greater removal or inactivation efficiencies of pathogenic organisms for which national primary drinking water regulations have been promulgated or that are of public health concern than would be achieved by the combination of filtration and chlorination disinfection (in compliance with this section).

(ii) DISINFECTION.—At any time after the end of the 3-year period that begins on August 6, 1996, but not later than the date on which the Administrator promulgates a Stage II rulemaking for disinfectants and disinfection byproducts (as described in paragraph (2)(C)), the Administrator shall also promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems, including surface water systems and, as necessary, ground water systems. After consultation with the States, the Administrator shall (as part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g–2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water. The Administrator shall simultaneously promulgate a rule specifying criteria that will be used by the Administrator (or delegated State authorities) to grant variances from this requirement according to the provisions of sections 300g–4(a)(1)(B) and 300g–4(a)(3) of this title. In implementing section 300l–1(e) of this title the Administrator or the delegated State authority shall, where appropriate, give special consideration to providing technical assistance to small public water systems in complying with the regulations promulgated under this paragraph.

(9) REVIEW AND REVISION.—The Administrator shall, not less often than every 6 years, review and revise, as appropriate, each national primary drinking water regulation promulgated under this subchapter. Any revision of a national primary drinking water regulation shall be promulgated in accordance with this section, except that each revision shall maintain, or provide for greater, protection of the health of persons.

(10) EFFECTIVE DATE.—A national primary drinking water regulation promulgated under this section (and any amendment thereto) shall take effect on the date that is 3 years after the date on which the regulation is promulgated unless the Administrator determines that an earlier date is practicable, except that the Administrator, or a State (in the case of an individual system), may allow up to 2 additional years to comply with a maximum contaminant level or treatment technique if the Administrator or State (in the case of an individual system) determines that additional time is necessary for capital improvements.

(11) No national primary drinking water regulation may require the addition of any substance for preventive health care purposes unrelated to contamination of drinking water.

(12) CERTAIN CONTAMINANTS.—

(A) ARSENIC.—

(i) Schedule and standard.—Notwithstanding the deadlines set forth in paragraph (1), the Administrator shall promulgate a national primary drinking water regulation
for arsenic pursuant to this subsection, in accordance with the schedule established by this paragraph.

(ii) STUDY PLAN.—Not later than 180 days after August 6, 1996, the Administrator shall develop a comprehensive plan for study in support of drinking water rulemaking to reduce the uncertainty in assessing health risks associated with exposure to low levels of arsenic. In conducting such study, the Administrator shall consult with the National Academy of Sciences, other Federal agencies, and interested public and private entities.

(iii) COOPERATIVE AGREEMENTS.—In carrying out the study plan, the Administrator may enter into cooperative agreements with other Federal agencies, State and local governments, and other interested public and private entities.

(iv) PROPOSED REGULATIONS.—The Administrator shall propose a national primary drinking water regulation for arsenic not later than January 1, 2000.

(v) FINAL REGULATIONS.—Not later than January 1, 2001, after notice and opportunity for public comment, the Administrator shall promulgate a national primary drinking water regulation for arsenic.

(vi) AUTHORIZATION.—There are authorized to be appropriated $2,500,000 for each of fiscal years 1997 through 2000 for the studies required by this paragraph.

(B) SULFATE.—

(i) ADDITIONAL STUDY.—Prior to promulgating a national primary drinking water regulation for sulfate, the Administrator and the Director of the Centers for Disease Control and Prevention shall jointly conduct an additional study to establish a reliable dose-response relationship for the adverse human health effects that may result from exposure to sulfate in drinking water, including the health effects that may be experienced by groups within the general population (including infants and travelers) that are potentially at greater risk of adverse health effects as the result of such exposure. The study shall be conducted in consultation with interested States, shall be based on the best available, peer-reviewed science and supporting studies conducted in accordance with sound and objective scientific practices, and shall be completed not later than 30 months after August 6, 1996.

(ii) DETERMINATION.—The Administrator shall include sulfate among the 5 or more contaminants for which a determination is made pursuant to paragraph (3)(B) not later than 5 years after August 6, 1996.

(iii) PROPOSED AND FINAL RULE.—Notwithstanding the deadlines set forth in paragraph (2), the Administrator may, pursuant to the authorities of this subsection and after notice and opportunity for public comment, promulgate a final national primary drinking water regulation for sulfate. Any such regulation shall include requirements for public notification and options for the provision of alternative water supplies to populations at risk as a means of complying with the regulation in lieu of a best available treatment technology or other means.

(13) RADON IN DRINKING WATER.—

(A) NATIONAL PRIMARY DRINKING WATER REGULATION.—Notwithstanding paragraph (2), the Administrator shall withdraw any national primary drinking water regulation for radon proposed prior to August 6, 1996, and shall propose and promulgate a regulation for radon under this section, as amended by the Safe Drinking Water Act Amendments of 1996.

(B) RISK ASSESSMENT AND STUDIES.—

(i) ASSESSMENT BY NAS.—Prior to proposing a national primary drinking water regulation for radon, the Administrator shall arrange for the National Academy of Sciences to prepare a risk assessment for radon in drinking water using the best available science in accordance with the requirements of paragraph (3). The risk assessment shall consider each of the risks associated with exposure to radon from drinking water and consider studies on the health effects of radon at levels and under conditions likely to be experienced through residential exposure. The risk assessment shall be peer-reviewed.

(ii) STUDY OF OTHER MEASURES.—The Administrator shall arrange for the National Academy of Sciences to prepare an assessment of the health risk reduction benefits associated with various mitigation measures to reduce radon levels in indoor air. The assessment may be conducted as part of the risk assessment authorized by clause (i) and shall be used by the Administrator to prepare the guidance and approve State programs under subparagraph (G).

(iii) OTHER ORGANIZATION.—If the National Academy of Sciences declines to prepare the risk assessment or studies required by this subparagraph, the Administrator shall enter into a contract or cooperative agreement with another independent, scientific organization to prepare such assessments or studies.

(C) HEALTH RISK REDUCTION AND COST ANALYSIS.—Not later than 30 months after August 6, 1996, the Administrator shall publish, and seek public comment on, a health risk reduction and cost analysis meeting the requirements of paragraph (3)(C) for potential maximum contaminant levels that are being considered for radon in drinking water. The Administrator shall include a response to all significant public comments received on the analysis with the preamble for the proposed rule published under subparagraph (D).

(D) PROPOSED REGULATION.—Not later than 36 months after August 6, 1996, the Administrator shall propose a maximum contaminant level goal and a national primary drinking water regulation for radon pursuant to this section.

(E) FINAL REGULATION.—Not later than 12 months after the date of the proposal under subparagraph (D), the Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for radon pursuant to this section.
section based on the risk assessment prepared pursuant to subparagraph (B) and the health risk reduction and cost analysis published pursuant to subparagraph (C). In considering the risk assessment and the health risk reduction and cost analysis in connection with the promulgation of such a standard, the Administrator shall take into account the costs and benefits of control programs for radon from other sources.

(F) ALTERNATIVE MAXIMUM CONTAMINANT LEVEL.—If the maximum contaminant level for radon in drinking water promulgated pursuant to subparagraph (E) is more stringent than necessary to reduce the contribution to radon in indoor air from drinking water to a concentration that is equivalent to the national average concentration of radon in outdoor air, the Administrator shall, simultaneously with the promulgation of such level, promulgate an alternative maximum contaminant level for radon that would result in a contribution of radon from drinking water to radon levels in indoor air equivalent to the national average concentration of radon in outdoor air. If the Administrator promulgates an alternative maximum contaminant level under this subparagraph, the Administrator shall, after notice and opportunity for public comment and in consultation with the States, publish guidelines for State programs, including criteria for multimedia measures to mitigate radon levels in indoor air, to be used by the States in preparing programs under subparagraph (G). The guidelines shall take into account data from existing radon mitigation programs and the assessment of mitigation measures prepared under subparagraph (B).

(G) MULTIMEDIA RADON MITIGATION PROGRAMS.—

(i) IN GENERAL.—A State may develop and submit a multimedia program to mitigate radon levels in indoor air for approval by the Administrator under this subparagraph. If, after notice and the opportunity for public comment, such program is approved by the Administrator, public water systems in the State may submit a program for approval by the Administrator under this subparagraph. If, after written notice to the State and an opportunity for the State to correct any deficiency in the program, withdraw approval of programs that no longer comply with such requirements.

(iv) REVIEW.—The Administrator shall periodically, but not less often than every 5 years, review each multimedia mitigation program approved under this subparagraph to determine whether it continues to meet the requirements of clause (iii) and shall, after written notice to the State and an opportunity for the State to correct any deficiency in the program, withdraw approval of programs that no longer comply with such requirements.

(v) EXTENSION.—If, within 90 days after the promulgation of an alternative maximum contaminant level under subparagraph (F), the Governor of a State submits a letter to the Administrator committing to develop a multimedia mitigation program under this subparagraph, the effective date of the national primary drinking water regulation for radon in the State that would be applicable under paragraph (10) shall be extended for a period of 18 months.

(vi) LOCAL PROGRAMS.—In the event that a State chooses not to submit a multimedia mitigation program for approval under this subparagraph or has submitted a program that has been disapproved, any public water system in the State may submit a program for approval by the Administrator according to the same criteria, conditions, and approval process that would apply to a State program. The Administrator shall approve a multimedia mitigation program if the health risk reduction benefits expected to be achieved by the program are equal to or greater than the health risk reduction benefits that would result from compliance by the public water system with the maximum contaminant level for radon promulgated under subparagraph (E).

(14) RECYCLING OF FILTER BACKWASH.—The Administrator shall promulgate a regulation to govern the recycling of filter backwash water within the treatment process of a public water system. The Administrator shall promulgate such regulation not later than 4 years after August 6, 1996, unless such recycling has been addressed by the Administrator's Enhanced Surface Water Treatment Rule prior to such date.

(15) VARIANCE TECHNOLOGIES.—

(A) IN GENERAL.—At the same time as the Administrator promulgates a national primary drinking water regulation for a contaminant pursuant to this section, the Administrator shall issue guidance or regulations describing the best treatment technologies, treatment techniques, or other means (referred to in this paragraph as “variance technology”) for the contaminant that the Admin-
istrator finds, after examination for efficacy under field conditions and not solely under laboratory conditions, are available and affordable, as determined by the Administrator in consultation with the States, for public water systems of varying size, considering the quality of the source water to be treated. The Administrator shall identify such variance technologies for public water systems serving—

(i) a population of 10,000 or fewer but more than 3,300;
(ii) a population of 3,300 or fewer but more than 500; and
(iii) a population of 500 or fewer but more than 25,

if, considering the quality of the source water to be treated, no treatment technology is listed for public water systems of that size under paragraph (4)(E). Variance technologies identified by the Administrator pursuant to this paragraph may not achieve compliance with the maximum contaminant level or treatment technique requirement of such regulation, but shall achieve the maximum reduction or inactivation efficiency that is affordable considering the size of the system and the quality of the source water. The guidance or regulations shall not require the use of a technology from a specific manufacturer or brand.

(B) LIMITATION.—The Administrator shall not identify any variance technology under this paragraph, unless the Administrator has determined, considering the quality of the source water to be treated and the expected useful life of the technology, that the variance technology is protective of public health.

(C) ADDITIONAL INFORMATION.—The Administrator shall include in the guidance or regulations identifying variance technologies under this paragraph any assumptions supporting the public health determination referred to in subparagraph (B), where such assumptions concern the public water system to which the technology may be applied, or its source waters. The Administrator shall provide any assumptions used in determining affordability, taking into consideration the number of persons served by such systems. The Administrator shall provide as much reliable information as practicable on performance, effectiveness, limitations, costs, and other relevant factors including the applicability of variance technology to waters from surface and underground sources.

(D) REGULATIONS AND GUIDANCE.—Not later than 2 years after August 6, 1996, and after consultation with the States, the Administrator shall issue guidance or regulations under subparagraph (A) for each national primary drinking water regulation promulgated prior to August 6, 1996, for which a variance may be granted under section 300g–4(e) of this title. The Administrator may, at any time after a national primary drinking water regulation has been promulgated, issue guidance or regulations describing additional variance technologies. The Administrator shall, not less often than every 7 years, or upon receipt of a petition supported by substantial information, review variance technologies identified under this paragraph. The Administrator shall issue revised guidance or regulations if new or innovative variance technologies become available that meet the requirements of this paragraph and achieve an equal or greater reduction or inactivation efficiency than the variance technologies previously identified under this subparagraph. No public water system shall be required to replace a variance technology during the useful life of the technology for the sole reason that a more efficient variance technology has been listed under this subparagraph.

(c) Secondary regulations; publication of proposed regulations; promulgation; amendments

The Administrator shall publish proposed national secondary drinking water regulations within 270 days after December 16, 1974. Within 90 days after publication of any such regulation, he shall promulgate such regulation with such modifications as he deems appropriate. Regulations under this subsection may be amended from time to time.

(d) Regulations; public hearings; administrative consultations

Regulations under this section shall be prescribed in accordance with section 553 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section, the Administrator shall consult with the Secretary and the National Drinking Water Advisory Council.

(e) Science Advisory Board comments

The Administrator shall request comments from the Science Advisory Board (established under the Environmental Research, Development, and Demonstration Act of 1978) prior to proposal of a maximum contaminant level goal and national primary drinking water regulation. The Board shall respond, as it deems appropriate, within the time period applicable for promulgation of the national primary drinking water standard concerned. This subsection shall, under no circumstances, be used to delay final promulgation of any national primary drinking water standard.

REFERENCES IN TEXT

The Safe Drinking Water Act Amendments of 1996, referred to in subsec. (b)(13)(A), is Pub. L. 104–182, Aug. 6,

AMENDMENTS

1996—Subsec. (a)(3). Pub. L. 104–182, § 102(c)(2), struck out “paragraph (1), (2), or (3) of” before “subsection (b)” in two places.
Subsec. (b). Pub. L. 104–182, § 102(a), inserted heading.
Subsec. (b)(1), (2). Pub. L. 104–182, § 103(a), added pars. (1) and (2) as outlyingpars. (1) and (2) of subpar. (B) which related to publication of maximum contaminant level goals and promulgation of national primary drinking water regulations for certain listed contaminants or subsets of contaminants.
Pub. L. 104–182, § 102(a), struck out par. (3) which related to publication of maximum contaminant level goals and promulgation of national primary drinking water regulations for contaminants, other than those referred to in pars. (1) or (2), which may have an adverse effect on human health and are known to occur in public water systems.
Subsec. (b)(4). Pub. L. 104–182, § 104(a)(1), designated first sentence as subpar. (A), inserted par. and subpar. (A) headings, designated second sentence as subpar. (B), inserted subpar. (B) heading, substituted “Except as provided in paragraphs (5) and (6), each national” for “Each national” and “specify a maximum contaminant level” for “specify a maximum level”, and added subpar. (C).
Subsec. (b)(4)(D). Pub. L. 104–182, § 104(a)(2), (3), redesignated par. (5) as subpar. (D) of par. (4), inserted subpar. heading, and substituted “this paragraph” for “paragraph (4)”.
Subsec. (b)(4)(E). Pub. L. 104–182, § 104(a)(4), (5), redesignated subpar. (6) as subpar. (D)(1) of par. (4), inserted subpar. and cl. headings, substituted “this subsection” for “this paragraph”, and added cls. (i) to (v).
Subsec. (b)(5). Pub. L. 104–182, § 104(a)(6), added subpar. (5) and (6). Provided par. (5) and (6) redesignated subpars. (D) and (E)(i), respectively, of par. (4).
Subsec. (b)(8). Pub. L. 104–182, § 105(a)(2), substituted “section 300g–2(a)” for “section 300g–2(1)”.
Subsec. (b)(12). Pub. L. 104–182, § 107, inserted heading, realigned margins, and substituted “At any time after the end of the 3-year period that begins on August 6, 1996, but not later than the date on which the Administrator promulgates a Stage II rulemaking for disinfectants and disinfection byproducts (as described in paragraph (2)(C)), the Administrator shall also promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems, including surface water systems and, as necessary, ground water systems. After consultation with the States, the Administrator shall (as part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g–2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water.” for “Not later than 36 months after June 19, 1986, the Administrator shall propose and promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems.”
Subsec. (b)(9). Pub. L. 104–182, § 108(c), amended par. (9) generally. Prior to amendment, par. (9) read as follows: “National primary drinking water regulations shall be amended whenever changes in technology, treatment techniques, and other means permit greater protection of the health of persons, but in any event such regulations shall be reviewed at least once every 3 years. Such review shall include an analysis of innovations or changes in technology, treatment techniques or other activities that have occurred over the previous 3-year period and that may provide for greater protection of the health of persons. The findings of such review shall be published in the Federal Register. If, after opportunity for public comment, the Administrator concludes that the technology, treatment techniques, or other means resulting from such innovations or changes are not feasible within the meaning of paragraph (5), an explanation of such conclusion shall be published in the Federal Register.”
Subsec. (b)(10). Pub. L. 104–182, § 108(a), amended par. (10) generally. Prior to amendment, par. (10) read as follows: “National primary drinking water regulations promulgated under this subsection (and amendments thereto) shall take effect on dates after the date of their promulgation. Regulations under subsection (a) of this section shall be superseded by regulations under this subsection to the extent provided by the regulations under this subsection.”
1986—Subsec. (a). Pub. L. 99–339, § 101(a), amended subsec. (a) generally. Prior to amendment, subsec. (a) read as follows: “(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.
(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means, which the Administrator determines are generally available (taking costs into consideration) on December 16, 1974.
(3) The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation.
(4) Subsec. (b)(1). Pub. L. 99–339, § 101(b), substituted provisions establishing standard setting schedules and deadlines for provisions relating to establishment of maximum contaminant levels and a list of contaminants with adverse effect but of undetermined potential.
Subsec. (b)(2). Pub. L. 99–339, § 101(b), substituted provisions authorizing the Administrator to substitute contaminants for those referred to in par. (1) and to supply a list of the contaminants proposed for substitution, with the decision of the Administrator to regulate such contaminant not subject to judicial review, for provisions which authorized the Administrator to publish in the Federal Register proposed revised national interim primary drinking water regulations and 180 days after the date of such proposed regulations to promulgate such revised regulations with modification as deemed appropriate.
Subsec. (b)(3). Pub. L. 99–339, § 101(b), substituted provisions directing the Administrator to publish maximum contaminant level goals and promulgate national primary drinking water regulations for contaminants, other than those specified in par. (1) or (2), which may have an adverse effect on health and are known or anticipated to occur in public water systems, to establish an advisory group to aid in establishing a list of such contaminants, and to publish, within a specified time, both proposed and final goals and regulations for provisions which required that revised national primary drinking water regulations specify a maximum contaminant level or require the use of treatment techniques for each contaminant, which level or technique
was to be as close to the recommended level or technique as feasible, and defined the term "feasible".

Subsec. (b)(4) to (11), Pub. L. 99-339, § 101(b), (c)(1), (d), added a new paragraph and redesignated former pars. (4) to (11), respectively, in par. (9) substituted "National" for "Revised National" and inserted provisions that review include analysis, and publication in Federal Register, of innovations in technology, treatment techniques or other activities occurring during previous three years and their feasibility, and in par. (10) substituted "National" for "Revised National".

Subsec. (e), Pub. L. 99-339, § 101(e), amended subsec. (e) generally, substituting provisions which relate to the request by the Administrator of comments by the Science Advisory Board prior to proposal of a maximum contaminant goal and national primary drinking water regulation for provisions which related to study by the National Academy of Sciences to determine the maximum contaminant levels, report to Congress, and funding therefor.

1977—Subsec. (e)(2), Pub. L. 95-190 inserted provisions relating to revisions of the required report and cl. (G).

NATIONAL PRIMARY DRINKING WATER REGULATION FOR ARSENIC

APPLICABILITY OF PRIOR REQUIREMENTS

Section 102(b) of Pub. L. 104-182 provided that: "The requirements of subparagraphs (C) and (D) of section 1412(b)(3) of the Safe Drinking Water Act [subsec. (b)(3)(C), (D) of this section] as in effect before the date of enactment of this Act [Aug. 6, 1996], and any obligation to promulgate regulations pursuant to such subparagraphs as of the date of enactment of this Act, are superseded by the amendments made by subsection (a) (amending this section)."

DISINFECTANTS AND DISINFECTION BYPRODUCTS

Section 104(b) of Pub. L. 104-182 provided that: "The Administrator of the Environmental Protection Agency may use the authority of section 1412(b)(5) of the Safe Drinking Water Act [subsec. (b)(3)(C), (D) of this section] as in effect before the date of enactment of this Act [Aug. 6, 1996], and any obligation to promulgate regulations pursuant to such subparagraphs as of the date of enactment of this Act, are superseded by the amendments made by subsection (a) (amending this section)."

§ 300g-2. State primary enforcement responsibility

(a) In general

For purposes of this subchapter, a State has primary enforcement responsibility for public water systems during any period for which the Administrator determines (pursuant to regulations prescribed under subsection (b) of this section) that such State—

(1) has adopted drinking water regulations that are no less stringent than the national primary drinking water regulations promulgated by the Administrator under subsections (a) and (b) of section 300g-1 of this title not later than 2 years after the date on which the regulations are promulgated by the Administrator, except that the Administrator may provide for an extension of not more than 2 years if, after submission and review of appropriate, adequate documentation from the State, the Administrator determines that the extension is necessary and justified;

(2) has adopted and is implementing adequate procedures for the enforcement of such State regulations, including conducting such monitoring and making such inspections as the Administrator may require by regulation;

(3) will keep such records and make such reports with respect to its activities under paragraphs (1) and (2) as the Administrator may require by regulation;

(4) if it permits variances or exemptions, or both, from the requirements of its drinking water regulations which meet the requirements of paragraph (1), permits such variances and exemptions under conditions and in a manner which is not less stringent than the conditions under, and the manner in which variances and exemptions may be granted under sections 300g-4 and 300g-5 of this title;

(5) has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances including earthquakes, floods, hurricanes, and other natural disasters, as appropriate; and

(6) has adopted authority for administrative penalties (unless the constitution of the State prohibits the adoption of the authority) in a maximum amount—

(A) in the case of a system serving a population of more than 10,000, that is not less than $1,000 per day per violation; and

(B) in the case of any other system, that is adequate to ensure compliance (as determined by the State); except that a State may establish a maximum limitation on the total amount of administrative penalties that may be imposed on a public water system per violation.

(b) Regulations

(1) The Administrator shall, by regulation (proposed within 180 days of December 16, 1974), prescribe the manner in which a State may apply to the Administrator for a determination that the requirements of paragraphs (1), (2), (3), and (4) of subsection (a) of this section are satisfied with respect to the State, the manner in which the determination is made, the period for which the determination will be effective, and the manner in which the Administrator may determine that such requirements are no longer met. Such regulations shall require that before a determination of the Administrator that such requirements are met or are no longer met with respect to a State may become effective, the Administrator shall notify such State of the determination and the reasons therefor and shall provide an opportunity for public hearing on the determination. Such regulations shall be promulgated (with such modifications as the Administrator deems appropriate) within 90 days of the publication of the proposed regulations in the Federal Register. The Administrator shall promptly notify in writing the chief executive officer of each State of the promulgation of regulations under this paragraph. Such notice shall contain a copy of the regulations and shall
§ 300g–3  TITLE 42—THE PUBLIC HEALTH AND WELFARE

specify a State’s authority under this subchapter when it is determined to have primary enforcement responsibility for public water systems.

(2) When an application is submitted in accordance with the Administrator's regulations under paragraph (1), the Administrator shall within 90 days of the date on which such application is submitted (A) make the determination applied for, or (B) deny the application and notify the applicant in writing of the reasons for his denial.

(c) Interim primary enforcement authority

A State that has primary enforcement authority under this section with respect to each existing national primary drinking water regulation shall be considered to have primary enforcement authority with respect to each new or revised national primary drinking water regulation during the period beginning on the effective date of a regulation adopted and submitted by the State with respect to the new or revised national primary drinking water regulation in accordance with subsection (b)(1) of this section and ending at such time as the Administrator makes a determination under subsection (b)(2)(B) of this section with respect to the regulation.

AMENDMENTS

1996—Subsec. (a)(1). Pub. L. 104-182, §112(a)(1), amended par. (1) generally. Prior to amendment, par. (1) read as follows: "has adopted drinking water regulations which are no less stringent than the national primary drinking water regulations in effect under sections 300g–1(a) and 300g–1(b) of this title;". Subsec. (a)(5). Pub. L. 104-182, §112(b), inserted "including earthquakes, floods, hurricanes, and other natural disasters, as appropriate" after "emergency circumstances;".

1986—Subsec. (a)(1). Pub. L. 99-339 substituted "are no less stringent than the national primary drinking water regulations in effect under sections 300g–1(a) and 300g–1(b) of this title" for subpars. (A) and (B) which related to stringency of State drinking water regulations between period of promulgation and effective date of national interim drinking water regulations and during the period after such effective date.

§ 300g–3. Enforcement of drinking water regulations

(a) Notice to State and public water system; issuance of administrative order; civil action

(1)(A) Whenever the Administrator finds during a period during which a State has primary enforcement responsibility for public water systems (within the meaning of section 300g–2(a) of this title) that any public water system—

(i) for which a variance under section 300g–4 or an exemption under section 300g–5 of this title is not in effect, does not comply with any applicable requirement, or

(ii) for which a variance under section 300g–4 or an exemption under section 300g–5 of this title is in effect, does not comply with any schedule or other requirement imposed pursuant thereto,

he shall so notify the State and such public water system and provide such advice and technical assistance to such State and public water system as may be appropriate to bring the system into compliance with the requirement by the earliest feasible time.

(B) If, beyond the thirtieth day after the Administrator’s notification under subparagraph (A), the State has not commenced appropriate enforcement action, the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such applicable requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(2) Enforcement in nonprimacy states.—

(A) In general.—If, on the basis of information available to the Administrator, the Administrator finds, with respect to a period in which a State does not have primary enforcement responsibility for public water systems, that a public water system in the State—

(i) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is not in effect, does not comply with any applicable requirement; or

(ii) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is in effect, does not comply with any schedule or other requirement imposed pursuant to the variance or exemption,

the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with the requirement, or commence a civil action under subsection (b) of this section.

(B) Notice.—If the Administrator takes any action pursuant to this paragraph, the Administrator shall notify an appropriate local elected official, if any, with jurisdiction over the public water system of the action prior to the time that the action is taken.

(b) Judicial determinations in appropriate Federal district courts; civil penalties, separate violations

The Administrator may bring a civil action in the appropriate United States district court to require compliance with any applicable requirement, with an order issued under subsection (g) of this section, or with any schedule or other requirement imposed pursuant to a variance or exemption granted under section 300g–4 or 300g–5 of this title if—

(1) authorized under paragraph (1) or (2) of subsection (a) of this section, or

(2) if requested by (A) the chief executive officer of the State in which is located the public water system which is not in compliance with such regulation or requirement, or (B) the agency of such State which has jurisdiction over compliance by public water systems in the State with national primary drinking water regulations or State drinking water regulations.

The court may enter, in an action brought under this subsection, such judgement as protection of
public health may require, taking into consideration the time necessary to comply and the availability of alternative water supplies; and, if the court determines that there has been a violation of the regulation or schedule or other requirement with respect to which the action was brought, the court may, taking into account the seriousness of the violation, the population at risk, and other appropriate factors, impose on the violator a civil penalty of not to exceed $25,000 for each day in which such violation occurs.

(c) Notice to persons served

(1) In general

Each owner or operator of a public water system shall give notice of each of the following to the persons served by the system:

(A) Notice of any failure on the part of the public water system to—

(i) comply with an applicable maximum contaminant level or treatment technique requirement of, or a testing procedure prescribed by, a national primary drinking water regulation; or
(ii) perform monitoring required by section 300j–4(a) of this title.

(B) If the public water system is subject to a variance granted under subsection (a)(1)(A), (a)(2), or (e) of section 300g–4 of this title for an inability to meet a maximum contaminant level requirement or is subject to an exemption granted under section 300g–5 of this title, notice of—

(i) the existence of the variance or exemption; and
(ii) any failure to comply with the requirements of any schedule prescribed pursuant to the variance or exemption.

(C) Notice of the concentration level of any unregulated contaminant for which the Administrator has required public notice pursuant to paragraph (2)(E).

(2) Form, manner, and frequency of notice

(A) In general

The Administrator shall, by regulation, and after consultation with the States, prescribe the manner, frequency, form, and content for giving notice under this subsection.

The regulations shall—

(i) provide for different frequencies of notice based on the differences between violations that are intermittent or infrequent and violations that are continuous or frequent; and
(ii) take into account the seriousness of any potential adverse health effects that may be involved.

(B) State requirements

(i) In general

A State may, by rule, establish alternative notification requirements—

(I) with respect to the form and content of notice given under and in a manner in accordance with subparagraph (C); and
(II) with respect to the form and content of notice given under subparagraph (D).

(ii) Contents

The alternative requirements shall provide the same type and amount of information as required pursuant to this subsection and regulations issued under subparagraph (A).

(iii) Relationship to section 300g–2

Nothing in this subparagraph shall be construed or applied to modify the requirements of section 300g–2 of this title.

(C) Violations with potential to have serious adverse effects on human health

Regulations issued under subparagraph (A) shall specify notification procedures for each violation by a public water system that has the potential to have serious adverse effects on human health as a result of short-term exposure. Each notice of violation provided under this subparagraph shall—

(i) be distributed as soon as practicable after the occurrence of the violation, but not later than 24 hours after the occurrence of the violation;
(ii) provide a clear and readily understandable explanation of—

(I) the violation;
(II) the potential adverse effects on human health;
(III) the steps that the public water system is taking to correct the violation; and
(IV) the necessity of seeking alternative water supplies until the violation is corrected;
(iii) be provided to the Administrator or the head of the State agency that has primary enforcement responsibility under section 300g–2 of this title as soon as practicable, but not later than 24 hours after the occurrence of the violation; and
(iv) as required by the State agency in general regulations of the State agency, or on a case-by-case basis after the consultation referred to in clause (iii), considering the health risks involved—

(I) be provided to appropriate broadcast media;
(II) be prominently published in a newspaper of general circulation serving the area not later than 1 day after distribution of a notice pursuant to clause (i) or the date of publication of the next issue of the newspaper; or
(III) be provided by posting or door-to-door notification in lieu of notification by means of broadcast media or newspaper.

(D) Written notice

(i) In general

Regulations issued under subparagraph (A) shall specify notification procedures for violations other than the violations covered by subparagraph (C). The procedures shall specify that a public water system shall provide written notice to each person served by the system by notice (I) in the first bill (if any) prepared after the date of occurrence of the violation, (II) in
an annual report issued not later than 1 year after the date of occurrence of the violation, or (III) by mail or direct delivery as soon as practicable, but not later than 1 year after the date of occurrence of the violation.

(ii) Form and manner of notice
The Administrator shall prescribe the form and manner of the notice to provide a clear and readily understandable explanation of the violation, any potential adverse health effects, and the steps that the system is taking to seek alternative water supplies, if any, until the violation is corrected.

(E) Unregulated contaminants
The Administrator may require the owner or operator of a public water system to give notice to the persons served by the system of the concentration levels of an unregulated contaminant required to be monitored under section 300g–2 of this title.

(3) Reports

(A) Annual report by State

(i) In general
Not later than January 1, 1998, and annually thereafter, each State that has primary enforcement responsibility under section 300g–2 of this title shall prepare, make readily available to the public, and submit to the Administrator an annual report on violations of national primary drinking water regulations by public water systems in the State, including violations with respect to (I) maximum contaminant levels, (II) treatment requirements, (III) variances and exemptions, and (IV) monitoring requirements determined to be significant by the Administrator after consultation with the States.

(ii) Distribution
The State shall publish and distribute summaries of the report and indicate where the full report is available for review.

(B) Annual report by Administrator
Not later than July 1, 1998, and annually thereafter, the Administrator shall prepare and make available to the public an annual report summarizing and evaluating reports submitted by States pursuant to subparagraph (A) and notices submitted by public water systems serving Indian Tribes provided to the Administrator pursuant to subparagraph (C) or (D) of paragraph (2) and making recommendations concerning the resources needed to improve compliance with this subchapter. The report shall include information about public water system compliance on Indian reservations and about enforcement activities undertaken and financial assistance provided by the Administrator on Indian reservations, and shall make specific recommendations concerning the resources needed to improve compliance with this subchapter on Indian reservations.

(4) Consumer confidence reports by community water systems

(A) Annual reports to consumers
The Administrator, in consultation with public water systems, environmental groups, public interest groups, risk communication experts, and the States, and other interested parties, shall issue regulations within 24 months after August 6, 1996, to require each community water system to mail to each customer of the system at least once annually a report on the level of contaminants in the drinking water purveyed by that system (referred to in this paragraph as a “consumer confidence report”). Such regulations shall provide a brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” and brief statements in plain language regarding the health concerns that resulted in regulation of each regulated contaminant. The regulations shall also include a brief and plainly worded explanation regarding contaminants that may reasonably be expected to be present in drinking water, including bottled water. The regulations shall also provide for an Environmental Protection Agency toll-free hotline that consumers can call for more information and explanation.

(B) Contents of report
The consumer confidence reports under this paragraph shall include, but not be limited to, each of the following:

(i) Information on the source of the water purveyed.
(ii) A brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” as provided in the regulations of the Administrator.
(iii) If any regulated contaminant is detected in the water purveyed by the public water system, a statement setting forth (I) the maximum contaminant level goal, (II) the maximum contaminant level, (III) the level of such contaminant in such water system, and (IV) for any regulated contaminant for which there has been a violation of the maximum contaminant level during the year concerned, the brief statement in plain language regarding the health concerns that resulted in regulation of such contaminant, as provided by the Administrator in regulations under subparagraph (A).
(iv) Information on compliance with national primary drinking water regulations, as required by the Administrator, and notice if the system is operating under a variance or exemption and the basis on which the variance or exemption was granted.
(v) Information on the levels of unregulated contaminants for which monitoring is required under section 300g–4(a)(2) of this title (including levels of cryptosporidium and radon where States determine they may be found).
(vi) A statement that the presence of contaminants in drinking water does not necessarily indicate that the drinking water poses a health risk and that more information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency hotline.

A public water system may include such additional information as it deems appropriate for public education. The Administrator may, for not more than 3 regulated contaminants other than those referred to in sub-clause (IV) of clause (iii), require a consumer confidence report under this paragraph to include the brief statement in plain language regarding the health concerns that resulted in regulation of the contaminant or contaminants concerned, as provided by the Administrator in regulations under subparagraph (A).

(C) Coverage

The Governor of a State may determine not to apply the mailing requirement of subparagraph (A) to a community water system serving fewer than 10,000 persons. Any such system shall—

(i) inform, in the newspaper notice required by clause (iii) or by other means, its customers that the system will not be mailing the report as required by subparagraph (A);

(ii) make the consumer confidence report available upon request to the public; and

(iii) publish the report referred to in subparagraph (A) annually in one or more local newspapers serving the area in which customers of the system are located.

(D) Alternative to publication

For any community water system which, pursuant to subparagraph (C), is not required to meet the mailing requirement of subparagraph (A) and which serves 500 persons or fewer, the community water system may elect not to comply with clause (i) or (iii) of subparagraph (C). If the community water system so elects, the system shall, at a minimum—

(i) prepare an annual consumer confidence report pursuant to subparagraph (B); and

(ii) provide notice at least once per year to each of its customers by mail, by door-to-door delivery, by posting or by other means authorized by the regulations of the Administrator that the consumer confidence report is available upon request.

(E) Alternative form and content

A State exercising primary enforcement responsibility may establish, by rule, after notice and public comment, alternative requirements with respect to the form and content of consumer confidence reports under this paragraph.

(d) Notice of noncompliance with secondary drinking water regulations

Whenever, on the basis of information available to him, the Administrator finds that within a reasonable time after national secondary drinking water regulations have been promulgated, one or more public water systems in a State do not comply with such secondary regulations, and that such noncompliance appears to result from a failure of such State to take reasonable action to assure that public water systems throughout such State meet such secondary regulations, he shall so notify the State.

(e) State authority to adopt or enforce laws or regulations respecting drinking water regulations or public water systems unaffected

Nothing in this subchapter shall diminish any authority of a State or political subdivision to adopt or enforce any law or regulation respecting drinking water regulations or public water systems, but no such law or regulation shall relieve any person of any requirement otherwise applicable under this subchapter.

(f) Notice and public hearing; availability of recommendations transmitted to State and public water system

If the Administrator makes a finding of noncompliance (described in subparagraph (A) or (B) of subsection (a)(1) of this section) with respect to a public water system in a State which has primary enforcement responsibility, the Administrator may, for the purpose of assisting that State in carrying out such responsibility and upon the petition of such State or public water system or persons served by such system, hold, after appropriate notice, public hearings for the purpose of gathering information from technical or other experts, Federal, State, or other public officials, representatives of such public water system, persons served by such system, and other interested persons on—

(1) the ways in which such system can within the earliest feasible time be brought into compliance with the regulation or requirement with respect to which such finding was made, and

(2) the means for the maximum feasible protection of the public health during any period in which such system is not in compliance with a national primary drinking water regulation or requirement applicable to a variance or exemption.

On the basis of such hearings the Administrator shall issue recommendations which shall be sent to such State and public water system and shall be made available to the public and communications media.

(g) Administrative order requiring compliance; notice and hearing; civil penalty; civil actions

(1) In any case in which the Administrator is authorized to bring a civil action under this section or under section 300j-4 of this title with respect to any applicable requirement, the Administrator also may issue an order to require compliance with such applicable requirement.

(2) An order issued under this subsection shall not take effect, in the case of a State having primary enforcement responsibility for public water systems in that State, until after the Administrator has provided the State with an opportunity to confer with the Administrator regarding the order. A copy of any order issued
under this subsection shall be sent to the appropriate State agency of the State involved if the State has primary enforcement responsibility for public water systems in that State. Any order issued under this subsection shall state with reasonable specificity the nature of the violation. In any case in which an order under this subsection is issued to a corporation, a copy of such order shall be issued to appropriate corporate officers.

(3)(A) Any person who violates, or fails or refuses to comply with, an order under this subsection shall be liable to the United States for a civil penalty of not more than $25,000 per day of violation.

(B) In a case in which a civil penalty sought by the Administrator under this paragraph does not exceed $5,000, the penalty shall be assessed by the Administrator after notice and opportunity for a public hearing (unless the person against whom the penalty is assessed requests a hearing on the record in accordance with section 554 of title 5). In a case in which a civil penalty sought by the Administrator under this paragraph exceeds $5,000, but does not exceed $25,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.

(C) Whenever any civil penalty sought by the Administrator under this subsection for a violation of an applicable requirement exceeds $25,000, the penalty shall be assessed by a civil action brought by the Administrator in the appropriate United States district court (as determined under the provisions of title 28).

(D) If any person fails to pay an assessment of a civil penalty after it has become final and unappealable order, or after the appropriate court of appeals has entered final judgment in favor of the Administrator, the Attorney General shall recover the amount for which such person is liable in any appropriate district court of the United States. In any such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(h) Consolidation incentive

(1) In general

An owner or operator of a public water system may submit to the State in which the system is located (if the State has primary enforcement responsibility under section 300g–2 of this title) or to the Administrator (if the State does not have primary enforcement responsibility) a plan (including specific measures and schedules) for—

(A) the physical consolidation of the system with 1 or more other systems;

(B) the consolidation of significant management and administrative functions of the system with 1 or more other systems; or

(C) the transfer of ownership of the system that may reasonably be expected to improve drinking water quality.

(2) Consequences of approval

If the State or the Administrator approves a plan pursuant to paragraph (1), no enforcement action shall be taken pursuant to this part with respect to a specific violation identified in the approved plan prior to the date that is the earlier of the date on which consolidation is completed according to the plan or the date that is 2 years after the plan is approved.

(i) "Applicable requirement" defined

In this section, the term "applicable requirement" means—

(1) a requirement of section 300g–1, 300g–3, 300g–4, 300g–5, 300g–6, 300l–2, 300i, or 300j–4 of this title;

(2) a regulation promulgated pursuant to a section referred to in paragraph (1);

(3) a schedule or requirement imposed pursuant to a section referred to in paragraph (1); and

(4) a requirement of, or permit issued under, an applicable State program for which the Administrator has made a determination that the requirements of section 300g–2 of this title have been satisfied, or an applicable State program approved pursuant to this part.

(2002—Subsec. (i)(1). Pub. L. 107–188 inserted "300i–2" after "300g–4".

Subsec. (a)(1)(B). Pub. L. 104–182, §113(a)(1)(B), substituted "any applicable requirement" for "a national primary drinking water regulation in effect under section 300g–1 of this title".

Subsec. (a)(2). Pub. L. 104–182, §113(a)(1)(A)(i), substituted "applicable requirement" for "such regulation or requirement".

Subsec. (a)(2). Pub. L. 104–182, §113(a)(1)(B), added par. (2) and struck out former par. (2) which read as follows: "Whenever, on the basis of information available to him, the Administrator finds during a period during which a State does not have primary enforcement responsibility for public water systems that a public water system in such State—"

"(A) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is not in effect, does not comply with any national primary drinking water regulation in effect under section 300g–1 of this title, or"

"(B) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is in effect, does not comply with any schedule or other requirement imposed pursuant thereto,"

the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement or the Administrator shall commence a civil action under subsection (b) of this section.

Subsec. (b). Pub. L. 104–182, §113(a)(2), substituted "any applicable requirement" for "a national primary drinking water regulation" in introductory provisions.

Subsec. (c). Pub. L. 104–182, §114(a). amended subsec. (c) generality. Prior to amendment, subsec. (c) related to notice of owner or operator of public water system to persons served, regulations for form, manner, and

1 So in original. There probably should be a comma.
frequency of notice, amendment of regulations to provide different types and frequencies of notice, and penalties.

Subsec. (g)(1). Pub. L. 104–182, §113(a)(3)(A), substituted “applicable requirement” for “regulation, schedule, or other requirement” in two places.

Subsec. (g)(2). Pub. L. 104–182, §113(a)(3)(B), substituted “effect, in the case” for “effect until after notice and opportunity for public hearing and, in the case” and “regarding the order” for “regarding the proposed order” and struck out “proposed to be” after “A copy of the

Subsec. (g)(3)(B). Pub. L. 104–182, §113(a)(3)(C)(i), added subpar. (B) and struck out former subpar. (B) which read as follows: “Whenever any civil penalty sought by the Administrator under this paragraph does not exceed a total of $5,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.”

Subsec. (g)(3)(C). Pub. L. 104–182, §113(a)(3)(C)(ii), substituted “subsection for a violation of an applicable requirement exceeds $25,000” for “paragraph exceeds $5,000”.

Subsecs. (h), (i). Pub. L. 104–182, §113(a)(4), added subsecs. (h) and (i).

Subsec. (a)(1)(A). Pub. L. 99–339, §102(a), inserted “and such public water system” after “notify the State” in provisions following cl. (i).

Subsec. (a)(1)(B). Pub. L. 99–339, §102(b)(1), amended subpar. (B) generally, substituting provisions which relate to issuance of an order to public water system to comply with regulations, or commencement of civil action if the State has not commenced appropriate enforcement action for provisions which related to public notice of noncompliance and commencement of civil action by Administrator if State failed to take steps to obtain compliance by public water system.

Subsec. (a)(2). Pub. L. 99–339, §102(b)(2), substituted “the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement, or the Administrator shall commence a civil action under subsection (b) of this section” for “he may commence a civil action under subsection (b) of this section”.

Subsec. (b). Pub. L. 99–339, §102(c), inserted “, with an order issued under subsection (g) of this section,” before “or with any schedule” and substituted “there has been a violation” for “there has been a willful violation” and “$25,000” for “$5,000”.

Subsec. (c). Pub. L. 99–339, §103, substituted provisions relating to amendment of regulations within fifteen months after June 19, 1986, to provide different types and frequencies of notice based on the differences between violations which are intermittent or continuous, manner and content of notices, notice required to be served by owner or operator of public water system, and civil penalty of $25,000, for provisions relating to form, manner, and frequency of notice based on three month billing period for water bills, notice required to be public served by owner or operator of public water system, and civil penalty of $5,000.

Subsec. (g). Pub. L. 99–339, §102(d), added subsec. (g).

1977—Subsec. (c). Pub. L. 95–190 inserted provisions relating to frequency of required notice, and notice respecting contaminant levels, and substituted “issued under this subsection” for “thereunder”.

§ 300g–4. Variances

(a) Characteristics of raw water sources; specific treatment technique; notice to Administrator, reasons for variance, compliance, enforcement; approval or revision of schedules and revocation of variances; review of variances and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting variances or failing to prescribe schedules; State corrective action; authority of Administrator in a State without primary enforcement responsibility; alternative treatment techniques

Notwithstanding any other provision of this part, variances from national primary drinking water regulations may be granted as follows:

(1)(A) A State which has primary enforcement responsibility for public water systems may grant one or more variances from an applicable national primary drinking water regulation to one or more public water systems within its jurisdiction which, because of characteristics of the raw water sources which are reasonably available to the systems, cannot meet the requirements respecting the maximum contaminant levels of such drinking water regulation. A variance may be issued to a system on condition that the system install the best technology, treatment techniques, or other means, which the Administrator finds are available (taking costs into consideration), and based upon an evaluation satisfactory to the State that indicates that alternative sources of water are not reasonably available to the system. The Administrator shall propose and promulgate his finding of the best available technology, treatment techniques or other means available for each contaminant for purposes of this subsection at the time he proposes and promulgates a maximum contaminant level for each such contaminant. The Administrator’s findings of best available technology, treatment techniques or other means for purposes of this subsection may vary depending on the number of persons served by the system or for other physical conditions related to engineering feasibility and costs of compliance with maximum contaminant levels as considered appropriate by the Administrator. Before a State may grant a variance under this subparagraph, the State shall prescribe at the time the variance is granted, a schedule for—

(i) compliance (including increments of progress) by the public water system with each containment level requirement with respect to which the variance was granted, and

(ii) implementation by the public water system of such additional control measures as the State may require for each contaminant, subject to such contaminant level requirement, during the period ending on the date compliance with such requirement is required.

\(^1\) So in original.
§ 300g–4

Before a schedule prescribed by a State pursuant to this subparagraph may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice. A schedule prescribed pursuant to this subparagraph for a public water system granted a variance shall require compliance by the system with each contaminant level requirement with respect to which the variance was granted as expeditiously as practicable (as the State may reasonably determine).

(B) A State which has primary enforcement responsibility for public water systems may grant to one or more public water systems within its jurisdiction one or more variances from any provision of the national primary drinking water regulation which requires the use of a specified treatment technique with respect to a contaminant if the public water system applying for the variance demonstrates to the satisfaction of the State that such treatment technique is not necessary to protect the health of persons because of the nature of the raw water source of such system. A variance granted under this subparagraph shall be conditioned on such monitoring and other requirements as the Administrator may prescribe.

(C) Before a variance proposed to be granted by a State under subparagraph (A) or (B) may take effect, such State shall provide notice and opportunity for public hearing on the proposed variance. A notice given pursuant to the preceding sentence may cover the granting of more than one variance and a hearing held pursuant to such notice shall include each of the variances covered by the notice. The State shall promptly notify the Administrator of all variances granted by it. Such notification shall contain the reason for the variance (and in the case of a variance under subparagraph (A), the basis for the finding required by that subparagraph before the granting of the variance) and documentation of the need for the variance.

(D) Each public water system's variance granted by a State under subparagraph (A) shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to that subparagraph. The requirements of each schedule prescribed by a State pursuant to that subparagraph shall be enforceable by the State under its laws. Any requirement of a schedule on which a variance granted under that subparagraph is conditioned may be enforced under section 300g–3 of this title as if the variance were part of a national primary drinking water regulation.

(E) Each schedule prescribed by a State pursuant to subparagraph (A) shall be deemed approved by the Administrator unless the variance for which it was prescribed is revoked by the Administrator under subparagraph (G) or the schedule is revised by the Administrator under such subparagraph.

(F) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the variances granted under subparagraph (A) (and schedules prescribed pursuant thereto) and under subparagraph (B) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of variances and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (i) provide information respecting the location of data and other information respecting the variances to be reviewed (including data and other information concerning new scientific matters bearing on such variances), and (ii) advise of the opportunity to submit comments on the variances reviewed and on the need for continuing them. Upon completion of any such review, the Administrator shall publish in the Federal Register the results of his review together with findings responsive to comments submitted in connection with such review.

(G)(i) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting variances under subparagraph (A) or (B) or that in a substantial number of cases the States has failed to prescribe schedules in accordance with subparagraph (A), the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting variances in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the variances and if the requirements applicable to the granting of the variances were complied with. A notice under this clause shall—

(I) identify each public water system with respect to which the finding was made,

(II) specify the reasons for the finding, and

(III) as appropriate, propose revocations of specific variances or propose revised schedules or other requirements for specific public water systems granted variances, or both.

(ii) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to clause (i) of this subparagraph. After a hearing on a notice pursuant to such clause, the Administrator shall (I) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (II) promulgate (with such modifications as he deems appropriate) such variance revocations and revised schedules or other requirements proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to clause (i) of this subparagraph, the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.

(iii) If a State is notified under clause (i) of this subparagraph of a finding of the Adminis-
trator made with respect to a variance grant-
ed a public water system within that State or
to a schedule or other requirement for a var-
iance and if, before a revocation of such var-
iance or a revision of such schedule or other re-
quirement promulgated by the Administrator
takes effect, the State takes corrective action
with respect to such variance or schedule or
other requirement which the Administrator
determines makes his finding inapplicable to
such variance or schedule or other require-
ment, the Administrator shall rescind the ap-
lication of his finding to that variance on
schedule or other requirement. No variance
revocation or revised schedule or other re-
quirement may take effect before the expira-
tion of 90 days following the date of the notice
in which the revocation or revised schedule or
other requirement was proposed.

(2) If a State does not have primary enforce-
ment responsibility for public water systems,
the Administrator shall have the same author-
ity to grant variances in such State as the
State would have under paragraph (1) if it had
primary enforcement responsibility.

(3) The Administrator may grant a variance
from any treatment technique requirement of
a national primary drinking water regulation
upon a showing by any person that an alter-
native treatment technique not included in
such requirement is at least as efficient in
lowering the level of the contaminant with re-
spect to which such requirement was pre-
scribed. A variance under this paragraph shall
be conditioned on the use of the alternative
treatment technique which is the basis of the
variance.

(b) Enforcement of schedule or other require-
ment

Any schedule or other requirement on which a
variance granted under paragraph (1)(B) or (2) of
subsection (a) of this section is conditioned may
be enforced under section 300g–3 of this title as
if such schedule or other requirement was part
of a national primary drinking water regulation.

(c) Applications for variances; regulations: rea-
sonable time for acting

If an application for a variance under sub-
section (a) of this section is made, the State re-
ceiving the application or the Administrator, as
the case may be, shall act upon such application
within a reasonable period (as determined under
regulations prescribed by the Administrator) af-
after the date of its submission.

(d) “Treatment technique requirement” defined

For purposes of this section, the term “treat-
ment technique requirement” means a require-
ment in a national primary drinking water regu-
lation which specifies for a contaminant (in ac-
cordance with section 300f(1)(C)(ii) of this title)
each treatment technique known to the Admin-
istrator which leads to a reduction in the level
of such contaminant sufficient to satisfy the re-
quirements of section 300g–1(b) of this title.

(e) Small system variances

(1) In general

A State exercising primary enforcement re-
ponsibility for public water systems under
section 300g–2 of this title (or the Adminis-
trator in nonprimacy States) may grant a variance
under this subsection for compliance with a require-
ment specifying a maximum contaminant level or treatment technique
contained in a national primary drinking
water regulation to—
(A) public water systems serving 3,300 or
fewer persons; and
(B) with the approval of the Administrator
pursuant to paragraph (9), public water sys-
tems serving more than 3,300 persons but
fewer than 10,000 persons,

if the variance meets each requirement of this
subsection.

(2) Availability of variances

A public water system may receive a var-
iance pursuant to paragraph (1) if—
(A) the Administrator has identified a variance technology under section
300g–1(b)(15) of this title that is applicable to
the size and source water quality conditions
of the public water system;
(B) the public water system installs, oper-
ates, and maintains, in accordance with
guidance or regulations issued by the Ad-
ministrator, such treatment technology,
treatment technique, or other means; and
(C) the State in which the system is lo-
cated determines that the conditions of
paragraph (3) are met.

(3) Conditions for granting variances

A variance under this subsection shall be
available only to a system—
(A) that cannot afford to comply, in ac-
cordance with affordability criteria estab-
lished by the Administrator (or the State in
the case of a State that has primary enforce-
ment responsibility under section 300g–2 of
this title), with a national primary drinking
water regulation, including compliance
through—
(i) treatment;
(ii) alternative source of water supply; or
(iii) restructuring or consolidation (un-
less the Administrator (or the State in
the case of a State that has primary enforce-
ment responsibility under section 300g–2 of
this title) makes a written determination
that restructuring or consolidation is not
practicable); and
(B) for which the Administrator (or the
State in the case of a State that has primary
enforcement responsibility under section
300g–2 of this title) determines that the
terms of the variance ensure adequate pro-
tection of human health, considering the
quality of the source water for the system
and the removal efficiencies and expected
useful life of the treatment technology re-
quired by the variance.

(4) Compliance schedules

A variance granted under this subsection
shall require compliance with the conditions
of the variance not later than 3 years after the
date on which the variance is granted, except
that the Administrator (or the State in the
case of a State that has primary enforcement
responsibility under section 300g–2 of this title) may allow up to 2 additional years to comply with a variance technology, secure an alternative source of water, restructure or consolidate if the Administrator (or the State) determines that additional time is necessary for capital improvements, or to allow for financial assistance provided pursuant to section 300j–12 of this title or any other Federal or State program.

(5) Duration of variances

The Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) shall review each variance granted under this subsection not less often than every 5 years after the compliance date established in the variance to determine whether the system remains eligible for the variance and is conforming to each condition of the variance.

(6) Ineligibility for variances

A variance shall not be available under this subsection for—

(A) any maximum contaminant level or treatment technique for a contaminant with respect to which a national primary drinking water regulation was promulgated prior to January 1, 1986; or

(B) a national primary drinking water regulation for a microbial contaminant (including a bacterium, virus, or other organism) or an indicator or treatment technique for a microbial contaminant.

(7) Regulations and guidance

(A) In general

Not later than 2 years after August 6, 1996, and in consultation with the States, the Administrator shall promulgate regulations for variances to be granted under this subsection. The regulations shall, at a minimum, specify:

(i) procedures to be used by the Administrator or a State to grant or deny variances, including requirements for notifying the Administrator and consumers of the public water system that a variance is proposed to be granted (including information regarding the contaminant and variance) and requirements for a public hearing on the variance before the variance is granted;

(ii) requirements for the installation and proper operation of variance technology that is identified (pursuant to section 300g–1(b)(15) of this title) for small systems and the financial and technical capability to operate the treatment system, including operator training and certification;

(iii) eligibility criteria for a variance for each national primary drinking water regulation, including requirements for the quality of the source water (pursuant to section 300g–1(b)(15)(A) of this title); and

(iv) information requirements for variance applications.

(B) Affordability criteria

Not later than 18 months after August 6, 1996, the Administrator, in consultation with the States and the Rural Utilities Service of the Department of Agriculture, shall publish information to assist the States in developing affordability criteria. The affordability criteria shall be reviewed by the States not less often than every 5 years to determine if changes are needed to the criteria.

(8) Review by the Administrator

(A) In general

The Administrator shall periodically review the program of each State that has primary enforcement responsibility for public water systems under section 300g–2 of this title with respect to variances to determine whether the variances granted by the State comply with the requirements of this subsection. With respect to affordability, the determination of the Administrator shall be limited to whether the variances granted by the State comply with the affordability criteria developed by the State.

(B) Notice and publication

If the Administrator determines that variances granted by a State are not in compliance with affordability criteria developed by the State and the requirements of this subsection, the Administrator shall notify the State in writing of the deficiencies and make public the determination.

(9) Approval of variances

A State proposing to grant a variance under this subsection to a public water system serving more than 3,300 and fewer than 10,000 persons shall submit the variance to the Administrator for review and approval prior to the issuance of the variance. The Administrator shall approve the variance if it meets each of the requirements of this subsection. The Administrator shall approve or disapprove the variance within 90 days. If the Administrator disapproves a variance under this paragraph, the Administrator shall notify the State in writing of the reasons for disapproval and the variance may be resubmitted with modifications to address the objections stated by the Administrator.

(10) Objections to variances

(A) By the Administrator

The Administrator may review and object to any variance proposed to be granted by a State, if the objection is communicated to the State not later than 90 days after the State proposes to grant the variance. If the Administrator objects to the granting of a variance, the Administrator shall notify the State in writing of each basis for the objection and propose a modification to the variance to resolve the concerns of the Administrator. The State shall make the recommended modification or respond in writing to each objection. If the State issues the variance without resolving the concerns of the Administrator, the Administrator may overturn the State decision to grant the variance if the Administrator determines that the State decision does not comply with this subsection.
(B) Petition by consumers

Not later than 30 days after a State exercising primary enforcement responsibility for public water systems under section 300g-2 of this title proposes to grant a variance for a public water system, any person served by the system may petition the Administrator to object to the granting of a variance. The Administrator shall respond to the petition and determine whether to object to the variance under subparagraph (A) not later than 60 days after the receipt of the petition.

(C) Timing

No variance shall be granted by a State until the later of the following:

(i) 90 days after the State proposes to grant a variance.

(ii) If the Administrator objects to the variance, the date on which the State makes the recommended modifications or responds in writing to each objection.

AMENDMENTS

Pub. L. 104-182, §115, in second sentence, substituted “be issued to a system after the system’s application of” and inserted “, and based upon an evaluation satisfactory to the State that indicates that alternative sources of water are not reasonably available to the system” after “(taking costs into consideration)”. Pub. L. 104-182, §115, as added Pub. L. 104-182, §501(a)(3), inserted “the” before “time the variance is granted,” in introductory provisions.

Subsec. (d). Pub. L. 104-182, §102(c)(1), substituted “section 300g-1(b)” for “section 300g-1(b)(3)”. Pub. L. 104-182, §116, added subsec. (e).

1986—Subsec. (a)(1)(A). Pub. L. 99-339, §104(1)-(3), substituted “such drinking water regulation. A variance may only be issued to a system after the system’s application for such drinking water regulation despite application”, struck out “generally” after “finds are”, inserted provisions relating to proposal and promulgation by Administrator of a finding on best available technology, treatment techniques or other means available for each contaminant at time of proposal and promulgation of maximum contaminant levels, and substituted “at the time” for “within one year of the date”. Pub. L. 99-339, §104(4), substituted “water system of such additional control” for “water system of such control”.

§ 300g-5. Exemptions

(a) Requisite findings

A State which has primary enforcement responsibility may exempt any public water system within the State’s jurisdiction from any requirement respecting a maximum contaminant level or any treatment technique requirement, or from both, of an applicable national primary drinking water regulation upon a finding that—

(1) due to compelling factors (which may include economic factors, including qualification of the public water system as a system serving a disadvantaged community pursuant to section 300j-12(d) of this title), the public water system is unable to comply with such contaminant level or treatment technique requirement, or to implement measures to develop an alternative source of water supply;

(2) the public water system was in operation on the effective date of such contaminant level or treatment technique requirement, or, for a system that was not in operation by that date, only if no reasonable alternative source of drinking water is available to such new system,

(3) the granting of the exemption will not result in an unreasonable risk to health;1 and

(4) management or restructuring changes (or both) cannot reasonably be made that will result in compliance with this subchapter or, if compliance cannot be achieved, improve the quality of the drinking water.

(b) Compliance schedule and implementation of control measures; notice and hearing; dates for compliance with schedule; compliance, enforcement; approval or revision of schedules and revocation of exemptions

(1) If a State grants a public water system an exemption under subsection (a) of this section, the State shall prescribe, at the time the exemption is granted, a schedule for—

(A) compliance (including increments of progress or measures to develop an alternative source of water supply) by the public water system with each contaminant level requirement or treatment technique requirement with respect to which the exemption was granted, and

(B) implementation by the public water system of such control measures as the State may require for each contaminant, subject to such contaminant level requirement or treatment technique requirement, during the period ending on the date compliance with such requirement is required.

Before a schedule prescribed by a State pursuant to this subsection may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice.

(2)(A) A schedule prescribed pursuant to this subsection for a public water system granted an exemption under subsection (a) of this section shall require compliance by the system with each contaminant level and treatment technique requirement with respect to which the exemption was granted as expeditiously as practicable (as the State may reasonably determine) but not later than 3 years after the otherwise applicable compliance date established in section 300g-1(b)(10) of this title.

(B) No exemption shall be granted unless the public water system establishes that—

(i) the system cannot meet the standard without capital improvements which cannot be completed prior to the date established pursuant to section 300g-1(b)(10) of this title;

1 So in original. The semicolon probably should be a comma.
(ii) in the case of a system which needs financial assistance for the necessary improvements, the system has entered into an agreement to obtain such financial assistance or assistance pursuant to section 300g–12 of this title, or any other Federal or State program is reasonably likely to be available within the period of the exemption; or
(iii) the system has entered into an enforceable agreement to become a part of a regional public water system; and

the system is taking all practicable steps to meet the standard.

(C) In the case of a system which does not serve more than a population of 3,300 and which needs financial assistance for the necessary improvements, an exemption granted under clause (i) or (ii) of subparagraph (B) may be renewed for one or more additional 2-year periods, but not to exceed a total of 6 years, if the system establishes that it is taking all practicable steps to meet the requirements of subparagraph (B).

(D) LIMITATION.—A public water system may not receive an exemption under this section if the system was granted a variance under section 300g–4(e) of this title.

(3) Each public water system’s exemption granted by a State under subsection (a) of this section shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to this subsection. The requirements of each schedule prescribed by a State pursuant to this subsection shall be enforceable by the State under its laws. Any requirement of a schedule on which an exemption granted under this section is conditioned may be enforced under section 300g–3 of this title as if such requirement was part of a national primary drinking water regulation.

(4) Each schedule prescribed by a State pursuant to this subsection shall be deemed approved by the Administrator unless the exemption for which it was prescribed is revoked by the Administrator under subsection (d)(2) of this section or the schedule is revised by the Administrator under such subsection.

(c) Notice to Administrator; reasons for exemption

Each State which grants an exemption under subsection (a) of this section shall promptly notify the Administrator of the granting of such exemption. Such notification shall contain the reasons for the exemption (including the basis for the finding required by subsection (a)(3) of this section before the exemption may be granted) and document the need for the exemption.

(d) Review of exemptions and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting exemptions or failing to prescribe schedules;

State corrective action

(1) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the exemptions granted (and schedules prescribed pursuant thereto) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of exemptions and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (A) provide information respecting the location of data and other information respecting the exemptions to be reviewed (including data and other information concerning new scientific matters bearing on such exemptions), and (B) advise of the opportunity to submit comments on the exemptions reviewed and on the revocation of the exemptions. Upon completion of any such review, the Administrator shall publish in the Federal Register the results of his review, together with findings responsive to comments submitted in connection with such review.

(2)(A) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting exemptions under subsection (a) of this section or failed to prescribe schedules in accordance with subsection (b) of this section, the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting exemptions in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the exemptions and if the requirements applicable to the granting of the exemptions were complied with. A notice under this subparagraph shall—
(i) identify each exempt public water system with respect to which the finding was made,
(ii) specify the reasons for the finding, and
(iii) as appropriate, propose revocations of specific exemptions or propose revised schedules for specific exempt public water systems, or both.

(B) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to subparagraph (A). After a hearing on notice pursuant to paragraph (A), the Administrator shall (i) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (ii) promulgate (with such modifications as he deems appropriate) such exemption revocations and revised schedules proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to subparagraph (A), the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.

(C) If a State is notified under subparagraph (A) of a finding of the Administrator made with respect to an exemption granted a public water system within that State or to a schedule prescribed pursuant to such an exemption and if before a revocation of such exemption or a revision of such schedule promulgated by the Administrator takes effect the State takes corrective action with respect to such exemption or schedule which the Administrator determines makes his finding inapplicable to such exemption or schedule, the Administrator shall re-
implement measures to develop an alternative source of water supply,’’ after ‘‘treatment technique requirement’’ each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1(b) of this title.

(f) Authority of Administrator in a State without primary enforcement responsibility

If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to exempt public water systems in such State from maximum contaminant level requirements and treatment technique requirements under the same conditions and in the same manner as the State would be authorized to grant exemptions under this section if it had primary enforcement responsibility.

(g) Applications for exemptions; regulations; reasonable time for acting

If an application for an exemption under this section is made, the State receiving the application or the Administrator, as the case may be, shall act upon such application within a reasonable period (as determined under regulations prescribed by the Administrator) after the date of its submission.

(1) Authority of Administrator in a State without primary enforcement responsibility

If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to exempt public water systems in such State from maximum contaminant level requirements and treatment technique requirements under the same conditions and in the same manner as the State would be authorized to grant exemptions under this section if it had primary enforcement responsibility.

(2) Applications for exemptions; regulations; reasonable time for acting

If an application for an exemption under this section is made, the State receiving the application or the Administrator, as the case may be, shall act upon such application within a reasonable period (as determined under regulations prescribed by the Administrator) after the date of its submission.
§ 300g–6. Prohibition on use of lead pipes, solder, and flux

(a) In general

(1) Prohibitions

(A) In general

No person may use any pipe, any pipe or plumbing fitting or fixture, any solder, or any flux, after June 19, 1986, in the installation or repair of—

(i) any public water system; or

(ii) any plumbing in a residential or nonresidential facility providing water for human consumption, that is not lead free (within the meaning of subsection (d) of this section).

(B) Leaded joints

Subparagraph (A) shall not apply to leaded joints necessary for the repair of cast iron pipes.

(2) Public notice requirements

(A) In general

Each owner or operator of a public water system shall identify and provide notice to persons that may be affected by lead contamination of their drinking water where such contamination results from either or both of the following:

(i) The lead content in the construction materials of the public water distribution system,

(ii) Corrosivity of the water supply sufficient to cause leaching of lead.

The notice shall be provided in such manner and form as may be reasonably required by the Administrator. Notice under this paragraph shall be provided notwithstanding the absence of a violation of any national drinking water standard.

(B) Contents of notice

Notice under this paragraph shall provide a clear and readily understandable explanation of—

(i) The potential sources of lead in the drinking water,

(ii) potential adverse health effects,

(iii) reasonably available methods of mitigating known or potential lead content in drinking water,

(iv) any steps the system is taking to mitigate lead content in drinking water, and

(v) the necessity for seeking alternative water supplies, if any.

(3) Unlawful acts

Effective 2 years after August 6, 1996, it shall be unlawful—

(A) for any person to introduce into commerce any pipe, or any pipe or plumbing fitting or fixture, that is not lead free, except for a pipe that is used in manufacturing or industrial processing;

(B) for any person engaged in the business of selling plumbing supplies, except manufacturers, to sell solder or flux that is not lead free; or

(C) for any person to introduce into commerce any solder or flux that is not lead free unless the solder or flux bears a prominent label stating that it is illegal to use the solder or flux in the installation or repair of any plumbing providing water for human consumption.

(b) State enforcement

(1) Enforcement of prohibition

The requirements of subsection (a)(1) of this section shall be enforced in all States effective 24 months after June 19, 1986. States shall enforce such requirements through State or local plumbing codes, or such other means of enforcement as the State may determine to be appropriate.

(2) Enforcement of public notice requirements

The requirements of subsection (a)(2) of this section shall apply in all States effective 24 months after June 19, 1986.

(c) Penalties

If the Administrator determines that a State is not enforcing the requirements of subsection (a) of this section as required pursuant to subsection (b) of this section, the Administrator may withhold up to 5 percent of Federal funds available to that State for State program grants under section 300j–2(a) of this title.

(d) “Lead free” defined

For purposes of this section, the term “lead free”—

(1) when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead; and

(2) when used with respect to pipes and plumbing fittings refers to pipes and plumbing fittings containing not more than 0.8 percent lead; and

(3) when used with respect to plumbing fittings and fixtures, refers to plumbing fittings and fixtures in compliance with standards established in accordance with subsection (e) of this section.

(e) Plumbing fittings and fixtures

(1) In general

The Administrator shall provide accurate and timely technical information and assistance to qualified third-party certifiers in the development of voluntary standards and testing protocols for the leaching of lead from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion.

(2) Standards

(A) In general

If a voluntary standard for the leaching of lead is not established by the date that is 1 year after August 6, 1996, the Administrator shall, not later than 2 years after August 6, 1996, promulgate regulations setting a health-effects-based performance standard establishing maximum leaching levels from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion. The standard
shall become effective on the date that is 5 years after the date of promulgation of the standard.

(B) Alternative requirement

If regulations are required to be promulgated under subparagraph (A) and have not been promulgated by the date that is 5 years after August 6, 1996, no person may import, manufacture, process, or distribute in commerce a new plumbing fitting or fixture, intended by the manufacturer to dispense water for human ingestion, that contains more than 4 percent lead by dry weight.

AMENDMENT OF SUBSECTIONS (a) AND (d)

Pub. L. 111–380, § 2, Jan. 4, 2011, 124 Stat. 4131, provided that, applicable beginning on the day that is 36 months after Jan. 4, 2011, this section is amended as follows:

(1) by adding at the end of subsection (a) the following:

“(4) Exemptions

“The prohibitions in paragraphs (1) and (3) shall not apply to—

“(A) pipes, pipe fittings, plumbing fittings, or fixtures, including backflow preventers, that are used exclusively for nonpotable services such as manufacturing, industrial processing, irrigation, outdoor watering, or any other uses where the water is not anticipated to be used for human consumption; or

“(B) toilets, bidets, urinals, fill valves, flushometer valves, tub fillers, shower valves, service saddles, or water distribution main gate valves that are 2 inches in diameter or larger.”; and

(2) by amending subsection (d) to read as follows:

(d) Definition of lead free

(1) In general

For the purposes of this section, the term “lead free” means—

(A) not containing more than 0.2 percent lead when used with respect to solder and flux; and

(B) not more than a weighted average of 0.25 percent lead when used with respect to the wetted surfaces of pipes, pipe fittings, plumbing fittings, and fixtures.

(2) Calculation

The weighted average lead content of a pipe, pipe fitting, plumbing fitting, or fixture shall be calculated by using the following formula: For each wetted component, the percentage of lead in the component shall be multiplied by the ratio of the wetted surface area of that component to the total wetted surface area of the entire product to arrive at the weighted percentage of lead of the component. The weighted percentage of lead of each wetted component shall be added together, and the sum of these weighted percentages shall constitute the weighted average lead content of the product. The lead content of the material used to produce wetted components shall be used to determine compliance with paragraph (1)(B). For lead content of materials that are provided as a range, the maximum content of the range shall be used.

AMENDMENTS

Subsec. (a)(1). Pub. L. 104–182, § 118(1), substituted “Prohibitions” for “Prohibition” in heading and amended text generally. Prior to amendment, text read as follows: “Any pipe, solder, or flux, which is used after June 19, 1986, in the installation or repair of—

“(A) any public water system, or

“(B) any plumbing in a residential or nonresidential facility providing water for human consumption which is connected to a public water system, shall be lead free (within the meaning of subsection (d) of this section). This paragraph shall not apply to leaded joints necessary for the repair of cast iron pipes.”

EFFECTIVE DATE OF 2011 AMENDMENT

Pub. L. 111–380, § 2(b), Jan. 4, 2011, 124 Stat. 4132, provided that: “The provisions of subsections (a)(4) and (d) of section 1417 of the Safe Drinking Water Act [42 U.S.C. 300g–6(a)(4), (d)], as added by this section, apply beginning on the day that is 36 months after the date of the enactment of this Act [Jan. 4, 2011].”

NOTIFICATION TO STATES

Section 109(b) of Pub. L. 99–339 provided that: “The Administrator of the Environmental Protection Agency shall notify all States with respect to the requirements of section 1417 of the Public Health Service Act [this section] within 90 days after the enactment of this Act [June 19, 1986].”

BAN ON LEAD WATER PIPES, SOLDER, AND FLUX IN VA AND HUD INSURED OR ASSISTED PROPERTY

“(1) PROHIBITION.—The Secretary of Housing and Urban Development and the Secretary of Veterans Affairs may not insure or guarantee a mortgage or furnish assistance with respect to newly constructed residential property which contains a potable water system unless such system uses only lead free pipe, solder, and flux.

“(2) DEFINITION OF LEAD FREE.—For purposes of paragraph (1) the term ‘lead free’—

“(A) when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead, and

“(B) when used with respect to pipes and pipe fittings refers to pipes and pipe fittings containing not more than 8.0 percent lead.

“(3) EFFECTIVE DATE.—Paragraph (1) shall become effective 24 months after the enactment of this Act [June 19, 1986].”

§ 300g–7. Monitoring of contaminants

(a) Interim monitoring relief authority

(1) In general

A State exercising primary enforcement responsibility for public water systems may modify the monitoring requirements for any regulated or unregulated contaminants for which monitoring is required other than mi-
crobiial contaminants (or indicators thereof), disinfectants and disinfection byproducts or corrosion byproducts for an interim period to provide that any public water system serving 10,000 persons or fewer shall not be required to conduct additional quarterly monitoring during an interim relief period for such contaminants if—

(A) monitoring, conducted at the beginning of the period for the contaminant concerned and certified to the State by the public water system, fails to detect the presence of the contaminant in the ground or surface water supplying the public water system; and

(B) the State, considering the hydrogeology of the area and other relevant factors, determines in writing that the contaminant is unlikely to be detected by further monitoring during such period.

(2) Termination; timing of monitoring

The interim relief period referred to in paragraph (1) shall terminate when permanent monitoring relief is adopted and approved for such State, or at the end of 36 months after August 6, 1996, whichever comes first. In order to serve as a basis for interim relief, the monitoring conducted at the beginning of the period must occur at the time determined by the State to be the time of the public water system's greatest vulnerability to the contaminant concerned in the relevant ground or surface water, taking into account the case of pesticides the time of application of the pesticide for the source water area and the travel time for the pesticide to reach such waters and taking into account, in the case of other contaminants, seasonality of precipitation and contaminant travel time.

(b) Permanent monitoring relief authority

(1) In general

Each State exercising primary enforcement responsibility for public water systems under this subchapter and having an approved source water assessment program may adopt, in accordance with guidance published by the Administrator, tailored alternative monitoring requirements for public water systems in such State (as an alternative to the monitoring requirements for chemical contaminants set forth in the applicable national primary drinking water regulations) where the State concludes that (based on data available at the time of adoption concerning susceptibility, use, occurrence, or wellhead protection, or from the State's drinking water source water assessment program) such alternative monitoring would provide assurance that it complies with the Administrator's guidelines. The State program must be adequate to assure compliance with, and enforcement of, applicable national primary drinking water regulations. Alternative monitoring shall not apply to regulated microbiological contaminants (or indicators thereof), disinfectants and disinfection byproducts, or corrosion byproducts. The preceding sentence is not intended to limit other authority of the Administrator under other provisions of this subchapter to grant monitoring flexibility.

(2) Guidelines

(A) In general

The Administrator shall issue, after notice and comment and at the same time as guidelines are issued for source water assessment under section 300j–13 of this title, guidelines for States to follow in proposing alternative monitoring requirements under paragraph (1) for chemical contaminants. The Administrator shall publish such guidelines in the Federal Register. The guidelines shall assure that the public health will be protected from drinking water contamination. The guidelines shall require that a State alternative monitoring program apply on a contaminant-by-contaminant basis, to be eligible for such alternative monitoring program, a public water system must show the State that the contaminant is not present in the drinking water supply or, if present, it is reliably and consistently below the maximum contaminant level.

(B) Definition

For purposes of subparagraph (A), the phrase "reliably and consistently below the maximum contaminant level" means that, although contaminants have been detected in a water supply, the State has sufficient knowledge of the contamination source and extent of contamination to predict that the maximum contaminant level will not be exceeded. In determining that a contaminant is reliably and consistently below the maximum contaminant level, States shall consider the quality and completeness of data, the length of time covered and the volatility or stability of monitoring results during that time, and the proximity of such results to the maximum contaminant level. Wide variations in the analytical results, or analytical results close to the maximum contaminant level, shall not be considered to be reliably and consistently below the maximum contaminant level.

(3) Effect of detection of contaminants

The guidelines issued by the Administrator under paragraph (2) shall require that if, after the monitoring program is in effect and operating, a contaminant covered by the alternative monitoring program is detected at levels at or above the maximum contaminant level or is no longer reliably or consistently below the maximum contaminant level, the public water system must either—

(A) demonstrate that the contamination source has been removed or that other action has been taken to eliminate the contamination problem; or

(B) test for the detected contaminant pursuant to the applicable national primary drinking water regulation.

(4) States not exercising primary enforcement responsibility

The Governor of any State not exercising primary enforcement responsibility under section 300g–2 of this title on August 6, 1996, may submit to the Administrator a request that the Administrator modify the monitoring re-
requirements established by the Administrator and applicable to public water systems in that State. After consultation with the Governor, the Administrator shall modify the requirements for public water systems in that State if the request of the Governor is in accordance with each of the requirements of this subsection that apply to alternative monitoring requirements established by States that have primary enforcement responsibility. A decision by the Administrator to approve a request under this clause shall be made for a period of 3 years and may subsequently be extended for periods of 5 years.

(c) Treatment as NPDWR

All monitoring relief granted by a State to a public water system for a regulated contaminant under subsection (a) or (b) of this section shall be treated as part of the national primary drinking water regulation for that contaminant.

(d) Other monitoring relief

Nothing in this section shall be construed to affect the authority of the States under applicable national primary drinking water regulations to alter monitoring requirements through waivers or other existing authorities. The Administrator shall periodically review and, as appropriate, revise such authorities.

(§ 300g–8. Operator certification)

(a) Guidelines

Not later than 30 months after August 6, 1996, and in cooperation with the States, the Administrator shall publish guidelines in the Federal Register, after notice and opportunity for comment from interested persons, including States and public water systems, specifying minimum standards for certification (and recertification) of the operators of community and nontransient noncommunity public water systems. Such guidelines shall take into account existing State programs, the complexity of the system, and other factors aimed at providing an effective program at reasonable cost to States and public water systems, taking into account the size of the system.

(b) State programs

Beginning 2 years after the date on which the Administrator publishes guidelines under subsection (a) of this section, the Administrator shall withhold 20 percent of the funds a State is otherwise entitled to receive under section 300j–12 of this title unless the State submits in compliance with subsection (a) of this section that has not been disapproved.

(c) Other programs

For any State exercising primary enforcement responsibility for public water systems or any other State which has an operator certification program, the guidelines under subsection (a) of this section shall allow the State to enforce such program in lieu of the guidelines under subsection (a) of this section if the State submits the program to the Administrator within 18 months after the publication of the guidelines unless the Administrator determines (within 9 months after the State submits the program to the Administrator) that such program is not substantially equivalent to such guidelines. In making this determination, an existing State program shall be presumed to be substantially equivalent to the guidelines, notwithstanding program differences, based on the size of systems or the quality of source water, providing the State program meets the overall public health objectives of the guidelines. If disapproved, the program may be resubmitted within 6 months after receipt of notice of disapproval.

(d) Expense reimbursement

(1) In general

The Administrator shall provide reimbursement for the costs of training, including an appropriate per diem for unsalaried operators, and certification for persons operating systems serving 3,300 persons or fewer that are required to undergo training pursuant to this section.

(2) State grants

The reimbursement shall be provided through grants to States with each State receiving an amount sufficient to cover the reasonable costs for training all such operators in the State, as determined by the Administrator, to the extent required by this section. Grants received by a State pursuant to this paragraph shall first be used to provide reimbursement for training and certification costs of persons operating systems serving 3,300 persons or fewer. If a State has reimbursed all such costs, the State may, after notice to the Administrator, use any remaining funds from the grant for any of the other purposes authorized for grants under section 300j–12 of this title.

(3) Authorization

There are authorized to be appropriated to the Administrator to provide grants for reimbursement under this section $30,000,000 for each of fiscal years 1997 through 2003.

(4) Reservation

If the appropriation made pursuant to paragraph (3) for any fiscal year is not sufficient to satisfy the requirements of paragraph (1), the Administrator shall, prior to any other allocation or reservation, reserve such sums as necessary from the funds appropriated pursuant to section 300j–12(m) of this title to provide reimbursement for the training and certification costs mandated by this subsection.

(July 1, 1944, ch. 373, title XIV, §1418, as amended Pub. L. 104–182, title I, §123, Aug. 6, 1996, 110 Stat. 1652.)
§ 300g–9. Capacity development

(a) State authority for new systems

A State shall receive only 80 percent of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds) unless the State has obtained the legal authority or other means to ensure that all new community water systems and new nontransient, noncommunity water systems commencing operation after October 1, 1999, demonstrate technical, managerial, and financial capacity with respect to each national primary drinking water regulation in effect, or likely to be in effect, on the date of commencement of operations.

(b) Systems in significant noncompliance

(1) List

Beginning not later than 1 year after August 6, 1996, each State shall report to the Administrator a list of community water systems and nontransient, noncommunity water systems that have a history of significant noncompliance with this subchapter (as defined in guidelines issued prior to August 6, 1996, or any revisions of the guidelines that have been made in consultation with the States) and, to the extent practicable, the reasons for noncompliance.

(2) Report

Not later than 5 years after August 6, 1996, and as part of the capacity development strategy of the State, each State shall report to the Administrator on the success of enforcement mechanisms and initial capacity development efforts in assisting the public water systems listed under paragraph (1) to improve technical, managerial, and financial capacity.

(3) Withholding

The list and report under this subsection shall be considered part of the capacity development strategy of the State required under subsection (c) of this section for purposes of the withholding requirements of section 300j–12(a)(1)(G)(i) of this title (relating to State loan funds).

(c) Capacity development strategy

(1) In general

Beginning 4 years after August 6, 1996, a State shall receive only—

(A) 90 percent in fiscal year 2001;

(B) 85 percent in fiscal year 2002; and

(C) 80 percent in each subsequent fiscal year,

of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds), unless the State is developing and implementing a strategy to assist public water systems in acquiring and maintaining technical, managerial, and financial capacity.

(2) Content

In preparing the capacity development strategy, the State shall consider, solicit public comment on, and include as appropriate—

(A) the methods or criteria that the State will use to identify and prioritize the public water systems most in need of improving technical, managerial, and financial capacity;

(B) a description of the institutional, regulatory, financial, tax, or legal factors at the Federal, State, or local level that encourage or impair capacity development;

(C) a description of how the State will use the authorities and resources of this subchapter or other means to—

(i) assist public water systems in complying with national primary drinking water regulations;

(ii) encourage the development of partnerships between public water systems to enhance the technical, managerial, and financial capacity of the systems; and

(iii) assist public water systems in the training and certification of operators;

(D) a description of how the State will establish a baseline and measure improvements in capacity with respect to national primary drinking water regulations and State drinking water law; and

(E) an identification of the persons that have an interest in and are involved in the development and implementation of the capacity development strategy (including all appropriate agencies of Federal, State, and local governments, private and nonprofit public water systems, and public water system customers).

(3) Report

Not later than 2 years after the date on which a State first adopts a capacity development strategy under this subsection, and every 3 years thereafter, the head of the State agency that has primary responsibility to carry out this subchapter in the State shall submit to the Governor a report that shall also be available to the public on the efficacy of the strategy and progress made toward improving the technical, managerial, and financial capacity of public water systems in the State.

(4) Review

The decisions of the State under this section regarding any particular public water system are not subject to review by the Administrator and may not serve as the basis for withholding funds under section 300j–12 of this title.

(d) Federal assistance

(1) In general

The Administrator shall support the States in developing capacity development strategies.

(2) Informational assistance

(A) In general

Not later than 180 days after August 6, 1996, the Administrator shall—

(i) conduct a review of State capacity development efforts in existence on August 6, 1996, and publish information to assist States and public water systems in capacity development efforts; and

(ii) initiate a partnership with States, public water systems, and the public to de-
develop information for States on recommended operator certification requirements.

(B) Publication of information

The Administrator shall publish the information developed through the partnership under subparagraph (A)(ii) not later than 18 months after August 6, 1996.

(3) Promulgation of drinking water regulations

In promulgating a national primary drinking water regulation, the Administrator shall include an analysis of the likely effect of compliance with the regulation on the technical, financial, and managerial capacity of public water systems.

(4) Guidance for new systems

Not later than 2 years after August 6, 1996, the Administrator shall publish guidance developed in consultation with the States describing legal authorities and other means to ensure that all new community water systems and new nontransient, noncommunity water systems demonstrate technical, managerial, and financial capacity with respect to national primary drinking water regulations.

(e) Variances and exemptions

Based on information obtained under subsection (c)(3) of this section, the Administrator shall, as appropriate, modify regulations concerning variances and exemptions for small public water systems to ensure flexibility in the use of the variances and exemptions. Nothing in this subsection shall be interpreted, construed, or applied to affect or alter the requirements of section 300g–4 or 300g–5 of this title.

(f) Small public water systems technology assistance centers

(1) Grant program

The Administrator is authorized to make grants to institutions of higher learning to establish and operate small public water system technology assistance centers in the United States.

(2) Responsibilities of the centers

The responsibilities of the small public water system technology assistance centers established under this subsection shall include the conduct of training and technical assistance relating to the information, performance, and technical needs of small public water systems or public water systems that serve Indian Tribes.

(3) Applications

Any institution of higher learning interested in receiving a grant under this subsection shall submit to the Administrator an application in such form and containing such information as the Administrator may require by regulation.

(4) Selection criteria

The Administrator shall select recipients of grants under this subsection on the basis of the following criteria:

(A) The small public water system technology assistance center shall be located in a State that is representative of the needs of the region in which the State is located for addressing the drinking water needs of small and rural communities or Indian Tribes.

(B) The grant recipient shall be located in a region that has experienced problems, or may reasonably be foreseen to experience problems, with small and rural public water systems.

(C) The grant recipient shall have access to expertise in small public water system technology management.

(D) The grant recipient shall have the capability to disseminate the results of small public water system technology and training programs.

(E) The projects that the grant recipient proposes to carry out under the grant are necessary and appropriate.

(F) The grant recipient has regional support beyond the host institution.

(5) Consortia of States

At least 2 of the grants under this subsection shall be made to consortia of States with low population densities.

(6) Authorization of appropriations

There are authorized to be appropriated to make grants under this subsection $2,000,000 for each of the fiscal years 1997 through 1999, and $5,000,000 for each of the fiscal years 2000 through 2003.

(g) Environmental finance centers

(1) In general

The Administrator shall provide initial funding for one or more university-based environmental finance centers for activities that provide technical assistance to State and local officials in developing the capacity of public water systems. Any such funds shall be used only for activities that are directly related to this subchapter.

(2) National capacity development clearinghouse

The Administrator shall establish a national public water system capacity development clearinghouse to receive and disseminate information with respect to developing, improving, and maintaining financial and managerial capacity at public water systems. The Administrator shall ensure that the clearinghouse does not duplicate other federally supported clearinghouse activities.

(3) Capacity development techniques

The Administrator may request an environmental finance center funded under paragraph (1) to develop and test managerial, financial, and institutional techniques for capacity development. The techniques may include capacity assessment methodologies, manual and computer based public water system rate models and capital planning models, public water system consolidation procedures, and regionalization models.

(4) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection $1,500,000 for each of the fiscal years 1997 through 2003.
(5) Limitation

No portion of any funds made available under this subsection may be used for lobbying expenses.

(July 1, 1944, ch. 373, title XIV, § 1420, as added Pub. L. 104–182, title I, §119, Aug. 6, 1996, 110 Stat. 1647.)

PART C—PROTECTION OF UNDERGROUND SOURCES OF DRINKING WATER

§ 300h. Regulations for State programs

(a) Publication of proposed regulations; promulgation; amendments; public hearings; administrative consultations

(1) The Administrator shall publish proposed regulations for State underground injection control programs within 180 days after December 16, 1974. Within 180 days after publication of such proposed regulations, he shall promulgate such regulations with such modifications as he deems appropriate. Any regulation under this subsection may be amended from time to time.

(2) Any regulation under this section shall be proposed and promulgated in accordance with section 553 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section the Administrator shall consult with the Secretary, the National Drinking Water Advisory Council, and other appropriate Federal entities and with interested State entities.

(b) Minimum requirements; restrictions

(1) Regulations under subsection (a) of this section for State underground injection control programs shall contain minimum requirements for effective programs to prevent underground injection which endangers drinking water sources within the meaning of subsection (d)(2) of this section. Such regulations shall require that a State program, in order to be approved under section 300h–1 of this title—

(A) shall prohibit, effective on the date on which such State’s permit program takes effect and being enforced in a substantial number of States, any underground injection by any other person whether or not occurring on property owned or leased by the United States.

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas, unless such requirements are essential to assure that underground sources of drinking water will not be endangered by such injection.

(2) Regulations of the Administrator under this section shall permit or provide for consideration of varying geologic, hydrological, or historical conditions in different States and in different areas within a State.

(B)(i) In prescribing regulations under this section the Administrator shall, to the extent feasible, avoid promulgation of requirements which would unnecessarily disrupt State underground injection control programs which are in effect and being enforced in a substantial number of States.

(ii) For the purpose of this subparagraph, a regulation prescribed by the Administrator under this section shall be deemed to disrupt a State underground injection control program only if it would be infeasible to comply with both such regulation and the State underground injection control program.

(c) Temporary permits; notice and hearing

(1) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to issue (without regard to subsection (b)(1)(B)(i) of this section) temporary permits for underground injection which may be effective until the expiration of four years after December 16, 1974, if—

(A) the Administrator finds that the State has demonstrated that it is unable and could not reasonably have been able to process all permit applications within the time available; and

(B) the Administrator determines the adverse effect on the environment of such temporary permits is not unwarranted;

(C) such temporary permits will be issued only with respect to injection wells in operation on the date on which such State’s permit program approved under this part first takes effect and for which there was inadequate time to process its permit application; and

(D) the Administrator determines the temporary permits require the use of adequate

1 See References in Text note below.
safeguards established by rules adopted by him.

(2) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to issue (without regard to subsection (b)(1)(B) of this section), but after reasonable notice and hearing, one or more temporary permits each of which is applicable to a particular injection well and to the underground injection of a particular fluid and which may be effective until the expiration of four years after December 16, 1974, if the State finds, on the record of such hearing—

(A) that technology (or other means) to permit safe injection of the fluid in accordance with the applicable underground injection control program is not generally available (taking costs into consideration);

(B) that injection of the fluid would be less harmful to health than the use of other available means of disposing of waste or producing the desired product; and

(C) that available technology or other means have been employed (and will be employed) to reduce the volume and toxicity of the fluid and to minimize the potentially adverse effect of the injection on the public health.

(d) "Underground injection" defined; underground injection endangerment of drinking water sources

For purposes of this part:

(1) UNDERGROUND INJECTION.—The term "underground injection"—

(A) means the subsurface emplacement of fluids by well injection; and

(B) excludes—

(i) the underground injection of natural gas for purposes of storage; and

(ii) the underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

(2) Underground injection endangers drinking water sources if such injection may result in the presence in underground water which supplies or can reasonably be expected to supply any public water system of any contaminant, and if the presence of such contaminant may result in such system's not complying with any national primary drinking water regulation or may otherwise adversely affect the health of persons.

(AMENDMENTS)

2005—Subsec. (d)(1). Pub. L. 109–58 inserted heading and amended text of par. (1) generally. Prior to amendment, par. (1) read as follows: "The term "underground injection" means the subsurface emplacement of fluids by well injection. Such term does not include the underground injection of natural gas for purposes of storage."

1996—Subsec. (b)(3)(B)(i). Pub. L. 104–182 substituted "number of States" for "number or States".

1980—Subsec. (b)(1)(A). Pub. L. 96–502, §4(c), substituted "effective on the date on which the applicable underground injection control program takes effect" for "effective three years after December 16, 1974".

Subsec. (d)(1). Pub. L. 95–926, §3, inserted provision that such term does not include the underground injection of natural gas for purposes of storage.

§ 300h–1. State primary enforcement responsibility

(a) List of States in need of a control program; amendment of list

Within 180 days after December 16, 1974, the Administrator shall list in the Federal Register each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources. Such list may be amended from time to time.

(b) State applications; notice to Administrator of compliance with revised or added requirements; approval or disapproval by Administrator; duration of State primary enforcement responsibility; public hearing

(1)(A) Each State listed under subsection (a) of this section shall within 270 days after the date of promulgation of any regulation under section 300h of this title (or, if later, within 270 days after such State is first listed under subsection (a) of this section) submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State—

(i) has adopted after reasonable notice and public hearings, and will implement, an underground injection control program which meets the requirements of regulations in effect under section 300h of this title; and

(ii) will keep such records and make such reports with respect to its activities under its underground injection control program as the Administrator may require by regulation.

The Administrator may, for good cause, extend the date for submission of an application by any State under this subparagraph for a period not to exceed an additional 270 days.

(B) Within 270 days of any amendment of a regulation under section 300h of this title revising or adding any requirement respecting State underground injection control programs, each State listed under subsection (a) of this section shall submit (in such form and manner as the Administrator may require) a notice to the Administrator containing a showing satisfactory to him that the State underground injection control program meets the revised or added requirement.

(2) Within ninety days after the State's application under paragraph (1)(A) or notice under...
paragraph (1)(B) and after reasonable opportunity for presentation of views, the Administrator shall by rule either approve, disapprove, or approve in part and disapprove in part, the State’s underground injection control program.

(3) If the Administrator approves the State’s program under paragraph (2), the State shall have primary enforcement responsibility for underground water sources until such time as the Administrator determines, by rule, that such State no longer meets the requirements of clause (i) or (ii) of paragraph (1)(A) of this subsection.

(4) Before promulgating any rule under paragraph (2) or (3) of this subsection, the Administrator shall provide opportunity for public hearing respecting such rule.

(c) Program by Administrator for State without primary enforcement responsibility; restrictions

If the Administrator disapproves a State’s program (or part thereof) under subsection (b)(2) of this section, if the Administrator determines under subsection (b)(3) of this section that a State no longer meets the requirements of clause (i) or (ii) of subsection (b)(1)(A) of this section or if a State fails to submit an application or notice before the date of expiration of the period specified in subsection (b)(1) of this section, the Administrator shall by regulation within 90 days after the date of such disapproval, determination, or expiration (as the case may be) prescribe (and may from time to time by regulation revise) a program applicable to such State meeting the requirements of section 300h(b) of this title. Such program may not include requirements which interfere with or impede—

(1) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations, or

(2) any underground injection for the secondary or tertiary recovery of oil or natural gas, unless such requirements are essential to assure that underground sources of drinking water will not be endangered by such injection. Such program shall apply in such State to the extent that a program adopted by such State which the Administrator determines meets such requirements is not in effect. Before promulgating any regulation under this section, the Administrator shall provide opportunity for public hearing respecting such regulation.

(d) “Applicable underground injection control program” defined

For purposes of this subchapter, the term “applicable underground injection control program” with respect to a State means the program (or most recent amendment thereof) (1) which has been adopted by the State and which has been approved under subsection (b) of this section, or (2) which has been prescribed by the Administrator under subsection (c) of this section.

(e) Primary enforcement responsibility by Indian Tribe

An Indian Tribe may assume primary enforcement responsibility for underground injection control under this section consistent with such regulations as the Administrator has prescribed pursuant to this part and section 300j–11 of this title. The area over which such Indian Tribe exercises governmental jurisdiction need not have been listed under subsection (a) of this section, and such Tribe need not submit an application to assume primary enforcement responsibility within the 270-day deadline noted in subsection (b)(1)(A) of this section. Until an Indian Tribe assumes primary enforcement responsibility, the currently applicable underground injection control program shall continue to apply. If an applicable underground injection control program does not exist for an Indian Tribe, the Administrator shall prescribe such a program pursuant to subsection (c) of this section, and consistent with section 300h(b) of this title, within 270 days after June 19, 1986, unless an Indian Tribe first obtains approval to assume primary enforcement responsibility for underground injection control.

(july 1, 1944, ch. 373, title xiv, §1422, as added pub. l. 93-523, §2(a), dec. 16, 1974, 88 stat. 1676; amended pub. l. 95-190, §6(a), nov. 16, 1977, 91 stat. 1396; pub. l. 99-339, title ii, §201(a), title iii, §302(c), june 19, 1986, 100 stat. 653, 666.)

amendments

1986—subsec. (c)(1). pub. l. 99-339, §201(a), inserted “or natural gas storage operations, or” after “production”.

subsec. (e). pub. l. 99-339, §302(c), added subsec. (e).

1977—subsec. (b)(1)(a). pub. l. 95-190 inserted provisions relating to extension of date for submission of applications by any State.

§ 300h–2. Enforcement of program

(a) Notice to State and violator; issuance of administrative order; civil action

(1) Whenever the Administrator finds during a period during which a State has primary enforcement responsibility for underground water sources (within the meaning of section 300h–1(b)(3) of this title or section 300h–4(c) of this title) that any person who is subject to a requirement of an applicable underground injection control program in such State is violating such requirement, he shall so notify the State and the person violating such requirement. If beyond the thirtieth day after the Administrator’s notification the State has not commenced appropriate enforcement action, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(2) Whenever the Administrator finds during a period during which a State does not have primary enforcement responsibility for underground water sources that any person subject to any requirement of any applicable underground injection control program in such State is violating such requirement, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.
(b) Civil and criminal actions

Civil actions referred to in paragraphs (1) and (2) of subsection (a) of this section shall be brought in the appropriate United States district court. Such court shall have jurisdiction to require compliance with any requirement of an applicable underground injection program or with an order issued under subsection (c) of this section. The court may enter such judgment as protection of public health may require. Any person who violates any requirement of an applicable underground injection control program or an order requiring compliance under subsection (c) of this section—

(1) shall be subject to a civil penalty of not more than $25,000 for each day of such violation, and

(2) if such violation is willful, such person may, in addition to or in lieu of the civil penalty authorized by paragraph (1), be imprisoned for not more than 3 years, or fined in accordance with title 18, or both.

c) Administrative orders

(1) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation or other requirement of this part other than those relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $10,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(2) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation, or other requirement of this part relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $5,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(3)(A) An order under this subsection shall be issued by the Administrator after opportunity (provided in accordance with this subparagraph) for a hearing. Before issuing the order, the Administrator shall give to the person to whom it is directed written notice of the Administrator’s proposal to issue such order and the opportunity to request, within 30 days of the date the notice is received by such person, a hearing on the order. Such hearing shall not be subject to section 554 or 556 of title 5, but shall provide a reasonable opportunity to be heard and to present evidence.

(B) The Administrator shall provide public notice of, and reasonable opportunity to comment on, any proposed order.

(C) Any citizen who comments on any proposed order under subparagraph (B) shall be given notice of any hearing under this subsection and of any order. In any hearing held under subparagraph (A), such citizen shall have a reasonable opportunity to be heard and to present evidence.

(D) Any order issued under this subsection shall become effective 30 days following its issuance unless an appeal is taken pursuant to paragraph (6).

(4)(A) Any order issued under this subsection shall state with reasonable specificity the nature of the violation and may specify a reasonable time for compliance.

(B) In assessing any civil penalty under this subsection, the Administrator shall take into account appropriate factors, including (i) the seriousness of the violation; (ii) the economic benefit (if any) resulting from the violation; (iii) any history of such violations; (iv) any good-faith efforts to comply with the applicable requirements; (v) the economic impact of the penalty on the violator; and (vi) such other matters as justice may require.

(5) Any violation with respect to which the Administrator has commenced and is diligently prosecuting an action, or has issued an order under this subsection assessing a penalty, shall not be subject to an action under subsection (b) of this section or section 300h–3(c) or 300–8 of this title, except that the foregoing limitation on civil actions under section 300–8 of this title shall not apply with respect to any violation for which—

(A) a civil action under section 300–8(a)(1) of this title has been filed prior to commencement of an action under this subsection, or

(B) a notice of violation under section 300–8(b)(1) of this title has been given before commencement of an action under this subsection and an action under section 300–8(a)(1) of this title is filed before 120 days after such notice is given.

(6) Any person against whom an order is issued or who commented on a proposed order pursuant to paragraph (3) may file an appeal of such order with the United States District Court for the District of Columbia or the district in which the violation is alleged to have occurred. Such an appeal may only be filed within the 30-day period beginning on the date the order is issued. Appellant shall simultaneously send a copy of the appeal by certified mail to the Administrator and to the Attorney General. The Administrator shall promptly file in such court a certified copy of the record on which such order was imposed. The district court shall not set aside or remand such order unless there is not substantial evidence on the record, taken as a whole, to support the finding of a violation or, unless the Administrator’s assessment of penalty or requirement for compliance constitutes an abuse of discretion. The district court shall
§ 300h-3. Interim regulation of underground injections

(a) Necessity for well operation permit; designation of one aquifer areas

(1) Any person may petition the Administrator to have an area of a State (or States) designated as an area in which no new underground injection well may be operated during the period beginning on the date of the designation and ending on the date on which the applicable underground injection control program covering such area takes effect unless a permit for the operation of such well has been issued by the Administrator under subsection (b) of this section. The Administrator may so designate an area within a State if he finds that the area has one aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health.

(2) Upon receipt of a petition under paragraph (1) of this subsection, the Administrator shall publish it in the Federal Register and shall provide an opportunity to interested persons to submit written data, views, or arguments thereon. Not later than the 30th day following the date of the publication of a petition under this paragraph in the Federal Register, the Administrator shall either make the designation for which the petition is submitted or deny the petition.

(b) Well operation permits; publication in Federal Register; notice and hearing; issuance or denial; conditions for issuance

(1) During the period beginning on the date an area is designated under subsection (a) of this section and ending on the date the applicable underground injection control program covering such area takes effect, no new underground injection well may be operated in such area unless the Administrator has issued a permit for such operation.

(2) Any person may petition the Administrator for the issuance of a permit for the operation of such a well in such an area. A petition submitted under this paragraph shall be submitted in such manner and contain such information as the Administrator may require by regulation. Upon receipt of such a petition, the Administrator shall publish it in the Federal Register. The Administrator shall give notice of any proceeding on a petition and shall provide opportunity for agency hearing. The Administrator shall act upon such petition on the record of any hearing held pursuant to the preceding sentence respecting such petition. Within 120 days of the publication in the Federal Register of a petition submitted under this paragraph, the Administrator shall either issue the permit for which the petition was submitted or deny its issuance.

(3) The Administrator may issue a permit for the operation of a new underground injection

Subsec. (c), (d). Pub. L. 99–339, § 202(c), added subsec. (c) and redesignated former subsec. (c) as (d).

§ 300h-4. Civil penalties

The Administrator shall impose civil penalties for willful violation of provisions which related to judicial determinations in appropriate Federal district courts, civil penalties of $5,000 per day, and fines of $10,000 per day for willful violations.

Subsecs. (c), (d). Pub. L. 99–339, § 202(c), added subsec. (c) and redesignated former subsec. (c) as (d).

§ 300h-5. Judicial review

The district courts of the United States shall have jurisdiction in equity to enforce any subpena under this section. The district courts shall relieve any person of any requirement otherwise applicable under this subchapter.

Subsec. (a)(1). Pub. L. 99–339, § 202(a)(1), substituted provisions which related to issuance of an order of compliance or commencement of a civil action by the Administrator if the State has not commenced enforcement against the violator for provisions directing the Administrator to give public notice and request that the State report within 15 days thereafter as to steps taken to enforce compliance and authorizing the Administrator to commence a civil action upon failure by the State to comply timely.

Subsec. (a)(2). Pub. L. 99–339, § 202(a)(2), substituted provision that the Administrator issue an order under subsec. (c) of this section or commence a civil action under subsec. (b) of this section for provisions that he commence a civil action under subsec. (b) of this section.

Subsec. (b). Pub. L. 99–339, § 202(b), amended subsec. (b) generally, substituting provisions relating to jurisdiction of the appropriate Federal district court, entry of judgment, civil penalty of $25,000 per day, criminal liability and fine for willful violation for provisions which related to judicial determinations in appropriate Federal district courts, civil penalties of $5,000 per day, and fines of $10,000 per day for willful violations.

Subsecs. (c), (d). Pub. L. 99–339, § 202(c), added subsec. (c) and redesignated former subsec. (c) as (d).
well in an area designated under subsection (a) of this section only, if he finds that the operation of such well will not cause contamination of the aquifer of such area so as to create a significant hazard to public health. The Administrator may condition the issuance of such a permit upon the use of such control measures in connection with the operation of such well, for which the permit is to be issued, as he deems necessary to assure that the operation of the well will not contaminate the aquifer of the designated area in which the well is located so as to create a significant hazard to public health.

(c) Civil penalties; separate violations; penalties for willful violations; temporary restraining order or injunction

Any person who operates a new underground injection well in violation of subsection (b) of this section, (1) shall be subject to a civil penalty of not more than $5,000 for each day in which such violation occurs, or (2) if such violation is willful, such person may, in lieu of the civil penalty authorized by clause (1), be fined not more than $10,000 for each day in which such violation occurs. If the Administrator has reason to believe that any person is violating or will violate subsection (b) of this section, he may petition the United States district court to issue a temporary restraining order or injunction (including a mandatory injunction) to enforce such subsection.

(d) "New underground injection well" defined

For purposes of this section, the term "new underground injection well" means an underground injection well whose operation was not approved by appropriate State and Federal agencies before December 16, 1974.

(e) Areas with one aquifer; publication in Federal Register; commitments for Federal financial assistance

If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the Federal Register. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

(July 1, 1944, ch. 373, title XIV, § 1424, as added Pub. L. 93–523, § 2(a), Dec. 16, 1974, 88 Stat. 1678.)

§ 300h–4. Optional demonstration by States relating to oil or natural gas

(a) Approval of State underground injection control program; alternative showing of effectiveness of program by State

For purposes of the Administrator's approval or disapproval under section 300h–1 of this title of that portion of any State underground injection control program which relates to—

(1) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations; or

(2) any underground injection for the secondary or tertiary recovery of oil or natural gas, in lieu of the showing required under subparagraph (A) of section 300h–1(b)(1) of this title the State may demonstrate that such portion of the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(b) Revision or amendment of requirements of regulation; showing of effectiveness of program by State

If the Administrator revises or amends any requirement of a regulation under section 300h of this title relating to any aspect of the underground injection referred to in subsection (a) of this section, in the case of that portion of a State underground injection control program for which the demonstration referred to in subsection (a) of this section has been made, in lieu of the showing required under section 300h–1(b)(1)(B) of this title the State may demonstrate that, with respect to that aspect of such underground injection, the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(c) Primary enforcement responsibility of State; voiding by Administrator under duly promulgated rule

(1) Section 300h–1(b)(3) of this title shall not apply to that portion of any State underground injection control program approved by the Administrator pursuant to a demonstration under subsection (a) of this section (and under subsection (b) of this section where applicable). (2) If pursuant to such a demonstration, the Administrator approves such portion of the State program, the State shall have primary enforcement responsibility with respect to that portion until such time as the Administrator determines, by rule, that such demonstration is no longer valid. Following such a determination, the Administrator may exercise the authority of subsection (c) of section 300h–1 of this title in the same manner as provided in such subsection with respect to a determination described in such subsection.

(3) Before promulgating any rule under paragraph (2), the Administrator shall provide opportunity for public hearing respecting such rule.

(Amendments)

1986—Subsec. (a)(1). Pub. L. 99–339 inserted "or natural gas storage operations, or" after "production".

1986—Pub. L. 99–339 substituted "or natural gas storage operations, or" for "or any underground injection operation, or".

§ 300h–5. Regulation of State programs

Not later than 18 months after June 19, 1986, the Administrator shall modify regulations issued under this chapter for Class I injection wells to identify monitoring methods, in addition to those in effect on November 1, 1985, including groundwater monitoring. In accordance with such regulations, the Administrator, or delegated State authority, shall determine the applicability of such monitoring methods, wherever appropriate, at locations and in such a manner as to provide the earliest possible detection of fluid migration into, or in the direction of, underground sources of drinking water from such wells, based on its assessment of the potential for fluid migration from the injection zone that may be harmful to human health or the environment. For purposes of this subsection, a class I injection well is defined in accordance with 40 CFR 146.05 as in effect on November 1, 1985.

(Shown as amended through Pub. L. 116–194, Nov. 12, 1986.)

Amendments

1996—Pub. L. 104–182 directed technical amendment of section catchline and subsec. (a) designation. The provision directing amendment of subsec. (a) designation could not be executed because section does not contain a subsec. (a).

1995—Pub. L. 104–66 struck out subsec. (a) designation and heading before “Not later than” and struck out heading and text of subsec. (b). Text read as follows: “The Administrator shall submit a report to Congress, no later than September 1987, summarizing the results of State surveys required by the Administrator under this section. The report shall include each of the following items of information:

“(1) The numbers and categories of class V wells which discharge nonhazardous waste into or above an underground source of drinking water.

“(2) The primary contamination problems associated with different categories of these disposal wells.

“(3) Recommendations for minimum design, construction, installation, and siting requirements that should be applied to protect underground sources of drinking water from such contamination wherever necessary.”

§ 300h–6. Sole source aquifer demonstration program

(a) Purpose

The purpose of this section is to establish procedures for development, implementation, and assessment of demonstration programs designed to protect critical aquifer protection areas located within areas designated as sole or principal source aquifers under section 300h–3(e) of this title.

(b) “Critical aquifer protection area” defined

For purposes of this section, the term “critical aquifer protection area” means either of the following:

(1) All or part of an area located within an area for which an application or designation as a sole or principal source aquifer pursuant to section 300h–3(e) of this title, has been submitted and approved by the Administrator and which satisfies the criteria established by the Administrator under subsection (d) of this section.

(2) All or part of an area which is within an aquifer designated as a sole source aquifer as of June 19, 1986, and for which an areawide ground water quality protection plan has been approved under section 208 of the Clean Water Act [33 U.S.C. 1288] prior to June 19, 1986.

(c) Application

Any State, municipal or local government or political subdivision thereof or any planning entity (including any interstate regional planning entity) that identifies a critical aquifer protection area over which it has authority or jurisdiction may apply to the Administrator for the selection of such area for a demonstration program under this section. Any applicant shall consult with other government or planning entities with authority or jurisdiction in such area prior to application. Applicants, other than the Governor, shall submit the application for a demonstration program jointly with the Governor.

(d) Criteria

Not later than 1 year after June 19, 1986, the Administrator shall, by rule, establish criteria for identifying critical aquifer protection areas under this section. In establishing such criteria, the Administrator shall consider each of the following:

(1) The vulnerability of the aquifer to contamination due to hydrogeologic characteristics.

(2) The number of persons or the proportion of population using the ground water as a drinking water source.

(3) The economic, social and environmental benefits that would result to the area from maintenance of ground water of high quality.

(4) The economic, social and environmental costs that would result from degradation of the quality of the ground water.

(e) Contents of application

An application submitted to the Administrator by any applicant for a demonstration program under this section shall meet each of the following requirements:

(1) The application shall propose boundaries for the critical aquifer protection area within its jurisdiction.

(2) The application shall designate or, if necessary, establish a planning entity (which shall be a public agency and which shall include representation of elected local and State governmental officials) to develop a comprehensive management plan (hereinafter in this section referred to as the “plan”) for the critical protection area. Where a local government planning agency exists with adequate authority to carry out this section with respect to any proposed critical protection area, such agency shall be designated as the planning entity.

(3) The application shall establish procedures for public participation in the development of the plan, for review, approval, and adoption of the plan, and for assistance to mu-
ment plan submitted by an applicant under this section shall be to maintain the quality of the ground water in the critical protection area in a manner reasonably expected to protect human health, the environment and ground water resources. In order to achieve such objective, the plan may be designed to maintain, to the maximum extent possible, the natural vegetative and hydrogeological conditions. Each of the following elements shall be included in such a protection plan:

- A map showing the detailed boundary of the critical protection area.
- An identification of existing and potential point and nonpoint sources of ground water degradation.
- An assessment of the relationship between activities on the land surface and ground water quality.
- Specific actions and management practices to be implemented in the critical protection area to prevent adverse impacts on ground water quality.
- Identification of authority adequate to implement the plan, estimates of program costs, and sources of State matching funds.

Such plan may also include the following:

- A determination of the quality of the existing ground water recharged through the special protection area and the natural recharge capabilities of the special protection area watershed.
- Requirements designed to maintain existing underground drinking water quality or improve underground drinking water quality if prevailing conditions fail to meet drinking water standards, pursuant to this chapter and State law.
- Limits on Federal, State, and local government, financially assisted activities and projects which may contribute to degradation of such ground water or any loss of natural surface and subsurface infiltration of purification capability of the special protection watershed.
- A comprehensive statement of land use management including emergency contingency planning as it pertains to the maintenance of the quality of underground sources of drinking water or to the improvement of such sources if necessary to meet drinking water standards pursuant to this chapter and State law.
- Actions in the special protection area which would avoid adverse impacts on water quality, recharge capabilities, or both.

(F) Consideration of specific techniques, which may include clustering, transfer of development rights, and other innovative measures sufficient to achieve the objectives of this section.

(G) Consideration of the establishment of a State institution to facilitate and assist funding a development transfer credit system.

(H) A program for State and local implementation of the plan described in this subsection in a manner that will ensure the continued, uniform, consistent protection of the critical protection area in accord with the purposes of this section.

(I) Pollution abatement measures, if appropriate.

(g) Plans under section 208 of Clean Water Act

A plan approved before June 19, 1986, under section 208 of the Clean Water Act [33 U.S.C. 1288] to protect a sole source aquifer designated under section 300h-3(e) of this title shall be considered a comprehensive management plan for the purposes of this section.

(h) Consultation and hearings

During the development of a comprehensive management plan under this section, the planning entity shall consult with, and consider the comments of, appropriate officials of any municipality and State or Federal agency which has jurisdiction over lands and waters within the special protection area, other concerned organizations and technical and citizen advisory committees. The planning entity shall conduct public hearings at places within the special protection area for the purpose of providing the opportunity to comment on any aspect of the plan.

(i) Approval or disapproval

Within 120 days after receipt of an application under this section, the Administrator shall approve or disapprove the application. The approval or disapproval shall be based on a determination that the critical protection area satisfies the criteria established under subsection (d) of this section and that a demonstration program for the area would provide protection for ground water quality consistent with the objectives stated in subsection (f) of this section. The Administrator may provide to the Governor a written explanation of the reasons for the disapproval of any such application. Any petitioner may modify and resubmit any application which is not approved. Upon approval of an application, the Administrator may enter into a cooperative agreement with the applicant to establish a demonstration program under this section.

(j) Grants and reimbursement

Upon entering a cooperative agreement under subsection (i) of this section, the Administrator may provide to the applicant, on a matching basis, a grant of 50 per centum of the costs of implementing the plan established under this section. The Administrator may also reimburse the applicant of an approved plan up to 50 per centum of the costs of developing such plan, except for plans approved under section 208 of the Clean Water Act [33 U.S.C. 1288]. The total amount of grants under this section for any one
§ 300h-7 TITLE 42—THE PUBLIC HEALTH AND WELFARE Page 1004

aquifer, designated under section 300h-3(e) of this title, shall not exceed $4,000,000 in any one fiscal year.

(k) Activities funded under other law

No funds authorized under this section may be used to fund activities funded under other sections of this chapter or the Clean Water Act [33 U.S.C. 1251 et seq.], the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.] or other environmental laws.

(l) Savings provision

Nothing under this section shall be construed to amend, supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws; or any requirement imposed or right provided under any Federal or State environmental or public health statute.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out this section not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$10,000,000</td>
</tr>
<tr>
<td>1988</td>
<td>15,000,000</td>
</tr>
<tr>
<td>1989</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1990</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1991</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1992-1993</td>
<td>15,000,000</td>
</tr>
</tbody>
</table>

Matching grants under this section may also be used to implement or update any water quality management plan for a sole or principal source aquifer approved (before June 19, 1986) by the Administrator under section 208 of the Federal Water Pollution Control Act [33 U.S.C. 1288].

REFERENCES IN TEXT

The Clean Water Act, referred to in subsection (k), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92-500, §2, Oct. 18, 1972, 86 Stat. 816, also known as the Federal Water Pollution Control Act, which is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

AMENDMENTS

1986—Pub. L. 99-339 redesignated subsections (i) to (m) as (l) to (m), respectively, and struck out heading and text of former subsec. (l). Text read as follows: "Not later than December 31, 1986, each State shall submit to the Administrator a report assessing the impact of the program on ground water quality and identifying those measures found to be effective in protecting ground water resources. No later than September 30, 1990, the Administrator shall submit to Congress a report summarizing the State reports, and assessing the accomplishments of the sole source aquifer demonstration program including an identification of protection methods found to be most effective and recommendations for their application to protect ground water resources from contamination whenever necessary."

1996—Pub. L. 104-182, §501(b)(2), substituted "this section" for "this subsection".

1990—Pub. L. 101-166, §2021(g), substituted "this Act" for "this Act to the Code, see Short Title note set out under section 6901 of this title and Tables."

§ 300h-7. State programs to establish wellhead protection areas

(a) State programs

The Governor or Governor’s designee of each State shall, within 3 years of June 19, 1986, adopt and submit to the Administrator a State program to protect wellhead areas within their jurisdiction from contaminants which may have any adverse effect on the health of persons. Each State program under this section shall, at a minimum—

(1) specify the duties of State agencies, local governmental entities, and public water supply systems with respect to the development and implementation of programs required by this section;

(2) for each wellhead, determine the wellhead protection area as defined in subsection (e) of this section based on all reasonably available hydrogeologic information on ground water flow, recharge and discharge and other information the State deems necessary to adequately determine the wellhead protection area;

(3) identify within each wellhead protection area all potential anthropogenic sources of contaminants which may have any adverse effect on the health of persons;

(4) describe a program that contains, as appropriate, technical assistance, financial assistance, implementation of control measures, education, training, and demonstration projects to protect the water supply within wellhead protection areas from such contaminants;

(5) include contingency plans for the location and provision of alternate drinking water supplies for each public water system in the event of well or wellfield contamination by such contaminants; and

(6) include a requirement that consideration be given to all potential sources of such contaminants within the expected wellhead area of a new water well which serves a public water supply system.

(b) Public participation

To the maximum extent possible, each State shall establish procedures, including but not
limited to the establishment of technical and citizens’ advisory committees, to encourage the public to participate in developing the protection program for wellhead areas and source water assessment programs under section 300j–13 of this title. Such procedures shall include notice and opportunity for public hearing on the State program before it is submitted to the Administrator.

(c) Disapproval

(1) In general

If, in the judgment of the Administrator, a State program or portion thereof under subsection (a) of this section is not adequate to protect public water systems as required by subsection (a) of this section or a State program under section 300j–13 of this title or section 300g–7(b) of this title does not meet the applicable requirements of section 300j–13 of this title or section 300g–7(b) of this title, the Administrator shall disapprove such program or portion thereof. A State program developed pursuant to subsection (a) of this section shall be deemed to be adequate unless the Administrator determines, within 9 months of the receipt of a State program, that such program (or portion thereof) is inadequate for the purpose of protecting public water systems as required by this section from contaminants that may have any adverse effect on the health of persons. A State program developed pursuant to section 300j–13 of this title or section 300g–7(b) of this title shall be deemed to be adequate unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements. If the Administrator determines that a proposed State program (or any portion thereof) is disapproved, the Administrator shall submit a written statement of the reasons for such determination to the Governor of the State.

(2) Modification and resubmission

Within 6 months after receipt of the Administrator’s written notice under paragraph (1) that any proposed State program (or portion thereof) is disapproved, the Governor or Governor’s designee, shall modify the program based upon the recommendations of the Administrator and resubmit the modified program to the Administrator.

(d) Federal assistance

After the date 3 years after June 19, 1986, no State shall receive funds authorized to be appropriated under this section except for the purpose of implementing the program and requirements of paragraphs (4) and (6) of subsection (a) of this section.

(e) “Wellhead protection area” defined

As used in this section, the term “wellhead protection area” means the surface and subsurface area surrounding a water well or wellfield, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or wellfield. The extent of a wellhead protection area, within a State, necessary to provide protection from contaminants which may have any adverse effect on the health of persons is to be determined by the State in the program submitted under subsection (a) of this section. Not later than one year after June 19, 1986, the Administrator shall issue technical guidance which States may use in making such determinations. Such guidance may reflect such factors as the radius of influence around a well or wellfield, the depth of drawdown of the water table by such well or wellfield at any given point, the time or rate of travel of various contaminants in various hydrologic conditions, distance from the well or wellfield, or other factors affecting the likelihood of contaminants reaching the well or wellfield, taking into account available engineering pump tests or comparable data, field reconnaissance, topographic information, and the geology of the formation in which the well or wellfield is located.

(f) Prohibitions

(1) Activities under other laws

No funds authorized to be appropriated under this section may be used to support activities authorized by the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.], or other sections of this chapter.

(2) Individual sources

No funds authorized to be appropriated under this section may be used to bring individual sources of contamination into compliance.

(g) Implementation

Each State shall make every reasonable effort to implement the State wellhead area protection program under this section within 2 years of submitting the program to the Administrator. Each State shall submit to the Administrator a biennial status report describing the State’s progress in implementing the program. Such report shall include amendments to the State program for water wells sited during the biennial period.

(h) Federal agencies

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government having jurisdiction over any potential source of contaminants identified by a State program pursuant to the provisions of subsection (a)(3) of this section shall be subject to and comply with all requirements of the State program developed according to subsection (a)(4) of this section applicable to such potential source of contaminants, both substantive and procedural, in the same manner, and to the same extent, as any other person is subject to such requirements, including payment of reasonable charges and fees. The President may exempt any potential source under the jurisdiction of any department, agency, or instrumentality in the executive branch if the President determines it to be in the paramount interest of the United States to do so. No such
exemption shall be granted due to the lack of an appropriation unless the President shall have specifically requested such appropriation as part of the budgetary process and the Congress shall have failed to make available such requested appropriations.

(i) Additional requirement

(1) In general

In addition to the provisions of subsection (a) of this section, States in which there are more than 2,500 active wells at which annular injection is used as of January 1, 1986, shall include in their State program a certification that a State program exists and is being adequately enforced that provides protection from contaminants which may have any adverse effect on the health of persons and which are associated with the annular injection or surface disposal of brines associated with oil and gas production.

(2) “Annular injection” defined

For purposes of this subsection, the term “annular injection” means the reinjection of brines associated with the production of oil or gas between the production and surface casings of a conventional oil or gas producing well.

(3) Review

The Administrator shall conduct a review of each program certified under this subsection.

(4) Disapproval

If a State fails to include the certification required by this subsection or if in the judgment of the Administrator the State program certified under this subsection is not being adequately enforced, the Administrator shall disapprove the State program submitted under subsection (a) of this section.

(j) Coordination with other laws

Nothing in this section shall authorize or require any department, agency, or other instrumentality of the Federal Government or State or local government to apportion, allocate, or otherwise regulate the withdrawal or beneficial use of ground or surface waters, so as to abrogate or modify any existing rights to water established pursuant to State or Federal law, including interstate compacts.

(k) Authorization of appropriations

Unless the State program is disapproved under this section, the Administrator shall make grants to the State for not less than 50 or more than 90 percent of the costs incurred by a State (as determined by the Administrator) in developing and implementing each State program under this section. For purposes of making such grants there is authorized to be appropriated not more than the following amounts:

The Federal Water Pollution Control Act, referred to in subsec. (f)(1), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92-500, §2, Oct. 18, 1972, 86 Stat. 816, which is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

Amendments

Subsec. (b). Pub. L. 104-182, §132(b)(4), inserted before period at end of first sentence “and source water assessment programs under section 300(j)-13 of this title”.

Subsec. (c)(1). Pub. L. 104-182, §132(b)(3), which directed substitution of “is disapproved” for “is inadequate” in third sentence, was executed by making the substitution in fourth sentence to reflect the probable intent of Congress and the amendment by Pub. L. 104-182, §122(b)(2). See below.

Pub. L. 104-182, §132(b)(2), inserted after second sentence “A State program developed pursuant to section 300(j)-13 of this title or section 300a-7(b) of this title shall be deemed to meet the applicable requirements of section 300(j)-13 of this title or section 300a-7(b) of this title unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements.”

Pub. L. 104-182, §132(b)(1), amended first sentence generally. Prior to amendment, first sentence read as follows: “If, in the judgment of the Administrator, a State program (or portion thereof), including the definition of a wellhead protection area, is not adequate to protect public water systems as required by this section, the Administrator shall disapprove such program (or portion thereof.).”

Subsec. (c)(2). Pub. L. 104-182, §132(b)(3), substituted “is disapproved” for “is inadequate”.

§300b-8. State ground water protection grants

(a) In general

The Administrator may make a grant to a State for the development and implementation of a State program to ensure the coordinated and comprehensive protection of ground water resources within the State.

(b) Guidance

Not later than 1 year after August 6, 1996, and annually thereafter, the Administrator shall publish guidance that establishes procedures for application for State ground water protection...
program assistance and that identifies key elements of State ground water protection programs.

(c) Conditions of grants

(1) In general

The Administrator shall award grants to States that submit an application that is approved by the Administrator. The Administrator shall determine the amount of a grant awarded pursuant to this paragraph on the basis of an assessment of the extent of ground water resources in the State and the likelihood that awarding the grant will result in sustained and reliable protection of ground water quality.

(2) Innovative program grants

The Administrator may also award a grant pursuant to this subsection for innovative programs proposed by a State for the prevention of ground water contamination.

(3) Allocation of funds

The Administrator shall, at a minimum, ensure that, for each fiscal year, not less than 1 percent of funds made available to the Administrator by appropriations to carry out this section are allocated to each State that submits an application that is approved by the Administrator pursuant to this section.

(4) Limitation on grants

No grant awarded by the Administrator may be used for a project to remediate ground water contamination.

(d) Amount of grants

The amount of a grant awarded pursuant to paragraph (1) shall not exceed 50 percent of the eligible costs of carrying out the ground water protection program that is the subject of the grant (as determined by the Administrator) for the 1-year period beginning on the date that the grant is awarded. The State shall pay a State share to cover the costs of the ground water protection program from State funds in an amount that is not less than 50 percent of the cost of conducting the program.

(e) Evaluations and reports

Not later than 3 years after August 6, 1996, and every 3 years thereafter, the Administrator shall evaluate the State ground water protection programs that are the subject of grants awarded pursuant to this section and report to the Congress on the status of ground water quality in the United States and the effectiveness of State programs for ground water protection.

(f) Authorization of appropriations

There are authorized to be appropriated to carry out this section $15,000,000 for each of fiscal years 1997 through 2003.

§ 300i-1. Tampering with public water systems

(a) Tampering

Any person who tampers with a public water system shall be imprisoned for not more than 20 years, or fined not more than $5,000, or both.
§ 300i–2. Terrorist and other intentional acts

(a) Vulnerability assessments

(1) Each community water system serving a population of greater than 3,300 persons shall conduct an assessment of the vulnerability of its system to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water. The vulnerability assessment shall include, but not be limited to, a review of pipes and constructed conveyances, physical barriers, water collection, treatment, storage and distribution facilities, electronic, computer or other automated systems which are utilized by the public water system, the use, storage, or handling of various chemicals, and the operation and maintenance of such system. The Administrator, not later than August 1, 2002, after consultation with appropriate departments and agencies of the Federal Government and with State and local governments, shall provide baseline information to community water systems required to conduct vulnerability assessments regarding which kinds of terrorist attacks or other intentional acts are the probable threats to—

(A) substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water; or

(B) otherwise present significant public health concerns.

(2) Each community water system referred to in paragraph (1) shall certify to the Administrator that it has conducted an assessment complying with paragraph (1) and shall submit to the Administrator a written copy of the assessment. Such certification and submission shall be made prior to—

(A) March 31, 2003, in the case of systems serving a population of 100,000 or more.

(B) December 31, 2003, in the case of systems serving a population of 50,000 or more but less than 100,000.

(C) June 30, 2004, in the case of systems serving a population greater than 3,300 but less than 50,000.

(3) Except for information contained in a certification under this subsection identifying the system submitting the certification and the date of the certification, all information provided to the Administrator under this subsection and all information derived therefrom shall be exempt from disclosure under section 552 of title 5.

(4) No community water system shall be required under State or local law to provide an assessment described in this section to any State, regional, or local governmental entity solely by reason of the requirement set forth in paragraph (2) that the system submit such assessment to the Administrator.

(5) Not later than November 30, 2002, the Administrator, in consultation with appropriate Federal law enforcement and intelligence officials, shall develop such protocols as may be necessary to protect the copies of the assessments required to be submitted under this subsection (and the information contained therein) from unauthorized disclosure. Such protocols shall ensure that—

(A) each copy of such assessment, and all information contained in or derived from the assessment, is kept in a secure location;

(B) only individuals designated by the Administrator may have access to the copies of the assessments; and

(C) no copy of an assessment, or part of an assessment, or information contained in or derived from an assessment shall be available to anyone other than an individual designated by the Administrator.

At the earliest possible time prior to November 30, 2002, the Administrator shall complete the development of such protocols for the purpose of having them in place prior to receiving any vulnerability assessments from community water systems under this subsection.

(6) (A) Except as provided in subparagraph (B), any individual referred to in paragraph (5)(B) who acquires the assessment submitted under paragraph (2), or any reproduction of such assessment, or any information derived from such assessment, and who knowingly or recklessly reveals such assessment, reproduction, or information other than—

(i) to an individual designated by the Administrator under paragraph (5).
(ii) for purposes of section 300j-4 of this title or for actions under section 300i of this title, or

(iii) for use in any administrative or judicial proceeding to impose a penalty for failure to comply with this section,

shall upon conviction be imprisoned for not more than one year or fined in accordance with the provisions of chapter 227 of title 18 applicable to class A misdemeanors, or both, and shall be removed from Federal office or employment.

(B) Notwithstanding subparagraph (A), an individual referred to in paragraph (5)(B) who is an officer or employee of the United States may discuss the contents of a vulnerability assessment submitted under this section with a State or local official.

(7) Nothing in this section authorizes any person to withhold any information from Congress or from any committee or subcommittee of Congress.

(b) Emergency response plan

Each community water system serving a population greater than 3,300 shall prepare or revise, where necessary, an emergency response plan that incorporates the results of vulnerability assessments that have been completed. Each such community water system shall certify to the Administrator, as soon as reasonably possible after the enactment of this section, but not later than 6 months after the completion of the vulnerability assessment under subsection (a) of this section, that the system has completed such plan. The emergency response plan shall include, but not be limited to, plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack on the public water system. The emergency response plan shall also include actions, procedures, and identification of equipment which can obviate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water provided to communities and individuals. Community water systems shall, to the extent possible, coordinate with existing Local Emergency Planning Committees established under the Emergency Planning and Community Right-to-Know Act (42 U.S.C. 11001 et seq.) when preparing or revising an emergency response plan under this subsection.

(c) Record maintenance

Each community water system shall maintain a copy of the emergency response plan completed pursuant to subsection (b) of this section for 5 years after such plan has been certified to the Administrator under this section.

(d) Guidance to small public water systems

The Administrator shall provide guidance to community water systems serving a population of less than 3,300 persons on how to conduct vulnerability assessments, prepare emergency response plans, and address threats from terrorist attacks or other intentional actions designed to disrupt the provision of safe drinking water or significantly affect the public health or significantly affect the safety or supply of drinking water provided to communities and individuals.

(e) Funding

(1) There are authorized to be appropriated to carry out this section not more than $160,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.

(2) The Administrator, in coordination with State and local governments, may use funds made available under paragraph (1) to provide financial assistance to community water systems for purposes of compliance with the requirements of subsections (a) and (b) of this section and to community water systems for expenses and contracts designed to address basic security enhancements of critical importance and significant threats to public health and the supply of drinking water as determined by a vulnerability assessment conducted under subsection (a) of this section. Such basic security enhancements may include, but shall not be limited to the following:

(A) the purchase and installation of equipment for detection of intruders;
(B) the purchase and installation of fencing, gating, lighting, or security cameras;
(C) the tamper-proofing of manhole covers, fire hydrants, and valve boxes;
(D) the rekeying of doors and locks;
(E) improvements to electronic, computer, or other automated systems and remote security systems;
(F) participation in training programs, and the purchase of training manuals and guidance materials, relating to security against terrorist attacks;
(G) improvements in the use, storage, or handling of various chemicals; and
(H) security screening of employees or contractor support services.

Funding under this subsection for basic security enhancements shall not include expenditures for personnel costs, or monitoring, operation, or maintenance of facilities, equipment, or systems.

(3) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems to assist in responding to and alleviating any vulnerability to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water (including sources of water for such systems) which the Administrator determines to present an immediate and urgent security need.

(4) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems serving a population of less than 3,300 persons for activities and projects undertaken in accordance with the guidance provided to such systems under subsection (d) of this section.

(July 1, 1944, ch. 373, title XIV, § 1433, as added Pub. L. 107–188, title IV, § 401, June 12, 2002, 116 Stat. 682.)

References in Text

The Emergency Planning and Community Right-to-Know Act, referred to in subsec. (b), probably means the Emergency Planning and Community Right-to-
§ 300i–3. Contaminant prevention, detection and response

(a) In general

The Administrator, in consultation with the Centers for Disease Control and Prevention by Pub. L. 102–531, title XIV, § 11001 et seq. of this title, for complete classification of this Act to the Code, see Short Title note set out under section 11001 of this title and Tables.

§ 300i–4. Supply disruption prevention, detection and response

(a) Disruption of supply or safety

The Administrator, in coordination with the appropriate departments and agencies of the Federal Government, shall review (or enter into contracts or cooperative agreements to provide for a review of) methods and means by which terrorists or other individuals or groups could disrupt the supply of safe drinking water or take other actions against water collection, pretreatment, treatment, storage and distribution facilities which could render such water significantly less safe for human consumption, including each of the following:

1. Methods and means by which pipes and other constructed conveyances utilized in public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

2. Methods and means by which collection, pretreatment, treatment, storage and distribution facilities utilized or used in connection with public water systems and collection and pretreatment storage facilities used in connection with public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

3. Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be altered or affected so as to be subject to cross-contamination of drinking water supplies.

4. Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be reasonably protected from terrorist attacks or other acts intended to disrupt the supply or affect the safety of drinking water.

(b) Alternative sources

The review under this section shall also include a review of the methods and means by which alternative supplies of drinking water could be provided in the event of the destruction, impairment or contamination of public water systems.

(c) Requirements and considerations

In carrying out this section and section 300i–3 of this title—

1. the Administrator shall ensure that reviews carried out under this section reflect the needs of community water systems of various sizes and various geographic areas of the United States; and

2. the Administrator may consider the vulnerability of, or potential for forced interruption of service for, a region or service area, including community water systems that provide service to the National Capital area.
(d) Information sharing

As soon as practicable after reviews carried out under this section or section 300i–3 of this title have been evaluated, the Administrator shall disseminate, as appropriate as determined by the Administrator, to community water systems information on the results of the project through the Information Sharing and Analysis Center, or other appropriate means.

(e) Funding

There are authorized to be appropriated to carry out this section and section 300i–3 of this title not more than $15,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.

PART E—GENERAL PROVISIONS

§ 300j. Assurances of availability of adequate supplies of chemicals necessary for treatment of water

(a) Certification of need application

If any person who uses chlorine, activated carbon, lime, ammonia, soda ash, potassium permanganate, caustic soda, or other chemical or substance for the purpose of treating water in any public water system or in any public treatment works determines that the amount of such chemical or substance necessary to effectively treat such water is not reasonably available to him or will not be so available to him when required for the effective treatment of such water, such person may apply to the Administrator for a certification (hereinafter in this section referred to as a “certification of need”) that the amount of such chemical or substance which such person requires to effectively treat such water is not reasonably available to him or will not be so available when required for the effective treatment of such water.

(b) Application requirements; publication in Federal Register; waiver; certification, issuance or denial

(1) An application for a certification of need shall be in such form and submitted in such manner as the Administrator may require and shall (A) specify the persons the applicant determines are able to provide the chemical or substance with respect to which the application is submitted, (B) specify the persons from whom the applicant has sought such chemical or substance, and (C) contain such other information as the Administrator may require.

(2) Upon receipt of an application under this section, the Administrator shall (A) publish in the Federal Register a notice of the receipt of the application and a brief summary of it, (B) notify in writing each person whom the President or his delegate (after consultation with the Administrator) determines could be made subject to an order required to be issued upon the issuance of the certification of need applied for in such application, and (C) provide an opportunity for the submission of written comments on such application. The requirements of the preceding sentence of this paragraph shall not apply when the Administrator for good cause finds (and incorporates the finding with a brief statement of reasons therefor in the order issued) that waiver of such requirements is necessary in order to protect the public health.

(3) Within 30 days after—

(A) the date a notice is published under paragraph (2) in the Federal Register with respect to an application submitted under this section for the issuance of a certification of need, or

(B) the date on which such application is received if as authorized by the second sentence of such paragraph no notice is published with respect to such application,

the Administrator shall take action either to issue or deny the issuance of a certification of need.

(c) Certification of need; issuance; executive orders; implementation of orders; equitable apportionment of orders; factors considered

(1) If the Administrator finds that the amount of a chemical or substance necessary for an applicant under an application submitted under this section to effectively treat water in a public water system or in a public treatment works is not reasonably available to the applicant or will not be so available to him when required for the effective treatment of such water, the Administrator shall issue a certification of need. Not later than seven days following the issuance of such certification, the President or his delegate shall issue an order requiring the provision to such person of such amounts of such chemical or substance as the Administrator deems necessary in the certification of need issued for such person. Such order shall apply to such manufacturers, producers, processors, distributors, and repackagers of such chemical or substance as the Administrator deems necessary and appropriate, except that such order may not apply to any manufacturer, producer, or processor of such chemical or substance who manufactures, produces, or processes (as the case may be) such chemical or substance solely for its own use.

Persons subject to an order issued under this section shall be given a reasonable opportunity to consult with the President or his delegate with respect to the implementation of the order.

(2) Orders which are to be issued under paragraph (1) to manufacturers, producers, and processors of a chemical or substance shall be equitably apportioned, as far as practicable, among all manufacturers, producers, and processors of such chemical or substance; and orders which are to be issued under paragraph (1) to distributors and repackagers of a chemical or substance shall be equitably apportioned, as far as practicable, among all distributors and repackagers of such chemical or substance. In apportioning orders issued under paragraph (1) to manufacturers, producers, processors, distributors, and repackagers of chlorine, the President or his delegate shall, in carrying out the requirements of the preceding sentence, consider—

(A) the geographical relationships and established commercial relationships between such manufacturers, producers, processors,
tributors, and repackage the persons for whom the orders are issued;

(B) in the case of orders to be issued to producers of chlorine, the (i) amount of chlorine historically supplied by each such producer to treat water in public water systems and public treatment works, and (ii) share of each such producer of the total annual production of chlorine in the United States; and

(C) such other factors as the President or his delegate may determine are relevant to the apportionment of orders in accordance with the requirements of the preceding sentence.

(3) Subject to subsection (f) of this section, any person for whom a certification has been issued under this subsection may upon the expiration of the order issued under paragraph (1) upon such certification apply under this section for additional certifications.

(d) Breach of contracts; defense

There shall be available as a defense to any action brought for breach of contract in a Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange a chemical or substance subject to an order issued pursuant to subsection (c)(1) of this section, that such delay or failure was caused solely by compliance with such order.

(e) Penalties for noncompliance with orders; temporary restraining orders and preliminary or permanent injunctions

(1) Whoever knowingly fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be fined not more than $5,000 for each such failure to comply.

(2) Whoever fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be subject to a civil penalty of not more than $2,500 for each such failure to comply.

(3) Whenever the Administrator or the President or his delegate has reason to believe that any person is violating or will violate any order issued pursuant to subsection (c)(1) of this section, he may petition a United States district court to issue a temporary restraining order or preliminary or permanent injunction (including a mandatory injunction) to enforce the provisions of such order.

(f) Termination date

No certification of need or order issued under this section may remain in effect for more than one year.

(1) The Administrator may conduct research, studies, and demonstrations relating to the causes, diagnosis, treatment, control, and prevention of physical and mental diseases and other impairments of man resulting directly or indirectly from contaminants in water, or to the provision of a dependably safe supply of drinking water, including—

(A) improved methods (i) to identify and measure the existence of contaminants in drinking water (including methods which may be used by State and local health and water officials), and (ii) to identify the source of such contaminants;

(B) improved methods to identify and measure the health effects of contaminants in drinking water;

(C) new methods of protecting underground water sources of public water systems from contamination.

(2) INFORMATION AND RESEARCH FACILITIES.—In carrying out this subchapter, the Administrator is authorized to—

(A) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water, together with appropriate recommendations in connection with the information; and

(B) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to this subchapter.
(3) The Administrator shall carry out a study of polychlorinated biphenyl contamination of actual or potential sources of drinking water, contamination of such sources by other substances known or suspected to be harmful to public health, the effects of such contamination, and means of removing, treating, or otherwise controlling such contamination. To assist in carrying out this paragraph, the Administrator is authorized to make grants to public agencies and private nonprofit institutions.

(4) The Administrator shall conduct a survey and study of—

(A) disposal of waste (including residential waste) which may endanger underground water which supplies, or can reasonably be expected to supply, any public water systems, and

(B) means of control of such waste disposal.

Not later than one year after December 16, 1974, he shall transmit to the Congress the results of such survey and study, together with such recommendations as he deems appropriate.

(5) The Administrator shall carry out a study of methods of underground injection which do not result in the degradation of underground drinking water sources.

(6) The Administrator shall carry out a study of methods of preventing, detecting, and dealing with surface spills of contaminants which may degrade underground water sources for public water systems.

(7) The Administrator shall carry out a study of virus contamination of drinking water sources and means of control of such contamination.

(8) The Administrator shall carry out a study of the nature and extent of the impact on underground water which supplies, or can reasonably be expected to supply, public water systems of (A) abandoned injection or extraction wells; (B) intensive application of pesticides and fertilizers in underground water recharge areas; and (C) ponds, pools, lagoons, pits, or other surface disposal of contaminants in underground water recharge areas.

(9) The Administrator shall conduct a comprehensive study of public water supplies and drinking water sources to determine the nature, extent, sources of and means of control of contamination by chemicals or other substances suspected of being carcinogenic. Not later than six months after December 16, 1974, he shall transmit to the Congress the initial results of such study, together with such recommendations for further review and corrective action as he deems appropriate.

(10) The Administrator shall carry out a study of the reaction of chlorine and humic acids and the effects of the contaminants which result from such reaction on public health and on the safety of drinking water, including any carcinogenic effect.

(b) Emergency situations

The Administrator is authorized to provide technical assistance and to make grants to States, or publicly owned water systems to assist in responding to and alleviating any emergency situation affecting public water systems (including sources of water for such systems) which the Administrator determines to present substantial danger to the public health. Grants provided under this subsection shall be used only to support those actions which (i) are necessary for preventing, limiting or mitigating danger to the public health in such emergency situation and (ii) would not, in the judgment of the Administrator, be taken without such emergency assistance. The Administrator may carry out the program authorized under this subsection as part of, and in accordance with the terms and conditions of, any other program of assistance for environmental emergencies which the Administrator is authorized to carry out under any other provision of law. No limitation on appropriations for any such other program shall apply to amounts appropriated under this subsection.

(c) Establishment of training programs and grants for training; training fees

The Administrator shall—

(1) provide training for, and make grants for training (including postgraduate training) of (A) personnel of State agencies which have primary enforcement responsibility and of agencies or units of local government to which enforcement responsibilities have been delegated by the State, and (B) personnel who manage or operate public water systems, and

(2) make grants for postgraduate training of individuals (including grants to educational institutions for traineeships) for purposes of qualifying such individuals to work as personnel referred to in paragraph (1).

(3) make grants to, and enter into contracts with, any public agency, educational institution, and any other organization, in accordance with procedures prescribed by the Administrator, under which he may pay all or part of the costs (as may be determined by the Administrator) of any project or activity which is designed—

(A) to develop, expand, or carry out a program (which may combine training education and employment) for training persons for occupations involving the public health aspects of providing safe drinking water; or

(B) to train inspectors and supervisory personnel to train or supervise persons in occupations involving the public health aspects of providing safe drinking water; or

(C) to develop and expand the capability of programs of States and municipalities to carry out the purposes of this subchapter (other than by carrying out State programs of public water system supervision or underground water source protection (as defined in section 300j–2(c) of this title));

Reasonable fees may be charged for training provided under paragraph (1)(B) to persons other than personnel of State or local agencies but such training shall be provided to personnel of State or local agencies without charge.

(d) Authorization of appropriations

There are authorized to be appropriated to carry out subsection (b) of this section not more than $35,000,000 for the fiscal year 2002 and such sums as may be necessary for each fiscal year thereafter.
(e) Technical assistance

The Administrator may provide technical assistance to small public water systems to enable such systems to achieve and maintain compliance with applicable national primary drinking water regulations. Such assistance may include circuit-rider and multi-State regional technical assistance programs, training, and preliminary engineering evaluations. The Administrator shall ensure that technical assistance pursuant to this subsection is available in each State. Each nonprofit organization receiving assistance under this subsection shall consult with the State in which the assistance is to be expended or otherwise made available before using assistance to undertake activities to carry out this subsection. There are authorized to be appropriated to the Administrator to be used for such technical assistance $15,000,000 for each of the fiscal years 1997 through 2003.

Not less than the greater of—

Not more than—

$10,000,000 for each of the fiscal years 1997 through 2003.

There are authorized to be appropriated to carry out this subsection $10,000,000 for each of the fiscal years 1987 through 1991.

"(1) 3 percent of the amounts appropriated under this subsection, or

"(2) $250,000 shall be utilized for technical assistance to public water systems owned or operated by Indian tribes."

1995—Subsecs. (c) to (g). Pub. L. 104–66 redesignated subsecs. (d), (f), and (g) as (c), (d), and (e), respectively, and struck out former subsec. (e) which read as follows: "Not later than eighteen months after November 16, 1977, the Administrator shall submit a report to Congress on the present and projected future availability of an adequate and dependable supply of safe drinking water to meet present and projected future need. Such report shall include an analysis of the future demand for drinking water and other competing uses of water, the availability and use of methods to conserve water or reduce demand, the adequacy of present measures to assure adequate and dependable supplies of safe drinking water, and the problems (financial, legal, or other) which need to be resolved in order to assure the availability of such supplies for the future. Existing information and data compiled by the National Water Commission and others shall be utilized to the extent possible."

1986—Subsec. (e). Pub. L. 99–339, §301(a), struck out subsec. (e) which authorized the Administrator to make grants to public water systems which are required, under State or local law, to meet standards relating to drinking turbidity which are more stringent than the national drinking water regulations. Such assistance may include "circuit-rider" programs, training, and preliminary engineering studies. There are authorized to be appropriated to carry out this subsection $10,000,000 for each of the fiscal years 1987 through 1991.

1980—Pub. L. 96–502, §5, Dec. 5, 1980, 94 Stat. 2736, added subsec. (b) which read as follows: "The Administrator is authorized to provide technical assistance to public water systems owned or operated by Indian tribes."

1979—Subsec. (e). Pub. L. 96–63 authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

1978—Pub. L. 95–232, §301(a), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

1975—Subsecs. (c) to (g). Pub. L. 94–55, §301(a), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

1974—Pub. L. 93–523, §2(a), Dec. 16, 1974, 88 Stat. 1682, amended subsec. (a) which read as follows: "The Administrator is authorized to—

(1) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water together with appropriate recommendations in connection therewith;

(2) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to the purposes of this subchapter.

Subsecs. (b)(3), (c)(9), Pub. L. 104–182, §121(1), which directed redesignation of subsec. (b)(3) as par. (3) of subsec. (d) and transfer of that par. to follow par. (2) of subsec. (d), was executed by redesignating subsec. (b)(3) as par. (3) of subsec. (c) and transferring that par. to follow par. (2) of subsec. (c) to reflect the probable intent of Congress and the redesignation of subsec. (d) as (c) by Pub. L. 104–66. See 1995 Amendment note below. Moreover, subsec. (d) does not have any pars.

Subsec. (e). Pub. L. 104–182, §122, amended subsec. (e) generally. Prior to amendment, subsec. (e) read as follows: "The Administrator is authorized to provide technical assistance to public water systems owned or operated by Indian Tribes."

"(1) 3 percent of the amounts appropriated under this subsection, or

"(2) $250,000 shall be utilized for technical assistance to public water systems owned or operated by Indian tribes."

1995—Subsecs. (c) to (g). Pub. L. 104–66 redesignated subsecs. (d), (f), and (g) as (c), (d), and (e), respectively, and struck out former subsec. (e) which read as follows: "Not later than eighteen months after November 16, 1977, the Administrator shall submit a report to Congress on the present and projected future availability of an adequate and dependable supply of safe drinking water to meet present and projected future need. Such report shall include an analysis of the future demand for drinking water and other competing uses of water, the availability and use of methods to conserve water or reduce demand, the adequacy of present measures to assure adequate and dependable supplies of safe drinking water, and the problems (financial, legal, or other) which need to be resolved in order to assure the availability of such supplies for the future. Existing information and data compiled by the National Water Commission and others shall be utilized to the extent possible."

1986—Subsec. (e). Pub. L. 99–339, §301(a), struck out subsec. (e) which authorized the Administrator to make grants to public water systems which are required, under State or local law, to meet standards relating to drinking turbidity which are more stringent than the standards in effect under this subchapter.

Subsec. (f). Pub. L. 99–339, §301(a), authorized appropriations to carry out subsec. (a)(2)(B) of this section for fiscal years 1987 to 1991 and to carry out provisions of this section other than subsecs. (a)(2)(B) and (g) and provisions relating to research for fiscal years 1987 to 1991.

Subsec. (g). Pub. L. 99–339, §301(g), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

Subsec. (f). Pub. L. 96–63 authorized appropriations of $21,405,000 for fiscal year ending Sept. 30, 1980, $18,000,000 for fiscal year ending Sept. 30, 1981, and $35,000,000 for fiscal year ending Sept. 30, 1982 for purposes other than those of subsec. (a)(2)(B) of this sec-

sec. (b) which read as follows: "In carrying out this subchapter, the Administrator is authorized to—

(1) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water together with appropriate recommendations in connection therewith;

(2) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to the purposes of this subchapter."
tion and for purposes of subsec. (a)(2)(B) of this section, $8,000,000 for fiscal years 1980 through 1982.

1977—Subsec. (a)(2). Pub. L. 95–190, §§ 13, 16, redesignated existing provisions as subpar. (A), added subpar. (B) and, in subpar. (B) as added, substituted provisions authorizing Administrator to make grants and provide technical assistance for any emergency situation affecting public water systems and criteria for such grants and assistance for provisions authorizing Administrator to make grants and provide technical assistance for any emergency situation respecting drinking water and criteria for determination of such situations.

Subsec. (a)(3). Pub. L. 95–190, § 3(a), designated existing provisions as subpar. (A) and added subpar. (B).

Subsec. (a)(10), (11). Pub. L. 95–190, § 3(e)(1), added pars. (10) and (11).

Subsec. (b)(3)(C). Pub. L. 95–190, § 18(b), substituted ‘‘300j–2(c)’’ for ‘‘300j–2(d)’’.

Subsecs. (c), (d). Pub. L. 95–190, § 3(b), 4, added subsecs. (c) and (d). Former subsec. (c) redesignated (e).

Subsec. (e). Pub. L. 95–190, § 3(a), redesignated former subsec. (c) as (e) and inserted provisions authorizing appropriations for fiscal years 1978 and 1979, and provisions relating to appropriations for subsec. (a)(2)(B) of this section and for research.

SCIENTIFIC RESEARCH REVIEW

Pub. L. 104–182, title II, § 202, Aug. 6, 1996, 110 Stat. 1682, provided that:

‘‘(a) IN GENERAL.—The Administrator shall—

‘‘(1) develop a strategic plan for drinking water research activities throughout the Environmental Protection Agency (in this section referred to as the ‘Agency’);

‘‘(2) integrate that strategic plan into ongoing Agency planning activities; and

‘‘(3) review all Agency drinking water research to ensure the research—

‘‘(A) is of high quality; and

‘‘(B) does not duplicate any other research being conducted by the Agency.

‘‘(b) PLAN.—The Administrator shall transmit the plan to the Committees on Commerce [now Energy and Commerce] and Science [now Science, Space, and Technology] of the House of Representatives and the Committee on Environment and Public Works of the Senate and the plan shall be made available to the public.’’

NATIONAL CENTER FOR GROUND WATER RESEARCH

Section 203 of Pub. L. 104–182 provided that: ‘‘The Administrator of the Environmental Protection Agency, acting through the Robert S. Kerr Environmental Research Laboratory, is authorized to reestablish a partnership between the Laboratory and the National Center for Ground Water Research, a university consortium, to conduct research, training, and technology transfer for ground water quality protection and restoration. No funds are authorized by this section.’’

COMPARATIVE HEALTH EFFECTS ASSESSMENT

Section 394(b) of Pub. L. 99–339 provided that: ‘‘The Administrator of the Environmental Protection Agency shall conduct a comparative health effects assessment, using available data, to compare the public health effects (both positive and negative) associated with water treatment chemicals and their byproducts with the public health effects associated with contaminants found in public water supplies. Not later than 18 months after the date of the enactment of this Act [June 19, 1986], the Administrator shall submit a report to the Congress setting forth the results of such assessment.’’

§ 300j–2. Grants for State programs

(a) Public water systems supervision programs; applications for grants; allotment of sums; waiver of grant restrictions; notice of approval or disapproval of application; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out public water system supervision programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. The Administrator may not approve an application of a State for its first grant under paragraph (1) unless he determines that the State—

(A) has established or will establish within one year from the date of such grant a public water system supervision program, and

(B) will, within that one year, assume primary enforcement responsibility for public water systems within the State.

No grant may be made to a State under paragraph (1) for any period beginning more than one year after the date of the State’s first grant unless the State has assumed and maintains primary enforcement responsibility for public water systems within the State.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient’s costs (as determined under regulations of the Administrator) in carrying out, during the one-year period beginning on the date the grant is made, a public water system supervision program.

(4) In each fiscal year the Administrator shall, in accordance, with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, number of public water systems, and other relevant factors. No State shall receive less than 1 per centum of the annual appropriation for grants under paragraph (1): Provided, That the Administrator may, by regulation, reduce such percentage in accordance with the criteria specified in this paragraph: And provided further, That such percentage shall not apply to grants allotted to Guam, American Samoa, or the Virgin Islands.

(5) The prohibition contained in the last sentence of paragraph (2) may be waived by the Administrator with respect to a grant to a State through fiscal year 1979 but such prohibition may only be waived if, in the judgment of the Administrator—

(A) the State is making a diligent effort to assume and maintain primary enforcement responsibility for public water systems within the State;

(B) the State has made significant progress toward assuming and maintaining such primary enforcement responsibility; and

(C) there is reason to believe the State will assume such primary enforcement responsibility by October 1, 1979.

The amount of any grant awarded for the fiscal years 1978 and 1979 pursuant to a waiver under
this paragraph may not exceed 75 per centum of the allotment which the State would have received for such fiscal year if it had assumed and maintained such primary enforcement responsibility. The remaining 25 per centum of the amount allotted to such State for such fiscal year shall be retained by the Administrator, and the Administrator may award such amount to such State at such time as the State assumes such responsibility before the beginning of fiscal year 1980. At the beginning of each fiscal years 1979 and 1980 the amounts retained by the Administrator for any preceding fiscal year and not awarded by the beginning of fiscal year 1979 or 1980 to the States to which such amounts were originally allotted may be removed from the original allotment and reallocated for fiscal year 1979 or 1980 (as the case may be) to States which have assumed primary enforcement responsibility by the beginning of such fiscal year.

(6) The Administrator shall notify the State of the approval or disapproval of any application for a grant under this section—

(A) within ninety days after receipt of such application, or

(B) not later than the first day of the fiscal year for which the grant application is made, whichever is later.

(7) AUTHORIZATION.—For the purpose of making grants under paragraph (1), there are authorized to be appropriated $100,000,000 for each of fiscal years 1997 through 2003.

(8) RESERVATION OF FUNDS BY THE ADMINISTRATOR.—If the Administrator assumes the primary enforcement responsibility of a State public water system supervision program, the Administrator may reserve from funds made available pursuant to this subsection an amount equal to the amount that would otherwise have been provided to the State pursuant to this subsection. The Administrator shall use the funds reserved pursuant to this paragraph to ensure the full and effective administration of a public water system supervision program in the State.

(9) STATE LOAN FUNDS.—

(A) RESERVATION OF FUNDS.—For any fiscal year for which the amount made available to the Administrator by appropriations to carry out this subsection is less than the amount that the Administrator determines is necessary to supplement funds made available pursuant to paragraph (8) to ensure the full and effective administration of a public water system supervision program in a State, the Administrator may reserve from the funds made available to the State under section 300j–12 of this title (relating to State loan funds) an amount that is equal to the amount of the shortfall. This paragraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(B) DUTY OF ADMINISTRATOR.—If the Administrator reserves funds from the allocation of an amount allotted to such State under subparagraph (A), the Administrator shall carry out in the State each of the activities that would be required of the State if the State had primary enforcement authority under section 300g–2 of this title.

(b) Underground water source protection programs; applications for grants; allotment of sums; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out underground water source protection programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. No grant may be made to any State under paragraph (1) unless the State has assumed primary enforcement responsibility within two years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title. The prohibition contained in the preceding sentence shall not apply to such grants when made to Indian Tribes.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient’s cost (as determined under regulations of the Administrator) in carrying out, during the one-year period beginning on the date the grant is made, and underground water source protection program.

(4) In each fiscal year the Administrator shall, in accordance with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, and other relevant factors.

(5) For purposes of making grants under paragraph (1) there are authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1976, $7,500,000 for the fiscal year ending June 30, 1977, $10,000,000 for each of the fiscal years 1978 and 1979, $7,705,000 for the fiscal year ending September 30, 1980, $18,000,000 for the fiscal year ending September 30, 1981, and $21,000,000 for the fiscal year ending September 30, 1982. For the purpose of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

<table>

(c) Definitions

For purposes of this section:

(1) The term “public water system supervision program” means a program for the adoption and enforcement of drinking water regulations (with such variances and exemptions from such regulations under conditions and in a manner which is not less stringent than the conditions under, and the manner in, which variances and exemptions may be granted under sections 300g–4 and 300g–5 of this title) which are no less stringent than the national primary drinking water regulations under section 300g–1 of this title, and for keeping records and making reports required by section 300g–2(a)(3) of this title.

(2) The term “underground water source protection program” means a program for the adoption and enforcement of a program which meets the requirements of regulations under
section 300h of this title, and for keeping records and making reports required by section 300h–1(b)(1)(A)(ii) of this title. Such term includes, where applicable, a program which meets the requirements of section 300h–4 of this title.

(d) New York City watershed protection program

(1) In general

The Administrator is authorized to provide financial assistance to the State of New York for demonstration projects implemented as part of the watershed program for the protection and enhancement of the quality of source waters of the New York City water supply system, including projects that demonstrate, assess, or provide for comprehensive monitoring and surveillance and projects necessary to comply with the criteria for avoiding filtration contained in 40 CFR 141.71. Demonstration projects which shall be eligible for financial assistance shall be certified to the Administrator by the State of New York as satisfying the purposes of this subsection. In certifying projects to the Administrator, the State of New York shall give priority to monitoring projects that have undergone peer review.

(2) Report

Not later than 5 years after the date on which the Administrator first provides assistance pursuant to this paragraph, the Governor of the State of New York shall submit a report to the Administrator on the results of projects assisted.

(3) Matching requirements

Federal assistance provided under this subsection shall not exceed 50 percent of the total cost of the protection program being carried out for any particular watershed or ground water recharge area.

(4) Authorization

There are authorized to be appropriated to the Administrator to carry out this subsection for each of fiscal years 2003 through 2010, $15,000,000 for the purpose of providing assistance to the State of New York to carry out paragraph (1).

Amount

1987....................................................... $37,200,000
1988....................................................... 40,150,000
1989....................................................... 40,150,000
1990....................................................... 40,150,000
1991....................................................... 40,150,000
1992....................................................... 40,150,000
1993....................................................... 40,150,000
1994....................................................... 40,150,000
1995....................................................... 40,150,000
1996....................................................... 40,150,000
1997....................................................... 40,150,000
1998....................................................... 40,150,000
1999....................................................... 40,150,000
2000....................................................... 40,150,000
2001....................................................... 40,150,000
2002....................................................... 40,150,000
2003....................................................... 40,150,000
2004....................................................... 40,150,000
2005....................................................... 40,150,000
2006....................................................... 40,150,000
2007....................................................... 40,150,000
2008....................................................... 40,150,000
2009....................................................... 40,150,000
2010....................................................... 40,150,000
1996—Passed Pub. L. 104–182, title I, § 128, Aug. 31, 1996, 110 Stat. 2650, 2651, amended provision that no grant may be made to any State under par. (1) unless he determines that the State has established or will establish within two years from the date of such grant an underground water source protection, and will, within such two years, assume primary enforcement responsibility for underground water sources within the State. Not later than 5 years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title for provisions that the Administrator may not approve an application of a State for its first grant under par. (1) unless he determines that the State has established or will establish within two years from the date of such grant an underground water source protection, and will, within such two years, assume primary enforcement responsibility for underground water sources within the State and that no grant may be made to a State under par. (1) for any fiscal year beginning more than two years after the date of the State’s first grant unless the State has assumed primary enforcement responsibility for underground water sources within the State.

AMENDMENTS

2004—Subsec. (d)(4). Pub. L. 108–328 substituted “2003 through 2010” for “1997 through 2003”. 1996—Subsec. (a)(7). Pub. L. 104–182, § 124(1), inserted heading and amended text generally. Prior to amendment, text read as follows: “For purposes of making grants under paragraph (1) there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1976, $25,000,000 for the fiscal year ending June 30, 1977, $35,000,000 for fiscal year 1978, $45,000,000 for fiscal year 1979, $29,450,000 for the fiscal year ending September 30, 1980, $32,000,000 for the fiscal year ending September 30, 1981, and $34,000,000 for the fiscal year ending September 30, 1982. For the purposes of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

§ 300j–3. Special project grants and guaranteed loans

(a) Special study and demonstration project grants

The Administrator may make grants to any person for the purposes of—

(1) assisting in the development and demonstration (including construction) of any
project which will demonstrate a new or improved method, approach, or technology, for providing a dependably safe supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health implications involved in the reclamation, recycling, and reuse of waste waters for drinking and the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations

Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66\% per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consulting the National Drinking Water Advisory Council, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(4) Priority for grants under this section shall be given where there are known or potential public health hazards which require advanced technology for the removal of particles which are too small to be removed by ordinary treatment technology.

(c) Authorization of appropriations

For the purposes of making grants under subsections (a) and (b) of this section there are authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1975; and $10,000,000 for the fiscal year ending June 30, 1976; and $7,500,000 for the fiscal year ending June 30, 1977.

(d) Loan guarantees to public water systems; conditions; indebtedness limitation; regulations

The Administrator during the fiscal years ending June 30, 1975, and June 30, 1976, shall carry out a program of guaranteeing loans made by private lenders to small public water systems for the purpose of enabling such systems to meet national primary drinking water regulations prescribed under section 300g–1 of this title. No such guarantee may be made with respect to a system unless (1) such system cannot reasonably obtain financial assistance necessary to comply with such regulations from any other source, and (2) the Administrator determines that any facilities constructed with a loan guaranteed under this subsection is not likely to be made obsolete by subsequent changes in primary regulations. The aggregate amount of indebtedness guaranteed with respect to any system may not exceed $50,000. The aggregate amount of indebtedness guaranteed under this subsection may not exceed $50,000,000. The Administrator shall prescribe regulations to carry out this subsection.

AMENDMENTS

§ 300j–3a. Grants to public sector agencies

(a) Assistance for development and demonstration projects

The Administrator of the Environmental Protection Agency shall offer grants to public sector agencies for the purposes of—

(1) assisting in the development and demonstration (including construction) of any project which will demonstrate a new or improved method, approach, or technology for providing a dependably safe supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health and conservation implications involved in the reclamation, recycling, and reuse of wastewaters for drinking and agricultural use or the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations

Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66\% per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consulting the National Drinking Water Advisory Council, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(d) Loan guarantees to public water systems; conditions; indebtedness limitation; regulations

The Administrator during the fiscal years ending June 30, 1975, and June 30, 1976, shall carry out a program of guaranteeing loans made by private lenders to small public water systems for the purpose of enabling such systems to meet national primary drinking water regulations prescribed under section 300g–1 of this title. No such guarantee may be made with respect to a system unless (1) such system cannot reasonably obtain financial assistance necessary to comply with such regulations from any other source, and (2) the Administrator determines that any facilities constructed with a loan guaranteed under this subsection is not likely to be made obsolete by subsequent changes in primary regulations. The aggregate amount of indebtedness guaranteed with respect to any system may not exceed $50,000. The aggregate amount of indebtedness guaranteed under this subsection may not exceed $50,000,000. The Administrator shall prescribe regulations to carry out this subsection.

AMENDMENTS

§ 300j–3b. Contaminant standards or treatment technique guidelines

(1) Not later than nine months after October 18, 1978, the Administrator shall promulgate guidelines establishing supplemental standards or treatment technique requirements for microbiological, viral, radiological, organic, and inorganic contaminants, which guidelines shall be conditions, as provided in paragraph (2), of any grant for a demonstration project for water reclamation, recycling, and reuse funded under section 300j–3a of this title or under section 300j–3(a)(2) of this title, where such project involves direct human consumption of treated wastewater. Such guidelines shall provide for sufficient control of each such contaminant, such that in the Administrator’s judgment, no adverse effects on the health of persons may reasonably be anticipated to occur, allowing an adequate margin of safety.

(2) A grant referred to in paragraph (1) for a project which involves direct human consumption of treated wastewater may be awarded on or after the date of promulgation of guidelines under this section only if the applicant demonstrates to the satisfaction of the Administrator that the project—

(A) will comply with all national primary drinking water regulations under section 300g–1 of this title;

(B) will comply with all guidelines under this section; and

(C) will in other respects provide safe drinking water.

Any such grant awarded before the date of promulgation of such guidelines shall be conditioned on the applicant’s agreement to comply to the maximum feasible extent with such guidelines as expeditiously as practicable following the date of promulgation thereof.

(3) Guidelines under this section may, in the discretion of the Administrator—

(A) be nationally and uniformly applicable to all projects funded under section 300j–3a of this title or section 300j–1(a)(2) 1 of this title;

(B) vary for different classes or categories of such projects (as determined by the Administrator);

(C) be established and applicable on a project-by-project basis; or

(D) any combination of the above.

(4) Nothing in this section shall be construed to prohibit or delay the award of any grant referred to in paragraph (1) prior to the date of promulgation of such guidelines.

REFERENCES IN TEXT

Section 300j–1(a)(2) of this title, referred to in par. (3)(A), was amended by Pub. L. 104–182, title I, §121(c), (4)(A), Aug. 6, 1996, 110 Stat. 1651, to redesignate par. (2)(B) as subsec. (b) of section 300j–1, strike par. (2)(A), and add a new par. (2) relating to information and research facilities.

§ 300j–3c. National assistance program for water infrastructure and watersheds

(a) Technical and financial assistance

The Administrator of the Environmental Protection Agency may provide technical and financial assistance in the form of grants to States (1) for the construction, rehabilitation, and improvement of water supply systems, and (2) consistent with nonpoint source management programs established under section 1329 of title 33, for source water quality protection programs to address pollutants in navigable waters for the purpose of making such waters usable by water supply systems.

(b) Limitation

Not more than 30 percent of the amounts appropriated to carry out this section in a fiscal year may be used for source water quality protection programs described in subsection (a)(2) of this section.

(c) Condition

As a condition to receiving assistance under this section, a State shall ensure that such assistance is carried out in the most cost-effective manner, as determined by the State.

(d) Authorization of appropriations

(1) Unconditional authorization

There are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003. Such sums shall remain available until expended.

(2) Conditional authorization

In addition to amounts authorized under paragraph (1), there are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003, provided that such authorization shall be in effect for a fiscal year only if at least 75 percent of the total amount of funds authorized to be appropriated for such fiscal year by section 300j–12(m) of this title are appropriated.

(e) Acquisition of lands

Assistance provided with funds made available under this section may be used for the acquisition of lands and other interests in lands; however, nothing in this section authorizes the acquisition of lands or other interests in lands from other than willing sellers.

(f) Federal share

The Federal share of the cost of activities for which grants are made under this section shall be 50 percent.

1 See References in Text note below.
§ 300j–4. Records and inspections

(a) Provision of information to Administrator; monitoring program for unregulated contaminants

(1)(A) Every person who is subject to any requirement of this subchapter or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regulation under this subchapter, in determining whether such person has acted or is acting in compliance with any program of financial assistance under this subchapter, and to advise the Administrator on any necessary modifications.

(B) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require under this subchapter for the installation of treatment equipment or process changes, the testing of treatment technology, or the analysis or processing of monitoring samples, except where the Administrator provides the funding for such activities.

(C) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require to assist the Administrator in establishing regulations under section 300g–1 of this title, after consultation with States and suppliers of water.

(2) Water supply system

The term “water supply system” means a system for the provision to the public of piped water for human consumption if such system serves at least 25 individuals and a draw and fill system for the provision to the public of water for human consumption. Such term does not include a system owned by a Federal agency. Such term includes (A) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (B) any collection or pretreatment facilities not under such control that are used primarily in connection with such system.

Section was enacted as part of the Safe Drinking Water Act Amendments of 1996, and not as part of the Public Health Service Act which comprises this chapter.

§ 300j–4. Records and inspections

(a) Provision of information to Administrator; monitoring program for unregulated contaminants

(1)(A) Every person who is subject to any requirement of this subchapter or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regulation to assist the Administrator in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with any program of financial assistance under this subchapter, and to advise the Administrator on any necessary modifications.

(B) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require under this subchapter for the installation of treatment equipment or process changes, the testing of treatment technology, or the analysis or processing of monitoring samples, except where the Administrator provides the funding for such activities.

(C) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require to assist the Administrator in establishing regulations under section 300g–1 of this title, after consultation with States and suppliers of water.
of this title or appropriated under subpara-
graph (H), the Administrator shall pay the
reasonable cost of such testing and labora-
tory analysis as are necessary to carry out
monitoring under the plan.

(D) Monitoring results.—Each public water
system that conducts monitoring of unregu-
lated contaminants pursuant to this para-
graph shall provide the results of the monitor-
ing to the primary enforcement authority for
the system.

(E) Notification.—Notification of the avail-
ability of the results of monitoring programs
required under paragraph (D) shall be given
to the persons served by the system.

(F) Waiver of Monitoring Requirement.—
The Administrator shall waive the require-
ment for monitoring for a contaminant under
this paragraph in a State, if the State dem-
onstrates that the criteria for listing the con-
taminant do not apply in that State.

(G) Analytical Methods.—The State may
use screening methods approved by the Ad-
ministrator under subsection (i) of this section
in lieu of monitoring for particular contami-
nants under this paragraph.

(H) Authorization of Appropriations.—
There are authorized to be appropriated to
carry out this paragraph $10,000,000 for each of
the fiscal years 1997 through 2003.

(b) Entry of establishments, facilities, or other
property; inspections; conduct of certain
tests; audit and examination of records;
entry restrictions; prohibition against in-
forming of a proposed entry

(1) Except as provided in paragraph (2), the Ad-
ministrator, or representatives of the Admin-
istrator duly designated by him, upon presenting
appropriate credentials and a written notice to
any supplier of water or other person subject to
(A) a national primary drinking water regula-
tion prescribed under section 300g–1 of this title,
(B) an applicable underground injection control
program, or (C) any requirement to monitor an
unregulated contaminant pursuant to sub-
section (a) of this section, or person in charge of
any of the property of such supplier or other
person referred to in clause (A), (B), or (C), is au-
thorized to enter any establishment, facility, or
other property of such supplier or other person
in order to determine whether such supplier or
other person has acted or is acting in compli-
ance with this subchapter, including for this
purpose, inspection, at reasonable times, of
records, files, papers, processes, controls, and fa-
cilities, or in order to test any feature of a pub-
lic water system, including its raw water source.
The Administrator or the Comptroller General
(or any representative designated by either)
shall have access for the purpose of audit and
examination to any records, reports, or informa-
tion of a grantee which are required to be main-
tained under subsection (a) of this section or
which are pertinent to any financial assistance
under this subchapter.

(2) No entry may be made under the first
sentence of paragraph (1) in an establishment, faci-
ility, or other property of a supplier of water or
other person subject to a national primary
drinking water regulation if the establishment,
facility, or other property is located in a State
which has primary enforcement responsibility
for public water systems unless, before written
notice of such entry is made, the Administrator
(or his representative) notifies the State agency
charged with responsibility for safe drinking
water of the reasons for such entry. The Admin-
istrator shall, upon a showing by the State
agency that such an entry will be detrimental to
the administration of the State’s program of
primary enforcement responsibility, take such
showing into consideration in determining
whether to make such entry. No State agency
which receives notice under this paragraph of
an entry proposed to be made under paragraph (1)
may use the information contained in the notice
to inform the person whose property is proposed
to be entered of the proposed entry; and if a State
agency so uses such information, notice to
the agency under this paragraph is not required
until such time as the Administrator determines
the agency has provided him satisfactory assur-
ances that it will no longer so use information
contained in a notice under this paragraph.

(c) Penalty

Whoever fails or refuses to comply with any
requirement of subsection (a) of this section or
to allow the Administrator, the Comptroller
General, or representatives of either, to enter
and conduct any audit or inspection authorized
by subsection (b) of this section shall be subject
to a civil penalty of not to exceed $25,000.

(d) Confidential Information; Trade Secrets
and Secret Processes; Information Disclosure; "In-
formation Required under this Section" De-
fined

(1) Subject to paragraph (2), upon a showing
satisfactory to the Administrator by any person
that any information required under this section
from such person, if made public, would divulge
trade secrets or secret processes of such person,
the Administrator shall consider such information
confidential in accordance with the pur-
poses of section 1905 of title 18. If the applicant
fails to make a showing satisfactory to the Ad-
mnistrator under subsection (i) of this section
that any information required under this section
satisfactory to the Administrator by any person
from such person, if made public, would divulge
that any information required under this section

(2) Any information required under this sec-
tion (A) may be disclosed to other officers, em-
ployees, or authorized representatives of the
United States concerned with carrying out this
subchapter or to committees of the Congress, or
when relevant in any proceeding under this sub-
chapter, and (B) shall be disclosed to the extent
it deals with the level of contaminants in drink-
ing water. For purposes of this subsection the
term "information required under this section"
means any papers, books, documents, or informa-
tion, or any particular part thereof, reported to
or otherwise obtained by the Administrator
under this section.

(e) "Grantee" and "Person" Defined

For purposes of this section, (1) the term
"grantee" means any person who applies for or
receives financial assistance, by grant, contract,
or loan guarantee under this subchapter, and (2)
the term "person" includes a Federal agency.
(f) Information regarding drinking water coolers

The Administrator may utilize the authorities of this section for purposes of part F of this subchapter. Any person who manufactures, imports, sells, or distributes drinking water coolers in interstate commerce shall be treated as a supplier of water for purposes of applying the provisions of this section in the case of persons subject to part F of this subchapter.

(g) Occurrence data base

(1) In general

Not later than 3 years after August 6, 1996, the Administrator shall assemble and maintain a national drinking water contaminant occurrence data base, using information on the occurrence of both regulated and unregulated contaminants in public water systems obtained under subsection (a)(1)(A) of this section or subsection (a)(2) of this section and reliable information from other public and private sources.

(2) Public input

In establishing the occurrence data base, the Administrator shall solicit recommendations from the Science Advisory Board, the States, and other interested parties concerning the development and maintenance of a national drinking water contaminant occurrence data base, including such issues as the structure and design of the data base, data input parameters and requirements, and the use and interpretation of data.

(3) Use

The data shall be used by the Administrator in making determinations under section 300g–1(b)(1) of this title with respect to the occurrence of a contaminant in drinking water at a level of public health concern.

(4) Public recommendations

The Administrator shall periodically solicit recommendations from the appropriate officials of the National Academy of Sciences and the States, and any person may submit recommendations to the Administrator, with respect to contaminants that should be included in the national drinking water contaminant occurrence data base, including recommendations with respect to additional unregulated contaminants that should be listed under subsection (a)(2) of this section. Any recommendation submitted under this clause shall be accompanied by reasonable documentation that—

(A) the contaminant occurs or is likely to occur in drinking water; and

(B) the contaminant poses a risk to public health.

(5) Public availability

The information from the data base shall be available to the public in readily accessible form.

(6) Regulated contaminants

With respect to each contaminant for which a national primary drinking water regulation has been established, the data base shall include information on the detection of the contaminant at a quantifiable level in public water systems (including detection of the contaminant at levels not constituting a violation of the maximum contaminant level for the contaminant).

(7) Unregulated contaminants

With respect to contaminants for which a national primary drinking water regulation has not been established, the data base shall include—

(A) monitoring information collected by public water systems that serve a population of more than 10,000, as required by the Administrator under subsection (a) of this section;

(B) monitoring information collected from a representative sampling of public water systems that serve a population of 10,000 or fewer; and

(C) other reliable and appropriate monitoring information on the occurrence of the contaminants in public water systems that is available to the Administrator.

(h) Availability of information on small system technologies

For purposes of sections 300g–1(b)(4)(E) and 300g–4(e) of this title (relating to small system variance program), the Administrator may request information on the characteristics of commercially available treatment systems and technologies, including the effectiveness and performance of the systems and technologies under various operating conditions. The Administrator may specify the form, content, and submission date of information to be submitted by manufacturers, States, and other interested persons for the purpose of considering the systems and technologies in the development of regulations or guidance under sections 300g–1(b)(4)(E) and 300g–4(e) of this title.

(i) Screening methods

The Administrator shall review new analytical methods to screen for regulated contaminants and may approve such methods as are more accurate or cost-effective than established reference methods for use in compliance monitoring.

Amendments

1996—Subsec. (a)(1). Pub. L. 104–182, § 125(a), amended par. (1) generally. Prior to amendment, par. (1) read as follows: “Every person who is a supplier of water, who is or may be otherwise subject to a primary drinking water regulation prescribed under section 300g–1 of this title or to an applicable underground injection control program (as defined in section 300h–1(c) of this title), who is or may be subject to the permit requirement of section 300h–3 of this title, or to an order issued under section 300j of this title, or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regu-
lation to assist him in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with this subchapter, in administering any program of financial assistance under this subchapter, in evaluating the health risks of unregulated contaminants, or in advising the public of such risks. In requiring a public water system to monitor under this subsection, the Administrator may take into consideration the system size and the contaminants likely to be found in the system's drinking water.\(^1\)

Subsec. (a)(2) to (8). Pub. L. 104–182, §125(c), added heading and text of par. (2) and struck out former pars. (2) to (8) which directed Administrator, not later than 18 months after June 19, 1986, to promulgate regulations requiring every public water system to conduct a monitoring program for unregulated contaminants, specified contents of regulations, provided for reporting and notification of availability of results of monitoring, waiver of monitoring requirements, and compliance by small systems, and authorized appropriations for fiscal year ending Sept. 30, 1987.

Subsec. (b). Pub. L. 104–182, §111(b), added subsec. (g).

Subsec. (i). Pub. L. 104–182, §125(d), added subsec. (i).

1986—Subsec. (a)(1). Pub. L. 99–339, §106(a)(b), designated existing provisions as par. (1) and inserted provisions permitting Administrator to consider size of system and contaminants likely to be found.

Subsec. (a)(2) to (7). Pub. L. 99–339, §106(b), added pars. (2) to (7).

Subsec. (c). Pub. L. 99–339, §106(c), substituted “shall be subject to a civil penalty of not to exceed $25,000” for “may be fined not more than $5,000”.

Subsec. (b)(1). Pub. L. 95–190, §12(d), designated existing provisions as cl. (A) and (B) and added cl. (C) and reference to such cl. (A) to (C).

§ 300j–5. National Drinking Water Advisory Council

(a) Establishment; membership; representation of interests; term of office, vacancies; reappointment

There is established a National Drinking Water Advisory Council which shall consist of fifteen members appointed by the Administrator after consultation with the Secretary. Five members shall be appointed from the general public; five members shall be appointed from State and local agencies concerned with water hygiene and public water supply; and five members shall be appointed from representatives of private organizations or groups demonstrating an active interest in the field of water hygiene and public water supply, of which two such members shall be associated with small, rural public water systems. Each member of the Council shall hold office for a term of three years, except that—

(1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

(2) the terms of the members first taking office shall expire as follows: Five shall expire three years after December 16, 1974, five shall expire two years after such date, and five shall expire one year after such date, as designated by the Administrator at the time of appointment.

The members of the Council shall be eligible for reappointment.

(b) Functions

The Council shall advise, consult with, and make recommendations to, the Administrator on matters relating to activities, functions, and policies of the Agency under this subchapter.

(c) Compensation and allowances; travel expenses

Members of the Council appointed under this section shall, while attending meetings or conferences of the Council or otherwise engaged in business of the Council, receive compensation and allowances at a rate to be fixed by the Administrator, but not exceeding the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including travel time) during which such person is engaged in the actual performance of duties in the Government service.

(3) Advisory committee termination provision inapplicable

Section 14(a) of the Federal Advisory Committee Act (relating to termination) shall not apply to the Council.

References in Text

Section 5703 of title 5, referred to in subsec. (c), was amended generally by Pub. L. 94–22, §4, May 19, 1975, 89 Stat. 85, and, as so amended, does not contain a subsec. (b).

Section 14(a) of the Federal Advisory Committee Act, referred to in subsec. (d), is section 14(a) of Pub. L. 92–463, which is set out in the Appendix to Title 5, Government Organization and Employees.

Amendments

1996—Subsec. (a). Pub. L. 104–182 inserted “, of which two such members shall be associated with small, rural public water systems” before period at end of second sentence.

Termination of Advisory Committees

Pub. L. 93–641, §6, Jan. 4, 1974, 88 Stat. 2275, set out as a note under section 217a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1974.

References in Other Laws to GS–16, 17, or 18 Pay Rates

References in laws to the rates of pay for GS–16, 17, or 18 are to maximum rates of pay under the General Schedule, to be considered references to rates payable under specified sections of Title 5, Government Organization and Employees, see section 529 (title I, §101(c)(1)) of Pub. L. 101–509, set out in a note under section 5376 of Title 5.

\(^1\) See References in Text note below.
§ 300j-6. Federal agencies

(a) In general

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government—

(1) owning or operating any facility in a wellhead protection area;
(2) engaged in any activity at such facility resulting, or which may result, in the contamination of water supplies in any such area;
(3) owning or operating any public water system; or
(4) engaged in any activity resulting, or which may result in, underground injection which endangers drinking water (within the meaning of section 300h(d)(2) of this title),

shall be subject to, and comply with, all Federal, State, interstate, and local requirements, both substantive and procedural (including any requirement for permits or reporting or any provisions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting the protection of such wellhead areas, respecting such public water systems, and respecting any underground injection in the same manner and to the same extent as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements referred to in this subsection include, but are not limited to, all administrative orders and all civil and administrative penalties and fines, regardless of whether such penalties or fines are punitive or coercive in nature or are imposed for isolated, intermittent, or continuing violations. The United States hereby expressly waives any immunity otherwise applicable to the United States with respect to any such substantive or procedural requirement (including, but not limited to, any injunctive relief, administrative order or civil or administrative penalty or fine referred to in the preceding sentence, or reasonable service charge). The reasonable service charges referred to in this subsection include, but are not limited to, all fees or charges assessed in connection with the processing and issuance of permits, renewal of permits, amendments to permits, review of plans, studies, and other documents, and inspection and monitoring of facilities, as well as any other nondiscriminatory charges that are assessed in connection with a Federal, State, interstate, or local regulatory program respecting the protection of wellhead areas or public water systems or respecting any underground injection. Neither the United States, nor any agent, employee, or officer thereof, shall be immune or exempt from any process or sanction of any State or Federal Court of respect to the enforcement of any such injunctive relief. No agent, employee, or officer of the United States shall be personally liable for any civil penalty under any Federal, State, interstate, or local law concerning the protection of wellhead areas or public water systems or concerning underground injection with respect to any act or omission within the scope of the official duties of the agent, employee, or officer. An agent, employee, or officer of the United States shall be subject to any criminal sanction (including, but not limited to, any fine or imprisonment) under any Federal or State requirement adopted pursuant to this subchapter, but no department, agency, or instrumentality in the executive branch from compliance with such a requirement if he determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of 1 year, but additional exemptions may be granted for periods not to exceed 1 year upon the President’s making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting each such exemption.

(b) Administrative penalty orders

(1) In general

If the Administrator finds that a Federal agency has violated an applicable requirement under this subchapter, the Administrator may issue a penalty order assessing a penalty against the Federal agency.

(2) Penalties

The Administrator may, after notice to the agency, assess a civil penalty against the agency in an amount not to exceed $25,000 per day per violation.

(3) Procedure

Before an administrative penalty order issued under this subsection becomes final, the Administrator shall provide the agency an opportunity for a hearing on the record in accordance with chapters 5 and 7 of title 5.

(4) Public review

(A) In general

Any interested person may obtain review of an administrative penalty order issued under this subsection. The review may be obtained in the United States District Court for the District of Columbia or in the United States District Court for the district in which the violation is alleged to have occurred by the filing of a complaint with the court within the 30-day period beginning on the date the penalty order becomes final. The person filing the complaint shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General.

(B) Record

The Administrator shall promptly file in the court a certified copy of the record on which the order was issued.
(C) Standard of review

The court shall not set aside or remand the order unless the court finds that there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(D) Prohibition on additional penalties

The court may not impose an additional civil penalty for a violation that is subject to the order unless the court finds that the assessment constitutes an abuse of discretion by the Administrator.

(c) Limitation on State use of funds collected from Federal Government

Unless a State law in effect on August 6, 1996, or a State constitution requires the funds to be used in a different manner, all funds collected by a State from the Federal Government from penalties and fines imposed for violation of any substantive or procedural requirement referred to in subsection (a) of this section shall be used by the State only for projects designed to improve or protect the environment or to defray the costs of environmental protection or enforcement.

(d) Indian rights and sovereignty as unaffected; “Federal agency” defined

(1) Nothing in the Safe Drinking Water Amendments of 1977 shall be construed to alter or affect the status of American Indian lands or water rights nor to waive any sovereignty over Indian lands guaranteed by treaty or statute.

(2) For the purposes of this chapter, the term “Federal agency” shall not be construed to refer to or include any American Indian tribe, nor to the Secretary of the Interior in his capacity as trustee of Indian lands.

(e) Washington Aqueduct

The Secretary of the Army shall not pass the cost of any penalty assessed under this subchapter on to any customer, user, or other purchaser of drinking water from the Washington Aqueduct system, including finished water from the Dalecarlia or McMillan treatment plant.

AMENDMENTS

1996—Subsecs. (a) to (d). Pub. L. 104–182, §129(a), added subsecs. (a) to (c), redesignated former subsec. (c) as (d), and struck out former subsecs. (a) and (b) which related to compliance by Federal agencies with Federal, State, and local requirements respecting provision of safe drinking water and respecting underground injection programs, liability for civil penalties, and waiver of compliance requirements when necessary in interest of national security.

Subsec. (e). Pub. L. 104–182, §129(c), added subsec. (e).

1977—Subsec. (a). Pub. L. 95–190, §§8(a), substituted provisions relating to compliance by Federal agencies having jurisdiction over federally owned or maintained public water systems, or engaged in underground injection activities with Federal, State, and local requirements, etc., for provisions relating to compliance by Federal agencies having jurisdiction over federally owned or maintained public water systems with national primary drinking water regulations.

Subsec. (c). Pub. L. 95–190, §8(d), added subsec. (c).

§300j–7. Judicial review

(a) Courts of appeals; petition for review: actions respecting regulations; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

A petition for review of—

(1) actions pertaining to the establishment of national primary drinking water regulations (including maximum contaminant level goals) may be filed only in the United States Court of Appeals for the District of Columbia circuit; and

(2) any other final action of the Administrator under this chapter may be filed in the circuit in which the petitioner resides or transacts business which is directly affected by the action.

Any such petition shall be filed within the 45-day period beginning on the date of the promulgation of the regulation or any other final Agency action with respect to which review is sought on the date of the determination with respect to which review is sought, and may be filed after the expiration of such 45-day period if the petition is based solely on grounds arising after the expiration of such period. Action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement. In any petition concerning the assessment of a civil penalty pursuant to section 300g–3(g)(3)(B) of this title, the petitioner shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General. The court shall set aside and remand the penalty order if the court finds that there is not substantial evidence in the record to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(b) District courts; petition for review: actions respecting variances or exemptions; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

The United States district courts shall have jurisdiction of actions brought to review (1) the granting of, or the refusing to grant, a variance or exemption under section 300g–4 or 300g–5 of this title or (2) the requirements of any schedule prescribed for a variance or exemption under such section or the failure to prescribe such a schedule. Such an action may only be brought upon a petition for review filed with the court within the 45-day period beginning on the date the action sought to be reviewed is taken or, in the case of a petition to review the refusal to
grant a variance or exemption or the failure to prescribe a schedule, within the 45-day period beginning on the date action is required to be taken on the variance, exemption, or schedule, as the case may be. A petition for such review may be filed after the expiration of such period if the petition is based solely on grounds arising after the expiration of such period. Action with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement.

(c) Judicial order for additional evidence before Administrator; modified or new findings; recommendation for modification or setting aside of original determination

In any judicial proceeding in which review is sought of a determination under this subchapter required to be made on the record after notice and opportunity for hearing, if any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Administrator, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Administrator, in such manner and upon such term and conditions as the court may deem proper. The Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original determination, with the return of such additional evidence.

(2) the court finds that there is not substantial evidence in the record to support the finding of a violation or that the court shall set aside and remand the penalty order if the court finds that there is not substantial evidence in

1

No civil action may be commenced—

(1) under subsection (a)(1) of this section respecting violation of a requirement prescribed by or under this subchapter—

(A) prior to sixty days after the plaintiff has given notice of such violation (i) to the Administrator, (ii) to any alleged violator of such requirement and (iii) to the State in which the violation occurs, or

(B) if the Administrator, the Attorney General, or the State has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such requirement, but in any such action in a court of the United States any person may intervene as a matter of right; or

(2) under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice of such action to the Administrator; or

§ 300j–8. Citizen's civil action

(a) Persons subject to civil action; jurisdiction of enforcement proceedings

Except as provided in subsection (b) of this section, any person may commence a civil action on his own behalf—

(1) against any person (including (A) the United States, and (B) any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any requirement prescribed by or under this subchapter;

(2) against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this subchapter which is not discretionary with the Administrator; or

(3) for the collection of a penalty by the United States Government (and associated costs and interest) against any Federal agency that fails, by the date that is 18 months after the effective date of a final order to pay a penalty assessed by the Administrator under section 300h–8(b) of this title, to pay the penalty.

No action may be brought under paragraph (1) against a public water system for a violation of a requirement prescribed by or under this subchapter which occurred within the 27-month period beginning on the first day of the month in which this subchapter is enacted. The United States district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce in an action brought under this subsection any requirement prescribed by or under this subchapter or to order the Administrator to perform an act or duty described in paragraph (2), as the case may be.

(b) Conditions for commencement of civil action; notice

No civil action may be commenced—

(1) under subsection (a)(1) of this section respecting violation of a requirement prescribed by or under this subchapter—

(A) prior to sixty days after the plaintiff has given notice of such violation (i) to the Administrator, (ii) to any alleged violator of such requirement and (iii) to the State in which the violation occurs, or

(B) if the Administrator, the Attorney General, or the State has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such requirement, but in any such action in a court of the United States any person may intervene as a matter of right; or

So in original. Probably should be section ‘‘300j–6(b)’’.
section 300j–7 of this title for a variance or exemption, unless such person shows to the satisfaction of the court that the State has in a substantial number of cases failed to prescribe such schedules.

(c) Intervention of right

In any action under this section, the Administrator or the Attorney General, if not a party, may intervene as a matter of right.

(d) Costs; attorney fees; expert witness fees; filing of bond

The court, in issuing any final order in any action brought under subsection (a) of this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

(e) Availability of other relief

Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any requirement prescribed by or under this subchapter or to seek any other relief. Nothing in this section or in any other law of the United States shall be construed to prohibit, exclude, or restrict any State or local government from—

(1) bringing any action or obtaining any remedy or sanction in any State or local court, or

(2) bringing any administrative action or obtaining any administrative remedy or sanction, against any agency of the United States under State or local law to enforce any requirement respecting the provision of safe drinking water or respecting any underground injection control program. Nothing in this section shall be construed to authorize judicial review of regulations or orders of the Administrator under this subchapter, except as provided in section 300j–7 of this title. For provisions providing for application of certain requirements to such agencies in the same manner as to nongovernmental entities, see section 300j–6 of this title.

REFERENCES IN TEXT

The Federal Rules of Civil Procedure, referred to in subsec. (d), are set out in the Appendix to Title 28, Judiciary and Judicial Procedure.
the Administrator is a party. Unless, within a reasonable time, the Attorney General notifies the Administrator that he will appear in such action, attorneys appointed by the Administrator shall appear and represent him.

(g) Authority of Administrator under other provisions unaffected

The provisions of this subchapter shall not be construed as affecting any authority of the Administrator under part G of subchapter II of this chapter.

(h) Reports to Congressional committees; review by Office of Management and Budget: submittal of comments to Congressional committees

Not later than April 1 of each year, the Administrator shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report respecting the activities of the Agency under this subchapter and containing such recommendations for legislation as he considers necessary. The report of the Administrator under this subsection which is due not later than April 1, 1975, and each subsequent report of the Administrator under this subsection shall include a statement on the actual and anticipated cost to public water systems in each State of compliance with the requirements of this subchapter. The Office of Management and Budget may review any report required by this subsection before its submission to such committees of Congress, but the Office may not revise any such report, require any revision in any such report, or delay its submission beyond the day prescribed for its submission, and may submit to such committees of Congress its comments respecting any such report.

(i) Discrimination prohibition; filing of complaint; investigation; orders of Secretary; notice and hearing; settlements; attorneys’ fees; judicial review; filing of petition; procedural requirements; stay of orders; exclusiveness of remedy; civil actions for enforcement of orders; appropriate relief; mandamus proceedings; prohibition inapplicable to undirected but deliberate violations

(1) No employer may discharge any employee or otherwise discriminate against any employee with respect to his compensation, terms, conditions, or privileges of employment because the employee (or any person acting pursuant to a request of the employee) has—

(A) commenced, caused to be commenced, or is about to commence or cause to be commenced a proceeding under this subchapter or a proceeding for the administration or enforcement of drinking water regulations or underground injection control programs of a State, 

(B) testified or is about to testify in any such proceeding, or 

(C) assisted or participated or is about to assist or participate in any manner in such a proceeding or in any other action to carry out the purposes of this subchapter.

(2)(A) Any employee who believes that he has been discharged or otherwise discriminated against by any person in violation of paragraph (1) may, within 30 days after such violation occurs, file (or have any person file on his behalf) a complaint with the Secretary of Labor (hereinafter in this subsection referred to as the “Secretary”) alleging such discharge or discrimination. Upon receipt of such a complaint, the Secretary shall notify the person named in the complaint of the filing of the complaint.

(B)(i) Upon receipt of a complaint filed under subparagraph (A), the Secretary shall conduct an investigation of the violation alleged in the complaint. Within 30 days of the receipt of such complaint, the Secretary shall complete such investigation and shall notify in writing the complainant (and any person acting in his behalf) and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this subparagraph. Within 90 days of the receipt of such complaint the Secretary shall, unless the proceeding on the complaint is terminated by the Secretary on the basis of a settlement entered into by the Secretary and the person alleged to have committed such violation, issue an order either providing the relief prescribed by clause (ii) or denying the complaint. An order of the Secretary shall be made on the record after notice and opportunity for agency hearing. The Secretary may not enter into a settlement terminating a proceeding on a complaint without the participation and consent of the complainant.

(ii) If in response to a complaint filed under subparagraph (A) the Secretary determines that a violation of paragraph (1) has occurred, the Secretary shall order (I) the person who committed such violation to take affirmative action to abate the violation, (II) such person to reinstate the complainant to his former position together with the compensation (including back pay), terms, conditions, and privileges of his employment, (III) compensatory damages, and (IV) where appropriate, exemplary damages. If such an order is issued, the Secretary, at the request of the complainant, shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorneys’ fees) reasonably incurred, as determined by the Secretary, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(3)(A) Any person adversely affected or aggrieved by an order issued under paragraph (2) may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within sixty days from the issuance of the Secretary’s order. Review shall conform to chapter 7 of title 5. The commencement of proceedings under this subparagraph shall not, unless ordered by the court, operate as a stay of the Secretary’s order.

(B) An order of the Secretary with respect to which review could have been obtained under subparagraph (A) shall not be subject to judicial review in any criminal or other civil proceeding.

(4) Whenever a person has failed to comply with an order issued under paragraph (2)(B), the Secretary shall file a civil action in the United States District Court of the District of Columbia...
States District Court for the district in which the violation was found to occur to enforce such order. In actions brought under this paragraph, the district courts shall have jurisdiction to grant all appropriate relief including, but not limited to, injunctive relief, compensatory, and exemplary damages.

(5) Any nondiscretionary duty imposed by this section is enforceable in mandamus proceeding brought under section 1361 of title 28.

(6) Paragraph (1) shall not apply with respect to any employee who, acting without direction from his employer (or the employer’s agent), deliberately causes a violation of any requirement of this subchapter.

(7) Subsection (g) of section 1452 of title 42 applies to any construction project carried out in whole or in part with assistance made available by a drinking water treatment revolving loan fund authorized by section 1452 of that Act (42 U.S.C. 300j–12).

§ 300j–10. Appointment of scientific, etc., personnel by Administrator of Environmental Protection Agency for implementation of responsibilities; compensation

To the extent that the Administrator of the Environmental Protection Agency deems such action necessary to the discharge of his functions under title XIV of the Public Health Service Act [42 U.S.C. 300 et seq.] (relating to safe drinking water) and under other provisions of law, he may appoint personnel to fill not more than thirty scientific, engineering, professional, legal, and administrative positions within the Environmental Protection Agency without regard to the civil service laws and may fix the compensation of such personnel in excess of the maximum rate payable for GS–18 of the General Schedule under section 5322 of title 5.

§ 300j–11. Indian Tribes

(a) In general

Subject to the provisions of subsection (b) of this section, the Administrator—

(1) is authorized to treat Indian Tribes as States under this subchapter,

(2) may delegate to such Tribes primary enforcement responsibility for public water systems and for underground injection control, and

(3) may provide such Tribes grant and contract assistance to carry out functions provided for in this subchapter.

(b) EPA regulations

(1) Specific provisions

The Administrator shall, within 18 months after June 19, 1996, promulgate final regulations specifying those provisions of this subchapter for which it is appropriate to treat Indian Tribes as States. Such treatment shall be authorized only if:
(A) the Indian Tribe is recognized by the Secretary of the Interior and has a governing body carrying out substantial governmental duties and powers;

(B) the functions to be exercised by the Indian Tribe are within the area of the Tribal Government’s jurisdiction; and

(C) the Indian Tribe is reasonably expected to be capable, in the Administrator’s judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this subchapter and of all applicable regulations.

(2) Provisions where treatment as State inappropriate

For any provision of this subchapter where treatment of Indian Tribes as identical to States is inappropriate, administratively infeasible or otherwise inconsistent with the purposes of this subchapter, the Administrator may include in the regulations promulgated under this section, other means for administering such provision in a manner that will achieve the purpose of the provision. Nothing in this section shall be construed to allow Indian Tribes to assume or maintain responsibility for public water systems or for underground injection control in a manner less protective of the health of persons than such responsibility may be assumed or maintained by a State. An Indian tribe¹ shall not be required to exercise criminal enforcement jurisdiction for purposes of complying with the preceding sentence.

AMENDMENTS

1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§ 300j–12. State revolving loan funds

(a) General authority

(1) Grants to States to establish State loan funds

(A) In general

The Administrator shall offer to enter into agreements with eligible States to make capitalization grants, including letters of credit, to the States under this subsection to further the health protection objectives of this subchapter, promote the efficient use of fund resources, and for other purposes as are specified in this subchapter.

(B) Establishment of fund

To be eligible to receive a capitalization grant under this section, a State shall establish a drinking water treatment revolving loan fund (referred to in this section as a “State loan fund”) and comply with the other requirements of this section. Each grant to a State under this section shall be deposited in the State loan fund established by the State, except as otherwise provided in this section and in other provisions of this subchapter. No funds authorized by other provisions of this subchapter to be used for other purposes specified in this subchapter shall be deposited in any State loan fund.

(C) Extended period

The grant to a State shall be available to the State for obligation during the fiscal year for which the funds are authorized and during the following fiscal year, except that grants made available from funds provided prior to fiscal year 1997 shall be available for obligation during each of the fiscal years 1997 and 1998.

(D) Allotment formula

Except as otherwise provided in this section, funds made available to carry out this section shall be allotted to States that have entered into an agreement pursuant to this section (other than the District of Columbia) in accordance with—

(i) for each of fiscal years 1995 through 1997, a formula that is the same as the formula used to distribute public water system supervision grant funds under section 300j–2 of this title in fiscal year 1995 except that the minimum proportionate share established in the formula shall be 1 percent of available funds and the formula shall be adjusted to include a minimum proportionate share for the State of Wyoming and the District of Columbia; and

(ii) for fiscal year 1998 and each subsequent fiscal year, a formula that allocates to each State the proportional share of the State needs identified in the most recent survey conducted pursuant to subsection (b) of this section, except that the minimum proportionate share provided to each State shall be the same as the minimum proportionate share provided under clause (i).

(E) Reallotment

The grants not obligated by the last day of the period for which the grants are available shall be reallotted according to the appropriate criteria set forth in subparagraph (D), except that the Administrator may reserve and allocate 10 percent of the remaining amount for financial assistance to Indian Tribes in addition to the amount allotted under subsection (i) of this section and none of the funds reallocated by the Administrator shall be reallocated to any State that has not obligated all sums allotted to the State pursuant to this section during the period in which the sums were available for obligation.

(F) Nonprimacy States

The State allotment for a State not exercising primary enforcement responsibility for public water systems shall not be deposited in any such fund but shall be allotted by the Administrator under this subparagraph. Pursuant to section 300j–2(a)(9)(A) of this title such sums allotted under this subparagraph shall be reserved as needed by the Administrator to exercise primary enforcement responsibility for purposes of this subchapter. No funds authorized by other provisions of this subchapter to be used for other purposes specified in this subchapter shall be deposited in any State loan fund.
responsibility under this subchapter in such State and the remainder shall be reallocated to States exercising primary enforcement responsibility for public water systems for deposit in such funds. Whenever the Administrator makes a final determination pursuant to section 300g–2(b) of this title that the requirements of section 300g–2(a) of this title are no longer being met by a State, additional grants for such State under this subchapter shall be immediately terminated by the Administrator. This subparagraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(G) Other programs
(i) New system capacity

Beginning in fiscal year 1999, the Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section to a State unless the State has met the requirements of section 300g–9(a) of this title (relating to capacity development) and shall withhold 10 percent for fiscal year 2001, 15 percent for fiscal year 2002, and 20 percent for fiscal year 2003 if the State has not complied with the provisions of section 300g–9(c) of this title (relating to capacity development strategies). Not more than a total of 20 percent of the capitalization grants made to a State in any fiscal year may be withheld under the preceding provisions of this clause. All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as is applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–9 of this title (relating to capacity development).

(ii) Operator certification

The Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section unless the State has met the requirements of section 300g–8 of this title (relating to operator certification). All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–8 of this title (relating to operator certification).

(2) Use of funds

Except as otherwise authorized by this subchapter, amounts deposited in a State loan fund, including loan repayments and interest earned on such amounts, shall be used only for providing loans or loan guarantees, or as a source of reserve and security for leveraged loans, the proceeds of which are deposited in a State loan fund established under paragraph (1), or other financial assistance authorized under this section to community water systems and nonprofit noncommunity water systems, other than systems owned by Federal agencies. Financial assistance under this section may be used by a public water system only for expenditures (not including monitoring, operation, and maintenance expenditures) of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations applicable to the system under section 300g–1 of this title or otherwise significantly further the health protection objectives of this subchapter. The funds may also be used to provide loans to a system referred to in section 300g–4(b) of this title for the purpose of providing the treatment described in section 300g–4(b)(1)(III) of this title.

The funds shall not be used for the acquisition of real property or interests therein, unless the acquisition is integral to a project authorized by this paragraph and the purchase is from a willing seller. Of the amount credited to any State loan fund established under this section in any fiscal year, 15 percent shall be available solely for providing loan assistance to public water systems which regularly serve fewer than 10,000 persons to the extent such funds can be obligated for eligible projects of public water systems.

(3) Limitation
(A) In general

Except as provided in subparagraph (B), no assistance under this section shall be provided to a public water system that—

(i) does not have the technical, managerial, and financial capability to ensure compliance with the requirements of this subchapter; or

(ii) is in significant noncompliance with any requirement of a national primary drinking water regulation or variance.

(B) Restructuring

A public water system described in subparagraph (A) may receive assistance under this section if—

(i) the use of the assistance will ensure compliance; and

(ii) if subparagraph (A)(i) applies to the system, the owner or operator of the system agrees to undertake feasible and appropriate changes in operations (including ownership, management, accounting, rates, maintenance, consolidation, alternative water supply, or other procedures) if the State determines that the measures are necessary to ensure that the system has the technical, managerial, and financial capability to comply with the requirements of this subchapter over the long term.

(C) Review

Prior to providing assistance under this section to a public water system that is in significant noncompliance with any requirement of a national primary drinking water regulation or variance, the State shall con-
duct a review to determine whether subpara-
graph (A)(i) applies to the system.

(b) Intended use plans

(1) In general

After providing for public review and com-
ment, each State that has entered into a cap-
italization agreement pursuant to this section
shall annually prepare a plan that identifies
the intended uses of the amounts available to
the State loan fund of the State.

(2) Contents

An intended use plan shall include—

(A) a list of the projects to be assisted in
the first fiscal year that begins after the
date of the plan, including a description of
the project, the expected terms of financial
assistance, and the size of the community
served;

(B) the criteria and methods established
for the distribution of funds; and

(C) a description of the financial status of
the State loan fund and the short-term and
long-term goals of the State loan fund.

(3) Use of funds

(A) In general

An intended use plan shall provide, to the
maximum extent practicable, that priority
for the use of funds be given to projects that—

(i) address the most serious risk to
human health;

(ii) are necessary to ensure compliance
with the requirements of this subchapter
(including requirements for filtration); and

(iii) assist systems most in need on a per
household basis according to State afford-
ability criteria.

(B) List of projects

Each State shall, after notice and oppor-
tunity for public comment, publish and peri-
odically update a list of projects in the State
that are eligible for assistance under this
section, including the priority assigned to
each project and, to the extent known, the
expected funding schedule for each project.

(c) Fund management

Each State loan fund under this section shall
be established, maintained, and credited with
repayments and interest. The fund corpus shall
be established, maintained, and credited with re-
obligation or expenditure, such amounts shall be
invested in interest bearing obligations.

(d) Assistance for disadvantaged communities

(1) Loan subsidy

Notwithstanding any other provision of this
section, in any case in which the State makes
a loan pursuant to subsection (a)(2) of this sec-
tion to a disadvantaged community or to a
community that the State expects to become
a disadvantaged community as the result of a
proposed project, the State may provide addi-
tional subsidization (including forgiveness of
principal).

(2) Total amount of subsidies

For each fiscal year, the total amount of
loan subsidies made by a State pursuant to
paragraph (1) may not exceed 30 percent of the
amount of the capitalization grant received by
the State for the year.

(3) “Disadvantaged community” defined

In this subsection, the term “disadvantaged
community” means the service area of a pub-
lic water system that meets affordability cri-
teria established after public review and com-
ment by the State in which the public water
system is located. The Administrator may
publish information to assist States in estab-
lishing affordability criteria.

(e) State contribution

Each agreement under subsection (a) of this
section shall require that the State deposit in
the State loan fund from State moneys an
amount equal to at least 20 percent of the total
amount of the grant to be made to the State on
or before the date on which the grant payment
is made to the State, except that a State shall
not be required to deposit such amount into the
fund prior to the date on which each grant pay-
ment is made for fiscal years 1994, 1995, 1996, and
1997 if the State deposits the State contribution
amount into the State loan fund prior to Sep-
tember 30, 1999.

(f) Types of assistance

Except as otherwise limited by State law, the
amounts deposited into a State loan fund under
this section may be used only—

(1) to make loans, on the condition that—

(A) the interest rate for each loan is less
than or equal to the market interest rate,
including an interest free loan;

(B) principal and interest payments on
each loan will commence not later than 1
year after completion of the project for
which the loan was made, and each loan will
be fully amortized not later than 20 years
after the completion of the project, except
that in the case of a disadvantaged com-
munity (as defined in subsection (d)(3) of
this section), a State may provide an extended
term for a loan, if the extended term—

(i) terminates not later than the date
that is 30 years after the date of project
completion; and

(ii) does not exceed the expected design
life of the project;

(C) the recipient of each loan will establish
a dedicated source of revenue (or, in the case
of a privately owned system, demonstrate
that there is adequate security) for the re-
payment of the loan; and

(D) the State loan fund will be credited
with all payments of principal and interest
on each loan;

(2) to buy or refinance the debt obligation of
a municipality or an intermunicipal or inter-
state agency within the State at an interest
rate that is less than or equal to the market
interest rate in any case in which a debt obli-
gation is incurred after July 1, 1993;

(3) to guarantee, or purchase insurance for, a
local obligation (all of the proceeds of which
finance a project eligible for assistance under
this section), if the guarantee or purchase
would improve credit market access or reduce
the interest rate applicable to the obligation;
(4) as a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the State if the proceeds of the sale of the bonds will be deposited into the State loan fund; and

(5) to earn interest on the amounts deposited into the State loan fund.

(g) Administration of State loan funds

(1) Combined financial administration

Notwithstanding subsection (c) of this section, a State may (as a convenience and to avoid unnecessary administrative costs) combine, in accordance with State law, the financial administration of a State loan fund established under this section with the financial administration of any other revolving fund established by the State if otherwise not prohibited by the law under which the State loan fund was established and if the Administrator determines that—

(A) the grants under this section, together with loan repayments and interest, will be separately accounted for and used solely for the purposes specified in subsection (a) of this section; and

(B) the authority to establish assistance priorities and carry out oversight and related activities (other than financial administration) with respect to assistance remains with the State agency having primary responsibility for administration of the State program under section 300g–2 of this title, after consultation with other appropriate State agencies (as determined by the State).

Provided. That in nonprimacy States eligible to receive assistance under this section, the Governor shall determine which State agency will have authority to establish priorities for financial assistance from the State loan fund.

(2) Cost of administering fund

Each State may annually use up to 4 percent of the funds allotted to the State under this section to cover the reasonable costs of administration of the programs under this section, including the recovery of reasonable costs expended to establish a State loan fund which are incurred after August 6, 1996, and to provide technical assistance to public water systems within the State. For fiscal year 1995 and each fiscal year thereafter, each State may use up to an additional 10 percent of the funds allotted to the State under this section—

(A) for public water system supervision programs under section 300j–2(a) of this title; (B) to administer or provide technical assistance through source water protection programs;

(C) to develop and implement a capacity development strategy under section 300g–9(c) of this title; and

(D) for an operator certification program for purposes of meeting the requirements of section 300g–8 of this title.

if the State matches the expenditures with at least an equal amount of State funds. At least half of the match must be additional to the amount expended by the State for public water supervision in fiscal year 1993. An additional 2 percent of the funds annually allotted to each State under this section may be used by the State to provide technical assistance to public water systems serving 10,000 or fewer persons in the State. Funds utilized under subparagraph (B) shall not be used for enforcement actions.

(3) Guidance and regulations

The Administrator shall publish guidance and promulgate regulations as may be necessary to carry out the provisions of this section, including—

(A) provisions to ensure that each State commits and expends funds allotted to the State under this section as efficiently as possible in accordance with this subchapter and applicable State laws;

(B) guidance to prevent waste, fraud, and abuse; and

(C) guidance to avoid the use of funds made available under this section to finance the expansion of any public water system in anticipation of future population growth.

The guidance and regulations shall also ensure that the States, and public water systems receiving assistance under this section, use accounting, audit, and fiscal procedures that conform to generally accepted accounting standards.

(4) State report

Each State administering a loan fund and assistance program under this subsection shall publish and submit to the Administrator a report every 2 years on its activities under this section, including the findings of the most recent audit of the fund and the entire State allotment. The Administrator shall periodically audit all State loan funds established by, and all other amounts allotted to, the States pursuant to this section in accordance with procedures established by the Comptroller General.

(h) Needs survey

The Administrator shall conduct an assessment of water system capital improvement needs of all eligible public water systems in the United States and submit a report to the Congress containing the results of the assessment within 180 days after August 6, 1996, and every 4 years thereafter.

(i) Indian Tribes

(1) In general

1½ percent of the amounts appropriated annually to carry out this section may be used by the Administrator to make grants to Indian Tribes and Alaska Native villages that have not otherwise received either grants from the Administrator under this section or assistance from State loan funds established under this section. The grants may only be used for expenditures by tribes and villages for public water system expenditures referred to in subsection (a)(2) of this section.

(2) Use of funds

Funds reserved pursuant to paragraph (1) shall be used to address the most significant threats to public health associated with public water systems that serve Indian Tribes, as de-
authorized by the Administrator in consultation with the Director of the Indian Health Service and Indian Tribes.

(3) Alaska Native villages

In the case of a grant for a project under this subsection in an Alaska Native village, the Administrator is also authorized to make grants to the State of Alaska for the benefit of Native villages. An amount not to exceed 4 percent of the grant amount may be used by the State of Alaska for project management.

(4) Needs assessment

The Administrator, in consultation with the Director of the Indian Health Service and Indian Tribes, shall, in accordance with a schedule that is consistent with the needs surveys conducted pursuant to subsection (h) of this section, prepare surveys and assess the needs of drinking water treatment facilities to serve Indian Tribes, including an evaluation of the public water systems that pose the most significant threats to public health.

(j) Other areas

Of the funds annually available under this section for grants to States, the Administrator shall make allotments in accordance with section 300j–2(a)(4) of this title for the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, American Samoa, and the Trust Territory. The grants allotted as provided in this subsection may be provided by the Administrator to the governments of such areas, to public water systems in such areas, or to both, to be used for the public water system expenditures referred to in subsection (a)(2) of this section. The grants, and grants for the District of Columbia, shall not be deposited in State loan funds. The total allotment of grants under this section for all areas described in this subsection in any fiscal year shall not exceed 0.33 percent of the aggregate amount made available to carry out this section in that fiscal year.

(k) Other authorized activities

(1) In general

Notwithstanding subsection (a)(2) of this section, a State may take each of the following actions:

(A) Provide assistance, only in the form of a loan, to one or more of the following:

(1) Any public water system described in subsection (a)(2) of this section to acquire land or a conservation easement from a willing seller or grantor, if the purpose of the acquisition is to protect the source water of the system from contamination and to ensure compliance with national primary drinking water regulations.

(2) Any community water system to implement local, voluntary source water protection measures to protect source water in areas delineated pursuant to section 300j–13 of this title, in order to facilitate compliance with national primary drinking water regulations.

(B) To provide assistance through a capacity development strategy pursuant to paragraph (1)(B).

(E) To make expenditures to establish and implement wellhead protection programs pursuant to paragraph (1)(D).

(3) Statutory construction

Nothing in this section creates or conveys any new authority to a State, political subdivision of a State, or community water system for any new regulatory measure, or limits any authority of a State, political subdivision of a State or community water system.

(l) Savings

The failure or inability of any public water system to receive funds under this section or any other loan or grant program, or any delay in obtaining the funds, shall not alter the obligation of the system to comply in a timely manner with all applicable drinking water standards and requirements of this subchapter.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out the purposes of this section $599,000,000 for the fiscal year 1994 and $1,000,000,000 for each of the fiscal years 1995 through 2003. To the extent amounts authorized to be appropriated under this subsection in any fiscal year are not appropriated in that fiscal year, such amounts are authorized to be appropriated in a subsection.
quent fiscal year (prior to the fiscal year 2004). Such sums shall remain available until expended.

(n) Health effects studies

From funds appropriated pursuant to this section for each fiscal year, the Administrator shall reserve $10,000,000 for health effects studies on drinking water contaminants authorized by the Safe Drinking Water Act Amendments of 1996. In allocating funds made available under this subsection, the Administrator shall give priority to studies concerning the health effects of cryptosporidium (as authorized by section 300j–18(c) of this title), disinfection byproducts (as authorized by section 300j–18(e) of this title), and arsenic (as authorized by section 300j–1(b)(12)(A) of this title), and the implementation of a plan for studies of subpopulations at greater risk of adverse effects (as authorized by section 300j–18(a) of this title).

(o) Monitoring for unregulated contaminants

From funds appropriated pursuant to this section for each fiscal year beginning with fiscal year 1996, the Administrator shall reserve $2,000,000 to pay the costs of monitoring for unregulated contaminants under section 300j–4(a)(2)(C) of this title.

(p) Demonstration project for State of Virginia

Notwithstanding the other provisions of this section limiting the use of funds deposited in a State loan fund from any State allotment, the State of Virginia may, as a single demonstration and with the approval of the Virginia General Assembly and the Administrator, conduct a program to demonstrate alternative approaches to intergovernmental coordination to assist in the financing of new drinking water facilities in the following rural communities in southwestern Virginia where none exists on August 6, 1996, and where such communities are experiencing economic hardship: Lee County, Wise County, Scott County, Dickenson County, Russell County, Buchanan County, Tazewell County, and the city of Norton, Virginia. The funds allotted to that State and deposited in the State loan fund may be loaned to a regional endowment fund for the purpose set forth in this subsection under a plan to be approved by the Administrator. The plan may include an advisory group that includes representatives of such counties.

(q) Small system technical assistance

The Administrator may reserve up to 2 percent of the total funds appropriated pursuant to subsection (m) of this section for each of the fiscal years 1997 through 2003 to carry out the provisions of section 300j–1(e) of this title (relating to technical assistance for small systems), except that the total amount of funds made available for such purpose in any fiscal year through appropriations (as authorized by section 300j–1(e)) and reservations made pursuant to this subsection shall not exceed the amount authorized by section 300j–1(e) of this title.

(r) Evaluation

The Administrator shall conduct an evaluation of the effectiveness of the State loan funds through fiscal year 2001. The evaluation shall be submitted to the Congress at the same time as the President submits to the Congress, pursuant to section 1108 of title 31, an appropriations request for fiscal year 2003 relating to the budget of the Environmental Protection Agency.

[July 1, 1944, ch. 373, title XIV, §4152, as added Pub. L. 104–182, title I, §130, Aug. 6, 1996, 110 Stat. 1662.]
§ 300j–13. Source water quality assessment

(a) Source water assessment

(1) Guidance

Within 12 months after August 6, 1996, after notice and comment, the Administrator shall publish guidance for States exercising primary enforcement responsibility for public water systems to carry out directly or through delegation (for the protection and benefit of public water systems and for the support of monitoring flexibility) a source water assessment program within the State’s boundaries. Each State adopting modifications to monitoring requirements pursuant to section 300g–7(b) of this title shall, prior to adopting such modifications, have an approved source water assessment program under this section and shall carry out the program either directly or through delegation.

(2) Program requirements

A source water assessment program under this subsection shall—

(A) delineate the boundaries of the assessment areas in such State from which one or more public water systems in the State receive supplies of drinking water, using all reasonably available hydrogeologic information on the sources of the supply of drinking water in the State and the water flow, recharge, and discharge and any other reliable information as the State deems necessary to adequately determine such areas; and

(B) identify for contaminants regulated under this subchapter for which monitoring is required under this subchapter (or any unregulated contaminants selected by the State, in its discretion, which the State, for the purposes of this subsection, has determined may present a threat to public health), to the extent practical, the origins within each delineated area of such contaminants to determine the susceptibility of the public water systems in the delineated area to such contaminants.

(3) Approval, implementation, and monitoring relief

A State source water assessment program under this subsection shall be submitted to the Administrator within 18 months after the Administrator’s guidance is issued under this subsection and shall be deemed approved 9 months after the date of such submittal unless the Administrator disapproves the program as provided in section 300h–7(c) of this title. States shall begin implementation of the program immediately after its approval. The Administrator’s approval of a State program under this subsection shall include a timetable, established in consultation with the State, allowing not more than 2 years for completion after approval of the program. Public water systems seeking monitoring relief in addition to the interim relief provided under section 300g–7(a) of this title shall be eligible for monitoring relief, consistent with section 300g–7(b) of this title, upon completion of the assessment in the delineated source water assessment area or areas concerned.

(4) Timetable

The timetable referred to in paragraph (3) shall take into consideration the availability to the State of funds under section 300j–12 of this title (relating to State loan funds) for assessments and other relevant factors. The Administrator may extend any timetable included in a State program approved under paragraph (3) to extend the period for completion by an additional 18 months.

(5) Demonstration project

The Administrator shall, as soon as practicable, conduct a demonstration project, in consultation with other Federal agencies, to demonstrate the most effective and protective means of assessing and protecting source waters serving large metropolitan areas and located on Federal lands.

(6) Use of other programs

To avoid duplication and to encourage efficiency, the program under this section may make use of any of the following:

(A) Vulnerability assessments, sanitary surveys, and monitoring programs.

(B) Delineations or assessments of ground water sources under a State wellhead protection program developed pursuant to this section.

(C) Delineations or assessments of surface or ground water sources under a State pesticide management plan developed pursuant to the Pesticide and Ground Water State Management Plan Regulation (subparts I and J of part 152 of title 40, Code of Federal Regulations), promulgated under section 136a(d) of title 7.

(D) Delineations or assessments of surface water sources under a State watershed initiative or to satisfy the watershed criterion for determining if filtration is required under the Surface Water Treatment Rule (section 141.70 of title 40, Code of Federal Regulations).

(E) Delineations or assessments of surface or ground water sources under plans pursuant to the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.].

(7) Public availability

The State shall make the results of the source water assessments conducted under this subsection available to the public.

(b) Approval and disapproval

For provisions relating to program approval and disapproval, see section 300h–7(c) of this title.
(a) Petition program

(1) In general

(A) Establishment

A State may establish a program under which an owner or operator of a community water system in the State, or a municipal or local government or political subdivision of a State, may submit a source water quality protection partnership petition to the State requesting that the State assist in the local development of a voluntary, incentive-based partnership, among the owner, operator, or government and other persons likely to be affected by the recommendations of the partnership, to—

(i) reduce the presence in drinking water of contaminants that may be addressed by a petition by considering the origins of the contaminants, including to the maximum extent practicable the specific activities that affect the drinking water supply of a community;

(ii) obtain financial or technical assistance necessary to facilitate establishment of a partnership, or to develop and implement recommendations of a partnership for the protection of source water to assist in the provision of drinking water that complies with national primary drinking water regulations with respect to contaminants addressed by a petition; and

(iii) develop recommendations regarding voluntary and incentive-based strategies for the long-term protection of the source water of community water systems.

(B) Funding

Each State may—

(i) use funds set aside pursuant to section 300j–12(k)(1)(A)(iii) of this title by the State to carry out a program described in subparagraph (A), including assistance to voluntary local partnerships for the development and implementation of partnership recommendations for the protection of source water such as source water quality assessment, contingency plans, and demonstration projects for partners within a source water area delineated under section 300j–13(a) of this title; and

(ii) provide assistance in response to a petition submitted under this subsection using funds referred to in subsection (b)(2)(B) of this section.

(2) Objectives

The objectives of a petition submitted under this subsection shall be to—

(A) facilitate the local development of voluntary, incentive-based partnerships among owners and operators of community water systems, governments, and other persons in source water areas; and

(B) obtain assistance from the State in identifying resources which are available to implement the recommendations of the partnerships to address the origins of drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) that affect the drinking water supply of a community.

(3) Contaminants addressed by a petition

A petition submitted to a State under this subsection may address only those contaminants—

(A) that are pathogenic organisms for which a national primary drinking water regulation has been established or is required under section 300g–1 of this title; or

(B) for which a national primary drinking water regulation has been promulgated or proposed and that are detected by adequate monitoring methods in the source water at the intake structure or in any collection, treatment, storage, or distribution facilities by the community water systems at levels—

(i) above the maximum contaminant level; or

(ii) that are not reliably and consistently below the maximum contaminant level.

(4) Contents

A petition submitted under this subsection shall, at a minimum—

(A) include a delineation of the source water area in the State that is the subject of the petition;

(B) identify, to the maximum extent practicable, the origins of the drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) in the source water area delineated under section 300j–13 of this title;

(C) identify any deficiencies in information that will impair the development of recommendations by the voluntary local partnership to address drinking water contaminants that may be addressed by a petition;

(D) specify the efforts made to establish the voluntary local partnership and obtain the participation of—

(i) the municipal or local government or other political subdivision of the State with jurisdiction over the source water area delineated under section 300j–13 of this title; and

(ii) each person in the source water area delineated under section 300j–13 of this title—

(I) who is likely to be affected by recommendations of the voluntary local partnership; and

(II) whose participation is essential to the success of the partnership;

(E) outline how the voluntary local partnership has or will, during development and
implementation of recommendations of the voluntary local partnership, identify, recognize and take into account any voluntary or other activities already being undertaken by persons in the source water area delineated under section 300j–13 of this title under Federal or State law to reduce the likelihood that contaminants will occur in drinking water at levels of public health concern; and

(F) specify the technical, financial, or other assistance that the voluntary local partnership requests of the State to develop the partnership or to implement recommendations of the partnership.

(b) Approval or disapproval of petitions

(1) In general

After providing notice and an opportunity for public comment on a petition submitted under subsection (a) of this section, the State shall approve or disapprove the petition, in whole or in part, not later than 120 days after the date of submission of the petition.

(2) Approval

The State may approve a petition if the petition meets the requirements established under subsection (a) of this section. The notice of approval shall, at a minimum, include for informational purposes—

(A) an identification of technical, financial, or other assistance that the State will provide to assist in addressing the drinking water contaminants that may be addressed by a petition based on—

(i) the relative priority of the public health concern identified in the petition with respect to the other water quality needs identified by the State;

(ii) any necessary coordination that the State will perform of the program established under this section with programs implemented or planned by other States under this section; and

(iii) funds available (including funds available from a State revolving loan fund established under title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.)) or section 300j–12 of this title;

(B) a description of technical or financial assistance pursuant to Federal and State programs that is available to assist in implementing recommendations of the partnership in the petition, including—

(i) any program established under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.);

(ii) the program established under section 1455b of title 16;

(iii) the agricultural water quality protection program established under chapter 2 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3838 et seq.);

(iv) the sole source aquifer protection program established under section 300h–6 of this title;

(v) the community wellhead protection program established under section 300h–7 of this title;

(vi) any pesticide or ground water management plan;

(vii) any voluntary agricultural resource management plan or voluntary whole farm or whole ranch management plan developed and implemented under a process established by the Secretary of Agriculture; and

(viii) any abandoned well closure program; and

(C) a description of activities that will be undertaken to coordinate Federal and State programs to respond to the petition.

(3) Disapproval

If the State disapproves a petition submitted under subsection (a) of this section, the State shall notify the entity submitting the petition in writing of the reasons for disapproval. A petition may be resubmitted at any time if—

(A) new information becomes available;

(B) conditions affecting the source water that is the subject of the petition change; or

(C) modifications are made in the type of assistance being requested.

(c) Grants to support State programs

(1) In general

The Administrator may make a grant to each State that establishes a program under this section that is approved under paragraph (2). The amount of each grant shall not exceed 50 percent of the cost of administering the program for the year in which the grant is available.

(2) Approval

In order to receive grant assistance under this subsection, a State shall submit to the Administrator for approval a plan for a source water quality protection partnership program that is consistent with the guidance published under subsection (d) of this section. The Administrator shall approve the plan if the plan is consistent with the guidance published under subsection (d) of this section.

(d) Guidance

(1) In general

Not later than 1 year after August 6, 1996, the Administrator, in consultation with the States, shall publish guidance to assist—

(A) States in the development of a source water quality protection partnership program; and

(B) municipal or local governments or political subdivisions of a State and community water systems in the development of source water quality protection partnerships and in the assessment of source water quality.

(2) Contents of the guidance

The guidance shall, at a minimum—

(A) recommend procedures for the approval or disapproval by a State of a petition submitted under subsection (a) of this section;

(B) recommend procedures for the submission of petitions developed under subsection (a) of this section;

(C) recommend criteria for the assessment of source water areas within a State; and

(D) describe technical or financial assistance pursuant to Federal and State pro-
grams that is available to address the contamination of sources of drinking water and to develop and respond to petitions submitted under subsection (a) of this section.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $5,000,000 for each of the fiscal years 1997 through 2003. Each State with a plan for a program approved under subsection (b) of this section shall receive an equitable portion of the funds available for any fiscal year.

(f) Statutory construction

Nothing in this section—

(1)(A) creates or conveys new authority to a State, political subdivision of a State, or community water system for any new regulatory measure; or

(B) limits any authority of a State, political subdivision, or community water system; or

(2) precludes a community water system, municipal or local government, or political subdivision of a government from locally developing and carrying out a voluntary, incentive-based, source water quality protection partnership to address the origins of drinking water contaminants of public health concern.

(94 Stat. 1675.)

§ 300j–17. Estrogenic substances screening program

(a) Definitions

As used in this section:

(1) Border State

The term “border State” means Arizona, California, New Mexico, and Texas.

(2) Eligible community

The term “eligible community” means a low-income community with economic hardship that—

(A) is commonly referred to as a colonia;

(B) is located along the United States-Mexico border (generally in an unincorporated area); and

(C) lacks a safe drinking water supply or adequate facilities for the provision of safe drinking water for human consumption.

(b) Grants to alleviate health risks

The Administrator of the Environmental Protection Agency and the heads of other appropriate Federal agencies are authorized to award grants to a border State to provide assistance to eligible communities to facilitate compliance with national primary drinking water regulations or otherwise significantly further the health protection objectives of this subchapter.

(c) Use of funds

Each grant awarded pursuant to subsection (b) of this section shall be used to provide assistance to one or more eligible communities with respect to which the residents are subject to a significant health risk (as determined by the Administrator or the head of the Federal agency making the grant) attributable to the lack of access to an adequate and affordable drinking water supply system.

(d) Cost sharing

The amount of a grant awarded pursuant to this section shall not exceed 50 percent of the costs of carrying out the project that is the subject of the grant.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1997 through 1999.

(94 Stat. 1675.)

§ 300j–16. Assistance to colonias

(a) Definitions

As used in this section:

(1) Border State

The term “border State” means Arizona, California, New Mexico, and Texas.

(2) Eligible community

The term “eligible community” means a low-income community with economic hardship that—

(A) is commonly referred to as a colonia;

(B) is located along the United States-Mexico border (generally in an unincorporated area); and

(C) lacks a safe drinking water supply or adequate facilities for the provision of safe drinking water for human consumption.

(b) Grants to alleviate health risks

The Administrator of the Environmental Protection Agency and the heads of other appropriate Federal agencies are authorized to award grants to a border State to provide assistance to eligible communities to facilitate compliance with national primary drinking water regulations or otherwise significantly further the health protection objectives of this subchapter.

(c) Use of funds

Each grant awarded pursuant to subsection (b) of this section shall be used to provide assistance to one or more eligible communities with respect to which the residents are subject to a significant health risk (as determined by the Administrator or the head of the Federal agency making the grant) attributable to the lack of access to an adequate and affordable drinking water supply system.

(d) Cost sharing

The amount of a grant awarded pursuant to this section shall not exceed 50 percent of the costs of carrying out the project that is the subject of the grant.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1997 through 1999.

(94 Stat. 1675.)
§ 300j–18 Drinking water studies

(a) Subpopulations at greater risk

(1) In general

The Administrator shall conduct a continuing program of studies to identify groups within the general population that may be at greater risk than the general population of adverse health effects from exposure to contaminants in drinking water. The study shall examine whether and to what degree infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that can be identified and characterized are likely to experience elevated health risks, including risks of cancer, from contaminants in drinking water.

(2) Report

Not later than 4 years after August 6, 1996, and periodically thereafter as new and significant information becomes available, the Administrator shall report to the Congress on the results of the studies.

(b) Biological mechanisms

The Administrator shall conduct biomedical studies to—

(1) understand the mechanisms by which chemical contaminants are absorbed, distributed, metabolized, and eliminated from the human body, so as to develop more accurate physiologically based models of the phenomena;

(2) understand the effects of contaminants and the mechanisms by which the contaminants cause adverse effects (especially noncancer and infectious effects) and the variations in the effects among humans, especially subpopulations at greater risk of adverse effects, and between test animals and humans; and

(3) develop new approaches to the study of complex mixtures, such as mixtures found in drinking water, especially to determine the prospects for synergistic or antagonistic interactions that may affect the shape of the dose-response relationship of the individual chemicals and microbes, and to examine noncancer endpoints and infectious diseases, and susceptible individuals and subpopulations.

(c) Studies on harmful substances in drinking water

(1) Development of studies

The Administrator shall, not later than 180 days after August 6, 1996, and after consultation with the Secretaries of Health and Human Services, the Secretary of Agriculture, and, as appropriate, the heads of other Federal agencies, conduct the studies described in paragraph (2) to support the development and implementation of the most current version of each of the following:

(A) Enhanced Surface Water Treatment Rule (59 Fed. Reg. 38832 (July 29, 1994)).

(B) Disinfectant and Disinfection Byproducts Rule (59 Fed. Reg. 38668 (July 29, 1994)).

(C) Ground Water Disinfection Rule (availability of draft summary announced at (57 Fed. Reg. 33960; July 31, 1992)).

(2) Contents of studies

The studies required by paragraph (1) shall include, at a minimum, each of the following:

(A) Toxicological studies and, if warranted, epidemiological studies to determine what levels of exposure from disinfectants and disinfection byproducts, if any, may be associated with developmental and birth defects and other potential toxic endpoints.

(B) Toxicological studies and, if warranted, epidemiological studies to quantify the carcinogenic potential from exposure to disinfection byproducts resulting from different disinfectants.

(C) The development of dose-response curves for pathogens, including cryptosporidium and the Norwalk virus.

(3) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection $12,500,000 for each of fiscal years 1997 through 2003.

(d) Waterborne disease occurrence study

(1) System

The Director of the Centers for Disease Control and Prevention, and the Administrator shall jointly—

(A) within 2 years after August 6, 1996, conduct pilot waterborne disease occurrence studies for at least 5 major United States communities or public water systems; and

(B) within 5 years after August 6, 1996, prepare a report on the findings of the pilot studies, and a national estimate of waterborne disease occurrence.

(2) Training and education

The Director and Administrator shall jointly establish a national health care provider training and public education campaign to inform both the professional health care provider community and the general public about waterborne disease and the symptoms that may be caused by infectious agents, including microbial contaminants. In developing such a campaign, they shall seek comment from interested groups and individuals, including scientists, physicians, State and local governments, environmental groups, public water systems, and vulnerable populations.

(3) Funding

There are authorized to be appropriated for each of the fiscal years 1997 through 2001 $3,000,000 to carry out this subsection. To the extent funds under this subsection are not fully appropriated, the Administrator may use not more than $2,000,000 of the funds from amounts reserved under section 300j–12(n) of this title for health effects studies for purposes of this subsection. The Administrator may transfer a portion of such funds to the Centers for Disease Control and Prevention for such purposes.

(July 1, 1944, ch. 373, title XIV, §1458, as added Pub. L. 104–182, title I, §137, Aug. 6, 1996, 110 Stat. 1680.)
§ 300j–21. Definitions

As used in this part—

(1) **Drinking water cooler**

The term “drinking water cooler” means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) **Lead free**

The term “lead free” means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) **Local educational agency**

The term “local educational agency” means—

(A) any local educational agency as defined in section 7801 of title 20,

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent’s education system provided for under the Defense Dependent’s Education Act of 1978 (20 U.S.C. 921 and following).

(4) **Repair**

The term “repair,” with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) **Replacement**

The term “replacement,” when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) **School**

The term “school” means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) **Lead-lined tank**

The term “lead-lined tank” means a water reservoir container in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.

Amendments

1996—Pub. L. 104–182 made technical amendment to section catchline and first word of text.

The** Effective**
§ 300j–22. Recall of drinking water coolers with lead-lined tanks

For purposes of the Consumer Product Safety Act [15 U.S.C. 2051 et seq.], all drinking water coolers identified by the Administrator on the list under section 300j–23 of this title as having a lead-lined tank shall be considered to be imminently hazardous consumer products within the meaning of section 12 of such Act (15 U.S.C. 2061). After notice and opportunity for comment, including a public hearing, the Consumer Product Safety Commission shall issue an order requiring the manufacturers and importers of such coolers to repair, replace, or recall and provide a refund for such coolers within 1 year after October 31, 1988. For purposes of enforcement, such order shall be treated as an order under section 15(d) of that Act (15 U.S.C. 2069(d)).

References in Text

The Consumer Product Safety Act, referred to in text, is Pub. L. 92–573, Oct. 27, 1972, 86 Stat. 1207, as amended, which is classified generally to chapter 47 (§ 2051 et seq.) of Title 15, Commerce and Trade. For complete classification of this Act to the Code, see Short Title note set out under section 2051 of Title 15 and Tables.

Amendments

1996—Pub. L. 104–182 made technical amendment to section catchline and first word of text.

§ 300j–23. Drinking water coolers containing lead

(a) Publication of lists

The Administrator shall, after notice and opportunity for public comment, identify each brand and model of drinking water cooler which is not lead free, including each brand and model of drinking water cooler which has a lead-lined tank. For purposes of identifying the brand and model of drinking water coolers under this subsection, the Administrator shall use the best information available to the Environmental Protection Agency. Within 100 days after October 31, 1988, the Administrator shall publish a list of each brand and model of drinking water cooler identified under this subsection. Such list shall separately identify each brand and model of cooler which has a lead-lined tank. The Administrator shall continue to gather information regarding lead in drinking water coolers and shall revise and republish the list from time to time as may be appropriate as new information or analysis becomes available regarding lead contamination in drinking water coolers.

(b) Prohibition

No person may sell in interstate commerce, or manufacture for sale in interstate commerce, any drinking water cooler listed under subsection (a) of this section or any other drinking water cooler which is not lead free, including a lead-lined drinking water cooler.

(c) Criminal penalty

Any person who knowingly violates the prohibition contained in subsection (b) of this section shall be imprisoned for not more than 5 years, or fined in accordance with title 18, or both.

(d) Civil penalty

The Administrator may bring a civil action in the appropriate United States District Court (as determined under the provisions of title 28) to impose a civil penalty on any person who violates subsection (b) of this section. In any such action the court may impose on such person a civil penalty of not more than $5,000 ($50,000 in the case of a second or subsequent violation).

Amendments

1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§ 300j–24. Lead contamination in school drinking water

(a) Distribution of drinking water cooler list

Within 100 days after October 31, 1988, the Administrator shall distribute to the States a list of each brand and model of drinking water cooler identified and listed by the Administrator under section 300j–23(a) of this title.

(b) Guidance document and testing protocol

The Administrator shall publish a guidance document and a testing protocol to assist schools in determining the source and degree of lead contamination in school drinking water supplies and in remediating such contamination. The guidance document shall include guidelines for sample preservation. The guidance document shall also include guidance to assist States, schools, and the general public in ascertaining the levels of lead contamination in drinking water coolers and in taking appropriate action to reduce or eliminate such contamination. The guidance document shall contain a testing protocol for the identification of drinking water coolers which contribute to lead contamination in drinking water. Such document and protocol may be revised, republished and redistributed as the Administrator deems necessary. The Administrator shall distribute the guidance document and testing protocol to the States within 100 days after October 31, 1988.

(c) Dissemination to schools, etc.

Each State shall provide for the dissemination to local educational agencies, private nonprofit elementary or secondary schools and to day care centers of the guidance document and testing protocol published under subsection (b) of this section, together with the list of drinking water coolers published under section 300j–23(a) of this title.
(d) Remedial action program

(1) Testing and remedying lead contamination

Within 9 months after October 31, 1988, each State shall establish a program, consistent with this section, to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(2) Public availability

A copy of the results of any testing under paragraph (1) shall be available in the administrative offices of the local educational agency for inspection by the public, including teachers, other school personnel, and parents. The local educational agency shall notify parent, teacher, and employee organizations of the availability of such testing results.

(3) Coolers

In the case of drinking water coolers, such program shall include measures for the reduction or elimination of lead contamination from those water coolers which are not lead free and which are located in schools. Such measures shall be adequate to ensure that within 15 months after October 31, 1988, all such water coolers in schools under the jurisdiction of such agencies are repaired, replaced, permanently removed, or rendered inoperable unless the cooler is tested and found (within the limits of testing accuracy) not to contribute lead to drinking water.

AMENDMENTS

§ 300j–26. Certification of testing laboratories

The Administrator of the Environmental Protection Agency shall assure that programs for the certification of testing laboratories which test drinking water supplies for lead contamination certify only those laboratories which provide reliable accurate testing. The Administrator (or the State in the case of a State to which certification authority is delegated under this subsection) shall publish and make available to the public upon request the list of laboratories certified under this subsection.

CODIFICATION

Section enacted as part of the Lead Contamination Control Act of 1988, and not as part of the Public Health Service Act which comprises this chapter.

SUBCHAPTER XIII—PREVENTIVE HEALTH MEASURES WITH RESPECT TO BREAST AND CERVICAL CANCERS

§ 300k. Establishment of program of grants to States

(a) In general

The Secretary, acting through the Director of the Centers for Disease Control and Prevention, may make grants to States on the basis of an established competitive review process for the purpose of carrying out programs—

(1) to screen women for breast and cervical cancer as a preventive health measure;

(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services and support services such as case management;

(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

1 So in original. Probably should be “section.”
49-104. **Powers and duties of the department and director**

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through the regulation of the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclaimation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and no more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Utilize any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title, but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection 1, paragraph 10.
13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes shall be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department may establish by rule a fee as a condition of licensure, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. The department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, article 8 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on:

(a) The direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

(b) The availability of other funds for the duties performed.

(c) The impact of the fees on the parties subject to the fees.

(d) The fees charged for similar duties performed by the department, other agencies and the private sector.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas...
conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203, except that state agencies are exempt from paying those fees that are not associated with the dredge and fill permit program established pursuant to chapter 2, article 3.2 of this title. For services provided under the dredge and fill permit program, a state agency shall pay either:

   (a) The fees established by the department under the dredge and fill permit program.

   (b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.
49-203. **Powers and duties of the director and department**

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.

2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.

3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:

(a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.

(b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.

(c) Maintenance but not construction of drainage ditches.

(d) Construction and maintenance of irrigation ditches.

(e) Maintenance of structures such as dams, dikes and levees.

4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.

5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.

6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.

7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.

8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.

9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection D shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State
49-257.01. **Underground injection control permit program; permits; prohibitions; rules**

A. The department shall establish an underground injection control permit program, including a permitting process.

B. An underground injection is prohibited unless the underground injection is into a well authorized by rule or unless it is authorized by a permit issued pursuant to this article or by a permit issued by the United States environmental protection agency. A person may not construct any well that is required to have a permit until the person is issued the permit or is otherwise authorized under the permit program established pursuant to this article or federal law.

C. Any underground injection activity is prohibited if it is conducted in a manner that allows the movement of fluid containing any contaminant into underground sources of drinking water and if the presence of that contaminant may endanger underground sources of drinking water.

D. The director shall adopt rules for the purposes of establishing and operating the underground injection control permit program pursuant to this article. Rules adopted by the director shall meet the minimum requirements prescribed by 42 United States Code section 300h(b).
date of the installment payment, the Department may suspend the licensee’s authorization to make installment payments and require the licensee to pay all pending fees.

G. If a licensee fails to submit an installment payment within 30 days after its due date, the Department may initiate action under A.R.S. § 36-495.09.

Historical Note

R9-14-609. Proficiency Testing
A. At least once in each 12-month period, and more often if requested by the Department, each licensee or applicant shall have at least one laboratory analyst participate in proficiency testing provided by the Department, the EPA, or a proficiency testing service that:
1. Includes at least one proficiency testing sample for each parameter for which an initial license or renewal license has been issued or requested and for which proficiency testing samples are available;
2. Demonstrates the laboratory analyst’s proficiency in compliance testing of:
   a. Applicable drinking water parameters in Table 6.2.A, if:
      i. The applicant plans to perform compliance testing of drinking water parameters, or
      ii. The licensee is approved to perform compliance testing of drinking water parameters; and
   b. Applicable parameters other than drinking water parameters, if:
      i. The applicant plans to perform compliance testing of the parameters, or
      ii. The licensee is approved to perform compliance testing of the parameters; and
3. If the licensee or applicant has been issued or has requested a license that includes approval for testing an analyte by different methods, may use the same proficiency testing sample for each method.
B. To demonstrate proficiency for a parameter, test results reported for the parameter shall be within acceptance limits established for:
1. Drinking water inorganic chemistry parameters by the EPA, as provided in 40 CFR 141.23;
2. Drinking water organic chemistry parameters by the EPA, as provided in 40 CFR 141.24;
3. Lead or copper in drinking water by the EPA, as provided in 40 CFR 141.89;
4. Disinfection byproducts in drinking water by the EPA, as provided in 40 CFR 141.131; and
5. Other parameters by the EPA or the proficiency testing service.
C. A licensee or applicant shall ensure that:
1. Each proficiency testing sample accepted at the licensee’s or applicant’s laboratory is analyzed at the licensee’s or applicant’s laboratory;
2. Each proficiency testing sample is tested within the maximum holding times allowed for its parameter, using the same procedures and techniques employed for routine sample testing, and calculating the holding time from the time the sample seal is broken or as indicated in the instructions accompanying the sample;
3. A proficiency testing service provides proficiency testing results directly to the Department;
4. If proficiency testing is provided by the Department, the licensee or applicant submits to the Department payment for the actual costs of the proficiency testing materials; and
5. If proficiency testing is not provided by the Department or the EPA, the licensee or applicant selects a proficiency testing service and contracts with and pays the proficiency testing service directly for proficiency testing.

D. The Department may submit blind proficiency testing samples to a licensed laboratory at any time during the license period.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-609 renumbered to R9-14-610; new Section R9-14-609 renumbered from R9-14-608 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-609 renumbered to R9-14-611; new Section R9-14-609 renumbered from R9-14-607 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-610. Approved Methods and References
A. A licensee or applicant shall ensure that compliance testing is performed according to an approved method and may use method alterations approved by the Department under subsection (C).
B. The approved methods listed by parameter in Tables 6.2.A through 6.2.D are found in the following references, which are incorporated by reference with the modifications described below; are on file with the Department; include no future editions or amendments; and are available as provided below.

C. If an approved method is not available for a particular parameter, or a method or method alteration that is not an approved method is required or authorized to be used for a particular parameter by the EPA, ADEQ, the U.S. Food and Drug Administration, or 9 A.A.C. 8, the following information:

1. For an alternate method or method alteration required or authorized by the EPA, ADEQ, the U.S. Food and Drug Administration, or 9 A.A.C. 8, the following information:
   a. The name, address, and telephone number of the licensee or person exempt under R9-14-602(4) or (5) submitting the request;
   b. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested;
   c. Identification of the parameter for which approval of the alternate method or method alteration is requested; and
   d. Reference to the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8 requirement or authorization for the use of the alternate method or method alteration for which approval is requested;

2. For an alternate method or method alteration to be used because an approved method is not available for a particular parameter, the following information:
   a. The name, address, and telephone number of the licensee or person exempt under R9-14-602(4) or (5) submitting the request;
   b. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested; and
   c. Identification of the parameter for which approval of the alternate method or method alteration is requested; and
   d. Written justification for using the alternate method or method alteration for which approval is requested, including the following:
      i. A detailed description of the alternate method or method alteration;
      ii. References to published or other studies confirming the general applicability of the alternate method or method alteration to the parameter for which its use is intended;
      iii. Reference to the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8 requirement to test the parameter; and
      iv. Data that demonstrate the performance of the alternate method or method alteration in terms of accuracy, precision, reliability, ruggedness, ease of use, and ability to achieve a detection limit appropriate for the proposed use of the alternate method or method alteration; and

3. An alternate method or method alteration approval fee of $50, payable to the Arizona Department of Health Services, in the form of a certified check, business check, money order, or credit card payment.

D. Before approving an alternate method or method alteration that is not required or authorized by the EPA, ADEQ, the U.S. Food and Drug Administration, or 9 A.A.C. 8, the Department may require that the alternate method or method alteration be performed by a laboratory designated by the Department to verify that, using the parameter for which its use is intended, the alternate method or method alteration produces data that comply with subsection (C)(2)(d)(iv).

E. The Department may approve an alternate method or method alteration if the Department determines:

   1. One of the following:
      a. Use of the alternate method or method alteration is required or authorized by the EPA, ADEQ, the U.S. Food and Drug Administration, or 9 A.A.C. 8;
      b. Use of the alternate method or method alteration is justified as described in subsection (C)(2)(d); and

   2. If the alternate method or method alteration pertains to drinking water compliance testing, the EPA concurs that the alternate method or method alteration may be used.

F. The Department may rescind the approval of an alternate method or method alteration approved by the Department according to subsection (E), if, as applicable:

   1. For an alternate method or method alteration requested under subsection (C)(1), the alternate method or method alteration is no longer required or authorized by the EPA, ADEQ, the U.S. Food and Drug Administration, or 9 A.A.C. 8; or

   2. For an alternate method or method alteration requested under subsection (C)(2), an approved method becomes available for the particular parameter.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-610 renumbered to R9-14-611; new Section R9-14-610 renumbered from R9-14-609 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-610 renumbered to R9-14-612; new Section R9-14-610 renumbered from R9-14-608 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 10 A.A.R. 187, effective April 6, 2004 (Supp. 04-2). Amended by final rulemaking at 12 A.A.R.
4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-611. Compliance Testing for Drinking Water Parameters
A. A licensee for a laboratory at which compliance testing for drinking water parameters is performed, including compliance testing performed according to 9 A.A.C. 8, Article 2, shall ensure that:
1. Except as provided in subsection (B), the laboratory is operated in compliance with the guidelines in Key References D4, D5, and D6, excluding the requirements for laboratory personnel education and experience;
2. Each sample for Arizona drinking water parameter compliance testing is analyzed:
   a. Using an approved method;
      i. Listed in Table 6.2.A; or
      ii. Approved by the Department for compliance testing for drinking water parameters under R9-14-610(E); and
   b. If the approved method is from Key Reference C, following the quality control guidelines in Key Reference C associated with the approved method; and
3. If the licensee requests approval to perform testing for vinyl chloride, the licensee also obtains approval to perform testing for each of the analytes listed in 40 CFR 141.61(a)(2)-(21).
B. If an approved method does not include a specific quality control guideline, a licensee for a laboratory at which compliance testing for drinking water parameters is performed shall ensure that the laboratory is operated in compliance with the guidelines in Key References C4, D7, D9, D10, D11, D12, D13, or D14, as applicable.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-611 renumbered to R9-14-612; new Section R9-14-611 renumbered from R9-14-610 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-611 renumbered to R9-14-613; new Section R9-14-611 renumbered from R9-14-610 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-612. Compliance Testing for Wastewater Parameters
A licensee for a laboratory at which compliance testing for wastewater parameters is performed shall ensure that:
1. The laboratory is operated in compliance with the guidelines in Key References C5 and C6; and
2. Each sample for Arizona wastewater parameter compliance testing is analyzed:
   a. Using an approved method;
      i. Listed in Table 6.2.B; or
      ii. Approved by the Department for wastewater parameter compliance testing under R9-14-610(E); and
   b. If the approved method is from Key Reference C, following the quality control guidelines in Key Reference C associated with the approved method.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-612 renumbered to R9-14-614; new Section R9-14-612 renumbered from R9-14-610 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-612 renumbered to R9-14-613; new Section R9-14-612 renumbered from R9-14-610 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-613. Compliance Testing for Waste Parameters
A licensee for a laboratory at which compliance testing for waste parameters is performed shall ensure that each waste sample for Arizona compliance testing is analyzed using an approved method:
1. Listed in Table 6.2.C; or
2. Approved by the Department for waste compliance testing under R9-14-610(E).
B. A licensee for a laboratory at which compliance testing for waste parameters is performed using an 8000 series method from Key Reference F shall:
   1. If the method includes specific quality control requirements, follow the specific quality control requirements in the method;
   2. If the method does not include specific quality control requirements, follow all requirements in Key Reference F14; and
   3. If the method does not include specific sample extraction procedures, follow the procedures in the following from Key Reference F, as applicable:
      a. Method 3500B,
      b. Method 3600C, or
      c. Method 5000.
C. A licensee for a laboratory at which compliance testing for waste parameters is performed using a non-8000 series method from Key Reference F shall comply with Chapters 1 through 8 of Update IV, February 2007, of Key Reference F, as applicable, according to the requirements of the specific method.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-613 renumbered to R9-14-614; new Section R9-14-613 renumbered from R9-14-610 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-613 renumbered to R9-14-615; new Section R9-14-613 renumbered from R9-14-610 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-614. Compliance Testing for Air and Stack Parameters
A licensee for a laboratory at which compliance testing for air or stack parameters is performed shall ensure that each air or stack sample for Arizona compliance testing is analyzed using an approved method:
1. Listed in Table 6.2.D; or
2. Approved by the Department for compliance testing for air or stack parameters under R9-14-610(E).

Title 18, Chapter 14, Department of Environmental Quality - Permit and Compliance Fees, Article 1, Water Quality Protection Fees

Amend:  R18-14-101, R18-14-102, R18-14-104, R18-14-111

New Section:  R18-14-111, R18-14-114, R18-14-115

Renumber:  R18-14-111, R18-14-112, R18-14-113, R18-14-114

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) relates to rules in Title 18, Chapter 14, Article 1, regarding Water Quality Protection Fees. This rulemaking is related to two other rulemakings the Department is simultaneously conducting regarding the Underground Injection Control (UIC) program. The other two rulemakings relate to Licensing Time-frames and Program Rules.

As the Department indicates, “[t]he Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. §§ 49-203(A)(6) and 49-257.01(A) to adopt a permit program for underground injection control (UIC), as administered under the Safe Drinking Water Act (SDWA; 42 U.S.C. § 300h et seq.). Per the conditional enactment in proposed rule R18-9-A602(A), any UIC rules promulgated by the State of Arizona shall not have the force and effect
of law until the U.S. Environmental Protection Agency (EPA) approves the transfer of primary enforcement authority (referred to herein as “Primacy”) through EPA’s publication of a final rule granting ADEQ Primacy in the Federal Register (see 40 CFR § 145.31). ADEQ first attempted this process in the late 1990s; but those efforts ultimately failed due to insufficient statutory and regulatory authority to develop the program. In 2018 Senate Bill 1494 was passed, giving ADEQ the requisite statutory authority to promulgate a state-level UIC program as required to obtain primacy approval.”

This action “proposes [a] new regulatory framework to articulate compliance expectations, mandate regulatory duties, and identify certain rights of those regulated through the Arizona UIC program.”

In this rulemaking, the Department is setting fees for the UIC program, with the objective being to put the least amount of burden on stakeholders while collecting enough revenue to operate the program.

The Department received an exception from the rulemaking moratorium to initiate this rulemaking on May 7, 2018 and final approval to submit it to the Council on May 17, 2022.

1. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   Yes. The Department cites both general and specific statutory authority for this rulemaking.

2. **Do the rules establish a new fee or contain a fee increase?**

   Yes. This rulemaking establishes a new fee pursuant to statutory authority in A.R.S. § 49-203(A)(9). Council staff finds the Department cites the appropriate statutory authority for the proposed new fee in this rulemaking.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

   The Department did not review or rely on a study in conducting this rulemaking.

4. **Summary of the agency’s economic impact analysis:**

   The Department states the rule making consists of 72 new sections, as well as amendments to existing sections, made by the Department to 18 A.A.C. 9, Articles 1 and 6, 18 A.C.C. 1, Article 5 and 18 A.A. C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01. The Arizona statutes mandate that ADEQ establish the UIC program through rule. Federal statute 42 United States Code
300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

The Department states that Arizona’s adoption will allow primacy to rest with ADEQ who is entirely focused on and knowledgeable of Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits faster, and eliminate the duplicative regulation, permitting, and permittee fees between the Federal and state programs.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department indicates that the purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. It believes there is no less intrusive or less costly alternative method of achieving the purpose of the rulemaking.

6. **What are the economic impacts on stakeholders?**

The Department believes the primary cost of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

The Department states there will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. It further states that despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders includes permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. It further indicates that the Department stands to benefit from this increase in fees by fulfilling the requirement of primacy. The stakeholders and the general public stand to benefit from the assurance that high-risk drywells in the state are being physically inspected from time to time.

The Department believes that this rulemaking will result in a positive impact for all stakeholders because it will protect the environment. Further, it believes that individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy and the community.
7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

No. As indicated in Item 10 of the Preamble, the Department added a new subsection to R18-14-111(3) to accommodate a transferability function for UIC Class V wells authorized by rule and to follow the general fee structure of the state drywell program. The fee for the transfer of each well from one owner to another is $100. This change does not result in a rule that is “substantially different” pursuant to A.R.S. § 41-1025.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

Yes. As indicated in Item 11 of the Preamble, the Department received three comments on this rulemaking and adequately responded to the comments it received.

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

These rules do not require a permit because they relate to fees for the UIC program. However, as the Department indicates in the Preamble for the Program Rules rulemaking, the UIC program will require permits. However, general permits are not used for the reasons specified in that Preamble.

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates that federal law applies to the UIC program, but the addition of fees to these rules has no applicable federal law.

11. **Conclusion**

In this regular rulemaking, the Department is adding fees for the UIC Program which it says are the way for it to recover the costs of administering the program while imposing the least burden on stakeholders. The Department is requesting the standard 60-day delayed effective date for this rulemaking. Council staff recommends approval of this rulemaking.
NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 14. DEPARTMENT OF ENVIRONMENTAL QUALITY

PERMIT AND COMPLIANCE FEES

PREAMBLE

1. Article, Part, or Section Affected (as applicable)  Rulemaking Action
   R18-14-101     Amend

   Telephone: (602) 771-8219
   E-mail:  rezabek.jon@azdeq.gov
   Website:  https://azdeq.gov/UIC

6. An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:
   General Explanation of this Rulemaking:
   The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. §§ 49-203(A)(6) and 49-257.01(A) to adopt a permit program for underground injection control (UIC), as administered under the Safe Drinking Water Act (SDWA; 42 U.S.C. § 300h et seq.). Per the conditional enactment in proposed rule R18-9-A602(A), any UIC rules promulgated by the State of Arizona shall not have the force and effect of law until the U.S. Environmental Protection Agency (EPA) approves the transfer of primary enforcement authority (referred to herein as “Primacy”) through EPA’s publication of a final rule granting ADEQ Primacy in the Federal
Register (see 40 CFR § 145.31). ADEQ first attempted this process in the late 1990s; but those efforts ultimately failed due to insufficient statutory and regulatory authority to develop the program. In 2018 Senate Bill 1494 was passed, giving ADEQ the requisite statutory authority to promulgate a state-level UIC program as required to obtain primacy approval.

In this action, ADEQ proposes new regulatory framework to articulate compliance expectations, mandate regulatory duties, and identify certain rights of those regulated through the Arizona UIC program. On May 7, 2018, the Governor’s Office approved an exemption to the rulemaking moratorium in Executive Order 2018-02 so ADEQ can proceed with this rulemaking.

**Associated Rulemakings**

The Arizona UIC program is a regulatory program with associated fees and licensing time frames (LTF). A.A.C. R1-1-103(D)(4) states, “...[a]n agency shall file only one Chapter per notice for any rulemaking activity.” In adherence to the rule, the program component of the Arizona UIC program, which amends A.A.C. Title 18, Chapter 9, is a separate Notice of Proposed Rulemaking filed contemporaneously this rulemaking, which amends A.A.C. Title 18, Chapter 14. Furthermore, the Arizona UIC program amendments to the licensing time frames (LTF) rules (A.A.C. Title 18, Chapter 1) has also been filed alongside the program and fee amendments. The LTF Notice of Proposed Rulemaking amends A.A.C. Title 18, Chapter 1.

**What is Underground Injection?**

An injection well is used to place fluid underground into porous geologic formations. These underground formations may range from deep sandstone or limestone, to a shallow soil layer. Injected fluids may include water, wastewater, brine (salt water), or water mixed with chemicals.

**What is a well?**

A well is a bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or a subsurface fluid distribution system.

**What does the Federal UIC program do?**

The UIC program protects Underground Sources of Drinking Water (USDW) through the regulation of injection wells. USDWs are:

1. aquifers or portions of aquifers that:
   1. supply public water systems; or
   2. contain a sufficient quantity of ground water to supply a public water system; and
      a. currently supply drinking water for human consumption, or
      b. contain fewer than 10,000 mg/l total dissolved solids; and
   3. are not aquifers exempted under the UIC program.

**How does the UIC program protect USDWs?**

The UIC program requires injected fluids stay within the well or the intended injection zone. The program also regulates fluids that are directly or indirectly injected into a USDW by prohibiting the movement of fluid containing any contaminant into USDWs, if the presence of that contaminant may cause a violation of any primary drinking water regulation or may otherwise adversely affect the health of persons.

**What are the different well classifications in the UIC program?**

**Class I**

Class I wells are used to inject hazardous and non-hazardous wastes into deep, isolated rock formations. Class I wells are disposal wells used by the petroleum refining, metal production, chemical production, pharmaceutical production, commercial disposal, food production and municipal wastewater treatment industries (amongst others) to dispose. These deep well injections release fluids into formations below USDWs, usually formations separated by multiple geologic strata from USDWS and often times at depths thousands of feet below the surface.

**Class II**
Class II wells are used exclusively to inject fluids associated with oil and natural gas production. Class II wells fall into one of the following three categories: disposal wells, enhanced recovery wells and hydrocarbon storage wells. Class II fluids are primarily brines (salt water) that are brought to the surface while producing oil and gas. Brines are separated from hydrocarbons at the surface and reinjected into the same or similar underground formations for disposal. Enhanced recovery wells utilize fluids consisting of brine, freshwater, steam, polymers, or carbon dioxide that are injected into oil-bearing formations to recover residual oil and in limited applications, natural gas. Hydrocarbon storage wells inject liquid hydrocarbons into underground formations (such as salt caverns) where they are stored, generally, as part of the U.S. Strategic Petroleum Reserve.

**Class III**
Class III wells are used to inject fluids for the purpose of dissolving and then extracting minerals. Production wells, which bring mining fluids to the surface, are not regulated under the UIC program. Class III wells are used to mine Uranium, Salt, Copper and Sulfur. Class III injection requirements isolate fluids from underground sources of drinking water.

**Class IV**
Class IV wells are used to inject hazardous or radioactive wastes into or above a geologic formation that contains a USDW. In 1984, EPA banned the use of Class IV injection wells. ADEQ will continue this ban upon primacy. These wells may only operate as part of an EPA or state authorized ground water clean-up action. Less than 32 waste clean-up sites with Class IV wells exist in the United States.

**Class V**
Class V wells are used to inject non-hazardous fluids underground. Most Class V wells are used to dispose of wastes into or above USDWs. This disposal can pose a threat to ground water quality if not managed properly. The different types of Class V wells pose various threats. Most Class V wells are shallow disposal systems that depend on gravity to drain fluids directly in the ground. Over 20 well subtypes fall into the Class V category. There are more than 650,000 Class V wells estimated to operate in the United States. Most of these Class V wells are unsophisticated shallow disposal systems such as stormwater drainage wells, septic system leach fields and agricultural drainage wells.

**Class VI**
Class VI wells are used to inject carbon dioxide (CO2) into deep rock formations. This long-term underground storage is called geologic sequestration (GS). Geologic sequestration refers to technologies to reduce CO2 emissions to the atmosphere and mitigate climate change.

**Stakeholder Composition**
Arizona currently has five (5) individual EPA UIC program permits operating within the state boundaries (not including Indian lands), all of which are for Class III wells for the purpose of extracting salts and copper. The three companies operating the five permits are Morton Salt, Inc., Excelsior Mining Arizona, Inc. and Florence Copper, Inc.

The UIC program applies to a large number of Class V injection wells through the programs “authorization by rule.” Class V authorization by rule includes initial inventorying, operators meeting a set of criteria, including a general standard to not cause fluids to move in such a way where a USDW would receive a pollutant above the standards in Table 1. Examples of Arizona Class V wells include drywells, aquifer storage recharge wells, septic systems serving greater than 20 people per day or that have a design flow of over 3,000 gallons per day and stimulation injection wells for the purpose of inert gas extraction (See proposed rule R18-9-A604(E) in Section 13 below for more examples of Class V wells). Furthermore, through stakeholder outreach, ADEQ has become aware of Arizona municipalities that are interested in developing Class I municipal wastewater disposal wells.

**What has been the stakeholder process thus far for this rulemaking?**
Statutory authority for program pursuit was passed into law through Senate Bill 1494 in 2018 at A.R.S. §§ 49-257 and 49-257.01. An exemption memo was received from the Governor’s Office in May of 2018. Since those events, ADEQ has been reaching out to UIC stakeholders throughout the state in a pre-rulemaking process.
known internally as “informal rulemaking”. Informal rulemaking involves developing and setting internal goals for what the rulemaking should achieve. ADEQ has held nine (9) stakeholder meetings, either presenting to stakeholders, receiving stakeholder input or both. Tribal consultation presentations were conducted three times in May 2019. Tribal correspondence has been addressed throughout the informal rulemaking phase as well.

The nine stakeholder meetings were designed to inform the regulated community of ADEQ’s progress in pursuing Primacy, as well as, explaining and presenting drafts of the state rules being developed for the ultimate purpose of administering the program. In November 2019 and November 2020, stakeholders were given access to drafts of the “program rule”. Afterwards, ADEQ solicited hundreds of comments from the regulated community, addressing and analyzing each one. Some comments led to changes in rule language, while others were determined to be inapplicable or unnecessary. All comments received were considered and are appreciated by the Agency. A repository of materials and events can be viewed on ADEQ’s “Stakeholder Materials” page for the UIC rulemaking. That webpage can be found here: https://azdeq.gov/UIC

In the context of stakeholder involvement, it should be noted that this set of rules, internally referred to as the “program rules,” is largely the same in substance as the EPA UIC permit program, which can be viewed in the CFR (see 40 CFR Parts 144 and 146). The substantive similarities were made by design, as EPA requires a primacy applicant’s administering rules to be at least as stringent as the EPA program. Furthermore, in Arizona, a number of statutes (A.R.S. §§ 41-1052(D)(9), 49-104(16) and others) prohibit a rule’s passage if the rule is more stringent than a corresponding federal law unless there is statutory authority to exceed the federal requirements. Due to these limitations on stringency, the language in the EPA program was adopted largely as is. The influence of stakeholder input can be seen in R18-9-A602, R18-9-C627(B) through (F) and R18-9-C631(B).

**UIC Fees**

The major factor in ADEQ’s decision-making in setting fees for the UIC program is the goal of putting the least amount of burden on the stakeholders while generating enough revenue to support the administrative costs necessary to operate the program. More specifically, the rulemaking proposal in A.A.C. R18-14-102(B) includes an hourly rate for a water quality protection service associated with a UIC permit to be set at $145 an hour. The APP program’s water quality protection service fee is $122 and was set in 2011. ADEQ determined $145 an hour for a UIC water quality protection service fee by considering other fees in the agency, such as the Air Pollution Control permits (A.A.C. R18-2-236(2)(d) & (H)) under Subs, as well as accounting for inflationary costs since 2011. A final factor of consideration was the goal of providing adequate revenue for the purposes of supporting the administration of the program.

The rulemaking proposal in A.A.C. R18-14-102(C) includes maximum fees for a water quality protection service assessed at an hourly rate. UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

The Annual Fees (listed in Tables 3.1 and 3.2 of R18-14-104) and the UIC Flat Fees (listed in R18-14-111) were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program and other states’ UIC programs.

ADEQ is exploring the regulation of drywells under the UIC program as Class V wells “authorized by rule.” At primacy, ADEQ will take administrative and enforcement authority over the UIC program, including Class V regulation of drywells.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to make sure the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.
A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The economic, small business, and consumer impact statement:

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An identification of the rulemaking:

The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

B. A summary of the EIS:

General Impacts

The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for-service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for
UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

**Specific Impacts**
While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

**Stakeholder Process**
ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. **Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:**
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

**State government agencies**
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

**Political subdivisions**
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Mines
- Mineral Extraction Companies
- Businesses which utilize drywells

The General Public
The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

2. Part II - Individual Stakeholder Summaries/Calculations:

This section outlines ADEQ’s analyses of the estimated costs and benefits of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection and underground injection control.

ADEQ

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule
3.2

Political Subdivisions

Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have
been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalinization plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.

The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

Privately-Owned Business

Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.

However, and as mentioned above, the benefits to privately-owned business include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

General Public

The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands
to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

F. A statement of the probable impact of the rules on small business:
In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. An identification of the small business subject to the rules:
   Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventorying, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. The administrative and other costs required for compliance with the rules:
   Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:
   a. Establishing less stringent compliance or reporting requirements in the rule for small businesses:
      Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.
   b. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:
      Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.
   c. Consolidating or simplifying the rule’s compliance or reporting requirements for small businesses:
      Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.
   d. Establishing performance standards for small businesses to replace design or operational standards in the rule:
      Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.
   e. Exempting small businesses from any or all requirements of the law:
      Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:
   As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according
to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.

Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.
H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142.

10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:
R18-14-111(3)
• This is a new subsection that was added in order to accommodate a transferability function for UIC Class V wells authorized by rule and to follow the general fee structure of the state drywell program. The language charges $100 for each well transferred from one owner to another.

11. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:
Comment 1: Resource Extraction Industry Member
Proposed R18-14-115 should be revised to replace the words "from the date of primacy" with the words "from the date of the Environmental Protection Agency's approval of the Arizona UIC program." This is unless ADEQ prefers to define "primacy" as such in A601 and employ that term likewise in A602(A). In these provisions, ADEQ may also wish to employ the words "the Administrator" in lieu of "the Environmental Protection Agency."
ADEQ Response 1:
ADEQ appreciates the comment.

Comment 2: Drywell Owners – UIC Drywell Regulation
How will the UIC program rulemaking affect drywell regulation in Arizona? Will the existing registrations be rolled in the new UIC program? If rolled into the new UIC program, will the regulations look the same/similar as they are now for the Class V wells? Upon primacy, will drywell owners with registrations under A.R.S. § 49-332 need to inventory under the UIC program? Are Dry Wells included in a Class? If so, which Class are they included in? Under the UIC program, will drywells be assessed an annual fee or a one-time fee?
ADEQ Response 2:
ADEQ appreciates the comment. Currently, drywells in Arizona are regulated primarily through a statutorily-based program that can be found at A.R.S. Title 49, Chapter 2, Article 8. This program requires registration of new drywells. There are a few special circumstances where drywells are required to register and apply for an Aquifer Protection Permit (APP) (see A.A.C. Title 18, Chapter 9, Article 3, Part C. Type 2 General Permits – specifically R18-9-C301, C303 & C304).
In 2022, the Arizona State Legislature passed a bill (signed by the Governor) which repeals the state statutory drywell program. The repealed state statutory drywell program leaves drywell regulation in Arizona to the UIC program. The UIC program regulates drywells as part of its Class V wells. Upon primacy over the UIC program (projected for early 2023), ADEQ would take administrative control from EPA over the program and the drywell regulation therein. Until primacy, the Environmental Protection
Agency (EPA) will continue to administer the UIC program in Arizona (including drywells which are encompassed in the Class V wells). ADEQ is currently developing the UIC program and aims to transfer all state drywell registrations into the UIC program inventory in the process (free of charge). More information on this process will be made public as program development continues.

Class V regulations in the UIC program that are currently in effect and administered by EPA out of the Code of Federal Regulations (CFR) are nearly identical to the Class V regulation in this rulemaking. Similar to the regulation in A.R.S. Title 49, Chapter 2, Article 8, the Class V regulation wherein drywells apply requires an inventory of new wells. Class V regulation also requires drywells to adhere to the prohibition of movement standard in rule R18-9-B608(A). This rule prohibits any injection activity in a manner that allows the movement of fluid containing any contaminant into an underground source of drinking water. The Class V-specific regulation can be found at R18-9-I650 et seq.

Under the Arizona UIC program, drywells and Class V wells are charged a one-time fee, per inventory, of $200. Class V wells, authorized by rule, will also be charged $100 upon transfer of the well to a new owner.

**Comment 3: Tribal Interest Group**

ADEQ has stated that it intends for the UIC Program to be almost entirely funded through collected permit fees. For many years, ADEQ has suffered from deficient state funding. ADEQ should not be pursuing UIC Program primacy without asking for sufficient funding from the Arizona Legislature. This is critical, as sufficient funding and adequate ADEQ workforce expertise must be present for ADEQ to fulfill its obligations under this Program, as well as its obligations to Arizona tribes.

**ADEQ Response 3:**

ADEQ appreciates the comment. The Arizona UIC program is proposed to operate on a fee-for-service model that derives funding from diverse sources of revenue, which includes fixed annual fees, well installation fees, an hourly fee for application and technical review, and an annual work grant from EPA. The Annual Fees (listed in the UIC Licensing Time Frame proposed rules at Tables 3.1 and 3.2, R18-14-104) and the UIC Flat Fees (listed in proposed rule R18-14-111) were determined by considering the necessary revenue needed to support the administration of the program. Projected revenue will be augmented by an increase in the hourly rate for a UIC water quality protection service associated with a UIC permit, which has been set at $145 an hour in proposed rule R18-14-102(B). Furthermore, ADEQ has proposed in the Fee rulemaking the periodic review of the revenues collected from the UIC program every three years (see proposed rule R18-14-115). The reviews will ensure that enough revenue is being collected to properly administer the program. The reviews will also ensure that the fees are equitable and not overly burdensome to the stakeholders.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

The following statutes contain therein prescribed matters applicable to the rules in this rulemaking: A.R.S. §§ 49-203(A)(6) and (9); 49-257; 49-257.01.

a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

   See Subsection 12(A) in the Notice of Proposed Rulemaking for Title 18, Chapter 9, Article 6 filed alongside this Notice of Proposed Rulemaking.

b. **Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

   Federal law is applicable to the UIC program. The UIC is a program authorized under the SDWA (see 42 U.S.C. § 300h et seq.), originally administered by EPA. The UIC program administration can be transferred from EPA to a state through a delineated process known as Primacy (see 42 U.S.C. § 300h-1). However, the addition of fees to 18 A.A.C. 14 has no applicable federal law.

c. **Whether a person submitted an analysis to the agency that compares the rule’s impact on the competitiveness of business in this state to the impact on business in other states:**

   No comparative analyses were submitted.
13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:
   No material was incorporated by reference in this rulemaking under A.R.S. § 41-1028, nor otherwise.

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:
   Not applicable.

15. The full text of the rules follows:

ARTICLE 1. WATER QUALITY PROTECTION FEES

R18-14-101. Definitions

In addition to the definitions in A.R.S. §§ 49-201, 49-241.02, 49-255, 49-331, and A.A.C. R18-9-101, A.A.C. R18-9-701, and A.A.C. R18-9-A901, the following terms apply to this Article:

1. “APP” means an Aquifer Protection Permit.
2. “Complex modification” means:
   a. A revision of an individual Aquifer Protection Permit for a facility within a mining sector as defined in A.R.S. § 49-241.02(F)(1); and
   b. A revision of an individual Aquifer Protection Permit for a facility within a non-mining sector due to any of the following:
      i. An expansion of an existing pollutant management area requiring a new or relocated point of compliance
      ii. A new subsurface disposal including injection or recharge, or new wetlands construction;
      iii. Submission of data indicating contamination, or identification of a discharging facility or pollutants not included in previous applications that requires reevaluation of BADCT; or
      iv. Closure of a facility that cannot meet the clean closure requirements of A.R.S. § 49-252 and requires post-closure care, monitoring, or remediation.
3. “Courtesy review” means a design review service that the Department performs within 30 days from the date of receiving the submittals, of the 60 percent completion specifications, design report, and construction drawings for a sewage collection system.
4. “Priority review” means a design review service for an APP Type 4 permit application that the Department completes using not more than 50 percent of the total review time-frame for the applicable Type 4 permit application as specified in 18 A.A.C. 1, Table 10.
5. “Request” means a written application, notice, letter, or memorandum submitted by an applicant to the Department for water quality protection services. The Department considers a request made on the date it is received by the Department.
6. “Review hours” means the hours or portions of hours that the Department’s staff spends on a request for a water quality protection service. Review hours include the time spent by the project manager and technical review team members, and if requested by the applicant, the supervisor or unit manager.
7. “Review-related costs” means any of the following costs applicable to a specific request for water quality protection service:
   a. Presiding officer services for public hearings on a permitting decision,
   b. Court reporter services for public hearings on a permitting decision,
   c. Facility rentals for public hearings on a permitting decision,
   d. Charges for laboratory analyses performed during the review, and
   e. Other reasonable and necessary review-related expenses documented in writing by the Department and agreed to by an applicant.
8. “Standard modification” means an amendment to an individual Aquifer Protection Permit that is not a complex modification.
10. “Water quality protection service” means:
   a. Reviewing a request for an APP determination of applicability;
   b. Issuing, renewing, amending, modifying, transferring, or denying an aquifer protection permit, an AZPDES permit, a UIC permit, a UIC application for an aquifer exemption or an injection depth waiver or a reclaimed water permit;
   c. Reviewing supplemental information required by a permit condition, including closure for an APP;
   d. Performing an APP clean closure plan review;
   e. Issuing or denying a Certificate of Approval for Sanitary Facilities for a Subdivision;
   f. Registering or transferring registration of a dry well;
   g. Conducting a site visit;
   h. Reviewing proprietary and other reviewed products under A.A.C. R18-9-A309(E);
   i. Reviewing, processing, and managing documentation related to an AZPDES general permit, including a notice of intent, notice of termination, certificate of no exposure, and waiver;
   j. Registering and reporting land application of biosolids; or
k. Pretreatment program review, inspection, or audit.

**R18-14-102. Hourly Rate and Maximum Fees for Water Quality Protection Services**

A. The Department shall assess and collect an hourly rate fee for a water quality protection service, except for APP minor permit amendments specified under A.A.C. R18-9-A211(C)(1), (2) and (3) and A.A.C. R18-9-B906(B), unless a flat fee is otherwise designated in this Article, and UIC minor modifications specified under A.A.C. R18-9-C633(A).

B. Hourly rate fees. The Department shall calculate the fee using an hourly rate of $122, except for the UIC program, where the Department shall calculate the fee using an hourly rate of $145. These rates shall then be multiplied by the number of review hours to provide a water quality protection service, plus any applicable review-related costs, up to the maximum fee specified in subsection (C). The Department shall not charge an applicant for the first 60 minutes of Department pre-application consultation time costs for the project manager.

C. Maximum fees for a water quality protection service assessed at an hourly rate are as follows:

<table>

1 A Class II, III or V Individual UIC permittee with multiple wells or multiple permits may consolidate their same-class wells for the purpose of “design injection flow rate in gallons per day” under Table 3.2.

2 An Area permit is not subject to Table 3.2.

### R18-14-111. UIC Flat Fees

The Department shall assess a flat fee for the following UIC regulated facility services:

1. Well installation in an Area Permit, $200 per well installation.
2. Class V authorization by rule, $200 per well inventory.
3. Class V authorization by rule, $100 per well transfer.

### R18-14-112. Other Flat Fees

Flat fees. The Department shall assess a flat fee for the following water quality protection services:

1. Dry well registration, $100 per dry well until:
   a. The fees in R18-14-111 are applicable, and
   b. A.R.S Title 49, Chapter 2, Article 8 is removed.
2. Dry well transfer of registration, $50 per transfer until:
   a. The fees in R18-14-111 are applicable, and
   b. A.R.S Title 49, Chapter 2, Article 8 is removed
   a. Subdivision with public sewerage system: $800 for every increment of 150 lots or less;
   b. Subdivision with individual sewerage system:
      i. $500 for less than 10 lots;
      ii. $1,000 for greater than 10 lots but less than 50 lots;
      iii. $1,000 for each additional increment of 50 lots or less.
   c. If water from a central system is not provided to the lot, the fee is one and one-half the applicable fee stated in subsection (3)(a) or (b).
   d. Condominium subdivision: $1,000 for every increment of 150 units or less.

### R18-14-112, R18-14-113. Implementation

The fees in this Article apply on July 1, 2011. For fees related to the AZPDES program:

1. A person shall submit the applicable fee when requesting a water quality protection service as specified in an AZPDES General Permit or in 18 A.A.C. 9, Article 9; and
2. A person is responsible for paying the annual fee for an AZPDES general permit, even if the person filed for coverage before the effective date of these rules.

### R18-14-113, R18-14-114. Annual Report

By December 1 of each year, the Department shall publish an accounting of Water Quality Fee Fund revenue and expenditure activity for the prior fiscal year.

### R18-14-115. UIC Fees Review

The department shall review the revenues derived from the implementation of the UIC program from the date of primacy through June 30, 2025. By September 30, 2025, the department shall determine the adequacy of the fees in comparison to the relevant data from the time period. The department shall repeat the review every three years based on the initial review date of June 30, 2025.
The economic, small business, and consumer impact statement:

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An identification of the rulemaking:

The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

B. A summary of the EIS:

General Impacts

The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for-service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.
Specific Impacts
While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

Stakeholder Process
ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

State government agencies
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

Political subdivisions
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Mines
- Mineral Extraction Companies
- Businesses which utilize drywells
The General Public
The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

Localized access to ADEQ’s expertise, personnel and customer service, as well as a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.  

General Public  
Ensuring underground sources of drinking water supply or aquifers are better protected from pollution.  
ADEQ employees developing Arizona-specific permits, leading to a better protection of the environment, which supports the economy, which supports the community.  

### 2. Part II - Individual Stakeholder Summaries/Calculations:

This section outlines ADEQ’s analyses of the estimated costs and benefits of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection and underground injection control.

**ADEQ**
ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

**The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule**

3.2  

**Political Subdivisions**
Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalinization plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.

The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program...
does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

Privately-Owned Business
Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.

However, and as mentioned above, the benefits to privately-owned business include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

General Public
The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring.
Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:
ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

F. A statement of the probable impact of the rules on small business:
In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. An identification of the small business subject to the rules:
Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventorying, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. **The administrative and other costs required for compliance with the rules:**
   Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. **A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:**
   a. *Establishing less stringent compliance or reporting requirements in the rule for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.
   b. *Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.
   c. *Consolidating or simplifying the rule's compliance or reporting requirements for small businesses:*
      Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.
   d. *Establishing performance standards for small businesses to replace design or operational standards in the rule:*
      Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.
   e. *Exempting small businesses from any or all requirements of the law:*
      Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. **The probable costs and benefits to private persons and consumers who are directly affected by the rules:**
   As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and
customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.

Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.

H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and
In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142. A table showing specific analogous Federal regulations to the rules in this rulemaking can be found in section 6 of the Preamble above.
when the individual is exposed to both internal and external radiation (see §20.1202). When an individual is exposed to radioactive materials which fall under several of the translocation classifications (i.e., Class D, Class W, or Class Y) of the same radionuclide, the exposure may be evaluated as if it were a mixture of different radionuclides.

It should be noted that the classification of a compound as Class D, W, or Y is based on the chemical form of the compound and does not take into account the radiological half-life of different radioisotopes. For this reason, values are given for Class D, W, and Y compounds, even for very short-lived radionuclides.

### Table 2

The columns in table 2 of this appendix captioned “Effluents,” “Air,” and “Water,” are applicable to the assessment and control of dose to the public, particularly in the implementation of the provisions of §20.1302. The concentration values given in columns 1 and 2 of table 2 are equivalent to the radionuclide concentrations which, if inhaled or ingested continuously over the course of a year, would produce a total effective dose equivalent of 0.05 rem (50 millirem or 0.5 millisieverts).

Consideration of non-stochastic limits has not been included in deriving the air and water effluent concentration limits because non-stochastic effects are presumed not to occur at the dose levels established for individual members of the public. For radionuclides, where the non-stochastic limit was governing in deriving the occupational DAC, the stochastic ALI was used in deriving the corresponding airborne effluent limit in table 2. For this reason, the DAC and airborne effluent limits are not always proportional as was the case in appendix B to §§20.1–20.601.

The air concentration values listed in table 2, column 1, were derived by one of two methods. For those radionuclides for which the stochastic limit is governing, the occupational stochastic inhalation ALI was divided by 2.4 \times 10^6 \text{ ml}, relating the inhalation ALI to the DAC, as explained above, and then divided by a factor of 300. The factor of 300 includes the following components: a factor of 50 to relate the 5-rem annual occupational dose limit to the 0.1-rem limit for members of the public; a factor of 3 to adjust for the difference in exposure time and the inhalation rate for a worker and that for members of the public; and a factor of 2 to adjust the occupational values (derived for adults) so that they are applicable to other age groups.

For those radionuclides for which submersion (external dose) is limiting, the occupational DAC in table 1, column 3, was divided by 219. The factor of 219 is composed of a factor of 50, as described above, and a factor of 4.38 relating occupational exposure for 2,000 hours per year to full-time exposure (8,760 hours per year). Note that an additional factor of 2 for age considerations is not warranted in the submersion case.

The water concentrations were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by \(7.3 \times 10^7\). The factor of \(7.3 \times 10^7\) (ml) includes the following components: the factors of 50 and 2 described above and a factor of \(7.3 \times 10^7\) (ml) which is the annual water intake by “Reference Man.”

Note 2 of this appendix provides groupings of radionuclides which are applicable to unknown mixtures of radionuclides. These groupings (including occupational inhalation ALIs and DACs, air and water effluent concentrations and sewerage) require demonstrating that the most limiting radionuclides in successive classes are absent. The limit for the unknown mixture is defined when the presence of one of the listed radionuclides cannot be definitely excluded either from knowledge of the radionuclide composition of the source or from actual measurements.

### Table 3 “Sewer Disposal”

The monthly average concentrations for release to sanitary sewers are applicable to the provisions in §20.2003. The concentration values were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by \(7.3 \times 10^6\) (ml). The factor of \(7.3 \times 10^6\) (ml) is composed of a factor of \(7.3 \times 10^5\) (ml), the annual water intake by “Reference Man,” and a factor of 10, such that the concentrations, if the sewage released by the licensee were the only source of water ingested by a reference man during a year, would result in a committed effective dose equivalent of 0.5 rem.

**Notes:**
- "St. wall" indicates standards for wall levels.
- "Lb. wall" indicates levels for wall levels.
- "Liver" indicates levels for liver.
- "Stomach" indicates levels for stomach.
- "Intestine" indicates levels for intestine.
- "Blood" indicates levels for blood.
- "Urine" indicates levels for urine.
- "Saliva" indicates levels for saliva.
- "Sweat" indicates levels for sweat.
- "Milk" indicates levels for milk.
- "Semen" indicates levels for semen.
- "Effluent Concentrations" refer to levels in effluent.

FOOTNOTES:

1. "Submersion" means that values given are for submersion in a hemispherical semi-infinite cloud of airborne material.

2. These radionuclides have radiological half-lives of less than 2 hours. The total effective dose equivalent received during operations with these radionuclides might include a significant contribution from external exposure. The DAC values for all radionuclides, other than those designated Class "Submersion," are based upon the committed effective dose equivalent due to the intake of the radionuclide into the body and do NOT include potentially significant contributions to dose equivalent from external exposures. The licensee may substitute 1E-7 µCi/l for the listed DAC to account for the submersion dose prospectively, but should use individual monitoring devices or other radiation measuring instruments that measure external exposure to demonstrate compliance with the limits. (See 10 CFR 20.103.)

3. For soluble mixtures of U-238, U-234, and U-235 in air, chemical toxicity may be the limiting factor (see 10 CFR 20.111(a)). If the percent by weight of enrichment of U-235 is not greater than 5, the concentration value for a 40-hour workweek is 0.2 milligrams of uranium per cubic meter of air average. For any enrichment, the product of the average concentration and time of exposure during a 40-hour workweek shall not exceed 8E-3 (SA µCi/m³), where SA is the specific activity of the uranium inhaled. The specific activity for natural uranium is 6.7E-7 curies per gram U. The specific activity for other mixtures of U-238, U-235, and U-234, if not known, shall be:

\[
SA = \frac{0.4 + 0.3E \times (enrichment) + 0.0034 \times (enrichment)^2}{1 - 6E + enrichment \geq 0.72}
\]

where enrichment is the percentage by weight of U-235, expressed as percent.

NOTE:

1. If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.

2. If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in this appendix are not present in the mixture, the inhalation ALI, DAC, and effluent and sewage concentrations for the mixture are the lowest values specified in this appendix for any radionuclide that is not known to be absent from the mixture; or

### Example

If radionuclides "A," "B," and "C" are present in concentrations $c_A$, $c_B$, and $c_C$, and if the applicable DACs are $DAC_A$, $DAC_B$, and $DAC_C$, respectively, then the concentrations shall be limited so that the following relationship exists:

$$
\frac{c_A}{DAC_A} + \frac{c_B}{DAC_B} + \frac{c_C}{DAC_C} < 1
$$

organizations reporting any such transactions under subsection (a)(3) of this section.

(f) Rates

Nothing in this section shall be construed to confer upon the Secretary any authority to approve or disapprove the rates charged by any health maintenance organization.

(g) Annual financial statement

Any health maintenance organization failing to file with the Secretary the annual financial statement required in subsection (a) of this section shall be ineligible for any Federal assistance under this subchapter until such time as such statement is received by the Secretary and shall not be a qualified health maintenance organization for purposes of section 300e–9 of this title.

(h) Penalties

Whoever knowingly and willfully makes or causes to be made any false statement or representation of a material fact in any statement filed pursuant to this section shall be guilty of a felony and upon conviction thereof shall be fined not more than $25,000 or imprisoned for not more than five years, or both.

AMENDMENTS

1986—Subsec. (e). Pub. L. 99–660 struck out subsec. (e) which read as follows: “The Secretary shall file an annual report with the Congress on the operation of this section. Such report shall include—

1(1) an enumeration of standards and norms utilized to make the evaluations required under subsection (d) of this section;

4(2) an assessment of the degree of conformity or nonconformity of each health maintenance organization evaluated by the Secretary under subsection (d) of this section with such standards and norms;

4(3) what action, if any, the Secretary considers necessary under section 300e–11 of this title with respect to health maintenance organizations evaluated under subsection (d) of this section.”

1981—Subsec. (a). Pub. L. 97–35, §948(a), (b), in par. (2) inserted reference to copy of the report, if any, filed with the Health Care Financing Administration, and in par. (3)(B) reorganized excluding provisions and, among revisions, inserted salaries paid to employees for services.

Subsec. (b)(1). Pub. L. 97–35, §948(c), inserted “responsible for management or administration’’ after “employee’’.

Subsec. (b)(4). Pub. L. 97–35, §948(d), substituted “spouse, child, or parent’’ for “member of the immediate family’’.

EFFECTIVE DATE OF 1986 AMENDMENT

SUBCHAPTER XII—SAFETY OF PUBLIC WATER SYSTEMS

PART A—DEFINITIONS

§ 300f. Definitions

For purposes of this subchapter:

1(1) The term “primary drinking water regulation’’ means a regulation which—

(A) applies to public water systems;

(B) specifies contaminants which, in the judgment of the Administrator, may have any adverse effect on the health of persons;

(C) specifies for each such contaminant either—

(i) a maximum contaminant level, if, in the judgment of the Administrator, it is economically and technologically feasible to ascertain the level of such contaminant in water in public water systems, or

(ii) if, in the judgment of the Administrator, it is not economically or technologically feasible to so ascertain the level of such contaminant, each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1 of this title; and

(D) contains criteria and procedures to assure a supply of drinking water which dependably complies with such maximum contaminant levels; including accepted methods for quality control and testing procedures to insure compliance with such levels and to insure proper operation and maintenance of the system, and requirements as to (i) the minimum quality of water which may be taken into the system and (ii) siting for new facilities for public water systems.

At any time after promulgation of a regulation referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation.

2(2) The term “secondary drinking water regulation’’ means a regulation which applies to public water systems and which specifies the maximum contaminant levels which, in the judgment of the Administrator, are requisite to protect the public welfare. Such regulations may apply to any contaminant in drinking water (A) which may adversely affect the odor or appearance of such water and consequently may cause a substantial number of the persons served by the public water system providing such water to discontinue its use, or (B) which may otherwise adversely affect the public welfare. Such regulations may vary according to geographic and other circumstances.

3(3) The term “maximum contaminant level’’ means the maximum permissible level of a contaminant in water which is delivered to any user of a public water system.

4(4) PUBLIC WATER SYSTEM.—

(A) IN GENERAL.—The term “public water system’’ means a system for the provision to
the public of water for human consumption through pipes or other constructed conveyances, if such system has at least fifteen service connections or regularly serves at least twenty-five individuals. Such term includes (i) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (ii) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.

(B) CONNECTIONS.—

(i) IN GENERAL.—For purposes of subparagraph (A), a connection to a system that delivers water by a constructed conveyance other than a pipe shall not be considered a connection, if—

(I) the water is used exclusively for purposes other than residential uses (consisting of drinking, bathing, and cooking, or other similar uses);

(II) the Administrator or the State (in the case of a State exercising primary enforcement responsibility for public water systems) determines that alternative water to achieve the equivalent level of public health protection provided by the applicable national primary drinking water regulation is provided for residential or similar uses for drinking and cooking; or

(III) the Administrator or the State (in the case of a State exercising primary enforcement responsibility for public water systems) determines that the water provided for residential or similar uses for drinking, cooking, and bathing is centrally treated or treated at the point of entry by the provider, a pass-through entity, or the user to achieve the equivalent level of protection provided by the applicable national primary drinking water regulations.

(ii) IRRIGATION DISTRICTS.—An irrigation district in existence prior to May 18, 1994, that provides primarily agricultural service through a piped water system with only incidental residential or similar use shall not be considered to be a public water system if the system or the residential or similar users of the system comply with subclause (II) or (III) of clause (i).

(C) TRANSITION PERIOD.—A water supplier that would be a public water system only as a result of modifications made to this paragraph by the Safe Drinking Water Act Amendments of 1996 shall not be considered a public water system for purposes of the Act until the date that is two years after August 6, 1996. If a water supplier does not serve 15 service connections (as defined in subparagraphs (A) and (B)) or 25 people at any time after the conclusion of the 2-year period, the water supplier shall not be considered a public water system.

The term “supplier of water” means any person who owns or operates a public water system.

(6) The term “contaminant” means any physical, chemical, biological, or radiological substance or matter in water.

(7) The term “Administrator” means the Administrator of the Environmental Protection Agency.

(8) The term “Agency” means the Environmental Protection Agency.

(9) The term “Council” means the National Drinking Water Advisory Council established under section 300j–5 of this title.

(10) The term “municipality” means a city, town, or other public body created by or pursuant to State law, or an Indian Tribe.

(11) The term “Federal agency” means any department, agency, or instrumentality of the United States.

(12) The term “person” means an individual, corporation, company, association, partnership, State, municipality, or Federal agency (and includes officers, employees, and agents of any corporation, company, association, State, municipality, or Federal agency).

(13) (A) Except as provided in subparagraph (B), the term “State” includes, in addition to the several States, only the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(B) For purposes of section 300j–12 of this title, the term “State” means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

(14) The term “Indian Tribe” means any Indian tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over any area. For purposes of section 300j–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).

(15) COMMUNITY WATER SYSTEM.—The term “community water system” means a public water system that—

(A) serves at least 15 service connections used by year-round residents of the area served by the system; or

(B) regularly serves at least 25 year-round residents.

(16) NONCOMMUNITY WATER SYSTEM.—The term “noncommunity water system” means a public water system that is not a community water system.

REFERENCES IN TEXT

referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation.

Par. (4). Pub. L. 104-182, §101(b)(1), designated existing provisions as subpar. (A), inserted par. and subpar. headings, redesignated former subpars. (A) and (B) as cl. (i) and (ii), respectively, substituted “water for human consumption through pipes or other constructed conveyances” for “piped water for human consumption in first sentence, and added subpars. (B) and (C).

Par. (13). Pub. L. 104-182, §101(a)(2), substituted “Indian Tribe” for “Indian tribal organization authorized by law”.

Par. (15). Pub. L. 104-182, §101(a)(3), inserted at end “For purposes of section 300j-12 of this title, the term includes any Native village (as defined in section 102(c) of title 43).”.

1986—Par. (10). Pub. L. 99-339, §302(b)(2), substituted “(10) consumers served by public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements;” for “(10) consumers served by public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements;”.

1977—Par. (12). Pub. L. 95-190 expanded definition of “person to include Federal agency, and officers, employees, and agents of any corporation, company, etc.”.

1976—Par. (13). Pub. L. 94-184 defined “State” to include Northern Mariana Islands.

Pub. L. 94-517 added par. (13).

**EFFECTIVE DATE OF 1996 AMENDMENT**

Section 2(b) of Pub. L. 104-182 provided that: “Except as otherwise specified in this Act [enacting sections 300g-7 to 300g-9, 300h-8, 300i-3c, and 300j-12 to 300j-18 of this title and section 1263a of Title 33, Navigation and Navigable Waters, amending this section, sections 300g-1 to 300g-6, 300h-5 to 300h-7, 300i-1, 300j to 300j-2, 300j-4 to 300j-8, 300j-11, and 300j-21 to 300j-25 of this title, sections 4701 and 4721 of Title 16, Conservation, and section 349 of Title 21, Food and Drugs, repealing section 13516 of this title, enacting provisions set out as notes under this section, sections 201, 300g-1, 300j-1, and 300j-12 of this title, section 1281 of Title 33, and section 45 of former Title 40, Public Buildings, Property, and Works, and amending provisions set out as a note under section 201 of this title] or in the amendments made by this Act, this Act and the amendments made by this Act shall take effect on the date of enactment of this Act [Aug. 6, 1996].”

**SHORT TITLE**

This subchapter is known as the “Safe Drinking Water Act”, see note set out under section 201 of this title.

**TERMINATION OF TRUST TERRITORY OF THE PACIFIC ISLANDS**

For termination of Trust Territory of the Pacific Islands, see note set out preceding section 1681 of Title 48, Territories and Insular Possessions.

**EFFECT OF PUBLIC LAW 104-182 ON FEDERAL WATER POLLUTION CONTROL ACT**

Section 2(c) of Pub. L. 104-182 provided that: “Except for the provisions of section 302 [42 U.S.C. 300-12 note] (relating to transfers of funds), nothing in this Act [see Effective Date of 1996 Amendment above] or in any amendments made by this Act to title XIV of the Public Health Service Act [this subchapter] (commonly known as the ‘Safe Drinking Water Act’) or any other law shall be construed by the Administrator of the Environmental Protection Agency or the courts as affecting, modifying, expanding, changing, or altering—“(1) the provisions of the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.]; “(2) the duties and responsibilities of the Administrator under that Act; “(3) the regulation or control of point or nonpoint sources of pollution discharged into waters covered by that Act. The Administrator shall identify in the agency’s annual budget all funding and full-time equivalents administering such title XIV separately from funding and staffing for the Federal Water Pollution Control Act.”

**CONGRESSIONAL FINDINGS**

Section 3 of Pub. L. 104-182 provided that: “The Congress finds that—“(1) safe drinking water is essential to the protection of public health; “(2) because the requirements of the Safe Drinking Water Act [42 U.S.C. 300f et seq.] now exceed the financial and technical capacity of some public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements; “(3) the Federal Government commits to maintaining and improving its partnership with the States in the administration and implementation of the Safe Drinking Water Act; “(4) States play a central role in the implementation of safe drinking water programs, and States need increased financial resources and appropriate flexibility to ensure the prompt and effective development and implementation of drinking water programs; “(5) the existing process for the assessment and selection of additional drinking water contaminants needs to be revised and improved to ensure that there is a sound scientific basis for setting priorities in establishing drinking water regulations; “(6) procedures for assessing the health effects of contaminants establishing drinking water standards should be revised to provide greater opportunity for public education and participation; “(7) in considering the appropriate level of regulation for contaminants in drinking water, risk assessment, based on sound and objective science, and benefit-cost analysis are important analytical tools for improving the efficiency and effectiveness of drinking water regulations to protect public health; “(8) more effective protection of public health requires— “(A) a Federal commitment to set priorities that will allow scarce Federal, State, and local resources to be targeted toward the drinking water problems of greatest public health concern; “(B) maximizing the value of the different and complementary strengths and responsibilities of the Federal and State governments in those States that have primary enforcement responsibility for the Safe Drinking Water Act; and “(C) prevention of drinking water contamination through well-trained system operators, water systems with adequate managerial, technical, and financial capacity, and enhanced protection of source waters of public water systems; “(9) compliance with the requirements of the Safe Drinking Water Act continues to be a concern at public water systems experiencing technical and financial limitations, and Federal, State, and local governments need more resources and more effective authority to attain the objectives of the Safe Drinking Water Act; and “(10) consumers served by public water systems should be provided with information on the source of the water they are drinking and its quality and safety, as well as prompt notification of any violation of drinking water regulations.”

**GAO STUDY**

“(A) ascertain the numbers and locations of individuals and households relying for their residential water needs, including drinking, bathing, and cooking (or other similar uses) on irrigation water systems, mining water systems, industrial water systems, or other water systems covered by section 1401(4)(B) of the Safe Drinking Water Act (par. (4)(B) of this section) that are not public water systems subject to the Safe Drinking Water Act (this subchapter);

“(B) determine the sources and costs and affordability (to users and systems) of water used by such populations for their residential needs; and

“(C) review State and water system compliance with the exclusion provisions of section 1401(4)(B) of such Act.

The Comptroller General shall submit a report to the Congress within 3 years after the date of enactment of this Act [Aug. 6, 1996] containing the results of such study.”

SAFE DRINKING WATER AMENDMENTS OF 1977

Restrictions on Appropriations for Research

Pub. L. 95–190, §2(e), Nov. 16, 1977, 91 Stat. 1393, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to authorize the appropriation of any amount for research under title XIV of the Public Health Service Act (this subchapter) (relating to safe drinking water).”

SAFE DRINKING WATER AMENDMENTS OF 1977 AS NOT AFFECTING AUTHORITY OF ADMINISTRATOR WITH RESPECT TO CONTAMINANTS

Pub. L. 95–190, §3(e)(2), Nov. 16, 1977, 91 Stat. 1394, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to alter or affect the Administrator's authority or duty under title 14 of the Public Health Service Act (this subchapter) to promulgate regulations or take other action with respect to any contaminant.”

RURAL WATER SURVEY; REPORT TO PRESIDENT AND CONGRESS; AUTHORIZATION OF APPROPRIATIONS

Section 3 of Pub. L. 93–523, as amended by Pub. L. 95–190, §§2(d), 3(d), Nov. 16, 1977, 91 Stat. 1393, 1394, directed Administrator of Environmental Protection Agency, after consultation with Secretary of Agriculture and the several States, to enter into arrangements with public or private entities to conduct a survey of quantity, quality, and availability of rural drinking water supplies, which survey was to include, but not be limited to, consideration of number of residents in each rural area who presently are being inadequately served by a public or private drinking water supply system, or by an individual home drinking water supply system, or who presently have limited or otherwise inadequate access to drinking water, or who, due to absence or inadequacy of a drinking water supply system, are exposed to an increased health hazard, and who have experienced incidents of chronic or acute illness, which may be attributed to inadequacy of a drinking water supply system. Survey to be completed within eighteen months of Dec. 16, 1974, and a final report thereon submitted, not later than six months after completion of survey, to President and to Congress.

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

TERMINATION OF ADVISORY COMMITTEES

Pub. L. 93–641, §6, Jan. 4, 1975, 88 Stat. 2275, set out as a note under section 217a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1975.

PART B—PUBLIC WATER SYSTEMS

§300g. Coverage

Subject to sections 300g–4 and 300g–5 of this title, national primary drinking water regulations under this part shall apply to each public water system in each State; except that such regulations shall not apply to a public water system—

(1) which consists only of distribution and storage facilities (and does not have any collection and treatment facilities);

(2) which obtains all of its water from, but is not owned or operated by, a public water system to which such regulations apply;

(3) which does not sell water to any person; and

(4) which is not a carrier which conveys passengers in interstate commerce.

(July 1, 1944, ch. 373, title XIV, §1411, as added Pub. L. 93–523, §2(a), Dec. 16, 1974, 88 Stat. 1662.)

§300g–1. National drinking water regulations

(a) National primary drinking water regulations; maximum contaminant level goals; simultaneous publication of regulations and goals

(1) Effective on June 19, 1986, each national interim or revised primary drinking water regulation promulgated under this section before June 19, 1986, shall be deemed to be a national primary drinking water regulation under subsection (b) of this section. No such regulation shall be required to comply with the standards set forth in subsection (b)(4) of this section unless such regulation is amended to establish a different maximum contaminant level after June 19, 1986.

(2) After June 19, 1986, each recommended maximum contaminant level published before June 19, 1986, shall be treated as a maximum contaminant level goal.

(3) Whenever a national primary drinking water regulation is proposed under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be proposed simultaneously. Whenever a national primary drinking water regulation is promulgated under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be published simultaneously.

(4) Paragraph (3) shall not apply to any recommended maximum contaminant level published before June 19, 1986.

(b) Standards

(1) IDENTIFICATION OF CONTAMINANTS FOR LISTING—

(A) General Authority.—The Administrator shall, in accordance with the procedures established by this subsection, publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for a contaminant (other than a contaminant referred to in paragraph (2) for which a national primary drinking water regulation has been
§ 300g–1

promulgated as of August 6, 1996) if the Administrator determines that—

(i) the contaminant may have an adverse effect on the health of persons;

(ii) the contaminant is known to occur or there is a substantial likelihood that the contaminant will occur in public water systems with a frequency and at levels of public health concern; and

(iii) in the sole judgment of the Administrator, regulation of such contaminant presents a meaningful opportunity for health risk reduction for persons served by public water systems.

(B) REGULATION OF UNREGULATED CONTAMINANTS.—

(i) LISTING OF CONTAMINANTS FOR CONSIDERATION.—(I) Not later than 18 months after August 6, 1996, and every 5 years thereafter, the Administrator, after consultation with the scientific community, including the Science Advisory Board, after notice and opportunity for public comment, and after considering the occurrence data base established under section 300j–4(g) of this title, shall publish a list of contaminants which, at the time of publication, are not subject to any proposed or promulgated national primary drinking water regulation, which are known or anticipated to occur in public water systems, and which may require regulation under this subchapter.

(II) The unregulated contaminants considered under subclause (I) shall include, but not be limited to, substances referred to in section 9601(14) of this title, and substances registered as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.).

(III) The Administrator’s decision whether or not to select an unregulated contaminant for a list under this clause shall not be subject to judicial review.

(ii) DETERMINATION TO REGULATE.—(I) Not later than 5 years after August 6, 1996, and every 5 years thereafter, the Administrator shall, after notice of the preliminary determination and opportunity for public comment, for not fewer than 5 contaminants included on the list published under clause (i), make determinations of whether or not to regulate such contaminants.

(II) A determination to regulate a contaminant shall be based on findings that the criteria of clauses (i), (ii), and (iii) of subclause (A) are satisfied. Such findings shall be based on the best available public health information, including the occurrence data base established under section 300j–4(g) of this title.

(III) The Administrator may make a determination to regulate a contaminant that does not appear on a list under clause (i) if the determination to regulate is made pursuant to subclause (II).

(IV) A determination under this clause not to regulate a contaminant shall be considered final agency action and subject to judicial review.

(iii) REVIEW.—Each document setting forth the determination for a contaminant under clause (ii) shall be available for public comment at such time as the determination is published.

(C) PRIORITIES.—In selecting unregulated contaminants for consideration under subparagraph (B), the Administrator shall select contaminants that present the greatest public health concern. The Administrator, in making such selection, shall take into consideration, among other factors of public health concern, the effect of such contaminants upon subgroups that comprise a meaningful portion of the general population (such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations) that are identifiable as being at greater risk of adverse health effects due to exposure to contaminants in drinking water than the general population.

(D) URGENT THREATS TO PUBLIC HEALTH.—The Administrator may promulgate an interim national primary drinking water regulation for a contaminant without making a determination for the contaminant under paragraph (3)(C), or completing the analysis under paragraph (3)(C), to address an urgent threat to public health as determined by the Administrator after consultation with and written response to any comments provided by the Secretary of Health and Human Services, acting through the director of the Centers for Disease Control and Prevention or the director of the National Institutes of Health. A determination for any contaminant in accordance with paragraph (3)(C) subject to an interim regulation under this subparagraph shall be issued, and a completed analysis meeting the requirements of paragraph (3)(C) shall be published, not later than 3 years after the date on which the regulation is promulgated and the regulation shall be repromulgated, or revised if appropriate, not later than 5 years after that date.

(E) REGULATION.—For each contaminant that the Administrator determines to regulate under subparagraph (B), the Administrator shall publish a maximum contaminant level goal and promulgate, by rule, a national primary drinking water regulation for a contaminant not later than 24 months after the determination to regulate under subparagraph (B), and may publish such proposed regulation concurrent with the determination to regulate. The Administrator shall propose the maximum contaminant level goal and national primary drinking water regulation for a contaminant not later than 24 months after the determination to regulate under subparagraph (B), and may publish such proposed regulation concurrent with the determination to regulate. The Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation within 18 months after the proposal thereof. The Administrator, by notice in the Federal Register, may extend the deadline for such promulgation for up to 9 months.

(F) HEALTH ADVISORIES AND OTHER ACTIONS.—The Administrator may publish health advisories (which are not regulations) or take other appropriate actions for contaminants not subject to any national primary drinking water regulation.

(2) SCHEDULES AND DEADLINES.—

(A) IN GENERAL.—In the case of the contaminants listed in the Advance Notice of Proposed
Rulemaking published in volume 47, Federal Register, page 9352, and in volume 48, Federal Register, page 45502, the Administrator shall publish maximum contaminant level goals and promulgate national primary drinking water regulations:

(i) not later than 1 year after June 19, 1986, for not fewer than 9 of the listed contaminants;

(ii) not later than 2 years after June 19, 1986, for not fewer than 40 of the listed contaminants; and

(iii) not later than 3 years after June 19, 1986, for the remainder of the listed contaminants.

(B) SUBSTITUTION OF CONTAMINANTS.—If the Administrator identifies a drinking water contaminant the regulation of which, in the judgment of the Administrator, is more likely to be protective of public health (taking into account the schedule for regulation under subparagraph (A)) than a contaminant referred to in subparagraph (A), the Administrator may publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for the identified contaminant in lieu of regulating the contaminant referred to in subparagraph (A). Substitutions may be made for not more than 7 contaminants referred to in subparagraph (A). Regulation of a contaminant identified under this subparagraph shall be in accordance with the schedule applicable to the contaminant for which the substitution is made.

(C) DISINFECTANTS AND DISINFECTION BYPRODUCTS.—The Administrator shall promulgate an Interim Enhanced Surface Water Treatment Rule, a Stage I Disinfectants and Disinfection Byproducts Rule, and a Stage II Disinfectants and Disinfection Byproducts Rule in accordance with the schedule published in volume 59, Federal Register, page 6361 (February 10, 1994), in table III.13 of the proposed Information Collection Rule. If a delay occurs with respect to the promulgation of any rule in the schedule referred to in this subparagraph, all subsequent rules shall be completed as expeditiously as practicable but no later than a revised date that reflects the interval in resolving the uncertainty; and use for the purposes of paragraphs (4), (5), and (6) an analysis of each of the following:

(I) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur as the result of treatment to comply with each level.

(II) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur from reductions in co-occurring contaminants that may be attributed solely to compliance with the maximum contaminant level, excluding benefits resulting from compliance with other proposed or promulgated regulations.

(III) Quantifiable and nonquantifiable costs for which there is a factual basis in the rulemaking record to conclude that such costs are likely to occur solely as a result of compliance with the maximum contaminant level, including monitoring, treatment, and other costs and excluding costs resulting from compliance with other proposed or promulgated regulations.

(IV) The incremental costs and benefits associated with each alternative maximum contaminant level considered.

(V) The effects of the contaminant on the general population and on groups within the general population such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that are identified as likely to be at greater risk of adverse health effects due to exposure to contami-
§ 300g–1

(4) GOALS AND STANDARDS.—

(A) MAXIMUM CONTAMINANT LEVEL GOALS.—Each maximum contaminant level goal established under this subsection shall be set at the level at which no known or anticipated adverse effects on the health of persons occur and which allows an adequate margin of safety.

(B) MAXIMUM CONTAMINANT LEVELS.—Except as provided in paragraphs (5) and (6), each national primary drinking water regulation for a contaminant for which a maximum contaminant level goal is established under this subsection shall specify a maximum contaminant level for such contaminant which is as close to the maximum contaminant level goal as is feasible.

(C) DETERMINATION.—At the time the Administrator proposes a national primary drinking water regulation under this paragraph, the Administrator shall publish and seek public comment on an analysis of the health risk reduction benefits and costs likely to be experienced as the result of compliance with the treatment technique and alternative treatment techniques that are being considered, taking into account, as appropriate, the factors described in clause (i).

(ii) TREATMENT TECHNIQUES.—When proposing a national primary drinking water regulation which establishes a maximum contaminant level shall list the technology, treatment technique, or other means which the Administrator finds to be feasible for purposes of meeting such maximum contaminant level, but a regulation under this subsection shall not require that any specified technology, treatment technique, or other means be used for purposes of meeting such maximum contaminant level.

(iii) LIST OF TECHNOLOGIES.—The Administrator shall publish and seek public comment on an analysis of the health risk reduction benefits and costs likely to be experienced as the result of compliance with the treatment technique and alternative treatment techniques that are being considered, taking into account, as appropriate, the factors described in clause (i).
(v), not later than 2 years after August 6, 1996, and after consultation with the States, the Administrator shall issue a list of technologies that achieve compliance with the maximum contaminant level or treatment technique for each category of public water systems described in subclauses (I), (II), and (III) of clause (i) for each national primary drinking water regulation promulgated prior to June 19, 1986.

(iv) ADDITIONAL TECHNOLOGIES.—The Administrator may, at any time after a national primary drinking water regulation has been promulgated, supplement the list of technologies describing additional or new or innovative treatment technologies that meet the requirements of this paragraph for categories of small public water systems described in subclauses (I), (II), and (III) of clause (i) that are subject to the regulation.

(v) TECHNOLOGIES THAT MEET SURFACE WATER TREATMENT RULE.—Within one year after August 6, 1996, the Administrator shall list technologies that meet the Surface Water Treatment Rule for each category of public water systems described in subclauses (I), (II), and (III) of clause (i).

(5) ADDITIONAL HEALTH RISK CONSIDERATIONS.—

(A) IN GENERAL.—Notwithstanding paragraph (4), the Administrator may establish a maximum contaminant level for a contaminant at a level other than the feasible level, if the technology, treatment techniques, and other means used to determine the feasible level would result in an increase in the health risk from drinking water by—

(i) increasing the concentration of other contaminants in drinking water; or

(ii) interfering with the efficacy of drinking water treatment techniques or processes that are used to comply with other national primary drinking water regulations.

(B) ESTABLISHMENT OF LEVEL.—If the Administrator establishes a maximum contaminant level or levels or requires the use of treatment techniques for any contaminant or contaminants pursuant to the authority of this paragraph—

(i) the level or levels or treatment techniques shall minimize the overall risk of adverse health effects by balancing the risk from the contaminant and the risk from other contaminants the concentrations of which may be affected by the use of a treatment technique or process that would be employed to attain the maximum contaminant level or levels; and

(ii) the combination of technology, treatment techniques, or other means required to meet the level or levels shall not be more stringent than is feasible (as defined in paragraph (4)(D)).

(6) ADDITIONAL HEALTH RISK REDUCTION AND COST CONSIDERATIONS.—

(A) IN GENERAL.—Notwithstanding paragraph (4), if the Administrator determines based on an analysis conducted under paragraph (3)(C) that the benefits of a maximum contaminant level promulgated in accordance with paragraph (4) would not justify the costs of complying with the level, the Administrator may, after notice and opportunity for public comment, promulgate a maximum contaminant level for the contaminant that maximizes health risk reduction benefits at a cost that is justified by the benefits.

(B) EXCEPTION.—The Administrator shall not use the authority of this paragraph to promulgate a maximum contaminant level for a contaminant, if the benefits of compliance with a national primary drinking water regulation for the contaminant that would be promulgated in accordance with paragraph (4) experienced by—

(i) persons served by large public water systems; and

(ii) persons served by such other systems as are unlikely, based on information provided by the States, to receive a variance under section 300g–4(e) of this title (relating to small system variances);

would justify the costs to the systems of complying with the regulation. This subparagraph shall not apply if the contaminant is found almost exclusively in small systems eligible under section 300g–4(e) of this title for a small system variance.

(C) DISINFECTANTS AND DISINFECTION BYPRODUCTS.—The Administrator may not use the authority of this paragraph to establish a maximum contaminant level in a Stage I or Stage II national primary drinking water regulation (as described in paragraph (2)(C)) for contaminants that are disinfectants or disinfection byproducts, or to establish a maximum contaminant level or treatment technique requirement for the control of cryptosporidium. The authority of this paragraph may be used to establish regulations for the use of disinfection by systems relying on ground water sources as required by paragraph (8).

(D) JUDICIAL REVIEW.—A determination by the Administrator that the benefits of a maximum contaminant level or treatment requirement justify or do not justify the costs of complying with the level shall be reviewed by the court pursuant to section 300j–7 of this title only as part of a review of a final national primary drinking water regulation that has been promulgated based on the determination and shall not be set aside by the court under that section unless the court finds that the determination is arbitrary and capricious.

(7)(A) The Administrator is authorized to promulgate a national primary drinking water regulation that requires the use of a treatment technique in lieu of establishing a maximum contaminant level, if the Administrator makes a finding that it is not economically or technologically feasible to ascertain the level of the contaminant. In such case, the Administrator shall identify those treatment techniques which, in the Administrator's judgment, would prevent known or anticipated adverse effects on the health of persons to the extent feasible. Such regulations shall specify each treatment technique known to the Administrator which meets the requirements of this paragraph, but the Administrator may grant a variance from any specified treatment technique in accordance with section 300g–4(a)(3) of this title.
(B) Any schedule referred to in this subsection for the promulgation of a national primary drinking water regulation for any contaminant shall apply in the same manner if the regulation requires a treatment technique in lieu of establishing a maximum contaminant level.

(C)(i) Not later than 18 months after June 19, 1986, the Administrator shall propose and promulgate national primary drinking water regulations specifying criteria under which filtration (including coagulation and sedimentation, as appropriate) is required as a treatment technique for public water systems supplied by surface water sources. In promulgating such rules, the Administrator shall consider the quality of source waters, protection afforded by watershed management, treatment practices (such as disinfection and length of water storage) and other factors relevant to protection of health.

(ii) In lieu of the provisions of section 300g–4 of this title the Administrator shall specify procedures by which the State determines which public water systems within its jurisdiction shall add filtration under the criteria of clause (i). The State may require the public water system to provide studies or other information to assist in this determination. The procedures shall provide notice and opportunity for public hearing on this determination. If the State determines that filtration is required, the State shall prepare a schedule for compliance by the public water system with the filtration requirement. A schedule shall require compliance within 18 months of a determination made under clause (iii).

(iii) Within 18 months from the time that the Administrator establishes the criteria and procedures under this subparagraph, a State with primary enforcement responsibility shall adopt any necessary regulations to implement this subparagraph. Within 12 months of adoption of such regulations the State shall make determinations regarding filtration for all the public water systems within its jurisdiction supplied by surface waters.

(iv) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the authority to make the determination in clause (ii) in such State as the State would have under that clause. Any filtration requirement or schedule under this subparagraph shall be treated as if it were a requirement of a national primary drinking water regulation.

(v) As an additional alternative to the regulations promulgated pursuant to clauses (i) and (iii), including the criteria for avoiding filtration contained in 40 CFR 141.71, a State exercising primary enforcement responsibility for public water systems may, on a case-by-case basis, and after notice and opportunity for public comment, establish treatment requirements as an alternative to filtration in the case of systems having uninhabited, undeveloped watersheds in consolidated ownership, and having control over access to, and activities in, those watersheds, if the State determines (and the Administrator concurs) that the quality of the source water and the alternative treatment requirements established by the State ensure greater removal or inactivation efficiencies of pathogenic organisms for which national primary drinking water regulations have been promulgated or that are of public health concern than would be achieved by the combination of filtration and chlorination disinfection (in compliance with this section).

(8) DISINFECTION.—At any time after the end of the 3-year period that begins on August 6, 1996, but not later than the date on which the Administrator promulgates a Stage II rulemaking for disinfectants and disinfection byproducts (as described in paragraph (2)(C)), the Administrator shall also promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems, including surface water systems and, as necessary, ground water systems. After consultation with the States, the Administrator shall (as part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g–2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water. The Administrator shall simultaneously promulgate a rule specifying criteria that will be used by the Administrator (or delegated State authorities) to grant variances from this requirement according to the provisions of sections 300g–4(a)(1)(B) and 300g–4(a)(3) of this title. In implementing section 300j–1(e) of this title the Administrator or the delegated State authority shall, where appropriate, give special consideration to providing technical assistance to small public water systems in complying with the regulations promulgated under this paragraph.

(9) REVIEW AND REVISION.—The Administrator shall, not less often than every 6 years, review and revise, as appropriate, each national primary drinking water regulation promulgated under this subchapter. Any revision of a national primary drinking water regulation shall be promulgated in accordance with this section, except that each revision shall maintain, or provide for greater, protection of the health of persons.

(10) EFFECTIVE DATE.—A national primary drinking water regulation promulgated under this section (and any amendment thereto) shall take effect on the date that is 3 years after the date on which the regulation is promulgated unless the Administrator determines that an earlier date is practicable, except that the Administrator, or a State (in the case of an individual system), may allow up to 2 additional years to comply with a maximum contaminant level or treatment technique if the Administrator or State (in the case of an individual system) determines that additional time is necessary for capital improvements.

(11) No national primary drinking water regulation may require the addition of any substance for preventive health care purposes unrelated to contamination of drinking water.

(12) CERTAIN CONTAMINANTS.—

(A) ARSENIC.—

(i) SCHEDULE AND STANDARD.—Notwithstanding the deadlines set forth in paragraph (1), the Administrator shall promulgate a national primary drinking water regulation
for arsenic pursuant to this subsection, in accordance with the schedule established by this paragraph.

(ii) Study Plan.—Not later than 180 days after August 6, 1996, the Administrator shall develop a comprehensive plan for study in support of drinking water rulemaking to reduce the uncertainty in assessing health risks associated with exposure to low levels of arsenic. In conducting such study, the Administrator shall consult with the National Academy of Sciences, other Federal agencies, and interested public and private entities.

(iii) Cooperative Agreements.—In carrying out the study plan, the Administrator may enter into cooperative agreements with other Federal agencies, State and local governments, and other interested public and private entities.

(iv) Proposed Regulations.—The Administrator shall propose a national primary drinking water regulation for arsenic not later than January 1, 2000.

(v) Final Regulations.—Not later than January 1, 2001, after notice and opportunity for public comment, the Administrator shall promulgate a national primary drinking water regulation for arsenic.

(vi) Authorization.—There are authorized to be appropriated $2,500,000 for each of fiscal years 1997 through 2000 for the studies required by this paragraph.

(B) Sulfate.—

(i) Additional Study.—Prior to promulgating a national primary drinking water regulation for sulfate, the Administrator and the Director of the Centers for Disease Control and Prevention shall jointly conduct an additional study to establish a reliable dose-response relationship for the adverse human health effects that may result from exposure to sulfate in drinking water, including the health effects that may be experienced by groups within the general population (including infants and travelers) that are potentially at greater risk of adverse health effects as the result of such exposure. The study shall be conducted in consultation with interested States, shall be based on the best available, peer-reviewed science and supporting studies conducted in accordance with sound and objective scientific practices, and shall be completed not later than 30 months after August 6, 1996.

(ii) Determination.—The Administrator shall include sulfate among the 5 or more contaminants for which a determination is made pursuant to paragraph (3)(B) not later than 5 years after August 6, 1996.

(iii) Proposed and Final Rule.—Notwithstanding the deadlines set forth in paragraph (2), the Administrator may, pursuant to the authorities of this subsection and after notice and opportunity for public comment, promulgate a final national primary drinking water regulation for sulfate. Any such regulation shall include requirements for public notification and options for the provision of alternative water supplies to populations at risk as a means of complying with the regulation in lieu of a best available treatment technology or other means.

(13) Radon in Drinking Water.—

(A) National Primary Drinking Water Regulation.—Notwithstanding paragraph (2), the Administrator shall withdraw any national primary drinking water regulation for radon proposed prior to August 6, 1996, and shall propose and promulgate a regulation for radon under this section, as amended by the Safe Drinking Water Act Amendments of 1996.

(B) Risk Assessment and Studies.—

(i) Assessment by NAS.—Prior to proposing a national primary drinking water regulation for radon, the Administrator shall arrange for the National Academy of Sciences to prepare a risk assessment for radon in drinking water using the best available science in accordance with the requirements of paragraph (3). The risk assessment shall consider each of the risks associated with exposure to radon from drinking water and consider studies on the health effects of radon at levels and under conditions likely to be experienced through residential exposure. The risk assessment shall be peer-reviewed.

(ii) Study of Other Measures.—The Administrator shall arrange for the National Academy of Sciences to prepare an assessment of the health risk reduction benefits associated with various mitigation measures to reduce radon levels in indoor air. The assessment may be conducted as part of the risk assessment authorized by clause (i) and shall be used by the Administrator to prepare the guidance and approve State programs under subparagraph (G).

(iii) Other Organization.—If the National Academy of Sciences declines to prepare the risk assessment or studies required by this subparagraph, the Administrator shall enter into a contract or cooperative agreement with another independent, scientific organization to prepare such assessments or studies.

(C) Health Risk Reduction and Cost Analysis.—Not later than 30 months after August 6, 1996, the Administrator shall publish, and seek public comment on, a health risk reduction and cost analysis meeting the requirements of paragraph (3)(C) for potential maximum contaminant levels that are being considered for radon in drinking water. The Administrator shall include a response to all significant public comments received on the analysis with the preamble for the proposed rule published under subparagraph (D).

(D) Proposed Regulation.—Not later than 36 months after August 6, 1996, the Administrator shall propose a maximum contaminant level goal and a national primary drinking water regulation for radon pursuant to this section.

(E) Final Regulation.—Not later than 12 months after the date of the proposal under subparagraph (D), the Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for radon pursuant to this
section based on the risk assessment prepared pursuant to subparagraph (B) and the health risk reduction and cost analysis published pursuant to subparagraph (C). In considering the risk assessment and the health risk reduction and cost analysis in connection with the promulgation of such a standard, the Administrator shall take into account the costs and benefits of control programs for radon from other sources.

(F) ALTERNATIVE MAXIMUM CONTAMINANT LEVEL.—If the maximum contaminant level for radon in drinking water promulgated pursuant to subparagraph (E) is more stringent than necessary to reduce the contribution to radon in indoor air from drinking water to a concentration that is equivalent to the national average concentration of radon in outdoor air, the Administrator shall, simultaneously with the promulgation of such level, promulgate an alternative maximum contaminant level for radon that would result in a contribution of radon from drinking water to radon levels in indoor air equivalent to the national average concentration of radon in outdoor air. If the Administrator promulgates an alternative maximum contaminant level under this subparagraph, the Administrator shall, after notice and opportunity for public comment and in consultation with the States, publish guidelines for State programs, including criteria for multimedia measures to mitigate radon levels in indoor air, to be used by the States in preparing programs under subparagraph (G). The guidelines shall take into account data from existing radon mitigation programs and the assessment of mitigation measures prepared under subparagraph (B).

(G) MULTIMEDIA RADON MITIGATION PROGRAMS.—

(i) IN GENERAL.—A State may develop and submit a multimedia program to mitigate radon levels in indoor air for approval by the Administrator under this subparagraph. If, after notice and the opportunity for public comment, such program is approved by the Administrator, public water systems in the State may comply with the alternative maximum contaminant level promulgated under subparagraph (F) in lieu of the maximum contaminant level in the national primary drinking water regulation promulgated under subparagraph (E).

(ii) ELEMENTS OF PROGRAMS.—State programs may rely on a variety of mitigation measures including public education, testing, training, technical assistance, remediation grant and loan or incentive programs, or other regulatory or nonregulatory measures. The effectiveness of elements in State programs shall be evaluated by the Administrator based on the assessment prepared by the National Academy of Sciences under subparagraph (B) and the guidelines published by the Administrator under subparagraph (F).

(iii) APPROVAL.—The Administrator shall approve a State program submitted under this paragraph if the health risk reduction benefits that would be achieved if each public water system in the State complied with the maximum contaminant level promulgated under subparagraph (E). The Administrator shall approve or disapprove a program submitted under this paragraph within 180 days of receipt. A program that is not disapproved during such period shall be deemed approved. A program that is disapproved may be modified to address the objections of the Administrator and be resubmitted for approval.

(iv) REVIEW.—The Administrator shall periodically, but not less often than every 5 years, review each multimedia mitigation program approved under this subparagraph to determine whether it continues to meet the requirements of clause (iii) and shall, after written notice to the State and an opportunity for the State to correct any deficiency in the program, withdraw approval of programs that no longer comply with such requirements.

(v) EXTENSION.—If, within 90 days after the promulgation of an alternative maximum contaminant level under subparagraph (F), the Governor of a State submits a letter to the Administrator committing to develop a multimedia mitigation program under this subparagraph, the effective date of the national primary drinking water regulation for radon in the State that would be applicable under paragraph (10) shall be extended for a period of 18 months.

(vi) LOCAL PROGRAMS.—In the event that a State chooses not to submit a multimedia mitigation program for approval under this subparagraph or has submitted a program that has been disapproved, any public water system in the State may submit a program for approval by the Administrator according to the same criteria, conditions, and approval process that would apply to a State program. The Administrator shall approve a multimedia mitigation program if the health risk reduction benefits expected to be achieved by the program are equal to or greater than the health risk reduction benefits that would result from compliance by the public water system with the maximum contaminant level for radon promulgated under subparagraph (E).

(14) RECYCLING OF FILTER BACKWASH.—The Administrator shall promulgate a regulation to govern the recycling of filter backwash water within the treatment process of a public water system. The Administrator shall promulgate such regulation not later than 4 years after August 6, 1996, unless such recycling has been addressed by the Administrator’s Enhanced Surface Water Treatment Rule prior to such date.

(15) VARIANCE TECHNOLOGIES.—

(A) IN GENERAL.—At the same time as the Administrator promulgates a national primary drinking water regulation for a contaminant pursuant to this section, the Administrator shall issue guidance or regulations describing the best treatment technologies, treatment techniques, or other means (referred to in this paragraph as “variance technology”) for the contaminant that the Admini-
istrator finds, after examination for efficacy under field conditions and not solely under laboratory conditions, are available and affordable, as determined by the Administrator in consultation with the States, for public water systems of varying size, considering the quality of the source water to be treated. The Administrator shall identify such variance technologies for public water systems serving—

(i) a population of 10,000 or fewer but more than 3,300;
(ii) a population of 3,300 or fewer but more than 500; and
(iii) a population of 500 or fewer but more than 25,

if, considering the quality of the source water to be treated, no treatment technology is listed for public water systems of that size under paragraph (4)(E). Variance technologies identified by the Administrator pursuant to this paragraph may not achieve compliance with the maximum contaminant level or treatment technique requirement of such regulation, but shall achieve the maximum reduction or inactivation efficiency that is affordable considering the size of the system and the quality of the source water. The guidance or regulations shall not require the use of a technology from a specific manufacturer or brand.

(B) LIMITATION.—The Administrator shall not identify any variance technology under this paragraph, unless the Administrator has determined, considering the quality of the source water to be treated and the expected useful life of the technology, that the variance technology is protective of public health.

(C) ADDITIONAL INFORMATION.—The Administrator shall include in the guidance or regulations identifying variance technologies under this paragraph any assumptions supporting the public health determination referred to in subparagraph (B), where such assumptions concern the public water system to which the technology may be applied, or its source waters. The Administrator shall provide any assumptions used in determining affordability, taken into consideration the number of persons served by such systems. The Administrator shall provide as much reliable information as practicable on performance, effectiveness, limitations, costs, and other relevant factors including the applicability of variance technology to waters from surface and underground sources.

(D) REGULATIONS AND GUIDANCE.—Not later than 2 years after August 6, 1996, and after consultation with the States, the Administrator shall issue guidance or regulations under subparagraph (A) for each national primary drinking water regulation promulgated prior to August 6, 1996, for which a variance may be granted under section 300g–4(e) of this title. The Administrator may, at any time after a national primary drinking water regulation has been promulgated, issue guidance or regulations describing additional variance technologies. The Administrator shall, not less often than every 7 years, or upon receipt of a petition supported by substantial information, review variance technologies identified under this paragraph. The Administrator shall issue revised guidance or regulations if new or innovative variance technologies become available that meet the requirements of this paragraph and achieve an equal or greater reduction or inactivation efficiency than the variance technologies previously identified under this subparagraph. No public water system shall be required to replace a variance technology during the useful life of the technology for the sole reason that a more efficient variance technology has been listed under this subparagraph.

(c) Secondary regulations; publication of proposed regulations; promulgation; amendments

The Administrator shall publish proposed national secondary drinking water regulations within 270 days after December 16, 1974. Within 90 days after publication of any such regulation, he shall promulgate such regulation with such modifications as he deems appropriate. Regulations under this subsection may be amended from time to time.

(d) Regulations; public hearings; administrative consultations

Regulations under this section shall be prescribed in accordance with section 553 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section, the Administrator shall consult with the Secretary and the National Drinking Water Advisory Council.

(e) Science Advisory Board comments

The Administrator shall request comments from the Science Advisory Board (established under the Environmental Research, Development, and Demonstration Act of 1978) prior to proposal of a maximum contaminant level goal and national primary drinking water regulation. The Board shall respond, as it deems appropriate, within the time period applicable for promulgation of the national primary drinking water standard concerned. This subsection shall, under no circumstances, be used to delay final promulgation of any national primary drinking water standard.

REFERENCES IN TEXT

The Safe Drinking Water Act Amendments of 1996, referred to in subsec. (b)(13)(A), is Pub. L. 104–182, Aug. 6,

**AMENDMENTS**

Subsec. (b). Pub. L. 104–182, § 102(a), inserted heading.

Subsec. (b)(1), (2). Pub. L. 104–182, § 102(a), added paras. (1) and (2) and struck out former paras. (1) and (2), which related to publication of maximum contaminant level goals and promulgation of national primary drinking water regulations for certain listed contaminants or subclasses of contaminants.

Pub. L. 104–182, § 102(a), struck out par. (3) which related to publication of maximum contaminant level goals and promulgation of national primary drinking water regulations for contaminants, other than those referred to in pars. (1) or (2), which may have an adverse effect on human health and are known to occur in public water systems.

Subsec. (b)(4). Pub. L. 104–182, § 104(a)(1), designated first sentence as subpar. (A), inserted par. and subparagraph (A) headings, designated second sentence as subpar. (B), inserted subpar. (B) heading, substituted “Except as provided in paragraphs (5) and (6), each national” for “Each national” and “specify a maximum contaminant level” for “specify a maximum level”, and added subpar. (C).

Subsec. (b)(4)(D). Pub. L. 104–182, § 104(a)(2), redesignated par. (5) as subpar. (D) of par. (4), inserted subpar. heading, and substituted “this paragraph” for “paragraph (4)”.

Subsec. (b)(4)(E). Pub. L. 104–182, § 104(a)(5), (10), redesignated subpar. (6) as subpar. (E)(1) of par. (4), inserted subpar. and cl. headings, substituted “this subsection” for “this paragraph”, and added cl. (i) to (v).

Subsec. (b)(5). Pub. L. 104–182, § 104(a)(6), added subpar. (6). Promoted pars. (5) and (6) redesignated subpars. (D) and (E)(1), respectively, of par. (4).

Subsec. (b)(8). Pub. L. 104–182, § 109(a)(2), substituted “section 300g–1(c)” for “section 300g–1(c)”.

Prior to amendment, par. (10) read as follows: “(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.

(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means, which the Administrator determines are generally available (taking costs into consideration) on December 16, 1974.

(3) The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation.”

Subsec. (b)(11). Pub. L. 104–182, § 111(a), amended par. (11) generally. Prior to amendment, subsec. (a) read as follows:

“(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.

(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means, which the Administrator determines are generally available (taking costs into consideration) on December 16, 1974.

(3) The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation.”

1986—Subsec. (a). Pub. L. 99–339, § 101(a), amended subsec. (a) generally. Prior to amendment, subsec. (a) read as follows:

“(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.

(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means, which the Administrator determines are generally available (taking costs into consideration) on December 16, 1974.

(3) The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation.”

Subsec. (b)(1). Pub. L. 99–339, § 101(b), substituted provisions establishing standard setting schedules and deadlines for provisions relating to establishment of maximum contaminant levels and a list of contaminants with adverse effect but of undetermined levels.

Subsec. (b)(2). Pub. L. 99–339, § 101(b), substituted provisions authorizing the Administrator to substitute contaminants for those referred to in par. (1) and to supply a list of the contaminants proposed for substitution, with the decision of the Administrator to regulate such contaminant not subject to judicial review, for provisions which authorized the Administrator to publish in the Federal Register proposed revised national interim primary drinking water regulations and 180 days after the date of such proposed regulations to promulgate such revised regulations with modification as deemed appropriate.

Subsec. (b)(3). Pub. L. 99–339, § 101(b), substituted provisions directing the Administrator to publish maximum contaminant level goals and promulgate national primary drinking water regulations for contaminants, other than specified in par. (1) or (2), which may have an adverse effect on health and are known or anticipated to occur in public water systems, to establish an advisory working group to aid in establishing a list of such contaminants, and to publish, within a specified time, both proposed and final goals and regulations for provisions which required that revised national primary drinking water regulations specify a maximum contaminant level or require the use of treatment techniques for each contaminant, which level or technique
was to be as close to the recommended level or technique as feasible, and defined the term "feasible".

Subsec. (b)(4) to (11), Pub. L. 99-338, § 104(a), (d), added subsec. (d) to (11), redesignated former pars. (4) to (10), respectively, in par. (9) substituted "National" for "Revised National" and inserted provisions which relate to the request by the Administrator of comments by the Science Advisory Board prior to proposal of a maximum contaminant level and national primary drinking water regulation on disinfection byproducts which related to the development of the July 29, 1994, proposed national primary drinking water regulation for arsenic not later than June 22, 2001.

Applicability of Prior Requirements

Section 102(b) of Pub. L. 104-182 provided that: "The requirements of subparagraphs (C) and (D) of section 1412(b)(3) of the Safe Drinking Water Act [subsec. (b)(3)(C), (D) of this section] as in effect before the date of enactment of this Act [Aug. 6, 1996], and any obligation to promulgate regulations pursuant to such subparagraphs (C) and (D) of section 1412(b)(3) of the Safe Drinking Water Act, as amended [subsec. (b)(3)(C), (D) of this section], the Administrator shall promulgate a national primary drinking water regulation for arsenic not later than June 22, 2001."

Section 102(b) of Pub. L. 104-182 provided that: "The Administrator of the Environmental Protection Agency may use the authority of section 1412(b)(5) of the Safe Drinking Water Act [subsec. (b)(5) of this section] (as amended by this Act) to promulgate the Stage I and Stage II Disinfectants and Disinfection Byproducts Rules as proposed in volume 59, Federal Register, page 38668 (July 29, 1994)." The considerations used in the development of the July 29, 1994, proposed national primary drinking water regulation on disinfectants and disinfection byproducts shall be treated as consistent with such section 1412(b)(5) for purposes of such Stage I and Stage II rules.

§ 300g-2. State primary enforcement responsibility

(a) In general

For purposes of this subchapter, a State has primary enforcement responsibility for public water systems during any period for which the Administrator determines (pursuant to regulations prescribed under subsection (b) of this section) that such State—

(1) has adopted drinking water regulations that are no less stringent than the national primary drinking water regulations promulgated by the Administrator under subsections (a) and (b) of section 300g-1 of this title not later than 2 years after the date on which the regulations are promulgated by the Administrator, except that the Administrator may provide for an extension of not more than 2 years if, after submission and review of appropriate, adequate documentation from the State, the Administrator determines that the extension is necessary and justified;

(2) has adopted and is implementing adequate procedures for the enforcement of such State regulations, including conducting such monitoring and making such inspections as the Administrator may require by regulation;

(3) will keep such records and make such reports with respect to its activities under paragraphs (1) and (2) as the Administrator may require by regulation;

(4) if it permits variances or exemptions, or both, from the requirements of its drinking water regulations which meet the requirements of paragraph (1), permits such variances and exemptions under conditions and in a manner which is not less stringent than the conditions under, and in the manner in which variances and exemptions may be granted under sections 300g-4 and 300g-5 of this title;

(5) has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances including earthquakes, floods, hurricanes, and other natural disasters, as appropriate; and

(6) has adopted authority for administrative penalties (unless the constitution of the State prohibits the adoption of the authority) in a maximum amount—

(A) in the case of a system serving a population of more than 10,000, that is not less than $1,000 per day per violation; and

(B) in the case of any other system, that is adequate to ensure compliance (as determined by the State); except that a State may establish a maximum limitation on the total amount of administrative penalties that may be imposed on a public water system per violation.

(b) Regulations

(1) The Administrator shall, by regulation (proposed within 180 days of December 16, 1974), prescribe the manner in which a State may apply to the Administrator for a determination that the requirements of paragraphs (1), (2), (3), and (4) of subsection (a) of this section are satisfied with respect to the State, the manner in which the determination is made, the period for which the determination will be effective, and the manner in which the Administrator may determine that such requirements are no longer met. Such regulations shall require that before a determination of the Administrator that such requirements are met or are no longer met with respect to a State may become effective, the Administrator shall notify such State of the determination and the reasons therefor and shall provide an opportunity for public hearing on the determination. Such regulations shall be promulgated (with such modifications as the Administrator deems appropriate) within 90 days of the publication of the proposed regulations in the Federal Register. The Administrator shall promptly notify in writing the chief executive officer of each State of the promulgation of regulations under this paragraph. Such notice shall contain a copy of the regulations and shall...
specify a State's authority under this subchapter when it is determined to have primary enforcement responsibility for public water systems.

(2) When an application is submitted in accordance with the Administrator's regulations under paragraph (1), the Administrator shall within 90 days of the date on which such application is submitted (A) make the determination applied for, or (B) deny the application and notify the applicant in writing of the reasons for his denial.

(c) Interim primary enforcement authority

A State that has primary enforcement authority under this section with respect to each existing national primary drinking water regulation shall be considered to have primary enforcement authority with respect to each new or revised national primary drinking water regulation during the period beginning on the effective date of a regulation adopted and submitted by the State with respect to the new or revised national primary drinking water regulation in accordance with subsection (b)(1) of this section and ending at such time as the Administrator makes a determination under subsection (b)(2)(B) of this section with respect to the regulation.

AMENDMENTS

1996—Subsec. (a)(1). Pub. L. 104–182, §112(a)(1), amended par. (1) generally. Prior to amendment, par. (1) read as follows: "has adopted drinking water regulations which are no less stringent than the national primary drinking water regulations in effect under sections 300g–1(a) and 300g–1(b) of this title".

Subsec. (a)(5). Pub. L. 104–182, §112(b), inserted "including earthquakes, floods, hurricanes, and other natural disasters, as appropriate" after "emergency circumstances".

1986—Subsec. (a)(1). Pub. L. 99–339 substituted "are no less stringent than the national primary drinking water regulations in effect under sections 300g–1(a) and 300g–1(b) of this title" for subpars. (A) and (B) which related to stringency of State drinking water regulations between period of promulgation and effective date of national primary drinking water regulations and during the period after such effective date.

§ 300g–3. Enforcement of drinking water regulations

(a) Notice to State and public water system; issuance of administrative order; civil action

(1)(A) Whenever the Administrator finds during a period during which a State has primary enforcement responsibility for public water systems (within the meaning of section 300g–2(a) of this title) that any public water system—

(i) for which a variance under section 300g–4 or an exemption under section 300g–5 of this title is not in effect, does not comply with any applicable requirement, or

(ii) for which a variance under section 300g–4 or an exemption under section 300g–5 of this title is in effect, does not comply with any schedule or other requirement imposed pursuant thereto,

he shall so notify the State and such public water system and provide such advice and technical assistance to such State and public water system as may be appropriate to bring the system into compliance with the requirement by the earliest feasible time.

(B) If, beyond the thirtieth day after the Administrator's notification under subparagraph (A), the State has not commenced appropriate enforcement action, the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such applicable requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(2) ENFORCEMENT IN NONPRIMACY STATES.—

(A) IN GENERAL.—If, on the basis of information available to the Administrator, the Administrator finds, with respect to a period in which a State does not have primary enforcement responsibility for public water systems, that a public water system in the State—

(i) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is not in effect, does not comply with any applicable requirement; or

(ii) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is in effect, does not comply with any schedule or other requirement imposed pursuant to the variance or exemption;

the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with the requirement, or commence a civil action under subsection (b) of this section.

(B) NOTICE.—If the Administrator takes any action pursuant to this paragraph, the Administrator shall notify an appropriate local elected official, if any, with jurisdiction over the public water system of the action prior to the time that the action is taken.

(b) Judicial determinations in appropriate Federal district courts; civil penalties, separate violations

The Administrator may bring a civil action in the appropriate United States district court to require compliance with any applicable requirement, with an order issued under subsection (g) of this section, or with any schedule or other requirement imposed pursuant to a variance or exemption granted under section 300g–4 or 300g–5 of this title if—

(1) authorized under paragraph (1) or (2) of subsection (a) of this section, or

(2) if requested by (A) the chief executive officer of the State in which is located the public water system which is not in compliance with such regulation or requirement, or (B) the agency of such State which has jurisdiction over compliance by public water systems in the State with national primary drinking water regulations or State drinking water regulations.

The court may enter, in an action brought under this subsection, such judgement as protection of
The alternative requirements shall provide the same type and amount of information as required pursuant to this subsection and regulations issued under subparagraph (A).

(iii) Relationship to section 300g–2

Nothing in this subparagraph shall be construed or applied to modify the requirements of section 300g–2 of this title.

(C) Violations with potential to have serious adverse effects on human health

Regulations issued under subparagraph (A) shall specify notification procedures for each violation by a public water system that has the potential to have serious adverse effects on human health as a result of short-term exposure. Each notice of violation provided under this subparagraph shall—

(i) provide a clear and readily understandable explanation of—

(I) the violation;

(II) the potential adverse effects on human health;

(III) the steps that the public water system is taking to correct the violation; and

(IV) the necessity of seeking alternative water supplies until the violation is corrected;

(ii) be provided to the Administrator or the head of the State agency that has primary enforcement responsibility under section 300g–2 of this title as soon as practicable, but not later than 24 hours after the occurrence of the violation; and

(iii) be provided by the State agency in general regulations of the State agency, or on a case-by-case basis after the consultation referred to in clause (iii), considering the health risks involved—

(I) be provided to appropriate broadcast media;

(II) be prominently published in a newspaper of general circulation serving the area not later than 1 day after distribution of a notice pursuant to clause (i) or the date of publication of the next issue of the newspaper; or

(III) be provided by posting or door-to-door notification in lieu of notification by means of broadcast media or newspaper.

(D) Written notice

(i) In general

Regulations issued under subparagraph (A) shall specify notification procedures for violations other than the violations covered by subparagraph (C). The procedures shall specify that a public water system shall provide written notice to each person served by the system by notice (I) in the first bill (if any) prepared after the date of occurrence of the violation, (II) in
§ 300g–3  TITLE 42—THE PUBLIC HEALTH AND WELFARE  Page 980

an annual report issued not later than 1 year after the date of occurrence of the violation, or (III) by mail or direct delivery as soon as practicable, but not later than 1 year after the date of occurrence of the violation.

(ii) Form and manner of notice

The Administrator shall prescribe the form and manner of the notice to provide a clear and readily understandable explanation of the violation, any potential adverse health effects, and the steps that the system is taking to seek alternative water supplies, if any, until the violation is corrected.

(E) Unregulated contaminants

The Administrator may require the owner or operator of a public water system to give notice to the persons served by the system of the concentration levels of an unregulated contaminant required to be monitored under section 300j–4(a) of this title.

(3) Reports

(A) Annual report by State

(i) In general

Not later than January 1, 1998, and annually thereafter, each State that has primary enforcement responsibility under section 300g–2 of this title shall prepare, make readily available to the public, and submit to the Administrator an annual report on violations of national primary drinking water regulations by public water systems in the State, including violations with respect to (I) maximum contaminant levels, (II) treatment requirements, (III) variances and exemptions, and (IV) monitoring requirements determined to be significant by the Administrator after consultation with the States.

(ii) Distribution

The State shall publish and distribute summaries of the report and indicate where the full report is available for review.

(B) Annual report by Administrator

Not later than July 1, 1998, and annually thereafter, the Administrator shall prepare and make available to the public an annual report summarizing and evaluating reports submitted by States pursuant to subparagraph (A) and notices submitted by public water systems serving Indian Tribes provided to the Administrator pursuant to subparagraph (C) or (D) of paragraph (2) and making recommendations concerning the resources needed to improve compliance with this subchapter. The report shall include information about public water system compliance on Indian reservations and about enforcement activities undertaken and financial assistance provided by the Administrator on Indian reservations, and shall make specific recommendations concerning the resources needed to improve compliance with this subchapter on Indian reservations.

(4) Consumer confidence reports by community water systems

(A) Annual reports to consumers

The Administrator, in consultation with public water systems, environmental groups, public interest groups, risk communication experts, and the States, and other interested parties, shall issue regulations within 24 months after August 6, 1996, to require each community water system to mail to each customer of the system at least once annually a report on the level of contaminants in the drinking water purveyed by that system (referred to in this paragraph as a “consumer confidence report”). Such regulations shall provide a brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” and brief statements in plain language regarding the health concerns that resulted in regulation of each regulated contaminant. The regulations shall also include a brief and plainly worded explanation regarding contaminants that may reasonably be expected to be present in drinking water, including bottled water. The regulations shall also provide for an Environmental Protection Agency toll-free hotline that consumers can call for more information and explanation.

(B) Contents of report

The consumer confidence reports under this paragraph shall include, but not be limited to, each of the following:

(i) Information on the source of the water purveyed.

(ii) A brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” as provided in the regulations of the Administrator.

(iii) If any regulated contaminant is detected in the water purveyed by the public water system, a statement setting forth (I) the maximum contaminant level goal, (II) the maximum contaminant level, (III) the level of such contaminant in such water system, and (IV) for any regulated contaminant for which there has been a violation of the maximum contaminant level during the year concerned, the brief statement in plain language regarding the health concerns that resulted in regulation of such contaminant, as provided by the Administrator in regulations under subparagraph (A).

(iv) Information on compliance with national primary drinking water regulations, as required by the Administrator, and notice if the system is operating under a variance or exemption and the basis on which the variance or exemption was granted.

(v) Information on the levels of unregulated contaminants for which monitoring is required under section 300j–4(a)(2) of this title (including levels of cryptosporidium and radon where States determine they may be found).
(vi) A statement that the presence of contaminants in drinking water does not necessarily indicate that the drinking water poses a health risk and that more information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency hotline.

A public water system may include such additional information as it deems appropriate for public education. The Administrator may, for not more than 3 regulated contaminants other than those referred to in subclause (IV) of clause (iii), require a consumer confidence report under this paragraph to include the brief statement in plain language regarding the health concerns that resulted in regulation of the contaminant or contaminants concerned, as provided by the Administrator in regulations under subparagraph (A).

(C) Coverage

The Governor of a State may determine not to apply the mailing requirement of subparagraph (A) to a community water system serving fewer than 10,000 persons. Any such system shall—

(i) inform, in the newspaper notice required by clause (iii) or by other means, its customers that the system will not be mailing the report as required by subparagraph (A);

(ii) make the consumer confidence report available upon request to the public; and

(iii) publish the report referred to in subparagraph (A) annually in one or more local newspapers serving the area in which customers of the system are located.

(D) Alternative to publication

For any community water system which, pursuant to subparagraph (C), is not required to meet the mailing requirement of subparagraph (A) and which serves 500 persons or fewer, the community water system may elect not to comply with clause (i) or (iii) of subparagraph (C). If the community water system so elects, the system shall, at a minimum—

(i) prepare an annual consumer confidence report pursuant to subparagraph (B); and

(ii) provide notice at least once per year to each of its customers by mail, by door-to-door delivery, by posting or by other means authorized by the regulations of the Administrator that the consumer confidence report is available upon request.

(E) Alternative form and content

A State exercising primary enforcement responsibility may establish, by rule, after notice and public comment, alternative requirements with respect to the form and content of consumer confidence reports under this paragraph.

(d) Notice of noncompliance with secondary drinking water regulations

Whenever, on the basis of information available to him, the Administrator finds that within a reasonable time after national secondary drinking water regulations have been promulgated, one or more public water systems in a State do not comply with such secondary regulations, and that such noncompliance appears to result from a failure of such State to take reasonable action to assure that public water systems throughout such State meet such secondary regulations, he shall so notify the State.

(e) State authority to adopt or enforce laws or regulations respecting drinking water regulations or public water systems unaffected

Nothing in this subchapter shall diminish any authority of a State or political subdivision to adopt or enforce any law or regulation respecting drinking water regulations or public water systems, but no such law or regulation shall relieve any person of any requirement otherwise applicable under this subchapter.

(f) Notice and public hearing; availability of recommendations transmitted to State and public water system

If the Administrator makes a finding of noncompliance (described in subparagraph (A) or (B) of subsection (a)(1) of this section) with respect to a public water system in a State which has primary enforcement responsibility, the Administrator may, for the purpose of assisting that State in carrying out such responsibility and upon the petition of such State or public water system or persons served by such system, hold, after appropriate notice, public hearings for the purpose of gathering information from technical or other experts, Federal, State, or other public officials, representatives of such public water system, persons served by such system, and other interested persons on—

(1) the ways in which such system can within the earliest feasible time be brought into compliance with the regulation or requirement with respect to which such finding was made, and

(2) the means for the maximum feasible protection of the public health during any period in which such system is not in compliance with a national primary drinking water regulation or requirement applicable to a variance or exemption.

On the basis of such hearings the Administrator shall issue recommendations which shall be sent to such State and public water system and shall be made available to the public and communications media.

(g) Administrative order requiring compliance; notice and hearing; civil penalty; civil actions

(1) In any case in which the Administrator is authorized to bring a civil action under this section or under section 300j–4 of this title with respect to any applicable requirement, the Administrator also may issue an order to require compliance with such applicable requirement.

(2) An order issued under this subsection shall not take effect, in the case of a State having primary enforcement responsibility for public water systems in that State, until after the Administrator has provided the State with an opportunity to confer with the Administrator regarding the order. A copy of any order issued
under this subsection shall be sent to the appropriate State agency of the State involved if the State has primary enforcement responsibility for public water systems in that State. Any order issued under this subsection shall state with reasonable specificity the nature of the violation. In any case in which an order under this subsection is issued to a corporation, a copy of such order shall be issued to appropriate corporate officers.

(3)(A) Any person who violates, or fails or refuses to comply with, an order under this subsection shall be liable to the United States for a civil penalty of not more than $25,000 per day of violation.

(B) In a case in which a civil penalty sought by the Administrator under this paragraph does not exceed $5,000, the penalty shall be assessed by the Administrator under this paragraph and not in accordance with section 554 of title 5. In a case in which a civil penalty sought by the Administrator under this paragraph exceeds $5,000, but does not exceed $25,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.

(C) Whenever any civil penalty sought by the Administrator under this subsection for a violation of an applicable requirement exceeds $25,000, the penalty shall be assessed by a civil action brought by the Administrator in the appropriate United States district court (as determined under the provisions of title 28).

(D) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court of appeals has entered final judgment in favor of the Administrator, the Attorney General shall recover the amount for which such person is liable in any appropriate district court of the United States. In any such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(h) Consolidation incentive

(1) In general

An owner or operator of a public water system may submit to the State in which the system is located (if the State has primary enforcement responsibility under section 300g–2 of this title) or to the Administrator (if the State does not have primary enforcement responsibility) a plan (including specific measures and schedules) for—

(A) the physical consolidation of the system with 1 or more other systems;

(B) the consolidation of significant management and administrative functions of the system with 1 or more other systems; or

(C) the transfer of ownership of the system that may reasonably be expected to improve drinking water quality.

(2) Consequences of approval

If the State or the Administrator approves a plan pursuant to paragraph (1), no enforcement action shall be taken pursuant to this part with respect to a specific violation identified in the approved plan prior to the date that is the earlier of the date on which consolidation is completed according to the plan or the date that is 2 years after the plan is approved.

(i) "Applicable requirement" defined

In this section, the term "applicable requirement" means—

(1) a requirement of section 300g–1, 300g–3, 300g–4, 300g–5, 300g–6, 300i–2, 300j, or 300j–4 of this title;

(2) a regulation promulgated pursuant to a section referred to in paragraph (1);

(3) a schedule or requirement imposed pursuant to a section referred to in paragraph (1); and

(4) a requirement of, or permit issued under, an applicable State program for which the Administrator has made a determination that the requirements of section 300g–2 of this title have been satisfied, or an applicable State program approved pursuant to this part.

(AMENDMENTS)

Subsec. (a)(1)(B), Pub. L. 104–182, §113(a)(1)(A)(ii), substituted "applicable requirement" for "national primary drinking water regulation in effect under section 300g–1 of this title".

Subsec. (a)(2)(B), Pub. L. 104–182, §113(a)(1)(A)(ii), substituted "applicable requirement" for "such regulation or requirement".

Subsec. (b)(2). Pub. L. 104–182, §113(a)(1)(B), added par. (2) and struck out former par. (2) which read as follows: "Whenever, on the basis of information available to him, the Administrator finds during a period during which a State does not have primary enforcement responsibility for public water systems that a public water system in such State—"

"(A) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is not in effect, does not comply with any national primary drinking water regulation in effect under section 300g–1 of this title, or

"(B) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is in effect, does not comply with any schedule or other requirement imposed pursuant thereto, the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement or the Administrator shall commence a civil action under subsection (b) of this section.

Subsec. (b). Pub. L. 104–182, §113(a)(2), substituted "any applicable requirement" for "a national primary drinking water regulation" in introductory provisions.

Subsec. (c), Pub. L. 104–182, §114(a), amended subsec. (c) generally. Prior to amendment, subsec. (c) related to notice of owner or operator of public water system to persons served, regulations for form, manner, and

1 So in original. There probably should be a comma.
frequency of notice, amendment of regulations to provide different types and frequencies of notice, and penalties.

Subsec. (g)(1). Pub. L. 104–182, §113(a)(3)(A), substituted “applicable requirement” for “regulation, schedule, or other requirement” in two places.

Subsec. (g)(2). Pub. L. 104–182, §113(a)(3)(B), substituted “effect, in the case” for “effect until after notice and opportunity for public hearing and, in the case” and “regarding the order” for “regarding the proposed order” and struck out “proposed to be” after “A copy of the order”.

Subsec. (g)(3)(B). Pub. L. 104–182, §113(a)(3)(C)(i), added subpar. (B) and struck out former subpar. (B), which read as follows: “Whenever any civil penalty sought by the Administrator under this paragraph does not exceed a total of $5,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.”

Subsec. (g)(3)(C). Pub. L. 104–182, §113(a)(3)(C)(ii), substituted “subsection for a violation of an applicable requirement exceeds $25,000” for “paragraph exceeds $5,000”.

Subsecs. (h), (i), Pub. L. 104–182, §113(a)(4), added subsecs. (h) and (i).

Subsec. (a)(1)(A). Pub. L. 99–339, §102(a), inserted “and such public water system” after “notify the State” in provisions following cl. (i).

Subsec. (a)(1)(B). Pub. L. 99–339, §102(b)(1), amended subpar. (B) generally, substituting provisions which relate to issuance of an order to public water system to comply with regulations, or commencement of civil action if the State has not commenced appropriate enforcement action for provisions which related to public notice of noncompliance and commencement of civil action by Administrator if State failed to take steps to obtain compliance by public water system.

Subsec. (a)(2). Pub. L. 99–339, §102(b)(2), substituted “the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement, or the Administrator shall commence a civil action under subsection (b) of this section” for “he may commence a civil action under subsection (b) of this section”.

Subsec. (b), Pub. L. 99–339, §102(c), inserted “, with an order issued under subsection (g) of this section,” before “or with any schedule” and substituted “there has been a violation” for “there has been a willful violation” and “$25,000” for “$5,000”.

Subsec. (c). Pub. L. 99–339, §103, substituted provisions relating to amendment of regulations within fifteen months after June 19, 1986, to provide different types and frequencies of notice based on the differences in pollution regulations which are intermittent or continuous, manner and content of notices, notice required to public served by owner or operator of public water system, and civil penalty of $25,000, for provisions relating to form, manner, and frequency of notice based on three month billing period for water bills, notice required to public served by owner or operator of public water system, and civil penalty of $5,000.

Subsec. (g). Pub. L. 99–339, §102(d), added subsec. (g).

1977—Subsec. (c). Pub. L. 95–190 inserted provisions relating to frequency of required notice, and notice respecting contaminant levels, and substituted “issued under this subsection” for “thereunder”.

§300g–4. Variances

(a) Characteristics of raw water sources; specific treatment technique; notice to Administrator, reasons for variance; compliance, enforcement; approval or revision of schedules and revocation of variances; review of variances and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting variances or failing to prescribe schedules; State corrective action; authority of Administrator in a State without primary enforcement responsibility; alternative treatment techniques

Notwithstanding any other provision of this part, variances from national primary drinking water regulations may be granted as follows:

(1)(A) A State which has primary enforcement responsibility for public water systems may grant one or more variances from an applicable national primary drinking water regulation to one or more public water systems within its jurisdiction which, because of characteristics of the raw water sources which are reasonably available to the systems, cannot meet the requirements respecting the maximum contaminant levels of such drinking water regulation. A variance may be issued to a system on condition that the system install the best technology, treatment techniques, or other means, which the Administrator finds are available (taking costs into consideration), and based upon an evaluation satisfactory to the State that indicates that alternative sources of water are not reasonably available to the system. The Administrator shall propose and promulgate his finding of the best available technology, treatment techniques or other means available for each contaminant for purposes of this subsection at the time he proposes and promulgates a maximum contaminant level for each such contaminant. The Administrator’s finding of best available technology, treatment techniques or other means for purposes of this subsection may vary depending on the number of persons served by the system or for other physical conditions related to engineering feasibility and costs of compliance with maximum contaminant levels as considered appropriate by the Administrator. Before a State may grant a variance under this subparagraph, the State must find that the variance will not result in an unreasonable risk to health. If a State grants a public water system a variance under this subparagraph, the State shall prescribe at the time the variance is granted, a schedule for—

(i) compliance (including increments of progress) by the public water system with each containment level requirement with respect to which the variance was granted, and

(ii) implementation by the public water system of such additional control measures as the State may require for each contaminant, subject to such contaminant level requirement, during the period ending on the date compliance with such requirement is required.

1So in original.
Before a schedule prescribed by a State pursuant to this subparagraph may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice. A schedule prescribed pursuant to this subparagraph for a public water system granted a variance shall require compliance by the system with each contaminant or level requirement with respect to which the variance was granted as expeditiously as practicable (as the State may reasonably determine).

(B) A State which has primary enforcement responsibility for public water systems may grant to one or more public water systems within its jurisdiction one or more variances from any provision of the national primary drinking water regulation which requires the use of a specified treatment technique with respect to a contaminant if the public water system applying for the variance demonstrates to the satisfaction of the State that such treatment technique is not necessary to protect the health of persons because of the nature of the raw water source of such system. A variance granted under this subparagraph shall be conditioned on such monitoring and other requirements as the Administrator may prescribe.

(C) Before a variance proposed to be granted by a State under subparagraph (A) or (B) may take effect, such State shall provide notice and opportunity for public hearing on the proposed variance. A notice given pursuant to the preceding sentence may cover the granting of more than one variance and a hearing held pursuant to such notice shall include each of the variances covered by the notice. The State shall promptly notify the Administrator of all variances granted by it. Such notification shall contain the reason for the variance (and in the case of a variance under subparagraph (A), the basis for the finding required by that subparagraph before the granting of the variance) and documentation of the need for the variance.

(D) Each public water system's variance granted by a State under subparagraph (A) shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to that subparagraph. The requirements of each schedule prescribed by a State pursuant to that subparagraph shall be enforceable by the State under its laws. Any requirement of a schedule on which a variance granted under that subparagraph is conditioned may be enforced under section 300g-3 of this title as if such requirement was part of a national primary drinking water regulation.

(E) Each schedule prescribed by a State pursuant to subparagraph (A) shall be deemed approved by the Administrator unless the variance for which it was prescribed is revoked by the Administrator under subparagraph (G) or the schedule is revised by the Administrator under such subparagraph.

(F) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the variances granted under subparagraph (A) and schedules prescribed pursuant thereto and under subparagraph (B) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of variances and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (i) provide information respecting the location of data and other information respecting the variances to be reviewed (including data and other information concerning new scientific matters bearing on such variances), and (ii) advise of the opportunity to submit comments on the variances reviewed and on the need for continuing them. Upon completion of any such review, the Administrator shall publish in the Federal Register the results of his review together with findings responsive to comments submitted in connection with such review.

(G)(i) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting variances under subparagraph (A) or (B) or that in a substantial number of cases the State has failed to prescribe schedules in accordance with subparagraph (A), the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting variances in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the variances and if the requirements applicable to the granting of the variances were complied with. A notice under this clause shall—

(I) identify each public water system with respect to which the finding was made,

(II) specify the reasons for the finding, and

(III) as appropriate, propose revocations of specific variances or propose revised schedules or other requirements for specific public water systems granted variances, or both.

(ii) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to clause (i) of this subparagraph. After a hearing on a notice pursuant to such clause, the Administrator shall (I) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (II) promulgate (with such modifications as he deems appropriate) such variance revocations and revised schedules or other requirements proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to clause (i) of this subparagraph, the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.

(iii) If a State is notified under clause (i) of this subparagraph of a finding of the Administer-
trator made with respect to a variance granted a public water system within that State or to a schedule or other requirement for a variance and if, before a revocation of such variance or a revision of such schedule or other requirement promulgated by the Administrator takes effect, the State takes corrective action with respect to such variance or schedule or other requirement which the Administrator determines makes his finding inapplicable to such variance or schedule or other requirement, the Administrator shall rescind the application of his finding to that variance on schedule or other requirement. No variance revocation or revised schedule or other requirement may take effect before the expiration of 90 days following the date of the notice in which the revocation or revised schedule or other requirement was proposed.

(2) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to grant variances in such State as the State would have under paragraph (1) if it had primary enforcement responsibility.

(3) The Administrator may grant a variance from any treatment technique requirement of a national primary drinking water regulation upon a showing by any person that an alternative treatment technique not included in such requirement is at least as efficient in lowering the level of the contaminant with respect to which such requirement was prescribed. A variance under this paragraph shall be conditioned on the use of the alternative treatment technique which is the basis of the variance.

(b) Enforcement of schedule or other requirement

Any schedule or other requirement on which a variance granted under paragraph (1)(B) or (2) of subsection (a) of this section is conditioned may be enforced under section 300g–3 of this title as subsection (a) of this section is made, the State responsibility for public water systems under section 300g–2 of this title (or the Administrator in nonprimacy States) may grant a variance under this subsection for compliance with a requirement specifying a maximum contaminant level or treatment technique contained in a national primary drinking water regulation to—

(A) public water systems serving 3,300 or fewer persons; and

(B) with the approval of the Administrator pursuant to paragraph (9), public water systems serving more than 3,300 persons but fewer than 10,000 persons, if the variance meets each requirement of this subsection.

(2) Availability of variances

A public water system may receive a variance pursuant to paragraph (1), if—

(A) the Administrator has identified a variance technology under section 300g–1(b)(15) of this title that is applicable to the size and source water quality conditions of the public water system;

(B) the public water system installs, operates, and maintains, in accordance with guidance or regulations issued by the Administrator, such treatment technology, treatment technique, or other means; and

(C) the State in which the system is located determines that the conditions of paragraph (3) are met.

(3) Conditions for granting variances

A variance under this subsection shall be available only to a system—

(A) that cannot afford to comply, in accordance with affordability criteria established by the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title), with a national primary drinking water regulation, including compliance through—

(i) treatment;

(ii) alternative source of water supply; or

(iii) restructuring or consolidation (unless the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) makes a written determination that restructuring or consolidation is not practicable); and

(B) for which the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) determines that the terms of the variance ensure adequate protection of human health, considering the quality of the source water for the system and the removal efficiencies and expected useful life of the treatment technology required by the variance.

(4) Compliance schedules

A variance granted under this subsection shall require compliance with the conditions of the variance not later than 3 years after the date on which the variance is granted, except that the Administrator (or the State in the case of a State that has primary enforcement
responsibility under section 300g–2 of this title) may allow up to 2 additional years to comply with a variance technology, secure an alternative source of water, restructure or consolidate if the Administrator (or the State) determines that additional time is necessary for capital improvements, or to allow for financial assistance provided pursuant to section 300j–12 of this title or any other Federal or State program.

(5) Duration of variances

The Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) shall review each variance granted under this subsection not less often than every 5 years after the compliance date established in the variance to determine whether the system remains eligible for the variance and is conforming to each condition of the variance.

(6) Ineligibility for variances

A variance shall not be available under this subsection for—

(A) any maximum contaminant level or treatment technique for a contaminant with respect to which a national primary drinking water regulation was promulgated prior to January 1, 1986; or

(B) a national primary drinking water regulation for a microbial contaminant (including a bacterium, virus, or other organism) or an indicator or treatment technique for a microbial contaminant.

(7) Regulations and guidance

(A) In general

Not later than 2 years after August 6, 1996, and in consultation with the States, the Administrator shall promulgate regulations for variances to be granted under this subsection. The regulations shall, at a minimum, specify—

(i) procedures to be used by the Administrator or a State to grant or deny variances, including requirements for notifying the Administrator and consumers of the public water system that a variance is proposed to be granted (including information regarding the contaminant and variance) and requirements for a public hearing on the variance before the variance is granted;

(ii) requirements for the installation and proper operation of variance technology that is identified (pursuant to section 300g–1(b)(15) of this title) for small systems and the financial and technical capability to operate the treatment system, including operator training and certification;

(iii) eligibility criteria for a variance for each national primary drinking water regulation, including requirements for the quality of the source water (pursuant to section 300g–1(b)(15)(A) of this title); and

(iv) information requirements for variance applications.

(B) Affordability criteria

Not later than 18 months after August 6, 1996, the Administrator, in consultation with the States and the Rural Utilities Service of the Department of Agriculture, shall publish information to assist the States in developing affordability criteria. The affordability criteria shall be reviewed by the States not less often than every 5 years to determine if changes are needed to the criteria.

(8) Review by the Administrator

(A) In general

The Administrator shall periodically review the program of each State that has primary enforcement responsibility for public water systems under section 300g–2 of this title with respect to variances to determine whether the variances granted by the State comply with the requirements of this subsection. With respect to affordability, the determination of the Administrator shall be limited to whether the variances granted by the State comply with the affordability criteria developed by the State.

(B) Notice and publication

If the Administrator determines that variances granted by a State are not in compliance with affordability criteria developed by the State and the requirements of this subsection, the Administrator shall notify the State in writing of the deficiencies and make public the determination.

(9) Approval of variances

A State proposing to grant a variance under this subsection to a public water system serving more than 3,300 and fewer than 10,000 persons shall submit the variance to the Administrator for review and approval prior to the issuance of the variance. The Administrator shall approve the variance if it meets each of the requirements of this subsection. The Administrator shall approve or disapprove the variance within 90 days. If the Administrator disapproves a variance under this paragraph, the variance may be resubmitted with modifications to address the objections stated by the Administrator.

(10) Objections to variances

(A) By the Administrator

The Administrator may review and object to any variance proposed to be granted by a State, if the objection is communicated to the State not later than 90 days after the State proposes to grant the variance. If the Administrator objects to the granting of a variance, the Administrator shall notify the State in writing of each basis for the objection and propose a modification to the variance to resolve the concerns of the Administrator. The State shall make the recommended modification or respond in writing to each objection. If the State issues the variance without resolving the concerns of the Administrator, the Administrator may overturn the State decision to grant the variance if the Administrator determines that the State decision does not comply with this subsection.
(B) Petition by consumers

Not later than 30 days after a State exercising primary enforcement responsibility for public water systems under section 300g–2 of this title proposes to grant a variance for a public water system, any person served by the system may petition the Administrator to object to the granting of a variance. The Administrator shall respond to the petition and determine whether to object to the variance under subparagraph (A) not later than 60 days after the receipt of the petition.

(C) Timing

No variance shall be granted by a State until the later of the following:

(i) 90 days after the State proposes to grant a variance.

(ii) If the Administrator objects to the variance, the date on which the State makes the recommended modifications or responds in writing to each objection.

(AMENDMENTS)

1986—Subsec. (d). Pub. L. 104–182, §102(c)(1), substituted “such drinking water regulation. A variance shall require compliance by the system with each contaminant level and treatment technique requirement, subject to compliance within the State’s jurisdiction from any requirement respecting a maximum contaminant level or any treatment technique requirement, or, from both, of an applicable national primary drinking water regulation upon a finding that—

(1) due to compelling factors (which may include economic factors, including qualification of the public water system as a system serving a disadvantaged community pursuant to section 300j–12(d) of this title), the public water system is unable to comply with such contaminant level or treatment technique requirement, or to implement measures to develop an alternative source of water supply and (2) the public water system was in operation on the effective date of such contaminant level or treatment technique requirement, or, for a system that was not in operation by that date, only if no reasonable alternative source of drinking water is available to such new system,

(3) the granting of the exemption will not result in an unreasonable risk to health;1 and

(4) management or restructuring changes (or both) cannot reasonably be made that will result in compliance with this subchapter or, if compliance cannot be achieved, improve the quality of the drinking water.

(b) Compliance schedule and implementation of control measures; notice and hearing; dates for compliance with schedule; compliance, enforcement; approval or revision of schedules and revocation of exemptions

(1) If a State grants a public water system an exemption under subsection (a) of this section, the State shall prescribe, at the time the exemption is granted, a schedule for:

(A) compliance (including increments of progress or measures to develop an alternative source of water supply) by the public water system with each contaminant level requirement or treatment technique requirement with respect to which the exemption was granted, and

(B) implementation by the public water system of such control measures as the State may require for each contaminant, subject to such contaminant level requirement or treatment technique requirement, during the period ending on the date compliance with such requirement is required.

Before a schedule prescribed by a State pursuant to this subsection may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice.

(2)(A) A schedule prescribed pursuant to this subsection for a public water system granted an exemption under subsection (a) of this section shall require compliance by the system with each contaminant level and treatment technique requirement with respect to which the exemption was granted as expeditiously as practicable (as the State may reasonably determine) but not later than 3 years after the otherwise applicable compliance date established in section 300g–1(b)(10) of this title.

(B) No exemption shall be granted unless the public water system establishes that—

(i) the system cannot meet the standard without capital improvements which cannot be completed prior to the date established pursuant to section 300g–1(b)(10) of this title;
(ii) in the case of a system which needs financial assistance for the necessary improvements, the system has entered into an agreement to obtain such financial assistance or assistance pursuant to section 300j–12 of this title, or any other Federal or State program is reasonably likely to be available within the period of the exemption; or
(iii) the system has entered into an enforceable agreement to become a part of a regional public water system; and
the system is taking all practicable steps to meet the standard.
(C) In the case of a system which does not serve more than a population of 3,300 and which needs financial assistance for the necessary improvements, an exemption granted under clause (i) or (ii) of subparagraph (B) may be renewed for one or more additional 2-year periods, but not to exceed a total of 6 years, if the system establishes that it is taking all practicable steps to meet the requirements of subparagraph (B).
(D) LIMITATION.—A public water system may not receive an exemption under this section if the system was granted a variance under section 300g–4(e) of this title.
(3) Each public water system's exemption granted by a State under subsection (a) of this section shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to this subsection. The requirements of each schedule prescribed by a State pursuant to this subsection shall be enforceable by the State under its laws. Any requirement of a schedule on which an exemption granted under this section is conditioned may be enforced under section 300g–3 of this title as if such requirement was conditioned may be enforced under section 300g–3 of this title.
(4) Each schedule prescribed by a State pursuant to this subsection shall be deemed approved by the Administrator unless the exemption for which it was prescribed is revoked by the Administrator under such subsection.
(c) Notice to Administrator; reasons for exemption
Each State which grants an exemption under subsection (a) of this section shall promptly notify the Administrator of the granting of such exemption. Such notification shall contain the reasons for the exemption (including the basis for the finding required by subsection (a)(3) of this section before the exemption may be granted) and document the need for the exemption.
(d) Review of exemptions and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting exemptions or failing to prescribe schedules; State corrective action
(1) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the exemptions granted (and schedules prescribed pursuant thereto) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of exemptions and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (A) provide information respecting the location of data and other information respecting the exemptions to be reviewed (including data and other information concerning new scientific matters bearing on such exemptions), and (B) advise of the opportunity to submit comments on the exemptions reviewed and on the findings responsive to comments submitted in connection with such review.
(2)(A) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting exemptions under subsection (a) of this section or failed to prescribe schedules in accordance with subsection (b) of this section, the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting exemptions in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the exemptions and the requirements applicable to the granting of the exemptions were complied with. A notice under this subparagraph shall—
(i) identify each exempt public water system with respect to which the finding was made,
(ii) specify the reasons for the finding, and
(iii) as appropriate, propose revocations of specific exemptions or propose revised schedules for specific exempt public water systems, or both.
(B) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to subparagraph (A). After a hearing on notice pursuant to paragraph (A), the Administrator shall (i) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (ii) promulgate (with such modifications as he deems appropriate) such exemption revocations and revised schedules proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to subparagraph (A), the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.
(C) If a State is notified under subparagraph (A) of a finding of the Administrator made with respect to an exemption granted a public water system within that State or to a schedule prescribed pursuant to such an exemption and if before a revocation of such exemption or a revision of such schedule promulgated by the Administrator takes effect the State takes corrective action with respect to such exemption or schedule which the Administrator determines makes his finding inapplicable to such exemption or schedule, the Administrator shall re-
scind the application of his finding to that exemption or schedule. No exemption revocation or revised schedule may take effect before the expiration of 90 days following the date of the notice in which the revocation or revised schedule was proposed.

(e) "Treatment technique requirement" defined

For purposes of this section, the term "treatment technique requirement" means a requirement in a national primary drinking water regulation which specifies for a contaminant (in accordance with section 300f(1)(C)(ii) of this title) each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1(b) of this title.

(f) Authority of Administrator in a State without primary enforcement responsibility

If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to exempt public water systems in such State from maximum contaminant level requirements and treatment technique requirements under the same conditions and in the same manner as the State would be authorized to grant exemptions under this section if it had primary enforcement responsibility.

(g) Applications for exemptions; regulations; reasonable time for acting

If an application for an exemption under this section is made, the State receiving the application or the Administrator, as the case may be, shall act upon such application within a reasonable period (as determined under regulations prescribed by the Administrator) after the date of its submission.
§ 300g–6. Prohibition on use of lead pipes, solder, and flux

(a) In general

(1) Prohibitions

(A) In general

No person may use any pipe, any pipe or plumbing fitting or fixture, any solder, or any flux, after June 19, 1986, in the installation or repair of—

(i) any public water system; or

(ii) any plumbing in a residential or nonresidential facility providing water for human consumption,

that is not lead free (within the meaning of subsection (d) of this section).

(B) Leaded joints

Subparagraph (A) shall not apply to leaded joints necessary for the repair of cast iron pipes.

(2) Public notice requirements

(A) In general

Each owner or operator of a public water system shall identify and provide notice to persons that may be affected by lead contamination of their drinking water where such contamination results from either or both of the following:

(i) The lead content in the construction materials of the public water distribution system.

(ii) Corrosivity of the water supply sufficient to cause leaching of lead.

The notice shall be provided in such manner and form as may be reasonably required by the Administrator. Notice under this paragraph shall be provided notwithstanding the absence of a violation of any national drinking water standard.

(B) Contents of notice

Notice under this paragraph shall provide a clear and readily understandable explanation of—

(i) The potential sources of lead in the drinking water;

(ii) potential adverse health effects;

(iii) reasonably available methods of mitigating known or potential lead content in drinking water;

(iv) any steps the system is taking to mitigate lead content in drinking water, and

(v) the necessity for seeking alternative water supplies, if any.

(3) Unlawful acts

Effective 2 years after August 6, 1996, it shall be unlawful—

(A) for any person to introduce into commerce any pipe, or any pipe or plumbing fitting or fixture, that is not lead free, except for a pipe that is used in manufacturing or industrial processing;

(B) for any person engaged in the business of selling plumbing supplies, except manufacturers, to sell solder or flux that is not lead free; or

(C) for any person to introduce into commerce any solder or flux that is not lead free unless the solder or flux bears a prominent label stating that it is illegal to use the solder or flux in the installation or repair of any plumbing providing water for human consumption.

(b) State enforcement

(1) Enforcement of prohibition

The requirements of subsection (a)(1) of this section shall be enforced in all States effective 24 months after June 19, 1986. States shall enforce such requirements through State or local plumbing codes, or such other means of enforcement as the State may determine to be appropriate.

(2) Enforcement of public notice requirements

The requirements of subsection (a)(2) of this section shall apply in all States effective 24 months after June 19, 1986.

(c) Penalties

If the Administrator determines that a State is not enforcing the requirements of subsection (a) of this section as required pursuant to subsection (b) of this section, the Administrator may withhold up to 5 percent of Federal funds available to that State for State program grants under section 300j–3(a) of this title.

(d) “Lead free” defined

For purposes of this section, the term “lead free”—

(1) when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead;

(2) when used with respect to pipes and pipe fittings refers to pipes and pipe fittings containing not more than 8.0 percent lead; and

(3) when used with respect to plumbing fittings and fixtures, refers to plumbing fittings and fixtures in compliance with standards established in accordance with subsection (e) of this section.

(e) Plumbing fittings and fixtures

(1) In general

The Administrator shall provide accurate and timely technical information and assistance to qualified third-party certifiers in the development of voluntary standards and testing protocols for the leaching of lead from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion.

(2) Standards

(A) In general

If a voluntary standard for the leaching of lead is not established by the date that is 1 year after August 6, 1996, the Administrator shall, not later than 2 years after August 6, 1996, promulgate regulations setting a health-effects-based performance standard establishing maximum leaching levels from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion. The standard
shall become effective on the date that is 5 years after the date of promulgation of the standard.

(B) Alternative requirement

If regulations are required to be promulgated under subparagraph (A) and have not been promulgated by the date that is 5 years after August 6, 1996, no person may import, manufacture, process, or distribute in commerce a new plumbing fitting or fixture, intended by the manufacturer to dispense water for human ingestion, that contains more than 4 percent lead by dry weight.

(71) Definition of lead free

AMENDMENT OF SUBSECTIONS (a) AND (d)

Pub. L. 111–380, § 2, Jan. 4, 2011, 124 Stat. 4313, provided that, applicable beginning on the day that is 36 months after Jan. 4, 2011, this section is amended as follows:

(1) by adding at the end of subsection (a) the following:

“(4) Exemptions

“The prohibitions in paragraphs (1) and (3) shall not apply to—

“(A) pipes, pipe fittings, plumbing fittings, or fixtures, including backflow preventers, that are used exclusively for nonpotable services such as manufacturing, industrial processing, irrigation, outdoor watering, or any other uses where the water is not anticipated to be used for human consumption; or

“(B) toilets, bidets, urinals, fill valves, flushometer valves, tub fillers, shower valves, service saddles, or water distribution main gate valves that are 2 inches in diameter or larger.”; and

(2) by amending subsection (d) to read as follows:

(d) Definition of lead free

(1) In general

For the purposes of this section, the term “lead free” means—

(A) not containing more than 0.2 percent lead when used with respect to solder and flux; and

(B) not more than a weighted average of 0.25 percent lead when used with respect to the wetted surfaces of pipes, pipe fittings, plumbing fittings, and fixtures.

(2) Calculation

The weighted average lead content of a pipe, pipe fitting, plumbing fitting, or fixture shall be calculated by using the following formula: For each wetted component, the percentage of lead in the component shall be multiplied by the ratio of the wetted surface area of that component to the total wetted surface area of the entire product to arrive at the weighted percentage of lead of the component. The weighted percentage of lead of each wetted component shall be added together, and the sum of these weighted percentages shall constitute the weighted average lead content of the product. The lead content of the material used to produce wetted components shall be used to determine compliance with paragraph (1)(B). For lead content of materials that are provided as a range, the maximum content of the range shall be used.

AMENDMENTS

Subsec. (a)(1). Pub. L. 104–182, § 118(1), substituted “Prohibitions” for “Prohibition” in heading and amended text generally. Prior to amendment, text read as follows: “Any pipe, solder, or flux, which is used after June 19, 1986, in the installation or repair of—

“(A) any public water system, or

“(B) any plumbing in a residential or nonresidential facility providing water for human consumption which is connected to a public water system, shall be lead free (within the meaning of subsection (d) of this section). This paragraph shall not apply to leaded joints necessary for the repair of cast iron pipes.”

EFFECTIVE DATE OF 2011 AMENDMENT

Pub. L. 111–380, § 2(b), Jan. 4, 2011, 124 Stat. 4322, provided that: “The provisions of subsections (a)(4) and (d) of section 1417 of the Safe Drinking Water Act [42 U.S.C. 300g–6(a)(4), (d)], as added by this section, apply beginning on the day that is 36 months after the date of the enactment of this Act [Jan. 4, 2011].”

NOTIFICATION TO STATES

Section 109(b) of Pub. L. 99–339 provided that: “The Administrator of the Environmental Protection Agency shall notify all States with respect to the requirements of section 1417 of the Public Health Service Act [this section] within 90 days after the enactment of this Act [June 19, 1986].”

BAN ON LEAD WATER PIPES, SOLDER, AND FLUX IN VA AND HUD INSURED OR ASSISTED PROPERTY

“(1) PROHIBITION.—The Secretary of Housing and Urban Development and the Secretary of Veterans Affairs may not insure or guarantee a mortgage or furnish assistance with respect to newly constructed residential property which contains a potable water system unless such system uses only lead free pipe, solder, and flux.

“(2) DEFINITION OF LEAD FREE.—For purposes of paragraph (1) the term ‘lead free’—

“(A) when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead, and

“(B) when used with respect to pipes and pipe fittings refers to pipes and pipe fittings containing not more than 8.0 percent lead.

“(3) EFFECTIVE DATE.—Paragraph (1) shall become effective 24 months after the enactment of this Act [June 19, 1986].”

§ 300g–7. Monitoring of contaminants

(a) Interim monitoring relief authority

(1) In general

A State exercising primary enforcement responsibility for public water systems may modify the monitoring requirements for any regulated or unregulated contaminants for which monitoring is required other than mi-
crobiial contaminants (or indicators thereof), disinfectants and disinfection byproducts or corrosion byproducts for an interim period to provide that any public water system serving 10,000 persons or fewer shall not be required to conduct additional quarterly monitoring during an interim relief period for such contaminants if—

(A) monitoring, conducted at the beginning of the period for the contaminant concerned and certified to the State by the public water system, fails to detect the presence of the contaminant in the ground or surface water supplying the public water system; and

(B) the State, considering the hydrogeology of the area and other relevant factors, determines in writing that the contaminant is unlikely to be detected by further monitoring during such period.

(2) Termination; timing of monitoring

The interim relief period referred to in paragraph (1) shall terminate when permanent monitoring relief is adopted and approved for such State, or at the end of 36 months after August 6, 1996, whichever comes first. In order to serve as a basis for interim relief, the monitoring conducted at the beginning of the period must occur at the time determined by the State to be the time of the public water system’s greatest vulnerability to the contaminant concerned in the relevant ground or surface water, taking into account in the case of pesticides the time of application of the pesticide for the source water area and the travel time for the pesticide to reach such waters and taking into account, in the case of other contaminants, seasonality of precipitation and contaminant travel time.

(b) Permanent monitoring relief authority

(1) In general

Each State exercising primary enforcement responsibility for public water systems under this subchapter and having an approved source water assessment program may adopt, in accordance with guidance published by the Administrator, tailored alternative monitoring requirements for public water systems in such State (as an alternative to the monitoring requirements for chemical contaminants set forth in the applicable national primary drinking water regulations) where the State concludes that (based on data available at the time of adoption concerning susceptibility, use, occurrence, or wellhead protection, or from the State’s drinking water source water assessment program) such alternative monitoring would provide assurance that it complies with the Administrator’s guidelines. The State program must be adequate to assure compliance with, and enforcement of, applicable national primary drinking water regulations. Alternative monitoring shall not apply to regulated microbiological contaminants (or indicators thereof), disinfectants and disinfection byproducts, or corrosion byproducts. The preceding sentence is not intended to limit other authority of the Administrator under other provisions of this subchapter to grant monitoring flexibility.

(2) Guidelines

(A) In general

The Administrator shall issue, after notice and comment and at the same time as guidelines are issued for source water assessment under section 300j–13 of this title, guidelines for States to follow in proposing alternative monitoring requirements under paragraph (1) for chemical contaminants. The Administrator shall publish such guidelines in the Federal Register. The guidelines shall assure that the public health will be protected from drinking water contamination. The guidelines shall require that a State alternative monitoring program apply on a contaminant-by-contaminant basis and to be eligible for such alternative monitoring program, a public water system must show the State that the contaminant is not present in the drinking water supply or, if present, it is reliably and consistently below the maximum contaminant level.

(B) Definition

For purposes of subparagraph (A), the phrase “reliably and consistently below the maximum contaminant level” means that, although contaminants have been detected in a water supply, the State has sufficient knowledge of the contamination source and extent of contamination to predict that the maximum contaminant level will not be exceeded. In determining that a contaminant is reliably and consistently below the maximum contaminant level, States shall consider the quality and completeness of data, the length of time covered and the volatility or stability of monitoring results during that time, and the proximity of such results to the maximum contaminant level. Wide variations in the analytical results, or analytical results close to the maximum contaminant level, shall not be considered to be reliably and consistently below the maximum contaminant level.

(3) Effect of detection of contaminants

The guidelines issued by the Administrator under paragraph (2) shall require that if, after the monitoring program is in effect and operating, a contaminant covered by the alternative monitoring program is detected at levels at or above the maximum contaminant level or is no longer reliably or consistently below the maximum contaminant level, the public water system must either—

(A) demonstrate that the contamination source has been removed or that other action has been taken to eliminate the contamination problem; or

(B) test for the detected contaminant pursuant to the applicable national primary drinking water regulation.

(4) States not exercising primary enforcement responsibility

The Governor of any State not exercising primary enforcement responsibility under section 300g–2 of this title on August 6, 1996, may submit to the Administrator a request that the Administrator modify the monitoring re-
requirements established by the Administrator and applicable to public water systems in that State. After consultation with the Governor, the Administrator shall modify the requirements for public water systems in that State if the request of the Governor is in accordance with each of the requirements of this subsection that apply to alternative monitoring requirements established by States that have primary enforcement responsibility. A decision by the Administrator to approve a request under this clause shall be for a period of 3 years and may subsequently be extended for periods of 5 years.

(c) Treatment as NPDWR

All monitoring relief granted by a State to a public water system for a regulated contaminant under subsection (a) or (b) of this section shall be treated as part of the national primary drinking water regulation for that contaminant.

(d) Other monitoring relief

Nothing in this section shall be construed to affect the authority of the States under applicable national primary drinking water regulations to adopt monitoring requirements through waivers or other existing authorities. The Administrator shall periodically review and, as appropriate, revise such authorities.

(July 1, 1944, ch. 373, title XIV, §1418, as added Pub. L. 104–182, title I, §125(b), Aug. 6, 1996, 110 Stat. 1654.)

§ 300g–8. Operator certification

(a) Guidelines

Not later than 30 months after August 6, 1996, and in cooperation with the States, the Administrator shall publish guidelines in the Federal Register, after notice and opportunity for comment from interested persons, including States and public water systems, specifying minimum standards for certification (and recertification) of the operators of community and nontransient noncommunity public water systems. Such guidelines shall take into account existing State programs, the complexity of the system, and other factors aimed at providing an effective program at reasonable cost to States and public water systems, taking into account the size of the system.

(b) State programs

Beginning 2 years after the date on which the Administrator publishes guidelines under subsection (a) of this section, the Administrator shall withhold 20 percent of the funds a State is otherwise entitled to receive under section 300j–12 of this title unless the State has adopted and is implementing a program for the certification of operators of community and nontransient noncommunity public water systems that meets the requirements of the guidelines published pursuant to subsection (a) of this section or that has been submitted in compliance with subsection (c) of this section and that has not been disapproved.

(c) Existing programs

For any State exercising primary enforcement responsibility for public water systems or any other State which has an operator certification program, the guidelines under subsection (a) of this section shall allow the State to enforce such program in lieu of the guidelines under subsection (a) of this section if the State submits the program to the Administrator within 18 months after the publication of the guidelines unless the Administrator determines (within 9 months after the State submits the program to the Administrator) that such program is not substantially equivalent to such guidelines. In making this determination, an existing State program shall be presumed to be substantially equivalent to the guidelines, notwithstanding program differences, based on the size of systems or the quality of source water, providing the State program meets the overall public health objectives of the guidelines. If disapproved, the program may be resubmitted within 6 months after receipt of notice of disapproval.

(d) Expense reimbursement

(1) In general

The Administrator shall provide reimbursement for the costs of training, including an appropriate per diem for unsalaried operators, and certification for persons operating systems serving 3,300 persons or fewer that are required to undergo training pursuant to this section.

(2) State grants

The reimbursement shall be provided through grants to States with each State receiving an amount sufficient to cover the reasonable costs for training all such operators in the State, as determined by the Administrator, to the extent required by this section. Grants received by a State pursuant to this paragraph shall first be used to provide reimbursement for training and certification costs of persons operating systems serving 3,300 persons or fewer. If a State has reimbursed all such costs, the State may, after notice to the Administrator, use any remaining funds from the grant for any of the other purposes authorized for grants under section 300j–12 of this title.

(3) Authorization

There are authorized to be appropriated to the Administrator to provide grants for reimbursement under this section $30,000,000 for each of fiscal years 1997 through 2003.

(4) Reservation

If the appropriation made pursuant to paragraph (3) for any fiscal year is not sufficient to satisfy the requirements of paragraph (1), the Administrator shall, prior to any other allocation or reservation, reserve such sums as necessary from the funds appropriated pursuant to section 300j–12(m) of this title to provide reimbursement for the training and certification costs mandated by this subsection.

(July 1, 1944, ch. 373, title XIV, §1419, as added Pub. L. 104–182, title I, §123, Aug. 6, 1996, 110 Stat. 1652.)
§ 300g–9. Capacity development

(a) State authority for new systems

A State shall receive only 80 percent of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds) unless the State has obtained the legal authority or other means to ensure that all new community water systems and new nontransient, noncommunity water systems commencing operation after October 1, 1999, demonstrate technical, managerial, and financial capacity with respect to each national primary drinking water regulation in effect, or likely to be in effect, on the date of commencement of operations.

(b) Systems in significant noncompliance

(1) List

Beginning not later than 1 year after August 6, 1996, each State shall report to the Administrator a list of community water systems and nontransient, noncommunity water systems that have a history of significant noncompliance with this subchapter (as defined in guidelines issued prior to August 6, 1996, or any revisions of the guidelines that have been made in consultation with the States) and, to the extent practicable, the reasons for noncompliance.

(2) Report

Not later than 5 years after August 6, 1996, and as part of the capacity development strategy of the State, each State shall report to the Administrator on the success of enforcement mechanisms and initial capacity development efforts in assisting the public water systems listed under paragraph (1) to improve technical, managerial, and financial capacity.

(c) Capacity development strategy

(1) In general

Beginning 4 years after August 6, 1996, a State shall receive only—

(A) 90 percent in fiscal year 2001;
(B) 85 percent in fiscal year 2002; and
(C) 80 percent in each subsequent fiscal year,

of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds), unless the State is developing and implementing a strategy to assist public water systems in acquiring and maintaining technical, managerial, and financial capacity.

(2) Content

In preparing the capacity development strategy, the State shall consider, solicit public comment on, and include as appropriate—

(A) the methods or criteria that the State will use to identify and prioritize the public water systems most in need of improving technical, managerial, and financial capacity;
(B) a description of the institutional, regulatory, financial, tax, or legal factors at the Federal, State, or local level that encourage or impair capacity development;
(C) a description of how the State will use the authorities and resources of this subchapter or other means to—

(i) assist public water systems in complying with national primary drinking water regulations;
(ii) encourage the development of partnerships between public water systems to enhance the technical, managerial, and financial capacity of the systems; and
(iii) assist public water systems in the training and certification of operators;
(D) a description of how the State will establish a baseline and measure improvements in capacity with respect to national primary drinking water regulations and State drinking water law; and
(E) an identification of the persons that have an interest in and are involved in the development and implementation of the capacity development strategy (including all appropriate agencies of Federal, State, and local governments, private and nonprofit public water systems, and public water system customers).

(3) Report

Not later than 2 years after the date on which a State first adopts a capacity development strategy under this subsection, and every 3 years thereafter, the head of the State agency that has primary responsibility to carry out this subchapter in the State shall submit to the Governor a report that shall also be available to the public on the efficacy of the strategy and progress made toward improving the technical, managerial, and financial capacity of public water systems in the State.

(4) Review

The decisions of the State under this section regarding any particular public water system are not subject to review by the Administrator and may not serve as the basis for withholding funds under section 300j–12 of this title.

(d) Federal assistance

(1) In general

The Administrator shall support the States in developing capacity development strategies.

(2) Informational assistance

(A) In general

Not later than 180 days after August 6, 1996, the Administrator shall—

(i) conduct a review of State capacity development efforts in existence on August 6, 1996, and publish information to assist States and public water systems in capacity development efforts; and
(ii) initiate a partnership with States, public water systems, and the public to-
develop information for States on recommended operator certification requirements.

(B) Publication of information
The Administrator shall publish the information developed through the partnership under subparagraph (A)(ii) not later than 18 months after August 6, 1996.

(3) Promulgation of drinking water regulations
In promulgating a national primary drinking water regulation, the Administrator shall include an analysis of the likely effect of compliance with the regulation on the technical, financial, and managerial capacity of public water systems.

(4) Guidance for new systems
Not later than 2 years after August 6, 1996, the Administrator shall publish guidance developed in consultation with the States describing legal authorities and other means to ensure that all new community water systems and new nontransient, noncommunity water systems demonstrate technical, managerial, and financial capacity with respect to national primary drinking water regulations.

(e) Variances and exemptions
Based on information obtained under subsection (c)(3) of this section, the Administrator shall, as appropriate, modify regulations concerning variances and exemptions for small public water systems to ensure flexibility in the use of the variances and exemptions. Nothing in this subsection shall be interpreted, construed, or applied to affect or alter the requirements of section 300g–4 or 300g–5 of this title.

(f) Small public water systems technology assistance centers

(1) Grant program
The Administrator is authorized to make grants to institutions of higher learning to establish and operate small public water system technology assistance centers in the United States.

(2) Responsibilities of the centers
The responsibilities of the small public water system technology assistance centers established under this subsection shall include the conduct of training and technical assistance relating to the information, performance, and technical needs of small public water systems or public water systems that serve Indian Tribes.

(3) Applications
Any institution of higher learning interested in receiving a grant under this subsection shall submit to the Administrator an application in such form and containing such information as the Administrator may require by regulation.

(4) Selection criteria
The Administrator shall select recipients of grants under this subsection on the basis of the following criteria:

(A) The small public water system technology assistance center shall be located in a State that is representative of the needs of the region in which the State is located for addressing the drinking water needs of small and rural communities or Indian Tribes.

(B) The grant recipient shall be located in a region that has experienced problems, or may reasonably be foreseen to experience problems, with small and rural public water systems.

(C) The grant recipient shall have access to expertise in small public water system technology management.

(D) The grant recipient shall have the capability to disseminate the results of small public water system technology and training programs.

(E) The projects that the grant recipient proposes to carry out under the grant are necessary and appropriate.

(F) The grant recipient has regional support beyond the host institution.

(5) Consortia of States
At least 2 of the grants under this subsection shall be made to consortia of States with low population densities.

(6) Authorization of appropriations
There are authorized to be appropriated to make grants under this subsection $2,000,000 for each of the fiscal years 1997 through 1999, and $5,000,000 for each of the fiscal years 2000 through 2003.

(g) Environmental finance centers

(1) In general
The Administrator shall provide initial funding for one or more university-based environmental finance centers for activities that provide technical assistance to State and local officials in developing the capacity of public water systems. Any such funds shall be used only for activities that are directly related to this subchapter.

(2) National capacity development clearinghouse
The Administrator shall establish a national public water system capacity development clearinghouse to receive and disseminate information with respect to developing, improving, and maintaining financial and managerial capacity at public water systems. The Administrator shall ensure that the clearinghouse does not duplicate other federally supported clearinghouse activities.

(3) Capacity development techniques
The Administrator may request an environmental finance center funded under paragraph (1) to develop and test managerial, financial, and institutional techniques for capacity development. The techniques may include capacity assessment methodologies, manual and computer based public water system rate models and capital planning models, public water system consolidation procedures, and regionalization models.

(4) Authorization of appropriations
There are authorized to be appropriated to carry out this subsection $1,500,000 for each of the fiscal years 1997 through 2003.
(5) Limitation

No portion of any funds made available under this subsection may be used for lobbying expenses.

(July 1, 1944, ch. 373, title XIV, §1420, as added Pub. L. 104–182, title I, §119, Aug. 6, 1996, 110 Stat. 1647.)

PART C—PROTECTION OF UNDERGROUND SOURCES OF DRINKING WATER

§ 300h. Regulations for State programs

(a) Publication of proposed regulations; promulgation; amendments; public hearings; administrative consultations

(1) The Administrator shall publish proposed regulations for State underground injection control programs within 180 days after December 16, 1974. Within 180 days after publication of such proposed regulations, he shall promulgate such regulations with such modifications as he deems appropriate. Any regulation under this subsection may be amended from time to time.

(2) Any regulation under this section shall be proposed and promulgated in accordance with section 553 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section the Administrator shall consult with the Secretary, the National Drinking Water Advisory Council, and other appropriate Federal entities and with interested State entities.

(b) Minimum requirements; restrictions

(1) Regulations under subsection (a) of this section for State underground injection control programs shall contain minimum requirements for effective programs to prevent underground injection which endangers drinking water sources within the meaning of subsection (d)(2) of this section. Such regulations shall require that a State program, in order to be approved under section 300h–1 of this title—

(A) shall prohibit, effective on the date on which the applicable underground injection control program takes effect, any underground injection in such State which is not authorized by a permit issued by the State (except that the regulations may permit a State to authorize underground injection by rule);

(B) shall require (i) in the case of a program which provides for authorization of underground injection by permit, that the applicant for the permit to inject must satisfy the State that the underground injection will not endanger drinking water sources, and (ii) in the case of a program which provides for such an authorization by rule, that no rule may be promulgated which authorizes any underground injection which endangers drinking water sources;

(C) shall include inspection, monitoring, recordkeeping, and reporting requirements; and

(D) shall apply (i) as prescribed by section 300j–6(b) of this title, to underground injections by Federal agencies, and (ii) to underground injections by any other person whether or not occurring on property owned or leased by the United States.

(2) Regulations of the Administrator under this section for State underground injection control programs may not prescribe requirements which interfere with or impede the establishment or operation of underground injection programs which provide for the injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations, or

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas, unless such requirements are essential to assure that underground sources of drinking water will not be endangered by such injection.

(3)(A) The regulations of the Administrator under this section shall permit or provide for consideration of varying geologic, hydrological, or historical conditions in different States and in different areas within a State.

(B)(i) In prescribing regulations under this section the Administrator shall, to the extent feasible, avoid promulgation of requirements which would unnecessarily disrupt State underground injection control programs which are in effect and being enforced in a substantial number of States.

(ii) For the purpose of this subparagraph, a regulation prescribed by the Administrator under this section shall be deemed to disrupt a State underground injection control program only if it would be infeasible to comply with such regulation and the State underground injection control program.

(C) Nothing in this section shall be construed to alter or affect the duty to assure that underground sources of drinking water will not be endangered by an underground injection.

(c) Temporary permits; notice and hearing

(1) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to issue (without regard to subsection (b)(1)(B)(i) of this section) temporary permits for underground injection which may be effective until the expiration of four years after December 16, 1974, if—

(A) the Administrator finds that the State has demonstrated that it is unable and could not reasonably have been able to process all permit applications within the time available;

(B) the Administrator determines the adverse effect on the environment of such temporary permits is not unwarranted;

(C) such temporary permits will be issued only with respect to injection wells in operation on the date on which such State's permit program approved under this part first takes effect and for which there was inadequate time to process its permit application; and

(D) the Administrator determines the temporary permits require the use of adequate
safeguards established by rules adopted by him.

(2) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to (without regard to subsection (b)(1)(B)(i) of this section), but after reasonable notice and hearing, one or more temporary permits each of which is applicable to a particular injection well and to the underground injection of a particular fluid and which may be effective until the expiration of four years after December 16, 1974, if the State finds, on the record of such hearing—

(A) that the technology (or other means) to permit safe injection of the fluid in accordance with the applicable underground injection control program is not generally available (taking costs into consideration);

(B) that injection of the fluid would be less harmful to health than the use of other available means of disposing of waste or producing the desired product; and

(C) that available technology or other means have been employed (and will be employed) to reduce the volume and toxicity of the fluid and to minimize the potentially adverse effect of the injection on the public health.

(3) “Underground injection” defined; underground injection endangerment of drinking water sources

For purposes of this part:

(1) UNDERGROUND INJECTION.—The term “underground injection”—

(A) means the subsurface emplacement of fluids by well injection; and

(B) excludes—

(i) the underground injection of natural gas for purposes of storage; and

(ii) the underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

(2) Underground injection endangers drinking water sources if such injection may result in the presence in underground water which supplies or can reasonably be expected to supply any public water system of any contaminant, and if the presence of such contaminant may result in such system(s) not complying with any national primary drinking water regulations or may otherwise adversely affect the health of persons.

(7) List of States in need of a control program; amendment of list

Within 180 days after December 16, 1974, the Administrator shall list in the Federal Register each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources. Such list may be amended from time to time.

(b) State applications; notice to Administrator of compliance with revised or added requirements; approval or disapproval by Administrator; duration of State primary enforcement responsibility; public hearing

(1) List of States in need of a control program; amendment of list

(A) Each State listed under subsection (a) of this section shall within 270 days after the date of promulgation of any regulation under section 300h of this title (or, if later, within 270 days after such State is first listed under subsection (a) of this section) submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State—

(i) has adopted after reasonable notice and public hearings, and will implement, an underground injection control program which meets the requirements of regulations in effect under section 300h of this title; and

(ii) will keep such records and make such reports with respect to its activities under its underground injection control program as the Administrator may require by regulation.

The Administrator may, for good cause, extend the date for submission of an application by any State under this subparagraph for a period not to exceed an additional 270 days.

(B) Within 270 days of any amendment of a regulation under section 300h of this title revising or adding any requirement respecting State underground injection control programs, each State listed under subsection (a) of this section shall submit (in such form and manner as the Administrator may require) a notice to the Administrator containing a showing satisfactory to him that the State underground injection control program meets the revised or added requirement.

(2) List of States in need of a control program; amendment of list.

(A) Each State listed under subsection (a) of this section shall within 270 days after the date of promulgation of any regulation under section 300h of this title (or, if later, within 270 days after such State is first listed under subsection (a) of this section) submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State—

(i) has adopted after reasonable notice and public hearings, and will implement, an underground injection control program which meets the requirements of regulations in effect under section 300h of this title; and

(ii) will keep such records and make such reports with respect to its activities under its underground injection control program as the Administrator may require by regulation.

The Administrator may, for good cause, extend the date for submission of an application by any State under this subparagraph for a period not to exceed an additional 270 days.

(B) Within 270 days of any amendment of a regulation under section 300h of this title revising or adding any requirement respecting State underground injection control programs, each State listed under subsection (a) of this section shall submit (in such form and manner as the Administrator may require) a notice to the Administrator containing a showing satisfactory to him that the State underground injection control program meets the revised or added requirement.

(2) Within ninety days after the State’s application under paragraph (1)(A) or notice under

RE礼貌

REFERENCES IN TEXT

Section 300j–6(b) of this title, referred to in subsec. (b)(1)(D), was repealed, and a new section 300j–6(b) relating to administrative penalty orders was added, by Pub. L. 104–182, title I, §129(a), Aug. 6, 1996, 110 Stat. 1660.
paragraph (1)(B) and after reasonable opportunity for presentation of views, the Administrator shall by rule either approve, disapprove, or approve in part and disapprove in part, the State's underground injection control program. If the Administrator approves the State's program under paragraph (2), the State shall have primary enforcement responsibility for underground water sources until such time as the Administrator determines, by rule, that such State no longer meets the requirements of clause (i) or (ii) of paragraph (1)(A) of this section.

(4) Before promulgating any rule under paragraph (2) or (3) of this subsection, the Administrator shall provide opportunity for public hearing respecting such rule.

(c) Program by Administrator for State without primary enforcement responsibility; restrictions

If the Administrator disapproves a State's program (or part thereof) under subsection (b)(2) of this section, if the Administrator determines under subsection (b)(3) of this section that a State no longer meets the requirements of clause (i) or (ii) of subsection (b)(1)(A) of this section or if a State fails to submit an application or notice before the date of expiration of the period specified in subsection (b)(1) of this section, the Administrator shall by regulation revise a program applicable underground injection control program to such State meeting the requirements of section 300h(b) of this title. Such program may not include requirements which interfere with or impede—

(1) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations, or

(2) any underground injection for the secondary or tertiary recovery of oil or natural gas, unless such requirements are essential to assure that underground sources of drinking water will not be endangered by such injection. Such program shall apply in such State to the extent that a program adopted by such State which the Administrator determines meets such requirements is not in effect. Before promulgating any regulation under this section, the Administrator shall provide opportunity for public hearing respecting such regulation.

(d) "Applicable underground injection control program" defined

For purposes of this subchapter, the term "applicable underground injection control program" with respect to a State means the program (or most recent amendment thereof) (1) which has been adopted by the State and which has been approved under subsection (b) of this section, or (2) which has been prescribed by the Administrator under subsection (c) of this section.

(e) Primary enforcement responsibility by Indian Tribe

An Indian Tribe may assume primary enforcement responsibility for underground injection control under this section consistent with such regulations as the Administrator has prescribed pursuant to this part and section 300j–11 of this title. The area over which such Indian Tribe exercises governmental jurisdiction need not have been listed under subsection (a) of this section, and such Tribe need not submit an application to assume primary enforcement responsibility within the 270-day deadline noted in subsection (b)(1)(A) of this section. Until an Indian Tribe assumes primary enforcement responsibility, the currently applicable underground injection control program shall continue to apply. If an applicable underground injection control program does not exist for an Indian Tribe, the Administrator shall prescribe such a program pursuant to subsection (c) of this section, and consistent with section 300h(b) of this title, within 270 days after June 19, 1986, unless an Indian Tribe first obtains approval to assume primary enforcement responsibility for underground injection control.

(1) Whenever the Administrator finds during a period during which a State has primary enforcement responsibility for underground water sources (within the meaning of section 300h–1(b)(3) of this title or section 300h–4(c) of this title) that any person who is subject to a requirement of an applicable underground injection control program in such State is violating such requirement, he shall notify the State and the person violating such requirement. If beyond the thirtieth day after the Administrator's notification the State has not commenced appropriate enforcement action, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(2) Whenever the Administrator finds during a period during which a State does not have primary enforcement responsibility for underground water sources that any person subject to any requirement of any applicable underground injection control program in such State is violating such requirement, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.
(b) Civil and criminal actions

Civil actions referred to in paragraphs (1) and (2) of subsection (a) of this section shall be brought in the appropriate United States district court. Such court shall have jurisdiction to require compliance with any requirement of an applicable underground injection program or with an order issued under subsection (c) of this section. The court may enter such judgment as protection of public health may require. Any person who violates any requirement of an applicable underground injection control program or an order requiring compliance under subsection (c) of this section—

(1) shall be subject to a civil penalty of not more than $25,000 for each day of such violation, and

(2) if such violation is willful, such person may, in addition to or in lieu of the civil penalty authorized by paragraph (1), be imprisoned for not more than 3 years, or fined in accordance with title 18, or both.

c) Administrative orders

(1) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation or other requirement of this part other than those relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $10,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(2) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation, or other requirement of this part relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $5,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(3)(A) An order under this subsection shall be issued by the Administrator after opportunity (provided in accordance with this subparagraph) for a hearing. Before issuing the order, the Administrator shall give to the person to whom it is directed written notice of the Administrator’s proposal to issue such order and the opportunity to request, within 30 days of the date the notice is received by such person, a hearing on the order. Such hearing shall not be subject to section 554 or 556 of title 5, but shall provide a reasonable opportunity to be heard and to present evidence.

(B) The Administrator shall provide public notice of, and reasonable opportunity to comment on, any proposed order.

(C) Any citizen who comments on any proposed order under subparagraph (B) shall be given notice of any hearing under this subsection and of any order. In any hearing held under subparagraph (A), such citizen shall have a reasonable opportunity to be heard and to present evidence.

(D) Any order issued under this subsection shall become effective 30 days following its issuance unless an appeal is taken pursuant to paragraph (6).

(4)(A) Any order issued under this subsection shall state with reasonable specificity the nature of the violation and may specify a reasonable time for compliance.

(B) In assessing any civil penalty under this subsection, the Administrator shall take into account appropriate factors, including (i) the seriousness of the violation; (ii) the economic benefit (if any) resulting from the violation; (iii) any history of such violations; (iv) any good-faith efforts to comply with the applicable requirements; (v) the economic impact of the penalty on the violator; and (vi) such other matters as justice may require.

(5) Any violation with respect to which the Administrator has commenced and is diligently prosecuting an action, or has issued an order under this subsection assessing a penalty, shall not be subject to an action under subsection (b) of this section or section 300h–3(c) or 300j–8 of this title, except that the foregoing limitation on civil actions under section 300j–8 of this title shall not apply with respect to any violation for which—

(A) a civil action under section 300j–8(a)(1) of this title has been filed prior to commencement of an action under this subsection, or

(B) a notice of violation under section 300j–8(b)(1) of this title has been given before commencement of an action under this subsection and an action under section 300j–8(a)(1) of this title is filed before 120 days after such notice is given.

(6) Any person against whom an order is issued or who commented on a proposed order pursuant to paragraph (3) may file an appeal of such order with the United States District Court for the District of Columbia or the district in which the violation is alleged to have occurred. Such an appeal may only be filed within the 30-day period beginning on the date the order is issued. Appellant shall simultaneously send a copy of the appeal by certified mail to the Administrator and to the Attorney General. The Administrator shall promptly file in such court a certified copy of the record on which such order was imposed. The district court shall not set aside or remand such order unless there is not substantial evidence on the record, taken as a whole, to support the finding of a violation or, unless the Administrator’s assessment of penalty or requirement for compliance constitutes an abuse of discretion. The district court shall
not impose additional civil penalties for the same violation unless the Administrator’s assessment of a penalty constitutes an abuse of discretion. Notwithstanding section 300–7(a)(2) of this title, any order issued under paragraph (3) shall be subject to judicial review exclusively under this paragraph.

(7) If any person fails to pay an assessment of a civil penalty—

(A) after the order becomes effective under paragraph (3), or

(B) after a court, in an action brought under paragraph (6), has entered a final judgment in favor of the Administrator,

the Administrator may request the Attorney General to bring a civil action in an appropriate district court to recover the amount assessed (plus costs, attorneys’ fees, and interest at currently prevailing rates from the date the order is effective or the date of such final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review.

(8) The Administrator may, in connection with administrative proceedings under this subsection, issue subpoenas compelling the attendance and testimony of witnesses and subpoenas duces tecum, and may request the Attorney General to bring an action to enforce any subpoena under this section. The district courts shall have jurisdiction to enforce such subpoenas and impose sanction.

(d) State authority to adopt or enforce laws or regulations respecting underground injection unaffected

Nothing in this subchapter shall diminish any authority of a State or political subdivision to adopt or enforce any law or regulation respecting underground injection but no such law or regulation shall relieve any person of any requirement otherwise applicable under this subchapter.

AMENDMENTS

Subsec. (a)(1). Pub. L. 99–339, § 202(a)(1), substituted provisions which related to issuance of an order of compliance or commencement of a civil action by the Administrator if the State has not commenced enforcement against the violator for provisions directing the Administrator to give public notice and request that the State report within 15 days thereafter as to steps taken to enforce compliance and authorizing the Administrator to commence a civil action upon failure by the State to comply timely.

Subsec. (a)(2). Pub. L. 99–339, § 202(a)(2), substituted provision that the Administrator issue an order under subsection (c) of this section or commence a civil action under subsection (b) of this section for provision that he commence a civil action under subsection (b)(1) of this section.

Subsec. (b). Pub. L. 99–339, § 202(b), amended subsection (b) generally, substituting provisions relating to jurisdiction of the appropriate Federal district court, entry of judgment, civil penalty of $25,000 per day, criminal liability and fine for willful violation for provisions which related to judicial determinations in appropriate Federal district courts, civil penalties of $5,000 per day, and fines of $10,000 per day for willful violations.

Subsecs. (c), (d). Pub. L. 99–339, § 202(c), added subsection (c) and redesignated former subsection (c) as (d).
well in an area designated under subsection (a) of this section only, if he finds that the operation of such well will not cause contamination of the aquifer of such area so as to create a significant hazard to public health. The Administrator may condition the issuance of such a permit upon the use of such control measures in connection with the operation of such well, for which the permit is to be issued, as he deems necessary to assure that the operation of the well will not contaminate the aquifer of the designated area in which the well is located so as to create a significant hazard to public health.

(c) Civil penalties; separate violations; penalties for willful violations; temporary restraining order or injunction

Any person who operates a new underground injection well in violation of subsection (b) of this section, (1) shall be subject to a civil penalty of not more than $5,000 for each day in which such violation occurs, and (2) if such violation is willful, such person may, in lieu of the civil penalty authorized by clause (1), be fined not more than $10,000 for each day in which such violation occurs. If the Administrator has reason to believe that any person is violating or will violate subsection (b) of this section, he may petition the United States district court to issue a temporary restraining order or injunction (including a mandatory injunction) to enforce such subsection.

(d) "New underground injection well" defined

For purposes of this section, the term "new underground injection well" means an underground injection well whose operation was not approved by appropriate State and Federal agencies before December 16, 1974.

(e) Areas with one aquifer; publication in Federal Register; commitments for Federal financial assistance

If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the Federal Register. After the publication of any such notice, no commitment for Federal financial assistance (including a mandatory injunction) to enforce such subsection.

§ 300h–1(b) of this section, in the case of that portion of a State underground injection control program for which the demonstration referred to in subsection (a) of this section has been made, in lieu of the showing required under section 300h–1(b)(1)(B) of this title the State may demonstrate that such portion of the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(b) Revision or amendment of requirements of regulation; showing of effectiveness of program by State

If the Administrator revises or amends any requirement of a regulation under section 300h of this title relating to any aspect of the underground injection referred to in subsection (a) of this section, in the case of that portion of a State underground injection control program for which the demonstration referred to in subsection (a) of this section has been made, in lieu of the showing required under section 300h–1(b)(1)(B) of this title the State may demonstrate that, with respect to that aspect of such underground injection, the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(c) Primary enforcement responsibility of State; voiding by Administrator under duly promulgated rule

(1) Section 300h–1(b)(3) of this title shall not apply to that portion of any State underground injection control program approved by the Administrator pursuant to a demonstration under subsection (a) of this section (and under subsection (b) of this section where applicable).

(2) If pursuant to such a demonstration, the Administrator approves such portion of the State program, the State shall have primary enforcement responsibility with respect to that portion until such time as the Administrator determines, by rule, that such demonstration is no longer valid. Following such a determination, the Administrator may exercise the authority of subsection (c) of section 300h–1 of this title in the same manner as provided in such subsection with respect to a determination described in such subsection.

(3) Before promulgating any rule under paragraph (2), the Administrator shall provide opportunity for public hearing respecting such rule.

§ 300h–4. Optional demonstration by States relating to oil or natural gas

(a) Approval of State underground injection control program; alternative showing of effectiveness of program by State

For purposes of the Administrator’s approval or disapproval under section 300h–1 of this title of that portion of any State underground injection control program which relates to—

1. the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations;

2. any underground injection for the secondary or tertiary recovery of oil or natural gas, in lieu of the showing required under subparagraph (A) of section 300h–1(b)(1) of this title the State may demonstrate that such portion of the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

MENDMENTS

1986—Subsec. (a)(1). Pub. L. 99–339 inserted "or natural gas storage operations, or" after "production".
§ 300h-5. Regulation of State programs

Not later than 18 months after June 19, 1986, the Administrator may modify regulations issued under this chapter for Class I injection wells to identify monitoring methods, in addition to those in effect on November 1, 1985, including groundwater monitoring. In accordance with such regulations, the Administrator, or delegated State authority, shall determine the applicability of such monitoring methods, wherever appropriate, at locations and in such a manner as to provide the earliest possible detection of fluid migration into, or in the direction of, underground sources of drinking water from such wells, based on its assessment of the potential for fluid migration from the injection zone that may be harmful to human health or the environment. For purposes of this subsection, a class I injection well is defined in accordance with 40 CFR 146.05 as in effect on November 1, 1985.

AMENDMENTS

1996—Pub. L. 104–182 directed technical amendment of section catchline and subsec. (a) designation. The provision directing amendment of subsec. (a) designation could not be executed because section does not contain a subsec. (a).

1995—Pub. L. 104–66 struck out subsec. (a) designation and heading before “Not later than’ and struck out heading and text of subsec. (b). Text read as follows: “(1) The Administrator shall submit a report to Congress, no later than September 1987, summarizing the results of State surveys required by the Administrator under this section. The report shall include each of the following items of information:

“(1) The numbers and categories of class V wells which discharge nonhazardous waste into or above an underground source of drinking water.

“(2) The primary contamination problems associated with different categories of these disposal wells.

“(3) Recommendations for minimum design, construction, installation, and siting requirements that should be applied to protect underground sources of drinking water from such contamination wherever necessary.”

§ 300h-6. Sole source aquifer demonstration program

(a) Purpose

The purpose of this section is to establish procedures for development, implementation, and assessment of demonstration programs designed to protect critical aquifer protection areas located within areas designated as sole or principal source aquifers under section 300h–3(e) of this title.

(b) “Critical aquifer protection area” defined

For purposes of this section, the term “critical aquifer protection area” means either of the following:

(1) All or part of an area located within an area for which an application or designation as a sole or principal source aquifer pursuant to section 300h–3(e) of this title, has been submitted and approved by the Administrator and which satisfies the criteria established by the Administrator under subsection (d) of this section.

(2) All or part of an area which is within an aquifer designated as a sole source aquifer as of June 19, 1986, and for which an area wide ground water quality protection plan has been approved under section 208 of the Clean Water Act [33 U.S.C. 1288] prior to June 19, 1986.

(c) Application

Any State, municipal or local government or political subdivision thereof or any planning entity (including any interstate regional planning entity) that identifies a critical aquifer protection area over which it has authority or jurisdiction may apply to the Administrator for the selection of such area for a demonstration program under this section. Any applicant shall consult with other government or planning entities with authority or jurisdiction in such area prior to application. Applicants, other than the Governor, shall submit the application for a demonstration program jointly with the Governor.

(d) Criteria

Not later than 1 year after June 19, 1986, the Administrator shall, by rule, establish criteria for identifying critical aquifer protection areas under this section. In establishing such criteria, the Administrator shall consider each of the following:

(1) The vulnerability of the aquifer to contamination due to hydrogeologic characteristics.

(2) The number of persons or the proportion of population using the ground water as a drinking water source.

(3) The economic, social and environmental benefits that would result to the area from maintenance of ground water of high quality.

(4) The economic, social and environmental costs that would result from degradation of the quality of the ground water.

(e) Contents of application

An application submitted to the Administrator by any applicant for a demonstration program under this section shall meet each of the following requirements:

(1) The application shall propose boundaries for the critical aquifer protection area within its jurisdiction.

(2) The application shall designate or, if necessary, establish a planning entity (which shall be a public agency and which shall include representation of elected local and State governmental officials) to develop a comprehensive management plan (hereinafter in this section referred to as the “plan”) for the critical protection area. Where a local government planning agency exists with adequate authority to carry out this section with respect to any proposed critical protection area, such agency shall be designated as the planning entity.

(3) The application shall establish procedures for public participation in the development of the plan, for review, approval, and adoption of the plan, and for assistance to mu-
ment plan submitted by an applicant under this section shall be to maintain the quality of the ground water in the critical protection area in a manner reasonably expected to protect human health, the environment and ground water resources. In order to achieve such objective, the plan may be designed to maintain, to the maximum extent possible, the natural vegetative and hydrogeological conditions. Each of the following elements shall be included in such a protection plan:

(A) A map showing the detailed boundary of the critical protection area.
(B) An identification of existing and potential point and nonpoint sources of ground water degradation.
(C) An assessment of the relationship between activities on the land surface and ground water quality.
(D) Specific actions and management practices to be implemented in the critical protection area to prevent adverse impacts on ground water quality.
(E) Identification of authority adequate to implement the plan, estimates of program costs, and sources of State matching funds.

(2) Such plan may also include the following:

(A) A determination of the quality of the existing ground water recharged through the special protection area and the natural recharge capabilities of the special protection area watershed.
(B) Requirements designed to maintain existing underground drinking water quality or improve underground drinking water quality if prevailing conditions fail to meet drinking water standards, pursuant to this chapter and State law.
(C) Limits on Federal, State, and local government, financially assisted activities and projects which may contribute to degradation of such ground water or any loss of natural surface and subsurface infiltration of purification capability of the special protection watershed.
(D) A comprehensive statement of land use management including emergency contingency planning as it pertains to the maintenance of the quality of underground sources of drinking water or to the improvement of such sources if necessary to meet drinking water standards pursuant to this chapter and State law.
(E) Actions in the special protection area which would avoid adverse impacts on water quality, recharge capabilities, or both.

(F) Consideration of specific techniques, which may include clustering, transfer of development rights, and other innovative measures sufficient to achieve the objectives of this section.

(G) Consideration of the establishment of a State institution to facilitate and assist funding a development transfer credit system.

(H) A program for State and local implementation of the plan described in this subsection in a manner that will insure the continued, uniform, consistent protection of the critical protection area in accord with the purposes of this section.

(I) Pollution abatement measures, if appropriate.

(g) Plans under section 208 of Clean Water Act

A plan approved before June 19, 1986, under section 208 of the Clean Water Act [33 U.S.C. 1288] to protect a sole source aquifer designated under section 300h-3(e) of this title shall be considered a comprehensive management plan for the purposes of this section.

(h) Consultation and hearings

During the development of a comprehensive management plan under this section, the planning entity shall consult with, and consider the comments of, appropriate officials of any municipality and State or Federal agency which has jurisdiction over lands and waters within the special protection area, other concerned organizations and technical and citizen advisory committees. The planning entity shall conduct public hearings at places within the special protection area for the purpose of providing the opportunity to comment on any aspect of the plan.

(i) Approval or disapproval

Within 120 days after receipt of an application under this section, the Administrator shall approve or disapprove the application. The approval or disapproval shall be based on a determination that the critical protection area satisfies the criteria established under subsection (d) of this section and that a demonstration program for the area would provide protection for ground water quality consistent with the objectives stated in subsection (f) of this section. The Administrator shall provide to the Governor a written explanation of the reasons for the disapproval of any such application. Any petitioner may modify and resubmit any application which is not approved. Upon approval of an application, the Administrator may enter into a cooperative agreement with the applicant to establish a demonstration program under this section.

(j) Grants and reimbursement

Upon entering a cooperative agreement under subsection (i) of this section, the Administrator may provide to the applicant, on a matching basis, a grant of 50 per centum of the costs of implementing the plan established under this section. The Administrator may also reimburse the applicant of an approved plan up to 50 per centum of the costs of developing such plan, except for plans approved under section 208 of the Clean Water Act [33 U.S.C. 1288]. The total amount of grants under this section for any one
aqueifer, designated under section 300h-3(e) of this title, shall not exceed $4,000,000 in any one fiscal year.

(k) Activities funded under other law

No funds authorized under this section may be used to fund activities funded under other sections of this chapter or the Clean Water Act [33 U.S.C. 1251 et seq.], the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.] or other environmental laws.

(l) Savings provision

Nothing under this section shall be construed to amend, supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws; or any requirement imposed or right provided under any Federal or State environmental or public health statute.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out this section not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$10,000,000</td>
</tr>
<tr>
<td>1988</td>
<td>15,000,000</td>
</tr>
<tr>
<td>1989</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1990</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1991</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1992-2003</td>
<td>15,000,000</td>
</tr>
</tbody>
</table>

Matching grants under this section may also be used to implement or update any water quality management plan for a sole or principal source aquifer approved (before June 19, 1986) by the Administrator under section 208 of the Federal Water Pollution Control Act [33 U.S.C. 1288].

(1) Fiscal year.

(2) Amount.

(a) State programs

The Governor or Governor's designee of each State shall, within 3 years of June 19, 1986, adopt and submit to the Administrator a State program to protect wellhead areas within their jurisdiction from contaminants which may have any adverse effect on the health of persons. Each State program under this section shall, at a minimum—

1. specify the duties of State agencies, local governmental entities, and public water supply systems with respect to the development and implementation of programs required by this section;
2. for each wellhead, determine the wellhead protection area as defined in subsection (e) of this section based on all reasonably available hydrogeologic information on ground water flow, recharge and discharge and other information the State deems necessary to adequately determine the wellhead protection area;
3. identify within each wellhead protection area all potential anthropogenic sources of contaminants which may have any adverse effect on the health of persons;
4. describe a program that contains, as appropriate, technical assistance, financial assistance, implementation of control measures, education, training, and demonstration projects to protect the water supply within wellhead protection areas from such contaminants;
5. include contingency plans for the location and provision of alternate drinking water supplies for each public water system in the event of well or wellfield contamination by such contaminants; and
6. include a requirement that consideration be given to all potential sources of such contaminants within the expected wellhead area of a new water well which serves a public water supply system.

(b) Public participation

To the maximum extent possible, each State shall establish procedures, including but not
limited to the establishment of technical and citizens' advisory committees, to encourage the public to participate in developing the protection program for wellhead areas and source water assessment programs under section 300j–13 of this title. Such procedures shall include notice and opportunity for public hearing on the State program before it is submitted to the Administrator.

(c) Disapproval

(1) In general

If, in the judgment of the Administrator, a State program or portion thereof under subsection (a) of this section is not adequate to protect public water systems as required by subsection (a) of this section or a State program under section 300j–13 of this title or section 300g–7(b) of this title does not meet the applicable requirements of section 300j–13 of this title or section 300g–7(b) of this title, the Administrator shall disapprove such program or portion thereof. A State program developed pursuant to subsection (a) of this section shall be deemed to be adequate unless the Administrator determines, within 9 months of the receipt of a State program, that such program (or portion thereof) is inadequate for the purpose of protecting public water systems as required by this section from contaminants that may have any adverse effect on the health of persons. A State program developed pursuant to section 300j–13 of this title or section 300g–7(b) of this title shall be deemed to be adequate unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements. If the Administrator determines that a proposed State program (or any portion thereof) is disapproved, the Administrator shall submit a written statement of the reasons for such determination to the Governor of the State.

(2) Modification and resubmission

Within 6 months after receipt of the Administrator's written notice under paragraph (1) that any proposed State program (or portion thereof) is disapproved, the Governor or Governor's designee, shall modify the program based upon the recommendations of the Administrator and resubmit the modified program to the Administrator.

(d) Federal assistance

After the date 3 years after June 19, 1986, no State shall receive funds authorized to be appropriated under this section except for the purpose of implementing the program and requirements of paragraphs (4) and (6) of subsection (a) of this section.

(e) "Wellhead protection area" defined

As used in this section, the term "wellhead protection area" means the surface and subsurface area surrounding a water well or wellfield, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or wellfield. The extent of a wellhead protection area, within a State, necessary to provide protection from contaminants which may have any adverse effect on the health of persons is to be determined by the State in the program submitted under subsection (a) of this section. Not later than one year after June 19, 1986, the Administrator shall issue technical guidance which States may use in making such determinations. Such guidance may reflect such factors as the radius of influence around a well or wellfield, the depth of drawdown of the water table by such well or wellfield at any given point, the time or rate of travel of various contaminants in various hydrologic conditions, distance from the well or wellfield, or other factors affecting the likelihood of contaminants reaching the well or wellfield, taking into account available engineering pump tests or comparable data, field reconnaissance, topographic information, and the geology of the formation in which the well or wellfield is located.

(f) Prohibitions

(1) Activities under other laws

No funds authorized to be appropriated under this section may be used to support activities authorized by the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.], or other sections of this chapter.

(2) Individual sources

No funds authorized to be appropriated under this section may be used to bring individual sources of contamination into compliance.

(g) Implementation

Each State shall make every reasonable effort to implement the State wellhead area protection program under this section within 2 years of submitting the program to the Administrator. Each State shall submit to the Administrator a biennial status report describing the State's progress in implementing the program. Such report shall include amendments to the State program for water wells sited during the biennial period.

(h) Federal agencies

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government having jurisdiction over any potential source of contaminants identified by a State program pursuant to the provisions of subsection (a)(4) of this section shall be subject to and comply with all requirements of the State program developed according to subsection (a)(4) of this section applicable to such potential source of contaminants, both substantive and procedural, in the same manner, and to the same extent, as any other person is subject to such requirements, including payment of reasonable charges and fees. The President may exempt any potential source under the jurisdiction of any department, agency, or instrumentality in the executive branch if the President determines it to be in the paramount interest of the United States to do so.
exemption shall be granted due to the lack of an appropriation unless the President shall have specifically requested such appropriation as part of the budgetary process and the Congress shall have failed to make available such requested appropriations.

(i) Additional requirement

(1) In general

In addition to the provisions of subsection (a) of this section, States in which there are more than 2,500 active wells at which annular injection is used as of January 1, 1986, shall include in their State program a certification that a State program exists and is being adequately enforced that provides protection from contaminants which may have any adverse effect on the health of persons and which are associated with the annular injection or surface disposal of brines associated with oil and gas production.

(2) “Annular injection” defined

For purposes of this subsection, the term “annular injection” means the reinjection of brines associated with the production of oil or gas between the production and surface casings of a conventional oil or gas producing well.

(3) Review

The Administrator shall conduct a review of each program certified under this subsection.

(4) Disapproval

If a State fails to include the certification required by this subsection or if in the judgment of the Administrator the State program certified under this subsection is not being adequately enforced, the Administrator shall disapprove the State program submitted under subsection (a) of this section.

(j) Coordination with other laws

Nothing in this section shall authorize or require any department, agency, or other instrumentality of the Federal Government or State or local government to apportion, allocate or otherwise regulate the withdrawal or beneficial use of ground or surface waters, so as to abrogate or modify any existing rights to water established pursuant to State or Federal law, including interstate compacts.

(k) Authorization of appropriations

Unless the State program is disapproved under this section, the Administrator shall make grants to the State for not less than 50 or more than 90 percent of the costs incurred by a State (as determined by the Administrator) in developing and implementing each State program under this section. For purposes of making such grants there is authorized to be appropriated not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$20,000,000</td>
</tr>
<tr>
<td>1988</td>
<td>20,000,000</td>
</tr>
<tr>
<td>1989</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1990</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1991</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1992-2003</td>
<td>30,000,000.</td>

REFERENCES IN TEXT

The Federal Water Pollution Control Act, referred to in subsec. (f)(1), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92-500, § 2, Oct. 18, 1972, 86 Stat. 816, which is classified generally to chapter 26 (§ 1261 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

AMENDMENTS

Subsec. (b), Pub. L. 104-182, § 132(b)(4), inserted before period at end of first sentence “and source water assessment programs under section 300j–13 of this title”.

Subsec. (c)(1), Pub. L. 104-182, § 132(b)(3), which directed substitution of “is disapproved” for “is inadequate” in third sentence, was executed by making the substitution in fourth sentence to reflect the probable intent of Congress and the amendment by Pub. L. 104-182, § 132(b)(2). See below.

Pub. L. 104-182, § 132(b)(2), inserted after second sentence “A State program developed pursuant to section 300j–13 of this title or section 300q–7(b) of this title shall be deemed to meet the applicable requirements of section 300j–13 of this title or section 300q–7(b) of this title unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements.”

Pub. L. 104-182, § 132(b)(1), amended first sentence generally. Prior to amendment, first sentence read as follows: “If, in the judgment of the Administrator, a State program (or portion thereof), including the definition of a wellhead protection area, is not adequate to protect public water systems as required by this section, the Administrator shall disapprove such program (or portion thereof).”

Subsec. (c)(2), Pub. L. 104-182, § 132(b)(3), substituted “is disapproved” for “is inadequate”.

Subsec. (k), Pub. L. 104-182, § 120(b), inserted table item relating to fiscal years 1992 through 2003.

§ 300b-8. State ground water protection grants

(a) In general

The Administrator may make a grant to a State for the development and implementation of a State program to ensure the coordinated and comprehensive protection of ground water resources within the State.

(b) Guidance

Not later than 1 year after August 6, 1996, and annually thereafter, the Administrator shall publish guidance that establishes procedures for application for State ground water protection...
program assistance and that identifies key elements of State ground water protection programs.

(c) Conditions of grants

(1) In general

The Administrator shall award grants to States that submit an application that is approved by the Administrator. The Administrator shall determine the amount of a grant awarded pursuant to this paragraph on the basis of an assessment of the extent of ground water resources in the State and the likelihood that awarding the grant will result in sustained and reliable protection of ground water quality.

(2) Innovative program grants

The Administrator may also award a grant pursuant to this subsection for innovative programs proposed by a State for the prevention of ground water contamination.

(3) Allocation of funds

The Administrator shall, at a minimum, ensure that, for each fiscal year, not less than 1 percent of funds made available to the Administrator by appropriations to carry out this section are allocated to each State that submits an application that is approved by the Administrator pursuant to this section.

(4) Limitation on grants

No grant awarded by the Administrator may be used for a project to remediate ground water contamination.

(d) Amount of grants

The amount of a grant awarded pursuant to paragraph (1) shall not exceed 50 percent of the eligible costs of carrying out the ground water protection program that is the subject of the grant (as determined by the Administrator) for the 1-year period beginning on the date that the grant is awarded. The State shall pay a State share to cover the costs of the ground water protection program from State funds in an amount that is not less than 50 percent of the cost of conducting the program.

(e) Evaluations and reports

Not later than 3 years after August 6, 1996, and every 3 years thereafter, the Administrator shall evaluate the State ground water protection programs that are the subject of grants awarded pursuant to this section and report to the Congress on the status of ground water quality in the United States and the effectiveness of State programs for ground water protection.

(f) Authorization of appropriations

There are authorized to be appropriated to carry out this section $15,000,000 for each of fiscal years 1997 through 2003.

PART D—EMERGENCY POWERS

§ 300i. Emergency powers

(a) Actions authorized against imminent and substantial endangerment to health

Notwithstanding any other provision of this subchapter the Administrator, upon receipt of information that a contaminant which is present in or is likely to enter a public water system or an underground source of drinking water, or that there is a threatened or potential terrorist attack (or other intentional act designed to disrupt the provision of safe drinking water or to impact adversely the safety of drinking water supplied to communities and individuals), which may present an imminent and substantial endangerment to the health of persons, and that appropriate State and local authorities have not acted to protect the health of such persons, may take such actions as he may deem necessary in order to protect the health of such persons. To the extent he determines it to be practicable in light of such imminent endangerment, he shall consult with the State and local authorities in order to confirm the correctness of the information on which action proposed to be taken under this subsection is based and to ascertain the action which such authorities are or will be taking. The action which the Administrator may take may include (but shall not be limited to) (1) issuing such orders as may be necessary to protect the health of persons who are or may be users of such system (including travelers), including orders requiring the provision of alternative water supplies by persons who caused or contributed to the endangerment, and (2) commencing a civil action for appropriate relief, including a restraining order or permanent or temporary injunction.

(b) Penalties for violations; separate offenses

Any person who violates or fails or refuses to comply with any order issued by the Administrator under subsection (a)(1) of this section may, in an action brought in the appropriate United States district court to enforce such order, be subject to a civil penalty of not to exceed $15,000 for each day in which such violation occurs or failure to comply continues.

AMENDMENTS

2002—Subsec. (a). Pub. L. 107–188, in first sentence, inserted “, or that there is a threatened or potential terrorist attack (or other intentional act designed to disrupt the provision of safe drinking water or to impact adversely the safety of drinking water supplied to communities and individuals),” after “drinking water”.

1996—Subsec. (b). Pub. L. 104–182 substituted “$15,000” for “$5,000”.

1986—Subsec. (a). Pub. L. 99–339, § 204(1), (2), inserted “or an underground source of drinking water” after “to enter a public water system” and “including orders requiring the provision of alternative water supplies by persons who caused or contributed to the endangerment,” after “including travelers).”.

1980—Pub. L. 96–517 substituted “the extent he determines it to be practicable in light of such imminent endangerment, he shall consult with the State and local authorities in order to confirm the correctness of the information on which action proposed to be taken under this subsection is based and to ascertain the action which such authorities are or will be taking.” for “he shall consult with the State and local authorities in order to confirm the correctness of the information on which action proposed to be taken under this subsection is based and to ascertain the action which such authorities are or will be taking.”.

§ 300i–1. Tampering with public water systems

(a) Tampering

Any person who tampers with a public water system shall be imprisoned for not more than 20
years, or fined in accordance with title 18, or both.

(b) Attempt or threat

Any person who attempts to tamper, or makes a threat to tamper, with a public drinking water system be imprisoned for not more than 10 years, or fined in accordance with title 18, or both.

(c) Civil penalty

The Administrator may bring a civil action in the appropriate United States district court (as determined under the provisions of title 28) against any person who tampers, attempts to tamper, or makes a threat to tamper with a public water system. The court may impose on such person a civil penalty of not more than $1,000,000 for such tampering or not more than $100,000 for such attempt or threat.

(d) "Tamper" defined

For purposes of this section, the term "tamper" means—

(1) to introduce a contaminant into a public water system with the intention of harming persons; or

(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

(§ 300i–2. Terrorist and other intentional acts

(a) Vulnerability assessments

(1) Each community water system serving a population of greater than 3,300 persons shall conduct an assessment of the vulnerability of its system to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water. The vulnerability assessment shall include, but not be limited to, a review of pipes and constructed conveyances, physical barriers, water collection, pretreatment, treatment, storage and distribution facilities, electronic, computer or other automated systems which are utilized by the public water system, the use, storage, or handling of various chemicals, and the operation and maintenance of such system. The Administrator, not later than August 1, 2002, after consultation with appropriate departments and agencies of the Federal Government and with State and local governments, shall provide baseline information to community water systems required to conduct vulnerability assessments regarding which kinds of terrorist attacks or other intentional acts are the probable threats to—

(A) substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water; or

(B) otherwise present significant public health concerns.

(2) Each community water system referred to in paragraph (1) shall certify to the Administrator that the system has conducted an assessment complying with paragraph (1) and shall submit to the Administrator a written copy of the assessment.

(b) Attempt or threat

(1) to introduce a contaminant into a public water system with the intention of harming persons.

(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

(3) Except for information contained in a certification under this subsection identifying the system submitting the certification and the date of the certification, all information provided to the Administrator under this subsection and all information derived therefrom shall be exempt from disclosure under section 552 of title 5.

(c) Civil penalty

(1) to introduce a contaminant into a public water system with the intention of harming persons.

(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

(3) Except for information contained in a certification under this subsection identifying the system submitting the certification and the date of the certification, all information provided to the Administrator under this subsection and all information derived therefrom shall be exempt from disclosure under section 552 of title 5.

(4) No community water system shall be required under State or local law to provide an assessment described in this section to any State, regional, or local governmental entity solely by reason of the requirement set forth in paragraph (2) that the system submit such assessment to the Administrator.

(d) "Tamper" defined

(1) to introduce a contaminant into a public water system with the intention of harming persons.

(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

(e) Civil penalty

(1) to introduce a contaminant into a public water system with the intention of harming persons.

(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

(3) Except for information contained in a certification under this subsection identifying the system submitting the certification and the date of the certification, all information provided to the Administrator under this subsection and all information derived therefrom shall be exempt from disclosure under section 552 of title 5.

(4) No community water system shall be required under State or local law to provide an assessment described in this section to any State, regional, or local governmental entity solely by reason of the requirement set forth in paragraph (2) that the system submit such assessment to the Administrator.

(5) Not later than November 30, 2002, the Administrator, in consultation with appropriate Federal law enforcement and intelligence officials, shall develop such protocols as may be necessary to protect the copies of the assessments required to be submitted under this subsection (and the information contained therein) from unauthorized disclosure. Such protocols shall ensure that—

(A) each copy of such assessment, and all information contained in or derived from the assessment, is kept in a secure location;

(B) only individuals designated by the Administrator may have access to the copies of the assessments; and

(C) no copy of an assessment, or part of an assessment, or information contained in or derived from an assessment shall be available to anyone other than an individual designated by the Administrator.

At the earliest possible time prior to November 30, 2002, the Administrator shall complete the development of such protocols for the purpose of having them in place prior to receiving any vulnerability assessments from community water systems under this subsection.

(6) (A) Except as provided in subparagraph (B), any individual referred to in paragraph (5)(B) who acquires the assessment submitted under paragraph (2), or any reproduction of such assessment, or any information derived from such assessment, and who knowingly or recklessly reveals such assessment, reproduction, or information other than—

(i) to an individual designated by the Administrator under paragraph (5),

(j) to a Federal law enforcement and intelligence official;

(k) to a State or local government official;
(ii) for purposes of section 300j-4 of this title or for actions under section 300i of this title, or
(iii) for use in any administrative or judicial proceeding to impose a penalty for failure to comply with this section,

shall upon conviction be imprisoned for not more than one year or fined in accordance with the provisions of chapter 227 of title 18 applicable to class A misdemeanors, or both, and shall be removed from Federal office or employment.

(B) Notwithstanding subparagraph (A), an individual referred to in paragraph (5)(B) who is an officer or employee of the United States may discuss the contents of a vulnerability assessment submitted under this section with a State or local official.

(7) Nothing in this section authorizes any person to withhold any information from Congress or from any committee or subcommittee of Congress.

(b) Emergency response plan

Each community water system serving a population greater than 3,300 shall prepare or revise, where necessary, an emergency response plan that incorporates the results of vulnerability assessments that have been completed. Each such community water system shall certify to the Administrator, as soon as reasonably possible after the enactment of this section, but not later than 6 months after the completion of the vulnerability assessment under subsection (a) of this section, that the system has completed such plan. The emergency response plan shall include, but not be limited to, plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack on the public water system. The emergency response plan shall also include actions, procedures, and identification of equipment which can obviate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water provided to communities and individuals. Community water systems shall, to the extent possible, coordinate with existing Local Emergency Planning Committees established under the Emergency Planning and Community Right-to-Know Act (42 U.S.C. 11001 et seq.) when preparing or revising an emergency response plan under this subsection.

(c) Record maintenance

Each community water system shall maintain a copy of the emergency response plan completed pursuant to subsection (b) of this section for 5 years after such plan has been certified to the Administrator under this section.

(d) Guidance to small public water systems

The Administrator shall provide guidance to community water systems serving a population of less than 3,300 persons on how to conduct vulnerability assessments, prepare emergency response plans, and address threats from terrorist attacks or other intentional actions designed to disrupt the provision of safe drinking water or significantly affect the public health or significantly affect the safety or supply of drinking water provided to communities and individuals.

(e) Funding

(1) There are authorized to be appropriated to carry out this section not more than $160,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.

(2) The Administrator, in coordination with State and local governments, may use funds made available under paragraph (1) to provide financial assistance to community water systems for purposes of compliance with the requirements of subsections (a) and (b) of this section and to community water systems for expenses and contracts designed to address basic security enhancements of critical importance and significant threats to public health and the supply of drinking water as determined by a vulnerability assessment conducted under subsection (a) of this section. Such basic security enhancements may include, but shall not be limited to the following:

(A) the purchase and installation of equipment for detection of intruders;
(B) the purchase and installation of fencing, gating, lighting, or security cameras;
(C) the tamper-proofing of manhole covers, fire hydrants, and valve boxes;
(D) the rekeying of doors and locks;
(E) improvements to electronic, computer, or other automated systems and remote security systems;
(F) participation in training programs, and the purchase of training manuals and guidance materials, relating to security against terrorist attacks;
(G) improvements in the use, storage, or handling of various chemicals; and
(H) security screening of employees or contractor support services.

Funding under this subsection for basic security enhancements shall not include expenditures for personnel costs, or monitoring, operation, or maintenance of facilities, equipment, or systems.

(3) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems to assist in responding to and alleviating any vulnerability to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water (including sources of water for such systems) which the Administrator determines to present an immediate and urgent security need.

(4) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems serving a population of less than 3,300 persons for activities and projects undertaken in accordance with the guidance provided to such systems under subsection (d) of this section.

REFERENCES IN TEXT

The Emergency Planning and Community Right-to-Know Act, referred to in subsec. (b), probably means the Emergency Planning and Community Right-to-
§ 300i-3. Contaminant prevention, detection and response

(a) In general

The Administrator, in consultation with the Centers for Disease Control and Prevention, shall review (or enter into contracts or cooperative agreements to provide for a review of) the current and future methods to prevent, detect and respond to the intentional introduction of chemical, biological or radiological contaminants into community water systems and source water for community water systems, including each of the following:

(1) Methods, means and equipment, including real time monitoring systems, designed to monitor and detect various levels of chemical, biological, and radiological contaminants or indicators of contaminants and reduce the likelihood that such contaminants can be successfully introduced into public water systems and source water intended to be used for drinking water.

(2) Methods and means to provide sufficient notice to operators of public water systems, and individuals served by such systems, of the introduction of chemical, biological or radiological contaminants and the possible effect of such introduction on public health and the safety and supply of drinking water.

(3) Methods and means for developing educational and awareness programs for community water systems.

(4) Procedures and equipment necessary to prevent the flow of contaminated drinking water to individuals served by public water systems.

(5) Methods, means, and equipment which could negate or mitigate deleterious effects on public health and the safety and supply caused by the introduction of contaminants into water intended to be used for drinking water, including an examination of the effectiveness of various drinking water technologies in removing, inactivating, or neutralizing biological, chemical, and radiological contaminants.

(6) Biomedical research into the short-term and long-term impact on public health of various chemical, biological and radiological contaminants that may be introduced into public water systems through terrorist or other intentional acts.

(b) Funding

For the authorization of appropriations to carry out this section, see section 300i-4(e) of this title.

CHANGE OF NAME

§ 300i-4. Supply disruption prevention, detection and response

(a) Disruption of supply or safety

The Administrator, in coordination with the appropriate departments and agencies of the Federal Government, shall review (or enter into contracts or cooperative agreements to provide for a review of) methods and means by which terrorists or other individuals or groups could disrupt the supply of safe drinking water or take other actions against water collection, pretreatment, treatment, storage and distribution facilities which could render such water significantly less safe for human consumption, including each of the following:

(1) Methods and means by which pipes and other constructed conveyances utilized in public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

(2) Methods and means by which collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems and collection and pretreatment storage facilities used in connection with public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

(3) Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be altered or affected so as to be subject to cross-contamination of drinking water supplies.

(4) Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be reasonably protected from terrorist attacks or other acts intended to disrupt the supply or affect the safety of drinking water.

(5) Methods and means by which information systems, including process controls and supervisory control and data acquisition and cyber systems at community water systems could be disrupted by terrorists or other groups.

(b) Alternative sources

The review under this section shall also include a review of the methods and means by which alternative supplies of drinking water could be provided in the event of the destruction, impairment or contamination of public water systems.

(c) Requirements and considerations

In carrying out this section and section 300i–3 of this title—

(1) the Administrator shall ensure that reviews carried out under this section reflect the needs of community water systems of various sizes and various geographic areas of the United States; and

(2) the Administrator may consider the vulnerability of, or potential for forced interruption of service for, a region or service area, including community water systems that provide service to the National Capital area.
(d) Information sharing
As soon as practicable after reviews carried out under this section or section 300i–3 of this title have been evaluated, the Administrator shall disseminate, as appropriate as determined by the Administrator, to community water systems information on the results of the project through the Information Sharing and Analysis Center, or other appropriate means.

(e) Funding
There are authorized to be appropriated to carry out this section and section 300i–3 of this title not more than $15,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.

(§ 300j. Assurances of availability of adequate supplies of chemicals necessary for treatment of water

(a) Certification of need application
If any person who uses chlorine, activated carbon, lime, ammonia, soda ash, potassium permanganate, caustic soda, or other chemical or substance for the purpose of treating water in any public water system or in any public treatment works determines that the amount of such chemical or substance necessary to effectively treat water is not reasonably available to him or will not be so available to him when required for the effective treatment of such water, the person may apply to the Administrator for a certification (hereinafter in this section referred to as a “certification of need”) that the amount of such chemical or substance which such person requires to effectively treat such water is not reasonably available to him or will not be so available when required for the effective treatment of such water.

(b) Application requirements; publication in Federal Register; waiver; certification, issuance or denial
(1) An application for a certification of need shall be in such form and submitted in such manner as the Administrator may require and shall (A) specify the persons the applicant determines are able to provide the chemical or substance with respect to which the application is submitted, (B) specify the persons from whom the applicant has sought such chemical or substance, and (C) contain such other information as the Administrator may require.

(2) Upon receipt of an application under this section, the Administrator shall (A) publish in the Federal Register a notice of the receipt of the application and a brief summary of it, (B) notify in writing each person whom the President or his delegate (after consultation with the Administrator) determines could be made subject to an order required to be issued upon the issuance of the certification of need applied for in such application, and (C) provide an opportunity for the submission of written comments on such application. The requirements of the preceding sentence of this paragraph shall not apply when the Administrator for good cause finds (and incorporates the finding with a brief statement of reasons therefor in the order issued) that waiver of such requirements is necessary in order to protect the public health.

(3) Within 30 days after—
(A) the date a notice is published under paragraph (2) in the Federal Register with respect to an application submitted under this section for the issuance of a certification of need, or
(B) the date on which such application is received if as authorized by the second sentence of such paragraph no notice is published with respect to such application, the Administrator shall take action either to issue or deny the issuance of a certification of need.

(c) Certification of need; issuance; executive orders; implementation of orders; equitable apportionment of orders; factors considered
(1) If the Administrator finds that the amount of a chemical or substance necessary for an applicant under an application submitted under this section to effectively treat water in a public water system or in a public treatment works is not reasonably available to the applicant or will not be so available to him when required for the effective treatment of such water, the Administrator shall issue a certification of need. Not later than seven days following the issuance of such certification, the President or his delegate shall issue an order requiring the provision to such person of such amounts of such chemical or substance as the Administrator deems necessary in the certification of need issued for such person. Such order shall apply to such manufacturers, producers, processors, distributors, and repackagers of such chemical or substance as the President or his delegate deems necessary and appropriate, except that such order may not apply to any manufacturer, producer, or processor of such chemical or substance who manufactures, produces, or processes (as the case may be) such chemical or substance solely for its own use. Persons subject to an order issued under this section shall be given a reasonable opportunity to consult with the President or his delegate with respect to the implementation of the order.

(2) Orders which are to be issued under paragraph (1) to manufacturers, producers, and processors of a chemical or substance shall be equitably apportioned, as far as practicable, among all manufacturers, producers, and processors of such chemical or substance; and orders which are to be issued under paragraph (1) to distributors and repackagers of a chemical or substance shall be equitably apportioned, as far as practicable, among all distributors and repackagers of such chemical or substance. In apportioning orders issued under paragraph (1) to manufacturers, producers, processors, distributors, and repackagers of chlorine, the President or his delegate shall, in carrying out the requirements of the preceding sentence, consider—
(A) the geographical relationships and established commercial relationships between such manufacturers, producers, processors, dis-
tributors, and repackagers and the persons for whom the orders are issued;
(B) in the case of orders to be issued to producers of chlorine, the (i) amount of chlorine historically supplied by each such producer to treat water in public water systems and public treatment works, and (ii) share of each such producer of the total annual production of chlorine in the United States; and
(C) such other factors as the President or his delegate may determine are relevant to the apportionment of orders in accordance with the requirements of the preceding sentence.
(3) Subject to subsection (f) of this section, any person for whom a certification of need has been issued under this subsection may upon the expiration of the order issued under paragraph (1) upon such certification apply under this section for additional certifications.
(d) Breach of contracts; defense
There shall be available as a defense to any action brought for breach of contract in a Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange a chemical or substance subject to an order issued pursuant to subsection (c)(1) of this section, that such delay or failure was caused solely by compliance with such order.
(e) Penalties for noncompliance with orders; temporary restraining orders and preliminary or permanent injunctions
(1) Whoever knowingly fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be fined not more than $5,000 for each such failure to comply.
(2) Whoever fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be subject to a civil penalty of not more than $5,000 for each such failure to comply.
(3) Whenever the Administrator or the President or his delegate has reason to believe that any person is violating or will violate any order issued pursuant to subsection (c)(1) of this section, he may petition a United States district court to issue a temporary restraining order or preliminary or permanent injunction (including a mandatory injunction) to enforce the provision of such order.
(f) Termination date
No certification of need or order issued under this section may remain in effect for more than one year.

EX. ORD. NO. 11879. DELEGATION OF FUNCTIONS TO SECRETARY OF COMMERCE RELATING TO ORDERS FOR PROVISION OF CHEMICALS OR SUBSTANCES NECESSARY FOR TREATMENT OF WATER
Ex. Ord. No. 11879, Sept. 17, 1975, 40 F.R. 43197, provided: By virtue of the authority vested in me by Section 1441 of the Public Health Service Act, as amended by the Safe Drinking Water Act (now Safe Drinking Water Act of 1974) (42 Stat. 1680, 42 U.S.C. 300j), and as President of the United States, the Secretary of Commerce is hereby delegated, with power to redelegate to agencies, officers and employees of the Government, the functions of the President contained in said section 1441 [this section]. Those functions shall be administered under regulations or agreements which are identical or compatible with other regulations and agreements, including those provided pursuant to Executive Order No. 10480, as amended [formerly set out as a note under section 2153 of Title 50, Appendix, War and National Defense], for the allocation of similar chemicals or substances.

GERALD R. FORD.

§ 300j–1. Research, technical assistance, information, training of personnel

(a) Specific powers and duties of Administrator
(1) The Administrator may conduct research, studies, and demonstrations relating to the causes, diagnosis, treatment, control, and prevention of physical and mental diseases and other impairments of man resulting directly or indirectly from contaminants in water, or to the provision of a dependably safe supply of drinking water, including—
(A) improved methods (i) to identify and measure the existence of contaminants in drinking water (including methods which may be used by State and local health and water officials), and (ii) to identify the source of such contaminants;
(B) improved methods to identify and measure the health effects of contaminants in drinking water;
(C) new methods of treating raw water to prepare it for drinking, so as to improve the efficiency of water treatment and to remove contaminants from water;
(D) improved methods for providing a dependably safe supply of drinking water, including improvements in water purification and distribution, and methods of assessing the health related hazards of drinking water; and
(E) improved methods of protecting underground water sources of public water systems from contamination.
(2) INFORMATION AND RESEARCH FACILITIES.—In carrying out this subchapter, the Administrator is authorized to—
(A) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water, together with appropriate recommendations in connection with the information; and
(B) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to this subchapter.

AMENDMENTS
1986—Subsec. (f). Pub. L. 99–339 substituted “in effect for more than one year” for “in effect— (1) for more than one year, or (2) September 30, 1982, whichever occurs first.”
§ 300j-1

(3) The Administrator shall carry out a study of polychlorinated biphenyl contamination of actual or potential sources of drinking water, contamination of such sources by other substances known or suspected to be harmful to public health, the effects of such contamination, and means of removing, treating, or otherwise controlling such contamination. To assist in carrying out this paragraph, the Administrator is authorized to make grants to public agencies and private nonprofit institutions.

(4) The Administrator shall conduct a survey and study of—

(A) disposal of waste (including residential waste) which may endanger underground water which supplies, or can reasonably be expected to supply, any public water systems, and

(B) means of control of such waste disposal.

Not later than one year after December 16, 1974, he shall transmit to the Congress the results of such survey and study, together with such recommendations as he deems appropriate.

(5) The Administrator shall carry out a study of methods of underground injection which do not result in the degradation of underground drinking water sources.

(6) The Administrator shall carry out a study of methods of preventing, detecting, and dealing with surface spills of contaminants which may degrade underground water sources for public water systems.

(7) The Administrator shall carry out a study of virus contamination of drinking water sources and means of control of such contamination.

(8) The Administrator shall carry out a study of the nature and extent of the impact on underground water which supplies, or can reasonably be expected to supply, public water systems of (A) abandoned injection or extraction wells; (B) intensive application of pesticides and fertilizers in underground water recharge areas; and (C) ponds, pools, lagoons, pits, or other surface disposal of contaminants in underground water recharge areas.

(9) The Administrator shall conduct a comprehensive study of public water supplies and drinking water sources to determine the nature, extent, sources of and means of control of contamination by chemicals or other substances suspected of being carcinogenic. Not later than six months after December 16, 1974, he shall transmit to the Congress the initial results of such study, together with such recommendations for further review and corrective action as he deems appropriate.

(10) The Administrator shall carry out a study of the reaction of chlorine and humic acids and the effects of the contaminants which result from such reaction on public health and on the safety of drinking water, including any carcinogenic effect.

(b) Emergency situations

The Administrator is authorized to provide technical assistance and to make grants to States, or publicly owned water systems to assist in responding to and alleviating any emergency situation affecting public water systems (including sources of water for such systems) which the Administrator determines to present substantial danger to the public health. Grants provided under this subsection shall be used only to support those actions which (i) are necessary for preventing, limiting or mitigating danger to the public health in such emergency situation and (ii) would not, in the judgment of the Administrator, be taken without such emergency assistance. The Administrator may carry out the program authorized under this subsection as part of, and in accordance with the terms and conditions of, any other program of assistance for environmental emergencies which the Administrator is authorized to carry out under any other provision of law. No limitation on appropriations for any such other program shall apply to amounts appropriated under this subsection.

(c) Establishment of training programs and grants for training ; training fees

The Administrator shall—

(1) provide training for, and make grants for training (including postgraduate training) of (A) personnel of State agencies which have primary enforcement responsibility and of agencies or units of local government to which enforcement responsibilities have been delegated by the State, and (B) personnel who manage or operate public water systems, and

(2) make grants for postgraduate training of individuals (including grants to educational institutions for traineeships) for purposes of qualifying such individuals to work as personnel referred to in paragraph (1).

(3) make grants to, and enter into contracts with, any public agency, educational institution, and any other organization, in accordance with procedures prescribed by the Administrator, under which he may pay all or part of the costs (as may be determined by the Administrator) of any project or activity which is designed—

(A) to develop, expand, or carry out a program (which may combine training education and employment) for training persons for occupations involving the public health aspects of providing safe drinking water;

(B) to train inspectors and supervisory personnel to train or supervise persons in occupations involving the public health aspects of providing safe drinking water; or

(C) to develop and expand the capability of programs of States and municipalities to carry out the purposes of this subchapter (other than by carrying out State programs of public water system supervision or underground water source protection (as defined in section 300j-2(c) of this title)).

Reasonable fees may be charged for training provided under paragraph (1)(B) to persons other than personnel of State or local agencies but such training shall be provided to personnel of State or local agencies without charge.

(d) Authorization of appropriations

There are authorized to be appropriated to carry out subsection (b) of this section not more than $35,000,000 for the fiscal year 2002 and such sums as may be necessary for each fiscal year thereafter.
§ 300j-1  TITLED—THE PUBLIC HEALTH AND WELFARE  Page 1014

(e) Technical assistance

The Administrator may provide technical assistance to small public water systems to enable such systems to achieve and maintain compliance with applicable national primary drinking water regulations. Such assistance may include circuit-rider and multi-State regional technical assistance programs, training, and preliminary engineering evaluations. The Administrator shall ensure that technical assistance pursuant to this subsection is available in each State. Each nonprofit organization receiving assistance under this subsection shall consult with the State in which the assistance is to be expended or otherwise made available before using assistance to undertake activities to carry out this subsection. There are authorized to be appropriated to the Administrator to be used for such technical assistance $15,000,000 for each of fiscal years 1997 through 2003.

§ 300j–12 of this title (relating to State loan funds) and no portion of any funds made available under this subsection may be used for lobbying expenses. Of the total amount appropriated under this subsection, 3 percent shall be used for technical assistance to public water systems owned or operated by Indian Tribes.

AMENDMENTS

2002—Subsec. (b). Pub. L. 107–188, § 403(4)(A), which directed substitution of “this subsection” for “this subparagraph” was executed by making the substitution in three places to reflect the probable intent of Congress.

Subsec. (d). Pub. L. 107–188, § 403(4)(B), amended subsec. (d) generally, substituting provisions relating to authorization of appropriations to carry out subsec. (b) in fiscal years 2002 and subsequent fiscal years for provisions relating to authorization of appropriations to carry out this section in fiscal year 1991 and earlier.

1996—Subsec. (a)(2). Pub. L. 104–182, § 121(4)(A), added heading and text of par. (2) and struck out former par. (2) which read as follows: “(2)(A) The Administrator shall, to the maximum extent feasible, provide technical assistance to the States and municipalities in the establishment and administration of public water system supervision programs (as defined in section 300j–2(c)(1) of this title).”

Subsec. (a)(2)(B). Pub. L. 104–182, § 121(3), redesignated subpar. (B) as subsec. (b) and transferred that subsec. to appear after subsec. (a).

Subsec. (a)(3). Pub. L. 104–182, § 121(4)(B), redesignated par. (11) as (3), transferred that par. to appear before par. (4), and struck out former par. (3) which provided that the Administrator was to conduct studies, and make periodic reports to Congress, on the costs of carrying out regulations prescribed under section 300j–1 of this title.

Subsec. (b). Pub. L. 104–182, § 121(2), redesignated subsec. (a)(2)(B) as subsec. (b), transferred that subsec. to appear after subsec. (a), and struck out subsec. (b) which read as follows: “In carrying out this subchapter, the Administrator is authorized to—

(1) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water together with appropriate recommendations in connection therewith;

(2) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to the purposes of this subchapter;”.

Subsecs. (b)(3), (c)(9). Pub. L. 104–182, § 121(1), which directed redesignation of subsec. (b)(3) as par. (3) of subsec. (d) and transfer of that par. to follow par. (2) of subsec. (d), was executed by redesignating subsec. (b)(3) as par. (3) of subsec. (c) and transferring that par. to follow par. (2) of subsec. (c) to reflect the probable intent of Congress and the redesignation of subsec. (d) as (c) by Pub. L. 104–66. See 1995 Amendment note below. Moreover, subsec. (d) does not have any pars.

Subsec. (e). Pub. L. 104–182, § 1122, amended subsec. (e) generally. Prior to amendment, subsec. (e) read as follows: “The Administrator is authorized to provide technical assistance to public water systems owned or operated by Indian tribes—

(1) 3 percent of the amounts appropriated under this subsection, or

(2) $250,000 shall be utilized for technical assistance to public water systems owned or operated by Indian tribes.”

1995—Subsecs. (c) to (g). Pub. L. 104–66 redesignated subsecs. (d), (f), and (g) as (c), (d), and (e), respectively, and struck out former subsec. (c) which read as follows: “Not later than eighteen months after November 16, 1977, the Administrator shall submit a report to Congress on the present and projected future availability of an adequate and dependable supply of safe drinking water to meet present and projected future need. Such report shall include an analysis of the future demand for drinking water and other competing uses of water, the availability and use of methods to conserve water or reduce demand, the adequacy of present measures to assure adequate and dependable supplies of safe drinking water, and the problems (financial, legal, or other) which need to be resolved in order to assure the availability of such supplies for the future. Existing information and data compiled by the National Water Commission and others shall be utilized to the extent possible.”

1986—Subsec. (e). Pub. L. 99–339, § 304(a), struck out subsec. (e) which authorized the Administrator to make grants to public water systems which are required, under State or local law, to meet standards relating to drinking turbidity which are more stringent than the standards in effect under this subchapter.

Subsec. (f). Pub. L. 99–339, § 301(a), authorized appropriations to carry out subsec. (a)(2)(B) of this section for fiscal years 1987 to 1991 and to carry out provisions of this section other than subsecs. (a)(2)(B) and (g) and provisions relating to research for fiscal years 1987 to 1991.

Subsec. (g). Pub. L. 99–339, § 301(g), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

1980—Subsecs. (e), (f). Pub. L. 96–502 added subsec. (e) and redesignated former subsec. (e) as (f).

1979—Subsec. (e). Pub. L. 96–63 authorized appropriations of $21,405,000 for fiscal year ending Sept. 30, 1980, $38,000,000 for fiscal year ending Sept. 30, 1981, and $35,000,000 for fiscal year ending Sept. 30, 1982 for purposes other than those of subsec. (a)(2)(B) of this sec-
tion and for purposes of subsec. (a)(2)(B) of this section, $8,000,000 for fiscal years 1980 through 1982.

1977—Subsec. (a)(2). Pub. L. 95–190, §§ 9, 13, designated existing provisions as subpar. (A), added subpar. (B) and, in subpar. (B) as added, substituted provisions authorizing Administrator to make grants and provide technical assistance for any emergency situation affecting public water systems and criteria for such grants and assistance for provisions authorizing Administrator to make grants and provide technical assistance for any emergency situation respecting drinking water and criteria for determination of such situations.

Subsec. (a)(3). Pub. L. 95–190, § 3(a), designated existing provisions as subpar. (A) and added subpar. (B).

Subsec. (a)(10), (11). Pub. L. 95–190, § 3(e)(1), added pars. (10) and (11).

Subsec. (b)(3)(C). Pub. L. 95–190, § 10(b), substituted ‘‘300j–2(c)’’ for ‘‘300j–2(d)’’.

Subsecs. (c), (d), Pub. L. 95–190, §§ 3(b), 4, added subsecs. (c) and (d). Former subsec. (c) redesignated (e).

Subsec. (e). Pub. L. 95–190, §§ 2(a), 3(b), redesignated former subsec. (c) as (e) and inserted provisions authorizing appropriations for fiscal years 1978 and 1979, and provisions relating to appropriations for subsec. (a)(2)(B) of this section and for research.

§ 300j–2. Grants for State programs

(a) Public water systems supervision programs; applications for grants; allotment of sums; waiver of grant restrictions; notice of approval or disapproval of application; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out public water system supervision programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. The Administrator may not approve an application of a State for its first grant under paragraph (1) unless he determines that the State—

(A) has established or will establish within one year from the date of such grant a public water system supervision program, and

(B) will, within that one year, assume primary enforcement responsibility for public water systems within the State.

No grant may be made to a State under paragraph (1) for any period beginning more than one year after the date of the State’s first grant unless the State has assumed and maintains primary enforcement responsibility for public water systems within the State. The prohibitions contained in the preceding two sentences shall not apply to such grants when made to Indian Tribes.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient’s costs (as determined under regulations of the Administrator) in carrying out, during the one-year period beginning on the date the grant is made, a public water system supervision program.

(4) In each fiscal year the Administrator shall, in accordance, with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, number of public water systems, and other relevant factors. No State shall receive less than 1 per centum of the annual appropriation for grants under paragraph (1): Provided, That the Administrator may, by regulation, reduce such percentage in accordance with the criteria specified in this paragraph: And provided further. That such percentage shall not apply to grants allotted to Guam, American Samoa, or the Virgin Islands.

(5) The prohibition contained in the last sentence of paragraph (2) may be waived by the Administrator with respect to a grant to a State through fiscal year 1979 but such prohibition may only be waived if, in the judgment of the Administrator—

(A) the State is making a diligent effort to assume and maintain primary enforcement responsibility for public water systems within the State;

(B) the State has made significant progress toward assuming and maintaining such primary enforcement responsibility; and

(C) there is reason to believe the State will assume such primary enforcement responsibility by October 1, 1979.

The amount of any grant awarded for the fiscal years 1978 and 1979 pursuant to a waiver under
this paragraph may not exceed 75 per centum of the amount allotted to such State for such fiscal year. The remaining 25 per centum of the amount allotted to such State for such fiscal year shall be retained by the Administrator, and the Administrator may award such amount to such State at such time as the State assumes such responsibility before the beginning of fiscal year 1980. At the beginning of each fiscal years 1979 and 1980 the amounts retained by the Administrator for any preceding fiscal year and not awarded by the beginning of fiscal year 1979 or 1980 to the States to which such amounts were originally allotted may be removed from the original allotment and reallocated for fiscal year 1979 or 1980 (as the case may be) to States which have assumed primary enforcement responsibility by the beginning of such fiscal year.

(6) The Administrator shall notify the State of the approval or disapproval of any application for a grant under this section—

(A) within ninety days after receipt of such application, or

(B) not later than the first day of the fiscal year for which the grant application is made, whichever is later.

(7) AUTHORIZATION.—For the purpose of making grants under paragraph (1), there are authorized to be appropriated $100,000,000 for each of fiscal years 1997 through 2003.

(8) RESERVATION OF FUNDS BY THE ADMINISTRATOR.—If the Administrator assumes the primary enforcement responsibility of a State public water system supervision program, the Administrator may reserve from funds made available pursuant to this subsection an amount equal to the amount that would otherwise have been provided to the State pursuant to this subsection. The Administrator shall use the funds reserved pursuant to this paragraph to ensure the full and effective administration of a public water system supervision program in the State.

(9) STATE LOAN FUNDS.—

(A) RESERVATION OF FUNDS.—For any fiscal year for which the amount made available to the Administrator by appropriations to carry out this subsection is less than the amount that the Administrator determines is necessary to supplement funds made available pursuant to paragraph (8) to ensure the full and effective administration of a public water system supervision program in a State, the Administrator may reserve from the funds made available to the State under section 300j–12 of this title (relating to State loan funds) an amount that is equal to the amount of the shortfall. This paragraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(B) DUTY OF ADMINISTRATOR.—If the Administrator reserves funds from the allocation of a State under subparagraph (A), the Administrator shall carry out in the State each of the activities that would be required of the State if the State had primary enforcement authority under section 300j–2 of this title.

(b) Underground water source protection programs; applications for grants; allotment of sums; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out underground water source protection programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. No grant may be made to any State under paragraph (1) unless the State has assumed primary enforcement responsibility within two years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title. The prohibition contained in the preceding sentence shall not apply to such grants when made to Indian Tribes.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient’s cost (as determined under regulations of the Administrator) in carrying out, during the one-year period beginning on the date the grant is made, and underground water source protection program.

(4) In each fiscal year the Administrator shall, in accordance with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, and other relevant factors.

(5) For purposes of making grants under paragraph (1) there are authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1976, $7,500,000 for the fiscal year ending June 30, 1977, $10,000,000 for each of the fiscal years 1978 and 1979, $7,795,000 for the fiscal year ending December 30, 1980, $18,000,000 for the fiscal year ending September 30, 1981, and $21,000,000 for the fiscal year ending September 30, 1982. For the purpose of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

<table>
<thead>
<tr>

(c) Definitions

For purposes of this section:

(1) The term “public water system supervision program” means a program for the adoption and enforcement of drinking water regulations (with such variances and exemptions from such regulations under conditions and in a manner which is not less stringent than the conditions under, and the manner in which variances and exemptions may be granted under sections 300g–4 and 300g–5 of this title) which are no less stringent than the national primary drinking water regulations under section 300g–1 of this title, and for keeping records and making reports required by section 300g–2(a)(3) of this title.

(2) The term “underground water source protection program” means a program for the adoption and enforcement of a program which meets the requirements of regulations under
section 300h of this title, and for keeping records and making reports required by section 300h–l(b)(1)(A)(i) of this title. Such term includes, where applicable, a program which meets the requirements of section 300h–4 of this title.

(d) New York City watershed protection program

(1) In general

The Administrator is authorized to provide financial assistance to the State of New York for demonstration projects implemented as part of the watershed program for the protection and enhancement of the quality of source waters of the New York City water supply system, including projects that demonstrate, assess, or provide for comprehensive monitoring and surveillance and projects necessary to comply with the criteria for avoiding filtration contained in 40 CFR 141.71. Demonstration projects which shall be eligible for financial assistance shall be certified to the Administrator by the State of New York as satisfying the purposes of this subsection. In certifying projects to the Administrator, the State of New York shall give priority to monitoring projects that have undergone peer review.

(2) Report

Not later than 5 years after the date on which the Administrator first provides assistance pursuant to this paragraph, the Governor of the State of New York shall submit a report to the Administrator on the results of projects assisted.

(3) Matching requirements

Federal assistance provided under this subsection shall not exceed 50 percent of the total cost of the protection program being carried out for any particular watershed or ground water recharge area.

(4) Authorization

There are authorized to be appropriated to the Administrator to carry out this subsection for each of fiscal years 2003 through 2010, $15,000,000 for the purpose of providing assistance to the State of New York to carry out paragraph (1).

AMENDMENTS

1996—Subsec. (a)(7). Pub. L. 104–182, §124(1), inserted heading and amended text generally. Prior to amendment, text read as follows: “For purposes of making grants under paragraph (1) there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1976, $25,000,000 for the fiscal year ending June 30, 1977, $35,000,000 for fiscal year 1978, $45,000,000 for fiscal year 1979, $29,450,000 for the fiscal year ending September 30, 1980, $32,000,000 for the fiscal year ending September 30, 1981, and $34,000,000 for the fiscal year ending September 30, 1982. For the purposes of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal Year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$37,200,000</td>
</tr>
<tr>
<td>1988</td>
<td>$37,200,000</td>
</tr>
<tr>
<td>1989</td>
<td>40,150,000</td>
</tr>
<tr>
<td>1990</td>
<td>40,150,000</td>
</tr>
<tr>
<td>1991</td>
<td>40,150,000</td>
</tr>
</tbody>
</table>

Subsec. (a)(8), (9). Pub. L. 104–182, §124(2), added pars. (8) and (9).

Subsec. (b)(5). Pub. L. 104–182, §120(c), added parentheticals to prov. (9).

1986—Subsec. (a)(2). Pub. L. 99–339, §302(d)(1), inserted provision that prohibitions contained in preceding two sentences not apply to such grants when made to Indian Tribes.

Subsec. (a)(7). Pub. L. 99–339, §301(b), authorized appropriations for grants under par. (1) of not more than $37,200,000 for fiscal years 1987 and 1988 and of not more than $40,150,000 for fiscal years 1989 to 1991.

Subsec. (b)(2). Pub. L. 99–339, §302(d)(2), inserted provision that prohibition contained in preceding sentence not apply to such grants when made to Indian Tribes.

Subsec. (b)(5). Pub. L. 99–339, §301(c), authorized appropriations for grants under par. (1) of not more than $19,700,000 for fiscal years 1987 and 1988 and of not more than $20,850,000 for fiscal years 1989 to 1991.

1980—Subsec. (b)(2). Pub. L. 96–502, §4(d), substituted provisions that no grant may be made to any State under par. (1) unless the State has assumed primary enforcement responsibility within two years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title for provisions that the Administrator may not approve an application for a State for its first grant under par. (1) unless he determines that the State has established or will establish within two years from the date of such grant an underground water source protection, and will, within such two years, assume primary enforcement responsibility for underground water sources within the State and that no grant may be made to a State under par. (1) for any period beginning more than two years after the date of the State’s first grant unless the State has assumed and maintains primary enforcement responsibility for underground water sources within the State.

Subsec. (c)(2). Pub. L. 96–502, §2(c), inserted proviso that such term includes, where applicable, a program which meets requirements of section 300h–4 of this title.

1979—Subsec. (a)(7). Pub. L. 96–63, §2(a), authorized appropriation of $29,450,000, $32,000,000, and $34,000,000 for fiscal years ending Sept. 30, 1980, through 1982, respectively.

Subsec. (b)(5). Pub. L. 96–63, §2(b), authorized appropriation of $7,795,000, $18,000,000, and $21,000,000 for fiscal years ending Sept. 30, 1980, through 1982, respectively.

Subsec. (a)(7). Pub. L. 95–190, §§2(b), 5(a), redesignated former par. (6) as (7) and authorized appropriations for fiscal years 1978 and 1979.

§ 300j–3. Special project grants and guaranteed loans

(a) Special study and demonstration project grants

The Administrator may make grants to any person for the purposes of—

(1) assisting in the development and demonstration (including construction) of any
project which will demonstrate a new or improved method, approach, or technology, for providing a dependable supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health implications involved in the reclamation, recycling, and reuse of waste waters for drinking and the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations
Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66$\text{}/_2$ per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consulting the National Drinking Water Advisory Council, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(4) Priority for grants under this section shall be given where there are known or potential public health hazards which require advanced technology for the removal of particles which are too small to be removed by ordinary treatment technology.

(c) Authorization of appropriations
For the purposes of making grants under subsections (a) and (b) of this section there are authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1975; and $10,000,000 for the fiscal year ending June 30, 1976.

(d) Loan guarantees to public water systems; conditions; indebtedness limitation; regulations
The Administrator during the fiscal years ending June 30, 1975, and June 30, 1976, shall carry out a program of guaranteeing loans made by private lenders to small public water systems for the purpose of enabling such systems to meet national primary drinking water regulations prescribed under section 300g–1 of this title. No such guarantee may be made with respect to a system unless (1) such system cannot reasonably obtain financial assistance necessary to comply with such regulations from any other source, and (2) the Administrator determines that any facilities constructed with a loan guaranteed under this subsection is not likely to be made obsolete by subsequent changes in primary regulations. The aggregate amount of indebtedness guaranteed with respect to any system may not exceed $50,000. The aggregate amount of indebtedness guaranteed under this subsection may not exceed $50,000,000. The Administrator shall prescribe regulations to carry out this subsection.

AMENDMENTS

§ 300j–3a. Grants to public sector agencies
(a) Assistance for development and demonstration projects
The Administrator of the Environmental Protection Agency shall offer grants to public sector agencies for the purposes of—

(1) assisting in the development and demonstration (including construction) of any project which will demonstrate a new or improved method, approach, or technology for providing a dependable safe supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health and conservation implications involved in the reclamation, recycling, and reuse of wastewaters for drinking and agricultural use or the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations
Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66$\text{}/_2$ per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consulting the National Drinking Water Advisory Council, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(c) Authorization of appropriations
There are authorized to be appropriated for the purposes of this section $25,000,000 for fiscal year 1978.

§ 300j–3b. Contaminant standards or treatment technique guidelines

(1) Not later than nine months after October 18, 1978, the Administrator shall promulgate guidelines establishing supplemental standards or treatment technique requirements for microbiological, viral, radiological, organic, and inorganic contaminants, which guidelines shall be conditions, as provided in paragraph (2), of any grant for a demonstration project for water reclamation, recycling, and reuse funded under section 300j–3a of this title or under section 300j–3(a)(2) of this title, where such project involves direct human consumption of treated wastewater. Such guidelines shall provide for sufficient control of each such contaminant, such that in the Administrator’s judgement, no adverse effects on the health of persons may reasonably be anticipated to occur, allowing an adequate margin of safety.

(2) A grant referred to in paragraph (1) for a project which involves direct human consumption of treated wastewater may be awarded on or after the date of promulgation of guidelines under this section only if the applicant demonstrates to the satisfaction of the Administrator that the project—

(A) will comply with all national primary drinking water regulations under section 300g–1 of this title;

(B) will comply with all guidelines under this section; and

(C) will in other respects provide safe drinking water.

Any such grant awarded before the date of promulgation of such guidelines shall be conditioned on the applicant’s agreement to comply to the maximum feasible extent with such guidelines as expeditiously as practicable following the date of promulgation thereof.

(3) Guidelines under this section may, in the discretion of the Administrator—

(A) be nationally and uniformly applicable to all projects funded under section 300j–3a of this title or section 300j–1(a)(2) of this title;

(B) vary for different classes or categories of such projects (as determined by the Administrator);

(C) be established and applicable on a project-by-project basis; or

(D) any combination of the above.

(4) Nothing in this section shall be construed to prohibit or delay the award of any grant referred to in paragraph (1) prior to the date of promulgation of such guidelines.

References in Text

Section 300j–1(a)(2) of this title, referred to in par. (3)(A), was amended by Pub. L. 104–182, title I, §121(c), (4)(A), Aug. 6, 1996, 110 Stat. 1651, to redesignate par. (2)(B) as subsec. (b) of section 300j–1, strike par. (2)(A), and add a new par. (2) relating to information and research facilities.

§ 300j–3c. National assistance program for water infrastructure and watersheds

(a) Technical and financial assistance

The Administrator of the Environmental Protection Agency may provide technical and financial assistance in the form of grants to States (1) for the construction, rehabilitation, and improvement of water supply systems, and (2) consistent with nonpoint source management programs established under section 1329 of title 33, for source water quality protection programs to address pollutants in navigable waters for the purpose of making such waters usable by water supply systems.

(b) Limitation

Not more than 30 percent of the amounts appropriated to carry out this section in a fiscal year may be used for source water quality protection programs described in subsection (a)(2) of this section.

(c) Condition

As a condition to receiving assistance under this section, a State shall ensure that such assistance is carried out in the most cost-effective manner, as determined by the State.

(d) Authorization of appropriations

(1) Unconditional authorization

There are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003. Such sums shall remain available until expended.

(2) Conditional authorization

In addition to amounts authorized under paragraph (1), there are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003, provided that such authorization shall be in effect for a fiscal year only if at least 75 percent of the total amount of funds authorized to be appropriated for such fiscal year by section 300j–12(m) of this title are appropriated.

(e) Acquisition of lands

Assistance provided with funds made available under this section may be used for the acquisition of lands and other interests in lands; however, nothing in this section authorizes the acquisition of lands or other interests in lands from other than willing sellers.

(f) Federal share

The Federal share of the cost of activities for which grants are made under this section shall be 50 percent.
(g) Definitions

In this section, the following definitions apply:

(1) State

The term “State” means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(2) Water supply system

The term “water supply system” means a system for the provision to the public of piped water for human consumption if such system serves at least 25 individuals and a draw and fill system for the provision to the public of water for human consumption. Such term does not include a system owned by a Federal agency. Such term includes (A) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (B) any collection or pretreatment facilities not under such control that are used primarily in connection with such system.

CODEFICATION

Section was enacted as part of the Safe Drinking Water Act Amendments of 1996, and not as part of the Public Health Service Act which comprises this chapter.

§ 300j–4. Records and inspections

(a) Provision of information to Administrator; monitoring program for unregulated contaminants

(1) (A) Every person who is subject to any requirement of this subchapter or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regulation to assist the Administrator in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with this subchapter, in determining whether such person is located if such State has primary enforcement responsibility for public water systems or if such State, the District of Columbia, or the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, or the Commonwealth of the Northern Mariana Islands.

(B) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require to assist the Administrator in establishing regulations under section 300g–1 of this title, after consultation with States and suppliers of water. The Administrator may not require under this subparagraph the installation of treatment equipment or process changes, the testing of treatment technology, or the analysis or processing of monitoring samples, except where the Administrator provides the funding for such activities. Before exercising this authority, the Administrator shall first seek to obtain the information by voluntary submission.

(C) The Administrator shall not later than 2 years after August 6, 1996, after consultation with public health experts, representatives of the general public, and officials of State and local governments, review the monitoring requirements for not fewer than 12 contaminants identified by the Administrator, and promulgate any necessary modifications.

(2) Monitoring program for unregulated contaminants—

(A) Establishment.—The Administrator shall promulgate regulations establishing the criteria for a monitoring program for unregulated contaminants. The regulations shall require monitoring of drinking water supplied by public water systems and shall vary the frequency and schedule for monitoring requirements for systems based on the number of persons served by the system, the source of supply, and the contaminants likely to be found, ensuring that only a representative sample of systems serving 10,000 persons or fewer are required to monitor.

(B) Monitoring program for certain unregulated contaminants.—

(i) Initial list.—Not later than 3 years after August 6, 1996, and every 5 years thereafter, the Administrator shall issue a list pursuant to subparagraph (A) of not more than 30 unregulated contaminants to be monitored by public water systems and to be included in the national drinking water occurrence data base maintained pursuant to subsection (g) of this section.

(ii) Governors’ petition.—The Administrator shall include among the list of contaminants for which monitoring is required under this paragraph each contaminant recommended in a petition signed by the Governor of each of 7 or more States, unless the Administrator determines that the action would prevent the listing of other contaminants of a higher public health concern.

(C) Monitoring plan for small and medium systems.—

(i) In general.—Based on the regulations promulgated by the Administrator, each State may develop a representative monitoring plan to assess the occurrence of unregulated contaminants in public water systems that serve a population of 10,000 or fewer in that State. The plan shall require monitoring for systems representative of different sizes, types, and geographic locations in the State.

(ii) Grants for small system costs.—From funds reserved under section 300j–12(a)
of this title or appropriated under subparagraph (H), the Administrator shall pay the reasonable cost of such testing and laboratory analysis as are necessary to carry out monitoring under the plan.

(D) MONITORING RESULTS.—Each public water system that conducts monitoring of unregulated contaminants pursuant to this paragraph shall provide the results of the monitoring to the primary enforcement authority for the system.

(E) NOTIFICATION.—Notification of the availability of the results of monitoring programs required under paragraph (2) shall be given to the persons served by the system.

(F) WAIVER OF MONITORING REQUIREMENT.—The Administrator shall waive the requirement for monitoring for a contaminant under this paragraph in a State, if the State demonstrates that the criteria for listing the contaminant do not apply in that State.

(G) ANALYTICAL METHODS.—The State may use screening methods approved by the Administrator under subsection (i) of this section in lieu of monitoring for particular contaminants under this paragraph.

(H) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this paragraph $10,000,000 for each of the fiscal years 1997 through 2003.

(b) Entry of establishments, facilities, or other property; inspections; conduct of certain tests; audit and examination of records; entry restrictions; prohibition against informing of a proposed entry

(1) Except as provided in paragraph (2), the Administrator, or representatives of the Administrator duly designated by him, upon presenting appropriate credentials and a written notice to any supplier of water or other person subject to or loan guarantee under this subchapter, and (2) any information required under this section.

(2) Any information required under this section (A) a national primary drinking water regulation prescribed under section 300g–1 of this title, (B) an applicable underground injection control program, or (C) any requirement to monitor an unregulated contaminant pursuant to subsection (a) of this section, or person in charge of any of the property of such supplier or other person referred to in clause (A), (B), or (C), is authorized to enter any establishment, facility, or other property of such supplier or other person in order to determine whether such supplier or other person has acted or is acting in compliance with this subchapter, including for this purpose, inspection, at reasonable times, of records, files, papers, processes, controls, and facilities, or in order to test any feature of a public water system, including its raw water source. The Administrator or the Comptroller General (or any representative designated by either) shall have access for the purpose of audit and examination to any records, reports, or information of a grantee which are required to be maintained under subsection (a) of this section or which are pertinent to any financial assistance under this subchapter.

(2) No entry may be made under the first sentence of paragraph (1) in an establishment, facility, or other property of a supplier of water or other person subject to a national primary drinking water regulation if the establishment, facility, or other property is located in a State which has primary enforcement responsibility for public water systems unless, before written notice of such entry is made, the Administrator (or his representative) notifies the State agency charged with responsibility for safe drinking water of the reasons for such entry. The Administrator shall, upon a showing by the State agency that such an entry will be detrimental to the administration of the State’s program of primary enforcement responsibility, take such showing into consideration in determining whether to make such entry. No State agency which receives notice under this paragraph of an entry proposed to be made under paragraph (1) may use the information contained in the notice to inform the person whose property is proposed to be entered of the proposed entry; and if a State agency so uses such information, notice to the agency under this paragraph is not required until such time as the Administrator determines the agency has provided him satisfactory assurances that it will no longer so use information contained in a notice under this paragraph.

(c) Penalty

Whoever fails or refuses to comply with any requirement of subsection (a) of this section or to allow the Administrator, the Comptroller General, or representatives of either, to enter and conduct any audit or inspection authorized by subsection (b) of this section shall be subject to a civil penalty of not to exceed $25,000.

(d) Confidential information; trade secrets and secret processes; information disclosure; “information required under this section” defined

(1) Subject to paragraph (2), upon a showing satisfactory to the Administrator by any person that any information required under this section from such person, if made public, would divulge trade secrets or secret processes of such person, the Administrator shall consider such information confidential in accordance with the purposes of section 1905 of title 18. If the applicant fails to make a showing satisfactory to the Administrator, the Administrator shall give such applicant thirty days’ notice before releasing the information to which the application relates (unless the public health or safety requires an earlier release of such information).

(2) Any information required under this section (A) may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this subchapter or to committees of the Congress, or when relevant in any proceeding under this subchapter, and (B) shall be disclosed to the extent it deals with the level of contaminants in drinking water. For purposes of this subsection the term “information required under this section” means any papers, books, documents, or information, or any particular part thereof, reported to or otherwise obtained by the Administrator under this section.

(e) “Grantee” and “person” defined

For purposes of this section, (1) the term “grantee” means any person who applies for or receives financial assistance, by grant, contract, or loan guarantee under this subchapter, and (2) the term “person” includes a Federal agency.
(f) Information regarding drinking water coolers

The Administrator may utilize the authorities of this section for purposes of part F of this subchapter. Any person who manufactures, imports, sells, or distributes drinking water coolers in interstate commerce shall be treated as a supplier of water for purposes of applying the provisions of this section in the case of persons subject to part F of this subchapter.

(g) Occurrence data base

(1) In general

Not later than 3 years after August 6, 1996, the Administrator shall assemble and maintain a national drinking water contaminant occurrence data base, using information on the occurrence of both regulated and unregulated contaminants in public water systems obtained under subsection (a)(1)(A) of this section or subsection (a)(2) of this section and reliable information from other public and private sources.

(2) Public input

In establishing the occurrence data base, the Administrator shall solicit recommendations from the Science Advisory Board, the States, and other interested parties concerning the development and maintenance of a national drinking water contaminant occurrence data base, including such issues as the structure and design of the data base, data input parameters and requirements, and the use and interpretation of data.

(3) Use

The data shall be used by the Administrator in making determinations under section 300g–1(b)(1) of this title with respect to the occurrence of a contaminant in drinking water at a level of public health concern.

(4) Public recommendations

The Administrator shall periodically solicit recommendations from the appropriate officials of the National Academy of Sciences and the States, and any person may submit recommendations to the Administrator, with respect to contaminants that should be included in the national drinking water contaminant occurrence data base, including recommendations with respect to additional unregulated contaminants that should be listed under subsection (a)(2) of this section. Any recommendation submitted under this clause shall be accompanied by reasonable documentation that—

(A) the contaminant occurs or is likely to occur in drinking water; and

(B) the contaminant poses a risk to public health.

(5) Public availability

The information from the data base shall be available to the public in readily accessible form.

(6) Regulated contaminants

With respect to each contaminant for which a national primary drinking water regulation has been established, the data base shall include information on the detection of the contaminant at a quantifiable level in public water systems (including detection of the contaminant at levels not constituting a violation of the maximum contaminant level for the contaminant).

(7) Unregulated contaminants

With respect to contaminants for which a national primary drinking water regulation has not been established, the data base shall include—

(A) monitoring information collected by public water systems that serve a population of more than 10,000, as required by the Administrator under subsection (a) of this section;

(B) monitoring information collected from a representative sampling of public water systems that serve a population of 10,000 or fewer; and

(C) other reliable and appropriate monitoring information on the occurrence of the contaminants in public water systems that is available to the Administrator.

(h) Availability of information on small system technologies

For purposes of sections 300g–1(b)(4)(E) and 300g–4(e) of this title (relating to small system variance program), the Administrator may request information on the characteristics of commercially available treatment systems and technologies, including the effectiveness and performance of the systems and technologies under various operating conditions. The Administrator may specify the form, content, and submission date of information to be submitted by manufacturers, States, and other interested persons for the purpose of considering the systems and technologies in the development of regulations or guidance under sections 300g–1(b)(4)(E) and 300g–4(e) of this title.

(i) Screening methods

The Administrator shall review new analytical methods to screen for regulated contaminants and may approve such methods as are more accurate or cost-effective than established reference methods for use in compliance monitoring.

(A) New analytical methods.

(1) In general.

(2) Regulated contaminants.

(3) Unregulated contaminants.

lation to assist him in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with this subchapter and administering any program of financial assistance under this subchapter, in evaluating the health risks of unregulated contaminants, or in advising the public of such risks. In requiring a public water system to monitor under this subsection, the Administrator may take into consideration the system size and the contaminants likely to be found in the system's drinking water.\(^1\)

Subsec. (a)(2) to (8). Pub. L. 104–182, §125(c), added heading and text of par. (2) and struck out former pars. (2) to (8) which directed Administrator, not later than 18 months after June 19, 1986, to promulgate regulations requiring every public water system to conduct a monitoring program for unregulated contaminants, specified contents of regulations, provided for reporting and notification of availability of results of monitoring, waiver of monitoring requirements, and compliance by small systems, and authorized appropriations for fiscal year ending Sept. 30, 1987.

Subsec. (g). Pub. L. 104–182, §126, added subsec. (g).

Subsec. (i). Pub. L. 104–182, §125(d), added subsec. (i).

1986—Subsec. (a)(1). Pub. L. 99–339, §106(a), (b), designated existing provisions as par. (1) and inserted provisions permitting Administrator to consider size of system and contaminants likely to be found.

Subsec. (a)(2) to (7). Pub. L. 99–339, §106(b), added pars. (2) to (7).

Subsec. (c). Pub. L. 99–339, §106(c), substituted "shall be subject to a civil penalty of not to exceed $25,000" for "may be fined not more than $5,000".

Subsec. (b)(1). Pub. L. 95–190, §12(d), designated existing provisions as cls. (A) and (B) and added cls. (C) and reference to such cls. (A) to (C).

§ 300j–5. National Drinking Water Advisory Council

(a) Establishment; membership; representation of interests; term of office, vacancies; reappointment

There is established a National Drinking Water Advisory Council which shall consist of fifteen members appointed by the Administrator after consultation with the Secretary. Five members shall be appointed from the general public; five members shall be appointed from appropriate State and local agencies concerned with water hygiene and public water supply; and five members shall be appointed from representatives of private organizations or groups demonstrating an active interest in the field of water hygiene and public water supply, of which two such members shall be associated with small, rural public water systems. Each member of the Council shall hold office for a term of three years, except that—

(1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

(2) the terms of the members first taking office shall expire as follows: Five shall expire three years after December 16, 1974, five shall expire two years after such date, and five shall expire one year after such date, as designated by the Administrator at the time of appointment.

The members of the Council shall be eligible for reappointment.

(b) Functions

The Council shall advise, consult with, and make recommendations to, the Administrator on matters relating to activities, functions, and policies of the Agency under this subchapter.

(c) Compensation and allowances; travel expenses

Members of the Council appointed under this section shall, while attending meetings or conferences of the Council or otherwise engaged in business of the Council, receive compensation and allowances at a rate to be fixed by the Administrator, but not exceeding the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including travel time in lieu of subsistence) in which they are engaged in the actual performance of duties vested in the Council. While away from their homes or regular places of business in the performance of services for the Council, members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b)\(^1\) of title 5.

(d) Advisory committee termination provision inapplicable

Section 14(a) of the Federal Advisory Committee Act (relating to termination) shall not apply to the Council.

References in Text

Section 5703 of title 5, referred to in subsec. (c), was amended generally by Pub. L. 94–22, §4, May 19, 1975, 89 Stat. 85, and, as so amended, does not contain a subsec. (b).

Section 14(a) of the Federal Advisory Committee Act, referred to in subsec. (d), is section 14(a) of Pub. L. 92–463 which is set out in the Appendix to Title 5, Government Organization and Employees.

Amendments

1996—Subsec. (a). Pub. L. 104–182 inserted "of which two such members shall be associated with small, rural public water systems" before period at end of second sentence.

Termination of Advisory Committees

Pub. L. 93–641, §6, Jan. 4, 1975, 88 Stat. 2275, set out as a note under section 217a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1975.

References in Other Laws to GS–16, 17, or 18 Pay Rates

References in laws to the rates of pay for GS–16, 17, or 18, or to maximum rates of pay under the General Schedule, to be considered references to rates payable under specified sections of Title 5, Government Organization and Employees, see section 529 (title 5, §1506(1)) of Pub. L. 101–509, set out in a note under section 5376 of Title 5.

\(^1\)See References in Text note below.
§ 300j-6. Federal agencies

(a) In general

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government—

(1) owning or operating any facility in a wellhead protection area;

(2) engaged in any activity at such facility resulting, or which may result, in the contamination of water supplies in any such area;

(3) owning or operating any public water system; or

(4) engaged in any activity resulting, or which may result in, underground injection which endangers drinking water (within the meaning of section 300h(d)(2) of this title),

shall be subject to, and comply with, all Federal, State, interstate, and local substantive and procedural requirements, both substantive and procedural (including any requirement for permits or reporting or any provisions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting the protection of such wellhead areas, respecting such public water systems, and respecting any underground injection in the same manner and to the same extent as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements referred to in this subsection include, but are not limited to, all administrative orders and all civil and administrative penalties and fines, regardless of whether such penalties or fines are punitive or coercive in nature or are imposed for isolated, intermittent, or continuing violations. The United States hereby expressly waives any immunity otherwise applicable to the United States with respect to any such substantive or procedural requirement (including, but not limited to, any injunctive relief, administrative order or civil or administrative penalty or fine referred to in the preceding sentence, or reasonable service charge). The reasonable service charges referred to in this subsection include, but are not limited to, fees or charges assessed in connection with the processing and issuance of permits, renewal of permits, amendments to permits, review of plans, studies, and other documents, and inspection and monitoring of facilities, as well as any other nondiscriminatory charges that are assessed in connection with a Federal, State, interstate, or local regulatory program respecting the protection of wellhead areas or public water systems or respecting any underground injection. Neither the United States, nor any agent, employee, or officer thereof, shall be immune or exempt from any process or sanction of any court or Federal Court with respect to the enforcement of any such injunctive relief. No agent, employee, or officer of the United States shall be personally liable for any civil penalty under any Federal, State, interstate, or local law concerning the protection of wellhead areas or public water systems or concerning underground injection with respect to any act or omission within the scope of the official duties of the agent, employee, or officer. An agent, employee, or officer of the United States shall be subject to any criminal sanction (including, but not limited to, any fine or imprisonment) under any Federal or State requirement adopted pursuant to this subchapter, but no department, agency, or instrumentality of the executive, legislative, or judicial branch of the Federal Government shall be subject to any such sanction. The President may exempt any facility of any department, agency, or instrumentality in the executive branch from compliance with such a requirement if he determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of 1 year, but additional exemptions may be granted for periods not to exceed 1 year upon the President’s making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting each such exemption.

(b) Administrative penalty orders

(1) In general

If the Administrator finds that a Federal agency has violated an applicable requirement under this subchapter, the Administrator may issue a penalty order assessing a penalty against the Federal agency.

(2) Penalties

The Administrator may, after notice to the agency, assess a civil penalty against the agency in an amount not to exceed $25,000 per day per violation.

(3) Procedure

Before an administrative penalty order issued under this subsection becomes final, the Administrator shall provide the agency an opportunity to confer with the Administrator and shall provide the agency notice and an opportunity for a hearing on the record in accordance with chapters 5 and 7 of title 5.

(4) Public review

(A) In general

Any interested person may obtain review of an administrative penalty order issued under this subsection. The review may be obtained in the United States District Court for the District of Columbia or in the United States District Court for the district in which the violation is alleged to have occurred by the filing of a complaint with the court within the 30-day period beginning on the date the penalty order becomes final. The person filing the complaint shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General.

(B) Record

The Administrator shall promptly file in the court a certified copy of the record on which the order was issued.

1So in original. Probably should not be capitalized.
(C) Standard of review

The court shall not set aside or remand the order unless the court finds that there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(D) Prohibition on additional penalties

The court may not impose an additional civil penalty for a violation that is subject to the order unless the court finds that the assessment constitutes an abuse of discretion by the Administrator.

(c) Limitation on State use of funds collected from Federal Government

Unless a State law in effect on August 6, 1996, or a State constitution requires the funds to be used in a different manner, all funds collected by a State from the Federal Government from penalties and fines imposed for violation of any substantive or procedural requirement referred to in subsection (a) of this section shall be used by the State only for projects designed to improve or protect the environment or to defray the costs of environmental protection or enforcement.

(d) Indian rights and sovereignty as unaffected; "Federal agency" defined

(1) Nothing in the Safe Drinking Water Amendments of 1977 shall be construed to alter or affect the status of American Indian lands or water rights nor to waive any sovereignty over Indian lands guaranteed by treaty or statute.

(2) For the purposes of this chapter, the term "Federal agency" shall not be construed to refer to or include any American Indian tribe, nor to the Secretary of the Interior in his capacity as trustee of Indian lands.

(e) Washington Aqueduct

The Secretary of the Army shall not pass the cost of any penalty assessed under this subchapter on to any customer, user, or other purchaser of drinking water from the Washington Aqueduct system, including finished water from the Dalecarlia or McMillan treatment plant.

§ 300j–7. Judicial review

(a) Courts of appeals; petition for review: actions respecting regulations; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

A petition for review of—

(1) actions pertaining to the establishment of national primary drinking water regulations (including maximum contaminant level goals) may be filed only in the United States Court of Appeals for the District of Columbia circuit; and

(2) any other final action of the Administrator under this chapter may be filed in the circuit in which the petitioner resides or transacts business which is directly affected by the action.

Any such petition shall be filed within the 45-day period beginning on the date of the promulgation of the regulation or any other final Agency action with respect to which review is sought or on the date of the determination with respect to which review is sought, and may be filed after the expiration of such 45-day period if the petition is based solely on grounds arising after the expiration of such period. Action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement. In any petition concerning the assessment of a civil penalty pursuant to section 300g–3(g)(3)(B) of this title, the petitioner shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General. The court shall set aside and remand the penalty order if the court finds that there is not substantial evidence in the record to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(b) District courts; petition for review: actions respecting variances or exemptions; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

The United States district courts shall have jurisdiction of actions brought to review (1) the granting of, or the refusing to grant, a variance or exemption under section 300g–4 or 300g–5 of this title or (2) the requirements of any schedule prescribed for a variance or exemption under such section or the failure to prescribe such a schedule. Such an action may only be brought upon a petition for review filed with the court within the 45-day period beginning on the date the action sought to be reviewed is taken or, in the case of a petition to review the refusal to...
grant a variance or exemption or the failure to prescribe a schedule, within the 45-day period beginning on the date action is required to be taken on the variance, exemption, or schedule, as the case may be. A petition for such review may be filed after the expiration of such period if the petition is based solely on grounds arising after the expiration of such period. Action with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement.

(c) Judicial order for additional evidence before Administrator; modified or new findings; recommendation for modification or setting aside of original determination

In any judicial proceeding in which review is sought of a determination under this subchapter required to be made on the record after notice and opportunity for hearing, if any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Administrator, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Administrator, in such manner and upon such term and conditions as the court may deem proper. The Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original determination, with the return of such additional evidence.

Amendments

1996—Subsec. (a). Pub. L. 104–182, §113(c)(2), (3), in concluding provisions, substituted “or any other final Agency action” for “or issuance of the order” and inserted at end “In any petition concerning the assessment of the penalty by the Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original determination, with the return of such additional evidence.”

(A) prior to sixty days after the plaintiff has given notice of such violation (i) to the Administrator; (ii) to any alleged violator of such requirement and (iii) to the State in which the violation occurs, or

(B) if the Administrator, the Attorney General, or the State has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such requirement, but in any such action in a court of the United States any person may intervene as a matter of right; or

(2) under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice of such action to the Administrator; or

§300j–8. Citizen’s civil action

(a) Persons subject to civil action; jurisdiction of enforcement proceedings

Except as provided in subsection (b) of this section, any person may commence a civil action on his own behalf—

(1) against any person (including (A) the United States, and (B) any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any requirement prescribed by or under this subchapter;

(2) against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this subchapter which is not discretionary with the Administrator; or

(3) for the collection of a penalty by the United States Government (and associated costs and interest) against any Federal agency that fails, by the date that is 18 months after the effective date of a final order to pay a penalty assessed by the Administrator under section 300h–8(b) 1 of this title, to pay the penalty.

No action may be brought under paragraph (1) against a public water system for a violation of a requirement prescribed by or under this subchapter which occurred within the 27-month period beginning on the first day of the month in which this subchapter is enacted. The United States district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce in an action brought under this subsection any requirement prescribed by or under this subchapter or to order the Administrator to perform an act or duty described in paragraph (2), as the case may be.

(b) Conditions for commencement of civil action; notice

No civil action may be commenced—

(1) under subsection (a)(1) of this section respecting violation of a requirement prescribed by or under this subchapter—

(A) prior to sixty days after the plaintiff has given notice of such violation (i) to the Administrator; (ii) to any alleged violator of such requirement and (iii) to the State in which the violation occurs, or

(B) if the Administrator, the Attorney General, or the State has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such requirement, but in any such action in a court of the United States any person may intervene as a matter of right; or

1 So in original. Probably should be section “300j–6(b)."
(3) under subsection (a)(3) of this section prior to 60 days after the plaintiff has given notice of such action to the Attorney General and to the Federal agency.

Notice required by this subsection shall be given in such manner as the Administrator shall prescribe by regulation. No person may commence a civil action under subsection (a) of this section to require a State to prescribe a schedule under section 300g–4 or 300g–5 of this title for a variance or exemption, unless such person shows to the satisfaction of the court that the State has in a substantial number of cases failed to prescribe such schedules.

(c) Intervention of right

In any action under this section, the Administrator or the Attorney General, if not a party, may intervene as a matter of right.

(d) Costs; attorney fees; expert witness fees; filing of bond

The court, in issuing any final order in any action brought under subsection (a) of this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

(e) Availability of other relief

Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any requirement prescribed by or under this subchapter or to seek any other relief. Nothing in this section or in any other law of the United States shall be construed to prohibit, exclude, or restrict any State or local government from—

(1) bringing any action or obtaining any remedy or sanction in any State or local court; or

(2) bringing any administrative action or obtaining any administrative remedy or sanction, against any agency of the United States under State or local law to enforce any requirement respecting the provision of safe drinking water or respecting any underground injection control program. Nothing in this section shall be construed to authorize judicial review of regulations or orders of the Administrator under this subchapter, except as provided in section 300j–7 of this title. For provisions providing for application of certain requirements to such agencies in the same manner as to nongovernmental entities, see section 300j–6 of this title.

REFERENCES IN TEXT

The Federal Rules of Civil Procedure, referred to in subsec. (d), are set out in the Appendix to Title 28, Judiciary and Judicial Procedure.
the Administrator is a party. Unless, within a reasonable time, the Attorney General notifies the Administrator that he will appear in such action, attorneys appointed by the Administrator shall appear and represent him.

(g) Authority of Administrator under other provisions unaffected

The provisions of this subchapter shall not be construed as affecting any authority of the Administrator under part G of subchapter II of this chapter.

(h) Reports to Congressional committees; review by Office of Management and Budget; submission of comments to Congressional committees

Not later than April 1 of each year, the Administrator shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report respecting the activities of the Agency under this subchapter and containing such recommendations for legislation as he considers necessary. The report of the Administrator under this subsection which is due not later than April 1, 1975, and each subsequent report of the Administrator under this subsection shall include a statement on the actual and anticipated cost to public water systems in each State of compliance with the requirements of this subchapter. The Office of Management and Budget may review any report required by this subsection before its submission to such committees of Congress, but the Office may not revise any such report, require any revision in any such report, or delay its submission beyond the day prescribed for its submission, and may submit to such committees of Congress its comments respecting any such report.

(i) Discrimination prohibition; filing of complaint; investigation; orders of Secretary; notice and hearing; settlements; attorneys' fees; judicial review; filing of petition; procedural requirements; stay of orders; exclusiveness of remedy; civil actions for enforcement of orders; appropriate relief; mandamus proceedings; prohibition inapplicable to undirected but deliberate violations

(1) No employer may discharge any employee or otherwise discriminate against any employee with respect to his compensation, terms, conditions, or privileges of employment because the employee (or any person acting pursuant to a request of the employee) has—

(A) commenced, caused to be commenced, or is about to commence or cause to be commenced a proceeding under this subchapter or a proceeding for the administration or enforcement of drinking water regulations or underground injection control programs of a State,

(B) testified or is about to testify in any such proceeding,

(C) assisted or participated in any manner in such a proceeding or in any other action to carry out the purposes of this subchapter.

(2)(A) Any employee who believes that he has been discharged or otherwise discriminated against by any person in violation of paragraph (1) may, within 30 days after such violation occurs, file (or have any person file on his behalf) a complaint with the Secretary of Labor (hereinafter in this subsection referred to as the "Secretary") alleging such discharge or discrimination. Upon receipt of such a complaint, the Secretary shall notify the person named in the complaint of the filing of the complaint.

(B)(i) Upon receipt of a complaint filed under subparagraph (A), the Secretary shall conduct an investigation of the violation alleged in the complaint. Within 30 days of the receipt of such complaint, the Secretary shall complete such investigation and shall notify in writing the complainant (and any person acting in his behalf) and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this subparagraph. Within 90 days of the receipt of such complaint the Secretary shall, unless the proceeding on the complaint is terminated by the Secretary on the basis of a settlement entered into by the Secretary and the person alleged to have committed such violation, issue an order either providing the relief prescribed by clause (ii) or denying the complaint. An order of the Secretary shall be made on the record after notice and opportunity for agency hearing. The Secretary may not enter into a settlement terminating a proceeding on a complaint without the participation and consent of the complainant.

(ii) If in response to a complaint filed under subparagraph (A) the Secretary determines that a violation of paragraph (1) has occurred, the Secretary shall order (I) the person who committed such violation to take affirmative action to abate the violation, (II) such person to restate the complainant to his former position together with the compensation (including back pay), terms, conditions, and privileges of his employment, (III) compensatory damages, and (IV) where appropriate, exemplary damages. If such an order is issued, the Secretary, at the request of the complainant, shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorneys' fees) reasonably incurred, as determined by the Secretary, by the complainant, the Secretary, and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this subparagraph. Within 90 days of the receipt of such complaint the Secretary shall conduct an investigation of the violation alleged in the complaint and shall notify in writing the complainant (and any person acting in his behalf) and the person named in the complaint of the filing of the complaint.

(3)(A) Any person adversely affected or aggrieved by an order issued under paragraph (2) may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within sixty days from the issuance of the Secretary's order. Review shall conform to chapter 7 of title 5. The commencement of proceedings under this subparagraph shall not, unless ordered by the court, operate as a stay of the Secretary's order.

(B) An order of the Secretary with respect to which review could have been obtained under subparagraph (A) shall not be subject to judicial review in any criminal or other civil proceeding.

(4) Whenever a person has failed to comply with an order issued under paragraph (2)(B), the Secretary shall file a civil action in the United States District Court for the district in which the complainant resides or is employed, or has his principal place of business if such complainant is an agency, or in the District of Columbia.
§ 300j-9. Employment of personnel; determination of compensation

(5) Any nondiscretionary duty imposed by this section is enforceable in mandamus proceeding brought under section 1361 of title 28.

(6) Paragraph (1) shall not apply with respect to any employee who, acting without direction from his employer (or the employer’s agent), deliberately causes a violation of any requirement of this subchapter.

(7) Any section 1783(a) civil action brought under section 1361 of title 28 shall be heard and decided expeditiously.

§ 300j-10. Appointment of scientific, etc., personnel by Administrator of Environmental Protection Agency for implementation of responsibilities; compensation

To the extent that the Administrator of the Environmental Protection Agency deems such action necessary to the discharge of his functions under title XIV of the Public Health Service Act [42 U.S.C. 300f et seq.] (relating to safe drinking water) and under other provisions of law, he may appoint personnel to fill not more than thirty scientific, engineering, professional, legal, and administrative positions within the Environmental Protection Agency without regard to the civil service laws and may fix the compensation of such personnel not in excess of the maximum rate payable for GS–18 of the General Schedule under section 5302 of title 5.

Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1287), referred to in subsec. (e), is set out in the Appendix to Title 5, Government Organization and Employees.

Part G of subchapter II of this chapter, referred to in subsec. (g), is classified to section 264 of this title.

Codification

References in Laws to the Rates of Pay for GS–16, 17, or 18 Pay Rates

References in laws to the rates of pay for GS–16, 17, or 18, or to maximum rates of pay under the General Schedule, to be considered references to rates payable under specified sections of Title 5, Government Organization and Employees, see section 5309 (title 1, § 101(c)(1)) of Pub. L. 101–509, set out in a note under section 5316 of Title 5.

§ 300j-11. Indian Tribes

(a) In general

Subject to the provisions of subsection (b) of this section, the Administrator—

(1) is authorized to treat Indian Tribes as States under this subchapter;

(2) may delegate to such Tribes primary enforcement responsibility for public water systems and for underground injection control, and

(3) may provide such Tribes grant and contract assistance to carry out functions provided by this subchapter.

(b) EPA regulations

(1) Specific provisions

The Administrator shall, within 18 months after June 19, 1996, promulgate final regulations specifying those provisions of this subchapter for which it is appropriate to treat Indian Tribes as States. Such treatment shall be authorized only if:
(A) the Indian Tribe is recognized by the Secretary of the Interior and has a governing body carrying out substantial governmental duties and powers;

(B) the functions to be exercised by the Indian Tribe are within the area of the Tribal Government’s jurisdiction; and

(C) the Indian Tribe is reasonably expected to be capable, in the Administrator’s judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this subchapter and of all applicable regulations.

(2) Provisions where treatment as State inappropriate

For any provision of this subchapter where treatment of Indian Tribes as identical to States is inappropriate, administratively infeasible or otherwise inconsistent with the purposes of this subchapter, the Administrator may include in the regulations promulgated under this section, other means for administering such provision in a manner that will achieve the purpose of the provision. Nothing in this section shall be construed to allow Indian Tribes to assume or maintain primary enforcement responsibility for public water systems or for underground injection control in a manner less protective of the health of persons than such responsibility may be assumed or maintained by a State. An Indian tribe shall not be required to exercise criminal enforcement jurisdiction for purposes of complying with the preceding sentence.

(AMENDMENTS

1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§ 300j–12. State revolving loan funds

(a) General authority

(1) Grants to States to establish State loan funds

(A) In general

The Administrator shall offer to enter into agreements with eligible States to make capitalization grants, including letters of credit, to the States under this subsection to further the health protection objectives of this subchapter, promote the efficient use of fund resources, and for other purposes as are specified in this subchapter.

(B) Establishment of fund

To be eligible to receive a capitalization grant under this section, a State shall establish a drinking water treatment revolving loan fund (referred to in this section as a “State loan fund”) and comply with the other requirements of this section. Each grant to a State under this section shall be deposited in the State loan fund established by the State, except as otherwise provided in this section and in other provisions of this subchapter. No funds authorized by other provisions of this subchapter to be used for other purposes specified in this subchapter shall be deposited in any State loan fund.

(C) Extended period

The grant to a State shall be available to the State for obligation during the fiscal year for which the funds are authorized and during the following fiscal year, except that grants made available from funds provided prior to fiscal year 1997 shall be available for obligation during each of the fiscal years 1997 and 1998.

(D) Allotment formula

Except as otherwise provided in this section, funds made available to carry out this section shall be allotted to States that have entered into an agreement pursuant to this section (other than the District of Columbia) in accordance with—

(i) for each of fiscal years 1995 through 1997, a formula that is the same as the formula used to distribute public water system supervision grant funds under section 300j–2 of this title in fiscal year 1995, except that the minimum proportionate share established in the formula shall be 1 percent of available funds and the formula shall be adjusted to include a minimum proportionate share for the State of Wyoming and the District of Columbia; and

(ii) for fiscal year 1998 and each subsequent fiscal year, a formula that allocates to each State the proportional share of the State needs identified in the most recent survey conducted pursuant to subsection (b) of this section, except that the minimum proportionate share provided to each State shall be the same as the minimum proportionate share provided under clause (i).

(E) Reallocation

The grants not obligated by the last day of the period for which the grants are available shall be reallocated according to the appropriate criteria set forth in subparagraph (D), except that the Administrator may reserve and allocate 10 percent of the remaining amount for financial assistance to Indian Tribes in addition to the amount allotted under subsection (i) of this section and none of the funds reallocated by the Administrator shall be reallocated to any State that has not obligated all sums allotted to the State pursuant to this section during the period in which the sums were available for obligation.

(F) Nonprimacy States

The State allotment for a State not exercising primary enforcement responsibility for public water systems shall not be deposited in any such fund but shall be allotted by the Administrator under this subparagraph. Pursuant to section 300j–2(a)(9)(A) of this title such sums allotted under this subparagraph shall be reserved as needed by the Administrator to exercise primary enforcement
responsible for public water systems for deposit in such funds. Whenever the Administrator makes a final determination pursuant to section 300g–2(b) of this title that the requirements of section 300g–2(a) of this title are no longer being met by a State, additional grants for such State under this subchapter shall be immediately terminated by the Administrator. This subparagraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(G) Other programs

(i) New system capacity

Beginning in fiscal year 1999, the Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section to a State unless the State has met the requirements of section 300g–9(a) of this title (relating to capacity development) and shall withhold 10 percent for fiscal year 2001, 15 percent for fiscal year 2002, and 20 percent for fiscal year 2003 if the State has not complied with the provisions of section 300g–9(c) of this title (relating to capacity development strategies). Not more than a total of 20 percent of the capitalization grants made to a State in any fiscal year may be withheld under the preceding provisions of this clause. All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as is applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–9 of this title (relating to capacity development).

(ii) Operator certification

The Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section unless the State has met the requirements of section 300g–8 of this title (relating to operator certification). All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–8 of this title (relating to operator certification).

(2) Use of funds

Except as otherwise authorized by this subchapter, amounts deposited in a State loan fund, including loan repayments and interest earned on such amounts, shall be used only for providing loans or loan guarantees, or as a source of reserve and security for leveraged loans, the proceeds of which are deposited in a State loan fund established under paragraph (1), or other financial assistance authorized under this section to community water systems and nonprofit noncommunity water systems, other than systems owned by Federal agencies. Financial assistance under this section may be used by a public water system only for expenditures (not including monitoring, operation, and maintenance expenditures) of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations applicable to the system under section 300g–1 of this title or otherwise significantly further the health protection objectives of this subchapter. The funds may also be used to provide loans to a system referred to in section 300f(4)(B) of this title for the purpose of providing the treatment described in section 300f(4)(B)(I)(III) of this title. The funds shall not be used for the acquisition of real property or interests therein, unless the acquisition is integral to a project authorized by this paragraph and the purchase is from a willing seller. Of the amount credited to any State loan fund established under this section in any fiscal year, 15 percent shall be available solely for providing loan assistance to public water systems which regularly serve fewer than 10,000 persons to the extent such funds can be obligated for eligible projects of public water systems.

(3) Limitation

(A) In general

Except as provided in subparagraph (B), no assistance under this section shall be provided to a public water system that—

(i) does not have the technical, managerial, and financial capability to ensure compliance with the requirements of this subchapter; or

(ii) is in significant noncompliance with any requirement of a national primary drinking water regulation or variance.

(B) Restructuring

A public water system described in subparagraph (A) may receive assistance under this section if—

(i) the use of the assistance will ensure compliance; and

(ii) if subparagraph (A)(i) applies to the system, the owner or operator of the system agrees to undertake feasible and appropriate changes in operations (including ownership, management, accounting, rates, maintenance, consolidation, alternative water supply, or other procedures) if the State determines that the measures are necessary to ensure that the system has the technical, managerial, and financial capability to comply with the requirements of this subchapter over the long term.

(C) Review

Prior to providing assistance under this section to a public water system that is in significant noncompliance with any requirement of a national primary drinking water regulation or variance, the State shall con-
duct a review to determine whether subparagraph (A)(1) applies to the system.

(b) Intended use plans

(1) In general

After providing for public review and comment, each State that has entered into a capitalization agreement pursuant to this section shall annually prepare a plan that identifies the intended uses of the amounts available to the State loan fund of the State.

(2) Contents

An intended use plan shall include—

(A) a list of the projects to be assisted in the first fiscal year that begins after the date of the plan, including a description of the project, the expected terms of financial assistance, and the size of the community served;

(B) the criteria and methods established for the distribution of funds; and

(C) a description of the financial status of the State loan fund and the short-term and long-term goals of the State loan fund.

(3) Use of funds

(A) In general

An intended use plan shall provide, to the maximum extent practicable, that priority for the use of funds be given to projects that—

(i) address the most serious risk to human health;

(ii) are necessary to ensure compliance with the requirements of this subchapter (including requirements for filtration); and

(iii) assist systems most in need on a per household basis according to State affordability criteria.

(B) List of projects

Each State shall, after notice and opportunity for public comment, publish and periodically update a list of projects in the State that are eligible for assistance under this section, including the priority assigned to each project and, to the extent known, the expected funding schedule for each project.

(c) Fund management

Each State loan fund under this section shall be established, maintained, and credited with re-obligation or expenditure, such amounts shall be invested in interest bearing obligations.

(d) Assistance for disadvantaged communities

(1) Loan subsidy

Notwithstanding any other provision of this section, in any case in which the State makes a loan pursuant to subsection (a)(2) of this section to a disadvantaged community or to a community that the State expects to become a disadvantaged community as the result of a proposed project, the State may provide additional subsidization (including forgiveness of principal).

(2) Total amount of subsidies

For each fiscal year, the total amount of loan subsidies made by a State pursuant to paragraph (1) may not exceed 30 percent of the amount of the capitalization grant received by the State for the year.

(3) “Disadvantaged community” defined

In this subsection, the term “disadvantaged community” means the service area of a public water system that meets affordability criteria established after public review and comment by the State in which the public water system is located. The Administrator may publish information to assist States in establishing affordability criteria.

(e) State contribution

Each agreement under subsection (a) of this section shall require that the State deposit in the State loan fund from State moneys an amount equal to at least 20 percent of the total amount of the grant to be made to the State on or before the date on which the grant payment is made to the State, except that a State shall not be required to deposit such amount into the fund prior to the date on which each grant payment is made for fiscal years 1994, 1995, 1996, and 1997 if the State deposits the State contribution amount into the State loan fund prior to September 30, 1999.

(f) Types of assistance

Except as otherwise limited by State law, the amounts deposited into a State loan fund under this section may be used only—

(1) to make loans, on the condition that—

(A) the interest rate for each loan is less than or equal to the market interest rate, including an interest free loan;

(B) principal and interest payments on each loan will commence not later than 1 year after completion of the project for which the loan was made, and each loan will be fully amortized not later than 20 years after the completion of the project, except that in the case of a disadvantaged community (as defined in subsection (d)(3) of this section), a State may provide an extended term for a loan, if the extended term—

(i) terminates not later than the date that is 30 years after the date of project completion; and

(ii) does not exceed the expected design life of the project;

(C) the recipient of each loan will establish a dedicated source of revenue (or, in the case of a privately owned system, demonstrate that there is adequate security) for the repayment of the loan; and

(D) the State loan fund will be credited with all payments of principal and interest on each loan;

(2) to buy or refinance the debt obligation of a municipality or an intermunicipal or interstate agency within the State at an interest rate that is less than or equal to the market interest rate in any case in which a debt obligation is incurred after July 1, 1993;

(3) to guarantee, or purchase insurance for, a local obligation (all of the proceeds of which finance a project eligible for assistance under this section) if the guarantee or purchase would improve credit market access or reduce the interest rate applicable to the obligation;
(4) as a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the State if the proceeds of the sale of the bonds will be deposited into the State loan fund; and

(5) to earn interest on the amounts deposited into the State loan fund.

(g) Administration of State loan funds

(1) Combined financial administration

Notwithstanding subsection (c) of this section, a State may (as a convenience and to avoid unnecessary administrative costs) combine, in accordance with State law, the financial administration of a State loan fund established under this section with the financial administration of any other revolving fund established by the State if otherwise not prohibited by the law under which the State loan fund was established and if the Administrator determines that—

(A) the grants under this section, together with loan repayments and interest, will be separately accounted for and used solely for the purposes specified in subsection (a) of this section; and

(B) the authority to establish assistance priorities and carry out oversight and related activities (other than financial administration) with respect to assistance remains with the State agency having primary responsibility for financial assistance from the State loan fund.

(2) Cost of administering fund

Each State may annually use up to 4 percent of the funds allotted to the State under this section to cover the reasonable costs of administration of the programs under this section, including the recovery of reasonable costs expended to establish a State loan fund which are incurred after August 6, 1996, and to provide technical assistance to public water systems within the State. For fiscal year 1995 and each fiscal year thereafter, each State may use up to an additional 10 percent of the funds allotted to the State under this section—

(A) for public water system supervision programs under section 300j–2(a) of this title; 

(B) to administer or provide technical assistance through source water protection programs; 

(C) to develop and implement a capacity development strategy under section 300g–9(c) of this title; and

(D) for an operator certification program for purposes of meeting the requirements of section 300g–8 of this title.

if the State matches the expenditures with at least an equal amount of State funds. At least half of the match must be additional to the amount expended by the State for public water supervision in fiscal year 1993. An additional 2 percent of the funds annually allotted to each State under this section may be used by the State to provide technical assistance to public water systems serving 10,000 or fewer persons in the State. Funds utilized under subparagraph (B) shall not be used for enforcement actions.

(3) Guidance and regulations

The Administrator shall publish guidance and promulgate regulations as may be necessary to carry out the provisions of this section, including—

(A) provisions to ensure that each State commits and expends funds allotted to the State under this section as efficiently as possible in accordance with this subchapter and applicable State laws;

(B) guidance to prevent waste, fraud, and abuse; and

(C) guidance to avoid the use of funds made available under this section to finance the expansion of any public water system in anticipation of future population growth.

The guidance and regulations shall also ensure that the States, and public water systems receiving assistance under this section, use accounting, audit, and fiscal procedures that conform to generally accepted accounting standards.

(4) State report

Each State administering a loan fund and assistance program under this subsection shall publish and submit to the Administrator a report every 2 years on its activities under this section, including the findings of the most recent audit of the fund and the entire State allotment. The Administrator shall periodically audit all State loan funds established by, and all other amounts allotted to, the States pursuant to this section in accordance with procedures established by the Comptroller General.

(h) Needs survey

The Administrator shall conduct an assessment of water system capital improvement needs of all eligible public water systems in the United States and submit a report to the Congress containing the results of the assessment within 180 days after August 6, 1996, and every 4 years thereafter.

(i) Indian Tribes

(1) In general

1½ percent of the amounts appropriated annually to carry out this section may be used by the Administrator to make grants to Indian Tribes and Alaska Native villages that have not otherwise received either grants from the Administrator under this section or assistance from State loan funds established under this section. The grants may only be used for expenditures by tribes and villages for public water system expenditures referred to in subsection (a)(2) of this section.

(2) Use of funds

Funds reserved pursuant to paragraph (1) shall be used to address the most significant threats to public health associated with public water systems that serve Indian Tribes, as de-
(3) Alaska Native villages

In the case of a grant for a project under this subsection in an Alaska Native village, the Administrator is also authorized to make grants to the State of Alaska for the benefit of Alaska Native villages. An amount not to exceed 4 percent of the grant amount may be used by the State of Alaska for project management.

(4) Needs assessment

The Administrator, in consultation with the Director of the Indian Health Service and Indian Tribes, shall, in accordance with a schedule that is consistent with the needs surveys conducted pursuant to subsection (h) of this section, prepare surveys and assess the needs of drinking water treatment facilities to serve Indian Tribes, including an evaluation of the public water systems that pose the most significant threats to public health.

(j) Other areas

Of the funds annually available under this section for grants to States, the Administrator shall make allotments in accordance with section 300j–2(a)(4) of this title for the Virgin Islands, the Commonwealth of the Northern Mariana Islands, American Samoa, and Guam. The grants allotted as provided in this subsection may be provided by the Administrator to the governments of such areas, to public water systems in such areas, or to both, to be used for the public water system expenditures referred to in subsection (a)(2) of this section. The grants, and grants for the District of Columbia, shall not be deposited in State loan funds. The total allotment of grants under this section for all areas described in this subsection in any fiscal year shall not exceed 0.33 percent of the aggregate amount made available to carry out this section in that fiscal year.

(k) Other authorized activities

(1) In general

Notwithstanding subsection (a)(2) of this section, a State may take each of the following actions:

(A) Provide assistance, only in the form of a loan, to one or more of the following:

(i) Any public water system described in subsection (a)(2) of this section to acquire land or a conservation easement from a willing seller or grantor, if the purpose of the acquisition is to protect the source water of the system from contamination and to ensure compliance with national primary drinking water regulations.

(ii) Any community water system to implement local, voluntary source water protection measures to protect source water in areas delineated pursuant to section 300j–13 of this title, in order to facilitate compliance with national primary drinking water regulations.

(B) To provide funding to implement voluntary, incentive-based source water quality protection measures pursuant to clauses (ii) and (iii) of paragraph (1)(A).

(C) To provide assistance through a capacity development strategy pursuant to paragraph (1)(B).

(D) To make expenditures to delineate or assess source water protection areas pursuant to paragraph (1)(C).

(E) To make expenditures to establish and implement wellhead protection programs pursuant to paragraph (1)(D).

(3) Statutory construction

Nothing in this section creates or conveys any new authority to a State, political subdivision of a State, or community water system for any new regulatory measure, or limits any authority of a State, political subdivision of a State or community water system.

(l) Savings

The failure or inability of any public water system to receive funds under this section or any other loan or grant program, or any delay in obtaining the funds, shall not alter the obligation of the system to comply in a timely manner with all applicable drinking water standards and requirements of this subchapter.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out the purposes of this section $599,000,000 for the fiscal year 1994 and $1,000,000,000 for each of the fiscal years 1995 through 2003. To the extent amounts authorized to be appropriated under this subsection in any fiscal year are not appropriated in that fiscal year, such amounts are authorized to be appropriated in a subse-
quent fiscal year (prior to the fiscal year 2004). Such sums shall remain available until expended.

(n) Health effects studies

From funds appropriated pursuant to this section for each fiscal year, the Administrator shall reserve $10,000,000 for health effects studies on drinking water contaminants authorized by the Safe Drinking Water Act Amendments of 1996. In allocating funds made available under this subsection, the Administrator shall give priority to studies concerning the health effects of cryptosporidium (as authorized by section 300j–18(c) of this title), disinfection byproducts (as authorized by section 300j–18(e) of this title), and arsenic (as authorized by section 300g–1(b)(12)(A) of this title), and the implementation of a plan for studies of subpopulations at greater risk of adverse effects (as authorized by section 300j–18(a) of this title).

(o) Monitoring for unregulated contaminants

From funds appropriated pursuant to this section for each fiscal year beginning with fiscal year 1996, the Administrator shall reserve $2,000,000 to pay the costs of monitoring for unregulated contaminants under section 300j–4(a)(2)(C) of this title.

(p) Demonstration project for State of Virginia

Notwithstanding the other provisions of this section limiting the use of funds deposited in a State loan fund from any State allotment, the State of Virginia may, as a single demonstration and with the approval of the Virginia General Assembly and the Administrator, conduct a program to demonstrate alternative approaches to intergovernmental coordination to assist in the financing of new drinking water facilities in the following rural communities in southwestern Virginia where none exists on August 6, 1996, and where such communities are experiencing economic hardship: Lee County, Wise County, Scott County, Dickenson County, Russell County, Buchanan County, Tazewell County, and the city of Norton, Virginia. The funds allotted to that State and deposited in the State loan fund may be loaned to a regional endowment fund for the purpose set forth in this subsection under a plan to be approved by the Administrator. The plan may include an advisory group that includes representatives of such counties.

(q) Small system technical assistance

The Administrator may reserve up to 2 percent of the total funds appropriated pursuant to subsection (m) of this section for each of the fiscal years 1997 through 2003 to carry out the provisions of section 300j–1(c) of this title (relating to technical assistance for small systems), except that the total amount of funds made available for such purpose in any fiscal year through appropriations (as authorized by section 300j–1(c) of this title) and reservations made pursuant to this subsection shall not exceed the amount authorized by section 300j–1(e) of this title.

(r) Evaluation

The Administrator shall conduct an evaluation of the effectiveness of the State loan funds through fiscal year 2001. The evaluation shall be submitted to the Congress at the same time as the President submits to the Congress, pursuant to section 1108 of title 31, an appropriations request for fiscal year 2003 relating to the budget of the Environmental Protection Agency.

(2) reserve in any year a dollar amount up to the dollar amount that may be reserved under paragraph

Combining Fund Assets for Enhancement of Lending Capacity

Pub. L. 105–276, title III, Oct. 21, 1998, 112 Stat. 2498, provided in part: ‘‘That, consistent with section 1452(g) of the Safe Drinking Water Act (§42 U.S.C. 300j–20(g)), section 302 of the Safe Drinking Water Act Amendments of 1996 (Public Law 104–182) [set out as a note below] and the accompanying joint explanatory statement of the committee of conference (H. Rept. No. 104–741 to accompany S. 1316, the Safe Drinking Water Act Amendments of 1996), and notwithstanding any other provision of law, beginning in fiscal year 1999 and thereafter, States may combine the assets of State Revolving Funds (SRFs) established under section 1452 of the Safe Drinking Water Act, as amended, and title VI of the Federal Water Pollution Control Act (§33 U.S.C. 1381 et seq.), as amended, as security for bond issues to enhance the lending capacity of one or both SRFs, but not to acquire the state match for either program, provided that revenues from the bonds are allocated to the purposes of the Safe Drinking Water Act (this subchapter) and the Federal Water Pollution Control Act (§33 U.S.C. 1251 et seq.) in the same portion as the funds are used as security for the bonds’’.

Transfer of Funds

Pub. L. 112–74, div. E, title II, Dec. 23, 2011, 125 Stat. 1018, provided in part: ‘‘That for fiscal year 2012 and hereafter, the Administrator may transfer funds provided for tribal set-asides through funds appropriated for the Clean Water State Revolving Funds and for the Drinking Water State Revolving Funds between those accounts in such manner as the Administrator deems appropriate, but not to exceed the transfer limits given to States under section 302(a) of Public Law 104–182 [set out below] and the accompanying joint explanatory statement of the committee of conference (H. Rept. No. 104–741 to accompany S. 1316, the Safe Drinking Water Act Amendments of 1996), and notwithstanding any other provision of law, beginning in fiscal year 1999 and thereafter, States may combine the assets of State Revolving Funds (SRFs) established under section 1452 of the Safe Drinking Water Act, as amended, and title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.), as amended, as security for bond issues to enhance the lending capacity of one or both SRFs, but not to acquire the state match for either program, provided that revenues from the bonds are allocated to the purposes of the Safe Drinking Water Act (this subchapter) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) in the same portion as the funds are used as security for the bonds’’.

Similar provisions were contained in the following prior appropriation acts:

§ 300j–13

Source water quality assessment

(a) Source water assessment

(1) Guidance

Within 12 months after August 6, 1996, after notice and comment, the Administrator shall publish guidance for States exercising primary enforcement responsibility for public water systems to carry out directly or through delegation (for the protection and benefit of public water systems and for the support of monitoring flexibility) a source water assessment program within the State's boundaries. Each State adopting modifications to monitoring requirements pursuant to section 300g–7(b) of this title shall, prior to adopting such modifications, have an approved source water assessment program under this section and shall carry out the program either directly or through delegation.

(2) Program requirements

A source water assessment program under this subsection shall—

(A) delineate the boundaries of the assessment areas in such State from which one or more public water systems in the State receive supplies of drinking water, using all reasonably available hydrogeologic information on the sources of the supply of drinking water in the State and the water flow, recharge, and discharge and any other reliable information as the State deems necessary to adequately determine such areas; and

(B) identify for contaminants regulated under this subchapter for which monitoring is required under this subchapter (or any unregulated contaminants selected by the State, in its discretion, which the State, for the purposes of this subsection, has determined may present a threat to public health), to the extent practical, the origins within each delineated area of such contaminants to determine the susceptibility of the public water systems in the delineated area to such contaminants.

(3) Approval, implementation, and monitoring relief

A State source water assessment program under this subsection shall be submitted to the Administrator within 18 months after the Administrator's guidance is issued under this subsection and shall be deemed approved 9 months after the date of such submittal unless the Administrator disapproves the program as provided in section 300h–7(c) of this title. States shall begin implementation of the program immediately after its approval. The Administrator's approval of a State program under this subsection shall include a timetable, established in consultation with the State, allowing not more than 2 years for completion after approval of the program. Public water systems seeking monitoring relief in addition to the interim relief provided under section 300g–7(a) of this title shall be eligible for monitoring relief, consistent with section 300g–7(b) of this title, upon completion of the assessment in the delineated source water assessment area or areas concerned.

(4) Timetable

The timetable referred to in paragraph (3) shall take into consideration the availability to the State of funds under section 300j–12 of this title (relating to State loan funds) for assessments and other relevant factors. The Administrator may extend any timetable included in a State program approved under paragraph (3) to extend the period for completion by an additional 18 months.

(5) Demonstration project

The Administrator shall, as soon as practicable, conduct a demonstration project, in consultation with other Federal agencies, to demonstrate the most effective and protective means of assessing and protecting source waters serving large metropolitan areas and located on Federal lands.

(6) Use of other programs

To avoid duplication and to encourage efficiency, the program under this section may make use of any of the following:

(A) Vulnerability assessments, sanitary surveys, and monitoring programs.

(B) Delineations or assessments of ground water sources under a State wellhead protection program developed pursuant to this section.

(C) Delineations or assessments of surface or ground water sources under a State pesticide management plan developed pursuant to the Pesticide and Ground Water State Management Plan Regulation (subparts I and J of part 152 of title 40, Code of Federal Regulations), promulgated under section 136a(d) of title 7.

(D) Delineations or assessments of surface water sources under a State watershed initiative or to satisfy the watershed criterion for determining if filtration is required under the Surface Water Treatment Rule (section 141.70 of title 40, Code of Federal Regulations).

(E) Delineations or assessments of surface or ground water sources under programs or plans pursuant to the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.].

(7) Public availability

The State shall make the results of the source water assessments conducted under this subsection available to the public.

(b) Approval and disapproval

For provisions relating to program approval and disapproval, see section 300h–7(c) of this title.
§ 300j–14. Source water petition program

(a) Petition program

1. In general

(A) Establishment

A State may establish a program under which an owner or operator of a community water system in the State, or a municipal or local government or political subdivision of a State, may submit a source water quality protection partnership petition to the State requesting that the State assist in the local development of a voluntary, incentive-based partnership, among the owner, operator, or government and other persons likely to be affected by the recommendations of the partnership, to—

(i) reduce the presence in drinking water of contaminants that may be addressed by a petition by considering the origins of the contaminants, including to the maximum extent practicable the specific activities that affect the drinking water supply of a community;

(ii) obtain financial or technical assistance necessary to facilitate establishment of a partnership, or to develop and implement recommendations of a partnership for the protection of source water to assist in the provision of drinking water that complies with national primary drinking water regulations with respect to contaminants addressed by a petition; and

(iii) develop recommendations regarding voluntary and incentive-based strategies for the long-term protection of the source water of community water systems.

(B) Funding

Each State may—

(i) use funds set aside pursuant to section 300j–12(k)(1)(A)(i)(iii) of this title by the State to carry out a program described in subparagraph (A), including assistance to voluntary local partnerships for the development and implementation of partnership recommendations for the protection of source water such as source water quality assessment, contingency plans, and demonstration projects for partners within a source water area delineated under section 300j–13(a) of this title; and

(ii) provide assistance in response to a petition submitted under this subsection using funds referred to in subsection (b)(2)(B) of this section.

2. Objectives

The objectives of a petition submitted under this subsection shall be to—

(A) facilitate the local development of voluntary, incentive-based partnerships among owners and operators of community water systems, governments, and other persons in source water areas; and

(B) obtain assistance from the State in identifying resources which are available to implement the recommendations of the partnerships to address the origins of drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) that affect the drinking water supply of a community.

3. Contaminants addressed by a petition

A petition submitted to a State under this subsection shall address only those contaminants—

(A) that are pathogenic organisms for which a national primary drinking water regulation has been established or is required under section 300g–1 of this title; or

(B) for which a national primary drinking water regulation has been promulgated or proposed and that are detected by adequate monitoring methods in the source water at the intake structure or in any collection, treatment, storage, or distribution facilities by the community water systems at levels—

(i) above the maximum contaminant level; or

(ii) that are not reliably and consistently below the maximum contaminant level.

4. Contents

A petition submitted under this subsection shall, at a minimum—

(A) include a delineation of the source water area in the State that is the subject of the petition;

(B) identify, to the maximum extent practicable, the origins of the drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) in the source water area delineated under section 300j–13 of this title;

(C) identify any deficiencies in information that will impair the development of recommendations by the voluntary local partnership to address drinking water contaminants that may be addressed by a petition; and

(D) specify the efforts made to establish the voluntary local partnership and obtain the participation of—

(i) the municipal or local government or other political subdivision of the State with jurisdiction over the source water area delineated under section 300j–13 of this title; and

(ii) each person in the source water area delineated under section 300j–13 of this title—

(I) who is likely to be affected by recommendations of the voluntary local partnership; and

(II) whose participation is essential to the success of the partnership;

(E) outline how the voluntary local partnership has or will, during development and
implementation of recommendations of the voluntary local partnership, identify, recognize and take into account any voluntary or other activities already being undertaken by persons in the source water area delineated under section 300j–13 of this title under Federal or State law to reduce the likelihood that contaminants will occur in drinking water at levels of public health concern; and

(F) specify the technical, financial, or other assistance that the voluntary local partnership requests of the State to develop the partnership or to implement recommendations of the partnership.

(b) Approval or disapproval of petitions

(1) In general

After providing notice and an opportunity for public comment on a petition submitted under subsection (a) of this section, the State shall approve or disapprove the petition, in whole or in part, not later than 120 days after the date of submission of the petition.

(2) Approval

The State may approve a petition if the petition meets the requirements established under subsection (a) of this section. The notice of approval shall, at a minimum, include for informational purposes—

(A) an identification of technical, financial, or other assistance that the State will provide to assist in addressing the drinking water contaminants that may be addressed by a petition based on—

(i) the relative priority of the public health concern identified in the petition with respect to the other water quality needs identified by the State;

(ii) any necessary coordination that the State will perform of the program established under this section with programs implemented or planned by other States under this section; and

(iii) funds available (including funds available from a State revolving loan fund established under title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.)) or section 300j–12 of this title;

(B) a description of technical or financial assistance pursuant to Federal and State programs that is available to assist in implementing recommendations of the partnership in the petition, including—

(i) any program established under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.);

(ii) the program established under section 1455b of title 16;

(iii) the agricultural water quality protection program established under chapter 2 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3838 et seq.);

(iv) the sole source aquifer protection program established under section 300h–6 of this title;

(v) the community wellhead protection program established under section 300h–7 of this title;

(vi) any pesticide or ground water management plan;

(vii) any voluntary agricultural resource management plan or voluntary whole farm or whole ranch management plan developed and implemented under a process established by the Secretary of Agriculture; and

(viii) any abandoned well closure program; and

(C) a description of activities that will be undertaken to coordinate Federal and State programs to respond to the petition.

(3) Disapproval

If the State disapproves a petition submitted under subsection (a) of this section, the State shall notify the entity submitting the petition in writing of the reasons for disapproval. A petition may be resubmitted at any time if—

(A) new information becomes available;

(B) conditions affecting the source water that is the subject of the petition change; or

(C) modifications are made in the type of assistance being requested.

(c) Grants to support State programs

(1) In general

The Administrator may make a grant to each State that establishes a program under this section that is approved under paragraph (2). The amount of each grant shall not exceed 50 percent of the cost of administering the program for the year in which the grant is available.

(2) Approval

In order to receive grant assistance under this subsection, a State shall submit to the Administrator for approval a plan for a source water quality protection partnership program that is consistent with the guidance published under subsection (d) of this section. The Administrator shall approve the plan if the plan is consistent with the guidance published under subsection (d) of this section.

(d) Guidance

(1) In general

Not later than 1 year after August 6, 1996, the Administrator, in consultation with the States, shall publish guidance to assist—

(A) States in the development of a source water quality protection partnership program; and

(B) municipal or local governments or political subdivisions of a State and community water systems in the development of source water quality protection partnerships and in the assessment of source water quality.

(2) Contents of the guidance

The guidance shall, at a minimum—

(A) recommend procedures for the approval or disapproval by a State of a petition submitted under subsection (a) of this section;

(B) recommend procedures for the submission of petitions developed under subsection (a) of this section;

(C) recommend criteria for the assessment of source water areas within a State; and

(D) describe technical or financial assistance pursuant to Federal and State pro-
grams that is available to address the contamination of sources of drinking water and to develop and respond to petitions submitted under subsection (a) of this section.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $5,000,000 for each of the fiscal years 1997 through 2003. Each State with a plan for a program approved under subsection (b) of this section shall receive an equitable portion of the funds available for any fiscal year.

(f) Statutory construction

Nothing in this section—

(1)(A) creates or conveys new authority to a State, political subdivision of a State, or community water system for any new regulatory measure; or

(B) limits any authority of a State, political subdivision, or community water system; or

(2) precludes a community water system, municipal or local government, or political subdivision of a government from locally developing and carrying out a voluntary, incentive-based, source water quality protection partnership to address the origins of drinking water contaminants of public health concern.

REFERENCES IN TEXT

The Federal Water Pollution Control Act, referred to in subsec. (b)(2)(A)(iii), (B)(i), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92–500, §2, Oct. 18, 1972, 86 Stat. 816, which is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. Title VI of the Act is classified generally to subchapter VI (§1381 et seq.) of chapter 26 of Title 33.

For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

§300j–15. Water conservation plan

(a) Guidelines

Not later than 2 years after August 6, 1996, the Administrator shall publish in the Federal Register guidelines for water conservation plans for public water systems serving fewer than 3,300 persons, public water systems serving between 3,300 and 10,000 persons, and public water systems serving more than 10,000 persons, taking into consideration such factors as water availability and climate.

(b) Loans or grants

Within 1 year after publication of the guidelines under subsection (a) of this section, a State exercising primary enforcement responsibility for public water systems may require a public water system, as a condition of receiving a loan or grant from a State loan fund under section 300j–12 of this title, to submit with its application for such loan or grant a water conservation plan consistent with such guidelines.

(July 1, 1944, ch. 373, title XIV, §1454, as added Pub. L. 104–182, title I, §134, Aug. 6, 1996, 110 Stat. 1679.)

§300j–16. Assistance to colonias

(a) Definitions

As used in this section:

(1) Border State

The term “border State” means Arizona, California, New Mexico, and Texas.

(2) Eligible community

The term “eligible community” means a low-income community with economic hardship—

(A) is commonly referred to as a colonia;

(B) is located along the United States-Mexico border (generally in an unincorporated area); and

(C) lacks a safe drinking water supply or adequate facilities for the provision of safe drinking water for human consumption.

(b) Grants to alleviate health risks

The Administrator of the Environmental Protection Agency and the heads of other appropriate Federal agencies are authorized to award grants to a border State to provide assistance to eligible communities to facilitate compliance with national primary drinking water regulations or otherwise significantly further the health protection objectives of this subchapter.

(c) Use of funds

Each grant awarded pursuant to subsection (b) of this section shall be used to provide assistance to one or more eligible communities with respect to which the residents are subject to a significant health risk (as determined by the Administrator or the head of the Federal agency making the grant) attributable to the lack of access to an adequate and affordable drinking water supply system.

(d) Cost sharing

The amount of a grant awarded pursuant to this section shall not exceed 50 percent of the costs of carrying out the project that is the subject of the grant.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1997 through 1999.

(July 1, 1944, ch. 373, title XIV, §1456, as added Pub. L. 104–182, title I, §135, Aug. 6, 1996, 110 Stat. 1679.)

§300j–17. Estrogenic substances screening program

In addition to the substances referred to in section 346a(p)(3)(B) of title 21, the Administrator may provide for testing under the screening program authorized by section 346a(p) of title 21, in accordance with the provisions of section 346a(p) of title 21, of any other substance that may be found in sources of drinking water
§ 300j–18. Drinking water studies

(a) Subpopulations at greater risk

(1) In general

The Administrator shall conduct a continuing program of studies to identify groups within the general population that may be at greater risk than the general population of adverse health effects from exposure to contaminants in drinking water. The study shall examine whether and to what degree infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that can be identified and characterized are likely to experience elevated health risks, including risks of cancer, from contaminants in drinking water.

(2) Report

Not later than 4 years after August 6, 1996, and periodically thereafter as new and significant information becomes available, the Administrator shall report to the Congress on the results of the studies.

(b) Biological mechanisms

The Administrator shall conduct biomedical studies to—

(1) understand the mechanisms by which chemical contaminants are absorbed, distributed, metabolized, and eliminated from the human body, so as to develop more accurate physiologically based models of the phenomena;

(2) understand the effects of contaminants and the mechanisms by which the contaminants cause adverse effects (especially noncancer and infectious effects) and the variations in the effects among humans, especially subpopulations at greater risk of adverse effects, and between test animals and humans; and

(3) develop new approaches to the study of complex mixtures, such as mixtures found in drinking water, especially to determine the prospects for synergistic or antagonistic interactions that may affect the shape of the dose-response relationship of the individual chemicals and microbes, and to examine noncancer endpoints and infectious diseases, and susceptible individuals and subpopulations.

(c) Studies on harmful substances in drinking water

(1) Development of studies

The Administrator shall, not later than 180 days after August 6, 1996, and after consultation with the Secretary of Health and Human Services, the Secretary of Agriculture, and, as appropriate, the heads of other Federal agencies, conduct the studies described in paragraph (2) to support the development and implementation of the most current version of each of the following:

(A) Enhanced Surface Water Treatment Rule (59 Fed. Reg. 38832 (July 29, 1994)).

(B) Disinfectant and Disinfection Byproducts Rule (59 Fed. Reg. 38668 (July 29, 1994)).

(C) Ground Water Disinfection Rule (availability of draft summary announced at (57 Fed. Reg. 53966; July 31, 1992)).

(2) Contents of studies

The studies required by paragraph (1) shall include, at a minimum, each of the following:

(A) Toxicological studies and, if warranted, epidemiological studies to determine what levels of exposure from disinfectants and disinfection byproducts, if any, may be associated with developmental and birth defects and other potential toxic endpoints.

(B) Toxicological studies and, if warranted, epidemiological studies to quantify the carcinogenic potential from exposure to disinfection byproducts resulting from different disinfectants.

(C) The development of dose-response curves for pathogens, including cryptosporidium and the Norwalk virus.

(3) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection $12,500,000 for each of fiscal years 1997 through 2003.

(d) Waterborne disease occurrence study

(1) System

The Director of the Centers for Disease Control and Prevention, and the Administrator shall jointly—

(A) within 2 years after August 6, 1996, conduct pilot waterborne disease occurrence studies for at least 5 major United States communities or public water systems; and

(B) within 5 years after August 6, 1996, prepare a report on the findings of the pilot studies, and a national estimate of waterborne disease occurrence.

(2) Training and education

The Director and Administrator shall jointly establish a national health care provider training and public education campaign to inform both the professional health care provider community and the general public about waterborne disease and the symptoms that may be caused by infectious agents, including microbial contaminants. In developing such a campaign, they shall seek comment from interested groups and individuals, including scientists, physicians, State and local governments, environmental groups, public water systems, and vulnerable populations.

(3) Funding

There are authorized to be appropriated for each of the fiscal years 1997 through 2001 $3,000,000 to carry out this subsection. To the extent funds under this subsection are not fully appropriated, the Administrator may use not more than $2,000,000 of the funds from amounts reserved under section 300j–12(n) of this title for health effects studies for purposes of this subsection. The Administrator may transfer a portion of such funds to the Centers for Disease Control and Prevention for such purposes.

(July 1, 1944, ch. 373, title XIV, §1458, as added Pub. L. 104–182, title I, §137, Aug. 6, 1996, 110 Stat. 1680.)
The term "drinking water cooler" means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) Lead free

The term "lead free" means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water contains not more than 8 percent lead, except that no drinking water cooler which contains any solder, flux, or storage tank interior surface which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) Local educational agency

The term "local educational agency" means—

(A) any local educational agency as defined in section 7801 of title 20,

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent's education system provided for under the Defense Dependents' Education Act of 1978 (20 U.S.C. 921 and following).

(4) Repair

The term "repair", with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) Replacement

The term "replacement", when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) School

The term "school" means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) Lead-lined tank

The term "lead-lined tank" means a water reservoir container in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.

$300j-21. Definitions

As used in this part—

(1) Drinking water cooler

The term "drinking water cooler" means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) Lead free

The term "lead free" means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water contains not more than 8 percent lead, except that no drinking water cooler which contains any solder, flux, or storage tank interior surface which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) Local educational agency

The term "local educational agency" means—

(A) any local educational agency as defined in section 7801 of title 20,

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent's education system provided for under the Defense Dependents' Education Act of 1978 (20 U.S.C. 921 and following).

(4) Repair

The term "repair", with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) Replacement

The term "replacement", when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) School

The term "school" means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) Lead-lined tank

The term "lead-lined tank" means a water reservoir container in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.

$300j-21. Definitions

As used in this part—

(1) Drinking water cooler

The term "drinking water cooler" means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) Lead free

The term "lead free" means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water contains not more than 8 percent lead, except that no drinking water cooler which contains any solder, flux, or storage tank interior surface which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) Local educational agency

The term "local educational agency" means—

(A) any local educational agency as defined in section 7801 of title 20,

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent's education system provided for under the Defense Dependents' Education Act of 1978 (20 U.S.C. 921 and following).

(4) Repair

The term "repair", with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) Replacement

The term "replacement", when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) School

The term "school" means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) Lead-lined tank

The term "lead-lined tank" means a water reservoir container in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.
§ 300j–22. Recall of drinking water coolers with lead-lined tanks

For purposes of the Consumer Product Safety Act [15 U.S.C. 2051 et seq.], all drinking water coolers identified by the Administrator on the list under section 300j–23 of this title as having a lead-lined tank shall be considered to be imminently hazardous consumer products within the meaning of section 12 of such Act (15 U.S.C. 2061). After notice and opportunity for comment, including a public hearing, the Consumer Product Safety Commission shall issue an order requiring the manufacturers and importers of such coolers to repair, replace, or recall and provide a refund for such coolers within 1 year after October 31, 1988. For purposes of enforcement, such order shall be treated as an order under section 15(d) of such Act (15 U.S.C. 2064(d)).

AMENDMENTS
1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§ 300j–23. Drinking water coolers containing lead

(a) Publication of lists

The Administrator shall, after notice and opportunity for public comment, identify each brand and model of drinking water cooler which is not lead free, including each brand and model of drinking water cooler which has a lead-lined tank. For purposes of identifying the brand and model of drinking water coolers under this subsection, the Administrator shall use the best information available to the Environmental Protection Agency. Within 100 days after October 31, 1988, the Administrator shall publish a list of each brand and model of drinking water cooler identified under this subsection. Such list shall separately identify each brand and model of cooler which has a lead-lined tank. The Administrator shall continue to gather information regarding lead in drinking water coolers and shall revise and republish the list from time to time as may be appropriate as new information or analysis becomes available regarding lead contamination in drinking water coolers.

(b) Prohibition

No person may sell in interstate commerce, or manufacture for sale in interstate commerce, any drinking water cooler listed under subsection (a) of this section or any other drinking water cooler which is not lead free, including a lead-lined drinking water cooler.

(c) Criminal penalty

Any person who knowingly violates the prohibition contained in subsection (b) of this section shall be imprisoned for not more than 5 years, or fined in accordance with title 18, or both.

(d) Civil penalty

The Administrator may bring a civil action in the appropriate United States District Court (as determined under the provisions of title 28) to impose a civil penalty on any person who violates subsection (b) of this section. In any such action the court may impose on such person a civil penalty of not more than $5,000 ($50,000 in the case of a second or subsequent violation).

AMENDMENTS
1996—Pub. L. 104–182 made technical amendment to section catchline and first word of text.
§ 300j–25. Federal assistance for State programs regarding lead contamination in drinking water

(a) School drinking water programs

The Administrator shall make grants to States to establish and carry out State programs under section 300j–24 of this title to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(b) Limits

Each grant under this section shall be used by the State for testing water coolers in accordance with section 300j–24 of this title, for testing for lead contamination in other drinking water supplies under section 300j–24 of this title, or for remedial action under State programs under section 300j–24 of this title. Not more than 5 percent of the grant may be used for program administration.

(c) Authorization of appropriations

There are authorized to be appropriated to carry out this section not more than $30,000,000 for fiscal year 1989, $30,000,000 for fiscal year 1990, and $30,000,000 for fiscal year 1991.

Subsec. (b). Pub. L. 104–182, § 501(d), substituted “by the State” for “as by the State”.

§ 300j–26. Certification of testing laboratories

The Administrator of the Environmental Protection Agency shall assure that programs for the certification of testing laboratories which test drinking water supplies for lead contamination certify only those laboratories which provide reliable accurate testing. The Administrator (or the State in the case of a State to which certification authority is delegated under this subsection) shall publish and make available to the public upon request the list of laboratories certified under this subsection.

(1) Testing and remedying lead contamination

Within 9 months after October 31, 1988, each State shall establish a program, consistent with this section, to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(2) Public availability

A copy of the results of any testing under paragraph (1) shall be available in the administrative offices of the local educational agency for inspection by the public, including teachers, other school personnel, and parents. The local educational agency shall notify parents, teacher, and employee organizations of the availability of such testing results.

(3) Coolers

In the case of drinking water coolers, such program shall include measures for the reduction or elimination of lead contamination from those water coolers which are not lead free and which are located in schools. Such measures shall be adequate to ensure that within 15 months after October 31, 1988, all such water coolers in schools under the jurisdiction of such agencies are repaired, replaced, permanently removed, or rendered inoperable unless the cooler is tested and found (within the limits of testing accuracy) not to contribute lead to drinking water.

(4) Remedial action program

Within 9 months after October 31, 1988, each State shall establish and carry out a program to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(5) Remedial action

Within 9 months after October 31, 1988, each State shall establish and carry out a program to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(6) Remedial action program

Within 9 months after October 31, 1988, each State shall establish and carry out a program to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

AMENDMENTS

Subsec. (b). Pub. L. 104–182, § 501(d), substituted “by the State” for “as by the State”.

§ 300k. Establishment of program of grants to States

(a) In general

The Secretary, acting through the Director of the Centers for Disease Control and Prevention, may make grants to States on the basis of an established competitive review process for the purpose of carrying out programs—

(1) to screen women for breast and cervical cancer as a preventive health measure;

(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services and support services such as case management;

(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

1 So in original. Probably should be “section.”
CHAPTER 82—SOLID WASTE DISPOSAL

SUBCHAPTER I—GENERAL PROVISIONS

Sec.
6901. Congressional findings.
6901a. Congressional findings: used oil recycling.
6902. Objectives and national policy.
6903. Definitions.
6904. Governmental cooperation.
6905. Application of chapter and integration with other Acts.
6906. Financial disclosure.
6907. Solid waste management information and guidelines.
6908. Small town environmental planning.
6908a. Agreements with Indian tribes.

SUBCHAPTER II—OFFICE OF SOLID WASTE; AUTHORITIES OF THE ADMINISTRATOR

6911. Office of Solid Waste and Interagency Coordinating Committee.
6911a. Assistant Administrator of Environmental Protection Agency; appointment, etc.
6912. Authorities of Administrator.
6914. Grants for discarded tire disposal.
6914a. Labeling of lubricating oil.
6914b. Degradable plastic ring carriers; definitions.
6914b–1. Regulation of plastic ring carriers.
6915. Annual report.
6916. General authorization.

SUBCHAPTER III—HAZARDOUS WASTE MANAGEMENT

6921. Identification and listing of hazardous waste.
6922. Standards applicable to generators of hazardous waste.
6923. Standards applicable to transporters of hazardous waste.
6924. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities.
6925. Permits for treatment, storage, or disposal of hazardous waste.
6926. Authorized State hazardous waste programs.
6927. Inspections.
6928. Federal enforcement.
6929. Retention of State authority.
6930. Effective date.
6931. Authorization of assistance to States.
6932. Transferred.
6933. Hazardous waste site inventory.
6934. Monitoring, analysis, and testing.
6935. Restrictions on recycled oil.
6936. Expansion during interim status.
6937. Inventory of Federal agency hazardous waste facilities.
6938. Export of hazardous wastes.
6939. Domestic sewage.
6939a. Exposure information and health assessments.
6939b. Interim control of hazardous waste injection.
6939c. Mixed waste inventory reports and plan.
6939d. Public vessels.
6939e. Federally owned treatment works.
6939f. Long-term storage.
6939g. Hazardous waste electronic manifest system.

SUBCHAPTER IV—STATE OR REGIONAL SOLID WASTE PLANS

6941. Objectives of subchapter.
6941a. Energy and materials conservation and recovery; Congressional findings.
6942. Federal guidelines for plans.
6943. Requirements for approval of plans.
6944. Criteria for sanitary landfills; sanitary landfills required for all disposal.
6945. Upgrading of open dumps.
6946. Procedure for development and implementation of State plan.
6947. Approval of State plan; Federal assistance.
6948. Federal assistance.
6949. Rural communities assistance.
6949a. Adequacy of certain guidelines and criteria.

SUBCHAPTER V—DUTIES OF SECRETARY OF COMMERCE IN RESOURCE AND RECOVERY

6951. Functions.
6954. Technology promotion.
6955. Marketing policies, establishment; nondiscrimination requirement.
6956. Authorization of appropriations.

SUBCHAPTER VI—FEDERAL RESPONSIBILITIES

6961. Application of Federal, State, and local law to Federal facilities.
6962. Federal procurement.
6963. Cooperation with Environmental Protection Agency.
6964. Applicability of solid waste disposal guidelines to Executive agencies.
6965. Chief Financial Officer report.
6966. Increased use of recovered mineral component in federally funded projects involving procurement
of cement or concrete.
6966a. Increased use of recovered mineral component in federally funded projects involving procurement
of cement or concrete.
6966b. Use of granular mine tailings.
6966c. Best practices for battery recycling and labeling guidelines.
6966d. Consumer recycling education and outreach grant program; Federal procurement.

SUBCHAPTER VII—MISCELLANEOUS PROVISIONS

6971. Employee protection.
6972. Citizen suits.
6973. Imminent hazard.
6974. Petition for regulations; public participation.
6975. Separability.
6976. Judicial review.
6977. Grants or contracts for training projects.
6978. Payments.
6979. Labor standards.
6979a. Transferred.
6979b. Law enforcement authority.

SUBCHAPTER VIII—RESEARCH, DEVELOPMENT, DEMONSTRATION, AND INFORMATION

6981. Research, demonstration, training, and other activities.
6982. Special studies; plans for research, development, and demonstrations.
6983. Coordination, collection, and dissemination of information.
6984. Full-scale demonstration facilities.
6985. Special study and demonstration projects on recovery of useful energy and materials.
6986. Grants for resource recovery systems and improved solid waste disposal facilities.
6987. Authorization of appropriations.

SUBCHAPTER IX—REGULATION OF UNDERGROUND STORAGE TANKS

6991. Definitions and exemptions.
6991a. Notification.
6991b. Release detection, prevention, and correction regulations.
6991c. Approval of State programs.
6991d. Inspections, monitoring, testing, and corrective action.
6991e. Federal enforcement.
6991f. Federal facilities.
6991g. State authority.
6991h. Study of underground storage tanks.
6991i. Operator training.
6991j. Use of funds for release prevention and compliance.
6991k. Delivery prohibition.
6991l. Tanks on tribal lands.
6991m. Authorization of appropriations.

SUBCHAPTER X—DEMONSTRATION MEDICAL WASTE TRACKING PROGRAM

6992. Scope of demonstration program for medical waste.
6992a. Listing of medical wastes.
6992b. Tracking of medical waste.
§6901. Congressional findings

(a) Solid waste
The Congress finds with respect to solid waste—

(1) that the continuing technological progress and improvement in methods of manufacture, packaging, and marketing of consumer products has resulted in an ever-mounting increase, and in a change in the characteristics, of the mass material discarded by the purchaser of such products;

(2) that the economic and population growth of our Nation, and the improvements in the standard of living enjoyed by our population, have required increased industrial production to meet our needs, and have made necessary the demolition of old buildings, the construction of new buildings, and the provision of highways and other avenues of transportation, which, together with related industrial, commercial, and agricultural operations, have resulted in a rising tide of scrap, discarded, and waste materials;

(3) that the continuing concentration of our population in expanding metropolitan and other urban areas has presented these communities with serious financial, management, intergovernmental, and technical problems in the disposal of solid wastes resulting from the industrial, commercial, domestic, and other activities carried on in such areas;

(4) that while the collection and disposal of solid wastes should continue to be primarily the function of State, regional, and local agencies, the problems of waste disposal as set forth above have become a matter national in scope and in concern and necessitate Federal action through financial and technical assistance and leadership in the development, demonstration, and application of new and improved methods and processes to reduce the amount of waste and unsalvageable materials and to provide for proper and economical solid waste disposal practices.

(b) Environment and health
The Congress finds with respect to the environment and health, that—

(1) although land is too valuable a national resource to be needlessly polluted by discarded materials, most solid waste is disposed of on land in open dumps and sanitary landfills;

(2) disposal of solid waste and hazardous waste in or on the land without careful planning and management can present a danger to human health and the environment;

(3) as a result of the Clean Air Act [42 U.S.C. 7401 et seq.], the Water Pollution Control Act [33 U.S.C. 1251 et seq.], and other Federal and State laws respecting public health and the environment, greater amounts of solid waste (in the form of sludge and other pollution treatment residues) have been created. Similarly, inadequate and environmentally unsound practices for the disposal or use of solid waste have created greater amounts of air and water pollution and other problems for the environment and for health;

(4) open dumping is particularly harmful to health, contaminates drinking water from underground and surface supplies, and pollutes the air and the land;

(5) the placement of inadequate controls on hazardous waste management will result in substantial risks to human health and the environment;

(6) if hazardous waste management is improperly performed in the first instance, corrective action is likely to be expensive, complex, and time consuming;

(7) certain classes of land disposal facilities are not capable of assuring long-term containment of certain hazardous wastes, and to avoid substantial risk to human health and the environment, reliance on land disposal should be minimized or eliminated, and land disposal, particularly landfill and surface impoundment, should be the least favored method for managing hazardous wastes; and

(8) alternatives to existing methods of land disposal must be developed since many of the cities in the United States will be running out of suitable solid waste disposal sites within five years unless immediate action is taken.

(c) Materials
The Congress finds with respect to materials, that—

(1) millions of tons of recoverable material which could be used are needlessly buried each year;

(2) methods are available to separate usable materials from solid waste; and

(3) the recovery and conservation of such materials can reduce the dependence of the United States on foreign resources and reduce the deficit in its balance of payments.

(d) Energy
The Congress finds with respect to energy, that—

(1) solid waste represents a potential source of solid fuel, oil, or gas that can be converted into energy;
(2) the need exists to develop alternative energy sources for public and private consumption in order to reduce our dependence on such sources as petroleum products, natural gas, nuclear and hydroelectric generation; and
(3) technology exists to produce usable energy from solid waste.

EDITORIAL NOTES

REFERENCES IN TEXT

The Clean Air Act, referred to in subsec. (b)(3), is act July 14, 1955, ch. 360, 69 Stat. 322, as amended, which is classified generally to chapter 85 (§7401 et seq.) of this title. For complete classification of this Act to the Code, see Short Title note set out under section 7401 of this title and Tables.

The Water Pollution Control Act, referred to in subsec. (b)(3), probably means act June 30, 1948, ch. 758, 62 Stat. 1155, as amended. The Water Pollution Control Act is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

CODIFICATION

The act, as set out in this chapter, carries a statutory credit showing the sections as having been added by Pub. L. 94–580, without reference to amendments to the act between its original enactment in 1965 and its complete revision in 1976. The act, as originally enacted in 1965, was classified to section 3251 et seq. of this title. For a recapitulation of the provisions of the act as originally enacted, see notes in chapter 39 (§3251 et seq.) of this title where the act was originally set out.

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3251 of this title prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1984—Subsec. (b)(5) to (8). Pub. L. 98–616 added pars. (5) to (7), struck out former par. (5) providing that "hazardous waste presents, in addition to the problems associated with non-hazardous solid waste, special dangers to health and requires a greater degree of regulation than does non-hazardous solid waste; and", redesignated former par. (6) as (8), and substituted a period for the semicolon at end.

STATUTORY NOTES AND RELATED SUBSIDIARIES

SHORT TITLE OF 2012 AMENDMENT

Pub. L. 112–195, §1, Oct. 5, 2012, 126 Stat. 1452, provided that: "This Act [enacting section 6939g of this title] may be cited as the 'Hazardous Waste Electronic Manifest Establishment Act'."

SHORT TITLE OF 2005 AMENDMENT

Pub. L. 109–58, title XV, §1521, Aug. 8, 2005, 119 Stat. 1092, provided that: "This subtitle [subtitle B (§§1521–1533) of title XV of Pub. L. 109–58, enacting sections 6991 to 6991m of this title, amending sections 6991 to 6991f, 6991h, and 6991i of this title, and enacting provisions set out as notes under section 6991b of this title] may be cited as the 'Underground Storage Tank Compliance Act'."

SHORT TITLE OF 1996 AMENDMENT

Pub. L. 104–119, §1, Mar. 26, 1996, 110 Stat. 830, provided that: "This Act [amending sections 6921, 6924, 6925, 6947, and 6949a of this title and enacting provisions set out as a note under section 6949a of this title] may be cited as the 'Land Disposal Program Flexibility Act of 1996'."

SHORT TITLE OF 1992 AMENDMENT

Pub. L. 102–386, title I, §101, Oct. 6, 1992, 106 Stat. 1505, provided that: "This title [enacting sections 6908, 6939c to 6939e, and 6965 of this title, amending sections 6903, 6924, 6927, and 6961 of this title, and enacting provisions set out as notes under sections 6939c and 6961 of this title] may be cited as the 'Federal Facility Compliance Act of 1992'."
SHORT TITLE OF 1988 AMENDMENT

Pub. L. 100–582, §1, Nov. 1, 1988, 102 Stat. 2950, provided that: "This Act [enacting sections 6992 to 6992k of this title and section 3063 of Title 18, Crimes and Criminal Procedure, and amending section 6903 of this title] may be cited as the 'Medical Waste Tracking Act of 1988'."

SHORT TITLE OF 1984 AMENDMENT

Pub. L. 98–616, §1, Nov. 8, 1984, 98 Stat. 3221, provided that: "This Act [enacting sections 6917, 6936 to 6939a, 6949a, 6979a, 6979b, and 6991 to 69911 of this title, amending this section and sections 6902, 6905, 6912, 6915, 6916, 6921 to 6933, 6935, 6941 to 6945, 6948, 6956, 6962, 6972, 6973, 6976, 6982 and 6984 of this title and enacting provisions set out as notes under sections 6905, 6921 and 6926 of this title] may be cited as 'The Hazardous and Solid Waste Amendments of 1984'."

SHORT TITLE OF 1980 AMENDMENTS

Pub. L. 96–482, §1, Oct. 21, 1980, 94 Stat. 2334, provided: "This Act [enacting sections 6933, 6934, 6941a, 6955, and 6956 of this title, amending sections 6903, 6905, 6912, 6916, 6921, 6922, 6924, 6925, 6927 to 6931, 6941 to 6943, 6945, 6946, 6948, 6949, 6952, 6953, 6962, 6963, 6964, 6971, 6973, 6974, 6976, 6979, and 6982 of this title; and enacting and repealing provisions set out as a note under section 6981 of this title] may be cited as the 'Solid Waste Disposal Act Amendments of 1980'."

Pub. L. 96–463, §1, Oct. 15, 1980, 94 Stat. 2055, provided: "This Act [enacting sections 6901a, 6914a and 6932 of this title, amending sections 6903, 6943 and 6948 of this title, and enacting provisions set out as notes under sections 6363 and 6932 of this title] may be cited as the 'Used Oil Recycling Act of 1980'."

SHORT TITLE OF 1976 AMENDMENT

Pub. L. 94–580, §1, Oct. 21, 1976, 90 Stat. 2795, provided that: "This Act [enacting this chapter and provisions set out as notes under this section and section 6981 of this title] may be cited as the 'Resource Conservation and Recovery Act of 1976'."

SHORT TITLE

Pub. L. 89–272, title II, §1001, as added by Pub. L. 94–580, §2, Oct. 21, 1976, 90 Stat. 2795, provided that: "This title (hereinafter in this title referred to as 'this Act'), together with the following table of contents, may be cited as the 'Solid Waste Disposal Act' " [table of contents omitted].

NATIONAL COMMISSION ON MATERIALS POLICY

Pub. L. 91–512, title II, §§201–206, Oct. 26, 1970, 84 Stat. 1234, known as the "National Materials Policy Act of 1970", provided for the establishment of the National Commission on Materials Policy to make a full investigation and study for the purpose of developing a national materials policy to utilize present resources and technology more efficiently and to anticipate the future materials requirements of the Nation and the world, the Commission to submit to the President and Congress a report on its findings and recommendations no later than June 30, 1973, ninety days after the submission of which it should cease to exist.

EXECUTIVE DOCUMENTS

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

§6901a. Congressional findings: used oil recycling

The Congress finds and declares that—

1. used oil is a valuable source of increasingly scarce energy and materials;
2. technology exists to re-refine, reprocess, reclaim, and otherwise recycle used oil;
3. used oil constitutes a threat to public health and the environment when reused or disposed of improperly; and

that, therefore, it is in the national interest to recycle used oil in a manner which does not constitute a threat to public health and the environment and which conserves energy and materials.

EDITORIAL NOTES
CODIFICATION

Section was enacted as part of the Used Oil Recycling Act of 1980, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6902. Objectives and national policy

(a) Objectives

The objectives of this chapter are to promote the protection of health and the environment and to conserve valuable material and energy resources by—

1. providing technical and financial assistance to State and local governments and interstate agencies for the development of solid waste management plans (including resource recovery and resource conservation systems) which will promote improved solid waste management techniques (including more effective organizational arrangements), new and improved methods of collection, separation, and recovery of solid waste, and the environmentally safe disposal of nonrecoverable residues;
2. providing training grants in occupations involving the design, operation, and maintenance of solid waste disposal systems;
3. prohibiting future open dumping on the land and requiring the conversion of existing open dumps to facilities which do not pose a danger to the environment or to health;
4. assuring that hazardous waste management practices are conducted in a manner which protects human health and the environment;
5. requiring that hazardous waste be properly managed in the first instance thereby reducing the need for corrective action at a future date;
6. minimizing the generation of hazardous waste and the land disposal of hazardous waste by encouraging process substitution, materials recovery, properly conducted recycling and reuse, and treatment;
7. establishing a viable Federal-State partnership to carry out the purposes of this chapter and insuring that the Administrator will, in carrying out the provisions of subchapter III of this chapter, give a high priority to assisting and cooperating with States in obtaining full authorization of State programs under subchapter III;
8. providing for the promulgation of guidelines for solid waste collection, transport, separation, recovery, and disposal practices and systems;
9. promoting a national research and development program for improved solid waste management and resource conservation techniques, more effective organizational arrangements, and new and improved methods of collection, separation, and recovery, and recycling of solid wastes and environmentally safe disposal of nonrecoverable residues;
10. promoting the demonstration, construction, and application of solid waste management, resource recovery, and resource conservation systems which preserve and enhance the quality of air, water, and land resources; and
11. establishing a cooperative effort among the Federal, State, and local governments and private enterprise in order to recover valuable materials and energy from solid waste.

(b) National policy

The Congress hereby declares it to be the national policy of the United States that, wherever feasible, the generation of hazardous waste is to be reduced or eliminated as expeditiously as possible. Waste that is nevertheless generated should be treated, stored, or disposed of so as to minimize the present and future threat to human health and the environment.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3251 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

Subsec. (a)(4) to (11). Pub. L. 98–616, §101(b)(2), struck out par. (4) which provided for regulating the treatment, storage, transportation, and disposal of hazardous wastes which have adverse effects on health and the environment, added pars. (4) to (7), and redesignated former pars. (5) to (8) as (8) to (11), respectively.

§6903. Definitions

As used in this chapter:
1. The term "Administrator" means the Administrator of the Environmental Protection Agency.
(2) The term "construction," with respect to any project of construction under this chapter, means (A) the erection or building of new structures and acquisition of lands or interests therein, or the acquisition, replacement, expansion, remodeling, alteration, modernization, or extension of existing structures, and (B) the acquisition and installation of initial equipment of, or required in connection with, new or newly acquired structures or the expanded, remodeled, altered, modernized or extended part of existing structures (including trucks and other motor vehicles, and tractors, cranes, and other machinery) necessary for the proper utilization and operation of the facility after completion of the project; and includes preliminary planning to determine the economic and engineering feasibility and the public health and safety aspects of the project, the engineering, architectural, legal, fiscal, and economic investigations and studies, and any surveys, designs, plans, working drawings, specifications, and other action necessary for the carrying out of the project, and (C) the inspection and supervision of the process of carrying out the project to completion.

(2A) The term "demonstration" means the initial exhibition of a new technology process or practice or a significantly new combination or use of technologies, processes or practices, subsequent to the development stage, for the purpose of proving technological feasibility and cost effectiveness.

(3) The term "disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including ground waters.

(5) The term "hazardous waste" means a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may—
   (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or
   (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

(6) The term "hazardous waste generation" means the act or process of producing hazardous waste.

(7) The term "hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous wastes.

(8) For purposes of Federal financial assistance (other than rural communities assistance), the term "implementation" does not include the acquisition, leasing, construction, or modification of facilities or equipment or the acquisition, leasing, or improvement of land.

(9) The term "intermunicipal agency" means an agency established by two or more municipalities with responsibility for planning or administration of solid waste.

(10) The term "interstate agency" means an agency of two or more municipalities in different States, or an agency established by two or more States, with authority to provide for the management of solid wastes and serving two or more municipalities located in different States.

(11) The term "long-term contract" means, when used in relation to solid waste supply, a contract of sufficient duration to assure the viability of a resource recovery facility (to the extent that such viability depends upon solid waste supply).

(12) The term "manifest" means the form used for identifying the quantity, composition, and the origin, routing, and destination of hazardous waste during its transportation from the point of generation to the point of disposal, treatment, or storage.

(13) The term "municipality" (A) means a city, town, borough, county, parish, district, or other public body created by or pursuant to State law, with responsibility for the planning or administration of solid waste management, or an Indian tribe or authorized tribal organization or Alaska Native village or organization, and (B) includes any rural community or unincorporated town or village or any other public entity for which an application for assistance is made by a State or political subdivision thereof.

(14) The term "open dump" means any facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 6944 of this title and which is not a facility for disposal of hazardous waste.

(15) The term "person" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body and shall include each department, agency, and instrumentality of the United States.

(16) The term "procurement item" means any device, good, substance, material, product, or other item whether real or personal property which is the subject of any purchase, barter, or other exchange made to procure such item.

(17) The term "procuring agency" means any Federal agency, or any State agency or agency of a political subdivision of a State which is using appropriated Federal funds for such procurement, or any person contracting with any such agency with respect to work performed under such contract.

(18) The term "recoverable" refers to the capability and likelihood of being recovered from solid waste for a commercial or industrial use.

(19) The term "recovered material" means waste material and byproducts which have been recovered or diverted from solid waste, but such term does not include those materials and byproducts generated from, and commonly reused within, an original manufacturing process.

(20) The term "recovered resources" means material or energy recovered from solid waste.

(21) The term "resource conservation" means reduction of the amounts of solid waste that are generated, reduction of overall resource consumption, and utilization of recovered resources.

(22) The term "resource recovery" means the recovery of material or energy from solid waste.
(23) The term "resource recovery system" means a solid waste management system which provides for collection, separation, recycling, and recovery of solid wastes, including disposal of nonrecoverable waste residues.

(24) The term "resource recovery facility" means any facility at which solid waste is processed for the purpose of extracting, converting to energy, or otherwise separating and preparing solid waste for reuse.

(25) The term "regional authority" means the authority established or designated under section 6946 of this title.

(26) The term "sanitary landfill" means a facility for the disposal of solid waste which meets the criteria published under section 6944 of this title.

(26A) The term "sludge" means any solid, semisolid or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility or any other such waste having similar characteristics and effects.

(27) The term "solid waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations, and from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under section 1342 of title 33, or source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923) [42 U.S.C. 2011 et seq.].

(28) The term "solid waste management" means the systematic administration of activities which provide for the collection, source separation, storage, transportation, transfer, processing, treatment, and disposal of solid waste.

(29) The term "solid waste management facility" includes—
(A) any resource recovery system or component thereof,
(B) any system, program, or facility for resource conservation, and
(C) any facility for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid wastes, including hazardous wastes, whether such facility is associated with facilities generating such wastes or otherwise.

(30) The terms "solid waste planning", "solid waste management", and "comprehensive planning" include planning or management respecting resource recovery and resource conservation.

(31) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(32) The term "State authority" means the agency established or designated under section 6947 of this title.

(33) The term "storage", when used in connection with hazardous waste, means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous waste.

(34) The term "treatment", when used in connection with hazardous waste, means any method, technique, or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste or so as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage, or reduced in volume. Such term includes any activity or processing designed to change the physical form or chemical composition of hazardous waste so as to render it nonhazardous.

(35) The term "vitrified material" means a raw material, including previously unused copper, aluminum, lead, zinc, iron, or other metal or metal ore, any undeveloped resource that is, or with new technology will become, a source of raw materials.

(36) The term "used oil" means any oil which has been—
(A) refined from crude oil,
(B) used, and
(C) as a result of such use, contaminated by physical or chemical impurities.

(37) The term "recycled oil" means any used oil which is reused, following its original use, for any purpose (including the purpose for which the oil was originally used). Such term includes oil which is re-refined, reclaimed, burned, or reprocessed.

(38) The term "lubricating oil" means the fraction of crude oil which is sold for purposes of reducing friction in any industrial or mechanical device. Such term includes re-refined oil.

(39) The term "re-refined oil" means used oil from which the physical and chemical contaminants acquired through previous use have been removed through a refining process.

(40) Except as otherwise provided in this paragraph, the term "medical waste" means any solid waste which is generated in the diagnosis, treatment, or immunization of human beings or animals, in research pertaining thereto, or in the production or testing of biologicals. Such term does not include any hazardous waste identified or listed under subchapter III or any household waste as defined in regulations under subchapter III.

(41) The term "mixed waste" means waste that contains both hazardous waste and source, special nuclear, or by-product material subject to the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.).

EDITORIAL NOTES

REFERENCES IN TEXT

The Atomic Energy Act of 1954, referred to in pars. (27) and (41), is act Aug. 1, 1946, ch. 724, as added by act Aug. 30, 1954, ch. 1073, §1, 68 Stat. 919, which is classified principally to chapter 23 (§2011 et seq.) of this
title. For complete classification of this Act to the Code, see Short Title note set out under section 2011 of this title and Tables.

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3252 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1992—Par. (15). Pub. L. 102–386, §103, inserted before period at end "and shall include each department, agency, and instrumentality of the United States".

1980—Par. (14). Pub. L. 96–482, §2(a), defined "open dump" to include a facility, substituted requirement that disposal facility or site not be a sanitary landfill meeting section 6944 of this title criteria for prior requirement that disposal site not be a sanitary landfill within meaning of section 6944 of this title, and required that the disposal facility or site not be a facility for disposal of hazardous waste.

Par. (19). Pub. L. 96–482, §2(b), defined "recovered material" to cover byproducts, substituted provision for recovery or diversion of waste material and byproducts from solid waste for prior provision for collection or recovery of material from solid waste, and excluded materials and byproducts generated from and commonly reused within an original manufacturing process.

1978—Par. (8). Pub. L. 95–609, §7(b)(1), struck out provision stating that employees' salaries due pursuant to subchapter IV of this chapter would not be included after Dec. 31, 1979.

Par. (10). Pub. L. 95–609, §7(b)(2), substituted "management" for "disposal".

Par. (29)(C). Pub. L. 95–609, §7(b)(3), substituted "the collection, source separation, storage, transportation, transfer, processing, treatment or disposal" for "the treatment".

CHANGE OF NAME

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

Enforcement functions of Administrator or other official of Environmental Protection Agency related to compliance with resource conservation and recovery permits used under this chapter with respect to pre-construction, construction, and initial operation of transportation system for Canadian and Alaskan natural gas transferred to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, until first anniversary of date of initial operation of Alaska Natural Gas Transportation System, see Reorg. Plan No. 1 of 1979, eff. July 1, 1979, §§102(a), 203(a), 44 F.R. 33663, 33666, 93 Stat. 1373, 1376, set out in the Appendix to Title 5, Government Organization and Employees. Office of Federal Inspector for the Alaska Natural Gas Transportation System abolished and functions and authority vested in Inspector transferred to Secretary of Energy by section 3012(b) of Pub. L. 102–486, set out as an Abolition of Office of Federal Inspector note under section 719e of Title 15, Commerce and Trade. Functions and authority vested in Secretary of Energy subsequently transferred to Federal Coordinator for Alaska Natural Gas Transportation Projects by section 720d(f) of Title 15.

§6904. Governmental cooperation

(a) Interstate cooperation

The provisions of this chapter to be carried out by States may be carried out by interstate agencies and provisions applicable to States may apply to interstate regions where such agencies and regions have been established by the respective States and approved by the Administrator. In any such case, action required to be taken by the Governor of a State, respecting regional designation shall be required to be taken by the Governor of each of the respective States with respect to so much of the interstate region as is within the jurisdiction of that State.

(b) Consent of Congress to compacts
The consent of the Congress is hereby given to two or more States to negotiate and enter into agreements or compacts, not in conflict with any law or treaty of the United States, for—

(1) cooperative effort and mutual assistance for the management of solid waste or hazardous waste (or both) and the enforcement of their respective laws relating thereto, and

(2) the establishment of such agencies, joint or otherwise, as they may deem desirable for making effective such agreements or compacts.

No such agreement or compact shall be binding or obligatory upon any State a party thereto unless it is agreed upon by all parties to the agreement and until it has been approved by the Administrator and the Congress.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6905. Application of chapter and integration with other Acts

(a) Application of chapter

Nothing in this chapter shall be construed to apply to (or to authorize any State, interstate, or local authority to regulate) any activity or substance which is subject to the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Safe Drinking Water Act [42 U.S.C. 300f et seq.], the Marine Protection, Research and Sanctuaries Act of 1972 [16 U.S.C. 1431 et seq., 1447 et seq., 33 U.S.C. 1401 et seq., 2801 et seq.], or the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.] except to the extent that such application (or regulation) is not inconsistent with the requirements of such Acts.

(b) Integration with other Acts

(1) The Administrator shall integrate all provisions of this chapter for purposes of administration and enforcement and shall avoid duplication, to the maximum extent practicable, with the appropriate provisions of the Clean Air Act [42 U.S.C. 7401 et seq.], the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. 136 et seq.], the Safe Drinking Water Act [42 U.S.C. 300f et seq.], the Marine Protection, Research and Sanctuaries Act of 1972 [16 U.S.C. 1431 et seq., 1447 et seq., 33 U.S.C. 1401 et seq., 2801 et seq.], and such other Acts of Congress as grant regulatory authority to the Administrator. Such integration shall be effected only to the extent that it can be done in a manner consistent with the goals and policies expressed in this chapter and in the other acts referred to in this subsection.

(2)(A) As promptly as practicable after November 8, 1984, the Administrator shall submit a report describing—

(i) the current data and information available on emissions of polychlorinated dibenzo-p-dioxins from resource recovery facilities burning municipal solid waste;

(ii) any significant risks to human health posed by these emissions; and

(iii) operating practices appropriate for controlling these emissions.

(B) Based on the report under subparagraph (A) and on any future information on such emissions, the Administrator may publish advisories or guidelines regarding the control of dioxin emissions from such facilities. Nothing in this paragraph shall be construed to preempt or otherwise affect the authority of the Administrator to promulgate any regulations under the Clean Air Act [42 U.S.C. 7401 et seq.] regarding emissions of polychlorinated dibenzo-p-dioxins.

(3) Notwithstanding any other provisions of law, in developing solid waste plans, it is the intention of this chapter that in determining the size of a waste-to-energy facility, adequate provisions shall be given to the present and reasonably anticipated future needs, including those needs created by thorough implementation of section 6952(h) of this title, of the recycling and resource recovery interests within the area encompassed by the solid waste plan.

(c) Integration with the Surface Mining Control and Reclamation Act of 1977

(1) No later than 90 days after October 21, 1980, the Administrator shall review any regulations applicable to the treatment, storage, or disposal of any coal mining wastes or overburden promulgated by the Secretary of the Interior under the Surface Mining and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.]. If the Administrator determines that any requirement of final regulations promulgated under any section of subchapter III relating to mining wastes or overburden is not adequately addressed in such regulations promulgated by the Secretary, the Administrator shall promptly transmit such determination, together with suggested revisions and supporting documentation, to the Secretary.

(2) The Secretary of the Interior shall have exclusive responsibility for carrying out any requirement of subchapter III of this chapter with respect to coal mining wastes or overburden for which a surface coal mining and reclamation permit is issued or approved under the Surface Mining Control and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.]. The Secretary shall, with the concurrence of the Administrator, promulgate such regulations as may be necessary to carry out the purposes of this subsection and shall integrate such regulations with regulations promulgated under the Surface Mining Control and Reclamation Act of 1977.

Transfer of Functions

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6906. Financial disclosure

(a) Statement
Each officer or employee of the Administrator who—

(1) performs any function or duty under this chapter; and

(2) has any known financial interest in any person who applies for or receives financial assistance under this chapter

shall, beginning on February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) Action by Administrator
The Administrator shall—

(1) act within ninety days after October 21, 1976—

(A) to define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provision for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

(2) report to the Congress on June 1, 1978, and of each succeeding calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) Exemption
In the rules prescribed under subsection (b) of this section, the Administrator may identify specific positions within the Environmental Protection Agency which are of a nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Penalty
Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

Statutory Notes and Related Subsidiaries

Termination of Reporting Requirements
For termination, effective May 15, 2000, of reporting provisions in subsec. (b)(2) of this section, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance, and the 14th item on page 164 of House Document No. 103–7.

Executive Documents

Transfer of Functions
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6907. Solid waste management information and guidelines

(a) Guidelines
Within one year of October 21, 1976, and from time to time thereafter, the Administrator shall, in cooperation with appropriate Federal, State, municipal, and intermunicipal agencies, and in consultation with other interested persons, and after public hearings, develop and publish suggested guidelines for solid waste management. Such suggested guidelines shall—

(1) provide a technical and economic description of the level of performance that can be attained by various available solid waste management practices (including operating practices) which provide for the protection of public health and the environment;

(2) not later than two years after October 21, 1976, describe levels of performance, including appropriate methods and degrees of control, that provide at a minimum for (A) protection of public health and welfare; (B) protection of the quality of ground waters and surface waters from leachates; (C) protection of the quality of surface waters from runoff through compliance with effluent limitations under the Federal Water Pollution Control Act, as amended [33 U.S.C. 1251 et seq.]; (D) protection of ambient air quality through compliance with new source performance standards or requirements of air
quality implementation plans under the Clean Air Act, as amended [42 U.S.C. 7401 et seq.]; (E) disease and vector control; (F) safety; and (G) esthetics; and

(3) provide minimum criteria to be used by the States to define those solid waste management practices which constitute the open dumping of solid waste or hazardous waste and are to be prohibited under subchapter IV of this chapter.

Where appropriate, such suggested guidelines also shall include minimum information for use in deciding the adequate location, design, and construction of facilities associated with solid waste management practices, including the consideration of regional, geographic, demographic, and climatic factors.

(b) Notice

The Administrator shall notify the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a reasonable time before publishing any suggested guidelines or proposed regulations under this chapter of the content of such proposed suggested guidelines or proposed regulations under this chapter.

CHANGE OF NAME

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6908. Small town environmental planning

(a) Establishment
The Administrator of the Environmental Protection Agency (hereafter referred to as the "Administrator") shall establish a program to assist small communities in planning and financing environmental facilities. The program shall be known as the "Small Town Environmental Planning Program".

(b) Small Town Environmental Planning Task Force
(1) The Administrator shall establish a Small Town Environmental Planning Task Force which shall be composed of representatives of small towns from different areas of the United States, Federal and State governmental agencies, and public interest groups. The Administrator shall terminate the Task Force not later than 2 years after the establishment of the Task Force.
(2) The Task Force shall—
   (A) identify regulations developed pursuant to Federal environmental laws which pose significant compliance problems for small towns;
   (B) identify means to improve the working relationship between the Environmental Protection Agency (hereafter referred to as the Agency) and small towns;
   (C) review proposed regulations for the protection of the environmental and public health and suggest revisions that could improve the ability of small towns to comply with such regulations;
   (D) identify means to promote regionalization of environmental treatment systems and infrastructure serving small towns to improve the economic condition of such systems and infrastructure; and
   (E) provide such other assistance to the Administrator as the Administrator deems appropriate.

(c) Identification of environmental requirements
(1) Not later than 6 months after October 6, 1992, the Administrator shall publish a list of requirements under Federal environmental and public health statutes (and the regulations developed pursuant to such statutes) applicable to small towns. Not less than annually, the Administrator shall make such additions and deletions to and from the list as the Administrator deems appropriate.
(2) The Administrator shall, as part of the Small Town Environmental Planning Program under this section, implement a program to notify small communities of the regulations identified under paragraph (1) and of future regulations and requirements through methods that the Administrator determines to be effective to provide information to the greatest number of small communities, including any of the following:
   (A) Newspapers and other periodicals.
   (B) Other news media.
   (C) Trade, municipal, and other associations that the Administrator determines to be appropriate.
   (D) Direct mail.

(d) Small Town Ombudsman
The Administrator shall establish and staff an Office of the Small Town Ombudsman. The Office shall provide assistance to small towns in connection with the Small Town Environmental Planning Program and other business with the Agency. Each regional office shall identify a small town contact. The Small Town Ombudsman and the regional contacts also may assist larger communities, but only if first priority is given to providing assistance to small towns.

(e) Multi-media permits
(1) The Administrator shall conduct a study of establishing a multi-media permitting program for small towns. Such evaluation shall include an analysis of—
   (A) environmental benefits and liabilities of a multi-media permitting program;
   (B) the potential of using such a program to coordinate a small town's environmental and public health activities; and
   (C) the legal barriers, if any, to the establishment of such a program.

   (2) Within 3 years after October 6, 1992, the Administrator shall report to Congress on the results of the evaluation performed in accordance with paragraph (1). Included in this report shall be a description of the activities conducted pursuant to subsections (a) through (d).

(f) "Small town" defined
For purposes of this section, the term "small town" means an incorporated or unincorporated community (as defined by the Administrator) with a population of less than 2,500 individuals.

(g) Authorization
There is authorized to be appropriated the sum of $500,000 to implement this section.

EDITORIAL NOTES

CODIFICATION
Section was enacted as part of the Federal Facility Compliance Act of 1992, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6908a. Agreements with Indian tribes

On and after October 21, 1998, the Administrator is authorized to enter into assistance agreements with Federally recognized Indian tribes on such terms and conditions as the Administrator deems appropriate for the development and implementation of programs to manage hazardous waste, and underground storage tanks.

Editorial Notes

Codification

Section was enacted as part of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999, and not as part of the Solid Waste Disposal Act which comprises this chapter.

1 So in original. Probably should not be capitalized.

Subchapter II—Office of Solid Waste; Authorities of the Administrator

§6911. Office of Solid Waste and Interagency Coordinating Committee

(a) Office of Solid Waste

The Administrator shall establish within the Environmental Protection Agency an Office of Solid Waste (hereinafter referred to as the "Office") to be headed by an Assistant Administrator of the Environmental Protection Agency. The duties and responsibilities (other than duties and responsibilities relating to research and development) of the Administrator under this chapter (as modified by applicable reorganization plans) shall be carried out through the Office.

(b) Interagency Coordinating Committee

(1) There is hereby established an Interagency Coordinating Committee on Federal Resource Conservation and Recovery Activities which shall have the responsibility for coordinating all activities dealing with resource conservation and recovery from solid waste carried out by the Environmental Protection Agency, the Department of Energy, the Department of Commerce, and all other Federal agencies which conduct such activities pursuant to this chapter or any other Act. For purposes of this subsection, the term "resource conservation and recovery activities" shall include, but not be limited to, all research, development and demonstration projects on resource conservation or energy, or material, recovery from solid waste, and all technical or financial assistance for State or local planning for, or implementation of, projects related to resource conservation or energy or material, recovery from solid waste. The Committee shall be chaired by the Administrator of the Environmental Protection Agency or such person as the Administrator may designate. Members of the Committee shall include representatives of the Department of Energy, the Department of Commerce, the Department of the Treasury, and each other Federal agency which the Administrator determines to have programs or responsibilities affecting resource conservation or recovery.

(2) The Interagency Coordinating Committee shall include oversight of the implementation of

(A) the May 1979 Memorandum of Understanding on Energy Recovery from Municipal Solid Waste between the Environmental Protection Agency and the Department of Energy;

(C) any subsequent agreements between these agencies or other Federal agencies which address Federal resource recovery or conservation activities.

Editorial Notes

References in Text

CODIFICATION

Subsection (b)(3) of this section, which required the Interagency Coordinating Committee to submit to Congress on March 1 of each year, a five-year action plan for Federal resource conservation or recovery activities, terminated, effective May 15, 2000, pursuant to section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance. See, also, the 2nd item on page 175 of House Document No. 103–7.

AMENDMENTS

Pub. L. 96–482 designated existing provisions as subsec. (a) and added subsec. (b).

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 1980 AMENDMENT

Pub. L. 96–510, title III, §307(c), Dec. 11, 1980, 94 Stat. 2810, provided that: "The amendment made by subsection (a) [amending this section] shall become effective ninety days after the date of the enactment of this Act [Dec. 11, 1980]."

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6911a. Assistant Administrator of Environmental Protection Agency; appointment, etc.

The Assistant Administrator of the Environmental Protection Agency appointed to head the Office of Solid Waste shall be in addition to the five Assistant Administrators of the Environmental Protection Agency provided for in section 1(d) of Reorganization Plan Numbered 3 of 1970 and the additional Assistant Administrator provided by the Toxic Substances Control Act [15 U.S.C. 2601 et seq.], shall be appointed by the President by and with the advice and consent of the Senate. (Pub. L. 96–510, title III, §307(b), Dec. 11, 1980, 94 Stat. 2810; Pub. L. 98–80, §2(c)(2)(B), Aug. 23, 1983, 97 Stat. 485.)

EDITORIAL NOTES

REFERENCES IN TEXT

Reorganization Plan Numbered 3 of 1970, referred to in text, is set out in the Appendix to Title 5, Government Organization and Employees.

The Toxic Substances Control Act, referred to in text, is Pub. L. 94–469, Oct. 11, 1976, 90 Stat. 2003, as amended, which is classified generally to chapter 53 (§2601 et seq.) of Title 15, Commerce and Trade. For complete classification of this Act to the Code, see Short Title note set out under section 2601 of Title 15 and Tables.

CODIFICATION

Section was enacted as part of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and not as part of the Solid Waste Disposal Act which comprises this chapter.

AMENDMENTS

1983—Pub. L. 98–80 struck out ", and shall be compensated at the rate provided for Level IV of the Executive Schedule pay rates under section 5315 of title 5" after "advice and consent of the Senate".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE

Section effective Dec. 11, 1980, see section 9652 of this title.
§6912. Authorities of Administrator

(a) Authorities
In carrying out this chapter, the Administrator is authorized to—

1. prescribe, in consultation with Federal, State, and regional authorities, such regulations as are necessary to carry out his functions under this chapter;
2. consult with or exchange information with other Federal agencies undertaking research, development, demonstration projects, studies, or investigations relating to solid waste;
3. provide technical and financial assistance to States or regional agencies in the development and implementation of solid waste plans and hazardous waste management programs;
4. consult with representatives of science, industry, agriculture, labor, environmental protection and consumer organizations, and other groups, as he deems advisable;
5. utilize the information, facilities, personnel and other resources of Federal agencies, including the National Institute of Standards and Technology and the National Bureau of the Census, on a reimbursable basis, to perform research and analyses and conduct studies and investigations related to resource recovery and conservation and to otherwise carry out the Administrator's functions under this chapter; and
6. to delegate to the Secretary of Transportation the performance of any inspection or enforcement function under this chapter relating to the transportation of hazardous waste where such delegation would avoid unnecessary duplication of activity and would carry out the objectives of this chapter and of chapter 51 of title 49.

(b) Revision of regulations
Each regulation promulgated under this chapter shall be reviewed and, where necessary, revised not less frequently than every three years.

(c) Criminal investigations
In carrying out the provisions of this chapter, the Administrator, and duly-designated agents and employees of the Environmental Protection Agency, are authorized to initiate and conduct investigations under the criminal provisions of this chapter, and to refer the results of these investigations to the Attorney General for prosecution in appropriate cases.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6913. Resource Recovery and Conservation Panels

The Administrator shall provide teams of personnel, including Federal, State, and local employees or contractors (hereinafter referred to as "Resource Conservation and Recovery Panels") to provide Federal agencies, States and local governments upon request with technical assistance on solid waste management, resource recovery, and resource conservation. Such teams shall include technical, marketing, financial, and institutional specialists, and the services of such teams shall be provided without charge to States or local governments.
§6914. Grants for discarded tire disposal

(a) Grants
The Administrator shall make available grants equal to 5 percent of the purchase price of tire shredders (including portable shredders attached to tire collection trucks) to those eligible applicants best meeting criteria promulgated under this section. An eligible applicant may be any private purchaser, public body, or public-private joint venture. Criteria for receiving grants shall be promulgated under this section and shall include the policy to offer any private purchaser the first option to receive a grant, the policy to develop widespread geographic distribution of tire shredding facilities, the need for such facilities within a geographic area, and the projected risk and viability of any such venture. In the case of an application under this section from a public body, the Administrator shall first make a determination that there are no private purchasers interested in making an application before approving a grant to a public body.

(b) Authorization of appropriations
There is authorized to be appropriated $750,000 for each of the fiscal years 1978 and 1979 to carry out this section.

§6914a. Labeling of lubricating oil
For purposes of any provision of law which requires the labeling of commodities, lubricating oil shall be treated as lawfully labeled only if it bears the following statement, prominently displayed:

"DON'T POLLUTE—CONSERVE RESOURCES; RETURN USED OIL TO COLLECTION CENTERS".

§6914b. Degradable plastic ring carriers; definitions

A prior section 2005 of Pub. L. 89–272 was renumbered section 2006 and is classified to section 6915 of this title.
As used in this title—

(1) the term "regulated item" means any plastic ring carrier device that contains at least one hole greater than 1\(\frac{1}{2}\) inches in diameter which is made, used, or designed for the purpose of packaging, transporting, or carrying multipackaged cans or bottles, and which is of a size, shape, design, or type capable, when discarded, of becoming entangled with fish or wildlife; and

(2) the term "naturally degradable material" means a material which, when discarded, will be reduced to environmentally benign subunits under the action of normal environmental forces, such as, among others, biological decomposition, photodegradation, or hydrolysis.
