This title, referred to in text, is title I of Pub. L. 100–556, Oct. 28, 1988, 102 Stat. 2779, which enacted sections 6914b and 6914b–1 of this title, and provisions set out as a note under section 6914b of this title. For complete classification of this title to the Code, see Tables.

CODIFICATION

Section was not enacted as part of the Solid Waste Disposal Act which comprises this chapter.

STATUTORY NOTES AND RELATED SUBSIDIARIES

CONGRESSIONAL FINDINGS

"(1) plastic ring carrier devices have been found in large quantities in the marine environment;

"(2) fish and wildlife have been known to have become entangled in plastic ring carriers;

"(3) nondegradable plastic ring carrier devices can remain intact in the marine environment for decades, posing a threat to fish and wildlife; and

"(4) 16 States have enacted laws requiring that plastic ring carrier devices be made from degradable material in order to reduce litter and to protect fish and wildlife."

§6914b–1. Regulation of plastic ring carriers

Not later than 24 months after October 28, 1988 (unless the Administrator of the Environmental Protection Agency determines that it is not feasible or that the byproducts of degradable regulated items present a greater threat to the environment than nondegradable regulated items), the Administrator of the Environmental Protection Agency shall require, by regulation, that any regulated item intended for use in the United States shall be made of naturally degradable material which, when discarded, decomposes within a period established by such regulation. The period within which decomposition must occur after being discarded shall be the shortest period of time consistent with the intended use of the item and the physical integrity required for such use. Such regulation shall allow a reasonable time for affected parties to come into compliance, including the use of existing inventories.

EDITORIAL NOTES

CODIFICATION

Section was not enacted as part of the Solid Waste Disposal Act which comprises this chapter.

§6915. Annual report

The Administrator shall transmit to the Congress and the President, not later than ninety days after the end of each fiscal year, a comprehensive and detailed report on all activities of the Office during the preceding fiscal year. Each such report shall include—

(1) a statement of specific and detailed objectives for the activities and programs conducted and assisted under this chapter;

(2) statements of the Administrator's conclusions as to the effectiveness of such activities and programs in meeting the stated objectives and the purposes of this chapter, measured through the end of such fiscal year;

(3) a summary of outstanding solid waste problems confronting the Administrator, in order of priority;

(4) recommendations with respect to such legislation which the Administrator deems necessary or desirable to assist in solving problems respecting solid waste;
(5) all other information required to be submitted to the Congress pursuant to any other provision of this chapter; and
(6) the Administrator's plans for activities and programs respecting solid waste during the next fiscal year.

98 Stat. 3276.)

EDITORIAL NOTES

PRIOR PROVISIONS

A prior section 2006 of Pub. L. 89–272 was renumbered section 2007 and is classified to section 6916 of this

AMENDMENTS

1984—Par. (1). Pub. L. 98–616 substituted "detailed" for "detail".

STATUTORY NOTES AND RELATED SUBSIDIARIES

TERMINATION OF REPORTING REQUIREMENTS

For termination, effective May 15, 2000, of provisions of this section relating to transmittal of annual report
to Congress, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31,

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection
Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas
Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for
Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6916. General authorization

(a) General administration

There are authorized to be appropriated to the Administrator for the purpose of carrying out the provisions of this chapter,
$35,000,000 for the fiscal year ending September 30, 1977, $38,000,000 for the fiscal year ending September 30, 1978,
$42,000,000 for the fiscal year ending September 30, 1979, $70,000,000 for the fiscal year ending September 30, 1980,
$80,000,000 for the fiscal year ending September 30, 1981, $80,000,000 for the fiscal year ending September 30, 1982,
$70,000,000 for the fiscal year ending September 30, 1985, $80,000,000 for the fiscal year ending September 30, 1986,
$80,000,000 for the fiscal year ending September 30, 1987, and $80,000,000 for the fiscal year 1988.

(b) Resource Recovery and Conservation Panels

Not less than 20 percent of the amount appropriated under subsection (a), or $5,000,000 per fiscal year, whichever is
less, shall be used only for purposes of Resource Recovery and Conservation Panels established under section 6913 of this
title (including travel expenses incurred by such panels in carrying out their functions under this chapter).

(c) Hazardous waste

Not less than 30 percent of the amount appropriated under subsection (a) shall be used only for purposes of carrying out
subchapter III of this chapter (relating to hazardous waste) other than section 6931 of this title.

(d) State and local support

Not less than 25 percent of the total amount appropriated under this chapter, up to the amount authorized in section
6948(a)(1) of this title, shall be used only for purposes of support to State, regional, local, and interstate agencies in
accordance with subchapter IV of this chapter other than section 6948(a)(2) or 6949 of this title.

(e) Criminal investigators

There is authorized to be appropriated to the Administrator $3,246,000 for the fiscal year 1985, $2,408,300 for the fiscal
year 1986, $2,529,000 for the fiscal year 1987, and $2,529,000 for the fiscal year 1988 to be used—
1. for additional officers or employees of the Environmental Protection Agency authorized by the Administrator to
conduct criminal investigations (to investigate, or supervise the investigation of, any activity for which a criminal penalty is
provided) under this chapter; and
2. for support costs for such additional officers or employees.

(f) Underground storage tanks
(1) There are authorized to be appropriated to the Administrator for the purpose of carrying out the provisions of subchapter IX (relating to regulation of underground storage tanks), $10,000,000 for each of the fiscal years 1985 through 1988.

(2) There is authorized to be appropriated $25,000,000 for each of the fiscal years 1985 through 1988 to be used to make grants to the States for purposes of assisting the States in the development and implementation of approved State underground storage tank release detection, prevention, and correction programs under subchapter IX.

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §2(a), substituted "$80,000,000 for the fiscal year ending September 30, 1982, $70,000,000 for the fiscal year ending September 30, 1985, $80,000,000 for the fiscal year ending September 30, 1986, $80,000,000 for the fiscal year ending September 30, 1987, and $80,000,000 for the fiscal year 1988 for "and $80,000,000 for the fiscal year ending September 30, 1982".

Subsecs. (e), (f). Pub. L. 98–616, §2(i), added subssecs. (e) and (f).

1980—Subsec. (a). Pub. L. 96–482, §31(a), authorized appropriation of $70,000,000, $80,000,000, and $80,000,000 for fiscal years ending Sept. 30, 1980, through 1982, respectively.

Subsec. (b). Pub. L. 96–482, §6(a), inserted ", or $5,000,000 per fiscal year, whichever is less," after "subsection (a)".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6917. Office of Ombudsman

(a) Establishment; functions

The Administrator shall establish an Office of Ombudsman, to be directed by an Ombudsman. It shall be the function of the Office of Ombudsman to receive individual complaints, grievances, requests for information submitted by any person with respect to any program or requirement under this chapter.

(b) Authority to render assistance

The Ombudsman shall render assistance with respect to the complaints, grievances, and requests submitted to the Office of Ombudsman, and shall make appropriate recommendations to the Administrator.

(c) Effect on procedures for grievances, appeals, or administrative matters

The establishment of the Office of Ombudsman shall not affect any procedures for grievances, appeals, or administrative matters in any other provision of this chapter, any other provision of law, or any Federal regulation.

(d) Termination

The Office of the Ombudsman shall cease to exist 4 years after November 8, 1984.

SUBCHAPTER III—HAZARDOUS WASTE MANAGEMENT

§6921. Identification and listing of hazardous waste

(a) Criteria for identification or listing

Not later than eighteen months after October 21, 1976, the Administrator shall, after notice and opportunity for public hearing, and after consultation with appropriate Federal and State agencies, develop and promulgate criteria for identifying the characteristics of hazardous waste, and for listing hazardous waste, which should be subject to the provisions of this
subchapter, taking into account toxicity, persistence, and degradability in nature, potential for accumulation in tissue, and other related factors such as flammability, corrosiveness, and other hazardous characteristics. Such criteria shall be revised from time to time as may be appropriate.

(b) Identification and listing

(1) Not later than eighteen months after October 21, 1976, and after notice and opportunity for public hearing, the Administrator shall promulgate regulations identifying the characteristics of hazardous waste, and listing particular hazardous wastes (within the meaning of section 6903(5) of this title), which shall be subject to the provisions of this subchapter. Such regulations shall be based on the criteria promulgated under subsection (a) and shall be revised from time to time thereafter as may be appropriate. The Administrator, in cooperation with the Agency for Toxic Substances and Disease Registry and the National Toxicology Program, shall also identify or list those hazardous wastes which shall be subject to the provisions of this subchapter solely because of the presence in such wastes of certain constituents (such as identified carcinogens, mutagens, or teratogens) at levels in excess of levels which endanger human health.

(2)(A) Notwithstanding the provisions of paragraph (1) of this subsection, drilling fluids, produced waters, and other wastes associated with the exploration, development, or production of crude oil or natural gas or geothermal energy shall be subject only to existing State or Federal regulatory programs in lieu of this subchapter until at least 24 months after October 21, 1980, and after promulgation of the regulations in accordance with subparagraphs (B) and (C) of this paragraph. It is the sense of the Congress that such State or Federal programs should include, for waste disposal sites which are to be closed, provisions requiring at least the following:

(i) The identification through surveying, platting, or other measures, together with recordation of such information on the public record, so as to assure that the location where such wastes are disposed of can be located in the future; except however, that no such surveying, platting, or other measure identifying the location of a disposal site for drilling fluids and associated wastes shall be required if the distance from the disposal site to the surveyed or platted location to the associated well is less than two hundred lineal feet; and

(ii) A chemical and physical analysis of a produced water and a composition of a drilling fluid suspected to contain a hazardous material, with such information to be acquired prior to closure and to be placed on the public record.

(B) Not later than six months after completion and submission of the study required by section 6982(m) of this title, the Administrator shall, after public hearings and opportunity for comment, determine either to promulgate regulations under this subchapter for drilling fluids, produced waters, and other wastes associated with the exploration, development, or production of crude oil or natural gas or geothermal energy or that such regulations are unwarranted. The Administrator shall publish his decision in the Federal Register accompanied by an explanation and justification of the reasons for it. In making the decision under this paragraph, the Administrator shall utilize the information developed or accumulated pursuant to the study required under section 6982(m) of this title.

(C) The Administrator shall transmit his decision, along with any regulations, if necessary, to both Houses of Congress. Such regulations shall take effect only when authorized by Act of Congress.

(3)(A) Notwithstanding the provisions of paragraph (1) of this subsection, each waste listed below shall, except as provided in subparagraph (B) of this paragraph, be subject only to regulation under other applicable provisions of Federal or State law in lieu of this subchapter until at least six months after the date of submission of the applicable study required to be conducted under subsection (f), (n), (o), or (p) of section 6982 of this title and after promulgation of regulations in accordance with subparagraph (C) of this paragraph:

(i) Fly ash waste, bottom ash waste, slag waste, and flue gas emission control waste generated primarily from the combustion of coal or other fossil fuels.

(ii) Solid waste from the extraction, beneficiation, and processing of ores and minerals, including phosphate rock and overburden from the mining of uranium ore.

(iii) Cement kiln dust waste.

(B)(i) Owners and operators of disposal sites for wastes listed in subparagraph (A) may be required by the Administrator, through regulations prescribed under authority of section 6912 of this title—

(I) as to disposal sites for such wastes which are to be closed, to identify the locations of such sites through surveying, platting, or other measures, together with recordation of such information on the public record, to assure that the locations where such wastes are disposed of are known and can be located in the future, and

(II) to provide chemical and physical analysis and composition of such wastes, based on available information, to be placed on the public record.

(ii)(I) In conducting any study under subsection (f), (n), (o), or (p), of section 6982 of this title, any officer, employee, or authorized representative of the Environmental Protection Agency, duly designated by the Administrator, is authorized, at reasonable times and as reasonably necessary for the purposes of such study, to enter any establishment where any waste subject to such study is generated, stored, treated, disposed of, or transported from; to inspect, take samples, and conduct monitoring and testing; and to have access to and copy records relating to such waste. Each such inspection shall be commenced and completed with reasonable promptness. If the officer, employee, or authorized representative obtains any samples prior to leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and if requested a portion of each such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, or monitoring and testing performed, a copy of the results shall be furnished promptly to the owner, operator, or agent in charge.

(II) Any records, reports, or information obtained from any person under subclause (I) shall be available to the public, except that upon a showing satisfactory to the Administrator by any person that records, reports, or information, or particular
part thereof, to which the Administrator has access under this subparagraph is made public, would divulge information entitled to protection under section 1905 of title 18, the Administrator shall consider such information or particular portion thereof confidential in accordance with the purposes of that section, except that such record, report, document, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this chapter. Any person not subject to the provisions of section 1905 of title 18 who knowingly and willfully divulges or discloses any information entitled to protection under this subparagraph shall, upon conviction, be subject to a fine of not more than $5,000 or to imprisonment not to exceed one year, or both.

(iii) The Administrator may prescribe regulations, under the authority of this chapter, to prevent radiation exposure which presents an unreasonable risk to human health from the use in construction or land reclamation (with or without revegetation) of (I) solid waste from the extraction, beneficiation, and processing of phosphate rock or (II) overburden from the mining of uranium ore.

(iv) Whenever on the basis of any information the Administrator determines that any person is in violation of any requirement of this subparagraph, the Administrator shall give notice to the violator of his failure to comply with such requirement. If such violation extends beyond the thirtieth day after the Administrator's notification, the Administrator may issue an order requiring compliance within a specified time period or the Administrator may commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

(C) Not later than six months after the date of submission of the applicable study required to be conducted under subsection (f), (n), (o), or (p), of section 6982 of this title, the Administrator shall, after public hearings and opportunity for comment, either determine to promulgate regulations under this subchapter for each waste listed in subparagraph (A) of this paragraph or determine that such regulations are unwarranted. The Administrator shall publish his determination, which shall be based on information developed or accumulated pursuant to such study, public hearings, and comment, in the Federal Register accompanied by an explanation and justification of the reasons for it.

(c) Petition by State Governor
   At any time after the date eighteen months after October 21, 1976, the Governor of any State may petition the Administrator to identify or list a material as a hazardous waste. The Administrator shall act upon such petition within ninety days following his receipt thereof and shall notify the Governor of such action. If the Administrator denies such petition because of financial considerations, in providing such notice to the Governor he shall include a statement concerning such considerations.

(d) Small quantity generator waste
   (1) By March 31, 1986, the Administrator shall promulgate standards under sections 6922, 6923, and 6924 of this title for hazardous waste generated by a generator in a total quantity of hazardous waste greater than one hundred kilograms but less than one thousand kilograms during a calendar month.

   (2) The standards referred to in paragraph (1), including standards applicable to the legitimate use, reuse, recycling, and reclamation of such wastes, may vary from the standards applicable to hazardous waste generated by larger quantity generators, but such standards shall be sufficient to protect human health and the environment.

   (3) Not later than two hundred and seventy days after November 8, 1984, any hazardous waste which is part of a total quantity generated by a generator generating greater than one hundred kilograms but less than one thousand kilograms during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied by a copy of the Environmental Protection Agency Uniform Hazardous Waste Manifest form signed by the generator. This form shall contain the following information:

   (A) the name and address of the generator of the waste;

   (B) the United States Department of Transportation description of the waste, including the proper shipping name, hazard class, and identification number (UN/NA), if applicable;

   (C) the number and type of containers;

   (D) the quantity of waste being transported; and

   (E) the name and address of the facility designated to receive the waste.

   If subparagraph (B) is not applicable, in lieu of the description referred to in such subparagraph (B), the form shall contain the Environmental Protection Agency identification number, or a generic description of the waste, or a description of the waste by hazardous waste characteristic. Additional requirements related to the manifest form shall apply only if determined necessary by the Administrator to protect human health and the environment.

   (4) The Administrator's responsibility under this subchapter to protect human health and the environment may require the promulgation of standards under this subchapter for hazardous wastes which are generated by any generator who does not generate more than one hundred kilograms of hazardous waste in a calendar month.

   (5) Until the effective date of standards required to be promulgated under paragraph (1), any hazardous waste identified or listed under this section generated by any generator during any calendar month in a total quantity greater than one hundred kilograms but less than one thousand kilograms, which is not treated, stored, or disposed of at a hazardous waste treatment, storage, or disposal facility with a permit under section 6925 of this title, shall be disposed of only in a facility which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste.

   (6) Standards promulgated as provided in paragraph (1) shall, at a minimum, require that all treatment, storage, or disposal of hazardous wastes generated by generators referred to in paragraph (1) shall occur at a facility with interim status or a permit under this subchapter, except that onsite storage of hazardous waste generated by a generator generating a total quantity of hazardous waste greater than one hundred kilograms, but less than one thousand kilograms during a calendar month, may occur without the requirement of a permit for up to one hundred and eighty days. Such onsite storage
may occur without the requirement of a permit for not more than six thousand kilograms for up to two hundred and seventy days if such generator must ship or haul such waste over two hundred miles.

(7)(A) Nothing in this subsection shall be construed to affect or impair the validity of regulations promulgated by the Secretary of Transportation pursuant to chapter 51 of title 49.

(B) Nothing in this subsection shall be construed to affect, modify, or render invalid any requirements in regulations promulgated prior to January 1, 1983 applicable to any acutely hazardous waste identified or listed under this section which is generated by any generator during any calendar month in a total quantity less than one thousand kilograms.

(8) Effective March 31, 1986, unless the Administrator promulgates standards as provided in paragraph (1) of this subsection prior to such date, hazardous waste generated by any generator in a total quantity greater than one hundred kilograms but less than one thousand kilograms during a calendar month shall be subject to the following requirements until the standards referred to in paragraph (1) of this subsection have become effective:

(A) the notice requirements of paragraph (3) of this subsection shall apply and in addition, the information provided in the form shall include the name of the waste transporters and the name and address of the facility designated to receive the waste;

(B) except in the case of the onsite storage referred to in paragraph (6) of this subsection, the treatment, storage, or disposal of such waste shall occur at a facility with interim status or a permit under this subchapter;

(C) generators of such waste shall file manifest exception reports as required of generators producing greater amounts of hazardous waste per month except that such reports shall be filed by January 31, for any waste shipment occurring in the last half of the preceding calendar year, and by July 31, for any waste shipment occurring in the first half of the calendar year; and

(D) generators of such waste shall retain for three years a copy of the manifest signed by the designated facility that has received the waste.

Nothing in this paragraph shall be construed as a determination of the standards appropriate under paragraph (1).

(9) The last sentence of section 6930(b) of this title shall not apply to regulations promulgated under this subsection.

(e) Specified wastes

(1) Not later than 6 months after November 8, 1984, the Administrator shall, where appropriate, list under subsection (b)(1), additional wastes containing chlorinated dioxins or chlorinated-dibenzoquarins. Not later than one year after November 8, 1984, the Administrator shall, where appropriate, list under subsection (b)(1) wastes containing remaining halogenated dioxins and halogenated-dibenzofurans.

(2) Not later than fifteen months after November 8, 1984, the Administrator shall make a determination of whether or not to list under subsection (b)(1) the following wastes: Chlorinated Aliphatics, Dioxin, Dimethyl Hydrazine, TDI (toluene disocyanate), Carbarnates, Bromacil, Linuron, Organo-bromines, solvents, refining wastes, chlorinated aromatics, dyes and pigments, inorganic chemical industry wastes, lithium batteries, coke byproducts, paint production wastes, and coal slurry pipeline effluent.

(f) Delisting procedures

(1) When evaluating a petition to exclude a waste generated at a particular facility from listing under this section, the Administrator shall consider factors (including additional constituents) other than those for which the waste was listed if the Administrator has a reasonable basis to believe that such additional factors could cause the waste to be a hazardous waste. The Administrator shall provide notice and opportunity for comment on these additional factors before granting or denying such petition.

(2)(A) To the maximum extent practicable the Administrator shall publish in the Federal Register a proposal to grant or deny a petition referred to in paragraph (1) within twelve months after receiving a complete application to exclude a waste generated at a particular facility from being regulated as a hazardous waste and shall grant or deny such a petition within twenty-four months after receiving a complete application.

(B) The temporary granting of such a petition prior to November 8, 1984, without the opportunity for public comment and the full consideration of such comments shall not continue for more than twenty-four months after November 8, 1984. If a final decision to grant or deny such a petition has not been promulgated after notice and opportunity for public comment within the time limit prescribed by the preceding sentence, any such temporary granting of such petition shall cease to be in effect.

(g) EP toxicity

Not later than twenty-eight months after November 8, 1984, the Administrator shall examine the deficiencies of the extraction procedure toxicity characteristic as a predictor of the leaching potential of wastes and make changes in the extraction procedure toxicity characteristic, including changes in the leaching media, as are necessary to insure that it accurately predicts the leaching potential of wastes which pose a threat to human health and the environment when mismanaged.

(h) Additional characteristics

Not later than two years after November 8, 1984, the Administrator shall promulgate regulations under this section identifying additional characteristics of hazardous waste, including measures or indicators of toxicity.

(i) Clarification of household waste exclusion

A resource recovery facility recovering energy from the mass burning of municipal solid waste shall not be deemed to be treating, storing, disposing of, or otherwise managing hazardous wastes for the purposes of regulation under this subchapter, if—

(1) such facility—
(A) receives and burns only—
(i) household waste (from single and multiple dwellings, hotels, motels, and other residential sources), and
(ii) solid waste from commercial or industrial sources that does not contain hazardous waste identified or listed under this section, and

(B) does not accept hazardous wastes identified or listed under this section, and

(2) the owner or operator of such facility has established contractual requirements or other appropriate notification or inspection procedures to assure that hazardous wastes are not received at or burned in such facility.

(j) Methamphetamine production

Not later than every 24 months, the Administrator shall submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report setting forth information collected by the Administrator from law enforcement agencies, States, and other relevant stakeholders that identifies the byproducts of the methamphetamine production process and whether the Administrator considers each of the byproducts to be a hazardous waste pursuant to this section and relevant regulations.

EDITORIAL NOTES

CODIFICATION

AMENDMENTS

1996—Subsec. (d)(5). Pub. L. 104–119 made technical amendment to reference in original act which appears in text as reference to this section.
1984—Subsec. (b)(1). Pub. L. 98–616, §222(b), inserted at end "The Administrator, in cooperation with the Agency for Toxic Substances and Disease Registry and the National Toxicology Program, shall also identify or list those hazardous wastes which shall be subject to the provisions of this subchapter solely because of the presence in such wastes of certain constituents (such as identified carcinogens, mutagens, or teratogens) [sic] at levels in excess of levels which endanger human health."
Subsecs. (e) to (h). Pub. L. 98–616, §222(a), added subsecs. (e) to (h).
1980—Subsec. (b). Pub. L. 96–482 redesignated existing provisions as par. (1) and added pars. (2) and (3).

STATUTORY NOTES AND RELATED SUBSIDIARIES

REGULATION

Pub. L. 99–499, title I, §124(b), Oct. 17, 1986, 100 Stat. 1689, provided that: "Unless the Administrator of the Environmental Protection Agency promulgates regulations under subtitle C of the Solid Waste Disposal Act [42 U.S.C. 6921 et seq.] addressing the extraction of wastes from landfills as part of the process of recovering methane from such landfills, the owner and operator of equipment used to recover methane from a landfill shall not be deemed to be managing, generating, transporting, treating, storing, or disposing of hazardous or liquid wastes within the meaning of that subtitle. If the aqueous or hydrocarbon phase of the condensate or any other waste material removed from the gas recovered from the landfill meets any of the characteristics identified under section 3001 of subtitle C of the Solid Waste Disposal Act [42 U.S.C. 6921], the preceding sentence shall not apply and such condensate phase or other waste material shall be deemed a hazardous waste under that subtitle, and shall be regulated accordingly."

ASH MANAGEMENT AND DISPOSAL

Pub. L. 101–549, title III, §306, Nov. 15, 1990, 104 Stat. 2584, provided that for 2 years after Nov. 15, 1990, ash from solid waste incineration units burning municipal waste would not be regulated by the Administrator of the Environmental Protection Agency pursuant to this section.

SMALL QUANTITY GENERATOR WASTE; INFORM AND EDUCATE; WASTE GENERATORS

25/151
Pub. L. 98–616, title II, §221(b), Nov. 8, 1984, 98 Stat. 3249, directed Administrator of Environmental Protection Agency to undertake activities to inform and educate waste generators of their responsibilities under subsec. (d) of this section during the period within thirty months after Nov. 8, 1984, to help assure compliance.

**STUDY OF EXISTING MANIFEST SYSTEM FOR HAZARDOUS WASTES AS APPLICABLE TO SMALL QUANTITY GENERATORS; SUBMITTAL TO CONGRESS**

Pub. L. 98–616, title II, §221(d), Nov. 8, 1984, 98 Stat. 3250, directed Administrator of Environmental Protection Agency to cause to be studied the existing manifest system for hazardous wastes as it applies to small quantity generators and recommend whether the current system should be retained or whether a new system should be introduced, such study to include an analysis of the cost versus the benefits of the system studied as well as an analysis of the ease of retrieving and collating information and identifying a given substance, with any new proposal to include a list of those standards that are necessary to protect human health and the environment, and with such study to be submitted to Congress not later than Apr. 1, 1987.

**ADMINISTRATIVE BURDENS; SMALL QUANTITY GENERATORS; RETENTION OF CURRENT SYSTEM; REPORT TO CONGRESS**

Pub. L. 98–616, title II, §221(e), Nov. 8, 1984, 98 Stat. 3250, directed Administrator of Environmental Protection Agency, in conjunction with Secretary of Transportation, to prepare and submit to Congress, not later than Apr. 1, 1987, a report on the feasibility of easing the administrative burden on small quantity generators, increasing compliance with statutory and regulatory requirements, and simplifying enforcement efforts through a program of licensing hazardous waste transporters to assume the responsibilities of small quantity generators relating to preparation of manifests and associated recordkeeping and reporting requirements, such report to examine the appropriate licensing requirements under such a program including the need for financial assurances by licensed transporters and to make recommendations on provisions and requirements for such a program including the appropriate division of responsibilities between Department of Transportation and Environmental Protection Administration.

**EDUCATIONAL INSTITUTIONS; ACCUMULATION, STORAGE AND DISPOSAL OF HAZARDOUS WASTES; STUDY**

Pub. L. 98–616, title II, §221(f), Nov. 8, 1984, 98 Stat. 3250, as amended by Pub. L. 107–110, title X, §1076(aa), Jan. 8, 2002, 115 Stat. 2093, directed Administrator of Environmental Protection Agency, in consultation with Secretary of Education, the States, and appropriate educational associations, to conduct a comprehensive study of problems associated with accumulation, storage, and disposal of hazardous wastes from educational institutions, such study to include an investigation of feasibility and availability of environmentally sound methods for treatment, storage, or disposal of hazardous waste from such institutions, taking into account the types and quantities of such waste which are generated by these institutions, and the nonprofit nature of these institutions, and directed Administrator to submit a report to Congress containing the findings of the study not later than Apr. 1, 1987.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1. *So in original. Probably should be "teratogens".*

**§6922. Standards applicable to generators of hazardous waste**

(a) In general

Not later than eighteen months after October 21, 1976, and after notice and opportunity for public hearings and after consultation with appropriate Federal and State agencies, the Administrator shall promulgate regulations establishing such standards, applicable to generators of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. Such standards shall establish requirements respecting—

(1) recordkeeping practices that accurately identify the quantities of such hazardous waste generated, the constituents thereof which are significant in quantity or in potential harm to human health or the environment, and the disposition of such wastes;
(2) labeling practices for any containers used for the storage, transport, or disposal of such hazardous waste such as will identify accurately such waste;

(3) use of appropriate containers for such hazardous waste;

(4) furnishing of information on the general chemical composition of such hazardous waste to persons transporting, treating, storing, or disposing of such wastes;

(5) use of a manifest system and any other reasonable means necessary to assure that all such hazardous waste generated is designated for treatment, storage, or disposal in, and arrives at, treatment, storage, or disposal facilities (other than facilities on the premises where the waste is generated) for which a permit has been issued as provided in this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.]; and

(6) submission of reports to the Administrator (or the State agency in any case in which such agency carries out a permit program pursuant to this subchapter) at least once every two years, setting out—

(A) the quantities and nature of hazardous waste identified or listed under this subchapter that he has generated during the year;

(B) the disposition of all hazardous waste reported under subparagraph (A);

(C) the efforts undertaken during the year to reduce the volume and toxicity of waste generated; and

(D) the changes in volume and toxicity of waste actually achieved during the year in question in comparison with previous years, to the extent such information is available for years prior to November 8, 1984.

(b) Waste minimization

Effective September 1, 1985, the manifest required by subsection (a)(5) shall contain a certification by the generator that—

(1) the generator of the hazardous waste has a program in place to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable; and

(2) the proposed method of treatment, storage, or disposal is that practicable method currently available to the generator which minimizes the present and future threat to human health and the environment.

AMENDMENTS

Subsec. (a)(6). Pub. L. 98–616, §224(a)(2), amended par. (6) generally. Prior to amendment, par. (6) read as follows: "submission of reports to the Administrator (or the State agency in any case in which such agency carries out an authorized permit program pursuant to this subchapter) at such times as the Administrator (or the State agency if appropriate) deems necessary, setting out—

(A) the quantities of hazardous waste identified or listed under this subchapter that he has generated during a particular time period; and

(B) the disposition of all hazardous waste reported under subparagraph (A)."

1980—Par. (5). Pub. L. 96–482 inserted "and any other reasonable means necessary" and ", and arrives at," after "use of a manifest system" and "disposal in", respectively.

Par. (6). Pub. L. 95–609, §7(f)(2), closed the parenthetical after "to this subchapter".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6923. Standards applicable to transporters of hazardous waste

(a) Standards

Not later than eighteen months after October 21, 1976, and after opportunity for public hearings, the Administrator, after consultation with the Secretary of Transportation and the States, shall promulgate regulations establishing such standards, applicable to transporters of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. Such standards shall include but need not be limited to requirements respecting—

(1) recordkeeping concerning such hazardous waste transported, and their source and delivery points;

(2) transportation of such waste only if properly labeled;

(3) compliance with the manifest system referred to in section 6922(5) of this title; and

(4) transportation of all such hazardous waste only to the hazardous waste treatment, storage, or disposal facilities which the shipper designates on the manifest form to be a facility holding a permit issued under this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.].

(b) Coordination with regulations of Secretary of Transportation

In case of any hazardous waste identified or listed under this subchapter which is subject to chapter 51 of title 49, the regulations promulgated by the Administrator under this section shall be consistent with the requirements of such Act and the regulations thereunder. The Administrator is authorized to make recommendations to the Secretary of Transportation respecting the regulations of such hazardous waste under the Hazardous Materials Transportation Act and for addition of materials to be covered by such Act.

(c) Fuel from hazardous waste

Not later than two years after November 8, 1984, and after opportunity for public hearing, the Administrator shall promulgate regulations establishing standards, applicable to transporters of fuel produced (1) from any hazardous waste identified or listed under section 6921 of this title, or (2) from any hazardous waste identified or listed under section 6921 of this title and any other material, as may be necessary to protect human health and the environment. Such standards may include any of the requirements set forth in paragraphs (1) through (4) of subsection (a) as may be appropriate.

CODIFICATION

AMENDMENTS

Subsec. (b). Pub. L. 95–609, §7(g)(2), substituted "Administrator under this section" for "Administrator under this subchapter".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6924. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities

(a) In general
Not later than eighteen months after October 21, 1976, and after opportunity for public hearings and after consultation with appropriate Federal and State agencies, the Administrator shall promulgate regulations establishing such performance standards, applicable to owners and operators of facilities for the treatment, storage, or disposal of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. In establishing such standards the Administrator shall, where appropriate, distinguish in such standards between requirements appropriate for new facilities and for facilities in existence on the date of promulgation of such regulations. Such standards shall include, but need not be limited to, requirements respecting—

1. maintaining records of all hazardous wastes identified or listed under this chapter which is treated, stored, or disposed of, as the case may be, and the manner in which such wastes were treated, stored, or disposed of;
2. satisfactory reporting, monitoring, and inspection and compliance with the manifest system referred to in section 6922(5) of this title;
3. treatment, storage, or disposal of all such waste received by the facility pursuant to such operating methods, techniques, and practices as may be satisfactory to the Administrator;
4. the location, design, and construction of such hazardous waste treatment, disposal, or storage facilities;
5. contingency plans for effective action to minimize unanticipated damage from any treatment, storage, or disposal of any such hazardous waste;
6. the maintenance of operation of such facilities and requiring such additional qualifications as to ownership, continuity of operation, training for personnel, and financial responsibility (including financial responsibility for corrective action) as may be necessary or desirable; and
7. compliance with the requirements of section 6925 of this title respecting permits for treatment, storage, or disposal.

No private entity shall be precluded by reason of criteria established under paragraph (6) from the ownership or operation of facilities providing hazardous waste treatment, storage, or disposal services where such entity can provide assurances of financial responsibility and continuity of operation consistent with the degree and duration of risks associated with the treatment, storage, or disposal of specified hazardous waste.

(b) Salt dome formations, salt bed formations, underground mines and caves

1. Effective on November 8, 1984, the placement of any noncontainerized or bulk liquid hazardous waste in any salt dome formation, salt bed formation, underground mine, or cave is prohibited until such time as—
   A. the Administrator has determined, after notice and opportunity for hearings on the record in the affected areas, that such placement is protective of human health and the environment;
   B. the Administrator has promulgated performance and permitting standards for such facilities under this subchapter, and;
   C. a permit has been issued under section 6925(c) of this title for the facility concerned.

2. Effective on November 8, 1984, the placement of any hazardous waste other than a hazardous waste referred to in paragraph (1) in a salt dome formation, salt bed formation, underground mine, or cave is prohibited until such time as a permit has been issued under section 6925(c) of this title for the facility concerned.

3. No determination made by the Administrator under subsection (d), (e), or (g) of this section regarding any hazardous waste to which such subsection (d), (e), or (g) applies shall affect the prohibition contained in paragraph (1) or (2) of this subsection.

4. Nothing in this subsection shall apply to the Department of Energy Waste Isolation Pilot Project in New Mexico.

(c) Liquids in landfills

1. Effective 6 months after November 8, 1984, the placement of bulk or noncontainerized liquid hazardous waste or free liquids contained in hazardous waste (whether or not absorbents have been added) in any landfill is prohibited. Prior to such date the requirements (as in effect on April 30, 1983) promulgated under this section by the Administrator regarding liquid hazardous waste shall remain in force and effect to the extent such requirements are applicable to the placement of bulk or noncontainerized liquid hazardous waste, or free liquids contained in hazardous waste, in landfills.

2. Not later than fifteen months after November 8, 1984, the Administrator shall promulgate final regulations which—
   A. minimize the disposal of containerized liquid hazardous waste in landfills, and
   B. minimize the presence of free liquids in containerized hazardous waste to be disposed of in landfills.

Such regulations shall also prohibit the disposal in landfills of liquids that have been absorbed in materials that biodegrade or that release liquids when compressed as might occur during routine landfill operations. Prior to the date on which such final regulations take effect, the requirements (as in effect on April 30, 1983) promulgated under this section by the Administrator shall remain in force and effect to the extent such requirements are applicable to the disposal of containerized liquid hazardous waste, or free liquids contained in hazardous waste, in landfills.
(3) Effective twelve months after November 8, 1984, the placement of any liquid which is not a hazardous waste in a
to a landfill for which a permit is required under section 6925(c) of this title or which is operating pursuant to interim status
under section 6925(e) of this title is prohibited unless the owner or operator of such landfill demonstrates to the
Administrator, or the Administrator determines, that—

(A) the only reasonably available alternative to the placement in such landfill is placement in a landfill or unlined surface
imposition, whether or not permitted under section 6925(c) of this title or operating pursuant to interim status under
section 6925(e) of this title, which contains, or may reasonably be anticipated to contain, hazardous waste; and

(B) placement in such owner or operator’s landfill will not present a risk of contamination of any underground source of
drinking water.

As used in subparagraph (B), the term "underground source of drinking water" has the same meaning as provided in
regulations under the Safe Drinking Water Act (title XIV of the Public Health Service Act) [42 U.S.C. 300f et seq.].

(4) No determination made by the Administrator under subsection (d), (e), or (g) of this section regarding any hazardous
waste to which such subsection (d), (e), or (g) applies shall affect the prohibition contained in paragraph (1) of this
subsection.

(d) Prohibitions on land disposal of specified wastes

(1) Effective 32 months after November 8, 1984 (except as provided in subsection (f) with respect to underground
injection into deep injection wells), the land disposal of the hazardous wastes referred to in paragraph (2) is prohibited
unless the Administrator determines the prohibition on one or more methods of land disposal of such waste is not required
in order to protect human health and the environment for as long as the waste remains hazardous, taking into account—

(A) the long-term uncertainties associated with land disposal,

(B) the goal of managing hazardous waste in an appropriate manner in the first instance, and

(C) the persistence, toxicity, mobility, and propensity to bioaccumulate of such hazardous wastes and their hazardous
constituents.

For the purposes of this paragraph, a method of land disposal may not be determined to be protective of human health
and the environment for a hazardous waste referred to in paragraph (2) (other than a hazardous waste which has complied
with the pretreatment regulations promulgated under subsection (m)), unless, upon application by an interested person, it
has been demonstrated to the Administrator, to a reasonable degree of certainty, that there will be no migration of
hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.

(2) Paragraph (1) applies to the following hazardous wastes listed or identified under section 6921 of this title:

(A) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing free cyanides at
concentrations greater than or equal to 1,000 mg/l.

(B) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing the following metals
(or elements) or compounds of these metals (or elements) at concentrations greater than or equal to those specified below:

(i) arsenic and/or compounds (as As) 500 mg/l;

(ii) cadmium and/or compounds (as Cd) 100 mg/l;

(iii) chromium (VI and/or compounds (as Cr VI)) 500 mg/l;

(iv) lead and/or compounds (as Pb) 500 mg/l;

(v) mercury and/or compounds (as Hg) 20 mg/l;

(vi) nickel and/or compounds (as Ni) 134 mg/l;

(vii) selenium and/or compounds (as Se) 100 mg/l; and

(viii) thallium and/or compounds (as Th) 130 mg/l.

(C) Liquid hazardous waste having a pH less than or equal to two (2.0).

(D) Liquid hazardous wastes containing polychlorinated biphenyls at concentrations greater than or equal to 50 ppm.

(E) Hazardous wastes containing halogenated organic compounds in total concentration greater than or equal to 1,000
mg/kg.

When necessary to protect human health and the environment, the Administrator shall substitute more stringent
concentration levels than the levels specified in subparagraphs (A) through (E).

(3) During the period ending forty-eight months after November 8, 1984, this subsection shall not apply to any disposal of
contaminated soil or debris resulting from a response action taken under section 9004 or 9006 of this title or a corrective
action required under this subchapter.

(e) Solvents and dioxins

(1) Effective twenty-four months after November 8, 1984 (except as provided in subsection (f) with respect to underground
injection into deep injection wells), the land disposal of the hazardous wastes referred to in paragraph (2) is prohibited
unless the Administrator determines the prohibition of one or more methods of land disposal of such waste is not required in
order to protect human health and the environment for as long as the waste remains hazardous, taking into account the
factors referred to in subparagraph (A) through (C) of subsection (d)(1). For the purposes of this paragraph, a method of
land disposal may not be determined to be protective of human health and the environment for a hazardous waste referred
to in paragraph (2) (other than a hazardous waste which has complied with the pretreatment regulations promulgated under
subsection (m)), unless upon application by an interested person it has been demonstrated to the Administrator, to a
reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.

(2) The hazardous wastes to which the prohibition under paragraph (1) applies are as follows—

(A) dioxin-containing hazardous wastes numbered F020, F021, F022, and F023 (as referred to in the proposed rule published by the Administrator in the Federal Register for April 4, 1983), and

(B) those hazardous wastes numbered F001, F002, F003, F004, and F005 in regulations promulgated by the Administrator under section 6921 of this title (40 C.F.R. 261.31 (July 1, 1983)), as those regulations are in effect on July 1, 1983.

(3) During the period ending forty-eight months after November 8, 1984, this subsection shall not apply to any disposal of contaminated soil or debris resulting from a response action taken under section 9604 or 9606 of this title or a corrective action required under this subchapter.

(f) Disposal into deep injection wells; specified subsection (d) wastes; solvents and dioxins

(1) Not later than forty-five months after November 8, 1984, the Administrator shall complete a review of the disposal of all hazardous wastes referred to in paragraph (2) of subsection (d) and in paragraph (2) of subsection (e) by underground injection into deep injection wells.

(2) Within forty-five months after November 8, 1984, the Administrator shall make a determination regarding the disposal by underground injection into deep injection wells of the hazardous wastes referred to in paragraph (2) of subsection (d) and the hazardous wastes referred to in paragraph (2) of subsection (e). The Administrator shall promulgate final regulations prohibiting the disposal of such wastes into such wells if it may reasonably be determined that such disposal may not be protective of human health and the environment for as long as the waste remains hazardous, taking into account the factors referred to in subparagraphs (A) through (C) of subsection (d)(1). In promulgating such regulations, the Administrator shall consider each hazardous waste referred to in paragraph (2) of subsection (d) or in paragraph (2) of subsection (e) which is prohibited from disposal into such wells by any State.

(3) If the Administrator fails to make a determination under paragraph (2) for any hazardous waste referred to in paragraph (2) of subsection (d) or in paragraph (2) of subsection (e) within forty-five months after November 8, 1984, such hazardous waste shall be prohibited from disposal into any deep injection well.

(4) As used in this subsection, the term "deep injection well" means a well used for the underground injection of hazardous waste other than a well to which section 6979a(a) 2 of this title applies.

(g) Additional land disposal prohibition determinations

(1) Not later than twenty-four months after November 8, 1984, the Administrator shall submit a schedule to Congress for—

(A) reviewing all hazardous wastes listed (as of November 8, 1984) under section 6921 of this title other than those wastes which are referred to in subsection (d) or (e); and

(B) taking action under paragraph (5) of this subsection with respect to each such hazardous waste.

(2) The Administrator shall base the schedule on a ranking of such listed wastes considering their intrinsic hazard and their volume such that decisions regarding the land disposal of high volume hazardous wastes with high intrinsic hazard shall, to the maximum extent possible, be made by the date forty-five months after November 8, 1984. Decisions regarding low volume hazardous wastes with lower intrinsic hazard shall be made by the date sixty-six months after November 8, 1984.

(3) The preparation and submission of the schedule under this subsection shall not be subject to the Paperwork Reduction Act of 1980. 2 No hearing on the record shall be required for purposes of preparation or submission of the schedule. The schedule shall not be subject to judicial review.

(4) The schedule under this subsection shall require that the Administrator shall promulgate regulations in accordance with paragraph (5) or make a determination under paragraph (5)—

(A) for at least one-third of all hazardous wastes referred to in paragraph (1) by the date forty-five months after November 8, 1984;

(B) for at least two-thirds of all such listed wastes by the date fifty-five months after November 8, 1984; and

(C) for all such listed wastes and for all hazardous wastes identified under section 6921 of this title by the date sixty-six months after November 8, 1984.

In the case of any hazardous waste identified or listed under section 6921 of this title after November 8, 1984, the Administrator shall determine whether such waste shall be prohibited from one or more methods of land disposal in accordance with paragraph (5) within six months after the date of such identification or listing.

(5) Not later than the date specified in the schedule published under this subsection, the Administrator shall promulgate final regulations prohibiting one or more methods of land disposal of the hazardous wastes listed on such schedule except for methods of land disposal which the Administrator determines will be protective of human health and the environment for as long as the waste remains hazardous, taking into account the factors referred to in subparagraphs (A) through (C) of subsection (d)(1). For the purposes of this paragraph, a method of land disposal may not be determined to be protective of human health and the environment (except with respect to a hazardous waste which has complied with the pretreatment regulations promulgated under subsection (m)) unless, upon application by an interested person, it has been demonstrated to the Administrator, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.
(6)(A) If the Administrator fails (by the date forty-five months after November 8, 1984) to promulgate regulations or make a determination under paragraph (5) for any hazardous waste which is included in the first one-third of the schedule published under this subsection, such hazardous waste may be disposed of in a landfill or surface impoundment only if—

(i) such facility is in compliance with the requirements of subsection (o) which are applicable to new facilities (relating to minimum technological requirements); and

(ii) prior to such disposal, the generator has certified to the Administrator that such generator has investigated the availability of treatment capacity and has determined that the use of such landfill or surface impoundment is the only practical alternative to treatment currently available to the generator.

The prohibition contained in this subparagraph shall continue to apply until the Administrator promulgates regulations or makes a determination under paragraph (5) for the waste concerned.

(B) If the Administrator fails (by the date 55 months after November 8, 1984) to promulgate regulations or make a determination under paragraph (5) for any hazardous waste which is included in the first two-thirds of the schedule published under this subsection, such hazardous waste may be disposed of in a landfill or surface impoundment only if—

(i) such facility is in compliance with the requirements of subsection (o) which are applicable to new facilities (relating to minimum technological requirements); and

(ii) prior to such disposal, the generator has certified to the Administrator that such generator has investigated the availability of treatment capacity and has determined that the use of such landfill or surface impoundment is the only practical alternative to treatment currently available to the generator.

The prohibition contained in this subparagraph shall continue to apply until the Administrator promulgates regulations or makes a determination under paragraph (5) for the waste concerned.

(C) If the Administrator fails to promulgate regulations, or make a determination under paragraph (5) for any hazardous waste referred to in paragraph (1) within 66 months after November 8, 1984, such hazardous waste shall be prohibited from land disposal.

(7) Solid waste identified as hazardous based solely on one or more characteristics shall not be subject to this subsection, any prohibitions under subsection (d), (e), or (f), or any requirement promulgated under subsection (m) (other than any applicable specific methods of treatment, as provided in paragraph (8)) if the waste—

(A) is treated in a treatment system that subsequently discharges to waters of the United States pursuant to a permit issued under section 1342 of title 33, treated for the purposes of the pretreatment requirements of section 1317 of title 33, or treated in a zero discharge system that prior to any permanent land disposal, engages in treatment that is equivalent to treatment required under section 1342 of title 33 for discharges to waters of the United States, as determined by the Administrator; and

(B) no longer exhibits a hazardous characteristic prior to management in any land-based solid waste management unit.

(8) Solid waste that otherwise qualifies under paragraph (7) shall nevertheless be required to meet any applicable specific methods of treatment specified for such waste by the Administrator under subsection (m), including those specified in the rule promulgated by the Administrator June 1, 1990, prior to management in a land-based unit as part of a treatment system specified in paragraph (7)(A). No solid waste may qualify under paragraph (7) that would generate toxic gases, vapors, or fumes due to the presence of cyanide when exposed to pH conditions between 2.0 and 12.5.

(9) Solid waste identified as hazardous based on one or more characteristics alone shall not be subject to this subsection, any prohibitions under subsection (d), (e), or (f), or any requirement promulgated under subsection (m) if the waste no longer exhibits a hazardous characteristic at the point of injection in any Class I injection well permitted under section 300h–1 of this title.

(10) Not later than five years after March 26, 1996, the Administrator shall complete a study of hazardous waste managed pursuant to paragraph (7) or (9) to characterize the risks to human health or the environment associated with such management. In conducting this study, the Administrator shall evaluate the extent to which risks are adequately addressed under existing State or Federal programs and whether unaddressed risks could be better addressed under such laws or programs. Upon receipt of additional information or upon completion of such study and as necessary to protect human health and the environment, the Administrator may impose additional requirements under existing Federal laws, including subsection (m)(1), or rely on other State or Federal programs or authorities to address such risks. In promulgating any treatment standards pursuant to subsection (m)(1) under the previous sentence, the Administrator shall take into account the extent to which treatment is occurring in land-based units as part of a treatment system specified in paragraph (7)(A).

(11) Nothing in paragraph (7) or (9) shall be interpreted or applied to restrict any inspection or enforcement authority under the provisions of this chapter.

(h) Variance from land disposal prohibitions

(1) A prohibition in regulations under subsection (d), (e), (f), or (g) shall be effective immediately upon promulgation.

(2) The Administrator may establish an effective date different from the effective date which would otherwise apply under subsection (d), (e), (f), or (g) with respect to a specific hazardous waste which is subject to a prohibition under subsection (d), (e), (f), or (g) or under regulations under subsection (d), (e), (f), or (g) of this section. Any such other effective date shall be established on the basis of the earliest date on which adequate alternative treatment, recovery, or disposal capacity which protects human health and the environment will be available. Any such other effective date shall in no event be later than 2 years after the effective date of the prohibition which would otherwise apply under subsection (d), (e), (f), or (g).

(3) The Administrator, after notice and opportunity for comment and after consultation with appropriate State agencies in all affected States, may on a case-by-case basis grant an extension of the effective date which would otherwise apply under subsection (d), (e), (f), or (g) under paragraph (2) for up to one year, where the applicant demonstrates that there is a
binding contractual commitment to construct or otherwise provide such alternative capacity but due to circumstances beyond the control of such applicant such alternative capacity cannot reasonably be made available by such effective date. Such extension shall be renewable once for no more than one additional year.

(4) Whenever another effective date (hereinafter referred to as a "variance") is established under paragraph (2), or an extension is granted under paragraph (3), with respect to any hazardous waste, during the period for which such variance or extension is in effect, such hazardous waste may be disposed of in a landfill or surface impoundment only if such facility is in compliance with the requirements of subsection (o).

(i) Publication of determination

If the Administrator determines that a method of land disposal will be protective of human health and the environment, he shall promptly publish in the Federal Register notice of such determination, together with an explanation of the basis for such determination.

(j) Storage of hazardous waste prohibited from land disposal

In the case of any hazardous waste which is prohibited from one or more methods of land disposal under this section (or under regulations promulgated by the Administrator under any provision of this section) the storage of such hazardous waste is prohibited unless such storage is solely for the purpose of the accumulation of such quantities of hazardous waste as are necessary to facilitate proper recovery, treatment or disposal.

(k) "Land disposal" defined

For the purposes of this section, the term "land disposal", when used with respect to a specified hazardous waste, shall be deemed to include, but not be limited to, any placement of such hazardous waste in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, or underground mine or cave.

(l) Ban on dust suppression

The use of waste or used oil or other material, which is contaminated or mixed with dioxin or any other hazardous waste identified or listed under section 6921 of this title (other than a waste identified solely on the basis of ignitability), for dust suppression or road treatment is prohibited.

(m) Treatment standards for wastes subject to land disposal prohibition

(1) Simultaneously with the promulgation of regulations under subsection (d), (e), (f), or (g) prohibiting one or more methods of land disposal of a particular hazardous waste, and as appropriate thereafter, the Administrator shall, after notice and an opportunity for hearings and after consultation with appropriate Federal and State agencies, promulgate regulations specifying those levels or methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and long-term threats to human health and the environment are minimized.

(2) If such hazardous waste has been treated to the level or by a method specified in regulations promulgated under this subsection, such waste or residue thereof shall not be subject to any prohibition promulgated under subsection (d), (e), (f), or (g) and may be disposed of in a land disposal facility which meets the requirements of this subchapter. Any regulation promulgated under this subsection for a particular hazardous waste shall become effective on the same date as any applicable prohibition promulgated under subsection (d), (e), (f), or (g).

(n) Air emissions

Not later than thirty months after November 8, 1984, the Administrator shall promulgate such regulations for the monitoring and control of air emissions at hazardous waste treatment, storage, and disposal facilities, including but not limited to open tanks, surface impoundments, and landfills, as may be necessary to protect human health and the environment.

(o) Minimum technological requirements

(1) The regulations under subsection (a) of this section shall be revised from time to time to take into account improvements in the technology of control and measurement. At a minimum, such regulations shall require, and a permit issued pursuant to section 6925(c) of this title after November 8, 1984, by the Administrator or a State shall require—

(A) for each new landfill or surface impoundment, each new landfill or surface impoundment unit at an existing facility, each replacement of an existing landfill or surface impoundment unit, and each lateral expansion of an existing landfill or surface impoundment unit, for which an application for a final determination regarding issuance of a permit under section 6925(c) of this title is received after November 8, 1984—

(i) the installation of two or more liners and a leachate collection system above (in the case of a landfill) and between such liners; and

(ii) ground water monitoring; and

(B) for each incinerator which receives a permit under section 6925(c) of this title after November 8, 1984, the attainment of the minimum destruction and removal efficiency required by regulations in effect on June 24, 1982.

The requirements of this paragraph shall apply with respect to all waste received after the issuance of the permit.

(2) Paragraph (1)(A)(i) shall not apply if the owner or operator demonstrates to the Administrator, and the Administrator finds for such landfill or surface impoundment, that alternative design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents into the ground water or surface water at least as effectively as such liners and leachate collection systems.

(3) The double-liner requirement set forth in paragraph (1)(A)(i) may be waived by the Administrator for any monofill, if—
(A) such monofil contains only hazardous wastes from foundry furnace emission controls or metal casting molding sand,
(B) such wastes do not contain constituents which would render the wastes hazardous for reasons other than the Extraction Procedure ("EP") toxicity characteristics set forth in regulations under this subchapter, and
(C) such monofil meets the same requirements as are applicable in the case of a waiver under section 6925(j)(2) or (4) of this title.

(4)(A) Not later than thirty months after November 8, 1984, the Administrator shall promulgate standards requiring that new landfill units, surface impoundment units, waste piles, underground tanks and land treatment units for the storage, treatment, or disposal of hazardous waste identified or listed under section 6921 of this title shall be required to utilize approved leak detection systems.

(B) For the purposes of subparagraph (A)—
   (i) the term "approved leak detection system" means a system or technology which the Administrator determines to be capable of detecting leaks of hazardous constituents at the earliest practicable time; and
   (ii) the term "new units" means units on which construction commences after the date of promulgation of regulations under this paragraph.

(5)(A) The Administrator shall promulgate regulations or issue guidance documents implementing the requirements of paragraph (1)(A) within two years after November 8, 1984.

(B) Until the effective date of such regulations or guidance documents, the requirement for the installation of two or more liners may be satisfied by the installation of a top liner designed, operated, and constructed of materials to prevent the migration of any constituent into such liner during the period such facility remains in operation (including any post-closure monitoring period), and a lower liner designed, operated 3 and constructed to prevent the migration of any constituent through such liner during such period. For the purpose of the preceding sentence, a lower liner shall be deemed to satisfy such requirement if it is constructed of at least a 3-foot thick layer of recompacted clay or other natural material with a permeability of no more than $1 \times 10^{-7}$ centimeter per second.

(6) Any permit under section 6925 of this title which is issued for a landfill located within the State of Alabama shall require the installation of two or more liners and a leachate collection system above and between such liners, notwithstanding any other provision of this chapter.

(7) In addition to the requirements set forth in this subsection, the regulations referred to in paragraph (1) shall specify criteria for the acceptable location of new and existing treatment, storage, or disposal facilities as necessary to protect human health and the environment. Within 18 months after November 8, 1984, the Administrator shall publish guidance criteria identifying areas of vulnerable hydrogeology.

(p) Ground water monitoring

The standards under this section concerning ground water monitoring which are applicable to surface impoundments, waste piles, land treatment units, and landfills shall apply to such a facility whether or not—

1. the facility is located above the seasonal high water table;
2. two liners and a leachate collection system have been installed at the facility; or
3. the owner or operator inspects the liner (or liners) which has been installed at the facility.

This subsection shall not be construed to affect other exemptions or waivers from such standards provided in regulations in effect on November 8, 1984, or as may be provided in revisions to those regulations, to the extent consistent with this subsection. The Administrator is authorized on a case-by-case basis to exempt from ground water monitoring requirements under this section (including subsection (o)) any engineered structure which the Administrator finds does not receive or contain liquid waste (or waste containing free liquids), is designed and operated to exclude liquid from precipitation or other runoff, utilizes multiple leak detection systems within the outer layer of containment, and provides for continuing operation and maintenance of those leak detection systems during the operating period, closure, and the period required for post-closure monitoring and for which the Administrator concludes on the basis of such findings that there is a reasonable certainty hazardous constituents will not migrate beyond the outer layer of containment prior to the end of the period required for post-closure monitoring.

(q) Hazardous waste used as fuel

1. Not later than two years after November 8, 1984, and after notice and opportunity for public hearing, the Administrator shall promulgate regulations establishing such—
   (A) standards applicable to the owners and operators of facilities which produce a fuel—
      (i) from any hazardous waste identified or listed under section 6921 of this title, or
      (ii) from any hazardous waste identified or listed under section 6921 of this title and any other material;
   (B) standards applicable to the owners and operators of facilities which burn, for purposes of energy recovery, any fuel produced as provided in subparagraph (A) or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title; and
   (C) standards applicable to any person who distributes or markets any fuel which is produced as provided in subparagraph (A) or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title;
as may be necessary to protect human health and the environment. Such standards may include any of the requirements set forth in paragraphs (1) through (7) of subsection (a) as may be appropriate. Nothing in this subsection shall be construed to affect or impair the provisions of section 6921(b)(3) of this title. For purposes of this subsection, the term "hazardous waste listed under section 6921 of this title" includes any commercial chemical product which is listed under section 6921 of this title and which, in lieu of its original intended use, is (i) produced for use as (or as a component of) a fuel, (ii) distributed for use as a fuel, or (iii) burned as a fuel.

(2) (A) This subsection, subsection (r), and subsection (s) shall not apply to petroleum refinery wastes containing oil which are converted into petroleum coke at the same facility at which such wastes were generated, unless the resulting coke product would exceed one or more characteristics by which a substance would be identified as a hazardous waste under section 6921 of this title.
(B) The Administrator may exempt from the requirements of this subsection, subsection (r), or subsection (s) facilities which burn de minimis quantities of hazardous waste as fuel, as defined by the Administrator, if the wastes are burned at the same facility at which such wastes are generated; the waste is burned to recover useful energy, as determined by the Administrator on the basis of the design and operating characteristics of the facility and the heating value and other characteristics of the waste; and the waste is burned in a type of device determined by the Administrator to be designed and operated at a destruction and removal efficiency sufficient such that protection of human health and environment is assured.
(C) (i) After November 8, 1984, and until standards are promulgated and in effect under paragraph (2) of this subsection, no fuel which contains any hazardous waste may be burned in any cement kiln which is located within the boundaries of any incorporated municipality with a population greater than five hundred thousand (based on the most recent census statistics) unless such kiln fully complies with regulations (as in effect on November 8, 1984) under this subchapter which are applicable to incinerators.
(ii) Any person who knowingly violates the prohibition contained in clause (i) shall be deemed to have violated section 6928(d)(2) of this title.

(r) Labeling

(1) Notwithstanding any other provision of law, until such time as the Administrator promulgates standards under subsection (q) specifically superseding this requirement, it shall be unlawful for any person who is required to file a notification in accordance with paragraph (1) or (3) of section 6930 of this title to distribute or market any fuel which is produced from any hazardous waste identified or listed under section 6921 of this title, or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title if the invoice or the bill of sale fails—
(A) to bear the following statement: "WARNING: THIS FUEL CONTAINS HAZARDOUS WASTES", and
(B) to list the hazardous wastes contained therein.

Beginning ninety days after November 8, 1984, such statement shall be located in a conspicuous place on every such invoice or bill of sale and shall appear in conspicuous and legible type in contrast by typography, layouts, or color with other printed matter on the invoice or bill of sale.
(2) Unless the Administrator determines otherwise as may be necessary to protect human health and the environment, this subsection shall not apply to fuels produced from petroleum refining waste containing oil if—
(A) such materials are generated and reinserted onsite into the refining process;
(B) contaminants are removed; and
(C) such refining waste containing oil is converted along with normal process streams into petroleum-derived fuel products at a facility at which crude oil is refined into petroleum products and which is classified as a number SIC 2911 facility under the Office of Management and Budget Standard Industrial Classification Manual.

(3) Unless the Administrator determines otherwise as may be necessary to protect human health and the environment, this subsection shall not apply to fuels produced from oily materials, resulting from normal petroleum refining, production and transportation practices, if (A) contaminants are removed; and (B) such oily materials are converted along with normal process streams into petroleum-derived fuel products at a facility at which crude oil is refined into petroleum products and which is classified as a number SIC 2911 facility under the Office of Management and Budget Standard Industrial Classification Manual.

(s) Recordkeeping

Not later than fifteen months after November 8, 1984, the Administrator shall promulgate regulations requiring that any person who is required to file a notification in accordance with subparagraph (1), (2), or (3), of section 6930(a) of this title shall maintain such records regarding fuel blending, distribution, or use as may be necessary to protect human health and the environment.

(t) Financial responsibility provisions

(1) Financial responsibility required by subsection (a) of this section may be established in accordance with regulations promulgated by the Administrator by any one, or any combination, of the following: insurance, guarantee, surety bond, letter of credit, or qualification as a self-insurer. In promulgating requirements under this section, the Administrator is authorized to specify policy or other contractual terms, conditions, or defenses which are necessary or are unacceptable in establishing such evidence of financial responsibility in order to effectuate the purposes of this chapter.
(2) In any case where the owner or operator is in bankruptcy, reorganization, or arrangement pursuant to the Federal Bankruptcy Code or where (with reasonable diligence) jurisdiction in any State court or any Federal Court cannot be obtained over an owner or operator likely to be solvent at the time of judgment, any claim arising from conduct for which evidence of financial responsibility must be provided under this section may be asserted directly against the guarantor providing such evidence of financial responsibility. In the case of any action pursuant to this subsection, such guarantor shall
be entitled to invoke all rights and defenses which would have been available to the owner or operator if any action had been brought against the owner or operator by the claimant and which would have been available to the guarantor if an action had been brought against the guarantor by the owner or operator.

(3) The total liability of any guarantor shall be limited to the aggregate amount which the guarantor has provided as evidence of financial responsibility to the owner or operator under this chapter. Nothing in this subsection shall be construed to limit any other State or Federal statutory, contractual or common law liability of a guarantor to its owner or operator including, but not limited to, the liability of such guarantor for bad faith either in negotiating or in failing to negotiate the settlement of any claim. Nothing in this subsection shall be construed to diminish the liability of any person under section 9607 or 9611 of this title or other applicable law.

(4) For the purpose of this subsection, the term "guarantor" means any person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator under this section.

(u) Continuing releases at permitted facilities

Standards promulgated under this section shall require, and a permit issued after November 8, 1984, by the Administrator or a State shall require, corrective action for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage, or disposal facility seeking a permit under this subchapter, regardless of the time at which waste was placed in such unit. Permits issued under section 6925 of this title shall contain schedules of compliance for such corrective action (where such corrective action cannot be completed prior to issuance of the permit) and assurances of financial responsibility for completing such corrective action.

(v) Corrective action beyond facility boundary

As promptly as practicable after November 8, 1984, the Administrator shall amend the standards under this section regarding corrective action required at facilities for the treatment, storage, or disposal, of hazardous waste listed or identified under section 6921 of this title to require that corrective action be taken beyond the facility boundary where necessary to protect human health and the environment unless the owner or operator of the facility concerned demonstrates to the satisfaction of the Administrator that, despite the owner or operator’s best efforts, the owner or operator was unable to obtain the necessary permission to undertake such action. Such regulations shall take effect immediately upon promulgation, notwithstanding section 6930(b) of this title, and shall apply to—

1. all facilities operating under permits issued under subsection (c), and

2. all landfills, surface impoundments, and waste pile units (including any new units, replacements of existing units, or lateral expansions of existing units) which receive hazardous waste after July 26, 1982.

Pending promulgation of such regulations, the Administrator shall issue corrective action orders for facilities referred to in paragraphs (1) and (2), on a case-by-case basis, consistent with the purposes of this subsection.

(w) Underground tanks

Not later than March 1, 1985, the Administrator shall promulgate final permitting standards under this section for underground tanks that cannot be entered for inspection. Within forty-eight months after November 8, 1984, such standards shall be modified, if necessary, to cover at a minimum all requirements and standards described in section 6991b of this title.

(x) Mining and other special wastes

If (1) solid waste from the extraction, beneficiation or processing of ores and minerals, including phosphate rock and overburden from the mining of uranium, (2) fly ash waste, bottom ash waste, slag waste, and flue gas emission control waste generated primarily from the combustion of coal or other fossil fuels, or (3) cement kiln dust waste, is subject to regulation under this subchapter, the Administrator is authorized to modify the requirements of subsections (c), (d), (e), (f), (g), (o), and (u) and section 6925(j) of this title, in the case of landfills or surface impoundments receiving such solid waste, to take into account the special characteristics of such wastes, the practical difficulties associated with implementation of such requirements, and site-specific characteristics, including but not limited to the climate, geology, hydrology and soil chemistry at the site, so long as such modified requirements assure protection of human health and the environment.

(y) Munitions

(1) Not later than 6 months after October 6, 1992, the Administrator shall propose, after consulting with the Secretary of Defense and appropriate State officials, regulations identifying when military munitions become hazardous waste for purposes of this subchapter and providing for the safe transportation and storage of such waste. Not later than 24 months after October 6, 1992, and after notice and opportunity for comment, the Administrator shall promulgate such regulations. Any such regulations shall assure protection of human health and the environment.

(2) For purposes of this subsection, the term "military munitions" includes chemical and conventional munitions.

EDITORIAL NOTES

REFERENCES IN TEXT

The Safe Drinking Water Act, referred to in subsec. (c)(3), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. For complete classification of this Act to the Code see Short Title note set out under section 201 of this title and Tables.

The Federal Bankruptcy Code, referred to in subsec. (t)(2), probably means a reference to Title 11, Bankruptcy.

AMENDMENTS

1996—Subsec. (g)(5). Pub. L. 104–119, §4(3), substituted "subparagraphs (A) through (C)" for "subparagraph (A) through (C)".

Subsec. (g)(7) to (11). Pub. L. 104–119, §2, added pars. (7) to (11).

Subsec. (a). Pub. L. 98–616, §208, inserted "(including financial responsibility for corrective action)".

Subsec. (b) to (n). Pub. L. 98–616, §201(a), added subsecs. (b) to (n).

Subsec. (q) to (s). Pub. L. 98–616, §204(b), added subsecs. (q) to (s).

Subsec. (v), (w). Pub. L. 98–616, §207, added subsecs. (v) and (w).

1980—Pub. L. 96–482 required standards regulations to reflect distinction in requirements appropriate for new facilities and for facilities in existence on date of promulgation of the regulations.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 See References in Text note below.

2 See References in Text note below.

3 So in original. Probably should be followed by a comma.

§6925. Permits for treatment, storage, or disposal of hazardous waste

(a) Permit requirements

Not later than eighteen months after October 21, 1976, the Administrator shall promulgate regulations requiring each person owning or operating an existing facility or planning to construct a new facility for the treatment, storage, or disposal of hazardous waste identified or listed under this subchapter to have a permit issued pursuant to this section. Such regulations shall take effect on the date provided in section 6930 of this title and upon and after such date the treatment, storage, or disposal of any such hazardous waste and the construction of any new facility for the treatment, storage, or disposal of any such hazardous waste is prohibited except in accordance with such a permit. No permit shall be required under this section.
in order to construct a facility if such facility is constructed pursuant to an approval issued by the Administrator under section 2605(e) of title 15 for the incineration of polychlorinated biphenyls and any person owning or operating such a facility may, at any time after operation or construction of such facility has begun, file an application for a permit pursuant to this section authorizing such facility to incinerate hazardous waste identified or listed under this subchapter.

(b) Requirements of permit application

Each application for a permit under this section shall contain such information as may be required under regulations promulgated by the Administrator, including information respecting—

1. estimates with respect to the composition, quantifies, and concentrations of any hazardous waste identified or listed under this subchapter, or combinations of any such hazardous waste and any other solid waste, proposed to be disposed of, treated, transported, or stored, and the time, frequency, or rate of which such waste is proposed to be disposed of, treated, transported, or stored;

2. the site at which such hazardous waste or the products of treatment of such hazardous waste will be disposed of, treated, transported to, or stored.

(c) Permit issuance

1. Upon a determination by the Administrator (or a State, if applicable), of compliance by a facility for which a permit is applied for under this section with the requirements of this section and section 6924 of this title, the Administrator (or the State) shall issue a permit for such facilities. In the event permit applicants propose modification of their facilities, or in the event the Administrator (or the State) determines that modifications are necessary to conform to the requirements under this section and section 6924 of this title, the permit shall specify the time allowed to complete the modifications.

2. (A)(i) Not later than the date four years after November 8, 1984, in the case of each application under this subsection for a permit for a land disposal facility which was submitted before such date, the Administrator shall issue a final permit pursuant to such application or issue a final denial of such application.

   (ii) Not later than the date five years after November 8, 1984, in the case of each application for a permit under this subsection for an incinerator facility which was submitted before such date, the Administrator shall issue a final permit pursuant to such application or issue a final denial of such application.

(B) Not later than the date eight years after November 8, 1984, in the case of each application for a permit under this subsection for any facility (other than a facility referred to in subparagraph (A)) which was submitted before such date, the Administrator shall issue a final permit pursuant to such application or issue a final denial of such application.

(C) The time periods specified in this paragraph shall also apply in the case of any State which is administering an authorized hazardous waste program under section 6926 of this title. Interim status under subsection (e) shall terminate for each facility referred to in subparagraph (A)(ii) or (B) on the expiration of the five- or eight-year period referred to in subparagraph (A) or (B), whichever is applicable, unless the owner or operator of the facility applies for a final determination regarding the issuance of a permit under this subsection within—

   (i) two years after November 8, 1984 (in the case of a facility referred to in subparagraph (A)(ii)), or

   (ii) four years after November 8, 1984 (in the case of a facility referred to in subparagraph (B)).

(3) Any permit under this section shall be for a fixed term, not to exceed 10 years in the case of any land disposal facility, storage facility, or incinerator or other treatment facility. Each permit for a land disposal facility shall be reviewed five years after date of issuance or reissuance and shall be modified as necessary to assure that the facility continues to comply with the currently applicable requirements of this section and section 6924 of this title. Nothing in this subsection shall preclude the Administrator from reviewing and modifying a permit at any time during its term. Review of any application for a permit renewal shall consider improvements in the state of control and measurement technology as well as changes in applicable regulations. Each permit issued under this section shall contain such terms and conditions as the Administrator (or the State) determines necessary to protect human health and the environment.

(d) Permit revocation

Upon a determination by the Administrator (or by a State, in the case of a State having an authorized hazardous waste program under section 6926 of this title) of noncompliance by a facility having a permit under this chapter with the requirements of this section or section 6924 of this title, the Administrator (or State, in the case of a State having an authorized hazardous waste program under section 6926 of this title) shall revoke such permit.

(e) Interim status

1. Any person who—

   (A) owns or operates a facility required to have a permit under this section which facility—

      (i) was in existence on November 19, 1980, or

      (ii) is in existence on the effective date of statutory or regulatory changes under this chapter that render the facility subject to the requirement to have a permit under this section,

   (B) has complied with the requirements of section 6930(a) of this title, and

   (C) has made an application for a permit under this section,

shall be treated as having been issued such permit until such time as final administrative disposition of such application is made, unless the Administrator or other plaintiff proves that final administrative disposition of such application has not been made because of the failure of the applicant to furnish information reasonably required or requested in order to process the application. This paragraph shall not apply to any facility which has been previously denied a permit under this section or if authority to operate the facility under this section has been previously terminated.
(2) In the case of each land disposal facility which has been granted interim status under this subsection before November 8, 1984, interim status shall terminate on the date twelve months after November 8, 1984, unless the owner or operator of such facility—

(A) applies for a final determination regarding the issuance of a permit under subsection (c) for such facility before the date twelve months after November 8, 1984; and

(B) certifies that such facility is in compliance with all applicable groundwater monitoring and financial responsibility requirements.

(3) In the case of each land disposal facility which is in existence on the effective date of statutory or regulatory changes under this chapter that render the facility subject to the requirement to have a permit under this section and which is granted interim status under this subsection, interim status shall terminate on the date twelve months after the date on which the facility first becomes subject to such permit requirement unless the owner or operator of such facility—

(A) applies for a final determination regarding the issuance of a permit under subsection (c) for such facility before the date twelve months after the date on which the facility first becomes subject to such permit requirement; and

(B) certifies that such facility is in compliance with all applicable groundwater monitoring and financial responsibility requirements.

(f) Coal mining wastes and reclamation permits

Notwithstanding subsection (a) through (e) of this section, any surface coal mining and reclamation permit covering any coal mining wastes or overburden which has been issued or approved under the Surface Mining Control and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.] shall be deemed to be a permit issued pursuant to this section with respect to the treatment, storage, or disposal of such wastes or overburden. Regulations promulgated by the Administrator under this subchapter shall not be applicable to treatment, storage, or disposal of coal mining wastes and overburden which are covered by such a permit.

(g) Research, development, and demonstration permits

(1) The Administrator may issue a research, development, and demonstration permit for any hazardous waste treatment facility which proposes to utilize an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under this subchapter. Any such permit shall include such terms and conditions as will assure protection of human health and the environment. Such permits—

(A) shall provide for the construction of such facilities, as necessary, and for operation of the facility for not longer than one year (unless renewed as provided in paragraph (4)); and

(B) shall provide for the receipt and treatment by the facility of only those types and quantities of hazardous waste which the Administrator deems necessary for purposes of determining the efficacy and performance capabilities of the technology or process and the effects of such technology or process on human health and the environment, and

(C) shall include such requirements as the Administrator deems necessary to protect human health and the environment (including, but not limited to, requirements regarding monitoring, operation, insurance or bonding, financial responsibility, closure, and remedial action), and such requirements as the Administrator deems necessary regarding testing and providing of information to the Administrator with respect to the operation of the facility.

The Administrator may apply the criteria set forth in this paragraph in establishing the conditions of each permit without separate establishment of regulations implementing such criteria.

(2) For the purpose of expediting review and issuance of permits under this subsection, the Administrator may, consistent with the protection of human health and the environment, modify or waive permit application and permit issuance requirements established in the Administrator’s general permit regulations except that there may be no modification or waiver of regulations regarding financial responsibility (including insurance) or of procedures established under section 6974(b)(2) of this title regarding public participation.

(3) The Administrator may order an immediate termination of all operations at the facility at any time he determines that termination is necessary to protect human health and the environment.

(4) Any permit issued under this subsection may be renewed not more than three times. Each such renewal shall be for a period of not more than 1 year.

(h) Waste minimization

Effective September 1, 1985, it shall be a condition of any permit issued under this section for the treatment, storage, or disposal of hazardous waste on the premises where such waste was generated that the permittee certify, no less often than annually, that—

(1) the generator of the hazardous waste has a program in place to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable; and

(2) the proposed method of treatment, storage, or disposal is that practicable method currently available to the generator which minimizes the present and future threat to human health and the environment.

(i) Interim status facilities receiving wastes after July 26, 1982

The standards concerning ground water monitoring, unsaturated zone monitoring, and corrective action, which are applicable under section 6924 of this title to new landfills, surface impoundments, land treatment units, and waste-pile units required to be permitted under subsection (c) shall also apply to any landfill, surface impoundment, land treatment unit, or waste-pile unit qualifying for the authorization to operate under subsection (e) which receives hazardous waste after July 26, 1982.

(j) Interim status surface impoundments
(1) Except as provided in paragraph (2), (3), or (4), each surface impoundment in existence on November 8, 1984, and qualifying for the authorization to operate under subsection (e) of this section shall not receive, store, or treat hazardous waste after the date four years after November 8, 1984, unless such surface impoundment is in compliance with the requirements of section 6924(o)(1)(A) of this title which would apply to such impoundment if it were new.

(2) Paragraph (1) of this subsection shall not apply to any surface impoundment which (A) has at least one liner, for which there is no evidence that such liner is leaking; (B) is located more than one-quarter mile from an underground source of drinking water; and (C) is in compliance with generally applicable ground water monitoring requirements for facilities with permits under subsection (c) of this section.

(3) Paragraph (1) of this subsection shall not apply to any surface impoundment which (A) contains treated waste water during the secondary or subsequent phases of an aggressive biological treatment facility subject to a permit issued under section 1342 of title 33 (or which holds such treated waste water after treatment and prior to discharge); (B) is in compliance with generally applicable ground water monitoring requirements for facilities with permits under section 1342 of this title; and (C)(i) is part of a facility in compliance with section 1311(b)(2) of title 33, or (ii) in the case of a facility for which no effluent guidelines required under section 1314(b)(2) of title 33 are in effect and no permit under section 1342(a)(1) of title 33 implementing section 1311(b)(2) of title 33 has been issued, is part of a facility in compliance with a permit under section 1342 of title 33, which is achieving significant degradation of toxic pollutants and hazardous constituents contained in the untreated waste stream and which has identified those toxic pollutants and hazardous constituents in the untreated waste stream to the appropriate permitting authority.

(4) The Administrator (or the State, in the case of a State with an authorized program), after notice and opportunity for comment, may modify the requirements of paragraph (1) for any surface impoundment if the owner or operator demonstrates that such surface impoundment is located, designed and operated so as to assure that there will be no migration of any hazardous constituent into ground water or surface water at any future time. The Administrator or the State shall take into account locational criteria established under section 6924(o)(7) of this title.

(5) The owner or operator of any surface impoundment potentially subject to paragraph (1) who has reason to believe that on the basis of paragraph (2), (3), or (4) such surface impoundment is not required to comply with the requirements of paragraph (1), shall apply to the Administrator (or the State, in the case of a State with an authorized program) not later than twenty-four months after November 8, 1984, for a determination of the applicability of paragraph (1) (in the case of paragraph (2) or (3)) or for a modification of the requirements of paragraph (1) (in the case of paragraph (4)), with respect to such surface impoundment. Such owner or operator shall provide, with such application, evidence pertinent to such decision, including:

(A) an application for a final determination regarding the issuance of a permit under subsection (c) of this section for such facility, if not previously submitted;

(B) evidence as to compliance with all applicable ground water monitoring requirements and the information and analysis from such monitoring;

(C) all reasonably ascertainable evidence as to whether such surface impoundment is leaking; and

(D) in the case of applications under paragraph (2) or (3), a certification by a registered professional engineer with academic training and experience in ground water hydrology that—

(i) under paragraph (2), the liner of such surface impoundment is designed, constructed, and operated in accordance with applicable requirements, such surface impoundment is more than one-quarter mile from an underground source of drinking water and there is no evidence such liner is leaking; or

(ii) under paragraph (3), based on analysis of those toxic pollutants and hazardous constituents that are likely to be present in the untreated waste stream, such impoundment satisfies the conditions of paragraph (3).

In the case of any surface impoundment for which the owner or operator fails to apply under this paragraph with the time provided by this paragraph or paragraph (6), such surface impoundment shall comply with paragraph (1) notwithstanding paragraph (2), (3), or (4). Within twelve months after receipt of such application and evidence and not later than thirty-six months after November 8, 1984, and after notice and opportunity to comment, the Administrator (or, if appropriate, the State) shall advise such owner or operator on the applicability of paragraph (1) to such surface impoundment or as to whether and how the requirements of paragraph (1) shall be modified and applied to such surface impoundment.

(6)(A) In any case in which a surface impoundment becomes subject to paragraph (1) after November 8, 1984, due to the promulgation of additional listings or characteristics for the identification of hazardous waste under section 6921 of this title, the period for compliance in paragraph (1) shall be four years after the date of such promulgation, the period for demonstrations under paragraph (4) and for submission of evidence under paragraph (5) shall be not later than twenty-four months after the date of such promulgation, and the period for the Administrator (or if appropriate, the State) to advise such owners or operators under paragraph (5) shall be not later than thirty-six months after the date of promulgation.

(B) In any case in which a surface impoundment is initially determined to be excluded from the requirements of paragraph (1) but due to a change in condition (including the existence of a leak) no longer satisfies the provisions of paragraph (2), (3), or (4) and therefore becomes subject to paragraph (1), the period for compliance in paragraph (1) shall be two years after the date of discovery of such change of condition, or in the case of a surface impoundment excluded under paragraph (3) three years after such date of discovery.

(7)(A) The Administrator shall study and report to the Congress on the number, range of size, construction, likelihood of hazardous constituents migrating into ground water, and potential threat to human health and the environment of existing surface impoundments excluded by paragraph (3) from the requirements of paragraph (1). Such report shall address the need, feasibility, and estimated costs of subjecting such existing surface impoundments to the requirements of paragraph (1).

(B) In the case of any existing surface impoundment or class of surface impoundments from which the Administrator (or the State, in the case of a State with an authorized program) determines hazardous constituents are likely to migrate into
ground water, the Administrator (or if appropriate, the State) is authorized to impose such requirements as may be necessary to protect human health and the environment, including the requirements of section 6924(o) of this title which would apply to such impoundments if they were new.

(C) In the case of any surface impoundment excluded by paragraph (3) from the requirements of paragraph (1) which is subsequently determined to be leaking, the Administrator (or, if appropriate, the State) shall require compliance with paragraph (1), unless the Administrator (or, if appropriate, the State) determines that such compliance is not necessary to protect human health and the environment.

(8) In the case of any surface impoundment in which the liners and leak detection system have been installed pursuant to the requirements of paragraph (1) and in good faith compliance with section 6924(o) of this title and the Administrator's regulations and guidance documents governing liners and leak detection systems, no liner or leak detection system which is different from that which was so installed pursuant to paragraph (1) shall be required for such unit by the Administrator when issuing the first permit under this section to such facility. Nothing in this paragraph shall preclude the Administrator from requiring installation of a new liner when the Administrator has reason to believe that any liner installed pursuant to the requirements of this subsection is leaking.

(9) In the case of any surface impoundment which has been excluded by paragraph (2) on the basis of a liner meeting the definition under paragraph (12)(A)(v), the closure of such impoundment the Administrator shall require the owner or operator of such impoundment to remove or decontaminate all waste residues, all contaminated liner material, and contaminated soil to the extent practicable. If all contaminated soil is not removed or decontaminated, the owner or operator of such impoundment shall be required to comply with appropriate post-closure requirements, including but not limited to ground water monitoring and corrective action.

(10) Any incremental cost attributable to the requirements of this subsection or section 6924(o) of this title shall not be considered by the Administrator (or the State, in the case of a State with an authorized program under section 1342 of title 33)—

(A) in establishing effluent limitations and standards under section 1311, 1314, 1316, 1317, or 1342 of title 33 based on effluent limitations guidelines and standards promulgated any time before twelve months after November 8, 1984; or

(B) in establishing any other effluent limitations to carry out the provisions of section 1311, 1317, or 1342 of title 33 on or before October 1, 1986.

(11)(A) If the Administrator allows a hazardous waste which is prohibited from one or more methods of land disposal under subsection (d), (e), or (g) of section 6924 of this title (or under regulations promulgated by the Administrator under such subsections) to be placed in a surface impoundment (which is operating pursuant to interim status) for storage or treatment, such impoundment shall meet the requirements that are applicable to new surface impoundments under section 6924(o)(1) of this title, unless such impoundment meets the requirements of paragraph (2) or (4).

(B) In the case of any hazardous waste which is prohibited from one or more methods of land disposal under subsection (d), (e), or (g) of section 6924 of this title (or under regulations promulgated by the Administrator under such subsection) the placement or maintenance of such hazardous waste in a surface impoundment for treatment is prohibited as of the effective date of such prohibition unless the treatment residues which are hazardous are, at a minimum, removed for subsequent management within one year of the entry of the waste into the surface impoundment.

(12)(A) For the purposes of paragraph (2)(A) of this subsection, the term "liner" means—

(i) a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility; or

(ii) a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(B) For the purposes of this subsection, the term "aggressive biological treatment facility" means a system of surface impoundments in which the initial impoundment of the secondary treatment segment of the facility utilizes intense mechanical aeration to enhance biological activity to degrade waste water pollutants and

(i) the hydraulic retention time in such initial impoundment is no longer than 5 days under normal operating conditions, on an annual average basis;

(ii) the hydraulic retention time in such initial impoundment is no longer than thirty days under normal operating conditions, on an annual average basis. Provided, That the sludge in such impoundment does not constitute a hazardous waste as identified by the extraction procedure toxicity characteristic in effect on November 8, 1984; or

(iii) such system utilizes activated sludge treatment in the first portion of secondary treatment.

(C) For the purposes of this subsection, the term "underground source or drinking water" has the same meaning as provided in regulations under the Safe Drinking Water Act (title XIV of the Public Health Service Act [42 U.S.C. 300f et seq.]).

(13) The Administrator may modify the requirements of paragraph (1) in the case of a surface impoundment for which the owner or operator, prior to October 1, 1984, has entered into, and is in compliance with, a consent order, decree, or agreement with the Administrator or a State with an authorized program mandating corrective action with respect to such surface impoundment that provides a degree of protection of human health and the environment which is at a minimum equivalent to that provided by paragraph (1).

EDITORIAL NOTES

REFERENCES IN TEXT

The Safe Drinking Water Act, referred to in subsec. (j)(12)(C), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. For complete classification of this Act to the Code see Short Title note set out under section 201 of this title and Tables.

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §211, substituted "an existing facility or planning to construct a new" for "a", inserted "and the construction of any new facility for the treatment, storage, or disposal of any such hazardous waste", and inserted at end "No permit shall be required under this section in order to construct a facility if such facility is constructed pursuant to an approval issued by the Administrator under section 2605(e) of title 15 for the incineration of polychlorinated [sic] biphenyls and any person owning or operating such a facility may, at any time after operation or construction of such facility has begun, file an application for a permit pursuant to this section authorizing such facility to incinerate hazardous waste identified or listed under this subchapter."
Subsec. (c)(1), (2). Pub. L. 98–616, §213(c), designated existing provisions as par. (1) and added par. (2).
Subsec. (e). Pub. L. 98–616, §213(a), designated existing provisions as par. (1), redesignated former pars. (1), (2), and (3) thereof as subpars. (A), (B), and (C), respectively, designated existing provisions of previously redesignated subpar. (A) as cl. (i) and added cl. (ii), inserted "This paragraph shall not apply to any facility which has been previously denied a permit under this section or if authority to operate the facility under this section has been previously terminated." to closing provisions of par. (1), and added pars. (2) and (3).
Subsec. (g). Pub. L. 98–616, §214(a), added subsec. (g).
1978—Subsec (a). Pub. L. 95–609 inserted "treatment, storage, or" after "and after such date the".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "responsibility".

2 So in original. Probably should be "constituent".

3 So in original. Probably should be "of".

§6926. Authorized State hazardous waste programs

(a) Federal guidelines

Not later than eighteen months after October 21, 1976, the Administrator, after consultation with State authorities, shall promulgate guidelines to assist States in the Development of State hazardous waste programs.

(b) Authorization of State program
Any State which seeks to administer and enforce a hazardous waste program pursuant to this subchapter may develop and, after notice and opportunity for public hearing, submit to the Administrator an application, in such form as he shall require, for authorization of such program. Within ninety days following submission of an application under this subsection, the Administrator shall issue a notice as to whether or not he expects such program to be authorized, and within ninety days following such notice (and after opportunity for public hearing) he shall publish his findings as to whether or not the conditions listed in items (1), (2), and (3) below have been met. Such State is authorized to carry out such program in lieu of the Federal program under this subchapter in such State and to issue and enforce permits for the storage, treatment, or disposal of hazardous waste (and to enforce permits deemed to have been issued under section 6935(d)(1) of this title) unless, within ninety days following submission of the application the Administrator notifies such State that such program may not be authorized and, within ninety days following such notice and after opportunity for public hearing, he finds that (1) such State program is not equivalent to the Federal program under this subchapter, (2) such program is not consistent with the Federal or State programs applicable in other States, or (3) such program does not provide adequate enforcement of compliance with the requirements of this subchapter. In authorizing a State program, the Administrator may base his findings on the Federal program in effect one year prior to submission of a State’s application or in effect on January 26, 1983, whichever is later.

c) Interim authorization

(1) Any State which has in existence a hazardous waste program pursuant to State law before the date ninety days after the date of promulgation of regulations under sections 6922, 6923, 6924, and 6925 of this title, may submit to the Administrator evidence of such existing program and may request a temporary authorization to carry out such program under this subchapter. The Administrator shall, if the evidence submitted shows the existing State program to be substantially equivalent to the Federal program under this subchapter, grant an interim authorization to the State to carry out such program in lieu of the Federal program pursuant to this subchapter for a period ending no later than January 31, 1986.

(2) The Administrator shall, by rule, establish a date for the expiration of interim authorization under this subsection.

(3) Pending interim or final authorization of a State program for any State which reflects the amendments made by the Hazardous and Solid Waste Amendments of 1984, the State may enter into an agreement with the Administrator under which the State may assist in the administration of the requirements and prohibitions which take effect pursuant to such Amendments.

(4) In the case of a State permit program for any State which is authorized under subsection (b) or under this subchapter, until such program is amended to reflect the amendments made by the Hazardous and Solid Waste Amendments of 1984 and such program amendments receive interim or final authorization, the Administrator shall have the authority in such State to issue or deny permits or those portions of permits affected by the requirements and prohibitions established by the Hazardous and Solid Waste Amendments of 1984. The Administrator shall coordinate with States the procedures for issuing such permits.

d) Effect of State permit

Any action taken by a State under a hazardous waste program authorized under this section shall have the same force and effect as action taken by the Administrator under this subchapter.

e) Withdrawal of authorization

Whenever the Administrator determines after public hearing that a State is not administering and enforcing a program authorized under this section in accordance with requirements of this section, he shall so notify the State and, if appropriate corrective action is not taken within a reasonable time, not to exceed ninety days, the Administrator shall withdraw authorization of such program and establish a Federal program pursuant to this subchapter. The Administrator shall not withdraw authorization of any such program unless he shall first have notified the State, and made public, in writing, the reasons for such withdrawal.

f) Availability of information

No State program may be authorized by the Administrator under this section unless—

(1) such program provides for the public availability of information obtained by the State regarding facilities and sites for the treatment, storage, and disposal of hazardous waste; and

(2) such information is available to the public in substantially the same manner, and to the same degree, as would be the case if the Administrator was carrying out the provisions of this subchapter in such State.

g) Amendments made by 1984 act

(1) Any requirement or prohibition which is applicable to the generation, transportation, treatment, storage, or disposal of hazardous waste and which is imposed under this subchapter pursuant to the amendments made by the Hazardous and Solid Waste Amendments of 1984 shall take effect in each State having an interim or finally authorized State program on the same date as such requirement takes effect in other States. The Administrator shall carry out such requirement directly in each such State unless the State program is finally authorized (or is granted interim authorization as provided in paragraph (2)) with respect to such requirement.

(2) Any State which, before November 8, 1984, has an existing hazardous waste program which has been granted interim or final authorization under this section may submit to the Administrator evidence that such existing program contains (or has been amended to include) any requirement which is substantially equivalent to a requirement referred to in paragraph (1) and may request interim authorization to carry out that requirement under this subchapter. The Administrator shall, if the evidence submitted shows the State requirement to be substantially equivalent to the requirement referred to in paragraph (1), grant an interim authorization to the State to carry out such requirement in lieu of direct administration in the State by the Administrator of such requirement.
(h) State programs for used oil

In the case of used oil which is not listed or identified under this subchapter as a hazardous waste but which is regulated under section 6935 of this title, the provisions of this section regarding State programs shall apply in the same manner and to the same extent as such provisions apply to hazardous waste identified or listed under this subchapter.

EDITORIAL NOTES

REFERENCES IN TEXT

Section 6935(d)(1) of this title, referred to in subsec. (b), was in the original a reference to section 3012(d)(1) of Pub. L. 89–272, which was renumbered section 3014(d)(1) of Pub. L. 98–616 and is classified to section 6935(d)(1) of this title.

The Hazardous and Solid Waste Amendments of 1984, referred to in subs. (c)(3), (4), and (g), is Pub. L. 98–616, Nov. 8, 1984, 98 Stat. 3221, which amended this chapter. For complete classification of this Act to the Code, see Short Title of 1984 Amendment note set out under section 6901 of this title and Tables.

AMENDMENTS

1984—Subsec. (b). Pub. L. 98–616, §§225, 241(b)(2), inserted "(and to enforce permits deemed to have been issued under section 6935(d)(1) of this title)" and inserted provision at end that in authorizing a State program, the Administrator may base his findings on the Federal program in effect one year prior to submission of a State's application or in effect on January 26, 1983, whichever is later.

Subsec. (c)(1). Pub. L. 98–616, §227(1), (2), designated existing provisions as par. (1) and substituted "period ending no later than January 31, 1986" for "twenty-four month period beginning on the date six months after the date of promulgation of regulations under sections 6922 through 6925 of this title".

Subsec. (c)(2) to (4). Pub. L. 98–616, §227(3), added pars. (2) to (4).

Subsec. (g). Pub. L. 98–616, §228, added subsec. (g).

1978—Subsec. (c). Pub. L. 95–609 substituted "of" for "required for" wherever appearing and "may submit" for "submit".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 1984 AMENDMENT

Pub. L. 98–616, title II, §226(b), Nov. 8, 1984, 98 Stat. 3254, provided that: "The amendment made by subsection (a) [enacting subsec. (f) of this section] shall apply with respect to State programs authorized under section 3006 [this section] before, on, or after the date of enactment of the Hazardous and Solid Waste Amendments of 1984 [Nov. 8, 1984]."

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 See References in Text note below.

§6927. Inspections

(a) Access entry

For purposes of developing or assisting in the development of any regulation or enforcing the provisions of this chapter, any person who generates, stores, treats, transports, disposes of, or otherwise handles or has handled hazardous wastes shall, upon request of any officer, employee or representative of the Environmental Protection Agency, duly designated by the Administrator, or upon request of any duly designated officer, employee or representative of a State having an authorized hazardous waste program, furnish information relating to such wastes and permit such person at all reasonable times to have access to, and to copy all records relating to such wastes. For the purposes of developing or assisting in the
development of any regulation or enforcing the provisions of this chapter, such officers, employees or representatives are authorized—

(1) to enter at reasonable times any establishment or other place where hazardous wastes are or have been generated, stored, treated, disposed of, or transported from;

(2) to inspect and obtain samples from any person of any such wastes and samples of any containers or labeling for such wastes.

Each such inspection shall be commenced and completed with reasonable promptness. If the officer, employee or representative obtains any samples, prior to leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and if requested a portion of each such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner, operator, or agent in charge.

(b) Availability to public

(1) Any records, reports, or information (including records, reports, or information obtained by representatives of the Environmental Protection Agency) obtained from any person under this section shall be available to the public, except that upon a showing satisfactory to the Administrator (or the State, as the case may be) by any person that records, reports, or information, or particular part thereof, to which the Administrator (or the State, as the case may be) or any officer, employee or representative thereof has access under this section if made public, would divulge information entitled to protection under section 1905 of title 18, such information or particular portion thereof shall be considered confidential in accordance with the purposes of that section, except that such record, report, document, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this chapter, or when relevant in any proceeding under this chapter.

(2) Any person not subject to the provisions of section 1905 of title 18 who knowingly and willfully divulges or discloses any information entitled to protection under this subsection shall, upon conviction, be subject to a fine of not more than $5,000 or to imprisonment not to exceed one year, or both.

(3) In submitting data under this chapter, a person required to provide such data may—

(A) designate the data which such person believes is entitled to protection under this subsection, and

(B) submit such designated data separately from other data submitted under this chapter.

A designation under this paragraph shall be made in writing and in such manner as the Administrator may prescribe.

(4) Notwithstanding any limitation contained in this section or any other provision of law, all information reported to, or otherwise obtained by, the Administrator (or any representative of the Administrator) under this chapter shall be made available, upon written request of any duly authorized committee of the Congress, to such committee.

(c) Federal facility inspections

The Administrator shall undertake on an annual basis a thorough inspection of each facility for the treatment, storage, or disposal of hazardous waste which is owned or operated by a department, agency, or instrumentality of the United States to enforce its compliance with this subchapter and the regulations promulgated thereunder. Any State with an authorized hazardous waste program also may conduct an inspection of any such facility for purposes of enforcing the facility’s compliance with the State hazardous waste program. The records of such inspections shall be available to the public as provided in subsection (b). The department, agency, or instrumentality owning or operating each such facility shall reimburse the Environmental Protection Agency for the costs of the inspection of the facility. With respect to the first inspection of each such facility occurring after October 6, 1992, the Administrator shall conduct a comprehensive ground water monitoring evaluation at the facility, unless such an evaluation was conducted during the 12-month period preceding October 6, 1992.

(d) State-operated facilities

The Administrator shall annually undertake a thorough inspection of every facility for the treatment, storage, or disposal of hazardous waste which is operated by a State or local government for which a permit is required under section 6925 of this title. The records of such inspection shall be available to the public as provided in subsection (b).

(e) Mandatory inspections

(1) The Administrator (or the State in the case of a State having an authorized hazardous waste program under this subchapter) shall commence a program to thoroughly inspect every facility for the treatment, storage, or disposal of hazardous waste for which a permit is required under section 6925 of this title no less often than every two years as to its compliance with this subchapter (and the regulations promulgated under this subchapter). Such inspections shall commence not later than twelve months after November 8, 1984. The Administrator shall, after notice and opportunity for public comment, promulgate regulations governing the minimum frequency and manner of such inspections, including the manner in which records of such inspections shall be maintained and the manner in which reports of such inspections shall be filed. The Administrator may distinguish between classes and categories of facilities commensurate with the risks posed by each class or category.

(2) Not later than six months after November 8, 1984, the Administrator shall submit to the Congress a report on the potential for inspections of hazardous waste treatment, storage, or disposal facilities by nongovernmental inspectors as a supplement to inspections conducted by officers, employees, or representatives of the Environmental Protection Agency or States having authorized hazardous waste programs or operating under a cooperative agreement with the Administrator. Such report shall be prepared in cooperation with the States, insurance companies offering environmental impairment insurance, independent companies providing inspection services, and other such groups as appropriate. Such report shall
contain recommendations on provisions and requirements for a program of private inspections to supplement governmental inspections.

EDITORIAL NOTES

AMENDMENTS

1992—Subsec. (c). Pub. L. 102–386 in first sentence substituted "The Administrator shall undertake" for "Beginning twelve months after November 8, 1984, the Administrator shall, or in the case of a State with an authorized hazardous waste program the State may, undertake" and "department, agency, or instrumentality of the United States" for "Federal agency", inserted after first sentence "Any State with an authorized hazardous waste program also may conduct an inspection of any such facility for purposes of enforcing the facility's compliance with the State hazardous waste program.", and inserted at end "The department, agency, or instrumentality owning or operating each such facility shall reimburse the Environmental Protection Agency for the costs of the inspection of the facility. With respect to the first inspection of each such facility occurring after October 6, 1992, the Administrator shall conduct a comprehensive ground water monitoring evaluation at the facility, unless such an evaluation was conducted during the 12-month period preceding October 6, 1992."

of Pub. L. 96–482.

1980—Subsec. (a). Pub. L. 96–482, §12(a), substituted "chapter" for "subchapter", "any officer, employee or representative" for "any officer or employee", "duly designated officer, employee or representative" for "duly designated officer employee", "officer, employee or representative obtains" for "officer or employee obtains", struck out "maintained by any person" after "establishment or other place", substituted "officer, employee or representative obtains" for "officer or employee obtains", and inserted "or has handled" after "otherwise handles" and "have been" after "where hazardous wastes are".

Subsec. (b)(1). Pub. L. 96–482, §12(b)(1)–(3), designated existing provisions as par. (1), inserted "or any officer, employee or representative thereof" before "has access under this section" and substituted "such information or particular portion thereof shall be considered" for "the Administrator (or the State, as the case may be) shall consider such information or portion thereof".

Pub. L. 96–482, §12(b)(4), as modified by Pub. L. 98–616, §502(a), inserted "(including records, reports, or information obtained by representatives of the Environmental Protection Agency)" after "information".

Subsec. (b)(2) to (4). Pub. L. 96–482, §12(b)(3), added paras. (2) to (4).

1978—Subsec. (a)(1). Pub. L. 95–609 substituted "disposed of, or transported from" for "or disposed of".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6928. Federal enforcement

(a) Compliance orders

(1) Except as provided in paragraph (2), whenever on the basis of any information the Administrator determines that any person has violated or is in violation of any requirement of this subchapter, the Administrator may issue an order assessing a civil penalty for any past or current violation, requiring compliance immediately or within a specified time period, or both, or the Administrator may commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

(2) In the case of a violation of any requirement of this subchapter where such violation occurs in a State which is authorized to carry out a hazardous waste program under section 6926 of this title, the Administrator shall give notice to the State in which such violation has occurred prior to issuing an order or commencing a civil action under this section.
(3) Any order issued pursuant to this subsection may include a suspension or revocation of any permit issued by the Administrator or a State under this subchapter and shall state with reasonable specificity the nature of the violation. Any penalty assessed in the order shall not exceed $25,000 per day of noncompliance for each violation of a requirement of this subchapter. In assessing such a penalty, the Administrator shall take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements.

(b) Public hearing
Any order issued under this section shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. In connection with any proceeding under this section the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

(c) Violation of compliance orders
If a violator fails to take corrective action within the time specified in a compliance order, the Administrator may assess a civil penalty of not more than $25,000 for each day of continued noncompliance with the order and the Administrator may suspend or revoke any permit issued to the violator (whether issued by the Administrator or the State).

d) Criminal penalties
Any person who—

(1) knowingly transports or causes to be transported any hazardous waste identified or listed under this subchapter to a facility which does not have a permit under this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.];

(2) knowingly treats, stores, or disposes of any hazardous waste identified or listed under this subchapter—
   (A) without a permit under this subchapter or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.]; or
   (B) in knowing violation of any material condition or requirement of such permit; or
   (C) in knowing violation of any material condition or requirement of any applicable interim status regulations or standards;

(3) knowingly omits material information or makes any false material statement or representation in any application, label, manifest, record, report, permit, or other document filed, maintained, or used for purposes of compliance with regulations promulgated by the Administrator (or by a State in the case of an authorized State program) under this subchapter;

(4) knowingly generates, stores, treats, transports, disposes of, exports, or otherwise handles any hazardous waste or any used oil not identified or listed as a hazardous waste under this subchapter (whether such activity took place before or takes place after November 8, 1984) and who knowingly destroys, alters, conceals, or fails to file any record, application, manifest, report, or other document required to be maintained or filed for purposes of compliance with regulations promulgated by the Administrator (or by a State in the case of an authorized State program) under this subchapter;

(5) knowingly transports without a manifest, or causes to be transported without a manifest, any hazardous waste or any used oil not identified or listed as a hazardous waste under this subchapter required by regulations promulgated under this subchapter (or by a State in the case of a State program authorized under this subchapter) to be accompanied by a manifest;

(6) knowingly exports a hazardous waste identified or listed under this subchapter (A) without the consent of the receiving country or, (B) where there exists an international agreement between the United States and the government of the receiving country establishing notice, export, and enforcement procedures for the transportation, treatment, storage, and disposal of hazardous wastes, in a manner which is not in conformance with such agreement; or

(7) knowingly stores, treats, transports, or causes to be transported, disposes of, or otherwise handles any used oil not identified or listed as a hazardous waste under this subchapter—
   (A) in knowing violation of any material condition or requirement of a permit under this subchapter; or
   (B) in knowing violation of any material condition or requirement of any applicable regulations or standards under this chapter;

shall, upon conviction, be subject to a fine of not more than $50,000 for each day of violation, or imprisonment not to exceed two years (five years in the case of a violation of paragraph (1) or (2)), or both. If the conviction is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment under the respective paragraph shall be doubled with respect to both fine and imprisonment.

(e) Knowing endangerment
Any person who knowingly transports, treats, stores, disposes of, or exports any hazardous waste identified or listed under this subchapter or used oil not identified or listed as a hazardous waste under this subchapter in violation of paragraph (1), (2), (3), (4), (5), (6), or (7) of subsection (d) of this section who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment for not more than fifteen years, or both. A defendant that is an organization shall, upon conviction of violating this subsection, be subject to a fine of not more than $1,000,000.

(f) Special rules
For the purposes of subsection (e)—
(1) A person's state of mind is knowing with respect to—
   (A) his conduct, if he is aware of the nature of his conduct;
   (B) an existing circumstance, if he is aware or believes that the circumstance exists; or
   (C) a result of his conduct, if he is aware or believes that his conduct is substantially certain to cause danger of death or serious bodily injury.

(2) In determining whether a defendant who is a natural person knew that his conduct placed another person in imminent danger of death or serious bodily injury—
   (A) the person is responsible only for actual awareness or actual belief that he possessed; and
   (B) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant;

Provided. That in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information.

(3) It is an affirmative defense to a prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—
   (A) an occupation, a business, or a profession; or
   (B) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent.

The defendant may establish an affirmative defense under this subsection by a preponderance of the evidence.

(4) All general defenses, affirmative defenses, and bars to prosecution that may apply with respect to other Federal criminal offenses may apply under subsection (e) and shall be determined by the courts of the United States according to the principles of common law as they may be interpreted in the light of reason and experience. Concepts of justification and excuse applicable under this section may be developed in the light of reason and experience.

(5) The term "organization" means a legal entity, other than a government, established, or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons.

(6) The term "serious bodily injury" means—
   (A) bodily injury which involves a substantial risk of death;
   (B) unconsciousness;
   (C) extreme physical pain;
   (D) protracted and obvious disfigurement; or
   (E) protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

(g) Civil penalty

Any person who violates any requirement of this subchapter shall be liable to the United States for a civil penalty in an amount not to exceed $25,000 for each such violation. Each day of such violation shall, for purposes of this subsection, constitute a separate violation.

(h) Interim status corrective action orders

(1) Whenever on the basis of any information the Administrator determines that there is or has been a release of hazardous waste into the environment from a facility authorized to operate under section 6925(e) of this title, the Administrator may issue an order requiring corrective action or such other response measure as he deems necessary to protect human health or the environment or the Administrator may commence a civil action in the United States district court in the district in which the facility is located for appropriate relief, including a temporary or permanent injunction.

(2) Any order issued under this subsection may include a suspension or revocation of authorization to operate under section 6925(e) of this title, shall state with reasonable specificity the nature of the required corrective action or other response measure, and shall specify a time for compliance. If any person named in an order fails to comply with the order, the Administrator may assess, and such person shall be liable to the United States for, a civil penalty in an amount not to exceed $25,000 for each day of noncompliance with the order.

EDITORIAL NOTES

REFERENCES IN TEXT

AMENDMENTS
1986—Subsec. (d)(4). Pub. L. 99–499, §205(i)(1), inserted "or any used oil not identified or listed as a hazardous waste under this subchapter".

Subsec. (d)(5). Pub. L. 99–499, §205(i)(1), (2), inserted "or any used oil not identified or listed as a hazardous waste under this subchapter" and struck out "; or" after "accompanied by a manifest".

Subsec. (d)(6). Pub. L. 99–499, §205(i)(3), inserted at end "; or".

Subsec. (e). Pub. L. 99–499, §205(i)(5), inserted "or used oil not identified or listed as a hazardous waste under this subchapter" and substituted "(5), (6), or (7)" for "(5), or (6)".

1984—Subsec. (a)(1). Pub. L. 98–616, §403(d)(1), in amending par. (1) generally, expanded authority of Administrator by empowering him to determine that a person "has violated" a requirement of this subchapter, and to assess a civil penalty for a past or current violation.

Subsec. (a)(3). Pub. L. 98–616, §403(d)(2), in amending par. (3) generally, substituted provision that any order issued pursuant to this subsection may include a suspension or revocation of any permit issued by the Administrator or a State under this subchapter and shall state with reasonable specificity the nature of the violation, and provision that any penalty assessed in the order shall not exceed $25,000 per day of noncompliance for each violation of a requirement of this subchapter, and that in assessing such a penalty, the Administrator take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements, for provision that if such violator fails to take corrective action within the time specified in the order, he shall be liable for a civil penalty of not more than $25,000 for each day of continued noncompliance and the Administrator may suspend or revoke any permit issued to the violator, whether issued by the Administrator or the State.

Subsec. (b). Pub. L. 98–616, §233(b), inserted "issued under this section".

Subsec. (c). Pub. L. 98–616, §403(d)(3), substituted provisions relating to penalties for violation of compliance orders for former provisions which set forth requirements for compliance orders.

Subsec. (d). Pub. L. 98–616, §232(a)(3), amended closing provisions generally. Prior to amendment, closing provisions read as follows: "shall, upon conviction, be subject to a fine of not more than $25,000 ($50,000 in the case of a violation of paragraph (1) or (2)) for each day of violation, or to imprisonment not to exceed one year (two years in the case of a violation of paragraph (1) or (2)), or both. If the conviction is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment for not more than two years, or by both."

Subsec. (d)(1). Pub. L. 98–616, §232(a)(1), inserted "or causes to be transported" and substituted "this subchapter" for "section 6925 of this title (or section 6926 of this title in case of a State program)"

Subsec. (d)(2)(A). Pub. L. 98–616, §232(a)(2)(B), (c), substituted "this subchapter" for "section 6925 of this title (or section 6926 of this title in case of a State program)" and struck out "having obtained" before "a permit under".

Subsec. (d)(3) to (5). Pub. L. 98–616, §232(a)(3), in amending pars. (3) and (4) generally, expanded par. (3) by providing criminal penalties for one who knowingly omits material information from documents required to be filed, maintained or used under this subchapter, expanded par. (4) by providing criminal penalties for one who knowingly fails to file required material under this subchapter, and added par. (5).

Subsec. (e). Pub. L. 98–616, §245(c), added subpar. (e).

Subsec. (e). Pub. L. 98–616, §232(b), in amending subsec. (e) generally, struck out provisions referring to violations of interim status standards and omission of material information from permit applications, struck out provision requiring proof of "unjustifiable and inexcusable disregard for human life" or "extreme indifference to human life" for conviction under this subsection, and inserted provision increasing maximum prison sentence to fifteen years for violation of subsec. (d)(1) through (6) of this section by one who knowingly places another person in imminent danger of death or serious bodily injury, replacing former provision calling for maximum imprisonment of two years, or five years in cases evidencing extreme indifference to human life.

1980—Subsec. (a)(1). Pub. L. 96–482, §13(1), (2), struck out "the Administrator shall give notice to the violator of his failure to comply with such requirement. If such violation extends beyond the thirtieth day after the Administrator's notification" before "the Administrator may issue" and substituted "compliance immediately or within a specified time period" for "compliance within a specified time period".

Subsec. (a)(2). Pub. L. 96–482, §13(2), struck out "thirty days" after "violation has occurred".

Subsec. (b). Pub. L. 96–482, §13(3), substituted "order shall become final unless, no later than thirty days after the order is served for "order or any suspension or revocation of a permit shall become final unless, no later than thirty days after the order or notice of the suspension or revocation is served".

Subsec. (d). Pub. L. 96–482, §13(5), in par. (2), designated existing provisions as subpar. (A) and added subpar. (B), in par. (3), inserted provision requiring the statement or representation to be material, added par.
(4), and in provisions following par. (4), inserted provision authorizing a fine of $50,000 and a two year imprisonment for violation of par. (1) or (2).  
Subsecs. (e) to (g). Pub. L. 96–482, §13(5), added subsecs. (e) to (g).  

**Executive Documents**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6929. Retention of State authority

Upon the effective date of regulations under this subchapter no State or political subdivision may impose any requirements less stringent than those authorized under this subchapter respecting the same matter as governed by such regulations, except that if application of a regulation with respect to any matter under this subchapter is postponed or enjoined by the action of any court, no State or political subdivision shall be prohibited from acting with respect to the same aspect of such matter until such time as such regulation takes effect. Nothing in this chapter shall be construed to prohibit any State or political subdivision thereof from imposing any requirements, including those for site selection, which are more stringent than those imposed by such regulations. Nothing in this chapter (or in any regulation adopted under this chapter) shall be construed to prohibit any State from requiring that the State be provided with a copy of each manifest used in connection with hazardous waste which is generated within that State or transported to a treatment, storage, or disposal facility within that State.  

**EDITORIAL NOTES**

**AMENDMENTS**

1984—Pub. L. 98–616 inserted "Nothing in this chapter (or in any regulation adopted under this chapter) shall be construed to prohibit any State from requiring that the State be provided with a copy of each manifest used in connection with hazardous waste which is generated within that State or transported to a treatment, storage, or disposal facility within that State."

1980—Pub. L. 96–482 prohibited construction of this chapter as barring a State from imposing more stringent requirements than provided in Federal regulations.

§6930. Effective date

(a) Preliminary notification

Not later than ninety days after promulgation of regulations under section 6921 of this title identifying by its characteristics or listing any substance as hazardous waste subject to this subchapter, any person generating or transporting such substance or owning or operating a facility for treatment, storage, or disposal of such substance shall file with the Administrator (or with States having authorized hazardous waste permit programs under section 6926 of this title) a notification stating the location and general description of such activity and the identified or listed hazardous wastes handled by such person. Not later than fifteen months after November 8, 1984—

1. the owner or operator of any facility which produces a fuel (A) from any hazardous waste identified or listed under section 6921 of this title, (B) from such hazardous waste identified or listed under section 6921 of this title and any other material, (C) from used oil, or (D) from used oil and any other material;

2. the owner or operator of any facility (other than a single- or two-family residence) which burns for purposes of energy recovery any fuel produced as provided in paragraph (1) or any fuel which otherwise contains used oil or any hazardous waste identified or listed under section 6921 of this title; and

3. any person who distributes or markets any fuel which is produced as provided in paragraph (1) or any fuel which otherwise contains used oil or any hazardous waste identified or listed under section 6921 of this title.

shall file with the Administrator (and with the State in the case of a State with an authorized hazardous waste program) a notification stating the location and general description of the facility, together with a description of the identified or listed
hazardous waste involved and, in the case of a facility referred to in paragraph (1) or (2), a description of the production or energy recovery activity carried out at the facility and such other information as the Administrator deems necessary. For purposes of the preceding provisions, the term "hazardous waste listed under section 6921 of this title" also includes any commercial chemical product which is listed under section 6921 of this title and which, in lieu of its original intended use, is (i) produced for use as (or as a component of) a fuel, (ii) distributed for use as a fuel, or (iii) burned as a fuel. Notification shall not be required under the second sentence of this subsection in the case of facilities (such as residential boilers) where the Administrator determines that such notification is not necessary in order for the Administrator to obtain sufficient information respecting current practices of facilities using hazardous waste for energy recovery. Nothing in this subsection shall be construed to affect or impair the provisions of section 6921(b)(3) of this title. Nothing in this subsection shall affect regulatory determinations under section 6935 of this title. In revising any regulation under section 6921 of this title identifying additional characteristics of hazardous waste or listing any additional substance as hazardous waste subject to this subchapter, the Administrator may require any person referred to in the preceding provisions to file with the Administrator (or with States having authorized hazardous waste permit programs under section 6926 of this title) the notification described in the preceding provisions. No more than one such notification shall be required to be filed with respect to the same substance. No identified or listed hazardous waste subject to this subchapter may be transported, treated, stored, or disposed of unless notification has been given as required under this subsection.

(b) Effective date of regulation

The regulations under this subchapter respecting requirements applicable to the generation, transportation, treatment, storage, or disposal of hazardous waste (including requirements respecting permits for such treatment, storage, or disposal) shall take effect on the date six months after the date of promulgation thereof (or six months after the date of revision in the case of any regulation which is revised after the date required for promulgation thereof). At the time a regulation is promulgated, the Administrator may provide for a shorter period prior to the effective date, or an immediate effective date for:

1. a regulation with which the Administrator finds the regulated community does not need six months to come into compliance;
2. a regulation which responds to an emergency situation; or
3. other good cause found and published with the regulation.

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §204(a), inserted provisions after first sentence relating to burning and blending of hazardous wastes and substituted "the preceding provisions" for "the preceding sentence" in three places.

Subsec. (b). Pub. L. 98–616, §234, inserted provision that at the time a regulation is promulgated, the Administrator may provide for a shorter period prior to the effective date, or an immediate effective date for a regulation with which the Administrator finds the regulated community does not need six months to come into compliance, a regulation which responds to an emergency situation, or other good cause found and published with the regulation.

1980—Subsec. (a). Pub. L. 96–482 struck out "or revision" after "after promulgation or revision of regulations" and inserted provision for filing of notification when revising any regulation identifying additional characteristics of hazardous waste or listing any additional substance as hazardous waste subject to this subchapter.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects; see note set out under section 6903 of this title.

\footnote{So in original. Probably should be followed by a semicolon.}

§6931. Authorization of assistance to States

(a) Authorization of appropriations

There is authorized to be appropriated $25,000,000 for each of the fiscal years 1978 and 1979 \footnote{1} $20,000,000 for fiscal year 1980, $35,000,000 for fiscal year 1981, $40,000,000 for the fiscal year 1982, $55,000,000 for the fiscal year 1985, $60,000,000 for the fiscal year 1986, $60,000,000 for the fiscal year 1987, and $60,000,000 for the fiscal year 1988 to be
used to make grants to the States for purposes of assisting the States in the development and implementation of authorized State hazardous waste programs.

(b) Allocation
Amounts authorized to be appropriated under subsection (a) shall be allocated among the States on the basis of regulations promulgated by the Administrator, after consultation with the States, which take into account, the extent to which hazardous waste is generated, transported, treated, stored, and disposed of within such State, the extent of exposure of human beings and the environment within such State to such waste, and such other factors as the Administrator deems appropriate.

(c) Activities included
State hazardous waste programs for which grants may be made under subsection (a) may include (but shall not be limited to) planning for hazardous waste treatment, storage and disposal facilities, and the development and execution of programs to protect health and the environment from inactive facilities which may contain hazardous waste.

EDITORIAL NOTES

AMENDMENTS
1984—Subsec. (a). Pub. L. 98–616 substituted "$40,000,000 for fiscal year 1982, $55,000,000 for fiscal year 1985, $60,000,000 for fiscal year 1986, $60,000,000 for fiscal year 1987, and $60,000,000 for fiscal year 1988" for "and $40,000,000 for fiscal year 1982".
1980—Subsec. (a). Pub. L. 96–482, §31(b), authorized appropriation of $20,000,000, $35,000,000, and $40,000,000 for fiscal years 1980, 1981, and 1982, respectively.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6932. Transferred

EDITORIAL NOTES

CODIFICATION

§6933. Hazardous waste site inventory

(a) State inventory programs
Each State shall, as expeditiously as practicable, undertake a continuing program to compile, publish, and submit to the Administrator an inventory describing the location of each site within such State at which hazardous waste has at any time been stored or disposed of. Such inventory shall contain—

(1) a description of the location of the sites at which any such storage or disposal has taken place before the date on which permits are required under section 6925 of this title for such storage or disposal;

(2) such information relating to the amount, nature, and toxicity of the hazardous waste at each such site as may be practicable to obtain and as may be necessary to determine the extent of any health hazard which may be associated with such site;

(3) the name and address, or corporate headquarters of, the owner of each such site, determined as of the date of preparation of the inventory;
(4) an identification of the types or techniques of waste treatment or disposal which have been used at each such site; and

(5) information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.

For purposes of assisting the States in compiling information under this section, the Administrator shall make available to each State undertaking a program under this section such information as is available to him concerning the items specified in paragraphs (1) through (5) with respect to the sites within such State, including such information as the Administrator is able to obtain from other agencies or departments of the United States and from surveys and studies carried out by any committee or subcommittee of the Congress. Any State may exercise the authority of section 6927 of this title for purposes of this section in the same manner and to the same extent as provided in such section in the case of States having an authorized hazardous waste program, and any State may by order require any person to submit such information as may be necessary to compile the data referred to in paragraphs (1) through (5).

(b) Environmental Protection Agency program

If the Administrator determines that any State program under subsection (a) is not adequately providing information respecting the sites in such State referred to in subsection (a), the Administrator shall notify the State. If within ninety days following such notification, the State program has not been revised or amended in such manner as will adequately provide such information, the Administrator shall carry out the inventory program in such State. In any such case—

(1) the Administrator shall have the authorities provided with respect to State programs under subsection (a);

(2) the funds allocated under subsection (c) for grants to States under this section may be used by the Administrator for carrying out such program in such State; and

(3) no further expenditure may be made for grants to such State under this section until such time as the Administrator determines that such State is carrying out, or will carry out, an inventory program which meets the requirements of this section.

(c) Grants

(1) Upon receipt of an application submitted by any State to carry out a program under this section, the Administrator may make grants to the States for purposes of carrying out such a program. Grants under this section shall be allocated among the several States by the Administrator based upon such regulations as he prescribes to carry out the purposes of this section. The Administrator may make grants to any State which has conducted an inventory program which effectively carried out the purposes of this section before October 21, 1980, to reimburse such State for all, or any portion of, the costs incurred by such State in conducting such program.

(2) There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1985 through 1988.

(d) No impediment to immediate remedial action

Nothing in this section shall be construed to provide that the Administrator or any State should, pending completion of the inventory required under this section, postpone undertaking any enforcement or remedial action with respect to any site at which hazardous waste has been treated, stored, or disposed of.

EDITORIAL NOTES

CODIFICATION

AMENDMENTS

1984—Subsec. (c)(2). Pub. L. 98–616 substituted "$25,000,000 for each of the fiscal years 1985 through 1988" for "$20,000,000".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6934. Monitoring, analysis, and testing
(a) Authority of Administrator

If the Administrator determines, upon receipt of any information, that—

(1) the presence of any hazardous waste at a facility or site at which hazardous waste is, or has been, stored, treated, or disposed of, or

(2) the release of any such waste from such facility or site

may present a substantial hazard to human health or the environment, he may issue an order requiring the owner or operator of such facility or site to conduct such monitoring, testing, analysis, and reporting with respect to such facility or site as the Administrator deems reasonable to ascertain the nature and extent of such hazard.

(b) Previous owners and operators

In the case of any facility or site not in operation at the time a determination is made under subsection (a) with respect to the facility or site, if the Administrator finds that the owner of such facility or site could not reasonably be expected to have actual knowledge of the presence of hazardous waste at such facility or site and of its potential for release, he may issue an order requiring the most recent previous owner or operator of such facility or site who could reasonably be expected to have such actual knowledge to carry out the actions referred to in subsection (a).

(c) Proposal

An order under subsection (a) or (b) shall require the person to whom such order is issued to submit to the Administrator within 30 days from the issuance of such order a proposal for carrying out the required monitoring, testing, analysis, and reporting. The Administrator may, after providing such person with an opportunity to confer with the Administrator respecting such proposal, require such person to carry out such monitoring, testing, analysis, and reporting in accordance with such proposal, and such modifications in such proposal as the Administrator deems reasonable to ascertain the nature and extent of the hazard.

(d) Monitoring, etc., carried out by Administrator

(1) If the Administrator determines that no owner or operator referred to in subsection (a) or (b) is able to conduct monitoring, testing, analysis, or reporting satisfactory to the Administrator, if the Administrator deems any such action carried out by an owner or operator to be unsatisfactory, or if the Administrator cannot initially determine that there is an owner or operator referred to in subsection (a) or (b) who is able to conduct such monitoring, testing, analysis, or reporting, he may—

(A) conduct monitoring, testing, or analysis (or any combination thereof) which he deems reasonable to ascertain the nature and extent of the hazard associated with the site concerned, or

(B) authorize a State or local authority or other person to carry out any such action,

and require, by order, the owner or operator referred to in subsection (a) or (b) to reimburse the Administrator or other authority or person for the costs of such activity.

(2) No order may be issued under this subsection requiring reimbursement of the costs of any action carried out by the Administrator which confirms the results of an order issued under subsection (a) or (b).

(3) For purposes of carrying out this subsection, the Administrator or any authority or other person authorized under paragraph (1), may exercise the authorities set forth in section 6927 of this title.

(e) Enforcement

The Administrator may commence a civil action against any person who fails or refuses to comply with any order issued under this section. Such action shall be brought in the United States district court in which the defendant is located, resides, or is doing business. Such court shall have jurisdiction to require compliance with such order and to assess a civil penalty of not to exceed $5,000 for each day during which such failure or refusal occurs.

Executive Documents

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6935. Restrictions on recycled oil

(a) In general

Not later than one year after October 15, 1980, the Administrator shall promulgate regulations establishing such performance standards and other requirements as may be necessary to protect the public health and the environment from hazards associated with recycled oil. In developing such regulations, the Administrator shall conduct an analysis of the economic impact of the regulations on the oil recycling industry. The Administrator shall ensure that such regulations do not discourage the recovery or recycling of used oil, consistent with the protection of human health and the environment.
(b) Identification or listing of used oil as hazardous waste

Not later than twelve months after November 8, 1984, the Administrator shall propose whether to list or identify used automobile and truck crankcase oil as hazardous waste under section 6921 of this title. Not later than twenty-four months after November 8, 1984, the Administrator shall make a final determination whether to list or identify used automobile and truck crankcase oil and other used oil as hazardous wastes under section 6921 of this title.

(c) Used oil which is recycled

(1) With respect to generators and transporters of used oil identified or listed as a hazardous waste under section 6921 of this title, the standards promulgated under section 6921(d), 6922, and 6923 of this title shall not apply to such used oil if such used oil is recycled.

(2)(A) In the case of used oil which is exempt under paragraph (1), not later than twenty-four months after November 8, 1984, the Administrator shall promulgate such standards under this subsection regarding the generation and transportation of used oil which is recycled as may be necessary to protect human health and the environment. In promulgating such regulations with respect to generators, the Administrator shall take into account the effect of such regulations on environmentally acceptable types of used oil recycling and the effect of such regulations on small quantity generators and generators which are small businesses (as defined by the Administrator).

(B) The regulations promulgated under this subsection shall provide that no generator of used oil which is exempt under paragraph (1) from the standards promulgated under section 6921(d), 6922, and 6923 of this title shall be subject to any manifest requirement or any associated recordkeeping and reporting requirement with respect to such used oil if such generator—

(i) either—

(1) enters into an agreement or other arrangement (including an agreement or arrangement with an independent transporter or with an agent of the recycler) for delivery of such used oil to a recycling facility which has a permit under section 6925(c) of this title (or for which a valid permit is deemed to be in effect under subsection (d)), or

(2) recycles such used oil at one or more facilities of the generator which has such a permit under section 6925 of this title (or for which a valid permit is deemed to have been issued under subsection (d) of this section);

(ii) such used oil is not mixed by the generator with other types of hazardous wastes; and

(iii) the generator maintains such records relating to such used oil, including records of agreements or other arrangements for delivery of such used oil to any recycling facility referred to in clause (i)(l), as the Administrator deems necessary to protect human health and the environment.

(3) The regulations under this subsection regarding the transportation of used oil which is exempt from the standards promulgated under section 6921(d), 6922, and 6923 of this title under paragraph (1) shall require the transporters of such used oil to deliver such used oil to a facility which has a valid permit under section 6925 of this title or which is deemed to have a valid permit under subsection (d) of this section. The Administrator shall also establish other standards for such transporters as may be necessary to protect human health and the environment.

(d) Permits

(1) The owner or operator of a facility which recycles used oil which is exempt under subsection (c)(1), shall be deemed to have a permit under this subsection for all such treatment or recycling (and any associated tank or container storage) if such owner and operator comply with standards promulgated by the Administrator under section 6924 of this title; except that the Administrator may require such owners and operators to obtain an individual permit under section 6925(c) of this title if he determines that an individual permit is necessary to protect human health and the environment.

(2) Notwithstanding any other provision of law, any generator who recycles used oil which is exempt under subsection (c) (1) shall not be required to obtain a permit under section 6925(c) of this title with respect to such used oil until the Administrator has promulgated standards under section 6924 of this title regarding the recycling of such used oil.

EDITORIAL NOTES

CODIFICATION

Section was formerly classified to section 6932 of this title.

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §§241(a), 242, designated existing provisions as subsec. (a) and inserted "consistent with the protection of human health and the environment" at end. Subsecs. (b) to (d). Pub. L. 98–616, §241(a), added subsecs. (b) to (d).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "sections".

§6936. Expansion during interim status

(a) Waste piles

The owner or operator of a waste pile qualifying for the authorization to operate under section 6925(e) of this title shall be subject to the same requirements for liners and leachate collection systems or equivalent protection provided in regulations promulgated by the Administrator under section 6924 of this title before October 1, 1982, or revised under section 6924(o) of this title (relating to minimum technological requirements), for new facilities receiving individual permits under subsection (c) of section 6925 of this title, with respect to each new unit, replacement of an existing unit, or lateral expansion of an existing unit that is within the waste management area identified in the permit application submitted under section 6925 of this title, and with respect to waste received beginning six months after November 8, 1984.

(b) Landfills and surface impoundments

(1) The owner or operator of a landfill or surface impoundment qualifying for the authorization to operate under section 6925(e) of this title shall be subject to the requirements of section 6924(o) of this title (relating to minimum technological requirements), with respect to each new unit, replacement of an existing unit, or lateral expansion of an existing unit that is within the waste management area identified in the permit application submitted under this section, and with respect to waste received beginning 6 months after November 8, 1984.

(2) The owner or operator of each unit referred to in paragraph (1) shall notify the Administrator (or the State, if appropriate) at least sixty days prior to receiving waste. The Administrator (or the State) shall require the filing, within six months of receipt of such notice, of an application for a final determination regarding the issuance of a permit for each facility submitting such notice.

(3) In the case of any unit in which the liner and leachate collection system has been installed pursuant to the requirements of this section and in good faith compliance with the Administrator's regulations and guidance documents governing liners and leachate collection systems, no liner or leachate collection system which is different from that which was so installed pursuant to this section shall be required for such unit by the Administrator when issuing the first permit under section 6925 of this title to such facility, except that the Administrator shall not be precluded from requiring installation of a new liner when the Administrator has reason to believe that any liner installed pursuant to the requirements of this section is leaking. The Administrator may, under section 6924 of this title, amend the requirements for liners and leachate collection systems required under this section as may be necessary to provide additional protection for human health and the environment.

§6937. Inventory of Federal agency hazardous waste facilities

(a) Program requirement; submission; availability; contents

Each Federal agency shall undertake a continuing program to compile, publish, and submit to the Administrator (and to the State in the case of sites in States having an authorized hazardous waste program) an inventory of each site which the Federal agency owns or operates or has owned or operated at which hazardous waste is stored, treated, or disposed of or has been disposed of at any time. The inventory shall be submitted every two years beginning January 31, 1986. Such inventory shall be available to the public as provided in section 6927(b) of this title. Information previously submitted by a Federal agency under section 9603 of this title, or under section 6925 or 6930 of this title, or under this section need not be resubmitted except that the agency shall update any previous submission to reflect the latest available data and information. The inventory shall include each of the following:

(1) A description of the location of each site at which any such treatment, storage, or disposal has taken place before the date on which permits are required under section 6925 of this title for such storage, treatment, or disposal, and where hazardous waste has been disposed, a description of hydrogeology of the site and the location of withdrawal wells and surface water within one mile of the site.

(2) Such information relating to the amount, nature, and toxicity of the hazardous waste in each site as may be necessary to determine the extent of any health hazard which may be associated with any site.

(3) Information on the known nature and extent of environmental contamination at each site, including a description of the monitoring data obtained.

(4) Information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated, stored, or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.

(5) A list of sites at which hazardous waste has been disposed and environmental monitoring data has not been obtained, and the reasons for the lack of monitoring data at each site.

(6) A description of response actions undertaken or contemplated at contaminated sites.
(7) An identification of the types of techniques of waste treatment, storage, or disposal which have been used at each site.
(8) The name and address and responsible Federal agency for each site, determined as of the date of preparation of the inventory.

(b) Environmental Protection Agency program
If the Administrator determines that any Federal agency under subsection (a) is not adequately providing information respecting the sites referred to in subsection (a), the Administrator shall notify the chief official of such agency. If within ninety days following such notification, the Federal agency has not undertaken a program to adequately provide such information, the Administrator shall carry out the inventory program for such agency.

§6938. Export of hazardous wastes

(a) In general
Beginning twenty-four months after November 8, 1984, no person shall export any hazardous waste identified or listed under this subchapter unless

1. (1)(A) such person has provided the notification required in subsection (c) of this section,
   (B) the government of the receiving country has consented to accept such hazardous waste,
   (C) a copy of the receiving country's written consent is attached to the manifest accompanying each waste shipment, and
   (D) the shipment conforms with the terms of the consent of the government of the receiving country required pursuant to subsection (e), or
   (2) the United States and the government of the receiving country have entered into an agreement as provided for in subsection (f) and the shipment conforms with the terms of such agreement.

(b) Regulations
Not later than twelve months after November 8, 1984, the Administrator shall promulgate the regulations necessary to implement this section. Such regulations shall become effective one hundred and eighty days after promulgation.

(c) Notification
Any person who intends to export a hazardous waste identified or listed under this subchapter beginning twelve months after November 8, 1984, shall, before such hazardous waste is scheduled to leave the United States, provide notification to the Administrator. Such notification shall contain the following information:

1. the name and address of the exporter;
   2. the types and estimated quantities of hazardous waste to be exported;
   3. the estimated frequency or rate at which such waste is to be exported; and the period of time over which such waste is to be exported;
   4. the ports of entry;
   5. a description of the manner in which such hazardous waste will be transported to and treated, stored, or disposed in the receiving country; and
   6. the name and address of the ultimate treatment, storage or disposal facility.

(d) Procedures for requesting consent of receiving country
Within thirty days of the Administrator's receipt of a complete notification under this section, the Secretary of State, acting on behalf of the Administrator, shall—

1. forward a copy of the notification to the government of the receiving country;
   2. advise the government that United States law prohibits the export of hazardous waste unless the receiving country consents to accept the hazardous waste;
   3. request the government to provide the Secretary with a written consent or objection to the terms of the notification; and
   4. forward to the government of the receiving country a description of the Federal regulations which would apply to the treatment, storage, and disposal of the hazardous waste in the United States.

(e) Conveyance of written consent to exporter
Within thirty days of receipt by the Secretary of State of the receiving country’s written consent or objection (or any subsequent communication withdrawing a prior consent or objection), the Administrator shall forward such a consent, objection, or other communication to the exporter.

(f) International agreements
Where there exists an international agreement between the United States and the government of the receiving country establishing notice, export, and enforcement procedures for the transportation, treatment, storage, and disposal of hazardous wastes, only the requirements of subsections (a)(2) and (g) shall apply.

(g) Reports
After November 8, 1984, any person who exports any hazardous waste identified or listed under section 6921 of this title shall file with the Administrator no later than March 1 of each year, a report summarizing the types, quantities, frequency, and ultimate destination of all such hazardous waste exported during the previous calendar year.
(h) Other standards

Nothing in this section shall preclude the Administrator from establishing other standards for the export of hazardous wastes under section 6922 of this title or section 6923 of this title.

1 So in original. Probably should be followed by a dash.

§6939. Domestic sewage

(a) Report

The Administrator shall, not later than 15 months after November 8, 1984, submit a report to the Congress concerning those substances identified or listed under section 6921 of this title which are not regulated under this subchapter by reason of the exclusion for mixtures of domestic sewage and other wastes that pass through a sewer system to a publicly owned treatment works. Such report shall include the types, size and number of generators which dispose of such substances in this manner, the types and quantities disposed of in this manner, and the identification of significant generators, wastes, and waste constituents not regulated under existing Federal law or regulated in a manner sufficient to protect human health and the environment.

(b) Revisions of regulations

Within eighteen months after submitting the report specified in subsection (a), the Administrator shall revise existing regulations and promulgate such additional regulations pursuant to this subchapter (or any other authority of the Administrator, including section 1317 of title 33) as are necessary to assure that substances identified or listed under section 6921 of this title which pass through a sewer system to a publicly owned treatment works are adequately controlled to protect human health and the environment.

(c) Report on wastewater lagoons

The Administrator shall, within thirty-six months after November 8, 1984, submit a report to Congress concerning wastewater lagoons at publicly owned treatment works and their effect on groundwater quality. Such report shall include—

(1) the number and size of such lagoons;
(2) the types and quantities of waste contained in such lagoons;
(3) the extent to which such waste has been or may be released from such lagoons and contaminate ground water; and
(4) available alternatives for preventing or controlling such releases.

The Administrator may utilize the authority of sections 6927 and 6934 of this title for the purpose of completing such report.

(d) Application of sections 6927 and 6930

The provisions of sections 6927 and 6930 of this title shall apply to solid or dissolved materials in domestic sewage to the same extent and in the same manner as such provisions apply to hazardous waste.

§6939a. Exposure information and health assessments

(a) Exposure information

Beginning on the date nine months after November 8, 1984, each application for a final determination regarding a permit under section 6925(c) of this title for a landfill or surface impoundment shall be accompanied by information reasonably ascertainable by the owner or operator on the potential for the public to be exposed to hazardous wastes or hazardous constituents through releases related to the unit. At a minimum, such information must address:

(1) reasonably foreseeable potential releases from both normal operations and accidents at the unit, including releases associated with transportation to or from the unit;
(2) the potential pathways of human exposure to hazardous wastes or constituents resulting from the releases described under paragraph (1); and
(3) the potential magnitude and nature of the human exposure resulting from such releases.

The owner or operator of a landfill or surface impoundment for which an application for such a final determination under section 6925(c) of this title has been submitted prior to November 8, 1984, shall submit the information required by this subsection to the Administrator (or the State, in the case of a State with an authorized program) no later than the date nine months after November 8, 1984.

(b) Health assessments

(1) The Administrator (or the State, in the case of a State with an authorized program) shall make the information required by subsection (a), together with other relevant information, available to the Agency for Toxic Substances and Disease Registry established by section 9604(i) of this title.
(2) Whenever in the judgment of the Administrator, or the State (in the case of a State with an authorized program), a
landfill or a surface impoundment poses a substantial potential risk to human health, due to the existence of releases of
hazardous constituents, the magnitude of contamination with hazardous constituents which may be the result of a release,
or the magnitude of the population exposed to such release or contamination, the Administrator or the State (with the
concurrency of the Administrator) may request the Administrator of the Agency for Toxic Substances and Disease Registry
to conduct a health assessment in connection with such facility and take other appropriate action with respect to such risks
as authorized by section 9604(b) and (i) of this title. If funds are provided in connection with such request the Administrator
of such Agency shall conduct such health assessment.

(c) Members of the public
Any member of the public may submit evidence of releases of or exposure to hazardous constituents from such a facility,
or as to the risks or health effects associated with such releases or exposure, to the Administrator of the Agency for Toxic
Substances and Disease Registry, the Administrator, or the State (in the case of a State with an authorized program).

(d) Priority
In determining the order in which to conduct health assessments under this subsection, the Administrator of the Agency
for Toxic Substances and Disease Registry shall give priority to those facilities or sites at which there is documented
evidence of release of hazardous constituents, at which the potential risk to human health appears highest, and for which in
the judgment of the Administrator of such Agency existing health assessment data is inadequate to assess the potential risk
to human health as provided in subsection (f).

(e) Periodic reports
The Administrator of such Agency shall issue periodic reports which include the results of all the assessments carried out
under this section. Such assessments or other activities shall be reported after appropriate peer review.

(f) "Health assessments" defined
For the purposes of this section, the term "health assessments" shall include preliminary assessments of the potential risk
to human health posed by individual sites and facilities subject to this section, based on such factors as the nature and
extent of contamination, the existence of potential for pathways of human exposure (including ground or surface water
contamination, air emissions, and food chain contamination), the size and potential susceptibility of the community within the
likely pathways of exposure, the comparison of expected human exposure levels to the short-term and long-term health
effects associated with identified contaminants and any available recommended exposure or tolerance limits for such
contaminants, and the comparison of existing morbidity and mortality data on diseases that may be associated with the
observed levels of exposure. The assessment shall include an evaluation of the risks to the potentially affected population
from all sources of such contaminants, including known point or nonpoint sources other than the site or facility in question. A
purpose of such preliminary assessments shall be to help determine whether full-scale health or epidemiological studies and
medical evaluations of exposed populations shall be undertaken.

(g) Cost recovery
In any case in which a health assessment performed under this section discloses the exposure of a population to the
release of a hazardous substance, the costs of such health assessment may be recovered as a cost of response under section 9607
of this title from persons causing or contributing to such release of such hazardous substance or, in the case of multiple
releases contributing to such exposure, to all such release.

§6939b. Interim control of hazardous waste injection

(a) Underground source of drinking water
No hazardous waste may be disposed of by underground injection—

(1) into a formation which contains (within one-quarter mile of the well used for such underground injection) an
underground source of drinking water; or
(2) above such a formation.

The prohibitions established under this section shall take effect 6 months after November 8, 1984, except in the case of
any State in which identical or more stringent prohibitions are in effect before such date under the Safe Drinking Water Act
[42 U.S.C. 300f et seq.].

(b) Actions under Comprehensive Environmental Response, Compensation, and Liability Act
Subsection (a) shall not apply to the injection of contaminated ground water into the aquifer from which it was withdrawn, if—

(1) such injection is—
(A) a response action taken under section 9604 or 9606 of this title, or
(B) part of corrective action required under this chapter 1

intended to clean up such contamination;
(2) such contaminated ground water is treated to substantially reduce hazardous constituents prior to such injection; and

1.
(3) such response action or corrective action will, upon completion, be sufficient to protect human health and the environment.

(c) Enforcement
In addition to enforcement under the provisions of this chapter, the prohibitions established under paragraphs (1) and (2) of subsection (a) shall be enforceable under the Safe Drinking Water Act [42 U.S.C. 300f et seq.] in any State—

(1) which has adopted identical or more stringent prohibitions under part C of the Safe Drinking Water Act [42 U.S.C. 300h et seq.] and which has assumed primary enforcement responsibility under that Act for enforcement of such prohibitions; or

(2) in which the Administrator has adopted identical or more stringent prohibitions under the Safe Drinking Water Act [42 U.S.C. 300f et seq.] and is exercising primary enforcement responsibility under that Act for enforcement of such prohibitions.

(d) Definitions
The terms "primary enforcement responsibility", "underground source of drinking water", "formation" and "well" have the same meanings as provided in regulations of the Administrator under the Safe Drinking Water Act [42 U.S.C. 300f et seq.]. The term "Safe Drinking Water Act" means title XIV of the Public Health Service Act.

EDITORIAL NOTES

REFERENCES IN TEXT
Title XIV of the Public Health Service Act, referred to in subsec. (d), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, known as the Safe Drinking Water Act, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. Part C of the Act is classified generally to part C (§300h et seq.) of subchapter XII of chapter 6A of this title. For complete classification of this Act to the Code, see Short Title note set out under section 201 of this title and Tables.

CODIFICATION
Section was formerly classified to section 6979a of this title, prior to renumbering by Pub. L. 99–339.

AMENDMENTS
1986—Subsec. (c). Pub. L. 99–339, §201(c)(1), substituted "enforcement under the provisions of this chapter" for "enforcement under sections 6972 and 6973 of this title".

1 So in original. Probably should be followed by a comma.

§6939c. Mixed waste inventory reports and plan
(a) Mixed waste inventory reports
(1) Requirement
Not later than 180 days after October 6, 1992, the Secretary of Energy shall submit to the Administrator and to the Governor of each State in which the Department of Energy stores or generates mixed wastes the following reports:

(A) A report containing a national inventory of all such mixed wastes, regardless of the time they were generated, on a State-by-State basis.

(B) A report containing a national inventory of mixed waste treatment capacities and technologies.

(2) Inventory of wastes
The report required by paragraph (1)(A) shall include the following:

(A) A description of each type of mixed waste at each Department of Energy facility in each State, including, at a minimum, the name of the waste stream.

(B) The amount of each type of mixed waste currently stored at each Department of Energy facility in each State, set forth separately by mixed waste that is subject to the land disposal prohibition requirements of section 6924 of this title and mixed waste that is not subject to such prohibition requirements.

(C) An estimate of the amount of each type of mixed waste the Department expects to generate in the next 5 years at each Department of Energy facility in each State.

(D) A description of any waste minimization actions the Department has implemented at each Department of Energy facility in each State for each mixed waste stream.

(E) The EPA hazardous waste code for each type of mixed waste containing waste that has been characterized at each Department of Energy facility in each State.

(F) An inventory of each type of waste that has not been characterized by sampling and analysis at each Department of Energy facility in each State.
(G) The basis for the Department's determination of the applicable hazardous waste code for each type of mixed waste at each Department of Energy facility and a description of whether the determination is based on sampling and analysis conducted on the waste or on the basis of process knowledge.

(H) A description of the source of each type of mixed waste at each Department of Energy facility in each State.

(I) The land disposal prohibition treatment technology or technologies specified for the hazardous waste component of each type of mixed waste at each Department of Energy facility in each State.

(J) A statement of whether and how the radionuclide content of the waste alters or affects use of the technologies described in subparagraph (I).

(3) Inventory of treatment capacities and technologies

The report required by paragraph (1)(B) shall include the following:

(A) An estimate of the available treatment capacity for each waste described in the report required by paragraph (1) (A) for which treatment technologies exist.

(B) A description, including the capacity, number and location, of each treatment unit considered in calculating the estimate under subparagraph (A).

(C) A description, including the capacity, number and location, of any existing treatment unit that was not considered in calculating the estimate under subparagraph (A) but that could, alone or in conjunction with other treatment units, be used to treat any of the wastes described in the report required by paragraph (1)(A) to meet the requirements of regulations promulgated pursuant to section 6924(m) of this title.

(D) For each unit listed in subparagraph (C), a statement of the reasons why the unit was not included in calculating the estimate under subparagraph (A).

(E) A description, including the capacity, number, location, and estimated date of availability, of each treatment unit currently proposed to increase the treatment capacities estimated under subparagraph (A).

(F) For each waste described in the report required by paragraph (1)(A) for which the Department has determined no treatment technology exists, information sufficient to support such determination and a description of the technological approaches the Department anticipates will need to be developed to treat the waste.

(4) Comments and revisions

Not later than 90 days after the date of the submission of the reports by the Secretary of Energy under paragraph (1), the Administrator and each State which received the reports shall submit any comments they may have concerning the reports to the Department of Energy. The Secretary of Energy shall consider and publish the comments prior to publication of the final report.

(5) Requests for additional information

Nothing in this subsection limits or restricts the authority of States or the Administrator to request additional information from the Secretary of Energy.

(b) Plan for development of treatment capacities and technologies

(1) Plan requirement

(A)(i) For each facility at which the Department of Energy generates or stores mixed wastes, except any facility subject to a permit, agreement, or order described in clause (ii), the Secretary of Energy shall develop and submit, as provided in paragraph (2), a plan for developing treatment capacities and technologies to treat all of the facility's mixed wastes, regardless of the time they were generated, to the standards promulgated pursuant to section 6924(m) of this title.

(ii) Clause (i) shall not apply with respect to any facility subject to any permit establishing a schedule for treatment of such wastes, or any existing agreement or administrative or judicial order governing the treatment of such wastes, to which the State is a party.

(B) Each plan shall contain the following:

(i) For mixed wastes for which treatment technologies exist, a schedule for submitting all applicable permit applications, entering into contracts, initiating construction, conducting systems testing, commencing operations, and processing backlogged and currently generated mixed wastes.

(ii) For mixed wastes for which no treatment technologies exist, a schedule for identifying and developing such technologies, identifying the funding requirements for the identification and development of such technologies, submitting treatability study exemptions, and submitting research and development permit applications.

(iii) For all cases where the Department proposes radionuclide separation of mixed wastes, or materials derived from mixed wastes, it shall provide an estimate of the volume of waste generated by each case of radionuclide separation, the volume of waste that would exist or be generated without radionuclide separation, the estimated costs of waste treatment and disposal if radionuclide separation is used compared to the estimated costs if it is not used, and the assumptions underlying such waste volume and cost estimates.

(C) A plan required under this subsection may provide for centralized, regional, or on-site treatment of mixed wastes, or any combination thereof.

(2) Review and approval of plan

(A) For each facility that is located in a State (i) with authority under State law to prohibit land disposal of mixed waste until the waste has been treated and (ii) with both authority under State law to regulate the hazardous components of mixed waste and authorization from the Environmental Protection Agency under section 6926 of this title to regulate the hazardous components of mixed waste, the Secretary of Energy shall submit the plan required under paragraph (1) to the appropriate State regulatory officials for their review and approval, modification, or disapproval. In reviewing the plan, the State shall consider the need for regional treatment facilities. The State shall consult with the Administrator and any other
State in which a facility affected by the plan is located and consider public comments in making its determination on the plan. The State shall approve, approve with modifications, or disapprove the plan within 6 months after receipt of the plan.

(B) For each facility located in a State that does not have the authority described in subparagraph (A), the Secretary shall submit the plan required under paragraph (1) to the Administrator of the Environmental Protection Agency for review and approval, modification, or disapproval. A copy of the plan also shall be provided by the Secretary to the State in which such facility is located. In reviewing the plan, the Administrator shall consider the need for regional treatment facilities. The Administrator shall consult with the State or States in which any facility affected by the plan is located and consider public comments in making a determination on the plan. The Administrator shall approve, approve with modifications, or disapprove the plan within 6 months after receipt of the plan.

(C) Upon the approval of a plan under this paragraph by the Administrator or a State, the Administrator shall issue an order under section 6928(a) of this title, or the State shall issue an order under appropriate State authority, requiring compliance with the approved plan.

(3) Public participation

Upon submission of a plan by the Secretary of Energy to the Administrator or a State, and before approval of the plan by the Administrator or a State, the Administrator or State shall publish a notice of the availability of the submitted plan and make such submitted plan available to the public on request.

(4) Revisions of plan

If any revisions of an approved plan are proposed by the Secretary of Energy or required by the Administrator or a State, the provisions of paragraphs (2) and (3) shall apply to the revisions in the same manner as they apply to the original plan.

(5) Waiver of plan requirement

(A) A State may waive the requirement for the Secretary of Energy to develop and submit a plan under this subsection for a facility located in the State if the State (i) enters into an agreement with the Secretary of Energy that addresses compliance at that facility with section 6924(j) of this title with respect to mixed waste, and (ii) issues an order requiring compliance with such agreement and which is in effect.

(B) Any violation of an agreement or order referred to in subparagraph (A) is subject to the waiver of sovereign immunity contained in section 6961(a) of this title.

(c) Schedule and progress reports

(1) Schedule

Not later than 6 months after October 6, 1992, the Secretary of Energy shall publish in the Federal Register a schedule for submitting the plans required under subsection (b).

(2) Progress reports

(A) Not later than the deadlines specified in subparagraph (B), the Secretary of Energy shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a progress report containing the following:

(i) An identification, by facility, of the plans that have been submitted to States or the Administrator of the Environmental Protection Agency pursuant to subsection (b).

(ii) The status of State and Environmental Protection Agency review and approval of each such plan.

(iii) The number of orders requiring compliance with such plans that are in effect.

(iv) For the first 2 reports required under this paragraph, an identification of the plans required under such subsection (b) that the Secretary expects to submit in the 12-month period following submission of the report.

(B) The Secretary of Energy shall submit a report under subparagraph (A) not later than 12 months after October 6, 1992, 24 months after October 6, 1992, and 36 months after October 6, 1992.

STATUTORY NOTES AND RELATED SUBSIDIARIES

CHANGE OF NAME

GAO REPORT

Pub. L. 102–386, title I, §105(c), Oct. 6, 1992, 106 Stat. 1512, provided that not later than 18 months after Oct. 6, 1992, the Comptroller General would submit to Congress a report, containing certain specified data, on the Department of Energy's progress in complying with subsec. (b) of this section.
§6939d. Public vessels

(a) Waste generated on public vessels
Any hazardous waste generated on a public vessel shall not be subject to the storage, manifest, inspection, or recordkeeping requirements of this chapter until such waste is transferred to a shore facility, unless—

(1) the waste is stored on the public vessel for more than 90 days after the public vessel is placed in reserve or is otherwise no longer in service; or

(2) the waste is transferred to another public vessel within the territorial waters of the United States and is stored on such vessel or another public vessel for more than 90 days after the date of transfer.

(b) Computation of storage period
For purposes of subsection (a), the 90-day period begins on the earlier of—

(1) the date on which the public vessel on which the waste was generated is placed in reserve or is otherwise no longer in service; or

(2) the date on which the waste is transferred from the public vessel on which the waste was generated to another public vessel within the territorial waters of the United States;

and continues, without interruption, as long as the waste is stored on the original public vessel (if in reserve or not in service) or another public vessel.

(c) Definitions
For purposes of this section:

(1) The term "public vessel" means a vessel owned or bareboat chartered and operated by the United States, or by a foreign nation, except when the vessel is engaged in commerce.

(2) The terms "in reserve" and "in service" have the meanings applicable to those terms under section 8663 and sections 8674 through 8678 of title 10 and regulations prescribed under those sections.

(d) Relationship to other law
Nothing in this section shall be construed as altering or otherwise affecting the provisions of section 8681 of title 10.

EDITORIAL NOTES

AMENDMENTS

2018—Subsec. (c)(2). Pub. L. 115–232, §809(n)(2)(A), substituted "section 8663 and sections 8674 through 8678 of title 10" for "section 7293 and sections 7304 through 7308 of title 10".

Subsec. (d). Pub. L. 115–232, §809(n)(2)(B), substituted "section 8681 of title 10" for "section 7311 of title 10".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 2018 AMENDMENT

Amendment by Pub. L. 115–232 effective Feb. 1, 2019, with provision for the coordination of amendments and special rule for certain redesignations, see section 800 of Pub. L. 115–232, set out as a note preceding section 3001 of Title 10, Armed Forces.

§6939e. Federally owned treatment works

(a) In general
For purposes of section 6903(27) of this title, the phrase "but does not include solid or dissolved material in domestic sewage" shall apply to any solid or dissolved material introduced by a source into a federally owned treatment works if—

(1) such solid or dissolved material is subject to a pretreatment standard under section 1317 of title 33, and the source is in compliance with such standard;

(2) for a solid or dissolved material for which a pretreatment standard has not been promulgated pursuant to section 1317 of title 33, the Administrator has promulgated a schedule for establishing such a pretreatment standard which would be applicable to such solid or dissolved material not later than 7 years after October 6, 1992, such standard is promulgated on or before the date established in the schedule, and after the effective date of such standard the source is in compliance with such standard;

(3) such solid or dissolved material is not covered by paragraph (1) or (2) and is not prohibited from land disposal under subsections 1(d), (e), (f), or (g) of section 6924 of this title because such material has been treated in accordance with section 6924(m) of this title; or
(4) notwithstanding paragraphs 1 (1), (2), or (3), such solid or dissolved material is generated by a household or person which generates less than 100 kilograms of hazardous waste per month unless such solid or dissolved material would otherwise be an acutely hazardous waste and subject to standards, regulations, or other requirements under this chapter notwithstanding the quantity generated.

(b) Prohibition
It is unlawful to introduce into a federally owned treatment works any pollutant that is a hazardous waste.

(c) Enforcement
(1) Actions taken to enforce this section shall not require closure of a treatment works if the hazardous waste is removed or decontaminated and such removal or decontamination is adequate, in the discretion of the Administrator or, in the case of an authorized State, of the State, to protect human health and the environment.

(2) Nothing in this subsection shall be construed to prevent the Administrator or an authorized State from ordering the closure of a treatment works if the Administrator or State determines such closure is necessary for protection of human health and the environment.

(3) Nothing in this subsection shall be construed to affect any other enforcement authorities available to the Administrator or a State under this subchapter.

(d) "Federally owned treatment works" defined
For purposes of this section, the term "federally owned treatment works" means a facility that is owned and operated by a department, agency, or instrumentality of the Federal Government treating wastewater, a majority of which is domestic sewage, prior to discharge in accordance with a permit issued under section 1342 of title 33.

(e) Savings clause
Nothing in this section shall be construed as affecting any agreement, permit, or administrative or judicial order, or any condition or requirement contained in such an agreement, permit, or order, that is in existence on October 6, 1992, and that requires corrective action or closure at a federally owned treatment works or solid waste management unit or facility related to such a treatment works.

1 So in original. Probably should be singular.

§6939f. Long-term storage

(a) Designation of facility

(1) In general
Not later than January 1, 2010, the Secretary of Energy (referred to in this section as the "Secretary") shall designate a facility or facilities of the Department of Energy, which shall not include the Y–12 National Security Complex or any other portion or facility of the Oak Ridge Reservation of the Department of Energy, for the purpose of long-term management and storage of elemental mercury generated within the United States.

(2) Operation of facility
Not later than January 1, 2019, the facility designated in paragraph (1) shall be operational and shall accept custody, for the purpose of long-term management and storage, of elemental mercury generated within the United States and delivered to such facility.

(b) Fees

(1) In general

(A) Assessment and collection
After consultation with persons who are likely to deliver elemental mercury to a designated facility for long-term management and storage under the program prescribed in subsection (a), and with other interested persons, the Secretary shall assess and collect a fee at the time of delivery for providing such management and storage, based on the pro rata cost of long-term management and storage of elemental mercury delivered to the facility.

(B) Amount
The amount of the fees described in subparagraph (A)—
(i) shall be made publicly available not later than October 1, 2018;
(ii) may be adjusted annually;
(iii) shall be set in an amount sufficient to cover the costs described in paragraph (2), subject to clause (iv); and
(iv) for generators temporarily accumulating elemental mercury in a facility subject to subparagraphs (B) and (D)(iv) of subsection (g)(2) if the facility designated in subsection (a) is not operational by January 1, 2019, shall be adjusted to subtract the cost of the temporary accumulation during the period in which the facility designated under subsection (a) is not operational.

(C) Conveyance of title and permitting
If the facility designated in subsection (a) is not operational by January 1, 2020, the Secretary—
(i) shall immediately accept the conveyance of title to all elemental mercury that has accumulated in facilities in accordance with subsection (g)(2)(D), before January 1, 2020, and deliver the accumulated mercury to the facility designated under subsection (a) on the date on which the facility becomes operational;

(ii) shall pay any applicable Federal permitting costs, including the costs for permits issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)); and

(iii) shall store, or pay the cost of storage of, until the time at which a facility designated in subsection (a) is operational, accumulated mercury to which the Secretary has title under this subparagraph in a facility that has been issued a permit under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)).

(2) Costs

The costs referred to in paragraph (1)(B)(iii) are the costs to the Department of Energy of providing such management and storage, including facility operation and maintenance, security, monitoring, reporting, personnel, administration, inspections, training, fire suppression, closure, and other costs required for compliance with applicable law. Such costs shall not include costs associated with land acquisition or permitting of a designated facility under the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.] or other applicable law. Building design and building construction costs shall only be included to the extent that the Secretary finds that the management and storage of elemental mercury accepted under the program under this section cannot be accomplished without construction of a new building or buildings.

(c) Report

Not later than 60 days after the end of each Federal fiscal year, the Secretary shall transmit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on all of the costs incurred in the previous fiscal year associated with the long-term management and storage of elemental mercury. Such report shall set forth separately the costs associated with activities taken under this section.

(d) Management standards for a facility

(1) Guidance

Not later than October 1, 2009, the Secretary, after consultation with the Administrator of the Environmental Protection Agency and all appropriate State agencies in affected States, shall make available, including to potential users of the long-term management and storage program established under subsection (a), guidance that establishes procedures and standards for the receipt, management, and long-term storage of elemental mercury at a designated facility or facilities, including requirements to ensure appropriate use of flasks or other suitable shipping containers. Such procedures and standards shall be protective of human health and the environment and shall ensure that the elemental mercury is stored in a safe, secure, and effective manner. In addition to such procedures and standards, elemental mercury managed and stored under this section at a designated facility shall be subject to the requirements of the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], including the requirements of subtitle C of that Act [42 U.S.C. 6921 et seq.], except as provided in subsection (g)(2) of this section. A designated facility is authorized to operate under interim status pursuant to section 3005(e) of the Solid Waste Disposal Act [42 U.S.C. 6925(e)] until a final decision on a permit application is made pursuant to section 3005(c) of the Solid Waste Disposal Act [42 U.S.C. 6925(c)]. Not later than January 1, 2020, the Administrator of the Environmental Protection Agency (or an authorized State) shall issue a final decision on the permit application.

(2) Training

The Secretary shall conduct operational training and emergency training for all staff that have responsibilities related to elemental mercury management, transfer, storage, monitoring, or response.

(3) Equipment

The Secretary shall ensure that each designated facility has all equipment necessary for routine operations, emergencies, monitoring, checking inventory, loading, and storing elemental mercury at the facility.

(4) Fire detection and suppression systems

The Secretary shall—

(A) ensure the installation of fire detection systems at each designated facility, including smoke detectors and heat detectors; and

(B) ensure the installation of a permanent fire suppression system, unless the Secretary determines that a permanent fire suppression system is not necessary to protect human health and the environment.

(e) Indemnification of persons delivering elemental mercury

(1) In general

(A) Except as provided in subparagraph (B) and subject to paragraph (2), the Secretary shall hold harmless, defend, and indemnify in full any person who delivers elemental mercury to a designated facility under the program established under subsection (a) from and against any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage (including death, illness, or loss of or damage to property or economic loss) that results from, or is in any manner predicated upon, the release or threatened release of elemental mercury as a result of acts or omissions occurring after such mercury is delivered to a designated facility described in subsection (a).

(B) To the extent that a person described in subparagraph (A) contributed to any such release or threatened release, subparagraph (A) shall not apply.

(2) Conditions

No indemnification may be afforded under this subsection unless the person seeking indemnification—
(A) notifies the Secretary in writing within 30 days after receiving written notice of the claim for which indemnification is sought;
(B) furnishes to the Secretary copies of pertinent papers the person receives;
(C) furnishes evidence or proof of any claim, loss, or damage covered by this subsection; and
(D) provides, upon request by the Secretary, access to the records and personnel of the person for purposes of defending or settling the claim or action.

(3) Authority of Secretary
(A) In any case in which the Secretary determines that the Department of Energy may be required to make indemnification payments to a person under this subsection for any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage referred to in paragraph (1)(A), the Secretary may settle or defend, on behalf of that person, the claim for personal injury or property damage.
(B) In any case described in subparagraph (A), if the person to whom the Department of Energy may be required to make indemnification payments does not allow the Secretary to settle or defend the claim, the person may not be afforded indemnification with respect to that claim under this subsection.

(f) Terms, conditions, and procedures
The Secretary is authorized to establish such terms, conditions, and procedures as are necessary to carry out this section.

(g) Effect on other law
(1) In general
Except as provided in paragraph (2), nothing in this section changes or affects any Federal, State, or local law or the obligation of any person to comply with such law.

(2) Exception
(A) Elemental mercury that the Secretary is storing on a long-term basis shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)). For the purposes of section 3004(j) of the Solid Waste Disposal Act, a generator accumulating elemental mercury destined for a facility designated by the Secretary under subsection (a) for 90 days or less shall be deemed to be accumulating the mercury to facilitate proper treatment, recovery, or disposal.
(B) Elemental mercury may be stored at a facility with respect to which any permit has been issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)), and shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)) if—
   (i) the Secretary is unable to accept the mercury at a facility designated by the Secretary under subsection (a) for reasons beyond the control of the owner or operator of the permitted facility;
   (ii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will ship the mercury to the designated facility when the Secretary is able to accept the mercury; and
   (iii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will not sell, or otherwise place into commerce, the mercury.

(C) Subparagraph (B) shall not apply to mercury with respect to which the owner or operator of the permitted facility fails to comply with a certification provided under clause (ii) or (iii) of that subparagraph.
(D) A generator producing elemental mercury incidentally from the beneficiation or processing of ore or related pollution control activities may accumulate the mercury produced onsite that is destined for a facility designated by the Secretary under subsection (a) for more than 90 days without a permit issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)), and shall not be subject to the storage prohibition of section 3004(j) of that Act (42 U.S.C. 6924(j)), if—
   (i) the Secretary is unable to accept the mercury at a facility designated by the Secretary under subsection (a) for reasons beyond the control of the generator;
   (ii) the generator certifies in writing to the Secretary that the generator will ship the mercury to a designated facility when the Secretary is able to accept the mercury;
   (iii) the generator certifies in writing to the Secretary that the generator is storing only mercury the generator has produced or recovered onsite and will not sell, or otherwise place into commerce, the mercury; and
   (iv) the generator has obtained an identification number under section 262.12 of title 40, Code of Federal Regulations, and complies with the requirements described in paragraphs (1) through (4) of section 262.34(a) of title 40, Code of Federal Regulations (as in effect on the date of enactment of this subparagraph).

(E) MANAGEMENT STANDARDS FOR TEMPORARY STORAGE.—Not later than January 1, 2017, the Secretary, after consultation with the Administrator of the Environmental Protection Agency and State agencies in affected States, shall develop and make available guidance that establishes procedures and standards for the management and short-term storage of elemental mercury at a generator covered under subparagraph (D), including requirements to ensure appropriate use of flasks or other suitable containers. Such procedures and standards shall be protective of health and the environment and shall ensure that the elemental mercury is stored in a safe, secure, and effective manner. A generator may accumulate mercury in accordance with subparagraph (D) immediately upon enactment of this subparagraph, and notwithstanding that guidance called for by this paragraph has not been developed or made available.

(h) Study
Not later than July 1, 2014, the Secretary shall transmit to the Congress the results of a study, conducted in consultation with the Administrator of the Environmental Protection Agency, that—

(1) determines the impact of the long-term storage program under this section on mercury recycling; and

(2) includes proposals, if necessary, to mitigate any negative impact identified under paragraph (1).

EDITORIAL NOTES

REFERENCES IN TEXT

AMENDMENTS

Subsec. (b)(1)(A). Pub. L. 114–182, §10(c)(2)(A)(ii), designated first sentence of par. (1) as subpar. (A) and inserted heading. Former subpar. (A) redesignated cl. (i) of subpar. (B).

Subsec. (b)(1)(B). Pub. L. 114–182, §10(c)(2)(A)(i), (iii), (iv), designated second sentence of par. (1) as subpar. (B), inserted heading, substituted "The amount of the fees described in subparagraph (A)" for "The amount of such fees" in introductory provisions, redesignated former subpars. (A) to (C) of par. (1) as cl. (i) to (iii), respectively, of subpar. (B) and realigned margins, substituted "publicly available not later than October 1, 2018" for "publicly available not later than October 1, 2012" in cl. (i) and ", subject to clause (iv); and" for period at end of cl. (iii), and added cl. (iv).

Subsec. (g)(2)(C). Pub. L. 114–182, §10(c)(3)(A), (B), redesignated concluding provisions of subpar. (B) as (C), substituted "Subparagraph (B)" for "This subparagraph", and inserted "of that subparagraph" before period at end.

Subsec. (g)(2)(D), (E). Pub. L. 114–182, §10(c)(3)(C), added subpars. (D) and (E).

CODIFICATION

Section was enacted as part of the Mercury Export Ban Act of 2008, and not as part of the Solid Waste Disposal Act which comprises this chapter.

STATUTORY NOTES AND RELATED SUBSIDIARIES

DEPOSIT OF FEES

§6939g. Hazardous waste electronic manifest system

(a) Definitions

In this section:

(1) Board

The term "Board" means the Hazardous Waste Electronic Manifest System Advisory Board established under subsection (f).

(2) Fund

The term "Fund" means the Hazardous Waste Electronic Manifest System Fund established by subsection (d).

(3) Person

The term "person" includes an individual, corporation (including a Government corporation), company, association, firm, partnership, society, joint stock company, trust, municipality, commission, Federal agency, State, political subdivision of a
State, or interstate body.

(4) System
The term "system" means the hazardous waste electronic manifest system established under subsection (b).

(5) User
The term "user" means a hazardous waste generator, a hazardous waste transporter, an owner or operator of a hazardous waste treatment, storage, recycling, or disposal facility, or any other person that—

(A) is required to use a manifest to comply with any Federal or State requirement to track the shipment, transportation, and receipt of hazardous waste or other material that is shipped from the site of generation to an off-site facility for treatment, storage, disposal, or recycling; and

(B)(i) elects to use the system to complete and transmit an electronic manifest format; or

(ii) submits to the system for data processing purposes a paper copy of the manifest (or data from such a paper copy), in accordance with such regulations as the Administrator may promulgate to require such a submission.

(b) Establishment
Not later than 3 years after October 5, 2012, the Administrator shall establish a hazardous waste electronic manifest system that may be used by any user.

(c) User fees

(1) In general
In accordance with paragraph (4), the Administrator may impose on users such reasonable service fees as the Administrator determines to be necessary to pay costs incurred in developing, operating, maintaining, and upgrading the system, including any costs incurred in collecting and processing data from any paper manifest submitted to the system after the date on which the system enters operation.

(2) Collection of fees
The Administrator shall—

(A) collect the fees described in paragraph (1) from the users in advance of, or as reimbursement for, the provision by the Administrator of system-related services; and

(B) deposit the fees in the Fund.

(3) Fee structure

(A) In general
The Administrator, in consultation with information technology vendors, shall determine through the contract award process described in subsection (e) the fee structure that is necessary to recover the full cost to the Administrator of providing system-related services, including—

(i) contractor costs relating to—

(I) materials and supplies;

(II) contracting and consulting;

(III) overhead;

(IV) information technology (including costs of hardware, software, and related services);

(V) information management;

(VI) collection of service fees;

(VII) reporting and accounting; and

(VIII) project management; and

(ii) costs of employment of direct and indirect Government personnel dedicated to establishing, managing, and maintaining the system.

(B) Adjustments in fee amount

(i) In general
The Administrator, in consultation with the Board, shall increase or decrease the amount of a service fee determined under the fee structure described in subparagraph (A) to a level that will—

(I) result in the collection of an aggregate amount for deposit in the Fund that is sufficient and not more than reasonably necessary to cover current and projected system-related costs (including any necessary system upgrades); and

(II) minimize, to the maximum extent practicable, the accumulation of unused amounts in the Fund.

(ii) Exception for initial period of operation
The requirement described in clause (i)(II) shall not apply to any additional fees that accumulate in the Fund, in an amount that does not exceed $2,000,000, during the 3-year period beginning on the date on which the system enters operation.

(iii) Timing of adjustments
Adjustments to service fees described in clause (i) shall be made—

(I) initially, at the time at which initial development costs of the system have been recovered by the Administrator such that the service fee may be reduced to reflect the elimination of the system development component of the fee; and
(II) periodically thereafter, upon receipt and acceptance of the findings of any annual accounting or auditing report under subsection (d)(3), if the report discloses a significant disparity for a fiscal year between the funds collected from service fees under this subsection for the fiscal year and expenditures made for the fiscal year to provide system-related services.

(4) Crediting and availability of fees

Fees authorized under this section shall be collected and available for obligation only to the extent and in the amount provided in advance in appropriations Acts.

(d) Hazardous Waste Electronic Manifest System Fund

(1) Establishment

There is established in the Treasury of the United States a revolving fund, to be known as the "Hazardous Waste Electronic Manifest System Fund", consisting of such amounts as are deposited in the Fund under subsection (c)(2)(B).

(2) Expenditures from Fund

(A) In general

Only to the extent provided in advance in appropriations Acts, on request by the Administrator, the Secretary of the Treasury shall transfer from the Fund to the Administrator amounts appropriated to pay costs incurred in developing, operating, maintaining, and upgrading the system under subsection (c).

(B) Use of funds by Administrator

Fees collected by the Administrator and deposited in the Fund under this section shall be available to the Administrator subject to appropriations Acts for use in accordance with this section without fiscal year limitation.

(C) Oversight of funds

The Administrator shall carry out all necessary measures to ensure that amounts in the Fund are used only to carry out the goals of establishing, operating, maintaining, upgrading, managing, supporting, and overseeing the system.

(3) Accounting and auditing

(A) Accounting

For each 2-fiscal-year period, the Administrator shall prepare and submit to the Committee on Environment and Public Works and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce and the Committee on Appropriations of the House of Representatives a report that includes—

(i) an accounting of the fees paid to the Administrator under subsection (c) and disbursed from the Fund for the period covered by the report, as reflected by financial statements provided in accordance with—

(I) the Chief Financial Officers Act of 1990 (Public Law 101–576; 104 Stat. 2838) and amendments made by that Act; and

(II) the Government Management Reform Act of 1994 (Public Law 103–356; 108 Stat. 3410) and amendments made by that Act; and

(ii) an accounting describing actual expenditures from the Fund for the period covered by the report for costs described in subsection (c)(1).

(B) Auditing

(i) In general

For the purpose of section 3515(c) of title 31, the Fund shall be considered a component of an Executive agency.

(ii) Components of audit

The annual audit required in accordance with sections 3515(b) and 3521 of title 31 of the financial statements of activities carried out using amounts from the Fund shall include an analysis of—

(I) the fees collected and disbursed under this section;

(II) the reasonableness of the fee structure in place as of the date of the audit to meet current and projected costs of the system;

(III) the level of use of the system by users; and

(IV) the success to date of the system in operating on a self-sustaining basis and improving the efficiency of tracking waste shipments and transmitting waste shipment data.

(iii) Federal responsibility

The Inspector General of the Environmental Protection Agency shall—

(I) conduct the annual audit described in clause (ii); and

(II) submit to the Administrator a report that describes the findings and recommendations of the Inspector General resulting from the audit.

(e) Contracts

(1) Authority to enter into contracts funded by service fees

After consultation with the Secretary of Transportation, the Administrator may enter into 1 or more information technology contracts with entities determined to be appropriate by the Administrator (referred to in this subsection as "contractors") for the provision of system-related services.
(2) Term of contract
A contract awarded under this subsection shall have a term of not more than 10 years.

(3) Achievement of goals
The Administrator shall ensure, to the maximum extent practicable, that a contract awarded under this subsection—
(A) is performance-based;
(B) identifies objective outcomes; and
(C) contains performance standards that may be used to measure achievement and goals to evaluate the success of a contractor in performing under the contract and the right of the contractor to payment for services under the contract, taking into consideration that a primary measure of successful performance shall be the development of a hazardous waste electronic manifest system that—
(i) meets the needs of the user community (including States that rely on data contained in manifests);
(ii) attracts sufficient user participation and service fee revenues to ensure the viability of the system;
(iii) decreases the administrative burden on the user community; and
(iv) provides the waste receipt data applicable to the biennial reports required by section 6922(a)(6) of this title.

(4) Payment structure
Each contract awarded under this subsection shall include a provision that specifies—
(A) the service fee structure of the contractor that will form the basis for payments to the contractor; and
(B) the fixed-share ratio of monthly service fee revenues from which the Administrator shall reimburse the contractor for system-related development, operation, and maintenance costs.

(5) Cancellation and termination
(A) In general
If the Administrator determines that sufficient funds are not made available for the continuation in a subsequent fiscal year of a contract entered into under this subsection, the Administrator may cancel or terminate the contract.

(B) Negotiation of amounts
The amount payable in the event of cancellation or termination of a contract entered into under this subsection shall be negotiated with the contractor at the time at which the contract is awarded.

(6) No effect on ownership
Regardless of whether the Administrator enters into a contract under this subsection, the system shall be owned by the Federal Government.

(f) Hazardous Waste Electronic Manifest System Advisory Board

(1) Establishment
Not later than 3 years after October 5, 2012, the Administrator shall establish a board to be known as the "Hazardous Waste Electronic Manifest System Advisory Board".

(2) Composition
The Board shall be composed of 9 members, of which—
(A) 1 member shall be the Administrator (or a designee), who shall serve as Chairperson of the Board; and
(B) 8 members shall be individuals appointed by the Administrator—
(i) at least 2 of whom shall have expertise in information technology;
(ii) at least 3 of whom shall have experience in using or represent users of the manifest system to track the transportation of hazardous waste under this subchapter (or an equivalent State program); and
(iii) at least 3 of whom shall be a State representative responsible for processing those manifests.

(3) Duties
The Board shall meet annually to discuss, evaluate the effectiveness of, and provide recommendations to the Administrator relating to, the system.

(g) Regulations

(1) Promulgation
(A) In general
Not later than 1 year after October 5, 2012, after consultation with the Secretary of Transportation, the Administrator shall promulgate regulations to carry out this section.

(B) Inclusions
The regulations promulgated pursuant to subparagraph (A) may include such requirements as the Administrator determines to be necessary to facilitate the transition from the use of paper manifests to the use of electronic manifests, or to accommodate the processing of data from paper manifests in the electronic manifest system, including a requirement that users of paper manifests submit to the system copies of the paper manifests for data processing purposes.

(C) Requirements
The regulations promulgated pursuant to subparagraph (A) shall ensure that each electronic manifest provides, to the same extent as paper manifests under applicable Federal and State law, for—
(i) the ability to track and maintain legal accountability of—
   (I) the person that certifies that the information provided in the manifest is accurately described; and
   (II) the person that acknowledges receipt of the manifest;

(ii) if the manifest is electronically submitted, State authority to access paper printout copies of the manifest from
     the system; and
   (iii) access to all publicly available information contained in the manifest.

(2) Effective date of regulations

Any regulation promulgated by the Administrator under paragraph (1) and in accordance with section 6923 of this title
relating to electronic manifesting of hazardous waste shall take effect in each State as of the effective date specified in the
regulation.

(3) Administration

The Administrator shall carry out regulations promulgated under this subsection in each State unless the State program
is fully authorized to carry out such regulations in lieu of the Administrator.

(h) Requirement of compliance with respect to certain States

In any case in which the State in which waste is generated, or the State in which waste will be transported to a designated
facility, requires that the waste be tracked through a hazardous waste manifest, the designated facility that receives the
waste shall, regardless of the State in which the facility is located—
   (1) complete the facility portion of the applicable manifest;
   (2) sign and date the facility certification; and
   (3) submit to the system a final copy of the manifest for data processing purposes.

(i) Authorization for start-up activities

There are authorized to be appropriated $2,000,000 for each of fiscal years 2013 through 2015 for start-up activities to
carry out this section, to be offset by collection of user fees under subsection (c) such that all such appropriated funds are
offset by fees as provided in subsection (c).

SUBCHAPTER IV—STATE OR REGIONAL SOLID WASTE PLANS

§6941. Objectives of subchapter

The objectives of this subchapter are to assist in developing and encouraging methods for the disposal of solid waste
which are environmentally sound and which maximize the utilization of valuable resources including energy and materials
which are recoverable from solid waste and to encourage resource conservation. Such objectives are to be accomplished
through Federal technical and financial assistance to States or regional authorities for comprehensive planning pursuant to
Federal guidelines designed to foster cooperation among Federal, State, and local governments and private industry. In
developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy
facility, adequate provision shall be given to the present and reasonably anticipated future needs, including those needs
created by thorough implementation of section 6962(h) of this title, of the recycling and resource recovery interest within the
area encompassed by the planning process.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3254 of this title, prior to the general
AMENDMENTS

1984—Pub. L. 98–616, §501(f)(1), inserted ", including those needs created by thorough implementation of section 6962(h) of this title,".

Pub. L. 98–616, §301(a), inserted at end "In developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy facility, adequate provision shall be given to the present and reasonably anticipated future needs of the recycling and resource recovery interest within the area encompassed by the planning process."

1980—Pub. L. 96–482 included as an objective in the disposal of solid waste the utilization of energy and materials recoverable from solid waste.

§6941a. Energy and materials conservation and recovery; Congressional findings

The Congress finds that—

(1) significant savings could be realized by conserving materials in order to reduce the volume or quantity of material which ultimately becomes waste;

(2) solid waste contains valuable energy and material resources which can be recovered and used thereby conserving increasingly scarce and expensive fossil fuels and virgin materials;

(3) the recovery of energy and materials from municipal waste, and the conservation of energy and materials contributing to such waste streams, can have the effect of reducing the volume of the municipal waste stream and the burden of disposing of increasing volumes of solid waste;

(4) the technology to conserve resources exists and is commercially feasible to apply;

(5) the technology to recover energy and materials from solid waste is of demonstrated commercial feasibility; and

(6) various communities throughout the nation have different needs and different potentials for conserving resources and for utilizing techniques for the recovery of energy and materials from waste, and Federal assistance in planning and implementing such energy and materials conservation and recovery programs should be available to all such communities on an equitable basis in relation to their needs and potential.

EDITORIAL NOTES

CODIFICATION

Section was enacted as part of the Solid Waste Disposal Act Amendments of 1980, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6942. Federal guidelines for plans

(a) Guidelines for identification of regions

For purposes of encouraging and facilitating the development of regional planning for solid waste management, the Administrator, within one hundred and eighty days after October 21, 1976, and after consultation with appropriate Federal, State, and local authorities, shall by regulation publish guidelines for the identification of those areas which have common solid waste management problems and are appropriate units for planning regional solid waste management services. Such guidelines shall consider—

(1) the size and location of areas which should be included,

(2) the volume of solid waste which should be included, and

(3) the available means of coordinating regional planning with other related regional planning and for coordination of such regional planning into the State plan.

(b) Guidelines for State plans

Not later than eighteen months after October 21, 1976, and after notice and hearing, the Administrator shall, after consultation with appropriate Federal, State, and local authorities, promulgate regulations containing guidelines to assist in the development and implementation of State solid waste management plans (hereinafter in this chapter referred to as "State plans"). The guidelines shall contain methods for achieving the objectives specified in section 6941 of this title. Such guidelines shall be reviewed from time to time, but not less frequently than every three years, and revised as may be appropriate.

(c) Considerations for State plan guidelines

The guidelines promulgated under subsection (b) shall consider—

(1) the varying regional, geologic, hydrologic, climatic, and other circumstances under which different solid waste practices are required in order to insure the reasonable protection of the quality of the ground and surface waters from leachate contamination, the reasonable protection of the quality of the surface waters from surface runoff contamination, and the reasonable protection of ambient air quality;

(2) characteristics and conditions of collection, storage, processing, and disposal operating methods, techniques and practices, and location of facilities where such operating methods, techniques, and practices are conducted, taking into
account the nature of the material to be disposed;
(3) methods for closing or upgrading open dumps for purposes of eliminating potential health hazards;
(4) population density, distribution, and projected growth;
(5) geographic, geologic, climatic, and hydrologic characteristics;
(6) the type and location of transportation;
(7) the profile of industries;
(8) the constituents and generation rates of waste;
(9) the political, economic, organizational, financial, and management problems affecting comprehensive solid waste management;
(10) types of resource recovery facilities and resource conservation systems which are appropriate; and
(11) available new and additional markets for recovered material and energy and energy resources recovered from solid waste as well as methods for conserving such materials and energy.

EDITORIAL NOTES

AMENDMENTS

1980—Subsec. (c)(11). Pub. L. 96–482 required State plan guidelines to consider energy and energy resources recovered from solid waste as well as methods for conserving such materials and energy.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6943. Requirements for approval of plans

(a) Minimum requirements

In order to be approved under section 6947 of this title, each State plan must comply with the following minimum requirements—

(1) The plan shall identify (in accordance with section 6946(b) of this title) (A) the responsibilities of State, local, and regional authorities in the implementation of the State plan, (B) the distribution of Federal funds to the authorities responsible for development and implementation of the State plan, and (C) the means for coordinating regional planning and implementation under the State plan.

(2) The plan shall, in accordance with sections 6944(b) and 6945(a) of this title, prohibit the establishment of new open dumps within the State, and contain requirements that all solid waste (including solid waste originating in other States, but not including hazardous waste) shall be (A) utilized for resource recovery or (B) disposed of in sanitary landfills (within the meaning of section 6944(a) of this title) or otherwise disposed of in an environmentally sound manner.

(3) The plan shall provide for the closing or upgrading of all existing open dumps within the State pursuant to the requirements of section 6945 of this title.

(4) The plan shall provide for the establishment of such State regulatory powers as may be necessary to implement the plan.

(5) The plan shall provide that no State or local government within the State shall be prohibited under State or local law from negotiating and entering into long-term contracts for the supply of solid waste to resource recovery facilities, from entering into long-term contracts for the operation of such facilities, or from securing long-term markets for material and energy recovered from such facilities or for conserving materials or energy by reducing the volume of waste.

(6) The plan shall provide for such resource conservation or recovery and for the disposal of solid waste in sanitary landfills or any combination of practices so as may be necessary to use or dispose of such waste in a manner that is environmentally sound.

(b) Discretionary plan provisions relating to recycled oil

Any State plan submitted under this subchapter may include, at the option of the State, provisions to carry out each of the following:

(1) Encouragement, to the maximum extent feasible and consistent with the protection of the public health and the environment, of the use of recycled oil in all appropriate areas of State and local government.

(2) Encouragement of persons contracting with the State to use recycled oil to the maximum extent feasible, consistent with protection of the public health and the environment.

(3) Informing the public of the uses of recycled oil.
(4) Establishment and implementation of a program (including any necessary licensing of persons and including the use, where appropriate, of manifests) to assure that used oil is collected, transported, treated, stored, reused, and disposed of, in a manner which does not present a hazard to the public health or the environment.

Any plan submitted under this chapter before October 15, 1980, may be amended, at the option of the State, at any time after such date to include any provision referred to in this subsection.

(c) Energy and materials conservation and recovery feasibility planning and assistance

(1) A State which has a plan approved under this subchapter or which has submitted a plan for such approval shall be eligible for assistance under section 6948(a)(3) of this title if the Administrator determines that under such plan the State will —

(A) analyze and determine the economic and technical feasibility of facilities and programs to conserve resources which contribute to the waste stream or to recover energy and materials from municipal waste;

(B) analyze the legal, institutional, and economic impediments to the development of systems and facilities for conservation of energy or materials which contribute to the waste stream or for the recovery of energy and materials from municipal waste and make recommendations to appropriate governmental authorities for overcoming such impediments;

(C) assist municipalities within the State in developing plans, programs, and projects to conserve resources or recover energy and materials from municipal waste; and

(D) coordinate the resource conservation and recovery planning under subparagraph (C).

(2) The analysis referred to in paragraph (1)(A) shall include—

(A) the evaluation of, and establishment of priorities among, market opportunities for industrial and commercial users of all types (including public utilities and industrial parks) to utilize energy and materials recovered from municipal waste;

(B) comparisons of the relative costs of energy recovered from municipal waste in relation to the costs of energy derived from fossil fuels and other sources;

(C) studies of the transportation and storage problems and other problems associated with the development of energy and materials recovery technology, including curbside source separation;

(D) the evaluation and establishment of priorities among ways of conserving energy or materials which contribute to the waste stream;

(E) comparison of the relative total costs between conserving resources and disposing of or recovering such waste; and

(F) studies of impediments to resource conservation or recovery, including business practices, transportation requirements, or storage difficulties.

Such studies and analyses shall also include studies of other sources of solid waste from which energy and materials may be recovered or minimized.

(d) Size of waste-to-energy facilities

Notwithstanding any of the above requirements, it is the intention of this chapter and the planning process developed pursuant to this chapter that in determining the size of the waste-to-energy facility, adequate provision shall be given to the present and reasonably anticipated future needs of the recycling and resource recovery interest within the area encompassed by the planning process.

EDITORIAL NOTES

CODIFICATION

Another section 5(b) of Pub. L. 96–463 amended section 6948 of this title.

AMENDMENTS

1984—Subsecs. (b), (c). Pub. L. 98–616, §502(h), redesignated the subsec. (b) entitled energy and materials conservation and recovery feasibility planning and assistance, as subsec. (c).

Subsec. (a)(2). Pub. L. 96–482, §18(a), substituted reference to sections 6944(b) and 6945(a) of this title for reference to section 6945(c) of this title.

Subsec. (a)(5). Pub. L. 96–482, §§18(b), 32(d)(1), substituted "State or local government" for "local government" and required State plan recognition of right to enter into long-term contracts for operation of resource recovery facilities and to secure long-term markets for material and energy recovered from such facilities, and required State plan recognition of right to negotiate long-term contracts and to negotiate and enter into such contracts for conserving materials or energy by reducing the volume of waste.

Subsec. (b). Pub. L. 96–463, §5(b), added subsec. (b) relating to discretionary plan provisions for recycled oil.
§6944. Criteria for sanitary landfills; sanitary landfills required for all disposal

(a) Criteria for sanitary landfills

Not later than one year after October 21, 1976, after consultation with the States, and after notice and public hearings, the Administrator shall promulgate regulations containing criteria for determining which facilities shall be classified as sanitary landfills and which shall be classified as open dumps within the meaning of this chapter. At a minimum, such criteria shall provide that a facility may be classified as a sanitary landfill and not an open dump only if there is no reasonable probability of adverse effects on health or the environment from disposal of solid waste at such facility. Such regulations may provide for the classification of the types of sanitary landfills.

(b) Disposal required to be in sanitary landfills, etc.

For purposes of complying with section 6943(2)\(^1\) of this title each State plan shall prohibit the establishment of open dumps and contain a requirement that disposal of all solid waste within the State shall be in compliance with such section 6943(2)\(^1\) of this title.

(c) Effective date

The prohibition contained in subsection (b) shall take effect on the date six months after the date of promulgation of regulations under subsection (a).

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (c). Pub. L. 98–616 struck out "or on the date of approval of the State plan, whichever is later" at end.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

\(^1\) See References in Text note below.

§6945. Upgrading of open dumps

(a) Closing or upgrading of existing open dumps

Upon promulgation of criteria under section 6907(a)(3) of this title, any solid waste management practice or disposal of solid waste or hazardous waste which constitutes the open dumping of solid waste or hazardous waste is prohibited, except in the case of any practice or disposal of solid waste under a timetable or schedule for compliance established under this section. The prohibition contained in the preceding sentence shall be enforceable under section 6972 of this title against persons engaged in the act of open dumping. For purposes of complying with section 6943(a)(2) and 6943(a)(3) of this title, each State plan shall contain a requirement that all existing disposal facilities or sites for solid waste in such State which are open dumps listed in the inventory under subsection (b) shall comply with such measures as may be promulgated by the Administrator to eliminate health hazards and minimize potential health hazards. Each such plan shall establish, for any entity which demonstrates that it has considered other public or private alternatives for solid waste management to comply with the prohibition on open dumping and is unable to utilize such alternatives to so comply, a timetable or schedule for compliance for such practice or disposal of solid waste which specifies a schedule of remedial measures, including an enforceable sequence of actions or operations, leading to compliance with the prohibition on open dumping of solid waste within a reasonable time (not to exceed 5 years from the date of publication of criteria under section 6907(a)(3) of this title).
(b) Inventory

To assist the States in complying with section 6943(a)(3) of this title, not later than one year after promulgation of regulations under section 6944 of this title, the Administrator, with the cooperation of the Bureau of the Census shall publish an inventory of all disposal facilities or sites in the United States which are open dumps within the meaning of this chapter.

(c) Control of hazardous disposal

(1)(A) Not later than 36 months after November 8, 1984, each State shall adopt and implement a permit program or other system of prior approval and conditions to assure that each solid waste management facility within such State which may receive hazardous household waste or hazardous waste due to the provision of section 6921(d) of this title for small quantity generators (otherwise not subject to the requirement for a permit under section 6925 of this title) will comply with the applicable criteria promulgated under section 6944(a) and 6907(a)(3) of this title.

(B) Not later than eighteen months after the promulgation of revised criteria under subsection 1 of section 6944(a) of this title (as required by section 6949(a)(c) of this title), each State shall adopt and implement a permit program or other system for prior approval and conditions, to assure that each solid waste management facility within such State which may receive hazardous household waste or hazardous waste due to the provision of section 6921(d) of this title for small quantity generators (otherwise not subject to the requirement for a permit under section 6925 of this title) will comply with the criteria revised under subsection 6944(a) of this title.

(C) The Administrator shall determine whether each State has developed an adequate program under this paragraph. The Administrator may make such a determination in conjunction with approval, disapproval or partial approval of a State plan under section 6947 of this title.

(2)(A) In any State that the Administrator determines has not adopted an adequate program for such facilities under paragraph (1)(B) by the date provided in such paragraph, the Administrator may use the authorities available under sections 6927 and 6928 of this title to enforce the prohibition contained in subsection (a) of this section with respect to such facilities.

(B) For purposes of this paragraph, the term "requirement of this subchapter" in section 6928 of this title shall be deemed to include criteria promulgated by the Administrator under sections 6907(a)(3) and 6944(a) of this title, and the term "hazardous wastes" in section 6927 of this title shall be deemed to include solid waste facilities that may handle hazardous household wastes or hazardous wastes from small quantity generators.

(d) State programs for control of coal combustion residuals

(1) Approval by Administrator

(A) In general

Each State may submit to the Administrator, in such form as the Administrator may establish, evidence of a permit program or other system of prior approval and conditions under State law for regulation by the State of coal combustion residuals units that are located in the State that, after approval by the Administrator, will operate in lieu of regulation of coal combustion residuals units in the State by—

(i) application of part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title); or

(ii) implementation by the Administrator of a permit program under paragraph (2)(B).

(B) Requirement

Not later than 180 days after the date on which a State submits the evidence described in subparagraph (A), the Administrator, after public notice and an opportunity for public comment, shall approve, in whole or in part, a permit program or other system of prior approval and conditions submitted under subparagraph (A) if the Administrator determines that the program or other system requires each coal combustion residuals unit located in the State to achieve compliance with—

(i) the applicable criteria for coal combustion residuals units under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title); or

(ii) such other State criteria that the Administrator, after consultation with the State, determines to be at least as protective as the criteria described in clause (i).

(C) Permit requirements

The Administrator shall approve under subparagraph (B)(ii) a State permit program or other system of prior approval and conditions that allows a State to include technical standards for individual permits or conditions of approval that differ from the criteria under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title) if, based on site-specific conditions, the Administrator determines that the technical standards established pursuant to a State permit program or other system are at least as protective as the criteria under that part.

(D) Program review and notification

(i) Program review

The Administrator shall review a State permit program or other system of prior approval and conditions that is approved under subparagraph (B)—

(I) from time to time, as the Administrator determines necessary, but not less frequently than once every 12 years;

(II) not later than 3 years after the date on which the Administrator revises the applicable criteria for coal combustion residuals units under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title);
III) not later than 1 year after the date of a significant release (as defined by the Administrator), that was not authorized at the time the release occurred, from a coal combustion residuals unit located in the State; and

IV) on request of any other State that asserts that the soil, groundwater, or surface water of the State is or is likely to be adversely affected by a release or potential release from a coal combustion residuals unit located in the State for which the program or other system was approved.

(ii) Notification and opportunity for a public hearing

The Administrator shall provide to a State notice of deficiencies with respect to the permit program or other system of prior approval and conditions of the State that is approved under subparagraph (B), and an opportunity for a public hearing, if the Administrator determines that—

(I) a revision or correction to the permit program or other system of prior approval and conditions of the State is necessary to ensure that the permit program or other system of prior approval and conditions continues to ensure that each coal combustion residuals unit located in the State achieves compliance with the criteria described in clauses (i) and (ii) of subparagraph (B);

(II) the State has not implemented an adequate permit program or other system of prior approval and conditions that requires each coal combustion residuals unit located in the State to achieve compliance with the criteria described in subparagraph (B); or

(III) the State has, at any time, approved or failed to revoke a permit for a coal combustion residuals unit, a release from which adversely affects or is likely to adversely affect the soil, groundwater, or surface water of another State.

(E) Withdrawal

(i) In general

The Administrator shall withdraw approval of a State permit program or other system of prior approval and conditions if, after the Administrator provides notice and an opportunity for a public hearing to the relevant State under subparagraph (D)(ii), the Administrator determines that the State has not corrected the deficiencies identified by the Administrator under subparagraph (D)(ii).

(ii) Reinstatement of State approval

Any withdrawal of approval under clause (i) shall cease to be effective on the date on which the Administrator makes a determination that the State has corrected the deficiencies identified by the Administrator under subparagraph (D)(ii).

(2) Nonparticipating states

(A) Definition of nonparticipating State

In this paragraph, the term "nonparticipating State" means a State—

(i) for which the Administrator has not approved a State permit program or other system of prior approval and conditions under paragraph (1)(B);

(ii) the Governor of which has not submitted to the Administrator for approval evidence to operate a State permit program or other system of prior approval and conditions under paragraph (1)(A);

(iii) the Governor of which provides notice to the Administrator that, not fewer than 90 days after the date on which the Governor provides the notice to the Administrator, the State will relinquish an approval under paragraph (1)(B) to operate a permit program or other system of prior approval and conditions; or

(iv) for which the Administrator has withdrawn approval for a permit program or other system of prior approval and conditions under paragraph (1)(E).

(B) Implementation of permit program

In the case of a nonparticipating State and subject to the availability of appropriations specifically provided in an appropriations Act to carry out a program in a nonparticipating State, the Administrator shall implement a permit program to require each coal combustion residuals unit located in the nonparticipating State to achieve compliance with applicable criteria established by the Administrator under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title).

(3) Applicability of criteria

The applicable criteria for coal combustion residuals units under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title), shall apply to each coal combustion residuals unit in a State unless—

(A) a permit under a State permit program or other system of prior approval and conditions approved by the Administrator under paragraph (1)(B) is in effect for the coal combustion residuals unit; or

(B) a permit issued by the Administrator in a State in which the Administrator is implementing a permit program under paragraph (2)(B) is in effect for the coal combustion residuals unit.

(4) Prohibition on open dumping

(A) In general

The Administrator may use the authority provided by sections 6927 and 6928 of this title to enforce the prohibition on open dumping under subsection (a) with respect to a coal combustion residuals unit—

(i) in a nonparticipating State (as defined in paragraph (2)); and
(ii) located in a State that is approved to operate a permit program or other system of prior approval and conditions under paragraph (1)(B), in accordance with subparagraph (B) of this paragraph.

(B) Federal enforcement in an approved State

(i) In general

In the case of a coal combustion residuals unit located in a State that is approved to operate a permit program or other system of prior approval and conditions under paragraph (1)(B), the Administrator may commence an administrative or judicial enforcement action under section 6928 of this title if—

(I) the State requests that the Administrator provide assistance in the performance of an enforcement action; or

(II) after consideration of any other administrative or judicial enforcement action involving the coal combustion residuals unit, the Administrator determines that an enforcement action is likely to be necessary to ensure that the coal combustion residuals unit is operating in accordance with the criteria established under the permit program or other system of prior approval and conditions.

(ii) Notification

In the case of an enforcement action by the Administrator under clause (i)(II), before issuing an order or commencing a civil action, the Administrator shall notify the State in which the coal combustion residuals unit is located.

(iii) Annual report to Congress

(I) In general

Subject to subclause (II), not later than December 31, 2017, and December 31 of each year thereafter, the Administrator shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a report that describes any enforcement action commenced under clause (i), including a description of the basis for the enforcement action.

(II) Applicability

Subclause (I) shall not apply for any calendar year during which the Administrator does not commence an enforcement action under clause (i).

(5) Indian country

The Administrator shall establish and carry out a permit program, in accordance with this subsection, for coal combustion residuals units in Indian country (as defined in section 1151 of title 18) to require each coal combustion residuals unit located in Indian country to achieve compliance with the applicable criteria established by the Administrator under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title).

(6) Treatment of coal combustion residuals units

A coal combustion residuals unit shall be considered to be a sanitary landfill for purposes of this chapter, including subsection (a), only if the coal combustion residuals unit is operating in accordance with—

(A) the requirements of a permit issued by—

(i) the State in accordance with a program or system approved under paragraph (1)(B); or

(ii) the Administrator pursuant to paragraph (2)(B) or paragraph (5); or

(B) the applicable criteria for coal combustion residuals units under part 257 of title 40, Code of Federal Regulations (or successor regulations promulgated pursuant to sections 6907(a)(3) and 6944(a) of this title).

(7) Effect of subsection

Nothing in this subsection affects any authority, regulatory determination, other law, or legal obligation in effect on the day before December 16, 2016.

EDITORIAL NOTES

CODIFICATION

Another section 19(b) of Pub. L. 96–482 amended section 6946 of this title.

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §403(c), inserted after first sentence "The prohibition contained in the preceding sentence shall be enforceable under section 6972 of this title against persons engaged in the act of open dumping."

Pub. L. 98–616, §502(c), inserted a closing parenthesis before the period at end.

Subsec. (c). Pub. L. 98–616, §302(c), added subsec. (c).
Subsec. (a). Pub. L. 96–482, §19(a), (b)(1), struck out subsec. (a) which defined "open dump", which is covered in section 6903(14) of this title, redesignated subsec. (c) as (a) and substituted "Upon promulgation of criteria under section 6907(a)(3) of this title, any" for "Any", "section 6943(a)(2) and 6943(a)(3) of this title" for "section 6943(2) of this title", and "criteria under section 6907(a)(3) of this title" for "the inventory under subsection (b)".

Amendment by section 19(b)(1) of Pub. L. 96–482, directing that following reference to "4003(2)", which had been editorially translated as section 6943(2) of this title, the phrase "and 4003(3)" be inserted, was executed by translating "4003(2) and 4003(3)" as section 6943(a)(2) and 6943(a)(3) of this title, in view of the designation of the existing provisions of section 6943 of this title as subsec. (a) of section 6943 of this title by section 5(b) of Pub. L. 96–463 and also by section 32(d)(2) of Pub. L. 96–482.

Subsec. (b). Pub. L. 96–482, §19(b)(2), inserted introductory phrase "To assist the States in complying with section 6943(a)(3) of this title". Amendment referring to section "4003(3)" was executed by translating "4003(3)" as section 6943(a)(3) of this title, in view of the designation of the existing provisions of section 6943 of this title as subsec. (a) of section 6943 of this title by section 5(b) of Pub. L. 96–463 and also by section 32(d)(2) of Pub. L. 96–482.

Subsec. (c). Pub. L. 96–482, §19(a), redesignated subsec. (c) as (a).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "section".

2 So in original. Probably should be "of".

§6946. Procedure for development and implementation of State plan

(a) Identification of regions

Within one hundred and eighty days after publication of guidelines under section 6942(a) of this title (relating to identification of regions), the Governor of each State, after consultation with local elected officials, shall promulgate regulations based on such guidelines identifying the boundaries of each area within the State which, as a result of urban concentrations, geographic conditions, markets, and other factors, is appropriate for carrying out regional solid waste management. Such regulations may be modified from time to time (identifying additional or different regions) pursuant to such guidelines.

(b) Identification of State and local agencies and responsibilities

(1) Within one hundred and eighty days after the Governor promulgates regulations under subsection (a), for purposes of facilitating the development and implementation of a State plan which will meet the minimum requirements of section 6943 of this title, the State, together with appropriate elected officials of general purpose units of local government, shall jointly (A) identify an agency to develop the State plan and identify one or more agencies to implement such plan, and (B) identify which solid waste management activities will, under such State plan, be planned for and carried out by the State and which such management activities will, under such State plan, be planned for and carried out by a regional or local authority or a combination of regional or local and State authorities. If a multi-functional regional agency authorized by State law to conduct solid waste planning and management (the members of which are appointed by the Governor) is in existence on October 21, 1976, the Governor shall identify such authority for purposes of carrying out within such region clause (A) of this paragraph. Where feasible, designation of the agency for the affected area designated under section 1288 of title 33 shall be considered. A State agency identified under this paragraph shall be established or designated by the Governor of such State. Local or regional agencies identified under this paragraph shall be composed of individuals at least a majority of whom are elected local officials.

(2) If planning and implementation agencies are not identified and designated or established as required under paragraph (1) for any affected area, the governor shall, before the date two hundred and seventy days after promulgation of regulations under subsection (a), establish or designate a State agency to develop and implement the State plan for such area.

(c) Interstate regions

(1) In the case of any region which, pursuant to the guidelines published by the Administrator under section 6942(a) of this title (relating to identification of regions), would be located in two or more States, the Governors of the respective States, after consultation with local elected officials, shall consult, cooperate, and enter into agreements identifying the boundaries of such region pursuant to subsection (a).

(2) Within one hundred and eighty days after an interstate region is identified by agreement under paragraph (1), appropriate elected officials of general purpose units of local government within such region shall jointly establish or designate an agency to develop a plan for such region. If no such agency is established or designated within such period by
such officials, the Governors of the respective States may, by agreement, establish or designate for such purpose a single representative organization including elected officials of general purpose units of local government within such region.

(3) Implementation of interstate regional solid waste management plans shall be conducted by units of local government for any portion of a region within their jurisdiction, or by multijurisdictional agencies or authorities designated in accordance with State law, including those designated by agreement by such units of local government for such purpose. If no such unit, agency, or authority is so designated, the respective Governors shall designate or establish a single interstate agency to implement such plan.

(4) For purposes of this subchapter, so much of an interstate regional plan as is carried out within a particular State shall be deemed part of the State plan for such State.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6947. Approval of State plan; Federal assistance

(a) Plan approval

The Administrator shall, within six months after a State plan has been submitted for approval, approve or disapprove the plan. The Administrator shall approve a plan if he determines that—

1) it meets the requirements of paragraphs (1), (2), (3), and (5) of section 6943(a) of this title; and

2) it contains provision for revision of such plan, after notice and public hearing, whenever the Administrator, by regulation, determines—

(A) that revised regulations respecting minimum requirements have been promulgated under paragraphs (1), (2), (3), and (5) of section 6943(a) of this title with which the State plan is not in compliance;

(B) that information has become available which demonstrates the inadequacy of the plan to effectuate the purposes of this subchapter; or

(C) that such revision is otherwise necessary.

The Administrator shall review approved plans from time to time and if he determines that revision or corrections are necessary to bring such plan into compliance with the minimum requirements promulgated under section 6943 of this title (including new or revised requirements), he shall, after notice and opportunity for public hearing, withdraw his approval of such plan. Such withdrawal of approval shall cease to be effective upon the Administrator's determination that such complies with such minimum requirements.

(b) Eligibility of States for Federal financial assistance

1) The Administrator shall approve a State application for financial assistance under this subchapter, and make grants to such State, if such State and local and regional authorities within such State have complied with the requirements of section 6946 of this title within the period required under such section and if such State has a State plan which has been approved by the Administrator under this subchapter.

2) The Administrator shall approve a State application for financial assistance under this subchapter, and make grants to such State, for fiscal years 1978 and 1979 if the Administrator determines that the State plan continues to be eligible for approval under subsection (a) and is being implemented by the State.

3) Upon withdrawal of approval of a State plan under subsection (a), the Administrator shall withhold Federal financial and technical assistance under this subchapter (other than such technical assistance as may be necessary to assist in obtaining the reinstatement of approval) until such time as such approval is reinstated.

(c) Existing activities

Nothing in this subchapter shall be construed to prevent or affect any activities respecting solid waste planning or management which are carried out by State, regional, or local authorities unless such activities are inconsistent with a State
plan approved by the Administrator under this subchapter.

EDITORIAL NOTES

AMENDMENTS

1996—Subsec. (a)(1), (2)(A). Pub. L. 104–119 substituted "section 6943(a) of this title" for "section 6943 of this title".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6948. Federal assistance

(a) Authorization of Federal financial assistance

(1) There are authorized to be appropriated $30,000,000 for fiscal year 1978, $40,000,000 for fiscal year 1979, $20,000,000 for fiscal year 1980, $15,000,000 for fiscal year 1981, $20,000,000 for the fiscal year 1982, and $10,000,000 for each of the fiscal years 1985 through 1988 for purposes of financial assistance to States and local, regional, and interstate authorities for the development and implementation of plans approved by the Administrator under this subchapter (other than the provisions of such plans referred to in section 6943(b) of this title, relating to feasibility planning for municipal waste energy and materials conservation and recovery).

(2)(A) The Administrator is authorized to provide financial assistance to States, counties, municipalities, and intermunicipal agencies and State and local public solid waste management authorities for implementation of programs to provide solid waste management, resource recovery, and resource conservation services and hazardous waste management. Such assistance shall include assistance for facility planning and feasibility studies; expert consultation; surveys and analyses of market needs; marketing of recovered resources; technology assessments; legal expenses; construction feasibility studies; source separation projects; and fiscal or economic investigations or studies; but such assistance shall not include any other element of construction, or any acquisition of land or interest in land, or any subsidy for the price of recovered resources. Agencies assisted under this subsection shall consider existing solid waste management and hazardous waste management services and facilities as well as facilities proposed for construction.

(B) An applicant for financial assistance under this paragraph must agree to comply with respect to the project or program assisted with the applicable requirements of section 6945 of this title and subchapter III of this chapter and apply applicable solid waste management practices, methods, and levels of control consistent with any guidelines published pursuant to section 6907 of this title. Assistance under this paragraph shall be available only for programs certified by the State to be consistent with any applicable State or area-wide solid waste management plan or program. Applicants for technical and financial assistance under this section shall not preclude or foreclose consideration of programs for the recovery of recyclable materials through source separation or other resource recovery techniques.

(C) There are authorized to be appropriated $15,000,000 for each of the fiscal years 1978 and 1979 for purposes of this section. There are authorized to be appropriated $10,000,000 for fiscal year 1980, $10,000,000 for fiscal year 1981, $10,000,000 for fiscal year 1982, and $10,000,000 for each of the fiscal years 1985 through 1988 for purposes of this paragraph.

(D) There are authorized—

(i) to be made available $15,000,000 out of funds appropriated for fiscal year 1985, and

(ii) to be appropriated for each of the fiscal years 1986 through 1988, $20,000,000.

for grants to States (and where appropriate to regional, local, and interstate agencies) to implement programs requiring compliance by solid waste management facilities with the criteria promulgated under section 6944(a) of this title and section 6907(a)(3) of this title and with the provisions of section 6945 of this title. To the extent practicable, such programs shall require such compliance not later than thirty-six months after November 8, 1984.

(3)(A) There is authorized to be appropriated for the fiscal year beginning October 1, 1981, and for each fiscal year thereafter before October 1, 1986, $4,000,000 for purposes of making grants to States to carry out section 6943(b) of this title. No amount may be appropriated for such purposes for the fiscal year beginning on October 1, 1986, or for any fiscal year thereafter.
(B) Assistance provided by the Administrator under this paragraph shall be used only for the purposes specified in section 6943(b) of this title. Such assistance may not be used for purposes of land acquisition, final facility design, equipment purchase, construction, startup or operation activities.

(C) Where appropriate, any State receiving assistance under this paragraph may make all or any part of such assistance available to municipalities within the State to carry out the activities specified in section 6943(b)(1)(A) and (B) of this title.

(b) State allotment

The sums appropriated in any fiscal year under subsection (a)(1) shall be allotted by the Administrator among all States, in the ratio that the population in each State bears to the population in all of the States, except that no State shall receive less than one-half of 1 per cent of the sums so allotted in any fiscal year. No State shall receive any grant under this section during any fiscal year when its expenditures of non-Federal funds for other than non-recurrent expenditures for solid waste management control programs will be less than its expenditures were for such programs during fiscal year 1975, except that such funds may be reduced by an amount equal to their proportionate share of any general reduction of State spending ordered by the Governor or legislature of such State. No State shall receive any grant for solid waste management programs unless the Administrator is satisfied that such grant will be so used as to supplement and, to the extent practicable, increase the level of State, local, regional, or other non-Federal funds that would in the absence of such grant be made available for the maintenance of such programs.

(c) Distribution of Federal financial assistance within the State

The Federal assistance allotted to the States under subsection (b) shall be allocated by the State receiving such funds to State, local, regional, and interstate authorities carrying out planning and implementation of the State plan. Such allocation shall be based upon the responsibilities of the respective parties as determined pursuant to section 6946(b) of this title.

(d) Technical assistance

(1) The Administrator may provide technical assistance to State and local governments for purposes of developing and implementing State plans. Technical assistance respecting resource recovery and conservation may be provided through resource recovery and conservation panels, established in the Environmental Protection Agency under subchapter II, to assist the State and local governments with respect to particular resource recovery and conservation projects under consideration and to evaluate their effect on the State plan.

(2) In carrying out this subsection, the Administrator may, upon request, provide technical assistance to States to assist in the removal or modification of legal, institutional, economic, and other impediments to the recycling of used oil. Such impediments may include laws, regulations, and policies, including State procurement policies, which are not favorable to the recycling of used oil.

(3) In carrying out this subsection, the Administrator is authorized to provide technical assistance to States, municipalities, regional authorities, and intermunicipal agencies upon request, to assist in the removal or modification of legal, institutional, and economic impediments which have the effect of impeding the development of systems and facilities to recovery energy and materials from municipal waste or to conserve energy or materials which contribute to the waste stream. Such impediments may include—

(A) laws, regulations, and policies, including State and local procurement policies, which are not favorable to resource conservation and recovery programs, systems, and facilities;

(B) impediments to the financing of facilities to conserve or recover energy and materials from municipal waste through the exercise of State and local authority to issue revenue bonds and the use of State and local credit assistance; and

(C) impediments to institutional arrangements necessary to undertake projects for the conservation or recovery of energy and materials from municipal waste, including the creation of special districts, authorities, or corporations where necessary having the power to secure the supply of waste of a project, to conserve resources, to implement the project, and to undertake related activities.

(e) Special communities

(1) The Administrator, in cooperation with State and local officials, shall identify local governments within the United States (A) having a solid waste disposal facility (i) which is owned by the unit of local government, (ii) for which an order has been issued by the State to cease receiving solid waste for treatment, storage, or disposal, and (iii) which is subject to a State-approved end-use recreation plan, and (B) which are located over an aquifer which is the source of drinking water for any person or public water system and which has serious environmental problems resulting from the disposal of such solid waste, including possible methane migration.

(2) There is authorized to be appropriated to the Administrator $2,500,000 for the fiscal year 1980 and $1,500,000 for each of the fiscal years 1981 and 1982 to make grants to be used for containment and stabilization of solid waste located at the disposal sites referred to in paragraph (1). Not more than one community in any State shall be eligible for grants under this paragraph and not more than one project in any State shall be eligible for such grants. No unit of local government shall be eligible for grants under this paragraph with respect to any site which exceeds 65 acres in size.

(f) Assistance to States for discretionary program for recycled oil

(1) The Administrator may make grants to States, which have a State plan approved under section 6947 of this title, or which have submitted a State plan for approval under such section, if such plan includes the discretionary provisions described in section 6943(b) of this title. Grants under this subsection shall be for purposes of assisting the State in carrying out such discretionary provisions. No grant under this subsection may be used for construction or for the acquisition of land or equipment.

(2) Grants under this subsection shall be allotted among the States in the same manner as provided in the first sentence of subsection (b).
(3) No grant may be made under this subsection unless an application therefor is submitted to, and approved by, the Administrator. The application shall be in such form, be submitted in such manner, and contain such information as the Administrator may require.

(4) For purposes of making grants under this subsection, there are authorized to be appropriated $5,000,000 for fiscal year 1982, $5,000,000 for fiscal year 1983, and $5,000,000 for each of the fiscal years 1985 through 1988.

(g) Assistance to municipalities for energy and materials conservation and recovery planning activities

(1) The Administrator is authorized to make grants to municipalities, regional authorities, and intermunicipal agencies to carry out activities described in subparagraphs (A) and (B) of section 6943(b)(1) of this title. Such grants may be made only pursuant to an application submitted to the Administrator by the municipality which application has been approved by the State and determined by the State to be consistent with any State plan approved or submitted under this subchapter or any other appropriate planning carried out by the State.

(2) There is authorized to be appropriated for the fiscal year beginning October 1, 1981, and for each fiscal year thereafter before October 1, 1986, $8,000,000 for purposes of making grants to municipalities under this subsection. No amount may be appropriated for such purposes for the fiscal year beginning on October 1, 1986, or for any fiscal year thereafter.

(3) Assistance provided by the Administrator under this subsection shall be used only for the purposes specified in paragraph (1). Such assistance may not be used for purposes of land acquisition, final facility design, equipment purchase, construction, startup or operation activities.

EDITORIAL NOTES

REFERENCES IN TEXT

Section 6943(b) of this title, referred to in subsecs. (a)(1), (3) and (g)(1), was redesignated section 6943(c) of this title by Pub. L. 98–616, title V, §502(h), Nov. 8, 1984, 98 Stat. 3277.

CODIFICATION

Section 2(d)–(g) of Pub. L. 98–616, cited as a credit to this section, appears to contain typographical error in that the text of subsec. (f)(1) of section 2007 of the Solid Waste Disposal Act (as added by section 2(i) of Pub. L. 98–616) is also shown as the text of subsec. "(f)(1)" of such section 2. Subsec. (f) of section 2, as set out in the Conference Report (H. Rept. 98–1133) to accompany H.R. 2867 (which became Pub. L. 98–616) read: "(f) Section 4008(e)(2) of the Solid Waste Disposal Act (relating to special communities) is amended by striking out 'and $1,500,000 for each of the fiscal years 1981 and 1982' and substituting ', $1,500,000 for each of the fiscal years 1981 and 1982, and $500,000 for each of the fiscal years 1985 through 1988'."

Another section 5(b) of Pub. L. 96–463 amended section 6943 of this title.

AMENDMENTS

Subsec. (d)(2), (3). Pub. L. 98–616, §502(d), redesignated second par. (2), relating to recovery of energy and materials from municipal waste, as par. (3).

Subsec. (f). Pub. L. 98–616, §502(e), redesignated second subsec. (f), relating to assistance to municipalities for energy and materials conservation and recovery planning activities, as subsec. (g).

Subsec. (g). Pub. L. 98–616, §502(e), redesignated second subsec. (f), relating to assistance to municipalities for energy and materials conservation and recovery planning activities, as subsec. (g).

1980—Subsec. (a)(1). Pub. L. 96–482, §31(c), authorized appropriations of $20,000,000, $15,000,000, and $20,000,000 for fiscal years, 1980, 1981, and 1982, respectively, and substituted provision making appropriation available for financial assistance to States, and local, regional, and interstate authorities for development and implementation of plans approved by the Administrator, except plans referred to in section 6943(b) of this title, relating to feasibility planning for municipal waste energy and materials conservation and recovery for provision making appropriations available to State for development and implementation of State plans.

Subsec. (a)(2)(B). Pub. L. 96–482, §32(e)(1), provided that applicants for technical and financial assistance shall not preclude or foreclose consideration of programs for recovery of recyclable materials through source separation or other resource recovery techniques.

Subsec. (d)(2). Pub. L. 96–463, §6, added par. (2) authorizing the Administrator to provide technical assistance to States to assist in the removal or modification of legal, institutional, economic, and other impediments to the recycling of used oil.

Pub. L. 96–482, §32(f), added par. (2) authorizing the Administrator to provide technical assistance to States, municipalities, regional authorities, and intermunicipal agencies to assist in the removal or modification of legal, institutional, and economic impediments which have the effect of impeding the development of systems and facilities to recover energy and materials from municipal waste.

Subsec. (e)(1). Pub. L. 96–482, §20(1)–(5), substituted in provision preceding cl. (A) "identify local governments" for "identify communities", struck out cl. (A), which required the Administrator to identify populations of less than twenty-five thousand persons, redesignated cls. (B) and (C) as (A) and (B), respectively, in cl. (A) as so redesignated, substituted "a solid waste disposal facility (i) which is owned by the unit of local government, (ii) for which an order has been issued by the State to cease receiving solid waste for treatment, storage, or disposal, and (iii) which is subject to a State-approved end-use recreation plan" for "solid waste disposal facilities in which more than 75 per centum of the solid waste of is from areas outside the jurisdiction of the communities" in cl. (B) as so redesignated, substituted "which are located over an aquifer which is the source of drinking water for any person or public water system and which has" for "which have" and inserted "including possible methane migration" after "such solid waste."

Subsec. (e)(2). Pub. L. 96–482, §20(6)–(8), substituted appropriations authorization of $2,500,000; $1,500,000; and $1,500,000 for fiscal years 1980, 1981, and 1982, for prior authorization of $2,500,000 for fiscal years 1978 and 1979, substituted provision for grants for "containment and stabilization of solid waste located at the disposal sites referred to in paragraph (1)" for such grants for "the conversion, improvement, or consolidation of existing solid waste disposal facilities, or for the construction of new solid waste disposal facilities, or for both, within communities identified under paragraph (1)", and prohibited grants to units of local government when site exceeds 65 acres in size.

Subsec. (e)(3). Pub. L. 96–482, §20(9), struck out par. (3) which required that grants to States be made only when the projects are consistent with applicable and approved State plan and will assist in carrying out such plan.

Subsec. (f). Pub. L. 96–463, §5(b), added subsec. (f) relating to assistance to States for discretionary program for recycled oil.

Pub. L. 96–482, §32(e)(3), added subsec. (f) relating to assistance to municipalities for energy and materials conservation and recovery planning activities.

**Executive Documents**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 See References in Text note below.

2 So in original. Probably should be "through".

3 So in original. Probably should be followed by a comma.

**§6949. Rural communities assistance**

(a) In general

The Administrator shall make grants to States to provide assistance to municipalities with a population of five thousand or less, or counties with a population of ten thousand or less or less than twenty persons per square mile and not within a metropolitan area, for solid waste management facilities (including equipment) necessary to meet the requirements of section 6945 of this title or restrictions on open burning or other requirements arising under the Clean Air Act [42 U.S.C. 7401 et seq.] or the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.]. Such assistance shall only be available—

1 to any municipality or county which could not feasibly be included in a solid waste management system or facility serving an urbanized, multijurisdictional area because of its distance from such systems;

2 where existing or planned solid waste management services or facilities are unavailable or insufficient to comply with the requirements of section 6945 of this title; and
(3) for systems which are certified by the State to be consistent with any plans or programs established under any State or areawide planning process.

(b) Allotment
The Administrator shall allot the sums appropriated to carry out this section in any fiscal year among the States in accordance with regulations promulgated by him on the basis of the average of the ratio which the population of rural areas of each State bears to the total population of rural areas of all the States, the ratio which the population of counties in each State having less than twenty persons per square mile bears to the total population of such counties in all the States, and the ratio which the population of such low-density counties in each State having 33 per centum or more of all families with incomes not in excess of 125 per centum of the poverty level bears to the total population of such counties in all the States.

(c) Limit
The amount of any grant under this section shall not exceed 75 per centum of the costs of the project. No assistance under this section shall be available for the acquisition of land or interests in land.

(d) Authorization of appropriations
There are authorized to be appropriated $25,000,000 for each of the fiscal years 1978 and 1979 to carry out this section. There are authorized to be appropriated $10,000,000 for the fiscal year 1980 and $15,000,000 for each of the fiscal years 1981 and 1982 to carry out this section.

(e) Additional appropriations

(1) In general
There are authorized to be appropriated to carry out this section for the Denali Commission to provide assistance to municipalities in the State of Alaska $1,500,000 for each of fiscal years 2008 through 2012.

(2) Administration
For the purpose of carrying out this subsection, the Denali Commission shall—
(A) be considered a State; and
(B) comply with all other requirements and limitations of this section.

CODIFICATION

AMENDMENTS
1980—Subsec. (d). Pub. L. 96–482 authorized appropriation of $10,000,000, $15,000,000, and $15,000,000 for fiscal years 1980, 1981, 1982, respectively.

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 2008 AMENDMENT

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

85/151
§6949a. Adequacy of certain guidelines and criteria

(a) Study

The Administrator shall conduct a study of the extent to which the guidelines and criteria under this chapter (other than guidelines and criteria for facilities to which subchapter III applies) which are applicable to solid waste management and disposal facilities, including, but not limited to landfills and surface impoundments, are adequate to protect human health and the environment from ground water contamination. Such study shall include a detailed assessment of the degree to which the criteria under section 6907(a) of this title and the criteria under section 6944 of this title regarding monitoring, prevention of contamination, and remedial action are adequate to protect ground water and shall also include recommendation with respect to any additional enforcement authorities which the Administrator, in consultation with the Attorney General, deems necessary for such purposes.

(b) Report

Not later than thirty-six months after November 8, 1984, the Administrator shall submit a report to the Congress setting forth the results of the study required under this section, together with any recommendations made by the Administrator on the basis of such study.

(c) Revisions of guidelines and criteria

(1) In general

Not later than March 31, 1988, the Administrator shall promulgate revisions of the criteria promulgated under paragraph (1) of section 6944(a) of this title and under section 6907(a)(3) of this title for facilities that may receive hazardous household wastes or hazardous wastes from small quantity generators under section 6921(d) of this title. The criteria shall be those necessary to protect human health and the environment and may take into account the practicable capability of such facilities. At a minimum such revisions for facilities potentially receiving such wastes should require ground water monitoring as necessary to detect contamination, establish criteria for the acceptable location of new or existing facilities, and provide for corrective action as appropriate.

(2) Additional revisions

Subject to paragraph (3), the requirements of the criteria described in paragraph (1) relating to ground water monitoring shall not apply to an owner or operator of a new municipal solid waste landfill unit, an existing municipal solid waste landfill unit, or a lateral expansion of a municipal solid waste landfill unit, that disposes of less than 20 tons of municipal solid waste daily, based on an annual average, if—

(A) there is no evidence of ground water contamination from the municipal solid waste landfill unit or expansion; and

(B) the municipal solid waste landfill unit or expansion serves—

(i) a community that experiences an annual interruption of at least 3 consecutive months of surface transportation that prevents access to a regional waste management facility; or

(ii) a community that has no practicable waste management alternative and the landfill unit is located in an area that annually receives less than or equal to 25 inches of precipitation.

(3) Protection of ground water resources

(A) Monitoring requirement

A State may require ground water monitoring of a solid waste landfill unit that would otherwise be exempt under paragraph (2) if necessary to protect ground water resources and ensure compliance with a State ground water protection plan, where applicable.

(B) Methods

If a State requires ground water monitoring of a solid waste landfill unit under subparagraph (A), the State may allow the use of a method other than the use of ground water monitoring wells to detect a release of contamination from the unit.

(C) Corrective action

If a State finds a release from a solid waste landfill unit, the State shall require corrective action as appropriate.

(4) No-migration exemption

(A) In general

Ground water monitoring requirements may be suspended by the Director of an approved State for a landfill operator if the operator demonstrates that there is no potential for migration of hazardous constituents from the unit to the uppermost aquifer during the active life of the unit and the post-closure care period.

(B) Certification

A demonstration under subparagraph (A) shall be certified by a qualified ground-water scientist and approved by the Director of an approved State.
(C) Guidance

Not later than 6 months after March 26, 1996, the Administrator shall issue a guidance document to facilitate small community use of the no migration 1 exemption under this paragraph.

(5) Alaska Native villages

Upon certification by the Governor of the State of Alaska that application of the requirements described in paragraph (1) to a solid waste landfill unit of a Native village (as defined in section 1602 of title 43) or unit that is located in or near a small, remote Alaska village would be infeasible, or would not be cost-effective, or is otherwise inappropriate because of the remote location of the unit, the State may exempt the unit from some or all of those requirements. This paragraph shall apply only to solid waste landfill units that dispose of less than 20 tons of municipal solid waste daily, based on an annual average.

(6) Further revisions of guidelines and criteria

Recognizing the unique circumstances of small communities, the Administrator shall, not later than two years after March 26, 1996, promulgate revisions to the guidelines and criteria promulgated under this subchapter to provide additional flexibility to approved States to allow landfills that receive 20 tons or less of municipal solid waste per day, based on an annual average, to use alternative frequencies of daily cover application, frequencies of methane gas monitoring, infiltration layers for final cover, and means for demonstrating financial assurance: Provided, That such alternative requirements take into account climatic and hydrogeologic conditions and are protective of human health and environment.

EDITORIAL NOTES

AMENDMENTS

1996—Subsec. (c). Pub. L. 104–119 designated existing provisions as par. (1), inserted heading, and added pars. (2) to (6).

STATUTORY NOTES AND RELATED SUBSIDIARIES

REINSTATEMENT OF REGULATORY EXEMPTION

Pub. L. 104–119, §3(b), Mar. 26, 1996, 110 Stat. 833, provided that: "It is the intent of section 4010(c)(2) of the Solid Waste Disposal Act [42 U.S.C. 6949a(c)(2)], as added by subsection (a), to immediately reinstate subpart E of part 258 of title 40, Code of Federal Regulations, as added by the final rule published at 56 Federal Register 50798 on October 9, 1991."

1 So in original. Probably should be "no-migration".

SUBCHAPTER V—DUTIES OF SECRETARY OF COMMERCE IN RESOURCE AND RECOVERY

§6951. Functions

The Secretary of Commerce shall encourage greater commercialization of proven resource recovery technology by providing—

(1) accurate specifications for recovered materials;
(2) stimulation of development of markets for recovered materials;
(3) promotion of proven technology; and
(4) a forum for the exchange of technical and economic data relating to resource recovery facilities.

§6952. Development of specifications for secondary materials

The Secretary of Commerce, acting through the National Institute of Standards and Technology, and in conjunction with national standards-setting organizations in resource recovery, shall, after public hearings, and not later than two years after September 1, 1979, publish guidelines for the development of specifications for the classification of materials recovered from waste which were destined for disposal. The specifications shall pertain to the physical and chemical properties and characteristics of such materials with regard to their use in replacing virgin materials in various industrial, commercial, and governmental uses. In establishing such guidelines the Secretary shall also, to the extent feasible, provide such information as may be necessary to assist Federal agencies with procurement of items containing recovered materials. The Secretary
shall continue to cooperate with national standards-setting organizations, as may be necessary, to encourage the publication, promulgation and updating of standards for recovered materials and for the use of recovered materials in various industrial, commercial, and governmental uses.

EDITORIAL NOTES

AMENDMENTS

§6953. Development of markets for recovered materials

The Secretary of Commerce shall within two years after September 1, 1979, take such actions as may be necessary to—

(1) identify the geographical location of existing or potential markets for recovered materials;

(2) identify the economic and technical barriers to the use of recovered materials; and

(3) encourage the development of new uses for recovered materials.

EDITORIAL NOTES

AMENDMENTS

§6954. Technology promotion

The Secretary of Commerce is authorized to evaluate the commercial feasibility of resource recovery facilities and to publish the results of such evaluation, and to develop a data base for purposes of assisting persons in choosing such a system.

§6955. Marketing policies, establishment; nondiscrimination requirement

In establishing any policies which may affect the development of new markets for recovered materials and in making any determination concerning whether or not to impose monitoring or other controls on any marketing or transfer of recovered materials, the Secretary of Commerce may consider whether to establish the same or similar policies or impose the same or similar monitoring or other controls on virgin materials.

§6956. Authorization of appropriations

There are authorized to be appropriated to the Secretary of Commerce $5,000,000 for each of fiscal years 1980, 1981, and 1982 and $1,500,000 for each of the fiscal years 1985 through 1988 to carry out the purposes of this subchapter.

EDITORIAL NOTES

AMENDMENTS

SUBCHAPTER VI—FEDERAL RESPONSIBILITIES
§6961. Application of Federal, State, and local law to Federal facilities

(a) In general
Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government (1) having jurisdiction over any solid waste management facility or disposal site, or (2) engaged in any activity resulting, or which may result, in the disposal or management of solid waste or hazardous waste shall be subject to, and comply with, all Federal, State, interstate, and local requirements, both substantive and procedural (including any requirement for permits or reporting or any provisions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting control and abatement of solid waste or hazardous waste disposal and management in the same manner, and to the same extent, as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements referred to in this subsection include, but are not limited to, all administrative orders and all civil and administrative penalties and fines, regardless of whether such penalties or fines are punitive or coercive in nature or are imposed for isolated, intermittent, or continuing violations. The United States hereby expressly waives any immunity otherwise applicable to the United States with respect to any such substantive or procedural requirement (including, but not limited to, any injunctive relief, administrative order or civil or administrative penalty or fine referred to in the preceding sentence, or reasonable service charge). The reasonable service charges referred to in this subsection include, but are not limited to, fees or charges assessed in connection with the processing and issuance of permits, renewal of permits, amendments to permits, review of plans, studies, and other documents, and inspection and monitoring of facilities, as well as any other nondiscriminatory charges that are assessed in connection with a Federal, State, interstate, or local solid waste or hazardous waste regulatory program. Neither the United States, nor any agent, employee, or officer thereof, shall be immune or exempt from any process or sanction of any State or Federal Court with respect to the enforcement of any such injunctive relief. No agent, employee, or officer of the United States shall be personally liable for any civil penalty under any Federal, State, interstate, or local solid or hazardous waste law with respect to any act or omission within the scope of the official duties of the agent, employee, or officer. An agent, employee, or officer of the United States shall be subject to any criminal sanction (including, but not limited to, any fine or imprisonment) under any Federal or State solid or hazardous waste law, but no department, agency, or instrumentality of the executive, legislative, or judicial branch of the Federal Government shall be subject to any such sanction. The President may exempt any solid waste management facility of any department, agency, or instrumentality in the executive branch from compliance with such a requirement if he determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of one year, but additional exemptions may be granted for periods not to exceed one year upon the President's making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting each such exemption.

(b) Administrative enforcement actions
(1) The Administrator may commence an administrative enforcement action against any department, agency, or instrumentality of the executive, legislative, or judicial branch of the Federal Government pursuant to the enforcement authorities contained in this chapter. The Administrator shall initiate an administrative enforcement action against such a department, agency, or instrumentality in the same manner and under the same circumstances as an action would be initiated against another person. Any voluntary resolution or settlement of such an action shall be set forth in a consent order.

(2) No administrative order issued to such a department, agency, or instrumentality shall become final until such department, agency, or instrumentality has had the opportunity to confer with the Administrator.

(c) Limitation on State use of funds collected from Federal Government
Unless a State law in effect on October 6, 1992, or a State constitution requires the funds to be used in a different manner, all funds collected by a State from the Federal Government from penalties and fines imposed for violation of any substantive or procedural requirement referred to in subsection (a) shall be used by the State only for projects designed to improve or protect the environment or to defray the costs of environmental protection or enforcement.

EDITORIAL NOTES

AMENDMENTS

1992—Pub. L. 102–386 designated existing provisions as subsec. (a), inserted heading, inserted in first sentence "and management" before "in the same manner", inserted second to fourth, sixth, and seventh sentences specifying Federal, State, interstate, and local substantive and procedural requirements, waiving sovereign immunity, determining reasonable service charges, and providing no agent, employee, or officer of the United States be personally liable for a civil penalty for an act or omission within the scope of official duties but be subject to criminal sanction, with no department, agency, or instrumentality of the executive, legislative, or judicial branch subject to such sanction, and added subsecs. (b) and (c).
1978—Pub. L. 95–609 inserted "or management" after "disposal" in cl. (2).

Statutory Notes and Related Subsidiaries

Effective Date of 1992 Amendment

Pub. L. 102–386, title I, §102(c), Oct. 6, 1992, 106 Stat. 1506, provided that:

"(1) IN GENERAL.—Except as otherwise provided in paragraphs (2) and (3), the amendments made by subsection (a) [amending this section] shall take effect upon the date of the enactment of this Act [Oct. 6, 1992].

“(2) DELAYED EFFECTIVE DATE FOR CERTAIN MIXED WASTE.—Until the date that is 3 years after the date of the enactment of this Act, the waiver of sovereign immunity contained in section 6001(a) of the Solid Waste Disposal Act [subsec. (a) of this section] with respect to civil, criminal, and administrative penalties and fines (as added by the amendments made by subsection (a)) shall not apply to departments, agencies, and instrumentalities of the executive branch of the Federal Government for violations of section 3004(j) of the Solid Waste Disposal Act [42 U.S.C. 6924(j)] involving storage of mixed waste that is not subject to an existing agreement, permit, or administrative or judicial order, so long as such waste is managed in compliance with all other applicable requirements.

“(3) EFFECTIVE DATE FOR CERTAIN MIXED WASTE.—(A) Except as provided in subparagraph (B), after the date that is 3 years after the date of the enactment of this Act, the waiver of sovereign immunity contained in section 6001(a) of the Solid Waste Disposal Act with respect to civil, criminal, and administrative penalties and fines (as added by the amendments made by subsection (a)) shall apply to departments, agencies, and instrumentalities of the executive branch of the Federal Government for violations of section 3004(j) of the Solid Waste Disposal Act involving storage of mixed waste.

“(B) With respect to the Department of Energy, the waiver of sovereign immunity referred to in subparagraph (A) shall not apply after the date that is 3 years after the date of the enactment of this Act for violations of section 3004(j) of such Act involving storage of mixed waste, so long as the Department of Energy is in compliance with both—

"(i) a plan that has been submitted and approved pursuant to section 3021(b) of the Solid Waste Disposal Act [42 U.S.C. 6939c(b)] and which is in effect; and

"(ii) an order requiring compliance with such plan which has been issued pursuant to such section 3021(b) and which is in effect.

“(4) APPLICATION OF WAIVER TO AGREEMENTS AND ORDERS.—The waiver of sovereign immunity contained in section 6001(a) of the Solid Waste Disposal Act (as added by the amendments made by subsection (a)) shall take effect on the date of the enactment of this Act with respect to any agreement, permit, or administrative or judicial order existing on such date of enactment (and any subsequent modifications to such an agreement, permit, or order), including, without limitation, any provision of an agreement, permit, or order that addresses compliance with section 3004(j) of such Act with respect to mixed waste.

“(5) AGREEMENT OR ORDER.—Except as provided in paragraph (4), nothing in this Act [see Short Title of 1992 Amendment note set out under section 6901 of this title] shall be construed to alter, modify, or change in any manner any agreement, permit, or administrative or judicial order, including, without limitation, any provision of an agreement, permit, or order—

"(i) that addresses compliance with section 3004(j) of the Solid Waste Disposal Act with respect to mixed waste;

"(ii) that is in effect on the date of enactment of this Act; and

"(iii) to which a department, agency, or instrumentality of the executive branch of the Federal Government is a party.

Termination of Reporting Requirements

For termination, effective May 15, 2000, of provisions in subsec. (a) of this section requiring the President to report annually to Congress, see section 3003 of Pub. L. 104–68, as amended, set out as a note under section 1113 of Title 31, Money and Finance, and the 8th item on page 20 of House Document No. 103–7.

Executive Documents

Executive Order No. 12780

Executive Order No. 12873

**EXECUTIVE ORDER NO. 13101**

Ex. Ord. No. 13101, Sept. 14, 1998, 63 F.R. 49643, which directed executive agencies to incorporate waste prevention and recycling policies in their daily operations and created a Steering Committee, a Federal Environmental Executive, a Task Force, and Agency Environmental Executive positions responsible for ensuring the implementation of this order, was revoked by Ex. Ord. No. 13423, §11(a)(i), Jan. 24, 2007, 72 F.R. 3923, formerly set out in a note under section 4321 of this title.

**§6962. Federal procurement**

**(a) Application of section**

Except as provided in subsection (b), a procuring agency shall comply with the requirements set forth in this section and any regulations issued under this section, with respect to any purchase or acquisition of a procurement item where the purchase price of the item exceeds $10,000 or where the quantity of such items or of functionally equivalent items purchased or acquired in the course of the preceding fiscal year was $10,000 or more.

**(b) Procurement subject to other law**

Any procurement, by any procuring agency, which is subject to regulations of the Administrator under section 6964 of this title (as promulgated before October 21, 1976, under comparable provisions of prior law) shall not be subject to the requirements of this section to the extent that such requirements are inconsistent with such regulations.

**(c) Requirements**

1. After the date specified in applicable guidelines prepared pursuant to subsection (e) of this section, each procuring agency which procures any items designated in such guidelines shall procure such items composed of the highest percentage of recovered materials practicable (and in the case of paper, the highest percentage of the postconsumer recovered materials referred to in subsection (h)(1) practicable), consistent with maintaining a satisfactory level of competition, considering such guidelines. The decision not to procure such items shall be based on a determination that such procurement items—
   (A) are not reasonably available within a reasonable period of time;
   (B) fail to meet the performance standards set forth in the applicable specifications or fail to meet the reasonable performance standards of the procuring agencies; or
   (C) are only available at an unreasonable price. Any determination under subparagraph (B) shall be made on the basis of the guidelines of the National Institute of Standards and Technology in any case in which such material is covered by such guidelines.

2. Agencies that generate heat, mechanical, or electrical energy from fossil fuel in systems that have the technical capability of using energy or fuels derived from solid waste as a primary or supplementary fuel shall use such capability to the maximum extent practicable.

3. (A) After the date specified in any applicable guidelines prepared pursuant to subsection (e) of this section, contracting officers shall require that vendors:
   (i) certify that the percentage of recovered materials to be used in the performance of the contract will be at least the amount required by applicable specifications or other contractual requirements and
   (ii) estimate the percentage of the total material utilized for the performance of the contract which is recovered materials.

4. Clause (ii) of subparagraph (A) applies only to a contract in an amount greater than $100,000.

**(d) Specifications**

All Federal agencies that have the responsibility for drafting or reviewing specifications for procurement items procured by Federal agencies shall—

1. as expeditiously as possible but in any event no later than eighteen months after November 8, 1984, eliminate from such specifications—
   (A) any exclusion of recovered materials and
   (B) any requirement that items be manufactured from virgin materials; and

2. within one year after the date of publication of applicable guidelines under subsection (e), or as otherwise specified in such guidelines, assure that such specifications require the use of recovered materials to the maximum extent possible without jeopardizing the intended end use of the item.

**(e) Guidelines**
The Administrator, after consultation with the Administrator of General Services, the Secretary of Commerce (acting through the National Institute of Standards and Technology), and the Director of the Government Publishing Office, shall prepare, review not less frequently than once every 5 years, and, if appropriate, revise, in consultation with recyclers and manufacturers of products containing recycled content, not later than 2 years after the completion of the initial review after November 15, 2021, and thereafter, as appropriate, guidelines for the use of procuring agencies in complying with the requirements of this section. Such guidelines shall—

(1) designate those items which are or can be produced with recovered materials and whose procurement by procuring agencies will carry out the objectives of this section, and in the case of paper, provide for maximizing the use of post consumer recovered materials referred to in subsection (h)(1); and

(2) set forth recommended practices with respect to the procurement of recovered materials and items containing such materials and with respect to certification by vendors of the percentage of recovered materials used,

and shall provide information as to the availability, relative price, and performance of such materials and items and where appropriate shall recommend the level of recovered material to be contained in the procured product. The Administrator shall prepare final guidelines for paper within one hundred and eighty days after November 8, 1984, and for three additional product categories (including tires) by October 1, 1985. In making the designation under paragraph (1), the Administrator shall consider, but is not limited in his considerations, to—

(A) the availability of such items;
(B) the impact of the procurement of such items by procuring agencies on the volume of solid waste which must be treated, stored or disposed of;
(C) the economic and technological feasibility of producing and using such items; and
(D) other uses for such recovered materials.

(f) Procurement of services

A procuring agency shall, to the maximum extent practicable, manage or arrange for the procurement of solid waste management services in a manner which maximizes energy and resource recovery.

(g) Executive Office

The Office of Procurement Policy in the Executive Office of the President, in cooperation with the Administrator, shall implement the requirements of this section. It shall be the responsibility of the Office of Procurement Policy to coordinate this policy with other policies for Federal procurement, in such a way as to maximize the use of recovered resources, and to, every two years beginning in 1984, report to the Congress on actions taken by Federal agencies and the progress made in the implementation of this section, including agency compliance with subsection (d).

(h) "Recovered materials" defined

As used in this section, in the case of paper products, the term "recovered materials" includes—

(1) postconsumer materials such as—
(A) paper, paperboard, and fibrous wastes from retail stores, office buildings, homes, and so forth, after they have passed through their end-usage as a consumer item, including: used corrugated boxes; old newspapers; old magazines; mixed waste paper; tabulating cards; and used cordage; and
(B) all paper, paperboard, and fibrous wastes that enter and are collected from municipal solid waste, and

(2) manufacturing, forest residues, and other wastes such as—

(A) dry paper and paperboard waste generated after completion of the papermaking process (that is, those manufacturing operations up to and including the cutting and trimming of the paper machine reel into smaller rolls or rough sheets) including: envelope cuttings, bindery trimmings, and other paper and paperboard waste, resulting from printing, cutting, forming, and other converting operations; bag, box, and carton manufacturing wastes; and butt rolls, mill wrappers, and rejected unused stock; and
(B) finished paper and paperboard from obsolete inventories of paper and paperboard manufacturers, merchants, wholesalers, dealers, printers, converters, or others;
(C) fibrous byproducts of harvesting, manufacturing, extractive, or wood-cutting processes, flax, straw, linters, bagasse, slash, and other forest residues;
(D) wastes generated by the conversion of goods made from fibrous material (that is, waste rope from cordage manufacture, textile mill waste, and cuttings); and
(E) fibers recovered from waste water which otherwise would enter the waste stream.

(i) Procurement program

(1) Within one year after the date of publication of applicable guidelines under subsection (e), each procuring agency shall develop an affirmative procurement program which will assure that items composed of recovered materials will be purchased to the maximum extent practicable and which is consistent with applicable provisions of Federal procurement law.

(2) Each affirmative procurement program required under this subsection shall, at a minimum, contain—

(A) a recovered materials preference program;
(B) an agency promotion program to promote the preference program adopted under subparagraph (A); and
(C) a program for requiring estimates of the total percentage of recovered material utilized in the performance of a contract; certification of minimum recovered material content actually utilized, where appropriate; and reasonable verification procedures for estimates and certifications; and
(D) annual review and monitoring of the effectiveness of an agency's affirmative procurement program.
In the case of paper, the recovered materials preference program required under subparagraph (A) shall provide for the maximum use of the post consumer recovered materials referred to in subsection (h)(1).

(3) In developing the preference program, the following options shall be considered for adoption:

(A) Case-by-Case Policy Development: Subject to the limitations of subsection (c)(1)(A) through (C), a policy of awarding contracts to the vendor offering an item composed of the highest percentage of recovered materials practicable (and in the case of paper, the highest percentage of the post consumer recovered materials referred to in subsection (h)(1)). Subject to such limitations, agencies may make an award to a vendor offering items with less than the maximum recovered materials content.

(B) Minimum Content Standards: Minimum recovered materials content specifications which are set in such a way as to assure that the recovered materials content (and in the case of paper, the content of post consumer materials referred to in subsection (h)(1)) required is the maximum available without jeopardizing the intended end use of the item, or violating the limitations of subsection (c)(1)(A) through (C).

Procuring agencies shall adopt one of the options set forth in subparagraphs (A) and (B) or a substantially equivalent alternative, for inclusion in the affirmative procurement program.

(j) Consultation and provision of information by Administrator

The Administrator shall—

(1) consult with each procuring agency, including contractors of the procuring agency, to clarify the responsibilities of the procuring agency under this section; and

(2) provide to each procuring agency information on the requirements under this section and the responsibilities of the procuring agency under this section.

(k) Reports

The Administrator, in consultation with the Administrator of General Services, shall submit to Congress an annual report describing—

(1) the quantity of federally procured recycled products listed in the guidelines under subsection (e); and

(2) with respect to the products described in paragraph (1), the percentage of recycled material in each product.

EDITORIAL NOTES

CODIFICATION

AMENDMENTS

2021—Subsec. (e). Pub. L. 117–58, §70402(c)(1), which directed substitution of "review not less frequently than once every 5 years, and, if appropriate, revise, in consultation with recyclers and manufacturers of products containing recycled content, not later than 2 years after the completion of the initial review after November 15, 2021, and thereafter, as appropriate" for "and from time to time, revise" in introductory provisions, was executed by making the substitution for "and from time to time revise" to reflect the probable intent of Congress.

Subsecs. (j), (k). Pub. L. 117–58, §70402(c)(2), added subsecs. (j) and (k).

1994—Subsec. (c)(3). Pub. L. 103–355, §4104(e), designated existing provisions as subpar. (A), redesignated subpars. (A) and (B) as cls. (i) and (ii), respectively, and added subpar. (B).

1984—Subsec. (c)(1). Pub. L. 98–616, §501(c), inserted "(and in the case of paper, the highest percentage of the post consumer recovered materials referred to in subsection (h)(1) practicable)".

Subsec. (d)(1). Pub. L. 98–616, §501(e), substituted "eighteen months after November 8, 1984" for "five years after October 21, 1976".
Subsec. (e). Pub. L. 98–616, §501(b)(2), substituted "for paper within one hundred and eighty days after November 8, 1984, and for three additional product categories (including tires) by October 1, 1985" for "for at least three product categories, including paper, by May 1, 1981, and for two additional product categories, including construction materials, by September 30, 1982." in provisions following par. (2).

Subsec. (e)(1). Pub. L. 98–616, §501(b)(1), inserted ", and in the case of paper, for providing for maximizing the use of post consumer recovered materials referred to in subsection (h)(1)".

Subsec. (g). Pub. L. 98–616, §501(d), substituted "the requirements of for "the policy expressed in" and inserted ", and to, every two years beginning in 1984, report to the Congress on actions taken by Federal agencies and the progress made in the implementation of this section, including agency compliance with subsection (d)".

Subsecs. (h), (i). Pub. L. 98–616, §501(a), added subsecs. (h) and (i).

1982—Subsec. (g). Pub. L. 97–375 struck out provision requiring the Office of Procurement Policy to report annually to Congress on actions taken by Federal agencies and the progress made in the implementation of the policy expressed in this section.

1980—Subsec. (c)(1). Pub. L. 96–482, §22(1), (2), in provision preceding subpar. (A), substituted "After the date specified in applicable guidelines prepared pursuant to subsection (e) of this section, each procuring agency which procures any item designated in such guidelines shall procure such" for "After two years after October 21, 1976, each procuring agency shall procure", and in subpar. (C), "paragraph (B)" for "clause (B)".

Subsec. (c)(2). Pub. L. 96–482, §22(3), substituted "energy or fuels derived from solid waste" for "recovered material and recovered-material-derived fuel".

Subsec. (c)(3). Pub. L. 96–482, §22(4), substituted subpars. (A) and (B) for provision requiring certification of the percentage of the total material utilized for the performance of the contract which is recovered materials.

Subsec. (d). Pub. L. 96–482, §22(5), in par. (1), substituted provision requiring Federal agencies to eliminate from specifications as expeditiously as possible, but in no event later than 5 years after Oct. 21, 1976, any exclusion of recovered materials and any requirement that items be manufactured from virgin materials for provision that Federal agencies in reviewing specifications, ascertain whether those specifications violate prohibitions in par. (2)(A) to (C), with such review undertaken not later than 18 months after Oct. 21, 1976, and in par. (2), substituted provision that Federal agencies act within 1 year from publication of applicable guidelines under subsec. (e) of this section for provision that in drafting or revising specifications after Oct. 21, 1976, any exclusion of recovered materials be eliminated and specifications not require the item to be manufactured from virgin materials.

Subsec. (e). Pub. L. 96–482, §22(6), designated provision relating to requirements of guidelines as cl. (2) and subpars. (A) and (C), added cl. (1), subpars. (B) and (C), and provision preceding subpar. (A), and struck out provision requiring information on source of supply.

1978—Subsec. (c). Pub. L. 95–609, §7(n)(1), (2), redesignated subpar. (1)(A) as par. (1), subpars. (1)(B) and (C) as pars. (2) and (3), respectively, and cls. (i) to (iii) of former subpar. (1)(A) as subpars. (A) to (C), respectively, of par. (1), and in par. (3), as so redesignated, inserted "After the date specified in any applicable guidelines prepared pursuant to subsection (e) of this section," before "contracting".

Subsec. (e). Pub. L. 95–609, §7(n)(3), inserted provision dealing with certification by vendors of the materials used.

STATUTORY NOTES AND RELATED SUBSIDIARIES

CHANGE OF NAME

"Director of the Government Publishing Office" substituted for "Public Printer" in subsec. (e) on authority of section 1301(d) of Pub. L. 113–235, set out as a note under section 301 of Title 44, Public Printing and Documents.

EFFECTIVE DATE OF 1994 AMENDMENT

For effective date and applicability of amendment by Pub. L. 103–355, see section 10001 of Pub. L. 103–355, set out as a note under section 8752 of Title 10, Armed Forces.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6963. Cooperation with Environmental Protection Agency

(a) General rule
All Federal agencies shall assist the Administrator in carrying out his functions under this chapter and shall promptly make available all requested information concerning past or present Agency waste management practices and past or present Agency owned, leased, or operated solid or hazardous waste facilities. This information shall be provided in such format as may be determined by the Administrator.

(b) Information relating to energy and materials conservation and recovery
The Administrator shall collect, maintain, and disseminate information concerning the market potential of energy and materials recovered from solid waste, including materials obtained through source separation, and information concerning the savings potential of conserving resources contributing to the waste stream. The Administrator shall identify the regions in which the increased substitution of such energy for energy derived from fossil fuels and other sources is most likely to be feasible, and provide information on the technical and economic aspects of developing integrated resource conservation or recovery systems which provide for the recovery of source-separated materials to be recycled or the conservation of resources. The Administrator shall utilize the authorities of subsection (a) in carrying out this subsection.

EDITORIAL NOTES

AMENDMENTS

1980—Pub. L. 96–482 designated existing provision as subsec. (a), substituted provision that information be provided in a format determined by the Administrator for provision that information be furnished on a reimbursable basis, and added subsec. (b).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6964. Applicability of solid waste disposal guidelines to Executive agencies

(a) Compliance

(1) If—
(A) an Executive agency (as defined in section 105 of title 5) or any unit of the legislative branch of the Federal Government has jurisdiction over any real property or facility the operation or administration of which involves such agency in solid waste management activities, or
(B) such an agency enters into a contract with any person for the operation by such person of any Federal property or facility, and the performance of such contract involves such person in solid waste management activities,

then such agency shall insure compliance with the guidelines recommended under section 6907 of this title and the purposes of this chapter in the operation or administration of such property or facility, or the performance of such contract, as the case may be.

(2) Each Executive agency or any unit of the legislative branch of the Federal Government which conducts any activity—
(A) which generates solid waste, and
(B) which, if conducted by a person other than such agency, would require a permit or license from such agency in order to dispose of such solid waste,

shall insure compliance with such guidelines and the purposes of this chapter in conducting such activity.

(3) Each Executive agency which permits the use of Federal property for purposes of disposal of solid waste shall insure compliance with such guidelines and the purposes of this chapter in the disposal of such waste.

(4) The President or the Committee on House Oversight of the House of Representatives and the Committee on Rules and Administration of the Senate with regard to any unit of the legislative branch of the Federal Government shall prescribe regulations to carry out this subsection.

(b) Licenses and permits
Each Executive agency which issues any license or permit for disposal of solid waste shall, prior to the issuance of such license or permit, consult with the Administrator to insure compliance with guidelines recommended under section 6907 of this title and the purposes of this chapter.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3254e of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

   Subsec. (a)(4). Pub. L. 96–482, §23(3), required House Committee on House Administration and Senate Committee on Rules and Administration with regard to any unit of the legislative branch of the Federal Government to prescribe implementing regulations.
   Subsec. (b). Pub. L. 95–609, §7(o)(3), substituted "Administrator" for "Secretary".

STATUTORY NOTES AND RELATED SUBSIDIARIES

CHANGE OF NAME

Committee on House Oversight of House of Representatives changed to Committee on House Administration of House of Representatives by House Resolution No. 5, One Hundred Sixth Congress, Jan. 6, 1999.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6965. Chief Financial Officer report

The Chief Financial Officer of each affected agency shall submit to Congress an annual report containing, to the extent practicable, a detailed description of the compliance activities undertaken by the agency for mixed waste streams, and an accounting of the fines and penalties imposed on the agency for violations involving mixed waste.

EDITORIAL NOTES

CODIFICATION

Section was enacted as part of the Federal Facility Compliance Act of 1992, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6966. Increased use of recovered mineral component in federally funded projects involving procurement of cement or concrete

(a) Definitions

In this section:
(1) Agency head
The term "agency head" means—
(A) the Secretary of Transportation; and
(B) the head of any other Federal agency that, on a regular basis, procures, or provides Federal funds to pay or assist in paying the cost of procuring, material for cement or concrete projects.

(2) Cement or concrete project
The term "cement or concrete project" means a project for the construction or maintenance of a highway or other transportation facility or a Federal, State, or local government building or other public facility that—
(A) involves the procurement of cement or concrete; and
(B) is carried out, in whole or in part, using Federal funds.

(3) Recovered mineral component
The term "recovered mineral component" means—
(A) ground granulated blast furnace slag, excluding lead slag;
(B) coal combustion fly ash; and
(C) any other waste material or byproduct recovered or diverted from solid waste that the Administrator, in consultation with an agency head, determines should be treated as recovered mineral component under this section for use in cement or concrete projects paid for, in whole or in part, by the agency head.

(b) Implementation of requirements

(1) In general
Not later than 1 year after August 8, 2005, the Administrator and each agency head shall take such actions as are necessary to implement fully all procurement requirements and incentives in effect as of August 8, 2005 (including guidelines under section 6962 of this title) that provide for the use of cement and concrete incorporating recovered mineral component in cement or concrete projects.

(2) Priority
In carrying out paragraph (1), an agency head shall give priority to achieving greater use of recovered mineral component in cement or concrete projects for which recovered mineral components historically have not been used or have been used only minimally.

(3) Federal procurement requirements
The Administrator and each agency head shall carry out this subsection in accordance with section 6962 of this title.

(c) Full implementation study

(1) In general
The Administrator, in cooperation with the Secretary of Transportation and the Secretary of Energy, shall conduct a study to determine the extent to which procurement requirements, when fully implemented in accordance with subsection (b), may realize energy savings and environmental benefits attainable with substitution of recovered mineral component in cement used in cement or concrete projects.

(2) Matters to be addressed
The study shall—
(A) quantify—
   (i) the extent to which recovered mineral components are being substituted for Portland cement, particularly as a result of procurement requirements; and
   (ii) the energy savings and environmental benefits associated with the substitution;

   (B) identify all barriers in procurement requirements to greater realization of energy savings and environmental benefits, including barriers resulting from exceptions from the law; and
   (C)(i) identify potential mechanisms to achieve greater substitution of recovered mineral component in types of cement or concrete projects for which recovered mineral components historically have not been used or have been used only minimally;
   (ii) evaluate the feasibility of establishing guidelines or standards for optimized substitution rates of recovered mineral component in those cement or concrete projects; and
   (iii) identify any potential environmental or economic effects that may result from greater substitution of recovered mineral component in those cement or concrete projects.

(3) Report
Not later than 30 months after August 8, 2005, the Administrator shall submit to Congress a report on the study.

(d) Additional procurement requirements
Unless the study conducted under subsection (c) identifies any effects or other problems described in subsection (c)(2)(C) (iii) that warrant further review or delay, the Administrator and each agency head shall, not later than 1 year after the date on which the report under subsection (c)(3) is submitted, take additional actions under this chapter to establish procurement requirements and incentives that provide for the use of cement and concrete with increased substitution of recovered mineral component in the construction and maintenance of cement or concrete projects—
(1) to realize more fully the energy savings and environmental benefits associated with increased substitution; and
(2) to eliminate barriers identified under subsection (c)(2)(B).

(e) Effect of section

Nothing in this section affects the requirements of section 6962 of this title (including the guidelines and specifications for implementing those requirements).

EDITORIAL NOTES

CODIFICATION

Another section 6005 of Pub. L. 89–272 is classified to section 6966a of this title.

§6966a. Increased use of recovered mineral component in federally funded projects involving procurement of cement or concrete

(a) Definitions

In this section:

(1) Agency head

The term "agency head" means—

(A) the Secretary of Transportation; and

(B) the head of each other Federal agency that on a regular basis procures, or provides Federal funds to pay or assist in paying the cost of procuring, material for cement or concrete projects.

(2) Cement or concrete project

The term "cement or concrete project" means a project for the construction or maintenance of a highway or other transportation facility or a Federal, State, or local government building or other public facility that—

(A) involves the procurement of cement or concrete; and

(B) is carried out in whole or in part using Federal funds.

(3) Recovered mineral component

The term "recovered mineral component" means—

(A) ground granulated blast furnace slag other than lead slag;

(B) coal combustion fly ash;

(C) blast furnace slag aggregate other than lead slag aggregate;

(D) silica fume; and

(E) any other waste material or byproduct recovered or diverted from solid waste that the Administrator, in consultation with an agency head, determines should be treated as recovered mineral component under this section for use in cement or concrete projects paid for, in whole or in part, by the agency head.

(b) Implementation of requirements

(1) In general

Not later than 1 year after August 10, 2005, the Administrator and each agency head shall take such actions as are necessary to implement fully all procurement requirements and incentives in effect as of August 10, 2005 (including guidelines under section 6962 of this title) that provide for the use of cement and concrete incorporating recovered mineral component in cement or concrete projects.

(2) Priority

In carrying out paragraph (1) an agency head shall give priority to achieving greater use of recovered mineral component in cement or concrete projects for which recovered mineral components historically have not been used or have been used only minimally.

(3) Conformance

The Administrator and each agency head shall carry out this subsection in accordance with section 6962 of this title.

(c) Full implementation study

(1) In general

The Administrator, in cooperation with the Secretary of Transportation and the Secretary of Energy, shall conduct a study to determine the extent to which current procurement requirements, when fully implemented in accordance with subsection (b), may realize energy savings and environmental benefits attainable with substitution of recovered mineral component in cement used in cement or concrete projects.

(2) Matters to be addressed

The study shall—

(A) quantify the extent to which recovered mineral components are being substituted for Portland cement, particularly as a result of current procurement requirements, and the energy savings and environmental benefits associated with
that substitution;
(B) identify all barriers in procurement requirements to greater realization of energy savings and environmental benefits, including barriers resulting from exceptions from current law; and
(C)(i) identify potential mechanisms to achieve greater substitution of recovered mineral component in types of cement or concrete projects for which recovered mineral components historically have not been used or have been used only minimally;
(ii) evaluate the feasibility of establishing guidelines or standards for optimized substitution rates of recovered mineral component in those cement or concrete projects; and
(iii) identify any potential environmental or economic effects that may result from greater substitution of recovered mineral component in those cement or concrete projects.

(3) Report
Not later than 30 months after August 10, 2005, the Administrator shall submit to Congress a report on the study.

(d) Additional procurement requirements
Unless the study conducted under subsection (c) identifies any effects or other problems described in subsection (c)(2)(C) (iii) that warrant further review or delay, the Administrator and each agency head shall, not later than 1 year after the release of the report in accordance with subsection (c)(3), take additional actions authorized under this chapter to establish procurement requirements and incentives that provide for the use of cement and concrete with increased substitution of recovered mineral component in the construction and maintenance of cement or concrete projects, so as to—
(1) realize more fully the energy savings and environmental benefits associated with increased substitution; and
(2) eliminate barriers identified under subsection (c).

(e) Effect of section
Nothing in this section affects the requirements of section 6962 of this title (including the guidelines and specifications for implementing those requirements).

EDITORIAL NOTES

CODIFICATION

Another section 6005 of Pub. L. 89–272 is classified to section 6966 of this title.

§6966b. Use of granular mine tailings

(a) Mine tailings

(1) In general
Not later than 180 days after August 10, 2005, the Administrator, in consultation with the Secretary of Transportation and heads of other Federal agencies, shall establish criteria (including an evaluation of whether to establish a numerical standard for concentration of lead and other hazardous substances) for the safe and environmentally protective use of granular mine tailings from the Tar Creek, Oklahoma Mining District, known as "chat", for—
(A) cement or concrete projects; and
(B) transportation construction projects (including transportation construction projects involving the use of asphalt) that are carried out, in whole or in part, using Federal funds.

(2) Requirements
In establishing criteria under paragraph (1), the Administrator shall consider—
(A) the current and previous uses of granular mine tailings as an aggregate for asphalt; and
(B) any environmental and public health risks and benefits derived from the removal, transportation, and use in transportation projects of granular mine tailings.

(3) Public participation
In establishing the criteria under paragraph (1), the Administrator shall solicit and consider comments from the public.

(4) Applicability of criteria
On the establishment of the criteria under paragraph (1), any use of the granular mine tailings described in paragraph (1) in a transportation project that is carried out, in whole or in part, using Federal funds, shall meet the criteria established under paragraph (1).

(b) Effect of sections
Nothing in this section or section 6966a of this title affects any requirement of any law (including a regulation) in effect on August 10, 2005.

EDITORIAL NOTES
REFERENCES IN TEXT

Section 6966a of this title, referred to in subsec. (b), was in the original "section 6005" meaning section 6005 of Pub. L. 89–272, which was translated as meaning the section 6005 of Pub. L. 89–272 as added by section 6017(a) of Pub. L. 109–59, to reflect the probable intent of Congress.

§6966c. Best practices for battery recycling and labeling guidelines

(a) Definitions
In this section:

(1) Administrator
The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) Battery
The term "battery" means a device that—
   (A) consists of 1 or more electrochemical cells that are electrically connected; and
   (B) is designed to store and deliver electric energy.

(3) Recycling
The term "recycling" means the series of activities—
   (A) during which recyclable materials are processed into specification-grade commodities, and consumed as raw-material feedstock, in lieu of virgin materials, in the manufacturing of new products;
   (B) that may include collection, processing, and brokering; and
   (C) that result in subsequent consumption by a materials manufacturer, including for the manufacturing of new products.

(b) Best practices for collection of batteries to be recycled

(1) In general
The Administrator shall develop best practices that may be implemented by State, Tribal, and local governments with respect to the collection of batteries to be recycled in a manner that—
   (A) to the maximum extent practicable, is technically and economically feasible for State, Tribal, and local governments;
   (B) is environmentally sound and safe for waste management workers; and
   (C) optimizes the value and use of material derived from recycling of batteries.

(2) Consultation
The Administrator shall develop the best practices described in paragraph (1) in coordination with State, Tribal, and local governments and relevant nongovernmental and private sector entities.

(3) Report
Not later than 2 years after November 15, 2021, the Administrator shall submit to Congress a report describing the best practices developed under paragraph (1).

(4) Authorization of appropriations
There is authorized to be appropriated to the Administrator to carry out this subsection $10,000,000 for fiscal year 2022, to remain available until September 30, 2026.

(c) Voluntary labeling guidelines

(1) In general
There is established within the Environmental Protection Agency a program (referred to in this subsection as the "program") to promote battery recycling through the development of—
   (A) voluntary labeling guidelines for batteries; and
   (B) other forms of communication materials for battery producers and consumers about the reuse and recycling of critical materials from batteries.

(2) Purposes
The purposes of the program are to improve battery collection and reduce battery waste, including by—
   (A) identifying battery collection locations and increasing accessibility to those locations;
   (B) promoting consumer education about battery collection and recycling; and
   (C) reducing safety concerns relating to the improper disposal of batteries.

(3) Other standards and law
The Administrator shall make every reasonable effort to ensure that voluntary labeling guidelines and other forms of communication materials developed under the program are consistent with—
   (A) international battery labeling standards; and
   (B) the Mercury-Containing and Rechargeable Battery Management Act (42 U.S.C. 14301 et seq.).

(4) Authorization of appropriations
There is authorized to be appropriated to the Administrator to carry out this subsection $15,000,000 for fiscal year 2022, to remain available until September 30, 2026.

EDITORIAL NOTES

CODIFICATION

Section was enacted as part of the Infrastructure Investment and Jobs Act, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6966d. Consumer recycling education and outreach grant program; Federal procurement

(a) Definition of Administrator

In this section, the term "Administrator" means the Administrator of the Environmental Protection Agency.

(b) Consumer recycling education and outreach grant program

(1) In general

The Administrator shall establish a program (referred to in this subsection as the "grant program") to award competitive grants to eligible entities to improve the effectiveness of residential and community recycling programs through public education and outreach.

(2) Criteria

The Administrator shall award grants under the grant program for projects that, by using one or more eligible activities described in paragraph (5)—

(A) inform the public about residential or community recycling programs;

(B) provide information about the recycled materials that are accepted as part of a residential or community recycling program that provides for the separate collection of residential solid waste from recycled material; and

(C) increase collection rates and decrease contamination in residential and community recycling programs.

(3) Eligible entities

(A) In general

An entity that is eligible to receive a grant under the grant program is—

(i) a State;

(ii) a unit of local government;

(iii) an Indian Tribe (as defined in section 5304 of title 25);

(iv) a Native Hawaiian organization (as defined in section 7517 of title 20);

(v) the Department of Hawaiian Home Lands;

(vi) the Office of Hawaiian Affairs;

(vii) a nonprofit organization; or

(viii) a public-private partnership.

(B) Coordination of activities

2 or more entities described in subparagraph (A) may receive a grant under the grant program to coordinate the provision of information to residents that may access 2 or more residential recycling programs, including programs that accept different recycled materials, to provide to the residents information regarding differences among those residential recycling programs.

(4) Requirement

(A) In general

To receive a grant under the grant program, an eligible entity shall demonstrate to the Administrator that the grant funds will be used to encourage the collection of recycled materials that are sold to an existing or developing market.

(B) Business plans and financial data

(i) In general

An eligible entity may make a demonstration under subparagraph (A) through the submission to the Administrator of appropriate business plans and financial data.
(ii) Confidentiality
The Administrator shall treat any business plans or financial data received under clause (i) as confidential information.

(5) Eligible activities
An eligible entity that receives a grant under the grant program may use the grant funds for activities including—
(A) public service announcements;
(B) a door-to-door education and outreach campaign;
(C) social media and digital outreach;
(D) an advertising campaign on recycling awareness;
(E) the development and dissemination of—
(i) a toolkit for a municipal and commercial recycling program;
(ii) information on the importance of quality in the recycling stream;
(iii) information on the economic and environmental benefits of recycling; and
(iv) information on what happens to materials after the materials are placed into a residential or community recycling program;

(F) businesses recycling outreach;
(G) bin, cart, and other receptacle labeling and signs; and
(H) such other activities that the Administrator determines are appropriate to carry out the purposes of this subsection.

(6) Prohibition on use of funds
No funds may be awarded under the grant program for a residential recycling program that—
(A) does not provide for the separate collection of residential solid waste (as defined in section 246.101 of title 40, Code of Federal Regulations (as in effect on November 15, 2021)) from recycled material (as defined in that section), unless the funds are used to promote a transition to a system that separately collects recycled materials; or
(B) promotes the establishment of, or conversion to, a residential collection system that does not provide for the separate collection of residential solid waste from recycled material (as those terms are defined under subparagraph (A)).

(7) Model recycling program toolkit
(A) In general
In carrying out the grant program, the Administrator, in consultation with other relevant Federal agencies, States, Indian Tribes, units of local government, nonprofit organizations, and the private sector, shall develop a model recycling program toolkit for States, Indian Tribes, and units of local government that includes, at a minimum—
(i) a standardized set of terms and examples that may be used to describe materials that are accepted by a residential recycling program;
(ii) information that the Administrator determines can be widely applied across residential recycling programs, taking into consideration the differences in recycled materials accepted by residential recycling programs;
(iii) educational principles on best practices for the collection and processing of recycled materials;
(iv) a community self-assessment guide to identify gaps in existing recycling programs;
(v) training modules that enable States and nonprofit organizations to provide technical assistance to units of local government;
(vi) access to consumer educational materials that States, Indian Tribes, and units of local government can adapt and use in recycling programs; and
(vii) a guide to measure the effectiveness of a grant received under the grant program, including standardized measurements for recycling rates and decreases in contamination.

(B) Requirement
In developing the standardized set of terms and examples under subparagraph (A)(i), the Administrator may not establish any requirements for—
(I) what materials shall be accepted by a residential recycling program; or
(II) the labeling of products.

(8) School curriculum
The Administrator shall provide assistance to the educational community, including nonprofit organizations, such as an organization the science, technology, engineering, and mathematics program of which incorporates recycling, to promote the introduction of recycling principles and best practices into public school curricula.

(9) Reports
(A) To the Administrator
Not earlier than 180 days, and not later than 2 years, after the date on which a grant under the grant program is awarded to an eligible entity, the eligible entity shall submit to the Administrator a report describing, by using the guide developed under paragraph (7)(A)(vii)—
(i) the change in volume of recycled material collected through the activities funded with the grant;
(ii) the change in participation rate of the recycling program funded with the grant;
(iii) the reduction of contamination in the recycling stream as a result of the activities funded with the grant; and
(iv) such other information as the Administrator determines to be appropriate.

(B) To Congress
The Administrator shall submit to Congress an annual report describing—
(i) the effectiveness of residential recycling programs awarded funds under the grant program, including statistics comparing the quantity and quality of recycled materials collected by those programs, as described in the reports submitted to the Administrator under subparagraph (A); and
(ii) recommendations on additional actions to improve residential recycling.

(c) Omitted

(d) Authorization of appropriations

(1) In general
There is authorized to be appropriated to the Administrator to carry out this section and the amendments made by this section $15,000,000 for each of fiscal years 2022 through 2026.

(2) Requirement
Of the amount made available under paragraph (1) for a fiscal year, not less than 20 percent shall be allocated to—
(A) low-income communities;
(B) rural communities; and
(C) communities identified as Native American pursuant to section 3001(9) of title 25.

EDITORIAL NOTES

REFERENCES IN TEXT
The amendments made by this section, referred to in subsec. (d)(1), means the amendments made by section 70402(c) of Pub. L. 117–58, which amended section 6962 of this title. See Codification note below.

CODIFICATION

Section is comprised of section 70402 of Pub. L. 117–58. Subsec. (c) of section 70402 of Pub. L. 117–58 amended section 6962 of this title.

Section was enacted as part of the Infrastructure Investment and Jobs Act, and not as part of the Solid Waste Disposal Act which comprises this chapter.

SUBCHAPTER VII—MISCELLANEOUS PROVISIONS

§6971. Employee protection

(a) General
No person shall fire, or in any other way discriminate against, or cause to be fired or discriminated against, any employee or any authorized representative of employees by reason of the fact that such employee or representative has filed, instituted, or caused to be filed or instituted any proceeding under this chapter or under any applicable implementation plan, or has testified or is about to testify in any proceeding resulting from the administration or enforcement of the provisions of this chapter or of any applicable implementation plan.

(b) Remedy
Any employee or a representative of employees who believes that he has been fired or otherwise discriminated against by any person in violation of subsection (a) of this section may, within thirty days after such alleged violation occurs, apply to the Secretary of Labor for a review of such firing or alleged discrimination. A copy of the application shall be sent to such person who shall be the respondent. Upon receipt of such application, the Secretary of Labor shall cause such investigation to be made as he deems appropriate. Such investigation shall provide an opportunity for a public hearing at the request of any party to such review to enable the parties to present information relating to such alleged violation. The parties shall be given written notice of the time and place of the hearing at least five days prior to the hearing. Any such hearing shall be of record and shall be subject to section 554 of title 5. Upon receiving the report of such investigation, the Secretary of Labor shall make findings of fact. If he finds that such violation did occur, he shall issue a decision, incorporating an order therein and his findings, requiring the party committing such violation to take such affirmative action to abate the violation as the Secretary of Labor deems appropriate, including, but not limited to, the rehiring or reinstatement of the employee or representative of employees to his former position with compensation. If he finds that there was no such violation, he shall issue an order denying the application. Such order issued by the Secretary of Labor under this subparagraph shall be subject to judicial review in the same manner as orders and decisions of the Administrator or subject to judicial review under this chapter.

(c) Costs
Whenever an order is issued under this section to abate such violation, at the request of the applicant, a sum equal to the aggregate amount of all costs and expenses (including the attorney's fees) as determined by the Secretary of Labor, to have been reasonably incurred by the applicant for, or in connection with, the institution and prosecution of such proceedings, shall be assessed against the person committing such violation.

(d) Exception
This section shall have no application to any employee who, acting without direction from his employer (or his agent) deliberately violates any requirement of this chapter.

(e) Employment shifts and loss
The Administrator shall conduct continuing evaluations of potential loss or shifts of employment which may result from the administration or enforcement of the provisions of this chapter and applicable implementation plans, including, where appropriate, investigating threatened plant closures or reductions in employment allegedly resulting from such administration or enforcement. Any employee who is discharged, or laid off, threatened with discharge or layoff, or otherwise discriminated against by any person because of the alleged results of such administration or enforcement, or any representative of such employee, may request the Administrator to conduct a full investigation of the matter. The Administrator shall thereupon investigate the matter and, at the request of any party, shall hold public hearings on not less than five days' notice, and shall at such hearings require the parties, including the employer involved, to present information relating to the actual or potential effect of such administration or enforcement on employment and on any alleged discharge, layoff, or other discrimination and the detailed reasons or justification therefor. Any such hearing shall be of record and shall be subject to section 554 of title 5. Upon receiving the report of such investigation, the Administrator shall make findings of fact as to the effect of such administration or enforcement on employment and on the alleged discharge, layoff, or discrimination and shall make such recommendations as he deems appropriate. Such report, findings, and recommendations shall be available to the public. Nothing in this subsection shall be construed to require or authorize the Administrator or any State to modify or withdraw any standard, limitation, or any other requirement of this chapter or any applicable implementation plan.

(f) Occupational safety and health
In order to assist the Secretary of Labor and the Director of the National Institute for Occupational Safety and Health in carrying out their duties under the Occupational Safety and Health Act of 1970 [29 U.S.C. 651 et seq.], the Administrator shall—

1. provide the following information, as such information becomes available, to the Secretary and the Director:
   A. the identity of any hazardous waste generation, treatment, storage, disposal facility or site where cleanup is planned or underway;
   B. information identifying the hazards to which persons working at a hazardous waste generation, treatment, storage, disposal facility or site or otherwise handling hazardous waste may be exposed, the nature and extent of the exposure, and methods to protect workers from such hazards; and
   C. incidents of worker injury or harm at a hazardous waste generation, treatment, storage or disposal facility or site; and

2. notify the Secretary and the Director of the Administrator’s receipt of notifications under section 6930 or reports under sections 6922, 6923, and 6924 of this title and make such notifications and reports available to the Secretary and the Director.

AMENDMENTS

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6972. Citizen suits

(a) In general

Except as provided in subsection (b) or (c) of this section, any person may commence a civil action on his own behalf—

(1)(A) against any person (including (a) the United States, and (b) any other governmental instrumentality or agency, to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any permit, standard, regulation, condition, requirement, prohibition, or order which has become effective pursuant to this chapter; or

(B) against any person, including the United States and any other governmental instrumentality or agency, to the extent permitted by the eleventh amendment to the Constitution, and including any past or present generator, past or present transporter, or past or present owner or operator of a treatment, storage, or disposal facility, who has contributed or who is contributing to the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste which may present an imminent and substantial endangerment to health or the environment; or

(2) against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this chapter which is not discretionary with the Administrator.

Any action under paragraph (a)(1) of this subsection shall be brought in the district court for the district in which the alleged violation occurred or the alleged endangerment may occur. Any action brought under paragraph (a)(2) of this subsection may be brought in the district court for the district in which the alleged violation occurred or in the District Court of the District of Columbia. The district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce the permit, standard, regulation, condition, requirement, prohibition, or order, referred to in paragraph (1)(A), to restrain any person who has contributed or who is contributing to the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste referred to in paragraph (1)(B), to order such person to take such other action as may be necessary, or both, or to order the Administrator to perform the act or duty referred to in paragraph (2), as the case may be, and to apply any appropriate civil penalties under section 6928(a) and (g) of this title.

(b) Actions prohibited

(1) No action may be commenced under subsection (a)(1)(A) of this section—

(A) prior to 60 days after the plaintiff has given notice of the violation to—

(i) the Administrator;

(ii) the State in which the alleged violation occurs; and

(iii) to any alleged violator of such permit, standard, regulation, condition, requirement, prohibition, or order,

except that such action may be brought immediately after such notification in the case of an action under this section respecting a violation of subchapter III of this chapter; or

(B) if the Administrator or State has commenced and is diligently prosecuting a civil or criminal action in a court of the United States or a State to require compliance with such permit, standard, regulation, condition, requirement, prohibition, or order.

In any action under subsection (a)(1)(A) in a court of the United States, any person may intervene as a matter of right.

(2)(A) No action may be commenced under subsection (a)(1)(B) of this section prior to ninety days after the plaintiff has given notice of the endangerment to—

(i) the Administrator;

(ii) the State in which the alleged endangerment may occur;

(iii) any person alleged to have contributed or to be contributing to the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste referred to in subsection (a)(1)(B),

except that such action may be brought immediately after such notification in the case of an action under this section respecting a violation of subchapter III of this chapter.

(B) No action may be commenced under subsection (a)(1)(B) of this section if the Administrator, in order to restrain or abate acts or conditions which may have contributed or are contributing to the activities which may present the alleged endangerment—

(i) has commenced and is diligently prosecuting an action under section 6973 of this title or under section 106 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 [42 U.S.C. 9060];

(ii) is actually engaging in a removal action under section 104 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 [42 U.S.C. 9004];

(iii) has incurred costs to initiate a Remedial Investigation and Feasibility Study under section 104 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 [42 U.S.C. 9004] and is diligently proceeding with a remedial action under that Act [42 U.S.C. 9001 et seq.]; or

(iv) has obtained a court order (including a consent decree) or issued an administrative order under section 106 of the Comprehensive Environmental Response, Compensation and Liability Act of 980 [42 U.S.C. 9060] or section 6973 of this title pursuant to which a responsible party is diligently conducting a removal action, Remedial Investigation and Feasibility Study (RIFS), or proceeding with a remedial action.
In the case of an administrative order referred to in clause (iv), actions under subsection (a)(1)(B) are prohibited only as to
the scope and duration of the administrative order referred to in clause (iv).
(C) No action may be commenced under subsection (a)(1)(B) of this section if the State, in order to restrain or abate acts
or conditions which may have contributed or are contributing to the activities which may present the alleged endangerment

- (i) has commenced and is diligently prosecuting an action under subsection (a)(1)(B);
- (ii) is actually engaging in a removal action under section 104 of the Comprehensive Environmental Response,
Compensation and Liability Act of 1980 [42 U.S.C. 9604]; or
- (iii) has incurred costs to initiate a Remedial Investigation and Feasibility Study under section 104 of the
Comprehensive Environmental Response, Compensation and Liability Act of 1980 [42 U.S.C. 9604] and is diligently
proceeding with a remedial action under that Act [42 U.S.C. 9601 et seq.].

(D) No action may be commenced under subsection (a)(1)(B) by any person (other than a State or local government) with
respect to the siting of a hazardous waste treatment, storage, or a disposal facility, nor to restrain or enjoin the issuance of a
permit for such facility.

(E) In any action under subsection (a)(1)(B) in a court of the United States, any person may intervene as a matter of right
when the applicant claims an interest relating to the subject of the action and he is so situated that the disposition of the
action may, as a practical matter, impair or impede his ability to protect that interest, unless the Administrator or the State
shows that the applicant’s interest is adequately represented by existing parties.

(F) Whenever any action is brought under subsection (a)(1)(B) in a court of the United States, the plaintiff shall serve a
copy of the complaint on the Attorney General of the United States and with the Administrator.

c Notice

No action may be commenced under paragraph (a)(2) of this section prior to sixty days after the plaintiff has given notice
to the Administrator that he will commence such action, except that such action may be brought immediately after such
notification in the case of an action under this section respecting a violation of subchapter III. Notice under this subsection
shall be given in such manner as the Administrator shall prescribe by regulation. Any action respecting a violation under
this chapter may be brought under this section only in the judicial district in which such alleged violation occurs.

d Intervention

In any action under this section the Administrator, if not a party, may intervene as a matter of right.

e Costs

The court, in issuing any final order in any action brought pursuant to this section or section 6976 of this title, may award
costs of litigation (including reasonable attorney and expert witness fees) to the prevailing or substantially prevailing party,
whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary
injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil
Procedure.

f Other rights preserved

Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or
common law to seek enforcement of any standard or requirement relating to the management of solid waste or hazardous
waste, or to seek any other relief (including relief against the Administrator or a State agency).

g Transporters

A transporter shall not be deemed to have contributed or to be contributing to the handling, storage, treatment, or
disposal, referred to in subsection (a)(1)(B) taking place after such solid waste or hazardous waste has left the possession
or control of such transporter, if the transportation of such waste was under a sole contractual arrangement arising from a
published tariff and acceptance for carriage by common carrier by rail and such transporter has exercised due care in the
past or present handling, storage, treatment, transportation and disposal of such waste.

EDITORIAL NOTES

REFERENCES IN TEXT

known as the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, which is classified principally to chapter 103 (§9601 et seq.) of this title. For complete classification of this Act to
the Code, see Short Title note set out under section 9601 of this title and Tables.

The Federal Rules of Civil Procedure, referred to in subsec. (e), are set out in the Appendix to Title 28, Judiciary and Judicial Procedure.

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §401(a), (b), designated existing provisions of subsec. (a)(1) as subpar. (A)
thereof, inserted "prohibition," after "requirement," added subpar. (B), and in provisions following par. (2)
inserted "or the alleged endangerment may occur" in first sentence and substituted "to enforce the permit,
standard, regulation, condition, requirement, prohibition, or order, referred to in paragraph (1)(A), to restrain any person who has contributed or who is contributing to the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste referred to in paragraph (1)(B), to order such person to take such other action as may be necessary, or both, or to order the Administrator to perform the act or duty referred to in paragraph (2), as the case may be, and to apply any appropriate civil penalties under section 6928(a) and (g) of this title" for "to enforce such regulation or order, or to order the Administrator to perform such act or duty as the case may be".

Subsec. (b). Pub. L. 98–616, §401(d), amended subsec. (b) generally. Prior to amendment, subsec. (b) read as follows: "No action may be commenced under paragraph (a)(1) of this section—

"(1) prior to sixty days after the plaintiff has given notice of the violation (A) to the Administrator; (B) to the State in which the alleged violation occurs; and (C) to any alleged violator of such permit, standard, regulation, condition, requirement, or order; or

"(2) if the Administrator or State has commenced and is diligently prosecuting a civil or criminal action in a court of the United States or a State to require compliance with such permit, standard, regulation, condition, requirement, or order: Provided, however, That in any such action in a court of the United States, any person may intervene as a matter of right."

Subsec. (e). Pub. L. 98–616, §401(e), substituted "to the prevailing or substantially prevailing party" for "to any party" and inserted "or section 6976 of this title".

Subsec. (g). Pub. L. 98–616, §401(c), added subsec. (g).

1978—Subsec. (c). Pub. L. 95–609, §7(p)(1), substituted "subchapter III" for "section 212 of this Act."

Subsec. (e). Pub. L. 95–609, §7(p)(2), substituted "require" for "requiring".

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1. *So in original. The comma probably should be a semicolon.*

2. *So in original. Probably should be "1980".*

---

**§6973. Imminent hazard**

(a) Authority of Administrator

Notwithstanding any other provision of this chapter, upon receipt of evidence that the past or present handling, storage, treatment, transportation or disposal of any solid waste or hazardous waste may present an imminent and substantial endangerment to health or the environment, the Administrator may bring suit on behalf of the United States in the appropriate district court against any person (including any past or present generator, past or present transporter, or past or present owner or operator of a treatment, storage, or disposal facility) who has contributed or who is contributing to such handling, storage, treatment, transportation or disposal to restrain such person from such handling, storage, treatment, transportation, or disposal, to order such person to take such other action as may be necessary, or both. A transporter shall not be deemed to have contributed or to be contributing to such handling, storage, treatment, or disposal taking place after such solid waste or hazardous waste has left the possession or control of such transporter if the transportation of such waste was under a sole contractual arrangement arising from a published tariff and acceptance for carriage by common carrier by rail and such transporter has exercised due care in the past or present handling, storage, treatment, transportation and disposal of such waste. The Administrator shall provide notice to the affected State of any such suit. The Administrator may also, after notice to the affected State, take other action under this section including, but not limited to, issuing such orders as may be necessary to protect public health and the environment.

(b) Violations

Any person who willfully violates, or fails or refuses to comply with, any order of the Administrator under subsection (a) may, in an action brought in the appropriate United States district court to enforce such order, be fined not more than $5,000 for each day in which such violation occurs or such failure to comply continues.

(c) Immediate notice

Upon receipt of information that there is hazardous waste at any site which has presented an imminent and substantial endangerment to human health or the environment, the Administrator shall provide immediate notice to the appropriate local government agencies. In addition, the Administrator shall require notice of such endangerment to be promptly posted at the site where the waste is located.

(d) Public participation in settlements
Whenever the United States or the Administrator proposes to covenant not to sue or to forbear from suit or to settle any claim arising under this section, notice, and opportunity for a public meeting in the affected area, and a reasonable opportunity to comment on the proposed settlement prior to its final entry shall be afforded to the public. The decision of the United States or the Administrator to enter into or not to enter into such Consent Decree, covenant or agreement shall not constitute a final agency action subject to judicial review under this chapter or chapter 7 of title 5.

EDITORIAL NOTES

CODIFICATION

In subsec. (d), "chapter 7 of title 5" substituted for "the Administrative Procedure Act" on authority of Pub. L. 89–554, §7(b), Sept. 6, 1966, 80 Stat. 631, the first section of which enacted Title 5, Government Organization and Employees.

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §402, inserted "past or present" after "evidence that the", substituted "against any person (including any past or present generator, past or present transporter, or past or present owner or operator of a treatment, storage, or disposal facility who has contributed or, who is ".

Subsec. (c). Pub. L. 98–616, §403(a), added subsec. (c).

1980—Pub. L. 96–482, §25, designated existing provisions as subsec. (a), substituted "may present" for "is presenting" and "such handling, storage, treatment, transportation or disposal" for "the alleged disposal" and authorized other action to be taken by the Administrator after notice including issuance of protective orders relating to public health and the environment, and added subsec. (b).

1978—Pub. L. 95–609 struck out "for" after "restrain any person".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "contractual".

§6974. Petition for regulations; public participation

(a) Petition

Any person may petition the Administrator for the promulgation, amendment, or repeal of any regulation under this chapter. Within a reasonable time following receipt of such petition, the Administrator shall take action with respect to such petition and shall publish notice of such action in the Federal Register, together with the reasons therefor.

(b) Public participation

(1) Public participation in the development, revision, implementation, and enforcement of any regulation, guideline, information, or program under this chapter shall be provided for, encouraged, and assisted by the Administrator and the States. The Administrator, in cooperation with the States, shall develop and publish minimum guidelines for public participation in such processes.

(2) Before the issuing of a permit to any person with any respect to any facility for the treatment, storage, or disposal of hazardous wastes under section 6925 of this title, the Administrator shall—
(A) cause to be published in major local newspapers of general circulation and broadcast over local radio stations notice of the agency's intention to issue such permit, and

(B) transmit in writing notice of the agency's intention to issue such permit to each unit of local government having jurisdiction over the area in which such facility is proposed to be located and to each State agency having any authority under State law with respect to the construction or operation of such facility.

If within 45 days the Administrator receives written notice of opposition to the agency's intention to issue such permit and a request for a hearing, or if the Administrator determines on his own initiative, he shall hold an informal public hearing (including an opportunity for presentation of written and oral views) on whether he should issue a permit for the proposed facility. Whenever possible the Administrator shall schedule such hearing at a location convenient to the nearest population center to such proposed facility and give notice in the aforementioned manner of the date, time, and subject matter of such hearing. No State program which provides for the issuance of permits referred to in this paragraph may be authorized by the Administrator under section 6926 of this title unless such program provides for the notice and hearing required by the paragraph.

EDITORIAL NOTES

AMENDMENTS

1980—Subsec. (b). Pub. L. 96–482 designated existing provisions as par. (1) and added par. (2).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6975. Separability

If any provision of this chapter, or the application of any provision of this chapter to any person or circumstance, is held invalid, the application of such provision to other persons or circumstances, and the remainder of this chapter, shall not be affected thereby.

§6976. Judicial review

(a) Review of final regulations and certain petitions

Any judicial review of final regulations promulgated pursuant to this chapter and the Administrator's denial of any petition for the promulgation, amendment, or repeal of any regulation under this chapter shall be in accordance with sections 701 through 706 of title 5, except that—

(1) a petition for review of action of the Administrator in promulgating any regulation, or requirement under this chapter or denying any petition for the promulgation, amendment or repeal of any regulation under this chapter may be filed only in the United States Court of Appeals for the District of Columbia, and such petition shall be filed within ninety days from the date of such promulgation or denial, or after such date if such petition for review is based solely on grounds arising after such ninetieth day; action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement; and

(2) in any judicial proceeding brought under this section in which review is sought of a determination under this chapter required to be made on the record after notice and opportunity for hearing, if a party seeking review under this chapter applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that the information is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Administrator, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Administrator, and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper; the Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order, with the return of such additional evidence.

(b) Review of certain actions under sections 6925 and 6926 of this title

Review of the Administrator's action (1) in issuing, denying, modifying, or revoking any permit under section 6925 of this title (or in modifying or revoking any permit which is deemed to have been issued under section 6935(d)(1) of this title), or
(2) in granting, denying, or withdrawing authorization or interim authorization under section 6926 of this title, may be had by any interested person in the Circuit Court of Appeals of the United States for the Federal judicial district in which such person resides or transacts such business upon application by such person. Any such application shall be made within ninety days from the date of such issuance, denial, modification, revocation, grant, or withdrawal, or after such date only if such application is based solely on grounds which arose after such ninetieth day. Action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement. Such review shall be in accordance with sections 701 through 706 of title 5.

EDITORIAL NOTES

REFERENCES IN TEXT

Section 6935(d)(1) of this title, referred to in subsec. (b), was in the original a reference to section 3012(d)(1) of Pub. L. 89–272, which was renumbered section 3014(d)(1) of Pub. L. 89–272 by Pub. L. 98–616 and is classified to section 6935(d)(1) of this title.

AMENDMENTS

1984—Pub. L. 98–616 inserted "(or in modifying or revoking any permit which is deemed to have been issued under section 6935(d)(1) of this title)" and inserted "Action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement."

1980—Pub. L. 96–482, §27(a), designated existing provisions as subsec. (a), in provision preceding par. (1), included judicial review of Administrator's denial of any petition for promulgation, amendment, or repeal of any regulation in par. (1), included review of Administrator's denial of any petition for promulgation, amendment, or repeal of any regulation, and substituted "District of Columbia, and" for "District of Columbia. Any", "date of such promulgation or denial" for "date of such promulgation", "petition for review is based" for "petition is based", and ";" for ". Action", and in par. (2), substituted "proper; the" for "proper. The", and added subsec. (b).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6977. Grants or contracts for training projects

(a) General authority

The Administrator is authorized to make grants to, and contracts with any eligible organization. For purposes of this section the term "eligible organization" means a State or interstate agency, a municipality, educational institution, and any other organization which is capable of effectively carrying out a project which may be funded by grant under subsection (b) of this section.

(b) Purposes

(1) Subject to the provisions of paragraph (2), grants or contracts may be made to pay all or a part of the costs, as may be determined by the Administrator, of any project operated or to be operated by an eligible organization, which is designed—

(A) to develop, expand, or carry out a program (which may combine training, education, and employment) for training persons for occupations involving the management, supervision, design, operation, or maintenance of solid waste management and resource recovery equipment and facilities; or

(B) to train instructors and supervisory personnel to train or supervise persons in occupations involving the design, operation, and maintenance of solid waste management and resource recovery equipment and facilities.

(2) A grant or contract authorized by paragraph (1) of this subsection may be made only upon application to the Administrator at such time or times and containing such information as he may prescribe, except that no such application shall be approved unless it provides for the same procedures and reports (and access to such reports and to other records)
as required by section 3254a(b)(4) and (5) \(^1\) of this title (as in effect before October 21, 1976) with respect to applications made under such section (as in effect before October 21, 1976).

**EDITORIAL NOTES**

**REFERENCES IN TEXT**

Section 3254a(b)(4) and (5) of this title, referred to in subsec. (b)(2), was in the original "section 207(b)(4) and (5)"., meaning section 207(b)(4) and (5) of the Solid Waste Disposal Act, which was omitted in the general revision of the Solid Waste Disposal Act by Pub. L. 94–580 on Oct. 21, 1976.

**PRIOR PROVISIONS**

Provisions similar to those in this section were contained in section 3254d of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

**AMENDMENTS**

1998—Subsec. (c). Pub. L. 105–362 struck out heading and text of subsec. (c) which related to Administrator's study and report on State and local training needs and obstacles to employment and occupational advancement in solid waste management and resource recovery field.

1978—Subsec. (b)(1). Pub. L. 95–609, §7(r)(1), (2), substituted "management" for "disposal" in two places, and "resource" for "resources".

Subsec. (c)(3). Pub. L. 95–609, §7(r)(3), substituted "management" for "disposal".

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

\(^1\) See References in Text note below.

**§6978. Payments**

(a) General rule

Payments of grants under this chapter may be made (after necessary adjustment on account of previously made underpayments or overpayments) in advance or by way of reimbursement, and in such installments and on such conditions as the Administrator may determine.

(b) Prohibition

No grant may be made under this chapter to any private profitmaking organization.

**EDITORIAL NOTES**

**PRIOR PROVISIONS**

Provisions similar to those in this section were contained in section 3258 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6979. Labor standards

No grant for a project of construction under this chapter shall be made unless the Administrator finds that the application contains or is supported by reasonable assurance that all laborers and mechanics employed by contractors or subcontractors on projects of the type covered by sections 3141–3144, 3146, and 3147 of title 40, will be paid wages at rates not less than those prevailing on similar work in the locality as determined by the Secretary of Labor in accordance with those sections; and the Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176) and section 3145 of title 40.

Editorial Notes

References in Text

Reorganization Plan Numbered 14 of 1950, referred to in text, is set out in the Appendix to Title 5, Government Organization and Employees.

Codification

Prior Provisions

Provisions similar to those in this section were contained in section 3256 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

Amendments

1980—Pub. L. 96–482 substituted "Administrator" for "Secretary".

§6979a. Transferred

Editorial Notes

Codification

§6979b. Law enforcement authority

The Attorney General of the United States shall, at the request of the Administrator and on the basis of a showing of need, deputize qualified employees of the Environmental Protection Agency to serve as special deputy United States marshals in criminal investigations with respect to violations of the criminal provisions of this chapter.

Editorial Notes

Prior Provisions

A prior section 7010 of Pub. L. 89–272, which was classified to section 6979a of this title, was renumbered section 3020 and transferred to section 6939b of this title.

Subchapter VIII—Research, Development, Demonstration, and Information
§6981. Research, demonstration, training, and other activities

(a) General authority

The Administrator, alone or after consultation with the Secretary of Energy, shall conduct, and encourage, cooperate with, and render financial and other assistance to appropriate public (whether Federal, State, interstate, or local) authorities, agencies, and institutions, private agencies and institutions, and individuals in the conduct of, and promote the coordination of, research, investigations, experiments, training, demonstrations, surveys, public education programs, and studies relating to—

(1) any adverse health and welfare effects of the release into the environment of material present in solid waste, and methods to eliminate such effects;
(2) the operation and financing of solid waste management programs;
(3) the planning, implementation, and operation of resource recovery and resource conservation systems and hazardous waste management systems, including the marketing of recovered resources;
(4) the production of usable forms of recovered resources, including fuel, from solid waste;
(5) the reduction of the amount of such waste and unsalvageable waste materials;
(6) the development and application of new and improved methods of collecting and disposing of solid waste and processing and recovering materials and energy from solid wastes;
(7) the identification of solid waste components and potential materials and energy recoverable from such waste components;
(8) small scale and low technology solid waste management systems, including but not limited to, resource recovery source separation systems;
(9) methods to improve the performance characteristics of resources recovered from solid waste and the relationship of such performance characteristics to available and potentially available markets for such resources;
(10) improvements in land disposal practices for solid waste (including sludge) which may reduce the adverse environmental effects of such disposal and other aspects of solid waste disposal on land, including means for reducing the harmful environmental effects of earlier and existing landfills, means for restoring areas damaged by such earlier or existing landfills, means for rendering landfills safe for purposes of construction and other uses, and techniques of recovering materials and energy from landfills;
(11) methods for the sound disposal of, or recovery of resources, including energy, from, sludge (including sludge from pollution control and treatment facilities, coal slurry pipelines, and other sources);
(12) methods of hazardous waste management, including methods of rendering such waste environmentally safe; and
(13) any adverse effects on air quality (particularly with regard to the emission of heavy metals) which result from solid waste which is burned (either alone or in conjunction with other substances) for purposes of treatment, disposal or energy recovery.

(b) Management program

(1)(A) In carrying out his functions pursuant to this chapter, and any other Federal legislation respecting solid waste or discarded material research, development, and demonstrations, the Administrator shall establish a management program or system to insure the coordination of all such activities and to facilitate and accelerate the process of development of sound new technology (or other discoveries) from the research phase, through development, and into the demonstration phase.
(B) The Administrator shall (i) assist, on the basis of any research projects which are developed with assistance under this chapter or without Federal assistance, the construction of pilot plant facilities for the purpose of investigating or testing the technological feasibility of any promising new fuel, energy, or resource recovery or resource conservation method or technology; and (ii) demonstrate each such method and technology that appears justified by an evaluation at such pilot plant stage or at a pilot plant stage developed without Federal assistance. Each such demonstration shall incorporate new or innovative technical advances or shall apply such advances to different circumstances and conditions, for the purpose of evaluating design concepts or to test the performance, efficiency, and economic feasibility of a particular method or technology under actual operating conditions. Each such demonstration shall be so planned and designed that, if successful, it can be expanded or utilized directly as a full-scale operational fuel, energy, or resource recovery or resource conservation facility.

(2) Any energy-related research, development, or demonstration project for the conversion including bioconversion, of solid waste carried out by the Environmental Protection Agency or by the Secretary of Energy pursuant to this chapter or any other Act shall be administered in accordance with the May 7, 1976, Interagency Agreement between the Environmental Protection Agency and the Energy Research and Development Administration on the Development of Energy from Solid Wastes and specifically, that in accordance with this agreement, (A) for those energy-related projects of mutual interest, planning will be conducted jointly by the Environmental Protection Agency and the Secretary of Energy, following which project responsibility will be assigned to one agency; (B) energy-related portions of projects for recovery of synthetic fuels or other forms of energy from solid waste shall be the responsibility of the Secretary of Energy; (C) the Environmental Protection Agency shall retain responsibility for the environmental, economic, and institutional aspects of solid waste projects and for assurance that such projects are consistent with any applicable suggested guidelines published pursuant to section 6907 of this title, and any applicable State or regional solid waste management plan; and (D) any activities undertaken under provisions of sections 6982 and 6983 of this title as related to energy; as related to energy or synthetic fuels recovery from waste; or as related to energy conservation shall be accomplished through coordination and consultation with the Secretary of Energy.

(c) Authorities
(1) In carrying out subsection (a) of this section respecting solid waste research, studies, development, and demonstration, except as otherwise specifically provided in section 6984(d) of this title, the Administrator may make grants to or enter into contracts (including contracts for construction) with, public agencies and authorities or private persons.

(2) Contracts for research, development, or demonstrations or for both (including contracts for construction) shall be made in accordance with and subject to the limitations provided with respect to research contracts of the military departments in section 2353 of title 10, except that the determination, approval, and certification required thereby shall be made by the Administrator.

(3) Any invention made or conceived in the course of, or under, any contract under this chapter shall be subject to section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 [42 U.S.C. 5908] to the same extent and in the same manner as inventions made or conceived in the course of contracts under such Act [42 U.S.C. 5901 et seq.], except that in applying such section, the Environmental Protection Agency shall be substituted for the Secretary of Energy and the words “solid waste” shall be substituted for the word “energy” where appropriate.

(4) For carrying out the purpose of this chapter the Administrator may detail personnel of the Environmental Protection Agency to agencies eligible for assistance under this section.

REFERENCES IN TEXT

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3253 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1978—Subsec. (a)(2). Pub. L. 95–609, §7(s)(1), substituted "management" for "disposal".

Subsec. (a)(13). Pub. L. 95–609, §7(s)(2), inserted "treatment," after "for purpose of".

STATUTORY NOTES AND RELATED SUBSIDIARIES

TRANSFER OF FUNCTIONS

"Secretary of Energy" was substituted for "Administrator of the Federal Energy Administration, the Administrator of the Energy Research and Development Administration, or the Chairman of the Federal Power Commission" in subsec. (a), and for "Energy Research and Development Administration" in subssecs. (b)(2) and (c)(3), in view of the termination of the Federal Energy Administration, the Energy Research and Development Administration, and the Federal Power Commission and the transfer of their functions and the functions of the Administrators and Chairman thereof (with certain exceptions) to the Secretary of Energy pursuant to sections 301, 703, and 707 of Pub. L. 95–91, which are classified to sections 7151, 7293, and 7297 of this title.

EPA STUDY OF METHODS TO REDUCE PLASTIC POLLUTION

Pub. L. 100–220, title II, §2202, Dec. 29, 1987, 101 Stat. 1465, directed Administrator of Environmental Protection Agency, in consultation with Secretary of Commerce, to conduct a study of the adverse effects of improper disposal of plastic articles on environment and on waste disposal, and various methods to reduce or eliminate such adverse effects, and directed Administrator, within 18 months after Dec. 29, 1987, to report results of this study to Congress.

NATIONAL ADVISORY COMMISSION ON RESOURCE CONSERVATION AND RECOVERY

Pub. L. 96–482, §33, Oct. 21, 1980, 94 Stat. 2356, as amended by Pub. L. 105–362, title V, §501(g), Nov. 10, 1998, 112 Stat. 3284, provided for establishment, membership, functions, etc., of a National Advisory Commission on Resource Conservation and Recovery, directed Commission, upon expiration of the two-year period beginning on the date when all initial members of the Commission have been appointed or the date initial funds become available, whichever is later, to transmit a final report to President and Congress containing a detailed statement of the findings and conclusions of the Commission, and terminated the Commission 30 days after submission of its final report.
SOLID WASTE CLEANUP ON FEDERAL LANDS IN ALASKA; STUDY AND REPORT TO CONGRESSIONAL COMMITTEES

LEACHATE CONTROL RESEARCH PROGRAM IN DELAWARE

Pub. L. 94–580, §4, Oct. 21, 1976, 90 Stat. 2840, directed Administrator of Environmental Protection Agency, in order to demonstrate effective means of dealing with contamination of public water supplies by leachate from abandoned or other landfills, to provide technical and financial assistance for a research program, designed by New Castle County area wide waste management program, to control leachate from Llangollen Landfill in New Castle County, Delaware, and provided up to $250,000 in each of the fiscal years 1978 and 1979 for the operating costs of a counter-pumping program to contain the leachate from the Llangollen Landfill during the period of this study.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6982. Special studies; plans for research, development, and demonstrations

(a) Glass and plastic

The Administrator shall undertake a study and publish a report on resource recovery from glass and plastic waste, including a scientific, technological, and economic investigation of potential solutions to implement such recovery.

(b) Composition of waste stream

The Administrator shall undertake a systematic study of the composition of the solid waste stream and of anticipated future changes in the composition of such stream and shall publish a report containing the results of such study and quantitatively evaluating the potential utility of such components.

(c) Priorities study

For purposes of determining priorities for research on recovery of materials and energy from solid waste and developing materials and energy recovery research, development, and demonstration strategies, the Administrator shall review, and make a study of, the various existing and promising techniques of energy recovery from solid waste (including, but not limited to, waterwall furnace incinerators, dry shredded fuel systems, pyrolysis, densified refuse-derived fuel systems, anaerobic digestion, and fuel and feedstock preparation systems). In carrying out such study the Administrator shall investigate with respect to each such technique—

(1) the degree of public need for the potential results of such research, development, or demonstration,

(2) the potential for research, development, and demonstration without Federal action, including the degree of restraint on such potential posed by the risks involved, and

(3) the magnitude of effort and period of time necessary to develop the technology to the point where Federal assistance can be ended.

(d) Small-scale and low technology study

The Administrator shall undertake a comprehensive study and analysis of, and publish a report on, systems of small-scale and low technology solid waste management, including household resource recovery and resource recovery systems which have special application to multiple dwelling units and high density housing and office complexes. Such study and analysis shall include an investigation of the degree to which such systems could contribute to energy conservation.

(e) Front-end source separation

The Administrator shall undertake research and studies concerning the compatibility of front-end source separation systems with high technology resource recovery systems and shall publish a report containing the results of such research and studies.

(f) Mining waste

The Administrator, in consultation with the Secretary of the Interior, shall conduct a detailed and comprehensive study on the adverse effects of solid wastes from active and abandoned surface and underground mines on the environment, including, but not limited to, the effects of such wastes on humans, water, air, health, welfare, and natural resources, and on
the adequacy of means and measures currently employed by the mining industry, Government agencies, and others to dispose of and utilize such solid wastes and to prevent or substantially mitigate such adverse effects. Such study shall include an analysis of—

1. the sources and volume of discarded material generated per year from mining;
2. present disposal practices;
3. potential dangers to human health and the environment from surface runoff of leachate and air pollution by dust;
4. alternatives to current disposal methods;
5. the cost of those alternatives in terms of the impact on mine product costs; and
6. potential for use of discarded material as a secondary source of the mine product.

In furtherance of this study, the Administrator shall, as he deems appropriate, review studies and other actions of other Federal agencies concerning such wastes with a view toward avoiding duplication of effort and the need to expedite such study. Not later than thirty-six months after October 21, 1980, the Administrator shall publish a report of such study and shall include appropriate findings and recommendations for Federal and non-Federal actions concerning such effects. Such report shall be submitted to the Committee on Environment and Public Works of the United States Senate and the Committee on Energy and Commerce of the United States House of Representatives.

(g) Sludge

The Administrator shall undertake a comprehensive study and publish a report on sludge. Such study shall include an analysis of—

1. what types of solid waste (including but not limited to sewage and pollution treatment residues and other residues from industrial operations such as extraction of oil from shale, liquefaction and gasification of coal and coal slurry pipeline operations) shall be classified as sludge;
2. the effects of air and water pollution legislation on the creation of large volumes of sludge;
3. the amounts of sludge originating in each State and in each industry producing sludge;
4. methods of disposal of such sludge, including the cost, efficiency, and effectiveness of such methods;
5. alternative methods for the use of sludge, including agricultural applications of sludge and energy recovery from sludge; and
6. methods to reclaim areas which have been used for the disposal of sludge or which have been damaged by sludge.

(h) Tires

The Administrator shall undertake a study and publish a report respecting discarded motor vehicle tires which shall include an analysis of the problems involved in the collection, recovery of resources including energy, and use of such tires.

(i) Resource recovery facilities

The Administrator shall conduct research and report on the economics of, and impediments, to the effective functioning of resource recovery facilities.

(j) Resource Conservation Committee

1. The Administrator shall serve as Chairman of a Committee composed of himself, the Secretary of Commerce, the Secretary of Labor, the Chairman of the Council on Environmental Quality, the Secretary of Treasury, the Secretary of the Interior, the Secretary of Energy, the Chairman of the Council of Economic Advisors, and a representative of the Office of Management and Budget, which shall conduct a full and complete investigation and study of all aspects of the economic, social, and environmental consequences of resource conservation with respect to—

(A) the appropriateness of recommended incentives and disincentives to foster resource conservation;
(B) the effect of existing public policies (including subsidies and economic incentives and disincentives, percentage depletion allowances, capital gains treatment and other tax incentives and disincentives) upon resource conservation, and the likely effect of the modification or elimination of such incentives and disincentives upon resource conservation;
(C) the appropriateness and feasibility of restricting the manufacture or use of categories of consumer products as a resource conservation strategy;
(D) the appropriateness and feasibility of employing as a resource conservation strategy the imposition of solid waste management charges on consumer products, which charges would reflect the costs of solid waste management services, litter pickup, the value of recoverable components of such product, final disposal, and any social value associated with the nonrecycling or uncontrolled disposal of such product; and
(E) the need for further research, development, and demonstration in the area of resource conservation.

2. The study required in paragraph (1)(D) may include pilot scale projects, and shall consider and evaluate alternative strategies with respect to—

(A) the product categories on which such charges would be imposed;
(B) the appropriate state in the production of such consumer product at which to levy such charge;
(C) appropriate criteria for establishing such charges for each consumer product category;
(D) methods for the adjustment of such charges to reflect actions such as recycling which would reduce the overall quantities of solid waste requiring disposal; and
(E) procedures for amending, modifying, or revising such charges to reflect changing conditions.

3. The design for the study required in paragraph (1) of this subsection shall include timetables for the completion of the study. A preliminary report putting forth the study design shall be sent to the President and the Congress within six months.
following October 21, 1976, and followup reports shall be sent six months thereafter. Each recommendation resulting from
the study shall include at least two alternatives to the proposed recommendation.

(4) The results of such investigation and study, including recommendations, shall be reported to the President and the
Congress not later than two years after October 21, 1976.

(5) There are authorized to be appropriated not to exceed $2,000,000 to carry out this subsection.

(k) Airport landfills

The Administrator shall undertake a comprehensive study and analysis of and publish a report on systems to alleviate the
hazards to aviation from birds congregating and feeding on landfills in the vicinity of airports.

(l) Completion of research and studies

The Administrator shall complete the research and studies, and submit the reports, required under subsections (b), (c),
(d), (e), (f), (g), and (k) not later than October 1, 1978. The Administrator shall complete the research and studies, and
submit the reports, required under subsections (a), (h), and (i) not later than October 1, 1979. Upon completion, each study
specified in subsections (a) through (k) of this section, the Administrator shall prepare a plan for research, development, and
demonstration respecting the findings of the study and shall submit any legislative recommendations resulting from such
study to appropriate committees of Congress.

(m) Drilling fluids, produced waters, and other wastes associated with the exploration, development, or production
of crude oil or natural gas or geothermal energy

(1) The Administrator shall conduct a detailed and comprehensive study and submit a report on the adverse effects, if
any, of drilling fluids, produced waters, and other wastes associated with the exploration, development, or production of
 crude oil or natural gas or geothermal energy on human health and the environment, including, but not limited to, the effects
of such wastes on humans, water, air, health, welfare, and natural resources and on the adequacy of means and measures
currently employed by the oil and gas and geothermal drilling and production industry, Government agencies, and others to
dispose of and utilize such wastes and to prevent or substantially mitigate such adverse effects. Such study shall include an
analysis of—

(A) the sources and volume of discarded material generated per year from such wastes;
(B) present disposal practices;
(C) potential danger to human health and the environment from the surface runoff or leachate;
(D) documented cases which prove or have caused danger to human health and the environment from surface runoff or
leachate;
(E) alternatives to current disposal methods;
(F) the cost of such alternatives; and
(G) the impact of those alternatives on the exploration for, and development and production of, crude oil and natural gas
or geothermal energy.

In furtherance of this study, the Administrator shall, as he deems appropriate, review studies and other actions of other
Federal agencies concerning such wastes with a view toward avoiding duplication of effort and the need to expedite such
study. The Administrator shall publish a report of such study and shall include appropriate findings and recommendations for
Federal and non-Federal actions concerning such effects.

(2) The Administrator shall complete the research and study and submit the report required under paragraph (1) not later
than twenty-four months from October 21, 1980. Upon completion of the study, the Administrator shall prepare a summary
of the findings of the study, a plan for research, development, and demonstration respecting the findings of the study, and
shall submit the findings and the study, along with any recommendations resulting from such study, to the Committee on
Environment and Public Works of the United States Senate and the Committee on Energy and Commerce of the United
States House of Representatives.

(3) There are authorized to be appropriated not to exceed $1,000,000 to carry out the provisions of this subsection.

(n) Materials generated from the combustion of coal and other fossil fuels

The Administrator shall conduct a detailed and comprehensive study and submit a report on the adverse effects on
human health and the environment, if any, of the disposal and utilization of fly ash waste, bottom ash waste, slag waste, flue
gas emission control waste, and other byproduct materials generated primarily from the combustion of coal or other fossil
fuels. Such study shall include an analysis of—

(1) the source and volumes of such material generated per year;
(2) present disposal and utilization practices;
(3) potential danger, if any, to human health and the environment from the disposal and reuse of such materials;
(4) documented cases in which danger to human health or the environment from surface runoff or leachate has been
proved;
(5) alternatives to current disposal methods;
(6) the costs of such alternatives;
(7) the impact of those alternatives on the use of coal and other natural resources; and
(8) the current and potential utilization of such materials.

In furtherance of this study, the Administrator shall, as he deems appropriate, review studies and other actions of other
Federal and State agencies concerning such material and invite participation by other concerned parties, including industry
and other Federal and State agencies, with a view toward avoiding duplication of effort. The Administrator shall publish a
report on such study, which shall include appropriate findings, not later than twenty-four months after October 21, 1980.
Such study and findings shall be submitted to the Committee on Environment and Public Works of the United States Senate and the Committee on Energy and Commerce of the United States House of Representatives.

(o) Cement kiln dust waste
The Administrator shall conduct a detailed and comprehensive study of the adverse effects on human health and the environment, if any, of the disposal of cement kiln dust waste. Such study shall include an analysis of—
(1) the source and volumes of such materials generated per year;
(2) present disposal practices;
(3) potential danger, if any, to human health and the environment from the disposal of such materials;
(4) documented cases in which danger to human health or the environment has been proved;
(5) alternatives to current disposal methods;
(6) the costs of such alternatives;
(7) the impact of those alternatives on the use of natural resources; and
(8) the current and potential utilization of such materials.

In furtherance of this study, the Administrator shall, as he deems appropriate, review studies and other actions of other Federal and State agencies concerning such waste or materials and invite participation by other concerned parties, including industry and other Federal and State agencies, with a view toward avoiding duplication of effort. The Administrator shall publish a report of such study, which shall include appropriate findings, not later than thirty-six months after October 21, 1980. Such report shall be submitted to the Committee on Environment and Public Works of the United States Senate and the Committee on Energy and Commerce of the United States House of Representatives.

(p) Materials generated from extraction, beneficiation, and processing of ores and minerals, including phosphate rock and overburden from uranium mining
The Administrator shall conduct a detailed and comprehensive study of the adverse effects on human health and the environment, if any, of the disposal and utilization of solid waste from the extraction, beneficiation, and processing of ores and minerals, including phosphate rock and overburden from uranium mining. Such study shall be conducted in conjunction with the study of mining wastes required by subsection (f) of this section and shall include an analysis of—
(1) the source and volumes of such materials generated per year;
(2) present disposal and utilization practices;
(3) potential danger, if any, to human health and the environment from the disposal and reuse of such materials;
(4) documented cases in which danger to human health or the environment has been proved;
(5) alternatives to current disposal methods;
(6) the costs of such alternatives;
(7) the impact of those alternatives on the use of phosphate rock and uranium ore, and other natural resources; and
(8) the current and potential utilization of such materials.

In furtherance of this study, the Administrator shall, as he deems appropriate, review studies and other actions of other Federal and State agencies concerning such waste or materials and invite participation by other concerned parties, including industry and other Federal and State agencies, with a view toward avoiding duplication of effort. The Administrator shall publish a report of such study, which shall include appropriate findings, in conjunction with the publication of the report of the study of mining wastes required to be conducted under subsection (f) of this section. Such report and findings shall be submitted to the Committee on Environment and Public Works of the United States Senate and the Committee on Energy and Commerce of the United States House of Representatives.

(q) Authorization of appropriations
There are authorized to be appropriated not to exceed $8,000,000 for the fiscal years 1978 and 1979 to carry out this section other than subsection (j).

(r) Minimization of hazardous waste
The Administrator shall compile, and not later than October 1, 1986, submit to the Congress, a report on the feasibility and desirability of establishing standards of performance or of taking other additional actions under this chapter to require the generators of hazardous waste to reduce the volume or quantity and toxicity of the hazardous waste they generate, and of establishing with respect to hazardous wastes required management practices or other requirements to assure such wastes are managed in ways that minimize present and future risks to human health and the environment. Such report shall include any recommendations for legislative changes which the Administrator determines are feasible and desirable to implement the national policy established by section 6902 of this title.

(s) Extending landfill life and reusing landfilled areas
The Administrator shall conduct detailed, comprehensive studies of methods to extend the useful life of sanitary landfills and to better use sites in which filled or closed landfills are located. Such studies shall address—
(1) methods to reduce the volume of materials before placement in landfills;
(2) more efficient systems for depositing waste in landfills;
(3) methods to enhance the rate of decomposition of solid waste in landfills, in a safe and environmentally acceptable manner;
(4) methane production from closed landfill units;
(5) innovative uses of closed landfill sites, including use for energy production such as solar or wind energy and use for metals recovery;
(6) potential for use of sewage treatment sludge in reclaiming landfilled areas; and
(7) methods to coordinate use of a landfill owned by one municipality by nearby municipalities, and to establish equitable rates for such use, taking into account the need to provide future landfill capacity to replace that so used.

The Administrator is authorized to conduct demonstrations in the areas of study provided in this subsection. The Administrator shall periodically report on the results of such studies, with the first such report not later than October 1, 1986. In carrying out this subsection, the Administrator need not duplicate other studies which have been completed and may rely upon information which has previously been compiled.

**EDITORIAL NOTES**

**AMENDMENTS**

Subsecs. (m) to (q). Pub. L. 96–482, §29(2), added subsecs. (m) to (p) and redesignated former subsec. (m) as (q).

1978—Subsec. (g)(1). Pub. L. 95–609, §7(t)(1), substituted "shale, liquefaction" for "shale liquefaction".
Subsec. (j)(1). Pub. L. 95–609, §7(t)(2), enacted a provision adding the Secretary of Energy and the Chairman of the Council of Economic Advisors to the Committee.
Subsec. (j)(2). Pub. L. 95–609, §7(t)(3), substituted "paragraph (1)(D)" for "paragraph (2)(D)".
Subsec. (j)(3). Pub. L. 95–609, §7(t)(4), substituted "paragraph (1)" for "paragraph (2)(D)".
Subsec. (1). Pub. L. 95–609, §7(t)(5), struck out requirement of submission of reports under subsec. (j) of this section.

**STATUTORY NOTES AND RELATED SUBSIDIARIES**

**CHANGE OF NAME**

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6983. Coordination, collection, and dissemination of information

(a) Information

The Administrator shall develop, collect, evaluate, and coordinate information on—

1 methods and costs of the collection of solid waste;
2 solid waste management practices, including data on the different management methods and the cost, operation, and maintenance of such methods;
3 the amounts and percentages of resources (including energy) that can be recovered from solid waste by use of various solid waste management practices and various technologies;
4 methods available to reduce the amount of solid waste that is generated;
(5) existing and developing technologies for the recovery of energy or materials from solid waste and the costs, reliability, and risks associated with such technologies;

(6) hazardous solid waste, including incidents of damage resulting from the disposal of hazardous solid wastes; inherently and potentially hazardous solid wastes; methods of neutralizing or properly disposing of hazardous solid wastes; facilities that properly dispose of hazardous wastes;

(7) methods of financing resource recovery facilities or, sanitary landfills, or hazardous solid waste treatment facilities, whichever is appropriate for the entity developing such facility or landfill (taking into account the amount of solid waste reasonably expected to be available to such entity);

(8) the availability of markets for the purchase of resources, either materials or energy, recovered from solid waste; and

(9) research and development projects respecting solid waste management.

(b) Library

(1) The Administrator shall establish and maintain a central reference library for (A) the materials collected pursuant to subsection (a) of this section and (B) the actual performance and cost effectiveness records and other data and information with respect to—

(i) the various methods of energy and resource recovery from solid waste,

(ii) the various systems and means of resource conservation,

(iii) the various systems and technologies for collection, transport, storage, treatment, and final disposition of solid waste, and

(iv) other aspects of solid waste and hazardous solid waste management.

Such central reference library shall also contain, but not be limited to, the model codes and model accounting systems developed under this section, the information collected under subsection (d), and, subject to any applicable requirements of confidentiality, information respecting any aspect of solid waste provided by officers and employees of the Environmental Protection Agency which has been acquired by them in the conduct of their functions under this chapter and which may be of value to Federal, State, and local authorities and other persons.

(2) Information in the central reference library shall, to the extent practicable, be collated, analyzed, verified, and published and shall be made available to State and local governments and other persons at reasonable times and subject to such reasonable charges as may be necessary to defray expenses of making such information available.

(c) Model accounting system

In order to assist State and local governments in determining the cost and revenues associated with the collection and disposal of solid waste and with resource recovery operations, the Administrator shall develop and publish a recommended model cost and revenue accounting system applicable to the solid waste management functions of State and local governments. Such system shall be in accordance with generally accepted accounting principles. The Administrator shall periodically, but not less frequently than once every five years, review such accounting system and revise it as necessary.

(d) Model codes

The Administrator is authorized, in cooperation with appropriate State and local agencies, to recommend model codes, ordinances, and statutes, providing for sound solid waste management.

(e) Information programs

(1) The Administrator shall implement a program for the rapid dissemination of information on solid waste management, hazardous waste management, resource conservation, and methods of resource recovery from solid waste, including the results of any relevant research, investigations, experiments, surveys, studies, or other information which may be useful in the implementation of new or improved solid waste management practices and methods and information on any other technical, managerial, financial, or market aspect of resource conservation and recovery facilities.

(2) The Administrator shall develop and implement educational programs to promote citizen understanding of the need for environmentally sound solid waste management practices.

(f) Coordination

In collecting and disseminating information under this section, the Administrator shall coordinate his actions and cooperate to the maximum extent possible with State and local authorities.

(g) Special restriction

Upon request, the full range of alternative technologies, programs or processes deemed feasible to meet the resource recovery or resource conservation needs of a jurisdiction shall be described in such a manner as to provide a sufficient evaluative basis from which the jurisdiction can make its decisions, but no officer or employee of the Environmental Protection Agency shall, in an official capacity, lobby for or otherwise represent an agency position in favor of resource recovery or resource conservation, as a policy alternative for adoption into ordinances, codes, regulations, or law by any State or political subdivision thereof.

EDITORIAL NOTES

AMENDMENTS

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6984. Full-scale demonstration facilities

(a) Authority

The Administrator may enter into contracts with public agencies or authorities or private persons for the construction and operation of a full-scale demonstration facility under this chapter, or provide financial assistance in the form of grants to a full-scale demonstration facility under this chapter only if the Administrator finds that—

(1) such facility or proposed facility will demonstrate at full scale a new or significantly improved technology or process, a practical and significant improvement in solid waste management practice, or the technological feasibility and cost effectiveness of an existing, but unproven technology, process, or practice, and will not duplicate any other Federal, State, local, or commercial facility which has been constructed or with respect to which construction has begun (determined as of the date action is taken by the Administrator under this chapter),

(2) such contract or assistance meets the requirements of section 6981 of this title and meets other applicable requirements of this chapter,

(3) such facility will be able to comply with the guidelines published under section 6907 of this title and with other laws and regulations for the protection of health and the environment,

(4) in the case of a contract for construction or operation, such facility is not likely to be constructed or operated by State, local, or private persons or in the case of an application for financial assistance, such facility is not likely to receive adequate financial assistance from other sources, and

(5) any Federal interest in, or assistance to, such facility will be disposed of or terminated, with appropriate compensation, within such period of time as may be necessary to carry out the basic objectives of this chapter.

(b) Time limitation

No obligation may be made by the Administrator for financial assistance under this subchapter for any full-scale demonstration facility after the date ten years after October 21, 1976. No expenditure of funds for any such full-scale demonstration facility under this subchapter may be made by the Administrator after the date fourteen years after October 21, 1976.

(c) Cost sharing

(1) Wherever practicable, in constructing, operating, or providing financial assistance under this subchapter to a full-scale demonstration facility, the Administrator shall endeavor to enter into agreements and make other arrangements for maximum practicable cost sharing with other Federal, State, and local agencies, private persons, or any combination thereof.

(2) The Administrator shall enter into arrangements, wherever practicable and desirable, to provide monitoring of full-scale solid waste facilities (whether or not constructed or operated under this chapter) for purposes of obtaining information concerning the other aspects of such facilities. Where the Administrator provides only monitoring and evaluation instruments or personnel (or both) or funds for such instruments or personnel and provides no other financial assistance to a facility, notwithstanding section 6981(c)(3) of this title, title to any invention made or conceived of in the course of developing, constructing, or operating such facility shall not be required to vest in the United States and patents respecting such invention shall not be required to be issued to the United States.

(d) Prohibition

After October 21, 1976, the Administrator shall not construct or operate any full-scale facility (except by contract with public agencies or authorities or private persons).

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (c)(1). Pub. L. 98–616 inserted "(1)" before "Wherever".
1978—Subsec. (a)(1). Pub. L. 95–609 substituted "solid waste" for "discarded material".

EXECUTIVE DOCUMENTS
TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6985. Special study and demonstration projects on recovery of useful energy and materials

(a) Studies

The Administrator shall conduct studies and develop recommendations for administrative or legislative action on—

(1) means of recovering materials and energy from solid waste, recommended uses of such materials and energy for national or international welfare, including identification of potential markets for such recovered resources, the impact of distribution of such resources on existing markets, and potentials for energy conservation through resource conservation and resource recovery;

(2) actions to reduce waste generation which have been taken voluntarily or in response to governmental action, and those which practically could be taken in the future, and the economic, social, and environmental consequences of such actions;

(3) methods of collection, separation, and containerization which will encourage efficient utilization of facilities and contribute to more effective programs of reduction, reuse, or disposal of wastes;

(4) the use of Federal procurement to develop market demand for recovered resources;

(5) recommended incentives (including Federal grants, loans, and other assistance) and disincentives to accelerate the reclamation or recycling of materials from solid wastes, with special emphasis on motor vehicle hulks;

(6) the effect of existing public policies, including subsidies and economic incentives and disincentives, percentage depletion allowances, capital gains treatment and other tax incentives and disincentives, upon the recycling and reuse of materials, and the likely effect of the modification or elimination of such incentives and disincentives upon the reuse, recycling and conservation of such materials;

(7) the necessity and method of imposing disposal or other charges on packaging, containers, vehicles, and other manufactured goods, which charges would reflect the cost of final disposal, the value of recoverable components of the item, and any social costs associated with nonrecycling or uncontrolled disposal of such items; and

(8) the legal constraints and institutional barriers to the acquisition of land needed for solid waste management, including land for facilities and disposal sites;

(9) in consultation with the Secretary of Agriculture, agricultural waste management problems and practices, the extent of reuse and recovery of resources in such wastes, the prospects for improvement, Federal, State, and local regulations governing such practices, and the economic, social, and environmental consequences of such practices; and

(10) in consultation with the Secretary of the Interior, mining waste management problems, and practices, including an assessment of existing authorities, technologies, and economics, and the environmental and public health consequences of such practices.

(b) Demonstration

The Administrator is also authorized to carry out demonstration projects to test and demonstrate methods and techniques developed pursuant to subsection (a).

(c) Application of other sections

Section 6981(b) and (c) of this title shall be applicable to investigations, studies, and projects carried out under this section.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3253a of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6986. Grants for resource recovery systems and improved solid waste disposal facilities

(a) Authority
The Administrator is authorized to make grants pursuant to this section to any State, municipal, or interstate or intermunicipal agency for the demonstration of resource recovery systems or for the construction of new or improved solid waste disposal facilities.

(b) Conditions
(1) Any grant under this section for the demonstration of a resource recovery system may be made only if it (A) is consistent with any plans which meet the requirements of subchapter IV of this chapter; (B) is consistent with the guidelines recommended pursuant to section 6907 of this title; (C) is designed to provide area-wide resource recovery systems consistent with the purposes of this chapter, as determined by the Administrator, pursuant to regulations promulgated under subsection (d) of this section; and (D) provides an equitable system for distributing the costs associated with construction, operation, and maintenance of any resource recovery system among the users of such system.
(2) The Federal share for any project to which paragraph (1) applies shall not be more than 75 percent.

(c) Limitations
(1) A grant under this section for the construction of a new or improved solid waste disposal facility may be made only if—
   (A) a State or interstate plan for solid waste disposal has been adopted which applies to the area involved, and the facility to be constructed (i) is consistent with such plan, (ii) is included in a comprehensive plan for the area involved which is satisfactory to the Administrator for the purposes of this chapter, and (iii) is consistent with the guidelines recommended under section 6907 of this title, and
   (B) the project advances the state of the art by applying new and improved techniques in reducing the environmental impact of solid waste disposal, in achieving recovery of energy or resources, or in recycling useful materials.

(2) The Federal share for any project to which paragraph (1) applies shall be not more than 50 percent in the case of a project serving an area which includes only one municipality, and not more than 75 percent in any other case.

(d) Regulations
(1) The Administrator shall promulgate regulations establishing a procedure for awarding grants under this section which—
   (A) provides that projects will be carried out in communities of varying sizes, under such conditions as will assist in solving the community waste problems of urban-industrial centers, metropolitan regions, and rural areas, under representative geographic and environmental conditions; and
   (B) provides deadlines for submission of, and action on, grant requests.

(2) In taking action on applications for grants under this section, consideration shall be given by the Administrator (A) to the public benefits to be derived by the construction and the propriety of Federal aid in making such grant; (B) to the extent applicable, to the economic and commercial viability of the project (including contractual arrangements with the private sector to market any resources recovered); (C) to the potential of such project for general application to community solid waste disposal problems; and (D) to the use by the applicant of comprehensive regional or metropolitan area planning.

(e) Additional limitations
A grant under this section—
(1) may be made only in the amount of the Federal share of (A) the estimated total design and construction costs, plus (B) in the case of a grant to which subsection (b)(1) applies, the first-year operation and maintenance costs; (2) may not be provided for land acquisition or (except as otherwise provided in paragraph (1)(B)) for operating or maintenance costs; (3) may not be made until the applicant has made provision satisfactory to the Administrator for proper and efficient operation and maintenance of the project (subject to paragraph (1)(B)); and
(4) may be made subject to such conditions and requirements, in addition to those provided in this section, as the Administrator may require to properly carry out his functions pursuant to this chapter.

For purposes of paragraph (1), the non-Federal share may be in any form, including, but not limited to, lands or interests therein needed for the project or personal property or services, the value of which shall be determined by the Administrator.

(f) Single State
(1) Not more than 15 percent of the total of funds authorized to be appropriated for any fiscal year to carry out this section shall be granted under this section for projects in any one State.
(2) The Administrator shall prescribe by regulation the manner in which this subsection shall apply to a grant under this section for a project in an area which includes all or part of more than one State.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3254b of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6987. Authorization of appropriations

There are authorized to be appropriated not to exceed $35,000,000 for the fiscal year 1978 to carry out the purposes of this subchapter (except for section 6982 of this title).

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3259 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

SUBCHAPTER IX—REGULATION OF UNDERGROUND STORAGE TANKS

§6991. Definitions and exemptions

In this subchapter:

(1) INDIAN TRIBE.—

(A) IN GENERAL.—The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community that is recognized as being eligible for special programs and services provided by the United States to Indians because of their status as Indians.

(B) INCLUSIONS.—The term "Indian tribe" includes an Alaska Native village, as defined in or established under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.); and 1

(2) The term "nonoperational storage tank" means any underground storage tank in which regulated substances will not be deposited or from which regulated substances will not be dispensed after November 8, 1984.

(3) The term "operator" means any person in control of, or having responsibility for, the daily operation of the underground storage tank.

(4) The term "owner" means—

(A) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances and

(B) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on November 8, 1984, any person who owned such tank immediately before the discontinuation of its use.

(5) The term "person" has the same meaning as provided in section 6903(15) of this title, except that such term includes a consortium, a joint venture, and a commercial entity, and the United States Government.

(6) The term "petroleum" means petroleum, including crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

(7) The term "regulated substance" means—

(A) any substance defined in section 9601(14) of this title (but not including any substance regulated as a hazardous waste under subchapter III), and

(B) petroleum.

(8) The term "release" means any spilling, leaking, emitting, discharging, escaping, leaching, or disposing from an underground storage tank into ground water, surface water or subsurface soils.

(9) TRUST FUND.—The term "Trust Fund" means the Leaking Underground Storage Tank Trust Fund established by section 9508 of title 26.
(10) The term "underground storage tank" means any one or combination of tanks (including underground pipes connected thereto) which is used to contain an accumulation of regulated substances, and the volume of which (including the volume of the underground pipes connected thereto) is 10 per centum or more beneath the surface of the ground. Such term does not include any—

(A) farm or residential tank of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes,

(B) tank used for storing heating oil for consumptive use on the premises where stored,

(C) septic tank,

(D) pipeline facility (including gathering lines)—

(i) which is regulated under chapter 601 of title 49, or

(ii) which is an intrastate pipeline facility regulated under State laws as provided in chapter 601 of title 49,

and which is determined by the Secretary to be connected to a pipeline or to be operated or intended to be capable of operating at pipeline pressure or as an integral part of a pipeline,

(E) surface impoundment, pit, pond, or lagoon,

(F) storm water or waste water collection system,

(G) flow-through process tank,

(H) liquid trap or associated gathering lines directly related to oil or gas production and gathering operations, or

(I) storage tank situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated or upon or above the surface of the floor.

The term "underground storage tank" shall not include any pipes connected to any tank which is described in subparagraphs (A) through (I).

EDITORIAL NOTES

REFERENCES IN TEXT

The Alaska Native Claims Settlement Act, referred to in par. (1)(B), is Pub. L. 92–203, Dec. 18, 1971, 85 Stat. 688, as amended, which is classified generally to chapter 33 (§1601 et seq.) of Title 43, Public Lands. For complete classification of this Act to the Code, see Short Title note set out under section 1601 of Title 43 and Tables.

AMENDMENTS

2005—Pub. L. 109–58 substituted "In this subchapter:" for "For the purposes of this subchapter—" in introductory provisions, added pars. (1) and (9), redesignated former pars. (1) to (8) as pars. (10), (7), (4), (3), (8), (5), (2), and (6), respectively, and, in par. (4)(A), substituted "substances" for "substances".

1994—Par. (1)(D). Pub. L. 103–429 amended subpar. (D) generally. Prior to amendment, subpar. (D) read as follows: "pipeline facility (including gathering lines)—

"(i) which is regulated under the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App. 1671 et seq.),

"(ii) which is regulated under the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2001 et seq.), or

"(iii) which is an intrastate pipeline facility regulated under State laws as provided in the provisions of law referred to in clause (i) or (ii) of this subparagraph, and which is determined by the Secretary to be connected to a pipeline or to be operated or intended to be capable of operating at pipeline pressure or as an integral part of a pipeline."

1992—Par. (1)(D). Pub. L. 102–508 amended subpar. (D) generally. Prior to amendment, subpar. (D) read as follows: "pipeline facility (including gathering lines) regulated under—

"(i) the Natural Gas Pipeline Safety Act of 1968,

"(ii) the Hazardous Liquid Pipeline Safety Act of 1979, or

"(iii) which is an intrastate pipeline facility regulated under State laws comparable to the provisions of law referred to in clause (i) or (ii) of this subparagraph."

1986—Par. (2)(B). Pub. L. 99–499 struck out ", including crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute)". See par. (8).

STATUTORY NOTES AND RELATED SUBSIDIARIES

ABoveground Storage Tank Grant Program
Pub. L. 106–554, §1(a)(4) [div. B, title XII, §1201], Dec. 21, 2000, 114 Stat. 2763, 2763A-313, provided that:

"(a) Definitions.—In this provision:

"(1) Aboveground storage tank.—The term 'aboveground storage tank' means any tank or combination of tanks (including any connected pipe)—

"(A) that is used to contain an accumulation of regulated substances; and

"(B) the volume of which (including the volume of any connected pipe) is located wholly above the surface of the ground.

"(2) Administrator.—The term 'Administrator' means the Administrator of the Environmental Protection Agency.

"(4) Federal environmental law.—The term 'Federal environmental law' means—

"(A) the Oil Pollution Control Act of 1990 (33 U.S.C. 2701 et seq.);

"(B) the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.);

"(C) the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.);

"(D) the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.); or

"(E) any other Federal law that is applicable to the release into the environment of a regulated substance, as determined by the Administrator.

"(5) Native village.—The term 'Native village' has the meaning given the term in section 11(b) in Public Law 92–203 (85 Stat. 688) [43 U.S.C. 1610(b)].

"(6) Program.—The term 'program' means the Aboveground Storage Tank Grant Program established by subsection (b)(1).

"(7) Regulated substance.—The term 'regulated substance' has the meaning given the term in section 9001 of the Solid Waste Disposal Act (42 U.S.C. 6991).

"(8) State.—The term 'State' means the State of Alaska.

"(b) Establishment.—

"(1) In general.—There is established a grant program to be known as the 'Aboveground Storage Tank Grant Program'.

"(2) Grants.—Under the program, the Administrator shall award a grant to—

"(A) the State, on behalf of a Native village; or

"(B) the Denali Commission.

"(c) Use of Grants.—The State or the Denali Commission shall use the funds of a grant under subsection (b) to repair, upgrade, or replace one or more aboveground storage tanks that—

"(1) leaks or poses an imminent threat of leaking, as certified by the Administrator, the Commandant of the Coast Guard, or any other appropriate Federal or State agency (as determined by the Administrator); and

"(2) is located in a Native village—

"(A) the median household income of which is less than 80 percent of the median household income in the State;

"(B) that is located—

"(i) within the boundaries of—

"(II) a unit of the National Park System;

"(III) a unit of the National Wildlife Refuge System; or

"(ii) on public land under the administrative jurisdiction of the Bureau of Land Management; or

"(C) that receives payments from the Federal Government under chapter 69 of title 31, United States Code (commonly known as 'payments in lieu of taxes').

"(d) Reports.—Not later than 1 year after the date on which the State or the Denali Commission receives a grant under subsection (c), and annually thereafter, the State or the Denali Commission, as the case may be, shall submit a report describing each project completed with grant funds and any projects planned for the following year, to—

"(1) the Administrator;

"(2) the Committee on Resources [now Committee on Natural Resources] of the House of Representatives;

"(3) the Committee on Environment and Public Works of the Senate;

"(4) the Committee on Appropriations of the House of Representatives; and

"(5) the Committee on Appropriations of the Senate.

"(e) Authorization of Appropriations.—There are authorized to be appropriated to carry out this Act [probably means this section], to remain available until expended—

"(1) $20,000,000 for fiscal year 2001; and

"(2) such sums as are necessary for each fiscal year thereafter.
§6991a. Notification

(a) Underground storage tanks

(1) Within 18 months after November 8, 1984, each owner of an underground storage tank shall notify the State or local agency or department designated pursuant to subsection (b)(1) of the existence of such tank, specifying the age, size, type, location, and uses of such tank.

(2)(A) For each underground storage tank taken out of operation after January 1, 1974, the owner of such tank shall, within eighteen months after November 8, 1984, notify the State or local agency, or department designated pursuant to subsection (b)(1) of the existence of such tanks (unless the owner knows the tank subsequently was removed from the ground). The owner of a tank taken out of operation on or before January 1, 1974, shall not be required to notify the State or local agency under this subsection.

(B) Notice under subparagraph (A) shall specify, to the extent known to the owner—

(i) the date the tank was taken out of operation,

(ii) the age of the tank on the date taken out of operation,

(iii) the size, type and location of the tank, and

(iv) the type and quantity of substances left stored in such tank on the date taken out of operation.

(3) Any owner which brings into use an underground storage tank after the initial notification period specified under paragraph (1), shall notify the designated State or local agency or department within thirty days of the existence of such tank, specifying the age, size, type, location and uses of such tank.

(4) Paragraphs (1) through (3) of this subsection shall not apply to tanks for which notice was given pursuant to section 9603(c) of this title.

(5) Beginning thirty days after the Administrator prescribes the form of notice pursuant to subsection (b)(2) and for eighteen months thereafter, any person who deposits regulated substances in an underground storage tank shall reasonably notify the owner or operator of such tank of the owner’s notification requirements pursuant to this subsection.

(6) Beginning thirty days after the Administrator issues new tank performance standards pursuant to section 6991b(c) of this title, any person who sells a tank intended to be used as an underground storage tank shall notify the purchaser of such tank of the owner’s notification requirements pursuant to this subsection.

(b) Agency designation

(1) Within one hundred and eighty days after November 8, 1984, the Governors of each State shall designate the appropriate State agency or department or local agencies or departments to receive the notifications under subsection (a) (1), (2), or (3).

(2) Within twelve months after November 8, 1984, the Administrator, in consultation with State and local officials designated pursuant to subsection (b)(1), and after notice and opportunity for public comment, shall prescribe the form of the notice and the information to be included in the notifications under subsection (a)(1), (2), or (3). In prescribing the form of such notice, the Administrator shall take into account the effect on small businesses and other owners and operators.

(c) State inventories

Each State shall make 2 separate inventories of all underground storage tanks in such State containing regulated substances. One inventory shall be made with respect to petroleum and one with respect to other regulated substances. In making such inventories, the State shall utilize and aggregate the data in the notification forms submitted pursuant to subsections (a) and (b) of this section. Each State shall submit such aggregated data to the Administrator not later than 270 days after October 17, 1986.

(d) Public record

(1) In general

The Administrator shall require each State that receives Federal funds to carry out this subchapter to maintain, update at least annually, and make available to the public, in such manner and form as the Administrator shall prescribe (after consultation with States), a record of underground storage tanks regulated under this subchapter.

(2) Considerations

To the maximum extent practicable, the public record of a State, respectively, shall include, for each year—

(A) the number, sources, and causes of underground storage tank releases in the State;

(B) the record of compliance by underground storage tanks in the State with—

(i) this subchapter; or

(ii) an applicable State program approved under section 6991c of this title; and
(C) data on the number of underground storage tank equipment failures in the State.

**EDITORIAL NOTES**

**AMENDMENTS**

§6991b. Release detection, prevention, and correction regulations

(a) Regulations

The Administrator, after notice and opportunity for public comment, and at least three months before the effective dates specified in subsection (f), shall promulgate release detection, prevention, and correction regulations applicable to all owners and operators of underground storage tanks, as may be necessary to protect human health and the environment.

(b) Distinctions in regulations

In promulgating regulations under this section, the Administrator may distinguish between types, classes, and ages of underground storage tanks. In making such distinctions, the Administrator may take into consideration factors, including, but not limited to: location of the tanks, soil and climate conditions, uses of the tanks, history of maintenance, age of the tanks, current industry recommended practices, national consensus codes, hydrogeology, water table, size of the tanks, quantity of regulated substances periodically deposited in or dispensed from the tank, the technical capability of the owners and operators, and the compatibility of the regulated substance and the materials of which the tank is fabricated.

(c) Requirements

The regulations promulgated pursuant to this section shall include, but need not be limited to, the following requirements respecting all underground storage tanks—

1. requirements for maintaining a leak detection system, an inventory control system together with tank testing, or a comparable system or method designed to identify releases in a manner consistent with the protection of human health and the environment;

2. requirements for maintaining records of any monitoring or leak detection system or inventory control system or tank testing or comparable system;

3. requirements for reporting of releases and corrective action taken in response to a release from an underground storage tank;

4. requirements for taking corrective action in response to a release from an underground storage tank;

5. requirements for the closure of tanks to prevent future releases of regulated substances into the environment; and

6. requirements for maintaining evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from operating an underground storage tank.

(d) Financial responsibility

1. Financial responsibility required by this subsection may be established in accordance with regulations promulgated by the Administrator by any one, or any combination, of the following: insurance, guarantee, surety bond, letter of credit, qualification as a self-insurer or any other method satisfactory to the Administrator. In promulgating requirements under this subsection, the Administrator is authorized to specify policy or other contractual terms, conditions, or defenses which are necessary or are unacceptable in establishing such evidence of financial responsibility in order to effectuate the purposes of this subchapter.

2. In any case where the owner or operator is in bankruptcy, reorganization, or arrangement pursuant to the Federal Bankruptcy Code or where with reasonable diligence jurisdiction in any State court of the Federal courts cannot be obtained over an owner or operator likely to be solvent at the time of judgment, any claim arising from conduct for which evidence of financial responsibility must be provided under this subsection may be asserted directly against the guarantor providing such evidence of financial responsibility. In the case of any action pursuant to this paragraph such guarantor shall be entitled to invoke all rights and defenses which would have been available to the owner or operator if any action had been brought against the owner or operator by the claimant and which would have been available to the guarantor if an action had been brought against the guarantor by the owner or operator.

3. The total liability of any guarantor shall be limited to the aggregate amount which the guarantor has provided as evidence of financial responsibility to the owner or operator under this section. Nothing in this subsection shall be construed to limit any other State or Federal statutory, contractual or common law liability of a guarantor to its owner or operator including, but not limited to, the liability of such guarantor for bad faith either in negotiating or in failing to negotiate the settlement of any claim. Nothing in this subsection shall be construed to diminish the liability of any person under section 9607 or 9611 of this title or other applicable law.

4. For the purpose of this subsection, the term "guarantor" means any person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator under this subsection.
(5)(A) The Administrator, in promulgating financial responsibility regulations under this section, may establish an amount of coverage for particular classes or categories of underground storage tanks containing petroleum which shall satisfy such regulations and which shall not be less than $1,000,000 for each occurrence with an appropriate aggregate requirement.

(B) The Administrator may set amounts lower than the amounts required by subparagraph (A) of this paragraph for underground storage tanks containing petroleum which are at facilities not engaged in petroleum production, refining, or marketing and which are not used to handle substantial quantities of petroleum.

(C) In establishing classes and categories for purposes of this paragraph, the Administrator may consider the following factors:
   (i) The size, type, location, storage, and handling capacity of underground storage tanks in the class or category and the volume of petroleum handled by such tanks.
   (ii) The likelihood of release and the potential extent of damage from any release from underground storage tanks in the class or category.
   (iii) The economic impact of the limits on the owners and operators of each such class or category, particularly relating to the small business segment of the petroleum marketing industry.
   (iv) The availability of methods of financial responsibility in amounts greater than the amount established by this paragraph.
   (v) Such other factors as the Administrator deems pertinent.

(D) The Administrator may suspend enforcement of the financial responsibility requirements for a particular class or category of underground storage tanks in a particular State, if the Administrator makes a determination that methods of financial responsibility satisfying the requirements of this subsection are not generally available for underground storage tanks in that class or category, and—
   (i) steps are being taken to form a risk retention group for such class of tanks; or
   (ii) such State is taking steps to establish a fund pursuant to section 6991(c)(1) of this title to be submitted as evidence of financial responsibility.

A suspension by the Administrator pursuant to this paragraph shall extend for a period not to exceed 180 days. A determination to suspend may be made with respect to the same class or category or for the same State at the end of such period, but only if substantial progress has been made in establishing a risk retention group, or the owners or operators in the class or category demonstrate, and the Administrator finds, that the formation of such a group is not possible and that the State is unable or unwilling to establish such a fund pursuant to clause (ii).

(e) New tank performance standards
   The Administrator shall, not later than three months prior to the effective date specified in subsection (f), issue performance standards for underground storage tanks brought into use on or after the effective date of such standards. The performance standards for new underground storage tanks shall include, but need not be limited to, design, construction, installation, release detection, and compatibility standards.

(f) Effective dates
   (1) Regulations issued pursuant to subsections (c) and (d), and standards issued pursuant to subsection (e) of this section, for underground storage tanks containing regulated substances defined in section 6991(7)(B) of this title (petroleum, including crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure) shall be effective not later than thirty months after November 8, 1984.
   (2) Standards issued pursuant to subsection (e) of this section (entitled "New Tank Performance Standards") for underground storage tanks containing regulated substances defined in section 6991(7)(A) of this title shall be effective not later than thirty-six months after November 8, 1984.
   (3) Regulations issued pursuant to subsection (c) of this section (entitled "Requirements") and standards issued pursuant to subsection (d) of this section (entitled "Financial Responsibility") for underground storage tanks containing regulated substances defined in section 6991(7)(A) of this title shall be effective not later than forty-eight months after November 8, 1984.

(g) Interim prohibition
   (1) Until the effective date of the standards promulgated by the Administrator under subsection (e) and after one hundred and eighty days after November 8, 1984, no person may install an underground storage tank for the purpose of storing regulated substances unless such tank (whether of single or double wall construction)—
      (A) will prevent releases due to corrosion or structural failure for the operational life of the tank;
      (B) is cathodically protected against corrosion, constructed of noncorrosive material, steel clad with a noncorrosive material, or designed in a manner to prevent the release or threatened release of any stored substance; and
      (C) the material used in the construction or lining of the tank is compatible with the substance to be stored.

   (2) Notwithstanding paragraph (1), if soil tests conducted in accordance with ASTM Standard G57–78, or another standard approved by the Administrator, show that soil resistivity in an installation location is 12,000 ohm/cm or more (unless a more stringent standard is prescribed by the Administrator by rule), a storage tank without corrosion protection may be installed in that location during the period referred to in paragraph (1).

(h) EPA response program for petroleum

   (1) Before regulations
Before the effective date of regulations under subsection (c), the Administrator (or a State pursuant to paragraph (7)) is authorized to—

(A) require the owner or operator of an underground storage tank to undertake corrective action with respect to any release of petroleum when the Administrator (or the State) determines that such corrective action will be done properly and promptly by the owner or operator of the underground storage tank from which the release occurs; or

(B) undertake corrective action with respect to any release of petroleum into the environment from an underground storage tank if such action is necessary, in the judgment of the Administrator (or the State), to protect human health and the environment.

The corrective action undertaken or required under this paragraph shall be such as may be necessary to protect human health and the environment. The Administrator shall use funds in the Trust Fund for payment of costs incurred for corrective action under subparagraph (B), enforcement action under subparagraph (A), and cost recovery under paragraph (6) of this subsection. Subject to the priority requirements of paragraph (3), the Administrator (or the State) shall give priority in undertaking such actions under subparagraph (B) to cases where the Administrator (or the State) cannot identify a solvent owner or operator of the tank who will undertake action properly.

(2) After regulations

Following the effective date of regulations under subsection (c), all actions or orders of the Administrator (or a State pursuant to paragraph (7)) described in paragraph (1) of this subsection shall be in conformity with such regulations. Following such effective date, the Administrator (or the State) may undertake corrective action with respect to any release of petroleum into the environment from an underground storage tank only if such action is necessary, in the judgment of the Administrator (or the State), to protect human health and the environment and one or more of the following situations exists:

(A) No person can be found, within 90 days or such shorter period as may be necessary to protect human health and the environment, who is—

(i) an owner or operator of the tank concerned,

(ii) subject to such corrective action regulations, and

(iii) capable of carrying out such corrective action properly.

(B) A situation exists which requires prompt action by the Administrator (or the State) under this paragraph to protect human health and the environment.

(C) Corrective action costs at a facility exceed the amount of coverage required by the Administrator pursuant to the provisions of subsections (c) and (d)(5) of this section and, considering the class or category of underground storage tank from which the release occurred, expenditures from the Trust Fund are necessary to assure an effective corrective action.

(D) The owner or operator of the tank has failed or refused to comply with an order of the Administrator under this subsection or section 6991e of this title or with the order of a State under this subsection to comply with the corrective action regulations.

(3) Priority of corrective actions

The Administrator (or a State pursuant to paragraph (7)) shall give priority in undertaking corrective actions under this subsection, and in issuing orders requiring owners or operators to undertake such actions, to releases of petroleum from underground storage tanks which pose the greatest threat to human health and the environment.

(4) Corrective action orders

The Administrator is authorized to issue orders to the owner or operator of an underground storage tank to carry out subparagraph (A) of paragraph (1) or to carry out regulations issued under subsection (c)(4). A State acting pursuant to paragraph (7) of this subsection is authorized to carry out subparagraph (A) of paragraph (1) only until the State's program is approved by the Administrator under section 6991c of this title. Such orders shall be issued and enforced in the same manner and subject to the same requirements as orders under section 6991e of this title.

(5) Allowable corrective actions

The corrective actions undertaken by the Administrator (or a State pursuant to paragraph (7)) under paragraph (1) or (2) may include temporary or permanent relocation of residents and alternative household water supplies. In connection with the performance of any corrective action under paragraph (1) or (2), the Administrator may undertake an exposure assessment as defined in paragraph (10) of this subsection or provide for such an assessment in a cooperative agreement with a State pursuant to paragraph (7) of this subsection. The costs of any such assessment may be treated as corrective action for purposes of paragraph (6), relating to cost recovery.

(6) Recovery of costs

(A) In general

Whenever costs have been incurred by the Administrator, or by a State pursuant to paragraph (7), for undertaking corrective action or enforcement action with respect to the release of petroleum from an underground storage tank, the owner or operator of such tank shall be liable to the Administrator or the State for such costs. The liability under this paragraph shall be construed to be the standard of liability which obtains under section 1321 of title 33.

(B) Recovery

In determining the equities for seeking the recovery of costs under subparagraph (A), the Administrator (or a State pursuant to paragraph (7) of this subsection) may consider the amount of financial responsibility required to be
maintained under subsections (c) and (d)(5) of this section and the factors considered in establishing such amount under subsection (d)(5).

(C) Effect on liability

(i) No transfers of liability

No indemnification, hold harmless, or similar agreement or conveyance shall be effective to transfer from the owner or operator of any underground storage tank or from any person who may be liable for a release or threat of release under this subsection, to any other person the liability imposed under this subsection. Nothing in this subsection shall bar any agreement to insure, hold harmless, or indemnify a party to such agreement for any liability under this section.

(ii) No bar to cause of action

Nothing in this subsection, including the provisions of clause (i) of this subparagraph, shall bar a cause of action that an owner or operator or any other person subject to liability under this section, or a guarantor, has or would have, by reason of subrogation or otherwise against any person.

(D) Facility

For purposes of this paragraph, the term "facility" means, with respect to any owner or operator, all underground storage tanks used for the storage of petroleum which are owned or operated by such owner or operator and located on a single parcel of property (or on any contiguous or adjacent property).

(E) Inability or limited ability to pay

(i) In general

In determining the level of recovery effort, or amount that should be recovered, the Administrator (or the State pursuant to paragraph (7)) shall consider the owner or operator's ability to pay. An inability or limited ability to pay corrective action costs must be demonstrated to the Administrator (or the State pursuant to paragraph (7)) by the owner or operator.

(ii) Considerations

In determining whether or not a demonstration is made under clause (i), the Administrator (or the State pursuant to paragraph (7)) shall take into consideration the ability of the owner or operator to pay corrective action costs and still maintain its basic business operations, including consideration of the overall financial condition of the owner or operator and demonstrable constraints on the ability of the owner or operator to raise revenues.

(iii) Information

An owner or operator requesting consideration under this subparagraph shall promptly provide the Administrator (or the State pursuant to paragraph (7)) with all relevant information needed to determine the ability of the owner or operator to pay corrective action costs.

(iv) Alternative payment methods

The Administrator (or the State pursuant to paragraph (7)) shall consider alternative payment methods as may be necessary or appropriate if the Administrator (or the State pursuant to paragraph (7)) determines that an owner or operator cannot pay all or a portion of the costs in a lump sum payment.

(v) Misrepresentation

If an owner or operator provides false information or otherwise misrepresents their financial situation under clause (ii), the Administrator (or the State pursuant to paragraph (7)) shall seek full recovery of the costs of all such actions pursuant to the provisions of subparagraph (A) without consideration of the factors in subparagraph (B).

(7) State authorities

(A) General

A State may exercise the authorities in paragraphs (1), (2), and (12), subject to the terms and conditions of paragraphs (3), (5), (9), (10), and (11), and the authority under sections 6991j and 6991k of this title and paragraphs (4), (6), and (8), if—

(i) the Administrator determines that the State has the capabilities to carry out effective corrective actions and enforcement activities; and

(ii) the Administrator enters into a cooperative agreement with the State setting out the actions to be undertaken by the State.

The Administrator may provide funds from the Trust Fund for the reasonable costs of the State’s actions under the cooperative agreement.

(B) Cost share

Following the effective date of the regulations under subsection (c) of this section, the State shall pay 10 per centum of the cost of corrective actions undertaken either by the Administrator or by the State under a cooperative agreement, except that the Administrator may take corrective action at a facility where immediate action is necessary to respond to an imminent and substantial endangerment to human health or the environment if the State fails to pay the cost share.

(8) Emergency procurement powers
Notwithstanding any other provision of law, the Administrator may authorize the use of such emergency procurement powers as he deems necessary.

(9) Definition of owner or operator

(A) In general

As used in this subchapter, the terms "owner" and "operator" do not include a person that, without participating in the management of an underground storage tank and otherwise not engaged in petroleum production, refining, or marketing, holds indicia of ownership primarily to protect the person's security interest.

(B) Security interest holders

The provisions regarding holders of security interests in subparagraphs (E) through (G) of section 9601(20) of this title and the provisions regarding fiduciaries at section 9607(n) of this title shall apply in determining a person's liability as an owner or operator of an underground storage tank for the purposes of this subchapter.

(C) Effect on rule

Nothing in subparagraph (B) shall be construed as modifying or affecting the final rule issued by the Administrator on September 7, 1995 (60 Fed. Reg. 46,692), or as limiting the authority of the Administrator to amend the final rule, in accordance with applicable law. The final rule in effect on September 30, 1996, shall prevail over any inconsistent provision regarding holders of security interests in subparagraphs (E) through (G) of section 9601(20) of this title or any inconsistent provision regarding fiduciaries in section 9607(n) of this title. Any amendment to the final rule shall be consistent with the provisions regarding holders of security interests in subparagraphs (E) through (G) of section 9601(20) of this title and the provisions regarding fiduciaries in section 9607(n) of this title. This subparagraph does not preclude judicial review of any amendment of the final rule made after September 30, 1996.

(10) Definition of exposure assessment

As used in this subsection, the term "exposure assessment" means an assessment to determine the extent of exposure of, or potential for exposure of, individuals to petroleum from a release from an underground storage tank based on such factors as the nature and extent of contamination and the existence of or potential for pathways of human exposure (including ground or surface water contamination, air emissions, and food chain contamination), the size of the community within the likely pathways of exposure, and the comparison of expected human exposure levels to the short-term and long-term health effects associated with identified contaminants and any available recommended exposure or tolerance limits for such contaminants. Such assessment shall not delay corrective action to abate immediate hazards or reduce exposure.

(11) Facilities without financial responsibility

At any facility where the owner or operator has failed to maintain evidence of financial responsibility in amounts at least equal to the amounts established by subsection (d)(5)(A) of this section (or a lesser amount if such amount is applicable to such facility as a result of subsection (d)(5)(B) of this section) for whatever reason the Administrator shall expend no monies from the Trust Fund to clean up releases at such facility pursuant to the provisions of paragraph (1) or (2) of this subsection. At such facilities the Administrator shall use the authorities provided in subparagraph (A) of paragraph (1) and paragraph (4) of this subsection and section 6991e of this title to order corrective action to clean up such releases. States acting pursuant to paragraph (7) of this subsection shall use the authorities provided in subparagraph (A) of paragraph (1) and paragraph (4) of this subsection to order corrective action to clean up such releases. Notwithstanding the provisions of this paragraph, the Administrator may use monies from the fund to take the corrective actions authorized by paragraph (5) of this subsection to protect human health at such facilities and shall seek full recovery of the costs of all such actions pursuant to the provisions of paragraph (6)(A) of this subsection and without consideration of the factors in paragraph (6)(B) of this subsection. Nothing in this paragraph shall prevent the Administrator (or a State pursuant to paragraph (7) of this subsection) from taking corrective action at a facility where there is no solvent owner or operator or where immediate action is necessary to respond to an imminent and substantial endangerment of human health or the environment.

(12) Remediation of oxygenated fuel contamination

(A) In general

The Administrator and the States may use funds made available under section 6991m(2)(B) of this title to carry out corrective actions with respect to a release of a fuel containing an oxygenated fuel additive that presents a threat to human health or welfare or the environment.

(B) Applicable authority

The Administrator or a State shall carry out subparagraph (A) in accordance with paragraph (2), and in the case of a State, in accordance with a cooperative agreement entered into by the Administrator and the State under paragraph (7).

(i) Additional measures to protect groundwater from contamination

The Administrator shall require each State that receives funding under this subchapter to require one of the following:

(1) Tank and piping secondary containment

(A) Each new underground storage tank, or piping connected to any such new tank, installed after the effective date of this subsection, or any existing underground storage tank, or existing piping connected to such existing tank, that is replaced after the effective date of this subsection, shall be secondarily contained and monitored for leaks if the new or replaced underground storage tank or piping is within 1,000 feet of any existing community water system or any existing potable drinking water well.
(B) In the case of a new underground storage tank system consisting of one or more underground storage tanks and connected by piping, subparagraph (A) shall apply to all underground storage tanks and connected pipes comprising such system.

(C) In the case of a replacement of an existing underground storage tank or existing piping connected to the underground storage tank, subparagraph (A) shall apply only to the specific underground storage tank or piping being replaced, not to other underground storage tanks and connected pipes comprising such system.

(D) Each installation of a new motor fuel dispenser system, after the effective date of this subsection, shall include under-dispenser spill containment if the new dispenser is within 1,000 feet of any existing community water system or any existing potable drinking water well.

(E) This paragraph shall not apply to repairs to an underground storage tank, piping, or dispenser that are meant to restore a tank, pipe, or dispenser to operating condition.

(F) As used in this subsection:

(i) The term "secondarily contained" means a release detection and prevention system that meets the requirements of 40 CFR 280.43(g), but shall not include under-dispenser spill containment or control systems.

(ii) The term "underground storage tank" has the meaning given to it in section 6991 of this title, except that such term does not include tank combinations or more than a single underground pipe connected to a tank.

(iii) The term "installation of a new motor fuel dispenser system" means the installation of a new motor fuel dispenser and the equipment necessary to connect the dispenser to the underground storage tank system, but does not mean the installation of a motor fuel dispenser installed separately from the equipment need to connect the dispenser to the underground storage tank system.

(2) Evidence of financial responsibility and certification

(A) Manufacturer and installer financial responsibility

A person that manufactures an underground storage tank or piping for an underground storage tank system or that installs an underground storage tank system is required to maintain evidence of financial responsibility under subsection (d) in order to provide for the costs of corrective actions directly related to releases caused by improper manufacture or installation unless the person can demonstrate themselves to be already covered as an owner or operator of an underground storage tank under this section.

(B) Installer certification

The Administrator and each State that receives funding under this subchapter, as appropriate, shall require that a person that installs an underground storage tank system is—

(i) certified or licensed by the tank and piping manufacturer;

(ii) certified or licensed by the Administrator or a State, as appropriate;

(iii) has their underground storage tank system installation certified by a registered professional engineer with education and experience in underground storage tank system installation;

(iv) has had their installation of the underground storage tank inspected and approved by the Administrator or the State, as appropriate;

(v) compliant with a code of practice developed by a nationally recognized association or independent testing laboratory and in accordance with the manufacturer’s instructions; or

(vi) compliant with another method that is determined by the Administrator or a State, as appropriate, to be no less protective of human health and the environment.

(C) Savings clause

Nothing in subparagraph (A) alters or affects the liability of any owner or operator of an underground storage tank.

(j) Government-owned tanks

(1) State compliance report

(A) Not later than 2 years after August 8, 2005, each State that receives funding under this subchapter shall submit to the Administrator a State compliance report that—

(i) lists the location and owner of each underground storage tank described in subparagraph (B) in the State that, as of the date of submission of the report, is not in compliance with this section; and

(ii) specifies the date of the last inspection and describes the actions that have been and will be taken to ensure compliance of the underground storage tank listed under clause (i) with this subchapter.

(B) An underground storage tank described in this subparagraph is an underground storage tank that is—

(i) regulated under this subchapter; and

(ii) owned or operated by the Federal, State, or local government.

(C) The Administrator shall make each report, received under subparagraph (A), available to the public through an appropriate media.

(2) Financial incentive

The Administrator may award to a State that develops a report described in paragraph (1), in addition to any other funds that the State is entitled to receive under this subchapter, not more than $50,000, to be used to carry out the report.

(3) Not a safe harbor
This subsection does not relieve any person from any obligation or requirement under this subchapter.

EDITORIAL NOTES

REFERENCES IN TEXT

The Federal Bankruptcy Code, referred to in subsec. (d)(2), probably means a reference to Title 11, Bankruptcy.

The effective date of this subsection, referred to in subsec. (i)(1)(A), (D), is 18 months after Aug. 8, 2005. See Effective Date of 2005 Amendment note set out below.

AMENDMENTS

2006—Subsecs. (i), (j). Pub. L. 109–168 redesignated subsec. (i), relating to government-owned tanks, as (j). Subsec. (j) was editorially transferred to the end of the section to reflect the probable intent of Congress.

2005—Subsec. (f)(1). Pub. L. 109–58, §1533(2), substituted "subsections (c) and (d)" for "subsection (c) and (d) of this section".

Pub. L. 109–58, §1532(b)(1)(A), substituted "6991(7)(B)" for "6991(2)(B)".

Pub. L. 109–58, §1525(1), in introductory provisions, substituted "paragraphs (1), (2), and (12)" for "paragraphs (1) and (2) of this subsection" and "and the authority under sections 6991 and 6991k of this title and paragraphs (4), (6), and (8)," for "and including the authorities of paragraphs (4), (6), and (8) of this subsection".

Subsec. (i). Pub. L. 109–58, §1530(a), added subsec. (i) relating to additional measures to protect groundwater from contamination.

Pub. L. 109–58, §1526(b), added subsec. (i) relating to government-owned tanks.

1996—Subsec. (h)(9). Pub. L. 104–208 added par. (9) and struck out heading and text of former par. (9). Text read as follows: "As used in this subsection, the term 'owner' does not include any person who, without participating in the management of an underground storage tank and otherwise not engaged in petroleum production, refining, and marketing, holds indicia of ownership primarily to protect the owner's security interest in the tank."

Subsec. (d)(1). Pub. L. 99–499, §205(c)(3), which directed that par. (1) be amended by "striking out 'or' after 'credit,' and by striking out the period at the end thereof and inserting in lieu thereof the following: 'or any other method satisfactory to the Administrator.'", was executed by striking the period and making insertion at end of first sentence, rather than at end of par. (1), as the probable intent of Congress, because an earlier version of the amending legislation had provided that such amendment be made to first sentence.

Pub. L. 99–499, §205(c)(2), redesignated par. (2) as (1) and struck out former par. (1) which read as follows: "As he deems necessary or desirable, the Administrator shall promulgate regulations containing requirements for maintaining evidence of financial responsibility as he deems necessary and desirable for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from operating an underground storage tank."

Subsec. (d)(2) to (5). Pub. L. 99–499, §205(c)(2), (4), added par. (5) and redesignated pars. (3) to (5) as (2) to (4), respectively. Former par. (2) redesignated (1).

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 2005 AMENDMENT

Pub. L. 109–58, title XV, §1530(b), Aug. 8, 2005, 119 Stat. 1104, provided that: "This subsection [probably means this section, which amended this section and section 6991e of this title and enacted provisions set out as
notes under this section] shall take effect 18 months after the date of enactment of this subsection [Aug. 8, 2005]."

**Effective Date of 1996 Amendment**

**Regulations**

Pub. L. 109–58, title XV, §1530(c), Aug. 8, 2005, 119 Stat. 1104, provided that: "The Administrator shall issue regulations or guidelines implementing the requirements of this subsection [probably means this section, which amended this section and section 6991e of this title and enacted provisions set out as notes under this section], including guidance to differentiate between the terms 'repair' and 'replace' for the purposes of section 9003(i)(1) of the Solid Waste Disposal Act [42 U.S.C. 6991b(i)(1)]."

**Assistance Agreements With Indian Tribes**

Pub. L. 105–276, title III, Oct. 21, 1998, 112 Stat. 2497, provided in part: "That hereafter, the Administrator is authorized to enter into assistance agreements with Federally recognized Indian tribes on such terms and conditions as the Administrator deems appropriate for the same purposes as are set forth in section 9003(h) (7) of the Resource Conservation and Recovery Act [probably means section 9003(h)(7) of Pub. L. 89–272, 42 U.S.C. 6991b(h)(7)]."

**Pollution Liability Insurance**

"(1) **STUDY.**—The Comptroller General shall conduct a study of the availability of pollution liability insurance, leak insurance, and contamination insurance for owners and operators of petroleum storage and distribution facilities. The study shall assess the current and projected extent to which private insurance can contribute to the financial responsibility of owners and operators of underground storage tanks and the ability of owners and operators of underground storage tanks to maintain financial responsibility through other methods. The study shall consider the experience of owners and operators of marine vessels in getting insurance for their liabilities under the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.] and the operation of the Water Quality Insurance Syndicate.

"(2) **REPORT.**—The Comptroller General shall report the findings under this subsection to the Congress within 15 months after the enactment of this subsection [Oct. 17, 1986]. Such report shall include recommendations for legislative or administrative changes that will enable owners and operators of underground storage tanks to maintain financial responsibility sufficient to provide all clean-up costs and damages that may result from reasonably foreseeable releases and events."

1 So in original.

2 So in original. Probably should be "medium."

**§6991c. Approval of State programs**

(a) **Elements of State program**

Beginning 30 months after November 8, 1984, any State may,1 submit an underground storage tank release detection, prevention, and correction program for review and approval by the Administrator. The program may cover tanks used to store regulated substances referred to in subparagraph (A) or (B) of section 6991(7) of this title. A State program may be approved by the Administrator under this section only if the State demonstrates that the State program includes the following requirements and standards and provides for adequate enforcement of compliance with such requirements and standards—

(1) requirements for maintaining a leak detection system, an inventory control system together with tank testing, or a comparable system or method designed to identify releases in a manner consistent with the protection of human health and the environment;  
(2) requirements for maintaining records of any monitoring or leak detection system or inventory control system or tank testing system;  
(3) requirements for reporting of any releases and corrective action taken in response to a release from an underground storage tank;  
(4) requirements for taking corrective action in response to a release from an underground storage tank;  
(5) requirements for the closure of tanks to prevent future releases of regulated substances into the environment;
requirements for maintaining evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from operating an underground storage tank;
(7) standards of performance for new underground storage tanks;
(8) requirements—
(A) for notifying the appropriate State agency or department (or local agency or department) designated according to section 6991a(b)(1) of this title of the existence of any operational or non-operational underground storage tank; and
(B) for providing the information required on the form issued pursuant to section 6991a(b)(2) of this title; and

(9) State-specific training requirements as required by section 6991i of this title.

(b) Federal standards

(1) A State program approved under this section may be approved only if the requirements under paragraphs (1) through (7) of subsection (a) are no less stringent than the corresponding requirements standards promulgated by the Administrator pursuant to section 6991b(a) of this title.
(2)(A) A State program may be approved without regard to whether or not the requirements referred to in paragraphs (1), (2), (3), and (5) of subsection (a) are less stringent than the corresponding standards under section 6991b(a) of this title during the one-year period commencing on the date of promulgation of regulations under section 6991b(a) of this title if State regulatory action but no State legislative action is required in order to adopt a State program.
(B) If such State legislative action is required, the State program may be approved without regard to whether or not the requirements referred to in paragraphs (1), (2), (3), and (5) of subsection (a) are less stringent than the corresponding standards under section 6991b(a) of this title during the two-year period commencing on the date of promulgation of regulations under section 6991b(a) of this title (and during an additional one-year period after such legislative action if regulations are required to be promulgated by the State pursuant to such legislative action).

(c) Financial responsibility

(1) Corrective action and compensation programs administered by State or local agencies or departments may be submitted for approval under subsection (a)(6) as evidence of financial responsibility.
(2) Financial responsibility required by this subsection may be established in accordance with regulations promulgated by the Administrator by any one, or any combination, of the following: insurance, guarantee, surety bond, letter of credit, qualification as a self-insurer or any other method satisfactory to the Administrator. In promulgating requirements under this subsection, the Administrator is authorized to specify policy or other contractual terms including the amount of coverage required for various classes and categories of underground storage tanks pursuant to section 6991b(d)(5) of this title, conditions, or defenses which are necessary or are unacceptable in establishing such evidence of financial responsibility in order to effectuate the purposes of this subchapter.
(3) In any case where the owner or operator is in bankruptcy, reorganization, or arrangement pursuant to the Federal Bankruptcy Code or where with reasonable diligence jurisdiction in any State court of the Federal courts cannot be obtained over an owner or operator likely to be solvent at the time of judgment, any claim arising from conduct for which evidence of financial responsibility must be provided under this subsection may be asserted directly against the guarantor providing such evidence of financial responsibility. In the case of any action pursuant to this paragraph such guarantor shall be entitled to invoke all rights and defenses which would have been available to the owner or operator if any action had been brought against the owner or operator by the claimant and which would have been available to the guarantor if an action had been brought against the guarantor by the owner or operator.
(4) The total liability of any guarantor shall be limited to the aggregate amount which the guarantor has provided as evidence of financial responsibility to the owner or operator under this section. Nothing in this subsection shall be construed to limit any other State or Federal statutory, contractual or common law liability of a guarantor to its owner or operator including, but not limited to, the liability of such guarantor for bad faith either in negotiating or in failing to negotiate the settlement of any claim. Nothing in this subsection shall be construed to diminish the liability of any person under section 9607 or 9611 of this title or other applicable law.
(5) For the purpose of this subsection, the term "guarantor" means any person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator under this subsection.
(6) Withdrawal of Approval.—After an opportunity for good faith, collaborative efforts to correct financial deficiencies with a State fund, the Administrator may withdraw approval of any State fund or State assurance program to be used as a financial responsibility mechanism without withdrawing approval of a State underground storage tank program under subsection (a).

(d) EPA determination

(1) Within one hundred and eighty days of the date of receipt of a proposed State program, the Administrator shall, after notice and opportunity for public comment, make a determination whether the State's program complies with the provisions of this section and provides for adequate enforcement of compliance with the requirements and standards adopted pursuant to this section.
(2) If the Administrator determines that a State program complies with the provisions of this section and provides for adequate enforcement of compliance with the requirements and standards adopted pursuant to this section, he shall approve the State program in lieu of the Federal program and the State shall have primary enforcement responsibility with respect to requirements of its program.

(e) Withdrawal of authorization

Whenever the Administrator determines after public hearing that a State is not administering and enforcing a program authorized under this subchapter in accordance with the provisions of this section, he shall so notify the State. If appropriate
action is not taken within a reasonable time, not to exceed one hundred and twenty days after such notification, the Administrator shall withdraw approval of such program and reestablish the Federal program pursuant to this subchapter.

(f) Trust Fund distribution

(1) In general

(A) Amount and permitted uses of distribution

The Administrator shall distribute to States not less than 80 percent of the funds from the Trust Fund that are made available to the Administrator under section 6991m(2)(A) of this title for each fiscal year for use in paying the reasonable costs, incurred under a cooperative agreement with any State for—

(i) corrective actions taken by the State under section 6991b(h)(7)(A) of this title;

(ii) necessary administrative expenses, as determined by the Administrator, that are directly related to State fund or State assurance programs under subsection (c)(1); or

(iii) enforcement, by a State or a local government, of State or local regulations pertaining to underground storage tanks regulated under this subchapter.

(B) Use of funds for enforcement

In addition to the uses of funds authorized under subparagraph (A), the Administrator may use funds from the Trust Fund that are not distributed to States under subparagraph (A) for enforcement of any regulation promulgated by the Administrator under this subchapter.

(C) Prohibited uses

Funds provided to a State by the Administrator under subparagraph (A) shall not be used by the State to provide financial assistance to an owner or operator to meet any requirement relating to underground storage tanks under subparts B, C, D, H, and G of part 280 of title 40, Code of Federal Regulations (as in effect on August 8, 2005).

(2) Allocation

(A) Process

Subject to subparagraphs (B) and (C), in the case of a State with which the Administrator has entered into a cooperative agreement under section 6991b(h)(7)(A) of this title, the Administrator shall distribute funds from the Trust Fund to the State using an allocation process developed by the Administrator.

(B) Diversion of State funds

The Administrator shall not distribute funds under subparagraph (A)(iii) of subsection (f)(1) to any State that has diverted funds from a State fund or State assurance program for purposes other than those related to the regulation of underground storage tanks covered by this subchapter, with the exception of those transfers that had been completed earlier than August 8, 2005.

(C) Revisions to process

The Administrator may revise the allocation process referred to in subparagraph (A) after—

(i) consulting with State agencies responsible for overseeing corrective action for releases from underground storage tanks; and

(ii) taking into consideration, at a minimum, each of the following:

(I) The number of confirmed releases from federally regulated leaking underground storage tanks in the States.

(II) The number of federally regulated underground storage tanks in the States.

(III) The performance of the States in implementing and enforcing the program.

(IV) The financial needs of the States.

(V) The ability of the States to use the funds referred to in subparagraph (A) in any year.

(3) Distributions to State agencies

Distributions from the Trust Fund under this subsection shall be made directly to a State agency that—

(A) enters into a cooperative agreement referred to in paragraph (2)(A); or

(B) is enforcing a State program approved under this section.

EDITORIAL NOTES

REFERENCES IN TEXT

The Federal Bankruptcy Code, referred to in subsec. (c)(3), probably means a reference to Title 11, Bankruptcy.

AMENDMENTS

2005—Subsec. (a). Pub. L. 109–58, §1533(3), substituted "in subparagraph (A) or (B) of section 6991(7)" for "in 6991(2)(A) or (B) or both".

§6991d. Inspections, monitoring, testing, and corrective action

(a) Furnishing information

For the purposes of developing or assisting in the development of any regulation, conducting any study, taking any corrective action, or enforcing the provisions of this subchapter, any owner or operator of an underground storage tank (or any tank subject to study under section 6991h of this title that is used for storing regulated substances) shall, upon request of any officer, employee or representative of the Environmental Protection Agency, duly designated by the Administrator, or upon request of any duly designated officer, employee, or representative of a State acting pursuant to subsection (h)(7) of section 6991b of this title or with an approved program, furnish information relating to such tanks, their associated equipment, their contents, conduct monitoring or testing, report such officer at all reasonable times to have access to, and to copy all records relating to such tanks and permit such officer to have access for corrective action. For the purposes of developing or assisting in the development of any regulation, conducting any study, taking corrective action, or enforcing the provisions of this subchapter, such officers, employees, or representatives are authorized—

(1) to enter at reasonable times any establishment or other place where an underground storage tank is located;
(2) to inspect and obtain samples from any person of any regulated substances contained in such tank;
(3) to conduct monitoring or testing of the tanks, associated equipment, contents, or surrounding soils, air, surface water or ground water; and
(4) to take corrective action.

Each such inspection shall be commenced and completed with reasonable promptness.

(b) Confidentiality

(1) Any records, reports, or information obtained from any persons under this section shall be available to the public, except that upon a showing satisfactory to the Administrator (or the State, as the case may be) by any person that records, reports, or information, or a particular part thereof, to which the Administrator (or the State, as the case may be) or any officer, employee, or representative thereof has access under this section if made public, would divulge information entitled to protection under section 1905 of title 18, such information or particular portion thereof shall be considered confidential in accordance with the purposes of that section, except that such record, report, document, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this chapter, or when relevant in any proceeding under this chapter.

(2) Any person not subject to the provisions of section 1905 of title 18 who knowingly and willfully divulges or discloses any information entitled to protection under this subsection shall, upon conviction, be subject to a fine of not more than $5,000 or to imprisonment not to exceed one year, or both.

(3) In submitting data under this subchapter, a person required to provide such data may—

(A) designate the data which such person believes is entitled to protection under this subsection, and
(B) submit such designated data separately from other data submitted under this subchapter.

A designation under this paragraph shall be made in writing and in such manner as the Administrator may prescribe.

(4) Notwithstanding any limitation contained in this section or any other provision of law, all information reported to, or otherwise obtained, by the Administrator (or any representative of the Administrator) under this chapter shall be made available, upon written request of any duly authorized committee of the Congress, to such committee (including records, reports, or information obtained by representatives of the Environmental Protection Agency).

(c) Inspection requirements

(1) Uninspected tanks

In the case of underground storage tanks regulated under this subchapter that have not undergone an inspection since December 22, 1998, not later than 2 years after August 8, 2005, the Administrator or a State that receives funding under this subchapter, as appropriate, shall conduct on-site inspections of all such tanks to determine compliance with this subchapter and the regulations under this subchapter (40 CFR 280) or a requirement or standard of a State program developed under section 6991c of this title.

(2) Periodic inspections

After completion of all inspections required under paragraph (1), the Administrator or a State that receives funding under this subchapter, as appropriate, shall conduct on-site inspections of each underground storage tank regulated under this subchapter at least once every 3 years to determine compliance with this subchapter and the regulations under
this subchapter (40 CFR 280) or a requirement or standard of a State program developed under section 6991c of this title. The Administrator may extend for up to one additional year the first 3-year inspection interval under this paragraph if the State demonstrates that it has insufficient resources to complete all such inspections within the first 3-year period.

(3) Inspection authority

Nothing in this section shall be construed to diminish the Administrator's or a State's authorities under subsection (a).

EDITORIAL NOTES

AMENDMENTS

Subsec. (c). Pub. L. 109–58, §1523(a), added subsec. (c).

Subsec. (a). Pub. L. 99–499, §205(f)(1), in first sentence, inserted "taking any corrective action" after "conductor any study", inserted "acting pursuant to subsection (h)(7) of section 6991b of this title or", struck out "and" before "permit such officer", and inserted "and permit such officer to have access for corrective action", and in second sentence, inserted "taking corrective action," after "study,". The amendment directing insertion of "taking any corrective action" after "study" in first sentence was executed by inserting that language after "conductor any study" rather than after "subject to study", as the probable intent of Congress.

§6991e. Federal enforcement

(a) Compliance orders

(1) Except as provided in paragraph (2), whenever on the basis of any information, the Administrator determines that any person is in violation of any requirement of this subchapter, the Administrator may issue an order requiring compliance within a reasonable specified time period or the Administrator may commence a civil action in the United States district court in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

(2) In the case of a violation of any requirement of this subchapter where such violation occurs in a State with a program approved under section 6991c of this title, the Administrator shall give notice to the State in which such violation has occurred prior to issuing an order or commencing a civil action under this section.

(3) If a violator fails to comply with an order under this subsection within the time specified in the order, he shall be liable for a civil penalty of not more than $25,000 for each day of continued noncompliance.

(b) Procedure

Any order issued under this section shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. In connection with any proceeding under this section the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

(c) Contents of order

Any order issued under this section shall state with reasonable specificity the nature of the violation, specify a reasonable time for compliance, and assess a penalty, if any, which the Administrator determines is reasonable taking into account the seriousness of the violation and any good faith efforts to comply with the applicable requirements.

(d) Civil penalties

(1) Any owner who knowingly fails to notify or submits false information pursuant to section 6991a(a) of this title shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or false information is submitted.

(2) Any owner or operator of an underground storage tank who fails to comply with—

(A) any requirement or standard promulgated by the Administrator under section 6991b of this title;

(B) any requirement or standard of a State program approved pursuant to section 6991c of this title;

(C) the provisions of section 6991b(g) of this title (entitled "Interim Prohibition"); or

(D) ² the requirements established in section 6991b(i) of this title; or

(E) the delivery prohibition requirement established by section 6991k of this title,
shall be subject to a civil penalty not to exceed $10,000 for each tank for each day of violation. Any person making or accepting a delivery or deposit of a regulated substance to an underground storage tank at an ineligible facility in violation of section 6991k of this title shall also be subject to the same civil penalty for each day of such violation.

(e) Incentive for performance

Both of the following may be taken into account in determining the terms of a civil penalty under subsection (d):

1. The compliance history of an owner or operator in accordance with this subchapter or a program approved under section 699fc of this title.

2. Any other factor the Administrator considers appropriate.

EDITORIAL NOTES

AMENDMENTS

2005—Subsec. (d)(2). Pub. L. 109–58, §1527(b)(2), inserted at end "Any person making or accepting a delivery or deposit of a regulated substance to an underground storage tank at an ineligible facility in violation of section 6991k of this title shall also be subject to the same civil penalty for each day of such violation."

Subsec. (d)(2)(B). Pub. L. 109–58, §1530(d)(1), which directed amendment of subpar. (B) by striking out "or" at end, could not be executed because "or" did not appear subsequent to amendment by Pub. L. 109–58, §1524(c)(1). See below.

Pub. L. 109–58, §1524(c)(1), struck out "or" at end.

Subsec. (d)(2)(D). Pub. L. 109–58, §1530(d)(3), added subpar. (D) relating to requirements established in section 6991b(i) of this title.

Pub. L. 109–58, §1524(c)(2), added subpar. (D) relating to training requirements established by States pursuant to section 6991 of this title.

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 2005 AMENDMENT

Amendment by section 1530(d) of Pub. L. 109–58 effective 18 months after Aug. 8, 2005, see section 1530(b) of Pub. L. 109–58, set out as a note under section 6991b of this title.

1 So in original. The word "or" probably should not appear.

2 So in original. Two subpars. (D) have been enacted.

3 So in original. The comma probably should be a semicolon.

§6991f. Federal facilities

(a) In general

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government (1) having jurisdiction over any underground storage tank or underground storage tank system, or (2) engaged in any activity resulting, or which may result, in the installation, operation, management, or closure of any underground storage tank, release response activities related thereto, or in the delivery, acceptance, or deposit of any regulated substance to an underground storage tank or underground storage tank system shall be subject to, and comply with, all Federal, State, interstate, and local requirements, both substantive and procedural (including any requirement for permits or reporting or any provisions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting underground storage tanks in the same manner, and to the same extent, as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements referred to in this subsection include, but are not limited to, all administrative orders and all civil and administrative penalties and fines, regardless of whether such penalties or fines are punitive or coercive in nature or are imposed for isolated, intermittent, or continuing violations. The United States hereby expressly waives any immunity otherwise applicable to the United States with respect to any such substantive or procedural requirement (including, but not limited to, any injunctive relief, administrative order or civil or administrative penalty or fine referred to in the preceding sentence, or reasonable service charge). The reasonable service charges referred to in this subsection include, but are not limited to, fees or charges assessed in connection with the processing and issuance of permits, renewal of permits,
amendments to permits, review of plans, studies, and other documents, and inspection and monitoring of facilities, as well as any other nondiscriminatory charges that are assessed in connection with a Federal, State, interstate, or local underground storage tank regulatory program. Neither the United States, nor any agent, employee, or officer thereof, shall be immune or exempt from any process or sanction of any State or Federal Court with respect to the enforcement of any such injunctive relief. No agent, employee, or officer of the United States shall be personally liable for any civil penalty under any Federal, State, interstate, or local law concerning underground storage tanks with respect to any act or omission within the scope of the official duties of the agent, employee, or officer. An agent, employee, or officer of the United States shall be subject to any criminal sanction (including, but not limited to, any fine or imprisonment) under any Federal or State law concerning underground storage tanks, but no department, agency, or instrumentality of the executive, legislative, or judicial branch of the Federal Government shall be subject to any such sanction. The President may exempt any underground storage tank of any department, agency, or instrumentality in the executive branch from compliance with such a requirement if he determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of 1 year, but additional exemptions may be granted for periods not to exceed 1 year upon the President's making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting each such exemption.

(b) Review of and report on Federal underground storage tanks

(1) Review

Not later than 12 months after August 8, 2005, each Federal agency that owns or operates one or more underground storage tanks, or that manages land on which one or more underground storage tanks are located, shall submit to the Administrator, the Committee on Energy and Commerce of the United States House of Representatives, and the Committee on the Environment and Public Works of the Senate a compliance strategy report that—

(A) lists the location and owner of each underground storage tank described in this paragraph;

(B) lists all tanks that are not in compliance with this subchapter that are owned or operated by the Federal agency;

(C) specifies the date of the last inspection by a State or Federal inspector of each underground storage tank owned or operated by the agency;

(D) lists each violation of this subchapter respecting any underground storage tank owned or operated by the agency;

(E) describes the operator training that has been provided to the operator and other persons having primary daily on-site management responsibility for the operation and maintenance of underground storage tanks owned or operated by the agency; and

(F) describes the actions that have been and will be taken to ensure compliance for each underground storage tank identified under subparagraph (B).

(2) Not a safe harbor

This subsection does not relieve any person from any obligation or requirement under this subchapter.

EDITORIAL NOTES

AMENDMENTS

2005—Pub. L. 109–58 amended section generally. Prior to amendment, section required each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government having jurisdiction over any underground storage tank to comply with all Federal, State, interstate, and local requirements, applicable to such tank, both substantive and procedural, in the same manner, and to the same extent, as any other person is subject to such requirements, including payment of reasonable service charges, provided that neither the United States, nor any agent, employee, or officer thereof, was immune or exempt from any process or sanction of any State or Federal court with respect to the enforcement of any such injunctive relief, and authorized the President to exempt any tank from compliance with such requirements upon certain determinations.

§6991g. State authority

Nothing in this subchapter shall preclude or deny any right of any State or political subdivision thereof to adopt or enforce any regulation, requirement, or standard of performance respecting underground storage tanks that is more stringent than a regulation, requirement, or standard of performance in effect under this subchapter or to impose any additional liability with respect to the release of regulated substances within such State or political subdivision.

EDITORIAL NOTES

AMENDMENTS

1986—Pub. L. 99–499 amended section generally. Prior to amendment, section read as follows: "Nothing in this subchapter shall preclude or deny any right of any State or political subdivision thereof to adopt or enforce any regulation, requirement or standard of performance respecting underground storage tanks that is more stringent than a regulation, requirement, or standard of performance in effect under this subchapter."

§6991h. Study of underground storage tanks

(a) Petroleum tanks

Not later than twelve months after November 8, 1984, the Administrator shall complete a study of underground storage tanks used for the storage of regulated substances defined in section 6991(7)(B) of this title.

(b) Other tanks

Not later than thirty-six months after November 8, 1984, the Administrator shall complete a study of all other underground storage tanks.

(c) Elements of studies

The studies under subsections (a) and (b) shall include an assessment of the ages, types (including methods of manufacture, coatings, protection systems, the compatibility of the construction materials and the installation methods) and locations (including the climate of the locations) of such tanks; soil conditions, water tables, and the hydrogeology of tank locations; the relationship between the foregoing factors and the likelihood of releases from underground storage tanks; the effectiveness and costs of inventory systems, tank testing, and leak detection systems; and such other factors as the Administrator deems appropriate.

(d) Farm and heating oil tanks

Not later than thirty-six months after November 8, 1984, the Administrator shall conduct a study regarding the tanks referred to in subparagraphs (A) and (B) of section 6991(10) of this title. Such study shall include estimates of the number and location of such tanks and an analysis of the extent to which there may be releases or threatened releases from such tanks into the environment.

(e) Reports

Upon completion of the studies authorized by this section, the Administrator shall submit reports to the President and to the Congress containing the results of the studies and recommendations respecting whether or not such tanks should be subject to the preceding provisions of this subchapter.

(f) Reimbursement

(1) If any owner or operator (excepting an agency, department, or instrumentality of the United States Government, a State or a political subdivision thereof) shall incur costs, including the loss of business opportunity, due to the closure or interruption of operation of an underground storage tank solely for the purpose of conducting studies authorized by this section, the Administrator shall provide such person fair and equitable reimbursement for such costs.

(2) All claims for reimbursement shall be filed with the Administrator not later than ninety days after the closure or interruption which gives rise to the claim.

(3) Reimbursements made under this section shall be from funds appropriated by the Congress pursuant to the authorization contained in section 6916(g) 1 of this title.

(4) For purposes of judicial review, a determination by the Administrator under this subsection shall be considered final agency action.

EDITORIAL NOTES

REFERENCES IN TEXT

Section 6916(g) of this title, referred to in subsec. (f)(3), probably means section 6916(f) of this title which authorizes appropriations for this subchapter. There is no subsec. (g) of section 6916.

AMENDMENTS

Subsec. (d). Pub. L. 109–58, §1532(b)(3)(B), substituted "subparagraphs (A) and (B) of section 6991(10)" for "section 6991(1)(A) and (B)".

1 See References in Text note below.
§6991i. Operator training

(a) Guidelines

(1) In general
Not later than 2 years after August 8, 2005, in consultation and cooperation with States and after public notice and opportunity for comment, the Administrator shall publish guidelines that specify training requirements for—
(A) persons having primary responsibility for on-site operation and maintenance of underground storage tank systems;
(B) persons having daily on-site responsibility for the operation and maintenance of underground storage tanks systems; and
(C) daily, on-site employees having primary responsibility for addressing emergencies presented by a spill or release from an underground storage tank system.

(2) Considerations
The guidelines described in paragraph (1) shall take into account—
(A) State training programs in existence as of the date of publication of the guidelines;
(B) training programs that are being employed by tank owners and tank operators as of August 8, 2005;
(C) the high turnover rate of tank operators and other personnel;
(D) the frequency of improvement in underground storage tank equipment technology;
(E) the nature of the businesses in which the tank operators are engaged;
(F) the substantial differences in the scope and length of training needed for the different classes of persons described in subparagraphs (A), (B), and (C) of paragraph (1); and
(G) such other factors as the Administrator determines to be necessary to carry out this section.

(b) State programs

(1) In general
Not later than 2 years after the date on which the Administrator publishes the guidelines under subsection (a)(1), each State that receives funding under this subchapter shall develop State-specific training requirements that are consistent with the guidelines developed under subsection (a)(1).

(2) Requirements
State requirements described in paragraph (1) shall—
(A) be consistent with subsection (a);
(B) be developed in cooperation with tank owners and tank operators;
(C) take into consideration training programs implemented by tank owners and tank operators as of August 8, 2005; and
(D) be appropriately communicated to tank owners and operators.

(3) Financial incentive
The Administrator may award to a State that develops and implements requirements described in paragraph (1), in addition to any funds that the State is entitled to receive under this subchapter, not more than $200,000, to be used to carry out the requirements.

(c) Training
All persons that are subject to the operator training requirements of subsection (a) shall—
(1) meet the training requirements developed under subsection (b); and
(2) repeat the applicable requirements developed under subsection (b), if the tank for which they have primary daily on-site management responsibilities is determined to be out of compliance with—
(A) a requirement or standard promulgated by the Administrator under section 6991b of this title; or
(B) a requirement or standard of a State program approved under section 6991c of this title.

EDITORIAL NOTES

REFERENCES IN TEXT

August 8, 2005, referred to in subsec. (b)(2)(C), was in the original "the date of enactment of this section", which was translated as meaning the date of enactment of Pub. L. 109–58, which amended this section generally, to reflect the probable intent of Congress.

AMENDMENTS

2005—Pub. L. 109–58 amended section catchline and text generally. Prior to amendment, text read as follows: "For authorization of appropriations to carry out this subchapter, see section 6916(g) of this title."
§6991j. Use of funds for release prevention and compliance

Funds made available under section 6991m(2)(D) of this title from the Trust Fund may be used to conduct inspections, issue orders, or bring actions under this subchapter—

(1) by a State, in accordance with a grant or cooperative agreement with the Administrator, of State regulations pertaining to underground storage tanks regulated under this subchapter; and

(2) by the Administrator, for tanks regulated under this subchapter (including under a State program approved under section 699 fc of this title).

1 So in original.

§6991k. Delivery prohibition

(a) Requirements

(1) Prohibition of delivery or deposit

Beginning 2 years after August 8, 2005, it shall be unlawful to deliver to, deposit into, or accept a regulated substance into an underground storage tank at a facility which has been identified by the Administrator or a State implementing agency to be ineligible for such delivery, deposit, or acceptance.

(2) Guidance

Within 1 year after August 8, 2005, the Administrator shall, in consultation with the States, underground storage tank owners, and product delivery industries, publish guidelines detailing the specific processes and procedures they will use to implement the provisions of this section. The processes and procedures include, at a minimum—

(A) the criteria for determining which underground storage tank facilities are ineligible for delivery, deposit, or acceptance of a regulated substance;

(B) the mechanisms for identifying which facilities are ineligible for delivery, deposit, or acceptance of a regulated substance to the underground storage tank owning and fuel delivery industries;

(C) the process for reclassifying ineligible facilities as eligible for delivery, deposit, or acceptance of a regulated substance;

(D) one or more processes for providing adequate notice to underground storage tank owners and operators and supplier industries that an underground storage tank has been determined to be ineligible for delivery, deposit, or acceptance of a regulated substance; and

(E) a delineation of, or a process for determining, the specified geographic areas subject to paragraph (4).

(3) Compliance

States that receive funding under this subchapter shall, at a minimum, comply with the processes and procedures published under paragraph (2).

(4) Consideration

(A) Rural and remote areas

Subject to subparagraph (B), the Administrator or a State may consider not treating an underground storage tank as ineligible for delivery, deposit, or acceptance of a regulated substance if such treatment would jeopardize the availability of, or access to, fuel in any rural and remote areas unless an urgent threat to public health, as determined by the Administrator, exists.

(B) Applicability

Subparagraph (A) shall apply only during the 180-day period following the date of a determination by the Administrator or the appropriate State under subparagraph (A).

(b) Effect on State authority

Nothing in this section shall affect or preempt the authority of a State to prohibit the delivery, deposit, or acceptance of a regulated substance to an underground storage tank.

(c) Defense to violation

A person shall not be in violation of subsection (a)(1) if the person has not been provided with notice pursuant to subsection (a)(2)(D) of the ineligibility of a facility for delivery, deposit, or acceptance of a regulated substance as determined by the Administrator or a State, as appropriate, under this section.

EDITORIAL NOTES
AMENDMENTS

§6991l. Tanks on tribal lands

(a) Strategy

The Administrator, in coordination with Indian tribes, shall, not later than 1 year after August 8, 2005, develop and implement a strategy—

(1) giving priority to releases that present the greatest threat to human health or the environment, to take necessary corrective action in response to releases from leaking underground storage tanks located wholly within the boundaries of—

(A) an Indian reservation; or
(B) any other area under the jurisdiction of an Indian tribe; and

(2) to implement and enforce requirements concerning underground storage tanks located wholly within the boundaries of—

(A) an Indian reservation; or
(B) any other area under the jurisdiction of an Indian tribe.

(b) Report

Not later than 2 years after August 8, 2005, the Administrator shall submit to Congress a report that summarizes the status of implementation and enforcement of this subchapter in areas located wholly within—

(1) the boundaries of Indian reservations; and
(2) any other areas under the jurisdiction of an Indian tribe.

The Administrator shall make the report under this subsection available to the public.

(c) Not a safe harbor

This section does not relieve any person from any obligation or requirement under this subchapter.

(d) State authority

Nothing in this section applies to any underground storage tank that is located in an area under the jurisdiction of a State, or that is subject to regulation by a State, as of August 8, 2005.

§6991m. Authorization of appropriations

There are authorized to be appropriated to the Administrator the following amounts:

(1) To carry out this subchapter (except sections 6991b(h), 6991d(c), 6991j, and 6991k of this title) $50,000,000 for each of fiscal years 2006 through 2011.

(2) From the Trust Fund—

(A) to carry out section 6991b(h) of this title (except section 6991b(h)(12) of this title) $200,000,000 for each of fiscal years 2006 through 2011;
(B) to carry out section 6991b(h)(12) of this title, $200,000,000 for each of fiscal years 2006 through 2011;
(C) to carry out sections 6991b(i), 6991c(f), and 6991d(c) of this title $100,000,000 for each of fiscal years 2006 through 2011; and
(D) to carry out sections 6991i, 6991j, 6991k, and 6991l of this title $55,000,000 for each of fiscal years 2006 through 2011.

EDITORIAL NOTES

AMENDMENTS

SUBCHAPTER X—DEMONSTRATION MEDICAL WASTE TRACKING PROGRAM
§6992. Scope of demonstration program for medical waste

(a) Covered States

The States within the demonstration program established under this subchapter for tracking medical wastes shall be New York, New Jersey, Connecticut, the States contiguous to the Great Lakes and any State included in the program through the petition procedure described in subsection (c), except for any of such States in which the Governor notifies the Administrator under subsection (b) that such State shall not be covered by the program.

(b) Opt out

(1) If the Governor of any State covered under subsection (a) which is not contiguous to the Atlantic Ocean notifies the Administrator that such State elects not to participate in the demonstration program, the Administrator shall remove such State from the program.

(2) If the Governor of any other State covered under subsection (a) notifies the Administrator that such State has implemented a medical waste tracking program that is no less stringent than the demonstration program under this subchapter and that such State elects not to participate in the demonstration program, the Administrator shall, if the Administrator determines that such State program is no less stringent than the demonstration program under this subchapter, remove such State from the demonstration program.

(3) Notifications under paragraphs (1) or (2) shall be submitted to the Administrator no later than 30 days after the promulgation of regulations implementing the demonstration program under this subchapter.

c) Petition in

The Governor of any State may petition the Administrator to be included in the demonstration program and the Administrator may, in his discretion, include any such State. Such petition may not be made later than 30 days after promulgation of regulations establishing the demonstration program under this subchapter, and the Administrator shall determine whether to include the State within 30 days after receipt of the State’s petition.

d) Expiration of demonstration program

The demonstration program shall expire on the date 24 months after the effective date of the regulations under this subchapter.

(Pub. L. 89–272, title II, §11001, as added Pub. L. 100–582, §2(a), Nov. 1, 1988, 102 Stat. 2950.)

§6992a. Listing of medical wastes

(a) List

Not later than 6 months after November 1, 1988, the Administrator shall promulgate regulations listing the types of medical waste to be tracked under the demonstration program. Except as provided in subsection (b), such list shall include, but need not be limited to, each of the following types of solid waste:

1. Cultures and stocks of infectious agents and associated biologicals, including cultures from medical and pathological laboratories; cultures and stocks of infectious agents from research and industrial laboratories; wastes from the production of biologicals, discarded live and attenuated vaccines, and culture dishes and devices used to transfer, inoculate, and mix cultures.

2. Pathological wastes, including tissues, organs, and body parts that are removed during surgery or autopsy.

3. Waste human blood and products of blood, including serum, plasma, and other blood components.

4. Sharps that have been used in patient care or in medical, research, or industrial laboratories, including hypodermic needles, syringes, pasteur pipettes, broken glass, and scalpel blades.

5. Contaminated animal carcasses, body parts, and bedding of animals that were exposed to infectious agents during research, production of biologicals, or testing of pharmaceuticals.

6. Wastes from surgery or autopsy that were in contact with infectious agents, including soiled dressings, sponges, drapes, lavender tubes, drainage sets, underpads, and surgical gloves.

7. Laboratory wastes from medical, pathological, pharmaceutical, or other research, commercial, or industrial laboratories that were in contact with infectious agents, including slides and cover slips, disposable gloves, laboratory coats, and aprons.

8. Dialysis wastes that were in contact with the blood of patients undergoing hemodialysis, including contaminated disposable equipment and supplies such as tubing, filters, disposable sheets, towels, gloves, aprons, and laboratory coats.

9. Discarded medical equipment and parts that were in contact with infectious agents.

10. Biological waste and discarded materials contaminated with blood, excretion, exudates or secretion from human beings or animals who are isolated to protect others from communicable diseases.

11. Such other waste material that results from the administration of medical care to a patient by a health care provider and is found by the Administrator to pose a threat to human health or the environment.

(b) Exclusions from list

The Administrator may exclude from the list under this section any categories or items described in paragraphs (6) through (10) of subsection (a) which he determines do not pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, disposed of, or otherwise managed.
§6992b. Tracking of medical waste

(a) Demonstration program

Not later than 6 months after November 1, 1988, the Administrator shall promulgate regulations establishing a program for the tracking of the medical waste listed in section 6992a of this title which is generated in a State subject to the demonstration program. The program shall (1) provide for tracking of the transportation of the waste from the generator to the disposal facility, except that waste that is incinerated need not be tracked after incineration, (2) include a system for providing the generator of the waste with assurance that the waste is received by the disposal facility, (3) use a uniform form for tracking in each of the demonstration States, and (4) include the following requirements:
  
  (A) A requirement for segregation of the waste at the point of generation where practicable.
  
  (B) A requirement for placement of the waste in containers that will protect waste handlers and the public from exposure.
  
  (C) A requirement for appropriate labeling of containers of the waste.

(b) Small quantities

In the program under subsection (a), the Administrator may establish an exemption for generators of small quantities of medical waste listed under section 6992a of this title, except that the Administrator may not exempt from the program any person who, or facility that, generates 50 pounds or more of such waste in any calendar month.

(c) On-site incinerators

Concurrently with the promulgation of regulations under subsection (a), the Administrator shall promulgate a recordkeeping and reporting requirement for any generator in a demonstration State of medical waste listed in section 6992a of this title that (1) incinerates medical waste listed in section 6992a of this title on site and (2) does not track such waste under the regulations promulgated under subsection (a). Such requirement shall require the generator to report to the Administrator on the volume and types of medical waste listed in section 6992a of this title that the generator incinerated on site during the 6 months following the effective date of the requirements of this subsection.

(d) Type of medical waste and types of generators

For each of the requirements of this section, the regulations may vary for different types of medical waste and for different types of medical waste generators.

(Pub. L. 89–272, title II, §11003, as added Pub. L. 100–582, §2(a), Nov. 1, 1988, 102 Stat. 2952.)

§6992c. Inspections

(a) Requirements for access

For purposes of developing or assisting in the development of any regulation or report under this subchapter or enforcing any provision of this subchapter, any person who generates, stores, treats, transports, disposes of, or otherwise handles or has handled medical waste shall, upon request of any officer, employee, or representative of the Environmental Protection Agency duly designated by the Administrator, furnish information relating to such waste, including any tracking forms required to be maintained under section 6992b of this title, conduct monitoring or testing, and permit such person at all reasonable times to have access to, and to copy, all records relating to such waste. For such purposes, such officers, employees, or representatives are authorized to—

  (1) enter at reasonable times any establishment or other place where medical wastes are or have been generated, stored, treated, disposed of, or transported from;
  
  (2) conduct monitoring or testing; and
  
  (3) inspect and obtain samples from any person of any such wastes and samples of any containers or labeling for such wastes.

(b) Procedures

Each inspection under this section shall be commenced and completed with reasonable promptness. If the officer, employee, or representative obtains any samples, prior to leaving the premises he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and, if requested, a portion of each such sample equal in volume or weight to the portion retained if giving such an equal portion is feasible. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner, operator, or agent in charge of the premises concerned.

(c) Availability to public

The provisions of section 6927(b) of this title shall apply to records, reports, and information obtained under this section in the same manner and to the same extent as such provisions apply to records, reports, and information obtained under section 6927 of this title.

(Pub. L. 89–272, title II, §11004, as added Pub. L. 100–582, §2(a), Nov. 1, 1988, 102 Stat. 2952.)
§6992d. Enforcement

(a) Compliance orders

(1) Violations

Whenever on the basis of any information the Administrator determines that any person has violated, or is in violation of, any requirement or prohibition in effect under this subchapter (including any requirement or prohibition in effect under regulations under this subchapter) (A) the Administrator may issue an order (i) assessing a civil penalty for any past or current violation, (ii) requiring compliance immediately or within a specified time period, or (iii) both, or (B) the Administrator may commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction. Any order issued pursuant to this subsection shall state with reasonable specificity the nature of the violation.

(2) Orders assessing penalties

Any penalty assessed in an order under this subsection shall not exceed $25,000 per day of noncompliance for each violation of a requirement or prohibition in effect under this subchapter. In assessing such a penalty, the Administrator shall take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements.

(3) Public hearing

Any order issued under this subsection shall become final unless, not later than 30 days after issuance of the order, the persons named therein request a public hearing. Upon such request, the Administrator shall promptly conduct a public hearing. In connection with any proceeding under this section, the Administrator may issue subpoenas for the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

(4) Violation of compliance orders

In the case of an order under this subsection requiring compliance with any requirement of or regulation under this subchapter, if a violator fails to take corrective action within the time specified in an order, the Administrator may assess a civil penalty of not more than $25,000 for each day of continued noncompliance with the order.

(b) Criminal penalties

Any person who—

(1) knowingly violates the requirements of or regulations under this subchapter;
(2) knowingly omits material information or makes any false material statement or representation in any label, record, report, or other document filed, maintained, or used for purposes of compliance with this subchapter or regulations thereunder; or
(3) knowingly generates, stores, treats, transports, disposes of, or otherwise handles any medical waste (whether such activity took place before or takes place after November 1, 1988) and who knowingly destroys, alters, conceals, or fails to file any record, report, or other document required to be maintained or filed for purposes of compliance with this subchapter or regulations thereunder

shall, upon conviction, be subject to a fine of not more than $50,000 for each day of violation, or imprisonment not to exceed 2 years (5 years in the case of a violation of paragraph (1)). If the conviction is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment under the respective paragraph shall be doubled with respect to both fine and imprisonment.

(c) Knowing endangerment

Any person who knowingly violates any provision of subsection (b) who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall upon conviction be subject to a fine of not more than $250,000 or imprisonment for not more than 15 years, or both. A defendant that is an organization shall, upon conviction under this subsection, be subject to a fine of not more than $1,000,000. The terms of this paragraph shall be interpreted in accordance with the rules provided under section 6928(f) of this title.

(d) Civil penalties

Any person who violates any requirement of or regulation under this subchapter shall be liable to the United States for a civil penalty in an amount not to exceed $25,000 for each such violation. Each day of such violation shall, for purposes of this section, constitute a separate violation.

(e) Civil penalty policy

Civil penalties assessed by the United States or by the States under this subchapter shall be assessed in accordance with the Administrator's "RCRA Civil Penalty Policy", as such policy may be amended from time to time.

(Pub. L. 89–272, title II, §11005, as added Pub. L. 100–582, §2(a), Nov. 1, 1988, 102 Stat. 2953.)

§6992e. Federal facilities

(a) In general

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government in a demonstration State (1) having jurisdiction over any solid waste management facility or disposal site at
which medical waste is disposed of or otherwise handled, or (2) engaged in any activity resulting, or which may result, in the disposal, management, or handling of medical waste shall be subject to, and comply with, all Federal, State, interstate, and local requirements, both substantive and procedural (including any requirement for permits or reporting or any provisions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting control and abatement of medical waste disposal and management in the same manner, and to the same extent, as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements included in this subsection include, but are not limited to, all administrative orders, civil, criminal, and administrative penalties, and other sanctions, including injunctive relief, fines, and imprisonment. Neither the United States, nor any agent, employee, or officer thereof, shall be immune or exempt from any process or sanction of any State or Federal court with respect to the enforcement of any such order, penalty, or other sanction. For purposes of enforcing any such substantive or procedural requirement (including, but not limited to, any injunctive relief, administrative order, or civil, criminal, administrative penalty, or other sanction), against any such department, agency, or instrumentality, the United States hereby expressly waives any immunity otherwise applicable to the United States. The President may exempt any department, agency, or instrumentality in the executive branch from compliance with such a requirement if he determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of one year, but additional exemptions may be granted for periods not to exceed one year upon the President's making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting each such exemption.

(b) "Person" defined

For purposes of this chapter, the term "person" shall be treated as including each department, agency, and instrumentality of the United States.

STATUTORY NOTES AND RELATED SUBSIDIARIES

TERMINATION OF REPORTING REQUIREMENTS

For termination, effective May 15, 2000, of provisions in subsec. (a) of this section requiring the President to report annually to Congress, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance, and the 10th item on page 20 of House Document No. 103–7.

§6992f. Relationship to State law

(a) State inspections and enforcement

A State may conduct inspections under 6992c of this title and take enforcement actions under section 6992d of this title against any person, including any person who has imported medical waste into a State in violation of the requirements of, or regulations under, this subchapter, to the same extent as the Administrator. At the time a State initiates an enforcement action under section 6992d of this title against any person, the State shall notify the Administrator in writing.

(b) Retention of State authority

Nothing in this subchapter shall—

(1) preempt any State or local law; or

(2) except as provided in subsection (c), otherwise affect any State or local law or the authority of any State or local government to adopt or enforce any State or local law.

(c) State forms

Any State or local law which requires submission of a tracking form from any person subject to this subchapter shall require that the form be identical in content and format to the form required under section 6992b of this title, except that a State may require the submission of other tracking information which is supplemental to the information required on the form required under section 6992b of this title through additional sheets or such other means as the State deems appropriate.

(Pub. L. 89–272, title II, §11007, as added Pub. L. 100–582, §2(a), Nov. 1, 1988, 102 Stat. 2955.)

\[1\] So in original. Probably should be "under section".

§6992h. Health impacts report
Within 24 months after November 1, 1988, the Administrator of the Agency for Toxic Substances and Disease Registry shall prepare for Congress a report on the health effects of medical waste, including each of the following—
(1) A description of the potential for infection or injury from the segregation, handling, storage, treatment, or disposal of medical wastes.
(2) An estimate of the number of people injured or infected annually by sharps, and the nature and seriousness of those injuries or infections.
(3) An estimate of the number of people infected annually by other means related to waste segregation, handling, storage, treatment, or disposal, and the nature and seriousness of those infections.
(4) For diseases possibly spread by medical waste, including Acquired Immune Deficiency Syndrome and hepatitis B, an estimate of what percentage of the total number of cases nationally may be traceable to medical wastes.

EDITORIAL NOTES

PRIOR PROVISIONS

§6992i. General provisions
(a) Consultation
(1) In promulgating regulations under this subchapter, the Administrator shall consult with the affected States and may consult with other interested parties.
(2) The Administrator shall also consult with the International Joint Commission to determine how to monitor the disposal of medical waste emanating from Canada.

(b) Public comment
In the case of the regulations required by this subchapter to be promulgated within 9 months after November 1, 1988, the Administrator may promulgate such regulations in interim final form without prior opportunity for public comment, but the Administrator shall provide an opportunity for public comment on the interim final rule. The promulgation of such regulations shall not be subject to the Paperwork Reduction Act of 1980.1

(c) Relationship to subchapter III
Nothing in this subchapter shall affect the authority of the Administrator to regulate medical waste, including medical waste listed under section 6992a of this title, under subchapter III of this chapter.

PRIOR PROVISIONS
A prior section 11009 of Pub. L. 89–272 was renumbered section 11008 and is classified to section 6992h of this title.

1 See References in Text note below.

§6992j. Effective date
The regulations promulgated under this subchapter shall take effect within 90 days after promulgation, except that, at the time of promulgation, the Administrator may provide for a shorter period prior to the effective date if he finds the regulated
community does not need 90 days to come into compliance.

PRIOR PROVISIONS

A prior section 11011 of Pub. L. 89–272 was renumbered section 11010 and is classified to section 6992J of this title.
49-104. **Powers and duties of the department and director**

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through the regulation of the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and no more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Utilize any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title, but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection 1, paragraph 10.
13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes shall be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department may establish by rule a fee as a condition of licensure, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. The department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, article 8 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on:

(a) The direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

(b) The availability of other funds for the duties performed.

(c) The impact of the fees on the parties subject to the fees.

(d) The fees charged for similar duties performed by the department, other agencies and the private sector.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas
conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203, except that state agencies are exempt from paying those fees that are not associated with the dredge and fill permit program established pursuant to chapter 2, article 3.2 of this title. For services provided under the dredge and fill permit program, a state agency shall pay either:

(a) The fees established by the department under the dredge and fill permit program.

(b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.
49-203. **Powers and duties of the director and department**

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.

2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.

3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:

   (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.

   (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.

   (c) Maintenance but not construction of drainage ditches.

   (d) Construction and maintenance of irrigation ditches.

   (e) Maintenance of structures such as dams, dikes and levees.

4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.

5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.

6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.

7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.

8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.

9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection D shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State
49-257.01. Underground injection control permit program; permits; prohibitions; rules

A. The department shall establish an underground injection control permit program, including a permitting process.

B. An underground injection is prohibited unless the underground injection is into a well authorized by rule or unless it is authorized by a permit issued pursuant to this article or by a permit issued by the United States environmental protection agency. A person may not construct any well that is required to have a permit until the person is issued the permit or is otherwise authorized under the permit program established pursuant to this article or federal law.

C. Any underground injection activity is prohibited if it is conducted in a manner that allows the movement of fluid containing any contaminant into underground sources of drinking water and if the presence of that contaminant may endanger underground sources of drinking water.

D. The director shall adopt rules for the purposes of establishing and operating the underground injection control permit program pursuant to this article. Rules adopted by the director shall meet the minimum requirements prescribed by 42 United States Code section 300h(b).
date of the installment payment, the Department may suspend
the licensee's authorization to make installment payments and
require the licensee to pay all pending fees.

G. If a licensee fails to submit an installment payment within 30
days after its due date, the Department may initiate action
under A.R.S. § 36-495.09.

Historical Note
Adopted effective August 16, 1985 (Supp. 85–4). Former
Section R9-14-608 repealed, new Section R9-14-608
adopted effective December 20, 1991 (Supp. 91–4). Section

R9-14-608 renumbered from R9-14-607 and amended
effective June 20, 1997 (Supp. 97–2). Former Section R9-
14-609 renumbered to R9-14-610; new Section R9-14-
608 adopted by final rulemaking at 7 A.A.R. 184, effective
December 15, 2000 (Supp. 00–4). Amended by final
rulemaking at 12 A.A.R. 4798, effective December 5,
2006 (Supp. 06–4). Amended by final rulemaking at 22
A.A.R. 2683, effective October 1, 2016 (Supp. 16–3).

R9-14-609. Proficiency Testing
A. At least once in each 12-month period, and more often if
requested by the Department, each licensee or applicant shall
have at least one laboratory analyst participate in proficiency
testing provided by the Department, the EPA, or a proficiency
testing service that:
1. Includes at least one proficiency testing sample for each
parameter for which an initial license or renewal license
has been issued or requested and for which proficiency
testing samples are available;
2. Demonstrates the laboratory analyst's proficiency in compliance testing of:
   a. Applicable drinking water parameters in Table
      6.2.A, if:
      i. The applicant plans to perform compliance testing
         of drinking water parameters, or
      ii. The licensee is approved to perform compliance
testing of drinking water parameters; and
   b. Applicable parameters other than drinking water parameters, if:
      i. The applicant plans to perform compliance testing
         of the parameters, or
      ii. The licensee is approved to perform compliance
testing of the parameters; and
3. If the licensee or applicant has been issued or has requested a license that includes approval for testing an
   analyst by different methods, may use the same proficiency testing sample for each method.

B. To demonstrate proficiency for a parameter, test results reported for the parameter shall be within acceptance limits established for:
1. Drinking water inorganic chemistry parameters by the EPA, as provided in 40 CFR 141.23;
2. Drinking water organic chemistry parameters by the EPA, as provided in 40 CFR 141.24;
3. Lead or copper in drinking water by the EPA, as provided in 40 CFR 141.89;
4. Disinfection byproducts in drinking water by the EPA, as provided in 40 CFR 141.131 and
5. Other parameters by the EPA or the proficiency testing service.

C. A licensee or applicant shall ensure that:
1. Each proficiency testing sample accepted at the licensee's or applicant's laboratory is analyzed at the licensee's or applicant's laboratory;
2. Each proficiency testing sample is tested within the maximum holding times allowed for its parameter, using the
   same procedures and techniques employed for routine sample testing, and calculating the holding time from the
   time the sample seal is broken or as indicated in the instructions accompanying the sample;
3. A proficiency testing service provides proficiency testing results directly to the Department;
4. If proficiency testing is provided by the Department, the licensee or applicant submits to the Department payment
   for the actual costs of the proficiency testing materials; and
5. If proficiency testing is not provided by the Department or the EPA, the licensee or applicant selects a proficiency
   testing service and contracts with and pays the proficiency testing service directly for proficiency testing.

D. The Department may submit blind proficiency testing samples to a licensed laboratory at any time during the license period.

C. If an approved method is not available for a particular parameter, or a method or method alteration that is not an approved method is required or authorized to be used for a particular parameter by the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, the following information:
1. For an alternate method or method alteration required or authorized by the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, the following information:
   a. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested;
   b. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested;
   c. Identification of the parameter for which approval of the alternate method or method alteration is requested;
   d. Reference to the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, requirement or authorization for the use of the alternate method or method alteration for which approval is requested;
2. For an alternate method or method alteration to be used because an approved method is not available for a particular parameter, the following information:
   a. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested;
   b. The name, address, and telephone number of the laboratory for which approval of the alternate method or method alteration is requested;
   c. Identification of the parameter for which approval of the alternate method or method alteration is requested;
   d. Written justification for using the alternate method or method alteration for which approval is requested, including the following:
      i. A detailed description of the alternate method or method alteration;
      ii. References to published or other studies confirming the general applicability of the alternate method or method alteration to the parameter for which its use is intended;
      iii. Reference to the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, requirement to test the parameter; and
   iv. Data that demonstrate the performance of the alternate method or method alteration in terms of accuracy, precision, reliability, ruggedness, ease of use, and ability to achieve a detection limit appropriate for the proposed use of the alternate method or method alteration; and
3. An alternate method or method alteration approval fee of $50, payable to the Arizona Department of Health Services, in the form of a certified check, business check, money order, or credit card payment.

D. Before approving an alternate method or method alteration that is not required or authorized by the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, the Department may require that the alternate method or method alteration be performed by a laboratory designated by the Department to verify that, using the parameter for which its use is intended, the alternate method or method alteration produces data that comply with subsection (C)(2)(d)(iv).

E. The Department may approve an alternate method or method alteration if the Department determines:
1. One of the following:
   a. Use of the alternate method or method alteration is required or authorized by the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, or
   b. Use of the alternate method or method alteration is justified as described in subsection (C)(2)(d); and
2. If the alternate method or method alteration pertains to drinking water compliance testing, the EPA concurs that the alternate method or method alteration may be used.

F. The Department may rescind the approval of an alternate method or method alteration approved by the Department according to subsection (E), if, as applicable:
1. For an alternate method or method alteration requested under subsection (C)(1), the alternate method or method alteration is no longer required or authorized by the EPA, ADEQ, U.S. Food and Drug Administration, or 9 A.A.C. 8, or
2. For an alternate method or method alteration requested under subsection (C)(2), an approved method becomes available for the particular parameter.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-610 renumbered to R9-14-611; new Section R9-14-610 renumbered from R9-14-609 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-610 renumbered to R9-14-612; new Section R9-14-610 renumbered from R9-14-608 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 10 A.A.R. 1687, effective April 6, 2004 (Supp. 04-2). Amended by final rulemaking at 12 A.A.R.
R9-14-611. Compliance Testing for Drinking Water Parameters

A. A licensee for a laboratory at which compliance testing for drinking water parameters is performed, including compliance testing performed according to 9 A.A.C. 8, Article 2, shall ensure that:

1. Except as provided in subsection (B), the laboratory is operated in compliance with the guidelines in Key References D4, D5, and D6, excluding the requirements for laboratory personnel education and experience;

2. Each sample for Arizona drinking water parameter compliance testing is analyzed:
   a. Using an approved method:
      i. Listed in Table 6.2.A; or
      ii. Approved by the Department for compliance testing for drinking water parameters under R9-14-610(E); and
   b. If the approved method is from Key Reference C, following the quality control guidelines in Key Reference C associated with the approved method; and

3. If the license requests approval to perform testing for vinyl chloride, the licensee also obtains approval to perform testing for each of the analytes listed in 40 CFR 141.61(a)(2)-21.

B. If an approved method does not include a specific quality control guideline, a licensee for a laboratory at which compliance testing for drinking water parameters is performed shall ensure that the laboratory is operated in compliance with the guidelines in Key References C4, D7, D9, D10, D11, D12, or D14, as applicable.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-611 renumbered to R9-14-612; new Section R9-14-611 renumbered from R9-14-610 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-611 renumbered to R9-14-613; new Section R9-14-611 renumbered from R9-14-609 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-612. Compliance Testing for Wastewater Parameters

A licensee for a laboratory at which compliance testing for wastewater parameters is performed shall ensure that:

1. The laboratory is operated in compliance with the guidelines in Key References C5 and C6; and

2. Each sample for Arizona wastewater parameter compliance testing is analyzed:
   a. Using an approved method:
      i. Listed in Table 6.2.B; or
      ii. Approved by the Department for wastewater parameter compliance testing under R9-14-610(E); and
   b. If the approved method is from Key Reference C, following the quality control guidelines in Key Reference C associated with the approved method.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-612 renumbered to R9-14-613; new Section R9-14-612 renumbered from R9-14-611 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-612 renumbered to R9-14-614; new Section R9-14-612 renumbered from R9-14-610 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-613. Compliance Testing for Waste Parameters

A. A licensee for a laboratory at which compliance testing for waste parameters is performed shall ensure that each waste sample for Arizona compliance testing is analyzed using an approved method:

1. Listed in Table 6.2.C; or

2. Approved by the Department for waste compliance testing under R9-14-610(E).

B. A licensee for a laboratory at which compliance testing for waste parameters is performed using an 8000 series method from Key Reference F shall:

1. If the method includes specific quality control requirements, follow the specific quality control requirements in the method;

2. If the method does not include specific quality control requirements, follow all requirements in Key Reference F14; and

3. If the method does not include specific sample extraction procedures, follow the procedures in the following from Key Reference F, as applicable:
   a. Method 3500B,
   b. Method 3600C, or
   c. Method 5000.

C. A licensee for a laboratory at which compliance testing for waste parameters is performed using a non-8000 series method from Key Reference F shall comply with Chapters I through 8 of Update IV, February 2007, of Key Reference F, as applicable, according to the requirements of the specific method.

Historical Note
Adopted effective December 20, 1991 (Supp. 91-4). Former Section R9-14-613 renumbered to R9-14-614; new Section R9-14-613 renumbered from R9-14-612 and amended effective June 20, 1997 (Supp. 97-2). Former Section R9-14-613 renumbered to R9-14-615; new Section R9-14-613 renumbered from R9-14-611 and amended by final rulemaking at 7 A.A.R. 184, effective December 15, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 4798, effective December 5, 2006 (Supp. 06-4). Amended by final rulemaking at 22 A.A.R. 2683, effective October 1, 2016 (Supp. 16-3).

R9-14-614. Compliance Testing for Air and Stack Parameters

A licensee for a laboratory at which compliance testing for air or stack parameters is performed shall ensure that each air or stack sample for Arizona compliance testing is analyzed using an approved method:

1. Listed in Table 6.2.D; or

2. Approved by the Department for compliance testing for air or stack parameters under R9-14-610(E).

New Table: Table 1
This regular rulemaking from the Department of Environmental Quality (Department) relates to rules in Title 18, Chapter 9 regarding Water Pollution Control. In this rulemaking, the Department seeks to add new rules related to the Underground Injection Control (UIC) program.
The Department provides a detailed justification and explanation of the UIC program in the Preamble. The Department indicates that it “proposes a new regulatory framework to articulate compliance expectations, mandate regulatory duties, and identify certain rights of those regulated through the Arizona UIC program.”

The Department received an exception from the rulemaking moratorium to initiate this rulemaking on May 7, 2018 and final approval to submit it to the Council on May 31, 2022.

1. **Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

   Yes. The Department cites both general and specific statutory authority for the rules.

2. **Do the rules establish a new fee or contain a fee increase?**

   Yes. The Department indicates that this rulemaking establishes a new fee. The Department cites applicable state statutory authority for the establishment of the new fee.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

   The Department did not review or rely on a study in conducting this rulemaking.

4. **Summary of the agency’s economic impact analysis:**

   The rulemaking addressed in the Department’s Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections in 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the UIC program under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01. The Arizona statutes mandate that the Department establish the UIC program through regulation. 42 U.S.C. 300h et seq. authorizes Environmental Protection Agency to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

   The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

   There will be an increase in permitting costs due to the Department’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The federal UIC program operates off of a general fund model, where permittees are not required to pay for the cost of regulatory program administration.
charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of the Department's programs were changed after the 2008 recession from a general fund model to fee-for service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

6. **What are the economic impacts on stakeholders?**

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. ADEQ, Arizona Department of Water Resources and Arizona Department of Agriculture benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

No. As indicated in Item 10 of the Preamble, the Department made several technical and clarifying changes to the rules between the Notice of Proposed Rulemaking and the Notice of Final Rulemaking. These changes do not result in rules that are “substantially different” pursuant to A.R.S. § 41-1025.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

Yes. As indicated in Item 11 of the Preamble, the Department received several comments on this rulemaking. The Department adequately responded to the comments that it received.
9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Yes. The Department indicates that the UIC program requires permits, but the Department is required to issue a specific type of permit pursuant to federal regulations. The Department demonstrates an adequate justification for an exemption from the general permit requirement pursuant to A.R.S. § 41-1037(A)(3).

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Yes. As the Department indicates in Item 12b of the Preamble, federal law corresponds to these rules. The Department indicates that there is existing state statutory authority for the rules to be more stringent than corresponding federal law.

11. **Conclusion**

In this regular rulemaking, the Department is seeking to establish program rules for the UIC program. The Department is seeking the standard 60-day delayed effective date for this rulemaking. Council staff recommends approval of this rulemaking.
May 17, 2022

Nicole Sornsin, Chair
Governor’s Regulatory Review Council
100 N. 15th Ave., #305
Phoenix, AZ 85007

Re:   Rulemaking for Title 18. Environmental Quality, Chapter 1. Department of Environmental Quality-Administration, Article 5; Title 18. Environmental Quality, Chapter 9. Department of Environmental Quality-Water Pollution Control, Articles 1 and 6; Title 18. Environmental Quality, Chapter 14. Department of Environmental Quality-Permit and Compliance Fees, Article 1.

Dear Chair Sornsin:

The Arizona Department of Environmental Quality (ADEQ) hereby submits three (3) Notices of Final Rulemaking to the Governor’s Regulatory Review Council (GRRC) for its consideration and approval at the Council meeting scheduled for July 6, 2022. This rulemaking supports ADEQ’s primacy pursuit of the Safe Drinking Water Act’s Underground Injection Control program.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information Required by A.A.C. R1-6-201(A)
   a. The public record closed for all rules on February 14, 2022 at 11:59 p.m.
   b. The rulemaking activity does not relate to a five-year review report.
   c. The rulemaking activity does establish a new fee; please see A.R.S. § 49-203(A)(9) for authority.
   d. Fees proposed to be established through this rulemaking have no state precedent. However, the analogous Federally-administered program, unto which ADEQ is pursuing primacy over, did not have fees.
   e. An immediate effective date is not requested.
   f. The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency’s evaluation of or justification for the rule.
g. The Department's preparer of the economic, small business, and consumer impact statement will notify the Joint Legislative Budget Committee of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3)(a).

h. A list of documents enclosed under A.A.C. R1-6-201(A)(2) through (8), which are enclosed as electronic copies:
   1. This cover letter.
   2. Three Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule. The preambles contain:
      a. an economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055;
      b. comments received by the agency, both written and oral, concerning the proposed rule;
      c. the general and specific statutes authorizing the rule, including relevant statutory definitions;
   3. No analyses were submitted to the agency regarding the rule’s impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
   4. No material is incorporated by reference in this rulemaking;
   5. A list of statutes or other rules referred to in the definitions.

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov, if you have any questions.

Sincerely,

Misael Cabrera, P.E.
Director

2. **Citations to the agency’s statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):**

   Authorizing statute: A.R.S. §§ 49-203(A)(6), 49-203(A)(9), 49-104(C)(1)
   Implementing statute: A.R.S. § 49-257.01

3. **The effective date for the rules:**
   [SEC. OF STATE TO FILL IN]

4. **Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:**

   Notice of Rulemaking Docket Openings: 25 A.A.R. 2491 (September, 27, 2019)
   26 A.A.R. 2003 (September 25, 2020)
   27 A.A.R. 1592 (October 1, 2021)
   Notice of Proposed Rulemaking: 28 A.A.R. 16 (January 7, 2022)

5. **The agency’s contact person who can answer questions about the rulemaking:**
   Name: Jon Rezabek
   Address: Arizona Department of Environmental Quality
6. An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

General Explanation of this Rulemaking:
The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. §§ 49-203(A)(6) and 49-257.01(A) to adopt a permit program for underground injection control (UIC), as administered under the Safe Drinking Water Act (SDWA; 42 U.S.C. § 300h et seq.). Per the conditional enactment in proposed rule R18-9-A602(A), any UIC rules promulgated by the State of Arizona shall not have the force and effect of law until the U.S. Environmental Protection Agency (EPA) approves the transfer of primary enforcement authority (referred to herein as “Primacy”) through EPA’s publication of a final rule granting ADEQ Primacy in the Federal Register (see 40 CFR § 145.31). ADEQ first attempted this process in the late 1990s; but those efforts ultimately failed due to insufficient statutory and regulatory authority to develop the program. In 2018 Senate Bill 1494 was passed, giving ADEQ the requisite statutory authority to promulgate a state-level UIC program as required to obtain primacy approval.

In this action, ADEQ proposes new regulatory framework to articulate compliance expectations, mandate regulatory duties, and identify certain rights of those regulated through the Arizona UIC program. On May 7, 2018, the Governor’s Office approved an exemption to the rulemaking moratorium in Executive Order 2018-02 so ADEQ can proceed with this rulemaking.

Associated Rulemakings
The Arizona UIC program is a regulatory program with associated fees and licensing time frames (LTF). A.A.C. R1-1-103(D)(4) states, “...[a]n agency shall file only one Chapter per notice for any rulemaking activity.” In adherence to the rule, the fee component of the Arizona UIC program, which amends A.A.C. Title 18, Chapter 14, is a separate Notice of Proposed Rulemaking filed contemporaneously with this rulemaking, which amends A.A.C. Title 18, Chapter 9. Furthermore, the Arizona UIC program amendments to the LTF has also been filed contemporaneously with the program and fee amendments. The LTF Notice of Proposed Rulemaking amends A.A.C. Title 18, Chapter 1.

What is Underground Injection?
An injection well is used to place fluid underground into porous geologic formations. These underground formations may range from deep sandstone or limestone, to a shallow soil layer. Injected fluids may include water, wastewater, brine (salt water), or water mixed with chemicals.

What is a well?
A well is a bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or a subsurface fluid distribution system.

What does the Federal UIC program do?
The UIC program protects Underground Sources of Drinking Water (USDW) through the regulation of injection wells. USDWs are:
- aquifers or portions of aquifers that:
  1. supply public water systems; or
  2. contain a sufficient quantity of ground water to supply a public water system; and
     a. currently supply drinking water for human consumption, or
     b. contain fewer than 10,000 mg/l total dissolved solids; and
  3. are not aquifers exempted under the UIC program.
**How does the UIC program protect USDWs?**
The UIC program requires injected fluids stay within the well or the intended injection zone. The program also regulates fluids that are directly or indirectly injected into a USDW by prohibiting the movement of fluid containing any contaminant into USDWs, if the presence of that contaminant may cause a violation of any primary drinking water regulation or may otherwise adversely affect the health of persons.

**What are the different well classifications in the UIC program?**

**Class I**
Class I wells are used to inject hazardous and non-hazardous wastes into deep, isolated rock formations. Class I wells are disposal wells used by the petroleum refining, metal production, chemical production, pharmaceutical production, commercial disposal, food production and municipal wastewater treatment industries (amongst others) to dispose. These deep well injections release fluids into formations below USDWs, usually formations separated by multiple geologic strata from USDWS and often times at depths thousands of feet below the surface.

**Class II**
Class II wells are used exclusively to inject fluids associated with oil and natural gas production. Class II wells fall into one of the following three categories: disposal wells, enhanced recovery wells and hydrocarbon storage wells. Class II fluids are primarily brines (salt water) that are brought to the surface while producing oil and gas. Brines are separated from hydrocarbons at the surface and reinjected into the same or similar underground formations for disposal. Enhanced recovery wells utilize fluids consisting of brine, freshwater, steam, polymers, or carbon dioxide that are injected into oil-bearing formations to recover residual oil and in limited applications, natural gas. Hydrocarbon storage wells inject liquid hydrocarbons into underground formations (such as salt caverns) where they are stored, generally, as part of the U.S. Strategic Petroleum Reserve.

**Class III**
Class III wells are used to inject fluids for the purpose of dissolving and then extracting minerals. Production wells, which bring mining fluids to the surface, are not regulated under the UIC program. Class III wells are used to mine Uranium, Salt, Copper and Sulfur. Class III injection requirements isolate fluids from underground sources of drinking water.

**Class IV**
Class IV wells are used to inject hazardous or radioactive wastes into or above a geologic formation that contains a USDW. In 1984, EPA banned the use of Class IV injection wells. ADEQ will continue this ban upon primacy. These wells may only operate as part of an EPA or state authorized ground water clean-up action. Less than 32 waste clean-up sites with Class IV wells exist in the United States.

**Class V**
Class V wells are used to inject non-hazardous fluids underground. Most Class V wells are used to dispose of wastes into or above USDWs. This disposal can pose a threat to ground water quality if not managed properly. The different types of Class V wells pose various threats. Most Class V wells are shallow disposal systems that depend on gravity to drain fluids directly in the ground. Over 20 well subtypes fall into the Class V category. There are more than 650,000 Class V wells estimated to operate in the United States. Most of these Class V wells are unsophisticated shallow disposal systems such as stormwater drainage wells, septic system leach fields and agricultural drainage wells.

**Class VI**
Class VI wells are used to inject carbon dioxide (CO2) into deep rock formations. This long-term underground storage is called geologic sequestration (GS). Geologic sequestration refers to technologies to reduce CO2 emissions to the atmosphere and mitigate climate change.

**What does a UIC inspection entail?**
Verification of proper well construction, mechanical integrity testing (MIT), no leaks detected from the well into the environment, assurance that monitoring, recordkeeping, and reporting conducted by the operator, as well as, assurance that any required operating conditions are being followed, amongst other check points.
Is the Arizona UIC Program different from the EPA UIC program?

Arizona’s UIC program must meet all of the requirements set forth in the Code of Federal Regulations or 40 CFR Part 145 in order for EPA to grant ADEQ Primacy over the program. The CFR requirements include building the state program up to the standards delineated in 40 CFR 145.1 through 40 CFR 145.14. Generally, Arizona’s UIC program must be at least as stringent as the EPA UIC program. However, A.R.S. § 49-104(16) requires ADEQ rules to be “…no more stringent than the corresponding federal law…” unless specifically authorized by the legislature. The UIC rules do not have a specific authorization to be more or less stringent. Therefore, the content of the proposed rules does not exceed Federal stringency and is largely the same as the rules that comprise the EPA program.

The noteworthy differences are as follows:

- R18-9-A602 is a rule that outlines the scope of applicability for the program. There is no EPA UIC program analog. The rule does not add or subtract regulatory burden on the regulated community. On the contrary, it is meant to clarify the program as a whole.
- R18-9-B609 prohibits Hazardous Waste Injection and Class IV injections. This rule differs from its federal analog at 40 CFR 144.13 in that subsection A was added in order to meet Arizona’s existing prohibition on injecting hazardous waste in A.A.C. R18-8-270(B)(2)(b).
- R18-9-A627 explains the requirements for a final permit decision. This rule differs from its federal analog at 40 CFR 124.15 in that information regarding Arizona state regulatory appeals processes has been added for the clarification of the regulated community. Subsections (C) through (F) were added to explain how issuances, modifications, or revocations and reissuances of permits that necessitate new aquifer exemptions or enlargements of a previously approved aquifer exemption are not effective until confirmed by the Administrator of the EPA.
- R18-9-C631 delineates the requirements for modification, revocation and reissuance of permits. Subsection B was altered from its federal analog at 40 CFR 124.5 in order to accommodate a reasonable request made by a stakeholder to allow for a notice of intent to deny to be issued when a request for a modification or a revocation and reissuance is denied as long as the scope of the request has not been proposed and denied before.
- R18-9-J654 delineates the prohibition of Class V cesspools and motor vehicle waste disposal wells. The rule was altered in order to expand the scope of the prohibition from its federal analog at 40 CFR 144.88. The scope of the prohibition in 40 CFR 144.88 is “large-capacity cesspools”. The scope of the draft language in R18-9-J654 is all “cesspools”. This language was changed in order to align with the more comprehensive prohibition in the APP program at R18-9-A309(A)(4).
- Table 1 is a list of the applicable primary drinking water maximum contamination limits (MCL). These are the standards applicable to the Arizona UIC program. The Arizona UIC program is listing the applicable MCLs where the Federal program simply references 40 CFR 141 and 142.

A comparison of the EPA UIC program and the Arizona UIC program can be made by referencing the following table which shows the analogs:

Can a Class V well be in operation before inventorying?
No. New Class V wells must inventory before operation.

Stakeholder Composition
Arizona currently has five (5) individual EPA UIC program permits operating within the state boundaries (not including Indian lands), all of which are for Class III wells for the purpose of extracting salts and copper. The three companies operating the five permits are Morton Salt, Inc., Excelsior Mining Arizona, Inc. and Florence Copper, Inc.

The UIC program applies to a large number of Class V injection wells through the programs “authorization by rule.” Class V authorization by rule includes initial inventorying, operators meeting a set of criteria, including a general standard to not cause fluids to move in such a way where a USDW would receive a pollutant above the standards in Table 1. Examples of Arizona Class V wells include drywells, aquifer storage recharge wells, septic systems serving greater than 20 people per day or that have a design flow of over 3,000 gallons per day and stimulation injection wells for the purpose of inert gas extraction (See proposed rule R18-9-A604(E) in Section 13 below for more examples of Class V wells). Furthermore, through stakeholder outreach, ADEQ has become aware of Arizona municipalities that are interested in developing Class I municipal wastewater disposal wells.

What has been the stakeholder process thus far for this rulemaking?
Statutory authority for program pursuit was passed into law through Senate Bill 1494 in 2018 at A.R.S. §§ 49-257 and 49-257.01. An exemption memo was received from the Governor’s Office in May of 2018. Since those events, ADEQ has been reaching out to UIC stakeholders throughout the state in a pre-rulemaking process known internally as “informal rulemaking”. Informal rulemaking involves developing and setting internal goals for what the rulemaking should achieve. ADEQ has held nine (9) stakeholder meetings, either presenting to stakeholders, receiving stakeholder input or both. Tribal consultation presentations were conducted three times in May 2019. Tribal correspondence has been addressed throughout the informal rulemaking phase as well.

The nine stakeholder meetings were designed to inform the regulated community of ADEQ’s progress in pursuing Primacy, as well as, explaining and presenting drafts of the state rules being developed for the ultimate purpose of administering the program. In November 2019 and November 2020, stakeholders were given access to drafts of the “program rule”. Afterwards, ADEQ solicited hundreds of comments from the regulated community, addressing and analyzing each one. Some comments led to changes in rule language, while others...
were determined to be inapplicable or unnecessary. All comments received were considered and are appreciated by the Agency. A repository of materials and events can be viewed on ADEQ’s “Stakeholder Materials” page for the UIC rulemaking. That webpage can be found here: https://azdeq.gov/UIC

In the context of stakeholder involvement, it should be noted that this set of rules, internally referred to as the “program rules,” is largely the same in substance as the EPA UIC permit program, which can be viewed in the CFR (see 40 CFR Parts 144 and 146). The substantive similarities were made by design, as EPA requires a primacy applicant’s administering rules to be at least as stringent as the EPA program. Furthermore, in Arizona, a number of statutes (A.R.S. §§ 41-1052(D)(9), 49-104(16) and others) prohibit a rule’s passage if the rule is more stringent than a corresponding federal law unless there is statutory authority to exceed the federal requirements. Due to these limitations on stringency, the language in the EPA program was adopted largely as is. The influence of stakeholder input can be seen in R18-9-A602, R18-9-C627(B) through (F) and R18-9-C631(B).

R18-9-A602(G)(2)
The Oil and Gas Conservation Commission (OGCC) has state statutory authority to permit some injection wells at A.R.S. § 27-516(A)(20). ADEQ responded by delineating R18-9-A602(G)(5), which excludes from the program, “[i]njection wells authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq.” This language allows the OGCC to issue UIC permits, should they receive primacy for certain injection wells from EPA. ADEQ intends to assist OGCC in their pursuit of primacy.

R18-9-A602(H)
Stakeholder comment was received by ADEQ concerning the exemption of natural gas storage from the program. ADEQ responded by delineating R18-9-A602(H), a subsection entitled the “Safe Drinking Water Act exemptions”. Here, ADEQ decided to make explicit the exemptions from the program that can be found in the United States Code (USC) at 42 USC 300h(d)(1), including the exclusion of “the underground injection of natural gas for purposes of storage” from the UIC definition of “underground injection”.

R18-9-A602(J)
Stakeholder comment was received by ADEQ concerning the preference to make explicit the transfer of existing UIC aquifer exemptions to the state program. This transfer is a requirement of ADEQ attaining primacy from EPA. ADEQ decided to make explicit the transfer as no issues arise in doing so.

R18-9-C627(A) through (F)
Subsection A: Stakeholder comment was received by ADEQ concerning appeals rights in permit, modification and aquifer exemption actions. The Federal analog for this rule is significantly different as the Federal terminology and appeals rights differ from those on the state level. A.R.S. 41-1092.03 was followed in delineating the notice components.
Subsection B addresses what accompanies a permit issuance.
Subsection C addresses how the denial of an aquifer exemption request can be appealed.
Subsection D addresses makes explicit the effectivity of a final permit decision.
Subsection E addresses when a permit in which necessitates an aquifer exemption may be appealed and when the permitting action becomes effective in relation to the formal approval of the EPA Administrator.
Subsection F addresses when a permit in which necessitates an injection depth waiver pursuant to R18-9-J670 may be appealed and when the permitting action becomes effective in relation to the written concurrence of the EPA Administrator.

R18-9-C631(B)
Stakeholder comment was received by ADEQ concerning the preference for a permittee to have the right to a notice of intent to deny if requested from a modification or revocation and reissuance decision. ADEQ found no issue in allowing such a right and proceeded to work with EPA and the stakeholder to develop appropriate language.

Why is Article 1 being amended?

Individually Permitted Class V UIC Wells
Article 1 is being amended in order to avoid a scenario where a UIC Class V individual permittee
would also be required to obtain an individual Aquifer Protection Permit (APP). A.R.S. § 49-250(B)(26) exempts all individual UIC permittees from APP program requirements - except Class V wells as “prescribed by rule”. This leaves Class V wells “prescribed by rule” subject to both UIC and APP regulation. UIC Class V wells are automatically “authorized by rule” unless the Director requires an individual permit. “Authorized by rule” means a well owner need only inventory their well and follow a set of criteria to remain in compliance. “Authorized by rule” Class V wells do not need an individual permit. The reason Class Vs were left out of the exemption from APP is that APP regulation for Class V wells is more protective of human health and the environment than the UIC requirements. However, the “prescribed by rule” language in A.R.S. § 49-250(B)(26) was unintentionally altered in the legislative process from “authorized by rule”. ADEQ is concerned that Class V wells “prescribed by rule” may be interpreted to include Class V wells “authorized by rule” and individually permitted Class V wells, which ADEQ does not believe was the intention of the legislation. If A.R.S. § 49-250(B)(26) is interpreted to require both Class V wells “authorized by rule” and Class V wells individually permitted to be applicable to APP, then individually permitted UIC Class V wells would be required to get a duplicative, individual permit. ADEQ has a goal of eliminating duplicative permitting in the APP and UIC programs, while simultaneously upholding robust protection of human health and the environment. To that end, ADEQ is proposing to add a Class Exemption in Article 1 pertaining to the APP program. Authority to make such an exemption can be found in A.R.S. § 49-250(A). The Class Exemption in the A.A.C. would make Class V wells with individual UIC permits not subject to the APP program.

**Coal Combustion Residuals (CCR) Class Exemption From APP**

Also proposed for amendment in Article 1 is R18-9-103(5). Currently, this language exempts a class of facilities from APP known as Coal Combustion Residuals Units or CCR Units. CCR disposal units are used for the treatment, storage, or disposal of CCR, which can be wet or dry, and is generally composed of fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers. Arizona CCR Units are currently regulated under the federal CCR regulations, which are self-implementing rules (see 40 CFR 257, Subpart D). Generally, this approach means that the regulations were not intended to be implemented through direct government oversight, and enforcement is largely left to be performed through citizen lawsuits (see generally Final Rule: Hazardous and Solid Water Management System; Disposal of CCR from Electric Utilities, 80 Fed. Reg. 21,302 (Apr. 17, 2015)). In addition to the self-implementing rules is the opportunity for a state agency to obtain primary enforcement authority (primacy) over the CCR regulatory program in which individual permits are issued (see 42 U.S.C. § 6945(d)(1)). At the time the 2019 rulemaking amended R18-9-103 (see 25 A.A.R. 3060) -- adding the exemption to subsection (5) -- ADEQ presumed that the implementation of the CCR regulatory program would occur within the APP program. APP’s rules are located in A.A.C. Title 18, Chapter 9. Since that time, ADEQ has decided that the CCR regulatory program would be better suited in the agency’s Waste Programs rules. Waste Program’s rules are located in A.A.C. Title 18, Chapter 8. In an effort to effectuate this intention and avoid confusion, ADEQ is proposing legislation to amend A.R.S. § 49-250(B). The proposal would exempt CCR units from APP on the statutory level if the units are:

1. Regulated under 40 CFR 257, Subpart D, or
2. ADEQ receives approval from EPA for a CCR regulatory program in accordance with 42 U.S.C. § 6945(d)(1).

Adjusting the language in R18-9-103(5) through this rulemaking aligns the exemption in rule with the proposed legislative amendment.

**7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

Not applicable.

**8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**
9. **The economic, small business, and consumer impact statement:**

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

### A. An identification of the rulemaking:

The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

### B. A summary of the EIS:

#### General Impacts

The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be
developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

Specific Impacts
While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

Stakeholder Process
ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

State government agencies
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

Political subdivisions
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.
Mines
Mineral Extraction Companies
Businesses which utilize drywells

The General Public
The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

D. Cost/benefit analysis

2. **Part II - Individual Stakeholder Summaries/Calculations:**

This section outlines ADEQ’s analyses of the estimated costs and benefits of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection and underground injection control.

**ADEQ**

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

**The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule**

3.2

**Political Subdivisions**

Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalination plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.
The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**Privately-Owned Business**

Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.

However, and as mentioned above, the benefits to privately-owned business include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**General Public**

The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

F. A statement of the probable impact of the rules on small business:

In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines
a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. **An identification of the small business subject to the rules:**
   Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventorying, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. **The administrative and other costs required for compliance with the rules:**
   Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. **A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:**
   a. **Establishing less stringent compliance or reporting requirements in the rule for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.
   b. **Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.
   c. **Consolidating or simplifying the rule’s compliance or reporting requirements for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.
   d. **Establishing performance standards for small businesses to replace design or operational standards in the rule:**
      Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.
   e. **Exempting small businesses from any or all requirements of the law:**
      Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. **The probable costs and benefits to private persons and consumers who are directly affected by the rules:**
   As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for
ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.

Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.

H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.
I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142. A table showing specific analogous Federal regulations to the rules in this rulemaking can be found in section 6 of the Preamble above.

10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:
R18-9-A601(3)
- To add clarity to the definition, replaced “‘Application’ means the ADEQ prescribed method for applying for a permit, including any additions, revisions or modifications to the forms” with “‘Application’ means the ADEQ prescribed method, such as a form, for applying for a permit, including any additions, revisions or modifications thereof.”
R18-9-A601(22) and (23)
- Switched the definitions of “Emergency permit” and “Environmental Protection Agency” for the purpose of adhering to alphabetization.
R18-9-A601(48)
- Replaced proposed definition language with language more closely following the Federal CFR analog. The proposed language is as follows, “‘Permit means an authorization issued by the Director pursuant to this Article, including an area permit under R18-9-C624 and an emergency permit under R18-9-C625.” It is replaced by this final language, “‘Permit’ means an authorization issued by the Director pursuant to this Article. ‘Permit’ includes an area permit under R18-9-C624 and an emergency permit under R18-9-C625. ‘Permit’ does not include UIC authorization by rule or any permit which has not yet been subject to a final permit decision, such as a ‘draft permit.’”
R18-9-A601(68) and (69)
- Switched the definitions of “Underground Injection Control” and “Underground injection” for the purpose of adhering to alphabetization.
R18-9-A601(74) and (75)
- Switched the definitions of “Well stimulation” and “Well monitoring” for the purpose of adhering to alphabetization.
R18-9-A602(C)
- This edit was made to add clarity to the jurisdictional scope of the program and to restructure the language in a more digestible fashion. The proposed language read,
(C) “Underground injection is prohibited in the State of Arizona unless authorized by permit or rule under this Article or authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq. Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or may adversely affect the health of persons.”
The final language reads,
(C) “Underground injection is prohibited in lands under the jurisdiction of the State of Arizona unless:
(1) Authorized by permit or rule under this Article in accordance with 42 U.S.C. 300h et seq., or
(2) Authorized by OGCC pursuant to regulations approved by EPA.
(D) Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or
may adversely affect the health of persons.”

R18-9-A602(G); previously R18-9-A602(E) in proposed rule

- The edit was made for two reasons; one, to conform the language with the classification rule at R18-9-A604(E)(2)(a); and two, to allow the prohibition of cesspools language at R18-9-A654 to stand alone. The proposed language read,

  (G) “Specific exclusions. The following are not covered by these regulations:
  (1) Individual or single-family residential waste disposal systems such as domestic cesspools or septic systems.
  (2) Non-residential cesspools, septic systems or similar waste disposal systems if such systems:
     (a) Are used solely for the disposal of sanitary waste, and
     (b) Have the capacity to serve fewer than 20 persons a day or a design capacity of less than 3,000 gallons per day.
  (3) Injection wells used for injection of hydrocarbons which are of pipeline quality and are gases at standard temperature and pressure for the purpose of storage.
  (4) Any dug hole, drilled hole, or bored shaft which is not used for the subsurface emplacement of fluids.
  (5) Injection wells authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq.”

The final language reads,

  (G) “Specific exclusions. The following are not covered by these regulations:
  (1) Septic systems or similar waste disposal systems if such systems:
     (a) Are used solely for the disposal of sanitary waste, and
     (b) Have a design capacity of less than 3,000 gallons per day.
  (2) Injection wells used for injection of hydrocarbons which are of pipeline quality and are gases at standard temperature and pressure for the purpose of storage.
  (3) Any dug hole, drilled hole, or bored shaft which is not used for the subsurface emplacement of fluids.
  (4) Injection wells authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq.”

R18-9-A602(J); previously R18-9-A602(I) in proposed rule

- Replaced “…upon the date of primacy” with “upon the effective date of the Arizona UIC Program” in order to align with program definitions. See R18-9-A601(21).

R18-9-A604(E)(2)(a)

- Removed “…the capacity to serve fewer than 20 persons a day or…” in order to reduce confusion between the formerly two thresholds, “…20 persons a day…” and “…design capacity … 3,000 gallons per day.”

R18-9-A604(F)

- Replaced “Class VI well are wells that are” with “Class VI wells are” for clarity.

R18-9-A605(B)(4)(a) and (b)

- Removed the “(A)” in references R18-9-A606(A)(2) and R18-9-A606(A)(3) in order to properly cite the structure of the final rule.

R18-9-A606(2)(a)

- Replaced “consider” with “considering” in order to make the sentence grammatically correct.

R18-9-C616(C)(2)

- Added the word “at” at the beginning of the final phrase in order to complete the statement that starts with the language of subsection (C).

R18-9-C616(D)(9)

- Added a new subsection here in order to comply with the agency requirements in the State Historic Preservation Act, specifically A.R.S. § 41-863.

R18-9-C620(D)(1)(e)

- Added a new subsection here because none of the subsections in the proposed rule under R18-9-C620(D)(1)(e) represented the Federal analog at 40 CFR 124.10(c)(1)(ix)(B) and (C).

R18-9-C622(E)

- Added a new subsection here because none of the subsections in the proposed rule under R18-9-C622 represented the Federal analog at 40 CFR 124.12(d).
R18-9-C624(A)(2)
- Removed an extra word, “in”.

R18-9-C627(A)
- The provision of the permit itself and an updated fact sheet was inserted into the first sentence of R18-9-C627(A) from proposed R18-9-C627(C) for language consolidation, clarity and to align UIC permit issuance with permit issuance in similar ADEQ programs. “…of the A.R.S.” was added to the second sentence for clarity.

The proposed language read,

(A) “Issue of a final permit decision by the Director shall be accompanied by a notification to the applicant and each person who has submitted written comments or requested notice of the final permit decision. The notice and hearing procedures are subject to either Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7.”

The final language reads,

(A) “Issuance of a final permit decision by the Director shall be accompanied by the permit and an updated fact sheet per R18-9-C619, if applicable, and a notification to the applicant and each person who has submitted written comments or requested notice of the final permit decision. The notice and hearing procedures are subject to either Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7 of the A.R.S.”

R18-9-C627(D); previously R18-9-C627(E) in proposed rule
- The language “…and pursuant to…” was changed to “…unless stayed pursuant to…” in order to more accurately align the section with potential stays through either the Office of Administrative Hearings or the Water Quality Appeals Board. See A.R.S. §§ 41-1092 et seq. and 49-321 et seq., respectively.

The proposed language read,

(E) “The final permit decision shall take effect 30 days after its issuance in accordance with the notification requirements of subsection A of this Section and pursuant to Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7.”

The final language reads,

(E) “The final permit decision shall take effect 30 days after its issuance in accordance with the notification requirements of subsection A of this Section unless stayed pursuant to Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7 of the A.R.S.”

R18-9-C631(B)
- The first three sentences were reworked for clarity, but do not adjust the language substantively.

The proposed language read,

(B) “If the Director decides the request is not justified, they shall send the requestor a brief written response giving a reason for the decision. A termination shall be accompanied by a brief written response giving a reason for the decision, but does not require a notice of intent to deny. Denials of modifications (not including minor modifications) or revocation and reissuances do not require a notice of intent to deny unless a request is made by the permittee, and the scope of the request has not previously been requested and denied before. A notice of intent to deny is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.”

The final language reads,

(B) “If the Director decides a request to modify, revoke and reissue, or terminate is not justified, they shall send the requestor a brief written response giving a reason for the decision. Denial of a request to terminate does not require a notice of intent to deny. Denial of a request for modification or revocation and reissuance requires a notice of intent to deny only when the request is made by the permittee, the scope of the request has not previously been requested and denied and the request is not for a minor modification. A notice of intent to deny is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.”

R18-9-C631(D)
- The final word “reissued” was changed to “issued” in order to more accurately describe the action the agency would take in this situation.

R18-9-C631(F)
The language “…R18-9-C634 where the permittee objects…” was changed to “…R18-9-C634(A)(1), (2) or (3)…” for two reasons; one, to distinguish between non-requested causes for termination and the requested cause in the subsections of R18-9-C634; and two, ADEQ has chosen to issue a notice of intent to terminate whether the permittee objects or not.

Proposed rule R18-9-C631(G), removed in final rule
- The subsection was removed as the EPA-issued permit transition plan, upon primacy, does not involve the termination of permits.

R18-9-C632(A)
- In the proposed rule, R18-9-C632(A) included what is now in final rule, R18-9-C632(A), (B), (C) and (D). No substantive changes have been made to the remaining first sentence of R18-9-C632(A) in the final rule through the restructuring. However, the proposed rule language at R18-9-C632(A), “…[w]hen a permit is modified, only the conditions subject to modification are reopened…” and “…[i]f a permit is revoked and reissued, the entire permit is reopened and subject to revision and the permit is reissued for a new term…” has been removed from the final rule as it is redundant with final rule R18-9-C631(D).

R18-9-C632(B); part of proposed rule R18-9-C632(A)
- The final rule splits proposed rule R18-9-C632(A) into four subsections, R18-9-C632(A), (B), (C) and (D). In the final rule, Subsection B is the second sentence of proposed rule R18-9-C632(A). No substantive changes have been made to this language.

R18-9-C632(C); part of proposed rule R18-9-C632(A)
- The final rule splits proposed rule R18-9-C632(A) into four subsections, R18-9-C632(A), (B), (C) and (D). In the final rule, Subsection C is the fifth sentence of proposed rule R18-9-C632(A). No substantive changes have been made to this language.

R18-9-C632(D); part of proposed rule R18-9-C632(A)
- The final rule splits proposed rule R18-9-C632(A) into four subsections, R18-9-C632(A), (B), (C) and (D). In the final rule, Subsection D is the sixth and seventh sentences of proposed rule R18-9-C632(A). No substantive changes have been made to this language.

R18-9-C632(E)(3); previously R18-9-C632(B)(3) in proposed rule
- The language “…of new or amended standards…” was replaced with “…of new regulations…” in order to more accurately capture the breadth of rule promulgations that may be cause for revocation and reissuance or modification.

R18-9-C633(8)
- Replace “an” with “and”.

R18-9-C635(16)(b)
- Replace “and” with “an”.

R18-9-C635(17)(b)
- The first reference in the proposed rule to R18-9-B614 should be to R18-9-613. The first reference in the proposed rule to R18-9-B613 should be to R18-9-B614. Both inaccurate references have been updated for the final rule.

R18-9-C636(A)(1)
- The reference in the proposed rule to R18-9-B634 should be to R18-9-633. The inaccurate reference has been updated for the final rule.

R18-9-E640(A)
- The second sentence of subsection A and further subsections 1 through 3 of subsection A in the proposed rule were removed for two reasons; one, because subsections 1 through 3 are not siting requirements; and two, because the removed language is not appropriate for a rule concerning construction requirements. ADEQ believes the language in R18-9-A604(A), classification of wells, suffices.

R18-9-E642(B)(16)
- The language “…R18-9-D636…” was replaced with “…R18-9-D636(A)(6)…” in order to add the appropriate amount of specificity.

R18-9-I650(A)(4); not in proposed rule
- This subsection was added to accommodate a transferability function for UIC Class V wells authorized by rule.

R18-9-I650(B)
- The reference to “…subsection (B)…” was changed to “…subsection (B)(2)…” in order to add the
appropriate amount of specificity.
R18-9-I650(B)(2)
- In order to clarify the language, “…if one of any one…” was changed to “…upon any…”
R18-9-I650(B)(2)(b)
- The language “…pursuant to R18-9-I651…” was added in order to attain the appropriate amount of specificity.
R18-9-I650(B)(3)
- The proposed language for R18-9-I650(B)(3) was replaced with, “[p]rior to abandoning a Class V well, the owner or operator shall meet the plugging requirements in R18-9-B614(C)” because R18-9-I650(B)(3) and R18-9-B614(C) are substantively identical and the removal or redundancy is a goal of the rulemaking.
R18-9-J657(B)(1)
- The language “…R18-9-C616(E)(1) through (6)” was changed to “…R18-9-C616(E)(1) through (9)” in order to accurately reference the rule.
R18-9-J657(B)(21), not in proposed rule
- Added a new subsection here in order to comply with the agency requirements in the State Historic Preservation Act, specifically A.R.S. § 41-863.

11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Drywell Owners – UIC Drywell Regulation
How will the UIC program rulemaking affect drywell regulation in Arizona? Will the existing registrations be rolled into the new UIC program? If rolled into the new UIC program, will the regulations look the same/similar as they are now for the Class V wells? Upon primacy, will drywell owners with registrations under A.R.S. § 49-332 need to inventory under the UIC program? Are Dry Wells included in a Class? If so, which Class are they included in? Under the UIC program, will drywells be assessed an annual fee or a one-time fee?

ADEQ Response 1:
ADEQ appreciates the comment. Currently, drywells in Arizona are regulated primarily through a statutorily-based program that can be found at A.R.S. Title 49, Chapter 2, Article 8. This program requires registration of new drywells. There are a few special circumstances where drywells are required to register and apply for an Aquifer Protection Permit (APP) (see A.A.C. Title 18, Chapter 9, Article 3, Part C. Type 2 General Permits – specifically R18-9-C301, C303 & C304).
In 2022, the Arizona State Legislature passed a bill (signed by the Governor) which repeals the state statutory drywell program. The repealed state statutory drywell program leaves drywell regulation in Arizona to the UIC program. The UIC program regulates drywells as part of its Class V wells. Upon primacy over the UIC program (projected for early 2023), ADEQ would take administrial control from EPA over the program and the drywell regulation therein. Until primacy, the Environmental Protection Agency (EPA) will continue to administer the UIC program in Arizona (including drywells which are encompassed in the Class V wells).
ADEQ is currently developing the UIC program and aims to transfer all state drywell registrations into the UIC program inventory in the process (free of charge). More information on this process will be made public as program development continues.
Class V regulations in the UIC program that are currently in effect and administered by EPA out of the Code of Federal Regulations (CFR) are nearly identical to the Class V regulation in this rulemaking. Similar to the regulation in A.R.S. Title 49, Chapter 2, Article 8, the Class V regulation wherein drywells apply requires an inventory of new wells. Class V regulation also requires drywells to adhere to the prohibition of movement standard in rule R18-9-B608(A). This rule prohibits any injection activity in a manner that allows the movement of fluid containing any contaminant into an underground source of drinking water. The Class V-specific regulation can be found at R18-9-I650 et seq. Under the Arizona UIC program, drywells and Class V wells are charged a one-time fee, per inventory, of $200. Class V wells, authorized by rule, will also be charged $100 upon transfer of the well to a new owner.

Comment 2: Drywell Industry Member – UIC Drywell Regulation
Will this proposed regulation impact the existing required registration of the typical parking lot drywell with ADEQ?

ADEQ Response 2:

Comment 3: Environmental Protection Agency (EPA) – UIC Drywell Regulation
Will the UIC program rulemaking affect drywell regulation in Arizona? Will the existing registrations be rolled into the new UIC program? If rolled into the new UIC program, will the regulations look the same/similar as they are now for the Class V wells? Upon primacy, will drywell owners with registrations under A.R.S. § 49-332 need to inventory under the UIC program? Are Dry Wells included in a Class? If so, which Class are they included in? Under the UIC program, will drywells be assessed an annual fee or a one-time fee?

ADEQ Response 3:
ADEQ appreciates the comment. Currently, drywells in Arizona are regulated primarily through a statutorily-based program that can be found at A.R.S. Title 49, Chapter 2, Article 8. This program requires registration of new drywells. There are a few special circumstances where drywells are required to register and apply for an Aquifer Protection Permit (APP) (see A.A.C. Title 18, Chapter 9, Article 3, Part C. Type 2 General Permits – specifically R18-9-C301, C303 & C304).
In 2022, the Arizona State Legislature passed a bill (signed by the Governor) which repeals the state statutory drywell program. The repealed state statutory drywell program leaves drywell regulation in Arizona to the UIC program. The UIC program regulates drywells as part of its Class V wells. Upon primacy over the UIC program (projected for early 2023), ADEQ would take administrial control from EPA over the program and the drywell regulation therein. Until primacy, the Environmental Protection Agency (EPA) will continue to administer the UIC program in Arizona (including drywells which are encompassed in the Class V wells).
ADEQ is currently developing the UIC program and aims to transfer all state drywell registrations into the UIC program inventory in the process (free of charge). More information on this process will be made public as program development continues.
Class V regulations in the UIC program that are currently in effect and administered by EPA out of the Code of Federal Regulations (CFR) are nearly identical to the Class V regulation in this rulemaking. Similar to the regulation in A.R.S. Title 49, Chapter 2, Article 8, the Class V regulation wherein drywells apply requires an inventory of new wells. Class V regulation also requires drywells to adhere to the prohibition of movement standard in rule R18-9-B608(A). This rule prohibits any injection activity in a manner that allows the movement of fluid containing any contaminant into an underground source of drinking water. The Class V-specific regulation can be found at R18-9-I650 et seq. Under the Arizona UIC program, drywells and Class V wells are charged a one-time fee, per inventory, of $200. Class V wells, authorized by rule, will also be charged $100 upon transfer of the well to a new owner.

Comment 4: Environmental Protection Agency (EPA) – UIC Drywell Regulation
Will the UIC program rulemaking affect drywell regulation in Arizona? Will the existing registrations be rolled into the new UIC program? If rolled into the new UIC program, will the regulations look the same/similar as they are now for the Class V wells? Upon primacy, will drywell owners with registrations under A.R.S. § 49-332 need to inventory under the UIC program? Are Dry Wells included in a Class? If so, which Class are they included in? Under the UIC program, will drywells be assessed an annual fee or a one-time fee?

ADEQ Response 4:
ADEQ appreciates the comment. Currently, drywells in Arizona are regulated primarily through a statutorily-based program that can be found at A.R.S. Title 49, Chapter 2, Article 8. This program requires registration of new drywells. There are a few special circumstances where drywells are required to register and apply for an Aquifer Protection Permit (APP) (see A.A.C. Title 18, Chapter 9, Article 3, Part C. Type 2 General Permits – specifically R18-9-C301, C303 & C304).
In 2022, the Arizona State Legislature passed a bill (signed by the Governor) which repeals the state statutory drywell program. The repealed state statutory drywell program leaves drywell regulation in Arizona to the UIC program. The UIC program regulates drywells as part of its Class V wells. Upon primacy over the UIC program (projected for early 2023), ADEQ would take administrial control from EPA over the program and the drywell regulation therein. Until primacy, the Environmental Protection Agency (EPA) will continue to administer the UIC program in Arizona (including drywells which are encompassed in the Class V wells).
ADEQ is currently developing the UIC program and aims to transfer all state drywell registrations into the UIC program inventory in the process (free of charge). More information on this process will be made public as program development continues.
Class V regulations in the UIC program that are currently in effect and administered by EPA out of the Code of Federal Regulations (CFR) are nearly identical to the Class V regulation in this rulemaking. Similar to the regulation in A.R.S. Title 49, Chapter 2, Article 8, the Class V regulation wherein drywells apply requires an inventory of new wells. Class V regulation also requires drywells to adhere to the prohibition of movement standard in rule R18-9-B608(A). This rule prohibits any injection activity in a manner that allows the movement of fluid containing any contaminant into an underground source of drinking water. The Class V-specific regulation can be found at R18-9-I650 et seq. Under the Arizona UIC program, drywells and Class V wells are charged a one-time fee, per inventory, of $200. Class V wells, authorized by rule, will also be charged $100 upon transfer of the well to a new owner.
ADEQ Response 2:
ADEQ appreciates the comment. If EPA grants ADEQ primary enforcement authority of the SDWA-UIC program and a person wanted to install a typical drywell draining a parking lot and comply with the prospective regulatory scheme for drywells in Arizona (projected for 2023), they would have to inventory the new drywell with ADEQ through the SDWA-UIC program (the old state dry well program would no longer exist). It should be noted that Arizona drywells are required to be inventoried under the SDWA-UIC program through the Federal EPA program before primacy. In the inventory process, it is possible that the drywell described in the question above would additionally be subject to the Aquifer Protection Permits (APP) if:

- the drywell drained an area where hazardous substances are used, stored, loaded or treated (see Arizona Administrative Code R18-9-C301), or if
- the drywell drained a motor fuel dispensing facility where motor fuels are used, stored or loaded (see Arizona Administrative Code R18-9-C304).

Please note that this potential, additional APP requirement exists now and will remain unaffected by the legislation referred to above.

Comment 3: Drywell Industry Member – UIC Drywell Regulation
As far as moving the UIC EPA program to Arizona, I am concerned that we will lose access to obtaining drywell lists that are important to conducting Phase I Environmental Site Assessments. How is ADEQ going to maintain the ADEQ database for Drywells?

ADEQ Response 3:
ADEQ appreciates the comment. Similar to the EPA Online Inventory Form, ADEQ plans to provide online inventorying and reporting for all Class V wells (including drywells) through myDEQ, which is designed to be an easy-to-use, online interface for stakeholders. The existing drywell registrations will be migrated to the myDEQ Class V inventory database. This means both past registrations and future inventories will be accessible to the public. ADEQ is currently developing the UIC program and will take this comment into consideration as development continues. More information on this process will be made public as program development continues.

Comment 4: Injection Well Industry Member – UIC Underground Storage Facility Regulation
We provide professional services to various entities that operate Underground Storage Facilities (USF) that recharge (inject by gravity) treated effluent or potable water into drinking water aquifers in the state. Unless these facilities recharge only CAP water they require an APP. Can you please clarify which USFs, if any, would also require a UIC Class V permit under the proposed ADEQ UIC regulation R18-9-A604(E)(f), or any other provision of the proposed rule?

ADEQ Response 4:
ADEQ appreciates the comment. USFs are considered Class V wells for the purposes of the UIC program (see proposed UIC rule R18-9-A604(E)(1)(f)). All USFs (including facilities that inject only CAP water) are required to inventory with the UIC program pursuant to R18-9-I652. Each individual well requires an inventory.

Comment 5: Local Government – Class V Septic Regulation
AAC R18-9-A604(E)(2) Class V wells do not include: Single-family residential septic system wells or non-residential septic system wells used solely for the disposal of sanitary waste with the capacity to serve fewer than 20 persons a day or a design capacity of less than 3,000 gallons per day.

The proposed language in AAC R18-9-A604(E)(2) above can be interpreted to include all of the following to be within the scope of UIC Class V regulation:

- Any non-residential septic system that comingles industrial or commercial waste with their sanitary waste, regardless of volume.
- Any non-residential septic system receiving sanitary waste serving 20 or more people a day, regardless of volume.

This can include an office building for 20 or more employees (20 gpd x 20 employees = 400 gpd design flow).

This can include facilities open to the public. An example could be a convenience mart with 3 employees a day and a men’s and a women’s bathroom (20 gpd x 3 employees = 60 gpd; 200 gpd x 2 public toilets = 400 gpd; total design flow of 460 gpd).
● This can include theaters, strip malls, park restrooms, arenas, or other businesses discharging only sanitary waste.
● Any non-residential septic system with design capacity 3,000 gpd or more.

Because it states “single-family residential septic system wells or”, it can be assumed the passage after “non-residential septic system wells” applies to the first part as well. It would read “Class V wells do not include: Single-family residential septic system wells used solely for the disposal of sanitary waste with the capacity to serve fewer than 20 persons a day or a design capacity of less than 3,000 gallons per day”. If so, the following would also apply.

● Any single-family residence septic system with a design capacity of 3,000 gallons per day or more.
● Any single-family residence septic system that comingles industrial or commercial waste with their sanitary waste, regardless of volume. This can occur with home businesses.
● Any single-family residence septic system receiving sanitary waste serving 20 or more people a day, regardless of volume. This can occur with home businesses.

ADEQ Response 5:
ADEQ appreciates the comment and recognizes the issues illustrated above. In response, ADEQ has decided to amend A.A.C. R18-9-A604(E)(2). The new language is as follows,

Class V wells do not include single-family residential septic system wells or non-residential septic system wells used solely for the disposal of sanitary waste with a design capacity of less than 3,000 gallons per day.

Eliminating the first of the previously two standards should address the stakeholder’s concerns above. The language removed was “with the capacity to serve fewer than 20 persons a day.”

Taking the amended language above along with all of the classification language in proposed rule R18-9-A604, the following list of wells would be considered Class V wells:

● Non-residential septic systems receiving only sanitary waste with a design capacity of 3,000 gallons per day or more.
● Single-family residential septic systems with a design capacity of 3,000 gallons per day or more.

Taking the amended language above along with all of the classification language in proposed rule R18-9-A604, the following list of wells would not be considered Class V wells:

● Non-residential septic systems that comingle industrial or commercial waste with their sanitary waste.
● Single-family residential septic systems that comingle industrial or commercial waste with their sanitary waste.

Comment 6: Local Government – UIC / APP Septic Regulation Interface
AAC R18-9-A604(E)(2) does not directly correlate with the Aquifer Protection General Permits, Type 4.23. APP Type 4.23 General Permits include cumulative flows on a property. This means it could be one septic system or multiple septic systems on the property. Nowhere in the UIC proposed regulations does it suggest that one consider the flow for the entire site or multiple septic systems for application of the UIC regulations when considering design capacity of 3000 gpd or more. One could avoid this regulation by installing multiple smaller septic systems that serve only sanitary waste with design capacities of less than 3000 gpd for each one. This would allow for example six 2500 gpd septic systems to be placed on a property without classifying as a Class V Injection Well.

ADEQ Response 6:
ADEQ appreciates the comment. For the purpose of calculating design flow for an APP Type 4.23 General Permit, all septic systems on a property are counted cumulatively. Therefore, an RV Park with three 1,100 gallon per day septic systems (totaling 3,300 gallons per day in cumulative design flow) would require an APP Type 4.23 General Permit. However, the UIC program takes the opposite approach for the purpose of determining applicability to Class V regulation. Under the UIC program, each septic system’s design flow (even if on the same property) is viewed independently of the other. Therefore, due to AAC R18-9-A604(E)(2) requirement of 3,000 gallons per day or more for Class V applicability, each of the 1,100 gallon per day septic systems in the hypothetical above would not be applicable to the UIC program. Taking the regulation of both the APP and UIC programs together, the six 2500 gallon per day septic systems from the commenter’s example above would not be applicable to UIC Class V regulation (not counted cumulatively), but would be applicable to APP General Permit regulation (counted cumulatively). ADEQ drafted the rules here carefully in order to make sure any septic systems with design flows below 3,000 gallons per day would be subject to the APP program and septic systems with design flows at or
above 3,000 gallons per day would be subject to, at least, the UIC Class V regulation. However, it should be noted that onsite wastewater treatment facilities of a cumulative design flow of between 3,000 and 24,000 gallons per day are subject to an APP General Permit (see A.A.C. R18-9-E323). If the facility is singular and falls between 3,000 and 24,000 gallons per day in design flow, then the UIC Class V regulation would apply in addition to the APP regulation.

**Comment 7: Local Government – Class V Septic Regulation**

**AAC R18-9-A604(E)(1)(i) - Class V wells include but are not limited to septic system wells used to inject the waste or effluent from a multiple dwelling, business establishment, community or regional business establishment septic tank.**

This section suggests that regardless of flow volume or flow type (sanitary, commercial, or industrial), multiple family and business septic systems are Class V Injection Wells.

ADEQ Response 7:
ADEQ appreciates the comment. It should be noted that the proposed rules are based on the Federal analog. This is dictated by the fact that EPA requires ADEQ’s rules to be at least as stringent as the Federal rule. Also, Arizona law dictates that the regulations be no more stringent than the corresponding Federal rule (see A.R.S. § 49-104(16)).

With that said, ADEQ understands UIC Class V regulation to include septic system wells used to inject effluent from a multiple dwelling, business establishment, community or regional business establishment septic tank, regardless of flow volume. Flow volume is considered only for single-family residential septic system wells or non-residential septic system wells used solely for the disposal of sanitary waste with a design capacity of less than 3,000 gallons per day. In other words, R18-9-A604(E)(2) is carved out of the broader, R18-9-A604(E)(1)(i). For example, a non-residential small business building septic system would initially be applicable to UIC Class V regulation. However, the same septic system w/a design flow below 3,000 gallons per day would fall out of UIC Class V applicability under R18-9-A604(E)(2).

**Comment 8: Local Government – UIC Class V / APP Regulation Interface**

Concerning UIC Class V regulation at AAC R18-9-A604(E)(1), air conditioning return flows, storm wells, and some of the other identified inclusions may include APP Type 1 and Type 2 General Permits or other permits within the AAC.

ADEQ Response 8:
ADEQ appreciates the comment. Per A.R.S. § 49-250(B)(26), UIC Class V is the only UIC well class in which wells are additionally subject to the APP program. This statute preserves ADEQ’s robust APP program while taking into consideration that UIC Class V regulation requires (almost always) only an inventory instead of a permit. However, it should be noted that under proposed UIC rule R18-9-I651, the Director has the authority to require a permit of a Class V well that was previously subject to an “authorization by rule”. Even in this rare situation, the language proposed in R18-9-103(6) would exempt a Class V well which has been issued a UIC permit from APP applicability. The statute and rule language relevant to this question was designed to eliminate duplicative permitting.

**Comment 9: Local Government – Cesspools**

**AAC R18-9-A604(E)(1)(b) - Class V wells include but are not limited to cesspools including multiple dwelling, community or regional cesspools, or other devices that receive wastes which have an open bottom and sometimes have perforated sides. The UIC requirements do not apply to single family residential cesspools nor to non-residential cesspools which receive solely sanitary wastes and have the capacity to serve fewer than 20 persons a day.**

Cesspools are prohibited by AAC R18-9-A309(A)(4).

ADEQ Response 9:
ADEQ appreciates the comment. The rule cited by the stakeholder above applies to the APP program, not the UIC program. However, proposed UIC rule R18-9-I654 likewise prohibits cesspools from the UIC program. The rule cited by the stakeholder above characterizes the wells. Therefore, UIC Class V regulation does apply to cesspools, amongst other injection wells. However, R18-9-I654 prohibits them nonetheless.

**Comment 10: Local Government – Aquifer Storage Recharge Wells**

We recommend allowing Class V wells authorized by rule to be exempt from requiring an individual APP if the source water injected into the aquifer is already regulated by an AZPDES/NPDES permit, or the SDWA. We feel it too burdensome on the utility to also obtain APP coverage for ASR wells when the source water being injected into the aquifer is already regulated by existing rules or regulations. This would align with the UIC program exempting Class V wells having individual UIC permit coverage exempt from
requiring an APP permit to avoid duplicative permitting. The EPA UIC program allows Class V wells to be authorized by rule if both the owner or operator submits the well information and the well injection does not endanger a USDW. If being authorized by rule is indicative that the injectate will not endanger the USDW, we recommend the establishment of a regulatory avenue for owners and operators to further demonstrate that their injectate will not endanger the USDW and allow an exemption from the individual APP requirement. If the UIC program standards are based on the National Primary Drinking Water Standards like the State’s APP program then in cases where the injectate is potable water then a process to submit for exemption would be preferred rather than having to obtain another permit.

ADEQ Response 10:
ADEQ appreciates the comment. ASR facilities are applicable to UIC, but exempt from APP under A.R.S. § 49-250(B)(12), (13), (14) or (24), unless the facility is using reclaimed water. Under the UIC program ASRs are considered Class V wells, which require an inventory to become authorized by rule. The AZPDES Program (per ARS 49-255.01) regulates discharges to surface water bodies under the Clean Water Act, which does not align with the requirements of the UIC Program (under the SDWA) or APP that explicitly regulates discharges to groundwater. Additionally, the surface water quality standards under the AZPDES Program at Title 18, Chapter 11 of the A.A.C. differ from the Aquifer Water Quality Standards which are used in the APP Program (see A.A.C. R18-11-406).

Comment 11: Resource Extraction Industry Member – Class VI Primacy Authority
Are legislative changes required in order to apply for Class VI primacy?

ADEQ Response 11:
ADEQ appreciates the comment. Legislative changes are not required. Arizona Revised Statute 49-203(A)(6) and 49-257.01 gives ADEQ authority to pursue all injection well classes under the UIC program, including Class VI.

Comment 12: Local Government – Applicable Standards
Will National Primary Drinking Water Regulations take priority over existing Aquifer Water Quality Standards, where they pertain to underground injection activities?

ADEQ Response 12:
ADEQ appreciates the comment. All UIC facilities must protect to the primary MCL’s. The Aquifer Protection Program will continue to use the Aquifer Water Quality Standards.

Comment 13: Local Government – Underground Storage Facility / Central Arizona Project
Will an Underground Storage Facility (USF) permitted by ADWR, using water other than effluent, need an APP permit under the UIC program? Unless it is Central Arizona Project (CAP) water?

ADEQ Response 13:
ADEQ appreciates the comment. Generally, USF facilities are exempt from APP under A.R.S. § 49-250(B)(12), (13), (14) or (24), unless injecting reclaimed water. The proposed UIC rule at R18-9-A604(E)(1)(f) lists “[r]echarge wells used to replenish water in an aquifer…” as a part of the scope of UIC Class V authorized by rule regulation. This descriptor encompasses USF facilities. In plain terms, USF facilities are subject to UIC Class V regulation which requires an inventory under proposed rule R18-9-1652.

Specifically, USFs permitted by ADWR under A.R.S. title 45, chapter 3.1 and using water other than reclaimed water are exempt from APP under A.R.S. § 49-250(B)(12), but are applicable to UIC Class V authorization by rule regulation under proposed rule R18-9-A604(E)(1)(f). USFs permitted by ADWR under A.R.S. title 45, chapter 3.1, article 6 and using CAP water are exempt from APP under A.R.S. § 49-250(B)(13), but are applicable to UIC Class V authorization by rule regulation under proposed rule R18-9-A604(E)(1)(f).

ADEQ would be happy to meet with any potential applicants to ensure they comply with all applicable environmental programs.

Comment 14: Local Government – Aquifer Storage Recharge Wells
Are dry and Aquifer Storage Recharge (ASR) wells considered class V wells, authorized by rule, for the purposes of the UIC program? Do such wells need to get an individual permit under the UIC program?

ADEQ Response 14:
ADEQ appreciates the comment. Both drywells and ASR wells are subject to UIC Class V regulation, authorized by rule. Generally, ASR facilities are exempt from APP under A.R.S. § 49-250(B)(12), (13), (14) or (24), unless injecting reclaimed water. ADEQ would be happy to meet with any potential applicants to ensure they comply with all applicable environmental programs.
Comment 15: Local Government
Our ASR wells have USF permits issued by ADWR. These will now require an individual APP under the UIC program, correct? So, these wells will have a USF permit, APP permit and UIC inventory required by rule?

ADEQ Response 15:
ADEQ appreciates the comment. ASR wells will not be required to apply for an individual APP under the UIC program. The APP and UIC programs are separate regulatory programs. Both currently (under the EPA administration) and upon primacy (prospective ADEQ administration), ASR wells in Arizona must:
- inventory under the UIC Class V program (authorized by rule), and
- have an Underground Storage Facility permit.

Also, ASRs may be applicable to APP, depending on whether the operation is exempt from APP under A.R.S. § 49-250(B)(12), (13), (14) or (24). For example, if an ASR well is injecting CAP water, then it is exempt from the APP program per ARS 49-250(B)(13) unless the storage water is blended with reclaimed water. Also of not, Class V wells (other than ASR and geothermal wells) are likely not subject to the APP program.

Comment 16: Law Firm – Tribal Lands
Does EPA retain authority to issue UIC permits on tribal lands?

ADEQ Response 16:
ADEQ appreciates the comment. Arizona’s UIC primacy authority will not extend to tribal lands within the state. UIC authority on tribal lands resides with the tribal nation or community (if that tribal nation or community has primacy) or is retained by the EPA otherwise.

Comment 17: Law Firm – Definition of Permit
The federal UIC program's definition of "permit" specifically states that the term does not include Class V wells authorized by rule,

40 CFR 144.3
"Permit means an authorization, license, or equivalent control document issued by EPA or an approved State to implement the requirements of this part, parts 145, 146 and 124. 'Permit' includes an area permit (§ 144.33) and an emergency permit (§ 144.34). Permit does not include UIC authorization by rule (§ 144.21), or any permit which has not yet been the subject of final agency action, such as a 'draft permit.'"

ADEQ's proposed definition does not include this language. Is there a reason for that (i.e., does ADEQ intend any different interpretation of the term "permit")?

R18-9-A601(48)
"'Permit' means an authorization issued by the Director pursuant to this Article, including an area permit under R18-9-C624 and an emergency permit under R18-9-C625."

ADEQ Response 17:
ADEQ appreciates the comment. A.R.S. § 49-201(32) provides the statutory definition for programs authorized within Title 49, Chapter 2 of the Arizona Revised Statutes, unless the context otherwise requires. Article 3.3 of Title 49, Chapter 2 contains the authority to establish a UIC permit program. Therefore, A.R.S. § 49-201(32) applies to the UIC program unless otherwise stated.

A.R.S. § 49-201(32)
"'Permit' means a written authorization issued by the director or prescribed by this chapter or in a rule adopted under this chapter stating the conditions and restrictions governing a discharge or governing the construction, operation or modification of a facility..."

A.A.C. R18-9-A601(48) was crafted to conform with A.R.S. § 49-201(32). ADEQ did not intend a different interpretation of the definition of permit for the purposes of the UIC program than that of the Federal analog at 40 CFR 144.3. In response to this comment, ADEQ has adjusted the language to better conform with 40 CFR 144.3 for the final rule.

R18-9-A601(48)
"Permit" means an authorization issued by the Director pursuant to this Article. ‘Permit’ includes an area permit under R18-9-C624 and an emergency permit under R18-9-C625. ‘Permit’ does not include UIC authorization by rule or any permit which has not yet been subject to a final permit decision, such as a ‘draft permit.’"

Comment 18: Government Agency – Regulatory Differences
The following proposed regulations differ from the federal UIC regulations at 40 CFR Parts 124, 144, and 146:
R18-9-A601.37 (Definitions)
R18-9-A603.A (Confidentiality of Information)
R19-9-C616 (Individual Permits; Application for Individual Permits)
R18-9-C620.D (Public Notice of Permit Actions and Public Comment Period)
R18-9-C622 (Public Hearing)
R18-9-C631.B (Modification; Revocation and Reissuance; or Termination of Permits
R18-9-D635.17.b. (Conditions Applicable to All Permits)
R18-9-D636.A.1 (Establishing Permit Conditions)

The entity suggests that ADEQ review the proposed regulations identified above and revise as necessary to ensure that the program is at least as stringent as the federal UIC program.

ADEQ Response 18:
ADEQ appreciates the comment.

R18-9-A601(37) (Definitions)
Proposed rule R18-9-A601(37) is the definition of “hazardous waste”, in which language differs from the analogous federal definition at 40 CFR 261.3. Despite the difference in language, the proposed rule incorporates the Federal rule by reference in the following manner; R18-9-A601(37) incorporates A.R.S. § 49-921(5) by reference, which incorporates “…any waste identified as hazardous pursuant to section 49-922…” by reference, which incorporates A.A.C. R18-8-261(A) by reference, which incorporates “…[a]ll of 40 CFR 261…” by reference. Therefore, despite the difference in language between R18-9-A601(37) and 40 CFR 261.3, the proposed rule is exactly as stringent as its federal analog due to its incorporation by reference.

R18-9-A603(A) (Confidentiality of Information)
40 CFR 145.11(a) lists the required permitting language a state program must have legal authority to implement in their rule in order for EPA to consider their application for primacy. 40 CFR 145.11(a)(1) requires the Federal language from 40 CFR 144.5(b), but not subsection (a), to be used in a state rule concerning confidential information. Arizona UIC proposed rule, R18-9-A603(B) contains language identical to 40 CFR 144.5(b) while deliberately missing language from 40 CFR 144.5(a). Therefore, even though the language in R18-9-A603(A) differs from 40 CFR 144.5, the fact that the language from 40 CFR 144.5(b) is included in R18-9-A603(B) suffices. Also, R18-9-A603(A) is crafted to meet the state confidentiality requirements in A.R.S. § 49-205.

R18-9-C616 (Individual Permits; Application for Individual Permits)
40 CFR 144.31(d) is the federal rule for application for a permit or authorization by permit. Subsection (d) of 40 CFR 144.31 is entitled “completeness”. This subsection is not included in the proposed Arizona UIC rule analog at R18-9-C616 because application completeness is prescribed elsewhere in the Arizona Administrative Code. Due to the requirements in statute for Arizona agencies who issue licenses to develop licensing time frames (LTF), ADEQ already has an application completeness review rule that would be applicable to the UIC program upon primacy in place (see A.A.C. R18-1-503(A)). 40 CFR 144.31(d) was not included in the proposed UIC rule for this purpose.

R18-9-C620(D) (Public Notice of Permit Actions and Public Comment Period)
40 CFR 124.10(c)(1) is the federal rule for recipients of a public notice. Arizona’s UIC rule analog at R18-9-C620(D) does not use the federal rule language verbatim. However, 40 CFR 124.10(c)(1)(viii) & (x) are covered under R18-9-C620(D)(1)(b). Also, 40 CFR 124.10(c)(1)(ix)(B) & (C) are covered under the new R18-9-C620(D)(1) list item, C620(D)(1)(e). R18-9-C620(D)(1)(e) was added to meet stringency between the proposed rule submitted and the final rule.

R18-9-C622 (Public Hearing)
40 CFR 124.12 is the federal rule for public hearings. Arizona’s proposed UIC rule analog at R18-9-C622 did not use the federal rule language verbatim. A
subsection (E) has been added in order to meet stringency requirements for 40 CFR 124.12(d).

R18-9-C631(B)  
(Modification; Revocation and Reissue; or Termination of Permits)
40 CFR 124.5 is the federal rule for modification, revocation and reissuance, or termination of permits. Arizona’s proposed UIC rule analog at R18-9-C631 does not use the federal rule language verbatim. The language in R18-9-C631(B) was designed to accommodate a stakeholder’s request to be issued a notice of intent to deny when the Director denies a request for a modification or revocation and reissuance. While this language is not mirrored in the federal analog, its inclusion in the proposed UIC rule does not make the rule more or less stringent. The language creates a reasonable right for an applicant whose request for a modification or revocation and reissuance has been denied by the Director.

R18-9-D635(17)(b)  
(Conditions Applicable to All Permits)
A stakeholder made ADEQ aware of a pair of incorrect references in R18-9-D635(17)(b). Specifically, in the first sentence, the reference to R18-9-B614 should have been to R18-9-B613. In the third sentence, the reference to R18-9-B613 should have been R18-9-B614. Both corrections have been made in the final rule and are otherwise the same as the analogous Federal rule.

R18-9-D636(A)(1)  
(Establishing Permit Conditions)
A stakeholder made ADEQ aware of an incorrect reference in R18-9-D636(A)(1). Specifically, in the fifth sentence, the reference to R18-9-B634 should have been to R18-9-B633. The correction has been made in the final rule and are otherwise the same as the analogous Federal rule.

Comment 19: Interest Group
We understand that ADEQ intends to adopt administration of the USEPA’s UIC program. Because this is a State implementation of a Federal program, the State’s implementation requires compliance with Federal laws and regulations, including consideration of the effects on historic properties afforded under Section 106 of the National Historic Preservation Act as implemented in 36 C.F.R. Part 800. Compliance with the State’s equivalent statute, the Arizona State Historic Preservation Act (A.R.S. 41-861 to 865) would be a reasonable implementation of the intent of Federal law and regulation.

We applaud ADEQ for including the provision of notification of permit actions to the Arizona State Historic Preservation Officer (SHPO) (R18-9-C620.D.1.c), which adequately complies with A.R.S. 41-864 (Review of agency plans), however the proposed rulemaking is not consistent with A.R.S. 41-862 and A.R.S. 41-863, which also would require ADEQ to locate and inventory historic properties affected by agency actions and initiate measures to ensure that historic properties are avoided or mitigated prior to being affected by the state action. We request that the proposed rules be amended to require the permittee to retain a cultural resources (archaeological) consultant to inventory the proposed permit area and submit a report of findings to the SHPO, and that the SHPO be afforded an opportunity to review and respond prior to ADEQ approval of the permit.

ADEQ Response 19:
ADEQ appreciates the comment. ADEQ is required by statute at A.R.S. §§ 49-203(A)(6) and 49-257.01 to adopt, by rule, the Safe Drinking Water Act’s Underground Injection Control permit program. The process of transferring administrative authority from EPA to a state is known as primary enforcement authority or primacy. Despite the fact that, upon primacy, ADEQ would administer a program that has its origin in Federal law, ADEQ’s permitting actions in administering the UIC program thereafter would not be considered a “federal action”. Many Federal laws and regulations are applicable only when a “federal action” is taken, as is the case with Section 106 of the National Historic Preservation Act as implemented in 36 C.F.R. Part 800 (see 40 CFR 800.1(a)).

Concerning the State Historic Preservation Act, A.R.S. § 41-863 requires each state agency to, “...initiate measures, in consultation with the state historic preservation officer, to assure that if, as a result of state action or assistance given by the agency, historic property is to be substantially altered or demolished, timely steps are taken to make appropriate documentary recordation in accordance with standards which the state historic preservation officer establishes...”
The notice provided to SHPO at R18-9-C620(D)(1)(c) fulfills the obligation to “initiate measures” in A.R.S. § 41-863. Providing such a notice allows SHPO to review a draft permit and determine whether the proposed state action would substantially alter or demolish historic property. If the proposed state action is determined to be an issue, SHPO and ADEQ would consult and develop the appropriate steps necessary to comply with the documentary recordation requirement.

In addition, ADEQ has added a required application component at R18-9-C616(D)(9) and R18-9-J657(B)(21) that reads as follows,

R18-9-C616(D)(9)

“All applicants ... shall provide the following information to the Director, using the application form provided by the Director ... [a] listing of any historic property or potential historic property as defined by R12-8-301.”

R18-9-J657(B)(21)

“Prior to the issuance of a permit for the construction of a new Class VI well ... the Director shall consider the following ... [a] listing of any historic property or potential historic property as defined by R12-8-301.”

ADEQ will consult with SHPO if historic property is identified by the applicant or by SHPO.

Comment 20: Tribal Interest Group
ADEQ must engage in direct government-to-government Tribal consultation with all Arizona Tribes since the proposed UIC program will likely have different and specific impacts on the treaty rights, water resources and traditional, religious, and cultural practices of each tribal nation or community depending on their unique circumstances.

ADEQ Response 20:
ADEQ appreciates the comment. The Agency agrees and is willing to engage in Tribal consultation as requested by each Tribal Nation or Community. ADEQ’s Tribal Consultation Policy outlines the actions that the Agency will take to engage with Tribal Nations and commits to collaborating with each Tribe to develop a consultation procedure that will meet its unique needs:

http://www.azdeq.gov/substantivepolicy?page=0%2C0

When ADEQ began pursuing primacy, the agency notified all 22 federally recognized Tribal Nations or Communities about our efforts, offering Tribal consultation. ADEQ held three tribal listening sessions to discuss the UIC program and the agency’s primacy efforts on May 10, 14 and 16th of 2019. The agency also informed at least 7 Tribal leaders about the UIC primacy efforts during other in-person Tribal consultations. Since then, ADEQ has responded to a number of inquiries from Arizona tribes concerning primacy of the UIC program, including the Ak-Chin Indian Community, San Carlos Apache Tribe and the Yavapai-Prescott Indian Tribe, among others.

ADEQ’s proposed rule at R18-9-C620(D)(1)(b) requires the Department to provide public notice to any affected tribal agency or council of government when a draft permit has been prepared or when a hearing has been scheduled. As ADEQ understands ancestral lands to be widespread throughout Arizona, ADEQ plans to implement R18-9-C620(D)(1)(b) by sending each public notice out to all 22 Federally-recognized Tribal Nations or Communities.

ADEQ has also developed a “Permits in Process” (PIP) online web page where the public can view water quality permit applications and their status in application review and permit development in real time. ADEQ anticipates adding the UIC program to the PIP web page.

Lastly, when EPA authorizes ADEQ’s Underground Injection Control program, the program will not apply on tribal land. ADEQ’s UIC program would apply only on lands under the jurisdiction of the State of Arizona.

Comment 21: Tribal Interest Group
The proposed UIC program rules lack needed requirements for engagement and coordination with tribes, the State Historic Preservation Office, and wildlife managers. R18-9-C620(A), R18-9-C620(D)(1)(b) & R18-9-C620(D)(1)(c) represent the extent of relevant notice requirements.

ADEQ Response 21:
ADEQ appreciates the comment. Please see response 20 for reference.

Comment 22: Tribal Interest Group
Waiting until after ADEQ and an applicant have fully negotiated the terms of a UIC permit – which is a process that can take some time – to provide notice to affected Tribes, the SHPO, jurisdictions, and affected wildlife managers deprives ADEQ of real time information that might be in the possession of Tribes, SHPO, jurisdictions, and wildlife managers regarding (1) existing conditions that might be relevant to
ADEQ’s consideration of the application and its development of the draft permit; (2) potential adverse impacts that the issuance of a UIC permit might have on cultural resources, the affected environment, wildlife, and the water resources. Certainly, relevant information known to Tribes, the SHPO, local jurisdictions, and wildlife managers should be considered before the draft UIC permit is negotiated and drafted, not after.

ADEQ Response 22:
ADEQ appreciates the comment. Please see response 20 for reference.

Comment 23: Tribal Interest Group
The proposed rules are completely silent as to how ADEQ intends to determine which Tribal governments are or will be “affected” by the issuance of the proposed UIC permit.

ADEQ Response 23:
ADEQ appreciates the comment and understands ancestral lands to be widespread throughout Arizona. With that in mind, ADEQ plans to implement R18-9-C620(D)(1)(b) by sending each public notice out to all 22 Federally-recognized Tribal Nations or Communities.

Comment 24: Tribal Interest Group
An appropriate Tribal Consultation Policy would be the first step towards setting forth a clear standard for how ADEQ might work with Tribes to identify geographic and other areas of interest in Arizona, where the issuance of permits, like a UIC permit, could correspondingly “affect” the interests of a Tribe. Such a policy could also assist ADEQ in its engagement efforts with the SHPO.

ADEQ Response 24:
ADEQ appreciates the comment. Please see responses 20 and 44 for reference.

Comment 25: Tribal Interest Group
Requiring that Tribal notice take place only after both events at R18-9-C620(A) have occurred – and the proverbial “what’s done has been done” – and not before, simply treats affected tribal governments like other interested members of the public and ignores the sovereign nature of Tribes and the government-to-government relationship between Arizona’s 22 federally recognized Tribes and ADEQ as an agency of the State of Arizona. This is inappropriate.

ADEQ Response 25:
ADEQ appreciates the comment. Please see responses 20 and 44 for reference.

Comment 26: Tribal Interest Group
SHPO is only mentioned at one point in the proposed rulemaking, that is, in the requirement for “public notice” found in R18-9-C620(D)(1)(c). Indeed, ADEQ has no obligation under the proposed rule to coordinate with the SHPO at any point during its application and permit review process to ensure that the UIC permit will comply with Arizona’s historic preservation laws. This is in stark contrast to ADEQ’s UIC Program Outline, which boldly promises that the SHPO “would be involved in reviewing applications that indicate a threat to historic or archaeological sites.” At minimum, this promise should be reflected in the final rulemaking.

ADEQ Response 26:
ADEQ appreciates the comment. Please see responses 19 & 20 above for reference.

Comment 27: Tribal Interest Group
The transfer of UIC Primacy to the State of Arizona could sever the federal nexus for numerous environmental and cultural resource laws that Arizona Tribes rely upon to ensure that Tribal interests and concerns are considered, and Tribal resources are protected. EPA Primacy can sever the United States’ trust responsibility to Indian tribes, limit the application of Executive Order No. 13175 and related consultation authorities, remove important requirements under Section 106 of the National Historic Preservation Act (NHPA) – including with regard to the resolution of adverse effects, and limit or cut off obligations under the National Environmental Policy Act (NEPA), and the Endangered Species Act (ESA). This is a matter of particular concern in Arizona, since the state of Arizona does not have any laws (or state programs) that are remotely comparable to Section 106 of the NHPA, NEPA or ESA. Even Arizona’s existing historic preservation laws are limited at best, since they do not include an adequate review process, do not require the resolution of adverse effects, and do not provide the SHPO with authority comparable to the authority of the Advisory Council on Historic Preservation.

ADEQ Response 27:
ADEQ appreciates the comment. NEPA, ESA, NHPA, and the other federal statutes impose procedural requirements on actions taken by federal agencies. The procedural requirements do not apply to state actions if there is no federal involvement (such as federal funding). Substantive requirements of the ESA
still apply, including the requirements of permittees (i.e. Section 9 of the ESA prohibits take of threatened and endangered species; the prohibition is not limited to federal agencies). Generally, please see responses 19 and 20 above for reference.

Concerning NEPA, 40 C.F.R. § 124.9(b)(6) provides in pertinent part that,

“all RCRA, UIC and PSD permits are not subject to the environmental impact statement provisions of section 102(2)(C) of the National Environmental Policy Act. 42 U.S.C. 4321.”

This regulation was adopted in response to case law holding that the UIC permitting process is functionally equivalent to NEPA's environmental impact statement requirements.

Comment 28: Tribal Interest Group
Regarding ESA compliance, the ADEQ UIC Program Outline also asserts that “State UIC permittees would have to comply with the ESA” and that “the Arizona UIC program has developed procedures in its permit process to adhere to the duties required in this law.” UIC Program Outline at 7. This promise is also not reflected in the proposed rulemaking.

ADEQ Response 28:
ADEQ appreciates the comment. Please see response 27 for reference.

Comment 29: Tribal Interest Group
The proposed Licensing Time Frame rules do not explain what is meant by “significantly complicated” versus “not significantly complicated” or how this determination was reached.

ADEQ Response 29:
ADEQ appreciates the comment. The UIC program regulates six classes of injection wells which are based on the characteristics of the fluids injected and the placement of the injectate in relation to Underground Sources of Drinking Water (USDW). Well construction, injection depth, design requirements, and operating techniques vary among well classes. Some wells are used to inject fluids into formations below USDWs, while others involve injection into or above USDWs. The proposed rules set out specific permitting and performance standards for each class of wells. In determining the licensing time frames for the prospective UIC applications, these factors were considered.

ADEQ categorized the prospective UIC applications by class into two categories, “significantly complicated” and “not significantly complicated”. Area, Class I, and Class VI wells are categorized as “significantly complicated”, while Class II, Class III, and Class V were determined to be “not significantly complicated”. The following facts were relied upon in distinguishing “significantly complicated” prospective UIC applications from the “not significantly complicated”:

1. Area Permits
   a. Comprised of multiple injection wells.
   b. Increased aquifer stresses induced by multiple injection wells.
   c. Delineation of the Area of Review and zone of endangering influence due to the induced aquifer stress.
   d. Area Class III solution mining wells require hydraulic capture of lixiviant and pregnant leachate solution to prevent migration into USDWs.
   e. Monitoring networks are often a function of the Area of Review and complexity of the hydrogeology.
   f. Class III Area Permits may require an Aquifer Exemption and subsequent aquifer restoration for closure. This closure strategy will require sophisticated geochemical modeling and long-term closure and post closure monitoring.

2. Class I wells are typically deep wells that inject waste into formations below a USDW.
   a. Class I wells allow injection far below the lowermost USDW (injection zones typically range from 1,700 to more than 10,000 feet in depth).
   b. The well design for injection is complex due to the depth of the injection, high injection pressures, and often complex geochemical reactions associated with the injectate and formation water.
   c. In Arizona, Class I wells are authorized to inject non-hazardous industrial waste, municipal wastewater, and radioactive waste. Hazardous waste injection is prohibited in Arizona.
   d. A Class I well requires a multilayered well design to prevent fluids from entering USDWs.
d. Operation, monitoring, and testing is critical for ensuring that injected wastewater is fully confined. These functions become more complex at greater well depths.

e. Seismic hazards must be thoroughly evaluated due to the deeper injection zone.

2. Class VI wells are used to sequester carbon in deep geologic formations.

a. Although CO2 is initially captured as a gas, it is compressed into a supercritical fluid (a relatively dense fluid intermediate to a gas and a liquid) before injection and remains in that state due to high pressures in the underground formation.

b. The CO2 is injected through specially designed wells into geologic formations, typically a half a mile or more below the Earth's surface.

c. CO2 can be physically trapped in the pore space, trapped through a chemical reaction of the CO2 with rock and water, dissolved into the existing fluid within the formation, or absorbed onto organic material or go through other chemical transformations. Geologic sequestration may take place over hundreds of years after injection, ultimately resulting in permanent storage of the CO2.

d. Mechanical integrity testing must be performed routinely to verify long-term well stability and operations.

e. Complex reservoir modeling must be conducted to determine the long-term storage capacity of a given geologic formation.

f. Groundwater monitoring can also be complex due to the longevity of the sequestration operations and area of influence of the injectate.

Comment 30: Tribal Interest Group
Arizona law requires strict compliance with LTFs and issues penalties for exceedances. Additionally, EPA's current guidance (see EPA's informational webpage on Class V wells; see also 40 C.F.R. § 146.5(e); see also 40 C.F.R. 144.81) notes that by regulation, Class V wells can actually be complex under certain circumstances. This should be reflected in ADEQ’s UIC Program as well.

ADEQ Response 30:
ADEQ appreciates the comment. Arizona law requires state agencies that issue licenses to comply with licensing time frames (LTFs) (see A.R.S. § 41-1072 et seq.). While there may be complex Class V permits, ADEQ does not feel the additional time that comes with the "complex" category is needed.

Comment 31: Tribal Interest Group
The proposed rules fail to describe the criteria for determining which permit applications would and would not warrant a public hearing for any UIC permit. This is a critical component of the program for stakeholders, permit holders, and the public to understand. This is separate from the provision allowing for the public to request a hearing at a later date, if there is "a significant degree of public interest" (see R18-9-C622).

ADEQ Response 31:
ADEQ appreciates the comment. UIC proposed rule R18-9-C622 provides the requirements of a UIC program public hearing. R18-9-C622 closely follows the federal UIC program rule at 40 CFR 124.12. Subsections A and B of R18-9-C622 require the Director to hold a public hearing whenever they find, on the basis of a request, a significant degree of public interest in a draft permit(s). Furthermore, the rule allows the Director to hold a public hearing at their discretion such as when a hearing might clarify one or more issues involved in the permit decision. Subsection A gives the Director discretion as to when a significant degree of public interest exists based on a public hearing request. ADEQ does not believe further criteria in determining whether a public hearing is necessary or not is needed.

Comment 32: Tribal Interest Group
ADEQ has stated that it intends for the UIC Program to be almost entirely funded through collected permit fees. For many years, ADEQ has suffered from deficient state funding. ADEQ should not be pursuing UIC Program primacy without asking for sufficient funding from the Arizona Legislature. This is critical, as sufficient funding and adequate ADEQ workforce expertise must be present for ADEQ to fulfill its obligations under this Program, as well as its obligations to Arizona tribes.

ADEQ Response 32:
ADEQ appreciates the comment. The Arizona UIC program is proposed to operate on a fee-for-service model that derives funding from diverse sources of revenue, which includes fixed annual fees, well installation fees, an hourly fee for application and technical review, and an annual work grant from EPA. The Annual Fees (listed in the UIC Licensing Time Frame proposed rules at Tables 3.1 and 3.2, R18-14-104) and the UIC Flat Fees (listed in proposed rule R18-14-111) were determined by considering the necessary revenue needed to support the administration of the program. Projected revenue will be augmented by an increase in the hourly rate for a UIC water quality protection service associated with a UIC permit, which has been set at $145 an hour in proposed rule R18-14-102(B). Furthermore, ADEQ has proposed in the Fee rulemaking the periodic review of the revenues collected from the UIC program every three years (see proposed rule R18-14-115). The reviews will ensure that enough revenue is being collected to properly administer the program. The reviews will also ensure that the fees are equitable and not overly burdensome to the stakeholders.

Comment 33: Tribal Interest Group
The rulemakings analysis of economic, small business, and consumer impacts (p.18) focuses heavily on alleviating financial burdens to stakeholders. While this may be an important aspect of an ADEQ UIC Program, ADEQ must also consider its obligations to protect the public health and the environment, and the economic costs of failing to do so, which can be catastrophic.

ADEQ Response 33:
ADEQ appreciates the comment. While alleviating financial burdens to stakeholders is an important attribute of primacy over the UIC program, ADEQ’s mission to protect human health and the environment remains priority number one. The UIC program is a robust regulatory program that compliments Arizona’s Aquifer Protection Permit program in its focus on injection wells.

Comment 34: Tribal Interest Group - Class V Wells / APP
Through the UIC Program, ADEQ proposes to regulate several types of injection wells across the state of Arizona (Class I through Class VI). Of these, ADEQ notes there are reportedly “many tens of thousands” of Class V injections in Arizona (a closer approximation was not provided). The rulemaking acknowledges further that most of these Class V wells “are used to dispose of wastes into or above” underground sources of drinking water. Indeed, ADEQ acknowledges that “[m]any” of these Class V wells require an Aquifer Protection Permit (APP). However, ADEQ intends to no longer require APP permits if a UIC permit has been issued.

ADEQ Response 34:
ADEQ appreciates the comment. A.R.S. § 49-250(B)(26) exempts all injection wells from the APP program if the facility has been issued an UIC permit. UIC Class V wells are not issued permits under normal circumstances. Such wells are “authorized by rule” under R18-9-I650 et seq. This means that a Class V well will not be exempt from the Aquifer Protection Program. Class V wells “authorized by rule” must inventory under R18-9-I652 and follow a set of criteria to become and remain authorized. These Class V wells are also subject to the APP program, if the well type is applicable. For example, APP regulates specific drywells that are special or pose a significant threat to groundwater (draining hazardous substance loading areas, tracer studies and draining a motor fueling area) (see R18-9-C301, R18-9-C303 and R18-9-C304). These drywells would also require authorization by rule under UIC.

Comment 35: Tribal Interest Group - APP vs. UIC
The UIC Program requires injected fluids to stay within a well or injection zone, and prohibits injection activity “that allows” movement of fluid containing any contaminant into an underground source of drinking water, if it may cause a violation (see proposed R18-9-B608). A complex formula is then proposed with certain assumptions for computing a zone of endangering influence (see proposed R18-9-B612). However, Arizona’s APP program goes further than this and provides an additional layer of coverage over underground water resources by addressing discharge more broadly (defined at A.R.S. § 49-201(12) as “the direct or indirect addition of any pollutant to the waters of the state from a facility. For purposes of the aquifer protection permit program prescribed by article 3 of this chapter, discharge means the addition of a pollutant from a facility either directly to an aquifer or to the land surface or the vadose zone in such a manner that there is a reasonable probability that the pollutant will reach an aquifer.” The UIC Program, as proposed, does not appear to contemplate the possibility of indirect contamination, or require consideration of the reasonable probability that a pollutant will reach an aquifer. Removal of the APP requirement from UIC activities without incorporating the protections provided by APP into the program does not remove duplicate regulations, as ADEQ suggests. Given the high number of Class V wells already located across Arizona that would be affected by this rule change, it reduces protections to Arizona’s precious
underground waters and has the potential to impact Tribal water sources and harm the cultural resources and ancestral lands of Arizona tribes.

ADEQ Response 35:
ADEQ appreciates the comment. ADEQ’s efforts to obtain primacy over the UIC program does not include revising the UIC program. ADEQ’s statutory authority is to obtain primacy without being more stringent than the federal program. Therefore, concerns about the UIC program considering indirect contamination are not applicable to obtaining primacy over the UIC program. ADEQ notes that many activities and facilities currently regulated by APP will continue to be regulated upon UIC primacy as those activities and facilities will not be regulated under the UIC program. For example, a facility that requires a UIC permit for Class III injection wells, may also require an APP permit for impoundments or other discharging facilities.

In 2021, the Arizona Legislature passed A.R.S. § 49-250(B)(26)) which exempts certain UIC wells from APP regulation. The language specifically leaves UIC Class V wells out of the exemption from APP (meaning UIC Class V wells are still applicable to regulation under APP).

Comment 36: Tribal Interest Group - Waiver of Permit Conditions
We are concerned with the wide latitude vested in the ADEQ Director to issue a UIC Permit with less stringent requirements to the extent the Director finds that a “reduction in requirements will not result in an increased risk of movement of fluids” into a USDW. While there may be instances where a waiver of this type might be appropriate, the proposed rulemaking should carefully and specifically outline criteria for the Director to apply when deciding to exercise this authority under the Program. It should not be a broad exemption over all other permit program requirements where a permittee may seek and easily obtain reduced requirements of many critical aspects such as “area of review, construction, mechanical integrity, operation, monitoring, and reporting.” (see proposed R18-9-B610)

ADEQ Response 36:
ADEQ appreciates the comment. The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in the SDWA in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). In the case of proposed rule R18-9-B608, ADEQ has used the analogous Federal language at 40 CFR 144.12, verbatim. ADEQ has no ability to develop further criteria for this rule and stay within the parameters of state and Federal law.

Comment 37: Tribal Interest Group - Groundwater Modeling
UIC Permits should not be considered in a vacuum. If insufficient or no information exists about the underground nature of the area, the UIC Program rulemaking may specify circumstances under which a groundwater model would be required. This is not contemplated for any class of well.

ADEQ Response 37:
ADEQ appreciates the comment. Proposed rule R18-9-B612 specifies the methods and, if appropriate, the calculations used to determine the area of review (AOR). This determination includes:

1. The zone of endangering influence based on physical measurements;
2. The zone of endangering influence computation based on the modified Theis equation (analytical groundwater model);
3. A fixed radius not less than 1/4 mile, from the injection well for an individual well permit or for an area permit; or
4. A mathematical (groundwater) model.
   * Annotation in parenthesis above added for clarification.

Comment 38: Tribal Interest Group - Area of Review
Restricting review to the “applicable area of review” (see R18-9-B612) may be self-limiting. Impacts to features and aquifers beyond this area may not be detected, because they have already been omitted from review.

ADEQ Response 38:
ADEQ appreciates the comment. The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program
rules in the SDWA in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). In the case of proposed rule R18-9-B612, ADEQ chose to use the analogous Federal language at 40 CFR 144.16, verbatim.

Comment 39: Law Firm - Prohibition on Movement
Change the first phrase in Arizona UIC Proposed Rule R18-9-B608(A) from:

“No owner or operator shall construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a manner that allows the movement of fluid containing any contaminant into USDWs…”

-- to --

“No owner or operator shall construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a manner that allows or causes the movement of fluid containing any contaminant into USDWs…”

For the following reasons:
1. Account for the possibility that fluids introduced by the injection activity will cause a migration of contaminant-containing fluid already present in the groundwater in the vicinity of the injection activity as a result of previous injection activities or other causes;
2. Correlate to the Arizona statutes that require the Arizona Department of Water Resources (“ADWR”) to rely on ADEQ for determinations of whether ADWR’s grant of a permit would cause or exacerbate migration of contaminated groundwater, see, e.g., A.R.S. § 45-811.01(C)(5); and
3. On its face, not make the rule more stringent than the federal UIC rules (alternatively, the modification suggested above would not be inappropriate under A.R.S. §§ 41-1052(D)(9) and 49-104(A)(16), given the operation of A.R.S. § 45-811.01(C)(5)).

ADEQ Response 39:
ADEQ appreciates the comment. The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and 49-257.01. In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in the SDWA in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). In the case of proposed rule R18-9-B608, ADEQ chose to use the analogous Federal language at 40 CFR 144.12, verbatim. ADEQ has no ability to revise the rule and stay within the parameters of state and Federal law.

Comment 40: Law Firm - Duplicative Regulation
The aquifer protection permit class exemption for UIC Class V wells with an individual UIC permit (proposed A.A.C. R18-9-103(6)) makes sense and should be retained. Requiring both an individual APP and individual UIC permit for a Class V well would be unnecessary and largely duplicative. Arguably, this exemption duplicates the statutory exemption found at A.R.S. § 49-250(B)(26), but the language of that exemption is less clear than it might be, so including the proposed new class exemption in the APP rules serves to clarify any uncertainty. It also is consistent with the mandate in A.R.S. § 49-203(D) to eliminate duplication and dual permitting to the maximum extent practicable.

ADEQ Response 40:
ADEQ appreciates the comment and agrees with the stakeholder’s statement.

Comment 41: Law Firm - Tribal Lands
ADEQ clarified at the public hearing that the state UIC program will not apply on tribal lands, and that EPA would still issue UIC permits for injection wells located on those lands. It may be prudent to specify that in the rule. As it stands, proposed A.A.C. R18-9-A602(C) states that injection in the state of Arizona is prohibited unless authorized by ADEQ (or OGCC, if it adopts an approved program), which suggests that only ADEQ or OGCC can issue UIC permits in the state.

ADEQ Response 41:
ADEQ appreciates the comment and has addressed the issue accordingly.

The proposed rule at A.A.C. R18-9-A602(C) is as follows,

Underground injection is prohibited in the State of Arizona unless authorized by permit or rule under this Article or authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq. Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground
sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or may adversely affect the health of persons.

In this proposed final rulemaking, ADEQ has amended the language in A.A.C. R18-9-A602(C) and (D) as follows,

(C) Underground injection is prohibited in lands under the jurisdiction of the State of Arizona unless:
   1. Authorized by permit or rule under this Article in accordance with 42 U.S.C. 300h et seq.,
   2. Authorized by OGCC pursuant to regulations approved by EPA.

(D) Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or may adversely affect the health of persons.

The restructuring of A.A.C. R18-9-A602(C) and (D) above distinguishes between lands under the jurisdiction of the State of Arizona and lands that are not (I.E. - Tribal Land).

Due to the restructuring of R18-9-A602(C), what was proposed to be R18-9-A602(D) has become R18-9-A602(E) and so on throughout the subsections.

Comment 42: Law Firm

The definition of “permit” (proposed A.A.C. R18-9-A601(48)) should be clarified to state that it does not include authorization by rule. This is clearly implied by the definition and the wording of other proposed rules, but it should be made explicit to avoid any potential for confusion. The comparable definition of “permit” in the federal UIC regulations (40 C.F.R. § 144.3) specifically states: “Permit does not include UIC authorization by rule . . . .” Given that ADEQ clarified at the public hearing that it intended no different interpretation of the term than exists under the federal program, ADEQ should add language tracking the federal definition to the final state definition of “permit.”

ADEQ Response 42:
ADEQ appreciates the comment. Please see response 17 above.

Comment 43: Law Firm

Is the last sentence of proposed A.A.C. R18-9-B608(B) needed? It does not appear in the analogous EPA regulation (40 C.F.R. § 144.12(b)). The sentence refers readers to the section of the proposed rules relating to Class V permits authorized by rule, but proposed A.A.C. R18-9-A608(C) and (D) also seem to apply to all Class V wells, including those authorized by rule. Does the cross-reference to the specific Class V rules add anything that is not encompassed within subsections C and D, especially given that the most pertinent provision of the Class V rules simply refers right back to proposed A.A.C. R18-9-B608 (see A.A.C. R18-9-I650(B)(2)(a))?

ADEQ Response 43:
ADEQ appreciates the comment. ADEQ added the cross references specifically to mirror federal law. The final sentence in proposed rule A.A.C. R18-9-B608(B) is as follows,

“In the case of Class V wells authorized by rule see R18-9-I650 through R18-9-I655 in Part I of this Article.”

The final two sentences of the federal analog at 40 CFR 144.12(b) are as follows,

In the case of wells authorized by rule, see §§ 144.21 through 144.24. For EPA administered programs, such enforcement action shall be taken in accordance with appropriate sections of the SDWA.

The final sentence in 40 CFR 144.12(b) is inapplicable to ADEQ’s prospective state UIC program, given the preface of the sentence, “[f]or EPA administered program...” EPA requires ADEQ to adopt a rule that is at least as stringent as the federal analog. In the case of 40 CFR 144.12(b), the second to last sentence is the last sentence that is required to be in the proposed rule.

Comment 44: Law Firm - Public Notice

With respect to the public notice requirements for permits (proposed A.A.C. R18-9-C620(D)(1)(b)), what constitutes an “affected” federal, state, tribal, or local agency or council of government? Is it simply the government with jurisdiction over the land where the injection occurs? If so, the word “tribal” should be
removed, since ADEQ does not have authority to issue UIC permits on tribal lands. If the notification is intended to be broader, as suggested by the reference to agencies and COGs, ADEQ should provide some explanation of how it will identify the “affected” agencies or governments that will receive notification.

ADEQ Response 44:
ADEQ appreciates the comment. The federal rule unto which A.A.C. R18-9-C620(D)(1)(b) is based on includes the following as a listed recipient of public notice at 40 CFR 124.10(c)(1)(iii), “...including any affected States (Indian Tribes). (For purposes of this paragraph, and in the context of the Underground Injection Control Program only, the term State includes Indian Tribes treated as States.)”

EPA requires ADEQ to adopt a rule that is at least as stringent as the federal rule equivalent. Therefore, ADEQ effectively adopted the language from the CFR.

Please refer to response 20 as well.

Comment 45: Law Firm
Also in the public notice section (proposed A.A.C. R18-9-C620(D)(1)(c)), notification regarding individual permits must be provided to SHPO and to state and federal agencies with jurisdiction over fish, shellfish and wildlife resources (presumably, AGFD and FWS). ADEQ should make clear in the preamble to the final rules that this notification does not stem from any mandatory consultation requirements that apply to the agency. Consultation requirements under the ESA and NHPA apply only to federal agencies, not state agencies, and the UIC delegation regulations do not require states to adopt requirements associated with the ESA or NHPA.

ADEQ Response 45:
ADEQ appreciates the comment. Please see responses 19 and 27 above.

Comment 46: Law Firm
Proposed A.A.C. R18-9-C629(A)(1) provides that an expiring permit continues in force and effect if a “timely application that is a complete application” for a new permit is submitted. This tracks language in EPA's UIC regulations for EPA-issued permits (40 C.F.R. § 144.37(a)(1)), but it is not clear what exactly this would require under the state program. Specifically:
- **Timely:** When will an application need to be submitted in order to be considered “timely”? Is simply submitting the application before the current permit expires timely? If not, how long before an existing permit expires must submission be made in order to be considered timely?
- **Complete:** ADEQ should clarify that an application will be considered “complete” for purposes of this provision if the application contains the requirements necessary to find administrative completeness (i.e., it contains the information listed in proposed A.A.C. R18-9-C616(D) or, for Class VI wells, the information listed in proposed A.A.C. R18-9-667(B)). Later requests for additional technical information or analysis made during the substantive review phase should not result in a conclusion that the application was not complete when submitted.

ADEQ Response 46:
ADEQ appreciates the comment and reiterates that the proposed rule A.A.C. R18-9-C629(A)(1) follows the analogous Federal rule at 40 CFR 144.37(a)(1). Under a state UIC program, the term “Timely”, for the purposes of proposed rule R18-9-C629(A), is within a reasonable amount of time before the expiration of the permit term occurs. ADEQ notes CAA & CWA programs define “timely” as 6 to 18 months prior to permit expiration. Also “Complete”, for the purposes of proposed rule R18-9-C629(A), is commensurate with “Administrative completeness” as defined in A.A.C. R18-1-501(1).

Comment 47: Law Firm
For new Class V wells (i.e., those created after the state begins implementing the UIC program), presumably it will be sufficient if the inventory form information specified in proposed A.A.C. R18-9-1652(B) is submitted prior to commencing injection. If that is correct, then ADEQ should so state in the preamble to the final rules.

ADEQ Response 47:
ADEQ appreciates the comment. Submitting an inventory pursuant to R18-9-1652 is a prerequisite to injection. The information has been added to the Preamble for the final rules.

Comment 48: Law Firm
There appears to be an incorrect cross-reference in proposed A.A.C. R18-9-1650(B)(1). That section begins: “With certain exceptions listed in subsection (B) of this Section . . . .” The reference presumably should instead be to subsection “(2)” of the section.

ADEQ Response 48:
ADEQ appreciates the comment and the identification of an incorrect cross-reference. The reference in A.A.C. R18-9-I650(B)(1) to subsection (B) has been adjusted to read (B)(2).

Comment 49: Law Firm
ADEQ’s authority to require a permit for a Class V well (proposed A.A.C. R18-9-I650(B)(2)(b)) should specifically cross-reference proposed A.A.C. R18-9-I651, which sets out the circumstances in which the Department can require a permit to be obtained. The first sentence of that subsection should read: “The Director specifically requires a Class V permit for the well to operate pursuant to A.A.C. R18-9-I651.”

ADEQ Response 49:
ADEQ appreciates the comment and agrees with the stakeholder’s concern and suggested revision. The first sentence of A.A.C. R18-9-I650(B)(2)(b) has been amended to align with the language suggested above for the purposes of the final rule.

Comment 50: Law Firm
To avoid ADEQ having unfettered discretion to require Class V wells to obtain an individual permit, the three grounds listed in proposed A.A.C. R18-9-I651 should be identified as the only three grounds for requiring an individual permit. Rather than saying that the grounds for such a decision “include” the three listed, which arguably suggests that there could be additional unlisted grounds, the final rule should indicate that the three listed grounds represent the only bases for requiring an individual permit. For these reasons, proposed A.A.C. R18-9-I651(A) should be modified to read: “The Director may require the owner or operator of any Class V injection well authorized by rule under this Article to apply for and obtain an individual or area UIC permit in any of the following circumstances. Cases where individual or area UIC permits may be required include:

● In the alternative, and recognizing that the analogous EPA regulation (40 C.F.R. § 144.25(A)) also uses the word “include,” ADEQ should clarify in the preamble that use of the word “include” in this rule is intended to identify the full universe of grounds for requiring a permit (i.e., it is distinct from the phrase “include but is not limited to,” which is used at least once elsewhere in the proposed rules, see proposed A.A.C. R18-9-A604(E)(1)).

ADEQ Response 50:
ADEQ appreciates the comment.

The stakeholder’s suggested language would curtail the Director’s authority to require a Class V well to obtain an individual permit. Narrowing the breadth of discretion in the rule would also make it less stringent than the federal analog. ADEQ respectfully declines to implement this suggested language in the final rule.

Comment 51: Law Firm
Proposed A.A.C. R18-9-I650(B)(2) states that a Class V well authorized by rule may instead be required to get a permit “if one of any one of the following:” There is clearly excess verbiage in this phrase. The requirement would be more clearly stated if it instead said something like “in the following circumstances.”

ADEQ Response 51:
ADEQ appreciates the comment and agrees with the stakeholder’s concern. The language has been amended for the final rule and reads as follows,

“A Class V well requires a permit and shall no longer be authorized by rule upon any of the following...”

Comment 52: Law Firm
When Class V wells are plugged and abandoned, the proposed rules require proper disposal of soil, gravel, sludge, liquids or other materials removed from “or adjacent to” the well (proposed A.A.C. R18-9-I650(B)(3)(b) and proposed A.A.C. R18-9-B614(C)). This tracks language in EPA’s UIC rules at 40 C.F.R. § 144.82(b). This requirement should not apply to materials that are unrelated to the well but merely happen to be located adjacent to it at the time of well closure. If this interpretation is correct, then ADEQ should so indicate in the preamble. If this interpretation is not correct, then ADEQ should explain in the preamble the intended scope of the requirement.

ADEQ Response 52:
ADEQ appreciates the comment. As stated by the stakeholder, both 40 C.F.R. § 144.82(b) and A.A.C. R18-9-I650(B)(3)(b) contain similar language to the following,

“...you must dispose or otherwise manage any soil, gravel, sludge, liquids, or other materials removed from or adjacent to your well in accordance with all applicable Federal, State, and local regulations and requirements.”
ADEQ believes the request to make a distinction between materials that are unrelated to the well but merely happen to be located adjacent to the well at the time of well closure and materials that are related to the well is unnecessary. Furthermore, implementing the requested distinction could affect the stringency of ADEQ’s proposed rule versus the Federal analog. ADEQ’s rules must remain as stringent as EPA’s analog rule in the CFR in order for ADEQ to be eligible for primacy.

Comment 53: Law Firm
The language in proposed A.A.C. R18-9-B614(C) and proposed A.A.C. R18-9-I650(B)(3) is virtually identical. This is not inherently problematic, but it is unusual to see the same language repeated twice in a rule package. Are both sections needed? Would a cross-reference in one location suffice?

ADEQ Response 53:
ADEQ appreciates the comment. ADEQ agrees that R18-9-B614(C) and R18-9-I650(B)(3) are quite similar. ADEQ has decided to amend the rules by leaving R18-9-B614(C) as is and changing R18-9-I650(B)(3) to read as follows,

“Prior to abandoning a Class V well, the owner or operator shall meet the plugging requirements in R18-9-B614(C).”

The former R18-9-I650(B)(3)(a) and (b) have been removed.

Comment 54: Law Firm
The proposed rules provide that a discharger may appeal to the Water Quality Appeals Board ADEQ’s determination that a permit is needed for a Class V well (proposed A.A.C. R18-9-I651(B)(5)). The proposal also states that authorization by rule for a Class V well ceases if an application for a permit is not submitted as specified by ADEQ, or when a permit is denied (proposed A.A.C. R18-9-I650(B)(2)(b)). To avoid the scenario where a discharger must apply for (and possibly even obtain) a permit that it is challenging the need for, this latter provision should be modified to state that if ADEQ’s decision to require a permit for a Class V well is appealed, then authorization by rule continues until that appeal is resolved. This could be accomplished by amending proposed A.A.C. R18-9-I650(B)(2)(b) to read that authorization by rule ceases upon the later of: (1) failure to submit an application in a timely manner as specified in a notice from ADEQ; (2) the effective date of permit denial; or (3) the date of a final administrative decision or other resolution of an appeal filed challenging the Department’s decision that a permit is required.

ADEQ Response 54:
ADEQ appreciates the comment and request to amend the rule language, but respectfully declines. ADEQ believes that the rule sufficiently provides the applicant’s right to appeal the individual permit requirement in proposed rule R18-9-I651. Proposed rule R18-9-I651 references the Water Quality Appeals Board statutes at Arizona Revised Statutes, Title 49, Chapter 2, Article 7. ADEQ prefers to allow those statutes to delineate any appeals rights an applicant may have upon the Director’s decision including any potential stay pending appeal.

Comment 55: Resource Extraction Industry Member
Proposed A601 defines "appropriate Act and regulations" even though that terminology is not employed anywhere else in the proposed rules. ADEQ may wish to delete that definition accordingly.

ADEQ Response 55:
ADEQ appreciates the comment. “Appropriate Act and regulations” can be found in the analogous Federal rule at 40 CFR 144.3. ADEQ will keep the definition in the regulations as the term is used elsewhere in the UIC primacy application, such as the Memorandum of Agreement.

Comment 56: Resource Extraction Industry Member
Proposed A602(A) provides that, "upon the date of the Environmental Protection Agency's approval of the Arizona UIC program," ADEQ shall administer and enforce any UIC permit that "has been previously authorized or issued" in Arizona under the federal UIC program. This leaves unclear the continuing status of legal instruments ancillary to the permit, the implementation of which was and continues to be a condition of EPA's issuance of the permit. In order to address this issue, a sentence should be added at the end of A602(A) more or less as follows:

In addition, the Arizona UIC Memorandum of Agreement shall, under terms and conditions agreed to by the Director and Administrator, provide for the continued force, effect and administration of legal instruments ancillary to such permits, the implementation of which was and continues to be a condition of the Administrator's authorization and issuance of the permit, such as, without limitation, an agreement relating to the permit that was executed and is being implemented pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, 36 C.F.R. Part 800.
ADEQ Response 56:
ADEQ appreciates the comment, but respectfully declines to add the language suggested. The ancillary matters referred to above and those matters of a like kind will be addressed in the permits themselves and or other documents, like the Memorandum of Agreement.

Comment 57: Resource Extraction Industry Member
Proposed A602(J) should be revised to replace the words "upon the date of primacy" with the words "upon the date of the Environmental Protection Agency's approval of the Arizona UIC program." This change would make A602(J) consistent with proposed A602(A).

ADEQ Response 57:
ADEQ appreciates the comment and will update the final rule to align with the definition in final rule R18-9-A601(21).

Comment 58: Resource Extraction Industry Member
Proposed A605(B)(4) concerning exemption of aquifers makes cross-references to "A606(A)(2)" and "A606(A)(3)." These cross-references appear to be incorrect. Based on the analogous provisions of 40 C.F.R. § 144.7, ADEQ should change these to "A605(B)(2)" and "A605(B)(3)."

ADEQ Response 58:
ADEQ appreciates the comment. After review of the specified cross references above, it was determined that they are correct.

Comment 59: Resource Extraction Industry Member
In proposed A606(2)(a), the word "consider" should be changed to "considering". This change would make (2)(a) consistent with 40 C.F.R. § 146.4(b)(1).

ADEQ Response 59:
ADEQ appreciates the comment and will align the final rule with the recommended language above.

Comment 60: Resource Extraction Industry Member
In proposed C626(A), Class II and III wells are excepted when describing the effect of compliance with a UIC permit. Although this exception language is found in EPA UIC regulations, it is unclear why there is a distinction between different classes of wells and why compliance with a permit for Class II and III wells is not considered compliance with the UIC regulations or the Safe Drinking Water Act. If there is not a satisfactory explanation, we recommend that this language be dropped after appropriate discussions with EPA.

ADEQ Response 60:
ADEQ appreciates the comment. UIC Class II & III wells are excepted from C626(A) because such permits are for the life of the operating facility. Therefore, compliance with a permit goes beyond the "term" and extends to the life of the facility in the case of Classes II & III. Please reference C628(A).

Comment 61: Local Government
The UIC rules require submittal of highly technical information. Will ADEQ have the staff available to review the applications and technical details? All business sectors are experiencing staff shortages. Unless ADEQ is offering competitive salaries, it may be difficult to attract candidates with the necessary expertise.

ADEQ Response 61:
ADEQ appreciates the comment. ADEQ has and will continue to develop the educational background and relevant experience to manage and administer the UIC Program. Upon primacy, ADEQ will utilize existing expertise within the Groundwater Protection Section to manage and administer the UIC program. It should also be noted that the Arizona Legislature appropriated funding for 3.2 full-time-equivalent positions specifically for the UIC program. ADEQ plans on hiring additional qualified staff based on capacity and workload needs. ADEQ salary structure and benefits package is attractive and should not be prohibitive in attracting qualified personnel.

Comment 62: Local Government
How will the Underground Injection Control Program interface with the Aquifer Protection Permit Program?

ADEQ Response 62:
ADEQ appreciates the comment. The UIC program and the APP program will complement each other in the fabric of groundwater protection regulation in Arizona. A.R.S. § 49-250(B)(26) exempts UIC wells from APP regulation for Classes I, II, III, IV and VI. However, Class V wells that are “authorized by rule” (as opposed to being individually permitted) will potentially be applicable to both UIC and APP regulation if the specific type of UIC Class V well is subject to APP. For example, a drywell that drains a motor
fueling area would be required to inventory under UIC Class V regulation and would be required to apply for an APP Type 2.04 General Permit (see R18-9-C304).

Comment 63: Local Government
Typo. Preamble. Subheading: Why is Article 1 being amended? Sentence: Individually Permitted Class V UIC Wells Omit the second "not" in the sentence "ADEQ is concerned that Class V wells "prescribed by rule" may be interpreted to include Class V wells "authorized by rule" and individually permitted Class V wells, which ADEQ does not believe was not the intention of the legislation."

ADEQ Response 63:
ADEQ appreciates the comment and will amend the language in the Preamble in the Notice of Final Rulemaking

Comment 64: Local Government
Will the National Primary Drinking Water Regulations in Table 1 supersede existing Arizona Aquifer Water Quality Standards?
ADEQ Response 64:
ADEQ appreciates the comment. The applicable primary drinking water maximum contaminant levels (MCLs) will be the standards used for the UIC program. EPA requires ADEQ use these standards in order to achieve the stringency in the rule required for EPA to grant ADEQ primacy. Arizona Aquifer Water Quality Standards will still apply for the APP.

Comment 65: Local Government
At R18-9-C616(C)(2), what is a reasonable timeframe? There should be a limitation on time, to ensure expediency.
ADEQ Response 65:
ADEQ appreciates the comment. The language in R18-9-C616(C)(2) makes it incumbent upon a permittee to submit a permit application prior to construction of an injection well. ADEQ recommends using the LTF framework in A.A.C. Title 18, Chapter 1, Article 5 as guidance for project planning and scheduling. The agency works hard to provide quick decisions on permit applications.

Comment 66: Local Government
● At R18-9-C616(C)(1), add ", but not to exceed L {i.e. 60) days]" after "practicable".
● At R18-9-C624(A)(2), strike the extraneous word "in".
● At R18-9-C633(A)(8), add "d" after "an".
● At R18-9-D635(A)(16)(b), strike the "d" in "and".
● At R18-9-F645(B)(2), 3rd sentence, change "suspended" to "suspected".

ADEQ Response 66:
ADEQ appreciates the comments. See response 65 for reference to Bullet 1. Bullets 2 through 5 have been implemented in the final proposed rule.

Comment 67: Federally-Recognized Arizona Tribal Nation or Community
The proposed rule should require ADEQ to fully implement and enforce the provisions of EPA permits transferred to ADEQ. The EPA, in administering any UIC permit (or indeed, undertaking any major action) must comply with a number of statutory requirements that protect Tribal interests, including Section 106 of the National Historic Preservation Act (NHPA). Through the NHPA, EPA consults with Tribes to protect cultural resources and frequently enters into a Programmatic Agreement or Memorandum of Agreement as a condition of permit issuance. These agreements typically impose conditions and requirements that protect Tribal lands, resources, and areas of cultural significance. Here, ADEQ's Proposed Rule is silent regarding the continued implementation and enforcement of such Programmatic Agreements and Memoranda of Agreements associated with EPA-issued permits. For transferred permits, ADEQ's Proposed Rule should include language ensuring that ADEQ implement and enforce the requirements and conditions, under laws such as NHPA, that EPA has imposed on its permittees.

ADEQ Response 67:
ADEQ appreciates the comment. Upon primacy, EPA will transfer the Federal permits to ADEQ for administration. All of the terms in the permit, including NHPA terms, will continue to be enforced jointly between EPA and ADEQ. The joint enforcement will be memorialized in the EPA | ADEQ Memorandum of Agreement (see A.R.S. § 49-203(B)(5)).

Comment 68: Federally-Recognized Arizona Tribal Nation or Community
The proposed rule does not include any requirements for ADEQ to analyze historic and cultural resources as part of UIC permit decision-making. The Community is concerned that the Proposed Rule does not require specific historic and cultural resource considerations in making UIC permitting decisions. Given
the prevalence of Tribal communities within Arizona, including a historic and cultural resource review requirement prior to issuance of any UIC permit is particularly critical to protect and preserve these resources. In addition to considering historic and cultural resources as a prerequisite to issuing any UIC permit under ADEQ’s proposed program, ADEQ should require that an applicant demonstrate that avoidance, minimization, and mitigation measures regarding impacts to historic and cultural resources have been demonstrated to ensure maximum protection for these resources.

ADEQ Response 68:
ADEQ appreciates the comment. Please see response 19 for reference.

Comment 69: Federally-Recognized Arizona Tribal Nation or Community
The proposed rule requires clarity around whether and when ADEQ will notify a tribe about permit-related actions. As currently drafted, the Proposed Rule states that public notice of activities, including draft permits and public hearings, shall be delivered to “[a]ny affected federal, state, tribal, or local agency, or council of government.” The Proposed Rule, however, lacks any parameters around what “affected” means in this context, thus providing no certainty that Tribal Governments whose resources or environments may be affected by a UIC permit will receive notice. Further, without proper notice to Tribal Governments, ADEQ may not realize the extent to which a proposed permit action could impact Tribal communities, their environment, and cultural and historic resources during the decision-making process. To clarify this vague language in the Proposed Rule, we recommend defining “affected” based upon objective criteria, such as when a permitted activity may be located in the same watershed or aquifer where a Tribe is located, located within a set radius of Tribal lands, or could impact cultural resources.

ADEQ Response 69:
ADEQ appreciates the comment. Please see responses 20 and 44 for reference.

Comment 70: Federally-Recognized Arizona Tribal Nation or Community
The proposed rule requires that the State Historic Preservation Office (SHPO) be notified regarding permit-related actions but lacks such notification requirements for Tribal Historic Preservation Offices (THPOS). ADEQ’s Proposed Rule requires notification to the SHPO for permit-related actions but does not include the same requirement for any THPO. Because UIC permit activities, regardless of the proximity to a particular Tribe’s lands, could impact cultural resources, the Proposed Rule should include requirements to notify THPOs in appropriate circumstances.

ADEQ Response 70:
ADEQ appreciates the comment. Please see responses 19 and 20 for reference.

Comment 71: Federally-Recognized Arizona Tribal Nation or Community
The commenter believes that there will be a number of other issues that ADEQ and EPA must address—in ADEQ’s UIC Program regulations and/or in the Arizona UIC Memorandum of Agreement—to protect Tribal interests and the environment. These include: (i) the requirement for ADEQ to engage in meaningful consultations with Tribes regarding proposed UIC permits; (ii) confirmation of ADEQ’s authority to consider and impose conditions to protect historic and cultural resources in ADEQ’s UIC Program permit decision-making; and (iii) the adequacy of ADEQ resources, staff, and budgets to implement the UIC Program.

ADEQ Response 71:
ADEQ appreciates the comment. Please see responses 19 and 20 for reference.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

The following statutes contain therein prescribed matters applicable to the rules in this rulemaking: A.R.S. §§ 49-203(A)(6) and (9); 49-257; 49-257.01.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:
The UIC program will require permits. General permits are not used because issuance of a general permit would not meet the applicable statutory requirements to adopt a permit program for underground injection control required in 40 CFR Part 145. 40 CFR Part 145 requires states to adopt the UIC program through primacy, meeting a stringency level that is at least as stringent as the federal program. Any deviation in the individual permits that are issued for most UIC wells would result in a less stringent program. EPA would not approve primacy if ADEQ proposed a set of rules that used general permits in place of individual
permits. However, the one exception is that the UIC Class V wells are regulated in a manner similar to general permits in that they are “authorized by rule.” This means that such UIC wells are automatically authorized under the program as long as such wells are inventoried and follow a delineated set of criteria.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is applicable to UIC. UIC is a program authorized under the SDWA (see 42 U.S.C. § 300h et seq.), originally administered by EPA. The UIC program administration can be transferred from EPA to a state through a delineated process known as Primacy (see 42 U.S.C. § 300h-1).

The rule is more stringent than Federal law in two circumstances in order to align with the following, existing state law:

- R18-9-B609(A) – Prohibition of hazardous waste injection, and

R18-9-B609(A)

R18-9-B609(A) reflects Arizona’s prohibition on hazardous waste injection in the Hazardous Waste Permit Program rules at A.A.C. R18-8-270(B)(2)(b). Statutory authority for the R18-9-B609(A) prohibition is found in A.R.S. § 49-203(A)(8), which states that the ADEQ Director shall adopt by rule standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 5 of this subsection. Paragraphs 5 and 6 of the subsection (A.R.S. § 49-203(A)) concern the adoption of the APP program and the UIC program. ADEQ interprets A.R.S. § 49-203(A)(8) to allow the Director to adopt a UIC rule and standard for the prohibition of hazardous waste injection because adopting the rule or standard is reasonable and necessary in order to carry out the APP program and the regulatory duties to protect groundwater in the APP and UIC programs. Adopting this prohibition also aligns the UIC program with the existing prohibition in the Hazardous Waste Permit Program at A.A.C. R18-8-270(B)(2)(b).

R18-9-I654

R18-9-I654 reflects the prohibition on cesspools found in the Aquifer Protection Permits program at A.A.C. R18-9-A309(A)(4). Statutory authority for this prohibition is found in A.R.S. § 49-104(B)(13) which mandates the ADEQ Director to prescribe reasonable rules regarding sewage disposal. Statutory authority can also be found in A.R.S. § 49-104(B)(14), which mandates the ADEQ Director to prescribe reasonably necessary rules regarding excreta disposal.

c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:

No comparative analyses were submitted.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

No material was incorporated by reference in this rulemaking under A.R.S. § 41-1028, nor otherwise.

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

15. The full text of the rules follows:

ARTICLE 1. AQUIFER PROTECTION PERMITS – GENERAL PROVISIONS

R18-9-103. Class Exemptions
Class exemptions. In addition to the classes or categories of facilities listed in A.R.S. § 49-250(B), the following classes or categories of facilities are exempt from the Aquifer Protection Permit requirements in Articles 1, 2, and 3 of this Chapter:

1. Facilities that treat, store, or dispose of hazardous waste and have been issued a permit or have interim status, under the Resource Conservation and Recovery Act (P.L. 94-580; 90 Stat. 2796; 42 U.S.C. 6901 et seq., as amended), or have been issued a permit according to the hazardous waste management rules adopted under 18 A.A.C. 8, Article 2;
2. Underground storage tanks that contain a regulated substance as defined in A.R.S. § 49-1001;
3. Facilities for the disposal of solid waste, as defined in A.R.S. § 49-701.01, that are located in unincorporated areas and receive solid waste from four or fewer households;
4. Land application of biosolids in compliance with 18 A.A.C. 9, Articles 9 and 10;
5. CCR Units regulated by 40 C.F.R. 257, Subpart D or by a permit in effect under a Department program approved by the United States Environmental Protection Agency in accordance with 42 U.S.C. § 6945(d)(1). Units that were in existence as of January 1, 2019, and which are governed by 40 C.F.R. Part 257, Subpart D. This exemption for CCR Units shall only extend until such time as both of the following are met, as applicable to a given CCR Unit:
   a. Regulations are approved by the U.S. Environmental Protection Agency, in accordance with 42 U.S.C. § 6945(d)(1), for the issuance of permits governing CCR Units, and
   b. The Director issues a permit to a given CCR Unit, which incorporates terms at least as protective as 40 C.F.R. Part 257, Subpart D.
6. Underground Injection Control Class V injection wells regulated under an area or individual permit per 18 A.A.C. 9, Article 6, Part I.

ARTICLE 6. UNDERGROUND INJECTION CONTROL

PART A. GENERAL PROVISIONS

R18-9-A601. Definitions
The following terms apply to this Article:

1. “Abandoned well” means a well whose use has been permanently discontinued or which is in a state of disrepair such that it cannot be used for its intended purpose or for observation purposes.
2. “Administrator” means the Administrator of the United States Environmental Protection Agency (EPA), or an authorized representative.
3. “Application” means the ADEQ prescribed method, such as a form, for applying for a permit, including any additions, revisions or modifications thereof.
4. “Appropriate Act and regulations” means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA); or Safe Drinking Water Act (SDWA), whichever is applicable; and applicable regulations promulgated under those statutes.
5. “Aquifer” means a geological formation, group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.
6. “Area of review” means the area surrounding an injection well described according to the criteria set forth in R18-9-B612 or in the case of an area permit, the project area plus a circumscribing area the width of which is either 1/4 of a mile or a number calculated according to the criteria set forth in R18-9-B612.
7. “Arizona UIC Memorandum of Agreement” means the agreement between the Administrator and the Director that coordinates EPA and ADEQ activities, responsibilities, and programs under the Arizona UIC Program.
8. “Arizona UIC Program” means the UIC program administered by the Director and approved by EPA according to 42 U.S.C. § 300h-1.
9. “Casing” means a pipe or tubing of appropriate material, of varying diameter and weight, lowered into a borehole during or after drilling to support the sides of the hole and prevent the walls from caving; to prevent loss of drilling mud into porous ground; or to prevent water, gas, or other fluid from entering or leaving the hole.
10. “Catastrophic collapse” means the sudden and utter failure of overlaying strata caused by removal of underlying materials.
11. “Cementing” means the operation whereby a cement slurry is pumped into a drilled hole and/or forced behind the casing.
12. “Cesspool” means a drywell that receives untreated sanitary waste containing human excreta, and which sometimes has an open bottom and/or perforated sides.
13. “Confining zone” means a geological formation, group of formations, or parts of a formation that is capable of limiting fluid movement above an injection zone.
14. “Contaminant” means any physical, chemical, biological, or radiological substance or matter in water.
15. “Conventional mine” means an open pit or underground excavation for the production of minerals.
16. “Director” means the Director of the Arizona Department of Environmental Quality or the Director’s designee.
17. “Disposal well” means a well that is used for the disposal of waste into a subsurface stratum.
18. “Draft permit” means a document prepared under R18-9-C618 indicating the Director's tentative decision to issue, renew, modify, revoke and reissue, or terminate a permit. A notice of intent to terminate a permit, and a notice of intent to deny a permit, as discussed in R18-9-C631 are types of draft permits. A denial of a request for modification, revocation and reissuance, or termination, of a permit is not a draft permit, except as discussed in R18-9-C631(B).
19. “Drilling mud” means a heavy suspension used in drilling an injection well, introduced down the drill pipe and through the drill bit.
20. “Drywell” means a well, other than an improved sinkhole or subsurface fluid distribution system, completed above the water table so that its bottom and sides are typically dry except when receiving fluids.
21. “Effective date of the Arizona UIC Program” means the date that the Arizona UIC Program is approved or established by the Administrator.
23. “Environmental Protection Agency” or “EPA” means the United States Environmental Protection Agency.
24. “Exempted aquifer” means an aquifer or its portion that meets the criteria in the definition of underground source of drinking water (USDW) but has been exempted according to the procedures in R18-9-A605.
25. “Existing injection well” means an injection well other than a new injection well.
26. “Experimental technology” means a technology which has not been proven feasible under the conditions in which it is being tested.
27. “Facility” or “activity” means any UIC injection well subject to regulation under this Article.
28. “Fault” means a surface or zone of rock fracture along which there has been displacement.
29. “Final permit decision” means the Director’s decision to issue, renew, modify, revoke and reissue, deny or terminate a permit as described in R18-9-C627.
30. “Flow rate” means the volume per time unit given the flow of gases or other fluid substance which emerges from an orifice, pump, turbine, or passes along a conduit or channel.
31. “Fluid” means any material or substance which flows or moves whether in a semisolid, liquid, sludge, gas, or any other form or state.
32. “Formation” means a body of consolidated or unconsolidated rock characterized by a degree of lithologic homogeneity which is prevailing, but not necessarily, tabular and is mappable on the earth's surface or traceable in the subsurface.
33. “Formation fluid” means fluid present in a formation under natural conditions as opposed to introduced fluids, such as drilling mud.
34. “Generator” means any person, by site location, whose act or process produces hazardous waste identified or listed in A.A.C. Title 18, Chapter 8 (Hazardous Waste Management).
35. “Geologic sequestration” means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.
36. “Ground water” means water below the land surface in a zone of saturation.
37. “Hazardous waste” means a hazardous waste as defined in A.R.S. § 49-921.
38. “Improved sinkhole” means a naturally occurring karst depression or other natural crevice found in volcanic terrain and other geologic settings which have been modified by man for the purpose of directing and emplacing fluids into the subsurface.
40. “Indian Tribe” means any Indian Tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over a defined area.
41. “Injection well” means a well into which fluids are being injected.
42. “Injection zone” means a geological formation group of formations, or part of a formation receiving fluids through a well.
43. “Lithology” means the description of rocks on the basis of their physical and chemical characteristics.
44. “Major facility” means any UIC facility or activity classified as such by the Administrator in conjunction with the Director.
45. “New injection wells” means an injection well which began injection after the effective date of the Arizona UIC Program.
46. “Owner” or “operator” means the owner or operator of any facility or activity subject to regulation under the Arizona UIC program.
47. “Packer” means a device lowered into a well to produce a fluid-tight seal.
48. “Permit” means an authorization issued by the Director pursuant to this Article. ‘Permit’ includes an area permit under R18-9-C624 and an emergency permit under R18-9-C625. ‘Permit’ does not include UIC authorization by rule or any permit which has not yet been subject to a final permit decision, such as a ‘draft permit.’
49. “Person” means an individual, employee, officer, managing body, trust, firm, joint-stock company, consortium, public or private corporation, Partnership, association or state, a political subdivision of this state, a commission, the United States government or any federal facility, interstate body, Tribal agency, or other entity.
50. “Plugging” means the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.
51. “Plugging record” means a systematic listing of permanent or temporary abandonment of water, oil, gas, test, exploration and waste injection wells, and may contain a well log, description of amounts and types of plugging material used, the method employed for plugging, a description of formations which are sealed and a graphic log of the well showing formation location, formation thickness, and location of plugging structures.
52. “Pressure” means the total load or force per unit area acting on a surface.
53. “Project” means a group of wells in a single operation.
54. “Radioactive Waste” means any waste which contains radioactive material in concentrations which exceed those listed in 10 CFR part 20, appendix B, table II column 2.
56. “Sanitary waste” means liquid or solid wastes originating solely from humans and human activities, such as wastes collected from toilets, showers, wash basins, sinks used for cleaning domestic areas, sinks used for food preparation, clothes washing operations, and sinks or washing machines where food and beverage serving dishes, glasses, and utensils are cleaned. Sources of these wastes may include single or multiple residences, hotels and motels, restaurants, bunkhouses, schools, ranger stations, crew quarters, guard stations, campgrounds, picnic grounds, day-use recreation areas, other commercial facilities, and industrial facilities provided the waste is not mixed with industrial waste.
57. “Schedule of compliance” means a schedule of remedial measures included in a permit including an enforceable sequence of interim requirements leading to compliance with this Article.
58. “SDWA” or “Safe Drinking Water Act” means the Safe Drinking Water Act (Pub. L. 93-523, as amended; 42 U.S.C. 300f et seq.).
59. “Septic system” means a well that is used to emplace sanitary waste below the surface and is typically comprised of a septic tank and subsurface fluid distribution system or disposal system.
60. “Site” means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the facility or activity.
61. “Stratum” means a single sedimentary bed or layer, or series of layers that consists of generally the same kind of rock material regardless of thickness. The plural of stratum is strata.
62. “Subsidence” means the lowering of the natural land surface in response to earth movements; lowering fluid pressures; removal of underlying support material by mining or solution of solids, either artificially or from natural causes; compaction due to wetting; oxidation of organic matter in soils; or added load on the land surface.
63. “Subsurface fluid distribution system” means an assemblage of perforated pipes, drain tiles, or other similar mechanisms intended to distribute fluids below the surface of the ground.
64. “Surface casing” means the first string of well casing to be installed in the well.
“Total dissolved solids” or “TDS” means the total dissolved (filterable) solids as determined by use of the method specified in A.A.C. R9-14-610 or R9-14-611.

“Transferee” means the owner or operator receiving ownership and/or operational control of the well.

“Transferor” means the owner or operator transferring ownership and/or operational control of the well.

“Underground injection” means a well injection; which excludes the underground injection of natural gas for purposes of storage and the underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

“Underground Injection Control” or “UIC” means the Underground Injection Control program under Part C of the Safe Drinking Water Act, including the Arizona UIC Program.

“USDW,” “USDWs,” or “Underground source of drinking water” means an aquifer(s) or its portion that:
   a. Supplies any public water system; or
   b. Contains a sufficient quantity of ground water to supply a public water system; and
      i. Currently supplies drinking water for human consumption; or
      ii. Contains fewer than 10,000 mg/l total dissolved solids; and
   c. Is not an exempted aquifer.

“Well” means a bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or a subsurface fluid distribution system.

“Well injection” means the subsurface emplacement of fluids through a well.

“Well plug” means a watertight and gastight seal installed in a borehole or well to prevent movement of fluids.

“Well monitoring” means the measurement, by on-site instruments or laboratory methods, of the quality of water in a well.

“Well stimulation” means several processes used to clean the well bore, enlarge channels and increase pore space in the interval to be injected thus making it possible for wastewater to move more readily into the formation and includes surging, jetting, blasting, acidizing, or hydraulic fracturing.

R18-9-A602. Applicability
A. This Article becomes effective upon the date of the Environmental Protection Agency’s approval of the Arizona UIC Program. Upon that date, the Department shall, under A.R.S. Title 49, Chapter 2, Articles 3.3, 4 and Article 6 of this Chapter, administer and enforce any permit which has been previously authorized or issued in this state under the Federal UIC program.

B. This Article and 40 CFR Part 145, Subpart C provide the minimum requirements of the State of Arizona’s Underground Injection Control (UIC) program under A.R.S. Title 49, Chapter 2, Article 3.3 (Underground Injection Control Permit Program) and pursuant to Part C of the Safe Drinking Water Act (SDWA) (Pub. L. 93-523, as amended; 42 U.S.C. 300h et seq.).

C. Underground injection is prohibited in lands under the jurisdiction of the State of Arizona unless:
   1. Authorized by permit or rule under this Article in accordance with 42 U.S.C. 300h et seq., or
   2. Authorized by OGCC pursuant to regulations approved by EPA.

D. Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or may adversely affect the health of persons.

E. Injection wells regulated under this Article are categorized into six classes based on characteristics of the injection well activity. Owners or operators of injection wells regulated under all six classes must be authorized by permit (all classes) or rule (Class V only if no permit is required) pursuant to the requirements of this Article.

F. Specific inclusions. The following wells are included among those types of injection activities which are covered by the UIC regulations in this Article. (This list is not intended to be exclusive but is for clarification only.)
   1. Any injection well located on a drilling platform inside the State's territorial waters.
   2. Any dug hole or well that is deeper than its largest surface dimension, where the principal function of the hole is emplacement of fluids.
   3. Any well used by generators of hazardous waste, or by owners or operators of hazardous waste management facilities, to dispose of fluids containing hazardous waste. This includes the disposal of hazardous waste into what would otherwise be septic systems and cesspools, regardless of their capacity.
4. Any septic tank, cesspool, or other well used by a multiple dwelling, or community, or other large system for the injection of wastes.

G. Specific exclusions. The following are not covered by these regulations:
   1. Septic systems or similar waste disposal systems if such systems:
      a. Are used solely for the disposal of sanitary waste, and
      b. Have a design capacity of less than 3,000 gallons per day.
   2. Injection wells used for injection of hydrocarbons which are of pipeline quality and are gases at standard temperature and pressure for the purpose of storage.
   3. Any dug hole, drilled hole, or bored shaft which is not used for the subsurface emplacement of fluids.
   4. Injection wells authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq.

H. Safe Drinking Water Act exemptions.
   1. The following activities are exempt from the Arizona UIC Program:
      a. The underground injection of natural gas for purposes of storage.
      b. The underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

I. The Director may identify aquifers and portions of aquifers which are actual or potential sources of drinking water, to assist in carrying out the Director’s duty pursuant to this Article. Any aquifer meeting the criteria under R18-9-A601(70) shall be protected as an USDW, even if it has not been explicitly identified pursuant to this Section.

J. The Director may also designate aquifers or portions of aquifers as exempt from the program using the criteria in R18-9-A605 and R18-9-A606, subject to EPA approval. Any aquifer or portion thereof within the State that has previously been designated exempt by EPA pursuant to 40 CFR § 144.7 shall be part of the Arizona UIC program upon the effective date of the Arizona UIC program.

R18-9-A603. Confidentiality of Information
A. In accordance with A.R.S. § 49-205, any information submitted to the Director pursuant to these regulations may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions or, in the case of other submissions, by stamping the words "confidential business information" on each page containing such information. If no claim is made at the time of submission, the Director may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in A.R.S. § 49-205 (Availability of information to the public).

B. Claims of confidentiality for the following information will be denied:
   1. The name and address of any permit applicant or permittee.
   2. Information which deals with the existence, absence, or level of contaminants in drinking water.

R18-9-A604. Classification of Wells
A. Class I wells are:
   1. Wells used by generators of hazardous waste or owners or operators of hazardous waste management facilities to inject hazardous waste beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.
   2. Other industrial and municipal disposal wells which inject fluids beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.
   3. Radioactive waste disposal wells which inject fluids beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.

B. Class II wells are injection wells that inject fluids:
   1. That are brought to the surface in connection with natural gas storage operations, or conventional oil or natural gas production and may be commingled with waste waters from gas plants which are an integral part of production operations, unless those waters are classified as a hazardous waste at the time of injection.
   2. For enhanced recovery of oil or natural gas.
   3. For storage of hydrocarbons which are liquid at standard temperatures and pressure.

C. Class III wells are injection wells used for the extraction of minerals, including:
   1. Sulfur mining by the Frasch process.
2. In-situ production of uranium or other metals from those ore bodies not conventionally mined. Solution mining of conventional mines such as stopes leaching is included in Class V.
3. Solution mining of salts or potash.

D. Class IV wells are injection wells that either:
   1. Inject hazardous or radioactive wastes into or above a formation with an USDW located within one-quarter mile of the well bore, or
   2. Inject hazardous wastes and cannot be classified under subsection (A)(1), or (D)(1) (e.g., wells used to dispose of hazardous wastes into or above a formation which contains an aquifer which has been previously exempted or exempted pursuant to R18-9-A606).

E. Class V wells are injection wells not included in Class I, II, III, IV, or VI.
   1. Class V wells include but are not limited to:
      a. Air conditioning return flow wells used to return to the supply aquifer the water used for heating or cooling in a heat pump.
      b. Cesspools including multiple dwelling, community or regional cesspools, or other devices that receive wastes which have an open bottom and sometimes have perforated sides. The UIC requirements do not apply to single family residential cesspools not to non-residential cesspools which receive solely sanitary wastes and have the capacity to serve fewer than 20 persons a day.
      c. Cooling water return flow wells used to inject water previously used for cooling.
      d. Drainage wells used to drain surface fluid, primarily storm runoff, into a subsurface formation.
      e. Dry wells used for the injection of wastes into a subsurface formation.
      f. Recharge wells used to replenish the water in an aquifer.
      g. Salt water intrusion barrier wells used to inject water into a fresh water aquifer to prevent the intrusion of salt water into the fresh water.
      h. Sand backfill and other backfill wells used to inject a mixture of water and sand, mill tailings or other solids into mined out portions of subsurface mines, except for radioactive wastes.
      i. Septic system wells used to inject the waste or effluent from a multiple dwelling, business establishment, community or regional business establishment septic tank.
      j. Subsidence control wells, other than those used in oil or natural gas production, that inject fluids into a non-oil or gas producing zone to reduce or eliminate subsidence associated with freshwater overdraft.
      k. Injection wells associated with the recovery of geothermal energy for heating, aquaculture, and production of electric power.
      l. Wells used for solution mining of conventional mines such as stopes leaching.
      m. Wells used to inject spent brine into the same formation from which it was withdrawn after extraction of halogens or their salts.
      n. Injection wells used in experimental technologies.
      o. Injection wells used for in situ recovery of lignite, coal, tar sands, and oil shale.
   2. Class V wells do not include:
      a. Single-family residential septic system wells or non-residential septic system wells used solely for the disposal of sanitary waste with a design capacity of less than 3,000 gallons per day.

F. Class VI wells are:
   1. Not experimental in nature that are used for geologic sequestration of carbon dioxide beneath the lowermost formation containing a USDW;
   2. Wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at R18-9-J670; or
   3. Wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to R18-9-A605 of this Chapter and R18-9-A604.

R18-9-A605. Identification of Underground Sources of Drinking Water and Exempt Aquifers
A. The Director may identify, by narrative description, illustration, maps, or other means, and shall protect as USDWs, all aquifers and parts of aquifers that meet the definition of USDW in R18-9-A601(70) except to the extent there is an applicable aquifer exemption under subsection (B) of this Section or an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration under subsection (D) of this Section. Other than EPA-approved aquifer exemption expansions that meet the criteria set forth in R18-9-A606(4), new aquifer
exemptions shall not be issued for Class VI injection wells. Even if an aquifer has not been specifically identified by the Director, it is an USDW if it meets the definition in R18-9-A601(70).

B. Aquifer exemptions procedure:

1. The Director may identify, by narrative description, illustrations, maps, or other means, and describe in geographic and/or geometric terms, such as vertical and lateral limits and gradient, that are clear and definite, all aquifers or parts thereof that the Director proposes to designate as exempted aquifers using the criteria in R18-9-A606.

2. No designation of an exempted aquifer submitted as part of Arizona’s UIC program shall be final until approved by EPA as part of the Arizona UIC Program. No designation of an expansion to the areal extent of a Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration shall be final until approved by the EPA as a substantial revision of the Arizona UIC Program in accordance with 40 CFR 145.32.

3. Subsequent to the program approval or promulgation, the Director may, after notice and opportunity for public hearing, identify additional exempted aquifers.

4. Exemption of aquifers identified:

a. Under R18-9-A606(2) shall be treated as a program revision under 40 CFR 145.32;
b. Under R18-9-A606(3) shall become final if the Director submits the exemption in writing to the Administrator and the Administrator has not disapproved the designation within 45 days.

C. Additional aquifer exemption requirements:

1. For Class III wells, the Director shall require an applicant for a permit which necessitates an aquifer exemption under R18-9-A606(2)(a) to furnish the data necessary to demonstrate that the aquifer is expected to be mineral or hydrocarbon producing. Information contained in the mining plan for the proposed project, such as a map and general description of the mining zone, general information on the mineralogy and geochemistry of the mining zone, analysis of the amenability of the mining zone to the proposed mining method, and a time-table of planned development of the mining zone shall be considered by the Director in addition to the information required by R18-9-C616(D).

2. For Class II wells, a demonstration of commercial producibility shall be made as follows:

a. For a Class II well to be used for enhanced oil recovery processes in a field or project containing aquifers from which hydrocarbons were previously produced, commercial producibility shall be presumed by the Director upon a demonstration by the applicant of historical production having occurred in the project area or field.

b. For Class II wells not located in a field or project containing aquifers from which hydrocarbons were previously produced, information such as logs, core data, formation description, formation depth, formation thickness and formation parameters such as permeability and porosity shall be considered by the Director, to the extent such information is available.

D. Owners or operators of Class II enhanced oil recovery or enhanced gas recovery wells may request that the Director approve an expansion to the areal extent of an aquifer exemption already in place for a Class II enhanced oil recovery or enhanced gas recovery well for the exclusive purpose of Class VI injection for geologic sequestration. Such requests must be treated as a substantial program revision to the Arizona UIC program under 40 CFR 145.32 and will not be final until approved by EPA.

1. The owner or operator of a Class II enhanced oil recovery or enhanced gas recovery well that requests an expansion of the areal extent of an existing aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration must define, by narrative description, illustrations, maps or other means, and describe in geographic and/or geometric terms, such as vertical and lateral limits and gradient, that are clear and definite, all aquifers or parts thereof that are requested to be designated as exempted using the criteria in R18-9-A606.

2. In evaluating a request to expand the areal extent of an aquifer exemption of a Class II enhanced oil recovery or enhanced gas recovery well for the purpose of Class VI injection, the Director must determine that the request meets the criteria for exemptions in R18-9-A606. In making the determination, the Director shall consider:

a. Current and potential future use of the USDWs to be exempted as drinking water resources;
b. The predicted extent of the injected carbon dioxide plume, and any mobilized fluids that may result in degradation of water quality, over the lifetime of the geologic sequestration project, as informed by computational modeling performed pursuant to R18-9-J659(1), in order to ensure that the proposed injection operation will not at any time endanger USDWs including non-exempted portions of the injection formation.
c. Whether the areal extent of the expanded aquifer exemption is of sufficient size to account for any possible revisions to the computational model during reevaluation of the area of review, pursuant to R18-9-J659(E) and
d. Any information submitted to support a waiver request made by the owner or operator under R18-9-J670 if appropriate.

R18-9-A606. Criteria for Exempted Aquifers
An aquifer or a portion thereof which meets the criteria for an “USDW” in R18-9-A601(70) may be determined under R18-9-A605 to be an “exempted aquifer” for Class I-V wells if it meets the criteria in subsections (A)(1) through (A)(3) of this Section. Class VI wells must meet the criteria under subsection (A)(4) of this Section.

1. It does not currently serve as a source of drinking water; and
2. It cannot now and will not in the future serve as a source of drinking water because:
   a. It is mineral hydrocarbon or geothermal energy producing, or can be demonstrated by a permit applicant as part of a permit application for a Class II or Class III operation to contain minerals or hydrocarbons that considering their quantity and location are expected to be commercially producible;
   b. It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technically impractical;
   c. It is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption; or
   d. It is located over a Class III well mining area subject to subsidence or catastrophic collapse; or
3. The total dissolved solids content of the ground water is more than 3,000 and less than 10,000 mg/l and it is not reasonably expected to supply a public water system.
4. The areal extent of an aquifer exemption for a Class II enhanced oil recovery or enhanced gas recovery well may be expanded for the exclusive purpose of Class VI injection for geologic sequestration under R18-9-A605(D) if it meets the following criteria:
   a. It does not currently serve as a source of drinking water; and
   b. The total dissolved solids content of the ground water is more than 3,000 mg/l and less than 10,000 mg/l; and
   c. It is not reasonably expected to supply a public water system.

PART A. GENERAL PROGRAM REQUIREMENTS

R18-9-B607. Prohibition of Unauthorized Injection
Any underground injection, except into a well authorized by rule or authorized by permit under the Arizona UIC program, is prohibited. The construction of any well required to have a permit is prohibited until the permit has been issued.

R18-9-B608. Prohibition of Movement of Fluid into Underground Sources of Drinking Water
A. No owner or operator shall construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a manner that allows the movement of fluid containing any contaminant into USDWs, if the presence of that contaminant may cause a violation of any primary drinking water regulation under this Article, as shown in Table 1, or may otherwise adversely affect the health of persons. The applicant for a permit shall have the burden of showing that the requirements of this subsection are met.
B. For Class I, II, III, and VI wells, if any water quality monitoring of an USDW indicates the movement of any contaminant into the USDW, except as authorized under this Article, the Director shall prescribe such additional requirements for construction, corrective action, operation, monitoring, or reporting (including closure of the injection well) as are necessary to prevent such movement. In the case of wells authorized by permit, these additional requirements shall be imposed by modifying the permit in accordance with R18-9-C632 or the permit may be terminated under R18-9-C634 if cause exists, or appropriate enforcement action may be taken if the permit has been violated. In the case of Class V wells authorized by rule see R18-9-I650 through R18-9-I655 in Part I of this Article.
C. For Class V wells, if at any time the Director learns that a Class V well may cause a violation of primary drinking water regulations under this Article, they shall:
   1. Require the injector to obtain an individual permit;
   2. Order the injector to take such actions (including, where required, closure of the injection well) as may be necessary to prevent the violation; or
3. **Take enforcement action.**

D. Whenever the Director learns that a Class V well may be otherwise adversely affecting the health of persons, they may prescribe such actions as may be necessary to prevent the adverse effect, including any action authorized under subsection (C) of this Section.

E. Notwithstanding any other provision of this Section, the Director may take emergency action upon receipt of information that a contaminant which is present in or likely to enter a public water system or USDW may present an imminent and substantial endangerment to the health of persons.

A. **Hazardous Waste Injection.**

1. The following are prohibited, except as provided in subsection (B)(3):
   a. The construction of any well for the purpose of hazardous waste injection.
   b. The operation of any well for the purpose of hazardous waste injection.

2. The owner or operator of a well for the purpose of hazardous waste injection shall close the well in accordance with this subsection.

3. The owner or operator of a well for the purpose of hazardous waste injection shall comply with the following requirements regarding closure of the well:
   a. Prior to abandoning any well for the purpose of hazardous waste injection, the owner or operator shall plug or otherwise close the well in a manner acceptable to the Director.
   b. The owner or operator of a well for the purpose of hazardous waste injection must notify the Director of intent to abandon the well at least 30 days prior to abandonment.

B. **Class IV.**

1. The following are prohibited, except as provided in subsection (B)(3) of this Section:
   a. The construction of any Class IV well.
   b. The operation or maintenance of any Class IV well.

2. The owner or operator of a Class IV well shall comply with the requirements of R18-9-H649 regarding closure of Class IV wells.

3. Wells used to inject contaminated groundwater that has been treated and is being re injected into the same formation that it was drawn are not prohibited by this Section if such injection is approved by the Administrator or the Director pursuant to subsections (a), (b) or (c) below:
   a. Provisions for cleanup of releases under CERCLA, or
   b. The requirements and provisions under RCRA, or
   c. The requirements and provisions under other applicable state laws for corrective and remedial action.

**R18-9-B610. Waiver of Requirement by Director**

A. When injection does not occur into, through, or above an USDW, the Director may authorize a well or project with less stringent requirements for area of review, construction, mechanical integrity, operation, monitoring, and reporting than required under this Article or R18-9-D636 to the extent that reduction in requirements will not result in an increased risk of movement of fluids into an USDW.

B. When injection occurs through or above an USDW, but the radius of endangering influence when computed under R18-9-B612(A) is smaller or equal to the radius of the well, the Director may authorize a well or project with less stringent requirements for operation, monitoring, and reporting than required under R18-9-D636 to the extent that a reduction in requirements will not result in an increased risk of movement of fluids into an USDW.

C. When reducing requirements under this Section, the Director shall prepare a fact sheet under R18-9-C619 explaining the reasons for the action.

**R18-9-B611. Records**

The Director may require, by written notice on a selective well-by-well basis, an owner or operator of an injection well to establish and maintain records, make reports, conduct monitoring, and provide other information as is deemed necessary to determine whether the owner or operator has acted or is acting in compliance with this Article and Part C of the SDWA or its implementing regulations.

**R18-9-B612. Area of Review**

A. The area of review for each injection well or each field, project or area of the State shall be determined according to this Section. The Director may solicit input from the owners or operators of injection wells within the State as to which method is most appropriate for each geographic area or field.

B. Where the area of review is determined according to the zone of endangering influence:
1. The zone of endangering influence shall be:
   a. In the case of application(s) for well permit(s) under R18-9-C616 that area the radius of which is the lateral distance in which the pressures in the injection zone may cause the migration of the injection and/or formation fluid into an USDW; or
   b. In the case of an application for an area permit under R18-9-C624, the project area plus a circumscribing area the width of which is the lateral distance from the perimeter of the project area, in which the pressures in the injection zone may cause the migration of the injection and/or formation fluid into an USDW.

2. Computation of the zone of endangering influence may be based upon the parameters listed below and should be calculated for an injection time period equal to the expected life of the injection well or pattern. The following modified Theis equation illustrates one form which the mathematical model may take:

   \[
   r = \left( \frac{2.25KHt}{S^{10}} \right)^{1/2}
   \]

   where:

   \[
   X = \frac{4nKH(h_o - h_w \times S \times G_b)}{2.3Q}
   \]

   - \( r \) = Radius of endangering influence from injection well (length)
   - \( K \) = Hydraulic conductivity of the injection zone (length/time)
   - \( H \) = Thickness of the injection zone (length)
   - \( t \) = Time of injection (time)
   - \( S \) = Storage coefficient (dimensionless)
   - \( Q \) = Injection rate (volume/time)
   - \( h_o \) = Observed original hydrostatic head of injection zone (length) measured from the base of the lowermost USDW
   - \( h_w \) = Hydrostatic head of USDW (length) measured from the base of the lowest USDW
   - \( S \times G_b \) = Specific gravity of fluid in the injection zone (dimensionless)
   - \( \pi = 3.142 \) (dimensionless)

   The above equation is based on the following assumptions:

   1. The injection zone is homogenous and isotropic;
   2. The injection zone has infinite area extent;
   3. The injection well penetrates the entire thickness of the injection zone;
   4. The well diameter is infinitesimal compared to "\( r \)" when injection time is longer than a few minutes; and
   5. The emplacement of fluid into the injection zone creates instantaneous increase in pressure.

C. Where Fixed Radius is used, the following shall apply:

1. In the case of application(s) for well permit(s) under R18-9-C616 a fixed radius around the well of not less than one-quarter mile may be used.
2. In the case of an application for an area permit under R18-9-C624, a fixed radius width of not less than one-quarter mile for circumscribing area may be used.
3. In determining the fixed radius, the following factors shall be taken into consideration: Chemistry of injected and formation fluids; hydrogeology; population and ground-water use and dependence; and historical practices in the area.

D. If the area of review is determined by a mathematical model pursuant to subsections (B) of this Section, the permissible radius is the result of such calculation even if it is less than one-fourth mile.

R18-9-B613. Mechanical Integrity

A. An injection well has mechanical integrity if:

1. There is no significant leak in the casing, tubing or packer; and
2. There is no significant fluid movement into an USDW through vertical channels adjacent to the injection well bore.

B. One of the following methods must be used to evaluate the absence of significant leaks under subsection (A)(1) of this Section:
1. Following an initial pressure test, monitoring of the tubing-casing annulus pressure with sufficient frequency to be representative, as determined by the Director, while maintaining an annulus pressure different from atmospheric pressure measured at the surface;

2. Pressure test with liquid or gas; or

3. Records of monitoring showing the absence of significant changes in the relationship between injection pressure and injection flow rate for the following Class II enhanced recovery wells:
   a. Existing wells completed without a packer provided that a pressure test has been performed and the data is available and provided further that one pressure test shall be performed at a time when the well is shut down and if the running of such a test will not cause further loss of significant amounts of oil or gas; or
   b. Existing wells constructed without a long string casing, but with surface casing which terminates at the base of fresh water provided that local geological and hydrological features allow such construction and provided further that the annular space shall be visually inspected. For these wells, the Director shall prescribe a monitoring program which will verify the absence of significant fluid movement from the injection zone into an USDW.

C. One of the following methods must be used to determine the absence of significant fluid movement under subsection (A)(2) of this Section:
   1. The results of a temperature or noise log;
   2. For Class II only, cementing records demonstrating the presence of adequate cement to prevent such migration;
   3. For Class III wells where the nature of the casing precludes the use of the logging techniques prescribed at subsection (C)(1) of this Section, cementing records demonstrating the presence of adequate cement to prevent such migration; or
   4. For Class III wells where the Director elects to rely on cementing records to demonstrate the absence of significant fluid movement, the monitoring program prescribed by R18-9-G647(B) shall be designed to verify the absence of significant fluid movement.

D. The Director may allow the use of a test to demonstrate mechanical integrity other than those listed in subsections (B) and (C)(2) of this Section with the written approval of the Administrator.

E. In conducting and evaluating the tests enumerated in this Section or others to be allowed by the Director, the owner or operator and the Director shall apply methods and standards generally accepted in the industry. When the owner or operator reports the results of mechanical integrity tests to the Director, they shall include a description of the test(s) and the method(s) used. In making the evaluation, the Director shall review monitoring and other test data submitted since the previous evaluation.

F. The Director may require additional or alternative tests if the results presented by the owner or operator under subsection (E) of this Section are not satisfactory to the Director to demonstrate that there is no movement of fluid into or between USDWs resulting from the injection activity.

R18-9-B614. Plugging and Abandoning Class I, II, III, IV, and V Wells

A. Requirements for Class I, II and III wells.
   1. Prior to abandoning Class I, II and III wells, the well shall be plugged with cement in a manner which will not allow the movement of fluids either into or between USDWs. The Director may allow Class III wells to use other plugging materials if the Director is satisfied that such materials will prevent movement of fluids into or between USDWs.

2. Placement of the cement plugs shall be accomplished by one of the following:
   a. The Balance method;
   b. The Dump Bailer method;
   c. The Two-Plug method; or
   d. An alternative method approved by the Director, which will reliably provide a comparable level of protection to USDWs.

3. The well to be abandoned shall be in a state of static equilibrium with the mud weight equalized top to bottom, either by circulating the mud in the well at least once or by a comparable method prescribed by the Director, prior to the placement of the cement plug(s).

4. The plugging and abandonment plan required under R18-9-D635(15) and R18-9-D636(A)(5) shall, in the case of a Class III project which underlies or is in an aquifer which has been exempted under R18-9-A606, also demonstrate adequate protection of USDWs. The Director shall prescribe aquifer cleanup and monitoring where it is deemed necessary and feasible to insure adequate protection of USDWs.

55
B. Requirements for Class IV wells. Prior to abandoning a Class IV well, the owner or operator shall close the well in accordance with R18-9-H649.

C. Requirements for Class V wells.
   1. Prior to abandoning a Class V well, the owner or operator shall close the well in a manner that prevents the movement of fluid containing any contaminant into an USDW, if the presence of that contaminant may cause a violation of any primary drinking water regulation under Table 1 of this Article or may otherwise adversely affect the health of persons.
   2. The owner or operator shall dispose of or otherwise manage any soil, gravel, sludge, liquids, or other materials removed from or adjacent to the well in accordance with all applicable Federal, State, and local regulations and requirements.

R18-9-B615. Transitioning from Class II to Class VI Injection Well

A. Owners and operators that are injecting carbon dioxide for the primary purpose of long-term storage into an oil and gas reservoir must apply for and obtain a Class VI geologic sequestration permit when there is an increased risk to the USDWs compared to Class II operations. In determining if there is an increased risk to USDWs, the owner or operator must consider the factors specified in subsection (B) of this Section.

B. The Director shall determine when there is an increased risk to USDWs compared to Class II operations and a Class VI permit is required. In order to make this determination the Director shall consider the following:
   1. Increase in reservoir pressure within the injection zone(s);
   2. Increase in carbon dioxide injection rates;
   3. Decrease in reservoir production rates;
   4. Distance between the injection zone(s) and USDWs;
   5. Suitability of the Class II area of review delineation;
   6. Quality of abandoned well plugs within the area of review;
   7. The owner’s or operator’s plan for recovery of carbon dioxide at the cessation of injection;
   8. The source and properties of injected carbon dioxide; and
   9. Any additional site-specific factors as determined by the Director.

PART C. AUTHORIZATION BY PERMIT FOR UNDERGROUND INJECTION

R18-9-C616. Individual Permits; Application for Individual Permits

A. Unless an underground injection well is authorized by rule under R18-9-I650, all injection activities including construction of an injection well are prohibited until the owner or operator is authorized by permit. Authorization by rule for a well or project that has submitted a permit application terminates for the well or project upon the effective date of the permit. Procedures for applications, issuance, and administration of emergency permits are found exclusively under R18-9-C625.

B. When a facility or activity is owned by one person but is operated by another person, it is the operator’s duty to obtain a permit.

C. Any person who performs or proposes an underground injection for which a permit is or will be required shall submit an application to the Director in accordance with the Arizona UIC program as follows:
   1. For existing wells, as expeditiously as practicable.
   2. For new injection wells, except new wells authorized by an existing area permit under R18-9-C624(C), at a reasonable time before construction is expected to begin.

D. All applicants for Class I, II, III, and V permits shall provide the following information to the Director, using the application form provided by the Director. Applicants for Class VI permits shall follow the criteria provided in R18-9-J657.
   1. Activities conducted by the applicant which require a permit;
   2. Name, mailing address, and location of the facility for which the application is submitted;
   3. Up to four NAICS codes which best reflect the principal products or services provided by the facility;
   4. The operator’s name, address, telephone number, ownership status, and status as Federal, State, private, public, or other entity;
   5. A listing of all state and federal environmental permits or construction approvals received or applied for and other relevant environmental permits;
   6. A topographic map (or other map if a topographic map is unavailable) extending one mile beyond the property boundaries of the source depicting the facility and each of its intake and discharge structures; each of its hazardous waste treatment, storage, or disposal facilities; each well where fluids from the
facility are injected underground; and those wells, springs, and other surface water bodies, and drinking water wells listed in public records or otherwise known to the applicant within a quarter mile of the facility property boundary;
7. A brief description of the nature of the business;
8. A plugging and abandonment plan that meets the requirements of R18-9-B614 and is acceptable to the Director;
9. A listing of any historic property or potential historic property as defined by R12-8-301.

E. Applicants shall keep records of all data used to complete permit applications and any supplemental information submitted under this Section for a period of at least three years from the date the application is signed.

R18-9-C617. Signatories
A. All permit applications, except those submitted for Class II wells, shall be signed as follows:
   1. For a corporation: by a responsible corporate officer. For the purpose of this Section, a responsible corporate officer means:
      a. A president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation; or
      b. The manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25 million, if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.
   2. For a Partnership or sole proprietorship: by a general Partner or the proprietor, respectively; or
   3. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this Section, a principal executive officer of a Federal agency includes:
      a. The chief executive officer of the agency; or
      b. A senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.
B. All reports required by permits, other information requested by the Director, and all permit applications submitted for Class II wells under R18-9-C616 shall be signed by a person described in subsection (A) of this Section, or by a duly authorized representative of that person. A person is a duly authorized representative only if:
   1. The authorization is made in writing by a person described in subsection (A) of this Section;
   2. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, or position of equivalent responsibility; and
   3. The written authorization is submitted to the Director.
C. If an authorization under subsection (B) of this Section is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of subsection (B) of this Section must be submitted to the Director prior to or together with any reports, information, or applications to be signed by an authorized representative.
D. Any person signing a document under subsection (A) or (B) of this Section shall make the following certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

R18-9-C618. Draft Permits
A. Once an application is complete, the Director shall tentatively decide whether to prepare a draft permit or to deny the application.
B. If the Director tentatively decides to deny the permit application, they shall issue a notice of intent to deny. A notice of intent to deny the permit application is a type of draft permit which follows the same procedures as any draft permit prepared under this section. If the Director's final decision is that the tentative decision to deny
the permit application was incorrect, they shall withdraw the notice of intent to deny and proceed to prepare a draft permit under subsection (D) of this section.

C. If the Director decides to prepare a draft permit, it shall contain the following information, to the extent applicable:
   1. All conditions under R18-9-D635;
   2. All compliance schedules under R18-9-D637;
   3. All monitoring requirements under R18-9-D638; and
   4. Permit conditions under R18-9-D636.

D. All draft permits prepared under this Section shall be accompanied by a brief summary of the basis for the draft permit conditions or the intent to deny, including references to applicable statutory or regulatory provisions and a fact sheet pursuant to R18-9-C619. The Director shall provide the applicant with the draft permit and the fact sheet and allow reasonable time for informal comment by the applicant prior to publicly noticing the draft permit and fact sheet. The Director shall give notice of opportunity for a public hearing and public comment, issue a final permit decision, and respond to comments.

R18-9-C619. Fact Sheet
A. A fact sheet shall be prepared for every draft permit for a UIC facility or activity. The fact sheet shall briefly set forth the principal facts and the significant factual, legal, methodological, and policy questions considered in preparing the draft permit. The Director shall send the fact sheet to the applicant and, on request, to any other person.

B. The fact sheet shall include, when applicable:
   1. A brief description of the type of facility or activity that is the subject of the draft permit.
   2. The type and quantity of wastes, fluids, or pollutants that are proposed to be or are being injected.
   3. A brief summary of the basis for the draft permit conditions including references to applicable statutory or regulatory provisions and appropriate supporting references to the administrative record.
   4. Reasons why any requested variance or alternatives to required standards do or do not appear justified.
   5. A description of the procedures for reaching a final decision on the draft permit, including:
      a. The beginning and ending dates of the comment period under R18-9-C620 and the address where comments will be received;
      b. Procedures for requesting a hearing and the nature of that hearing; and
      c. Any other procedures by which the public may Participate in the final decision.
   6. The name and telephone number of a person to contact for additional information.

R18-9-C620. Public Notice of Permit Actions and Public Comment Period
A. The Director shall give public notice that the following actions have occurred:
   1. A draft permit that has been prepared under R18-9-C618 and
   2. A hearing has been scheduled under R18-9-C622.

B. Public notices may describe more than one permit or permit action.

C. Public notice of the preparation of a draft permit required under subsection (A) of this Section:
   1. Shall allow at least 30 days for public comment; and
   2. Shall be given at least 30 days before the hearing date.

D. Public notice of activities described in subsection (A) of this Section shall be given by the following methods:
   1. Delivery of a copy of the notice to:
      a. The applicant;
      b. Any affected federal, state, tribal, or local agency, or council of government;
      c. Federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources, and the State Historic Preservation Office;
      d. Any person who requested, in writing, notification of the activity;
      e. Any persons on a contact list developed from past permit proceedings and public outreach; and
      f. For Class VI injection well UIC permits, mailing or e-mailing a notice to State and local oil and gas regulatory agencies and State agencies regulating mineral exploration and recovery and all agencies that oversee injection wells in the State.
   2. For Major Facilities only, newspaper publication in accordance with A.A.C. R18-1-401(A)(1).

E. All public notices issued under this Part shall contain the following information:
   1. Name and address of the Department;
2. Name and address of the permittee or permit applicant and, if different, of the facility or activity regulated by the permit;
3. A brief description of the business conducted at the facility or activity described in the permit application or the draft permit;
4. Name, address, and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit or draft general permit, as the case may be, fact sheet, and the application;
5. A brief description of the comment procedures, the time and place of any hearing, including a statement of procedures to request a hearing, unless a hearing has already been scheduled, and other procedures that the public may use to participate in the final permit decision; and
6. Any additional information considered necessary to the permit decision.

F. In addition to the general public notice described in subsection (E) of this Section, the public notice of hearing under R18-9-C622 shall contain the following information:
1. Reference to the date of previous public notices relating to the permit;
2. Date, time, and place of the hearing; and
3. A brief description of the nature and purpose of the hearing, including the applicable rules and procedures.

G. In addition to the general public notice described in subsection (E) of this Section, the Director shall deliver a copy of the fact sheet, permit application, and draft permit to all persons identified in subsections (D)(1)(a), (D)(1)(b), and (D)(1)(c).

**R18-9-C621. Public Comments and Requests for Public Hearings**

During the public comment period provided under R18-9-C620, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered as provided in R18-9-C623.

**R18-9-C622. Public Hearings**

A. The Director shall hold a public hearing whenever they find, on the basis of a request, a significant degree of public interest in a draft permit(s).

B. The Director may also hold a public hearing at their discretion such as when a hearing might clarify one or more issues involved in the permit decision. The Director may designate a presiding officer if a hearing is held.

C. Public notice of the hearing shall be given as specified in R18-9-C620.

D. Any person may submit oral or written statements and data concerning the draft permit. Reasonable limits may be set upon the time allowed for oral statements, and the submission of statements in writing may be required. The public comment period under R18-9-C620 shall automatically be extended to the close of any public hearing under this Section. The hearing officer may also extend the comment period by so stating at the hearing.

E. An audio recording or written transcript of the hearing shall be made available to the public upon request.

**R18-9-C623. Response to Comments**

A. At the time that any final permit is issued under R18-9-C627, the Director shall issue a response to comments. This response shall:
1. Specify which provisions, if any, of the draft permit have been changed in the final permit decision, and the reasons for the change; and
2. Briefly describe and respond to all significant comments on the draft permit raised during the public comment period, or during any hearing.

B. The response to comments shall be available to the public.

**R18-9-C624. Area Permits**

A. The Director may issue a permit on an area basis, rather than for each well individually, provided that the permit is for injection wells:
1. Described and identified by location in permit application(s) if they are existing wells, except that the Director may accept a single description of wells with substantially the same characteristics;
2. Within the same well field, facility site, reservoir, project, or similar unit located in Arizona;
3. Operated by a single owner or operator;
4. Used to inject fluids other than hazardous waste; and
5. Other than Class VI wells.
B. Area permits shall specify:
   1. The area within which underground injections are authorized; and
   2. The requirements for construction, monitoring, reporting, operation, and abandonment, for all wells
      authorized by the permit.
C. The area permit may authorize the permittee to construct and operate, convert, or plug and abandon wells within
   the permit area provided:
   1. The permittee notifies the Director at such time as the permit requires;
   2. The additional well satisfies the criteria in subsection (A) of this Section and meets the requirements
      specified in the permit under subsection (B) of this Section; and
   3. The cumulative effects of drilling and operation of additional injection wells are considered by the
      Director during evaluation of the area permit application and are acceptable to the Director.
D. If the Director determines any well that is constructed pursuant to subsection (C) of this Section does not satisfy
   any of the requirements of subsections (C)(1) and (2) of this Section the Director may modify the permit under
   R18-9-C632, terminate under R18-9-C634, or take enforcement action. If the Director determines that
   cumulative effects are unacceptable, the permit may be modified under R18-9-C632.

R18-9-C625. Emergency Permits
A. Notwithstanding any other provision of this Article, the Director may temporarily permit a specific underground
   injection if:
   1. An imminent and substantial endangerment to the health of persons will result unless a temporary
      emergency permit is granted; or
   2. A substantial and irretrievable loss of oil or gas resources will occur unless a temporary emergency permit
      is granted to a Class II well; and
      a. Timely application for a permit could not practicably have been made; and
      b. The injection will not result in the movement of fluids into USDWs; or
   3. A substantial delay in production of oil or gas resources will occur unless a temporary emergency permit is
      granted to a new Class II well and the temporary authorization will not result in the movement of fluids
      into an USDW.
B. Requirements for issuance.
   1. Any temporary permit under subsection (A)(1) of this Section shall be for no longer term than required to
      prevent the hazard.
   2. Any temporary permit under subsection (A)(2) of this Section shall be for no longer than 90 days, except
      that if a permit application has been submitted prior to the expiration of the 90-day period, the Director
      may extend the temporary permit until final action on the application.
   3. Any temporary permit under subsection (A)(3) of this Section shall be issued only after a complete permit
      application has been submitted and shall be effective until final action on the application.
   4. Notice of any temporary permit under this Section shall be published in accordance with R18-9-C621
      within ten days of the issuance of the permit.
   5. The temporary permit under this Section may be either oral or written. If oral, it must be followed within
      five calendar days by a written temporary emergency permit.
   6. The Director shall condition the temporary permit in any manner they determine is necessary to ensure
      that the injection will not result in the movement of fluids into an USDW.

R18-9-C626. Effect of a Permit
A. Except for Class II and III wells, compliance with a permit during its term constitutes compliance, for purposes
   of enforcement, with this Article and Part C of the SDWA. However, a permit may be modified, revoked and
   reissued, or terminated during its term for cause as set forth in R18-9-C632 and R18-9-C634.
B. The issuance of a permit does not convey any property rights of any sort, or any exclusive privilege.
C. The issuance of a permit does not authorize any injury to persons or property or invasion of other private rights,
   or any infringement of State or local law or regulations.

R18-9-C627. Final Permit Decision and Notification
A. Issuance of a final permit decision by the Director shall be accompanied by the permit and an updated fact sheet
   per R18-9-C619, if applicable, and a notification to the applicant and each person who has submitted written
   comments or requested notice of the final permit decision. The notice and hearing procedures are subject to
   either Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7 of the A.R.S.
B. The notice shall include:
1. If applicable, the reasons for the denial, revocation or termination, including reference to the statutes or rules on which the decision is based.
2. A description of the party’s right to request a hearing and a reference to the procedures for appealing the final permit decision, including the number of days within which an appeal may be filed and the name and telephone number of the Department contact person who can answer questions regarding the appeals process.
3. A reference to the applicant’s right to request an informal settlement conference under A.R.S. § 41-1092.06.

C. If the final permit decision is based on a determination by the Director that the applicable criteria under R18-9-A606 are not satisfied, then that determination may be included as part of the appeal.

D. The final permit decision shall take effect 30 days after its issuance in accordance with the notification requirements of subsection A of this Section unless stayed pursuant to Title 41, Chapter 6, Article 10, or Title 49, Chapter 2, Article 7 of the A.R.S.

E. If, under this Article, the issuance, modification, or revocation and reissuance of a permit necessitates a new aquifer exemption or enlargement of a previously approved aquifer exemption, then the issuance, modification, or revocation and reissuance of the permit is appealable, but shall not become effective unless the new aquifer exemption or enlargement of the previously approved aquifer exemption has been approved by the Administrator.

F. If, under this Article, the issuance, modification, or revocation and reissuance of a permit necessitates an injection depth waiver pursuant to R18-9-J670 of this Article then the issuance, modification, or revocation and reissuance of the permit is appealable, but shall not become effective until the Director is in receipt of written concurrence from the Administrator.

R18-9-C628. Permit Duration
A. Permits for Class I and Class V wells shall be effective for a fixed term not to exceed ten years. UIC permits for Class II and III wells shall be issued for a period up to the operating life of the facility. UIC permits for Class VI wells shall be issued for the operating life of the facility and the post-injection site care period. The Director shall review each issued Class II, III, and VI well UIC permit at least once every five years to determine whether it should be modified, revoked and reissued, terminated, or a minor modification made as provided in R18-9-C632.

B. Except as provided in R18-9-C629, the term of a permit shall not be extended by modification beyond the maximum duration specified in this Section.

C. The Director may issue any permit for a duration that is less than the full allowable term under this Section.

R18-9-C629. Continuation of Expiring Permits
A. The conditions of an expiring permit continue in force under A.R.S. § 41-1092.11(A) until the effective date of a new permit if:
1. The permittee has submitted a timely application that is a complete application for a new permit; and
2. The Director, through no fault of the permittee, does not issue a new permit with an effective date on or before the expiration date of the prior permit.

B. Permits continued under this Section remain fully effective and enforceable.

C. When the permittee is not in compliance with the conditions of the expiring or expired permits the Director may choose to do any or all of the following:
1. Initiate enforcement action based upon the permit that has been continued;
2. Issue a notice of intent to deny the new permit. If the permit is denied, the owner or operator would then be required to cease the activities authorized by the continued permit or be subject to enforcement action for operating without a permit;
3. Issue a new permit under this Article with appropriate conditions; or
4. Take other action as authorized under this Article.

D. Upon the effective date of EPA’s approval of Arizona’s UIC program, the Department shall administer any permit authorized or issued under the EPA UIC program in the state of Arizona, excluding Indian lands. The Director may continue expired or expiring EPA-issued UIC permits until the effective date of a new state-issued UIC permit.
R18-9-C630. Permit Transfer
A. Except as provided in subsection (B) of this Section, a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued under R18-9-C632(F)(2), or a minor modification made under R18-9-C633(4), to identify the new permittee and incorporate such other requirements as may be necessary under this Article the Safe Drinking Water Act.
B. As an alternative to transfers under subsection (A) of this Section, any UIC permit for a well not injecting hazardous waste or injecting carbon dioxide for geological sequestration may be automatically transferred to a new permittee if:
   1. The current permittee notifies the Director at least 30 days in advance of the proposed transfer date referred to in subsection (B)(2) of this Section;
   2. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer or permit responsibility, coverage, and liability between them, and the notice demonstrates that the financial responsibility requirements of R18-9-D636(A)(6) will be met by the new permittee; and
   3. The Director does not notify the existing permittee and the proposed new permittee of the Director’s intent to modify or revoke and reissue the permit. A modification under this Section may also be a minor modification under R18-9-C633. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in subsection (B)(2) of this Section.

R18-9-C631. Modification; Revocation and Reissuance; or Termination of Permits
A. Permits may only be modified or revoked and reissued pursuant to R18-9-C632 or terminated pursuant to R18-9-C634 either at the request of any interested person, including the permittee, or upon the Director’s initiative. All requests shall be made in writing and shall contain facts or reasons supporting the request.
B. If the Director decides a request to modify, revoke and reissue, or terminate is not justified, they shall send the requestor a brief written response giving a reason for the decision. Denial of a request to terminate does not require a notice of intent to deny. Denial of a request for modification or revocation and reissuance requires a notice of intent to deny only when the request is made by the permittee, the scope of the request has not previously been requested and denied and the request is not for a minor modification. A notice of intent to deny is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.
C. If the Director preliminarily decides to modify or revoke and reissue a permit under R18-9-C632, they shall prepare a draft permit under R18-9-C618 incorporating the proposed changes and notify the permittee in writing of the reason for the preliminary decision to modify or revoke and reissue a permit with reference to the statute or rule on which the decision is based. The Director may request additional information and, in the case of a modified permit, may require the submission of an updated application. The Director shall require the submission of a new application in the case of revoked and reissued permits.
D. In a permit modification under this Section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this Section, the entire permit is reopened just as if the permit had expired and was being reissued. During any modification or revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is issued.
E. Minor modifications pursuant to R18-9-C633 are not subject to the requirements of this Section.
F. If the Director preliminarily decides to terminate under R18-9-C634(A)(1), (2) or (3), the Director shall issue a notice of intent to terminate that identifies the reason for the preliminary decision to terminate with reference to the statute or rule on which the decision is based. A notice of intent to terminate is not required when a permittee requests termination under R18-9-C634(A)(4). A notice of intent to terminate is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.

R18-9-C632. Modification; Revocation and Reissuance of Permits
A. When the Director receives any information (for example, inspects the facility, receives information submitted by the permittee as required in the permit, receives a request for modification or revocation and reissuance under R18-9-C631, or conducts a review of the permit file) they may determine whether or not one or more of the causes listed in subsections (E) and (F) of this Section for modification or revocation and reissuance or both exist.
B. If cause exists, the Director may modify or revoke and reissue the permit accordingly, subject to the limitations of subsection (G) of this Section, and may request an updated application if necessary.
C. If cause does not exist under this Section or R18-9-C633, the Director shall not modify or revoke and reissue the permit.

D. If a permit modification satisfies the criteria in R18-9-C633 for “minor modifications” the permit may be modified without a draft permit or public review. Otherwise, a draft permit must be prepared and other procedures under this Article must be followed.

E. For Class II, Class III or Class VI wells the following may be causes for revocation and reissuance as well as modification; and for all other wells the following may be cause for revocation or reissuance as well as modification when the permittee requests or agrees:

1. There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.

2. Permits other than for Class II and III wells may be modified during their terms for this cause only if the information was not available at the time of permit issuance, other than revised regulations, guidance, or test methods, and would have justified the application of different permit conditions at the time of issuance. For UIC area permits under R18-9-C624, this cause shall include any information indicating that cumulative effects on the environment are unacceptable.

3. The standards or regulations on which the permit was based have been changed by promulgation of new regulations or by judicial decision after the permit was issued. Permits other than those for Class II, Class III or Class VI wells may be modified during their permit terms for this cause only as follows:
   a. For promulgation of amended standards or regulations, when:
      i. The permit condition requested to be modified was based on a regulation promulgated under this Article;
      ii. ADEQ has revised, withdrawn, or modified that portion of the regulation on which the permit condition was based, and
      iii. A permittee requests modification in accordance with R18-9-C631 within 90 days after Arizona Administrative Register notice of the ADEQ action on which the request is based.
   b. For judicial decisions, a court of competent jurisdiction has remanded and stayed ADEQ promulgated regulations if the remand and stay concern that portion of the regulations on which the permit condition was based and a request is filed by the permittee in accordance with R18-9-C631 within 90 days of judicial remand.

4. The Director determines if good cause exists for modification of a compliance schedule. Good cause includes unforeseen circumstances, like a strike, a flood, a materials shortage or other events over which the permittee has little or no control and for which there is no reasonably available remedy. See also R18-9-C633 (minor modifications).

5. Additionally, for Class VI wells, whenever the Director determines that permit changes are necessary based on:
   a. Area of review reevaluations under R18-9-J659(E)(1);
   b. Any amendments to the testing and monitoring plan under R18-9-J665(10);
   c. Any amendments to the injection well plugging plan under R18-9-J667(C);
   d. Any amendments to the post-injection site care and site closure plan under R18-9-J668(A)(3);
   e. Any amendments to the emergency and remedial response plan under R18-9-J669(D); or
   f. A review of monitoring and/or testing results conducted in accordance with permit requirements.

F. The following are causes to modify or, alternatively, revoke and reissue a permit:

1. Cause exists for termination under R18-9-C634, and the Director determines that modification or revocation and reissuance is appropriate.

2. The Director has received notification of a proposed transfer of the permit. A permit also may be modified to reflect a transfer after the effective date of an automatic transfer under R18-9-C630(B) but will not be revoked and reissued after the effective date of the transfer except upon the request of the new permittee.

3. A determination that the waste being injected is a hazardous waste as defined in A.R.S. § 49-921 either because the definition has been revised, or because a previous determination has been changed.

G. Suitability of the facility location will not be considered at the time of permit modification or revocation and reissuance unless new information or standards indicate that a threat to human health or the environment exists which was unknown at the time of permit issuance.
R18-9-C633. Minor Modifications of Permits
Upon the consent of the permittee, the Director may modify a permit to make the corrections or allowances for changes in the permitted activity listed in this Section, without following the procedures of this Article. Any permit modification not processed as a minor modification under this Section must be made for cause and with a draft permit and public notice as required by R18-9-C632. Minor modifications may only:

1. Correct typographical errors;
2. Require more frequent monitoring or reporting by the permittee;
3. Change an interim compliance date in a schedule of compliance, provided the new date is not more than 120 days after the date specified in the existing permit and does not interfere with attainment of the final compliance date requirement;
4. Allow for a change in ownership or operational control of a facility where the Director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittees has been submitted to the Director;
5. Change quantities or types of fluids injected which are within the capacity of the facility as permitted and, in the judgment of the Director, would not interfere with the operation of the facility or its ability to meet conditions described in the permit and would not change its classification;
6. Change construction requirements approved by the Director pursuant to R18-9-D636(A)(1), provided that any such alteration shall comply with the requirements of this Article;
7. Amend a plugging and abandonment plan that has been updated under R18-9-D636(A)(5); or
8. Amend a Class VI injection well testing and monitoring plan, plugging plan, post-injection site care and site closure plan, or emergency and remedial response plan where the modifications merely clarify or correct the plan, as determined by the Director.

R18-9-C634. Termination of Permits
A. The Director may terminate a permit during its term, or deny a permit renewal application for the following causes:
   1. Noncompliance by the permittee with any condition of the permit;
   2. The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time; or
   3. A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or
   4. The permittee has requested termination of their permit due to the completion of the terms and conditions therein, including proper abandonment or plugging pursuant to R18-9-B614.
B. The Director shall follow the applicable procedures as required under R18-9-C631(F) in terminating any permit under this Section.

PART D: PERMIT CONDITIONS FOR UNDERGROUND INJECTION

R18-9-D635. Conditions Applicable to All Permits
The following conditions apply to all UIC permits. All conditions applicable to all permits shall be incorporated into the permits issued under this Article, either expressly or referenced by specific citation. If incorporated by reference, a specific citation to this Section must be given in the permit.

1. The permittee must comply with all conditions of any permit issued under this Article. Any permit noncompliance constitutes a violation of this Article and is grounds for enforcement action; for permit modification, revocation and reissuance, or termination; or for denial of a permit renewal application unless otherwise authorized in an emergency permit under R18-9-C625.
2. If the permittee wishes to continue any activity regulated by permit under this Article after the expiration date of this permit, the permittee must apply for and obtain a new permit.
3. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
4. The permittee shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit.
5. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control, and related appurtenances, that are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate
funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit.

6. This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.

7. This permit does not convey property rights of any sort, or any exclusive privilege.

8. The permittee shall furnish to the Director, within a time specified, any information which the Director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the Director, upon request, copies of records required to be kept by this permit.

9. The permittee shall allow the Director, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:
   a. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;
   b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
   c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
   d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by this Article the SDWA, any substances or parameters at any location.

10. Monitoring and records.
    a. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
    b. The permittee shall retain records of all monitoring information, including the following:
       i. Calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three years from the date of the sample, measurement, report, or application. This period may be extended by request of the Director at any time; and
       ii. The nature and composition of all injected fluids until three years after the completion of any plugging and abandonment procedures specified under R18-9-D636(A)(5), or under this Article as appropriate. The Director may require the owner or operator to deliver the records to the Director at the conclusion of the retention period.
    c. Records of monitoring information shall include:
       i. The date, exact place, and time of sampling or measurements;
       ii. The individual(s) who performed the sampling or measurements;
       iii. The date(s) analyses were performed;
       iv. The individual(s) who performed the analyses;
       v. The analytical techniques or methods used; and
       vi. The results of such analyses.
    d. Owners or operators of Class VI wells shall retain records as specified in Part J of this Article, including R18-9-J659(G), R18-9-J666(6), R18-9-J667(D), R18-9-J668(F), and R18-9-J668(H).

11. All applications, reports, or information submitted to the Director shall be signed and certified as required under R18-9-C617.

12. Reporting requirements.
    a. The permittee shall give notice to the Director as soon as possible of any planned physical alterations or additions to the permitted facility.
    b. The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity that may result in noncompliance with permit requirements.
    c. This permit is not transferable to any person except after notice to the Director. The Director may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under this Article.
    d. Monitoring results shall be reported at the intervals specified in this permit.
e. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 30 days following each schedule date.

f. The permittee shall report any noncompliance that may endanger health or the environment within 24 hours, including:
   i. Any monitoring or other information that indicates any contaminant may cause an endangerment to a USDW; or
   ii. Any noncompliance with a permit condition or malfunction of the injection system that may cause fluid migration into or between USDWs. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within five days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause, the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

   g. The permittee shall report all instances of noncompliance not reported under subsections (A)(12)(a), (A)(12)(d), (A)(12)(e), and (A)(12)(f) of this Section, at the time monitoring reports are submitted. The reports shall contain the information listed in subsection (A)(12)(f) of this Section.

h. Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Director, it shall promptly submit such facts or information.

13. Except for all new wells authorized by an area permit under R18-9-C624(C), a new injection well may not commence injection until construction is complete; and:
   a. The permittee has submitted notice of completion of construction to the Director; and
   b. Either of the following apply:
      i. The Director has inspected or otherwise reviewed the new injection well and finds it is in compliance with the conditions of the permit; or
      ii. The permittee has not received notice from the Director of the intent to inspect or otherwise review the new injection well within 13 days of the date of the notice under subsection (A)(13)(a) of this Section, in which case prior inspection or review is waived and the permittee may commence injection. The Director shall include in the notice a reasonable time period in which the well shall be inspected.

14. The permittee shall notify the Director at such times as the permit requires before conversion or abandonment of the well or in the case of area permits before closure of the project.

15. A Class I, II, or III permit shall include, and a Class V permit may include, conditions that meet the requirements of R18-9-B614 to ensure that plugging and abandonment of the well will not allow the movement of fluids into or between USDWs. Where the plan meets the requirements of R18-9-B614, the Director shall incorporate the plan into the permit as a permit condition. Where the Director's review of an application indicates that the permittee's plan is inadequate, the Director may require the applicant to revise the plan, prescribe conditions meeting the requirements of this subsection, or deny the permit. A Class VI permit shall include conditions that meet the requirements set forth in R18-9-J667. Where the plan meets the requirements of R18-9-J667, the Director shall incorporate it into the permit as a permit condition. For purposes of this subsection, temporary or intermittent cessation of injection operations is not abandonment.

16. Within 60 days after plugging a well or at the time of the next quarterly report, whichever is less, the owner or operator shall submit a report to the Director. If the quarterly report is due less than 15 days before completion of plugging, then the report shall be submitted within 60 days. The report shall be certified as accurate by the person who performed the plugging operation. Such report shall consist of either:
   a. A statement that the well was plugged in accordance with the plan previously submitted to the Director; or
   b. Where actual plugging differed from the plan previously submitted, an updated version of the plan on the form supplied by the Director, specifying the differences.

17. Duty to establish and maintain mechanical integrity.
a. The owner or operator of a Class I, II, III or VI well permitted under this Article shall establish mechanical integrity prior to commencing injection or on a schedule determined by the Director. Thereafter the owner or operator of Class I, II, and III wells must maintain mechanical integrity as defined in R18-9-B613 and the owner or operator of Class VI wells must maintain mechanical integrity as defined in R18-9-J664.

b. When the Director determines that a Class I, II, III or VI well lacks mechanical integrity pursuant to R18-9-B613 or R18-9-J664 for Class VI, written notice of the determination will be given to the owner or operator. Unless the Director requires immediate cessation, the owner or operator shall cease injection into the well within 48 hours of receipt of the Director's determination. The Director may allow plugging of the well pursuant to the requirements of R18-9-B614 or require the permittee to perform such additional construction, operation, monitoring, reporting, and corrective action as is necessary to prevent the movement of fluid into or between USDWs caused by the lack of mechanical integrity. The owner or operator may resume injection upon written notification from the Director that the owner or operator has demonstrated mechanical integrity pursuant to R18-9-B613.

c. The Director may allow the owner or operator of a well that lacks mechanical integrity pursuant to R18-9-B613(A)(1) to continue or resume injection, if the owner or operator has made a satisfactory demonstration that there is no movement of fluid into or between USDWs.

R18-9-D636. Establishing Permit Conditions
A. In addition to conditions required in R18-9-D635, the Director shall establish conditions, as required on a case-by-case basis under R18-9-C628 (Permit Duration), R18-9-D637 (Schedules of Compliance), and R18-9-D638 (Requirements for Recording and Reporting Monitoring Results). Permits for owners or operators of Class VI injection wells shall include conditions meeting the requirements of Part J of this Article. Permits for other wells shall contain the following requirements, when applicable.

1. Construction requirements as set forth in this Article. Existing wells shall achieve compliance with such requirements according to a compliance schedule established as a permit condition. The owner or operator of a proposed new injection well shall submit plans for testing, drilling, and construction as part of the permit application. Except as authorized by an area permit, no construction may commence until a permit has been issued containing construction requirements. New wells shall be in compliance with these requirements prior to commencing injection operations. Changes in construction plans during construction may be approved by the Director as minor modifications as defined under R18-9-C633. No such changes may be physically incorporated into construction of the well prior to approval of the modification by the Director.

3. Operation requirements as set forth in this Article; the permit shall establish any maximum injection volumes and/or pressures necessary to assure that fractures are not initiated in the confining zone, that injected fluids do not migrate into any USDW, that formation fluids are not displaced into any USDW, and to assure compliance with the operating requirements under this Article.

4. Monitoring and reporting requirements as set forth in this Article. The permittee shall be required to identify types of tests and methods used to generate the monitoring data. Monitoring of the nature of injected fluids shall comply with an analytical method prescribed in A.A.C. R9-14-610, or an alternative analytical method approved under A.A.C. R9-14-610(C), or as approved by the Director. A test result from a sample taken to determine compliance with a national primary drinking water standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

5. After a cessation of operations for two years the owner or operator shall plug and abandon the well in accordance with the plan unless they:
   a. Provide notice to the Director; and
   b. Describe actions or procedures, satisfactory to the Director, that the owner or operator will take to ensure that the well will not endanger USDWs during the period of temporary abandonment. These actions and procedures shall include compliance with the technical requirements applicable to active injection wells unless waived by the Director.

a. The permittee, including the transferor of a permit, is required to demonstrate and maintain financial responsibility and resources to close, plug, and abandon the underground injection operation in a manner prescribed by the Director until:
   i. The well has been plugged and abandoned in accordance with an approved plugging and abandonment plan pursuant to R18-9-D635(15), R18-9-B614, and R18-9-J667, and submitted a plugging and abandonment report pursuant to R18-9-D635(16); or
   ii. The well has been converted in compliance with the requirements of R18-9-D635(14); or
   iii. The transferor of a permit has received notice from the Director that the owner or operator receiving transfer of the permit, the new permittee, has demonstrated financial responsibility for the well.

b. The permittee shall show evidence of such financial responsibility to the Director by the submission of a surety bond, or other adequate assurance, such as a financial statement or other materials acceptable to the Director. For Class VI wells, the permittee shall show evidence of such financial responsibility to the Director by the submission of a qualifying instrument, such as a financial statement or other materials acceptable to the Director. The owner or operator of a Class VI well must comply with the financial responsibility requirements set forth in R18-9-J660.

7. A permit for any Class I, II, III or VI well or injection project that lacks mechanical integrity shall include, and for any Class V well may include, a condition prohibiting injection operations until the permittee shows to the satisfaction of the Director under R18-9-B613 or R18-9-J664 of this Chapter for Class VI, that the well has mechanical integrity.

8. The Director shall impose on a case-by-case basis such additional conditions as are necessary to prevent the migration of fluids into USDWs.

B. In addition to conditions required in all permits, the Director shall establish conditions in permits as required on a case-by-case basis, to provide for and assure compliance with all applicable requirements of this Article.

1. Applicable requirements include, but are not limited to:
   a. State statutory or regulatory requirements in effect prior to final administrative disposition of a permit; or
   b. Any requirement in effect prior to the modification or revocation and reissuance of a permit, to the extent allowed under R18-9-C632.

C. New or reissued permits, and to the extent allowed under R18-9-C632 modified or revoked and reissued permits, shall incorporate each of the applicable requirements referenced in this Section.

D. All permit conditions shall be incorporated either expressly or by reference. If incorporated by reference, a specific citation to the applicable regulations or requirements must be given in the permit.

E. Permits shall provide language on duration, expiration and termination.

R18-9-D637. Compliance Schedule

A. A permit may, when appropriate, specify a schedule for compliance with this Article.

1. Any compliance schedules shall require compliance as soon as possible, and in no case later than three years after the effective date of the permit.

2. Except as provided in subsection (B)(1)(b) of this Section, if a permit establishes a compliance schedule that exceeds one year from the date of permit issuance, the schedule shall set forth interim requirements and the dates for their achievement.
   a. The time between interim dates shall not exceed one year.
   b. If the time necessary for completion of any interim requirement is more than one year and is not readily divisible into stages for completion, the permit shall specify interim dates for the submission of reports of progress toward completion of the interim requirements and indicate a projected completion date.

3. The permit shall be written to require that if subsection (A)(1) of this Section is applicable, progress reports be submitted no later than 30 days following each interim date and the final date of compliance.

B. A permit applicant or permittee may cease conducting regulated activities at a given time by plugging and abandonment rather than continue to operate and meet permit requirements as follows:

1. If the permittee decides to cease conducting regulated activities at a given time within the term of a permit which has already been issued:
   a. The permit may be modified to contain a new or additional schedule leading to timely cessation of activities; or
b. The permittee shall cease conducting permitted activities before noncompliance with any interim or final compliance schedule requirement already specified in the permit.

2. If the decision to cease conducting regulated activities is made before issuance of a permit whose term will include the termination date, the permit shall contain a schedule leading to termination that will ensure timely compliance with the applicable requirements.

3. If the permittee is undecided whether to cease conducting regulated activities, the Director may issue or modify a permit to contain two schedules as follows:
   a. Both schedules shall contain an identical interim deadline requiring a final decision on whether to cease conducting regulated activities no later than a date that ensures sufficient time to comply with applicable requirements in a timely manner if the decision is to continue conducting regulated activities;
   b. One schedule shall lead to timely compliance with applicable requirements;
   c. The second schedule shall lead to cessation of the regulated activities by a date that ensures timely compliance with applicable requirements; and
   d. Each permit containing two schedules shall include a requirement that after the permittee has made a final decision under subsection (B)(3)(a) of this Section it shall follow the schedule leading to compliance if the decision is to continue conducting the regulated activities, and follow the schedule leading to termination if the decision is to cease conducting regulated activities.

4. The applicant’s or permittee’s decision to cease conducting regulated activities shall be evidenced by a firm public commitment satisfactory to the Director, such as a resolution of the board of Directors of a corporation.

R18-9-D638. Requirements for Recording and Reporting Monitoring Results
All permits shall specify:
1. Requirements concerning the proper use, maintenance, and installation, when appropriate, of monitoring equipment or methods, including biological monitoring methods when appropriate;
2. Required monitoring including type, intervals, and frequency sufficient to yield data that are representative of the monitored activity including when appropriate, continuous monitoring; and
3. Applicable reporting requirements based upon the impact of the regulated activity and as specified under this Article. Reporting shall be no less frequent than specified in the above regulations.

R18-9-D639. Corrective Action
A. Applicants for Class I, II, or III injection well permits shall identify the location of all known wells within the injection well’s area of review that penetrates the injection zone, or in the case of Class II wells operating over the fracture pressure of the injection formation, all known wells within the area of review penetrating formations affected by the increase in pressure. For such wells that are improperly sealed, completed, or abandoned, the applicant shall also submit a plan consisting of such steps or modifications as are necessary to prevent movement of fluid into USDWs. Where the plan is adequate, the Director shall incorporate it into the permit as a condition. Where the Director’s review of an application indicates that the permittee’s plan is inadequate, the Director shall require the applicant to revise the plan, prescribe a plan for corrective action as a condition of the permit under subsection (B) through (E) of this Section, or deny the application. The Director may disregard the provisions of R18-9-B612 and this Section when reviewing an application to permit an existing Class II well.

B. Any permit issued for an existing injection well, other than Class II wells, requiring corrective action shall include a compliance schedule requiring any corrective action accepted or prescribed under subsection (A) of this Section to be completed as soon as possible.

C. No owner or operator of a new injection well may begin injection until all required corrective action has been taken.

D. The Director may require as a permit condition that injection pressure be so limited that pressure in the injection zone does not exceed hydrostatic pressure at the site of any improperly completed or abandoned well within the area of review. This pressure limitation shall satisfy the corrective action requirement. Alternatively, such injection pressure limitation can be part of a compliance schedule and last until all other required corrective action has been taken.

E. When setting corrective action requirements for Class III wells, the Director shall consider the overall effect of the project on the hydraulic gradient in potentially affected USDWs, and the corresponding changes in potentiometric surface(s) and flow direction(s) rather than the discrete effect of each well. If a decision is made
that corrective action is not necessary based on the determinations above, the monitoring program required in R18-9-G647(B) shall be designed to verify the validity of such determinations.

F. In determining the adequacy of corrective action proposed by the applicant under this Section and in determining the additional steps needed to prevent fluid movement into USDWs, the following criteria and factors shall be considered by the Director:

1. Nature and volume of injected fluid;
2. Nature of native fluids or by-products of injection;
3. Potentially affected population;
4. Geology;
5. Hydrology;
6. History of the injection operation;
7. Completion and plugging records;
8. Abandonment procedures in effect at the time the well was abandoned; and
9. Hydraulic connections with USDWs.

PART E: CLASS I INJECTION WELL REQUIREMENTS

R18-9-E640. Class I; Construction Requirements

A. All Class I wells shall be sited in such a fashion that they inject into a formation which is beneath the lowermost formation containing, within one-quarter mile of the well bore, an USDW.

B. All Class I wells shall be cased and cemented to prevent the movement of fluids into or between USDWs. The casing and cement used in the construction of each newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:

1. Depth to the injection zone;
2. Injection pressure, external pressure, internal pressure, and axial loading;
3. Hole size;
4. Size and grade of all casing strings, such as wall thickness, diameter, nominal weight, length, joint Specification, and construction material;
5. Corrosiveness of injected fluid, formation fluids, and temperatures;
6. Lithology of injection and confining intervals; and
7. Type or grade of cement.

C. All Class I injection wells, except those municipal wells injecting non-corrosive wastes, shall inject fluids through tubing with a packer set immediately above the injection zone, or tubing with an approved fluid seal as an alternative. The tubing, packer, and fluid seal shall be designed for the expected service.

1. The use of other alternatives to a packer may be allowed with the written approval of the Director. To obtain approval, the operator shall submit a written request to the Director, which shall set forth the proposed alternative and all technical data supporting its use. The Director shall approve the request if the alternative method will reliably provide a comparable level of protection to USDWs. The Director may approve an alternative method solely for an individual well or for general use.
2. In determining and specifying requirements for tubing, packer, or alternatives the following factors shall be considered:
   a. Depth of setting;
   b. Characteristics of injection fluid such as chemical content, corrosiveness, and density;
   c. Injection pressure;
   d. Annular pressure;
   e. Rate, temperature and volume of injected fluid; and
   f. Size of casing.

D. Appropriate logs and other tests shall be conducted during the drilling and construction of new Class I wells. A descriptive report interpreting the results of such logs and tests shall be prepared by a knowledgeable log analyst and submitted to the Director. At a minimum, such logs and tests shall include:

1. Deviation checks on all holes constructed by first drilling a pilot hole, and then enlarging the pilot hole by reaming or another method. Such checks shall be at sufficiently frequent intervals to assure that vertical avenues for fluid migration in the form of diverging holes are not created during drilling.
2. Such other logs and tests as may be needed after taking into account the availability of similar data in the area of the drilling site, the construction plan, and the need for additional information that may arise from
time to time as the construction of the well progresses. In determining which logs and tests shall be required, the following logs shall be considered for use in the following situations:

a. For surface casing intended to protect USDWs:
   i. Resistivity, spontaneous potential, and caliper logs before the casing is installed; and
   ii. A cement bond, temperature, or density log after the casing is set and cemented.

b. For intermediate and long strings of casing intended to facilitate injection:
   i. Resistivity, spontaneous potential, porosity, and gamma ray logs before the casing is installed;
   ii. Fracture finder logs; and
   iii. A cement bond, temperature, or density log after the casing is set and cemented.

E. At a minimum, the following information concerning the injection formation shall be determined or calculated for new Class I wells:
   1. Fluid pressure;
   2. Temperature;
   3. Fracture pressure;
   4. Other physical and chemical characteristics of the injection matrix; and
   5. Physical and chemical characteristics of the formation fluids.

R18-9-E641. Class I: Operating, Monitoring, and Reporting Requirements

A. Operating requirements shall, at a minimum, specify that:
   1. Except during stimulation injection pressure at the wellhead shall not exceed a maximum which shall be calculated so as to assure that the pressure in the injection zone during injection does not initiate new fractures or propagate existing fractures in the injection zone. In no case shall injection pressure initiate fractures in the confining zone or cause the movement of injection or formation fluids into an USDW.
   2. Injection between the outermost casing protecting USDWs and the well bore is prohibited.
   3. Unless an alternative to a packer has been approved under R18-9-E640(C), the annulus between the tubing and the long string of casings shall be filled with a fluid approved by the Director and a pressure, also approved by the Director, shall be maintained on the annulus.

B. Monitoring requirements shall, at a minimum, include:
   1. The analysis of the injected fluids with sufficient frequency to yield representative data of their characteristics;
   2. Installation and use of continuous recording devices to monitor injection pressure, flow rate and volume, and the pressure on the annulus between the tubing and the long string of casing;
   3. A demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the well; and
   4. The type, number and location of wells within the area of review to be used to monitor any migration of fluids into and pressure in the USDWs, the parameters to be measured and the frequency of monitoring.

C. Reporting requirements shall, at a minimum, include:
   1. Quarterly reports to the Director on:
      a. The physical, chemical and other relevant characteristics of injection fluids;
      b. Monthly average, maximum and minimum values for injection pressure, flow rate and volume, and annular pressure; and
      c. The results of monitoring prescribed under subsection (B)(4) of this Section.
   2. Reporting the results, with the first quarterly report after the completion, of:
      a. Periodic tests of mechanical integrity;
      b. Any other test of the injection well conducted by the permittee if required by the Director; and
      c. Any well work over.

D. Ambient monitoring.
   1. Based on a site-specific assessment of the potential for fluid movement from the well or injection zone and on the potential value of monitoring wells to detect such movement, the Director shall require the owner or operator to develop a monitoring program. At a minimum, the Director shall require monitoring of the pressure buildup in the injection zone annually, including at a minimum, a shut down of the well for a time sufficient to conduct a valid observation of the pressure fall-off curve.
   2. When prescribing a monitoring system the Director may also require:
      a. Continuous monitoring for pressure changes in the first aquifer overlying the confining zone. When such a well is installed, the owner or operator shall, on a quarterly basis, sample the aquifer and analyze for constituents specified by the Director;
b. The use of indirect, geophysical techniques to determine the position of the waste front, the water quality in a formation designated by the Director, or to provide other site specific data;
c. Periodic monitoring of the ground water quality in the first aquifer overlying the injection zone;
d. Periodic monitoring of the ground water quality in the lowermost USDW; and
e. Any additional monitoring necessary to determine whether fluids are moving into or between USDWs.

R18-9-E642. Class I: Information to be Considered by the Director

A. This Section sets forth the information which must be considered by the Director in authorizing Class I wells.

1. For an existing or converted new Class I well the Director may rely on the existing permit file for those items of information listed in subsections (B), (C) & (D) which are current and accurate in the file.

2. For a newly drilled Class I well, the Director shall require the submission of all the information listed in subsections (B), (C) & (D) which are current and accurate in the file.

3. For both existing and new Class I wells certain maps, cross sections, tabulations of wells within the area of review and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.

B. Prior to the issuance of a permit for an existing Class I well to operate or the construction or conversion of a new Class I well the Director shall consider the following:

1. Information required in R18-9-C616;
2. A map showing the injection well(s) for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number, or name, and location of all producing wells, injection wells, abandoned wells, dry holes, surface bodies of water, springs, mines, quarries, water wells and other pertinent surface features including residences and roads. The map should also show faults, if known or suspected. Only information of public record is required to be included on this map;
3. A tabulation of data on all wells within the area of review which penetrate into the proposed injection zone. Such data shall include a description of each well’s type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require;
4. Maps and cross sections indicating the general vertical and lateral limits of all USDWs within the area of review, their position relative to the injection formation and the direction of water movement, where known, in each USDW which may be affected by the proposed injection;
5. Maps and cross sections detailing the geologic structure of the local area;
6. Generalized maps and cross sections illustrating the regional geologic setting;
7. Proposed operating data:
   a. Average and maximum daily rate and volume of the fluid to be injected;
   b. Average and maximum injection pressure; and
   c. Source and an analysis of the chemical, physical, radiological and biological characteristics of injection fluids;
8. Proposed formation testing program to obtain an analysis of the chemical, physical and radiological characteristics of and other information on the receiving formation;
9. Proposed stimulation program;
10. Proposed injection procedure;
11. Schematic or other appropriate drawings of the surface and subsurface construction details of the well;
12. Contingency plans to cope with all shut-ins or well failures so as to prevent migration of fluids into any USDW;
13. Plans, including maps, for meeting the monitoring requirements in R18-9-E641(B);
14. For wells within the area of review which penetrate the injection zone but are not properly completed or plugged, the corrective action proposed to be taken under R18-9-D639;
15. Construction procedures including a cementing and casing program, logging procedures, deviation checks, and a drilling, testing, and coring program; and
16. A certificate that the applicant has assured, through a performance bond or other appropriate means, the resources necessary to close, plug or abandon the well as required by R18-9-D636(A)(6).

C. Prior to granting approval for the operation of a Class I well the Director shall consider the following information:

1. All available logging and testing program data on the well;
2. A demonstration of mechanical integrity pursuant to R18-9-B613;
3. The anticipated maximum pressure and flow rate at which the permittee will operate;
4. The results of the formation testing program;  
5. The actual injection procedure;  
6. The compatibility of injected waste with fluids in the injection zone and minerals in both the injection zone and the confining zone; and  
7. The status of corrective action on defective wells in the area of review.

D. Prior to granting approval for the plugging and abandonment of a Class I well the Director shall consider the following information:
   1. The type and number of plugs to be used;  
   2. The placement of each plug including the elevation of the top and bottom;  
   3. The type and grade and quantity of cement to be used;  
   4. The method for placement of the plugs; and  
   5. The procedure to be used to meet the requirements of R18-9-B614(C).

PART F: CLASS II INJECTION WELL REQUIREMENTS

R18-9-F643. Class II; Construction Requirements

A. All new Class II wells shall be sited in such a fashion that they inject into a formation which is separated from any USDW by a confining zone that is free of known open faults or fractures within the area of review.

B. All Class II injection wells:
   1. Shall be cased and cemented to prevent movement of fluids into or between USDWs. The casing and cement used in the construction of each newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:
      a. Depth to the injection zone;  
      b. Depth to the bottom of all USDWs; and  
      c. Estimated maximum and average injection pressures.
   2. In addition the Director may consider information on:
      a. Nature of formation fluids;  
      b. Lithology of injection and confining zones;  
      c. External pressure, internal pressure, and axial loading;  
      d. Hole size;  
      e. Size and grade of all casing strings; and  
      f. Class of cement.

C. The requirements in subsection (B) of this Section need not apply to existing or newly converted Class II wells located in existing fields if:
   1. Regulatory controls for casing and cementing existed for those wells at the time of drilling and those wells are in compliance with those controls; and  
   2. Well injection will not result in the movement of fluids into an USDW so as to create a significant risk to the health of persons.

D. The requirements in subsection (B) of this Section need not apply to newly drilled wells in existing fields if:
   1. They meet the requirements of the State for casing and cementing applicable to that field at the time of submission of the State program to the Administrator; and  
   2. Well injection will not result in the movement of fluids into an USDW so as to create a significant risk to the health of persons.

E. Appropriate logs and other tests shall be conducted during the drilling and construction of new Class II wells. A descriptive report interpreting the results of that portion of those logs and tests which specifically relate to (1) an USDW and the confining zone adjacent to it, and (2) the injection and adjacent formations shall be prepared by a knowledgeable log analyst and submitted to the Director. At a minimum, these logs and tests shall include:
   1. Deviation checks on all holes constructed by first drilling a pilot hole and then enlarging the pilot hole, by reaming or another method. Such checks shall be at sufficiently frequent intervals to assure that vertical avenues for fluid movement in the form of diverging holes are not created during drilling.
   2. Such other logs and tests as may be needed after taking into account the availability of similar data in the area of the drilling site, the construction plan, and the need for additional information that may arise from time to time as the construction of the well progresses. In determining which logs and tests shall be required the following shall be considered by the Director in setting logging and testing requirements:
      a. For surface casing intended to protect USDWs in areas where the lithology has not been determined:
i. Electric and caliper logs before casing is installed; and
ii. A cement bond, temperature, or density log after the casing is set and cemented.

b. For intermediate and long strings of casing intended to facilitate injection:
   i. Electric, porosity and gamma ray logs before the casing is installed;
   ii. Fracture finder logs; and
   iii. A cement bond, temperature, or density log after the casing is set and cemented.

F. At a minimum, the following information concerning the injection formation shall be determined or calculated for new Class II wells or projects:
   1. Fluid pressure;
   2. Estimated fracture pressure; and
   3. Physical and chemical characteristics of the injection zone.

R18-9-F644. Class II; Operating, Monitoring, and Reporting Requirements

A. Operating requirements shall, at a minimum, specify that:
   1. Injection pressure at the wellhead shall not exceed a maximum which shall be calculated so as to assure that the pressure during injection does not initiate new fractures or propagate existing fractures in the confining zone adjacent to the USDWs. In no case shall injection pressure cause the movement of injection or formation fluids into an USDW.
   2. Injection between the outermost casing protecting USDWs and the well bore shall be prohibited.

B. Monitoring requirements shall, at a minimum, include:
   1. Monitoring of the nature of injected fluids at time intervals sufficiently frequent to yield data representative of their characteristics;
   2. Observation of injection pressure, flow rate, and cumulative volume at least with the following frequencies:
      a. Weekly for produced fluid disposal operations;
      b. Monthly for enhanced recovery operations;
      c. Daily during the injection of liquid hydrocarbons and injection for withdrawal of stored hydrocarbons; and
      d. Daily during the injection phase of cyclic steam operations; and
      e. Record one observation of injection pressure, flow rate and cumulative volume at reasonable intervals no greater than 30 days;
   3. A demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the injection well;
   4. Maintenance of the results of all monitoring until the next permit review; and
   5. Hydrocarbon storage and enhanced recovery may be monitored on a field or project basis rather than on an individual well basis by manifold monitoring. Manifold monitoring may be used in cases of facilities consisting of more than one injection well, operating with a common manifold. Separate monitoring systems for each well are not required provided the owner/operator demonstrates that manifold monitoring is comparable to individual well monitoring.

C. Reporting requirements.
   1. Reporting requirements shall at a minimum include an annual report to the Director summarizing the results of monitoring required under subsection (B) of this Section. Such summary shall include monthly records of injected fluids, and any major changes in characteristics or sources of injected fluid. Previously submitted information may be included by reference.
   2. Owners or operators of hydrocarbon storage and enhanced recovery projects may report on a field or project basis rather than an individual well basis where manifold monitoring is used.

R18-9-F645. Class II; Information to be Considered by the Director

A. This Section sets forth the information which must be considered by the Director in authorizing Class II wells. Certain maps, cross sections, tabulations of wells within the area of review, and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.

B. Prior to the issuance of a permit for an existing Class II well to operate or the construction or conversion of a new Class II well the Director shall consider the following:
   1. Information required in R18-9-C616.
2. A map showing the injection well or project area for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number or name and location of all existing producing wells, injection wells, abandoned wells, dry holes, and water wells. The map may also show surface bodies of waters, mines (surface and subsurface), quarries and other pertinent surface features including residences and roads, and faults if known or suspended. Only information of public record and pertinent information known to the applicant is required to be included on this map. This requirement does not apply to existing Class II wells.

3. A tabulation of data reasonably available from public records or otherwise known to the applicant on all wells within the area of review included on the map required under subsection (B)(2) of this Section which penetrate the proposed injection zone or, in the case of Class II wells operating over the fracture pressure of the injection formation, all known wells within the area of review which penetrate formations affected by the increase in pressure. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of plugging and completion, and any additional information the Director may require. In cases where the information would be repetitive and the wells are of similar age, type, and construction the Director may elect to only require data on a representative number of wells. This requirement does not apply to existing Class II wells.

4. Proposed operating data:
   a. Average and maximum daily rate and volume of fluids to be injected;
   b. Average and maximum injection pressure; and
   c. Source and an appropriate analysis of the chemical and physical characteristics of the injection fluid.

5. Appropriate geological data on the injection zone and confining zone including lithologic description, geologic name, thickness and depth.

6. Geologic name and depth to bottom of all USDWs which may be affected by the injection.

7. Schematic or other appropriate drawings of the surface and subsurface construction details of the well.

8. In the case of new injection wells the corrective action proposed to be taken by the applicant under R18-9-D639.

9. A certificate that the applicant has assured through a performance bond or other appropriate means, the resources necessary to close, plug or abandon the well as required by R18-9-D636(A)(6).

C. In addition the Director may consider the following:
   1. Proposed formation testing program to obtain the information required by R18-9-F643(F);
   2. Proposed stimulation program;
   3. Proposed injection procedure;
   4. Proposed contingency plans, if any, to cope with well failures so as to prevent migration of contaminating fluids into an USDW;
   5. Plans for meeting the monitoring requirements of R18-9-F644(B).

D. Prior to granting approval for the operation of a Class II well the Director shall consider the following information:
   1. All available logging and testing program data on the well;
   2. A demonstration of mechanical integrity pursuant to R18-9-B613;
   3. The anticipated maximum pressure and flow rate at which the permittee will operate;
   4. The results of the formation testing program;
   5. The actual injection procedure; and
   6. For new wells the status of corrective action on defective wells in the area of review.

E. Prior to granting approval for the plugging and abandonment of a Class II well the Director shall consider the following information:
   1. The type, and number of plugs to be used;
   2. The placement of each plug including the elevation of top and bottom;
   3. The type, grade, and quantity of cement to be used;
   4. The method of placement of the plugs; and
   5. The procedure to be used to meet the requirements of R18-9-B614(A).

PART G: CLASS III INJECTION WELL REQUIREMENTS

R18-9-G646. Class III: Construction Requirements
A. All new Class III wells shall be cased and cemented to prevent the migration of fluids into or between USDWs. The Director may waive the cementing requirement for new wells in existing projects or portions of existing
projects where they have substantial evidence that no contamination of USDWs would result. The casing and cement used in the construction of each newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:

1. Depth to the injection zone;
2. Injection pressure, external pressure, internal pressure, axial loading, etc.;
3. Hole size;
4. Size and grade of all casing strings, such as wall thickness, diameter, nominal weight, length, joint specification, and construction material;
5. Corrosiveness of injected fluids and formation fluids;
6. Lithology of injection and confining zones; and
7. Type and grade of cement.

B. Appropriate logs and other tests shall be conducted during the drilling and construction of new Class III wells. A descriptive report interpreting the results of such logs and tests shall be prepared by a knowledgeable log analyst and submitted to the Director. The logs and tests appropriate to each type of Class III well shall be determined based on the intended function, depth, construction and other characteristics of the well, availability of similar data in the area of the drilling site and the need for additional information that may arise from time to time as the construction of the well progresses. Deviation checks shall be conducted on all holes where pilot holes and reaming are used, unless the hole will be cased and cemented by circulating cement to the surface. Where deviation checks are necessary they shall be conducted at sufficiently frequent intervals to assure that vertical avenues for fluid migration in the form of diverging holes are not created during drilling.

C. Where the injection zone is a formation which is naturally water-bearing the following information concerning the injection zone shall be determined or calculated for new Class III wells or projects:

1. Fluid pressure;
2. Fracture pressure; and
3. Physical and chemical characteristics of the formation fluids.

D. Where the injection formation is not a water-bearing formation, the information in subsection (C)(2) of this Section must be submitted.

E. Where injection is into a formation which contains water with less than 10,000 mg/l TDS monitoring wells shall be completed into the injection zone and into any USDWs above the injection zone which could be affected by the mining operation. These wells shall be located in such a fashion as to detect any excursion of injection fluids, process by-products, or formation fluids outside the mining area or zone. If the operation may be affected by subsidence or catastrophic collapse the monitoring wells shall be located so that they will not be physically affected.

F. Where injection is into a formation which does not contain water with less than 10,000 mg/l TDS, no monitoring wells are necessary in the injection stratum.

G. Where the injection wells penetrate an USDW in an area subject to subsidence or catastrophic collapse an adequate number of monitoring wells shall be completed into the USDW to detect any movement of injected fluids, process by-products or formation fluids into the USDW. The monitoring wells shall be located outside the physical influence of the subsidence or catastrophic collapse.

H. In determining the number, location, construction and frequency of monitoring of the monitoring wells the following criteria shall be considered:

1. The population relying on the USDW affected or potentially affected by the injection operation;
2. The proximity of the injection operation to points of withdrawal of drinking water;
3. The local geology and hydrology;
4. The operating pressures and whether a negative pressure gradient is being maintained;
5. The nature and volume of the injected fluid, the formation water, and the process by-products; and
6. The injection well density.

R18-9-G647. Class III; Operating, Monitoring, and Reporting Requirements

A. Operating requirements prescribed shall, at a minimum, specify that:

1. Except during well stimulation, injection pressure at the wellhead shall be calculated so as to assure that the pressure in the injection zone during injection does not initiate new fractures or propagate existing fractures in the injection zone. In no case, shall injection pressure initiate fractures in the confining zone or cause the migration of injection or formation fluids into an USDW.
2. Injection between the outermost casing protecting USDWs and the well bore is prohibited.

B. Monitoring requirements shall, at a minimum, specify:
1. Monitoring of the nature of injected fluids with sufficient frequency to yield representative data on its characteristics. Whenever the injection fluid is modified to the extent that the analysis required by R18-9-G648(B)(7)(c) is incorrect or incomplete, a new analysis as required by R18-9-G648(B)(7)(c) shall be provided to the Director.

2. Monitoring of injection pressure and either flow rate or volume semi-monthly, or metering and daily recording of injected and produced fluid volumes as appropriate.

3. Demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the well for salt solution mining.

4. Monitoring of the fluid level in the injection zone semi-monthly, where appropriate and monitoring of the parameters chosen to measure water quality in the monitoring wells required by R18-9-G646(E), semi-monthly.

5. Quarterly monitoring of wells required by R18-9-G646(G).

6. All Class III wells may be monitored on a field or project basis rather than an individual well basis by manifold monitoring. Manifold monitoring may be used in cases of facilities consisting of more than one injection well, operating with a common manifold. Separate monitoring systems for each well are not required provided the owner/operator demonstrates that manifold monitoring is comparable to individual well monitoring.

C. Reporting requirements shall, at a minimum, include:

1. Quarterly reporting to the Director on required monitoring;

2. Results of mechanical integrity and any other periodic test required by the Director reported with the first regular quarterly report after the completion of the test; and

3. Monitoring may be reported on a project or field basis rather than individual well basis where manifold monitoring is used.

R18-9-G648. Class III; Information to be Considered by the Director

A. This Section sets forth the information which must be considered by the Director in authorizing Class III wells. Certain maps, cross sections, tabulations of wells within the area of review, and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.

B. Prior to the issuance of a permit for an existing Class III well or area to operate or the construction of a new Class III well the Director shall consider the following:

1. Information required in R18-9-C616.

2. A map showing the injection well or project area for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number or name and location of all existing producing wells, injection wells, abandoned wells, dry holes, public water systems and water wells. The map may also show surface bodies of waters, mines (surface and subsurface) quarries and other pertinent surface features including residences and roads, and faults if known or suspected. Only information of public record and pertinent information known to the applicant is required to be included on this map.

3. A tabulation of data reasonably available from public records or otherwise known to the applicant on wells within the area of review included on the map required under subsection (B)(2) of this Section which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of plugging and completion, and any additional information the Director may require. In cases where the information would be repetitive and the wells are of similar age, type, and construction the Director may elect to only require data on a representative number of wells.

4. Maps and cross sections indicating the vertical limits of all USDWs within the area of review, their position relative to the injection formation, and the direction of water movement, where known, in every USDW which may be affected by the proposed injection.

5. Maps and cross sections detailing the geologic structure of the local area;

6. Generalized map and cross sections illustrating the regional geologic setting;

7. Proposed operating data:

   a. Average and maximum daily rate and volume of fluid to be injected;

   b. Average and maximum injection pressure; and

   c. Qualitative analysis and ranges in concentrations of all constituents of injected fluids. If the information is confidential pursuant to R18-9-A603 an applicant may, in lieu of the ranges in concentrations, choose to submit maximum concentrations which shall not be exceeded. In such a
case the applicant shall retain records of the undisclosed concentrations and provide them upon request to the Director as part of any enforcement investigation.

8. Proposed formation testing program to obtain the information required by R18-9-G646(C).
9. Proposed stimulation program;
10. Proposed injection procedure;
11. Schematic or other appropriate drawings of the surface and subsurface construction details of the well;
12. Plans (including maps) for meeting the monitoring requirements of R18-9-G647(B);
13. Expected changes in pressure, native fluid displacement, direction of movement of injection fluid;
14. Contingency plans to cope with all shut-ins or well failures so as to prevent the migration of contaminating fluids into USDWs;
15. A certificate that the applicant has assured, through a performance bond, or other appropriate means, the resources necessary to close, plug, or abandon the well as required by R18-9-D636(A)(5); and
16. The corrective action proposed to be taken under R18-9-D639.

C. Prior to granting approval for the operation of a Class III well the Director shall consider the following information:
1. All available logging and testing data on the well;
2. A satisfactory demonstration of mechanical integrity for all new wells and for all existing salt solution wells pursuant to R18-9-B613;
3. The anticipated maximum pressure and flow rate at which the permittee will operate;
4. The results of the formation testing program;
5. The actual injection procedures; and
6. The status of corrective action on defective wells in the area of review.

D. Prior to granting approval for the plugging and abandonment of a Class III well the Director shall consider the following information:
1. The type and number of plugs to be used;
2. The placement of each plug including the elevation of the top and bottom;
3. The type, grade and quantity of cement to be used;
4. The method of placement of the plugs; and
5. The procedure to be used to meet the requirements of R18-9-B614(A).

PART H: CLASS IV INJECTION WELL REQUIREMENTS

R18-9-H649. Class IV; Closure Requirements and Remediation

A. Closure.
1. Prior to abandoning any Class IV well, the owner or operator shall plug or otherwise close the well in a manner acceptable to the Director.
2. The owner or operator of a Class IV well must notify the Director of intent to abandon the well at least 30 days prior to abandonment.

B. Remediation.
1. Injection wells used to inject contaminated groundwater that has been treated and is being injected into the same formation from which it was drawn are authorized by rule for the life of the well if such subsurface emplacement of fluids is approved by the Administrator or the Director pursuant to subsections (a), (b) or (c) below:
   a. Provisions for cleanup of releases under CERCLA, or
   b. The requirements and provisions under RCRA, or
   c. The requirements and provisions under other applicable state laws for corrective and remedial action.

PART I: CLASS V INJECTION WELL REQUIREMENTS

R18-9-I650. Class V: General Requirements

A. The following requirements apply to Class V Wells authorized by rule:
1. A Class V Injection well is authorized by rule subject to the conditions under this Section.
2. Well authorization under this Section expires upon the effective date of a permit issued pursuant to R18-9-I651, R18-9-C616, R18-9-C624, R18-9-C625, or upon proper closure of the well.
3. An owner or operator of a well that is authorized by rule pursuant to this Section is prohibited from injecting into the well:
   a. Upon the effective date of an applicable permit denial;
   b. Upon failure to submit a permit application in a timely manner pursuant to R18-9-I651 or R18-9-C616;
   c. Upon failure to submit inventory information in a timely manner pursuant to R18-9-I652; or
   d. Upon failure to comply with a request for information in a timely manner pursuant to R18-9-I653.

4. Submission of the following is required in order to transfer ownership of a well that is authorized by rule pursuant to this Section:
   a. An inventory, and
   b. A Class V authorized by rule transfer fee pursuant to R18-14-111(3).

B. The following requirements apply for all Class V Wells:

1. With certain exceptions listed in subsection (B)(2) of this Section, Class V injection activity is “authorized by rule,” meaning owners and operators must comply with all the requirements of this Article but do not have to get an individual permit. Well authorization expires once the injection well has been properly closed.

2. A Class V well requires a permit and shall no longer be authorized by rule upon any of the following:
   a. Failure to comply with the prohibition of movement standard in R18-9-B608(A).
   b. The Director specifically requires a Class V permit for the well to operate pursuant to R18-9-I651. In which case rule authorization expires upon the effective date of the permit issued, or you are prohibited from injecting into your well upon:
      i. Failure to submit a permit application in a timely manner as specified in a notice from the Director; or
      ii. Upon the effective date of permit denial.
   c. Failure to submit inventory information as required under R18-9-I652.
   d. Failure to comply with the Director’s request for additional information under R18-9-I653 in a timely manner.

3. Prior to abandoning a Class V well, the owner or operator shall meet the plugging requirements in R18-9-B614(C).

4. In limited cases, the Director may authorize the conversion (reclassification) of a motor vehicle waste disposal well to another type of Class V well. Motor vehicle wells may only be converted if: all motor vehicle fluids are segregated by physical barriers and are not allowed to enter the well; and, injection of motor vehicle waste is unlikely based on a facility's compliance history and records showing proper waste disposal. The use of a semi-permanent plug as the means to segregate waste is not sufficient to convert a motor vehicle waste disposal well to another type of Class V well.

R18-9-I651. Class V: Requiring a Permit

A. The Director may require the owner or operator of any Class V injection well authorized by rule under this Article to apply for and obtain an individual or area UIC permit. Cases where individual or area UIC permits may be required include:
   1. The injection well is not in compliance with any requirement under this Article or A.R.S. Title 49, Chapter 2, Article 3.3;
   2. The injection well is not or no longer is within the category of wells and types of well operations authorized in the rule; or
   3. The protection of USDWs requires that the injection operation be regulated by requirements, such as for corrective action, monitoring and reporting, or operation, which are not contained in the rule.

B. If an individual or area UIC permit is required, the Director shall notify the discharger in writing of the decision. The notice shall include:
   1. A brief statement of the reasons for the decision,
   2. An application form,
   3. A statement setting a deadline to file the application,
   4. A statement that on the effective date of issuance or denial of the individual or area UIC permit, coverage by rule will automatically terminate,
   5. The applicant’s right to appeal the individual permit requirement under A.R.S. § 49-323 and the name and telephone number of the Department contact person who can answer questions regarding the appeals process.
C. An owner or operator of a well authorized by rule may request to be excluded from the coverage of this Section by applying for an individual or area UIC permit. The owner or operator shall submit an application under R18-9-C616 with reasons supporting the request to the Director. The Director may grant any such requests.

R18-9-I652. Class V; Inventory Requirements for Class V Wells Authorized by Rule
A. The owner or operator of an injection well authorized by rule under R18-9-I650 shall submit inventory information to the Director. Such an owner or operator is prohibited from injecting into the well upon failure to submit inventory information for the well within the timeframe specified in subsection (D) of this Section.
B. As part of the inventory, the Director shall require and the owner/operator shall provide at least the following information:
1. Facility name and location;
2. Name and address of legal contact;
3. Ownership of facility;
4. Nature and type of injection well; and
5. Operating status of injection well.
C. Upon approval of the Arizona UIC Program, the Director shall notify all known owners or operators of injection wells of their duty to submit inventory information in the manner specified by the Director.
D. The owner or operator of an injection well shall submit inventory information no later than one year after the effective date of the Arizona UIC program. The Director need not require inventory information from any facility with interim status under RCRA.

R18-9-I653. Class V; Requiring Other Information
A. In addition to the inventory requirements under R18-9-I652, the Director may require the owner or operator of any well authorized by rule under this Article to submit information as deemed necessary by the Director to determine whether a well may be endangering an USDW in violation of R18-9-B608 of this Part.
B. Such information requirements may include, but are not limited to:
1. Performance of ground-water monitoring and the periodic submission of reports of such monitoring;
2. An analysis of injected fluids, including periodic submission of such analyses; and
3. A description of the geologic strata through and into which injection is taking place.
C. Any request for information under this Section shall be made in writing, and include a brief statement of the reasons for requiring the information. An owner and operator shall submit the information within the time period(s) provided in the notice.
D. An owner or operator of an injection well authorized by rule under this Part is prohibited from injecting into the well upon failure of the owner or operator to comply with a request for information within the time period(s) specified by the Director pursuant to subsection (C) of this Section. An owner or operator of a well prohibited from injection under this Section shall not resume injection except under a permit issued pursuant to R18-9-I651; R18-9-C616, R18-9-C624, or R18-9-C625.

R18-9-I654. Class V; Prohibition of Class V Cesspools and Motor Vehicle Waste Disposal Wells
The construction and operation of cesspools and motor vehicle waste disposal wells are prohibited.

R18-9-I655. Class V; Prohibition of Non-Experimental Class V Wells for Geologic Sequestration
The construction, operation or maintenance of any non-experimental Class V geologic sequestration well is prohibited.

PART J: CLASS VI INJECTION WELL REQUIREMENTS

R18-9-J656. Class VI: Applicability
A. This Part establishes criteria and standards for underground injection control programs to regulate any Class VI carbon dioxide geologic sequestration injection wells.
B. This Part applies to any well used to inject carbon dioxide specifically for the purpose of geologic sequestration.
C. This Part also applies to owners or operators of permit- or rule-authorized Class V experimental carbon dioxide injection projects who seek to apply for Class VI geologic sequestration permit for their well or wells. Owners or operators seeking to convert existing Class I, Class II, or Class V experimental wells to Class VI geologic sequestration wells must demonstrate to the Director that the wells were engineered and constructed to meet the requirements of R18-9-J661 and ensure protection of USDWs. In lieu of requirements at R18-9-J661 and R18-9-J662, a converted well must still meet all other requirements under Part F of this Article.
D. The following definitions apply to this Part and govern for Class VI wells to the extent that these definitions conflict with those in R18-9-A601:

1. “Area of review” means the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity. The area of review is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and displaced fluids, and is based on available site characterization, monitoring, and operational data as set forth in R18-9-J659.

2. “Carbon dioxide plume” means the extent underground, in three dimensions, of an injected carbon dioxide stream.

3. “Carbon dioxide stream” means carbon dioxide that has been captured from an emission source, plus incidental associated substances derived from the source materials and the capture process, and any substances added to the stream to enable or improve the injection process. This Part does not apply to any carbon dioxide stream that meets the definition of a hazardous waste under A.R.S. § 49-921.

4. “Confining zone” means a geologic formation, group of formations, or part of a formation stratigraphically overlying the injection zone(s) that acts as barrier to fluid movement. For Class VI wells operating under an injection depth waiver, confining zone means a geologic formation, group of formations, or part of a formation stratigraphically overlying and underlying the injection zone(s).

5. “Corrective action” means the use of Director-approved methods to ensure that wells within the area of review do not serve as conduits for the movement of fluids into USDWs.

6. “Geologic sequestration” means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.

7. “Geologic sequestration project” means an injection well or wells used to emplace a carbon dioxide stream beneath the lowermost formation containing a USDW or, wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at R18-9-J670; or, wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to R18-9-A605 and R18-9-A606. It includes the subsurface three-dimensional extent of the carbon dioxide plume, associated area of elevated pressure, and displaced fluids, as well as the surface area above that delineated region.

8. “Injection zone” means a geologic formation, group of formations, or part of a formation that is of sufficient areal extent, thickness, porosity, and permeability to receive carbon dioxide through a well or wells associated with a geologic sequestration project.

9. “Post-injection site care” means appropriate monitoring and other actions, including corrective action, needed following cessation of injection to ensure that USDWs are not endangered, as required under R18-9-J668.

10. “Pressure front” means the zone of elevated pressure that is created by the injection of carbon dioxide into the subsurface. For the purposes of this Part, the pressure front of a carbon dioxide plume refers to a zone where there is a pressure differential sufficient to cause the movement of injected fluids or formation fluids into a USDW.

11. “Site closure” means the point/time, as determined by the Director following the requirements under R18-9-J668, at which the owner or operator of a geologic sequestration site is released from post-injection site care responsibilities.

12. “Transmissive fault” or “fracture” means a fault or fracture that has sufficient permeability and vertical extent to allow fluids to move between formations.

R18-9-J657. Class VI: Required Permit Information

A. This Section sets forth the information which must be considered by the Director in authorizing Class VI wells. For converted Class I, Class II, or Class V experimental wells, certain maps, cross sections, tabulations of wells within the area of review and other data may be included in the application by reference provided they are current, readily available to the Director, and sufficiently identified to be retrieved.

B. Prior to the issuance of a permit for the construction of a new Class VI well or the conversion of an existing Class I, Class II, or Class V well to a Class VI well, the owner or operator shall submit, pursuant to R18-9-J666, and the Director shall consider the following:

1. Information required in R18-9-C616(D)(1) through (9):
2. A map showing the injection well for which a permit is sought and the applicable area of review consistent with R18-9-J659. Within the area of review, the map must show the number or name, and location of all injection wells, producing wells, abandoned wells, plugged wells or dry holes, deep stratigraphic boreholes, State- or EPA-approved subsurface cleanup sites, surface bodies of water, springs, mines (surface and subsurface), quarries, water wells, other pertinent surface features including structures intended for human occupancy, State, Tribal, and Territory boundaries, and roads. The map should also show faults, if known or suspected. Only information of public record is required to be included on this map.

3. Information on the geologic structure and hydrogeologic properties of the proposed storage site and overlying formations, including:
   a. Maps and cross sections of the area of review;
   b. The location, orientation, and properties of known or suspected faults and fractures that may transect the confining zone(s) in the area of review and a determination that they would not interfere with containment;
   c. Data on the depth, areal extent, thickness, mineralogy, porosity, permeability, and capillary pressure of the injection and confining zone(s); including geology/facies changes based on field data which may include geologic cores, outcrop data, seismic surveys, well logs, and names and lithologic descriptions;
   d. Geomechanical information on fractures, stress, ductility, rock strength, and in situ fluid pressures within the confining zone(s);
   e. Information on the seismic history including the presence and depth of seismic sources and a determination that the seismicity would not interfere with containment; and
   f. Geologic and topographic maps and cross sections illustrating regional geology, hydrogeology, and the geologic structure of the local area.

4. A tabulation of all wells within the area of review which penetrate the injection or confining zone(s). Such data must include a description of each well's type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require.

5. Maps and stratigraphic cross sections indicating the general vertical and lateral limits of all USDWs, water wells and springs within the area of review, their positions relative to the injection zone(s), and the direction of water movement, where known.

6. Baseline geochemical data on subsurface formations, including all USDWs in the area of review.

7. Proposed operating data for the proposed geologic sequestration site:
   a. Average and maximum daily rate and volume and/or mass and total anticipated volume and/or mass of the carbon dioxide stream;
   b. Average and maximum injection pressure;
   c. The source(s) of the carbon dioxide stream; and
   d. An analysis of the chemical and physical characteristics of the carbon dioxide stream.

8. Proposed pre-operational formation testing program to obtain an analysis of the chemical and physical characteristics of the injection zone(s) and confining zone(s) and that meets the requirements at R18-9-J662.

9. Proposed stimulation program, a description of stimulation fluids to be used and a determination that stimulation will not interfere with containment;

10. Proposed procedure to outline steps necessary to conduct injection operation;

11. Schematics or other appropriate drawings of the surface and subsurface construction details of the well;

12. Injection well construction procedures that meet the requirements of R18-9-J661;

13. Proposed area of review and corrective action plan that meets the requirements under R18-9-J659;

14. A demonstration, satisfactory to the Director, that the applicant has met the financial responsibility requirements under R18-9-J660;

15. Proposed testing and monitoring plan required by R18-9-J665;

16. Proposed injection well plugging plan required by R18-9-J667(B);

17. Proposed post-injection site care and site closure plan required by R18-9-J668(A);

18. At the Director's discretion, a demonstration of an alternative post-injection site care timeframe required by R18-9-J668(C);

20. A list of contacts, submitted to the Director, for those States, Tribes, and Territories identified to be within the area of review of the Class VI project based on information provided in subsection (B)(2) of this Section;
21. A listing of any historic property or potential historic property as defined by R12-8-301, and
22. Any other information requested by the Director.

C. The Director shall notify, in writing, any States, Tribes, or Territories within the area of review of the Class VI project based on information provided in subsections (B)(2) and (B)(20) of this Section of the permit application.

D. Prior to granting approval for the operation of a Class VI well, the Director shall consider the following information:
   1. The final area of review based on modeling, using data obtained during logging and testing of the well and the formation as required by subsections (D)(2), (3), (4), (6), (7), and (10) of this Section;
   2. Any relevant updates, based on data obtained during logging and testing of the well and the formation as required by subsections (D)(3), (4), (6), (7), and (10) of this Section, to the information on the geologic structure and hydrogeologic properties of the proposed storage site and overlying formations, submitted to satisfy the requirements of subsection (B)(3) of this Section;
   3. Information on the compatibility of the carbon dioxide stream with fluids in the injection zone(s) and minerals in both the injection and the confining zone(s), based on the results of the formation testing program, and with the materials used to construct the well;
   4. The results of the formation testing program required at subsection (B)(8) of this Section;
   5. Final injection well construction procedures that meet the requirements of R18-9-J661;
   6. The status of corrective action on wells in the area of review;
   7. All available logging and testing program data on the well required by R18-9-J662;
   8. A demonstration of mechanical integrity pursuant to R18-9-J664;
   9. Any updates to the proposed area of review and corrective action plan, testing and monitoring plan, injection well plugging plan, post-injection site care and site closure plan, or the emergency and remedial response plan submitted under subsection (B) of this Section, which are necessary to address new information collected during logging and testing of the well and the formation as required by all subsections of this Section, and any updates to the alternative post-injection site care timeframe demonstration submitted under subsection (B) of this Section, which are necessary to address new information collected during the logging and testing of the well and the formation as required by all subsections of this Section; and
   10. Any other information requested by the Director.

E. Owners or operators seeking a waiver of the requirement to inject below the lowermost USDW must also refer to R18-9-J670 and submit a supplemental report, as required at R18-9-J670. The supplemental report is not part of the permit application.

R18-9-J658. Class VI; Minimum Criteria for Siting
A. Owners or operators of Class VI wells must demonstrate to the satisfaction of the Director that the wells will be sited in areas with a suitable geologic system. The owners or operators must demonstrate that the geologic system comprises:
   1. An injection zone(s) of sufficient areal extent, thickness, porosity, and permeability to receive the total anticipated volume of the carbon dioxide stream;
   2. Confining zone(s) free of transmissive faults or fractures and of sufficient areal extent and integrity to contain the injected carbon dioxide stream and displaced formation fluids and allow injection at proposed maximum pressures and volumes without initiating or propagating fractures in the confining zone(s).

B. The Director may require owners or operators of Class VI wells to identify and characterize additional zones that will impede vertical fluid movement, are free of faults and fractures that may interfere with containment, allow for pressure dissipation, and provide additional opportunities for monitoring, mitigation, and remediation.

R18-9-J659. Class VI; Area of Review and Corrective Action
A. The area of review is the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity. The area of review is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and is based on available site characterization, monitoring, and operational data.
B. The owner or operator of a Class VI well must prepare, maintain, and comply with a plan to delineate the area of review for a proposed geologic sequestration project, periodically reevaluate the delineation, and perform corrective action that meets the requirements of this Section and is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. As a part of the permit application for approval by the Director, the owner or operator must submit an area of review and corrective action plan that includes the following information:

1. The method for delineating the area of review that meets the requirements of subsection (C) of this Section, including the model to be used, assumptions that will be made, and the site characterization data on which the model will be based.

2. A description of:
   a. The minimum fixed frequency, not to exceed five years, at which the owner or operator proposes to reevaluate the area of review;
   b. The monitoring and operational conditions that would warrant a reevaluation of the area of review prior to the next scheduled reevaluation as determined by the minimum fixed frequency established in subsection (B)(2)(a) of this Section;
   c. How monitoring and operational data will be used to inform an area of review reevaluation; and
   d. How corrective action will be conducted to meet the requirements of subsection (D) of this Section, including what corrective action will be performed prior to injection and what, if any, portions of the area of review will have corrective action addressed on a phased basis and how the phasing will be determined; how corrective action will be adjusted if there are changes in the area of review; and how site access will be guaranteed for future corrective action.

C. Owners or operators of Class VI wells must perform the following actions to delineate the area of review and identify all wells that require corrective action:

1. Predict, using existing site characterization, monitoring and operational data, and computational modeling, the projected lateral and vertical migration of the carbon dioxide plume and formation fluids in the subsurface from the commencement of injection activities until the plume movement ceases, until pressure differentials sufficient to cause the movement of injected fluids or formation fluids into a USDW are no longer present, or until the end of a fixed time period as determined by the Director. The model must:
   a. Be based on detailed geologic data collected to characterize the injection zone(s), confining zone(s) and any additional zones; and anticipated operating data, including injection pressures, rates, and total volumes over the proposed life of the geologic sequestration project;
   b. Take into account any geologic heterogeneities, other discontinuities, data quality, and their possible impact on model predictions; and
   c. Consider potential migration through faults, fractures, and artificial penetrations.

2. Using methods approved by the Director, identify all penetrations, including active and abandoned wells and underground mines, in the area of review that may penetrate the confining zone(s). Provide a description of each well's type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require; and

3. Determine which abandoned wells in the area of review have been plugged in a manner that prevents the movement of carbon dioxide or other fluids that may endanger USDWs, including use of materials compatible with the carbon dioxide stream.

D. Owners or operators of Class VI wells must perform corrective action on all wells in the area of review that are determined to need corrective action, using methods designed to prevent the movement of fluid into or between USDWs, including use of materials compatible with the carbon dioxide stream, where appropriate.

E. At the minimum fixed frequency, not to exceed five years, as specified in the area of review and corrective action plan, or when monitoring and operational conditions warrant, owners or operators must:

1. Reevaluate the area of review in the same manner specified in subsection (C)(1) of this Section;

2. Identify all wells in the reevaluated area of review that require corrective action in the same manner specified in subsection (C) of this Section;

3. Perform corrective action on wells requiring corrective action in the reevaluated area of review in the same manner specified in subsection (C) of this Section; and

4. Submit an amended area of review and corrective action plan or demonstrate to the Director through monitoring data and modeling results that no amendment to the area of review and corrective action plan is needed. Any amendments to the area of review and corrective action plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements under R18-9-C632 or R18-9-C633, as appropriate.
The emergency and remedial response plan and the demonstration of financial responsibility must account for
the area of review delineated as specified in subsection (C)(1) of this Section or the most recently evaluated area
of review delineated under subsection (E) of this Section, regardless of whether or not corrective action in the
area of review is phased.

All modeling inputs and data used to support area of review reevaluations under subsection (E) of this Section
shall be retained for ten years.

**R18-9-J660. Class VI; Financial Responsibility**

A. The owner or operator must demonstrate and maintain financial responsibility as determined by the Director
that meets the following conditions:

1. The financial responsibility instrument(s) used must be from the following list of qualifying instruments:
   a. Trust Funds.
   b. Surety Bonds.
   c. Letter of Credit.
   d. Insurance.
   e. Self Insurance (i.e., Financial Test and Corporate Guarantee).
   f. Escrow Account.
   g. Any other instrument(s) satisfactory to the Director.

2. The qualifying instrument(s) must be sufficient to cover the cost of:
   a. Corrective action under R18-9-J659;
   b. Injection well plugging under R18-9-J667;
   c. Post injection site care and site closure under R18-9-J668; and

3. The financial responsibility instrument(s) must be sufficient to address endangerment of USDWs.

4. The qualifying financial responsibility instrument(s) must comprise protective conditions of coverage,
   a. Protective conditions of coverage must include at a minimum cancellation, renewal, and continuation
      provisions, specifications on when the provider becomes liable following a notice of cancellation if
      there is a failure to renew with a new qualifying financial instrument, and requirements for the
      provider to meet a minimum rating, minimum capitalization, and ability to pass the bond rating when
      applicable.
      i. Cancellation--for purposes of this Part, an owner or operator must provide that their financial
         mechanism may not cancel, terminate or fail to renew except for failure to pay such financial
         instrument. If there is a failure to pay the financial instrument, the financial institution may elect
to cancel, terminate, or fail to renew the instrument by sending notice by certified mail to the
owner or operator and the Director. The cancellation must not be final for 120 days after receipt
of cancellation notice. The owner or operator must provide an alternate financial responsibility
demonstration within 60 days of notice of cancellation, and if an alternate financial
responsibility demonstration is not acceptable (or possible), any funds from the instrument being
cancelled must be released within 60 days of notification by the Director.
      ii. Renewal--for purposes of this Part, owners or operators must renew all financial instruments, if
an instrument expires, for the entire term of the geologic sequestration project. The instrument
may be automatically renewed as long as the owner or operator has the option of renewal at the
face amount of the expiring instrument. The automatic renewal of the instrument must, at a
minimum, provide the holder with the option of renewal at the face amount of the expiring
financial instrument.
      iii. Cancellation, termination, or failure to renew may not occur and the financial instrument will
remain in full force and effect in the event that on or before the date of expiration: The Director
deems the facility abandoned; or the permit is terminated or revoked or a new permit is denied;
or closure is ordered by the Director or a U.S. district court or other court of competent
jurisdiction; or the owner or operator is named as debtor in a voluntary or involuntary
proceeding under Title 11 (Bankruptcy), U.S. Code; or the amount due is paid.

5. The qualifying financial responsibility instrument(s) must be approved by the Director.
   a. The Director shall consider and approve the financial responsibility demonstration for all the phases
of the geologic sequestration project prior to issue a Class VI permit under R18-9-J657.
   b. The owner or operator must provide any updated information related to their financial responsibility
instrument(s) on an annual basis and if there are any changes, the Director must evaluate, within a
reasonable time, the financial responsibility demonstration to confirm that the instrument(s) used remain adequate for use. The owner or operator must maintain financial responsibility requirements regardless of the status of the Director's review of the financial responsibility demonstration.

c. The Director may disapprove the use of a financial instrument if they determine that it is not sufficient to meet the requirements of this Section.

6. The owner or operator may demonstrate financial responsibility by using one or multiple qualifying financial instruments for specific phases of the geologic sequestration project.

a. In the event that the owner or operator combines more than one instrument for a specific geologic sequestration phase such combination must be limited to instruments that are not based on financial strength or performance, for example trust funds, surety bonds guaranteeing payment into a trust fund, letters of credit, escrow account, and insurance. In this case, it is the combination of mechanisms, rather than the single mechanism, which must provide financial responsibility for an amount at least equal to the current cost estimate.

b. When using a third-party instrument to demonstrate financial responsibility, the owner or operator must provide a proof that the third-party providers either have passed financial strength requirements based on credit ratings; or has met a minimum rating, minimum capitalization, and ability to pass the bond rating when applicable.

c. An owner or operator using certain types of third-party instruments must establish a standby trust to enable ADEQ to be party to the financial responsibility agreement without ADEQ being the beneficiary of any funds. The standby trust fund must be used along with other financial responsibility instruments (e.g., surety bonds, letters of credit, or escrow accounts) to provide a location to place funds if needed.

d. An owner or operator may deposit money to an escrow account to cover financial responsibility requirements; this account must segregate funds sufficient to cover estimated costs for Class VI (geologic sequestration) financial responsibility from other accounts and uses.

e. An owner or operator or its guarantor may use self insurance to demonstrate financial responsibility for geologic sequestration projects. In order to satisfy this requirement the owner or operator must meet a Tangible Net Worth of an amount approved by the Director, have a Net working capital and tangible net worth each at least six times the sum of the current well plugging, post injection site care and site closure cost, have assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current well plugging, post injection site care and site closure cost, and must submit a report of its bond rating and financial information annually. In addition the owner or operator must either: Have a bond rating test of AAA, AA, A, or BBB as issued by Standard & Poor's or Aaa, Aa, A, or Baa as issued by Moody's; or meet all of the following five financial ratio thresholds: A ratio of total liabilities to net worth less than 2.0; a ratio of current assets to current liabilities greater than 1.5; a ratio of the sum of net income plus depreciation, depletion, and amortization to total liabilities greater than 0.1; A ratio of current assets minus current liabilities to total assets greater than -0.1; and a net profit (revenues minus expenses) greater than 0.

f. An owner or operator who is not able to meet corporate financial test criteria may arrange a corporate guarantee by demonstrating that its corporate parent meets the financial test requirements on its behalf. The parent's demonstration that it meets the financial test requirement is insufficient if it has not also guaranteed to fulfill the obligations for the owner or operator.

g. An owner or operator may obtain an insurance policy to cover the estimated costs of geologic sequestration activities requiring financial responsibility. This insurance policy must be obtained from a third party provider.

B. The requirement to maintain adequate financial responsibility and resources is directly enforceable regardless of whether the requirement is a condition of the permit.

1. The owner or operator must maintain financial responsibility and resources until:

a. The Director receives and approves the completed post-injection site care and site closure plan; and
b. The Director approves site closure.

2. The owner or operator may be released from a financial instrument in the following circumstances:

a. The owner or operator has completed the phase of the geologic sequestration project for which the financial instrument was required and has fulfilled all its financial obligations as determined by the Director, including obtaining financial responsibility for the next phase of the geologic sequestration project, if required; or
b. The owner or operator has submitted a replacement financial instrument and received written approval from the Director accepting the new financial instrument and releasing the owner or operator from the previous financial instrument.

C. The owner or operator must have a detailed written estimate, in current dollars, of the cost of performing corrective action on wells in the area of review, plugging the injection well(s), post-injection site care and site closure, and emergency and remedial response.

1. The cost estimate must be performed for each phase separately and must be based on the costs to the regulatory agency of hiring a third party to perform the required activities. A third party is a party who is not within the corporate structure of the owner or operator.

2. During the active life of the geologic sequestration project, the owner or operator must adjust the cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with subsection (A) of this Section and provide this adjustment to the Director. The owner or operator must also provide to the Director written updates of adjustments to the cost estimate within 60 days of any amendments to the area of review and corrective action plan as required under R18-9-J659, the injection well plugging plan under R18-9-J667, the post-injection site care and site closure plan as required under R18-9-J668, and the emergency and remedial response plan as required under R18-9-J669.

3. The Director must approve any decrease or increase to the initial cost estimate. During the active life of the geologic sequestration project, the owner or operator must revise the cost estimate no later than 60 days after the Director has approved the request to modify the area of review and corrective action plan as required under R18-9-J659, the injection well plugging plan under R18-9-J667, the post-injection site care and site closure plan as required under R18-9-J668, and the emergency and response plan as required under R18-9-J669, if the change in the plan increases the cost. If the change to the plans decreases the cost, any withdrawal of funds must be approved by the Director. Any decrease to the value of the financial assurance instrument must first be approved by the Director. The revised cost estimate must be adjusted for inflation as specified at subsection (C)(2) of this Section.

4. Whenever the current cost estimate increases to an amount greater than the face amount of a financial instrument currently in use, the owner or operator, within 60 days after the increase, must either cause the face amount to be increased to an amount at least equal to the current cost estimate and submit evidence of such increase to the Director, or obtain other financial responsibility instruments to cover the increase. Whenever the current cost estimate decreases, the face amount of the financial assurance instrument may be reduced to the amount of the current cost estimate only after the owner or operator has received written approval from the Director.

D. The owner or operator must notify the Director by certified mail of adverse financial conditions such as bankruptcy that may affect the ability to carry out injection well plugging and post-injection site care and site closure.

1. In the event that the owner or operator or the third party provider of a financial responsibility instrument is going through a bankruptcy, the owner or operator must notify the Director by certified mail of the commencement of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code, naming the owner or operator as debtor, within ten days after commencement of the proceeding.

2. A guarantor of a corporate guarantee must make such a notification to the Director if they are named as debtor, as required under the terms of the corporate guarantee.

3. An owner or operator who fulfills the requirements of subsection (A) of this Section by obtaining a trust fund, surety bond, letter of credit, escrow account, or insurance policy will be deemed to be without the required financial assurance in the event of bankruptcy of the trustee or issuing institution, or a suspension or revocation of the authority of the trustee institution to act as trustee of the institution issuing the trust fund, surety bond, letter of credit, escrow account, or insurance policy. The owner or operator must establish other financial assurance within 60 days after such an event.

E. The owner or operator must provide an adjustment of the cost estimate to the Director within 60 days of notification by the Director, if the Director determines during the annual evaluation of the qualifying financial responsibility instrument(s) that the most recent demonstration is no longer adequate to cover the cost of corrective action as required under R18-9-J659, injection well plugging under R18-9-J667, post-injection site care and site closure as required under R18-9-J668, and emergency and remedial response as required under R18-9-J669.

F. The Director must approve the use and length of pay-in-periods for trust funds or escrow accounts.
R18-9-J661. Class VI Injection Well Construction Requirements

A. The owner or operator must ensure that all Class VI wells are constructed and completed to:
   1. Prevent the movement of fluids into or between USDWs or into any unauthorized zones;
   2. Permit the use of appropriate testing devices and workover tools; and
   3. Permit continuous monitoring of the annulus space between the injection tubing and long string casing.

B. Casing and Cementing of Class VI Wells.
   1. Casing and cement or other materials used in the construction of each Class VI well must have sufficient structural strength and be designed for the life of the geologic sequestration project. All well materials must be compatible with fluids with which the materials may be expected to come into contact and must meet or exceed standards developed for such materials by the American Petroleum Institute, ASTM International, or comparable standards acceptable to the Director. The casing and cementing program must be designed to prevent the movement of fluids into or between USDWs. In order to allow the Director to determine and specify casing and cementing requirements, the owner or operator must provide the following information:
      a. Depth to the injection zone(s);
      b. Injection pressure, external pressure, internal pressure, and axial loading;
      c. Hole size;
      d. Size and grade of all casing strings (wall thickness, external diameter, nominal weight, length, joint specification, and construction material);
      e. Corrosiveness of the carbon dioxide stream and formation fluids;
      f. Down-hole temperatures;
      g. Lithology of injection and confining zone(s); and
      h. Type or grade of cement and cement additives; and
      i. Quantity, chemical composition, and temperature of the carbon dioxide stream.
   2. Surface casing must extend through the base of the lowermost USDW and be cemented to the surface through the use of a single or multiple strings of casing and cement.
   3. At least one long string casing, using a sufficient number of centralizers, must extend to the injection zone and must be cemented by circulating cement to the surface in one or more stages.
   4. Circulation of cement may be accomplished by staging. The Director may approve an alternative method of cementing in cases where the cement cannot be recirculated to the surface, provided the owner or operator can demonstrate by using logs that the cement does not allow fluid movement behind the well bore.
   5. Cement and cement additives must be compatible with the carbon dioxide stream and formation fluids and of sufficient quality and quantity to maintain integrity over the design life of the geologic sequestration project. The integrity and location of the cement shall be verified using technology capable of evaluating cement quality radially and identifying the location of channels to ensure that USDWs are not endangered.

C. Tubing and packer.
   1. Tubing and packer materials used in the construction of each Class VI well must be compatible with fluids with which the materials may be expected to come into contact and must meet or exceed standards developed for such materials by the American Petroleum Institute, ASTM International, or comparable standards acceptable to the Director.
   2. All owners or operators of Class VI wells must inject fluids through tubing with a packer set at a depth opposite a cemented interval at the location approved by the Director.
   3. In order for the Director to determine and specify requirements for tubing and packer, the owner or operator must submit the following information:
      a. Depth of setting;
      b. Characteristics of the carbon dioxide stream (chemical content, corrosiveness, temperature, and density) and formation fluids;
      c. Maximum proposed injection pressure;
      d. Maximum proposed annular pressure;
      e. Proposed injection rate (intermittent or continuous) and volume and/or mass of the carbon dioxide stream;
      f. Size of tubing and casing; and
      g. Tubing tensile, burst, and collapse strengths.
R18-9-J662. Class VI; Logging, Sampling, and Testing Prior to Well Operation

A. During the drilling and construction of a Class VI injection well, the owner or operator must run appropriate logs, surveys and tests to determine or verify the depth, thickness, porosity, permeability, and lithology of, and the salinity of any formation fluids in all relevant geologic formations to ensure conformance with the injection well construction requirements under R18-9-J661 and to establish accurate baseline data against which future measurements may be compared. The owner or operator must submit to the Director a descriptive report prepared by a knowledgeable log analyst that includes an interpretation of the results of such logs and tests. At a minimum, such logs and tests must include:

1. Deviation checks during drilling on all holes constructed by drilling a pilot hole which is enlarged by reaming or another method. Such checks must be at sufficiently frequent intervals to determine the location of the borehole and to ensure that vertical avenues for fluid movement in the form of diverging holes are not created during drilling; and

2. Before and upon installation of the surface casing:
   a. Resistivity, spontaneous potential, and caliper logs before the casing is installed; and
   b. A cement bond and variable density log to evaluate cement quality radially, and a temperature log after the casing is set and cemented.

3. Before and upon installation of the long string casing:
   a. Resistivity, spontaneous potential, porosity, caliper, gamma ray, fracture finder logs, and any other logs the Director requires for the given geology before the casing is installed; and
   b. A cement bond and variable density log, and a temperature log after the casing is set and cemented.

4. A series of tests designed to demonstrate the internal and external mechanical integrity of injection wells, which may include:
   a. A pressure test with liquid or gas;
   b. A tracer survey such as oxygen-activation logging;
   c. A temperature or noise log;
   d. A casing inspection log; and

5. Any alternative methods that provide equivalent or better information and that are required by and/or approved of by the Director.

B. The owner or operator must take whole cores or sidewall cores of the injection zone and confining system and formation fluid samples from the injection zone(s), and must submit to the Director a detailed report prepared by a log analyst that includes: Well log analyses (including well logs), core analyses, and formation fluid sample information. The Director may accept information on cores from nearby wells if the owner or operator can demonstrate that core retrieval is not possible and that such cores are representative of conditions at the well. The Director may require the owner or operator to core other formations in the borehole.

C. The owner or operator must record the fluid temperature, pH, conductivity, reservoir pressure, and static fluid level of the injection zone(s).

D. At a minimum, the owner or operator must determine or calculate the following information concerning the injection and confining zone(s):

1. Fracture pressure;

2. Other physical and chemical characteristics of the injection and confining zone(s); and

3. Physical and chemical characteristics of the formation fluids in the injection zone(s).

E. Upon completion, but prior to operation, the owner or operator must conduct the following tests to verify hydrogeologic characteristics of the injection zone(s):

1. A pressure fall-off test; and,

2. A pump test; or

3. Injectivity tests.

F. The owner or operator must provide the Director with the opportunity to witness all logging and testing by this Part. The owner or operator must submit a schedule of such activities to the Director 30 days prior to conducting the first test and submit any changes to the schedule 30 days prior to the next scheduled test.

R18-9-J663. Class VI; Injection Well Operating Requirements

A. Except during stimulation, the owner or operator must ensure that injection pressure does not exceed 90 percent of the fracture pressure of the injection zone(s) so as to ensure that the injection does not initiate new fractures or propagate existing fractures in the injection zone(s). In no case may injection pressure initiate fractures in the confining zone(s) or cause the movement of injection or formation fluids that endangers a USDW. Pursuant to
requirements at R18-9-J657(B)(9), all stimulation programs must be approved by the Director as part of the permit application and incorporated into the permit.

B. Injection between the outermost casing protecting USDWs and the well bore is prohibited.

C. The owner or operator must fill the annulus between the tubing and the long string casing with a non-corrosive fluid approved by the Director. The owner or operator must maintain on the annulus a pressure that exceeds the operating injection pressure, unless the Director determines that such requirement might harm the integrity of the well or endanger USDWs.

D. Other than during periods of well workover (maintenance) approved by the Director in which the sealed tubing-casing annulus is disassembled for maintenance or corrective procedures, the owner or operator must maintain mechanical integrity of the injection well at all times.

E. The owner or operator must install and use:
   1. Continuous recording devices to monitor: The injection pressure; the rate, volume and/or mass, and temperature of the carbon dioxide stream; and the pressure on the annulus between the tubing and the long string casing and annulus fluid volume; and
   2. Alarms and automatic surface shut-off systems or, at the discretion of the Director, down-hole shut-off systems for onshore wells or, other mechanical devices that provide equivalent protection.

F. If a shutdown (such as down-hole or at the surface) is triggered or a loss of mechanical integrity is discovered, the owner or operator must immediately investigate and identify as expeditiously as possible the cause of the shut off. If, upon such investigation, the well appears to be lacking mechanical integrity, or if monitoring required under subsection (E) of this Section otherwise indicates that the well may be lacking mechanical integrity, the owner or operator must:
   1. Immediately cease injection;
   2. Take all steps reasonably necessary to determine whether there may have been a release of the injected carbon dioxide stream or formation fluids into any unauthorized zone;
   3. Notify the Director within 24 hours;
   4. Restore and demonstrate mechanical integrity to the satisfaction of the Director prior to resuming injection; and
   5. Notify the Director when injection can be expected to resume.

R18-9-J664. Class VI; Mechanical Integrity

A. A Class VI well has mechanical integrity if:
   1. There is no significant leak in the casing, tubing, or packer; and
   2. There is no significant fluid movement into a USDW through channels adjacent to the injection well bore.

B. To evaluate the absence of significant leaks under subsection (A)(1) of this Section, owners or operators must, following an initial annulus pressure test, continuously monitor injection pressure, rate, injected volumes; pressure on the annulus between tubing and long-string casing; and annulus fluid volume as specified in R18-9-J663;

C. At least once per year, the owner or operator must use one of the following methods to determine the absence of significant fluid movement under subsection (A)(2) of this Section:
   1. An approved tracer survey such as an oxygen-activation log; or
   2. A temperature or noise log.

D. If required by the Director, at a frequency specified in the testing and monitoring plan required at R18-9-J665, the owner or operator must run a casing inspection log to determine the presence or absence of corrosion in the long-string casing.

E. The Director may require any other test to evaluate mechanical integrity under subsections (A)(1) or (A)(2) of this Section. Also, the Director may allow the use of a test to demonstrate mechanical integrity other than those listed above with the written approval of the Administrator. To obtain approval for a new mechanical integrity test, the Director must submit a written request to the Administrator setting forth the proposed test and all technical data supporting its use.

F. In conducting and evaluating the tests enumerated in this Section or others to be allowed by the Director, the owner or operator and the Director must apply methods and standards generally accepted in the industry. When the owner or operator reports the results of mechanical integrity tests to the Director, they shall include a description of the test(s) and the method(s) used. In making his/her evaluation, the Director must review monitoring and other test data submitted since the previous evaluation.

G. The Director may require additional or alternative tests if the results presented by the owner or operator under subsections (A) through (F) of this Section are not satisfactory to the Director to demonstrate that there is no
significant leak in the casing, tubing, or packer, or to demonstrate that there is no significant movement of fluid into a USDW resulting from the injection activity as stated in subsections (A)(1) and (A)(2) of this Section.

R18-9-J665. Class VI: Testing and Monitoring Requirements

The owner or operator of a Class VI well must prepare, maintain, and comply with a testing and monitoring plan to verify that the geologic sequestration project is operating as permitted and is not endangering USDWs. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The testing and monitoring plan must be submitted with the permit application, for Director approval, and must include a description of how the owner or operator will meet the requirements of this Section, including accessing sites for all necessary monitoring and testing during the life of the project. Testing and monitoring associated with geologic sequestration projects must, at a minimum, include:

1. Analysis of the carbon dioxide stream with sufficient frequency to yield data representative of its chemical and physical characteristics;
2. Installation and use, except during well workovers as defined in R18-9-J663, of continuous recording devices to monitor injection pressure, rate, and volume; the pressure on the annulus between the tubing and the long string casing; and the annulus fluid volume added;
3. Corrosion monitoring of the well materials for loss of mass, thickness, cracking, pitting, and other signs of corrosion, which must be performed on a quarterly basis to ensure that the well components meet the minimum standards for material strength and performance set forth in R18-9-J661, by:
   a. Analyzing coupons of the well construction materials placed in contact with the carbon dioxide stream; or
   b. Routing the carbon dioxide stream through a loop constructed with the material used in the well and inspecting the materials in the loop; or
   c. Using an alternative method approved by the Director;
4. Periodic monitoring of the ground water quality and geochemical changes above the confining zone(s) that may be a result of carbon dioxide movement through the confining zone(s) or additional identified zones, including:
   a. The location and number of monitoring wells based on specific information about the geologic sequestration project, including injection rate and volume, geology, the presence of artificial penetrations, and other factors; and
   b. The monitoring frequency and spatial distribution of monitoring wells based on baseline geochemical data that has been collected under R18-9-J657 and on any modeling results in the area of review evaluation required by R18-9-J659(C);
5. A demonstration of external mechanical integrity pursuant to R18-9-J664(C) at least once per year until the injection well is plugged; and, if required by the Director, a casing inspection log pursuant to requirements under R18-9-J664(D) at a frequency established in the testing and monitoring plan;
6. A pressure fall-off test at least once every five years unless more frequent testing is required by the Director based on site-specific information;
7. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of elevated pressure (e.g., the pressure front) by using:
   a. Direct methods in the injection zone(s); and,
   b. Indirect methods (e.g., seismic, electrical, gravity, or electromagnetic surveys and/or down-hole carbon dioxide detection tools), unless the Director determines, based on site-specific geology, that such methods are not appropriate;
8. The Director may require surface air monitoring and/or soil gas monitoring to detect movement of carbon dioxide that could endanger a USDW.
   a. Design of Class VI surface air and/or soil gas monitoring must be based on potential risks to USDWs within the area of review;
   b. The monitoring frequency and spatial distribution of surface air monitoring and/or soil gas monitoring must be decided using baseline data, and the monitoring plan must describe how the proposed monitoring will yield useful information on the area of review delineation and/or compliance with standards under R18-9-B608;
   c. If an owner or operator demonstrates that monitoring employed under 40 CFR §§ 98.440 to 98.449 (Clean Air Act, 42 U.S.C. 7401 et seq.) accomplishes the goals of subsections (A)(8)(a) and (b) of this Section, and meets the requirements pursuant to R18-9-J666(3)(e), a Director that requires surface

91
air/soil gas monitoring must approve the use of monitoring employed under 40 CFR §§ 98.440 to 98.449. Compliance with 40 CFR §§ 98.440 to 98.449 pursuant to this provision is considered a condition of the Class VI permit;

9. Any additional monitoring, as required by the Director, necessary to support, upgrade, and improve computational modeling of the area of review evaluation required under R18-9-J659(C) and to determine compliance with standards under R18-9-B608;

10. The owner or operator shall periodically review the testing and monitoring plan to incorporate monitoring data collected under this Part, operational data collected under R18-9-J663, and the most recent area of review reevaluation performed under R18-9-J659(E). In no case shall the owner or operator review the testing and monitoring plan less often than once every five years. Based on this review, the owner or operator shall submit an amended testing and monitoring plan or demonstrate to the Director that no amendment to the testing and monitoring plan is needed. Any amendments to the testing and monitoring plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements under R18-9-C632 or R18-9-C633, as appropriate. Amended plans or demonstrations shall be submitted to the Director as follows:
   a. Within one year of an area of review reevaluation;
   b. Following any significant changes to the facility, such as addition of monitoring wells or newly permitted injection wells within the area of review, on a schedule determined by the Director; or
   c. When required by the Director.

11. A quality assurance and surveillance plan for all testing and monitoring requirements.

R18-9-J666. Class VI; Reporting Requirements
The owner or operator must provide at a minimum, the following reports to the Director, and as specified in subsection (5) of this Section to EPA, for each permitted Class VI well:

1. Semi-annual reports containing:
   a. Any changes to the physical, chemical, and other relevant characteristics of the carbon dioxide stream from the proposed operating data;
   b. Monthly average, maximum, and minimum values for injection pressure, flow rate and volume, and annular pressure;
   c. A description of any event that exceeds operating parameters for annulus pressure or injection pressure specified in the permit;
   d. A description of any event which triggers a shut-off device required pursuant to R18-9-J663(E) and the response taken;
   e. The monthly volume and/or mass of the carbon dioxide stream injected over the reporting period and the volume injected cumulatively over the life of the project;
   f. Monthly annulus fluid volume added; and
   g. The results of monitoring prescribed under R18-9-J665.

2. Report, within 30 days, the results of:
   a. Periodic tests of mechanical integrity;
   b. Any well workover; and
   c. Any other test of the injection well conducted by the permittee if required by the Director.

3. Report, within 24 hours:
   a. Any evidence that the injected carbon dioxide stream or associated pressure front may cause an endangerment to a USDW;
   b. Any noncompliance with a permit condition, or malfunction of the injection system, which may cause fluid migration into or between USDWs;
   c. Any triggering of a shut-off system (i.e., down-hole or at the surface);
   d. Any failure to maintain mechanical integrity; or
   e. Pursuant to compliance with the requirement at R18-9-J665(8) for surface air/soil gas monitoring or other monitoring technologies, if required by the Director, any release of carbon dioxide to the atmosphere or biosphere.

4. Owners or operators must notify the Director in writing 30 days in advance of:
   a. Any planned well workover;
   b. Any planned stimulation activities, other than stimulation for formation testing conducted under R18-9-J657; and
   c. Any other planned test of the injection well conducted by the permittee.
5. Owners or operators must submit all required reports, submittals, and notifications under Part J of this Article to EPA in an electronic format approved by EPA.

6. Records shall be retained by the owner or operator as follows:
   a. All data collected under R18-9-J657 for Class VI permit applications shall be retained throughout the life of the geologic sequestration project and for ten years following site closure.
   b. Data on the nature and composition of all injected fluids collected pursuant to R18-9-J665(1) shall be retained until ten years after site closure. The Director may require the owner or operator to deliver the records to the Director at the conclusion of the retention period.
   c. Monitoring data collected pursuant to R18-9-J665(2) through (9) shall be retained for ten years after it is collected.
   d. Well plugging reports, post-injection site care data, including, if appropriate, data and information used to develop the demonstration of the alternative post-injection site care timeframe, and the site closure report collected pursuant to requirements at R18-9-J668(F) and (H) shall be retained for ten years following site closure.
   e. The Director has authority to require the owner or operator to retain any records required in this Part for longer than ten years after site closure.

R18-9-J667. Class VI; Injection Well Plugging

A. Prior to the well plugging, the owner or operator must flush each Class VI injection well with a buffer fluid, determine bottomhole reservoir pressure, and perform a final external mechanical integrity test.

B. The owner or operator of a Class VI well must prepare, maintain, and comply with a plan that is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The well plugging plan must be submitted as part of the permit application and must include the following information:
   1. Appropriate tests or measures for determining bottomhole reservoir pressure;
   2. Appropriate testing methods to ensure external mechanical integrity as specified in R18-9-J664;
   3. The type and number of plugs to be used;
   4. The placement of each plug, including the elevation of the top and bottom of each plug;
   5. The type, grade, and quantity of material to be used in plugging. The material must be compatible with the carbon dioxide stream; and
   6. The method of placement of the plugs.

C. The owner or operator must notify the Director in writing pursuant to R18-9-J666(5), at least 60 days before plugging of a well. At this time, if any changes have been made to the original well plugging plan, the owner or operator must also provide the revised well plugging plan. The Director may allow for a shorter notice period. Any amendments to the injection well plugging plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate.

D. Within 60 days after plugging, the owner or operator must submit, pursuant to R18-9-J666(5), a plugging report to the Director. The report must be certified as accurate by the owner or operator and by the person who performed the plugging operation, if other than the owner or operator. The owner or operator shall retain the well plugging report for ten years following site closure.

R18-9-J668. Class VI; Post-Injection Site Care and Site Closure

A. The owner or operator of a Class VI well must prepare, maintain, and comply with a plan for post-injection site care and site closure that meets the requirements of subsection (A)(2) of this Section and is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit.
   1. The owner or operator must submit the post-injection site care and site closure plan as a part of the permit application to be approved by the Director.
   2. The post-injection site care and site closure plan must include the following information:
      a. The pressure differential between pre-injection and predicted post-injection pressures in the injection zone(s);
      b. The predicted position of the carbon dioxide plume and associated pressure front at site closure as demonstrated in the area of review evaluation required under R18-9-J659(C)(1);
      c. A description of post-injection monitoring location, methods, and proposed frequency;
d. A proposed schedule for submitting post-injection site care monitoring results to the Director pursuant to R18-9-J666(5); and
e. The duration of the post-injection site care timeframe and, if approved by the Director, the demonstration of the alternative post-injection site care timeframe that ensures non-endangerment of USDWs.

3. Upon cessation of injection, owners or operators of Class VI wells must either submit an amended post-injection site care and site closure plan or demonstrate to the Director through monitoring data and modeling results that no amendment to the plan is needed. Any amendments to the post-injection site care and site closure plan must be approved by the Director, be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate.

4. At any time during the life of the geologic sequestration project, the owner or operator may modify and resubmit the post-injection site care and site closure plan for the Director's approval within 30 days of such change.

B. The owner or operator shall monitor the site following the cessation of injection to show the position of the carbon dioxide plume and pressure front and demonstrate that USDWs are not being endangered.

1. Following the cessation of injection, the owner or operator shall continue to conduct monitoring as specified in the Director-approved post-injection site care and site closure plan for at least 50 years or for the duration of the alternative timeframe approved by the Director pursuant to requirements in subsection (C) of this Section, unless they make a demonstration under subsection (B)(2) of this Section. The monitoring must continue until the geologic sequestration project no longer poses an endangerment to USDWs and the demonstration under subsection (B)(2) of this Section is submitted and approved by the Director.

2. If the owner or operator can demonstrate to the satisfaction of the Director before 50 years or prior to the end of the approved alternative timeframe based on monitoring and other site-specific data, that the geologic sequestration project no longer poses an endangerment to USDWs, the Director may approve an amendment to the post-injection site care and site closure plan to reduce the frequency of monitoring or may authorize site closure before the end of the 50-year period or prior to the end of the approved alternative timeframe, where they have substantial evidence that the geologic sequestration project no longer poses a risk of endangerment to USDWs.

3. Prior to authorization for site closure, the owner or operator must submit to the Director for review and approval a demonstration, based on monitoring and other site-specific data, that no additional monitoring is needed to ensure that the geologic sequestration project does not pose an endangerment to USDWs.

4. If the demonstration in subsection (B)(3) of this Section cannot be made at the end of the 50-year period or at the end of the approved alternative timeframe, or if the Director does not approve the demonstration, the owner or operator must submit to the Director a plan to continue post-injection site care until a demonstration can be made and approved by the Director.

C. At the Director's discretion, the Director may approve, in consultation with EPA, an alternative post-injection site care timeframe other than the 50-year default, if an owner or operator can demonstrate during the permitting process that an alternative post-injection site care timeframe is appropriate and ensures non-endangerment of USDWs. The demonstration must be based on significant, site-specific data and information including all data and information collected pursuant to R18-9-J657 or R18-9-J658, and must contain substantial evidence that the geologic sequestration project will no longer pose a risk of endangerment to USDWs at the end of the alternative post-injection site care timeframe.

1. A demonstration of an alternative post-injection site care timeframe must include consideration and documentation of:
   a. The results of computational modeling performed pursuant to delineation of the area of review under R18-9-J659;
   b. The predicted timeframe for pressure decline within the injection zone, and any other zones, such that formation fluids may not be forced into any USDWs; and/or the timeframe for pressure decline to pre-injection pressures;
   c. The predicted rate of carbon dioxide plume migration within the injection zone, and the predicted timeframe for the cessation of migration;
   d. A description of the site-specific processes that will result in carbon dioxide trapping including immobilization by capillary trapping, dissolution, and mineralization at the site;
   e. The predicted rate of carbon dioxide trapping in the immobile capillary phase, dissolved phase, and/or mineral phase;
f. The results of laboratory analyses, research studies, and/or field or site-specific studies to verify the information required in subsection (C)(1)(d) and (C)(1)(e) of this Section;
g. A characterization of the confining zone(s) including a demonstration that it is free of transmissive faults, fractures, and micro-fractures and of appropriate thickness, permeability, and integrity to impede fluid movement, such as carbon dioxide and formation fluids;
h. The presence of potential conduits for fluid movement including planned injection wells and project monitoring wells associated with the proposed geologic sequestration project or any other projects in proximity to the predicted/modelled, final extent of the carbon dioxide plume and area of elevated pressure;
i. A description of the well construction and an assessment of the quality of plugs of all abandoned wells within the area of review;
j. The distance between the injection zone and the nearest USDWs above and/or below the injection zone; and
k. Any additional site-specific factors required by the Director.

2. Information submitted to support the demonstration in subsection (C)(1) of this Section must meet the following criteria:
   a. All analyses and tests performed to support the demonstration must be accurate, reproducible, and performed in accordance with the established quality assurance standards;
   b. Estimation techniques must be appropriate and EPA-certified test protocols must be used where available;
   c. Predictive models must be appropriate and tailored to the site conditions, composition of the carbon dioxide stream and injection and site conditions over the life of the geologic sequestration project;
   d. Predictive models must be calibrated using existing information where sufficient data are available;
   e. Reasonably conservative values and modeling assumptions must be used and disclosed to the Director whenever values are estimated on the basis of known, historical information instead of site-specific measurements;
   f. An analysis must be performed to identify and assess aspects of the alternative post-injection site care timeframe demonstration that contribute significantly to uncertainty. The owner or operator must conduct sensitivity analyses to determine the effect that significant uncertainty may contribute to the modeling demonstration;
   g. An approved quality assurance and quality control plan must address all aspects of the demonstration;
   h. Any additional criteria required by the Director.

D. The owner or operator must notify the Director in writing at least 120 days before site closure. At this time, if any changes have been made to the original post-injection site care and site closure plan, the owner or operator must also provide the revised plan. The Director may allow for a shorter notice period.

E. After the Director has authorized site closure, the owner or operator must plug all monitoring wells in a manner which will not allow movement of injection or formation fluids that endangers a USDW.

F. The owner or operator must submit a site closure report to the Director within 90 days of site closure, which must thereafter be retained at a location designated by the Director for ten years. The report must include:
   1. Documentation of appropriate injection and monitoring well plugging as specified in R18-9-J667 and subsection (E) of this Section. The owner or operator must provide a copy of a survey plat which has been submitted to the local zoning authority designated by the Director. The plat must indicate the location of the injection well relative to permanently surveyed benchmarks. The owner or operator must also submit a copy of the plat to the Administrator of EPA Region 9;
   2. Documentation of appropriate notification and information to such State, local and Tribal authorities that have authority over drilling activities to enable such State, local, and Tribal authorities to impose appropriate conditions on subsequent drilling activities that may penetrate the injection and confining zone(s); and
   3. Records reflecting the nature, composition, and volume of the carbon dioxide stream.

G. Each owner or operator of a Class VI injection well must record a notation on the deed to the facility property or any other document that is normally examined during Title search that will in perpetuity provide any potential purchaser of the property the following information:
   1. The fact that land has been used to sequester carbon dioxide;
   2. The name of the State agency, local authority, and/or Tribe with which the survey plat was filed, as well as the address of the Environmental Protection Agency Regional Office to which it was submitted; and
3. The volume of fluid injected, the injection zone or zones into which it was injected, and the period over which injection occurred.

H. The owner or operator must retain for ten years following site closure, records collected during the post-injection site care period. The owner or operator must deliver the records to the Director at the conclusion of the retention period, and the records must thereafter be retained at a location designated by the Director for that purpose.

R18-9-J669. Class VI; Emergency and Remedial Response

A. As part of the permit application, the owner or operator must provide the Director with an emergency and remedial response plan that describes actions the owner or operator must take to address movement of the injection or formation fluids that may cause an endangerment to a USDW during construction, operation, and post-injection site care periods. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit.

B. If the owner or operator obtains evidence that the injected carbon dioxide stream and associated pressure front may cause an endangerment to a USDW, the owner or operator must:
   1. Immediately cease injection;
   2. Take all steps reasonably necessary to identify and characterize any release;
   3. Notify the Director within 24 hours; and
   4. Implement the emergency and remedial response plan approved by the Director.

C. The Director may allow the operator to resume injection prior to remediation if the owner or operator demonstrates that the injection operation will not endanger USDWs.

D. The owner or operator shall periodically review the emergency and remedial response plan developed under subsection (A) of this Section. In no case shall the owner or operator review the emergency and remedial response plan less often than once every five years. Based on this review, the owner or operator shall submit an amended emergency and remedial response plan or demonstrate to the Director that no amendment to the emergency and remedial response plan is needed. Any amendments to the emergency and remedial response plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate. Amended plans or demonstrations shall be submitted to the Director as follows:
   1. Within one year of an area of review reevaluation;
   2. Following any significant changes to the facility, such as addition of injection or monitoring wells, on a schedule determined by the Director; or
   3. When required by the Director.

R18-9-J670. Class VI; Injection Depth Waiver Requirements

A. This Section sets forth information which an owner or operator seeking a waiver of the Class VI injection depth requirements must submit to the Director; information the Director must consider in consultation with all affected Public Water System Supervision Directors; the procedure for Director-Administrator communication and waiver issuance; and the additional requirements that apply to owners or operators of Class VI wells granted a waiver of the injection depth requirements.

B. In seeking a waiver of the requirement to inject below the lowermost USDW, the owner or operator must submit a supplemental report concurrent with permit application. The supplemental report must include the following:
   1. A demonstration that the injection zone(s) is/are laterally continuous, is not a USDW, and is not hydraulically connected to USDWs; does not outcrop; has adequate injectivity, volume, and sufficient porosity to safely contain the injected carbon dioxide and formation fluids; and has appropriate geochemistry.
   2. A demonstration that the injection zone(s) is/are bounded by laterally continuous, impermeable confining units above and below the injection zone(s) adequate to prevent fluid movement and pressure buildup outside of the injection zone(s); and that the confining unit(s) is/are free of transmissive faults and fractures. The report shall further characterize the regional fracture properties and contain a demonstration that such fractures will not interfere with injection, serve as conduits, or endanger USDWs.
   3. A demonstration, using computational modeling, that USDWs above and below the injection zone will not be endangered as a result of fluid movement. This modeling should be conducted in conjunction with the area of review determination, as described in R18-9-J659, and is subject to requirements, as described in R18-9-J659(C), and periodic reevaluation, as described in R18-9-J659(E).
4. A demonstration that well design and construction, in conjunction with the waiver, will ensure isolation of the injectate in lieu of requirements at R18-9-J661(A)(1) and will meet well construction requirements in subsection (G) of this Section.

5. A description of how the monitoring and testing and any additional plans will be tailored to the geologic sequestration project to ensure protection of USDWs above and below the injection zone(s), if a waiver is granted.

6. Information on the location of all the public water supplies affected, reasonably likely to be affected, or served by USDWs in the area of review.

7. Any other information requested by the Director to inform the Administrator's decision to issue a waiver.

C. To inform the Administrator's decision on whether to grant a waiver of the injection depth requirements at R18-9-A604 and R18-9-J661(A)(1), the Director must submit, to the Administrator, documentation of the following:

1. An evaluation of the following information as it relates to siting, construction, and operation of a geologic sequestration project with a waiver:
   a. The integrity of the upper and lower confining units;
   b. The suitability of the injection zone(s), such as lateral continuity, lack of transmissive faults and fractures, knowledge of current or planned artificial penetrations into the injection zone(s), or formations below the injection zone;
   c. The potential capacity of the geologic formation(s) to sequester carbon dioxide, accounting for the availability of alternative injection sites;
   d. All other site characterization data, the proposed emergency and remedial response plan, and a demonstration of financial responsibility;
   e. Community needs, demands, and supply from drinking water resources;
   f. Planned needs, potential and/or future use of USDWs and non-USDWs in the area;
   g. Planned or permitted water, hydrocarbon, or mineral resource exploitation potential of the proposed injection formation(s) and other formations both above and below the injection zone to determine if there are any plans to drill through the formation to access resources in or beneath the proposed injection zone(s)/formation(s);
   h. The proposed plan for securing alternative resources or treating USDW formation waters in the event of contamination related to the Class VI injection activity and;
   i. Any other applicable considerations or information requested by the Director.

2. Consultation with the Public Water System Supervision Directors of all States and Tribes having jurisdiction over lands within the area of review of a well for which a waiver is sought.

3. Any written waiver-related information submitted by the Public Water System Supervision Director(s) to the (UIC) Director.

D. Pursuant to requirements at R18-9-C620 and concurrent with the Class VI permit application notice process, the Director shall give public notice that a waiver application has been submitted. The notice shall clearly state:

1. The depth of the proposed injection zone(s);
2. The location of the injection well(s);
3. The name and depth of all USDWs within the area of review;
4. A map of the area of review;
5. The names of any public water supplies affected, reasonably likely to be affected, or served by USDWs in the area of review and;
6. The results of UIC-Public Water System Supervision consultation required under subsection (C)(2) of this Section.

E. Following public notice, the Director shall provide all information received through the waiver application process to the Administrator. Based on the information provided, the Administrator shall provide written concurrence or non-concurrence regarding waiver issuance.

1. If the Administrator determines that additional information is required to support a decision, the Director shall provide the information. At the Administrator’s discretion, they may require that public notice of the new information be initiated.

2. In no case shall a Director of a State-approved program issue a waiver without receipt of written concurrence from the Administrator.

F. If a waiver is issued, within 30 days of waiver issuance, EPA shall post the following information on the Office of Water's Web site:

1. The depth of the proposed injection zone(s);
2. The location of the injection well(s);
3. The name and depth of all USDWs within the area of review;
4. A map of the area of review;
5. The names of any public water supplies affected, reasonably likely to be affected, or served by USDWs in
   the area of review; and
6. The date of waiver issuance.

G. Upon receipt of a waiver of the requirement to inject below the lowermost USDW for geologic sequestration, the
   owner or operator of the Class VI well must comply with:
2. All requirements at R18-9-J661 with the following modified requirements:
   a. The owner or operator must ensure that Class VI wells with a waiver are constructed and completed to
      prevent movement of fluids into any unauthorized zones including USDWs, in lieu of requirements at
      R18-9-J661(A)(1).
   b. The casing and cementing program must be designed to prevent the movement of fluids into any
      unauthorized zones including USDWs in lieu of requirements at R18-9-J661(B)(1).
   c. The surface casing must extend through the base of the nearest USDW directly above the injection
      zone and be cemented to the surface; or, at the Director's discretion, another formation above the
      injection zone and below the nearest USDW above the injection zone.

3. All requirements at R18-9-J665 with the following modified requirements:
   a. The owner or operator shall monitor the groundwater quality, geochemical changes, and pressure in
      the first USDWs immediately above and below the injection zone(s); and in any other formations at
      the discretion of the Director.
   b. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of
      elevated pressure by using direct methods to monitor for pressure changes in the injection zone(s); and,
      indirect methods (such as seismic, electrical, gravity, or electromagnetic surveys and/or
      down-hole carbon dioxide detection tools), unless the Director determines, based on site-specific
      geology, that such methods are not appropriate.

4. All requirements at R18-9-J668 with the following, modified post-injection site care monitoring
   requirements:
   a. The owner or operator shall monitor the groundwater quality, geochemical changes and pressure in
      the first USDWs immediately above and below the injection zone; and in any other formations at the
      discretion of the Director.
   b. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of
      elevated pressure by using direct methods in the injection zone(s); and indirect methods, unless the
      Director determines based on site-specific geology, that such methods are not appropriate.

5. Any additional requirements requested by the Director designed to ensure protection of USDWs above and
   below the injection zone(s).

**NOTES**

1. Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology and taking cost into consideration. MCLs are enforceable standards.

2. Units are in milligrams per liter (mg/L) unless otherwise noted. Milligrams per liter are equivalent to parts per million (ppm).

3. A routine sample that is fecal coliform-positive or E. coli-positive triggers repeat samples; if any repeat sample is total coliform-positive, the system has an acute MCL violation. A routine sample that is total coliform-positive, and fecal coliform-negative or E. coli-negative triggers repeat samples; if any repeat sample is fecal coliform-positive or E. coli-positive, the system has an acute MCL violation. See also Total Coliforms.

4. No more than 5.0 percent samples total coliform-positive in a month. (For water systems that collect fewer than 40 routine samples per month, no more than one sample can be total coliform-positive per month.) Every sample that has total coliform must be analyzed for either fecal coliforms or E. coli. If two consecutive TC-positive samples, and one is also positive for E. coli or fecal coliforms, system has an acute MCL violation.
The economic, small business, and consumer impact statement:

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An identification of the rulemaking:
The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of 72 new sections, as well as amendments to existing sections, made by the Arizona Department of Environmental Quality (ADEQ) to 18 A.A.C. 9, Articles 1 and 6, 18 A.A.C. 1, Article 5 and 18 A.A.C. 14, Article 1 in order to adopt the Federal Safe Drinking Water Act’s (SDWA) Underground Injection Control Program (UIC) under the relevant regulation in 40 C.F.R. Parts 144 through 146 within the State of Arizona as required under A.R.S. §§ 49-203(A)(6), 49-257.01.

Arizona Revised Statutes §§ 49-203(A)(6) and 49-257.01 mandate that ADEQ establishes the UIC Program through rule. Federal statute at 42 United States Code 300h et seq. authorizes EPA to grant states primary enforcement authority or primacy over the UIC program upon the adoption of the program in rule at the state level (see 40 CFR 145.22(a)(5)).

Control of underground injection conducted in the industrial, municipal and residential sectors is necessary in order to protect Arizona’s underground sources of drinking water (USDWs) or aquifers. In Arizona, the UIC program has been administered by the Environmental Protection Agency (EPA) for decades. Currently 5 Federal UIC permits are in effect, along with thousands of UIC Class V wells that are authorized by rule.

Arizona’s program adoption will allow primacy to rest with ADEQ who is entirely focused on, and knowledgeable of, Arizona’s unique geology and climate; and who deeply understand Arizona’s environment, economy, and community. Additionally, program adoption will allow ADEQ to issue better permits, faster, and eliminate duplicative regulation, permitting, and permittee fees between the Federal and state programs. Adoption of this program will supplement Arizona’s already existing groundwater safeguards, taking a place in conjunction with the Aquifer Protection Permit Program.

B. A summary of the EIS:
General Impacts
The primary costs of this rulemaking will be borne by UIC well permit holders and UIC wells authorized by rule. This includes in-situ copper mines, salt mines, municipal aquifer storage and recharge wells, extraction wells, carbon sequestration wells and a host of other injection wells.

There will be an increase in permitting costs due to ADEQ’s fee-for-service model. The fee-for-service model institutes the charging of permittees for a significant portion of the funding needed to support the implementation of the regulatory program. The Federal UIC program operates off of a general fund model, where permittees are not charged and the cost of implementation of the regulatory program comes from specific, legislatively approved funds (usually with an origin in government tax revenue). Many of ADEQ’s programs were changed after the 2008 recession from a general fund model to fee-for service model. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a financial burden upon the permittees.

Despite the increase in permitting fees, such as annual fees, the beneficial impact to the stakeholders include permits and amendments being issued faster and the elimination of duplicative regulation, permitting, and permittee fees as a result of eliminating one of the two applicable regulatory programs for UIC permittees. ADEQ stands to benefit from this increase in fees by fulfilling a requirement of primacy. The stakeholders and the general public stand to benefit through the assurance provided that high-risk drywells in the state are being physically inspected from time to time, as opposed to rarely, as was the frequency of inspection before the ADEQ UIC program primacy.

A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.
Specific Impacts
While the three existing UIC permittees in the state of Arizona will see an increase in regulatory cost of conducting their business, they stand to benefit greatly in having the program administered in-state through speedier application review and permit services, the elimination of duplicative regulation between the Federal and state governments and local access to ADEQ expertise, personnel and customer service. Despite the increase in regulatory cost, the existing permittees support ADEQ’s adoption of the program.

Drywell regulation in Arizona will be transitioned from dual regulation between the Federal and state governments to a singular, UIC Class V authorization by rule through a simple inventory. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. The former drywell registration fee of $100 will be increased to $200 per UIC Class V inventory.

The reason for this increase to the Drywell fees is to supplement the funds necessary to support the implementation of the Class V portion of the UIC program. This includes an EPA requirement for ADEQ to assume the inspection of responsibilities for Class V wells in the state.

Stakeholder Process
ADEQ and Arizona’s UIC stakeholders spent many hours negotiating the fees for the UIC program in this rulemaking. The transparent and collaborative process rendered a balanced set of fees, whereupon the needs of all parties were met and the support of the stakeholders in adopting the program was preserved.

C. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rules:
This rulemaking will affect state government agencies, political subdivisions, and privately-owned businesses. Additionally, the rulemaking will impact the general public.

ADEQ has identified the following list of affected persons:

State government agencies
State agencies benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry.

- ADEQ
- Arizona Department of Water Resources
- Arizona Department of Agriculture

Political subdivisions
Political subdivisions benefit from the rulemaking due to the rulemaking supporting the environment, the community, and industry. Additional benefits include faster, better permits facilitating the installation of Drywells as needed and the development of groundwater treatment facilities to support Arizona’s growing potable water needs. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Counties
- Municipalities
- Domestic Water Improvement Districts

Privately-Owned Businesses
Privately-owned businesses will benefit from faster, better permits reducing the costs of delays to permit issuance. As permittees, political subdivisions will also bear the increased cost of the new permitting fee schedule.

- Mines
- Mineral Extraction Companies
- Businesses which utilize drywells
**The General Public**
The general public will benefit from the environmental protection of better permits being issued by an agency with expertise specific to the permitting actions occurring in Arizona’s climate and geology. Additional benefits will be derived through the benefits industry derives which in turn supports the community and the general public.

**D. Cost/benefit analysis**

2. Part II - Individual Stakeholder Summaries/Calculations:

This section outlines ADEQ’s analyses of the estimated costs and benefits of this rulemaking, made after consultation with ADEQ staff, as well as knowledgeable individuals in the area of groundwater protection and underground injection control.

ADEQ
ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself requires staff time for technical review, rule composition, and public input. In order to support the administration of the UIC program, ADEQ plans on hiring 3.2 new full-time employees (FTE). These 3.2 FTEs will be split primarily between permit specialist positions, inspectors and other administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees, annual fees, inventory fees, well fees and an EPA work grant.

This rulemaking will create significant benefit to ADEQ in its fulfillment of the legislative mandates at A.R.S. §§ 49-203(A)(6) and 49-257.01. Given ADEQ’s mission to protect human health and the environment, the Department acknowledges the benefits to stakeholders that will flow from the implementation of this program, including a streamlined permitting process and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program and permit. This fact stands to save the regulated community time, money and hardship.

The Number of New, Full-Time Employees Necessary to Implement and Enforce the Proposed Rule
3.2

Political Subdivisions
Political subdivisions are likely to see minimal costs and minimal benefit from this rulemaking. As mentioned above, municipalities have shown interest in applying for Class I disposal well permits; however, none have been applied for at the time of this rulemaking. Until political subdivisions apply for UIC permits, they will see no costs due to this rulemaking and the UIC program. However, political subdivisions are interested in the disposal of brine from prospective desalinization plants. This rulemaking stands to localize brine disposal regulation, which would bring benefit to prospective stakeholders. Municipalities also often own a multitude of dry wells, which are to be regulated under the UIC program’s Class V wells.

The UIC program exists currently, administered by the Federal government, until ADEQ achieves primary enforcement authority over the program. As is stated above, the EPA administered program is funded through an approved budget from a Federal general fund. ADEQ’s funding for UIC program administration will be realized through a fee-for-service model. The fee-for-service model institutes the charging of applicants and permittees for a significant portion of the funding necessary to support the regulatory program and the personnel necessary to staff it. Many of ADEQ’s programs are structured this way. The Federal UIC program
does not charge applicants, but rather derives its approved funds from a Federal general fund. The difference between the fee-for-service model and the general fund model is the reason the regulatory program within this rulemaking will impose a potentially minimal financial burden upon political subdivisions.

However, when the political subdivisions choose to engage with the UIC program that is the subject of this rulemaking, the benefits include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**Privately-Owned Business**

Privately-owned business is likely to see moderate cost and moderate benefit from this rulemaking. The disparity between EPA’s general fund program model and ADEQ’s fee-for-service model will incur potentially moderate costs to privately-owned businesses, especially the businesses that currently have UIC permits.

However, and as mentioned above, the benefits to privately-owned business include a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship.

**General Public**

The general public could see significant benefit from this rulemaking. The UIC program that is the subject of this rulemaking aims to protect underground sources of drinking water supply or aquifers, many of which provide drinking water to Arizonans. The price of treating contaminated water or having to resort to other sources of water for drinking water supply is potentially significant. Furthermore, A positive impact for all stakeholders is the protection of the environment that the program this rulemaking supports will bring. Individuals with a better understanding of Arizona’s geology and climate will be developing and maintaining these permits, which will lead to better protection of the environment, which supports the economy, which supports the community.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ estimates that, for the most part, this rulemaking will not have an impact on public or private employment. However, and as mentioned above, all UIC permittees, whether public or private, stand to benefit through the state establishment of a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs. Upon adoption of the program, stakeholders who would have in the past had to file dual applications, comply with dual regulatory programs, file a dual set of ongoing reports and pay for consulting costs for dual permits will see all of those obligations consolidated into one, localized state program. This fact stands to save the regulated community time, money and hardship. Arizona environmental consultants may see a minimal detriment due to the streamlining of environmental compliance for companies using injection wells.

F. A statement of the probable impact of the rules on small business:

In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

1. An identification of the small business subject to the rules:
Among the stakeholders listed above, only a few meet the definition of small business as set forth in A.R.S. § 41-1001(21). For example, ADEQ estimates that all three current UIC permit holders in Arizona are not small businesses. However, ADEQ has recorded with frequency around 1,000 drywell registrations annually. Drywells will be regulated under the Class V UIC program upon primacy. Small businesses will constitute a significant portion of the approximately 1,000 drywell inventories ADEQ expects annually upon primacy. In terms of UIC Class V drywell inventorying, some small businesses will be affected in a minimally negative manner by this rulemaking. However, the rulemaking intends to institute some UIC Class V inspections, including drywells, which could prove minimally beneficial to certain small businesses.

2. **The administrative and other costs required for compliance with the rules:**
Compliance costs associated with this rulemaking will vary based on the stakeholder involved. ADEQ’s examination of compliance costs for UIC well owners regulated through a permit or an authorization by rule is addressed in the cost benefit analysis above.

3. **A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:**
   a. **Establishing less stringent compliance or reporting requirements in the rule for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to compliance or reporting requirements. In order to be eligible for EPA’s transfer of primary enforcement authority of the program from Federal to State, the Federal SDWA-UIC program must be at least as stringent as the Federal program.
   b. **Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to the stringency of schedules or deadlines for compliance and reporting. Please reference subsection (F)(3)(a) above for more explanation.
   c. **Consolidating or simplifying the rule's compliance or reporting requirements for small businesses:**
      Under the SDWA, small businesses are not given special treatment when it comes to compliance and reporting requirements. Please reference subsection (F)(3)(a) above for more explanation.
   d. **Establishing performance standards for small businesses to replace design or operational standards in the rule:**
      Under the SDWA, small businesses are not given special treatment when it comes to design or operational standards. Please reference subsection (F)(3)(a) above for more explanation.
   e. **Exempting small businesses from any or all requirements of the law:**
      Under the SDWA, small businesses are not given special treatment when it comes to requirements. Please reference subsection (F)(3)(a) above for more explanation.

4. **The probable costs and benefits to private persons and consumers who are directly affected by the rules:**
As is stated above in this EIS, the SDWA-UIC program in currently in effect, administered by the Federal government’s EPA. This rulemaking is designed to support the primary enforcement authority or primacy application ADEQ has been mandated to pursue according to A.R.S. §§ 49-203(A)(6) and 49-257.01. The existing regulated parties in Arizona include three UIC Class III permittees and tens of thousands of UIC Class V wells (mostly drywells). Also stated above is the disparity in funding mechanisms between EPA’s current administration of the program and ADEQ’s proposed funding mechanisms in administration (EPA: General Fund based; ADEQ: Fee-For-Service based). Despite the new fees associated with Arizona’s potential primacy, the state’s UIC stakeholders have shown support for ADEQ’s primacy pursuit. The reason for their support is the consolidation of Federal and state regulatory obligations into one, localized state program. The benefits to these private entities include the elimination of the necessity to file dual applications, to comply with dual regulatory programs, to file a dual set of ongoing reports and to pay for consulting costs for dual permits. Further benefits include the local access to ADEQ’s expertise, personnel and
customer service, a streamlined permitting process, and a reduction in cost through the elimination of duplicative regulation between Federal and state programs.

UIC applicants and permittees will be subject to a water quality protection service fee of $145 an hour for application review, permit writing and other, similar services. The maximum fee for a single licensing time frame for UIC Area and Classes I, II, III and V permits are set at $200,000. UIC Area and Classes I, II, III and V permit modification and/or permit renewal are set at a maximum of $150,000. UIC Class VI permits maximum fee proposal is “no max”. The reason why no maximum fee has been proposed for UIC Class VI is because of its complicated and unknown nature. Arizona does not have any Class VI carbon sequestration wells and the entire country only has a few in operation. ADEQ believes there is no basis for proposing a maximum on UIC Class VI wells at this time.

UIC permittees will be subject to Annual and Flat Fees, which were determined by considering the necessary revenue needed to support the administration of the program while putting the least burden possible on the stakeholders. Other factors include input from the APP program, other states’ UIC programs and directly affected stakeholders.

Drywell regulation in Arizona will be transitioned from a state statutorily based regulatory program to regulation under the UIC program’s Class V wells. Arizona’s more than 65,000 registered drywells will be transitioned into the UIC Class V well inventory without a charge. However, there will be a cost increase between new drywell registration fees associated with the state statutory program and new inventory fees in the state-administered UIC program. Registration fees are $100 per registration, where inventory fees will be $200 per inventory. The reason for this increase is to supplement the funds necessary to support the administration of the Class V portion of the UIC program, including the commencement of more regular inspection of high-risk drywells in Arizona. A condition of EPA granting ADEQ primacy to administer the UIC program is the inspection of a small portion of the UIC Class V wells in the state. In order to meet this requirement, ADEQ has increased the fee required to inventory a drywell in the state.

In discussion with UIC stakeholders, it was determined that a review of the revenues collected from the UIC program’s fees should take place once every three years in order to ensure that enough revenue is being collected to properly administer the program and to that the fees are equitable by putting the least amount of burden on the stakeholders. To that end, R18-14-115 is proposed in this rulemaking.

G. A statement of the probable effect on state revenues:
This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Because the UIC permittees in Arizona were permitted through the UIC program as administered by the EPA, ADEQ does not anticipate a significant decrease in business activity in the state or a corresponding loss of state tax revenues.

H. A description of any less intrusive or less costly alternative methods of achieving the purpose of the rulemaking:
The purpose of this rulemaking is to adopt the SDWA-UIC program in Arizona rule in order to lay the groundwork for state administration of the program as required by the legislature through A.R.S. §§ 49-203(A)(6) and 49-257.01. There are no less intrusive or less costly alternative methods of achieving the purpose of the rulemaking.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:
The SDWA allows states to apply for primary enforcement authority in the administration of the UIC regulatory program (see 42 United States Code 300h et seq.). The Arizona legislature mandated pursuit of the SDWA-UIC program through the passage of the following statutes, A.R.S. §§ 49-203(A)(6) and
In order to achieve primacy, one requirement of a state is to put rules in place for the program to operate through (see 40 Code of Federal Regulations 145.22(a)(5)). These rules must be at least as stringent as the Federal UIC program rules in order for EPA to consider a state’s primacy application. The rules must also be no more stringent than the analogous Federal rule, per Arizona state law (see A.R.S. § 49-104(16)). Given those parameters, the language for the rules in this rulemaking came largely from 40 CFR Parts 144, 145 and 146 and to a lesser extent, 40 CFR Parts 124, 141 and 142. A table showing specific analogous Federal regulations to the rules in this rulemaking can be found in section 6 of the Preamble above.
when the individual is exposed to both internal and external radiation (see §20.1202). When an individual is exposed to radioactive materials which fall under several of the translocation classifications (i.e., Class D, Class W, or Class Y) of the same radionuclide, the exposure may be evaluated as if it were a mixture of different radionuclides.

It should be noted that the classification of a compound as Class D, W, or Y is based on the chemical form of the compound and does not take into account the radiological half-life of different radioisotopes. For this reason, values are given for Class D, W, and Y compounds, even for very short-lived radionuclides.

**Table 2**

The columns in table 2 of this appendix captioned “Effluents,” “Air,” and “Water,” are applicable to the assessment and control of dose to the public, particularly in the implementation of the provisions of §20.1302. The concentration values given in columns 1 and 2 of table 2 are equivalent to the radionuclide concentrations which, if inhaled or ingested continuously over the course of a year, would produce a total effective dose equivalent of 0.05 rem (50 milliavels or 0.5 millisieverts).

Consideration of non-stochastic limits has not been included in deriving the air and water effluent concentration limits because non-stochastic effects are presumed not to occur at the dose levels established for individual members of the public. For radionuclides, where the non-stochastic limit was governing in deriving the occupational DAC, the stochastic ALI was used in deriving the corresponding airborne effluent limit in table 2. For this reason, the DAC and airborne effluent limits are not always proportional as was the case in appendix B to §20.1–20.601.

The air concentration values listed in table 2, column 1, were derived by one of two methods. For those radionuclides for which the stochastic limit is governing, the occupational stochastic inhalation ALI was divided by 2.4 × 10^9 ml, relating the inhalation ALI to the DAC, as explained above, and then divided by a factor of 300. The factor of 300 includes the following components: a factor of 50 to relate the 5-rem annual occupational dose limit to the 0.1-rem limit for members of the public, a factor of 3 to adjust for the difference in exposure time and the inhalation rate for a worker and that for members of the public; and a factor of 2 to adjust the occupational values (derived for adults) so that they are applicable to other age groups.

For those radionuclides for which submerison (external dose) is limiting, the occupational DAC in table 1, column 3, was divided by 219. The factor of 219 is composed of a factor of 50, as described above, and a factor of 4.38 relating occupational exposure for 2,000 hours per year to full-time exposure (8,760 hours per year). Note that an additional factor of 2 for age considerations is not warranted in the submersion case.

The water concentrations were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3 × 10^8. The factor of 7.3 × 10^8 (ml) includes the following components: the factors of 50 and 2 described above and a factor of 7.3 × 10^8 (ml) which is the annual water intake by “Reference Man.”

Note 2 of this appendix provides groupings of radionuclides which are applicable to unknown mixtures of radionuclides. These groupings (including occupational inhalation ALIs and DACs, air and water effluent concentrations and sewerage) require demonstrating that the most limiting radionuclides in successive classes are absent. The limit for the unknown mixture is defined when the presence of one of the listed radionuclides cannot be definitely excluded either from knowledge of the radionuclide composition of the source or from actual measurements.

**Table 3 “Sewer Disposal”**

The monthly average concentrations for release to sanitary sewers are applicable to the provisions in §20.2003. The concentration values were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3 × 10^9 (ml). The factor of 7.3 × 10^9 (ml) is composed of a factor of 7.3 × 10^8 (ml), the annual water intake by “Reference Man,” and a factor of 10, such that the concentrations, if the sewage released by the licensee were the only source of water ingested by a reference man during a year, would result in a committed effective dose equivalent of 0.5 rem.

</table>

- Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactive half-life less than 2 hours is Subversion.  
- Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactive half-life greater than 2 hours is Subversion.
- Any single radionuclide not listed above that decays by alpha emission or spontaneous fission, or any mixture for which either the identity or the concentration of any radionuclide in the mixture is not known.
FOOTNOTES:

1. "Submergence" means that values given are for submergence in a hemispherical semi-infinite cloud of airborne material.

2. These radionuclides have radiological half-lives of less than 2 hours. The total effective dose equivalent received during operations with these radionuclides might include a significant contribution from external exposure. The DAC values for all radionuclides, other than those designated Class "Submergence," are based upon the committed effective dose equivalent due to the intake of the radionuclide into the body and do NOT include potentially significant contributions to dose equivalent from external exposures. The license may substitute IE-7 μCi/μCi for the listed DAC to account for the submergence dose prospectively, but should use individual monitoring devices or other radiation measuring instruments that measure external exposure to demonstrate compliance with the limits. (See 10 CFR 20.1203.)

3. For soluble mixtures of U-238, U-235, and U-235 in air, chemical toxicity may be the limiting factor (see 10 CFR 20.121(a)). If the percent by weight (enrichment) of U-235 is not greater than 5, the concentration value for a 40-hour work week is 0.7 μCi/m 3 /gram per cubic meter of air average. For any enrichment, the product of the average concentration and time of exposure during a 40-hour work week shall not exceed IE-3 (SA) μCi/μCi, where SA is the specific activity of the uranium labeled. The specific activity for natural uranium is 6.7E-7 curies per gram U. The specific activity for other mixtures of U-238, U-235, and U-235, if not known, shall be:

   \[ SA = 3.6E-7 \text{ curies} / \text{gram U} \]

   \[ SA = 0.4 + 0.38 \times (\text{enrichment}) + 0.0034 \times (\text{enrichment})^2 \]

   \[ \text{IE-6} \], enrichment \( \leq 0.72 \%

   where enrichment is the percentage by weight of U-235, expressed as percent.

NOTE:

1. If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.

2. If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in this appendix are not present in the mixture, the inhalation ALI, DAC, and effluent and sewage concentrations for the mixture are the lowest values specified in this appendix for any radionuclide that is not known to be absent from the mixture or:

---

3 If a mixture of radionuclides consists of uranium and its daughters in ore dust (10 µm particle size assumed) prior to chemical separation of the uranium from the ore, the following values may be used for the D.M. of the mixture: 6E-11 mCi of gross alpha activity per uranium-238, uranium-234, thorium-230, and radium-226 per milliliter of air; or 65 micrograms of natural uranium per cubic meter of air.

4 If the identity and concentration of each radionuclide in a mixture are known, the limiting values should be derived as follows: Determine, for each radionuclide in the mixture, the ratio between the concentration present in the mixture and the concentration otherwise established in Appendix B for the specific radionuclide when not in a mixture. The sum of such ratios for all of the radionuclides in the mixture may not exceed "1." (e.g., "unity").

Example: If radionuclides "A," "B," and "C" are present in concentrations "a," "b," and "c," and if the applicable D.A.C.s are DAC_A, DAC_B, and DAC_C respectively, then the concentrations shall be limited so that the following relationship exists:

\[
c_a \frac{DAC_A}{DAC_A} + c_b \frac{DAC_B}{DAC_B} + c_c \frac{DAC_C}{DAC_C} < 1
\]

---

organizations reporting any such transactions under subsection (a)(3) of this section.

(f) Rates

Nothing in this section shall be construed to confer upon the Secretary any authority to approve or disapprove the rates charged by any health maintenance organization.

(g) Annual financial statement

Any health maintenance organization failing to file with the Secretary the annual financial statement required in subsection (a) of this section shall be ineligible for any Federal assistance under this subchapter until such time as such statement is received by the Secretary and shall not be a qualified health maintenance organization for purposes of section 300e–9 of this title.

(h) Penalties

Whoever knowingly and willfully makes or causes to be made any false statement or representation of a material fact in any statement filed pursuant to this section shall be guilty of a felony and upon conviction thereof shall be fined not more than $25,000 or imprisoned for not more than five years, or both.

AMENDMENTS

1986—Subsec. (e). Pub. L. 99–660 struck out subsec. (e) which read as follows: “The Secretary shall file an annual report with the Congress on the operation of this section. Such report shall include—

“(1) an enumeration of standards and norms utilized to make the evaluations required under subsection (d) of this section;

“(2) an assessment of the degree of conformity or nonconformity of each health maintenance organization evaluated by the Secretary under subsection (d) of this section with such standards and norms;

“(3) what action, if any, the Secretary considers necessary under section 300e–11 of this title with respect to health maintenance organizations evaluated under subsection (d) of this section.”

1981—Subsec. (a). Pub. L. 97–35, § 948(a), (b), in par. (2) inserted reference to copy of the report, if any, filed with the Health Care Financing Administration, and in par. (3)(B) reorganized excluding provisions and, among revisions, inserted salaries paid to employees for services.

Subsec. (b)(1). Pub. L. 97–35, § 948(c), inserted “responsible for management or administration” after “employee”.

Subsec. (b)(4). Pub. L. 97–35, § 948(e), substituted “spouse, child, or parent” for “member of the immediate family”.

EFFECTIVE DATE OF 1986 AMENDMENT

SUBCHAPTER XII—SAFETY OF PUBLIC WATER SYSTEMS

PART A—DEFINITIONS

§ 300f. Definitions

For purposes of this subchapter:

(1) The term “primary drinking water regulation” means a regulation which—

(A) applies to public water systems;

(B) specifies contaminants which, in the judgment of the Administrator, may have any adverse effect on the health of persons;

(C) specifies for each such contaminant either—

(i) a maximum contaminant level, if, in the judgment of the Administrator, it is economically and technologically feasible to ascertain the level of such contaminant in water in public water systems, or

(ii) if, in the judgment of the Administrator, it is not economically or technologically feasible to so ascertain the level of such contaminant, each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1 of this title; and

(D) contains criteria and procedures to assure a supply of drinking water which dependably complies with such maximum contaminant levels; including accepted methods for quality control and testing procedures to insure compliance with such levels and to insure proper operation and maintenance of the system, and requirements as to (i) the minimum quality of water which may be taken into the system and (ii) siting for new facilities for public water systems.

At any time after promulgation of a regulation referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation.

(2) The term “secondary drinking water regulation” means a regulation which applies to public water systems and which specifies the maximum contaminant levels which, in the judgment of the Administrator, are requisite to protect the public welfare. Such regulations may apply to any contaminant in drinking water (A) which may adversely affect the odor or appearance of such water and consequently may cause a substantial number of the persons served by the public water system providing such water to discontinue its use, or (B) which may otherwise adversely affect the public welfare. Such regulations may vary according to geographic and other circumstances.

(3) The term “maximum contaminant level” means the maximum permissible level of a contaminant in water which is delivered to any user of a public water system.

(4) PUBLIC WATER SYSTEM.—

(A) IN GENERAL.—The term “public water system” means a system for the provision to
the public of water for human consumption through pipes or other constructed conveyances, if such system has at least fifteen service connections or regularly serves at least twenty-five individuals. Such term includes (i) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (ii) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.

(B) CONNECTIONS.—

(i) In general.—For purposes of subparagraph (A), a connection to a system that delivers water by a constructed conveyance other than a pipe shall not be considered a connection, if—

(I) the water is used exclusively for purposes other than residential uses (consisting of drinking, bathing, and cooking, or other similar uses);

(II) the Administrator or the State (in the case of a State exercising primary enforcement responsibility for public water systems) determines that alternative water to achieve the equivalent level of public health protection provided by the applicable national primary drinking water regulation is provided for residential or similar uses for drinking and cooking; or

(III) the Administrator or the State (in the case of a State exercising primary enforcement responsibility for public water systems) determines that the water provided for residential or similar uses for drinking, cooking, and bathing is centrally treated or treated at the point of entry by the provider, a pass-through entity, or the user to achieve the equivalent level of protection provided by the applicable national primary drinking water regulations.

(ii) IRRIGATION DISTRICTS.—An irrigation district in existence prior to May 18, 1994, that provides primarily agricultural service through a piped water system with only incidental residential or similar use shall not be considered to be a public water system if the system or the residential or similar users of the system comply with subclause (II) or (III) of clause (i).

(C) TRANSITION PERIOD.—A water supplier that would be a public water system only as a result of modifications made to this paragraph by the Safe Drinking Water Act Amendments of 1996 shall not be considered a public water system for purposes of the Act until the date that is two years after August 6, 1996. If a water supplier does not serve 15 service connections (as defined in subparagraphs (A) and (B)) or 25 people at any time after the conclusion of the 2-year period, the water supplier shall not be considered a public water system.

(5) The term “supplier of water” means any person who owns or operates a public water system.

(6) The term “contaminant” means any physical, chemical, biological, or radiological substance or matter in water.

(7) The term “Administrator” means the Administrator of the Environmental Protection Agency.

(8) The term “Agency” means the Environmental Protection Agency.

(9) The term “Council” means the National Drinking Water Advisory Council established under section 300j–5 of this title.

(10) The term “municipality” means a city, town, or other public body created by or pursuant to State law, or an Indian Tribe.

(11) The term “Federal agency” means any department, agency, or instrumentality of the United States.

(12) The term “person” means an individual, corporation, company, association, partnership, State, municipality, or Federal agency (and includes officers, employees, and agents of any corporation, company, association, State, municipality, or Federal agency).

(13)(A) Except as provided in subparagraph (B), the term “State” includes, in addition to the several States, only the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(B) For purposes of section 300j–12 of this title, the term “State” means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

(14) The term “Indian Tribe” means any Indian tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over any area. For purposes of section 300j–12 of this title, the term includes any Native village (as defined in section 1602(c) of title 43).

(15) COMMUNITY WATER SYSTEM.—The term “community water system” means a public water system that—

(A) serves at least 15 service connections used by year-round residents of the area served by the system; or

(B) regularly serves at least 25 year-round residents.

(16) NONCOMMUNITY WATER SYSTEM.—The term “noncommunity water system” means a public water system that is not a community water system.

REFERENCES IN TEXT

AMENDMENTS

referred to in this paragraph, the Administrator may add equally effective quality control and testing procedures by guidance published in the Federal Register. Such procedures shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation."

Par. (1)(D). Pub. L. 104-182, §101(a)(1)(A), inserted "accepted methods for before "quality control".

Par. (4). Pub. L. 104-182, §101(b)(1), designated existing provisions as subpar. (A), inserted par. and subpar. headings, redesignated former subpars. (A) and (B) as cls. (i) and (ii), respectively, substituted "water for human consumption through pipes or other constructed conveyances" for "piped water for human consumption" in first sentence, and added subpars. (B) and (C).

Par. (13). Pub. L. 104-182, §101(a)(2), designated existing provisions as subpar. (A), substituted "Except as provided in subparagraph (B), the term" for "The term", and added subpar. (B).

Par. (14). Pub. L. 104-182, §101(a)(3), inserted at end "For purposes of section 303j-12 of this title, the term includes any Native village (as defined in section 1982(c) of title 43)."

1977—Par. (12). Pub. L. 95-190 expanded definition of "person" to include Federal agency, and officers, employees, and agents of any corporation, company, etc.

Pub. L. 94-517 added par. (13).

EFFECTIVE DATE OF 1996 AMENDMENT

Section 2(b) of Pub. L. 104-182 provided that: "Except as otherwise specified in this Act [enacting sections 300g-7 to 300q-9, 300h-3, 300i-3c, and 300j-12 to 300j-18 of this title and section 1263a of Title 33, Navigation and Navigable Waters, amending this section, sections 300g-1 to 300q-6, 300h, 300h-5 to 300h-7, 300i, 300i-1, 300j to 300j-2, 300j-4 to 300j-8, 300j-11, and 300j-21 to 300j-25 of this title, sections 4701 and 4721 of Title 16, Conservation, and section 349 of Title 21, Food and Drugs, repealing section 1356i of this title, enacting provisions set out as notes under this section, sections 201, 300c-1, 300j-1, and 300j-12 of this title, section 1281 of Title 33, and section 45 of former Title 40, Public Buildings, Property, and Works, and amending provisions set out as a note under section 201 of this title] or in the amendments made by this Act, this Act and the amendments made by this Act shall take effect on the date of enactment of this Act [Aug. 6, 1996]."

SHORT TITLE

This subchapter is known as the "Safe Drinking Water Act", see note set out under section 201 of this title.

TERMINATION OF TRUST TERRITORY OF THE PACIFIC ISLANDS

For termination of Trust Territory of the Pacific Islands, see note set out preceding section 1681 of Title 48, Territories and Insular Possessions.

EFFECT OF PUBLIC LAW 104-182 ON FEDERAL WATER POLLUTION CONTROL ACT

Section 2(c) of Pub. L. 104-182 provided that: "Except for the provisions of section 302 (42 U.S.C. 300-12 note) (relating to transfers of funds), nothing in this Act [see Effective Date of 1996 Amendment above] or in any amendments made by this Act to title XIV of the Public Health Service Act [this subchapter] (commonly known as the 'Safe Drinking Water Act') or any other law shall be construed by the Administrator of the Environmental Protection Agency or the courts as affecting, modifying, expanding, changing, or altering—

"(1) the provisions of the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.];

"(2) the duties and responsibilities of the Administrator under that Act; or

"(3) the regulation or control of point or nonpoint sources of pollution discharged into waters covered by that Act."

The Administrator shall identify in the agency's annual budget all funding and full-time equivalents administering such title XIV separately from funding and staffing for the Federal Water Pollution Control Act."

CONGRESSIONAL FINDINGS

Section 3 of Pub. L. 104-182 provided that: "The Congress finds that—

"(1) safe drinking water is essential to the protection of public health;

"(2) because the requirements of the Safe Drinking Water Act (42 U.S.C. 300f et seq.) now exceed the financial and technical capacity of some public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements;

"(3) the Federal Government commits to maintaining and improving its partnership with the States in the administration and implementation of the Safe Drinking Water Act;

"(4) States play a central role in the implementation of safe drinking water programs, and States need increased financial resources and appropriate flexibility to ensure the prompt and effective development and implementation of drinking water programs;

"(5) the existing process for the assessment and selection of additional drinking water contaminants needs to be revised and improved to ensure that there is a sound scientific basis for setting priorities in establishing drinking water regulations;

"(6) procedures for assessing the health effects of contaminants establishing drinking water standards should be revised to provide greater opportunity for public education and participation;

"(7) in considering the appropriate level of regulation for contaminants in drinking water, risk assessment, based on sound and objective science, and benefit-cost analysis are important analytical tools for improving the efficiency and effectiveness of drinking water regulations to protect human health;

"(8) more effective protection of public health requires—

"(A) a Federal commitment to set priorities that will allow scarce Federal, State, and local resources to be targeted toward the drinking water problems of greatest public health concern;

"(B) maximizing the value of the different and complementary strengths and responsibilities of the Federal and State governments in those States that have primary enforcement responsibility for the Safe Drinking Water Act; and

"(C) prevention of drinking water contamination through well-trained system operators, water systems with adequate managerial, technical, and financial capacity, and enhanced protection of source waters of public water systems;

"(9) compliance with the requirements of the Safe Drinking Water Act continues to be a concern at public water systems experiencing technical and financial limitations, and Federal, State, and local governments need more resources and more effective authority to attain the objectives of the Safe Drinking Water Act; and

"(10) consumers served by public water systems should be provided with information on the source of the water they are drinking and its quality and safety, as well as prompt notification of any violation of drinking water regulations."

GAO STUDY

“(A) ascertain the numbers and locations of individuals and households relying for their residential water needs, including drinking, bathing, and cooking (or other similar uses) on irrigation water systems, mining water systems, industrial water systems, or other water systems covered by section 1401(4)(B) of the Safe Drinking Water Act [par. (4)(B) of this section] that are not public water systems subject to the Safe Drinking Water Act [this subchapter];

“(B) determine the sources and costs and affordability (to users and systems) of water used by such populations for their residential water needs; and

“(C) review State and water system compliance with the exclusion provisions of section 1401(4)(B) of such Act.

The Comptroller General shall submit a report to the Congress within 3 years after the date of enactment of this Act [Aug. 6, 1996] containing the results of such study.”

SAFE DRINKING WATER AMENDMENTS OF 1977

RESTRICTIONS ON APPROPRIATIONS FOR RESEARCH

Pub. L. 95–190, §2(e), Nov. 16, 1977, 91 Stat. 1393, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to authorize the appropriation of any amount for research under title XIV of the Public Health Service Act [this subchapter] (relating to safe drinking water).”

SAFE DRINKING WATER AMENDMENTS OF 1977 AS NOT AFFECTING AUTHORITY OF ADMINISTRATOR WITH RESPECT TO CONTAMINANTS

Pub. L. 95–190, §3(e)(2), Nov. 16, 1977, 91 Stat. 1394, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to alter or affect the Administrator’s authority or duty under title 14 of the Public Health Service Act [this subchapter] to promulgate regulations or take other action with respect to any contaminant.”

RURAL WATER SURVEY; REPORT TO PRESIDENT AND CONGRESS; AUTHORIZATION OF APPROPRIATIONS

Section 3 of Pub. L. 93–523, as amended by Pub. L. 95–190, §§2(d), 3(d), Nov. 16, 1977, 91 Stat. 1393, 1394, directed Administrator of Environmental Protection Agency, after consultation with Secretary of Agriculture and the several States, to enter into arrangements with public or private entities to conduct a survey of quantity, quality, and availability of rural drinking water supplies, which survey was to include, but not be limited to, consideration of number of residents in each rural area who presently are being inadequately served by a public or private drinking water supply system, or by an individual home drinking water supply system, or who presently have limited or otherwise inadequate access to drinking water, or who, due to absence or inadequacy of a drinking water supply system, are exposed to an increased health hazard, and who have experienced incidents of chronic or acute illness, which may be attributed to inadequacy of a drinking water supply system. Survey to be completed within eighteen months of Dec. 16, 1974, and a final report thereon submitted, not later than six months after completion of survey, to President and to Congress.

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

TERMINATION OF ADVISORY COMMITTEES

Pub. L. 93–441, §6, Jan. 4, 1974, 88 Stat. 2275, set out as a note under section 217a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1975.

PART B—PUBLIC WATER SYSTEMS

§300g. Coverage

Subject to sections 300g–4 and 300g–5 of this title, national primary drinking water regulations under this part shall apply to each public water system in each State; except that such regulations shall not apply to a public water system—

(1) which consists only of distribution and storage facilities (and does not have any collection and treatment facilities);

(2) which obtains all of its water from, but is not owned or operated by, a public water system to which such regulations apply;

(3) which does not sell water to any person; and

(4) which is not a carrier which conveys passengers in interstate commerce.

(July 1, 1944, ch. 373, title XIV, §1411, as added Pub. L. 93–523, §2(a), Dec. 16, 1974, 88 Stat. 1662.)

§300g–1. National drinking water regulations

(a) National primary drinking water regulations; maximum contaminant level goals; simultaneous publication of regulations and goals

(1) Effective on June 19, 1986, each national interim or revised primary drinking water regulation promulgated under this section before June 19, 1986, shall be deemed to be a national primary drinking water regulation under subsection (b) of this section. No such regulation shall be required to comply with the standards set forth in subsection (b)(4) of this section unless such regulation is amended to establish a different maximum contaminant level after June 19, 1986.

(2) After June 19, 1986, each recommended maximum contaminant level published before June 19, 1986, shall be treated as a maximum contaminant level goal.

(3) Whenever a national primary drinking water regulation is proposed under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be proposed simultaneously. Whenever a national primary drinking water regulation is promulgated under subsection (b) of this section for any contaminant, the maximum contaminant level goal for such contaminant shall be published simultaneously.

(4) Paragraph (3) shall not apply to any recommended maximum contaminant level published before June 19, 1986.

(b) Standards

(1) IDENTIFICATION OF CONTAMINANTS FOR LISTING.—

(A) GENERAL AUTHORITY.—The Administrator shall, in accordance with the procedures established by this subsection, publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for a contaminant (other than a contaminant referred to in paragraph (2) for which a national primary drinking water regulation has been
promulgated as of August 6, 1996) if the Administrator determines that—

(i) the contaminant may have an adverse effect on the health of persons;

(ii) the contaminant is known to occur or there is a substantial likelihood that the contaminant will occur in public water systems with a frequency and at levels of public health concern; and

(iii) in the sole judgment of the Administrator, regulation of such contaminant presents a meaningful opportunity for health risk reduction for persons served by public water systems.

(B) REGULATION OF UNREGULATED CONTAMINANTS.—

(i) LISTING OF CONTAMINANTS FOR CONSIDERATION.—(I) Not later than 18 months after August 6, 1996, and every 5 years thereafter, the Administrator, after consultation with the scientific community, including the Science Advisory Board, after notice and opportunity for public comment, and after considering the occurrence data base established under section 300g–1 of this title, shall publish a list of contaminants which, at the time of publication, are not subject to any proposed or promulgated national primary drinking water regulation, which are known or anticipated to occur in public water systems, and which may require regulation under this subchapter.

(II) The unregulated contaminants considered under subclause (I) shall include, but not be limited to, substances referred to in section 9601(14) of this title, and substances registered as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. 136 et seq.].

(III) The Administrator’s decision whether or not to select an unregulated contaminant for a list under this clause shall not be subject to judicial review.

(ii) DETERMINATION TO REGULATE.—(I) Not later than 5 years after August 6, 1996, and every 5 years thereafter, the Administrator shall, after notice of the preliminary determination and opportunity for public comment, for not fewer than 5 contaminants included on the list published under clause (i), make determinations of whether or not to regulate such contaminants.

(II) A determination to regulate a contaminant shall be based on findings that the criteria of clauses (i), (ii), and (iii) of subparagraph (A) are satisfied. Such findings shall be based on the best available public health information, including the occurrence data base established under section 300g–4(g) of this title.

(III) The Administrator may make a determination to regulate a contaminant that does not appear on a list under clause (i) if the determination to regulate is made pursuant to subclause (II).

(IV) A determination under this clause not to regulate a contaminant shall be considered final agency action and subject to judicial review.

(iii) REVIEW.—Each document setting forth the determination for a contaminant under clause (ii) shall be available for public comment at such time as the determination is published.

(C) PRIORITIES.—In selecting unregulated contaminants for consideration under subparagraph (B), the Administrator shall select contaminants that present the greatest public health concern. The Administrator, in making such selection, shall take into consideration, among other factors of public health concern, the effect of such contaminants upon subgroups that comprise a meaningful portion of the general population (such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations) that are identifiable as being at greater risk of adverse health effects due to exposure to contaminants in drinking water than the general population.

(D) URGENT THREATS TO PUBLIC HEALTH.—The Administrator may promulgate an interim national primary drinking water regulation for a contaminant without making a determination for the contaminant under paragraph (4)(C), or completing the analysis under paragraph (3)(C), to address an urgent threat to public health as determined by the Administrator after consultation with and written response to any comments provided by the Secretary of Health and Human Services, acting through the director of the Centers for Disease Control and Prevention or the director of the National Institutes of Health. A determination for any contaminant in accordance with paragraph (4)(C) subject to an interim regulation under this subparagraph shall be issued, and a completed analysis meeting the requirements of paragraph (3)(C) shall be published, not later than 3 years after the date on which the regulation is promulgated and the regulation shall be repromulgated, or revised if appropriate, not later than 5 years after that date.

(E) REGULATION.—For each contaminant that the Administrator determines to regulate under subparagraph (B), the Administrator shall publish maximum contaminant level goals and promulgate, by rule, national primary drinking water regulations under this subsection. The Administrator shall propose the maximum contaminant level goal and national primary drinking water regulation for a contaminant not later than 24 months after the determination to regulate under subparagraph (B), and may publish such proposed regulation concurrent with the determination to regulate. The Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation within 18 months after the proposal thereof. The Administrator, by notice in the Federal Register, may extend the deadline for such promulgation for up to 9 months.

(F) HEALTH ADVISORIES AND OTHER ACTIONS.—The Administrator may publish health advisories (which are not regulations) or take other appropriate actions for contaminants not subject to any national primary drinking water regulation.

(2) SCHEDULES AND DEADLINES.—

(A) IN GENERAL.—In the case of the contaminants listed in the Advance Notice of Proposed
Rulemaking published in volume 47, Federal Register, page 9352, and in volume 48, Federal Register, page 45502, the Administrator shall publish maximum contaminant level goals and promulgate national primary drinking water regulations—

(i) not later than 1 year after June 19, 1986, for not fewer than 9 of the listed contaminants;

(ii) not later than 2 years after June 19, 1986, for not fewer than 40 of the listed contaminants; and

(iii) not later than 3 years after June 19, 1986, for the remainder of the listed contaminants.

(B) SUBSTITUTION OF CONTAMINANTS.—If the Administrator identifies a drinking water contaminant the regulation of which, in the judgment of the Administrator, is more likely to be protective of public health (taking into account the schedule for regulation under subparagraph (A)) than a contaminant referred to in subparagraph (A), the Administrator may publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for the identified contaminant in lieu of regulating the contaminant referred to in subparagraph (A). Substitutions may be made for not more than 7 contaminants referred to in subparagraph (A). Regulation of a contaminant identified under this subparagraph shall be in accordance with the schedule applicable to the contaminant for which the substitution is made.

(C) DISINFECTION BYPRODUCTS.—The Administrator shall promulgate an Interim Enhanced Surface Water Treatment Rule, a Stage I Disinfectants and Disinfection Byproducts Rule, and a Stage II Disinfectants and Disinfection Byproducts Rule in accordance with the schedule published in volume 59, Federal Register, page 6361 (February 10, 1994), in table III.13 of the proposed Information Collection Rule. If a delay occurs with respect to the promulgation of any rule in the schedule referred to in this subparagraph, all subsequent rules shall be completed as expeditiously as practicable but no later than a revised date that reflects the interval or intervals for the rules in the schedule.

(3) RISK ASSESSMENT, MANAGEMENT, AND COMMUNICATION.

(A) USE OF SCIENCE IN DECISIONMAKING.—In carrying out this section, and, to the degree that an Agency action is based on science, the Administrator shall use—

(i) the best available, peer-reviewed science and supporting studies conducted in accordance with sound and objective scientific practices; and

(ii) data collected by accepted methods or best available methods (if the reliability of the method and the nature of the decision justifies use of the data).

(B) PUBLIC INFORMATION.—In carrying out this section, the Administrator shall ensure that the presentation of information on public health effects is comprehensive, informative, and understandable. The Administrator shall, in a document made available to the public in support of a regulation promulgated under this section, specify, to the extent practicable—

(i) each population addressed by any estimate of public health effects;

(ii) the expected risk or central estimate of risk for the specific populations;

(iii) each appropriate upper-bound or lower-bound estimate of risk;

(iv) each significant uncertainty identified in the process of the assessment of public health effects and studies that would assist in resolving the uncertainty; and

(v) peer-reviewed studies known to the Administrator that support, are directly relevant to, or fail to support any estimate of public health effects and the methodology used to reconcile inconsistencies in the scientific data.

(C) HEALTH RISK REDUCTION AND COST ANALYSIS.—

(i) MAXIMUM CONTAMINANT LEVELS.—When proposing any national primary drinking water regulation that includes a maximum contaminant level, the Administrator shall, with respect to a maximum contaminant level that is being considered in accordance with paragraph (4) and each alternative maximum contaminant level that is being considered pursuant to paragraph (6)(A), publish, seek public comment on, and use for the purposes of paragraphs (4), (5), and (6) an analysis of each of the following:

(I) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur as the result of treatment to comply with each level.

(II) Quantifiable and nonquantifiable health risk reduction benefits for which there is a factual basis in the rulemaking record to conclude that such benefits are likely to occur from reductions in co-occurring contaminants that may be attributed solely to compliance with the maximum contaminant level, excluding benefits resulting from compliance with other proposed or promulgated regulations.

(III) Quantifiable and nonquantifiable costs for which there is a factual basis in the rulemaking record to conclude that such costs are likely to occur solely as a result of compliance with the maximum contaminant level, including monitoring, treatment, and other costs and excluding costs resulting from compliance with other proposed or promulgated regulations.

(IV) The incremental costs and benefits associated with each alternative maximum contaminant level considered.

(V) The effects of the contaminant on the general population and on groups within the general population such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that are identified as likely to be at greater risk of adverse health effects due to exposure to contami-
§ 300g–1

(4) When proposing a national primary drinking water regulation which includes a treatment technique, the Administrator shall publish and seek public comment on an analysis of the health risk reduction benefits and costs likely to be experienced as the result of compliance with the treatment technique and alternative treatment techniques that are being considered, taking into account, as appropriate, the factors described in clause (i).

(ii) TREATMENT TECHNIQUES.—When proposing a national primary drinking water regulation in accordance with paragraph (7)(A), the Administrator shall publish and seek public comment on an analysis of the health risk reduction benefits and costs likely to be experienced as the result of compliance with the treatment technique and alternative treatment techniques that are being considered, taking into account, as appropriate, the factors described in clause (i).

(iii) APPROACHES TO MEASURE AND VALUE BENEFITS.—The Administrator may identify valid approaches for the measurement and valuation of benefits under this subparagraph, including approaches to identify consumer willingness to pay for reductions in health risks from drinking water contaminants.

(iv) AUTHORIZATION.—There are authorized to be appropriated to the Administrator, acting through the Office of Ground Water and Drinking Water, to conduct studies, assessments, and analyses in support of regulations or the development of methods, $35,000,000 for each of fiscal years 1996 through 2003.

(4) GOALS AND STANDARDS.—

(A) MAXIMUM CONTAMINANT LEVEL GOALS.—Each maximum contaminant level goal established under this subsection shall be set at the level at which no known or anticipated adverse effects on the health of persons result and which allows an adequate margin of safety.

(B) MAXIMUM CONTAMINANT LEVELS.—Except as provided in paragraphs (5) and (6), each national primary drinking water regulation for a contaminant for which a maximum contaminant level goal is established under this subsection shall specify a maximum contaminant level for such contaminant which is as close as practicable to the maximum contaminant level goal as is feasible.

(C) DETERMINATION.—At the time the Administrator proposes a national primary drinking water regulation under this paragraph, the Administrator shall publish a determination as required under this subsection, the term “feasible” means feasible with the use of the best technology, treatment techniques and other means which the Administrator finds, after examination for efficacy under field conditions and not solely under laboratory conditions, are available (taking cost into consideration). For the purpose of this paragraph, granular activated carbon is feasible for the control of synthetic organic chemicals, and any technology, treatment technique, or other means found to be the best available for the control of synthetic organic chemicals must be at least as effective in controlling synthetic organic chemicals as granular activated carbon.

(E) FEASIBLE TECHNOLOGIES.—

(i) IN GENERAL.—Each national primary drinking water regulation which establishes a maximum contaminant level shall list the technology, treatment techniques, and other means which the Administrator finds to be feasible for purposes of meeting such maximum contaminant level, but a regulation under this subsection shall not require that any specified technology, treatment technique, or other means be used for purposes of meeting such maximum contaminant level.

(ii) LIST OF TECHNOLOGIES FOR SMALL SYSTEMS.—The Administrator shall include in the list any technology, treatment technique, or other means that is affordable, as determined by the Administrator in consultation with the States, for small public water systems serving:

(I) a population of 10,000 or fewer but more than 3,300;

(II) a population of 3,300 or fewer but more than 500; and

(iii) a population of 500 or fewer but more than 25;

and that achieves compliance with the maximum contaminant level or treatment technique, including packaged or modular systems and point-of-entry or point-of-use treatment units. Point-of-entry and point-of-use treatment units shall be owned, controlled and maintained by the public water system or by a person under contract with the public water system to ensure proper operation and maintenance and compliance with the maximum contaminant level or treatment technique and equipped with mechanical warnings to ensure that customers are automatically notified of operational problems. The Administrator shall not include in the list any point-of-use treatment technology, treatment technique, or other means to achieve compliance with a maximum contaminant level or treatment technique requirement for a microbial contaminant (or an indicator of a microbial contaminant). If the American National Standards Institute has issued product standards applicable to a specific type of point-of-entry or point-of-use treatment unit, individual units of that type may be accepted for compliance with a maximum contaminant level or treatment technique requirement only if they are independently certified in accordance with such standards. In listing any technology, treatment technique, or other means pursuant to this clause, the Administrator shall consider the quality of the source water to be treated.

(iii) LIST OF TECHNOLOGIES THAT ACHIEVE COMPLIANCE.—Except as provided in clause
that the benefits of a maximum contaminant level or treatment procedure for each category of public water systems described in subclauses (I), (II), and (III) of clause (ii) for each national primary drinking water regulation promulgated prior to June 19, 1986.

(iv) ADDITIONAL TECHNOLOGIES.—The Administrator may, at any time after a national primary drinking water regulation has been promulgated, supplement the list of technologies describing additional or new or innovative treatment technologies that meet the requirements of this paragraph for categories of small public water systems described in subclauses (I), (II), and (III) of clause (ii) that are subject to the regulation.

(v) TECHNOLOGIES THAT MEET SURFACE WATER TREATMENT RULE.—Within one year after August 6, 1996, the Administrator shall list technologies that meet the Surface Water Treatment Rule for each category of public water systems described in subclauses (I), (II), and (III) of clause (ii).

(5) ADDITIONAL HEALTH RISK CONSIDERATIONS.—

(A) IN GENERAL.—Notwithstanding paragraph (4), the Administrator may establish a maximum contaminant level for a contaminant at a level other than the feasible level, if the technology, treatment techniques, and other means used to determine the feasible level would result in an increase in the health risk from drinking water by—

(i) increasing the concentration of other contaminants in drinking water; or

(ii) interfering with the efficacy of drinking water treatment techniques or processes that are used to comply with other national primary drinking water regulations.

(B) ESTABLISHMENT OF LEVEL.—If the Administrator establishes a maximum contaminant level or levels or requires the use of treatment techniques for any contaminant or contaminants pursuant to the authority of this paragraph—

(i) the level or levels or treatment techniques shall minimize the overall risk of adverse health effects by balancing the risk from the contaminant and the risk from other contaminants the concentrations of which may be affected by the use of a treatment technique or process that would be employed to attain the maximum contaminant level or levels; and

(ii) the combination of technology, treatment techniques, or other means required to meet the level or levels shall not be more stringent than is feasible (as defined in paragraph (4)(D)).

(6) ADDITIONAL HEALTH RISK REDUCTION AND COST CONSIDERATIONS.—

(A) IN GENERAL.—Notwithstanding paragraph (4), if the Administrator determines based on an analysis conducted under paragraph (3)(C) that the benefits of a maximum contaminant level promulgated in accordance with paragraph (4) would not justify the costs of complying with the level, the Administrator may, after notice and opportunity for public comment, promulgate a maximum contaminant level for the contaminant that maximizes health risk reduction benefits at a cost that is justified by the benefits.

(B) EXCEPTION.—The Administrator shall not use the authority of this paragraph to promulgate a maximum contaminant level for a contaminant, if the benefits of compliance with a national primary drinking water regulation for the contaminant that would be promulgated in accordance with paragraph (4) experienced by—

(i) persons served by large public water systems; and

(ii) persons served by such other systems as are unlikely, based on information provided by the States, to receive a variance under section 300g–4(e) of this title (relating to small system variances); or

would justify the costs to the systems of complying with the regulation. This subparagraph shall not apply if the contaminant is found almost exclusively in small systems eligible under section 300g–4(e) of this title for a small system variance.

(C) DISINFECTANTS AND DISINFECTION BYPRODUCTS.—The Administrator may not use the authority of this paragraph to establish a maximum contaminant level in a Stage I or Stage II national primary drinking water regulation (as described in paragraph (2)(C)) for contaminants that are disinfectants or disinfection byproducts, or to establish a maximum contaminant level or treatment technique requirement for the control of cryptosporidium. The authority of this paragraph may be used to establish regulations for the use of disinfection by systems relying on ground water sources as required by paragraph (8).

(D) JUDICIAL REVIEW.—A determination by the Administrator that the benefits of a maximum contaminant level or treatment requirement justify or do not justify the costs of complying with the level shall be reviewed by the court pursuant to section 300j–7 of this title, only as part of a review of a final national primary drinking water regulation that has been promulgated based on the determination and shall not be set aside by the court under that section unless the court finds that the determination is arbitrary and capricious.

(7)(A) The Administrator is authorized to promulgate a national primary drinking water regulation that requires the use of a treatment technique in lieu of establishing a maximum contaminant level, if the Administrator makes a finding that it is not economically or technologically feasible to ascertain the level of the contaminant. In such case, the Administrator shall identify those treatment techniques which, in the Administrator’s judgment, would prevent known or anticipated adverse effects on the health of persons to the extent feasible. Such regulations shall specify each treatment technique known to the Administrator which meets the requirements of this paragraph, but the Administrator may grant a variance from any specified treatment technique in accordance with section 300g–4(a)(3) of this title.
(B) Any schedule referred to in this subsection for the promulgation of a national primary drinking water regulation for any contaminant shall apply in the same manner if the regulation requires a treatment technique in lieu of establishing a maximum contaminant level.

(C)(i) Not later than 18 months after June 19, 1986, the Administrator shall propose and promulgate national primary drinking water regulations specifying criteria under which filtration (including coagulation and sedimentation, as appropriate) is required as a treatment technique for public water systems supplied by surface water sources. In promulgating such rules, the Administrator shall consider the quality of source waters, protection afforded by watershed management, treatment practices (such as disinfection and length of water storage) and other factors relevant to protection of health.

(ii) In lieu of the provisions of section 300g-4 of this title the Administrator shall specify procedures by which the State determines which public water systems within its jurisdiction shall adopt filtration under the criteria of clause (i). The State may require the public water system to provide studies or other information to assist in this determination. The procedures shall provide notice and opportunity for public hearing on this determination. If the State determines that filtration is required, the State shall prescribe a schedule for compliance by the public water system with the filtration requirement. A schedule shall require compliance within 18 months of a determination made under clause (iii).

(iii) Within 18 months from the time that the Administrator establishes the criteria and procedures under this subparagraph, a State with primary enforcement responsibility shall adopt any necessary regulations to implement this subparagraph. Within 12 months of adoption of such regulations the State shall make determinations regarding filtration for all the public water systems within its jurisdiction supplied by surface waters.

(iv) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the authority to make the determination in clause (ii) in such State as the State would have under that clause. Any filtration requirement or schedule under this subparagraph shall be treated as if it were a requirement of a national primary drinking water regulation.

(v) As an additional alternative to the regulations promulgated pursuant to clauses (i) and (iii), including the criteria for avoiding filtration contained in 40 CFR 141.71, a State exercising primary enforcement responsibility for public water systems may, on a case-by-case basis, and after notice and opportunity for public comment, establish treatment requirements as an alternative to filtration in the case of systems having uninhabited, undeveloped watersheds in consolidated ownership, and having control over access to, and activities in, those watersheds. If the State determines (and the Administrator concurs) that the quality of the source water and the alternative treatment requirements established by the State ensure greater removal or inactivation efficiencies of pathogenic organisms for which national primary drinking water regulations have been promulgated or that are of public health concern than would be achieved by the combination of filtration and chlorine disinfection (in compliance with this section).

(8) DISINFECTION.—At any time after the end of the 3-year period that begins on August 6, 1996, but not later than the date on which the Administrator promulgates a Stage II rulemaking for disinfectants and disinfection byproducts (as described in paragraph (2)(C)), the Administrator shall also promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems, including surface water systems and, as necessary, ground water systems. After consultation with the States, the Administrator shall (as part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g-2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water. The Administrator shall simultaneously promulgate a rule specifying criteria that will be used by the Administrator (or delegated State authorities) to grant variances from this requirement according to the provisions of sections 300g-4(a)(1)(B) and 300g-4(a)(3) of this title. In implementing section 300j-1(e) of this title the Administrator or the delegated State authority shall, where appropriate, give special consideration to providing technical assistance to small public water systems in complying with the regulations promulgated under this paragraph.

(9) REVIEW AND REVISION.—The Administrator shall, not less often than every 6 years, review and revise, as appropriate, each national primary drinking water regulation promulgated under this subchapter. Any revision of a national primary drinking water regulation shall be promulgated in accordance with this section, except that each revision shall maintain, or provide for greater, protection of the health of persons.

(10) EFFECTIVE DATE.—A national primary drinking water regulation promulgated under this section (and any amendment thereto) shall take effect on the date that is 3 years after the date on which the regulation is promulgated unless the Administrator determines that an earlier date is practicable, except that the Administrator, or a State (in the case of an individual system), may allow up to 2 additional years to comply with a maximum contaminant level or treatment technique if the Administrator or State (in the case of an individual system) determines that additional time is necessary for capital improvements.

(11) No national primary drinking water regulation may require the addition of any substance for preventive health care purposes unrelated to contamination of drinking water.

(12) CERTAIN CONTAMINANTS.—

(A) ARSENIC.—

(i) SCHEDULE AND STANDARD.—Notwithstanding the deadlines set forth in paragraph (1), the Administrator shall promulgate a national primary drinking water regulation
for arsenic pursuant to this subsection, in accordance with the schedule established by this paragraph.

(ii) STUDY PLAN.—Not later than 180 days after August 6, 1996, the Administrator shall develop a comprehensive plan for study in support of drinking water rulemaking to reduce the uncertainty in assessing health risks associated with exposure to low levels of arsenic. In conducting such study, the Administrator shall consult with the National Academy of Sciences, other Federal agencies, and interested public and private entities.

(iii) COOPERATIVE AGREEMENTS.—In carrying out the study plan, the Administrator may enter into cooperative agreements with other Federal agencies, State and local governments, and other interested public and private entities.

(iv) PROPOSED REGULATIONS.—The Administrator shall propose a national primary drinking water regulation for arsenic not later than January 1, 2000.

(v) FINAL REGULATIONS.—Not later than January 1, 2001, after notice and opportunity for public comment, the Administrator shall promulgate a national primary drinking water regulation for arsenic.

(vi) AUTHORIZATION.—There are authorized to be appropriated $2,500,000 for each of fiscal years 1997 through 2000 for the studies required by this paragraph.

(B) SULFATE.—

(i) ADDITIONAL STUDY.—Prior to promulgating a national primary drinking water regulation for sulfate, the Administrator and the Director of the Centers for Disease Control and Prevention shall jointly conduct an additional study to establish a reliable dose-response relationship for the adverse human health effects that may result from exposure to sulfate in drinking water, including the health effects that may be experienced by groups within the general population (including infants and travelers) that are potentially at greater risk of adverse health effects as the result of such exposure. The study shall be conducted in consultation with interested States, shall be based on the best available, peer-reviewed science and supporting studies conducted in accordance with sound and objective scientific practices, and shall be completed not later than 30 months after August 6, 1996.

(ii) DETERMINATION.—The Administrator shall include sulfate among the 5 or more contaminants for which a determination is made pursuant to paragraph (3)(B) not later than 5 years after August 6, 1996.

(iii) PROPOSED AND FINAL RULE.—Notwithstanding the deadlines set forth in paragraph (2), the Administrator may, pursuant to the authorities of this subsection and after notice and opportunity for public comment, promulgate a final national primary drinking water regulation for sulfate. Any such regulation shall include requirements for public notification and options for the provision of alternative water supplies to populations at risk as a means of complying with the regulation in lieu of a best available treatment technology or other means.

(13) RADON IN DRINKING WATER.—

(A) NATIONAL PRIMARY DRINKING WATER REGULATION.—Notwithstanding paragraph (2), the Administrator shall withdraw any national primary drinking water regulation for radon proposed prior to August 6, 1996, and shall propose and promulgate a regulation for radon under this section, as amended by the Safe Drinking Water Act Amendments of 1996.

(B) RISK ASSESSMENT AND STUDIES.—

(i) ASSESSMENT BY NAS.—Prior to proposing a national primary drinking water regulation for radon, the Administrator shall arrange for the National Academy of Sciences to prepare a risk assessment for radon in drinking water using the best available science in accordance with the requirements of paragraph (3). The risk assessment shall consider each of the risks associated with exposure to radon from drinking water and consider studies on the health effects of radon at levels and under conditions likely to be experienced through residential exposure. The risk assessment shall be peer-reviewed.

(ii) STUDY OF OTHER MEASURES.—The Administrator shall arrange for the National Academy of Sciences to prepare an assessment of the health risk reduction benefits associated with various mitigation measures to reduce radon levels in indoor air. The assessment may be conducted as part of the risk assessment authorized by clause (i) and shall be used by the Administrator to prepare the guidance and approve State programs under subparagraph (G).

(iii) OTHER ORGANIZATION.—If the National Academy of Sciences declines to prepare the risk assessment or studies required by this subparagraph, the Administrator shall enter into a contract or cooperative agreement with another independent, scientific organization to prepare such assessments or studies.

(C) HEALTH RISK REDUCTION AND COST ANALYSIS.—Not later than 30 months after August 6, 1996, the Administrator shall publish, and seek public comment on, a health risk reduction and cost analysis meeting the requirements of paragraph (3)(C) for potential maximum contaminant levels that are being considered for radon in drinking water. The Administrator shall include a response to all significant public comments received on the analysis with the preamble for the proposed rule published under subparagraph (D).

(D) PROPOSED REGULATION.—Not later than 36 months after August 6, 1996, the Administrator shall propose a maximum contaminant level goal and a national primary drinking water regulation for radon pursuant to this section.

(E) FINAL REGULATION.—Not later than 12 months after the date of the proposal under subparagraph (D), the Administrator shall publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for radon pursuant to this
section based on the risk assessment prepared pursuant to subparagraph (B) and the health risk reduction and cost analysis published pursuant to subparagraph (C). In considering the risk assessment and the health risk reduction and cost analysis in connection with the promulgation of such a standard, the Administrator shall take into account the costs and benefits of control programs for radon from other sources.

(F) ALTERNATIVE MAXIMUM CONTAMINANT LEVEL.—If the maximum contaminant level for radon in drinking water promulgated pursuant to subparagraph (E) is more stringent than necessary to reduce the contribution to the national average concentration of radon in outdoor air, the Administrator shall, simultaneously with the promulgation of such level, promulgate an alternative maximum contaminant level for radon that would result in a contribution of radon from drinking water to radon levels in indoor air equivalent to the national average concentration of radon in outdoor air. If the Administrator promulgates an alternative maximum contaminant level under this subparagraph, the Administrator shall, after notice and opportunity for public comment and in consultation with the States, publish guidelines for State programs, including criteria for multimedia measures to mitigate radon levels in indoor air, to be used by the States in preparing programs under subparagraph (G). The guidelines shall take into account data from existing radon mitigation programs and the assessment of mitigation measures prepared under subparagraph (B).

(G) MULTIMEDIA RADON MITIGATION PROGRAMS.—

(i) In general.—A State may develop and submit a multimedia program to mitigate radon levels in indoor air for approval by the Administrator under this subparagraph. If, after notice and the opportunity for public comment, such program is approved by the Administrator, public water systems in the State may comply with the alternative maximum contaminant level promulgated under subparagraph (F) in lieu of the maximum contaminant level in the national primary drinking water regulation promulgated pursuant to this section, the Administrator promulgates a national primary drinking water regulation promulgated under subparagraph (E).

(ii) ELEMENTS OF PROGRAMS.—State programs may rely on a variety of mitigation measures including public education, testing, training, technical assistance, remediation grant and loan or incentive programs, or other regulatory or nonregulatory measures. The effectiveness of elements in State programs shall be evaluated by the Administrator based on the assessment prepared by the National Academy of Sciences under subparagraph (B) and the guidelines published by the Administrator under subparagraph (F).

(iii) APPROVAL.—The Administrator shall approve a State program submitted under this paragraph if the health risk reduction benefits that would be achieved if each public water system in the State complied with the maximum contaminant level promulgated under subparagraph (E). The Administrator shall approve or disapprove a program submitted under this paragraph within 180 days of receipt. A program that is not disapproved during such period shall be deemed approved. A program that is disapproved may be modified to address the objections of the Administrator and be resubmitted for approval.

(iv) REVIEW.—The Administrator shall periodically, but not less often than every 5 years, review each multimedia mitigation program approved under this subparagraph to determine whether it continues to meet the requirements of clause (iii) and shall, after written notice to the State and an opportunity for the State to correct any deficiency in the program, withdraw approval of programs that no longer comply with such requirements.

(v) EXTENSION.—If, within 90 days after the promulgation of an alternative maximum contaminant level under subparagraph (F), the Governor of a State submits a letter to the Administrator committing to develop a multimedia mitigation program under this subparagraph, the effective date of the national primary drinking water regulation for radon in the State that would be applicable under paragraph (10) shall be extended for a period of 18 months.

(vi) LOCAL PROGRAMS.—In the event that a State chooses not to submit a multimedia mitigation program for approval under this subparagraph or has submitted a program that has been disapproved, any public water system in the State may submit a program for approval by the Administrator according to the same criteria, conditions, and approval process that would apply to a State program. The Administrator shall approve a multimedia mitigation program if the health risk reduction benefits expected to be achieved by the program are equal to or greater than the health risk reduction benefits that would result from compliance by the public water system with the maximum contaminant level for radon promulgated under subparagraph (E).

(14) RECYCLING OF FILTER BACKWASH.—The Administrator shall promulgate a regulation to govern the recycling of filter backwash water within the treatment process of a public water system. The Administrator shall promulgate such regulation not later than 4 years after August 6, 1996, unless such recycling has been addressed by the Administrator's Enhanced Surface Water Treatment Rule prior to such date.

(15) VARIANCE TECHNOLOGIES.—

(A) IN GENERAL.—At the same time as the Administrator promulgates a national primary drinking water regulation for a contaminant pursuant to this section, the Administrator shall issue guidance or regulations describing the best treatment technologies, treatment techniques, or other means (referred to in this paragraph as “variance technology”) for the contaminant that the Admin-
istrator finds, after examination for efficacy under field conditions and not solely under laboratory conditions, are available and affordable, as determined by the Administrator in consultation with the States, for public water systems of varying size, considering the quality of the source water to be treated. The Administrator shall identify such variance technologies for public water systems serving—

(i) a population of 10,000 or fewer but more than 3,300;
(ii) a population of 3,300 or fewer but more than 500; and
(iii) a population of 500 or fewer but more than 25.

if, considering the quality of the source water to be treated, no treatment technology is listed for public water systems of that size under paragraph (4)(E). Variance technologies identified by the Administrator pursuant to this paragraph may not achieve compliance with the maximum contaminant level or treatment technique requirement of such regulation, but shall achieve the maximum reduction or inactivation efficiency that is affordable considering the size of the system and the quality of the source water. The guidance or regulations shall not require the use of a technology from a specific manufacturer or brand.

(B) LIMITATION.—The Administrator shall not identify any variance technology under this paragraph, unless the Administrator has determined, considering the quality of the source water to be treated and the expected useful life of the technology, that the variance technology is protective of public health.

(C) ADDITIONAL INFORMATION.—The Administrator shall include in the guidance or regulations identifying variance technologies under this paragraph any assumptions supporting the public health determination referred to in subparagraph (B), where such assumptions concern the public water system to which the technology may be applied, or its source waters. The Administrator shall provide any assumptions used in determining affordability, taking into consideration the number of persons served by such systems. The Administrator shall provide as much reliable information as practicable on performance, effectiveness, limitations, costs, and other relevant factors including the applicability of variance technology to waters from surface and groundwater sources.

(D) REGULATIONS AND GUIDANCE.—Not later than 2 years after August 6, 1996, and after consultation with the States, the Administrator shall issue guidance or regulations under subparagraph (A) for each national primary drinking water regulation promulgated prior to August 6, 1996, for which a variance may be granted under section 300g–4(e) of this title. The Administrator may, at any time after a national primary drinking water regulation has been promulgated, issue guidance or regulations describing additional variance technologies. The Administrator shall, not less often than every 7 years, or upon receipt of a petition supported by substantial information, review variance technologies identified under this paragraph. The Administrator shall issue revised guidance or regulations if new or innovative variance technologies become available that meet the requirements of this paragraph and achieve an equal or greater reduction or inactivation efficiency than the variance technologies previously identified under this subparagraph. No public water system shall be required to replace a variance technology during the useful life of the technology for the sole reason that a more efficient variance technology has been listed under this subparagraph.

(c) Secondary regulations; publication of proposed regulations; promulgation; amendments

The Administrator shall publish proposed national secondary drinking water regulations within 270 days after December 16, 1974. Within 90 days after publication of any such regulation, he shall promulgate such regulation with such modifications as he deems appropriate. Regulations under this subsection may be amended from time to time.

(d) Regulations; public hearings; administrative consultations

Regulations under this section shall be prescribed in accordance with section 553 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section, the Administrator shall consult with the Secretary and the National Drinking Water Advisory Council.

(e) Science Advisory Board comments

The Administrator shall request comments from the Science Advisory Board (established under the Environmental Research, Development, and Demonstration Act of 1978) prior to proposal of a maximum contaminant level goal and national primary drinking water regulation. The Board shall respond, as it deems appropriate, within the time period applicable for promulgation of the national primary drinking water standard concerned. This subsection shall, under no circumstances, be used to delay final promulgation of any national primary drinking water standard.

(3) The Safe Drinking Water Act Amendments of 1996, referred to in subsec. (b)(13)(A), is Pub. L. 104–182, Aug. 6,
§ 300g–1  TITLES 42—THE PUBLIC HEALTH AND WELFARE  Page 976

AMENDMENTS

1996—Subsec. (a)(3). Pub. L. 104–182, § 102(c)(2), struck out “paragraph (1), (2), or (3) of” before “subsection (b) in two places.

Subsec. (b). Pub. L. 104–182, § 102(a), inserted heading.

Subsec. (b)(1). Pub. L. 104–182, § 102(a), added paras. (12) and (13) and struck out former par. (11) inserted subpar. (C) and designated subpar. (B) as subpar. (A) and subpar. (A) as subpar. (B), redesignated subpars. (D) and (E), respectively, of subsec. (a) generally. Prior to amendment, subsec. (a) read as follows:

“(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.

“(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means permit greater protection of the health of persons, but in any event such regulations shall be reviewed at least once every 3 years. Such review shall include an analysis of innovations or changes in technology, treatment techniques or other activities that have occurred over the previous 3-year period and that may provide for greater protection of the health of persons. The findings of such review shall be published in the Federal Register. If, after opportunity for public comment, the Administrator concludes that the technology, treatment techniques, or other means resulting from such innovations or changes are not feasible within the meaning of paragraph (5), an explanation of such conclusion shall be published in the Federal Register.

Subsec. (b)(10). Pub. L. 104–182, § 110, amended par. (10) generally. Prior to amendment, par. (10) read as follows: “National primary drinking water regulations promulgated under this subsection (and amendments thereto) shall take effect eighteen months after the date of their promulgation. Regulations under subsection (a) of this section shall be superseded by regulations under this subsection to the extent provided by the regulations under this subsection.”

1986—Subsec. (a). Pub. L. 99–339, § 101(a), substituted sec. (a) generally. Prior to amendment, subsec. (a) read as follows:

“(1) The Administrator shall publish proposed national interim primary drinking water regulations within 90 days after December 16, 1974. Within 180 days after December 16, 1974, he shall promulgate such regulations with such modifications as he deems appropriate. Regulations under this paragraph may be amended from time to time.

“(2) National interim primary drinking water regulations promulgated under paragraph (1) shall protect health to the extent feasible, using technology, treatment techniques, and other means, which the Administrator determines are generally available (taking costs into consideration) on December 16, 1974.

“(3) The interim primary regulations first promulgated under paragraph (1) shall take effect eighteen months after the date of their promulgation.”

Subsec. (b)(1). Pub. L. 99–339, § 101(b), substituted provisions establishing standard setting schedules and deadlines for provisions relating to establishment of maximum contaminant levels and a list of contaminants with adverse effect but not yet determined.

Subsec. (b)(2). Pub. L. 99–339, § 101(b), substituted provisions authorizing the Administrator to substitute contaminants for those referred to in par. (1) and to supply a list of the contaminants proposed for inclusion, with the decision of the Administrator to regulate such contaminant not subject to judicial review, for provisions which authorized the Administrator to publish in the Federal Register proposed revised national interim primary drinking water regulations and 180 days after the date of such proposed regulations to promulgate such revised regulations with modification as deemed appropriate.

Subsec. (b)(3). Pub. L. 99–339, § 101(b), substituted provisions directing the Administrator to publish maximum contaminant level goals and promulgate national primary drinking water regulations for contaminants other than specified in par. (1) or (2), which may have an adverse effect on health and are known or anticipated to occur in public water systems; to establish an advisory working group to aid in establishing a list of such contaminants, and to publish, within a specified time, both proposed and final goals and regulations for water regulations for contaminants, other than those referred to in pars. (1) or (2), which may have an adverse effect on human health and are known to occur in public water systems.

Subsec. (b)(4). Pub. L. 104–182, § 104(a)(1), designated first sentence as subpar. (A), inserted par. and subpar. (A) headings, designated second sentence as subpar. (B), inserted subpar. (B) heading, substituted “Except as provided in paragraphs (5) and (6), each national” for “Each national” and specified a maximum contaminant level for “specify a maximum level”, and added subpar. (C).

Subsec. (b)(4)(D). Pub. L. 104–182, § 104(a)(2), (3), redesignated par. (5) as subpar. (D) of par. (4), inserted subpar. heading, and substituted “this paragraph” for “paragraph (4)”.

Subsec. (b)(5). Pub. L. 104–182, § 104(a)(6), added par. (5) and (6). For provisions parts (5) and (6) redesignated subpars. (D) and (E)(1), respectively, of par. (4).

Subsec. (b)(8). Pub. L. 104–182, § 501(a)(2), substituted “section (a) of this section shall be superseded by regulations promulgated under this subsection” for “subsection (a) of this section shall be superseded by regulations promulgated under this subsection (and amendments thereto)”.

Subsec. (b)(9). Pub. L. 104–182, § 107, inserted heading, realigned margins, and substituted “At any time after the end of the 3-year period that begins on August 6, 1996, but not later than the date on which the Administrator promulgates a Stage II rulemaking for disinfectants and disinfection byproducts (as described in paragraph (2)(C)(ii) of this section) and to promulgate criteria that the Administrator shall as (part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g–2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water.” for “Not later than 36 months after June 19, 1996, the Administrator shall propose and promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems, including surface water systems and, as necessary, ground water systems. After consultation with the States, the Administrator shall (as part of the regulations) promulgate criteria that the Administrator, or a State that has primary enforcement responsibility under section 300g–2 of this title, shall apply to determine whether disinfection shall be required as a treatment technique for any public water system served by ground water.” for “Not later than 36 months after June 19, 1996, the Administrator shall propose and promulgate national primary drinking water regulations requiring disinfection as a treatment technique for all public water systems.”

Subsec. (b)(10). Pub. L. 104–182, § 108, amended par. (9) generally. Prior to amendment, par. (9) read as follows: “National primary drinking water regulations shall be amended whenever changes in technology, treatment techniques, and other means permit greater protection of the health of persons, but in any event such regulations shall be reviewed at least once every 3 years. Such review shall include an analysis of innovations or changes in technology, treatment techniques or other activities that have occurred over the previous 3-year period and that may provide for greater protection of the health of persons. The findings of such review shall be published in the Federal Register. If, after opportunity for public comment, the Administrator concludes that the technology, treatment techniques, or other means resulting from such innovations or changes are not feasible within the meaning of paragraph (5), an explanation of such conclusion shall be published in the Federal Register.”

was to be as close to the recommended level or technique as feasible, and defined the term "feasible".

Subsec. (b)(4) to (11), Pub. L. 99-338, § 10(f)(b), (c)(1), (d), added subsec. (e), Pub. L. 99-339, § 10(e), amended subsec. (e), (f) to (k), redesignated former pars. (4) to (9) as pars. (9) to (15), respectively, in par. (9) substituted "National" for "Revised National" and inserted provisions that review include analysis, and publication in Federal Register, of innovations in technology, treatment techniques or other activities occurring during previous three years and their feasibility, and in par. (16) substituted "National" for "Revised National".

Subsec. (e), Pub. L. 99-338, § 10(e), amended subsec. (e) generally, substituting provisions which relate to the request by the Administrator of comments by the Science Advisory Board prior to proposal of a maximum contaminant level goal and national primary drinking water regulation for provisions which related to study by the National Academy of Sciences to determine the maximum contaminant levels, report to Congress, and funding therefor.

1977—Subsec. (e)(2), Pub. L. 95-190 inserted provisions relating to revisions of the required report and cl. (G).

NATIONAL PRIMARY DRINKING WATER REGULATION FOR ARSENIC

Pub. L. 106-377, § 1(a)(1) [title III], Oct. 27, 2000, 114 Stat. 1411, 141A-41, provided in part: "That notwithstanding section 1412(b)(5) of the Safe Drinking Water Act, as amended [subsec. (b)(5) of this section], the Administrator shall promulgate a national primary drinking water regulation for arsenic not later than June 22, 2001."

APPLICABILITY OF PRIOR REQUIREMENTS

Section 102(b) of Pub. L. 104-182 provided that: "The requirements of subparagraphs (C) and (D) of section 1412(b)(3) of the Safe Drinking Water Act [subsec. (b)(3)(C), (D) of this section] as in effect before the date of enactment of this Act [Aug. 6, 1996], and any obligation to promulgate regulations pursuant to such subparagraph as of the date of enactment of this Act, are superseded by the amendments made by subsection (a) [amending this section]."

DISINFECTANTS AND DISINFECTION BYPRODUCTS

Section 104(b) of Pub. L. 104-182 provided that: "The Administrator of the Environmental Protection Agency may use the authority of section 1412(b)(5) of the Safe Drinking Water Act [subsec. (b)(5) of this section] (as amended by this Act) to promulgate the Stage I and Stage II Disinfectants and Disinfection Byproducts Rules as proposed in volume 59, Federal Register, page 30693, July 29, 1994. The considerations used in the development of the July 29, 1994, proposed national primary drinking water regulation on disinfectants and disinfection byproducts shall be treated as consistent with such section 1412(b)(5) for purposes of such Stage I and Stage II rules."
specify a State’s authority under this subchapter when it is determined to have primary enforcement responsibility for public water systems.

(2) When an application is submitted in accordance with the Administrator’s regulations under paragraph (1), the Administrator shall, within 90 days of the date on which such application is submitted, (A) make the determination applied for, or (B) deny the application and notify the applicant in writing of the reasons for his denial.

(c) Interim primary enforcement authority

A State that has primary enforcement authority under this section with respect to each existing national primary drinking water regulation shall be considered to have primary enforcement authority with respect to each new or revised national primary drinking water regulation during the period beginning on the effective date of a regulation adopted and submitted by the State with respect to the new or revised national primary drinking water regulation in accordance with subsection (b)(1) of this section and ending at such time as the Administrator makes a determination under subsection (b)(2)(B) of this section with respect to the regulation.

(2) Enforcement in nonprimary States.—

(A) In general.—If, on the basis of information available to the Administrator, the Administrator finds, with respect to a period in which a State does not have primary enforcement responsibility for public water systems, that a public water system in the State—

(i) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is not in effect, does not comply with any applicable requirement; or

(ii) for which a variance under section 300g–4 of this title or an exemption under section 300g–5 of this title is in effect, does not comply with any schedule or other requirement imposed pursuant to the variance or exemption;

the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such applicable requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(B) Notice.—If the Administrator takes any action pursuant to this paragraph, the Administrator shall notify an appropriate local official of the State in which is located the public water system as may be appropriate to bring the system into compliance with the requirement by the earliest feasible time.

(b) Judicial determinations in appropriate Federal district courts; civil penalties, separate violations

The Administrator may bring a civil action in the appropriate United States district court to require compliance with any applicable requirement, with an order issued under subsection (g) of this section, or with any schedule or other requirement imposed pursuant to a variance or exemption granted under section 300g–4 or 300g–5 of this title if—

(1) authorized under paragraph (1) or (2) of subsection (a) of this section, or

(2) if requested by (A) the chief executive officer of the State in which is located the public water system which is not in compliance with such regulation or requirement, or (B) the agency of such State which has jurisdiction over compliance by public water systems in the State with national primary drinking water regulations.

The court may enter, in an action brought under this subsection, such judgement as protection of
public health may require, taking into consideration the time necessary to comply and the availability of alternative water supplies; and, if the court determines that there has been a violation of the regulation or schedule or other requirement with respect to which the action was brought, the court may, taking into account the seriousness of the violation, the population at risk, and other appropriate factors, impose on the violator a civil penalty of not to exceed $25,000 for each day in which such violation occurs.

(c) Notice to persons served

(1) In general

Each owner or operator of a public water system shall give notice of each of the following to the persons served by the system:

(A) Notice of any failure on the part of the public water system to—

(i) comply with an applicable maximum contaminant level or treatment technique requirement of, or a testing procedure prescribed by, a national primary drinking water regulation; or

(ii) perform monitoring required by section 300j–4(a) of this title.

(B) If the public water system is subject to a variance granted under subsection (a)(1)(A), (a)(2), or (e) of section 300g–4 of this title for an inability to meet a maximum contaminant level requirement or is subject to an exemption granted under section 300g–5 of this title, notice of—

(i) the existence of the variance or exemption; and

(ii) any failure to comply with the requirements of any schedule prescribed pursuant to the variance or exemption.

(C) Notice of the concentration level of any unregulated contaminant for which the Administrator has required public notice pursuant to paragraph (2)(E).

(2) Form, manner, and frequency of notice

(A) In general

The Administrator shall, by regulation, and after consultation with the States, prescribe the manner, frequency, form, and content for giving notice under this subsection.

The regulations shall—

(i) provide for different frequencies of notice based on the differences between violations that are intermittent or infrequent and violations that are continuous or frequent; and

(ii) take into account the seriousness of any potential adverse health effects that may be involved.

(B) State requirements

(i) In general

A State may, by rule, establish alternative notification requirements—

(I) with respect to the form and content of notice given under and in a manner in accordance with subparagraph (C); and

(II) with respect to the form and content of notice given under subparagraph (D).

(ii) Contents

The alternative requirements shall provide the same type and amount of information as required pursuant to this subsection and regulations issued under subparagraph (A).

(iii) Relationship to section 300g–2

Nothing in this subparagraph shall be construed or applied to modify the requirements of section 300g–2 of this title.

(C) Violations with potential to have serious adverse effects on human health

Regulations issued under subparagraph (A) shall specify notification procedures for each violation by a public water system that has the potential to have serious adverse effects on human health as a result of short-term exposure. Each notice of violation provided under this subparagraph shall—

(i) be distributed as soon as practicable after the occurrence of the violation, but not later than 24 hours after the occurrence of the violation;

(ii) provide a clear and readily understandable explanation of—

(I) the violation;

(II) the potential adverse effects on human health;

(III) the steps that the public water system is taking to correct the violation; and

(IV) the necessity of seeking alternative water supplies until the violation is corrected;

(iii) be provided to the Administrator or the head of the State agency that has primary enforcement responsibility under section 300g–2 of this title as soon as practicable, but not later than 24 hours after the occurrence of the violation; and

(iv) be provided to the Administrator or the head of the State agency in general regulations of the State agency, or on a case-by-case basis after the consultation referred to in clause (iii), considering the health risks involved—

(I) be provided to appropriate broadcast media;

(II) be prominently published in a newspaper of general circulation serving the area not later than 1 day after distribution of a notice pursuant to clause (i) or the date of publication of the next issue of the newspaper; or

(III) be provided by posting or door-to-door notification in lieu of notification by means of broadcast media or newspaper.

(D) Written notice

(i) In general

Regulations issued under subparagraph (A) shall specify notification procedures for violations other than the violations covered by subparagraph (C). The procedures shall specify that a public water system shall provide written notice to each person served by the system by notice (I) in the first bill (if any) prepared after the date of occurrence of the violation, (II) in
an annual report issued not later than 1 year after the date of occurrence of the violation, or (III) by mail or direct delivery as soon as practicable, but not later than 1 year after the date of occurrence of the violation.

(ii) Form and manner of notice

The Administrator shall prescribe the form and manner of the notice to provide a clear and readily understandable explanation of the violation, any potential adverse health effects, and the steps that the system is taking to seek alternative water supplies, if any, until the violation is corrected.

(E) Unregulated contaminants

The Administrator may require the owner or operator of a public water system to give notice to the persons served by the system of the concentration levels of an unregulated contaminant required to be monitored under section 300j–4(a) of this title.

(3) Reports

(A) Annual report by State

(i) In general

Not later than January 1, 1998, and annually thereafter, each State that has primary enforcement responsibility under section 300g–2 of this title shall prepare, make readily available to the public, and submit to the Administrator an annual report on violations of national primary drinking water regulations by public water systems in the State, including violations with respect to (I) maximum contaminant levels, (II) treatment requirements, (III) variances and exemptions, and (IV) monitoring requirements determined to be significant by the Administrator after consultation with the States.

(ii) Distribution

The State shall publish and distribute summaries of the report and indicate where the full report is available for review.

(B) Annual report by Administrator

Not later than July 1, 1998, and annually thereafter, the Administrator shall prepare and make available to the public an annual report summarizing and evaluating reports submitted by States pursuant to subparagraph (A) and notices submitted by public water systems serving Indian Tribes provided to the Administrator pursuant to subparagraph (O) or (D) of paragraph (2) and making recommendations concerning the resources needed to improve compliance with this subchapter. The report shall include information about public water system compliance on Indian reservations and about enforcement activities undertaken and financial assistance provided by the Administrator on Indian reservations, and shall make specific recommendations concerning the resources needed to improve compliance with this subchapter on Indian reservations.

(4) Consumer confidence reports by community water systems

(A) Annual reports to consumers

The Administrator, in consultation with public water systems, environmental groups, public interest groups, risk communication experts, and the States, and other interested parties, shall issue regulations within 24 months after August 6, 1996, to require each community water system to mail to each customer of the system at least once annually a report on the level of contaminants in the drinking water purveyed by that system (referred to in this paragraph as a “consumer confidence report”). Such regulations shall provide a brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” and brief statements in plain language regarding the health concerns that resulted in regulation of each regulated contaminant. The regulations shall also include a brief and plainly worded explanation regarding contaminants that may reasonably be expected to be present in drinking water, including bottled water. The regulations shall also provide for an Environmental Protection Agency toll-free hotline that consumers can call for more information and explanation.

(B) Contents of report

The consumer confidence reports under this paragraph shall include, but not be limited to, each of the following:

(i) Information on the source of the water purveyed.

(ii) A brief and plainly worded definition of the terms “maximum contaminant level goal”, “maximum contaminant level”, “variances”, and “exemptions” as provided in the regulations of the Administrator.

(iii) If any regulated contaminant is detected in the water purveyed by the public water system, a statement setting forth (I) the maximum contaminant level goal, (II) the maximum contaminant level, (III) the level of such contaminant in such water system, and (IV) for any regulated contaminant for which there has been a violation of the maximum contaminant level during the year concerned, the brief statement in plain language regarding the health concerns that resulted in regulation of such contaminant, as provided by the Administrator in regulations under subparagraph (A).

(iv) Information on compliance with national primary drinking water regulations, as required by the Administrator, and notice if the system is operating under a variance or exemption and the basis on which the variance or exemption was granted.

(v) Information on the levels of unregulated contaminants for which monitoring is required under section 300j–4(a)(2) of this title (including levels of cryptosporidium and radon where States determine they may be found).
(vi) A statement that the presence of contaminants in drinking water does not necessarily indicate that the drinking water poses a health risk and that more information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency hotline.

A public water system may include such additional information as it deems appropriate for public education. The Administrator may, for not more than 3 regulated contaminants other than those referred to in sub-clause (iv) of clause (iii), require a consumer confidence report under this paragraph to include the brief statement in plain language regarding the health concerns that resulted in regulation of the contaminant or contaminants concerned, as provided by the Administrator in regulations under subparagraph (A).

(C) Coverage

The Governor of a State may determine not to apply the mailing requirement of subparagraph (A) to a community water system serving fewer than 10,000 persons. Any such system shall—

(i) inform, in the newspaper notice required by clause (iii) or by other means, its customers that the system will not be mailing the report as required by subparagraph (A);

(ii) make the consumer confidence report available upon request to the public; and

(iii) publish the report referred to in subparagraph (A) annually in one or more local newspapers serving the area in which customers of the system are located.

(D) Alternative to publication

For any community water system which, pursuant to subparagraph (C), is not required to meet the mailing requirement of subparagraph (A) and which serves 500 persons or fewer, the community water system may elect not to comply with clause (i) or (iii) of subparagraph (C). If the community water system so elects, the system shall, at a minimum—

(i) prepare an annual consumer confidence report pursuant to subparagraph (B); and

(ii) provide notice at least once per year to each of its customers by mail, by door-to-door delivery, by posting or by other means authorized by the regulations of the Administrator that the consumer confidence report is available upon request.

(E) Alternative form and content

A State exercising primary enforcement responsibility may establish, by rule, after notice and public comment, alternative requirements with respect to the form and content of consumer confidence reports under this paragraph.

(d) Notice of noncompliance with secondary drinking water regulations

Whenever, on the basis of information available to him, the Administrator finds that within a reasonable time after national secondary drinking water regulations have been promulgated, one or more public water systems in a State do not comply with such secondary regulations, and that such noncompliance appears to result from a failure of such State to take reasonable action to assure that public water systems throughout such State meet such secondary regulations, he shall so notify the State.

(e) State authority to adopt or enforce laws or regulations respecting drinking water regulations or public water systems unaffected

Nothing in this subchapter shall diminish any authority of a State or political subdivision to adopt or enforce any law or regulation respecting drinking water regulations or public water systems, but no such law or regulation shall relieve any person of any requirement otherwise applicable under this subchapter.

(f) Notice and public hearing; availability of recommendations transmitted to State and public water system

If the Administrator makes a finding of noncompliance (described in subparagraph (A) or (B) of subsection (a)(1) of this section) with respect to a public water system in a State which has primary enforcement responsibility, the Administrator may, for the purpose of assisting that State in carrying out such responsibility and upon the petition of such State or public water system or persons served by such system, hold, after appropriate notice, public hearings for the purpose of gathering information from technical or other experts, Federal, State, or other public officials, representatives of such public water system, persons served by such system, and other interested persons on—

(1) the ways in which such system can within the earliest feasible time be brought into compliance with the regulation or requirement with respect to which such finding was made, and

(2) the means for the maximum feasible protection of the public health during any period in which such system is not in compliance with a national primary drinking water regulation or requirement applicable to a variance or exemption.

On the basis of such hearings the Administrator shall issue recommendations which shall be sent to such State and public water system and shall be made available to the public and communications media.

(g) Administrative order requiring compliance; notice and hearing; civil penalty; civil actions

(1) In any case in which the Administrator is authorized to bring a civil action under this section or under section 300j–4 of this title with respect to any applicable requirement, the Administrator also may issue an order to require compliance with such applicable requirement.

(2) An order issued under this subsection shall not take effect, in the case of a State having primary enforcement responsibility for public water systems in that State, until after the Administrator has provided the State with an opportunity to confer with the Administrator regarding the order. A copy of any order issued
under this subsection shall be sent to the appropriate State agency of the State involved if the State has primary enforcement responsibility for public water systems in that State. Any order issued under this subsection shall state with reasonable specificity the nature of the violation. In any case in which an order under this subsection is issued to a corporation, a copy of such order shall be issued to appropriate corporate officers.

(3)(A) Any person who violates, or fails or refuses to comply with, an order under this subsection shall be liable to the United States for a civil penalty of not more than $25,000 per day of violation.

(B) In a case in which a civil penalty sought by the Administrator under this paragraph does not exceed $5,000, the penalty shall be assessed by the Administrator after notice and opportunity for a public hearing (unless the person against whom the penalty is assessed requests a hearing on the record in accordance with section 554 of title 5). In a case in which a civil penalty sought by the Administrator under this paragraph exceeds $5,000, but does not exceed $25,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.

(C) Whenever any civil penalty sought by the Administrator under this subsection for a violation of an applicable requirement exceeds $25,000, the penalty shall be assessed by a civil action brought by the Administrator in the appropriate United States district court (as determined under the provisions of title 28).

(D) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court of appeals has entered final judgment in favor of the Administrator, the Attorney General shall recover the amount for which such person is liable in any appropriate district court of the United States. In any such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(h) Consolidation incentive

(1) In general

An owner or operator of a public water system may submit to the State in which the system is located (if the State has primary enforcement responsibility under section 300g–2 of this title) or to the Administrator (if the State does not have primary enforcement responsibility) a plan (including specific measures and schedules) for—

(A) the physical consolidation of the system with 1 or more other systems;

(B) the consolidation of significant management and administrative functions of the system with 1 or more other systems; or

(C) the transfer of ownership of the system that may reasonably be expected to improve drinking water quality.

(2) Consequences of approval

If the State or the Administrator approves a plan pursuant to paragraph (1), no enforcement action shall be taken pursuant to this part with respect to a specific violation identified in the approved plan prior to the date that is the earlier of the date on which consolidation is completed according to the plan or the date that is 2 years after the plan is approved.

(i) “Applicable requirement” defined

In this section, the term “applicable requirement” means—

(1) a requirement of section 300g–1, 300g–3, 300g–4, 300g–5, 300g–6, 300i–2, 300j–4, or 300j–4 of this title;

(2) a regulation promulgated pursuant to a section referred to in paragraph (1);

(3) a schedule or requirement imposed pursuant to a section referred to in paragraph (1); and

(4) a requirement of, or permit issued under, an applicable State program for which the Administrator has made a determination that the requirements of section 300g–2 of this title have been satisfied, or an applicable State program approved pursuant to this part.

(AMENDMENTS)

Subsec. (a)(1)(B). Pub. L. 104–182, §113(a)(1)(A)(ii), substituted “any applicable requirement” for “any national primary drinking water regulation in effect under section 300g–1 of this title”.

Subsec. (a)(2). Pub. L. 104–182, §113(a)(1)(B), added par. (2) and struck out former par. (2) which read as follows: “Whenever, on the basis of information available to him, the Administrator finds during a period during which a State does not have primary enforcement responsibility for public water systems that a public water system in such State—

“(A) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is not in effect, does not comply with any national primary drinking water regulation in effect under section 300g–1 of this title, or

“(B) for which a variance under section 300g–4(a)(2) or an exemption under section 300g–5(f) of this title is in effect, does not comply with any schedule or other requirement imposed pursuant thereto, the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement or the Administrator shall commence a civil action under subsection (b) of this section.”

Subsec. (c). Pub. L. 104–182, §114(a), amended subsec. (c) generally. Prior to amendment, subsec. (c) related to notice of owner or operator of public water system to persons served, regulations for form, manner, and

1So in original. There probably should be a comma.
frequency of notice, amendment of regulations to provide different types and frequencies of notice, and penalties.

Subsec. (g)(1). Pub. L. 104–182, §113(a)(3)(A), substituted “applicable requirement” for “regulation, schedule, or other requirement” in two places.

Subsec. (g)(2). Pub. L. 104–182, §113(a)(3)(B), substituted “effect, in the case” for “effect until after no-” and struck out “proposed order” and struck out former subsec. (B) which read as follows: “Whenever any civil penalty sought by the Administrator under this paragraph does not exceed a total of $5,000, the penalty shall be assessed by the Administrator after notice and opportunity for a hearing on the record in accordance with section 554 of title 5.”

Subsec. (g)(3)(B). Pub. L. 104–182, §113(a)(3)(C)(i), substituted “subsection for a violation of an applicable requirement exceeds $25,000” for “paragraph exceeds $5,000”.

Subsecs. (h), (i). Pub. L. 104–182, §113(a)(4), added subsecs. (h) and (i).

Subsec. (a)(1)(A). Pub. L. 99–339, §102(a), inserted “and such public water system” after “notify the State” in provisions following cl. (i).

Subsec. (a)(1)(B). Pub. L. 99–339, §102(b)(1), amended subpar. (B), generally, substituting provisions which relate to issuance of an order to public water system to comply with regulations, or commencement of civil action if the State has not commenced appropriate enforcement action for provisions which related to public notice of noncompliance and commencement of civil action by Administrator if State failed to take steps to obtain compliance by public water system.

Subsec. (a)(2). Pub. L. 99–339, §102(b)(2), substituted “the Administrator shall issue an order under subsection (g) of this section requiring the public water system to comply with such regulation or requirement, or the Administrator shall commence a civil action under subsection (b) of this section” for “he may commence a civil action under subsection (b) of this section”.

Subsec. (b). Pub. L. 99–339, §102(c), inserted “, with an order issued under subsection (g) of this section,” before “or with any schedule” and substituted “there has been a violation” for “there has been a willful violation” and “$25,000” for “$5,000”.

Subsec. (c). Pub. L. 99–339, §103, substituted provisions relating to amendment of regulations within fifteen months after June 19, 1986, to provide different types and frequencies of notice based on the differences between violations which are intermittent or continuous, manner and content of notices, notice required to public served by owner or operator of public water system, and civil penalty of $25,000, for provisions relating to form, manner, and frequency of notice based on three month billing period for water bills, notice required to public served by owner or operator of public water system, and civil penalty of $5,000.

Subsec. (g). Pub. L. 99–339, §102(d), added subsec. (g).

1977—Subsec. (c). Pub. L. 95–190 inserted provisions relating to frequency of required notice, and notice respecting contaminant levels, and substituted “issued under this subsection” for “thereunder”.

§300g–4. Variances

(a) Characteristics of raw water sources; specific treatment technique; notice to Administrator, reasons for variance; compliance, enforcement; approval or revision of schedules and revocation of variances; review of variances and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting variances or failing to prescribe schedules; State corrective action; authority of Administrator in a State without primary enforcement responsibility; alternative treatment techniques

Notwithstanding any other provision of this part, variances from national primary drinking water regulations may be granted as follows:

(1)(A) A State which has primary enforcement responsibility for public water systems may grant one or more variances from an applicable national primary drinking water regulation to one or more public water systems within its jurisdiction which, because of characteristics of the raw water sources which are reasonably available to the systems, cannot meet the requirements respecting the maximum contaminant levels of such drinking water regulation. A variance may be issued to a system on condition that the system install the best technology, treatment techniques, or other means, which the Administrator finds are available (taking costs into consideration), and based upon an evaluation satisfactory to the State that indicates that alternative sources of water are not reasonably available to the system. The Administrator shall propose and promulgate his finding of the best available technology, treatment techniques or other means available for each contaminant for purposes of this subsection at the time he proposes and promulgates a maximum contaminant level for each such contaminant. The Administrator’s finding of the best available technology, treatment techniques or other means for purposes of this subsection may vary depending on the number of persons served by the system or for other physical conditions related to engineering feasibility and costs of compliance with maximum contaminant levels as considered appropriate by the Administrator. Before a State may grant a variance under this subparagraph, the State must find that the variance will not result in an unreasonable risk to health. If a State grants a public water system a variance under this subparagraph, the State shall prescribe at the the time the variance is granted, a schedule for—

(i) compliance (including increments of progress) by the public water system with each containment level requirement with respect to which the variance was granted, and

(ii) implementation by the public water system of such additional control measures as the State may require for each contaminant, subject to such contaminant level requirement, during the period ending on the date compliance with such requirement is required.
Before a schedule prescribed by a State pursuant to this subparagraph may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice. A schedule prescribed pursuant to this subparagraph for a public water system granted a variance shall require compliance by the system with each contaminant level requirement with respect to which the variance was granted as expeditiously as practicable (as the State may reasonably determine).

(B) A State which has primary enforcement responsibility for public water systems may grant to one or more public water systems within its jurisdiction one or more variances from any provision of the national primary drinking water regulation which requires the use of a specified treatment technique with respect to a contaminant if the public water system applying for the variance demonstrates to the satisfaction of the State that such treatment technique is not necessary to protect the health of persons because of the nature of the raw water source of such system. A variance granted under this subparagraph shall be conditioned on such monitoring and other requirements as the Administrator may prescribe.

(C) Before a variance proposed to be granted by a State under subparagraph (A) or (B) may take effect, such State shall provide notice and opportunity for public hearing on the proposed variance. A notice given pursuant to the preceding sentence may cover the granting of more than one variance and a hearing held pursuant to such notice shall include each of the variances covered by the notice. The State shall promptly notify the Administrator of all variances granted by it. Such notification shall contain the reason for the variance (and in the case of a variance under subparagraph (A), the basis for the finding required by that subparagraph before the granting of the variance and documentation of the need for the variance.

(D) Each public water system’s variance granted by a State under subparagraph (A) shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to that subparagraph. The requirements of each schedule prescribed by a State pursuant to that subparagraph shall be enforceable by the State under its laws. Any requirement of a schedule on which a variance granted under that subparagraph is conditioned may be enforced under section 300g-3 of this title as if such requirement was part of a national primary drinking water regulation.

(E) Each schedule prescribed by a State pursuant to subparagraph (A) shall be deemed approved by the Administrator unless the variance for which it was prescribed is revoked by the Administrator under subparagraph (G) or the schedule is revised by the Administrator under such subparagraph.

(F) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the variances granted under subparagraph (A) (and schedules prescribed pursuant thereto) and under subparagraph (B) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of variances and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (i) provide information respecting the location of data and other information respecting the variances to be reviewed (including data and other information concerning new scientific matters bearing on such variances), and (ii) advise of the opportunity to submit comments on the variances reviewed and on the need for continuing them. Upon completion of any such review, the Administrator shall publish in the Federal Register the results of his review together with findings responsive to comments submitted in connection with such review.

(G)(i) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting variances under subparagraph (A) or (B) or that in a substantial number of cases the State has failed to prescribe schedules in accordance with subparagraph (A), the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting variances in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the variances and if the requirements applicable to the granting of the variances were complied with. A notice under this clause shall—

(I) identify each public water system with respect to which the finding was made,

(II) specify the reasons for the finding, and

(III) as appropriate, propose revocations of specific variances or propose revised schedules or other requirements for specific public water systems granted variances, or both.

(ii) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to clause (i) of this subparagraph. After a hearing on a notice pursuant to such clause, the Administrator shall (I) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (II) promulgate (with such modifications as he deems appropriate) such variance revocations and revised schedules or other requirements proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to clause (i) of this subparagraph, the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.

(iii) If a State is notified under clause (i) of this subparagraph of a finding of the Adminis-
Enforcement of schedule or other requirement

Any schedule or other requirement on which a variance granted under paragraph (1)(B) or (2) of subsection (a) of this section is conditioned may take effect before the expiration of 90 days following the date of the notice in which the revocation or revised schedule or other requirement was proposed.

(2) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to grant variances in such State as the State would have under paragraph (1) if it had primary enforcement responsibility.

(3) The Administrator may grant a variance from any treatment technique requirement of a national primary drinking water regulation upon a showing by any person that an alternative treatment technique not included in such requirement is at least as efficient in lowering the level of the contaminant with respect to which such requirement was prescribed. A variance under this paragraph shall be conditioned on the use of the alternative treatment technique which is the basis of the variance.

(b) Enforcement of schedule or other requirement

Any schedule or other requirement on which a variance granted under paragraph (1)(B) or (2) of subsection (a) of this section is conditioned may be enforced under section 300g–3 of this title as subsection (a) of this section is made, the State takes corrective action with respect to such variance or schedule or other requirement which the Administrator determines makes his finding inapplicable to such variance or schedule or other requirement, the Administrator shall rescind the application of his finding to that variance on schedule or other requirement. No variance revocation or revised schedule or other requirement may take effect before the expiration of 90 days following the date of the notice in which the revocation or revised schedule or other requirement was proposed.

(2) If a State does not have primary enforcement responsibility for public water systems, the Administrator shall have the same authority to grant variances in such State as the State would have under paragraph (1) if it had primary enforcement responsibility.

(3) The Administrator may grant a variance from any treatment technique requirement of a national primary drinking water regulation upon a showing by any person that an alternative treatment technique not included in such requirement is at least as efficient in lowering the level of the contaminant with respect to which such requirement was prescribed. A variance under this paragraph shall be conditioned on the use of the alternative treatment technique which is the basis of the variance.

(c) Applications for variances; regulations: reasonable time for acting

If an application for a variance under subsection (a) of this section is made, the State receiving the application or the Administrator, as the case may be, shall act upon such application within a reasonable period (as determined under regulations prescribed by the Administrator) after the date of its submission.

(d) "Treatment technique requirement" defined

For purposes of this section, the term "treatment technique requirement" means a requirement in a national primary drinking water regulation which specifies for a contaminant (in accordance with section 300g(c)(ii) of this title) each treatment technique known to the Administrator which leads to a reduction in the level of such contaminant sufficient to satisfy the requirements of section 300g–1(b) of this title.

(e) Small system variances

(1) In general

A State exercising primary enforcement responsibility for public water systems under section 300g–2 of this title (or the Administrator in nonprimacy States) may grant a variance under this subsection for compliance with a requirement specifying a maximum contaminant level or treatment technique contained in a national primary drinking water regulation to—

(A) public water systems serving 3,300 or fewer persons; and

(B) with the approval of the Administrator pursuant to paragraph (9), public water systems serving more than 3,300 persons but fewer than 10,000 persons,

if the variance meets each requirement of this subsection.

(2) Availability of variances

A public water system may receive a variance pursuant to paragraph (1), if—

(A) the Administrator has identified a variance technology under section 300g–1(b)(15) of this title that is applicable to the size and source water quality conditions of the public water system;

(B) the public water system installs, operates, and maintains, in accordance with guidance or regulations issued by the Administrator, such treatment technology, treatment technique, or other means; and

(C) the State in which the system is located determines that the conditions of paragraph (3) are met.

(3) Conditions for granting variances

A variance under this subsection shall be available only to a system—

(A) that cannot afford to comply, in accordance with affordability criteria established by the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title), with a national primary drinking water regulation, including compliance through—

(i) treatment;

(ii) alternative source of water supply; or

(iii) restructuring or consolidation (unless the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) makes a written determination that restructuring or consolidation is not practicable); and

(B) for which the Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) determines that the terms of the variance ensure adequate protection of human health, considering the quality of the source water for the system and the removal efficiencies and expected useful life of the treatment technology required by the variance.

(4) Compliance schedules

A variance granted under this subsection shall require compliance with the conditions of the variance not later than 3 years after the date on which the variance is granted, except that the Administrator (or the State in the case of a State that has primary enforcement
responsibility under section 300g–2 of this title) may allow up to 2 additional years to comply with a variance technology, secure an alternative source of water, restructure or consolidate if the Administrator (or the State) determines that additional time is necessary for capital improvements, or to allow for financial assistance provided pursuant to section 300j–12 of this title or any other Federal or State program.

(5) Duration of variances

The Administrator (or the State in the case of a State that has primary enforcement responsibility under section 300g–2 of this title) shall review each variance granted under this subsection not less often than every 5 years after the compliance date established in the variance to determine whether the system remains eligible for the variance and is conforming to each condition of the variance.

(6) Ineligibility for variances

A variance shall not be available under this subsection for—

(A) any maximum contaminant level or treatment technique for a contaminant with respect to which a national primary drinking water regulation was promulgated prior to January 1, 1986; or

(B) a national primary drinking water regulation for a microbial contaminant (including a bacterium, virus, or other organism) or an indicator or treatment technique for a microbial contaminant.

(7) Regulations and guidance

(A) In general

Not later than 2 years after August 6, 1996, and in consultation with the States, the Administrator shall promulgate regulations for variances to be granted under this subsection. The regulations shall, at a minimum, specify:

(i) procedures to be used by the Administrator or a State to grant or deny variances, including requirements for notifying the Administrator and consumers of the public water system that a variance is proposed to be granted (including information regarding the contaminant and variance) and requirements for a public hearing on the variance before the variance is granted;

(ii) requirements for the installation and proper operation of variance technology that is identified (pursuant to section 300g–1(b)(15) of this title) for small systems and the financial and technical capability to operate the treatment system, including operator training and certification;

(iii) eligibility criteria for a variance for each national primary drinking water regulation, including requirements for the quality of the source water (pursuant to section 300g–1(b)(15)(A) of this title); and

(iv) information requirements for variance applications.

(B) Affordability criteria

Not later than 18 months after August 6, 1996, the Administrator, in consultation with the States and the Rural Utilities Service of the Department of Agriculture, shall publish information to assist the States in developing affordability criteria. The affordability criteria shall be reviewed by the States not less often than every 5 years to determine if changes are needed to the criteria.

(8) Review by the Administrator

(A) In general

The Administrator shall periodically review the program of each State that has primary enforcement responsibility for public water systems under section 300g–2 of this title with respect to variances to determine whether the variances granted by the State comply with the requirements of this subsection. With respect to affordability, the determination of the Administrator shall be limited to whether the variances granted by the State comply with the affordability criteria developed by the State.

(B) Notice and publication

If the Administrator determines that variances granted by a State are not in compliance with affordability criteria developed by the State, the Administrator shall notify the State in writing of the deficiencies and make public the determination.

(9) Approval of variances

A State proposing to grant a variance under this subsection to a public water system serving more than 3,300 and fewer than 10,000 persons shall submit the variance to the Administrator for review and approval prior to the issuance of the variance. The Administrator shall approve the variance if it meets each of the requirements of this subsection. The Administrator shall approve or disapprove the variance within 90 days. If the Administrator disapproves a variance under this paragraph, the Administrator shall notify the State in writing of the deficiencies and variance may be resubmitted with modifications to address the objections stated by the Administrator.

(10) Objections to variances

(A) By the Administrator

The Administrator may review and object to any variance proposed to be granted by a State, if the objection is communicated to the State not later than 90 days after the State proposes to grant the variance. If the Administrator objects to the granting of a variance, the Administrator shall notify the State in writing of each basis for the objection and propose a modification to the variance to resolve the concerns of the Administrator. The State shall make the recommended modification or respond in writing to each objection. If the State issues the variance without resolving the concerns of the Administrator, the Administrator may overturn the State decision to grant the variance if the Administrator determines that the State decision does not comply with this subsection.
(B) Petition by consumers

Not later than 30 days after a State exercising primary enforcement responsibility for public water systems under section 300g-2 of this title proposes to grant a variance for a public water system, any person served by the system may petition the Administrator to object to the granting of a variance. The Administrator shall respond to the petition and determine whether to object to the variance under subparagraph (A) not later than 60 days after the receipt of the petition.

(C) Timing

No variance shall be granted by a State until the later of the following:

1. 90 days after the State proposes to grant a variance.
2. If the Administrator objects to the variance, the date on which the State makes the recommended modifications or responds in writing to each objection.

AMENDMENTS

1986—Pub. L. 99–339, title I, § 104(4), struck out provisions relating to proposal and promulgation by Administrator of a finding on best available technology, treatment techniques or other means available for each contaminant level and treatment technique requirement, during the period ending on the date compliance with such requirement is required.

Before a schedule prescribed by a State pursuant to this subsection may take effect, the State shall provide notice and opportunity for a public hearing on the schedule. A notice given pursuant to the preceding sentence may cover the prescribing of more than one such schedule and a hearing held pursuant to such notice shall include each of the schedules covered by the notice.

(2)(A) A schedule prescribed pursuant to this subsection for a public water system granted an exemption under subsection (a) of this section shall require compliance by the system with each contaminant level and treatment technique requirement with respect to which the exemption was granted, and

(b) Compliance schedule and implementation of control measures; notice and hearing; dates for compliance with schedule; compliance, enforcement; approval or revision of schedules and revocation of exemptions

(1) If a State grants a public water system an exemption under subsection (a) of this section, the State shall prescribe, at the time the exemption is granted, a schedule for:

A. compliance (including increments of progress or measures to develop an alternative source of water supply) by the public water system with each contaminant level requirement or treatment technique requirement with respect to which the exemption was granted, and

B. implementation by the public water system of such control measures as the State may require for each contaminant, subject to such contaminant level requirement or treatment technique requirement, during the period ending on the date compliance with such requirement is required.

§ 300g–5. Exemptions

(a) Requisite findings

A State which has primary enforcement responsibility may exempt any public water system within the State’s jurisdiction from any requirement respecting a maximum contaminant level or any treatment technique requirement, or from both, of an applicable national primary drinking water regulation upon a finding that—

1. due to compelling factors (which may include economic factors, including qualification of the public water system as a system serving a disadvantaged community pursuant to section 300j–12(d) of this title), the public water system is unable to comply with such contaminant level or treatment technique requirement, or to implement measures to develop an alternative source of water supply

2. the public water system was in operation on the effective date of such contaminant level or treatment technique requirement, or, for a system that was not in operation by that date, only if no reasonable alternative source of drinking water is available to such new system,

3. the granting of the exemption will not result in an unreasonable risk to health; 1 and

4. management or restructuring changes (or both) cannot reasonably be made that will result in compliance with this subchapter or, if compliance cannot be achieved, improve the quality of the drinking water.

(b) Compliance schedule and implementation of control measures; notice and hearing; dates for compliance with schedule; compliance, enforcement; approval or revision of schedules and revocation of exemptions

1. So in original. The semicolon probably should be a comma.
(ii) in the case of a system which needs financial assistance for the necessary improvements, the system has entered into an agreement to obtain such financial assistance or assistance pursuant to section 3001–12 of this title or any other Federal or State program is reasonably likely to be available within the period of the exemption; or

(iii) the system has entered into an enforceable agreement to become a part of a regional public water system; and

the system is taking all practicable steps to meet the standard.

(C) In the case of a system which does not serve more than a population of 3,300 and which needs financial assistance for the necessary improvements, an exemption granted under clause (i) or (ii) of subparagraph (B) may be renewed for one or more additional 2-year periods, but not to exceed a total of 6 years, if the system establishes that it is taking all practicable steps to meet the requirements of subparagraph (B).

(D) LIMITATION.—A public water system may not receive an exemption under this section if the system was granted a variance under section 300g–4(e) of this title.

(3) Each public water system's exemption granted by a State under subsection (a) of this section shall be conditioned by the State upon compliance by the public water system with the schedule prescribed by the State pursuant to this subsection. The requirements of each schedule prescribed by a State pursuant to this subsection shall be enforceable by the State under its laws. Any requirement of a schedule on which an exemption granted under this section is conditioned may be enforced under section 300g–3 of this title as if such requirement was part of a national primary drinking water regulation.

(4) Each schedule prescribed by a State pursuant to this subsection shall be deemed approved by the Administrator unless the exemption for which it was prescribed is revoked by the Administrator under subsection (d)(2) of this section or the schedule is revised by the Administrator under such subsection.

(e) Notice to Administrator; reasons for exemption

Each State which grants an exemption under subsection (a) of this section shall promptly notify the Administrator of the granting of such exemption. Such notification shall contain the reasons for the exemption (including the basis for the finding required by subsection (a)(3) of this section before the exemption may be granted) and document the need for the exemption.

(f) Review of exemptions and schedules; publication in Federal Register, notice and results of review; notice to State; considerations respecting abuse of discretion in granting exemptions or failing to prescribe schedules; State corrective action

(1) Not later than 18 months after the effective date of the interim national primary drinking water regulations the Administrator shall complete a comprehensive review of the exemptions granted (and schedules prescribed pursuant thereto) by the States during the one-year period beginning on such effective date. The Administrator shall conduct such subsequent reviews of exemptions and schedules as he deems necessary to carry out the purposes of this subchapter, but each subsequent review shall be completed within each 3-year period following the completion of the first review under this subparagraph. Before conducting any review under this subparagraph, the Administrator shall publish notice of the proposed review in the Federal Register. Such notice shall (A) provide information respecting the location of data and other information respecting the exemptions to be reviewed (including data and other information concerning new scientific matters bearing on such exemptions), and (B) advise of the opportunity to submit comments on the exemptions reviewed and on the findings of the Administrator. Upon completion of any such review, the Administrator shall publish in the Federal Register the results of his review, together with findings responsive to comments submitted in connection with such review.

(2)(A) If the Administrator finds that a State has, in a substantial number of instances, abused its discretion in granting exemptions under subsection (a) of this section or failed to prescribe schedules in accordance with subsection (b) of this section, the Administrator shall notify the State of his findings. In determining if a State has abused its discretion in granting exemptions in a substantial number of instances, the Administrator shall consider the number of persons who are affected by the exemptions and if the requirements applicable to the granting of the exemptions were complied with. A notice under this subparagraph shall—

(i) identify each exempt public water system with respect to which the finding was made,

(ii) specify the reasons for the finding, and

(iii) as appropriate, propose revocations of specific exemptions or propose revised schedules for specific exempt public water systems, or both.

(B) The Administrator shall provide reasonable notice and public hearing on the provisions of each notice given pursuant to subparagraph (A). After a hearing on notice pursuant to paragraph (A), the Administrator shall (i) rescind the finding for which the notice was given and promptly notify the State of such rescission, or (ii) promulgate (with such modifications as he deems appropriate) such exemption revocations and revised schedules proposed in such notice as he deems appropriate. Not later than 180 days after the date a notice is given pursuant to subparagraph (A), the Administrator shall complete the hearing on the notice and take the action required by the preceding sentence.

(C) If a State is notified under subparagraph (A) of a finding of the Administrator made with respect to an exemption granted a public water system within that State or to a schedule prescribed pursuant to such an exemption and if before a revocation of such exemption or a revision of such schedule promulgated by the Administrator takes effect the State takes corrective action with respect to such exemption or schedule which the Administrator determines makes his finding inapplicable to such exemption or schedule, the Administrator shall re-
scind the application of his finding to that ex-
emption or schedule. No exemption revocation
or revised schedule may take effect before the
expiration of 90 days following the date of the
notice in which the revocation or revised sched-
ule was proposed.

(e) "Treatment technique requirement" defined

For purposes of this section, the term "treat-
ment technique requirement" means a require-
ment in a national primary drinking water regu-
lation which specifies for a contaminant (in ac-
cordance with section 300F(1)(C)(ii) of this title)
each treatment technique known to the Admin-
istrator which leads to a reduction in the level
of such contaminant sufficient to satisfy the re-
quirements of section 300g–1(b) of this title.

(f) Authority of Administrator in a State without
primary enforcement responsibility

If a State does not have primary enforcement
responsibility for public water systems, the Ad-
ministrator shall have the same authority to ex-
empt public water systems in such State from
maximum contaminant level requirements and
treatment technique requirements under the
same conditions and in the same manner as the
State would be authorized to grant exemptions
under this section if it had primary enforcement
responsibility.

(g) Applications for exemptions; regulations; rea-
sonable time for acting

If an application for an exemption under this
section is made, the State receiving the applica-
tion or the Administrator, as the case may be,
shall act upon such application within a reason-
able period (as determined under regulations
prescribed by the Administrator) after the date
of its submission.

AMENDMENTS

1996—Subsec. (a)(1). Pub. L. 104–182, § 117(a)(1), inserted "(1) including qualification of the public water system as a system serving a disadvantaged com-
munity pursuant to section 300–12(d) of this title" after "(which may include economic factors" and "or to im-
plement measures to develop an alternative source of water supply," after "treatment technique require-
ment,"

tuted "not later than 12 months after June 19, 1986" for "not later than January 1, 1984".

tuted "other than a regulation referred to in section 300g–1(a) of this title, 12 months after the date of the
issuance of the exemption" for "not later than seven years after the date such requirement takes effect".

read as follows: "Notwithstanding clauses (i) and (ii) of subparagraph (A) of this paragraph, the final date for
compliance prescribed in a schedule prescribed pursuant to this subsection for an exemption granted for a
public water system which (as determined by the State granting the exemption) has entered into an enforce-
able agreement to become a part of a regional public water system shall—

(i) in the case of a schedule prescribed for an ex-
emption granted with respect to a contaminant level or treatment technique requirement prescribed by re-
vised national primary drinking water regulations, be not later than January 1, 1986; and

(ii) in the case of a schedule prescribed for an ex-
emption granted with respect to a contaminant level or treatment technique requirement prescribed by re-
vised national primary drinking water regulations, be not later than nine years after such requirement takes effect."
§ 300g–6. Prohibition on use of lead pipes, solder, and flux

(a) In general

(1) Prohibitions

(A) In general

No person may use any pipe, any pipe or plumbing fitting or fixture, any solder, or any flux, after June 19, 1986, in the installation or repair of—

(i) any public water system; or

(ii) any plumbing in a residential or nonresidential facility providing water for human consumption,

that is not lead free (within the meaning of subsection (d) of this section).

(B) Leaded joints

Subparagraph (A) shall not apply to leaded joints necessary for the repair of cast iron pipes.

(2) Public notice requirements

(A) In general

Each owner or operator of a public water system shall identify and provide notice to persons that may be affected by lead contamination of their drinking water where such contamination results from either or both of the following:

(i) The lead content in the construction materials of the public water distribution system,

(ii) Corrosivity of the water supply sufficient to cause leaching of lead.

The notice shall be provided in such manner and form as may be reasonably required by the Administrator. Notice under this paragraph shall be provided notwithstanding the absence of a violation of any national drinking water standard.

(B) Contents of notice

Notice under this paragraph shall provide a clear and readily understandable explanation of—

(i) the potential sources of lead in the drinking water,

(ii) potential adverse health effects,

(iii) reasonably available methods of mitigating known or potential lead content in drinking water,

(iv) any steps the system is taking to mitigate lead content in drinking water, and

(v) the necessity for seeking alternative water supplies, if any.

(3) Unlawful acts

Effective 2 years after August 6, 1996, it shall be unlawful—

(A) for any person to introduce into commerce any pipe, or any pipe or plumbing fitting or fixture, that is not lead free, except for a pipe that is used in manufacturing or industrial processing;

(B) for any person engaged in the business of selling plumbing supplies, except manufacturers, to sell solder or flux that is not lead free; or

(C) for any person to introduce into commerce any solder or flux that is not lead free unless the solder or flux bears a prominent label stating that it is illegal to use the solder or flux in the installation or repair of any plumbing providing water for human consumption.

(b) State enforcement

(1) Enforcement of prohibition

The requirements of subsection (a)(1) of this section shall be enforced in all States effective 24 months after June 19, 1986. States shall enforce such requirements through State or local plumbing codes, or such other means of enforcement as the State may determine to be appropriate.

(2) Enforcement of public notice requirements

The requirements of subsection (a)(2) of this section shall apply in all States effective 24 months after June 19, 1986.

(c) Penalties

If the Administrator determines that a State is not enforcing the requirements of subsection (a) of this section as required pursuant to subsection (b) of this section, the Administrator may withhold up to 5 percent of Federal funds available to that State for State program grants under section 300j-2(a) of this title.

(d) “Lead free” defined

For purposes of this section, the term “lead free”—

(1) when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead;

(2) when used with respect to pipes and pipe fittings refers to pipes and pipe fittings containing not more than 0.0 percent lead; and

(3) when used with respect to plumbing fittings and fixtures, refers to plumbing fittings and fixtures in compliance with standards established in accordance with subsection (e) of this section.

(e) Plumbing fittings and fixtures

(1) In general

The Administrator shall provide accurate and timely technical information and assistance to qualified third-party certifiers in the development of voluntary standards and testing protocols for the leaching of lead from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion.

(2) Standards

(A) In general

If a voluntary standard for the leaching of lead is not established by the date that is 1 year after August 6, 1996, the Administrator shall, not later than 2 years after August 6, 1996, promulgate regulations setting a health-effects-based performance standard establishing maximum leaching levels from new plumbing fittings and fixtures that are intended by the manufacturer to dispense water for human ingestion. The standard
shall become effective on the date that is 5 years after the date of promulgation of the standard.

(B) Alternative requirement

If regulations are required to be promulgated under subparagraph (A) and have not been promulgated by the date that is 5 years after August 6, 1996, no person may import, manufacture, process, or distribute in commerce a new plumbing fitting or fixture, intended by the manufacturer to dispense water for human ingestion, that contains more than 4 percent lead by dry weight.

(71) Definition of lead free

For purposes of this section, the term “lead free” means—

(A) not containing more than 0.2 percent lead when used with respect to solder and flux; and

(B) not more than a weighted average of 0.25 percent lead when used with respect to the wetted surfaces of pipes, pipe fittings, plumbing fittings, and fixtures.

(2) Calculation

The weighted average lead content of a pipe, pipe fitting, plumbing fitting, or fixture shall be calculated by using the following formula: For each wetted component, the percentage of lead in the component shall be multiplied by the ratio of the wetted surface area of that component to the total wetted surface area of the entire product to arrive at the weighted percentage of lead of the component. The weighted percentage of lead of each wetted component shall be added together, and the sum of these weighted percentages shall constitute the weighted average lead content of the product. The lead content of the material used to produce wetted components shall be used to determine compliance with paragraph (1)(B). For lead content of materials that are provided as a range, the maximum content of the range shall be used.

AMENDMENTS

Subsec. (a)(1). Pub. L. 104–182, §118(1), substituted “Prohibitions” for “Prohibition” in heading and amended text generally. Prior to amendment, text read as follows: “Any pipe, solder, or flux, which is used after June 19, 1986, in the installation or repair of—

(A) any public water system, or

(B) any plumbing in a residential or nonresidential facility providing water for human consumption which is connected to a public water system, shall be lead free (within the meaning of subsection (d) of this section). This paragraph shall not apply to leaded joints necessary for the repair of cast iron pipes.”

EFFECTIVE DATE OF 2011 AMENDMENT

Pub. L. 111–380, §2(b), Jan. 4, 2011, 124 Stat. 4132, provided that: “The provisions of subsections (a)(4) and (d) of section 1417 of the Safe Drinking Water Act [42 U.S.C. 300g–6(a)(4), (d)], as added by this section, apply beginning on the day that is 36 months after the date of enactment of this Act [Jan. 4, 2011].”

NOTIFICATION TO STATES

Section 109(b) of Pub. L. 99–339 provided that: “The Administrator of the Environmental Protection Agency shall notify all States with respect to the requirements of section 1417 of the Public Health Service Act [this section] within 90 days after the enactment of this Act [June 19, 1986].”

BAN ON LEAD WATER PIPES, SOLDER, AND FLUX IN VA AND HUD INSURED OR ASSISTED PROPERTY

“(1) PROHIBITION.—The Secretary of Housing and Urban Development and the Secretary of Veterans Affairs may not insure or guarantee a mortgage or furnish assistance with respect to newly constructed residential property which contains a potable water system unless such system uses only lead free pipe, solder, and flux.

“(2) DEFINITION OF LEAD FREE.—For purposes of paragraph (1) the term ‘lead free’—

“A. when used with respect to solders and flux refers to solders and flux containing not more than 0.2 percent lead, and

“B. when used with respect to pipes and pipe fittings contains not more than 8.0 percent lead.

“(3) EFFECTIVE DATE.—Paragraph (1) shall become effective 24 months after the enactment of this Act [June 19, 1986].”

§ 300g–7. Monitoring of contaminants

(a) Interim monitoring relief authority

(1) In general

A State exercising primary enforcement responsibility for public water systems may modify the monitoring requirements for any regulated or unregulated contaminants for which monitoring is required other than mi-
crobial contaminants (or indicators thereof), disinfectants and disinfection byproducts or corrosion byproducts for an interim period to provide that any public water system serving 10,000 persons or fewer shall not be required to conduct additional quarterly monitoring during an interim relief period for such contaminants if—

(A) monitoring, conducted at the beginning of the period for the contaminant concerned, fails to detect the presence of the contaminant in the ground or surface water supplying the public water system; and

(B) the State, considering the hydrogeology of the area and other relevant factors, determines in writing that the contaminant is unlikely to be detected by further monitoring during such period.

(2) Termination; timing of monitoring

The interim relief period referred to in paragraph (1) shall terminate when permanent monitoring relief is adopted and approved for such State, or at the end of 36 months after August 6, 1996, whichever comes first. In order to serve as a basis for interim relief, the monitoring conducted at the beginning of the period must occur at the time determined by the State to be the time of the public water system’s greatest vulnerability to the contaminant concerned in the relevant ground or surface water, taking into account in the case of pesticides the time of application of the pesticide for the source water area and the travel time for the pesticide to reach such waters and taking into account, in the case of other contaminants, seasonality of precipitation and contaminant travel time.

(b) Permanent monitoring relief authority

(1) In general

Each State exercising primary enforcement responsibility for public water systems under this subchapter and having an approved source water assessment program may adopt, in accordance with guidance published by the Administrator, tailored alternative monitoring requirements for public water systems in such State (as an alternative to the monitoring requirements for chemical contaminants set forth in the applicable national primary drinking water regulations) where the State concludes that (based on data available at the time of adoption concerning susceptibility, use, occurrence, or wellhead protection, or from the State’s drinking water source water assessment program) such alternative monitoring would provide assurance that it complies with the Administrator’s guidelines. The State program must be adequate to assure compliance with, and enforcement of, applicable national primary drinking water regulations. Alternative monitoring shall not apply to regulated microbiological contaminants (or indicators thereof), disinfectants and disinfection byproducts, or corrosion byproducts. The preceding sentence is not intended to limit other authority of the Administrator under other provisions of this subchapter to grant monitoring flexibility.

(2) Guidelines

(A) In general

The Administrator shall issue, after notice and comment and at the same time as guidelines are issued for source water assessment under section 300–13 of this title, guidelines for States to follow in proposing alternative monitoring requirements under paragraph (1) for chemical contaminants. The Administrator shall publish such guidelines in the Federal Register. The guidelines shall assure that the public health will be protected from drinking water contamination. The guidelines shall require that a State alternative monitoring program apply on a contaminant-by-contaminant basis, to be eligible for such alternative monitoring program, a public water system must show the State that the contaminant is not present in the drinking water supply or, if present, it is reliably and consistently below the maximum contaminant level.

(B) Definition

For purposes of subparagraph (A), the phrase “reliably and consistently below the maximum contaminant level” means that, although contaminants have been detected in a water supply, the State has sufficient knowledge of the contamination source and extent of contamination to predict that the maximum contaminant level will not be exceeded. In determining that a contaminant is reliably and consistently below the maximum contaminant level, States shall consider the quality and completeness of data, the length of time covered and the volatility or stability of monitoring results during that time, and the probability of such results to the maximum contaminant level. Wide variations in the analytical results, or analytical results close to the maximum contaminant level, shall not be considered to be reliably and consistently below the maximum contaminant level.

(3) Effect of detection of contaminants

The guidelines issued by the Administrator under paragraph (2) shall require that if, after the monitoring program is in effect and operating, a contaminant covered by the alternative monitoring program is detected at levels at or above the maximum contaminant level or is no longer reliably or consistently below the maximum contaminant level, the public water system must either—

(A) demonstrate that the contamination source has been removed or that other action has been taken to eliminate the contamination problem; or

(B) test for the detected contaminant pursuant to the applicable national primary drinking water regulation.

(4) States not exercising primary enforcement responsibility

The Governor of any State not exercising primary enforcement responsibility under section 300g–2 of this title on August 6, 1996, may submit to the Administrator a request that the Administrator modify the monitoring re-
requirements established by the Administrator and applicable to public water systems in that State. After consultation with the Governor, the Administrator shall modify the requirements for public water systems in that State if the request of the Governor is in accordance with each of the requirements of this subsection that apply to alternative monitoring requirements established by States that have primary enforcement responsibility. A decision by the Administrator to approve a request under this clause shall be for a period of 3 years and may subsequently be extended for periods of 5 years.

(c) Treatment as NPDWR

All monitoring relief granted by a State to a public water system for a regulated contaminant under subsection (a) or (b) of this section shall be treated as part of the national primary drinking water regulation for that contaminant.

(d) Other monitoring relief

Nothing in this section shall be construed to affect the authority of the States under applicable national primary drinking water regulations to alter monitoring requirements through waivers or other existing authorities. The Administrator shall periodically review and, as appropriate, revise such authorities.

(July 1, 1944, ch. 373, title XIV, § 1418, as added Pub. L. 104–182, title I, § 125(b), Aug. 6, 1996, 110 Stat. 1654.)

§ 300g–8. Operator certification

(a) Guidelines

Not later than 30 months after August 6, 1996, and in cooperation with the States, the Administrator shall publish guidelines in the Federal Register, after notice and opportunity for comment from interested persons, including States and public water systems, specifying minimum standards for certification (and recertification) of the operators of community and nontransient noncommunity public water systems. Such guidelines shall take into account existing State programs, the complexity of the system, and other factors aimed at providing an effective program at reasonable cost to States and public water systems, taking into account the size of the system.

(b) State programs

Beginning 2 years after the date on which the Administrator publishes guidelines under subsection (a) of this section, the Administrator shall withhold 20 percent of the funds a State is otherwise entitled to receive under section 300j–12 of this title unless the State has adopted and is implementing a program for the certification of operators of community and nontransient noncommunity public water systems that meets the requirements of the guidelines published pursuant to subsection (a) of this section or that has been submitted in compliance with subsection (c) of this section and that has not been disapproved.

(c) Existing programs

For any State exercising primary enforcement responsibility for public water systems or any other State which has an operator certification program, the guidelines under subsection (a) of this section shall allow the State to enforce such program in lieu of the guidelines under subsection (a) of this section if the State submits the program to the Administrator within 18 months after the publication of the guidelines unless the Administrator determines (within 9 months after the State submits the program to the Administrator) that such program is not substantially equivalent to such guidelines. In making this determination, an existing State program shall be presumed to be substantially equivalent to the guidelines, notwithstanding program differences, based on the size of systems or the quality of source water, providing the State program meets the overall public health objectives of the guidelines. If disapproved, the program may be resubmitted within 6 months after receipt of notice of disapproval.

(d) Expense reimbursement

(1) In general

The Administrator shall provide reimbursement for the costs of training, including an appropriate per diem for unsalaried operators, and certification for persons operating systems serving 3,300 persons or fewer that are required to undergo training pursuant to this section.

(2) State grants

The reimbursement shall be provided through grants to States with each State receiving an amount sufficient to cover the reasonable costs for training all such operators in the State, as determined by the Administrator, to the extent required by this section. Grants received by a State pursuant to this paragraph shall first be used to provide reimbursement for training and certification costs of persons operating systems serving 3,300 persons or fewer. If a State has reimbursed all such costs, the State may, after notice to the Administrator, use any remaining funds from the grant for any of the other purposes authorized for grants under section 300j–12 of this title.

(3) Authorization

There are authorized to be appropriated to the Administrator to provide grants for reimbursement under this section $30,000,000 for each of fiscal years 1997 through 2003.

(4) Reservation

If the appropriation made pursuant to paragraph (3) for any fiscal year is not sufficient to satisfy the requirements of paragraph (1), the Administrator shall, prior to any other allocation or reservation, reserve such sums as necessary from the funds appropriated pursuant to section 300j–12(m) of this title to provide reimbursement for the training and certification costs mandated by this subsection.

(July 1, 1944, ch. 373, title XIV, § 1419, as added Pub. L. 104–182, title I, § 123, Aug. 6, 1996, 110 Stat. 1652.)
§ 300g–9. Capacity development

(a) State authority for new systems

A State shall receive only 80 percent of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds) unless the State has obtained the legal authority or other means to ensure that all new community water systems and new nontransient, noncommunity water systems commencing operation after October 1, 1999, demonstrate technical, managerial, and financial capacity with respect to each national primary drinking water regulation in effect, or likely to be in effect, on the date of commencement of operations.

(b) Systems in significant noncompliance

(1) List

Beginning not later than 1 year after August 6, 1996, each State shall prepare, periodically update, and submit to the Administrator a list of community water systems and nontransient, noncommunity water systems that have a history of significant noncompliance with this subchapter (as defined in guidelines issued prior to August 6, 1996, or any revisions of the guidelines that have been made in consultation with the States) and, to the extent practicable, the reasons for noncompliance.

(2) Report

Not later than 5 years after August 6, 1996, and as part of the capacity development strategy of the State, each State shall report to the Administrator on the success of enforcement mechanisms and initial capacity development efforts in assisting the public water systems listed under paragraph (1) to improve technical, managerial, and financial capacity.

(c) Capacity development strategy

(1) In general

Beginning 4 years after August 6, 1996, a State shall receive only—

(A) 90 percent in fiscal year 2001;
(B) 85 percent in fiscal year 2002; and
(C) 80 percent in each subsequent fiscal year,

of the allotment that the State is otherwise entitled to receive under section 300j–12 of this title (relating to State loan funds), unless the State is developing and implementing a strategy to assist public water systems in acquiring and maintaining technical, managerial, and financial capacity.

(2) Content

In preparing the capacity development strategy, the State shall consider, solicit public comment on, and include as appropriate—

(A) the methods or criteria that the State will use to identify and prioritize the public

water systems most in need of improving technical, managerial, and financial capacity;
(B) a description of the institutional, regulatory, financial, tax, or legal factors at the Federal, State, or local level that encourage or impair capacity development;
(C) a description of how the State will use the authorities and resources of this subchapter or other means to—

(i) assist public water systems in complying with national primary drinking water regulations;
(ii) encourage the development of partnerships between public water systems to enhance the technical, managerial, and financial capacity of the systems; and
(iii) assist public water systems in the training and certification of operators;
(D) a description of how the State will establish a baseline and measure improvements in capacity with respect to national primary drinking water regulations and State drinking water law; and
(E) an identification of the persons that have an interest in and are involved in the development and implementation of the capacity development strategy (including all appropriate agencies of Federal, State, and local governments, private and nonprofit public water systems, and public water system customers).

(3) Report

Not later than 2 years after the date on which a State first adopts a capacity development strategy under this subsection, and every 3 years thereafter, the head of the State agency that has primary responsibility to carry out this subchapter in the State shall submit to the Governor a report that shall also be available to the public on the efficacy of the strategy and progress made toward improving the technical, managerial, and financial capacity of public water systems in the State.

(4) Review

The decisions of the State under this section regarding any particular public water system are not subject to review by the Administrator and may not serve as the basis for withholding funds under section 300j–12 of this title.

(d) Federal assistance

(1) In general

The Administrator shall support the States in developing capacity development strategies.

(2) Informational assistance

(A) In general

Not later than 180 days after August 6, 1996, the Administrator shall—

(i) conduct a review of State capacity development efforts in existence on August 6, 1996, and publish information to assist States and public water systems in capacity development efforts; and
(ii) initiate a partnership with States, public water systems, and the public to de-
develop information for States on recommended operator certification requirements.

(B) Publication of information

The Administrator shall publish the information developed through the partnership under subparagraph (A)(ii) not later than 18 months after August 6, 1996.

(3) Promulgation of drinking water regulations

In promulgating a national primary drinking water regulation, the Administrator shall include an analysis of the likely effect of compliance with the regulation on the technical, financial, and managerial capacity of public water systems.

(4) Guidance for new systems

Not later than 2 years after August 6, 1996, the Administrator shall publish guidance developed in consultation with the States describing legal authorities and other means to ensure that all new community water systems and new nontransient, noncommunity water systems demonstrate technical, managerial, and financial capacity with respect to national primary drinking water regulations.

(e) Variances and exemptions

Based on information obtained under subsection (c)(3) of this section, the Administrator shall, as appropriate, modify regulations concerning variances and exemptions for small public water systems to ensure flexibility in the use of the variances and exemptions. Nothing in this subsection shall be interpreted, construed, or applied to affect or alter the requirements of section 300g–4 of this title.

(f) Small public water systems technology assistance centers

(1) Grant program

The Administrator is authorized to make grants to institutions of higher learning to establish and operate small public water system technology assistance centers in the United States.

(2) Responsibilities of the centers

The responsibilities of the small public water system technology assistance centers established under this subsection shall include the conduct of training and technical assistance relating to the information, performance, and technical needs of small public water systems or public water systems that serve Indian Tribes.

(3) Applications

Any institution of higher learning interested in receiving a grant under this subsection shall submit to the Administrator an application in such form and containing such information as the Administrator may require by regulation.

(4) Selection criteria

The Administrator shall select recipients of grants under this subsection on the basis of the following criteria:

(A) The small public water system technology assistance center shall be located in a State that is representative of the needs of the region in which the State is located for addressing the drinking water needs of small and rural communities or Indian Tribes.

(B) The grant recipient shall be located in a region that has experienced problems, or may reasonably be foreseen to experience problems, with small and rural public water systems.

(C) The grant recipient shall have access to expertise in small public water system technology management.

(D) The grant recipient shall have the capability to disseminate the results of small public water system technology and training programs.

(E) The projects that the grant recipient proposes to carry out under the grant are necessary and appropriate.

(F) The grant recipient has regional support beyond the host institution.

(5) Consortia of States

At least 2 of the grants under this subsection shall be made to consortia of States with low population densities.

(6) Authorization of appropriations

There are authorized to be appropriated to make grants under this subsection $2,000,000 for each of the fiscal years 1997 through 1999, and $5,000,000 for each of the fiscal years 2000 through 2003.

(g) Environmental finance centers

(1) In general

The Administrator shall provide initial funding for one or more university-based environmental finance centers for activities that provide technical assistance to State and local officials in developing the capacity of public water systems. Any such funds shall be used only for activities that are directly related to this subchapter.

(2) National capacity development clearinghouse

The Administrator shall establish a national public water system capacity development clearinghouse to receive and disseminate information with respect to developing, improving, and maintaining financial and managerial capacity at public water systems. The Administrator shall ensure that the clearinghouse does not duplicate other federally supported clearinghouse activities.

(3) Capacity development techniques

The Administrator may request an environmental finance center funded under paragraph (1) to develop and test managerial, financial, and institutional techniques for capacity development. The techniques may include capacity assessment methodologies, manual and computer based public water system rate models and capital planning models, public water system consolidation procedures, and regionalization models.

(4) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection $1,500,000 for each of the fiscal years 1997 through 2003.
§ 300h. Regulations for State programs

(a) Publication of proposed regulations; promulgation; amendments; public hearings; administrative consultations

(1) The Administrator shall publish proposed regulations for State underground injection control programs within 180 days after December 16, 1974. Within 180 days after publication of such proposed regulations, he shall promulgate such regulations with such modifications as he deems appropriate. Any regulation under this subsection may be amended from time to time.

(2) Any regulation under this section shall be proposed and promulgated in accordance with section 533 of title 5 (relating to rulemaking), except that the Administrator shall provide opportunity for public hearing prior to promulgation of such regulations. In proposing and promulgating regulations under this section, the Administrator shall consult with the Secretary, the National Drinking Water Advisory Council, and other appropriate Federal entities and with interested State entities.

(b) Minimum requirements; restrictions

(1) Regulations under subsection (a) of this section for State underground injection control programs shall contain minimum requirements for effective programs to prevent underground injection which endangers drinking water sources within the meaning of subsection (d)(2) of this section. Such regulations shall require that a State program, in order to be approved under section 300h–1 of this title—

(A) shall prohibit, effective on the date on which the applicable underground injection control program takes effect, any underground injection in such State which is not authorized by a permit issued by the State (except that the regulations may permit a State to authorize underground injection by rule);

(B) shall require (i) in the case of a program which provides for authorization of underground injection by permit, that the applicant for the permit to inject must satisfy the State that the underground injection will not endanger drinking water sources, and (ii) in the case of a program which provides for such an authorization by rule, that no rule may be promulgated which authorizes any underground injection which endangers drinking water sources;

(C) shall include inspection, monitoring, recordkeeping, and reporting requirements; and

(D) shall apply (i) as prescribed by section 300j–6(b) (1) of this title, to underground injections by Federal agencies, and (ii) to underground injections by any other person whether or not occurring on property owned or leased by the United States.

(2) Regulations of the Administrator under this section for State underground injection control programs may not prescribe requirements which interfere with or impede—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas, unless such requirements are essential to assure that underground sources of drinking water will not be endangered by such injection.

(3)(A) The regulations of the Administrator under this section shall permit or provide for consideration of varying geologic, hydrological, or historical conditions in different States and in different areas within a State.

(B)(i) In prescribing regulations under this section the Administrator shall, to the extent feasible, avoid promulgation of requirements which would unnecessarily disrupt State underground injection control programs which are in effect and being enforced in a substantial number of States.

(ii) For the purpose of this subparagraph, a regulation prescribed by the Administrator under this section shall be deemed to disrupt a State underground injection control program only if it would be infeasible to comply with both such regulation and the State underground injection control program.

(iii) For the purpose of this subparagraph, a regulation prescribed by the Administrator under this section shall be deemed unnecessary only if, without such regulation, underground sources of drinking water will not be endangered by an underground injection.

(C) Nothing in this section shall be construed to alter or affect the duty to assure that underground sources of drinking water will not be endangered by any underground injection.

(c) Temporary permits; notice and hearing

(1) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to issue (without regard to subsection (b)(1)(B)(i) of this section) temporary permits for underground injection which may be effective until the expiration of four years after December 16, 1974, if—

(A) the Administrator finds that the State has demonstrated that it is unable and could not reasonably have been able to process all permit applications within the time available;

(B) the Administrator determines the adverse effect on the environment of such temporary permits is not unwarranted;

(C) such temporary permits will be issued only with respect to injection wells in operation on the date on which such State’s permit program approved under this part first takes effect and for which there was inadequate time to process its permit application; and

(D) the Administrator determines the temporary permits require the use of adequate

1 See References in Text note below.
safeguards established by rules adopted by him.

(2) The Administrator may, upon application of the Governor of a State which authorizes underground injection by means of permits, authorize such State to issue (without regard to subsection (b)(1)(B)(i) of this section), but after reasonable notice and hearing, one or more temporary permits each of which is applicable to a particular injection well and to the underground injection of a particular fluid and which may be effective until the expiration of four years after December 16, 1974, if the State finds, on the record of such hearing—

(A) that technology (or other means) to permit safe injection of the fluid in accordance with the applicable underground injection control program is not generally available (taking costs into consideration); and

(B) that injection of the fluid would be less harmful to health than the use of other available means of disposing of waste or producing the desired product; and

(C) that available technology or other means have been employed (and will be employed) to reduce the volume and toxicity of the fluid and to minimize the potentially adverse effect of the injection on the public health.

(d) “Underground injection” defined; underground injection endangerment of drinking water sources

For purposes of this part:

(1) UNDERGROUND INJECTION.—The term “underground injection”—

(A) means the subsurface emplacement of fluids by well injection; and

(B) excludes—

(i) the underground injection of natural gas for purposes of storage; and

(ii) the underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

(2) Underground injection endangers drinking water sources if such injection may result in the presence in underground water supplies that are reasonably expected to supply any public water system of any contaminant, and if the presence of such contaminant may result in such system's not complying with any national primary drinking water regulation or may otherwise adversely affect the health of persons.

(3) Notice under paragraph (1) shall be made by the Administrator to the State, and at such time as the Administrator determines that a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources. Such list may be amended from time to time.

(b) State applications; notice to Administrator of compliance with revised or added requirements; approval or disapproval by Administrator; duration of State primary enforcement responsibility; public hearing

(1) (A) Each State listed under subsection (a) of this section shall within 270 days after the date of promulgation of any regulation under section 300h of this title (or, if later, within 270 days after such State is first listed under subsection (a) of this section) submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State—

(i) has adopted after reasonable notice and public hearings, and will implement, an underground injection control program as the Administrator may require by regulation.

(ii) will keep such records and make such reports with respect to its activities under its underground injection control program meets the revised or added requirements of regulations in effect under section 300h of this title; and

(2) Within 270 days of any amendment of a regulation under section 300h of this title revising or adding any requirement respecting State underground injection control programs, each State listed under subsection (a) of this section shall submit (in such form and manner as the Administrator may require) a notice to the Administrator containing a showing satisfactory to him that the State underground injection control program meets the revised or added requirement.

(b) Within ninety days after the State's application under paragraph (1)(A) or notice under
paragraph (1)(B) and after reasonable opportunity for presentation of views, the Administrator shall by rule either approve, disapprove, or approve in part and disapprove in part, the State's underground injection control program.

(3) If the Administrator approves the State's program under paragraph (2), the State shall have primary enforcement responsibility for underground water sources until such time as the Administrator determines, by rule, that such State no longer meets the requirements of clause (i) or (ii) of paragraph (1)(A) of this subsection.

(4) Before promulgating any rule under paragraph (2) or (3) of this subsection, the Administrator shall provide opportunity for public hearing respecting such rule.

(e) Program by Administrator for State without primary enforcement responsibility; restrictions

If the Administrator disapproves a State's program (or part thereof) under subsection (b)(2) of this section, if the Administrator determines under subsection (b)(3) of this section that a State no longer meets the requirements of clause (i) or (ii) of subsection (b)(1)(A) of this section or if a State fails to submit an application or notice before the date of expiration of the period specified in subsection (b)(1) of this section, the Administrator shall by regulation within 90 days after the date of such disapproval, determination, or expiration (as the case may be) prescribe (and may from time to time by regulation revise) a program applicable underground injection control program in such State not to exceed 270 days after June 19, 1986, unless an Indian Tribe first obtains approval to assume primary enforcement responsibility for underground injection control.

AMENDMENTS

1986—Subsec. (c)(1). Pub. L. 99–339, § 201(a), inserted “or natural gas storage operations, or” after “production”.

§ 300h–2. Enforcement of program

(a) Notice to State and violator; issuance of administrative order; civil action

(1) Whenever the Administrator finds during a period during which a State has primary enforcement responsibility for underground water sources (within the meaning of section 300h–1(b)(3) of this title or section 300h–4(c) of this title) that any person who is subject to a requirement of an applicable underground injection control program in such State is violating such requirement, he shall so notify the State and the person violating such requirement. If beyond the thirtieth day after the Administrator's notification the State has not commenced appropriate enforcement action, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.

(2) Whenever the Administrator finds during a period during which a State does not have primary enforcement responsibility for underground water sources that any person subject to any requirement of any applicable underground injection control program in such State is violating such requirement, the Administrator shall issue an order under subsection (c) of this section requiring the person to comply with such requirement or the Administrator shall commence a civil action under subsection (b) of this section.
(b) Civil and criminal actions

Civil actions referred to in paragraphs (1) and (2) of subsection (a) of this section shall be brought in the appropriate United States district court. Such court shall have jurisdiction to require compliance with any requirement of an applicable underground injection program or order issued under subsection (c) of this section. The court may enter such judgment as protection of public health may require. Any person who violates any requirement of an applicable underground injection control program or an order requiring compliance under subsection (c) of this section—

(1) shall be subject to a civil penalty of not more than $25,000 for each day of such violation, and

(2) if such violation is willful, such person may, in addition to or in lieu of the civil penalty authorized by paragraph (1), be imprisoned for not more than 3 years, or fined in accordance with title 18, or both.

c) Administrative orders

(1) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation or other requirement of this part other than those relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $10,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(2) In any case in which the Administrator is authorized to bring a civil action under this section with respect to any regulation, or other requirement of this part relating to—

(A) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production, or

(B) any underground injection for the secondary or tertiary recovery of oil or natural gas,

the Administrator may also issue an order under this subsection either assessing a civil penalty of not more than $5,000 for each day of violation for any past or current violation, up to a maximum administrative penalty of $125,000, or requiring compliance with such regulation or other requirement, or both.

(3) An order under this subsection shall be issued by the Administrator after opportunity (provided in accordance with this subparagraph) for a hearing. Before issuing the order, the Administrator shall give to the person to whom it is directed written notice of the Administrator's proposal to issue such order and the opportunity to request, within 30 days of the date the notice is received by such person, a hearing on the order. Such hearing shall not be subject to section 554 or 556 of title 5, but shall provide a reasonable opportunity to be heard and to present evidence.

(B) The Administrator shall provide public notice of, and reasonable opportunity to comment on, any proposed order.

(C) Any citizen who comments on any proposed order under subparagraph (B) shall be given notice of any hearing under this subsection and of any order. In any hearing held under subparagraph (A), such citizen shall have a reasonable opportunity to be heard and to present evidence.

(D) Any order issued under this subsection shall become effective 30 days following its issuance unless an appeal is taken pursuant to paragraph (6).

(4) (A) Any order issued under this subsection shall state with reasonable specificity the nature of the violation and may specify a reasonable time for compliance.

(B) In assessing any civil penalty under this subsection, the Administrator shall take into account appropriate factors, including (i) the seriousness of the violation; (ii) the economic benefit (if any) resulting from the violation; (iii) any history of such violations; (iv) any good-faith efforts to comply with the applicable requirements; (v) the economic impact of the penalty on the violator; and (vi) such other matters as justice may require.

(5) Any violation with respect to which the Administrator has commenced and is diligently prosecuting an action, or has issued an order under this subsection assessing a penalty, shall not be subject to an action under subsection (b) of this section or section 300h–3(c) or 300j–8 of this title, except that the foregoing limitation on civil actions under section 300j–8 of this title shall not apply with respect to any violation for which—

(A) a civil action under section 300j–8(a)(1) of this title has been filed prior to commencement of an action under this subsection, or

(B) a notice of violation under section 300j–8(b)(1) of this title has been given before commencement of an action under this subsection and an action under section 300j–8(a)(1) of this title is filed before 120 days after such notice is given.

(6) Any person against whom an order is issued or who commented on a proposed order pursuant to paragraph (3) may file an appeal of such order with the United States District Court for the District of Columbia or the district in which the violation is alleged to have occurred. Such an appeal may only be filed within the 30-day period beginning on the date the order is issued. Appellant shall simultaneously send a copy of the appeal by certified mail to the Administrator and to the Attorney General. The Administrator shall promptly file in such court a certified copy of the record on which such order was imposed. The district court shall not set aside or remand such order unless there is a substantial question of the record, taken as a whole, to support the finding of a violation or, unless the Administrator's assessment of penalty or requirement for compliance constitutes an abuse of discretion. The district court shall
not impose additional civil penalties for the same violation unless the Administrator’s assessment of a penalty constitutes an abuse of discretion. Notwithstanding section 300–7(a)(2) of this title, any order issued under paragraph (3) shall be subject to judicial review exclusively under this paragraph.

(7) If any person fails to pay an assessment of a civil penalty—

(A) after the order becomes effective under paragraph (3), or

(B) after a court, in an action brought under paragraph (6), has entered a final judgment in favor of the Administrator,

the Administrator may request the Attorney General to bring a civil action in an appropriate district court to recover the amount assessed (plus costs, attorneys’ fees, and interest at currently prevailing rates from the date the order is effective or the date of such final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review.

(8) The Administrator may, in connection with administrative proceedings under this subsection, issue subpoenas compelling the attendance and testimony of witnesses and subpoenas duces tecum, and may request the Attorney General to bring an action to enforce any subpoena under this section. The district courts shall have jurisdiction to enforce such subpoenas and impose sanction.

(d) State authority to adopt or enforce laws or regulations respecting underground injection

Nothing in this subchapter shall diminish any authority of a State or political subdivision to adopt or enforce any law or regulation respecting underground injection but no such law or regulation shall relieve any person of any requirement otherwise applicable under this subchapter.

AMENDMENTS

Subsec. (a)(1). Pub. L. 99–339, §202(a)(1), substituted provisions which related to issuance of an order of compliance or commencement of a civil action by the Administrator if the State has not commenced enforcement against the violator for provisions directing the Administrator to give public notice and request that the State report within 15 days thereafter as to steps taken to enforce compliance and authorizing the Administrator to commence a civil action upon failure by the State to comply timely.

Subsec. (a)(2). Pub. L. 99–339, §202(a)(2), substituted provision that the Administrator issue an order under subsec. (c) of this section or commence a civil action under subsec. (b) of this section for provision that he commence a civil action under subsec. (b)(1) of this section.

Subsec. (b). Pub. L. 99–339, §202(b), amended subsec. (b) generally, substituting provisions relating to jurisdiction of the appropriate Federal district court, entry of judgment, civil penalty of $25,000 per day, criminal liability and fine for willful violation for provisions which related to judicial determinations in appropriate Federal district courts, civil penalties of $5,000 per day, and fines of $10,000 per day for willful violations.

Subsecs. (c), (d). Pub. L. 99–339, §202(c), added subsec. (c) and redesignated former subsec. (c) as (d).

§300h–3. Interim regulation of underground injections

(a) Necessity for well operation permit; designation of one aquifer areas

(1) Any person may petition the Administrator to have an area of a State (or States) designated as an area in which no new underground injection well may be operated during the period beginning on the date of the designation and ending on the date on which the applicable underground injection control program covering such area takes effect unless a permit for the operation of such well has been issued by the Administrator under subsection (b) of this section. The Administrator may so designate an area within a State if he finds that the area has one aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health.

(2) Upon receipt of a petition under paragraph (1) of this subsection, the Administrator shall publish it in the Federal Register and shall provide an opportunity to interested persons to submit written data, views, or arguments thereon. Not later than the 30th day following the date of the publication of a petition under this paragraph in the Federal Register, the Administrator shall either make the designation for which the petition is submitted or deny the petition.

(b) Well operation permits; publication in Federal Register; notice and hearing; issuance or denial; conditions for issuance

(1) During the period beginning on the date an area is designated under subsection (a) of this section and ending on the date the applicable underground injection control program covering such area takes effect, no new underground injection well may be operated in such area unless the Administrator has issued a permit for such operation.

(2) Any person may petition the Administrator for the issuance of a permit for the operation of such a well in such an area. A petition submitted under this paragraph shall be submitted in such manner and contain such information as the Administrator may require by regulation. Upon receipt of such a petition, the Administrator shall publish it in the Federal Register. The Administrator shall give notice of any proceeding on a petition and shall provide opportunity for agency hearing. The Administrator shall act upon such petition on the record of any hearing held pursuant to the preceding sentence respecting such petition. Within 120 days of the publication in the Federal Register of a petition submitted under this paragraph, the Administrator shall either issue the permit for which the petition was submitted or deny its issuance.

(3) The Administrator may issue a permit for the operation of a new underground injection...
well in an area designated under subsection (a) of this section only, if he finds that the operation of such well will not cause contamination of the aquifer of such area so as to create a significant hazard to public health. The Administrator may condition the issuance of such a permit upon the use of such control measures in connection with the operation of such well, for which the permit is to be issued, as he deems necessary to assure that the operation of the well will not contaminate the aquifer of the designated area in which the well is located so as to create a significant hazard to public health.

(c) Civil penalties; separate violations; penalties for willful violations; temporary restraining order or injunction

Any person who operates a new underground injection well in violation of subsection (b) of this section, (1) shall be subject to a civil penalty of not more than $5,000 for each day in which such violation occurs, or (2) if such violation is willful, such person may, in lieu of the civil penalty authorized by clause (1), be fined not more than $10,000 for each day in which such violation occurs. If the Administrator has reason to believe that any person is violating or will violate subsection (b) of this section, he may petition the United States district court to issue a temporary restraining order or injunction (including a mandatory injunction) to enforce such subsection.

(d) “New underground injection well” defined

For purposes of this section, the term “new underground injection well” means an underground injection well whose operation was not approved by appropriate State and Federal agencies before December 16, 1974.

(e) Areas with one aquifer; publication in Federal Register; commitments for Federal financial assistance

If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the Federal Register. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

(July 1, 1944, ch. 373, title XIV, §1424, as added Pub. L. 93-523, §2(a), Dec. 16, 1974, 88 Stat. 1678.)

§ 300h–4. Optional demonstration by States relating to oil or natural gas

(a) Approval of State underground injection control program; alternative showing of effectiveness of program by State

For purposes of the Administrator’s approval or disapproval under section 300h–1 of this title of that portion of any State underground injection control program which relates to—

(1) the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations; or

(2) any underground injection for the secondary or tertiary recovery of oil or natural gas, in lieu of the showing required under subparagraph (A) of section 300h–1(b)(1) of this title the State may demonstrate that such portion of the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(b) Revision or amendment of requirements of regulation; showing of effectiveness of program by State

If the Administrator revises or amends any requirement of a regulation under section 300h of this title relating to any aspect of the underground injection referred to in subsection (a) of this section, in the case of that portion of a State underground injection control program for which the demonstration referred to in subsection (a) of this section has been made, in lieu of the showing required under section 300h–1(b)(1)(B) of this title the State may demonstrate that, with respect to that aspect of such underground injection, the State program meets the requirements of subparagraphs (A) through (D) of section 300h(b)(1) of this title and represents an effective program (including adequate recordkeeping and reporting) to prevent underground injection which endangers drinking water sources.

(c) Primary enforcement responsibility of State; voiding by Administrator under duly promulgated rule

(1) Section 300h–1(b)(3) of this title shall not apply to that portion of any State underground injection control program approved by the Administrator pursuant to a demonstration under subsection (a) of this section (and under subsection (b) of this section where applicable).

(2) If pursuant to such a demonstration, the Administrator approves such portion of the State program, the State shall have primary enforcement responsibility with respect to that portion until such time as the Administrator determines, by rule, that such demonstration is no longer valid. Following such a determination, the Administrator may exercise the authority of subsection (c) of section 300h–1 of this title in the same manner as provided in such subsection with respect to a determination described in such subsection.

(3) Before promulgating any rule under paragraph (2), the Administrator shall provide opportunity for public hearing respecting such rule.

(Amendment

1986—Pub. L. 99–339 substituted “the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production or natural gas storage operations” for “the underground injection of brine or other fluids which are brought to the surface in connection with oil or natural gas production”.
§ 300h–5. Regulation of State programs

Not later than 18 months after June 19, 1986, the Administrator shall modify regulations issued under this chapter for Class I injection wells to identify monitoring methods, in addition to those in effect on November 1, 1985, including groundwater monitoring. In accordance with such regulations, the Administrator, or delegated State authority, shall determine the applicability of such monitoring methods, wherever appropriate, at locations and in such a manner as to provide the earliest possible detection of fluid migration into, or in the direction of, underground sources of drinking water from such wells, based on its assessment of the potential for fluid migration from the injection zone that may be harmful to human health or the environment. For purposes of this subsection, a class I injection well is defined in accordance with 40 CFR 146.05 as in effect on November 1, 1985.

AMENDMENTS

1996—Pub. L. 104–182 directed technical amendment of section catchline and subsec. (a) designation. The provision directing amendment of subsec. (a) designation could not be executed because section does not contain a subsec. (a).

1995—Pub. L. 104–66 struck out subsec. (a) designation and heading before “Not later than” and struck out heading and text of subsec. (b). Text read as follows: “The Administrator shall submit a report to Congress, no later than September 1987, summarizing the results of State surveys required by the Administrator under this section. The report shall include each of the following items of information:

1. The numbers and categories of class V wells which discharge nonhazardous waste into or above an underground source of drinking water.

2. The primary contamination problems associated with different categories of these disposal wells.

3. Recommendations for minimum design, construction, installation, and siting requirements that should be applied to protect underground sources of drinking water from such contamination wherever necessary.”

§ 300h–6. Sole source aquifer demonstration program

(a) Purpose

The purpose of this section is to establish procedures for development, implementation, and assessment of demonstration programs designed to protect critical aquifer protection areas located within areas designated as sole or principal source aquifers under section 300h–3(e) of this title.

(b) “Critical aquifer protection area” defined

For purposes of this section, the term “critical aquifer protection area” means either of the following:

1. All or part of an area located within an area for which an application or designation as a sole or principal source aquifer pursuant to section 300h–3(e) of this title, has been submitted and approved by the Administrator and which satisfies the criteria established by the Administrator under subsection (d) of this section.

2. All or part of an area which is within an aquifer designated as a sole source aquifer as of June 19, 1986, and for which an area wide ground water quality protection plan has been approved under section 208 of the Clean Water Act [33 U.S.C. 1288] prior to June 19, 1986.

(c) Application

Any State, municipal or local government or political subdivision thereof or any planning entity (including any interstate regional planning entity) that identifies a critical aquifer protection area over which it has authority or jurisdiction may apply to the Administrator for the selection of such area for a demonstration program under this section. Any applicant shall consult with other government or planning entities with authority or jurisdiction in such area prior to application. Applicants, other than the Governor, shall submit the application for a demonstration program jointly with the Governor.

(d) Criteria

Not later than 1 year after June 19, 1986, the Administrator shall, by rule, establish criteria for identifying critical aquifer protection areas under this section. In establishing such criteria, the Administrator shall consider each of the following:

1. The vulnerability of the aquifer to contamination due to hydrogeologic characteristics.

2. The number of persons or the proportion of population using the ground water as a drinking water source.

3. The economic, social and environmental benefits that would result to the area from maintenance of ground water of high quality.

4. The economic, social and environmental costs that would result from degradation of the quality of the ground water.

(e) Contents of application

An application submitted to the Administrator by any applicant for a demonstration program under this section shall meet each of the following requirements:

1. The application shall propose boundaries for the critical aquifer protection area within its jurisdiction.

2. The application shall designate or, if necessary, establish a planning entity (which shall be a public agency and which shall include representation of elected local and State governmental officials) to develop a comprehensive management plan (hereinafter in this section referred to as the “plan”) for the critical protection area. Where a local government planning agency exists with adequate authority to carry out this section with respect to any proposed critical protection area, such agency shall be designated as the planning entity.

3. The application shall establish procedures for public participation in the development of the plan, for review, approval, and adoption of the plan, and for assistance to mu-
ment plan submitted by an applicant under this section shall be to maintain the quality of the ground water in the critical protection area in a manner reasonably expected to protect human health, the environment and ground water resources. In order to achieve such objective, the plan may be designed to maintain, to the maximum extent possible, the natural vegetative and hydrogeological conditions. Each of the following elements shall be included in such a protection plan:

(A) A map showing the detailed boundary of the critical protection area.

(B) An identification of existing and potential point and nonpoint sources of ground water degradation.

(C) An assessment of the relationship between activities on the land surface and ground water quality.

(D) Specific actions and management practices to be implemented in the critical protection area to prevent adverse impacts on ground water quality.

(E) Identification of authority adequate to implement the plan, estimates of program costs, and sources of State matching funds.

(2) Such plan may also include the following:

(A) A determination of the quality of the existing ground water recharged through the special protection area and the natural recharge capabilities of the special protection area watershed.

(B) Requirements designed to maintain existing underground drinking water quality or improve underground drinking water quality if prevailing conditions fail to meet drinking water standards, pursuant to this chapter and State law.

(C) Limits on Federal, State, and local government, financially assisted activities and projects which may contribute to degradation of such ground water or any loss of natural surface and subsurface infiltration of purification capability of the special protection watershed.

(D) A comprehensive statement of land use management including emergency contingency planning as it pertains to the maintenance of the quality of underground sources of drinking water or to the improvement of such sources if necessary to meet drinking water standards pursuant to this chapter and State law.

(E) Actions in the special protection area which would avoid adverse impacts on water quality, recharge capabilities, or both.

(F) Consideration of specific techniques, which may include clustering, transfer of development rights, and other innovative measures sufficient to achieve the objectives of this section.

(G) Consideration of the establishment of a State institution to facilitate and assist funding a development transfer credit system.

(H) A program for State and local implementation of the plan described in this subsection in a manner that will insure the continued, uniform, consistent protection of the critical protection area in accord with the purposes of this section.

(I) Pollution abatement measures, if appropriate.

(g) Plans under section 208 of Clean Water Act

A plan approved before June 19, 1986, under section 208 of the Clean Water Act [33 U.S.C. 1288] to protect a sole source aquifer designated under section 300h-3(e) of this title shall be considered a comprehensive management plan for the purposes of this section.

(h) Consultation and hearings

During the development of a comprehensive management plan under this section, the planning entity shall consult with, and consider the comments of, appropriate officials of any municipality and State or Federal agency which has jurisdiction over lands and waters within the special protection area, other concerned organizations and technical and citizen advisory committees. The planning entity shall conduct public hearings at places within the special protection area for the purpose of providing the opportunity to comment on any aspect of the plan.

(i) Approval or disapproval

Within 120 days after receipt of an application under this section, the Administrator shall approve or disapprove the application. The approval or disapproval shall be based on a determination that the critical protection area satisfies the criteria established under subsection (d) of this section and that a demonstration program for the area would provide protection for ground water quality consistent with the objectives stated in subsection (f) of this section. The Administrator shall provide to the Governor a written explanation of the reasons for the disapproval of any such application. Any petitioner may modify and resubmit any application which is not approved. Upon approval of an application, the Administrator may enter into a cooperative agreement with the applicant to establish a demonstration program under this section.

(j) Grants and reimbursement

Upon entering a cooperative agreement under subsection (i) of this section, the Administrator may provide to the applicant, on a matching basis, a grant of 50 per centum of the costs of implementing the plan established under this section. The Administrator may also reimburse the applicant of an approved plan up to 50 per centum of the costs of developing such plan, except for plans approved under section 208 of the Clean Water Act [33 U.S.C. 1288]. The total amount of grants under this section for any one
aqurifer, designated under section 300h-3(e) of this title, shall not exceed $4,000,000 in any one fiscal year.

(k) Activities funded under other law

No funds authorized under this section may be used to fund activities funded under other sections of this chapter or the Clean Water Act [33 U.S.C. 1251 et seq.], the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.] or other environmental laws.

(l) Savings provision

Nothing under this section shall be construed to amend, supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws; or any requirement imposed or right provided under any Federal or State environmental or public health statute.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out this section more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$10,000,000</td>
</tr>
<tr>
<td>1988</td>
<td>15,000,000</td>
</tr>
<tr>
<td>1989</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1990</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1991</td>
<td>17,500,000</td>
</tr>
<tr>
<td>1992-1993</td>
<td>15,000,000</td>
</tr>
</tbody>
</table>

Matching grants under this section may also be used to implement or update any water quality management plan for a sole or principal source aquifer approved (before June 19, 1986) by the Administrator under section 208 of the Federal Water Pollution Control Act [33 U.S.C. 1288].

The Solid Waste Disposal Act, referred to in subsec. (k), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92-500, §2, Oct. 18, 1972, 88 Stat. 816, also known as the Federal Water Pollution Control Act, which is classified generally to chapter 103 of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980, referred to in subsec. (k), is Pub. L. 96-510, Dec. 11, 1980, 94 Stat. 2767, as amended, which is classified principally to chapter 103 of Title 42 and text of former subsec. (m) as (l) and (m), respectively, and struck out heading and text of former subsec. (l). Text read as follows: “Not later than December 31, 1989, each State shall submit to the Administrator a report assessing the impact of the program on ground water quality and identifying those measures found to be effective in protecting ground water resources. No later than September 30, 1990, the Administrator shall submit to Congress a report summarizing the State reports, and assessing the accomplishments of the sole source aquifer demonstration program including an identification of protection methods found to be most effective and recommendations for their application to protect ground water resources from contamination whenever necessary.”

REFERENCES IN TEXT

The Clean Water Act, referred to in subsec. (k), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92-500, §2, Oct. 18, 1972, 88 Stat. 816, also known as the Federal Water Pollution Control Act, which is classified generally to chapter 14 of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

The Governor or Governor’s designee of each State shall, within 3 years of June 19, 1986, adopt and submit to the Administrator a State program to protect wellhead areas within their jurisdiction from contaminants which may have any adverse effect on the health of persons. Each State program under this section shall, at a minimum—

1. Specify the duties of State agencies, local governmental entities, and public water supply systems with respect to the development and implementation of programs required by this section;

2. For each wellhead, determine the wellhead protection area as defined in subsection (e) of this section based on all reasonably available hydrogeologic information on ground water flow, recharge and discharge and other information the State deems necessary to adequately determine the wellhead protection area;

3. Identify within each wellhead protection area all potential anthropogenic sources of contaminants which may have any adverse effect on the health of persons;

4. Describe a program that contains, as appropriate, technical assistance, financial assistance, implementation of control measures, education, training, and demonstration projects to protect the water supply within wellhead protection areas from such contaminants;

5. Include contingency plans for the location and provision of alternate drinking water supplies for each public water system in the event of well or wellfield contamination by such contaminants; and

6. Include a requirement that consideration be given to all potential sources of such contaminants within the expected wellhead area of a new water well which serves a public water supply system.

(b) Public participation

To the maximum extent possible, each State shall establish procedures, including but not
limited to the establishment of technical and citizens’ advisory committees, to encourage the public to participate in developing the protection program for wellhead areas and source water assessment programs under section 300j–13 of this title. Such procedures shall include notice and opportunity for public hearing on the State program before it is submitted to the Administrator.

(c) Disapproval

(1) In general

If, in the judgment of the Administrator, a State program or portion thereof under subsection (a) of this section is not adequate to protect public water systems as required by subsection (a) of this section or a State program under section 300j–13 of this title or section 300g–7(b) of this title does not meet the applicable requirements of section 300j–13 of this title or section 300g–7(b) of this title, the Administrator shall disapprove such program or portion thereof. A State program developed pursuant to subsection (a) of this section shall be deemed to be adequate unless the Administrator determines, within 9 months of the receipt of a State program, that such program (or portion thereof) is inadequate for the purpose of protecting public water systems as required by this section from contaminants that may have any adverse effect on the health of persons. A State program developed pursuant to section 300j–13 of this title or section 300g–7(b) of this title shall be deemed to be adequate unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements. If the Administrator determines that a proposed State program (or any portion thereof) is disapproved, the Administrator shall submit a written statement of the reasons for such determination to the Governor of the State.

(2) Modification and resubmission

Within 6 months after receipt of the Administrator’s written notice under paragraph (1) that any proposed State program (or portion thereof) is disapproved, the Governor or Governor’s designee, shall modify the program based upon the recommendations of the Administrator and resubmit the modified program to the Administrator.

(d) Federal assistance

After the date 3 years after June 19, 1986, no State shall receive funds authorized to be appropriated under this section except for the purpose of implementing the program and requirements of paragraphs (4) and (6) of subsection (a) of this section.

(e) “Wellhead protection area” defined

As used in this section, the term “wellhead protection area” means the surface and subsurface area surrounding a water well or wellfield, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or wellfield. The extent of a wellhead protection area, within a State, necessary to provide protection from contaminants which may have any adverse effect on the health of persons is to be determined by the State in the program submitted under subsection (a) of this section. Not later than one year after June 19, 1986, the Administrator shall issue technical guidance which States may use in making such determinations. Such guidance may reflect such factors as the radius of influence around a well or wellfield, the depth of drawdown of the water table by such well or wellfield at any given point, the time or rate of travel of various contaminants in various hydrologic conditions, distance from the well or wellfield, or other factors affecting the likelihood of contaminants reaching the well or wellfield, taking into account available engineering pump tests or comparable data, field reconnaissance, topographic information, and the geology of the formation in which the well or wellfield is located.

(f) Prohibitions

(1) Activities under other laws

No funds authorized to be appropriated under this section may be used to support activities authorized by the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [42 U.S.C. 9601 et seq.], or other sections of this chapter.

(2) Individual sources

No funds authorized to be appropriated under this section may be used to bring individual sources of contamination into compliance.

(g) Implementation

Each State shall make every reasonable effort to implement the State wellhead area protection program under this section within 2 years of submitting the program to the Administrator. Each State shall submit to the Administrator a biennial status report describing the State’s progress in implementing the program. Such report shall include amendments to the State program for water wells sited during the biennial period.

(h) Federal agencies

Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government having jurisdiction over any potential source of contaminants identified by a State program pursuant to the provisions of subsection (a)(3) of this section shall be subject to and comply with all requirements of the State program developed according to subsection (a)(4) of this section applicable to such potential source of contaminants, both substantive and procedural, in the same manner, and to the same extent, as any other person is subject to such requirements, including payment of reasonable charges and fees. The President may exempt any potential source under the jurisdiction of any department, agency, or instrumentality in the executive branch if the President determines it to be in the paramount interest of the United States to do so. No such
exemption shall be granted due to the lack of an appropriation unless the President shall have specifically requested such appropriation as part of the budgetary process and the Congress shall have failed to make available such requested appropriations.

(i) Additional requirement

(1) In general

In addition to the provisions of subsection (a) of this section, States in which there are more than 2,500 active wells at which annular injection is used as of January 1, 1986, shall include in their State program a certification that a State program exists and is being adequately enforced that provides protection from contaminants which may have an adverse effect on the health of persons and which are associated with the annular injection or surface disposal of brines associated with oil and gas production.

(2) “Annular injection” defined

For purposes of this subsection, the term “annular injection” means the reinjection of brines associated with the production of oil or gas between the production and surface casings of a conventional oil or gas producing well.

(3) Review

The Administrator shall conduct a review of each program certified under this subsection.

(4) Disapproval

If a State fails to include the certification required by this subsection or if in the judgment of the Administrator the State program certified under this subsection is not being adequately enforced, the Administrator shall disapprove the State program submitted under subsection (a) of this section.

(j) Coordination with other laws

Nothing in this section shall authorize or require any department, agency, or other instrumentality of the Federal Government or State or local government to apportion, allocate or otherwise regulate the withdrawal or beneficial use of ground or surface waters, so as to abrogate or modify any existing rights to water established pursuant to State or Federal law, including interstate compacts.

(k) Authorization of appropriations

Unless the State program is disapproved under this section, the Administrator shall make grants to the State for not less than 50 or more than 90 percent of the costs incurred by a State (as determined by the Administrator) in developing and implementing each State program under this section. For purposes of making such grants there is authorized to be appropriated not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$20,000,000</td>
</tr>
<tr>
<td>1988</td>
<td>20,000,000</td>
</tr>
<tr>
<td>1989</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1990</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1991</td>
<td>35,000,000</td>
</tr>
<tr>
<td>1992–1993</td>
<td>30,000,000</td>
</tr>
</tbody>
</table>

REFERENCES IN TEXT

The Federal Water Pollution Control Act, referred to in subsec. (f)(1), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92–500, §2, Oct. 18, 1972, 86 Stat. 816, which is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

AMENDMENTS

Subsec. (b), Pub. L. 104–182, §132(b)(4), inserted before period at end of first sentence “and source water assessment programs under section 300j–13 of this title”.

Subsec. (c)(1), Pub. L. 104–182, §132(b)(3), which directed substitution of “is disapproved” for “is inadequate” in third sentence, was executed by making the substitution in fourth sentence to reflect the probable intent of Congress and the amendment by Pub. L. 104–182, §122(b)(2). See below.

Pub. L. 104–182, §132(b)(2), inserted after second sentence “A State program developed pursuant to section 300j–13 of this title or section 300g–7(b) of this title shall be deemed to meet the applicable requirements of section 300j–13 of this title or section 300g–7(b) of this title unless the Administrator determines within 9 months of the receipt of the program that such program (or portion thereof) does not meet such requirements.”

Pub. L. 104–182, §132(b)(1), amended first sentence generally. Prior to amendment, first sentence read as follows: “If, in the judgment of the Administrator, a State program (or portion thereof), including the definition of a wellhead protection area, is not adequate to protect public water systems as required by this section, the Administrator shall disapprove such program (or portion thereof).”

Subsec. (c)(2), Pub. L. 104–182, §132(b)(3), substituted “is disapproved” for “is inadequate”.

Subsec. (k), Pub. L. 104–182, §120(b), inserted table item relating to fiscal years 1992 through 2003.

§ 300h–8. State ground water protection grants

(a) In general

The Administrator may make a grant to a State for the development and implementation of a State program to ensure the coordinated and comprehensive protection of ground water resources within the State.

(b) Guidance

Not later than 1 year after August 6, 1996, and annually thereafter, the Administrator shall publish guidance that establishes procedures for application for State ground water protection
program assistance and that identifies key elements of State ground water protection programs.

(c) Conditions of grants
(1) In general
The Administrator shall award grants to States that submit an application that is approved by the Administrator. The Administrator shall determine the amount of a grant awarded pursuant to this paragraph on the basis of an assessment of the extent of ground water resources in the State and the likelihood that awarding the grant will result in sustained and reliable protection of ground water quality.

(2) Innovative program grants
The Administrator may also award a grant pursuant to this subsection for innovative programs proposed by a State for the prevention of ground water contamination.

(3) Allocation of funds
The Administrator shall, at a minimum, ensure that, for each fiscal year, not less than 1 percent of funds made available to the Administrator by appropriations to carry out this section are allocated to each State that submits an application that is approved by the Administrator pursuant to this section.

(4) Limitation on grants
No grant awarded by the Administrator may be used for a project to remediate ground water contamination.

(d) Amount of grants
The amount of a grant awarded pursuant to paragraph (1) shall not exceed 50 percent of the eligible costs of carrying out the ground water protection program that is the subject of the grant (as determined by the Administrator) for the 1-year period beginning on the date that the grant is awarded. The State shall pay a State share to cover the costs of the ground water protection program that is the subject of the grant (as determined by the Administrator) for the 1-year period beginning on the date that the grant is awarded. The share to be paid by the State is not less than 50 percent of the cost of conducting the program.

(e) Evaluations and reports
Not later than 3 years after August 6, 1996, and every 3 years thereafter, the Administrator shall evaluate the State ground water protection programs that are the subject of grants awarded pursuant to this section and report to the Congress on the status of ground water quality in the United States and the effectiveness of State programs for ground water protection.

(f) Authorization of appropriations
There are authorized to be appropriated to carry out this section $15,000,000 for each of fiscal years 1997 through 2003.

PART D—EMERGENCY POWERS

§ 300i. Emergency powers

(a) Actions authorized against imminent and substantial endangerment to health
Notwithstanding any other provision of this subchapter the Administrator, upon receipt of information that a contaminant which is present in or is likely to enter a public water system or an underground source of drinking water, or that there is a threatened or potential terrorist attack (or other intentional act designed to disrupt the provision of safe drinking water or to impact adversely the safety of drinking water supplied to communities and individuals), which may present an imminent and substantial endangerment to the health of persons, and that appropriate State and local authorities have not acted to protect the health of such persons, may take such actions as he may deem necessary in order to protect the health of such persons. To the extent he determines it to be practicable in light of such imminent endangerment, he shall consult with the State and local authorities in order to confirm the correctness of the information on which action proposed to be taken under this subsection is based and to ascertain the action which such authorities are or will be taking. The action which the Administrator may take may include (but shall not be limited to) (1) issuing such orders as may be necessary to protect the health of persons who are or may be users of such system (including travelers), including orders requiring the provision of alternative water supplies by persons who caused or contributed to the endangerment, and (2) commencing a civil action for appropriate relief, including a restraining order or permanent or temporary injunction.

(b) Penalties for violations; separate offenses
Any person who violates or fails or refuses to comply with any order issued by the Administrator under subsection (a)(1) of this section may, in an action brought in the appropriate United States district court to enforce such order, be subject to a civil penalty of not to exceed $15,000 for each day in which such violation occurs or failure to comply continues.

AMENDMENTS
2002—Subsec. (a). Pub. L. 107–188, in first sentence, inserted “, or that there is a threatened or potential terrorist attack (or other intentional act designed to disrupt the provision of safe drinking water or to impact adversely the safety of drinking water supplied to communities and individuals), which” after “drinking water”.

1996—Subsec. (b). Pub. L. 104–182 substituted “$15,000” for “$5,000”.

1986—Subsec. (a). Pub. L. 99–339, § 204(1), (2), inserted “or an underground source of drinking water” after “to enter a public water system” and “including orders requiring the provision of alternative water supplies by persons who caused or contributed to the endangerment,” after “including travelers.”

Subsec. (b). Pub. L. 99–339, § 204(3), struck out “willfully” after “person who” and substituted “subject to a civil penalty of not to exceed” for “fined not more than”.

§ 300i–1. Tampering with public water systems

(a) Tampering
Any person who tampers with a public water system shall be imprisoned for not more than 20
§300i–2. Terrorist and other intentional acts
(a) Vulnerability assessments
(1) Each community water system serving a population of greater than 3,300 persons shall conduct an assessment of the vulnerability of its system to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water. The vulnerability assessment shall include, but not be limited to, a review of pipes and constructed conveyances, physical barriers, water collection, pretreatment, treatment, storage and distribution facilities, electronic, computer or other automated systems which are utilized by the public water system, the use, storage, or handling of various chemicals, and the operation and maintenance of such system. The assessment shall be made prior to:
(A) March 31, 2003, in the case of systems serving a population of 100,000 or more.
(B) December 31, 2003, in the case of systems serving a population of 50,000 or more but less than 100,000.
(C) June 30, 2004, in the case of systems serving a population greater than 3,300 but less than 50,000.
(2) Each community water system referred to in paragraph (1) shall certify to the Administrator that it has conducted an assessment complying with paragraph (1) and shall submit to the Administrator a written copy of the assessment. Such certification and submission shall be made prior to:
(A) March 31, 2003, in the case of systems serving a population of 100,000 or more.
(B) December 31, 2003, in the case of systems serving a population of 50,000 or more but less than 100,000.
(C) June 30, 2004, in the case of systems serving a population greater than 3,300 but less than 50,000.

(b) Attempt or threat
Any person who attempts to tamper, or makes a threat to tamper, with a public drinking water system be imprisoned for not more than 10 years, or fined in accordance with title 18, or both.

(c) Civil penalty
The Administrator may bring a civil action in the appropriate United States district court (as determined under the provisions of title 28) against any person who tampers, attempts to tamper, or makes a threat to tamper with a public water system. The court may impose on such person a civil penalty of not more than $1,000,000 for such tampering or not more than $100,000 for such attempt or threat.

(d) “Tamper” defined
For purposes of this section, the term “tamper” means—
(1) to introduce a contaminant into a public water system with the intention of harming persons; or
(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

AMENDMENTS
2002—Subsec. (a). Pub. L. 107–188, §403(3)(A), substituted “20 years” for “5 years”.
Subsec. (b). Pub. L. 107–188, §403(3)(B), substituted “10 years” for “3 years”.
Subsec. (c). Pub. L. 107–188, §403(3)(C), (D), substituted “$1,000,000” for “$50,000” and “$100,000” for “$20,000”.
1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§300i–3. Nonpublic water systems
(a) Certification
(1) Each nonpublic water system serving a population of 100 or more shall conduct an assessment of its system to meet the requirements of section 300f–1(b) of title 20 years, or fined in accordance with title 18, or

(b) Attempt or threat
Any person who attempts to tamper, or makes a threat to tamper, with a public drinking water system be imprisoned for not more than 10 years, or fined in accordance with title 18, or both.

(c) Civil penalty
The Administrator may bring a civil action in the appropriate United States district court (as determined under the provisions of title 28) against any person who tampers, attempts to tamper, or makes a threat to tamper with a public water system. The court may impose on such person a civil penalty of not more than $1,000,000 for such tampering or not more than $100,000 for such attempt or threat.

(d) “Tamper” defined
For purposes of this section, the term “tamper” means—
(1) to introduce a contaminant into a public water system with the intention of harming persons; or
(2) to otherwise interfere with the operation of a public water system with the intention of harming persons.

AMENDMENTS
2002—Subsec. (a). Pub. L. 107–188, §403(3)(A), substituted “20 years” for “5 years”.
Subsec. (b). Pub. L. 107–188, §403(3)(B), substituted “10 years” for “3 years”.
Subsec. (c). Pub. L. 107–188, §403(3)(C), (D), substituted “$1,000,000” for “$50,000” and “$100,000” for “$20,000”.
1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

(ii) for purposes of section 300j–4 of this title or for actions under section 300i of this title, or
(iii) for use in any administrative or judicial proceeding to impose a penalty for failure to comply with this section,
shall upon conviction be imprisoned for not more than one year or fined in accordance with the provisions of chapter 227 of title 18 applicable to class A misdemeanors, or both, and shall be removed from Federal office or employment.
(B) Notwithstanding subparagraph (A), an individual referred to in paragraph (5)(B) who is an officer or employee of the United States may discuss the contents of a vulnerability assessment submitted under this section with a State or local official.
(7) Nothing in this section authorizes any person to withhold any information from Congress or from any committee or subcommittee of Congress.

(b) Emergency response plan

Each community water system serving a population greater than 3,300 shall prepare or revise, where necessary, an emergency response plan that incorporates the results of vulnerability assessments that have been completed. Each such community water system shall certify to the Administrator, as soon as reasonably possible after the enactment of this section, but not later than 6 months after the completion of the vulnerability assessment under subsection (a) of this section, that the system has completed such plan. The emergency response plan shall include, but not be limited to, plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack on the public water system. The emergency response plan shall also include actions, procedures, and identification of equipment which can obviate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water provided to communities and individuals. Community water systems shall, to the extent possible, coordinate with existing Local Emergency Planning Committees established under the Emergency Planning and Community Right-to-Know Act (42 U.S.C. 11001 et seq.) when preparing or revising an emergency response plan under this subsection.

(c) Record maintenance

Each community water system shall maintain a copy of the emergency response plan completed pursuant to subsection (b) of this section for 5 years after such plan has been certified to the Administrator under this section.

(d) Guidance to small public water systems

The Administrator shall provide guidance to community water systems serving a population of less than 3,300 persons on how to conduct vulnerability assessments, prepare emergency response plans, and address threats from terrorist attacks or other intentional actions designed to disrupt the provision of safe drinking water or significantly affect the public health or significantly affect the safety or supply of drinking water provided to communities and individuals.

(e) Funding

(1) There are authorized to be appropriated to carry out this section not more than $160,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.
(2) The Administrator, in coordination with State and local governments, may use funds made available under paragraph (1) to provide financial assistance to community water systems for purposes of compliance with the requirements of subsections (a) and (b) of this section and to community water systems for expenses and contracts designed to address basic security enhancements of critical importance and significant threats to public health and the supply of drinking water as determined by a vulnerability assessment conducted under subsection (a) of this section. Such basic security enhancements may include, but shall not be limited to the following:
   (A) the purchase and installation of equipment for detection of intruders;
   (B) the purchase and installation of fencing, gating, lighting, or security cameras;
   (C) the tamper-proofing of manhole covers, fire hydrants, and valve boxes;
   (D) the rekeying of doors and locks;
   (E) improvements to electronic, computer, or other automated systems and remote security systems;
   (F) participation in training programs, and the purchase of training manuals and guidance materials, relating to security against terrorist attacks;
   (G) improvements in the use, storage, or handling of various chemicals; and
   (H) security screening of employees or contractor support services.

Funding under this subsection for basic security enhancements shall not include expenditures for personnel costs, or monitoring, operation, or maintenance of facilities, equipment, or systems.

(3) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems to assist in responding to and alleviating any vulnerability to a terrorist attack or other intentional acts intended to substantially disrupt the ability of the system to provide a safe and reliable supply of drinking water (including sources of water for such systems) which the Administrator determines to present an immediate and urgent security need.

(4) The Administrator may use not more than $5,000,000 from the funds made available under paragraph (1) to make grants to community water systems serving a population of less than 3,300 persons for activities and projects undertaken in accordance with the guidance provided to such systems under subsection (d) of this section.

(2002-07-12)
§ 300i–3. Contaminant prevention, detection and response

(a) In general

The Administrator, in consultation with the Centers for Disease Control and, after consultation with appropriate departments and agencies of the Federal Government and with State and local governments, shall review (or enter into contracts or cooperative agreements to provide for a review of) current and future methods to prevent, detect and respond to the intentional introduction of chemical, biological or radiological contaminants into community water systems and source water for community water systems, including each of the following:

(1) Methods, means and equipment, including real time monitoring systems, designed to monitor and detect various levels of chemical, biological, and radiological contaminants or indicators of contaminants and reduce the likelihood that such contaminants can be successfully introduced into public water systems and source water intended to be used for drinking water.

(2) Methods and means to provide sufficient notice to operators of public water systems, and individuals served by such systems, of the introduction of chemical, biological or radiological contaminants and the possible effect of such introduction on public health and the safety and supply of drinking water.

(3) Methods and means for developing educational and awareness programs for community water systems.

(4) Procedures and equipment necessary to prevent the flow of contaminated drinking water to individuals served by public water systems.

(5) Methods, means, and equipment which could negate or mitigate deleterious effects on public health and the safety and supply caused by the introduction of contaminants into water intended to be used for drinking water, including an examination of the effectiveness of various drinking water technologies in removing, inactivating, or neutralizing biological, chemical, and radiological contaminants.

(6) Biomedical research into the short-term and long-term impact on public health of various chemical, biological and radiological contaminants that may be introduced into public water systems through terrorist or other intentional acts.

(b) Funding

For the authorization of appropriations to carry out this section, see section 300i–4(e) of this title.

Change of Name

§ 300i–4. Supply disruption prevention, detection and response

(a) Disruption of supply or safety

The Administrator, in coordination with the appropriate departments and agencies of the Federal Government, shall review (or enter into contracts or cooperative agreements to provide for a review of) methods and means by which terrorists or other individuals or groups could disrupt the supply of safe drinking water or take other actions against water collection, pretreatment, treatment, storage and distribution facilities which could render such water significantly less safe for human consumption, including each of the following:

(1) Methods and means by which pipes and other constructed conveyances utilized in public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

(2) Methods and means by which collection, pretreatment, treatment, storage and distribution facilities utilized or used in connection with public water systems and collection and pretreatment storage facilities used in connection with public water systems could be destroyed or otherwise prevented from providing adequate supplies of drinking water meeting applicable public health standards.

(3) Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be altered or affected so as to be subject to cross-contamination of drinking water supplies.

(4) Methods and means by which pipes, constructed conveyances, collection, pretreatment, treatment, storage and distribution systems that are utilized in connection with public water systems could be reasonably protected from terrorist attacks or other acts intended to disrupt the supply or affect the safety of drinking water.

(5) Methods and means by which information systems, including process controls and supervisory control and data acquisition and cyber systems at community water systems could be disrupted by terrorists or other groups.

(b) Alternative sources

The review under this section shall also include a review of the methods and means by which alternative supplies of drinking water could be provided in the event of the destruction, impairment or contamination of public water systems.

(c) Requirements and considerations

In carrying out this section and section 300i–3 of this title—

(1) the Administrator shall ensure that reviews carried out under this section reflect the needs of community water systems of various sizes and various geographic areas of the United States; and

(2) the Administrator may consider the vulnerability of, or potential for forced interruption of service for, a region or service area, including community water systems that provide service to the National Capital area.
(d) Information sharing

As soon as practicable after reviews carried out under this section or section 300i–3 of this title have been evaluated, the Administrator shall disseminate, as appropriate as determined by the Administrator, to community water systems information on the results of the project through the Information Sharing and Analysis Center, or other appropriate means.

(e) Funding

There are authorized to be appropriated to carry out this section and section 300i–3 of this title not more than $15,000,000 for the fiscal year 2002 and such sums as may be necessary for the fiscal years 2003 through 2005.

(July 1, 1944, ch. 373, title XIV, §1435, as added Pub. L. 107–188, title IV, §402, June 12, 2002, 116 Stat 686.)

PART E—GENERAL PROVISIONS

§300j. Assurances of availability of adequate supplies of chemicals necessary for treatment of water

(a) Certification of need application

If any person who uses chlorine, activated carbon, lime, ammonia, soda ash, potassium permanganate, caustic soda, or other chemical or substance for the purpose of treating water in any public water system or in any public treatment works determines that the amount of such chemical or substance necessary to effectively treat such water is not reasonably available to him or will not be so available to him when required for the effective treatment of such water, such person may apply to the Administrator for a certification (hereinafter in this section referred to as a “certification of need”) that the amount of such chemical or substance which such person requires to effectively treat such water is not reasonably available to him or will not be so available when required for the effective treatment of such water.

(b) Application requirements; publication in Federal Register; waiver; certification, issuance or denial

(1) An application for a certification of need shall be in such form and submitted in such manner as the Administrator may require and shall (A) specify the persons the applicant determines are able to provide the chemical or substance with respect to which the application is submitted, (B) specify the persons from whom the applicant has sought such chemical or substance, and (C) contain such other information as the Administrator may require.

(2) Upon receipt of an application under this section, the Administrator shall (A) publish in the Federal Register a notice of the receipt of the application and a brief summary of it, (B) notify in writing each person whom the President or his delegate (after consultation with the Administrator) determines could be made subject to an order required to be issued upon the issuance of the certification of need applied for in such application, and (C) provide an opportunity for the submission of written comments on such application. The requirements of the preceding sentence of this paragraph shall not apply when the Administrator for good cause finds (and incorporates the finding with a brief statement of reasons therefor in the order issued) that waiver of such requirements is necessary in order to protect the public health.

(3) Within 30 days after—

(A) the date a notice is published under paragraph (2) in the Federal Register with respect to an application submitted under this section for the issuance of a certification of need, or

(B) the date on which such application is received if as authorized by the second sentence of such paragraph no notice is published with respect to such application,

the Administrator shall take action either to issue or deny the issuance of a certification of need.

(c) Certification of need; issuance; executive orders; implementation of orders; equitable apportionment of orders; factors considered

(1) If the Administrator finds that the amount of a chemical or substance necessary for an applicant under an application submitted under this section to effectively treat water in a public water system or in a public treatment works is not reasonably available to the applicant or will not be so available to him when required for the effective treatment of such water, the Administrator shall issue a certification of need. Not later than seven days following the issuance of such certification, the President or his delegate shall issue an order requiring the provision of such chemical or substance as the Administrator deems necessary in the certification of need issued for such person. Such order shall apply to such manufacturer, producer, or processor of such chemical or substance who manufactures, produces, or processes (as the case may be) such chemical or substance solely for its own use. Persons subject to an order issued under this paragraph shall be given a reasonable opportunity to consult with the President or his delegate with respect to the implementation of the order.

(2) Orders which are to be issued under paragraph (1) to manufacturers, producers, and processors of a chemical or substance shall be equitably apportioned, as far as practicable, among all manufacturers, producers, and processors of such chemical or substance; and orders which are to be issued under paragraph (1) to distributors and repackagers of a chemical or substance shall be equitably apportioned, as far as practicable, among all distributors and repackagers of such chemical or substance. In apportioning orders issued under paragraph (1) to manufacturers, producers, distributors, and repackagers of chlorine, the President or his delegate shall, in carrying out the requirements of the preceding sentence, consider—

(A) the geographical relationships and established commercial relationships between such manufacturers, producers, distributors, dis-
tributors, and repackagers and the persons for whom the orders are issued;

(B) in the case of orders to be issued to producers of chlorine, the (i) amount of chlorine historically supplied by each such producer to treat water in public water systems and public treatment works, and (ii) share of each such producer of the total annual production of chlorine in the United States; and

(C) such other factors as the President or his delegate may determine are relevant to the apportionment of orders in accordance with the requirements of the preceding sentence.

(3) Subject to subsection (f) of this section, any person for whom a certification of need has been issued under this subsection may upon the expiration of the order issued under paragraph (1) upon such certification apply under this section for additional certifications.

(d) Breach of contracts; defense

There shall be available as a defense to any action brought for breach of contract in a Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange a chemical or substance subject to an order issued pursuant to subsection (c)(1) of this section, that such delay or failure was caused solely by compliance with such order.

(e) Penalties for noncompliance with orders; temporary restraining orders and preliminary or permanent injunctions

(1) Whoever knowingly fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be fined not more than $5,000 for each such failure to comply.

(2) Whoever fails to comply with any order issued pursuant to subsection (c)(1) of this section shall be subject to a civil penalty of not more than $2,500 for each such failure to comply.

(3) Whenever the Administrator or the President or his delegate has reason to believe that any person is violating or will violate any order issued pursuant to subsection (c)(1) of this section, that such delay or failure was caused solely by compliance with such order.

(f) Termination date

There shall be available as a defense to any action brought for breach of contract in a Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange a chemical or substance subject to an order issued pursuant to subsection (c)(1) of this section, that such delay or failure was caused solely by compliance with such order.

(a) Specific powers and duties of Administrator

(1) The Administrator may conduct research, studies, and demonstrations relating to the causes, diagnosis, treatment, control, and prevention of physical and mental diseases and other impairments of man resulting directly or indirectly from contaminants in water, or to the provision of a dependably safe supply of drinking water, including—

(A) improved methods (i) to identify and measure the existence of contaminants in drinking water (including methods which may be used by State and local health and water officials), and (ii) to identify the source of such contaminants;

(B) improved methods to identify and measure the health effects of contaminants in drinking water;

(C) new methods of treating raw water to prepare it for drinking, so as to improve the efficiency of water treatment and to remove contaminants from water;

(D) improved methods for providing a dependably safe supply of drinking water, including improvements in water purification and distribution, and methods of assessing the health related hazards of drinking water; and

(E) improved methods of protecting underground water sources of public water systems from contamination.

(2) INFORMATION AND RESEARCH FACILITIES.—In carrying out this subchapter, the Administrator is authorized to—

(A) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water, together with appropriate recommendations in connection with the information; and

(B) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to this subchapter.
(3) The Administrator shall carry out a study of polychlorinated biphenyl contamination of actual or potential sources of drinking water, contamination of such sources by other substances known or suspected to be harmful to public health, the effects of such contamination, and means of removing, treating, or otherwise controlling such contamination. To assist in carrying out this paragraph, the Administrator is authorized to make grants to public agencies and private nonprofit institutions.

(4) The Administrator shall conduct a survey and study of—
(A) disposal of waste (including residential waste) which may endanger underground water which supplies, or can reasonably be expected to supply, any public water systems; and
(B) means of control of such waste disposal.

Not later than one year after December 16, 1974, he shall transmit to the Congress the results of such survey and study, together with such recommendations as he deems appropriate.

(5) The Administrator shall carry out a study of methods of underground injection which do not result in the degradation of underground drinking water sources.

(6) The Administrator shall carry out a study of methods of preventing, detecting, and dealing with surface spills of contaminants which may degrade underground water sources for public water systems.

(7) The Administrator shall carry out a study of virus contamination of drinking water sources and means of control of such contamination.

(8) The Administrator shall carry out a study of the nature and extent of the impact on underground water which supplies or can reasonably be expected to supply public water systems of (A) abandoned injection or extraction wells; (B) intensive application of pesticides and fertilizers in underground water recharge areas; and (C) ponds, pools, lagoons, pits, or other surface disposal of contaminants in underground water recharge areas.

(9) The Administrator shall conduct a comprehensive study of public water supplies and drinking water sources to determine the nature, extent, sources of and means of control of contamination by chemicals or other substances suspected of being carcinogenic. Not later than six months after December 16, 1974, he shall transmit to the Congress the initial results of such study, together with such recommendations for further review and corrective action as he deems appropriate.

(10) The Administrator shall carry out a study of the reaction of chlorine and humic acids and the effects of the contaminants which result from such reaction on public health and on the safety of drinking water, including any carcinogenic effect.

(b) Emergency situations

The Administrator is authorized to provide technical assistance and to make grants to States, or publicly owned water systems to assist in responding to and alleviating any emergency situation affecting public water systems (including sources of water for such systems) which the Administrator determines to present substantial danger to the public health. Grants provided under this subsection shall be used only to support those actions which (i) are necessary for preventing, limiting or mitigating danger to the public health in such emergency situation and (ii) would not, in the judgment of the Administrator, be taken without such emergency assistance. The Administrator may carry out the program authorized under this subsection as part of, and in accordance with the terms and conditions of, any other program of assistance for environmental emergencies which the Administrator is authorized to carry out under any other provision of law. No limitation on appropriations for any such other program shall apply to amounts appropriated under this subsection.

(c) Establishment of training programs and grants for training; training fees

The Administrator shall—
(1) provide training for, and make grants for training (including postgraduate training) of (A) personnel of State agencies which have primary enforcement responsibility and of agencies or units of local government to which enforcement responsibilities have been delegated by the State, and (B) personnel who manage or operate public water systems, and
(2) make grants for postgraduate training of individuals (including grants to educational institutions for traineeships) for purposes of qualifying such individuals to work as personnel referred to in paragraph (1).
(3) make grants to, and enter into contracts with, any public agency, educational institution, and any other organization, in accordance with procedures prescribed by the Administrator, under which he may pay all or part of the costs (as may be determined by the Administrator) of any project or activity which is designed—
(A) to develop, expand, or carry out a program (which may combine training education and employment) for training persons for occupations involving the public health aspects of providing safe drinking water; and
(B) to train inspectors and supervisory personnel to train or supervise persons in occupations involving the public health aspects of providing safe drinking water; or
(C) to develop and expand the capability of programs of States and municipalities to carry out the purposes of this subchapter (other than by carrying out State programs of public water system supervision or underground water source protection (as defined in section 300j–2(c) of this title)).

Reasonable fees may be charged for training provided under paragraph (1)(B) to persons other than personnel of State or local agencies but such training shall be provided to personnel of State or local agencies without charge.

(d) Authorization of appropriations

There are authorized to be appropriated to carry out subsection (b) of this section not more than $35,000,000 for the fiscal year 2002 and such sums as may be necessary for each fiscal year thereafter.
(e) Technical assistance

The Administrator may provide technical assistance to small public water systems to enable such systems to achieve and maintain compliance with applicable national primary drinking water regulations. Such assistance may include circuit-rider and multi-State regional technical assistance programs, training, and preliminary engineering evaluations. The Administrator shall ensure that technical assistance pursuant to this subsection is available in each State. Each nonprofit organization receiving assistance under this subsection shall consult with the State in which the assistance is to be expended or otherwise made available before using assistance to undertake activities to carry out this subsection. There are authorized to be appropriated to the Administrator to be used for such technical assistance $15,000,000 for each of the fiscal years 1997 through 2003. No portion of any State loan fund established under section 300j–12 of this title (relating to State loan funds) and no portion of any funds made available under this subsection may be used for lobbying expenses. Of the total amount appropriated under this subsection, 3 percent shall be used for technical assistance to public water systems owned or operated by Indian Tribes.

(2) Of the total amount appropriated under this subsection, 3 percent shall be utilized for technical assistance to public water systems owned or operated by Indian Tribes.

AMENDMENTS

2002—Subsec. (b). Pub. L. 107–188, § 403(4)(A), which directed substitution of “this subsection” for “this subparagrap1944h”, was executed by making the substitution in three places to reflect the probable intent of Congress.

Subsec. (d). Pub. L. 107–188, § 403(4)(B), amended subsec. (d) generally, substituting provisions relating to authorization of appropriations to carry out subsec. (b) in fiscal year 2002 and subsequent fiscal years for provisions relating to authorization of appropriations to carry out this section in fiscal year 1991 and earlier.

1996—Subsec. (a)(2). Pub. L. 104–182, § 121(4)(A), added heading and text of par. (2) and struck out former par. (2) which read as follows: “(2)(A) The Administrator shall, to the maximum extent feasible, provide technical assistance to the States and municipalities in the establishment and administration of public water system supervision programs (as defined in section 300j–2(c)(1) of this title).”

Subsec. (a)(2)(B). Pub. L. 104–182, § 121(3), redesignated subpar. (B) as subsec. (b) and transferred that subsec. to appear after subsec. (a).

Subsec. (a)(3), (11). Pub. L. 104–182, § 121(4)(B), redesignated par. (11) as (3), transferred that par. to appear before par. (4), and struck out former par. (3) which provided that the Administrator was to conduct studies, and make periodic reports to Congress, on the costs of carrying out regulations prescribed under section 300g–1 of this title.

Subsec. (b). Pub. L. 104–182, § 121(2), (3), redesignated subsec. (a)(2)(B) as subsec. (b), transferred that subsec. to appear after subsec. (a), and struck out former subsec. (b) which read as follows: “In carrying out this subchapter, the Administrator is authorized to—

(1) collect and make available information pertaining to research, investigations, and demonstrations with respect to providing a dependably safe supply of drinking water together with appropriate recommendations in connection therewith;

(2) make available research facilities of the Agency to appropriate public authorities, institutions, and individuals engaged in studies and research relating to the purposes of this subchapter.”

Subsecs. (b)(1), (c)(9). Pub. L. 104–182, § 121(1), which directed redesignation of subsec. (b)(3) as par. (3) of subsec. (d) and transfer of that par. to follow par. (2) of subsec. (d), was executed by redesignating subsec. (b)(3) as par. (3) of subsec. (c) and transferring that par. to follow par. (2) of subsec. (c) to reflect the probable intent of Congress and the redesignation of subsec. (d) as (c) by Pub. L. 104–66. See 1995 Amendment note below.

Moreover, subsec. (d) does not have any pars.

Subsec. (e). Pub. L. 104–182, § 122, amended subsec. (e) generally. Prior to amendment, subsec. (e) read as follows: “The Administrator is authorized to provide technical assistance to public water systems owned or operated by Indian Tribes.”

1995—Subsecs. (c) to (g). Pub. L. 104–66 redesignated subsecs. (d), (f), and (g) as (c), (d), and (e), respectively, and struck out former subsec. (c) which read as follows: “Not later than eighteen months after November 16, 1977, the Administrator shall submit a report to Congress on the present and projected future availability of an adequate and dependable supply of safe drinking water to meet present and projected future need. Such report shall include an analysis of the future demand for drinking water and other competing uses of water, the availability and use of methods to conserve water or reduce demand, the adequacy of present measures to assure adequate and dependable supplies of safe drinking water, and the problems (financial, legal, or other) which need to be resolved in order to assure the availability of such supplies for the future. Existing information and data compiled by the National Water Commission and others shall be utilized to the extent possible.”

1986—Subsec. (e). Pub. L. 99–339, § 301(a), struck out subsec. (e) which authorized the Administrator to make grants to public water systems which are required, under State or local law, to meet standards relating to drinking turbidity which are more stringent than the standards in effect under this subchapter.

Subsec. (f). Pub. L. 99–339, § 301(a), authorized appropriations to carry out subsec. (a)(2)(B) of this section for fiscal years 1987 to 1991 and to carry out provisions of this section other than subsecs. (a)(2)(B) and (g) and provisions relating to research for fiscal years 1987 to 1991.

Subsec. (g). Pub. L. 99–339, § 301(g), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.

1986—Subsec. (e). Pub. L. 99–339, § 301(a), struck out subsec. (e) which authorized the Administrator to make grants to public water systems which are required, under State or local law, to meet standards relating to drinking turbidity which are more stringent than the standards in effect under this subchapter.

Subsec. (f). Pub. L. 99–339, § 301(a), authorized appropriations to carry out subsec. (a)(2)(B) of this section for fiscal years 1987 to 1991 and to carry out provisions of this section other than subsecs. (a)(2)(B) and (g) and provisions relating to research for fiscal years 1987 to 1991.

Subsec. (g). Pub. L. 99–339, § 301(g), authorized appropriations to carry out this subsection of $10,000,000 for each of fiscal years 1987 through 1991 and specified amount to be utilized for public water systems owned or operated by Indian tribes.
§ 300j–2. Grants for State programs

(a) Public water systems supervision programs; applications for grants; allotment of sums; waiver of grant restrictions; notice of approval or disapproval of application; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out public water system supervision programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. The Administrator may not approve an application of a State for its first grant under paragraph (1) unless he determines that the State—

(A) has established or will establish within one year from the date of such grant a public water system supervision program, and

(B) will, within that one year, assume primary enforcement responsibility for public water systems within the State.

No grant may be made to a State under paragraph (1) for any period beginning more than one year after the date of the State's first grant unless the State has assumed and maintains primary enforcement responsibility for public water systems within the State.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient's costs (as determined under regulations of the Administrator) in carrying out, during the one-year period beginning on the date the grant is made, a public water system supervision program.

(4) In each fiscal year the Administrator shall, in accordance, with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, number of public water systems, and other relevant factors. No State shall receive less than 1 per centum of the annual appropriation for grants under paragraph (1): Provided, That the Administrator may, by regulation, reduce such percentage in accordance with the criteria specified in this paragraph: And provided further, That such percentage shall not apply to grants allotted to Guam, American Samoa, or the Virgin Islands.

(5) The prohibition contained in the last sentence of paragraph (2) may be waived by the Administrator with respect to a grant to a State through fiscal year 1979 but such prohibition may only be waived if, in the judgment of the Administrator—

(A) the State is making a diligent effort to assume and maintain primary enforcement responsibility for public water systems within the State;

(B) the State has made significant progress toward assuming and maintaining such primary enforcement responsibility; and

(C) there is reason to believe the State will assume such primary enforcement responsibility by October 1, 1979.

The amount of any grant awarded for the fiscal years 1978 and 1979 pursuant to a waiver under

\[\text{Page 1015 TITLE 42—THE PUBLIC HEALTH AND WELFARE} \]
this paragraph may not exceed 75 per centum of the allotment which the State would have received for such fiscal year if it had assumed and maintained such primary enforcement responsibility. The remaining 25 per centum of the amount allotted to such State for such fiscal year shall be retained by the Administrator, and the Administrator may award such amount to such State at such time as the State assumes such responsibility before the beginning of fiscal year 1980. At the beginning of each fiscal years 1979 and 1980 the amounts retained by the Administrator for any preceding fiscal year and not awarded by the beginning of fiscal year 1979 or 1980 to the States to which such amounts were originally allotted may be removed from the original allotment and reallocated for fiscal year 1979 or 1980 (as the case may be) to States which have assumed primary enforcement responsibility by the beginning of such fiscal year.

(6) The Administrator shall notify the State of the approval or disapproval of any application for a grant under this section—

(A) within ninety days after receipt of such application, or

(B) not later than the first day of the fiscal year for which the grant application is made, whichever is later.

(7) Authorization.—For the purpose of making grants under paragraph (1), there are authorized to be appropriated $100,000,000 for each of fiscal years 1997 through 2003.

(8) Reservation of funds by the Administrator.—If the Administrator assumes the primary enforcement responsibility of a State public water system supervision program, the Administrator may reserve from funds made available pursuant to this subsection an amount equal to the amount that would otherwise have been provided to the State pursuant to this subsection. The Administrator shall use the funds reserved pursuant to this paragraph to ensure the full and effective administration of a public water system supervision program in the State.

(9) State loan funds.—

(A) Reservation of funds.—For any fiscal year for which the amount made available to the Administrator by appropriations to carry out this subsection is less than the amount that the Administrator determines is necessary to supplement funds made available pursuant to paragraph (8) to ensure the full and effective administration of a public water system supervision program in a State, the Administrator may reserve from the funds made available to the State under section 300j–12 of this title relating to State loan funds an amount that is equal to the amount of the shortfall. This paragraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(B) Duty of Administrator.—If the Administrator reserves funds from the allocation of an amount allotted to such State under subparagraph (A), the Administrator shall carry out in the State each of the activities that would be required of the State if the State had primary enforcement authority under section 300g–2 of this title.

(b) Underground water source protection programs; applications for grants; allotment of sums; authorization of appropriations

(1) From allotments made pursuant to paragraph (4), the Administrator may make grants to States to carry out underground water source protection programs.

(2) No grant may be made under paragraph (1) unless an application therefor has been submitted to the Administrator in such form and manner as he may require. No grant may be made to any State under paragraph (1) unless the State has assumed primary enforcement responsibility within two years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title. The prohibition contained in the preceding sentence shall not apply to such grants when made to Indian Tribes.

(3) A grant under paragraph (1) shall be made to cover not more than 75 per centum of the grant recipient’s cost (as determined under regulations of the Administrator) during the one-year period beginning on the date the grant is made, and underground water source protection program.

(4) In each fiscal year the Administrator shall, in accordance with regulations, allot the sums appropriated for such year under paragraph (5) among the States on the basis of population, geographical area, and other relevant factors.

(5) For purposes of making grants under paragraph (1) there are authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1976, $7,500,000 for the fiscal year ending June 30, 1977, $10,000,000 for each of the fiscal years 1978 and 1979, $7,765,000 for the fiscal year ending December 31, 1980, $18,000,000 for the fiscal year ending September 30, 1981, and $21,000,000 for the fiscal year ending September 30, 1982. For the purpose of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

<table>

(c) Definitions

For purposes of this section:

(1) The term “public water system supervision program” means a program for the adoption and enforcement of drinking water regulations (with such variances and exemptions from such regulations under conditions and in a manner which is not less stringent than the conditions under, and the manner in which variances and exemptions may be granted under sections 300g–4 and 300g–5 of this title) which are no less stringent than the national primary drinking water regulations under section 300g–1 of this title, and for keeping records and making reports required by section 300g–2(a)3 of this title.

(2) The term “underground water source protection program” means a program for the adoption and enforcement of a program which meets the requirements of regulations under
section 300h of this title, and for keeping records and making reports required by section 300h–1(b)(1)A(i) of this title. Such term includes, where applicable, a program which meets the requirements of section 300h–4 of this title.

(d) New York City watershed protection program

(1) In general

The Administrator is authorized to provide financial assistance to the State of New York for demonstration projects implemented as part of the watershed program for the protection and enhancement of the quality of source waters of the New York City water supply system, including projects that demonstrate, assess, or provide for comprehensive monitoring and surveillance and projects necessary to comply with the criteria for avoiding filtration contained in 40 CFR 141.71. Demonstration projects which shall be eligible for financial assistance shall be certified to the Administrator by the State of New York as satisfying the purposes of this subsection. In certifying projects to the Administrator, the State of New York shall give priority to monitoring projects that have undergone peer review.

(2) Report

Not later than 5 years after the date on which the Administrator first provides assistance pursuant to this paragraph, the Governor of the State of New York shall submit a report to the Administrator on the results of projects assisted.

(3) Matching requirements

Federal assistance provided under this subsection shall not exceed 50 percent of the total cost of the protection program being carried out for any particular watershed or ground water recharge area.

(4) Authorization

There are authorized to be appropriated to the Administrator to carry out this subsection for each of fiscal years 2003 through 2010, $15,000,000 for the purpose of providing assistance to the State of New York to carry out paragraph (1).

AMENDMENTS

1996—Subsec. (a)(7). Pub. L. 104–182, §124(1), inserted heading and amended text generally. Prior to amendment, text read as follows: “For purposes of making grants under paragraph (1) there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1976, $25,000,000 for the fiscal year ending June 30, 1977, $35,000,000 for fiscal year 1978, $45,000,000 for fiscal year 1979, $39,450,000 for the fiscal year ending September 30, 1980, $32,000,000 for the fiscal year ending September 30, 1981, and $34,000,000 for the fiscal year ending September 30, 1982. For the purposes of making grants under paragraph (1) there are authorized to be appropriated not more than the following amounts:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>1987</td>
<td>$37,200,000</td>
</tr>
<tr>
<td>1988</td>
<td>$37,200,000</td>
</tr>
<tr>
<td>1989</td>
<td>$40,150,000</td>
</tr>
<tr>
<td>1990</td>
<td>$40,150,000</td>
</tr>
<tr>
<td>1991</td>
<td>$40,150,000</td>
</tr>
</tbody>
</table>

Subsec. (a)(8), (9). Pub. L. 104–182, §124(2), added pars. (8) and (9).

Subsec. (b)(5). Pub. L. 104–182, §120(c), added subpars. (8) and (9).

1986—Subsec. (a)(2). Pub. L. 99–339, §302(d)(1), inserted provision that limitations contained in preceding two sentences not apply to such grants when made to Indian Tribes.

Subsec. (a)(7). Pub. L. 99–339, §301(b), authorized appropriations for grants under par. (1) of not more than $37,200,000 for fiscal years 1987 and 1988 and of not more than $40,150,000 for fiscal years 1989 to 1991.

Subsec. (b)(2). Pub. L. 99–339, §302(d)(2), inserted provision that limitations contained in preceding sentence not apply to such grants when made to Indian Tribes.

Subsec. (b)(5). Pub. L. 99–339, §301(c), authorized appropriations for grants under par. (1) of not more than $19,700,000 for fiscal years 1987 and 1988 and of not more than $20,850,000 for fiscal years 1989 to 1991.

1980—Subsec. (b)(2). Pub. L. 96–502, §4(d), substituted provisions that no grant may be made to any State under par. (1) unless the State has assumed primary enforcement responsibility within two years after the date the Administrator promulgates regulations for State underground injection control programs under section 300h of this title for provisions that the Administrator may not approve an application of a State for its first grant under par. (1) unless he determines that the State has established or will establish within two years from the date of such grant an underground water source protection, and, within such two years, assume primary enforcement responsibility for underground water sources within the State and that no grant may be made to a State under par. (1) for any period beginning more than two years after the date of the State’s first grant unless the State has assumed and maintains primary enforcement responsibility for underground water sources within the State.

Subsec. (c)(2). Pub. L. 96–502, §2(c), inserted provision that such term includes, where applicable, a program which meets requirements of section 300h–4 of this title.

1979—Subsec. (a)(7). Pub. L. 96–63, §2(a), authorized appropriation of $29,450,000, $32,000,000, and $34,000,000 for fiscal years ending Sept. 30, 1980, 1980, through 1982, respectively.

Subsec. (b)(5). Pub. L. 96–63, §2(b), authorized appropriation of $7,795,000, $18,000,000, and $21,000,000 for fiscal years ending Sept. 30, 1980, through 1982, respectively.

Subsec. (a)(7). Pub. L. 95–190, §§2(b), 5(a), redesignated former par. (6) as (7) and authorized appropriations for fiscal years 1978 and 1979.

§300j–3. Special project grants and guaranteed loans

(a) Special study and demonstration project grants

The Administrator may make grants to any person for the purposes of—

(1) assisting in the development and demonstration (including construction) of any
project which will demonstrate a new or improved method, approach, or technology, for providing a dependably safe supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health implications involved in the reclamation, recycling, and reuse of waste waters for drinking and the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations

Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66⅔ per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consulting the National Drinking Water Advisory Council, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(4) Priority for grants under this section shall be given where there are known or potential public health hazards which require advanced technology for the removal of particles which are too small to be removed by ordinary treatment technology.

(c) Authorization of appropriations

For the purposes of making grants under subsections (a) and (b) of this section there are authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1975; and $7,500,000 for the fiscal year ending June 30, 1976.

(d) Loan guarantees to public water systems; conditions; indebtedness limitation; regulations

The Administrator during the fiscal years ending June 30, 1975, and June 30, 1976, shall carry out a program of guaranteeing loans made by private lenders to small public water systems for the purpose of enabling such systems to meet national primary drinking water regulations prescribed under section 300g–1 of this title. No such guarantee may be made with respect to a system unless (1) such system cannot reasonably obtain financial assistance necessary to comply with such regulations from any other source, and (2) the Administrator determines that any facilities constructed with a loan guaranteed under this subsection is not likely to be made obsolete by subsequent changes in primary regulations. The aggregate amount of indebtedness guaranteed with respect to any system may not exceed $50,000. The aggregate amount of indebtedness guaranteed under this subsection may not exceed $50,000,000. The Administrator shall prescribe regulations to carry out this subsection.

AMENDMENTS

§ 300j–3a. Grants to public sector agencies

(a) Assistance for development and demonstration projects

The Administrator of the Environmental Protection Agency shall offer grants to public sector agencies for the purposes of—

(1) assisting in the development and demonstration (including construction) of any project which will demonstrate a new or improved method, approach, or technology for providing a dependably safe supply of drinking water to the public; and

(2) assisting in the development and demonstration (including construction) of any project which will investigate and demonstrate health and conservation implications involved in the reclamation, recycling, and reuse of wastewaters for drinking and agricultural use or the processes and methods for the preparation of safe and acceptable drinking water.

(b) Limitations

Grants made by the Administrator under this section shall be subject to the following limitations:

(1) Grants under this section shall not exceed 66⅔ per centum of the total cost of construction of any facility and 75 per centum of any other costs, as determined by the Administrator.

(2) Grants under this section shall not be made for any project involving the construction or modification of any facilities for any public water system in a State unless such project has been approved by the State agency charged with the responsibility for safety of drinking water (or if there is no such agency in a State, by the State health authority).

(3) Grants under this section shall not be made for any project unless the Administrator determines, after consultation, that such project will serve a useful purpose relating to the development and demonstration of new or improved techniques, methods, or technologies for the provision of safe water to the public for drinking.

(4) Priority for grants under this section shall be given where there are known or potential public health hazards which require advanced technology for the removal of particles which are too small to be removed by ordinary treatment technology.

(c) Authorization of appropriations

For the purposes of making grants under subsections (a) and (b) of this section there are authorized to be appropriated $25,000,000 for fiscal year 1978.

§ 300j–3b. Contaminant standards or treatment technique guidelines

(1) Not later than nine months after October 18, 1978, the Administrator shall promulgate guidelines establishing supplemental standards or treatment technique requirements for microbiological, viral, radiological, organic, and inorganic contaminants, which guidelines shall be conditions, as provided in paragraph (2), of any grant for a demonstration project for water reclamation, recycling, and reuse funded under section 300j–3a of this title or under section 300j–3(a)(2) of this title, where such project involves direct human consumption of treated wastewater. Such guidelines shall provide for sufficient control of each such contaminant, such that in the Administrator’s judgment, no adverse effects on the health of persons may reasonably be anticipated to occur, allowing an adequate margin of safety.

(2) A grant referred to in paragraph (1) for a project which involves direct human consumption of treated wastewater may be awarded on or after the date of promulgation of guidelines under this section only if the applicant demonstrates to the satisfaction of the Administrator that the project—

(A) will comply with all national primary drinking water regulations under section 300g–1 of this title;

(B) will comply with all guidelines under this section; and

(C) will in other respects provide safe drinking water.

Any such grant awarded before the date of promulgation of such guidelines shall be conditioned on the applicant’s agreement to comply to the maximum feasible extent with such guidelines as expeditiously as practicable following the date of promulgation thereof.

(3) Guidelines under this section may, in the discretion of the Administrator—

(A) be nationally and uniformly applicable to all projects funded under section 300j–3a of this title or section 300j–1(a)(2);

(B) vary for different classes or categories of such projects (as determined by the Administrator);

(C) be established and applicable on a project-by-project basis; or

(D) any combination of the above.

(4) Nothing in this section shall be construed to prohibit or delay the award of any grant referred to in paragraph (1) prior to the date of promulgation of such guidelines.

REFERENCES IN TEXT

Section 300j–1(a)(2) of this title, referred to in par. (3)(A), was amended by Pub. L. 104–182, title I, §121(3), (4)(A), Aug. 6, 1996, 110 Stat. 1651, to redesignate par. (2)(B) as subsec. (b) of section 300j–1, strike par. (2)(A), and add a new par. (2) relating to information and research facilities.

§ 300j–3c. National assistance program for water infrastructure and watersheds

(a) Technical and financial assistance

The Administrator of the Environmental Protection Agency may provide technical and financial assistance in the form of grants to States (1) for the construction, rehabilitation, and improvement of water supply systems, and (2) consistent with nonpoint source management programs established under section 1329 of title 33, for source water quality protection programs to address pollutants in navigable waters for the purpose of making such waters usable by water supply systems.

(b) Limitation

Not more than 30 percent of the amounts appropriated to carry out this section in a fiscal year may be used for source water quality protection programs described in subsection (a)(2).

(c) Condition

As a condition to receiving assistance under this section, a State shall ensure that such assistance is carried out in the most cost-effective manner, as determined by the State.

(d) Authorization of appropriations

(1) Unconditional authorization

There are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003. Such sums shall remain available until expended.

(2) Conditional authorization

In addition to amounts authorized under paragraph (1), there are authorized to be appropriated to carry out this section $25,000,000 for each of fiscal years 1997 through 2003, provided that such authorization shall be in effect for a fiscal year only if at least 75 percent of the total amount of funds authorized to be appropriated for such fiscal year by section 300j–12(m) of this title are appropriated.

(e) Acquisition of lands

Assistance provided with funds made available under this section may be used for the acquisition of lands and other interests in lands; however, nothing in this section authorizes the acquisition of lands or other interests in lands from other than willing sellers.

(f) Federal share

The Federal share of the cost of activities for which grants are made under this section shall be 50 percent.
§ 300j–4. Records and inspections

(a) Provision of information to Administrator; monitoring program for unregulated contaminants

(1)(A) Every person who is subject to any requirement of this subchapter or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regulation to assist the Administrator in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with this subchapter, in determining whether such person is located if such State has primary enforcement responsibility for public water systems and to be included in the national drinking water occurrence data base maintained pursuant to subsection (g) of this section.

(B) Every person who is subject to a national primary drinking water regulation under section 300g–1 of this title shall provide such information as the Administrator may reasonably require to assist the Administrator in establishing regulations under section 300g–1 of this title, after consultation with States and suppliers of water.

(2) Monitoring program for unregulated contaminants

(A) Establishment. The Administrator shall promulgate regulations establishing the criteria for a monitoring program for unregulated contaminants. The regulations shall require monitoring of drinking water supplied by public water systems serving 10,001 persons or fewer, and shall vary the frequency and schedule for monitoring requirements for systems based on the number of persons served by the system, the source of supply, and the contaminants likely to be found, ensuring that only a representative sample of systems serving 10,000 persons or fewer are required to monitor.

(B) Monitoring plan for certain unregulated contaminants.

(i) Initial list. Not later than 3 years after August 6, 1996, and every 5 years thereafter, the Administrator shall issue a list pursuant to subparagraph (A) of not more than 30 unregulated contaminants to be monitored by public water systems and to be included in the national drinking water occurrence data base maintained pursuant to subsection (g) of this section.

(ii) Governors’ petition. The Administrator shall include among the list of contaminants for which monitoring is required under this paragraph each contaminant recommended in a petition signed by the Governor of each of 7 or more States, unless the Administrator determines that the action would prevent the listing of other contaminants of a higher public health concern.

(C) Monitoring plan for small and medium systems.

(i) In general. Based on the regulations promulgated by the Administrator, each State may develop a representative monitoring plan to assess the occurrence of unregulated contaminants in public water systems that serve a population of 10,000 or fewer in that State. The plan shall require monitoring for systems representative of different sizes, types, and geographic locations in the State.

(ii) Grants for small system costs. From funds reserved under section 300j–12(o)
of this title or appropriated under subpara-
graph (H), the Administrator shall pay the
reasonable cost of such testing and labora-
tory analysis as are necessary to carry out
monitoring under the plan.

(D) Monitoring Results.—Each public water
system that conducts monitoring of unregu-
lated contaminants pursuant to this para-
graph shall provide the results of the monitor-
ing to the primary enforcement authority for
the system.

(E) Notification.—Notification of the avail-
ability of the results of monitoring programs
required under paragraph (D) shall be given
in accordance with 

(F) Waiver of Monitoring Requirement.—
The Administrator shall waive the require-
ment for monitoring for a contaminant under
this paragraph in a State, if the State dem-
onstrates that the criteria for listing the con-
taminant do not apply in that State.

(G) Analytical Methods.—The State may
use screening methods approved by the Ad-
ministrator under subsection (i) of this section
in lieu of monitoring for particular contami-
nants under this paragraph.

(H) Authorization of Appropriations.—
There are authorized to be appropriated to
carry out this paragraph $10,000,000 for each of
the fiscal years 1997 through 2003.

(b) Entry of establishments, facilities, or other
property; inspections; conduct of certain
tests; audit, and examination of records;
entry restrictions; prohibition against in-
forming of a proposed entry

(1) Except as provided in paragraph (2), the Ad-
ministrator, or representatives of the Admin-
istrator duly designated by him, upon presenting
appropriate credentials and a written notice to
any supplier of water or other person subject to
(A) a national primary drinking water regula-
tion prescribed under section 300g–1 of this title,
(B) an applicable underground injection control
program, or (C) any requirement to monitor an
unregulated contaminant pursuant to sub-
section (a) of this section, or person in charge of
any of the property of such supplier or other
person referred to in clause (A), (B), or (C), is au-
thorized to enter any establishment, facility, or
other property of such supplier or other person
in order to determine whether such supplier or
other person has acted or is acting in compli-
ance with this subchapter, including for this
purpose, inspection, at reasonable times, of
records, files, papers, processes, controls, and fa-
cilities, or in order to test any feature of a pub-
lic water system, including its raw water source.
The Administrator or the Comptroller General
(or any representative designated by either)
shall have access for the purpose of audit and
examination to any records, reports, or informa-
tion of a grantee which are required to be main-
tained under subsection (a) of this section or
which are pertinent to any financial assistance
under this subchapter.

(2) No entry may be made under the first
sentence of paragraph (1) in an establishment, faci-
ility, or other property of a supplier of water or
other person subject to a national primary
drinking water regulation if the establishment,
facility, or other property is located in a State
which has primary enforcement responsibility
for public water systems unless, before written
notice of such entry is made, the Administrator
(or his representative) notifies the State agency
charged with responsibility for safe drinking
water of the reasons for such entry. The Admin-
istrator shall, upon a showing by the State
agency that such an entry will be detrimental to
the administration of the State’s program of
primary enforcement responsibility, take such
showing into consideration in determining
whether to make such entry. No State agency
which receives notice under this paragraph of an
entry proposed to be made under paragraph (1)
may use the information contained in the notice
to inform the person whose property is proposed
to be entered of the proposed entry; and if a State
agency so uses such information, notice to
the agency under this paragraph is not required
until such time as the Administrator determines
the agency has provided him satisfactory assur-
ances that it will no longer so use information
contained in a notice under this paragraph.

(c) Penalty

Whoever fails or refuses to comply with any
requirement of subsection (a) of this section or
to allow the Administrator, the Comptroller
General, or representatives of either, to enter
and conduct any audit or inspection authorized
by subsection (b) of this section shall be subject
to a civil penalty of not to exceed $50,000.

(d) Confidential information; trade secrets
and secret processes; information disclosure; “in-
formation required under this section” de-

ified

(1) Subject to paragraph (2), upon a showing
satisfactory to the Administrator by any person
that any information required under this section
from such person, if made public, would divulge
trade secrets or secret processes of such person,
the Administrator shall consider such informa-
tion confidential in accordance with the pur-
poses of section 1905 of title 18. If the applicant
fails to make a showing satisfactory to the Ad-
ministrator, the Administrator shall give such
applicant thirty days’ notice before releasing the
information to which the application relates
(unless the public health or safety requires an
earlier release of such information).

(2) Any information required under this sec-
tion (A) may be disclosed to other officers, em-
ployees, or authorized representatives of the
United States concerned with carrying out this
subchapter or to committees of the Congress, or
when relevant in any proceeding under this sub-
chapter, and (B) shall be disclosed to the extent
it deals with the level of contaminants in drink-
ing water. For purposes of this subsection the
term “information required under this section”
means any papers, books, documents, or informa-
tion, or any particular part thereof, reported to
or otherwise obtained by the Administrator
under this section.

(e) “Grantee” and “person” defined

For purposes of this section, (1) the term
“grantee” means any person who applies for or
receives financial assistance, by grant, contract,
or loan guarantee under this subchapter, and (2)
the term “person” includes a Federal agency.
§ 300j–4

(f) Information regarding drinking water coolers

The Administrator may utilize the authorities of this section for purposes of part F of this subchapter. Any person who manufactures, imports, sells, or distributes drinking water coolers in interstate commerce shall be treated as a supplier of water for purposes of applying the provisions of this section in the case of persons subject to part F of this subchapter.

(g) Occurrence data base

(1) In general

Not later than 3 years after August 6, 1996, the Administrator shall assemble and maintain a national drinking water contaminant occurrence data base, using information on the occurrence of both regulated and unregulated contaminants in public water systems obtained under subsection (a)(1)(A) of this section or subsection (a)(2) of this section and reliable information from other public and private sources.

(2) Public input

In establishing the occurrence data base, the Administrator shall solicit recommendations from the Science Advisory Board, the States, and other interested parties concerning the development and maintenance of a national drinking water contaminant occurrence data base, including such issues as the structure and design of the data base, data input parameters and requirements, and the use and interpretation of data.

(3) Use

The data shall be used by the Administrator in making determinations under section 300g–1(b)(1) of this title with respect to the occurrence of a contaminant in drinking water at a level of public health concern.

(4) Public recommendations

The Administrator shall periodically solicit recommendations from the appropriate officials of the National Academy of Sciences and the States, and any person may submit recommendations to the Administrator, with respect to contaminants that should be included in the national drinking water contaminant occurrence data base, including recommendations with respect to additional unregulated contaminants that should be listed under subsection (a)(2) of this section. Any recommendation submitted under this clause shall be accompanied by reasonable documentation that—

(A) the contaminant occurs or is likely to occur in drinking water; and

(B) the contaminant poses a risk to public health.

(5) Public availability

The information from the data base shall be available to the public in readily accessible form.

(6) Regulated contaminants

With respect to each contaminant for which a national primary drinking water regulation has been established, the data base shall include information on the detection of the contaminant at a quantifiable level in public water systems (including detection of the contaminant at levels not constituting a violation of the maximum contaminant level for the contaminant).

(7) Unregulated contaminants

With respect to contaminants for which a national primary drinking water regulation has not been established, the data base shall include—

(A) monitoring information collected by public water systems that serve a population of more than 10,000, as required by the Administrator under subsection (a) of this section;

(B) monitoring information collected from a representative sampling of public water systems that serve a population of 10,000 or fewer; and

(C) other reliable and appropriate monitoring information on the occurrence of the contaminants in public water systems that is available to the Administrator.

(h) Availability of information on small system technologies

For purposes of sections 300g–1(b)(4)(E) and 300g–4(e) of this title (relating to small system variance program), the Administrator may request information on the characteristics of commercially available treatment systems and technologies, including the effectiveness and performance of the systems and technologies under various operating conditions. The Administrator may specify the form, content, and submission date of information to be submitted by manufacturers, States, and other interested persons for the purpose of considering the systems and technologies in the development of regulations or guidance under sections 300g–1(b)(4)(E) and 300g–4(e) of this title.

(i) Screening methods

The Administrator shall review new analytical methods to screen for regulated contaminants and may approve such methods as are more accurate or cost-effective than established reference methods for use in compliance monitoring.

-Amendments-

1996—Subsec. (a)(1). Pub. L. 104–182, § 125(a), amended par. (1) generally. Prior to amendment, par. (1) read as follows: ‘‘Every person who is a supplier of water, who is or may be otherwise subject to a primary drinking water regulation prescribed under section 300g–1 of this title or to an applicable underground injection control program (as defined in section 300h–1(c) of this title), who is or may be subject to the permit requirement of section 300h–3 of this title, or to an order issued under section 300j of this title, or who is a grantee, shall establish and maintain such records, make such reports, conduct such monitoring, and provide such information as the Administrator may reasonably require by regul-
lation to assist him in establishing regulations under this subchapter, in determining whether such person has acted or is acting in compliance with this subchapter, and in administering any program of financial assistance under this subchapter, in evaluating the health risks of unregulated contaminants, or in advising the public of such risks. In requiring a public water system to monitor under this subsection, the Administrator may take into consideration the system size and the contaminants likely to be found in the system’s drinking water. The members of the Council shall be eligible for reappointment.

(b) Functions

The Council shall advise, consult with, and make recommendations to, the Administrator on matters relating to activities, functions, and policies of the Agency under this subchapter.

(c) Compensation and allowances; travel expenses

Members of the Council appointed under this section shall, while attending meetings or conferences of the Council or otherwise engaged in business of the Council, receive compensation and allowances at a rate to be fixed by the Administrator, but not exceeding the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including traveltime in lieu of subsistence, in the same manner as persons employed intermittently in the Government service) on which they are engaged in the actual performance of duties vested in the Council. While away from their homes or regular places of business in the performance of services for the Council, members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5.

(d) Advisory committee termination provision inapplicable

Section 14(a) of the Federal Advisory Committee Act (relating to termination) shall not apply to the Council.

References in Text

Section 5703 of title 5, referred to in subsec. (c), was amended generally by Pub. L. 94–22, § 4, May 19, 1973, 87 Stat. 85, and, as so amended, does not contain a subsec. (b).

Section 14(a) of the Federal Advisory Committee Act, referred to in subsec. (d), is section 14(a) of Pub. L. 92–463, which is set out as a note under section 14(a) of the Federal Advisory Committee Act (relating to termination) shall not apply to the Council.

AMENDMENTS

1996—Subsec. (a). Pub. L. 104–182 inserted “, of which two such members shall be associated with small, rural public water systems” before period at end of second sentence.

Termination of Advisory Committees

Pub. L. 93–641, § 6, Jan. 4, 1975, 88 Stat. 2275, set out as a note under section 27a of this title, provided that an advisory committee established pursuant to the Public Health Service Act shall terminate at such time as may be specifically prescribed by an Act of Congress enacted after Jan. 4, 1975.

References in Other Laws

References in laws to the rates of pay for GS–16, 17, or 18 pay rates

References in laws to the rates of pay for GS–16, 17, or 18, or to maximum rates of pay under the General Schedule, to be considered references to rates payable under specified sections of Title 5, Government Organization and Employees, see section 5309 of Title 5.

1 See References in Text note below.
§ 300j–6. Federal agencies

(a) In general

Each department, agency, and instrumental-ity of the executive, legislative, and judicial branches of the Federal Government—

(1) owning or operating any facility in a wellhead protection area;
(2) engaged in any activity at such facility resulting, or which may result, in the contamination of water supplies in any such area;
(3) owning or operating any public water sys-
tem; or

(4) engaged in any activity resulting, or which may result in, underground injection which endangers drinking water (within the meaning of section 300h(d)(2) of this title),

shall be subject to, and comply with, all Fed-
eral, State, interstate, and local substantive and procedural (including any requirement for permits or reporting or any pro-
visions for injunctive relief and such sanctions as may be imposed by a court to enforce such relief), respecting the protection of such wellhead areas, respecting such public water systems, and respecting any underground injection in the same manner and to the same extent as any person is subject to such requirements, including the payment of reasonable service charges. The Federal, State, interstate, and local substantive and procedural requirements referred to in this subsection include, but are not limited to, all Federal, State, interstate, or local regulatory program respecting or which may result in, underground injection with respect to any wellhead protection area;

(b) Administrative penalty orders

(1) In general

If the Administrator finds that a Federal agency has violated an applicable requirement under this subchapter, the Administrator may issue a penalty order assessing a penalty against the Federal agency.

(2) Penalties

The Administrator may, after notice to the agency, assess a civil penalty against the agency in an amount not to exceed $25,000 per day per violation.

(3) Procedure

Before an administrative penalty order issued under this subsection becomes final, the Administrator shall provide the agency the opportunity to confer with the Administrator and shall provide the agency notice and an opportunity for a hearing on the record in accordance with chapters 5 and 7 of title 5.

(4) Public review

(A) In general

Any interested person may obtain review of an administrative penalty order issued under this subsection. The review may be obtained in the United States District Court for the District of Columbia or in the United States District Court for the district in which the violation is alleged to have occurred by the filing of a complaint with the court within the 30-day period beginning on the date the penalty order becomes final. The person filing the complaint shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General.

(B) Record

The Administrator shall promptly file in the court a certified copy of the record on which the order was issued.

1 So in original. Probably should not be capitalized.
(C) Standard of review

The court shall not set aside or remand the order unless the court finds that there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(D) Prohibition on additional penalties

The court may not impose an additional civil penalty for a violation that is subject to the order unless the court finds that the assessment constitutes an abuse of discretion by the Administrator.

(c) Limitation on State use of funds collected from Federal Government

Unless a State law in effect on August 6, 1996, or a State constitution requires the funds to be used in a different manner, all funds collected by a State from the Federal Government from penalties and fines imposed for violation of any substantive or procedural requirement referred to in subsection (a) of this section shall be used by the State only for projects designed to improve or protect the environment or to defray the costs of environmental protection or enforcement.

(d) Indian rights and sovereignty as unaffected; "Federal agency" defined

(1) Nothing in the Safe Drinking Water Amendments of 1977 shall be construed to alter or affect the status of American Indian lands or water rights nor to waive any sovereignty over Indian lands guaranteed by treaty or statute.

(2) For the purposes of this chapter, the term "Federal agency" shall not be construed to refer to or include any American Indian tribe, nor to the Secretary of the Interior in his capacity as trustee of Indian lands.

(e) Washington Aqueduct

The Secretary of the Army shall not pass the cost of any penalty assessed under this subchapter on to any customer, user, or other purchaser of drinking water from the Washington Aqueduct system, including finished water from the Dalecarlia or McMillan treatment plant.

(1) For the purposes of this chapter, the term "Federal agency" shall be construed to include the United States Environmental Protection Agency, the United States Army Corps of Engineers, and the United States Bureau of Reclamation, their respective employees, and the District of Columbia Water and Sewer Authority.

(2) Nothing in this chapter shall be construed to alter, amend, or affect the status of tribal land or water rights or to waive any sovereignty over Indian lands guaranteed by treaty or statute.

(3) Nothing in this chapter shall be construed to alter, amend, or affect the status of any Federal agency having jurisdiction over federally owned or maintained public water systems, or engaged in underground injection activities with Federal, State, and local requirements, etc., for provisions relating to compliance by Federal agencies having jurisdiction over federally owned or maintained public water systems with national primary drinking water regulations.

§300j–7. Judicial review

(a) Courts of appeals; petition for review: actions respecting regulations; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

A petition for review of—

(1) actions pertaining to the establishment of national primary drinking water regulations (including maximum contaminant level goals) may be filed only in the United States Court of Appeals for the District of Columbia circuit; and

(2) any other final action of the Administrator under this chapter may be filed in the circuit in which the petitioner resides or transacts business which is directly affected by the action.

Any such petition shall be filed within the 45-day period beginning on the date of the promulgation of the regulation or any other final Agency action with respect to which review is sought or on the date of the determination with respect to which review is sought, and may be filed after the expiration of such 45-day period if the petition is based solely on grounds arising after the expiration of such period. Action of the Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement. In any petition concerning the assessment of a civil penalty pursuant to section 300g–3(g)(3)(B) of this title, the petitioner shall simultaneously send a copy of the complaint by certified mail to the Administrator and to the Attorney General. The court shall set aside and remand the penalty order if the court finds that there is not substantial evidence in the record to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.

(b) District courts; petition for review: actions respecting variances or exemptions; filing period; grounds arising after expiration of filing period; exclusiveness of remedy

The United States district courts shall have jurisdiction of actions brought to review (1) the granting of, or the refusing to grant, a variance or exemption under section 300g–4 or 300g–5 of this title or (2) the requirements of any schedule prescribed for a variance or exemption under such section or the failure to prescribe such a schedule. Such an action may only be brought upon a petition for review filed with the court within the 45-day period beginning on the date the action sought to be reviewed is taken or, in the case of a petition to review the refusal to...
§ 300j–8  TITLE 42—THE PUBLIC HEALTH AND WELFARE  Page 1026

grant a variance or exemption or the failure to prescribe a schedule, within the 45-day period beginning on the date action is required to be taken on the variance, exemption, or schedule, as the case may be. A petition for such review may be filed after the expiration of such period if the petition is based solely on grounds arising after the expiration of such period. Action with respect to which review could have been obtained under this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement or in any civil action to enjoin enforcement.

(c) Judicial order for additional evidence before Administrator; modified or new findings; recommendation for modification or setting aside of original determination

In any judicial proceeding in which review is sought of a determination under this subchapter required to be made on the record after notice and opportunity for hearing, if any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Administrator, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Administrator, in such manner and upon such term and conditions as the court may deem proper. The Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original determination, with the return of such additional evidence. (July 1, 1944, ch. 373, title XIV, §1448, as added Pub. L. 93–523, §2(a), Dec. 16, 1974, 88 Stat. 1689; amended Pub. L. 99–339, title III, §303, June 19, 1986, 100 Stat. 667; Pub. L. 104–182, title I, §113(c), Aug. 6, 1996, 110 Stat. 1636.)

AMENDMENTS

1996—Subsec. (a). Pub. L. 104–182, §113(c)(2), (3), in concluding provisions, substituted “or any other final Agency action” for “or issuance of the order” and inserted at end “In any petition concerning the assessment of a civil penalty pursuant to section 300g–1 of this title, any regulation under section 300g–3(g)(3)(B) of this title, the petitioner shall simultaneously send a copy of the complaint by certified mail to the Administrator and the Attorney General. The court shall set aside and remand the penalty order if the court finds that there is not substantial evidence in the record to support the finding of a violation or that the assessment of the penalty by the Administrator constitutes an abuse of discretion.”

Subsec. (a)(2). Pub. L. 104–182, §113(c)(1), substituted “any other final action” for “any other action”.

1986—Subsec. (a)(1). Pub. L. 99–339, §303(1), amended par. (1) generally. Prior to amendment, par. (1) read as follows: “action of the Administrator in promulgating any national primary drinking water regulation under section 300g–1 of this title, any regulation under section 300g–2(b)(1) of this title, any regulation under section 300g–3(b) of this title, any regulation for State underground injection control programs under section 300h of this title, or any general regulation for the administration of this subchapter may be filed only in the United States Court of Appeals for the District of Columbia Circuit; and”.

Subsec. (a)(2). Pub. L. 99–339, §303(2), amended par. (2) generally. Prior to amendment, par. (2) read as follows:

“action of the Administrator in promulgating any other regulation under this subchapter, issuing any order under this subchapter, or making any determination under this subchapter may be filed only in the United States court of appeals for the appropriate circuit.”

§ 300j–8. Citizen’s civil action

(a) Persons subject to civil action; jurisdiction of enforcement proceedings

Except as provided in subsection (b) of this section, any person may commence a civil action on his own behalf—

(1) against any person (including (A) the United States, and (B) any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any requirement prescribed by or under this subchapter;

(2) against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this subchapter which is not discretionary with the Administrator; or

(3) for the collection of a penalty by the United States Government (and associated costs and interest) against any Federal agency that fails, by the date that is 18 months after the effective date of a final order to pay a penalty assessed by the Administrator under section 300h–8(b)1 of this title, to pay the penalty.

No action may be brought under paragraph (1) against a public water system for a violation of a requirement prescribed by or under this subchapter which occurred within the 27-month period beginning on the first day of the month in which this subchapter is enacted. The United States district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce in an action brought under this subsection any requirement prescribed by or under this subchapter or to order the Administrator to perform an act or duty described in paragraph (2), as the case may be.

(b) Conditions for commencement of civil action; notice

No civil action may be commenced—

(1) under subsection (a)(1) of this section respecting violation of a requirement prescribed by or under this subchapter—

(A) prior to sixty days after the plaintiff has given notice of such violation (i) to the Administrator, (ii) to any alleged violator of such requirement and (iii) to the State in which the violation occurs, or

(B) if the Administrator, the Attorney General, or the State has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such requirement, but in any such action in a court of the United States any person may intervene as a matter of right;

or

(2) under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice of such action to the Administrator; or

1 So in original. Probably should be section “300j–6(b)”.
Notice required by this subsection shall be given in such manner as the Administrator shall prescribe by regulation. No person may commence a civil action under subsection (a) of this section to require a State to prescribe a schedule under section 300q–4 or 300q–5 of this title for a variance or exemption, unless such person shows to the satisfaction of the court that the State has in a substantial number of cases failed to prescribe such schedules.

(c) Intervention of right

In any action under this section, the Administrator or the Attorney General, if not a party, may intervene as a matter of right.

(d) Costs; attorney fees; expert witness fees; filing of bond

The court, in issuing any final order in any action brought under subsection (a) of this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

(e) Availability of other relief

Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any requirement prescribed by or under this subchapter or to seek any other relief. Nothing in this section or in any other law of the United States shall be construed to prohibit, exclude, or restrict any State or local government from—

(1) bringing any action or obtaining any remedy or sanction in any State or local court, or

(2) bringing any administrative action or obtaining any administrative remedy or sanction, against any agency of the United States under State or local law to enforce any requirement respecting the provision of safe drinking water or respecting any underground injection control program. Nothing in this section shall be construed to authorize judicial review of regulations or orders of the Administrator under this subchapter, except as provided in section 300j–7 of this title. For provisions providing for application of certain requirements to such agencies in the same manner as to nongovernmental entities, see section 300j–6 of this title.

References in Text

The Federal Rules of Civil Procedure, referred to in subsec. (d), are set out in the Appendix to Title 28, Judiciary and Judicial Procedure.
the Administrator is a party. Unless, within a reasonable time, the Attorney General notifies the Administrator that he will appear in such action, attorneys appointed by the Administrator shall appear and represent him.

(g) Authority of Administrator under other provisions unaffected

The provisions of this subchapter shall not be construed as affecting any authority of the Administrator under part G of subchapter II of this chapter.

(h) Reports to Congressional committees; review by Office of Management and Budget: submittal of comments to Congressional committees

Not later than April 1 of each year, the Administrator shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report respecting the activities of the Agency under this subchapter and containing such recommendations for legislation as he considers necessary. The report of the Administrator under this subsection which is due not later than April 1, 1975, and each subsequent report of the Administrator under this subsection shall include a statement on the actual and anticipated cost to public water systems in each State of compliance with the requirements of this subchapter. The Office of Management and Budget may review any report required by this subsection before its submission to such committees of Congress, but the Office may not revise any such report, require any revision in any such report, or delay its submission beyond the day prescribed for its submission, and may submit to such committees of Congress its comments respecting any such report.

(i) Discrimination prohibition; filing of complaint; investigation; orders of Secretary; notice and hearing; settlements; attorneys’ fees; judicial review; filing of petition; procedural requirements; stay of orders; exclusiveness of remedy; civil actions for enforcement of orders; appropriate relief; mandamus proceedings; prohibition inapplicable to undirected but deliberate violations

(1) No employer may discharge any employee or otherwise discriminate against any employee with respect to his compensation, terms, conditions, or privileges of employment because the employee (or any person acting pursuant to a request of the employee) has—

(A) commenced, caused to be commenced, or is about to commence or cause to be commenced a proceeding under this subchapter or a proceeding for the administration or enforcement of drinking water regulations or underground injection control programs of a State,

(B) testified or is about to testify in any such proceeding, or

(C) assisted or participated or is about to assist or participate in any manner in such a proceeding or in any other action to carry out the purposes of this subchapter.

(2)(A) Any employee who believes that he has been discharged or otherwise discriminated against by any person in violation of paragraph (1) may, within 30 days after such violation occurs, file (or have any person file on his behalf) a complaint with the Secretary of Labor (hereinafter in this subsection referred to as the "Secretary") alleging such discharge or discrimination. Upon receipt of such a complaint, the Secretary shall notify the person named in the complaint of the filing of the complaint.

(B)(i) Upon receipt of a complaint filed under subparagraph (A), the Secretary shall conduct an investigation of the violation alleged in the complaint. Within 30 days of the receipt of such complaint, the Secretary shall complete such investigation and shall notify in writing the complainant (and any person acting in his behalf) and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this subparagraph. Within 90 days of the receipt of such complaint the Secretary shall, unless the proceeding on the complaint is terminated by the Secretary on the basis of a settlement entered into by the Secretary and the person alleged to have committed such violation, issue an order either providing the relief prescribed by clause (ii) or denying the complaint. An order of the Secretary shall be made on the record after notice and opportunity for agency hearing. The Secretary may not enter into a settlement terminating a proceeding on a complaint without the participation and consent of the complainant.

(ii) If in response to a complaint filed under subparagraph (A) the Secretary determines that a violation of paragraph (1) has occurred, the Secretary shall order (I) the person who committed such violation to take affirmative action to abate the violation, (II) such person to reinstate the complainant to his former position together with the compensation (including back pay), terms, conditions, and privileges of his employment, (III) compensatory damages, and (IV) where appropriate, exemplary damages. If such an order is issued, the Secretary, at the request of the complainant, shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorneys’ fees) reasonably incurred, as determined by the Secretary, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(3)(A) Any person adversely affected or aggrieved by an order issued under paragraph (2) may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within sixty days from the issuance of the Secretary’s order. Review shall conform to chapter 7 of title 5. The commencement of proceedings under this subparagraph shall not, unless ordered by the court, operate as a stay of the Secretary’s order.

(B) An order of the Secretary with respect to which review could have been obtained under subparagraph (A) shall not be subject to judicial review in any criminal or other civil proceeding.

(4) Whenever a person has failed to comply with an order issued under paragraph (2)(B), the Secretary shall file a civil action in the United
§ 300j-11. Indian Tribes

(a) In general

Subject to the provisions of subsection (b) of this section, the Administrator—

(1) is authorized to treat Indian Tribes as States under this subchapter,

(2) may delegate to such Tribes primary enforcement responsibility for public water systems and for underground injection control, and

(3) may provide such Tribes grant and contract assistance to carry out functions provided by this subchapter.

(b) EPA regulations

(1) Specific provisions

The Administrator shall, within 18 months after June 19, 1996, promulgate final regulations specifying those provisions of this subchapter for which it is appropriate to treat Indian Tribes as States. Such treatment shall be authorized only if:
(A) the Indian Tribe is recognized by the Secretary of the Interior and has a governing body carrying out substantial governmental duties and powers;

(B) the functions to be exercised by the Indian Tribe are within the area of the Tribal Government’s jurisdiction; and

(C) the Indian Tribe is reasonably expected to be capable, in the Administrator’s judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this subchapter and of all applicable regulations.

(2) Provisions where treatment as State inappropriate

For any provision of this subchapter where treatment of Indian Tribes as identical to States is inappropriate, administratively infeasible or otherwise inconsistent with the purposes of this subchapter, the Administrator may include in the regulations promulgated under this section, other means for administering such provision in a manner that will achieve the purpose of the provision. Nothing in this section shall be construed to allow Indian Tribes to assume or maintain primary enforcement responsibility for public water systems or for underground injection control in a manner less protective of the health of persons than such responsibility may be assumed or maintained by a State. An Indian tribe shall not be required to exercise criminal enforcement jurisdiction for purposes of complying with the preceding sentence.

(300j-12) State revolving loan funds

(a) General authority

The Administrator shall offer to enter into agreements with eligible States to make capitalization grants, including letters of credit, to the States under this subsection to further the health protection objectives of this subchapter, promote the efficient use of fund resources, and for other purposes as are specified in this subchapter.

(b) Establishment of fund

To be eligible to receive a capitalization grant under this section, a State shall establish a drinking water treatment revolving loan fund (referred to in this section as a “State loan fund”) and comply with the other requirements of this section. Each grant to a State under this section shall be deposited in the State loan fund established by the State, except as otherwise provided in this section and in other provisions of this subchapter. No funds authorized by other provisions of this subchapter to be used for other purposes specified in this subchapter shall be deposited in any State loan fund.

(C) Extended period

The grant to a State shall be available to the State for obligation during the fiscal year for which the funds are authorized and during the following fiscal year, except that grants made available from funds provided prior to fiscal year 1997 shall be available for obligation during each of the fiscal years 1997 and 1998.

(D) Allotment formula

Except as otherwise provided in this section, funds made available to carry out this section shall be allotted to States that have entered into an agreement pursuant to this section (other than the District of Columbia) in accordance with—

(i) for each of fiscal years 1995 through 1997, a formula that is the same as the formula used to distribute public water system supervision grant funds under section 300j-2 of this title in fiscal year 1995, except that the minimum proportionate share established in the formula shall be 1 percent of available funds and the formula shall be adjusted to include a minimum proportionate share for the State of Wyoming and the District of Columbia, and

(ii) for fiscal year 1998 and each subsequent fiscal year, a formula that allocates to each State the proportional share of the State needs identified in the most recent survey conducted pursuant to subsection (b) of this section, except that the minimum proportionate share provided to each State shall be the same as the minimum proportionate share provided under clause (i).

(E) Reallocation

The grants not obligated by the last day of the period for which the grants are available shall be reallocated according to the appropriate criteria set forth in subparagraph (D), except that the Administrator may reserve and allocate 10 percent of the remaining amount for financial assistance to Indian Tribes in addition to the amount allotted under subsection (i) of this section and none of the funds reallocated by the Administrator shall be reallocated to any State that has not obligated all sums allotted to the State pursuant to this section during the period in which the sums were available for obligation.

(F) Nonprimacy States

The State allotment for a State not exercising primary enforcement responsibility for public water systems shall not be deposited in any such fund but shall be allotted by the Administrator under this subparagraph. Pursuant to section 300j-2(a)(9)(A) of this title such sums allotted under this subparagraph shall be reserved as needed by the Administrator to exercise primary enforcement responsibility.
responsibility under this subchapter in such State and the remainder shall be reallocated to States exercising primary enforcement responsibility for public water systems for deposit in such funds. Whenever the Administrator makes a final determination pursuant to section 300g–2(b) of this title that the requirements of section 300g–2(a) of this title are no longer being met by a State, additional grants for such State under this subchapter shall be immediately terminated by the Administrator. This subparagraph shall not apply to any State not exercising primary enforcement responsibility for public water systems as of August 6, 1996.

(G) Other programs

(i) New system capacity

Beginning in fiscal year 1999, the Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section to a State unless the State has met the requirements of section 300g–9(a) of this title (relating to capacity development) and shall withhold 10 percent for fiscal years 2001, 15 percent for fiscal year 2002, and 20 percent for fiscal year 2003 if the State has not complied with the provisions of section 300g–9(c) of this title (relating to capacity development strategies). Not more than a total of 20 percent of the capitalization grants made to a State in any fiscal year may be withheld under the preceding provisions of this clause. All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as is applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–9 of this title (relating to capacity development).

(ii) Operator certification

The Administrator shall withhold 20 percent of each capitalization grant made pursuant to this section unless the State has met the requirements of section 300g–8 of this title (relating to operator certification). All funds withheld by the Administrator pursuant to this clause shall be reallocated by the Administrator on the basis of the same ratio as applicable to funds allotted under subparagraph (D). None of the funds reallocated by the Administrator pursuant to this paragraph shall be allotted to a State unless the State has met the requirements of section 300g–8 of this title (relating to operator certification).

(2) Use of funds

Except as otherwise authorized by this subchapter, amounts deposited in a State loan fund, including loan repayments and interest earned on such amounts, shall be used only for providing loans or loan guarantees, or as a source of reserve and security for leveraged loans, the proceeds of which are deposited in a State loan fund established under paragraph (1), or other financial assistance authorized under this section to community water systems and nonprofit noncommunity water systems, other than systems owned by Federal agencies. Financial assistance under this section may be used by a public water system only for expenditures (not including monitoring, operation, and maintenance expenditures) of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations applicable to the system under section 300g–1 of this title or otherwise significantly further the health protection objectives of this subchapter. The funds may also be used to provide loans to a system referred to in section 300f(4)(B) of this title for the purpose of providing the treatment described in section 300f(4)(B)(1)(III) of this title. The funds shall not be used for the acquisition of real property or interests therein, unless the acquisition is integral to a project authorized by this paragraph and the purchase is from a willing seller. Of the amount credited to any State loan fund established under this section in any fiscal year, 15 percent shall be available solely for providing loan assistance to public water systems which regularly serve fewer than 10,000 persons to the extent such funds can be obligated for eligible projects of public water systems.

(3) Limitation

(A) In general

Except as provided in subparagraph (B), no assistance under this section shall be provided to a public water system that—

(i) does not have the technical, managerial, and financial capability to ensure compliance with the requirements of this subchapter; or

(ii) is in significant noncompliance with any requirement of a national primary drinking water regulation or variance.

(B) Restructuring

A public water system described in subparagraph (A) may receive assistance under this section if—

(i) the use of the assistance will ensure compliance; and

(ii) if subparagraph (A)(i) applies to the system, the owner or operator of the system agrees to undertake feasible and appropriate changes in operations (including ownership, management, accounting, rates, maintenance, consolidation, alternative water supply, or other procedures) if the State determines that the measures are necessary to ensure that the system has the technical, managerial, and financial capability to comply with the requirements of this subchapter over the long term.

(C) Review

Prior to providing assistance under this section to a public water system that is in significant noncompliance with any requirement of a national primary drinking water regulation or variance, the State shall con-
§ 300j–12

(3) “Disadvantaged community” defined

In this subsection, the term “disadvantaged community” means the service area of a public water system that meets affordability criteria established after public review and comment by the State in which the public water system is located. The Administrator may publish information to assist States in establishing affordability criteria.

(e) State contribution

Each agreement under subsection (a) of this section shall require that the State deposit in the State loan fund from State moneys an amount equal to at least 20 percent of the total amount of the grant to be made to the State on or before the date on which the grant payment is made to the State, except that a State shall not be required to deposit such amount into the fund prior to the date on which each grant payment is made for fiscal years 1994, 1995, 1996, and 1997 if the State deposits the State contribution amount into the State loan fund prior to September 30, 1999.

(f) Types of assistance

Except as otherwise limited by State law, the amounts deposited into a State loan fund under this section may be used only—

(1) to make loans, on the condition that—

(A) the interest rate for each loan is less than or equal to the market interest rate, including an interest-free loan;

(B) principal and interest payments on each loan will commence not later than 1 year after completion of the project for which the loan was made, and each loan will be fully amortized not later than 20 years after the completion of the project, except that in the case of a disadvantaged community (as defined in subsection (d)(3) of this section), a State may provide an extended term for a loan, if the extended term—

(i) terminates not later than the date that is 30 years after the date of project completion; and

(ii) does not exceed the expected design life of the project;

(C) the recipient of each loan will establish a dedicated source of revenue (or, in the case of a privately owned system, demonstrate that there is adequate security) for the repayment of the loan; and

(D) the State loan fund will be credited with all payments of principal and interest on each loan;

(2) to buy or refinance the debt obligation of a municipality or an intermunicipal or interstate agency within the State at an interest rate that is less than or equal to the market interest rate in any case in which a debt obligation is incurred after July 1, 1993;

(3) to guarantee, or purchase insurance for, a local obligation (all of the proceeds of which finance a project eligible for assistance under this section) if the guarantee or purchase would improve credit market access or reduce the interest rate applicable to the obligation;
(4) as a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the State if the proceeds of the sale of the bonds will be deposited into the State loan fund; and
(5) to earn interest on the amounts deposited into the State loan fund.

(g) Administration of State loan funds

(1) Combined financial administration

Notwithstanding subsection (c) of this section, a State may (as a convenience and to avoid unnecessary administrative costs) combine, in accordance with State law, the financial administration of a State loan fund established under this section with the financial administration of any other revolving fund established by the State if otherwise not prohibited by the law under which the State loan fund was established and if the Administrator determines that—
(A) the grants under this section, together with loan repayments and interest, will be separately accounted for and used solely for the purposes specified in subsection (a) of this section; and
(B) the authority to establish assistance priorities and carry out oversight and related activities (other than financial administration) with respect to assistance remains with the State agency having primary responsibility for administration of the State program under section 300g–2 of this title, after consultation with other appropriate State agencies (as determined by the State); Provided, That in nonprimacy States eligible for assistance under this section, the Governor shall determine which State agency will have authority to establish priorities for financial assistance from the State loan fund.

(2) Cost of administering fund

Each State may annually use up to 4 percent of the funds allotted to the State under this section to cover the reasonable costs of administration of the programs under this section, including the recovery of reasonable costs expended to establish a State loan fund which are incurred after August 6, 1996, and to provide technical assistance to public water systems within the State. For fiscal year 1995 and each fiscal year thereafter, each State may use up to an additional 10 percent of the funds allotted to the State under this section—
(A) for public water system supervision programs under section 300j–2(a) of this title; (B) to administer or provide technical assistance through source water protection programs;
(C) to develop and implement a capacity development strategy under section 300g–9(c) of this title; and
(D) for an operator certification program for purposes of meeting the requirements of section 300g–8 of this title.

if the State matches the expenditures with at least an equal amount of State funds. At least half of the match must be additional to the amount expended by the State for public water supervision in fiscal year 1993. An additional 2 percent of the funds annually allotted to each State under this section may be used by the State to provide technical assistance to public water systems serving 10,000 or fewer persons in the State. Funds utilized under subparagraph (B) shall not be used for enforcement actions.

(3) Guidance and regulations

The Administrator shall publish guidance and promulgate regulations as may be necessary to carry out the provisions of this section, including—
(A) provisions to ensure that each State commits and expends funds allotted to the State under this section as efficiently as possible in accordance with this subchapter and applicable State laws;
(B) guidance to prevent waste, fraud, and abuse; and
(C) guidance to avoid the use of funds made available under this section to finance the expansion of any public water system in anticipation of future population growth.

The guidance and regulations shall also ensure that the States, and public water systems receiving assistance under this section, use accounting, audit, and fiscal procedures that conform to generally accepted accounting standards.

(4) State report

Each State administering a loan fund and assistance program under this subsection shall publish and submit to the Administrator a report every 2 years on its activities under this section, including the findings of the most recent audit of the fund and the entire State allotment. The Administrator shall periodically audit all State loan funds established by, and all other amounts allotted to, the States pursuant to this section in accordance with procedures established by the Comptroller General.

(h) Needs survey

The Administrator shall conduct an assessment of water system capital improvement needs of all eligible public water systems in the United States and submit a report to the Congress containing the results of the assessment within 180 days after August 6, 1996, and every 4 years thereafter.

(i) Indian Tribes

(1) In general

1½ percent of the amounts appropriated annually to carry out this section may be used by the Administrator to make grants to Indian Tribes and Alaska Native villages that have not otherwise received either grants from the Administrator under this section or assistance from State loan funds established under this section. The grants may only be used for expenditures by tribes and villages for public water system expenditures referred to in subsection (a)(2) of this section.

(2) Use of funds

Funds reserved pursuant to paragraph (1) shall be used to address the most significant threats to public health associated with public water systems that serve Indian Tribes, as de-
§ 300j–12  TITLE 42—THE PUBLIC HEALTH AND WELFARE

(d) Other areas

Other areas may be provided by the Administrator to the governments in such areas, or to both, to be used for the public water systems allotted as provided in this subsection in the Commonwealth of the Northern Mariana Islands, American Samoa, and Guam. The allotments under this section for the Virgin Islands, the Commonwealth of the Northern Marianas, Guam, and the District of Columbia, shall not exceed 0.33 percent of the aggregate deposits in State loan funds. The total allotments for the District of Columbia, shall not exceed 0.33 percent of the aggregate deposits for the District of Columbia, and the grants for the District of Columbia, shall not be deposited in State loan funds. The total allotments for grants under this section for all areas described in this subsection in any fiscal year shall not exceed 0.33 percent of the aggregate amount of deposits made available to carry out this section in that fiscal year.

(k) Other authorized activities

(1) In general

Notwithstanding subsection (a)(2) of this section, a State may take each of the following actions:

(A) Provide assistance, only in the form of a loan, to one or more of the following:

(i) Any public water system described in subsection (a)(2) of this section to acquire land or a conservation easement from a willing seller or grantor, if the purpose of the acquisition is to protect the source water of the system from contamination and to ensure compliance with national primary drinking water regulations.

(ii) Any community water system to implement local, voluntary source water protection measures to protect source water in areas delineated pursuant to section 300j–13 of this title, in order to facilitate compliance with national primary drinking water regulations applicable to the system under section 300g–1 of this title or otherwise significantly further the health protection objectives of this subchapter.

(B) Provide assistance, including technical and financial assistance, to any public water system as part of a capacity development strategy developed and implemented in accordance with section 300g–9(c) of this title.

(C) Make expenditures from the capitalization grant of the State for fiscal years 1996 and 1997 to delineate and assess source water protection areas in accordance with section 300j–13 of this title, except that funds set aside for such expenditure shall be obligated within 4 fiscal years.

(D) Make expenditures from the fund for the establishment and implementation of wellhead protection programs under section 300h–7 of this title.

(2) Limitation

For each fiscal year, the total amount of assistance provided and expenditures made by a State under this subsection may not exceed 15 percent of the amount of the capitalization grant received by the State for that year and may not exceed 10 percent of that amount for any one of the following activities:

(A) To acquire land or conservation easements pursuant to paragraph (1)(A)(i).

(B) To provide funding to implement voluntary, incentive-based source water quality protection measures pursuant to clauses (ii) and (iii) of paragraph (1)(A).

(C) To provide assistance through a capacity development strategy pursuant to paragraph (1)(B).

(D) To make expenditures to delineate or assess source water protection areas pursuant to paragraph (1)(C).

(E) To make expenditures to establish and implement wellhead protection programs pursuant to paragraph (1)(D).

(3) Statutory construction

Nothing in this section creates or conveys any new authority to a State, political subdivision of a State, or community water system for any new regulatory measure, or limits any authority of a State, political subdivision of a State or community water system.

(l) Savings

The failure or inability of any public water system to receive funds under this section or any other loan or grant program, or any delay in obtaining the funds, shall not alter the obligation of the system to comply in a timely manner with all applicable drinking water standards and requirements of this subchapter.

(m) Authorization of appropriations

There are authorized to be appropriated to carry out the purposes of this section $599,000,000 for the fiscal year 1994 and $1,000,000,000 for each of the fiscal years 1995 through 2003. To the extent amounts authorized to be appropriated under this subsection in any fiscal year are not appropriated in that fiscal year, such amounts are authorized to be appropriated in a subse-
quent fiscal year (prior to the fiscal year 2004). Such sums shall remain available until expended.

(n) Health effects studies

From funds appropriated pursuant to this section for each fiscal year, the Administrator shall reserve $10,000,000 for health effects studies on drinking water contaminants authorized by the Safe Drinking Water Act Amendments of 1996. In allocating funds made available under this subsection, the Administrator shall give priority to studies concerning the health effects of cryptosporidium (as authorized by section 300j–18(c) of this title), disinfection byproducts (as authorized by section 300j–18(e) of this title), and arsenic (as authorized by section 300j–1(b)(12)(A) of this title), and the implementation of a plan for studies of subpopulations at greater risk of adverse effects (as authorized by section 300j–18(a) of this title).

(o) Monitoring for unregulated contaminants

From funds appropriated pursuant to this section for each fiscal year beginning with fiscal year 1998, the Administrator shall reserve $2,000,000 to pay the costs of monitoring for unregulated contaminants under section 300j–4(a)(2)(C) of this title.

(p) Demonstration project for State of Virginia

Notwithstanding the other provisions of this section limiting the use of funds deposited in a State loan fund from any State allotment, the State of Virginia may, as a single demonstration and with the approval of the Virginia General Assembly and the Administrator, conduct a program to demonstrate alternative approaches to intergovernmental coordination to assist in the financing of new drinking water facilities in the following rural communities in southwestern Virginia where none exists on August 6, 1996, and where such communities are experiencing economic hardship: Lee County, Wise County, Scott County, Dickenson County, Russell County, Buchanan County, Tazewell County, and the city of Norton, Virginia. The funds allotted to the State and deposited in the State loan fund pursuant to section 1452 of the Safe Drinking Water Act Amendments of 1996, (Public Law 104–182) for each fiscal year beginning in fiscal year 1998 and thereafter, States may combine the assets of State Revolving Funds (SRFs) established under section 1452 of the Safe Drinking Water Act, as amended, and title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.), as amended, as security for bond issues to enhance the lending capacity of one or both SRFs, but not to acquire the state match for either program, provided that revenues from the bonds are allocated to the purposes of the Safe Drinking Water Act [this subchapter] and the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.] in the same portion as the funds are used as security for the bonds’.

(f) Small system technical assistance

The Administrator may reserve up to 2 percent of the total funds appropriated pursuant to subsection (m) of this section for each of the fiscal years 1997 through 2003 to carry out the provisions of section 300j–1(e) of this title (relating to technical assistance for small systems), except that the total amount of funds made available for such purpose in any fiscal year through appropriations (as authorized by section 300j–1(e) of this title) and reservations made pursuant to this subsection shall not exceed the amount authorized by section 300j–1(e) of this title.

(r) Evaluation

The Administrator shall conduct an evaluation of the effectiveness of the State loan funds through fiscal year 2001. The evaluation shall be submitted to the Congress at the same time as the President submits to the Congress, pursuant to section 1108 of title 31, an appropriations request for fiscal year 2003 relating to the budget of the Environmental Protection Agency.
§ 300j–13. Source water quality assessment

(a) Source water assessment

(1) Guidance

Within 12 months after August 6, 1996, after notice and comment, the Administrator shall publish guidance for States exercising primary enforcement responsibility for public water systems to carry out directly or through delegation (for the protection and benefit of public water systems and for the support of monitoring flexibility) a source water assessment program within the State’s boundaries. Each State adopting modifications to monitoring requirements pursuant to section 300g–7(b) of this title shall, prior to adopting such modifications, have an approved source water assessment program under this section and shall carry out the program either directly or through delegation.

(2) Program requirements

A source water assessment program under this subsection shall—

(A) delineate the boundaries of the assessment areas in such State from which one or more public water systems in the State receive supplies of drinking water, using all reasonably available hydrogeologic information on the sources of the supply of drinking water in the State and the water flow, recharge, and discharge and any other reliable information as the State deems necessary to adequately determine such areas; and

(B) identify for contaminants regulated under this subchapter for which monitoring is required under this subchapter (or any unregulated contaminants selected by the State, in its discretion, which the State, for the purposes of this subsection, has determined may present a threat to public health), to the extent practical, the origins within each delineated area of such contaminants to determine the susceptibility of the public water systems in the delineated area to such contaminants.

(3) Approval, implementation, and monitoring relief

A State source water assessment program under this subsection shall be submitted to the Administrator within 18 months after the Administrator’s guidance is issued under this subsection and shall be deemed approved 9 months after the date of such submittal unless the Administrator disapproves the program as provided in section 300h–7(c) of this title. States shall begin implementation of the program immediately after its approval. The Administrator’s approval of a State program under this subsection shall include a timetable, established in consultation with the State, allowing not more than 2 years for completion after approval of the program. Public water systems seeking monitoring relief in addition to the interim relief provided under section 300g–7(a) of this title shall be eligible for monitoring relief, consistent with section 300g–7(b) of this title, upon completion of the assessment in the delineated source water assessment area or areas concerned.

(4) Timetable

The timetable referred to in paragraph (3) shall take into consideration the availability to the State of funds under section 300j–12 of this title (relating to State loan funds) for assessments and other relevant factors. The Administrator may extend any timetable included in a State program approved under paragraph (3) to extend the period for completion by an additional 18 months.

(5) Demonstration project

The Administrator shall, as soon as practicable, conduct a demonstration project, in consultation with other Federal agencies, to demonstrate the most effective and protective means of assessing and protecting source waters serving large metropolitan areas and located on Federal lands.

(6) Use of other programs

To avoid duplication and to encourage efficiency, the program under this section may make use of any of the following:

(A) Vulnerability assessments, sanitary surveys, and monitoring programs.

(B) Delineations or assessments of ground water sources under a State wellhead protection program developed pursuant to this section.

(C) Delineations or assessments of surface or ground water sources under a State pesticide management plan developed pursuant to the Pesticide and Ground Water State Management Plan Regulation (subparts I and J of part 152 of title 40, Code of Federal Regulations), promulgated under section 136a(d) of title 7.

(D) Delineations or assessments of surface water sources under a State watershed initiative or to satisfy the watershed criterion for determining if filtration is required under the Surface Water Treatment Rule (section 141.70 of title 40, Code of Federal Regulations).

(E) Delineations or assessments of surface or ground water sources under programs or plans pursuant to the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.].

(7) Public availability

The State shall make the results of the source water assessments conducted under this subsection available to the public.

(b) Approval and disapproval

For provisions relating to program approval and disapproval, see section 300h–7(c) of this title.
§ 300j-14. Source water petition program

(a) Petition program

(1) In general

(A) Establishment

A State may establish a program under which an owner or operator of a community water system in the State, or a municipal or local government or political subdivision of a State, may submit a source water quality protection partnership petition to the State requesting that the State assist in the local development of a voluntary, incentive-based partnership, among the owner, operator, or government and other persons likely to be affected by the recommendations of the partnership, to—

(i) reduce the presence in drinking water of contaminants that may be addressed by a petition by considering the origins of the contaminants, including to the maximum extent practicable the specific activities that affect the drinking water supply of a community;

(ii) obtain financial or technical assistance necessary to facilitate establishment of a partnership, or to develop and implement recommendations of a partnership for the protection of source water to assist in the provision of drinking water that complies with national primary drinking water regulations with respect to contaminants, including to the maximum extent practicable the specific activities contributing to the presence of the contaminants addressed by a petition; and

(iii) develop recommendations regarding voluntary and incentive-based strategies for the long-term protection of the source water of community water systems.

(B) Funding

Each State may—

(i) use funds set aside pursuant to section 300j–12(k)(1)(A)(iii) of this title by the State to carry out a program described in subparagraph (A), including assistance to voluntary local partnerships for the development and implementation of partnership recommendations for the protection of source water such as source water quality assessment, contingency plans, and demonstration projects for partners within a source water area delineated under section 300j–13(a) of this title; and

(ii) provide assistance in response to a petition submitted under this subsection using funds referred to in subsection (b)(2)(B) of this section.

(2) Objectives

The objectives of a petition submitted under this subsection shall be to—

(A) facilitate the local development of voluntary, incentive-based partnerships among owners and operators of community water systems, governments, and other persons in source water areas; and

(B) obtain assistance from the State in identifying resources which are available to implement the recommendations of the partnerships to address the origins of drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) that affect the drinking water supply of a community.

(3) Contaminants addressed by a petition

A petition submitted to a State under this subsection may address only those contaminants—

(A) that are pathogenic organisms for which a national primary drinking water regulation has been established or is required under section 300g–1 of this title; or

(B) for which a national primary drinking water regulation has been promulgated or proposed and that are detected by adequate monitoring methods in the source water at the intake structure or in any collection, treatment, storage, or distribution facilities by the community water systems at levels—

(i) above the maximum contaminant level; or

(ii) that are not reliably and consistently below the maximum contaminant level.

(4) Contents

A petition submitted under this subsection shall, at a minimum—

(A) include a delineation of the source water area in the State that is the subject of the petition;

(B) identify, to the maximum extent practicable, the origins of the drinking water contaminants that may be addressed by a petition (including to the maximum extent practicable the specific activities contributing to the presence of the contaminants) in the source water area delineated under section 300j–13 of this title;

(C) identify any deficiencies in information that will impair the development of recommendations by the voluntary local partnership to address drinking water contaminants that may be addressed by a petition;

(D) specify the efforts made to establish the voluntary local partnership and obtain the participation of—

(i) the municipal or local government or other political subdivision of the State with jurisdiction over the source water area delineated under section 300j–13 of this title; and

(ii) each person in the source water area delineated under section 300j–13 of this title—

(I) who is likely to be affected by recommendations of the voluntary local partnership; and

(II) whose participation is essential to the success of the partnership;

(E) outline how the voluntary local partnership has or will, during development and
(b) Approval or disapproval of petitions

(1) In general

After providing notice and an opportunity for public comment on a petition submitted under subsection (a) of this section, the State shall approve or disapprove the petition, in whole or in part, not later than 120 days after the date of submission of the petition.

(2) Approval

The State may approve a petition if the petition meets the requirements established under subsection (a) of this section. The notice of approval shall, at a minimum, include for informational purposes—

(A) an identification of technical, financial, or other assistance that the State will provide to assist in addressing the drinking water contaminants that may be addressed by a petition based on—

(i) the relative priority of the public health concern identified in the petition with respect to the other water quality needs identified by the State;

(ii) any necessary coordination that the State will perform of the program established under this section with programs implemented or planned by other States under this section; and

(iii) funds available (including funds available from a State revolving loan fund established under title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.)) or section 300j–12 of this title;

(B) a description of technical or financial assistance pursuant to Federal and State programs that is available to assist in implementing recommendations of the partnership in the petition, including—

(i) any program established under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.);

(ii) the program established under section 1455b of title 16;

(iii) the agricultural water quality protection program established under chapter 2 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3838 et seq.);

(iv) the sole source aquifer protection program established under section 300h–6 of this title;

(v) the community wellhead protection program established under section 300h–7 of this title;

(vi) any pesticide or ground water management plan;

(vii) any voluntary agricultural resource management plan or voluntary whole farm or whole ranch management plan developed and implemented under a process established by the Secretary of Agriculture; and

(viii) any abandoned well closure program; and

(C) a description of activities that will be undertaken to coordinate Federal and State programs to respond to the petition.

(3) Disapproval

If the State disapproves a petition submitted under subsection (a) of this section, the State shall notify the entity submitting the petition in writing of the reasons for disapproval. A petition may be resubmitted at any time if—

(A) new information becomes available;

(B) conditions affecting the source water that is the subject of the petition change; or

(C) modifications are made in the type of assistance being requested.

(c) Grants to support State programs

(1) In general

The Administrator may make a grant to each State that establishes a program under this section that is approved under paragraph (2). The amount of each grant shall not exceed 50 percent of the cost of administering the program for the year in which the grant is available.

(2) Approval

In order to receive grant assistance under this subsection, a State shall submit to the Administrator for approval a plan for a source water quality protection partnership program that is consistent with the guidance published under subsection (d) of this section. The Administrator shall approve the plan if the plan is consistent with the guidance published under subsection (d) of this section.

(d) Guidance

(1) In general

Not later than 1 year after August 6, 1996, the Administrator, in consultation with the States, shall publish guidance to assist—

(A) States in the development of a source water quality protection partnership program; and

(B) municipal or local governments or political subdivisions of a State and community water systems in the development of source water quality protection partnerships and in the assessment of source water quality.

(2) Contents of the guidance

The guidance shall, at a minimum—

(A) recommend procedures for the approval or disapproval by a State of a petition submitted under subsection (a) of this section;

(B) recommend procedures for the submission of petitions developed under subsection (a) of this section;

(C) recommend criteria for the assessment of source water areas within a State; and

(D) describe technical or financial assistance pursuant to Federal and State pro-
grams that is available to address the contamination of sources of drinking water and to develop and respond to petitions submitted under subsection (a) of this section.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $5,000,000 for each of the fiscal years 1997 through 2003. Each State with a plan for a program approved under subsection (b) of this section shall receive an equitable portion of the funds available for any fiscal year.

(f) Statutory construction

Nothing in this section—

(1) (A) creates or conveys new authority to a State, political subdivision of a State, or community water system for any new regulatory measure; or

(B) limits any authority of a State, political subdivision, or community water system; or

(2) precludes a community water system, municipal or local government, or political subdivision of a government from locally developing and carrying out a voluntary, incentive-based, source water quality protection partnership to address the origins of drinking water contaminants of public health concern.

(july 1, 1944, ch. 373, title xiv, § 1454, as added pub. l. 104–182, title i, § 133(a), aug. 6, 1996, 110 stat. 1675.)

References in Text

The Federal Water Pollution Control Act, referred to in subsection (b)(2)(A)(iii), is act june 30, 1948, ch. 758, as amended generally by pub. l. 92–500, § 2, oct. 18, 1972, 86 stat. 816, which is classified generally to chapter 26 (§ 1251 et seq.) of title 33. navigation and navigable waters. title vi of the act is classified generally to subchapter vi (§ 1381 et seq.) of chapter 26 of title 33. for complete classification of this act to the code, see short title note set out under section 1251 of title 33 and tables.

The Food Security Act of 1985, referred to in subsection (b)(2)(B)(iii), is pub. l. 99–198, dec. 23, 1985, 99 stat. 1354, as amended. chapter 2 of subtitle d of title xii of the act was classified generally to part ii (§ 5838 et seq.) of subchapter iv of chapter 58 of title 21, conservation, prior to repeal by pub. l. 104–127, title iii, § 3396(b), apr. 4, 1996, 110 stat. 1307. for complete classification of this act to the code, see short title of 1985 amendment note set out under section 1281 of title 7, agriculture, and tables.

§ 300j–15. Water conservation plan

(a) Guidelines

Not later than 2 years after August 6, 1996, the Administrator shall publish in the Federal Register guidelines for water conservation plans for public water systems serving fewer than 3,300 persons, public water systems serving between 3,300 and 10,000 persons, and public water systems serving more than 10,000 persons, taking into consideration such factors as water availability and climate.

(b) Loans or grants

Within 1 year after publication of the guidelines under subsection (a) of this section, a State exercising primary enforcement responsibility for public water systems may require a public water system, as a condition of receiving a loan or grant from a State loan fund under section 300j–12 of this title, to submit with its application for such loan or grant a water conservation plan consistent with such guidelines.

(july 1, 1944, ch. 373, title xiv, § 1455, as added pub. l. 104–182, title i, § 134, aug. 6, 1996, 110 stat. 1679.)

§ 300j–16. Assistance to colonias

(a) Definitions

As used in this section:

(1) Border State

The term "border State" means Arizona, California, New Mexico, and Texas.

(2) Eligible community

The term "eligible community" means a low-income community with economic hardship that—

(A) is commonly referred to as a colonia;

(B) is located along the United States-Mexico border (generally in an unincorporated area); and

(C) lacks a safe drinking water supply or adequate facilities for the provision of safe drinking water for human consumption.

(b) Grants to alleviate health risks

The Administrator of the Environmental Protection Agency and the heads of other appropriate Federal agencies are authorized to award grants to a border State to provide assistance to eligible communities to facilitate compliance with national primary drinking water regulations or otherwise significantly further the health protection objectives of this subchapter.

(c) Use of funds

Each grant awarded pursuant to subsection (b) of this section shall be used to provide assistance to one or more eligible communities with respect to which the residents are subject to a significant health risk (as determined by the Administrator or the head of the Federal agency making the grant) attributable to the lack of access to an adequate and affordable drinking water supply system.

(d) Cost sharing

The amount of a grant awarded pursuant to this section shall not exceed 50 percent of the costs of carrying out the project that is the subject of the grant.

(e) Authorization of appropriations

There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1997 through 1999.

(july 1, 1944, ch. 373, title xiv, § 1456, as added pub. l. 104–182, title i, § 135, aug. 6, 1996, 110 stat. 1679.)

§ 300j–17. Estrogenic substances screening program

In addition to the substances referred to in section 348a(p)(3)(B) of title 21 the Administrator may provide for testing under the screening program authorized by section 348a(p) of title 21, in accordance with the provisions of section 348a(p) of title 21, of any other substance that may be found in sources of drinking water.
§ 300j–18. Drinking water studies

(a) Subpopulations at greater risk

(1) In general

The Administrator shall conduct a continuing program of studies to identify groups within the general population that may be at greater risk than the general population of adverse health effects from exposure to contaminants in drinking water. The study shall examine whether and to what degree infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations that can be identified and characterized are likely to experience elevated health risks, including risks of cancer, from contaminants in drinking water.

(2) Report

Not later than 4 years after August 6, 1996, and periodically thereafter as new and significant information becomes available, the Administrator shall report to the Congress on the results of the studies.

(b) Biological mechanisms

The Administrator shall conduct biomedical studies to—

(1) understand the mechanisms by which chemical contaminants are absorbed, distributed, metabolized, and eliminated from the human body, so as to develop more accurate physiologically based models of the phenomena;

(2) understand the effects of contaminants and the mechanisms by which the contaminants cause adverse effects (especially noncancer and infectious effects) and the variations in the effects among humans, especially subpopulations at greater risk of adverse effects, and between test animals and humans; and

(3) develop new approaches to the study of complex mixtures, such as mixtures found in drinking water, especially to determine the prospects for synergistic or antagonistic interactions that may affect the shape of the dose-response relationship of the individual chemicals and microbes, and to examine noncancer endpoints and infectious diseases, and susceptible individuals and subpopulations.

(c) Studies on harmful substances in drinking water

(1) Development of studies

The Administrator shall, not later than 180 days after August 6, 1996, and after consultation with the Secretary of Health and Human Services, the Secretary of Agriculture, and, as appropriate, the heads of other Federal agencies, conduct the studies described in paragraph (2) to support the development and implementation of the most current version of each of the following:

(A) Enhanced Surface Water Treatment Rule (59 Fed. Reg. 38832 (July 29, 1994)).

(B) Disinfectant and Disinfection Byproducts Rule (59 Fed. Reg. 38668 (July 29, 1994)).

(C) Ground Water Disinfection Rule (availability of draft summary announced at (57 Fed. Reg. 33966; July 31, 1992)).

(2) Contents of studies

The studies required by paragraph (1) shall include, at a minimum, each of the following:

(A) Toxicological studies and, if warranted, epidemiological studies to determine what levels of exposure from disinfectants and disinfection byproducts, if any, may be associated with developmental and birth defects and other potential toxic end points.

(B) Toxicological studies and, if warranted, epidemiological studies to quantify the carcinogenic potential from exposure to disinfection byproducts resulting from different disinfectants.

(C) The development of dose-response curves for pathogens, including cryptosporidium and the Norwalk virus.

(3) Authorization of appropriations

There are authorized to be appropriated to carry out this subsection $12,500,000 for each of fiscal years 1997 through 2003.

(d) Waterborne disease occurrence study

(1) System

The Director of the Centers for Disease Control and Prevention, and the Administrator shall jointly—

(A) within 2 years after August 6, 1996, conduct pilot waterborne disease occurrence studies for at least 5 major United States communities or public water systems; and

(B) within 5 years after August 6, 1996, prepare a report on the findings of the pilot studies, and a national estimate of waterborne disease occurrence.

(2) Training and education

The Director and Administrator shall jointly establish a national health care provider training and public education campaign to inform both the professional health care provider community and the general public about waterborne disease and the symptoms that may be caused by infectious agents, including microbial contaminants. In developing such a campaign, they shall seek comment from interested groups and individuals, including scientists, physicians, State and local governments, environmental groups, public water systems, and vulnerable populations.

(3) Funding

There are authorized to be appropriated for each of the fiscal years 1997 through 2001 $3,000,000 to carry out this subsection. To the extent funds under this subsection are not fully appropriated, the Administrator may use not more than $2,000,000 of the funds from amounts reserved under section 300j–12(n) of this title for health effects studies for purposes of this subsection. The Administrator may transfer a portion of such funds to the Centers for Disease Control and Prevention for such purposes.

(July 1, 1944, ch. 373, title XIV, §1458, as added Pub. L. 104–182, title I, §137, Aug. 6, 1996, 110 Stat. 1680.)
Public Health Assessment of Exposure to Perchlorate

"(a) Epidemiological Study of Exposure to Perchlorate.—The Secretary of Defense shall provide for an independent epidemiological study of exposure to perchlorate in drinking water. The entity conducting the study shall—

"(1) assess the incidence of thyroid disease and measurable effects of thyroid function in relation to exposure to perchlorate;

"(2) ensure that the study is of sufficient scope and scale to permit the making of meaningful conclusions of the measurable public health threat associated with exposure to perchlorate, especially the threat to sensitive subpopulations; and

"(3) examine thyroid function, including measurements of urinary iodine and thyroid hormone levels, in a sufficient number of pregnant women, neonates, and infants exposed to perchlorate in drinking water and match measurements of perchlorate levels in the drinking water of each study participant in order to permit the development of meaningful conclusions on the public health threat to individuals exposed to perchlorate.

"(b) Review of Effects of Perchlorate on Endocrine System.—The Secretary shall provide for an independent review of the effects of perchlorate on the human endocrine system. The entity conducting the review shall assess—

"(1) available data on human exposure to perchlorate, including clinical data and data on exposure of sensitive subpopulations, and the levels at which health effects were observed; and

"(2) available data on other substances that have endocrine effects similar to perchlorate to which the public is frequently exposed.

"(c) Performance of Study and Review.—(1) The Secretary shall provide for the performance of the study under subsection (a) through the Centers for Disease Control and Prevention, the National Institutes of Health, or another Federal entity with experience in environmental toxicology selected by the Secretary.

"(2) The Secretary shall provide for the performance of the review under subsection (b) through the Centers for Disease Control and Prevention, the National Institutes of Health, or another appropriate Federal research entity with experience in human endocrinology selected by the Secretary. The Secretary shall ensure that the panel conducting the review is composed of individuals with expertise in human endocrinology.

"(d) Reporting Requirements.—Not later than June 1, 2005, the Federal entities conducting the study and review under this section shall submit to the Secretary reports containing the results of the study and review."

Part F—Additional Requirements To Regulate Safety of Drinking Water

§300j–21. Definitions

As used in this part—

(1) Drinking water cooler

The term “drinking water cooler” means any mechanical device affixed to drinking water supply plumbing which actively cools water for human consumption.

(2) Lead free

The term “lead free” means, with respect to a drinking water cooler, that each part or component of the cooler which may come in contact with drinking water contains not more than 8 percent lead, except that no drinking water cooler which contains any solvent, flux, or storage tank interior surface which may come in contact with drinking water shall be considered lead free if the solder, flux, or storage tank interior surface contains more than 0.2 percent lead. The Administrator may establish more stringent requirements for treating any part or component of a drinking water cooler as lead free for purposes of this part whenever he determines that any such part may constitute an important source of lead in drinking water.

(3) Local educational agency

The term “local educational agency” means—

(A) any local educational agency as defined in section 7801 of title 20;

(B) the owner of any private, nonprofit elementary or secondary school building, and

(C) the governing authority of any school operating under the defense dependent’s education system provided for under the Defense Dependent’s Education Act of 1978 (20 U.S.C. 921 and following).

(4) Repair

The term “repair”, with respect to a drinking water cooler, to take such corrective action as is necessary to ensure that water cooler is lead free.

(5) Replacement

The term “replacement”, when used with respect to a drinking water cooler, means the permanent removal of the water cooler and the installation of a lead free water cooler.

(6) School

The term “school” means any elementary school or secondary school as defined in section 7801 of title 20 and any kindergarten or day care facility.

(7) Lead-lined tank

The term “lead-lined tank” means a water reservoir contained in a drinking water cooler which container is constructed of lead or which has an interior surface which is not lead free.

References in Text

Amendments

§ 300j–22. Recall of drinking water coolers with lead-lined tanks

For purposes of the Consumer Product Safety Act [15 U.S.C. 2051 et seq.], all drinking water coolers identified by the Administrator on the list under section 300j–23 of this title as having a lead-lined tank shall be considered to be imminently hazardous consumer products within the meaning of section 12 of such Act (15 U.S.C. 2061). After notice and opportunity for comment, including a public hearing, the Consumer Product Safety Commission shall issue an order requiring the manufacturers and importers of such coolers to repair, replace, or recall and provide a refund for such coolers within 1 year after October 31, 1988. For purposes of enforcement, such order shall be treated as an order under section 15(d) of that Act (15 U.S.C. 2064(d)).

AMENDMENTS
1996—Pub. L. 104–182 made technical amendment to section catchline and subsec. (a) designation.

§ 300j–23. Drinking water coolers containing lead

(a) Publication of lists

The Administrator shall, after notice and opportunity for public comment, identify each brand and model of drinking water cooler which is not lead free, including each brand and model of drinking water cooler which has a lead-lined tank. For purposes of identifying the brand and model of drinking water coolers under this subsection, the Administrator shall use the best information available to the Environmental Protection Agency. Within 100 days after October 31, 1988, the Administrator shall publish a list of each brand and model of drinking water cooler identified under this subsection. Such list shall separately identify each brand and model of cooler which has a lead-lined tank. The Administrator shall continue to gather information regarding lead in drinking water coolers and shall revise and republish the list from time to time as may be appropriate as new information or analysis becomes available regarding lead contamination in drinking water coolers.

(b) Prohibition

No person may sell in interstate commerce, or manufacture for sale in interstate commerce, any drinking water cooler listed under subsection (a) of this section or any other drinking water cooler which is not lead free, including a lead-lined drinking water cooler.

(c) Criminal penalty

Any person who knowingly violates the prohibition contained in subsection (b) of this section shall be imprisoned for not more than 5 years, or fined in accordance with title 18, or both.

(d) Civil penalty

The Administrator may bring a civil action in the appropriate United States District Court (as determined under the provisions of title 28) to impose a civil penalty on any person who violates subsection (b) of this section. In any such action the court may impose on such person a civil penalty of not more than $5,000 ($50,000 in the case of a second or subsequent violation).

AMENDMENTS
1996—Pub. L. 104–182 made technical amendment to section catchline and first word of text.

§ 300j–24. Lead contamination in school drinking water

(a) Distribution of drinking water cooler list

Within 100 days after October 31, 1988, the Administrator shall distribute to the States a list of each brand and model of drinking water cooler identified and listed by the Administrator under section 300j–23(a) of this title.

(b) Guidance document and testing protocol

The Administrator shall publish a guidance document and a testing protocol to assist schools in determining the source and degree of lead contamination in school drinking water supplies and in remediating such contamination. The guidance document shall include guidelines for sample preservation. The guidance document shall also include guidance to assist States, schools, and the general public in ascertaining the levels of lead contamination in drinking water coolers and in taking appropriate action to reduce or eliminate such contamination. The guidance document shall contain a testing protocol for the identification of drinking water coolers which contribute to lead contamination in drinking water. Such document and protocol may be revised, republished and redistributed as the Administrator deems necessary. The Administrator shall distribute the guidance document and testing protocol to the States within 100 days after October 31, 1988.

(c) Dissemination to schools, etc.

Each State shall provide for the dissemination to local educational agencies, private nonprofit elementary or secondary schools and to day care centers of the guidance document and testing protocol published under subsection (b) of this section, together with the list of drinking water coolers published under section 300j–23(a) of this title.
§ 300j–25. Federal assistance for State programs regarding lead contamination in school drinking water

(a) School drinking water programs

The Administrator shall make grants to States to establish and carry out State programs under section 300j–24 of this title to assist local educational agencies in testing for, and remedying, lead contamination in drinking water from coolers and from other sources of lead contamination at schools under the jurisdiction of such agencies.

(b) Limits

Each grant under this section shall be used by the State for testing water coolers in accordance with section 300j–24 of this title, for testing for lead contamination in other drinking water supplies under section 300j–24 of this title, or for remedial action under State programs under section 300j–24 of this title. Not more than 5 percent of the grant may be used for program administration.

§ 300j–26. Certification of testing laboratories

The Administrator of the Environmental Protection Agency shall assure that programs for the certification of testing laboratories which test drinking water supplies for lead contamination certify only those laboratories which provide reliable accurate testing. The Administrator (or the State in the case of a State to which certification authority is delegated under this subsection) shall publish and make available to the public upon request the list of laboratories certified under this subsection.

AMENDMENTS

Subsec. (b). Pub. L. 104–182, § 501(d), substituted “by the State” for “as by the State”.

§ 300k. Establishment of program of grants to States

(a) In general

The Secretary, acting through the Director of the Centers for Disease Control and Prevention, may make grants to States on the basis of an established competitive review process for the purpose of carrying out programs—

(1) to screen women for breast and cervical cancer as a preventive health measure;

(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services and support services such as case management;

(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

(§ 300k

(c) Authorization of appropriations

There are authorized to be appropriated to carry out this section not more than $30,000,000 for fiscal year 1989, $30,000,000 for fiscal year 1990, and $30,000,000 for fiscal year 1991.

CHAPTER 82—SOLID WASTE DISPOSAL

SUBCHAPTER I—GENERAL PROVISIONS

Sec.
6901. Congressional findings.
6901a. Congressional findings: used oil recycling.
6902. Objectives and national policy.
6903. Definitions.
6904. Governmental cooperation.
6905. Application of chapter and integration with other Acts.
6906. Financial disclosure.
6907. Solid waste management information and guidelines.
6908. Small town environmental planning.
6908a. Agreements with Indian tribes.

SUBCHAPTER II—OFFICE OF SOLID WASTE; AUTHORITIES OF THE ADMINISTRATOR

6911. Office of Solid Waste and Interagency Coordinating Committee.
6911a. Assistant Administrator of Environmental Protection Agency; appointment, etc.
6912. Authorities of Administrator.
6914. Grants for discarded tire disposal.
6914a. Labeling of lubricating oil.
6914b. Degradable plastic ring carriers; definitions.
6914b-1. Regulation of plastic ring carriers.
6915. Annual report.
6916. General authorization.

SUBCHAPTER III—HAZARDOUS WASTE MANAGEMENT

6921. Identification and listing of hazardous waste.
6922. Standards applicable to generators of hazardous waste.
6923. Standards applicable to transporters of hazardous waste.
6924. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities.
6925. Permits for treatment, storage, or disposal of hazardous waste.
6926. Authorized State hazardous waste programs.
6927. Inspections.
6928. Federal enforcement.
6929. Retention of State authority.
6930. Effective date.
6931. Authorization of assistance to States.
6932. Transferred.
6933. Hazardous waste site inventory.
6934. Monitoring, analysis, and testing.
6935. Restrictions on recycled oil.
6936. Expansion during interim status.
6937. Inventory of Federal agency hazardous waste facilities.
6938. Export of hazardous wastes.
6939. Domestic sewage.
6939a. Exposure information and health assessments.
6939b. Interim control of hazardous waste injection.
6939c. Mixed waste inventory reports and plan.
6939d. Public vessels.
6939e. Federally owned treatment works.
6939f. Long-term storage.
6939g. Hazardous waste electronic manifest system.

SUBCHAPTER IV—STATE OR REGIONAL SOLID WASTE PLANS

6941. Objectives of subchapter.
6941a. Energy and materials conservation and recovery; Congressional findings.
6942. Federal guidelines for plans.
6943. Requirements for approval of plans.
Criteria for sanitary landfills; sanitary landfills required for all disposal.
Upgrading of open dumps.
Procedure for development and implementation of State plan.
Approval of State plan; Federal assistance.
Federal assistance.
Rural communities assistance.
Adequacy of certain guidelines and criteria.

SUBCHAPTER V—DUTIES OF SECRETARY OF COMMERCE IN RESOURCE AND RECOVERY

Functions.
Development of specifications for secondary materials.
Development of markets for recovered materials.
Technology promotion.
Marketing policies, establishment; nondiscrimination requirement.
Authorization of appropriations.

SUBCHAPTER VI—FEDERAL RESPONSIBILITIES

Application of Federal, State, and local law to Federal facilities.
Federal procurement.
Cooperation with Environmental Protection Agency.
Applicability of solid waste disposal guidelines to Executive agencies.
Chief Financial Officer report.
Increased use of recovered mineral component in federally funded projects involving procurement of cement or concrete.
Increased use of recovered mineral component in federally funded projects involving procurement of cement or concrete.
Use of granular mine tailings.
Best practices for battery recycling and labeling guidelines.
Consumer recycling education and outreach grant program; Federal procurement.

SUBCHAPTER VII—MISCELLANEOUS PROVISIONS

Employee protection.
Citizen suits.
Imminent hazard.
Petition for regulations; public participation.
Separability.
Judicial review.
Grants or contracts for training projects.
Payments.
Labor standards.
Transferred.
Law enforcement authority.

SUBCHAPTER VIII—RESEARCH, DEVELOPMENT, DEMONSTRATION, AND INFORMATION

Research, demonstration, training, and other activities.
Special studies; plans for research, development, and demonstrations.
Coordination, collection, and dissemination of information.
Full-scale demonstration facilities.
Special study and demonstration projects on recovery of useful energy and materials.
Grants for resource recovery systems and improved solid waste disposal facilities.
Authorization of appropriations.

SUBCHAPTER IX—REGULATION OF UNDERGROUND STORAGE TANKS

Definitions and exemptions.
Notification.
Release detection, prevention, and correction regulations.
Approval of State programs.
Inspections, monitoring, testing, and corrective action.
Federal enforcement.
Federal facilities.
State authority.
Study of underground storage tanks.
Operator training.
Use of funds for release prevention and compliance.
Delivery prohibition.
Tanks on tribal lands.
Authorization of appropriations.

SUBCHAPTER X—DEMONSTRATION MEDICAL WASTE TRACKING PROGRAM

Scope of demonstration program for medical waste.
Listing of medical wastes.
Tracking of medical waste.
§6901. Congressional findings

(a) Solid waste
The Congress finds with respect to solid waste—
(1) that the continuing technological progress and improvement in methods of manufacture, packaging, and marketing of consumer products has resulted in an ever-mounting increase, and in a change in the characteristics, of the mass material discarded by the purchaser of such products;
(2) that the economic and population growth of our Nation, and the improvements in the standard of living enjoyed by our population, have required increased industrial production to meet our needs, and have made necessary the demolition of old buildings, the construction of new buildings, and the provision of highways and other avenues of transportation, which, together with related industrial, commercial, and agricultural operations, have resulted in a rising tide of scrap, discarded, and waste materials;
(3) that the continuing concentration of our population in expanding metropolitan and other urban areas has presented these communities with serious financial, management, intergovernmental, and technical problems in the disposal of solid wastes resulting from the industrial, commercial, domestic, and other activities carried on in such areas;
(4) that while the collection and disposal of solid wastes should continue to be primarily the function of State, regional, and local agencies, the problems of waste disposal as set forth above have become a matter national in scope and in concern and necessitate Federal action through financial and technical assistance and leadership in the development, demonstration, and application of new and improved methods and processes to reduce the amount of waste and unsalvageable materials and to provide for proper and economical solid waste disposal practices.

(b) Environment and health
The Congress finds with respect to the environment and health, that—
(1) although land is too valuable a national resource to be needlessly polluted by discarded materials, most solid waste is disposed of on land in open dumps and sanitary landfills;
(2) disposal of solid waste and hazardous waste in or on the land without careful planning and management can present a danger to human health and the environment;
(3) as a result of the Clean Air Act [42 U.S.C. 7401 et seq.], the Water Pollution Control Act [33 U.S.C. 1251 et seq.], and other Federal and State laws respecting public health and the environment, greater amounts of solid waste (in the form of sludge and other pollution treatment residues) have been created. Similarly, inadequate and environmentally unsound practices for the disposal or use of solid waste have created greater amounts of air and water pollution and other problems for the environment and for health;
(4) open dumping is particularly harmful to health, contaminates drinking water from underground and surface supplies, and pollutes the air and the land;
(5) the placement of inadequate controls on hazardous waste management will result in substantial risks to human health and the environment;
(6) if hazardous waste management is improperly performed in the first instance, corrective action is likely to be expensive, complex, and time consuming;
(7) certain classes of land disposal facilities are not capable of assuring long-term containment of certain hazardous wastes, and to avoid substantial risk to human health and the environment, reliance on land disposal should be minimized or eliminated, and land disposal, particularly landfill and surface impoundment, should be the least favored method for managing hazardous wastes; and
(8) alternatives to existing methods of land disposal must be developed since many of the cities in the United States will be running out of suitable solid waste disposal sites within five years unless immediate action is taken.

(c) Materials
The Congress finds with respect to materials, that—
(1) millions of tons of recoverable material which could be used are needlessly buried each year;
(2) methods are available to separate usable materials from solid waste; and
(3) the recovery and conservation of such materials can reduce the dependence of the United States on foreign resources and reduce the deficit in its balance of payments.

(d) Energy
The Congress finds with respect to energy, that—
(1) solid waste represents a potential source of solid fuel, oil, or gas that can be converted into energy;
(2) the need exists to develop alternative energy sources for public and private consumption in order to reduce our dependence on such sources as petroleum products, natural gas, nuclear and hydroelectric generation; and
(3) technology exists to produce usable energy from solid waste.

EDITORIAL NOTES

REFERENCES IN TEXT

The Clean Air Act, referred to in subsec. (b)(3), is act July 14, 1955, ch. 360, 69 Stat. 322, as amended, which is classified generally to chapter 85 (§7401 et seq.) of this title. For complete classification of this Act to the Code, see Short Title note set out under section 7401 of this title and Tables.

CODIFICATION

The act, as set out in this chapter, carries a statutory credit showing the sections as having been added by Pub. L. 94–580, without reference to amendments to the act between its original enactment in 1965 and its complete revision in 1976. The act, as originally enacted in 1965, was classified to section 3251 et seq. of this title. For a recapitulation of the provisions of the act as originally enacted, see notes in chapter 39 (§3251 et seq.) of this title where the act was originally set out.

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3251 of this title prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1984—Subsec. (b)(5) to (8). Pub. L. 98–616 added pars. (5) to (7), struck out former par. (5) providing that "hazardous waste presents, in addition to the problems associated with non-hazardous solid waste, special dangers to health and requires a greater degree of regulation than does non-hazardous solid waste; and", redesignated former par. (6) as (8), and substituted a period for the semicolon at end.

STATUTORY NOTES AND RELATED SUBSIDIARIES

SHORT TITLE OF 2012 AMENDMENT

Pub. L. 112–195, §1, Oct. 5, 2012, 126 Stat. 1452, provided that: "This Act [enacting section 6939g of this title] may be cited as the 'Hazardous Waste Electronic Manifest Establishment Act'.”

SHORT TITLE OF 2005 AMENDMENT

Pub. L. 109–58, title XV, §1521, Aug. 8, 2005, 119 Stat. 1092, provided that: "This subtitle [subtitle B (§§1521–1533) of title XV of Pub. L. 109–58, enacting sections 6991j to 6991m of this title, amending sections 6991 to 6991f, 6991h, and 6991i of this title, and enacting provisions set out as notes under section 6991b of this title] may be cited as the 'Underground Storage Tank Compliance Act'.”

SHORT TITLE OF 1996 AMENDMENT

Pub. L. 104–119, §1, Mar. 26, 1996, 110 Stat. 830, provided that: "This Act [amending sections 6921, 6924, 6925, 6947, and 6949a of this title and enacting provisions set out as a note under section 6949a of this title] may be cited as the 'Land Disposal Program Flexibility Act of 1996'.”

SHORT TITLE OF 1992 AMENDMENT

Pub. L. 102–386, title I, §101, Oct. 6, 1992, 106 Stat. 1505, provided that: "This title [enacting sections 6908, 6939c to 6939e, and 6965 of this title, amending sections 6903, 6924, 6927, and 6961 of this title, and enacting provisions set out as notes under sections 6939c and 6961 of this title] may be cited as the 'Federal Facility Compliance Act of 1992'.”

4/151
SHORT TITLE OF 1988 AMENDMENT

Pub. L. 100–582, §1, Nov. 1, 1988, 102 Stat. 2950, provided that: "This Act [enacting sections 6992 to 6992k of this title and section 3063 of Title 18, Crimes and Criminal Procedure, and amending section 6903 of this title] may be cited as the 'Medical Waste Tracking Act of 1988'."

SHORT TITLE OF 1984 AMENDMENT

Pub. L. 98–616, §1, Nov. 8, 1984, 98 Stat. 3221, provided that: "This Act [enacting sections 6917, 6936 to 6939a, 6949a, 6979a, 6979b, and 6991 to 6991i of this title, amending this section and sections 6902, 6905, 6912, 6915, 6916, 6921 to 6933, 6935, 6941 to 6945, 6948, 6956, 6962, 6972, 6973, 6976, 6982 and 6984 of this title and enacting provisions set out as notes under sections 6905, 6921 and 6926 of this title] may be cited as 'The Hazardous and Solid Waste Amendments of 1984'."

SHORT TITLE OF 1980 AMENDMENTS

Pub. L. 96–482, §1, Oct. 21, 1980, 94 Stat. 2334, provided: "This Act [enacting sections 6933, 6934, 6941a, 6955, and 6956 of this title, amending sections 6903, 6905, 6911, 6912, 6916, 6921, 6922, 6924, 6925, 6927 to 6931, 6941 to 6943, 6945, 6946, 6948, 6949, 6952, 6953, 6962, 6963, 6964, 6971, 6973, 6974, 6976, 6979, and 6982 of this title; and enacting and repealing provisions set out as a note under section 6981 of this title] may be cited as the 'Solid Waste Disposal Act Amendments of 1980'."

Pub. L. 96–463, §1, Oct. 15, 1980, 94 Stat. 2055, provided: "This Act [enacting sections 6901a, 6914a and 6932 of this title, amending sections 6903, 6943 and 6948 of this title, and enacting provisions set out as notes under sections 6363 and 6932 of this title] may be cited as the 'Used Oil Recycling Act of 1980'."

SHORT TITLE OF 1976 AMENDMENT

Pub. L. 94–580, §1, Oct. 21, 1976, 90 Stat. 2795, provided that: "This Act [enacting this chapter and provisions set out as notes under this section and section 6981 of this title] may be cited as the 'Resource Conservation and Recovery Act of 1976'."

SHORT TITLE

Pub. L. 89–272, title II, §1001, as added by Pub. L. 94–580, §2, Oct. 21, 1976, 90 Stat. 2795, provided that: "This title (hereinafter in this title referred to as 'this Act'), together with the following table of contents, may be cited as the 'Solid Waste Disposal Act' " [table of contents omitted].

NATIONAL COMMISSION ON MATERIALS POLICY

Pub. L. 91–512, title II, §§201–206, Oct. 26, 1970, 84 Stat. 1234, known as the "National Materials Policy Act of 1970", provided for the establishment of the National Commission on Materials Policy to make a full investigation and study for the purpose of developing a national materials policy to utilize present resources and technology more efficiently and to anticipate the future materials requirements of the Nation and the world, the Commission to submit to the President and Congress a report on its findings and recommendations no later than June 30, 1973, ninety days after the submission of which it should cease to exist.

EXECUTIVE DOCUMENTS

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

§6901a. Congressional findings: used oil recycling

The Congress finds and declares that—

(1) used oil is a valuable source of increasingly scarce energy and materials;

(2) technology exists to re-refine, reprocess, reclaim, and otherwise recycle used oil;

(3) used oil constitutes a threat to public health and the environment when reused or disposed of improperly; and

that, therefore, it is in the national interest to recycle used oil in a manner which does not constitute a threat to public health and the environment and which conserves energy and materials.

EDITORIAL NOTES
CODIFICATION

Section was enacted as part of the Used Oil Recycling Act of 1980, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6902. Objectives and national policy

(a) Objectives

The objectives of this chapter are to promote the protection of health and the environment and to conserve valuable material and energy resources by—

1. providing technical and financial assistance to State and local governments and interstate agencies for the development of solid waste management plans (including resource recovery and resource conservation systems) which will promote improved solid waste management techniques (including more effective organizational arrangements), new and improved methods of collection, separation, and recovery of solid waste, and the environmentally safe disposal of nonrecoverable residues;

2. providing training grants in occupations involving the design, operation, and maintenance of solid waste disposal systems;

3. prohibiting future open dumping on the land and requiring the conversion of existing open dumps to facilities which do not pose a danger to the environment or to health;

4. assuring that hazardous waste management practices are conducted in a manner which protects human health and the environment;

5. requiring that hazardous waste be properly managed in the first instance thereby reducing the need for corrective action at a future date;

6. minimizing the generation of hazardous waste and the land disposal of hazardous waste by encouraging process substitution, materials recovery, properly conducted recycling and reuse, and treatment;

7. establishing a viable Federal-State partnership to carry out the purposes of this chapter and insuring that the Administrator will, in carrying out the provisions of subchapter III of this chapter, give a high priority to assisting and cooperating with States in obtaining full authorization of State programs under subchapter III;

8. providing for the promulgation of guidelines for solid waste collection, transport, separation, recovery, and disposal practices and systems;

9. promoting a national research and development program for improved solid waste management and resource conservation techniques, more effective organizational arrangements, and new and improved methods of collection, separation, and recovery, and recycling of solid wastes and environmentally safe disposal of nonrecoverable residues;

10. promoting the demonstration, construction, and application of solid waste management, resource recovery, and resource conservation systems which preserve and enhance the quality of air, water, and land resources; and

11. establishing a cooperative effort among the Federal, State, and local governments and private enterprise in order to recover valuable materials and energy from solid waste.

(b) National policy

The Congress hereby declares it to be the national policy of the United States that, wherever feasible, the generation of hazardous waste is to be reduced or eliminated as expeditiously as possible. Waste that is nevertheless generated should be treated, stored, or disposed of so as to minimize the present and future threat to human health and the environment.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3251 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

Subsec. (a)(4) to (11). Pub. L. 98–616, §101(b)(2), struck out par. (4) which provided for regulating the treatment, storage, transportation, and disposal of hazardous wastes which have adverse effects on health and the environment, added pars. (4) to (7), and redesignated former pars. (5) to (8) as (8) to (11), respectively.

§6903. Definitions

As used in this chapter:

1. The term "Administrator" means the Administrator of the Environmental Protection Agency.
(2) The term "construction," with respect to any project of construction under this chapter, means (A) the erection or building of new structures and acquisition of lands or interests therein, or the acquisition, replacement, expansion, remodeling, alteration, modernization, or extension of existing structures, and (B) the acquisition and installation of initial equipment of, or required in connection with, new or newly acquired structures or the expanded, remodeled, altered, modernized or extended part of existing structures (including trucks and other motor vehicles, and tractors, cranes, and other machinery) necessary for the proper utilization and operation of the facility after completion of the project; and includes preliminary planning to determine the economic and engineering feasibility and the public health and safety aspects of the project, the engineering, architectural, legal, fiscal, and economic investigations and studies, and any surveys, designs, plans, working drawings, specifications, and other action necessary for the carrying out of the project, and (C) the inspection and supervision of the process of carrying out the project to completion.

(2A) The term "demonstration" means the initial exhibition of a new technology process or practice or a significantly new combination or use of technologies, processes or practices, subsequent to the development stage, for the purpose of proving technological feasibility and cost effectiveness.

(3) The term "disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including ground waters.

(5) The term "hazardous waste" means a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may—

(A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or

(B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

(6) The term "hazardous waste generation" means the act or process of producing hazardous waste.

(7) The term "hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous wastes.

(8) For purposes of Federal financial assistance (other than rural communities assistance), the term "implementation" does not include the acquisition, leasing, construction, or modification of facilities or equipment or the acquisition, leasing, or improvement of land.

(9) The term "intermunicipal agency" means an agency established by two or more municipalities with responsibility for planning or administration of solid waste.

(10) The term "Interstate agency" means an agency of two or more municipalities in different States, or an agency established by two or more States, with authority to provide for the management of solid wastes and serving two or more municipalities located in different States.

(11) The term "long-term contract" means, when used in relation to solid waste supply, a contract of sufficient duration to assure the viability of a resource recovery facility (to the extent that such viability depends upon solid waste supply).

(12) The term "manifest" means the form used for identifying the quantity, composition, and the origin, routing, and destination of hazardous waste during its transportation from the point of generation to the point of disposal, treatment, or storage.

(13) The term "municipality" (A) means a city, town, borough, county, parish, district, or other public body created by or pursuant to State law, with responsibility for the planning or administration of solid waste management, or an Indian tribe or authorized tribal organization or Alaska Native village or organization, and (B) includes any rural community or incorporated town or village or any other public entity for which an application for assistance is made by a State or political subdivision thereof.

(14) The term "open dump" means any facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 6944 of this title and which is not a facility for disposal of hazardous waste.

(15) The term "person" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body and shall include each department, agency, and instrumentality of the United States.

(16) The term "procurement item" means any device, good, substance, material, product, or other item whether real or personal property which is the subject of any purchase, barter, or other exchange made to procure such item.

(17) The term "procuring agency" means any Federal agency, or any State agency or agency of a political subdivision of a State which is using appropriated Federal funds for such procurement, or any person contracting with any such agency with respect to work performed under such contract.

(18) The term "recovered" refers to the capability and likelihood of being recovered from solid waste for a commercial or industrial use.

(19) The term "recovered material" means waste material and byproducts which have been recovered or diverted from solid waste, but such term does not include those materials and byproducts generated from, and commonly reused within, an original manufacturing process.

(20) The term "recovered resources" means material or energy recovered from solid waste.

(21) The term "resource conservation" means reduction of the amounts of solid waste that are generated, reduction of overall resource consumption, and utilization of recovered resources.

(22) The term "resource recovery" means the recovery of material or energy from solid waste.
(23) The term "resource recovery system" means a solid waste management system which provides for collection, separation, recycling, and recovery of solid wastes, including disposal of nonrecoverable waste residues.

(24) The term "resource recovery facility" means any facility at which solid waste is processed for the purpose of extracting, converting to energy, or otherwise separating and preparing solid waste for reuse.

(25) The term "regional authority" means the authority established or designated under section 6946 of this title.

(26) The term "sanitary landfill" means a facility for the disposal of solid waste which meets the criteria published under section 6944 of this title.

(26A) The term "sludge" means any solid, semisolid or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility or any other such waste having similar characteristics and effects.

(27) The term "solid waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations, and from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under section 1342 of title 33, or source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923) [42 U.S.C. 2011 et seq.].

(28) The term "solid waste management" means the systematic administration of activities which provide for the collection, source separation, storage, transportation, transfer, processing, treatment, and disposal of solid waste.

(29) The term "solid waste management facility" includes—

(A) any resource recovery system or component thereof,

(B) any system, program, or facility for resource conservation, and

(C) any facility for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid wastes, including hazardous wastes, whether such facility is associated with facilities generating such wastes or otherwise.

(30) The terms "solid waste planning" "solid waste management", and "comprehensive planning" include planning or management respecting resource recovery and waste conservation.

(31) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(32) The term "State authority" means the agency established or designated under section 6947 of this title.

(33) The term "storage", when used in connection with hazardous waste, means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous waste.

(34) The term "treatment", when used in connection with hazardous waste, means any method, technique, or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste or so as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage, or reduced in volume. Such term includes any activity or processing designed to change the physical form or chemical composition of hazardous waste so as to render it nonhazardous.

(35) The term "virgin material" means a raw material, including previously unused copper, aluminum, lead, zinc, iron, or other metal or metal ore, any undeveloped resource that is, or with new technology will become, a source of raw materials.

(36) The term "used oil" means any oil which has been—

(A) refined from crude oil,

(B) used, and

(C) as a result of such use, contaminated by physical or chemical impurities.

(37) The term "recycled oil" means any used oil which is reused, following its original use, for any purpose (including the purpose for which the oil was originally used). Such term includes oil which is re-refined, reclaimed, burned, or reprocessed.

(38) The term "lubricating oil" means the fraction of crude oil which is sold for purposes of reducing friction in any industrial or mechanical device. Such term includes re-refined oil.

(39) The term "re-refined oil" means used oil from which the physical and chemical contaminants acquired through previous use have been removed through a refining process.

(40) Except as otherwise provided in this paragraph, the term "medical waste" means any solid waste which is generated in the diagnosis, treatment, or immunization of human beings or animals, in research pertaining thereto, or in the production or testing of biologicals. Such term does not include any hazardous waste identified or listed under subchapter III or any household waste as defined in regulations under subchapter III.

(41) The term "mixed waste" means waste that contains both hazardous waste and source, special nuclear, or by-product material subject to the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.).

**EDITORIAL NOTES**

**REFERENCES IN TEXT**

The Atomic Energy Act of 1954, referred to in pars. (27) and (41), is act Aug. 1, 1946, ch. 724, as added by act Aug. 30, 1954, ch. 1073, §1, 68 Stat. 919, which is classified principally to chapter 23 (§2011 et seq.) of this
title. For complete classification of this Act to the Code, see Short Title note set out under section 2011 of this title and Tables.

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3252 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1992—Par. (15). Pub. L. 102–386, §103, inserted before period at end "and shall include each department, agency, and instrumentality of the United States".

1980—Par. (14). Pub. L. 96–482, §2(a), defined "open dump" to include a facility, substituted requirement that disposal facility or site not be a sanitary landfill meeting section 6944 of this title criteria for prior requirement that disposal site not be a sanitary landfill within meaning of section 6944 of this title, and required that the disposal facility or site not be a facility for disposal of hazardous waste.

Par. (19). Pub. L. 96–482, §2(b), defined "recovered material" to cover byproducts, substituted provision for recovery or diversion of waste material and byproducts from solid waste for prior provision for collection or recovery of material from solid waste, and excluded materials and byproducts generated from and commonly reused within an original manufacturing process.

1978—Par. (8). Pub. L. 95–609, §7(b)(1), struck out provision stating that employees' salaries due pursuant to subchapter IV of this chapter would not be included after Dec. 31, 1979.

Par. (10). Pub. L. 95–609, §7(b)(2), substituted "management" for "disposal".

Par. (29)(C). Pub. L. 95–609, §7(b)(3), substituted "the collection, source separation, storage, transportation, transfer, processing, treatment or disposal" for "the treatment".

STATUTORY NOTES AND RELATED SUBSIDIARIES

CHANGE OF NAME

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

Enforcement functions of Administrator or other official of Environmental Protection Agency related to compliance with resource conservation and recovery permits used under this chapter with respect to pre-construction, construction, and initial operation of transportation system for Canadian and Alaskan natural gas transferred to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, until first anniversary of date of initial operation of Alaska Natural Gas Transportation System, see Reorg. Plan No. 1 of 1979, eff. July 1, 1979, §§102(a), 203(a), 44 F.R. 33663, 33666, 93 Stat. 1373, 1376, set out in the Appendix to Title 5, Government Organization and Employees. Office of Federal Inspector for the Alaska Natural Gas Transportation System abolished and functions and authority vested in Inspector transferred to Secretary of Energy by section 3012(b) of Pub. L. 102–486, set out as an Abolition of Office of Federal Inspector note under section 719e of Title 15, Commerce and Trade, Functions and authority vested in Secretary of Energy subsequently transferred to Federal Coordinator for Alaska Natural Gas Transportation Projects by section 720d(f) of Title 15.

§6904. Governmental cooperation

(a) Interstate cooperation

The provisions of this chapter to be carried out by States may be carried out by interstate agencies and provisions applicable to States may apply to interstate regions where such agencies and regions have been established by the respective States and approved by the Administrator. In any such case, action required to be taken by the Governor of a State, respecting regional designation shall be required to be taken by the Governor of each of the respective States with respect to so much of the interstate region as is within the jurisdiction of that State.

(b) Consent of Congress to compacts
The consent of the Congress is hereby given to two or more States to negotiate and enter into agreements or compacts, not in conflict with any law or treaty of the United States, for—

(1) cooperative effort and mutual assistance for the management of solid waste or hazardous waste (or both) and the enforcement of their respective laws relating thereto, and

(2) the establishment of such agencies, joint or otherwise, as they may deem desirable for making effective such agreements or compacts.

No such agreement or compact shall be binding or obligatory upon any State or a party thereto unless it is agreed upon by all parties to the agreement and until it has been approved by the Administrator and the Congress.

### Executive Documents

#### Transfer of Functions

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

### §6905. Application of chapter and integration with other Acts

(a) Application of chapter

Nothing in this chapter shall be construed to apply to (or to authorize any State, interstate, or local authority to regulate) any activity or substance which is subject to the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Safe Drinking Water Act [42 U.S.C. 300f et seq.], the Marine Protection, Research and Sanctuaries Act of 1972 [16 U.S.C. 1431 et seq., 1447 et seq., 33 U.S.C. 1401 et seq., 2801 et seq.], or the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.] except to the extent that such application (or regulation) is not inconsistent with the requirements of such Acts.

(b) Integration with other Acts

(1) The Administrator shall integrate all provisions of this chapter for purposes of administration and enforcement and shall avoid duplication, to the maximum extent practicable, with the appropriate provisions of the Clean Air Act [42 U.S.C. 7401 et seq.], the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.], the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. 136 et seq.], the Safe Drinking Water Act [42 U.S.C. 300f et seq.], the Marine Protection, Research and Sanctuaries Act of 1972 [16 U.S.C. 1431 et seq., 1447 et seq., 33 U.S.C. 1401 et seq., 2801 et seq.], and such other Acts of Congress as grant regulatory authority to the Administrator. Such integration shall be effected only to the extent that it can be done in a manner consistent with the goals and policies expressed in this chapter and in the other acts referred to in this subsection.

(2)(A) As promptly as practicable after November 8, 1984, the Administrator shall submit a report describing—

(i) the current data and information available on emissions of polychlorinated dibenzo-p-dioxins from resource recovery facilities burning municipal solid waste;

(ii) any significant risks to human health posed by these emissions; and

(iii) operating practices appropriate for controlling these emissions.

(B) Based on the report under subparagraph (A) and on any future information on such emissions, the Administrator may publish advisories or guidelines regarding the control of dioxin emissions from such facilities. Nothing in this paragraph shall be construed to preempt or otherwise affect the authority of the Administrator to promulgate any regulations under the Clean Air Act [42 U.S.C. 7401 et seq.] regarding emissions of polychlorinated dibenzo-p-dioxins.

(3) Notwithstanding any other provisions of law, in developing solid waste plans, it is the intention of this chapter that in determining the size of a waste-to-energy facility, adequate provisions shall be given to the present and reasonably anticipated future needs, including those needs created by thorough implementation of section 6952(h) of this title, of the recycling and resource recovery interests within the area encompassed by the solid waste plan.

(c) Integration with the Surface Mining Control and Reclamation Act of 1977

(1) No later than 90 days after October 21, 1980, the Administrator shall review any regulations applicable to the treatment, storage, or disposal of any coal mining wastes or overburden promulgated by the Secretary of the Interior under the Surface Mining and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.]. If the Administrator determines that any requirement of final regulations promulgated under any section of subchapter III relating to mining wastes or overburden is not adequately addressed in such regulations promulgated by the Secretary, the Administrator shall promptly transmit such determination, together with suggested revisions and supporting documentation, to the Secretary.

(2) The Secretary of the Interior shall have exclusive responsibility for carrying out any requirement of subchapter III of this chapter with respect to coal mining wastes or overburden for which a surface coal mining and reclamation permit is issued or approved under the Surface Mining Control and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.]. The Secretary shall, with the concurrence of the Administrator, promulgate such regulations as may be necessary to carry out the purposes of this subsection and shall integrate such regulations with regulations promulgated under the Surface Mining Control and Reclamation Act of 1977.
EDITORIAL NOTES

REFERENCES IN TEXT

The Federal Water Pollution Control Act, referred to in subsecs. (a) and (b), is act June 30, 1948, ch. 758, as amended generally by Pub. L. 92–500, §2, Oct. 18, 1972, 86 Stat. 816, which is classified generally to chapter 26 (§1251 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1251 of Title 33 and Tables.

The Marine Protection, Research and Sanctuaries Act of 1972, referred to in subsecs. (a) and (b), is Pub. L. 92–532, Oct. 23, 1972, 86 Stat. 1052, as amended, which enacted chapters 32 (§1431 et seq.) and 32A (§1447 et seq.) of Title 16, Conservation, and chapters 27 (§1401 et seq.) and 41 (§2801 et seq.) of Title 33, Navigation and Navigable Waters. For complete classification of this Act to the Code, see Short Title note set out under section 1401 of Title 33 and Tables.

The Safe Drinking Water Act, referred to in subsecs. (a) and (b), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. For complete classification of this Act to the Code, see Short Title note set out under section 201 of this title and Tables.

The Clean Air Act, referred to in subsec. (b)(1), (2)(B), is act July 14, 1955, ch. 360, 69 Stat. 322, as amended, which is classified generally to chapter 85 (§7401 et seq.) of this title. For complete classification of this Act to the Code, see Short Title note set out under section 7401 of this title and Tables.

The Surface Mining Control and Reclamation Act of 1977, referred to in subsec. (c), is Pub. L. 95–87, Aug. 3, 1977, 91 Stat. 445, as amended, which is classified generally to chapter 25 (§1201 et seq.) of Title 30, Mineral Lands and Mining. For complete classification of this Act to the Code, see Short Title note set out under section 1201 of Title 30 and Tables.

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3257 of this title, prior to the general amendment of the Solid Waste Disposal Act by Pub. L. 94–580.

AMENDMENTS

1984—Subsec. (b)(1), (2). Pub. L. 98–616, §102, designated existing provisions as par. (1) and added par. (2).

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6906. Financial disclosure

(a) Statement

Each officer or employee of the Administrator who—

(1) performs any function or duty under this chapter; and
(2) has any known financial interest in any person who applies for or receives financial assistance under this chapter

shall, beginning on February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) Action by Administrator

The Administrator shall—

(1) act within ninety days after October 21, 1976—
   (A) to define the term "known financial interest" for purposes of subsection (a) of this section; and
   (B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provision for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and
(2) report to the Congress on June 1, 1978, and of each succeeding calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) Exemption

In the rules prescribed under subsection (b) of this section, the Administrator may identify specific positions within the Environmental Protection Agency which are of a nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Penalty

Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

STATUTORY NOTES AND RELATED SUBSIDIARIES

TERMINATION OF REPORTING REQUIREMENTS

For termination, effective May 15, 2000, of reporting provisions in subsec. (b)(2) of this section, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance, and the 14th item on page 164 of House Document No. 103–7.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6907. Solid waste management information and guidelines

(a) Guidelines

Within one year of October 21, 1976, and from time to time thereafter, the Administrator shall, in cooperation with appropriate Federal, State, municipal, and intermunicipal agencies, and in consultation with other interested persons, and after public hearings, develop and publish suggested guidelines for solid waste management. Such suggested guidelines shall—

(1) provide a technical and economic description of the level of performance that can be attained by various available solid waste management practices (including operating practices) which provide for the protection of public health and the environment;
(2) not later than two years after October 21, 1976, describe levels of performance, including appropriate methods and degrees of control, that provide at a minimum for (A) protection of public health and welfare; (B) protection of the quality of ground waters and surface waters from leachates; (C) protection of the quality of surface waters from runoff through compliance with effluent limitations under the Federal Water Pollution Control Act, as amended [33 U.S.C. 1251 et seq.]; (D) protection of ambient air quality through compliance with new source performance standards or requirements of air
quality implementation plans under the Clean Air Act, as amended [42 U.S.C. 7401 et seq.]; (E) disease and vector control; (F) safety; and (G) esthetics; and
(3) provide minimum criteria to be used by the States to define those solid waste management practices which constitute the open dumping of solid waste or hazardous waste and are to be prohibited under subchapter IV of this chapter.

Where appropriate, such suggested guidelines also shall include minimum information for use in deciding the adequate location, design, and construction of facilities associated with solid waste management practices, including the consideration of regional, geographic, demographic, and climatic factors.

(b) Notice
The Administrator shall notify the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a reasonable time before publishing any suggested guidelines or proposed regulations under this chapter of the content of such proposed suggested guidelines or proposed regulations under this chapter.

CHANGE OF NAME

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6908. Small town environmental planning

(a) Establishment

The Administrator of the Environmental Protection Agency (hereafter referred to as the "Administrator") shall establish a program to assist small communities in planning and financing environmental facilities. The program shall be known as the "Small Town Environmental Planning Program".

(b) Small Town Environmental Planning Task Force

(1) The Administrator shall establish a Small Town Environmental Planning Task Force which shall be composed of representatives of small towns from different areas of the United States, Federal and State governmental agencies, and public interest groups. The Administrator shall terminate the Task Force not later than 2 years after the establishment of the Task Force.

(2) The Task Force shall—

(A) identify regulations developed pursuant to Federal environmental laws which pose significant compliance problems for small towns;

(B) identify means to improve the working relationship between the Environmental Protection Agency (hereafter referred to as the Agency) and small towns;

(C) review proposed regulations for the protection of the environmental and public health and suggest revisions that could improve the ability of small towns to comply with such regulations;

(D) identify means to promote regionalization of environmental treatment systems and infrastructure serving small towns to improve the economic condition of such systems and infrastructure; and

(E) provide such other assistance to the Administrator as the Administrator deems appropriate.

(c) Identification of environmental requirements

(1) Not later than 6 months after October 6, 1992, the Administrator shall publish a list of requirements under Federal environmental and public health statutes (and the regulations developed pursuant to such statutes) applicable to small towns. Not less than annually, the Administrator shall make such additions and deletions to and from the list as the Administrator deems appropriate.

(2) The Administrator shall, as part of the Small Town Environmental Planning Program under this section, implement a program to notify small communities of the regulations identified under paragraph (1) and of future regulations and requirements through methods that the Administrator determines to be effective to provide information to the greatest number of small communities, including any of the following:

(A) Newspapers and other periodicals.

(B) Other news media.

(C) Trade, municipal, and other associations that the Administrator determines to be appropriate.

(D) Direct mail.

(d) Small Town Ombudsman

The Administrator shall establish and staff an Office of the Small Town Ombudsman. The Office shall provide assistance to small towns in connection with the Small Town Environmental Planning Program and other business with the Agency. Each regional office shall identify a small town contact. The Small Town Ombudsman and the regional contacts also may assist larger communities, but only if first priority is given to providing assistance to small towns.

(e) Multi-media permits

(1) The Administrator shall conduct a study of establishing a multi-media permitting program for small towns. Such evaluation shall include an analysis of—

(A) environmental benefits and liabilities of a multi-media permitting program;

(B) the potential of using such a program to coordinate a small town's environmental and public health activities; and

(C) the legal barriers, if any, to the establishment of such a program.

(2) Within 3 years after October 6, 1992, the Administrator shall report to Congress on the results of the evaluation performed in accordance with paragraph (1). Included in this report shall be a description of the activities conducted pursuant to subsections (a) through (d).

(f) "Small town" defined

For purposes of this section, the term "small town" means an incorporated or unincorporated community (as defined by the Administrator) with a population of less than 2,500 individuals.

(g) Authorization

There is authorized to be appropriated the sum of $500,000 to implement this section.

Section was enacted as part of the Federal Facility Compliance Act of 1992, and not as part of the Solid Waste Disposal Act which comprises this chapter.

§6908a. Agreements with Indian tribes

On and after October 21, 1998, the Administrator is authorized to enter into assistance agreements with Federally 1 recognized Indian tribes on such terms and conditions as the Administrator deems appropriate for the development and implementation of programs to manage hazardous waste, and underground storage tanks.

EDITORIAL NOTES

CODIFICATION

Section was enacted as part of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999, and not as part of the Solid Waste Disposal Act which comprises this chapter.

1 So in original. Probably should not be capitalized.

SUBCHAPTER II—OFFICE OF SOLID WASTE; AUTHORITIES OF THE ADMINISTRATOR

§6911. Office of Solid Waste and Interagency Coordinating Committee

(a) Office of Solid Waste

The Administrator shall establish within the Environmental Protection Agency an Office of Solid Waste (hereinafter referred to as the "Office") to be headed by an Assistant Administrator of the Environmental Protection Agency. The duties and responsibilities (other than duties and responsibilities relating to research and development) of the Administrator under this chapter (as modified by applicable reorganization plans) shall be carried out through the Office.

(b) Interagency Coordinating Committee

(1) There is hereby established an Interagency Coordinating Committee on Federal Resource Conservation and Recovery Activities which shall have the responsibility for coordinating all activities dealing with resource conservation and recovery from solid waste carried out by the Environmental Protection Agency, the Department of Energy, the Department of Commerce, and all other Federal agencies which conduct such activities pursuant to this chapter or any other Act. For purposes of this subsection, the term "resource conservation and recovery activities" shall include, but not be limited to, all research, development and demonstration projects on resource conservation or energy, or material, recovery from solid waste, and all technical or financial assistance for State or local planning for, or implementation of, projects related to resource conservation or energy or material, recovery from solid waste. The Committee shall be chaired by the Administrator of the Environmental Protection Agency or such person as the Administrator may designate. Members of the Committee shall include representatives of the Department of Energy, the Department of Commerce, the Department of the Treasury, and each other Federal agency which the Administrator determines to have programs or responsibilities affecting resource conservation or recovery.

(2) The Interagency Coordinating Committee shall include oversight of the implementation of

(A) the May 1979 Memorandum of Understanding on Energy Recovery from Municipal Solid Waste between the Environmental Protection Agency and the Department of Energy;

(C) any subsequent agreements between these agencies or other Federal agencies which address Federal resource recovery or conservation activities.

EDITORIAL NOTES

CODIFICATION

Subsection (b)(3) of this section, which required the Interagency Coordinating Committee to submit to Congress on March 1 of each year, a five-year action plan for Federal resource conservation or recovery activities, terminated, effective May 15, 2000, pursuant to section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance. See, also, the 2nd item on page 175 of House Document No. 103–7.

AMENDMENTS

Pub. L. 96–482 designated existing provisions as subsec. (a) and added subsec. (b).

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 1980 AMENDMENT

Pub. L. 96–510, title III, §307(c), Dec. 11, 1980, 94 Stat. 2810, provided that: "The amendment made by subsection (a) [amending this section] shall become effective ninety days after the date of the enactment of this Act [Dec. 11, 1980]."

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6911a. Assistant Administrator of Environmental Protection Agency; appointment, etc.

The Assistant Administrator of the Environmental Protection Agency appointed to head the Office of Solid Waste shall be in addition to the five Assistant Administrators of the Environmental Protection Agency provided for in section 1(d) of Reorganization Plan Numbered 3 of 1970 and the additional Assistant Administrator provided by the Toxic Substances Control Act [15 U.S.C. 2601 et seq.], shall be appointed by the President by and with the advice and consent of the Senate. (Pub. L. 96–510, title III, §307(b), Dec. 11, 1980, 94 Stat. 2810; Pub. L. 98–80, §2(c)(2)(B), Aug. 23, 1983, 97 Stat. 485.)

EDITORIAL NOTES

Reorganization Plan Numbered 3 of 1970, referred to in text, is set out in the Appendix to Title 5, Government Organization and Employees.

The Toxic Substances Control Act, referred to in text, is Pub. L. 94–469, Oct. 11, 1976, 90 Stat. 2003, as amended, which is classified generally to chapter 53 (§2601 et seq.) of Title 15, Commerce and Trade. For complete classification of this Act to the Code, see Short Title note set out under section 2601 of Title 15 and Tables.

CODIFICATION

Section was enacted as part of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and not as part of the Solid Waste Disposal Act which comprises this chapter.

AMENDMENTS

1983—Pub. L. 98–80 struck out ",", and shall be compensated at the rate provided for Level IV of the Executive Schedule pay rates under section 5315 of title 5" after "advice and consent of the Senate".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE

Section effective Dec. 11, 1980, see section 9652 of this title.
§6912. Authorities of Administrator

(a) Authorities

In carrying out this chapter, the Administrator is authorized to—

1. prescribe, in consultation with Federal, State, and regional authorities, such regulations as are necessary to carry out his functions under this chapter;

2. consult with or exchange information with other Federal agencies undertaking research, development, demonstration projects, studies, or investigations relating to solid waste;

3. provide technical and financial assistance to States or regional agencies in the development and implementation of solid waste plans and hazardous waste management programs;

4. consult with representatives of science, industry, agriculture, labor, environmental protection and consumer organizations, and other groups, as he deems advisable;

5. utilize the information, facilities, personnel and other resources of Federal agencies, including the National Institute of Standards and Technology and the National Bureau of the Census, on a reimbursable basis, to perform research and analyses and conduct studies and investigations related to resource recovery and conservation and to otherwise carry out the Administrator's functions under this chapter; and

6. to delegate to the Secretary of Transportation the performance of any inspection or enforcement function under this chapter relating to the transportation of hazardous waste where such delegation would avoid unnecessary duplication of activity and would carry out the objectives of this chapter and of chapter 51 of title 49.

(b) Revision of regulations

Each regulation promulgated under this chapter shall be reviewed and, where necessary, revised not less frequently than every three years.

(c) Criminal investigations

In carrying out the provisions of this chapter, the Administrator, and duly-designated agents and employees of the Environmental Protection Agency, are authorized to initiate and conduct investigations under the criminal provisions of this chapter, and to refer the results of these investigations to the Attorney General for prosecution in appropriate cases.

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6913. Resource Recovery and Conservation Panels

The Administrator shall provide teams of personnel, including Federal, State, and local employees or contractors (hereinafter referred to as "Resource Conservation and Recovery Panels") to provide Federal agencies, States and local governments upon request with technical assistance on solid waste management, resource recovery, and resource conservation. Such teams shall include technical, marketing, financial, and institutional specialists, and the services of such teams shall be provided without charge to States or local governments.
EDITORIAL NOTES

AMENDMENTS

1978—Pub. L. 95–609 inserted "Federal agencies," after "to provide".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6914. Grants for discarded tire disposal

(a) Grants

The Administrator shall make available grants equal to 5 percent of the purchase price of tire shredders (including portable shredders attached to tire collection trucks) to those eligible applicants best meeting criteria promulgated under this section. An eligible applicant may be any private purchaser, public body, or public-private joint venture. Criteria for receiving grants shall be promulgated under this section and shall include the policy to offer any private purchaser the first option to receive a grant, the policy to develop widespread geographic distribution of tire shredding facilities, the need for such facilities within a geographic area, and the projected risk and viability of any such venture. In the case of an application under this section from a public body, the Administrator shall first make a determination that there are no private purchasers interested in making an application before approving a grant to a public body.

(b) Authorization of appropriations

There is authorized to be appropriated $750,000 for each of the fiscal years 1978 and 1979 to carry out this section.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6914a. Labeling of lubricating oil

For purposes of any provision of law which requires the labeling of commodities, lubricating oil shall be treated as lawfully labeled only if it bears the following statement, prominently displayed:

"DON'T POLLUTE—CONSERVE RESOURCES; RETURN USED OIL TO COLLECTION CENTERS".

EDITORIAL NOTES

PRIOR PROVISIONS

A prior section 2005 of Pub. L. 89–272 was renumbered section 2006 and is classified to section 6915 of this title.

§6914b. Degradable plastic ring carriers; definitions
As used in this title—
(1) the term "regulated item" means any plastic ring carrier device that contains at least one hole greater than 1¾ inches in diameter which is made, used, or designed for the purpose of packaging, transporting, or carrying multipackaged cans or bottles, and which is of a size, shape, design, or type capable, when discarded, of becoming entangled with fish or wildlife; and
(2) the term "naturally degradable material" means a material which, when discarded, will be reduced to environmentally benign subunits under the action of normal environmental forces, such as, among others, biological decomposition, photodegradation, or hydrolysis.

EDITORIAL NOTES

REFERENCES IN TEXT
This title, referred to in text, is title I of Pub. L. 100–556, Oct. 28, 1988, 102 Stat. 2779, which enacted sections 6914b and 6914b–1 of this title, and provisions set out as a note under section 6914b of this title. For complete classification of this title to the Code, see Tables.

CODIFICATION
Section was not enacted as part of the Solid Waste Disposal Act which comprises this chapter.

STATUTORY NOTES AND RELATED SUBSIDIARIES

CONGRESSIONAL FINDINGS
"(1) plastic ring carrier devices have been found in large quantities in the marine environment;
"(2) fish and wildlife have been known to have become entangled in plastic ring carriers;
"(3) nondegradable plastic ring carrier devices can remain intact in the marine environment for decades, posing a threat to fish and wildlife; and
"(4) 16 States have enacted laws requiring that plastic ring carrier devices be made from degradable material in order to reduce litter and to protect fish and wildlife."

§6914b–1. Regulation of plastic ring carriers
Not later than 24 months after October 28, 1988 (unless the Administrator of the Environmental Protection Agency determines that it is not feasible or that the byproducts of degradable regulated items present a greater threat to the environment than nondegradable regulated items), the Administrator of the Environmental Protection Agency shall require, by regulation, that any regulated item intended for use in the United States shall be made of naturally degradable material which, when discarded, decomposes within a period established by such regulation. The period within which decomposition must occur after being discarded shall be the shortest period of time consistent with the intended use of the item and the physical integrity required for such use. Such regulation shall allow a reasonable time for affected parties to come into compliance, including the use of existing inventories.

EDITORIAL NOTES

CODIFICATION
Section was not enacted as part of the Solid Waste Disposal Act which comprises this chapter.

§6915. Annual report
The Administrator shall transmit to the Congress and the President, not later than ninety days after the end of each fiscal year, a comprehensive and detailed report on all activities of the Office during the preceding fiscal year. Each such report shall include—
(1) a statement of specific and detailed objectives for the activities and programs conducted and assisted under this chapter;
(2) statements of the Administrator's conclusions as to the effectiveness of such activities and programs in meeting the stated objectives and the purposes of this chapter, measured through the end of such fiscal year;
(3) a summary of outstanding solid waste problems confronting the Administrator, in order of priority;
(4) recommendations with respect to such legislation which the Administrator deems necessary or desirable to assist in solving problems respecting solid waste;
(5) all other information required to be submitted to the Congress pursuant to any other provision of this chapter; and
(6) the Administrator’s plans for activities and programs respecting solid waste during the next fiscal year.

98 Stat. 3276.)

EDITORIAL NOTES

PRIOR PROVISIONS

A prior section 2006 of Pub. L. 89–272 was renumbered section 2007 and is classified to section 6916 of this
title.

AMENDMENTS

1984—Par. (1). Pub. L. 98–616 substituted "detailed" for "detail".

STATUTORY NOTES AND RELATED SUBSIDIARIES

TERMINATION OF REPORTING REQUIREMENTS

For termination, effective May 15, 2000, of provisions of this section relating to transmittal of annual report
to Congress, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31,

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection
Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas
Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for
Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6916. General authorization

(a) General administration

There are authorized to be appropriated to the Administrator for the purpose of carrying out the provisions of this chapter,
$35,000,000 for the fiscal year ending September 30, 1977, $38,000,000 for the fiscal year ending September 30, 1978,
$42,000,000 for the fiscal year ending September 30, 1979, $70,000,000 for the fiscal year ending September 30, 1980,
$80,000,000 for the fiscal year ending September 30, 1981, $80,000,000 for the fiscal year ending September 30, 1982,
$70,000,000 for the fiscal year ending September 30, 1985, $80,000,000 for the fiscal year ending September 30, 1986,
$80,000,000 for the fiscal year ending September 30, 1987, and $80,000,000 for the fiscal year 1988.

(b) Resource Recovery and Conservation Panels

Not less than 20 percent of the amount appropriated under subsection (a), or $5,000,000 per fiscal year, whichever is
less, shall be used only for purposes of Resource Recovery and Conservation Panels established under section 6913 of this
title (including travel expenses incurred by such panels in carrying out their functions under this chapter).

(c) Hazardous waste

Not less than 30 percent of the amount appropriated under subsection (a) shall be used only for purposes of carrying out
subchapter III of this chapter (relating to hazardous waste) other than section 6931 of this title.

(d) State and local support

Not less than 25 percent of the total amount appropriated under this chapter, up to the amount authorized in section
6948(a)(1) of this title, shall be used only for purposes of support to State, regional, local, and interstate agencies in
accordance with subchapter IV of this chapter other than section 6948(a)(2) or 6949 of this title.

(e) Criminal investigators

There is authorized to be appropriated to the Administrator $3,246,000 for the fiscal year 1985, $2,408,300 for the fiscal
year 1986, $2,529,000 for the fiscal year 1987, and $2,529,000 for the fiscal year 1988 to be used—
(1) for additional officers or employees of the Environmental Protection Agency authorized by the Administrator to
conduct criminal investigations (to investigate, or supervise the investigation of, any activity for which a criminal penalty is
provided) under this chapter; and
(2) for support costs for such additional officers or employees.

(f) Underground storage tanks
(1) There are authorized to be appropriated to the Administrator for the purpose of carrying out the provisions of subchapter IX (relating to regulation of underground storage tanks), $10,000,000 for each of the fiscal years 1985 through 1988.

(2) There is authorized to be appropriated $25,000,000 for each of the fiscal years 1985 through 1988 to be used to make grants to the States for purposes of assisting the States in the development and implementation of approved State underground storage tank release detection, prevention, and correction programs under subchapter IX.

**EDITORIAL NOTES**

**AMENDMENTS**

1984—Subsec. (a). Pub. L. 98–616, §2(a), substituted "$80,000,000 for the fiscal year ending September 30, 1982, $70,000,000 for the fiscal year ending September 30, 1985, $80,000,000 for the fiscal year ending September 30, 1986, $80,000,000 for the fiscal year ending September 30, 1987, and $80,000,000 for the fiscal year 1988" for "and $80,000,000 for the fiscal year ending September 30, 1982".

Subsecs. (e), (f). Pub. L. 98–616, §2(i), added subsecs. (e) and (f).

1980—Subsec. (a). Pub. L. 96–482, §31(a), authorized appropriation of $70,000,000, $80,000,000, and $80,000,000 for fiscal years ending Sept. 30, 1980, through 1982, respectively.

Subsec. (b). Pub. L. 96–482, §6(a), inserted ", or $5,000,000 per fiscal year, whichever is less," after "subsection (a)".

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6917. Office of Ombudsman

(a) Establishment; functions

The Administrator shall establish an Office of Ombudsman, to be directed by an Ombudsman. It shall be the function of the Office of Ombudsman to receive individual complaints, grievances, requests for information submitted by any person with respect to any program or requirement under this chapter.

(b) Authority to render assistance

The Ombudsman shall render assistance with respect to the complaints, grievances, and requests submitted to the Office of Ombudsman, and shall make appropriate recommendations to the Administrator.

(c) Effect on procedures for grievances, appeals, or administrative matters

The establishment of the Office of Ombudsman shall not affect any procedures for grievances, appeals, or administrative matters in any other provision of this chapter, any other provision of law, or any Federal regulation.

(d) Termination

The Office of the Ombudsman shall cease to exist 4 years after November 8, 1984.

**SUBCHAPTER III—HAZARDOUS WASTE MANAGEMENT**

§6921. Identification and listing of hazardous waste

(a) Criteria for identification or listing

Not later than eighteen months after October 21, 1976, the Administrator shall, after notice and opportunity for public hearing, and after consultation with appropriate Federal and State agencies, develop and promulgate criteria for identifying the characteristics of hazardous waste, and for listing hazardous waste, which should be subject to the provisions of this
subchapter, taking into account toxicity, persistence, and degradability in nature, potential for accumulation in tissue, and other related factors such as flammability, corrosiveness, and other hazardous characteristics. Such criteria shall be revised from time to time as may be appropriate.

(b) Identification and listing

(1) Not later than eighteen months after October 21, 1976, and after notice and opportunity for public hearing, the Administrator shall promulgate regulations identifying the characteristics of hazardous waste, and listing particular hazardous wastes (within the meaning of section 6903(5) of this title), which shall be subject to the provisions of this subchapter. Such regulations shall be based on the criteria promulgated under subsection (a) and shall be revised from time to time thereafter as may be appropriate. The Administrator, in cooperation with the Agency for Toxic Substances and Disease Registry and the National Toxicology Program, shall also identify or list those hazardous wastes which shall be subject to the provisions of this subchapter solely because of the presence in such wastes of certain constituents (such as identified carcinogens, mutagens, or teratogens) at levels in excess of levels which endanger human health.

(2)(A) Notwithstanding the provisions of paragraph (1) of this subsection, drilling fluids, produced waters, and other wastes associated with the exploration, development, or production of crude oil or natural gas or geothermal energy shall be subject only to existing State or Federal regulatory programs in lieu of this subchapter until at least 24 months after October 21, 1980, and after promulgation of the regulations in accordance with subparagraphs (B) and (C) of this paragraph. It is the sense of the Congress that such State or Federal programs should include, for waste disposal sites which are to be closed, provisions requiring at least the following:

(i) The identification through surveying, platting, or other measures, together with recordation of such information on the public record, so as to assure that the location where such wastes are disposed of can be located in the future; except however, that no such surveying, platting, or other measure identifying the location of a disposal site for drilling fluids and associated wastes shall be required if the distance from the disposal site to the surveyed or platted location to the associated well is less than two hundred lineal feet; and

(ii) A chemical and physical analysis of a produced water and a composition of a drilling fluid suspected to contain a hazardous material, with such information to be acquired prior to closure and to be placed on the public record.

(B) Not later than six months after completion and submission of the study required by section 6982(m) of this title, the Administrator shall, after public hearings and opportunity for comment, determine either to promulgate regulations under this subchapter for drilling fluids, produced waters, and other wastes associated with the exploration, development, or production of crude oil or natural gas or geothermal energy or that such regulations are unwarranted. The Administrator shall publish his decision in the Federal Register accompanied by an explanation and justification of the reasons for it. In making the decision under this paragraph, the Administrator shall utilize the information developed or accumulated pursuant to the study required under section 6982(m) of this title.

(C) The Administrator shall transmit his decision, along with any regulations, if necessary, to both Houses of Congress. Such regulations shall take effect only when authorized by Act of Congress.

(3)(A) Notwithstanding the provisions of paragraph (1) of this subsection, each waste listed below shall, except as provided in subparagraph (B) of this paragraph, be subject only to regulation under other applicable provisions of Federal or State law in lieu of this subchapter until at least six months after the date of submission of the applicable study required to be conducted under subsection (f), (n), (o), or (p) of section 6982 of this title and after promulgation of regulations in accordance with subparagraph (C) of this paragraph:

(i) Fly ash waste, bottom ash waste, slag waste, and flue gas emission control waste generated primarily from the combustion of coal or other fossil fuels.

(ii) Solid waste from the extraction, beneficiation, and processing of ores and minerals, including phosphate rock and overburden from the mining of uranium ore.

(iii) Cement kiln dust waste.

(B)(i) Owners and operators of disposal sites for wastes listed in subparagraph (A) may be required by the Administrator, through regulations prescribed under authority of section 6912 of this title—

(I) as to disposal sites for such wastes which are to be closed, to identify the locations of such sites through surveying, platting, or other measures, together with recordation of such information on the public record, to assure that the locations where such wastes are disposed of are known and can be located in the future, and

(II) to provide chemical and physical analysis and composition of such wastes, based on available information, to be placed on the public record.

(ii) In conducting any study under subsection (f), (n), (o), or (p), of section 6982 of this title, any officer, employee, or authorized representative of the Environmental Protection Agency, duly designated by the Administrator, is authorized, at reasonable times and as reasonably necessary for the purposes of such study, to enter any establishment where any waste subject to such study is generated, stored, treated, disposed of, or transported from; to inspect, take samples, and conduct monitoring and testing; and to have access to and copy records relating to such waste. Each such inspection shall be commenced and completed with reasonable promptness. If the officer, employee, or authorized representative obtains any samples prior to leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and if requested a portion of each such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, or monitoring and testing performed, a copy of the results shall be furnished promptly to the owner, operator, or agent in charge.

(II) Any records, reports, or information obtained from any person under subclause (I) shall be available to the public, except that upon a showing satisfactory to the Administrator by any person that records, reports, or information, or particular
part thereof, to which the Administrator has access under this subparagraph is made public, would divulge information
entitled to protection under section 1905 of title 18, the Administrator shall consider such information or particular portion
thereof confidential in accordance with the purposes of that section, except that such record, report, document, or
information may be disclosed to other officers, employees, or authorized representatives of the United States concerned
with carrying out this chapter. Any person not subject to the provisions of section 1905 of title 18 who knowingly and willfully
divulges or discloses any information entitled to protection under this subparagraph shall, upon conviction, be subject to a
fine of not more than $5,000 or to imprisonment not to exceed one year, or both.

(iii) The Administrator may prescribe regulations, under the authority of this chapter, to prevent radiation exposure which
presents an unreasonable risk to human health from the use in construction or land reclamation (with or without
revegetation) of (I) solid waste from the extraction, beneficiation, and processing of phosphate rock or (II) overburden from
the mining of uranium ore.

(iv) Whenever on the basis of any information the Administrator determines that any person is in violation of any
requirement of this subparagraph, the Administrator shall give notice to the violator of his failure to comply with such
requirement. If such violation extends beyond the thirtieth day after the Administrator’s notification, the Administrator may
issue an order requiring compliance within a specified time period or the Administrator may commence a civil action in the
United States district court in the district in which the violation occurred for appropriate relief, including a temporary or
permanent injunction.

(C) Not later than six months after the date of submission of the applicable study required to be conducted under
subsections (f), (n), (o), or (p), of section 6982 of this title, the Administrator shall, after public hearings and opportunity for
comment, either determine to promulgate regulations under this subchapter for each waste listed in subparagraph (A) of this
paragraph or determine that such regulations are unwarranted. The Administrator shall publish his determination, which
shall be based on information developed or accumulated pursuant to such study, public hearings, and comment, in the
Federal Register accompanied by an explanation and justification of the reasons for it.

(c) Petition by State Governor

At any time after the date eighteen months after October 21, 1976, the Governor of any State may petition the
Administrator to identify or list a material as a hazardous waste. The Administrator shall act upon such petition within ninety
days following his receipt thereof and shall notify the Governor of such action. If the Administrator denies such petition
because of financial considerations, in providing such notice to the Governor he shall include a statement concerning such
considerations.

(d) Small quantity generator waste

(1) By March 31, 1986, the Administrator shall promulgate standards under sections 6922, 6923, and 6924 of this title for
hazardous waste generated by a generator in a total quantity of hazardous waste greater than one hundred kilograms but
less than one thousand kilograms during a calendar month.

(2) The standards referred to in paragraph (1), including standards applicable to the legitimate use, reuse, recycling, and
reclamation of such wastes, may vary from the standards applicable to hazardous waste generated by larger quantity
generators, but such standards shall be sufficient to protect human health and the environment.

(3) Not later than two hundred and seventy days after November 8, 1984, any hazardous waste which is part of a total
quantity generated by a generator generating greater than one hundred kilograms but less than one thousand kilograms
during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied
by a copy of the Environmental Protection Agency Uniform Hazardous Waste Manifest form signed by the generator. This
form shall contain the following information:

(A) the name and address of the generator of the waste;

(B) the United States Department of Transportation description of the waste, including the proper shipping name,
hazard class, and identification number (UN/NA), if applicable;

(C) the number and type of containers;

(D) the quantity of waste being transported; and

(E) the name and address of the facility designated to receive the waste.

If subparagraph (B) is not applicable, in lieu of the description referred to in such subparagraph (B), the form shall contain
the Environmental Protection Agency identification number, or a generic description of the waste, or a description of the
waste by hazardous waste characteristic. Additional requirements related to the manifest form shall apply only if determined
necessary by the Administrator to protect human health and the environment.

(4) The Administrator’s responsibility under this subchapter to protect human health and the environment may require the
promulgation of standards under this subchapter for hazardous wastes which are generated by any generator who does not
generate more than one hundred kilograms of hazardous waste in a calendar month.

(5) Until the effective date of standards required to be promulgated under paragraph (1), any hazardous waste identified
or listed under this section generated by any generator during any calendar month in a total quantity greater than one
hundred kilograms but less than one thousand kilograms, which is not treated, stored, or disposed of at a hazardous waste
treatment, storage, or disposal facility with a permit under section 6925 of this title, shall be disposed of only in a facility
which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste.

(6) Standards promulgated as provided in paragraph (1) shall, at a minimum, require that all treatment, storage, or
disposal of hazardous wastes generated by generators referred to in paragraph (1) shall occur at a facility with interim status
or a permit under this subchapter, except that onsite storage of hazardous waste generated by a generator generating a
total quantity of hazardous waste greater than one hundred kilograms, but less than one thousand kilograms during a
calendar month, may occur without the requirement of a permit for up to one hundred and eighty days. Such onsite storage
may occur without the requirement of a permit for not more than six thousand kilograms for up to two hundred and seventy

days if such generator must ship or haul such waste over two hundred miles.

(7)(A) Nothing in this subsection shall be construed to affect or impair the validity of regulations promulgated by the

Secretary of Transportation pursuant to chapter 51 of title 49.

(B) Nothing in this subsection shall be construed to affect, modify, or render invalid any requirements in regulations

promulgated prior to January 1, 1983 applicable to any acutely hazardous waste identified or listed under this section which

is generated by any generator during any calendar month in a total quantity less than one thousand kilograms.

(8) Effective March 31, 1986, unless the Administrator promulgates standards as provided in paragraph (1) of this

subsection prior to such date, hazardous waste generated by any generator in a total quantity greater than one hundred

kilograms but less than one thousand kilograms during a calendar month shall be subject to the following requirements until

the standards referred to in paragraph (1) of this subsection have become effective:

(A) the notice requirements of paragraph (3) of this subsection shall apply and in addition, the information provided in

the form shall include the name of the waste transporters and the name and address of the facility designated to receive

the waste;

(B) except in the case of the onsite storage referred to in paragraph (6) of this subsection, the treatment, storage, or

disposal of such waste shall occur at a facility with interim status or a permit under this subchapter;

(C) generators of such waste shall file manifest exception reports as required of generators producing greater amounts

of hazardous waste per month except that such reports shall be filed by January 31, for any waste shipment occurring in

the last half of the preceding calendar year, and by July 31, for any waste shipment occurring in the first half of the

calendar year; and

(D) generators of such waste shall retain for three years a copy of the manifest signed by the designated facility that

has received the waste.

Nothing in this paragraph shall be construed as a determination of the standards appropriate under paragraph (1).

(9) The last sentence of section 6930(b) of this title shall not apply to regulations promulgated under this subsection.

(e) Specified wastes

(1) Not later than 6 months after November 8, 1984, the Administrator shall, where appropriate, list under subsection (b)
(1), additional wastes containing chlorinated dioxins or chlorinated-dibenzozenfurans. Not later than one year after November 8,
1984, the Administrator shall, where appropriate, list under subsection (b)(1) wastes containing remaining halogenated

dioxins and halogenated-dibenzozenfurans.

(2) Not later than fifteen months after November 8, 1984, the Administrator shall make a determination of whether or not

to list under subsection (b)(1) the following wastes: Chlorinated Aliphatics, Dioxin, Dimethyl Hydrazine, TDI (toluene
disocyanate), Carbamates, Bromacil, Linuron, Organo-bromines, solvents, refining wastes, chlorinated aromatics, dyes and

pigments, inorganic chemical industry wastes, lithium batteries, coke byproducts, paint production wastes, and coal slurry

pipeline effluent.

(f) Delisting procedures

(1) When evaluating a petition to exclude a waste generated at a particular facility from listing under this section, the

Administrator shall consider factors (including additional constituents) other than those for which the waste was listed if the

Administrator has a reasonable basis to believe that such additional factors could cause the waste to be a hazardous waste.

The Administrator shall provide notice and opportunity for comment on these additional factors before granting or denying

such petition.

(2)(A) To the maximum extent practicable the Administrator shall publish in the Federal Register a proposal to grant or
deny a petition referred to in paragraph (1) within twelve months after receiving a complete application to exclude a waste

generated at a particular facility from being regulated as a hazardous waste and shall grant or deny such a petition within

twenty-four months after receiving a complete application.

(B) The temporary granting of such a petition prior to November 8, 1984, without the opportunity for public comment and

the full consideration of such comments shall not continue for more than twenty-four months after November 8, 1984. If a

final decision to grant or deny such a petition has not been promulgated after notice and opportunity for public comment

within the time limit prescribed by the preceding sentence, any such temporary granting of such petition shall cease to be in

effect.

(g) EP toxicity

Not later than twenty-eight months after November 8, 1984, the Administrator shall examine the deficiencies of the

extrac tion procedure toxicity characteristic as a predictor of the leaching potential of wastes and make changes in the

extraction procedure toxicity characteristic, including changes in the leaching media, as are necessary to insure that it

accurately predicts the leaching potential of wastes which pose a threat to human health and the environment when

mism anaged.

(h) Additional characteristics

Not later than two years after November 8, 1984, the Administrator shall promulgate regulations under this section

identifying additional characteristics of hazardous waste, including measures or indicators of toxicity.

(i) Clarification of household waste exclusion

A resource recovery facility recovering energy from the mass burning of municipal solid waste shall not be deemed to be

treating, storing, disposing of, or otherwise managing hazardous wastes for the purposes of regulation under this

subchapter, if—

(1) such facility—
(A) receives and burns only—
   (i) household waste (from single and multiple dwellings, hotels, motels, and other residential sources), and
   (ii) solid waste from commercial or industrial sources that does not contain hazardous waste identified or listed
       under this section, and

(B) does not accept hazardous wastes identified or listed under this section, and

(2) the owner or operator of such facility has established contractual requirements or other appropriate notification or
inspection procedures to assure that hazardous wastes are not received at or burned in such facility.

(j) Methamphetamine production

Not later than every 24 months, the Administrator shall submit to the Committee on Energy and Commerce of the House
of Representatives and the Committee on Environment and Public Works of the Senate a report setting forth information
collected by the Administrator from law enforcement agencies, States, and other relevant stakeholders that identifies the
byproducts of the methamphetamine production process and whether the Administrator considers each of the byproducts to
be a hazardous waste pursuant to this section and relevant regulations.

EDITORIAL NOTES

CODIFICATION

In subsec. (d)(7)(A), "chapter 51 of title 49" substituted for "the Hazardous Materials Transportation Act [49
App. U.S.C. 1801 et seq."] on authority of Pub. L. 103–272, §6(b), July 5, 1994, 108 Stat. 1378, the first section of
which enacted subtitles II, III, and V to X of Title 49, Transportation.

AMENDMENTS

1996—Subsec. (d)(5). Pub. L. 104–119 made technical amendment to reference in original act which appears
in text as reference to this section.
1984—Subsec. (b)(1). Pub. L. 98–616, §222(b), inserted at end "The Administrator, in cooperation with the
Agency for Toxic Substances and Disease Registry and the National Toxology Program, shall also identify or
list those hazardous wastes which shall be subject to the provisions of this subchapter solely because of the
presence in such wastes of certain constituents (such as identified carcinogens, mutagens, or teratogens)
sic at levels in excess of levels which endanger human health."
Subsecs. (e) to (h). Pub. L. 98–616, §222(a), added subsecs. (e) to (h).
1980—Subsec. (b). Pub. L. 96–482 designated existing provisions as par. (1) and added pars. (2) and (3).

STATUTORY NOTES AND RELATED SUBSIDIARIES

REGULATION

Environmental Protection Agency promulgates regulations under subtitle C of the Solid Waste Disposal Act
[42 U.S.C. 6921 et seq.] addressing the extraction of wastes from landfills as part of the process of recovering
methane from such landfills, the owner and operator of equipment used to recover methane from a landfill
shall not be deemed to be managing, generating, transporting, treating, storing, or disposing of hazardous or
liquid wastes within the meaning of that subtitle. If the aqueous or hydrocarbon phase of the condensate or
any other waste material removed from the gas recovered from the landfill meets any of the characteristics
identified under section 3001 of subtitle C of the Solid Waste Disposal Act [42 U.S.C. 6921], the preceding
sentence shall not apply and such condensate phase or other waste material shall be deemed a hazardous
waste under that subtitle, and shall be regulated accordingly."

ASH MANAGEMENT AND DISPOSAL

ash from solid waste incineration units burning municipal waste would not be regulated by the Administrator of
the Environmental Protection Agency pursuant to this section.

SMALL QUANTITY GENERATOR WASTE; INFORM AND EDUCATE; WASTE GENERATORS
Pub. L. 98–616, title II, §221(b), Nov. 8, 1984, 98 Stat. 3249, directed Administrator of Environmental Protection Agency to undertake activities to inform and educate waste generators of their responsibilities under subsec. (d) of this section during the period within thirty months after Nov. 8, 1984, to help assure compliance.

**STUDY OF EXISTING MANIFEST SYSTEM FOR HAZARDOUS WASTES AS APPLICABLE TO SMALL QUANTITY GENERATORS; SUBMITAL TO CONGRESS**

Pub. L. 98–616, title II, §221(d), Nov. 8, 1984, 98 Stat. 3250, directed Administrator of Environmental Protection Agency to cause to be studied the existing manifest system for hazardous wastes as it applies to small quantity generators and recommend whether the current system should be retained or whether a new system should be introduced, such study to include an analysis of the cost versus the benefits of the system studied as well as an analysis of the ease of retrieving and collating information and identifying a given substance, with any new proposal to include a list of those standards that are necessary to protect human health and the environment, and with such study to be submitted to Congress not later than Apr. 1, 1987.

**ADMINISTRATIVE BURDENS; SMALL QUANTITY GENERATORS; RETENTION OF CURRENT SYSTEM; REPORT TO CONGRESS**

Pub. L. 98–616, title II, §221(e), Nov. 8, 1984, 98 Stat. 3250, directed Administrator of Environmental Protection Agency, in conjunction with Secretary of Transportation, to prepare and submit to Congress, not later than Apr. 1, 1987, a report on the feasibility of easing the administrative burden on small quantity generators, increasing compliance with statutory and regulatory requirements, and simplifying enforcement efforts through a program of licensing hazardous waste transporters to assume the responsibilities of small quantity generators relating to preparation of manifests and associated recordkeeping and reporting requirements, such report to examine the appropriate licensing requirements under such a program including the need for financial assurances by licensed transporters and to make recommendations on provisions and requirements for such a program including the appropriate division of responsibilities between Department of Transportation and Environmental Protection Administration.

**EDUCATIONAL INSTITUTIONS; ACCUMULATION, STORAGE AND DISPOSAL OF HAZARDOUS WASTES; STUDY**

Pub. L. 98–616, title II, §221(f), Nov. 8, 1984, 98 Stat. 3250, as amended by Pub. L. 107–110, title X, §1076(aa), Jan. 8, 2002, 115 Stat. 2093, directed Administrator of Environmental Protection Agency, in consultation with Secretary of Education, the States, and appropriate educational associations, to conduct a comprehensive study of problems associated with accumulation, storage, and disposal of hazardous wastes from educational institutions, such study to include an investigation of feasibility and availability of environmentally sound methods for treatment, storage, or disposal of hazardous waste from such institutions, taking into account the types and quantities of such waste which are generated by these institutions, and the nonprofit nature of these institutions, and directed Administrator to submit a report to Congress containing the findings of the study not later than Apr. 1, 1987.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1. *So in original. Probably should be “teratogens”.*

**§6922. Standards applicable to generators of hazardous waste**

(a) In general

Not later than eighteen months after October 21, 1976, and after notice and opportunity for public hearings and after consultation with appropriate Federal and State agencies, the Administrator shall promulgate regulations establishing such standards, applicable to generators of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. Such standards shall establish requirements respecting—

1. recordkeeping practices that accurately identify the quantities of such hazardous waste generated, the constituents thereof which are significant in quantity or in potential harm to human health or the environment, and the disposition of such wastes;
(2) labeling practices for any containers used for the storage, transport, or disposal of such hazardous waste such as will identify accurately such waste;
(3) use of appropriate containers for such hazardous waste;
(4) furnishing of information on the general chemical composition of such hazardous waste to persons transporting, treating, storing, or disposing of such wastes;
(5) use of a manifest system and any other reasonable means necessary to assure that all such hazardous waste generated is designated for treatment, storage, or disposal in, and arrives at, treatment, storage, or disposal facilities (other than facilities on the premises where the waste is generated) for which a permit has been issued as provided in this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.]; and

(6) submission of reports to the Administrator (or the State agency in any case in which such agency carries out a permit program pursuant to this subchapter) at least once every two years, setting out—
(A) the quantities and nature of hazardous waste identified or listed under this subchapter that he has generated during the year;
(B) the disposition of all hazardous waste reported under subparagraph (A);
(C) the efforts undertaken during the year to reduce the volume and toxicity of waste generated; and
(D) the changes in volume and toxicity of waste actually achieved during the year in question in comparison with previous years, to the extent such information is available for years prior to November 8, 1984.

(b) Waste minimization

Effective September 1, 1985, the manifest required by subsection (a)(5) shall contain a certification by the generator that—

(1) the generator of the hazardous waste has a program in place to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable; and
(2) the proposed method of treatment, storage, or disposal is that practicable method currently available to the generator which minimizes the present and future threat to human health and the environment.

EDITORIAL NOTES

AMENDMENTS

Subsec. (a)(6). Pub. L. 98–616, §224(a)(2), amended par. (6) generally. Prior to amendment, par. (6) read as follows: "submission of reports to the Administrator (or the State agency in any case in which such agency carries out an authorized permit program pursuant to this subchapter) at such times as the Administrator (or the State agency if appropriate) deems necessary, setting out—
"(A) the quantities of hazardous waste identified or listed under this subchapter that he has generated during a particular time period; and
"(B) the disposition of all hazardous waste reported under subparagraph (A)."
1980—Par. (5). Pub. L. 95–482 inserted "and any other reasonable means necessary" and ", and arrives at,"
after "use of a manifest system" and "disposal in", respectively.
Research, and Sanctuaries Act.
Par. (6). Pub. L. 95–609, §7(f)(2), closed the parenthetical after "to this subchapter".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6923. Standards applicable to transporters of hazardous waste

(a) Standards
Not later than eighteen months after October 21, 1976, and after opportunity for public hearings, the Administrator, after consultation with the Secretary of Transportation and the States, shall promulgate regulations establishing such standards, applicable to transporters of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. Such standards shall include but need not be limited to requirements respecting—

1. recordkeeping concerning such hazardous waste transported, and their source and delivery points;
2. transportation of such waste only if properly labeled;
3. compliance with the manifest system referred to in section 6922(5) of this title; and
4. transportation of all such hazardous waste only to the hazardous waste treatment, storage, or disposal facilities which the shipper designates on the manifest form to be a facility holding a permit issued under this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanitation Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.].

(b) Coordination with regulations of Secretary of Transportation
In case of any hazardous waste identified or listed under this subchapter which is subject to chapter 51 of title 49, the regulations promulgated by the Administrator under this section shall be consistent with the requirements of such Act and the regulations thereunder. The Administrator is authorized to make recommendations to the Secretary of Transportation respecting the regulations of such hazardous waste under the Hazardous Materials Transportation Act and for addition of materials to be covered by such Act.

(c) Fuel from hazardous waste
Not later than two years after November 8, 1984, and after opportunity for public hearing, the Administrator shall promulgate regulations establishing standards, applicable to transporters of fuel produced (1) from any hazardous waste identified or listed under section 6921 of this title, or (2) from any hazardous waste identified or listed under section 6921 of this title and any other material, as may be necessary to protect human health and the environment. Such standards may include any of the requirements set forth in paragraphs (1) through (4) of subsection (a) as may be appropriate.

CODIFICATION

AMENDMENTS
Subsec. (b). Pub. L. 95–609, §7(g)(2), substituted "Administrator under this section" for "Administrator under this subchapter".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.
§6924. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities

(a) In general
   Not later than eighteen months after October 21, 1976, and after opportunity for public hearings and after consultation with appropriate Federal and State agencies, the Administrator shall promulgate regulations establishing such performance standards, applicable to owners and operators of facilities for the treatment, storage, or disposal of hazardous waste identified or listed under this subchapter, as may be necessary to protect human health and the environment. In establishing such standards the Administrator shall, where appropriate, distinguish in such standards between requirements appropriate for new facilities and for facilities in existence on the date of promulgation of such regulations. Such standards shall include, but need not be limited to, requirements respecting—
   (1) maintaining records of all hazardous wastes identified or listed under this chapter which is treated, stored, or disposed of, as the case may be, and the manner in which such wastes were treated, stored, or disposed of;
   (2) satisfactory reporting, monitoring, and inspection and compliance with the manifest system referred to in section 6922(5) of this title;
   (3) treatment, storage, or disposal of all such waste received by the facility pursuant to such operating methods, techniques, and practices as may be satisfactory to the Administrator;
   (4) the location, design, and construction of such hazardous waste treatment, disposal, or storage facilities;
   (5) contingency plans for effective action to minimize unanticipated damage from any treatment, storage, or disposal of any such hazardous waste;
   (6) the maintenance of operation of such facilities and requiring such additional qualifications as to ownership, continuity of operation, training for personnel, and financial responsibility (including financial responsibility for corrective action) as may be necessary or desirable; and
   (7) compliance with the requirements of section 6925 of this title respecting permits for treatment, storage, or disposal.

No private entity shall be precluded by reason of criteria established under paragraph (6) from the ownership or operation of facilities providing hazardous waste treatment, storage, or disposal services where such entity can provide assurances of financial responsibility and continuity of operation consistent with the degree and duration of risks associated with the treatment, storage, or disposal of specified hazardous waste.

(b) Salt dome formations, salt bed formations, underground mines and caves
   (1) Effective on November 8, 1984, the placement of any noncontainerized or bulk liquid hazardous waste in any salt dome formation, salt bed formation, underground mine, or cave is prohibited until such time as—
      (A) the Administrator has determined, after notice and opportunity for hearings on the record in the affected areas, that such placement is protective of human health and the environment;
      (B) the Administrator has promulgated performance and permitting standards for such facilities under this subchapter, and;
      (C) a permit has been issued under section 6925(c) of this title for the facility concerned.
   
   (2) Effective on November 8, 1984, the placement of any hazardous waste other than a hazardous waste referred to in paragraph (1) in a salt dome formation, salt bed formation, underground mine, or cave is prohibited until such time as a permit has been issued under section 6925(c) of this title for the facility concerned.
   
   (3) No determination made by the Administrator under subsection (d), (e), or (g) of this section regarding any hazardous waste to which such subsection (d), (e), or (g) applies shall affect the prohibition contained in paragraph (1) or (2) of this subsection.
   
   (4) Nothing in this subsection shall apply to the Department of Energy Waste Isolation Pilot Project in New Mexico.

(c) Liquids in landfills
   (1) Effective 6 months after November 8, 1984, the placement of bulk or noncontainerized liquid hazardous waste or free liquids contained in hazardous waste (whether or not absorbents have been added) in any landfill is prohibited. Prior to such date the requirements (as in effect on April 30, 1983) promulgated under this section by the Administrator regarding liquid hazardous waste shall remain in force and effect to the extent such requirements are applicable to the placement of bulk or noncontainerized liquid hazardous waste, or free liquids contained in hazardous waste, in landfills.
   
   (2) Not later than fifteen months after November 8, 1984, the Administrator shall promulgate final regulations which—
      (A) minimize the disposal of containerized liquid hazardous waste in landfills, and
      (B) minimize the presence of free liquids in containerized hazardous waste to be disposed of in landfills.

Such regulations shall also prohibit the disposal in landfills of liquids that have been absorbed in materials that biodegrade or that release liquids when compressed as might occur during routine landfill operations. Prior to the date on which such final regulations take effect, the requirements (as in effect on April 30, 1983) promulgated under this section by the Administrator shall remain in force and effect to the extent such requirements are applicable to the disposal of containerized liquid hazardous waste, or free liquids contained in hazardous waste, in landfills.
(3) Effective twelve months after November 8, 1984, the placement of any liquid which is not a hazardous waste in a landfill for which a permit is required under section 6925(c) of this title or which is operating pursuant to interim status granted under section 6925(e) of this title is prohibited unless the owner or operator of such landfill demonstrates to the Administrator, or the Administrator determines, that—

(A) the only reasonably available alternative to the placement in such landfill is placement in a landfill or unlined surface impoundment, whether or not permitted under section 6925(c) of this title or operating pursuant to interim status under section 6925(e) of this title, which contains, or may reasonably be anticipated to contain, hazardous waste; and

(B) placement in such owner or operator's landfill will not present a risk of contamination of any underground source of drinking water.

As used in subparagraph (B), the term "underground source of drinking water" has the same meaning as provided in regulations under the Safe Drinking Water Act (title XIV of the Public Health Service Act) [42 U.S.C. 300f et seq.].

(4) No determination made by the Administrator under subsection (d), (e), or (g) of this section regarding any hazardous waste to which such subsection (d), (e), or (g) applies shall affect the prohibition contained in paragraph (1) of this subsection.

(d) Prohibitions on land disposal of specified wastes

(1) Effective 32 months after November 8, 1984 (except as provided in subsection (f) with respect to underground injection into deep injection wells), the land disposal of the hazardous wastes referred to in paragraph (2) is prohibited unless the Administrator determines the prohibition on one or more methods of land disposal of such waste is not required in order to protect human health and the environment for as long as the waste remains hazardous, taking into account—

(A) the long-term uncertainties associated with land disposal,

(B) the goal of managing hazardous waste in an appropriate manner in the first instance, and

(C) the persistence, toxicity, mobility, and propensity to bioaccumulate of such hazardous wastes and their hazardous constituents.

For the purposes of this paragraph, a method of land disposal may not be determined to be protective of human health and the environment for a hazardous waste referred to in paragraph (2) (other than a hazardous waste which has complied with the pretreatment regulations promulgated under subsection (m)), unless, upon application by an interested person, it has been demonstrated to the Administrator, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.

(2) Paragraph (1) applies to the following hazardous wastes listed or identified under section 6921 of this title:

(A) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing free cyanides at concentrations greater than or equal to 1,000 mg/l.

(B) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing the following metals (or elements) or compounds of these metals (or elements) at concentrations greater than or equal to those specified below:

   (i) arsenic and/or compounds (as As) 500 mg/l;
   (ii) cadmium and/or compounds (as Cd) 100 mg/l;
   (iii) chromium (VI and/or compounds (as Cr VI)) 500 mg/l;
   (iv) lead and/or compounds (as Pb) 500 mg/l;
   (v) mercury and/or compounds (as Hg) 20 mg/l;
   (vi) nickel and/or compounds (as Ni) 134 mg/l;
   (vii) selenium and/or compounds (as Se) 100 mg/l; and
   (viii) thallium and/or compounds (as Th) 130 mg/l.

(C) Liquid hazardous waste having a pH less than or equal to two (2.0).

(D) Liquid hazardous wastes containing polychlorinated biphenyls at concentrations greater than or equal to 50 ppm.

(E) Hazardous wastes containing halogenated organic compounds in total concentration greater than or equal to 1,000 mg/kg.

When necessary to protect human health and the environment, the Administrator shall substitute more stringent concentration levels than the levels specified in subparagraphs (A) through (E).

(3) During the period ending forty-eight months after November 8, 1984, this subsection shall not apply to any disposal of contaminated soil or debris resulting from a response action taken under section 9004 or 9006 of this title or a corrective action required under this subchapter.

(e) Solvents and dioxins

(1) Effective twenty-four months after November 8, 1984 (except as provided in subsection (f) with respect to underground injection into deep injection wells), the land disposal of the hazardous wastes referred to in paragraph (2) is prohibited unless the Administrator determines the prohibition of one or more methods of land disposal of such waste is not required in order to protect human health and the environment for as long as the waste remains hazardous, taking into account the factors referred to in subparagraph (A) through (C) of subsection (d)(1). For the purposes of this paragraph, a method of land disposal may not be determined to be protective of human health and the environment for a hazardous waste referred to in paragraph (2) (other than a hazardous waste which has complied with the pretreatment regulations promulgated under subsection (m)), unless upon application by an interested person it has been demonstrated to the Administrator, to a
reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.

(2) The hazardous wastes to which the prohibition under paragraph (1) applies are as follows—

(A) dioxin-containing hazardous wastes numbered F020, F021, F022, and F023 as referred to in the proposed rule published in the Federal Register for April 4, 1983, and

(B) those hazardous wastes numbered F001, F002, F003, F004, and F005 in regulations promulgated by the Administrator under section 6921 of this title (40 C.F.R. 261.31 (July 1, 1983)), as those regulations are in effect on July 1, 1983.

(3) During the period ending forty-eight months after November 8, 1984, this subsection shall not apply to any disposal of contaminated soil or debris resulting from a response action taken under section 9604 or 9606 of this title or a corrective action required under this subchapter.

(f) Disposal into deep injection wells; specified subsection (d) wastes; solvents and dioxins

(1) Not later than forty-five months after November 8, 1984, the Administrator shall complete a review of the disposal of all hazardous wastes referred to in paragraph (2) of subsection (d) and in paragraph (2) of subsection (e) by underground injection into deep injection wells.

(2) Within forty-five months after November 8, 1984, the Administrator shall make a determination regarding the disposal by underground injection into deep injection wells of the hazardous wastes referred to in paragraph (2) of subsection (d) and the hazardous wastes referred to in paragraph (2) of subsection (e). The Administrator shall promulgate final regulations prohibiting the disposal of such wastes into such wells if it may reasonably be determined that such disposal may not be protective of human health and the environment for as long as the waste remains hazardous, taking into account the factors referred to in subparagraphs (A) through (C) of subsection (d)(1). In promulgating such regulations, the Administrator shall consider each hazardous waste referred to in paragraph (2) of subsection (d) or in paragraph (2) of subsection (e) which is prohibited from disposal into such wells by any State.

(3) If the Administrator fails to make a determination under paragraph (2) for any hazardous waste referred to in paragraph (2) of subsection (d) or in paragraph (2) of subsection (e) within forty-five months after November 8, 1984, such hazardous waste shall be prohibited from disposal into any deep injection well.

(4) As used in this subsection, the term "deep injection well" means a well used for the underground injection of hazardous waste other than a well to which section 6979a(a) of this title applies.

(g) Additional land disposal prohibition determinations

(1) Not later than twenty-four months after November 8, 1984, the Administrator shall submit to Congress for

(A) reviewing all hazardous wastes listed (as of November 8, 1984) under section 6921 of this title other than those wastes which are referred to in subsection (d) or (e); and

(B) taking action under paragraph (5) of this subsection with respect to each such hazardous waste.

(2) The Administrator shall base the schedule on a ranking of such listed wastes considering their intrinsic hazard and their volume such that decisions regarding the land disposal of high volume hazardous wastes with high intrinsic hazard shall, to the maximum extent possible, be made by the date forty-five months after November 8, 1984. Decisions regarding low volume hazardous wastes with lower intrinsic hazard shall be made by the date sixty-six months after November 8, 1984.

(3) The preparation and submission of the schedule under this subsection shall not be subject to the Paperwork Reduction Act of 1980. No hearing on the record shall be required for purposes of preparation or submission of the schedule. The schedule shall not be subject to judicial review.

(4) The schedule under this subsection shall require that the Administrator shall promulgate regulations in accordance with paragraph (5) or make a determination under paragraph (5)—

(A) for at least one-third of all hazardous wastes referred to in paragraph (1) by the date forty-five months after November 8, 1984;

(B) for at least two-thirds of all such listed wastes by the date fifty-five months after November 8, 1984; and

(C) for all such listed wastes and for all hazardous wastes identified under section 6921 of this title by the date sixty-six months after November 8, 1984.

In the case of any hazardous waste identified or listed under section 6921 of this title after November 8, 1984, the Administrator shall determine whether such waste shall be prohibited from one or more methods of land disposal in accordance with paragraph (5) within six months after the date of such identification or listing.

(5) Not later than the date specified in the schedule published under this subsection, the Administrator shall promulgate final regulations prohibiting one or more methods of land disposal of the hazardous wastes listed on such schedule except for methods of land disposal which the Administrator determines will be protective of human health and the environment for as long as the waste remains hazardous, taking into account the factors referred to in subparagraphs (A) through (C) of subsection (d)(1). For the purposes of this paragraph, a method of land disposal may not be determined to be protective of human health and the environment (except with respect to a hazardous waste which has complied with the pretreatment regulations promulgated under subsection (m)) unless, upon application by an interested person, it has been demonstrated to the Administrator, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous.
(6)(A) If the Administrator fails (by the date forty-five months after November 8, 1984) to promulgate regulations or make a determination under paragraph (5) for any hazardous waste which is included in the first one-third of the schedule published under this subsection, such hazardous waste may be disposed of in a landfill or surface impoundment only if—

(i) such facility is in compliance with the requirements of subsection (o) which are applicable to new facilities (relating to minimum technological requirements); and

(ii) prior to such disposal, the generator has certified to the Administrator that such generator has investigated the availability of treatment capacity and has determined that the use of such landfill or surface impoundment is the only practical alternative to treatment currently available to the generator.

The prohibition contained in this subparagraph shall continue to apply until the Administrator promulgates regulations or makes a determination under paragraph (5) for the waste concerned.

(B) If the Administrator fails (by the date 55 months after November 8, 1984) to promulgate regulations or make a determination under paragraph (5) for any hazardous waste which is included in the first two-thirds of the schedule published under this subsection, such hazardous waste may be disposed of in a landfill or surface impoundment only if—

(i) such facility is in compliance with the requirements of subsection (o) which are applicable to new facilities (relating to minimum technological requirements); and

(ii) prior to such disposal, the generator has certified to the Administrator that such generator has investigated the availability of treatment capacity and has determined that the use of such landfill or surface impoundment is the only practical alternative to treatment currently available to the generator.

The prohibition contained in this subparagraph shall continue to apply until the Administrator promulgates regulations or makes a determination under paragraph (5) for the waste concerned.

(C) If the Administrator fails to promulgate regulations, or make a determination under paragraph (5) for any hazardous waste referred to in paragraph (1) within 66 months after November 8, 1984, such hazardous waste shall be prohibited from land disposal.

(7) Solid waste identified as hazardous based solely on one or more characteristics shall not be subject to this subsection, any prohibitions under subsection (d), (e), or (f), or any requirement promulgated under subsection (m) (other than any applicable specific methods of treatment, as provided in paragraph (8)) if the waste—

(A) is treated in a treatment system that subsequently discharges to waters of the United States pursuant to a permit issued under section 1342 of title 33, treated for the purposes of the pretreatment requirements of section 1317 of title 33, or treated in a zero discharge system that, prior to any permanent land disposal, engages in treatment that is equivalent to treatment required under section 1342 of title 33 for discharges to waters of the United States, as determined by the Administrator; and

(B) no longer exhibits a hazardous characteristic prior to management in any land-based solid waste management unit.

(8) Solid waste that otherwise qualifies under paragraph (7) shall nevertheless be required to meet any applicable specific methods of treatment specified for such waste by the Administrator under subsection (m), including those specified in the rule promulgated by the Administrator June 1, 1990, prior to management in a land-based unit as part of a treatment system specified in paragraph (7)(A). No solid waste may qualify under paragraph (7) that would generate toxic gases, vapors, or fumes due to the presence of cyanide when exposed to pH conditions between 2.0 and 12.5.

(9) Solid waste identified as hazardous based on one or more characteristics alone shall not be subject to this subsection, any prohibitions under subsection (d), (e), or (f), or any requirement promulgated under subsection (m) if the waste no longer exhibits a hazardous characteristic at the point of injection in any Class I injection well permitted under section 300h-1 of this title.

(10) Not later than five years after March 26, 1996, the Administrator shall complete a study of hazardous waste managed pursuant to paragraph (7) or (9) to characterize the risks to human health or the environment associated with such management. In conducting this study, the Administrator shall evaluate the extent to which risks are adequately addressed under existing State or Federal programs and whether unaddressed risks could be better addressed under such laws or programs. Upon receipt of additional information or upon completion of such study and as necessary to protect human health and the environment, the Administrator may impose additional requirements under existing Federal laws, including subsection (m)(1), or rely on other State or Federal programs or authorities to address such risks. In promulgating any treatment standards pursuant to subsection (m)(1) under the previous sentence, the Administrator shall take into account the extent to which treatment is occurring in land-based units as part of a treatment system specified in paragraph (7)(A).

(11) Nothing in paragraph (7) or (9) shall be interpreted or applied to restrict any inspection or enforcement authority under the provisions of this chapter.

(h) Variance from land disposal prohibitions

(1) A prohibition in regulations under subsection (d), (e), (f), or (g) shall be effective immediately upon promulgation.

(2) The Administrator may establish an effective date different from the effective date which would otherwise apply under subsection (d), (e), (f), or (g) with respect to a specific hazardous waste which is subject to a prohibition under subsection (d), (e), (f), or (g) or under regulations under subsection (d), (e), (f), or (g) of this section. Any such other effective date shall be established on the basis of the earliest date on which adequate alternative treatment, recovery, or disposal capacity which protects human health and the environment will be available. Any such other effective date shall in no event be later than 2 years after the effective date of the prohibition which would otherwise apply under subsection (d), (e), (f), or (g).

(3) The Administrator, after notice and opportunity for comment and after consultation with appropriate State agencies in all affected States, may on a case-by-case basis grant an extension of the effective date which would otherwise apply under subsection (d), (e), (f), or (g) under paragraph (2) for up to one year, where the applicant demonstrates that there is a
binding contractual commitment to construct or otherwise provide such alternative capacity but due to circumstances beyond the control of such applicant such alternative capacity cannot reasonably be made available by such effective date. Such extension shall be renewable once for no more than one additional year.

(4) Whenever another effective date (hereinafter referred to as a "variance") is established under paragraph (2), or an extension is granted under paragraph (3), with respect to any hazardous waste, during the period for which such variance or extension is in effect, such hazardous waste may be disposed of in a landfill or surface impoundment only if such facility is in compliance with the requirements of subsection (o).

(i) Publication of determination

If the Administrator determines that a method of land disposal will be protective of human health and the environment, he shall promptly publish in the Federal Register notice of such determination, together with an explanation of the basis for such determination.

(j) Storage of hazardous waste prohibited from land disposal

In the case of any hazardous waste which is prohibited from one or more methods of land disposal under this section (or under regulations promulgated by the Administrator under any provision of this section) the storage of such hazardous waste is prohibited unless such storage is solely for the purpose of the accumulation of such quantities of hazardous waste as are necessary to facilitate proper recovery, treatment or disposal.

(k) "Land disposal" defined

For the purposes of this section, the term "land disposal", when used with respect to a specified hazardous waste, shall be deemed to include, but not be limited to, any placement of such hazardous waste in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, or underground mine or cave.

(l) Ban on dust suppression

The use of waste or used oil or other material, which is contaminated or mixed with dioxin or any other hazardous waste identified or listed under section 6921 of this title (other than a waste identified solely on the basis of ignitability), for dust suppression or road treatment is prohibited.

(m) Treatment standards for wastes subject to land disposal prohibition

(1) Simultaneously with the promulgation of regulations under subsection (d), (e), (f), or (g) prohibiting one or more methods of land disposal of a particular hazardous waste, and as appropriate thereafter, the Administrator shall, after notice and an opportunity for hearings and after consultation with appropriate Federal and State agencies, promulgate regulations specifying those levels or methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and long-term threats to human health and the environment are minimized.

(2) If such hazardous waste has been treated to the level or by a method specified in regulations promulgated under this subsection, such waste or residue thereof shall not be subject to any prohibition promulgated under subsection (d), (e), (f), or (g) and may be disposed of in a land disposal facility which meets the requirements of this subchapter. Any regulation promulgated under this subsection for a particular hazardous waste shall become effective on the same date as any applicable prohibition promulgated under subsection (d), (e), (f), or (g).

(n) Air emissions

Not later than thirty months after November 8, 1984, the Administrator shall promulgate such regulations for the monitoring and control of air emissions at hazardous waste treatment, storage, and disposal facilities, including but not limited to open tanks, surface impoundments, and landfills, as may be necessary to protect human health and the environment.

(o) Minimum technological requirements

(1) The regulations under subsection (a) of this section shall be revised from time to time to take into account improvements in the technology of control and measurement. At a minimum, such regulations shall require, and a permit issued pursuant to section 6925(c) of this title after November 8, 1984, by the Administrator or a State shall require—

(A) for each new landfill or surface impoundment, each new landfill or surface impoundment unit at an existing facility, each replacement of an existing landfill or surface impoundment unit, and each lateral expansion of an existing landfill or surface impoundment unit, for which an application for a final determination regarding issuance of a permit under section 6925(c) of this title is received after November 8, 1984—

(i) the installation of two or more liners and a leachate collection system above (in the case of a landfill) and between such liners; and

(ii) ground water monitoring; and

(B) for each incinerator which receives a permit under section 6925(c) of this title after November 8, 1984, the attainment of the minimum destruction and removal efficiency required by regulations in effect on June 24, 1982.

The requirements of this paragraph shall apply with respect to all waste received after the issuance of the permit.

(2) Paragraph (1)(A)(i) shall not apply if the owner or operator demonstrates to the Administrator, and the Administrator finds for such landfill or surface impoundment, that alternative design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents into the ground water or surface water at least as effectively as such liners and leachate collection systems.

(3) The double-liner requirement set forth in paragraph (1)(A)(i) may be waived by the Administrator for any monofil, if—
(A) such monofill contains only hazardous wastes from foundry furnace emission controls or metal casting molding sand,
(B) such wastes do not contain constituents which would render the wastes hazardous for reasons other than the Extraction Procedure ("EP") toxicity characteristics set forth in regulations under this subchapter, and
(C) such monofill meets the same requirements as are applicable in the case of a waiver under section 6925(j)(2) or (4) of this title.

(4)(A) Not later than thirty months after November 8, 1984, the Administrator shall promulgate standards requiring that new landfill units, surface impoundment units, waste piles, underground tanks and land treatment units for the storage, treatment, or disposal of hazardous waste identified or listed under section 6921 of this title shall be required to utilize approved leak detection systems.
(B) For the purposes of subparagraph (A)—
   (i) the term "approved leak detection system" means a system or technology which the Administrator determines to be capable of detecting leaks of hazardous constituents at the earliest practicable time; and
   (ii) the term "new units" means units on which construction commences after the date of promulgation of regulations under this paragraph.

(5)(A) The Administrator shall promulgate regulations or issue guidance documents implementing the requirements of paragraph (1)(A) within two years after November 8, 1984.
(B) Until the effective date of such regulations or guidance documents, the requirement for the installation of two or more liners may be satisfied by the installation of a top liner designed, operated, and constructed of materials to prevent the migration of any constituent into such liner during the period such facility remains in operation (including any post-closure monitoring period), and a lower liner designed, operated 3 and constructed to prevent the migration of any constituent through such liner during such period. For the purpose of the preceding sentence, a lower liner shall be deemed to satisfy such requirement if it is constructed of at least a 3-foot thick layer of recompacted clay or other natural material with a permeability of no more than 1×10⁻⁷ centimeter per second.
(6) Any permit under section 6925 of this title which is issued for a landfill located within the State of Alabama shall require the installation of two or more liners and a leachate collection system above and between such liners, notwithstanding any other provision of this chapter.
(7) In addition to the requirements set forth in this subsection, the regulations referred to in paragraph (1) shall specify criteria for the acceptable location of new and existing treatment, storage, or disposal facilities as necessary to protect human health and the environment. Within 18 months after November 8, 1984, the Administrator shall publish guidance criteria identifying areas of vulnerable hydrogeology.

(p) Ground water monitoring
   The standards under this section concerning ground water monitoring which are applicable to surface impoundments, waste piles, land treatment units, and landfills shall apply to such a facility whether or not—
   (1) the facility is located above the seasonal high water table;
   (2) two liners and a leachate collection system have been installed at the facility; or
   (3) the owner or operator inspects the liner (or liners) which has been installed at the facility.

This subsection shall not be construed to affect other exemptions or waivers from such standards provided in regulations in effect on November 8, 1984, or as may be provided in revisions to those regulations, to the extent consistent with this subsection. The Administrator is authorized on a case-by-case basis to exempt from ground water monitoring requirements under this section (including subsection (o)) any engineered structure which the Administrator finds does not receive or contain liquid waste (nor waste containing free liquids), is designed and operated to exclude liquid from precipitation or other runoff, utilizes multiple leak detection systems within the outer layer of containment, and provides for continuing operation and maintenance of these leak detection systems during the operating period, closure, and the period required for post-closure monitoring and for which the Administrator concludes on the basis of such findings that there is a reasonable certainty hazardous constituents will not migrate beyond the outer layer of containment prior to the end of the period required for post-closure monitoring.

(q) Hazardous waste used as fuel
   (1) Not later than two years after November 8, 1984, and after notice and opportunity for public hearing, the Administrator shall promulgate regulations establishing such—
      (A) standards applicable to the owners and operators of facilities which produce a fuel—
         (i) from any hazardous waste identified or listed under section 6921 of this title, or
         (ii) from any hazardous waste identified or listed under section 6921 of this title and any other material;
      (B) standards applicable to the owners and operators of facilities which burn, for purposes of energy recovery, any fuel produced as provided in subparagraph (A) or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title; and
      (C) standards applicable to any person who distributes or markets any fuel which is produced as provided in subparagraph (A) or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title;
as may be necessary to protect human health and the environment. Such standards may include any of the requirements set forth in paragraphs (1) through (7) of subsection (a) as may be appropriate. Nothing in this subsection shall be construed to affect or impair the provisions of section 6921(b)(3) of this title. For purposes of this subsection, the term "hazardous waste listed under section 6921 of this title" includes any commercial chemical product which is listed under section 6921 of this title and which, in lieu of its original intended use, is (i) produced for use as (or as a component of) a fuel, (ii) distributed for use as a fuel, or (iii) burned as a fuel.

(2)(A) This subsection, subsection (r), and subsection (s) shall not apply to petroleum refinery wastes containing oil which are converted into petroleum coke at the same facility at which such wastes were generated, unless the resulting coke product would exceed one or more characteristics by which a substance would be identified as a hazardous waste under section 6921 of this title.

(B) The Administrator may exempt from the requirements of this subsection, subsection (r), or subsection (s) facilities which burn de minimis quantities of hazardous waste as fuel, as defined by the Administrator, if the wastes are burned at the same facility at which such wastes are generated; the waste is burned to recover useful energy, as determined by the Administrator on the basis of the design and operating characteristics of the facility and the heating value and other characteristics of the waste; and the waste is burned in a type of device determined by the Administrator to be designed and operated at a destruction and removal efficiency sufficient such that protection of human health and environment is assured.

(C)(i) After November 8, 1984, and until standards are promulgated and in effect under paragraph (2) of this subsection, no fuel which contains any hazardous waste may be burned in any cement kiln which is located within the boundaries of any incorporated municipality with a population greater than five hundred thousand (based on the most recent census statistics) unless such kiln fully complies with regulations (as in effect on November 8, 1984) under this subchapter which are applicable to incinerators.

(ii) Any person who knowingly violates the prohibition contained in clause (i) shall be deemed to have violated section 6928(d)(2) of this title.

(r) Labeling

(1) Notwithstanding any other provision of law, until such time as the Administrator promulgates standards under subsection (q) specifically superseding this requirement, it shall be unlawful for any person who is required to file a notification in accordance with paragraph (1) or (3) of section 6930 of this title to distribute or market any fuel which is produced from any hazardous waste identified or listed under section 6921 of this title, or any fuel which otherwise contains any hazardous waste identified or listed under section 6921 of this title if the invoice or the bill of sale fails—

(A) to bear the following statement: "WARNING: THIS FUEL CONTAINS HAZARDOUS WASTES", and

(B) to list the hazardous wastes contained therein.

Beginning ninety days after November 8, 1984, such statement shall be located in a conspicuous place on every such invoice or bill of sale and shall appear in conspicuous and legible type in contrast by typography, layouts, or color with other printed matter on the invoice or bill of sale.

(2) Unless the Administrator determines otherwise as may be necessary to protect human health and the environment, this subsection shall not apply to fuels produced from petroleum refining waste containing oil if—

(A) such materials are generated and reinserted onsite into the refining process;

(B) contaminants are removed; and

(C) such refining waste containing oil is converted along with normal process streams into petroleum-derived fuel products at a facility at which crude oil is refined into petroleum products and which is classified as a number SIC 2911 facility under the Office of Management and Budget Standard Industrial Classification Manual.

(3) Unless the Administrator determines otherwise as may be necessary to protect human health and the environment, this subsection shall not apply to fuels produced from oily materials, resulting from normal petroleum refining, production and transportation practices, if (A) contaminants are removed; and (B) such oily materials are converted along with normal process streams into petroleum-derived fuel products at a facility at which crude oil is refined into petroleum products and which is classified as a number SIC 2911 facility under the Office of Management and Budget Standard Industrial Classification Manual.

(s) Recordkeeping

Not later than fifteen months after November 8, 1984, the Administrator shall promulgate regulations requiring that any person who is required to file a notification in accordance with subparagraph (1), (2), or (3), of section 6930(a) of this title shall maintain such records regarding fuel blending, distribution, or use as may be necessary to protect human health and the environment.

(t) Financial responsibility provisions

(1) Financial responsibility required by subsection (a) of this section may be established in accordance with regulations promulgated by the Administrator by any one, or any combination, of the following: insurance, guarantee, surety bond, letter of credit, or qualification as a self-insurer. In promulgating requirements under this section, the Administrator is authorized to specify policy or other contractual terms, conditions, or defenses which are necessary or are unacceptable in establishing such evidence of financial responsibility in order to effectuate the purposes of this chapter.

(2) In any case where the owner or operator is in bankruptcy, reorganization, or arrangement pursuant to the Federal Bankruptcy Code or where (with reasonable diligence) jurisdiction in any State court or any Federal Court cannot be obtained over an owner or operator likely to be solvent at the time of judgment, any claim arising from conduct for which evidence of financial responsibility must be provided under this section may be asserted directly against the guarantor providing such evidence of financial responsibility. In the case of any action pursuant to this subsection, such guarantor shall
be entitled to invoke all rights and defenses which would have been available to the owner or operator if any action had been brought against the owner or operator by the claimant and which would have been available to the guarantor if an action had been brought against the guarantor by the owner or operator.

(3) The total liability of any guarantor shall be limited to the aggregate amount which the guarantor has provided as evidence of financial responsibility to the owner or operator under this chapter. Nothing in this subsection shall be construed to limit any other State or Federal statutory, contractual or common law liability of a guarantor to its owner or operator including, but not limited to, the liability of such guarantor for bad faith either in negotiating or in failing to negotiate the settlement of any claim. Nothing in this subsection shall be construed to diminish the liability of any person under section 9607 or 9611 of this title or other applicable law.

(4) For the purpose of this subsection, the term "guarantor" means any person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator under this section.

(u) Continuing releases at permitted facilities

Standards promulgated under this section shall require, and a permit issued after November 8, 1984, by the Administrator or a State shall require, corrective action for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage, or disposal facility seeking a permit under this subchapter, regardless of the time at which waste was placed in such unit. Permits issued under section 6925 of this title shall contain schedules of compliance for such corrective action (where such corrective action cannot be completed prior to issuance of the permit) and assurances of financial responsibility for completing such corrective action.

(v) Corrective action beyond facility boundary

As promptly as practicable after November 8, 1984, the Administrator shall amend the standards under this section regarding corrective action required at facilities for the treatment, storage, or disposal, of hazardous waste listed or identified under section 6921 of this title to require that corrective action be taken beyond the facility boundary where necessary to protect human health and the environment unless the owner or operator of the facility concerned demonstrates to the satisfaction of the Administrator that, despite the owner or operator's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such action. Such regulations shall take effect immediately upon promulgation, notwithstanding section 6930(b) of this title, and shall apply to—

(1) all facilities operating under permits issued under subsection (c), and
(2) all landfills, surface impoundments, and waste pile units (including any new units, replacements of existing units, or lateral expansions of existing units) which receive hazardous waste after July 26, 1982.

Pending promulgation of such regulations, the Administrator shall issue corrective action orders for facilities referred to in paragraphs (1) and (2), on a case-by-case basis, consistent with the purposes of this subsection.

(w) Underground tanks

Not later than March 1, 1985, the Administrator shall promulgate final permitting standards under this section for underground tanks that cannot be entered for inspection. Within forty-eight months after November 8, 1984, such standards shall be modified, if necessary, to cover at a minimum all requirements and standards described in section 6991b of this title.

(x) Mining and other special wastes

If (1) solid waste from the extraction, beneficiation or processing of ores and minerals, including phosphate rock and overburden from the mining of uranium, (2) fly ash waste, bottom ash waste, slag waste, and flue gas emission control waste generated primarily from the combustion of coal or other fossil fuels, or (3) cement kiln dust waste, is subject to regulation under this subchapter, the Administrator is authorized to modify the requirements of subsections (c), (d), (e), (f), (g), (o), and (u) and section 6925(j) of this title, in the case of landfills or surface impoundments receiving such solid waste, to take into account the special characteristics of such wastes, the practical difficulties associated with implementation of such requirements, and site-specific characteristics, including but not limited to the climate, geology, hydrology and soil chemistry at the site, so long as such modified requirements assure protection of human health and the environment.

(y) Munitions

(1) Not later than 6 months after October 6, 1992, the Administrator shall propose, after consulting with the Secretary of Defense and appropriate State officials, regulations identifying when military munitions become hazardous waste for purposes of this subchapter and providing for the safe transportation and storage of such waste. Not later than 24 months after October 6, 1992, and after notice and opportunity for comment, the Administrator shall promulgate such regulations. Any such regulations shall assure protection of human health and the environment.

(2) For purposes of this subsection, the term "military munitions" includes chemical and conventional munitions.

**EDITORIAL NOTES**

**REFERENCES IN TEXT**

36/151

The Safe Drinking Water Act, referred to in subsec. (c)(3), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. For complete classification of this Act to the Code see Short Title note set out under section 201 of this title and Tables.

The Federal Bankruptcy Code, referred to in subsec. (t)(2), probably means a reference to Title 11, Bankruptcy.

**AMENDMENTS**

1996—Subsec. (g)(5). Pub. L. 104–119, §4(3), substituted "subparagraphs (A) through (C)" for "subparagraph (A) through (C)".

Subsec. (g)(7) to (11). Pub. L. 104–119, §2, added pars. (7) to (11).

Subsec. (a)(6). Pub. L. 98–616, §208, inserted "(including financial responsibility for corrective action)".

Subsecs. (b) to (n). Pub. L. 98–616, §201(a), added subsecs. (b) to (n).

Subsecs. (q) to (s). Pub. L. 98–616, §204(b)(1), added subsecs. (q) to (s).

Subsecs. (v), (w). Pub. L. 98–616, §207, added subsecs. (v) and (w).

1980—Pub. L. 96–482 required standards regulations to reflect distinction in requirements appropriate for new facilities and for facilities in existence on date of promulgation of the regulations.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 See References in Text note below.

2 See References in Text note below.

3 So in original. Probably should be followed by a comma.

§6925. Permits for treatment, storage, or disposal of hazardous waste

(a) Permit requirements

Not later than eighteen months after October 21, 1976, the Administrator shall promulgate regulations requiring each person owning or operating an existing facility or planning to construct a new facility for the treatment, storage, or disposal of hazardous waste identified or listed under this subchapter to have a permit issued pursuant to this section. Such regulations shall take effect on the date provided in section 6930 of this title and upon and after such date the treatment, storage, or disposal of any such hazardous waste and the construction of any new facility for the treatment, storage, or disposal of any such hazardous waste is prohibited except in accordance with such a permit. No permit shall be required under this section
in order to construct a facility if such facility is constructed pursuant to an approval issued by the Administrator under section 2605(e) of title 15 for the incineration of polychlorinated biphenyls and any person owning or operating such a facility may, at any time after operation or construction of such facility has begun, file an application for a permit pursuant to this section authorizing such facility to incinerate hazardous waste identified or listed under this subchapter.

(b) Requirements of permit application

Each application for a permit under this section shall contain such information as may be required under regulations promulgated by the Administrator, including information respecting—

1) estimates with respect to the composition, quantities, and concentrations of any hazardous waste identified or listed under this subchapter, or combinations of any such hazardous waste and any other solid waste, proposed to be disposed of, treated, transported, or stored, and the time, frequency, or rate of which such waste is proposed to be disposed of, treated, transported, or stored; and

2) the site at which such hazardous waste or the products of treatment of such hazardous waste will be disposed of, treated, transported to, or stored.

(c) Permit issuance

1) Upon a determination by the Administrator (or a State, if applicable), of compliance by a facility for which a permit is applied for under this section with the requirements of this section and section 6924 of this title, the Administrator (or the State) shall issue a permit for such facilities. In the event permit applicants propose modification of their facilities, or in the event the Administrator (or the State) determines that modifications are necessary to conform to the requirements under this section and section 6924 of this title, the permit shall specify the time allowed to complete the modifications.

2) (A)(i) Not later than the date four years after November 8, 1984, in the case of each application under this subsection for a permit for a land disposal facility which was submitted before such date, the Administrator shall issue a final permit pursuant to such application or issue a final denial of such application.

(B) Not later than the date eight years after November 8, 1984, in the case of each application for a permit under this subsection for any facility (other than a facility referred to in subparagraph (A)) which was submitted before such date, the Administrator shall issue a final permit pursuant to such application or issue a final denial of such application.

(C) The time periods specified in this paragraph shall also apply in the case of any State which is administering an authorized hazardous waste program under section 6926 of this title. Interim status under subsection (e) shall terminate for each facility referred to in subparagraph (A)(ii) or (B) on the expiration of the five- or eight-year period referred to in subparagraph (A) or (B), whichever is applicable, unless the owner or operator of the facility applies for a final determination regarding the issuance of a permit under this subsection within—

(i) two years after November 8, 1984 (in the case of a facility referred to in subparagraph (A)(ii)), or

(ii) four years after November 8, 1984 (in the case of a facility referred to in subparagraph (B)).

3) Any permit under this section shall be for a fixed term, not to exceed 10 years in the case of any land disposal facility, storage facility, or incinerator or other treatment facility. Each permit for a land disposal facility shall be reviewed five years after date of issuance or reissuance and shall be modified as necessary to assure that the facility continues to comply with the currently applicable requirements of this section and section 6924 of this title. Nothing in this subsection shall preclude the Administrator from reviewing and modifying a permit at any time during its term. Review of any application for a permit renewal shall consider improvements in the state of control and measurement technology as well as changes in applicable regulations. Each permit issued under this section shall contain such terms and conditions as the Administrator (or the State) determines necessary to protect human health and the environment.

(d) Permit revocation

Upon a determination by the Administrator (or by a State, in the case of a State having an authorized hazardous waste program under section 6926 of this title) of noncompliance by a facility having a permit under this chapter with the requirements of this section or section 6924 of this title, the Administrator (or State, in the case of a State having an authorized hazardous waste program under section 6926 of this title) shall revoke such permit.

(e) Interim status

1) Any person who—

(A) owns or operates a facility required to have a permit under this section which facility—

(i) was in existence on November 19, 1980, or

(ii) is in existence on the effective date of statutory or regulatory changes under this chapter that render the facility subject to the requirement to have a permit under this section,

(B) has complied with the requirements of section 6930(a) of this title, and

(C) has made an application for a permit under this section,

shall be treated as having been issued such permit until such time as final administrative disposition of such application is made, unless the Administrator or other plaintiff proves that final administrative disposition of such application has not been made because of the failure of the applicant to furnish information reasonably required or requested in order to process the application. This paragraph shall not apply to any facility which has been previously denied a permit under this section or if authority to operate the facility under this section has been previously terminated.
(2) In the case of each land disposal facility which has been granted interim status under this subsection before November 8, 1984, interim status shall terminate on the date twelve months after November 8, 1984, unless the owner or operator of such facility—

(A) applies for a final determination regarding the issuance of a permit under subsection (c) for such facility before the date twelve months after November 8, 1984; and

(B) certifies that such facility is in compliance with all applicable groundwater monitoring and financial responsibility requirements.

(3) In the case of each land disposal facility which is in existence on the effective date of statutory or regulatory changes under this chapter that render the facility subject to the requirement to have a permit under this section and which is granted interim status under this subsection, interim status shall terminate on the date twelve months after the date on which the facility first becomes subject to such permit requirement unless the owner or operator of such facility—

(A) applies for a final determination regarding the issuance of a permit under subsection (c) for such facility before the date twelve months after the date on which the facility first becomes subject to such permit requirement; and

(B) certifies that such facility is in compliance with all applicable groundwater monitoring and financial responsibility requirements.

(f) Coal mining wastes and reclamation permits

Notwithstanding subsection (a) through (e) of this section, any surface coal mining and reclamation permit covering any coal mining wastes or overburden which has been issued or approved under the Surface Mining Control and Reclamation Act of 1977 [30 U.S.C. 1201 et seq.] shall be deemed to be a permit issued pursuant to this section with respect to the treatment, storage, or disposal of such wastes or overburden. Regulations promulgated by the Administrator under this subchapter shall not be applicable to treatment, storage, or disposal of coal mining wastes and overburden which are covered by such a permit.

(g) Research, development, and demonstration permits

(1) The Administrator may issue a research, development, and demonstration permit for any hazardous waste treatment facility which proposes to utilize an innovative and experimental hazardous waste treatment technology or process for which permit standards for such experimental activity have not been promulgated under this subchapter. Any such permit shall include such terms and conditions as will assure protection of human health and the environment. Such permits—

(A) shall provide for the construction of such facilities, as necessary, and for operation of the facility for not longer than one year (unless renewed as provided in paragraph (4)); and

(B) shall provide for the receipt and treatment by the facility of only those types and quantities of hazardous waste which the Administrator deems necessary for purposes of determining the efficacy and performance capabilities of the technology or process and the effects of such technology or process on human health and the environment, and

(C) shall include such requirements as the Administrator deems necessary to protect human health and the environment (including, but not limited to, requirements regarding monitoring, operation, insurance or bonding, financial responsibility, closure, and remedial action), and such requirements as the Administrator deems necessary regarding testing and providing of information to the Administrator with respect to the operation of the facility.

The Administrator may apply the criteria set forth in this paragraph in establishing the conditions of each permit without separate establishment of regulations implementing such criteria.

(2) For the purpose of expediting review and issuance of permits under this subsection, the Administrator may, consistent with the protection of human health and the environment, modify or waive permit application and permit issuance requirements established in the Administrator's general permit regulations except that there may be no modification or waiver of regulations regarding financial responsibility (including insurance) or of procedures established under section 6974(b)(2) of this title regarding public participation.

(3) The Administrator may order an immediate termination of all operations at the facility at any time he determines that termination is necessary to protect human health and the environment.

(4) Any permit issued under this subsection may be renewed not more than three times. Each such renewal shall be for a period of not more than 1 year.

(h) Waste minimization

Effective September 1, 1985, it shall be a condition of any permit issued under this section for the treatment, storage, or disposal of hazardous waste on the premises where such waste was generated that the permittee certify, no less often than annually, that—

(1) the generator of the hazardous waste has a program in place to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable; and

(2) the proposed method of treatment, storage, or disposal is that practicable method currently available to the generator which minimizes the present and future threat to human health and the environment.

(i) Interim status facilities receiving wastes after July 26, 1982

The standards concerning ground water monitoring, unsaturated zone monitoring, and corrective action, which are applicable under section 6924 of this title to new landfills, surface impoundments, land treatment units, and waste-pile units required to be permitted under subsection (c) shall also apply to any landfill, surface impoundment, land treatment unit, or waste-pile unit qualifying for the authorization to operate under subsection (e) which receives hazardous waste after July 26, 1982.

(j) Interim status surface impoundments
(1) Except as provided in paragraph (2), (3), or (4), each surface impoundment in existence on November 8, 1984, and qualifying for the authorization to operate under subsection (e) of this section shall not receive, store, or treat hazardous waste after the date four years after November 8, 1984, unless such surface impoundment is in compliance with the requirements of section 6924(o)(1)(A) of this title which would apply to such impoundment if it were new.

(2) Paragraph (1) of this subsection shall not apply to any surface impoundment which (A) has at least one liner, for which there is no evidence that such liner is leaking; (B) is located more than one-quarter mile from an underground source of drinking water; and (C) is in compliance with generally applicable ground water monitoring requirements for facilities with permits under subsection (c) of this section.

(3) Paragraph (1) of this subsection shall not apply to any surface impoundment which (A) contains treated waste water during the secondary or subsequent phases of an aggressive biological treatment facility subject to a permit issued under section 1342 of title 33 (or which holds such treated waste water after treatment and prior to discharge); (B) is in compliance with generally applicable ground water monitoring requirements for facilities with permits under subsection (c) of this section; and (C)(i) is part of a facility in compliance with section 1311(b)(2) of title 33, or (ii) in the case of a facility for which no effluent guidelines required under section 1314(b)(2) of title 33 are in effect and no permit under section 1342(a)(1) of title 33 implementing section 1311(b)(2) of title 33 has been issued, is part of a facility in compliance with a permit under section 1342 of title 33, which is achieving significant degradation of toxic pollutants and hazardous constituents contained in the untreated waste stream and which has identified those toxic pollutants and hazardous constituents in the untreated waste stream to the appropriate permitting authority.

(4) The Administrator (or the State, in the case of a State with an authorized program), after notice and opportunity for comment, may modify the requirements of paragraph (1) for any surface impoundment if the owner or operator demonstrates that such surface impoundment is located, designed and operated so as to assure that there will be no migration of any hazardous constituent into ground water or surface water at any future time. The Administrator or the State shall take into account locational criteria established under section 6924(o)(7) of this title.

(5) The owner or operator of any surface impoundment potentially subject to paragraph (1) who has reason to believe that on the basis of paragraph (2), (3), or (4) such surface impoundment is not required to comply with the requirements of paragraph (1), shall apply to the Administrator (or the State, in the case of a State with an authorized program) not later than twenty-four months after November 8, 1984, for a determination of the applicability of paragraph (1) (in the case of paragraph (2) or (3)) or for a modification of the requirements of paragraph (1) (in the case of paragraph (4)), with respect to such surface impoundment. Such owner or operator shall provide, with such application, evidence pertinent to such decision, including:

(A) an application for a final determination regarding the issuance of a permit under subsection (c) of this section for such facility, if not previously submitted;

(B) evidence as to compliance with all applicable ground water monitoring requirements and the information and analysis from such monitoring;

(C) all reasonably ascertainable evidence as to whether such surface impoundment is leaking; and

(D) in the case of applications under paragraph (2) or (3), a certification by a registered professional engineer with academic training and experience in ground water hydrology that—

(i) under paragraph (2), the liner of such surface impoundment is designed, constructed, and operated in accordance with applicable requirements, such surface impoundment is more than one-quarter mile from an underground source of drinking water and there is no evidence such liner is leaking; or

(ii) under paragraph (3), based on analysis of those toxic pollutants and hazardous constituents that are likely to be present in the untreated waste stream, such impoundment satisfies the conditions of paragraph (3).

In the case of any surface impoundment for which the owner or operator fails to apply under this paragraph within the time provided by this paragraph or paragraph (6), such surface impoundment shall comply with paragraph (1) notwithstanding paragraph (2), (3), or (4). Within twelve months after receipt of such application and evidence and not later than thirty-six months after November 8, 1984, and after notice and opportunity to comment, the Administrator (or, if appropriate, the State) shall advise such owner or operator on the applicability of paragraph (1) to such surface impoundment so as to whether and how the requirements of paragraph (1) shall be modified and applied to such surface impoundment.

(6)(A) In any case in which a surface impoundment becomes subject to paragraph (1) after November 8, 1984, due to the promulgation of additional listings or characteristics for the identification of hazardous waste under section 6921 of this title, the period for compliance in paragraph (1) shall be four years after the date of such promulgation, the period for demonstrations under paragraph (4) and for submission of evidence under paragraph (5) shall be not later than twenty-four months after the date of promulgation, and the period for the Administrator (or, if appropriate, the State) to advise such owners or operators under paragraph (5) shall be not later than thirty-six months after the date of promulgation.

(B) In any case in which a surface impoundment is initially determined to be excluded from the requirements of paragraph (1) but due to a change in condition (including the existence of a leak) no longer satisfies the provisions of paragraph (2), (3), or (4) and therefore becomes subject to paragraph (1), the period for compliance in paragraph (1) shall be two years after the date of discovery of such change of condition, or in the case of a surface impoundment excluded under paragraph (3) three years after such date of discovery.

(7)(A) The Administrator shall study and report to the Congress on the number, range of size, construction, likelihood of hazardous constituents migrating into ground water, and potential threat to human health and the environment of existing surface impoundments excluded by paragraph (3) from the requirements of paragraph (1). Such report shall address the need, feasibility, and estimated costs of subjecting such existing surface impoundments to the requirements of paragraph (1).

(B) In the case of any existing surface impoundment or class of surface impoundments from which the Administrator (or the State, in the case of a State with an authorized program) determines hazardous constituents are likely to migrate into
ground water, the Administrator (or if appropriate, the State) is authorized to impose such requirements as may be necessary to protect human health and the environment, including the requirements of section 6924(o) of this title which would apply to such impoundments if they were new.

(C) In the case of any surface impoundment excluded by paragraph (3) from the requirements of paragraph (1) which is subsequently determined to be leaking, the Administrator (or, if appropriate, the State) shall require compliance with paragraph (1), unless the Administrator (or, if appropriate, the State) determines that such compliance is not necessary to protect human health and the environment.

(8) In the case of any surface impoundment in which the liners and leak detection system have been installed pursuant to the requirements of paragraph (1) and in good faith compliance with section 6924(o) of this title and the Administrator's regulations and guidance documents governing liners and leak detection systems, no liner or leak detection system which is different from that which was so installed pursuant to paragraph (1) shall be required for such unit by the Administrator when issuing the first permit under this section to such facility. Nothing in this paragraph shall preclude the Administrator from requiring installation of a new liner when the Administrator has reason to believe that any liner installed pursuant to the requirements of this subsection is leaking.

(9) In the case of any surface impoundment which has been excluded by paragraph (2) on the basis of a liner meeting the definition under paragraph (12)(A)(ii), at the closure of such impoundment the Administrator shall require the owner or operator of such impoundment to remove or decontaminate all waste residues, all contaminated liner material, and contaminated soil to the extent practicable. If all contaminated soil is not removed or decontaminated, the owner or operator of such impoundment shall be required to comply with appropriate post-closure requirements, including but not limited to ground water monitoring and corrective action.

(10) Any incremental cost attributable to the requirements of this subsection or section 6924(o) of this title shall not be considered by the Administrator (or the State, in the case of a State with an authorized program under section 1342 of title 33)—

(A) in establishing effluent limitations and standards under section 1311, 1314, 1316, 1317, or 1342 of title 33 based on effluent limitations guidelines and standards promulgated any time before twelve months after November 8, 1984; or

(B) in establishing any other effluent limitations to carry out the provisions of section 1311, 1317, or 1342 of title 33 on or before October 1, 1986.

(11)(A) If the Administrator allows a hazardous waste which is prohibited from one or more methods of land disposal under subsection (d), (e), or (g) of section 6924 of this title (or under regulations promulgated by the Administrator under such subsections) to be placed in a surface impoundment (which is operating pursuant to interim status) for storage or treatment, such impoundment shall meet the requirements that are applicable to new surface impoundments under section 6924(o)(1) of this title, unless such impoundment meets the requirements of paragraph (2) or (4).

(B) In the case of any hazardous waste which is prohibited from one or more methods of land disposal under subsection (d), (e), or (g) of section 6924 of this title (or under regulations promulgated by the Administrator under such subsection) the placement or maintenance of such hazardous waste in a surface impoundment for treatment is prohibited as of the effective date of such prohibition unless the treatment residues which are hazardous are, at a minimum, removed for subsequent management within one year of the entry of the waste into the surface impoundment.

(12)(A) For the purposes of paragraph (2)(A) of this subsection, the term "liner" means—

(i) a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility; or

(ii) a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility.

(B) For the purposes of this subsection, the term "aggressive biological treatment facility" means a system of surface impoundments in which the initial impoundment of the secondary treatment segment of the facility utilizes intense mechanical aeration to enhance biological activity to degrade waste water pollutants and

(i) the hydraulic retention time in such initial impoundment is no longer than 5 days under normal operating conditions, on an annual average basis;

(ii) the hydraulic retention time in such initial impoundment is no longer than thirty days under normal operating conditions, on an annual average basis: Provided, That the sludge in such impoundment does not constitute a hazardous waste as identified by the extraction procedure toxicity characteristic in effect on November 8, 1984; or

(iii) such system utilizes activated sludge treatment in the first portion of secondary treatment.

(C) For the purposes of this subsection, the term "underground source or drinking water" has the same meaning as provided in regulations under the Safe Drinking Water Act (title XIV of the Public Health Service Act [42 U.S.C. 300f et seq.]).

(13) The Administrator may modify the requirements of paragraph (1) in the case of a surface impoundment for which the owner or operator, prior to October 1, 1984, has entered into, and is in compliance with, a consent order, decree, or agreement with the Administrator or a State with an authorized program mandating corrective action with respect to such surface impoundment that provides a degree of protection of human health and the environment which is at a minimum equivalent to that provided by paragraph (1).

EDITORIAL NOTES

REFERENCES IN TEXT

The Safe Drinking Water Act, referred to in subsec. (j)(12)(C), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. For complete classification of this Act to the Code see Short Title note set out under section 201 of this title and Tables.

Amendments

1984—Subsec. (a). Pub. L. 98–616, §211, substituted "an existing facility or planning to construct a new" for "a", inserted "and the construction of any new facility for the treatment, storage, or disposal of any such hazardous waste", and inserted at end "No permit shall be required under this section in order to construct a facility if such facility is constructed pursuant to an approval issued by the Administrator under section 2605(e) of title 15 for the incineration of polychlorinated [sic] biphenyls and any person owning or operating such a facility may, at any time after operation or construction of such facility has begun, file an application for a permit pursuant to this section authorizing such facility to incinerate hazardous waste identified or listed under this subchapter."

Subsec. (c)(1), (2). Pub. L. 98–616, §213(c), designated existing provisions as par. (1) and added par. (2).

Subsec. (e). Pub. L. 98–616, §213(a), designated existing provisions as par. (1), redesignated former pars. (1), (2), and (3) thereof as subpars. (A), (B), and (C), respectively, designated existing provisions of previously redesignated subpar. (A) as cl. (i) and added cl. (ii), inserted "This paragraph shall not apply to any facility which has been previously denied a permit under this section or if authority to operate the facility under this section has been previously terminated." to closing provisions of par. (1), and added pars. (2) and (3).

Subsec. (g). Pub. L. 98–616, §214(a), added subsec. (g).

1978—Subsec (a). Pub. L. 95–609 inserted "treatment, storage, or" after "and after such date the".

Executive Documents

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "responsibility".

2 So in original. Probably should be "constituent".

3 So in original. Probably should be "of".

§6926. Authorized State hazardous waste programs

(a) Federal guidelines

Not later than eighteen months after October 21, 1976, the Administrator, after consultation with State authorities, shall promulgate guidelines to assist States in the Development of State hazardous waste programs.

(b) Authorization of State program
Any State which seeks to administer and enforce a hazardous waste program pursuant to this subchapter may develop and, after notice and opportunity for public hearing, submit to the Administrator an application, in such form as he shall require, for authorization of such program. Within ninety days following submission of an application under this subsection, the Administrator shall issue a notice as to whether or not he expects such program to be authorized, and within ninety days following such notice (and after opportunity for public hearing) he shall publish his findings as to whether or not the conditions listed in items (1), (2), and (3) below have been met. Such State is authorized to carry out such program in lieu of the Federal program under this subchapter in such State and to issue and enforce permits for the storage, treatment, or disposal of hazardous waste (and to enforce permits deemed to have been issued under section 6935(d)(1) of this title) unless, within ninety days following submission of the application the Administrator notifies such State that such program may not be authorized and, within ninety days following such notice and after opportunity for public hearing, he finds that (1) such State program is not equivalent to the Federal program under this subchapter, (2) such program is not consistent with the Federal or State programs applicable in other States, or (3) such program does not provide adequate enforcement of compliance with the requirements of this subchapter. In authorizing a State program, the Administrator may base his findings on the Federal program in effect one year prior to submission of a State’s application or in effect on January 26, 1983, whichever is later.

(c) Interim authorization

(1) Any State which has in existence a hazardous waste program pursuant to State law before the date ninety days after the date of promulgation of regulations under sections 6922, 6923, 6924, and 6925 of this title, may submit to the Administrator evidence of such existing program and may request a temporary authorization to carry out such program under this subchapter. The Administrator shall, if the evidence submitted shows the existing State program to be substantially equivalent to the Federal program under this subchapter, grant an interim authorization to the State to carry out such program in lieu of the Federal program pursuant to this subchapter for a period ending no later than January 31, 1986.

(2) The Administrator shall, by rule, establish a date for the expiration of interim authorization under this subsection.

(3) Pending interim or final authorization of a State program for any State which reflects the amendments made by the Hazardous and Solid Waste Amendments of 1984, the State may enter into an agreement with the Administrator under which the State may assist in the administration of the requirements and prohibitions which take effect pursuant to such Amendments.

(4) In the case of a State permit program for any State which is authorized under subsection (b) or under this subchapter, until such program is amended to reflect the amendments made by the Hazardous and Solid Waste Amendments of 1984 and such program amendments receive interim or final authorization, the Administrator shall have the authority in such State to issue or deny permits or those portions of permits affected by the requirements and prohibitions established by the Hazardous and Solid Waste Amendments of 1984. The Administrator shall coordinate with States the procedures for issuing such permits.

(d) Effect of State permit

Any action taken by a State under a hazardous waste program authorized under this section shall have the same force and effect as action taken by the Administrator under this subchapter.

(e) Withdrawal of authorization

Whenever the Administrator determines after public hearing that a State is not administering and enforcing a program authorized under this section in accordance with requirements of this section, he shall so notify the State and, if appropriate corrective action is not taken within a reasonable time, not to exceed ninety days, the Administrator shall withdraw authorization of such program and establish a Federal program pursuant to this subchapter. The Administrator shall not withdraw authorization of any such program unless he shall first have notified the State, and made public, in writing, the reasons for such withdrawal.

(f) Availability of information

No State program may be authorized by the Administrator under this section unless—

(1) such program provides for the public availability of information obtained by the State regarding facilities and sites for the treatment, storage, and disposal of hazardous waste; and

(2) such information is available to the public in substantially the same manner, and to the same degree, as would be the case if the Administrator was carrying out the provisions of this subchapter in such State.

(g) Amendments made by 1984 act

(1) Any requirement or prohibition which is applicable to the generation, transportation, treatment, storage, or disposal of hazardous waste and which is imposed under this subchapter pursuant to the amendments made by the Hazardous and Solid Waste Amendments of 1984 shall take effect in each State having an interim or finally authorized State program on the same date as such requirement takes effect in other States. The Administrator shall carry out such requirement directly in each such State unless the State program is finally authorized (or is granted interim authorization as provided in paragraph (2)) with respect to such requirement.

(2) Any State which, before November 8, 1984, has an existing hazardous waste program which has been granted interim or final authorization under this section may submit to the Administrator evidence that such existing program contains (or has been amended to include) any requirement which is substantially equivalent to a requirement referred to in paragraph (1) and may request interim authorization to carry out that requirement under this subchapter. The Administrator shall, if the evidence submitted shows the State requirement to be substantially equivalent to the requirement referred to in paragraph (1), grant an interim authorization to the State to carry out such requirement in lieu of direct administration in the State by the Administrator of such requirement.
(h) State programs for used oil

In the case of used oil which is not listed or identified under this subchapter as a hazardous waste but which is regulated under section 6935 of this title, the provisions of this section regarding State programs shall apply in the same manner and to the same extent as such provisions apply to hazardous waste identified or listed under this subchapter.

EDITORIAL NOTES

REFERENCES IN TEXT

Section 6935(d)(1) of this title, referred to in subsec. (b), was in the original a reference to section 3012(d)(1) of Pub. L. 89–272, which was renumbered section 3014(d)(1) of Pub. L. 98–616 and is classified to section 6935(d)(1) of this title.

The Hazardous and Solid Waste Amendments of 1984, referred to in subsecs. (c)(3), (4), and (g), is Pub. L. 98–616, Nov. 8, 1984, 98 Stat. 3221, which amended this chapter. For complete classification of this Act to the Code, see Short Title of 1984 Amendment note set out under section 6901 of this title and Tables.

AMENDMENTS

1984—Subsec. (b). Pub. L. 98–616, §§225, 241(b)(2), inserted "(and to enforce permits deemed to have been issued under section 6935(d)(1) of this title)", and inserted provision at end that in authorizing a State program, the Administrator may base his findings on the Federal program in effect one year prior to submission of a State's application or in effect on January 26, 1983, whichever is later.

Subsec. (c)(1). Pub. L. 98–616, §227(1), (2), designated existing provisions as par. (1) and substituted "period ending no later than January 31, 1986" for "twenty-four month period beginning on the date six months after the date of promulgation of regulations under sections 6922 through 6925 of this title".

Subsec. (c)(2) to (4). Pub. L. 98–616, §227(3), added par. (2) to (4).

Subsec. (g). Pub. L. 98–616, §228, added subsec. (g).

1978—Subsec. (c). Pub. L. 95–609 substituted "of" for "required for" wherever appearing and "may submit" for "submit".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 1984 AMENDMENT

Pub. L. 98–616, title II, §226(b), Nov. 8, 1984, 98 Stat. 3254, provided that: "The amendment made by subsection (a) [enacting subsec. (f) of this section] shall apply with respect to State programs authorized under section 3006 [this section] before, on, or after the date of enactment of the Hazardous and Solid Waste Amendments of 1984 [Nov. 8, 1984]."

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 See References in Text note below.

§6927. Inspections

(a) Access entry

For purposes of developing or assisting in the development of any regulation or enforcing the provisions of this chapter, any person who generates, stores, treats, transports, disposes of, or otherwise handles or has handled hazardous wastes shall, upon request of any officer, employee or representative of the Environmental Protection Agency, duly designated by the Administrator, or upon request of any duly designated officer, employee or representative of a State having an authorized hazardous waste program, furnish information relating to such wastes and permit such person at all reasonable times to have access to, and to copy all records relating to such wastes. For the purposes of developing or assisting in the
development of any regulation or enforcing the provisions of this chapter, such officers, employees or representatives are authorized—

(1) to enter at reasonable times any establishment or other place where hazardous wastes are or have been generated, stored, treated, disposed of, or transported from;

(2) to inspect and obtain samples from any person of any such wastes and samples of any containers or labeling for such wastes.

Each such inspection shall be commenced and completed with reasonable promptness. If the officer, employee or representative obtains any samples, prior to leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and if requested a portion of each such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner, operator, or agent in charge.

(b) Availability to public

(1) Any records, reports, or information (including records, reports, or information obtained by representatives of the Environmental Protection Agency) obtained from any person under this section shall be available to the public, except that upon a showing satisfactory to the Administrator (or the State, as the case may be) by any person that records, reports, or information, or particular part thereof, to which the Administrator (or the State, as the case may be) or any officer, employee or representative thereof has access under this section if made public, would divulge information entitled to protection under section 1905 of title 18, such information or particular portion thereof shall be considered confidential in accordance with the purposes of that section, except that such record, report, document, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this chapter, or when relevant in any proceeding under this chapter.

(2) Any person not subject to the provisions of section 1905 of title 18 who knowingly and willfully divulges or discloses any information entitled to protection under this subsection shall, upon conviction, be subject to a fine of not more than $5,000 or to imprisonment not to exceed one year, or both.

(3) In submitting data under this chapter, a person required to provide such data may—

(A) designate the data which such person believes is entitled to protection under this subsection, and

(B) submit such designated data separately from other data submitted under this chapter.

A designation under this paragraph shall be made in writing and in such manner as the Administrator may prescribe.

(4) Notwithstanding any limitation contained in this section or any other provision of law, all information reported to, or otherwise obtained by, the Administrator (or any representative of the Administrator) under this chapter shall be made available, upon written request of any duly authorized committee of the Congress, to such committee.

(c) Federal facility inspections

The Administrator shall undertake on an annual basis a thorough inspection of each facility for the treatment, storage, or disposal of hazardous waste which is owned or operated by a department, agency, or instrumentality of the United States to enforce its compliance with this subchapter and the regulations promulgated thereunder. Any State with an authorized hazardous waste program also may conduct an inspection of any such facility for purposes of enforcing the facility’s compliance with the State hazardous waste program. The records of such inspections shall be available to the public as provided in subsection (b). The department, agency, or instrumentality owning or operating each such facility shall reimburse the Environmental Protection Agency for the costs of the inspection of the facility. With respect to the first inspection of each such facility occurring after October 6, 1992, the Administrator shall conduct a comprehensive ground water monitoring evaluation at the facility, unless such an evaluation was conducted during the 12-month period preceding October 6, 1992.

(d) State-operated facilities

The Administrator shall annually undertake a thorough inspection of every facility for the treatment, storage, or disposal of hazardous waste which is operated by a State or local government for which a permit is required under section 6925 of this title. The records of such inspection shall be available to the public as provided in subsection (b).

(e) Mandatory inspections

(1) The Administrator (or the State in the case of a State having an authorized hazardous waste program under this subchapter) shall commence a program to thoroughly inspect every facility for the treatment, storage, or disposal of hazardous waste for which a permit is required under section 6925 of this title no less often than every two years as to its compliance with this subchapter (and the regulations promulgated under this subchapter). Such inspections shall commence not later than twelve months after November 8, 1984. The Administrator shall, after notice and opportunity for public comment, promulgate regulations governing the minimum frequency and manner of such inspections, including the manner in which records of such inspections shall be maintained and the manner in which reports of such inspections shall be filed. The Administrator may distinguish between classes and categories of facilities commensurate with the risks posed by each class or category.

(2) Not later than six months after November 8, 1984, the Administrator shall submit to the Congress a report on the potential for inspections of hazardous waste treatment, storage, or disposal facilities by nongovernmental inspectors as a supplement to inspections conducted by officers, employees, or representatives of the Environmental Protection Agency or States having authorized hazardous waste programs or operating under a cooperative agreement with the Administrator. Such report shall be prepared in cooperation with the States, insurance companies offering environmental impairment insurance, independent companies providing inspection services, and other such groups as appropriate. Such report shall
contain recommendations on provisions and requirements for a program of private inspections to supplement governmental inspections.

EDITORIAL NOTES

AMENDMENTS

1992—Subsec. (c). Pub. L. 102–386 in first sentence substituted "The Administrator shall undertake" for "Beginning twelve months after November 8, 1984, the Administrator shall, or in the case of a State with an authorized hazardous waste program the State may, undertake" and "department, agency, or instrumentality of the United States" for "Federal agency", inserted after first sentence "Any State with an authorized hazardous waste program also may conduct an inspection of any such facility for purposes of enforcing the facility's compliance with the State hazardous waste program.", and inserted at end "The department, agency, or instrumentality owning or operating each such facility shall reimburse the Environmental Protection Agency for the costs of the inspection of the facility. With respect to the first inspection of each such facility occurring after October 6, 1992, the Administrator shall conduct a comprehensive ground water monitoring evaluation at the facility, unless such an evaluation was conducted during the 12-month period preceding October 6, 1992."

1980—Subsec. (a). Pub. L. 96–482, §12(a), substituted "chapter" for "subchapter", "any officer, employee or representative" for "any officer or employee", "duly designated officer, employee or representative" for "duly designated officer employee", "such officers, employees or representatives" for "such officers or employees", "furnish information relating to such wastes and permit" for "furnish or permit", and "officer, employee or representative obtains" for "officer or employee obtains", struck out "maintained by any person" after "establishment or other place", substituted "officer, employee or representative obtains" for "officer or employee obtains", and inserted "or has handled" after "otherwise handles" and "or have been" after "where hazardous wastes are".

Subsec. (b)(1). Pub. L. 96–482, §12(b)(1)–(3), designated existing provisions as par. (1), inserted "or any officer, employee or representative thereof before "has access under this section" and substituted "such information or particular portion thereof shall be considered" for "the Administrator (or the State, as the case may be) shall consider such information or portion thereof"

Pub. L. 96–482, §12(b)(4), as modified by Pub. L. 98–616, §502(a), inserted "(including records, reports, or information obtained by representatives of the Environmental Protection Agency)" after "information".

Subsec. (b)(2) to (4). Pub. L. 96–482, §12(b)(3), added pars. (2) to (4).

1978—Subsec. (a)(1). Pub. L. 95–609 substituted "disposed of, or transported from" for "or disposed of".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6928. Federal enforcement

(a) Compliance orders

(1) Except as provided in paragraph (2), whenever on the basis of any information the Administrator determines that any person has violated or is in violation of any requirement of this subchapter, the Administrator may issue an order assessing a civil penalty for any past or current violation, requiring compliance immediately or within a specified time period, or both, or the Administrator may commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

(2) In the case of a violation of any requirement of this subchapter where such violation occurs in a State which is authorized to carry out a hazardous waste program under section 6926 of this title, the Administrator shall give notice to the State in which such violation has occurred prior to issuing an order or commencing a civil action under this section.
(3) Any order issued pursuant to this subsection may include a suspension or revocation of any permit issued by the Administrator or a State under this subchapter and shall state with reasonable specificity the nature of the violation. Any penalty assessed in the order shall not exceed $25,000 per day of noncompliance for each violation of a requirement of this subchapter. In assessing such a penalty, the Administrator shall take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements.

(b) Public hearing

Any order issued under this section shall become final unless, no later than thirty days after the order is served, the person or persons named therein request a public hearing. Upon such request the Administrator shall promptly conduct a public hearing. In connection with any proceeding under this section the Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

(c) Violation of compliance orders

If a violator fails to take corrective action within the time specified in a compliance order, the Administrator may assess a civil penalty of not more than $25,000 for each day of continued noncompliance with the order and the Administrator may suspend or revoke any permit issued to the violator (whether issued by the Administrator or the State).

(d) Criminal penalties

Any person who—

1. knowingly transports or causes to be transported any hazardous waste identified or listed under this subchapter to a facility which does not have a permit under this subchapter, or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.;

2. knowingly treats, stores, or disposes of any hazardous waste identified or listed under this subchapter—

   (A) without a permit under this subchapter or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052) [33 U.S.C. 1411 et seq.; or

   (B) in knowing violation of any material condition or requirement of such permit; or

   (C) in knowing violation of any material condition or requirement of any applicable interim status regulations or standards;

3. knowingly omits material information or makes any false material statement or representation in any application, label, manifest, record, report, permit, or other document filed, maintained, or used for purposes of compliance with regulations promulgated by the Administrator (or by a State in the case of an authorized State program) under this subchapter;

4. knowingly generates, stores, treats, transports, disposes of, exports, or otherwise handles any hazardous waste or any used oil not identified or listed as a hazardous waste under this subchapter (whether such activity took place before or takes place after November 8, 1984) and who knowingly destroys, alters, conceals, or fails to file any record, application, manifest, report, or other document required to be maintained or filed for purposes of compliance with regulations promulgated by the Administrator (or by a State in the case of an authorized State program) under this subchapter;

5. knowingly transports without a manifest, or causes to be transported without a manifest, any hazardous waste or any used oil not identified or listed as a hazardous waste under this subchapter required by regulations promulgated under this subchapter (or by a State in the case of a State program authorized under this subchapter) to be accompanied by a manifest;

6. knowingly exports a hazardous waste identified or listed under this subchapter (A) without the consent of the receiving country or, (B) where there exists an international agreement between the United States and the government of the receiving country establishing notice, export, and enforcement procedures for the transportation, treatment, storage, and disposal of hazardous wastes, in a manner which is not in conformance with such agreement; or

7. knowingly stores, treats, transports, or causes to be transported, disposes of, or otherwise handles any used oil not identified or listed as a hazardous waste under this subchapter—

   (A) in knowing violation of any material condition or requirement of a permit under this subchapter; or

   (B) in knowing violation of any material condition or requirement of any applicable regulations or standards under this chapter;

shall, upon conviction, be subject to a fine of not more than $50,000 for each day of violation, or imprisonment not to exceed two years (five years in the case of a violation of paragraph (1) or (2)), or both. If the conviction is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment under the respective paragraph shall be doubled with respect to both fine and imprisonment.

(e) Knowing endangerment

Any person who knowingly transports, treats, stores, disposes of, or exports any hazardous waste identified or listed under this subchapter or used oil not identified or listed as a hazardous waste under this subchapter in violation of paragraph (1), (2), (3), (4), (5), (6), or (7) of subsection (d) of this section who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment for not more than fifteen years, or both. A defendant that is an organization shall, upon conviction of violating this subsection, be subject to a fine of not more than $1,000,000.

(f) Special rules

For the purposes of subsection (e)—
(1) A person's state of mind is knowing with respect to—
   (A) his conduct, if he is aware of the nature of his conduct;
   (B) an existing circumstance, if he is aware or believes that the circumstance exists; or
   (C) a result of his conduct, if he is aware or believes that his conduct is substantially certain to cause danger of death or serious bodily injury.

(2) In determining whether a defendant who is a natural person knew that his conduct placed another person in imminent danger of death or serious bodily injury—
   (A) the person is responsible only for actual awareness or actual belief that he possessed; and
   (B) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant;

Provided. That in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information.

(3) It is an affirmative defense to a prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—
   (A) an occupation, a business, or a profession; or
   (B) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent.

The defendant may establish an affirmative defense under this subsection by a preponderance of the evidence.

(4) All general defenses, affirmative defenses, and bars to prosecution that may apply with respect to other Federal criminal offenses may apply under subsection (e) and shall be determined by the courts of the United States according to the principles of common law as they may be interpreted in the light of reason and experience. Concepts of justification and excuse applicable under this section may be developed in the light of reason and experience.

(5) The term "organization" means a legal entity, other than a government, established, or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons.

(6) The term "serious bodily injury" means—
   (A) bodily injury which involves a substantial risk of death;
   (B) unconsciousness;
   (C) extreme physical pain;
   (D) protracted and obvious disfigurement; or
   (E) protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

(g) Civil penalty
Any person who violates any requirement of this subchapter shall be liable to the United States for a civil penalty in an amount not to exceed $25,000 for each such violation. Each day of such violation shall, for purposes of this subsection, constitute a separate violation.

(h) Interim status corrective action orders
(1) Whenever on the basis of any information the Administrator determines that there is or has been a release of hazardous waste into the environment from a facility authorized to operate under section 6925(e) of this title, the Administrator may issue an order requiring corrective action or such other response measure as he deems necessary to protect human health or the environment or the Administrator may commence a civil action in the United States district court in the district in which the facility is located for appropriate relief, including a temporary or permanent injunction.

(2) Any order issued under this subsection may include a suspension or revocation of authorization to operate under section 6925(e) of this title, shall state with reasonable specificity the nature of the required corrective action or other response measure, and shall specify a time for compliance. If any person named in an order fails to comply with the order, the Administrator may assess, and such person shall be liable to the United States for, a civil penalty in an amount not to exceed $25,000 for each day of noncompliance with the order.

EDITORIAL NOTES

REFERENCES IN TEXT

AMENDMENTS
1986—Subsec. (d)(4). Pub. L. 99–499, §205(i)(1), inserted "or any used oil not identified or listed as a hazardous waste under this subchapter".

Subsec. (d)(5). Pub. L. 99–499, §205(i)(1), (2), inserted "or any used oil not identified or listed as a hazardous waste under this subchapter" and struck out "; or" after "accompanied by a manifest".

Subsec. (d)(6). Pub. L. 99–499, §205(i)(3), inserted at end "; or".

Subsec. (e). Pub. L. 99–499, §205(i)(5), inserted "or used oil not identified or listed as a hazardous waste under this subchapter" and substituted "(5), (6), or (7)" for "(5), or (6)".

1984—Subsec. (a)(1). Pub. L. 98–616, §403(d)(1), in amending par. (1) generally, expanded authority of Administrator by empowering him to determine that a person "has violated" a requirement of this subchapter, and to assess a civil penalty for a past or current violation.

Subsec. (a)(3). Pub. L. 98–616, §403(d)(2), in amending par. (3) generally, substituted provision that any order issued pursuant to this subsection may include a suspension or revocation of any permit issued by the Administrator or a State under this subchapter and shall state with reasonable specificity the nature of the violation, and provision that any penalty assessed in the order shall not exceed $25,000 per day of noncompliance for each violation of a requirement of this subchapter, and that in assessing such a penalty, the Administrator take into account the seriousness of the violation and any good faith efforts to comply with applicable requirements, for provision that if such violator fails to take corrective action within the time specified in the order, he shall be liable for a civil penalty of not more than $25,000 for each day of continued noncompliance and the Administrator may suspend or revoke any permit issued to the violator, whether issued by the Administrator or the State.

Subsec. (b). Pub. L. 98–616, §233(b), inserted "issued under this section".

Subsec. (c). Pub. L. 98–616, §403(d)(3), substituted provisions relating to penalties for violation of compliance orders for former provisions which set forth requirements for compliance orders.

Subsec. (d). Pub. L. 98–616, §232(a)(3), amended closing provisions generally. Prior to amendment, closing provisions read as follows: "shall, upon conviction, be subject to a fine of not more than $25,000 ($50,000 in the case of a violation of paragraph (1) or (2)) for each day of violation, or to imprisonment not to exceed one year (two years in the case of a violation of paragraph (1) or (2)), or both. If the conviction is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment for not more than two years, or by both."

Subsec. (d)(1). Pub. L. 98–616, §232(a)(1), inserted "or causes to be transported" and substituted "this subchapter" for "section 6925 of this title (or section 6926 of this title in case of a State program)"

Subsec. (d)(2)(A). Pub. L. 98–616, §232(a)(2)(B), (c), substituted "this subchapter" for "section 6925 of this title (or section 6926 of this title in case of a State program)" and struck out "having obtained" before "a permit under".

Subsec. (d)(3) to (5). Pub. L. 98–616, §232(a)(3), in amending pars. (3) and (4) generally, expanded par. (3) by providing criminal penalties for one who knowingly omits material information from documents required to be filed, maintained or used under this subchapter, expanded par. (4) by providing criminal penalties for one who knowingly fails to file required material under this subchapter, and added par. (5).

Subsec. (e). Pub. L. 98–616, §232(b), in amending subsec. (e) generally, struck out provisions referring to violations of interim status standards and omission of material information from permit applications, struck out provision requiring proof of "unjustifiable and inexcusable disregard for human life" or "extreme indifference to human life" for conviction under this subsection, and inserted provision increasing maximum prison sentence to fifteen years for violation of subsec. (d)(1) through (6) of this section by one who knowingly places another person in imminent danger of death or serious bodily injury, replacing former provision calling for maximum imprisonment of two years, or five years in cases evidencing extreme indifference to human life.

1980—Subsec. (a)(1). Pub. L. 96–482, §13(1), (2), struck out "the Administrator shall give notice to the violator of his failure to comply with such requirement. If such violation extends beyond the thirtieth day after the Administrator's notification" before "the Administrator may issue" and substituted "compliance immediately or within a specified time period" for "compliance within a specified time period".

Subsec. (a)(2). Pub. L. 96–482, §13(2), struck out "thirty days" after "violation has occurred".

Subsec. (b). Pub. L. 96–482, §13(3), substituted "order shall become final unless, no later than thirty days after the order is served" for "order or any suspension or revocation of a permit shall become final unless, no later than thirty days after the order or notice of the suspension or revocation is served".

Subsec. (d). Pub. L. 96–482, §13(5), in par. (2), designated existing provisions as subpar. (A) and added subpar. (B), in par. (3), inserted provision requiring the statement or representation to be material, added par.
(4), and in provisions following par. (4), inserted provision authorizing a fine of $50,000 and a two year
imprisonment for violation of par. (1) or (2).
Subsecs. (e) to (g). Pub. L. 96–482, §13(5), added subsecs. (e) to (g).
Research, and Sanctuaries Act.
Subsec. (d)(2). Pub. L. 95–609, §7(k)(2), inserted provisions relating to treatment or storage of hazardous

Executive Documents

Transfer of Functions

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection
Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas
Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for
Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6929. Retention of State authority

Upon the effective date of regulations under this subchapter no State or political subdivision may impose any
requirements less stringent than those authorized under this subchapter respecting the same matter as governed by such
regulations, except that if application of a regulation with respect to any matter under this subchapter is postponed or
enjoined by the action of any court, no State or political subdivision shall be prohibited from acting with respect to the same
aspect of such matter until such time as such regulation takes effect. Nothing in this chapter shall be construed to prohibit
any State or political subdivision thereof from imposing any requirements, including those for site selection, which are more
stringent than those imposed by such regulations. Nothing in this chapter (or in any regulation adopted under this chapter)
shall be construed to prohibit any State from requiring that the State be provided with a copy of each manifest used in
connection with hazardous waste which is generated within that State or transported to a treatment, storage, or disposal
facility within that State.

Editorial Notes

Amendments

1984—Pub. L. 98–616 inserted "Nothing in this chapter (or in any regulation adopted under this chapter) shall
be construed to prohibit any State from requiring that the State be provided with a copy of each manifest used in
connection with hazardous waste which is generated within that State or transported to a treatment, storage, or disposal
facility within that State."

1980—Pub. L. 96–482 prohibited construction of this chapter as barring a State from imposing more stringent
requirements than provided in Federal regulations.

§6930. Effective date

(a) Preliminary notification

Not later than ninety days after promulgation of regulations under section 6921 of this title identifying by its characteristics
or listing any substance as hazardous waste subject to this subchapter, any person generating or transporting such
substance or owning or operating a facility for treatment, storage, or disposal of such substance shall file with the
Administrator (or with States having authorized hazardous waste permit programs under section 6926 of this title) a
notification stating the location and general description of such activity and the identified or listed hazardous wastes handled by such person. Not later than fifteen months after November 8, 1984—

(1) the owner or operator of any facility which produces a fuel (A) from any hazardous waste identified or listed under
section 6921 of this title, (B) from such hazardous waste identified or listed under section 6921 of this title and any other
material, (C) from used oil, or (D) from used oil and any other material;

(2) the owner or operator of any facility (other than a single- or two-family residence) which burns for purposes of
energy recovery any fuel produced as provided in paragraph (1) or any fuel which otherwise contains used oil or any
hazardous waste identified or listed under section 6921 of this title; and

(3) any person who distributes or markets any fuel which is produced as provided in paragraph (1) or any fuel which
otherwise contains used oil or any hazardous waste identified or listed under section 6921 of this title 1

shall file with the Administrator (and with the State in the case of a State with an authorized hazardous waste program) a
notification stating the location and general description of the facility, together with a description of the identified or listed

1

hazardous waste involved and, in the case of a facility referred to in paragraph (1) or (2), a description of the production or
energy recovery activity carried out at the facility and such other information as the Administrator deems necessary. For
purposes of the preceding provisions, the term "hazardous waste listed under section 6921 of this title" also includes any
commercial chemical product which is listed under section 6921 of this title and which, in lieu of its original intended use, is
(i) produced for use as (or as a component of) a fuel, (ii) distributed for use as a fuel, or (iii) burned as a fuel. Notification
shall not be required under the second sentence of this subsection in the case of facilities (such as residential boilers) where
the Administrator determines that such notification is not necessary in order for the Administrator to obtain sufficient
information respecting current practices of facilities using hazardous waste for energy recovery. Nothing in this subsection
shall be construed to affect or impair the provisions of section 6921(b)(3) of this title. Nothing in this subsection shall affect
regulatory determinations under section 6935 of this title. In revising any regulation under section 6921 of this title identifying
additional characteristics of hazardous waste or listing any additional substance as hazardous waste subject to this
subchapter, the Administrator may require any person referred to in the preceding provisions to file with the Administrator (or
with States having authorized hazardous waste permit programs under section 6926 of this title) the notification described in
the preceding provisions. Nothing more than one such notification shall be required to be filed with respect to the same
substance. No identified or listed hazardous waste subject to this subchapter may be transported, treated, stored, or
disposed of unless notification has been given as required under this subsection.

(b) Effective date of regulation

The regulations under this subchapter respecting requirements applicable to the generation, transportation, treatment,
storage, or disposal of hazardous waste (including requirements respecting permits for such treatment, storage, or disposal)
shall take effect on the date six months after the date of promulgation thereof (or six months after the date of revision in the
case of any regulation which is revised after the date required for promulgation thereof). At the time a regulation is
promulgated, the Administrator may provide for a shorter period prior to the effective date, or an immediate effective date for:

1. a regulation with which the Administrator finds the regulated community does not need six months to come into
compliance;
2. a regulation which responds to an emergency situation; or
3. other good cause found and published with the regulation.

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (a). Pub. L. 98–616, §204(a), inserted provisions after first sentence relating to burning and
blending of hazardous wastes and substituted "the preceding provisions" for "the preceding sentence" in three
places.

Subsec. (b). Pub. L. 98–616, §234, inserted provision that at the time a regulation is promulgated, the
Administrator may provide for a shorter period prior to the effective date, or an immediate effective date for a
regulation with which the Administrator finds the regulated community does not need six months to come into
compliance, a regulation which responds to an emergency situation, or other good cause found and published with
the regulation.

1980—Subsec. (a). Pub. L. 96–482 struck out "or revision" after "after promulgation or revision of regulations"
and inserted provision for filing of notification when revising any regulation identifying additional characteristics
of hazardous waste or listing any additional substance as hazardous waste subject to this subchapter.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection
Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas
Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for
Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6931. Authorization of assistance to States

(a) Authorization of appropriations

There is authorized to be appropriated $25,000,000 for each of the fiscal years 1978 and 1979 1 $20,000,000 for fiscal
year 1980, $35,000,000 for fiscal year 1981, $40,000,000 for the fiscal year 1982, $55,000,000 for the fiscal year 1985,
$60,000,000 for the fiscal year 1986, $60,000,000 for the fiscal year 1987, and $60,000,000 for the fiscal year 1988 to be

1 So in original. Probably should be followed by a semicolon.
used to make grants to the States for purposes of assisting the States in the development and implementation of authorized State hazardous waste programs.

(b) Allocation

Amounts authorized to be appropriated under subsection (a) shall be allocated among the States on the basis of regulations promulgated by the Administrator, after consultation with the States, which take into account, the extent to which hazardous waste is generated, transported, treated, stored, and disposed of within such State, the extent of exposure of human beings and the environment within such State to such waste, and such other factors as the Administrator deems appropriate.

(c) Activities included

State hazardous waste programs for which grants may be made under subsection (a) may include (but shall not be limited to) planning for hazardous waste treatment, storage and disposal facilities, and the development and execution of programs to protect health and the environment from inactive facilities which may contain hazardous waste.

EDITORIAL NOTES

AMENDMENTS

1984—Subsec. (a). Pub. L. 96–616 substituted "$40,000,000 for fiscal year 1982, $55,000,000 for fiscal year 1985, $60,000,000 for fiscal year 1986, $60,000,000 for fiscal year 1987, and $60,000,000 for fiscal year 1988" for "and $40,000,000 for fiscal year 1982".

1980—Subsec. (a). Pub. L. 96–482, §31(b), authorized appropriation of $20,000,000, $35,000,000, and $40,000,000 for fiscal years 1980, 1981, and 1982, respectively.

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

§6932. Transferred

EDITORIAL NOTES

CODIFICATION

§6933. Hazardous waste site inventory

(a) State inventory programs

Each State shall, as expeditiously as practicable, undertake a continuing program to compile, publish, and submit to the Administrator an inventory describing the location of each site within such State at which hazardous waste has at any time been stored or disposed of. Such inventory shall contain—

1. a description of the location of the sites at which any such storage or disposal has taken place before the date on which permits are required under section 6925 of this title for such storage or disposal;

2. such information relating to the amount, nature, and toxicity of the hazardous waste at each such site as may be practicable to obtain and as may be necessary to determine the extent of any health hazard which may be associated with such site;

3. the name and address, or corporate headquarters of, the owner of each such site, determined as of the date of preparation of the inventory;
(4) an identification of the types or techniques of waste treatment or disposal which have been used at each such site; and
(5) information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.

For purposes of assisting the States in compiling information under this section, the Administrator shall make available to each State undertaking a program under this section such information as is available to him concerning the items specified in paragraphs (1) through (5) with respect to the sites within such State, including such information as the Administrator is able to obtain from other agencies or departments of the United States and from surveys and studies carried out by any committee or subcommittee of the Congress. Any State may exercise the authority of section 6927 of this title for purposes of this section in the same manner and to the same extent as provided in such section in the case of States having an authorized hazardous waste program, and any State may by order require any person to submit such information as may be necessary to compile the data referred to in paragraphs (1) through (5).

(b) Environmental Protection Agency program

If the Administrator determines that any State program under subsection (a) is not adequately providing information respecting the sites in such State referred to in subsection (a), the Administrator shall notify the State. If within ninety days following such notification, the State program has not been revised or amended in such manner as will adequately provide such information, the Administrator shall carry out the inventory program in such State. In any such case—
(1) the Administrator shall have the authorities provided with respect to State programs under subsection (a);
(2) the funds allocated under subsection (c) for grants to States under this section may be used by the Administrator for carrying out such program in such State; and
(3) no further expenditure may be made for grants to such State under this section until such time as the Administrator determines that such State is carrying out, or will carry out, an inventory program which meets the requirements of this section.

(c) Grants

(1) Upon receipt of an application submitted by any State to carry out a program under this section, the Administrator may make grants to the States for purposes of carrying out such a program. Grants under this section shall be allocated among the several States by the Administrator based upon such regulations as he prescribes to carry out the purposes of this section. The Administrator may make grants to any State which has conducted an inventory program which effectively carried out the purposes of this section before October 21, 1980, to reimburse such State for all, or any portion of, the costs incurred by such State in conducting such program.

(2) There are authorized to be appropriated to carry out this section $25,000,000 for each of the fiscal years 1985 through 1988.

(d) No impediment to immediate remedial action

Nothing in this section shall be construed to provide that the Administrator or any State should, pending completion of the inventory required under this section, postpone undertaking any enforcement or remedial action with respect to any site at which hazardous waste has been treated, stored, or disposed of.

EDITORIAL NOTES

CODIFICATION

AMENDMENTS

1984—Subsec. (c)(2). Pub. L. 98–616 substituted "$25,000,000 for each of the fiscal years 1985 through 1988" for "$20,000,000".

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

§6934. Monitoring, analysis, and testing
(a) Authority of Administrator

If the Administrator determines, upon receipt of any information, that—

(1) the presence of any hazardous waste at a facility or site at which hazardous waste is, or has been, stored, treated, or disposed of, or

(2) the release of any such waste from such facility or site

may present a substantial hazard to human health or the environment, he may issue an order requiring the owner or operator of such facility or site to conduct such monitoring, testing, analysis, and reporting with respect to such facility or site as the Administrator deems reasonable to ascertain the nature and extent of such hazard.

(b) Previous owners and operators

In the case of any facility or site not in operation at the time a determination is made under subsection (a) with respect to the facility or site, if the Administrator finds that the owner of such facility or site could not reasonably be expected to have actual knowledge of the presence of hazardous waste at such facility or site and of its potential for release, he may issue an order requiring the most recent previous owner or operator of such facility or site who could reasonably be expected to have such actual knowledge to carry out the actions referred to in subsection (a).

(c) Proposal

An order under subsection (a) or (b) shall require the person to whom such order is issued to submit to the Administrator within 30 days from the issuance of such order a proposal for carrying out the required monitoring, testing, analysis, and reporting. The Administrator may, after providing such person with an opportunity to confer with the Administrator respecting such proposal, require such person to carry out such monitoring, testing, analysis, and reporting in accordance with such proposal, and such modifications in such proposal as the Administrator deems reasonable to ascertain the nature and extent of the hazard.

(d) Monitoring, etc., carried out by Administrator

(1) If the Administrator determines that no owner or operator referred to in subsection (a) or (b) is able to conduct monitoring, testing, analysis, or reporting satisfactory to the Administrator, if the Administrator deems any such action carried out by an owner or operator to be unsatisfactory, or if the Administrator cannot initially determine that there is an owner or operator referred to in subsection (a) or (b) who is able to conduct such monitoring, testing, analysis, or reporting, he may—

(A) conduct monitoring, testing, or analysis (or any combination thereof) which he deems reasonable to ascertain the nature and extent of the hazard associated with the site concerned, or

(B) authorize a State or local authority or other person to carry out any such action,

and require, by order, the owner or operator referred to in subsection (a) or (b) to reimburse the Administrator or other authority or person for the costs of such activity.

(2) No order may be issued under this subsection requiring reimbursement of the costs of any action carried out by the Administrator which confirms the results of an order issued under subsection (a) or (b).

(3) For purposes of carrying out this subsection, the Administrator or any authority or other person authorized under paragraph (1), may exercise the authorities set forth in section 6927 of this title.

(e) Enforcement

The Administrator may commence a civil action against any person who fails or refuses to comply with any order issued under this section. Such action shall be brought in the United States district court in which the defendant is located, resides, or is doing business. Such court shall have jurisdiction to require compliance with such order and to assess a civil penalty of not to exceed $5,000 for each day during which such failure or refusal occurs.

**EXECUTIVE DOCUMENTS**

**TRANSFER OF FUNCTIONS**

For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

**§6935. Restrictions on recycled oil**

(a) In general

Not later than one year after October 15, 1980, the Administrator shall promulgate regulations establishing such performance standards and other requirements as may be necessary to protect the public health and the environment from hazards associated with recycled oil. In developing such regulations, the Administrator shall conduct an analysis of the economic impact of the regulations on the oil recycling industry. The Administrator shall ensure that such regulations do not discourage the recovery or recycling of used oil, consistent with the protection of human health and the environment.
(b) Identification or listing of used oil as hazardous waste

Not later than twelve months after November 8, 1984, the Administrator shall propose whether to list or identify used automobile and truck crankcase oil as hazardous waste under section 6921 of this title. Not later than twenty-four months after November 8, 1984, the Administrator shall make a final determination whether to list or identify used automobile and truck crankcase oil and other used oil as hazardous wastes under section 6921 of this title.

(c) Used oil which is recycled

(1) With respect to generators and transporters of used oil identified or listed as a hazardous waste under section 6921 of this title, the standards promulgated under section §6921(d), 6922, and 6923 of this title shall not apply to such used oil if such used oil is recycled.

(2)(A) In the case of used oil which is exempt under paragraph (1), not later than twenty-four months after November 8, 1984, the Administrator shall promulgate such standards under this subsection regarding the generation and transportation of used oil which is recycled as may be necessary to protect human health and the environment. In promulgating such regulations with respect to generators, the Administrator shall take into account the effect of such regulations on environmentally acceptable types of used oil recycling and the effect of such regulations on small quantity generators and generators which are small businesses (as defined by the Administrator).

(B) The regulations promulgated under this subsection shall provide that no generator of used oil which is exempt under paragraph (1) from the standards promulgated under section §6921(d), 6922, and 6923 of this title shall be subject to any manifest requirement or any associated recordkeeping and reporting requirement with respect to such used oil if such generator—

(i) either—

(I) enters into an agreement or other arrangement (including an agreement or arrangement with an independent transporter or with an agent of the recycler) for delivery of such used oil to a recycling facility which has a permit under section 6925(c) of this title (or for which a valid permit is deemed to be in effect under subsection (d)), or

(ii) recycles such used oil at one or more facilities of the generator which has such a permit under section 6925 of this title (or for which a valid permit is deemed to have been issued under subsection (d) of this section);

(ii) such used oil is not mixed by the generator with other types of hazardous wastes; and

(iii) the generator maintains such records relating to such used oil, including records of agreements or other arrangements for delivery of such used oil to any recycling facility referred to in clause (i)(I), as the Administrator deems necessary to protect human health and the environment.

(3) The regulations under this subsection regarding the transportation of used oil which is exempt from the standards promulgated under section §6921(d), 6922, and 6923 of this title under paragraph (1) shall require the transporters of such used oil to deliver such used oil to a facility which has a valid permit under section 6925 of this title which is deemed to have a valid permit under subsection (d) of this section. The Administrator shall also establish other standards for such transporters as may be necessary to protect human health and the environment.

(d) Permits

(1) The owner or operator of a facility which recycles used oil which is exempt under subsection (c)(1), shall be deemed to have a permit under this subsection for all such treatment or recycling (and any associated tank or container storage) if such owner and operator comply with standards promulgated by the Administrator under section 6924 of this title; except that the Administrator may require such owners and operators to obtain an individual permit under section 6925(c) of this title if he determines that an individual permit is necessary to protect human health and the environment.

(2) Notwithstanding any other provision of law, any generator who recycles used oil which is exempt under subsection (c) shall not be required to obtain a permit under section 6925(c) of this title with respect to such used oil until the Administrator has promulgated standards under section 6924 of this title regarding the recycling of such used oil.

EDITORIAL NOTES

Codification

Section was formerly classified to section 6932 of this title.

Amendments

1984—Subsec. (a). Pub. L. 98–616, §§241(a), 242, designated existing provisions as subsec. (a) and inserted "consistent with the protection of human health and the environment" at end.

Subsecs. (b) to (d). Pub. L. 98–616, §241(a), added subsecs. (b) to (d).

Executive Documents

Transfer of Functions
For transfer of certain enforcement functions of Administrator or other official of Environmental Protection Agency under this chapter to Federal Inspector, Office of Federal Inspector for the Alaska Natural Gas Transportation System, and subsequent transfer to Secretary of Energy, then to Federal Coordinator for Alaska Natural Gas Transportation Projects, see note set out under section 6903 of this title.

1 So in original. Probably should be "sections".

§6936. Expansion during interim status

(a) Waste piles

The owner or operator of a waste pile qualifying for the authorization to operate under section 6925(e) of this title shall be subject to the same requirements for liners and leachate collection systems or equivalent protection provided in regulations promulgated by the Administrator under section 6924 of this title before October 1, 1982, or revised under section 6924(o) of this title (relating to minimum technological requirements), for new facilities receiving individual permits under subsection (c) of section 6925 of this title, with respect to each new unit, replacement of an existing unit, or lateral expansion of an existing unit that is within the waste management area identified in the permit application submitted under section 6925 of this title, and with respect to waste received beginning six months after November 8, 1984.

(b) Landfills and surface impoundments

(1) The owner or operator of a landfill or surface impoundment qualifying for the authorization to operate under section 6925(e) of this title shall be subject to the requirements of section 6924(o) of this title (relating to minimum technological requirements), with respect to each new unit, replacement of an existing unit, or lateral expansion of an existing unit that is within the waste management area identified in the permit application submitted under this section, and with respect to waste received beginning 6 months after November 8, 1984.

(2) The owner or operator of each unit referred to in paragraph (1) shall notify the Administrator (or the State, if appropriate) at least sixty days prior to receiving waste. The Administrator (or the State) shall require the filing, within six months of receipt of such notice, of an application for a final determination regarding the issuance of a permit for each facility submitting such notice.

(3) In the case of any unit in which the liner and leachate collection system has been installed pursuant to the requirements of this section and in good faith compliance with the Administrator's regulations and guidance documents governing liners and leachate collection systems, no liner or leachate collection system which is different from that which was so installed pursuant to this section shall be required for such unit by the Administrator when issuing the first permit under section 6925 of this title to such facility, except that the Administrator shall not be precluded from requiring installation of a new liner when the Administrator has reason to believe that any liner installed pursuant to the requirements of this section is leaking. The Administrator may, under section 6924 of this title, amend the requirements for liners and leachate collection systems required under this section as may be necessary to provide additional protection for human health and the environment.

§6937. Inventory of Federal agency hazardous waste facilities

(a) Program requirement; submission; availability; contents

Each Federal agency shall undertake a continuing program to compile, publish, and submit to the Administrator (and to the State in the case of sites in States having an authorized hazardous waste program) an inventory of each site which the Federal agency owns or operates or has owned or operated at which hazardous waste is stored, treated, or disposed of or has been disposed of at any time. The inventory shall be submitted every two years beginning January 31, 1986. Such inventory shall be available to the public as provided in section 6927(b) of this title. Information previously submitted by a Federal agency under section 9603 of this title, or under section 6925 or 6930 of this title, or under this section need not be resubmitted except that the agency shall update any previous submission to reflect the latest available data and information. The inventory shall include each of the following:

(1) A description of the location of each site at which any such treatment, storage, or disposal has taken place before the date on which permits are required under section 6925 of this title for such storage, treatment, or disposal, and where hazardous waste has been disposed, a description of hydrogeology of the site and the location of withdrawal wells and surface water within one mile of the site.

(2) Such information relating to the amount, nature, and toxicity of the hazardous waste in each site as may be necessary to determine the extent of any health hazard which may be associated with any site.

(3) Information on the known nature and extent of environmental contamination at each site, including a description of the monitoring data obtained.

(4) Information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated, stored, or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.

(5) A list of sites at which hazardous waste has been disposed and environmental monitoring data has not been obtained, and the reasons for the lack of monitoring data at each site.

(6) A description of response actions undertaken or contemplated at contaminated sites.
(7) An identification of the types of techniques of waste treatment, storage, or disposal which have been used at each site.

(8) The name and address and responsible Federal agency for each site, determined as of the date of preparation of the inventory.

(b) Environmental Protection Agency program

If the Administrator determines that any Federal agency under subsection (a) is not adequately providing information respecting the sites referred to in subsection (a), the Administrator shall notify the chief official of such agency. If within ninety days following such notification, the Federal agency has not undertaken a program to adequately provide such information, the Administrator shall carry out the inventory program for such agency.

§6938. Export of hazardous wastes

(a) In general

Beginning twenty-four months after November 8, 1984, no person shall export any hazardous waste identified or listed under this subchapter unless 1

1(A) such person has provided the notification required in subsection (c) of this section,
(B) the government of the receiving country has consented to accept such hazardous waste,
(C) a copy of the receiving country’s written consent is attached to the manifest accompanying each waste shipment, and
(D) the shipment conforms with the terms of the consent of the government of the receiving country required pursuant to subsection (e), or
(2) the United States and the government of the receiving country have entered into an agreement as provided for in subsection (f) and the shipment conforms with the terms of such agreement.

(b) Regulations

Not later than twelve months after November 8, 1984, the Administrator shall promulgate the regulations necessary to implement this section. Such regulations shall become effective one hundred and eighty days after promulgation.

(c) Notification

Any person who intends to export a hazardous waste identified or listed under this subchapter beginning twelve months after November 8, 1984, shall, before such hazardous waste is scheduled to leave the United States, provide notification to the Administrator. Such notification shall contain the following information:

(1) the name and address of the exporter;
(2) the types and estimated quantities of hazardous waste to be exported;
(3) the estimated frequency or rate at which such waste is to be exported; and the period of time over which such waste is to be exported;
(4) the ports of entry;
(5) a description of the manner in which such hazardous waste will be transported to and treated, stored, or disposed in the receiving country; and
(6) the name and address of the ultimate treatment, storage or disposal facility.

(d) Procedures for requesting consent of receiving country

Within thirty days of the Administrator's receipt of a complete notification under this section, the Secretary of State, acting on behalf of the Administrator, shall—

(1) forward a copy of the notification to the government of the receiving country;
(2) advise the government that United States law prohibits the export of hazardous waste unless the receiving country consents to accept the hazardous waste;
(3) request the government to provide the Secretary with a written consent or objection to the terms of the notification; and
(4) forward to the government of the receiving country a description of the Federal regulations which would apply to the treatment, storage, and disposal of the hazardous waste in the United States.

(e) Conveyance of written consent to exporter

Within thirty days of receipt by the Secretary of State of the receiving country’s written consent or objection (or any subsequent communication withdrawing a prior consent or objection), the Administrator shall forward such a consent, objection, or other communication to the exporter.

(f) International agreements

Where there exists an international agreement between the United States and the government of the receiving country establishing notice, export, and enforcement procedures for the transportation, treatment, storage, and disposal of hazardous wastes, only the requirements of subsections (a)(2) and (g) shall apply.

(g) Reports

After November 8, 1984, any person who exports any hazardous waste identified or listed under section 6921 of this title shall file with the Administrator no later than March 1 of each year, a report summarizing the types, quantities, frequency, and ultimate destination of all such hazardous waste exported during the previous calendar year.
(h) Other standards

Nothing in this section shall preclude the Administrator from establishing other standards for the export of hazardous wastes under section 6922 of this title or section 6923 of this title.

1 So in original. Probably should be followed by a dash.

§6939. Domestic sewage

(a) Report

The Administrator shall, not later than 15 months after November 8, 1984, submit a report to the Congress concerning those substances identified or listed under section 6921 of this title which are not regulated under this subchapter by reason of the exclusion for mixtures of domestic sewage and other wastes that pass through a sewer system to a publicly owned treatment works. Such report shall include the types, size and number of generators which dispose of such substances in this manner, the types and quantities disposed of in this manner, and the identification of significant generators, wastes, and waste constituents not regulated under existing Federal law or regulated in a manner sufficient to protect human health and the environment.

(b) Revisions of regulations

Within eighteen months after submitting the report specified in subsection (a), the Administrator shall revise existing regulations and promulgate such additional regulations pursuant to this subchapter (or any other authority of the Administrator, including section 1317 of title 33) as are necessary to assure that substances identified or listed under section 6921 of this title which pass through a sewer system to a publicly owned treatment works are adequately controlled to protect human health and the environment.

(c) Report on wastewater lagoons

The Administrator shall, within thirty-six months after November 8, 1984, submit a report to Congress concerning wastewater lagoons at publicly owned treatment works and their effect on groundwater quality. Such report shall include—

1 the number and size of such lagoons;
2 the types and quantities of waste contained in such lagoons;
3 the extent to which such waste has been or may be released from such lagoons and contaminate ground water; and
4 available alternatives for preventing or controlling such releases.

The Administrator may utilize the authority of sections 6927 and 6934 of this title for the purpose of completing such report.

(d) Application of sections 6927 and 6930

The provisions of sections 6927 and 6930 of this title shall apply to solid or dissolved materials in domestic sewage to the same extent and in the same manner as such provisions apply to hazardous waste.

§6939a. Exposure information and health assessments

(a) Exposure information

Beginning on the date nine months after November 8, 1984, each application for a final determination regarding a permit under section 6925(c) of this title for a landfill or surface impoundment shall be accompanied by information reasonably ascertainable by the owner or operator on the potential for the public to be exposed to hazardous wastes or hazardous constituents through releases related to the unit. At a minimum, such information must address:

1 reasonably foreseeable potential releases from both normal operations and accidents at the unit, including releases associated with transportation to or from the unit;
2 the potential pathways of human exposure to hazardous wastes or constituents resulting from the releases described under paragraph (1); and
3 the potential magnitude and nature of the human exposure resulting from such releases.

The owner or operator of a landfill or surface impoundment for which an application for such a final determination under section 6925(c) of this title has been submitted prior to November 8, 1984, shall submit the information required by this subsection to the Administrator (or the State, in the case of a State with an authorized program) no later than the date nine months after November 8, 1984.

(b) Health assessments

1 The Administrator (or the State, in the case of a State with an authorized program) shall make the information required by subsection (a), together with other relevant information, available to the Agency for Toxic Substances and Disease Registry established by section 9604(i) of this title.
(2) Whenever in the judgment of the Administrator, or the State (in the case of a State with an authorized program), a landfill or a surface impoundment poses a substantial potential risk to human health, due to the existence of releases of hazardous constituents, the magnitude of contamination with hazardous constituents which may be the result of a release, or the magnitude of the population exposed to such release or contamination, the Administrator or the State (with the concurrence of the Administrator) may request the Administrator of the Agency for Toxic Substances and Disease Registry to conduct a health assessment in connection with such facility and take other appropriate action with respect to such risks as authorized by section 9604(b) and (i) of this title. If funds are provided in connection with such request the Administrator of such Agency shall conduct such health assessment.

(c) Members of the public

Any member of the public may submit evidence of releases of or exposure to hazardous constituents from such a facility, or as to the risks or health effects associated with such releases or exposure, to the Administrator of the Agency for Toxic Substances and Disease Registry, the Administrator, or the State (in the case of a State with an authorized program).

(d) Priority

In determining the order in which to conduct health assessments under this subsection, the Administrator of the Agency for Toxic Substances and Disease Registry shall give priority to those facilities or sites at which there is documented evidence of release of hazardous constituents, at which the potential risk to human health appears highest, and for which in the judgment of the Administrator of such Agency existing health assessment data is inadequate to assess the potential risk to human health as provided in subsection (f).

(e) Periodic reports

The Administrator of such Agency shall issue periodic reports which include the results of all the assessments carried out under this section. Such assessments or other activities shall be reported after appropriate peer review.

(f) "Health assessments" defined

For the purposes of this section, the term "health assessments" shall include preliminary assessments of the potential risk to human health posed by individual sites and facilities subject to this section, based on such factors as the nature and extent of contamination, the existence of potential for pathways of human exposure (including ground or surface water contamination, air emissions, and food chain contamination), the size and potential susceptibility of the community within the likely pathways of exposure, the comparison of expected human exposure levels to the short-term and long-term health effects associated with identified contaminants and any available recommended exposure or tolerance limits for such contaminants, and the comparison of existing morbidity and mortality data on diseases that may be associated with the observed levels of exposure. The assessment shall include an evaluation of the risks to the potentially affected population from all sources of such contaminants, including known point or nonpoint sources other than the site or facility in question. A purpose of such preliminary assessments shall be to help determine whether full-scale health or epidemiological studies and medical evaluations of exposed populations shall be undertaken.

(g) Cost recovery

In any case in which a health assessment performed under this section discloses the exposure of a population to the release of a hazardous substance, the costs of such health assessment may be recovered as a cost of response under section 9607 of this title from persons causing or contributing to such release of such hazardous substance or, in the case of multiple releases contributing to such exposure, to all such release.

§6939b. Interim control of hazardous waste injection

(a) Underground source of drinking water

No hazardous waste may be disposed of by underground injection—

(1) into a formation which contains (within one-quarter mile of the well used for such underground injection) an underground source of drinking water; or

(2) above such a formation.

The prohibitions established under this section shall take effect 6 months after November 8, 1984, except in the case of any State in which identical or more stringent prohibitions are in effect before such date under the Safe Drinking Water Act [42 U.S.C. 300f et seq.].

(b) Actions under Comprehensive Environmental Response, Compensation, and Liability Act

Subsection (a) shall not apply to the injection of contaminated ground water into the aquifer from which it was withdrawn, if—

(1) such injection is—

(A) a response action taken under section 9604 or 9606 of this title, or

(B) part of corrective action required under this chapter 1

intended to clean up such contamination;

(2) such contaminated ground water is treated to substantially reduce hazardous constituents prior to such injection; and
(3) such response action or corrective action will, upon completion, be sufficient to protect human health and the environment.

(c) Enforcement

In addition to enforcement under the provisions of this chapter, the prohibitions established under paragraphs (1) and (2) of subsection (a) shall be enforceable under the Safe Drinking Water Act [42 U.S.C. 300f et seq.] in any State—

(1) which has adopted identical or more stringent prohibitions under part C of the Safe Drinking Water Act [42 U.S.C. 300h et seq.] and which has assumed primary enforcement responsibility under that Act for enforcement of such prohibitions; or

(2) in which the Administrator has adopted identical or more stringent prohibitions under the Safe Drinking Water Act [42 U.S.C. 300f et seq.] and is exercising primary enforcement responsibility under that Act for enforcement of such prohibitions.

(d) Definitions

The terms "primary enforcement responsibility", "underground source of drinking water", "formation" and "well" have the same meanings as provided in regulations of the Administrator under the Safe Drinking Water Act [42 U.S.C. 300f et seq.]. The term "Safe Drinking Water Act" means title XIV of the Public Health Service Act.

EDITORIAL NOTES

REFERENCES IN TEXT

Title XIV of the Public Health Service Act, referred to in subsec. (d), is title XIV of act July 1, 1944, as added Dec. 16, 1974, Pub. L. 93–523, §2(a), 88 Stat. 1660, as amended, known as the Safe Drinking Water Act, which is classified generally to subchapter XII (§300f et seq.) of chapter 6A of this title. Part C of the Act is classified generally to part C (§300h et seq.) of subchapter XII of chapter 6A of this title. For complete classification of this Act to the Code, see Short Title note set out under section 201 of this title and Tables.

CODIFICATION

Section was formerly classified to section 6979a of this title, prior to renumbering by Pub. L. 99–339.

AMENDMENTS

1986—Subsec. (c). Pub. L. 99–339, §201(c)(1), substituted "enforcement under the provisions of this chapter" for "enforcement under sections 6972 and 6973 of this title".

1 So in original. Probably should be followed by a comma.

§6939c. Mixed waste inventory reports and plan

(a) Mixed waste inventory reports

(1) Requirement

Not later than 180 days after October 6, 1992, the Secretary of Energy shall submit to the Administrator and to the Governor of each State in which the Department of Energy stores or generates mixed wastes the following reports:

(A) A report containing a national inventory of all such mixed wastes, regardless of the time they were generated, on a State-by-State basis.

(B) A report containing a national inventory of mixed waste treatment capacities and technologies.

(2) Inventory of wastes

The report required by paragraph (1)(A) shall include the following:

(A) A description of each type of mixed waste at each Department of Energy facility in each State, including, at a minimum, the name of the waste stream.

(B) The amount of each type of mixed waste currently stored at each Department of Energy facility in each State, set forth separately by mixed waste that is subject to the land disposal prohibition requirements of section 6924 of this title and mixed waste that is not subject to such prohibition requirements.

(C) An estimate of the amount of each type of mixed waste the Department expects to generate in the next 5 years at each Department of Energy facility in each State.

(D) A description of any waste minimization actions the Department has implemented at each Department of Energy facility in each State for each mixed waste stream.

(E) The EPA hazardous waste code for each type of mixed waste containing waste that has been characterized at each Department of Energy facility in each State.

(F) An inventory of each type of waste that has not been characterized by sampling and analysis at each Department of Energy facility in each State.
(G) The basis for the Department’s determination of the applicable hazardous waste code for each type of mixed waste at each Department of Energy facility and a description of whether the determination is based on sampling and analysis conducted on the waste or on the basis of process knowledge.

(H) A description of the source of each type of mixed waste at each Department of Energy facility in each State.

(I) The land disposal prohibition treatment technology or technologies specified for the hazardous waste component of each type of mixed waste at each Department of Energy facility in each State.

(J) A statement of whether and how the radionuclide content of the waste alters or affects use of the technologies described in subparagraph (I).

(3) Inventory of treatment capacities and technologies

The report required by paragraph (1)(B) shall include the following:

(A) An estimate of the available treatment capacity for each waste described in the report required by paragraph (1) for which treatment technologies exist.

(B) A description, including the capacity, number and location, of each treatment unit considered in calculating the estimate under subparagraph (A).

(C) A description, including the capacity, number and location, of any existing treatment unit that was not considered in calculating the estimate under subparagraph (A) but that could, alone or in conjunction with other treatment units, be used to treat any of the wastes described in the report required by paragraph (1)(A) to meet the requirements of regulations promulgated pursuant to section 6924(m) of this title.

(D) For each unit listed in subparagraph (C), a statement of the reasons why the unit was not included in calculating the estimate under subparagraph (A).

(E) A description, including the capacity, number, location, and estimated date of availability, of each treatment unit currently proposed to increase the treatment capacities estimated under subparagraph (A).

(F) For each waste described in the report required by paragraph (1)(A) for which the Department has determined no treatment technology exists, information sufficient to support such determination and a description of the technological approaches the Department anticipates will need to be developed to treat the waste.

(4) Comments and revisions

Not later than 90 days after the date of the submission of the reports by the Secretary of Energy under paragraph (1), the Administrator and each State which received the reports shall submit any comments they may have concerning the reports to the Department of Energy. The Secretary of Energy shall consider and publish the comments prior to publication of the final report.

(5) Requests for additional information

Nothing in this subsection limits or restricts the authority of States or the Administrator to request additional information from the Secretary of Energy.

(b) Plan for development of treatment capacities and technologies

(1) Plan requirement

(A)(i) For each facility at which the Department of Energy generates or stores mixed wastes, except any facility subject to a permit, agreement, or order described in clause (ii), the Secretary of Energy shall develop and submit, as provided in paragraph (2), a plan for developing treatment capacities and technologies to treat all of the facility’s mixed wastes, regardless of the time they were generated, to the standards promulgated pursuant to section 6924(m) of this title.

(ii) Clause (i) shall not apply with respect to any facility subject to any permit establishing a schedule for treatment of such wastes, or any existing agreement or administrative or judicial order governing the treatment of such wastes, to which the State is a party.

(B) Each plan shall contain the following:

(i) For mixed wastes for which treatment technologies exist, a schedule for submitting all applicable permit applications, entering into contracts, initiating construction, conducting systems testing, commencing operations, and processing backlogged and currently generated mixed wastes.

(ii) For mixed wastes for which no treatment technologies exist, a schedule for identifying and developing such technologies, identifying the funding requirements for the identification and development of such technologies, submitting treatability study exemptions, and submitting research and development permit applications.

(iii) For all cases where the Department proposes radionuclide separation of mixed wastes, or materials derived from mixed wastes, it shall provide an estimate of the volume of waste generated by each case of radionuclide separation, the volume of waste that would exist or be generated without radionuclide separation, the estimated costs of waste treatment and disposal if radionuclide separation is used compared to the estimated costs if it is not used, and the assumptions underlying such waste volume and cost estimates.

(C) A plan required under this subsection may provide for centralized, regional, or on-site treatment of mixed wastes, or any combination thereof.

(2) Review and approval of plan

(A) For each facility that is located in a State (i) with authority under State law to prohibit land disposal of mixed waste until the waste has been treated and (ii) with both authority under State law to regulate the hazardous components of mixed waste and authorization from the Environmental Protection Agency under section 6926 of this title to regulate the hazardous components of mixed waste, the Secretary of Energy shall submit the plan required under paragraph (1) to the appropriate State regulatory officials for their review and approval, modification, or disapproval. In reviewing the plan, the State shall consider the need for regional treatment facilities. The State shall consult with the Administrator and any other
State in which a facility affected by the plan is located and consider public comments in making its determination on the plan. The State shall approve, approve with modifications, or disapprove the plan within 6 months after receipt of the plan.

(B) For each facility located in a State that does not have the authority described in subparagraph (A), the Secretary shall submit the plan required under paragraph (1) to the Administrator of the Environmental Protection Agency for review and approval, modification, or disapproval. A copy of the plan also shall be provided by the Secretary to the State in which such facility is located. In reviewing the plan, the Administrator shall consider the need for regional treatment facilities. The Administrator shall consult with the State or States in which any facility affected by the plan is located and consider public comments in making a determination on the plan. The Administrator shall approve, approve with modifications, or disapprove the plan within 6 months after receipt of the plan.

(C) Upon the approval of a plan under this paragraph by the Administrator or a State, the Administrator shall issue an order under section 6928(a) of this title, or the State shall issue an order under appropriate State authority, requiring compliance with the approved plan.

(3) Public participation

Upon submission of a plan by the Secretary of Energy to the Administrator or a State, and before approval of the plan by the Administrator or a State, the Administrator or State shall publish a notice of the availability of the submitted plan and make such submitted plan available to the public on request.

(4) Revisions of plan

If any revisions of an approved plan are proposed by the Secretary of Energy or required by the Administrator or a State, the provisions of paragraphs (2) and (3) shall apply to the revisions in the same manner as they apply to the original plan.

(5) Waiver of plan requirement

(A) A State may waive the requirement for the Secretary of Energy to develop and submit a plan under this subsection for a facility located in the State if the State (i) enters into an agreement with the Secretary of Energy that addresses compliance at that facility with section 6924(j) of this title with respect to mixed waste, and (ii) issues an order requiring compliance with such agreement and which is in effect.

(B) Any violation of an agreement or order referred to in subparagraph (A) is subject to the waiver of sovereign immunity contained in section 6961(a) of this title.

(c) Schedule and progress reports

(1) Schedule

Not later than 6 months after October 6, 1992, the Secretary of Energy shall publish in the Federal Register a schedule for submitting the plans required under subsection (b).

(2) Progress reports

(A) Not later than the deadlines specified in subparagraph (B), the Secretary of Energy shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a progress report containing the following:

(i) An identification, by facility, of the plans that have been submitted to States or the Administrator of the Environmental Protection Agency pursuant to subsection (b).

(ii) The status of State and Environmental Protection Agency review and approval of each such plan.

(iii) The number of orders requiring compliance with such plans that are in effect.

(iv) For the first 2 reports required under this paragraph, an identification of the plans required under such subsection (b) that the Secretary expects to submit in the 12-month period following submission of the report.

(B) The Secretary of Energy shall submit a report under subparagraph (A) not later than 12 months after October 6, 1992, 24 months after October 6, 1992, and 36 months after October 6, 1992.

STATUTORY NOTES AND RELATED SUBSIDIARIES

CHANGE OF NAME

GAO REPORT

Pub. L. 102–386, title I, §105(c), Oct. 6, 1992, 106 Stat. 1512, provided that not later than 18 months after Oct. 6, 1992, the Comptroller General would submit to Congress a report, containing certain specified data, on the Department of Energy's progress in complying with subsec. (b) of this section.
§6939d. Public vessels

(a) Waste generated on public vessels
Any hazardous waste generated on a public vessel shall not be subject to the storage, manifest, inspection, or recordkeeping requirements of this chapter until such waste is transferred to a shore facility, unless—
(1) the waste is stored on the public vessel for more than 90 days after the public vessel is placed in reserve or is otherwise no longer in service; or
(2) the waste is transferred to another public vessel within the territorial waters of the United States and is stored on such vessel or another public vessel for more than 90 days after the date of transfer.

(b) Computation of storage period
For purposes of subsection (a), the 90-day period begins on the earlier of—
(1) the date on which the public vessel on which the waste was generated is placed in reserve or is otherwise no longer in service; or
(2) the date on which the waste is transferred from the public vessel on which the waste was generated to another public vessel within the territorial waters of the United States;

and continues, without interruption, as long as the waste is stored on the original public vessel (if in reserve or not in service) or another public vessel.

(c) Definitions
For purposes of this section:
(1) The term "public vessel" means a vessel owned or bareboat chartered and operated by the United States, or by a foreign nation, except when the vessel is engaged in commerce.
(2) The terms "in reserve" and "in service" have the meanings applicable to those terms under section 8663 and sections 8674 through 8678 of title 10 and regulations prescribed under those sections.

(d) Relationship to other law
Nothing in this section shall be construed as altering or otherwise affecting the provisions of section 8681 of title 10.

EDITORIAL NOTES

AMENDMENTS
2018—Subsec. (c)(2). Pub. L. 115–232, §809(n)(2)(A), substituted "section 8663 and sections 8674 through 8678 of title 10" for "section 7293 and sections 7304 through 7308 of title 10".
Subsec. (d). Pub. L. 115–232, §809(n)(2)(B), substituted "section 8681 of title 10" for "section 7311 of title 10".

STATUTORY NOTES AND RELATED SUBSIDIARIES

EFFECTIVE DATE OF 2018 AMENDMENT
Amendment by Pub. L. 115–232 effective Feb. 1, 2019, with provision for the coordination of amendments and special rule for certain redesignations, see section 800 of Pub. L. 115–232, set out as a note preceding section 3001 of Title 10, Armed Forces.

§6939e. Federally owned treatment works

(a) In general
For purposes of section 6903(27) of this title, the phrase "but does not include solid or dissolved material in domestic sewage" shall apply to any solid or dissolved material introduced by a source into a federally owned treatment works if—
(1) such solid or dissolved material is subject to a pretreatment standard under section 1317 of title 33, and the source is in compliance with such standard;
(2) for a solid or dissolved material for which a pretreatment standard has not been promulgated pursuant to section 1317 of title 33, the Administrator has promulgated a schedule for establishing such a pretreatment standard which would be applicable to such solid or dissolved material not later than 7 years after October 6, 1992, such standard is promulgated on or before the date established in the schedule, and after the effective date of such standard the source is in compliance with such standard;
(3) such solid or dissolved material is not covered by paragraph (1) or (2) and is not prohibited from land disposal under subsections 1 (d), (e), (f), or (g) of section 6924 of this title because such material has been treated in accordance with section 6924(m) of this title; or
(4) notwithstanding paragraphs 1 (1), (2), or (3), such solid or dissolved material is generated by a household or person which generates less than 100 kilograms of hazardous waste per month unless such solid or dissolved material would otherwise be an acutely hazardous waste and subject to standards, regulations, or other requirements under this chapter notwithstanding the quantity generated.

(b) Prohibition
It is unlawful to introduce into a federally owned treatment works any pollutant that is a hazardous waste.

(c) Enforcement
(1) Actions taken to enforce this section shall not require closure of a treatment works if the hazardous waste is removed or decontaminated and such removal or decontamination is adequate, in the discretion of the Administrator or, in the case of an authorized State, of the State, to protect human health and the environment.

(2) Nothing in this subsection shall be construed to prevent the Administrator or an authorized State from ordering the closure of a treatment works if the Administrator or State determines such closure is necessary for protection of human health and the environment.

(3) Nothing in this subsection shall be construed to affect any other enforcement authorities available to the Administrator or a State under this subchapter.

d) "Federally owned treatment works" defined
For purposes of this section, the term "federally owned treatment works" means a facility that is owned and operated by a department, agency, or instrumentality of the Federal Government treating wastewater, a majority of which is domestic sewage, prior to discharge in accordance with a permit issued under section 1342 of title 33.

(e) Savings clause
Nothing in this section shall be construed as affecting any agreement, permit, or administrative or judicial order, or any condition or requirement contained in such an agreement, permit, or order, that is in existence on October 6, 1992, and that requires corrective action or closure at a federally owned treatment works or solid waste management unit or facility related to such a treatment works.

§6939f. Long-term storage

(a) Designation of facility
(1) In general
Not later than January 1, 2010, the Secretary of Energy (referred to in this section as the "Secretary") shall designate a facility or facilities of the Department of Energy, which shall not include the Y–12 National Security Complex or any other portion or facility of the Oak Ridge Reservation of the Department of Energy, for the purpose of long-term management and storage of elemental mercury generated within the United States.

(2) Operation of facility
Not later than January 1, 2019, the facility designated in paragraph (1) shall be operational and shall accept custody, for the purpose of long-term management and storage, of elemental mercury generated within the United States and delivered to such facility.

(b) Fees
(1) In general

(A) Assessment and collection
After consultation with persons who are likely to deliver elemental mercury to a designated facility for long-term management and storage under the program prescribed in subsection (a), and with other interested persons, the Secretary shall assess and collect a fee at the time of delivery for providing such management and storage, based on the pro rata cost of long-term management and storage of elemental mercury delivered to the facility.

(B) Amount
The amount of the fees described in subparagraph (A)—
(i) shall be made publicly available not later than October 1, 2018;
(ii) may be adjusted annually;
(iii) shall be set in an amount sufficient to cover the costs described in paragraph (2), subject to clause (iv); and
(iv) for generators temporarily accumulating elemental mercury in a facility subject to subparagraphs (B) and (D)(iv) of subsection (g)(2) if the facility designated in subsection (a) is not operational by January 1, 2019, shall be adjusted to subtract the cost of the temporary accumulation during the period in which the facility designated under subsection (a) is not operational.

(C) Conveyance of title and permitting
If the facility designated in subsection (a) is not operational by January 1, 2020, the Secretary—
(i) shall immediately accept the conveyance of title to all elemental mercury that has accumulated in facilities in accordance with subsection (g)(2)(D), before January 1, 2020, and deliver the accumulated mercury to the facility designated under subsection (a) on the date on which the facility becomes operational;
(ii) shall pay any applicable Federal permitting costs, including the costs for permits issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)); and
(iii) shall store, or pay the cost of storage of, until the time at which a facility designated in subsection (a) is operational, accumulated mercury to which the Secretary has title under this subparagraph in a facility that has been issued a permit under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)).

(2) Costs
The costs referred to in paragraph (1)(B)(iii) are the costs to the Department of Energy of providing such management and storage, including facility operation and maintenance, security, monitoring, reporting, personnel, administration, inspections, training, fire suppression, closure, and other costs required for compliance with applicable law. Such costs shall not include costs associated with land acquisition or permitting of a designated facility under the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.] or other applicable law. Building design and building construction costs shall only be included to the extent that the Secretary finds that the management and storage of elemental mercury accepted under the program under this section cannot be accomplished without construction of a new building or buildings.

(c) Report
Not later than 60 days after the end of each Federal fiscal year, the Secretary shall transmit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on all of the costs incurred in the previous fiscal year associated with the long-term management and storage of elemental mercury. Such report shall set forth separately the costs associated with activities taken under this section.

(d) Management standards for a facility

(1) Guidance
Not later than October 1, 2009, the Secretary, after consultation with the Administrator of the Environmental Protection Agency and all appropriate State agencies in affected States, shall make available, including to potential users of the long-term management and storage program established under subsection (a), guidance that establishes procedures and standards for the receipt, management, and long-term storage of elemental mercury at a designated facility or facilities, including requirements to ensure appropriate use of flasks or other suitable shipping containers. Such procedures and standards shall be protective of human health and the environment and shall ensure that the elemental mercury is stored in a safe, secure, and effective manner. In addition to such procedures and standards, elemental mercury managed and stored under this section at a designated facility shall be subject to the requirements of the Solid Waste Disposal Act [42 U.S.C. 6901 et seq.], including the requirements of subtitle C of that Act [42 U.S.C. 6921 et seq.], except as provided in subsection (g)(2) of this section. A designated facility is authorized to operate under interim status pursuant to section 3005(e) of the Solid Waste Disposal Act [42 U.S.C. 6921 et seq.] until a final decision on a permit application is made pursuant to section 3005(c) of the Solid Waste Disposal Act [42 U.S.C. 6925(c)]. Not later than January 1, 2020, the Administrator of the Environmental Protection Agency (or an authorized State) shall issue a final decision on the permit application.

(2) Training
The Secretary shall conduct operational training and emergency training for all staff that have responsibilities related to elemental mercury management, transfer, storage, monitoring, or response.

(3) Equipment
The Secretary shall ensure that each designated facility has all equipment necessary for routine operations, emergencies, monitoring, checking inventory, loading, and storing elemental mercury at the facility.

(4) Fire detection and suppression systems
The Secretary shall—
(A) ensure the installation of fire detection systems at each designated facility, including smoke detectors and heat detectors; and
(B) ensure the installation of a permanent fire suppression system, unless the Secretary determines that a permanent fire suppression system is not necessary to protect human health and the environment.

(e) Indemnification of persons delivering elemental mercury

(1) In general
(A) Except as provided in subparagraph (B) and subject to paragraph (2), the Secretary shall hold harmless, defend, and indemnify in full any person who delivers elemental mercury to a designated facility under the program established under subsection (a) from and against any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage (including death, illness, or loss of or damage to property or economic loss) that results from, or is in any manner predicated upon, the release or threatened release of elemental mercury as a result of acts or omissions occurring after such mercury is delivered to a designated facility described in subsection (a).
(B) To the extent that a person described in subparagraph (A) contributed to any such release or threatened release, subparagraph (A) shall not apply.

(2) Conditions
No indemnification may be afforded under this subsection unless the person seeking indemnification—
(A) notifies the Secretary in writing within 30 days after receiving written notice of the claim for which indemnification is sought;
(B) furnishes to the Secretary copies of pertinent papers the person receives;
(C) furnishes evidence or proof of any claim, loss, or damage covered by this subsection; and
(D) provides, upon request by the Secretary, access to the records and personnel of the person for purposes of defending or settling the claim or action.

(3) Authority of Secretary

(A) In any case in which the Secretary determines that the Department of Energy may be required to make indemnification payments to a person under this subsection for any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage referred to in paragraph (1)(A), the Secretary may settle or defend, on behalf of that person, the claim for personal injury or property damage.

(B) In any case described in subparagraph (A), if the person to whom the Department of Energy may be required to make indemnification payments does not allow the Secretary to settle or defend the claim, the person may not be afforded indemnification with respect to that claim under this subsection.

(f) Terms, conditions, and procedures

The Secretary is authorized to establish such terms, conditions, and procedures as are necessary to carry out this section.

(g) Effect on other law

(1) In general

Except as provided in paragraph (2), nothing in this section changes or affects any Federal, State, or local law or the obligation of any person to comply with such law.

(2) Exception

(A) Elemental mercury that the Secretary is storing on a long-term basis shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)). For the purposes of section 3004(j) of the Solid Waste Disposal Act, a generator accumulating elemental mercury destined for a facility designated by the Secretary under subsection (a) for 90 days or less shall be deemed to be accumulating the mercury to facilitate proper treatment, recovery, or disposal.

(B) Elemental mercury may be stored at a facility with respect to which any permit has been issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)), and shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)) if—

(i) the Secretary is unable to accept the mercury at a facility designated by the Secretary under subsection (a) for reasons beyond the control of the owner or operator of the permitted facility;

(ii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will ship the mercury to the designated facility when the Secretary is able to accept the mercury; and

(iii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will not sell, or otherwise place into commerce, the mercury.

(C) Subparagraph (B) shall not apply to mercury with respect to which the owner or operator of the permitted facility fails to comply with a certification provided under clause (ii) or (iii) of that subparagraph.

(D) A generator producing elemental mercury incidentally from the beneficiation or processing of ore or related pollution control activities may accumulate the mercury produced onsite that is destined for a facility designated by the Secretary under subsection (a) for more than 90 days without a permit issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)), and shall not be subject to the storage prohibition of section 3004(j) of that Act (42 U.S.C. 6924(j)), if—

(i) the Secretary is unable to accept the mercury at a facility designated by the Secretary under subsection (a) for reasons beyond the control of the generator;

(ii) the generator certifies in writing to the Secretary that the generator will ship the mercury to a designated facility when the Secretary is able to accept the mercury;

(iii) the generator certifies in writing to the Secretary that the generator is storing only mercury the generator has produced or recovered onsite and will not sell, or otherwise place into commerce, the mercury; and

(iv) the generator has obtained an identification number under section 262.12 of title 40, Code of Federal Regulations, and complies with the requirements described in paragraphs (1) through (4) of section 262.34(a) of title 40, Code of Federal Regulations (as in effect on the date of enactment of this subparagraph).

(E) Management standards for temporary storage.—Not later than January 1, 2017, the Secretary, after consultation with the Administrator of the Environmental Protection Agency and State agencies in affected States, shall develop and make available guidance that establishes procedures and standards for the management and short-term storage of elemental mercury at a generator covered under subparagraph (D), including requirements to ensure appropriate use of flasks or other suitable containers. Such procedures and standards shall be protective of health and the environment and shall ensure that the elemental mercury is stored in a safe, secure, and effective manner. A generator may accumulate mercury in accordance with subparagraph (D) immediately upon enactment of this subparagraph, and notwithstanding that guidance called for by this paragraph has not been developed or made available.

(h) Study
Not later than July 1, 2014, the Secretary shall transmit to the Congress the results of a study, conducted in consultation with the Administrator of the Environmental Protection Agency, that—
(1) determines the impact of the long-term storage program under this section on mercury recycling; and
(2) includes proposals, if necessary, to mitigate any negative impact identified under paragraph (1).

EDITORIAL NOTES

REFERENCES IN TEXT

AMENDMENTS
Subsec. (b)(1)(A). Pub. L. 114–182, §10(c)(2)(A)(ii), designated first sentence of par. (1) as subpar. (A) and inserted heading. Former subpar. (A) redesignated cl. (i) of subpar. (B).
Subsec. (b)(1)(B). Pub. L. 114–182, §10(c)(2)(A)(i), (iii), (iv), designated second sentence of par. (1) as subpar. (B), inserted heading, substituted "The amount of the fees described in subparagraph (A)" for "The amount of such fees" in introductory provisions, redesignated former subpars. (A) to (C) of par. (1) as cls. (i) to (iii), respectively, of subpar. (B) and realigned margins, substituted "publicly available not later than October 1, 2018" for "publicly available not later than October 1, 2012" in cl. (i) and ", subject to clause (iv); and" for period at end of cl. (iii), and added cl. (iv).
Subsec. (g)(2)(C). Pub. L. 114–182, §10(c)(3)(A), (B), redesignated concluding provisions of subpar. (B) as (C), substituted "Subparagraph (B)" for "This subparagraph", and inserted "of that subparagraph before period at end.
Subsec. (g)(2)(D), (E). Pub. L. 114–182, §10(c)(3)(C), added subpars. (D) and (E).

CODIFICATION

Section was enacted as part of the Mercury Export Ban Act of 2008, and not as part of the Solid Waste Disposal Act which comprises this chapter.

STATUTORY NOTES AND RELATED SUBSIDIARIES

DEPOSIT OF FEES

§6939g. Hazardous waste electronic manifest system

(a) Definitions
In this section:
(1) Board
The term "Board" means the Hazardous Waste Electronic Manifest System Advisory Board established under subsection (f).
(2) Fund
The term "Fund" means the Hazardous Waste Electronic Manifest System Fund established by subsection (d).
(3) Person
The term "person" includes an individual, corporation (including a Government corporation), company, association, firm, partnership, society, joint stock company, trust, municipality, commission, Federal agency, State, political subdivision of a
State, or interstate body.

(4) System
The term "system" means the hazardous waste electronic manifest system established under subsection (b).

(5) User
The term "user" means a hazardous waste generator, a hazardous waste transporter, an owner or operator of a hazardous waste treatment, storage, recycling, or disposal facility, or any other person that—
(A) is required to use a manifest to comply with any Federal or State requirement to track the shipment, transportation, and receipt of hazardous waste or other material that is shipped from the site of generation to an off-site facility for treatment, storage, disposal, or recycling; and
(B)(i) elects to use the system to complete and transmit an electronic manifest format; or
(ii) submits to the system for data processing purposes a paper copy of the manifest (or data from such a paper copy), in accordance with such regulations as the Administrator may promulgate to require such a submission.

(b) Establishment
Not later than 3 years after October 5, 2012, the Administrator shall establish a hazardous waste electronic manifest system that may be used by any user.

(c) User fees
(1) In general
In accordance with paragraph (4), the Administrator may impose on users such reasonable service fees as the Administrator determines to be necessary to pay costs incurred in developing, operating, maintaining, and upgrading the system, including any costs incurred in collecting and processing data from any paper manifest submitted to the system after the date on which the system enters operation.

(2) Collection of fees
The Administrator shall—
(A) collect the fees described in paragraph (1) from the users in advance of, or as reimbursement for, the provision by the Administrator of system-related services; and
(B) deposit the fees in the Fund.

(3) Fee structure
(A) In general
The Administrator, in consultation with information technology vendors, shall determine through the contract award process described in subsection (e) the fee structure that is necessary to recover the full cost to the Administrator of providing system-related services, including—
(i) contractor costs relating to—
(I) materials and supplies;
(II) contracting and consulting;
(III) overhead;
(IV) information technology (including costs of hardware, software, and related services);
(V) information management;
(VI) collection of service fees;
(VII) reporting and accounting; and
(VIII) project management; and

(ii) costs of employment of direct and indirect Government personnel dedicated to establishing, managing, and maintaining the system.

(B) Adjustments in fee amount
(i) In general
The Administrator, in consultation with the Board, shall increase or decrease the amount of a service fee determined under the fee structure described in subparagraph (A) to a level that will—
(I) result in the collection of an aggregate amount for deposit in the Fund that is sufficient and not more than reasonably necessary to cover current and projected system-related costs (including any necessary system upgrades); and
(II) minimize, to the maximum extent practicable, the accumulation of unused amounts in the Fund.

(ii) Exception for initial period of operation
The requirement described in clause (i)(II) shall not apply to any additional fees that accumulate in the Fund, in an amount that does not exceed $2,000,000, during the 3-year period beginning on the date on which the system enters operation.

(iii) Timing of adjustments
Adjustments to service fees described in clause (i) shall be made—
(I) initially, at the time at which initial development costs of the system have been recovered by the Administrator such that the service fee may be reduced to reflect the elimination of the system development component of the fee; and
(II) periodically thereafter, upon receipt and acceptance of the findings of any annual accounting or auditing report under subsection (d)(3), if the report discloses a significant disparity for a fiscal year between the funds collected from service fees under this subsection for the fiscal year and expenditures made for the fiscal year to provide system-related services.

(4) **Crediting and availability of fees**

Fees authorized under this section shall be collected and available for obligation only to the extent and in the amount provided in advance in appropriations Acts.

(d) **Hazardous Waste Electronic Manifest System Fund**

(1) **Establishment**

There is established in the Treasury of the United States a revolving fund, to be known as the "Hazardous Waste Electronic Manifest System Fund", consisting of such amounts as are deposited in the Fund under subsection (c)(2)(B).

(2) **Expenditures from Fund**

(A) **In general**

Only to the extent provided in advance in appropriations Acts, on request by the Administrator, the Secretary of the Treasury shall transfer from the Fund to the Administrator amounts appropriated to pay costs incurred in developing, operating, maintaining, and upgrading the system under subsection (c).

(B) **Use of funds by Administrator**

Fees collected by the Administrator and deposited in the Fund under this section shall be available to the Administrator subject to appropriations Acts for use in accordance with this section without fiscal year limitation.

(C) **Oversight of funds**

The Administrator shall carry out all necessary measures to ensure that amounts in the Fund are used only to carry out the goals of establishing, operating, maintaining, upgrading, managing, supporting, and overseeing the system.

(3) **Accounting and auditing**

(A) **Accounting**

For each 2-fiscal-year period, the Administrator shall prepare and submit to the Committee on Environment and Public Works and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce and the Committee on Appropriations of the House of Representatives a report that includes—

(i) an accounting of the fees paid to the Administrator under subsection (c) and disbursed from the Fund for the period covered by the report, as reflected by financial statements provided in accordance with—

(I) the Chief Financial Officers Act of 1990 (Public Law 101–576; 104 Stat. 2838) and amendments made by that Act; and

(II) the Government Management Reform Act of 1994 (Public Law 103–356; 108 Stat. 3410) and amendments made by that Act;

(ii) an accounting describing actual expenditures from the Fund for the period covered by the report for costs described in subsection (c)(1).

(B) **Auditing**

(i) **In general**

For the purpose of section 3515(c) of title 31, the Fund shall be considered a component of an Executive agency.

(ii) **Components of audit**

The annual audit required in accordance with sections 3515(b) and 3521 of title 31 of the financial statements of activities carried out using amounts from the Fund shall include an analysis of—

(I) the fees collected and disbursed under this section;

(II) the reasonableness of the fee structure in place as of the date of the audit to meet current and projected costs of the system;

(III) the level of use of the system by users; and

(IV) the success to date of the system in operating on a self-sustaining basis and improving the efficiency of tracking waste shipments and transmitting waste shipment data.

(iii) **Federal responsibility**

The Inspector General of the Environmental Protection Agency shall—

(I) conduct the annual audit described in clause (ii); and

(II) submit to the Administrator a report that describes the findings and recommendations of the Inspector General resulting from the audit.

(e) **Contracts**

(1) **Authority to enter into contracts funded by service fees**

After consultation with the Secretary of Transportation, the Administrator may enter into 1 or more information technology contracts with entities determined to be appropriate by the Administrator (referred to in this subsection as "contractors") for the provision of system-related services.
(2) Term of contract
A contract awarded under this subsection shall have a term of not more than 10 years.

(3) Achievement of goals
The Administrator shall ensure, to the maximum extent practicable, that a contract awarded under this subsection—
(A) is performance-based;
(B) identifies objective outcomes; and
(C) contains performance standards that may be used to measure achievement and goals to evaluate the success of a contractor in performing under the contract and the right of the contractor to payment for services under the contract, taking into consideration that a primary measure of successful performance shall be the development of a hazardous waste electronic manifest system that—
   (i) meets the needs of the user community (including States that rely on data contained in manifests);
   (ii) attracts sufficient user participation and service fee revenues to ensure the viability of the system;
   (iii) decreases the administrative burden on the user community; and
   (iv) provides the waste receipt data applicable to the biennial reports required by section 6922(a)(6) of this title.

(4) Payment structure
Each contract awarded under this subsection shall include a provision that specifies—
(A) the service fee structure of the contractor that will form the basis for payments to the contractor; and
(B) the fixed-share ratio of monthly service fee revenues from which the Administrator shall reimburse the contractor for system-related development, operation, and maintenance costs.

(5) Cancellation and termination
   (A) In general
      If the Administrator determines that sufficient funds are not made available for the continuation in a subsequent fiscal year of a contract entered into under this subsection, the Administrator may cancel or terminate the contract.
   (B) Negotiation of amounts
      The amount payable in the event of cancellation or termination of a contract entered into under this subsection shall be negotiated with the contractor at the time at which the contract is awarded.

(6) No effect on ownership
Regardless of whether the Administrator enters into a contract under this subsection, the system shall be owned by the Federal Government.

(f) Hazardous Waste Electronic Manifest System Advisory Board
(1) Establishment
   Not later than 3 years after October 5, 2012, the Administrator shall establish a board to be known as the "Hazardous Waste Electronic Manifest System Advisory Board".

(2) Composition
   The Board shall be composed of 9 members, of which—
   (A) 1 member shall be the Administrator (or a designee), who shall serve as Chairperson of the Board; and
   (B) 8 members shall be individuals appointed by the Administrator—
      (i) at least 2 of whom shall have expertise in information technology;
      (ii) at least 3 of whom shall have experience in using or represent users of the manifest system to track the transportation of hazardous waste under this subchapter (or an equivalent State program); and
      (iii) at least 3 of whom shall be a State representative responsible for processing those manifests.

(3) Duties
   The Board shall meet annually to discuss, evaluate the effectiveness of, and provide recommendations to the Administrator relating to, the system.

(g) Regulations
(1) Promulgation
   (A) In general
      Not later than 1 year after October 5, 2012, after consultation with the Secretary of Transportation, the Administrator shall promulgate regulations to carry out this section.
   (B) Inclusions
      The regulations promulgated pursuant to subparagraph (A) may include such requirements as the Administrator determines to be necessary to facilitate the transition from the use of paper manifests to the use of electronic manifests, or to accommodate the processing of data from paper manifests in the electronic manifest system, including a requirement that users of paper manifests submit to the system copies of the paper manifests for data processing purposes.
   (C) Requirements
      The regulations promulgated pursuant to subparagraph (A) shall ensure that each electronic manifest provides, to the same extent as paper manifests under applicable Federal and State law, for—
(i) the ability to track and maintain legal accountability of—
   (I) the person that certifies that the information provided in the manifest is accurately described; and
   (II) the person that acknowledges receipt of the manifest;

(ii) if the manifest is electronically submitted, State authority to access paper printout copies of the manifest from
   the system; and
   (iii) access to all publicly available information contained in the manifest.

(2) Effective date of regulations
   Any regulation promulgated by the Administrator under paragraph (1) and in accordance with section 6923 of this title
   relating to electronic manifesting of hazardous waste shall take effect in each State as of the effective date specified in the
   regulation.

(3) Administration
   The Administrator shall carry out regulations promulgated under this subsection in each State unless the State program
   is fully authorized to carry out such regulations in lieu of the Administrator.

(h) Requirement of compliance with respect to certain States
   In any case in which the State in which waste is generated, or the State in which waste will be transported to a designated
   facility, requires that the waste be tracked through a hazardous waste manifest, the designated facility that receives the
   waste shall, regardless of the State in which the facility is located—
   (1) complete the facility portion of the applicable manifest;
   (2) sign and date the facility certification; and
   (3) submit to the system a final copy of the manifest for data processing purposes.

(i) Authorization for start-up activities
   There are authorized to be appropriated $2,000,000 for each of fiscal years 2013 through 2015 for start-up activities to
   carry out this section, to be offset by collection of user fees under subsection (c) such that all such appropriated funds are
   offset by fees as provided in subsection (c).

SUBCHAPTER IV—STATE OR REGIONAL SOLID WASTE PLANS

§6941. Objectives of subchapter
   The objectives of this subchapter are to assist in developing and encouraging methods for the disposal of solid waste
   which are environmentally sound and which maximize the utilization of valuable resources including energy and materials
   which are recoverable from solid waste and to encourage resource conservation. Such objectives are to be accomplished
   through Federal technical and financial assistance to States or regional authorities for comprehensive planning pursuant to
   Federal guidelines designed to foster cooperation among Federal, State, and local governments and private industry. In
   developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy
   facility, adequate provision shall be given to the present and reasonably anticipated future needs, including those needs
   created by thorough implementation of section 6962(h) of this title, of the recycling and resource recovery interest within the
   area encompassed by the planning process.

EDITORIAL NOTES

PRIOR PROVISIONS

Provisions similar to those in this section were contained in section 3254 of this title, prior to the general
AMENDMENTS

1984—Pub. L. 98–616, §501(f)(1), inserted ", including those needs created by thorough implementation of section 6962(h) of this title,"

Pub. L. 98–616, §301(a), inserted at end "In developing such comprehensive plans, it is the intention of this chapter that in determining the size of the waste-to-energy facility, adequate provision shall be given to the present and reasonably anticipated future needs of the recycling and resource recovery interest within the area encompassed by the planning process."

1980—Pub. L. 96–482 included as an objective in the disposal of solid waste the utilization of energy and materials recoverable from solid waste.

§6941a. Energy and materials conservation and recovery; Congressional findings

The Congress finds that—

1. significant savings could be realized by conserving materials in order to reduce the volume or quantity of material which ultimately becomes waste;

2. solid waste contains valuable energy and material resources which can be recovered and used thereby conserving increasingly scarce and expensive fossil fuels and virgin materials;

3. the recovery of energy and materials from municipal waste, and the conservation of energy and materials contributing to such waste streams, can have the effect of reducing the volume of the municipal waste stream and the burden of disposing of increasing volumes of solid waste;

4. the technology to conserve resources exists and is commercially feasible to apply;
