welfare and enhance the quality of water in the state. This means that WQS should, wherever attainable, provide water quality for the protection and propagation of fish, shellfish and wildlife and for recreation in and on the water and take into consideration the use and value of water for public water supplies, recreation in and on the water, and agricultural, industrial, and other purposes including navigation.

EPA will review ADEQ's Article 1 WQS to determine if they are consistent with the requirements of the CWA. If EPA determines that ADEQ's SWQS do not meet the requirements of the CWA, EPA will disapprove ADEQ's SWQS and promulgate federal standards. ADEQ has, therefore, developed the proposed WQS to comply with federal and state law, and to avoid federally promulgated WQS. Additionally, water quality criteria must be based on sound scientific rationale to protect the designated use, and not economic considerations. ADEQ is not aware of any less intrusive or less costly alternative methods that would meet ADEQ's legal obligations.

**I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data.**

ADEQ recommends that interested stakeholder review ADEQ's Arizona Water Quality Standards technical paper for additional information about how data for calculating water quality standards is obtained. The paper can be accessed here: [https://static.azdeq.gov/wqd/swpp/wqs\\_tp.pdf](https://static.azdeq.gov/wqd/swpp/wqs_tp.pdf).

For information regarding ADEQ's economic analysis, ADEQ recommends that interested stakeholder review the consultant's final report and ADEQ's technical paper describing it. ADEQ's technical paper is available here: [https://static.azdeq.gov/wqd/swpp/ese\\_tp.pdf](https://static.azdeq.gov/wqd/swpp/ese_tp.pdf) and a copy of the consultant report is available here: [https://static.azdeq.gov/wqd/swpp/ese\\_report.pdf](https://static.azdeq.gov/wqd/swpp/ese_report.pdf).

**10. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:**

Appendix A

- Non-substantive changes to correct CAS numbers and ensure values represented previously approved standards.
- Barium missing the distinction T after the PBC and FBC standards.
- Cadmium missing the (d) footnote.
- DDT and its breakdown products fixed to be "14 ug/L" for FBC and "0.0002 ug/L" for FC.
- Corrected 2,4,5 - TP PBC standard that was inadvertently crossed out.
- Corrected instances where (e) was transformed to € and (c) was transformed to © by word editing software.

- Removed CAS number for Tributyltin to avoid confusion and ensure applicability to all tributyltin species.

#### Appendix B

- EPA approved fish consumption use was missing from the Cherry Creek listing with the description "Headwaters to confluence with unnamed tributary at 34°05'09"/110°56'07"
- EPA approved Aquatic & Wildlife coldwater use was missing from the Christopher Creek listing with the description "Headwaters to confluence with Tonto Creek."
- Modified description of Antelope Creek pursuant to EPA comment to reflect that the surface water segment runs from the Headwaters of Antelope Creek to the confluence with Martinez Creek.
- Modified descriptions of 3 Hassayampa River segments pursuant to EPA comment to more accurately identify the reaches.
- Modified the description of Weaver Creek pursuant to EPA comment to reflect that the surface water segment runs from the Headwaters to the confluence with Antelope Creek, tributary to Martinez Creek.
- Modified the description of the Santa Cruz EDW and Santa Cruz River pursuant to EPA comment to more accurately describe the starting point and end point of the segment.
- Modified the description of Camp Creek pursuant to EPA comment to reflect that the segment runs to the Verde River.
- Modified the description of the Del Monte Gulch (EDW) pursuant to EPA comment to reflect that the segment runs to the Verde River.
- Modified the description of Sycamore Creek pursuant to EPA comment.

#### R18-11-201

- Definition for "Geometric Mean" was missing the associated formula.

#### R18-11-202

- Corrected R18-11-202(B)(2)(f) to read "Pond of sump" instead of "pon or sump."

#### R18-11-210

- Corrected an instance where WOTUS was inadvertently spelled "WTOSU."

#### R18-11-215

- Non-substantive changes to correct CAS numbers and ensure values are correct.

- Barium missing the distinction T after the PBC and FBC standards.
- Cadmium missing the (d) footnote.
- Corrected instances where (e) was transformed to € and (c) was transformed to © by word editing software.
- Removed CAS number for Tributyltin to avoid confusion and ensure applicability to all tributyltin species.

R18-11-216

Table A

- Split Stronghold Canyon into two reaches with more appropriate DUs.
- Removed Alvord Park Lake, Cortez Park Lake, and Encanto Park Lake from the non-WOTUS protected surface waters list at the request of the City of Phoenix.

Table B

- Modified header language to provide clarity.

Table C

- Modified header language to provide clarity. Multiple commentors asked ADEQ to clarify the meaning of the Table headings used in R18-11-216. The changes made to these headings are non-substantive and serve to better illustrate the regulations that apply to listed waters.

R18-11-217

- Added the word "upstream" after "1/4 mile" to clarify the rule.

**11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:**

**The Protected Surface Waters List**

ADEQ received a number of comments regarding waters listed on the Protected Surface Waters List in R18-2-

216. Generally, those comments expressed confusion about how waters on each list were regulated. As a response to those comments ADEQ has modified the header text for the tables and provides the following response to the comments listed below:

**Comment 1: Municipality** - *Article 2, Table C has not been in any prior version of the proposed rule and creates uncertainty about whether these waters would be regulated as WOTUS.*

*Following an October 5th conversation with ADEQ, the City appreciates that Table C represents ADEQ's effort to increase transparency and that ADEQ's intent is that these waters will be regulated as WOTUS. The City recommends ADEQ add clarifying language to the title and introduction paragraph for Table C, explaining that these waters were determined previously by ADEQ to be WOTUS, are still being regulated as WOTUS, and that these determinations are being re-affirmed due to the passage of time (or other reason, as determined during ADEQ's analysis). As written, there is a significant lack of clarity for permittees, resulting in an increased risk of illicit discharges in these waters and creating an apparent contradiction between Article 1 and Article 2 WOTUS lists.*

**ADEQ Response:** ADEQ has modified the headers for the table and added language to this preamble to clarify that waters listed in Table C will be regulated as WOTUS. If any of these waters are further evaluated and the result is a non-WOTUS determination made through any of the mechanisms mentioned in the heading, the water will then be evaluated for regulatory status under Article 2.

**Comment 2: Non-Profit** - *We appreciate the amount of staff time and effort that goes into development of a program such as the SWPP. Regarding the proposed Protected Surface Waters List, [non-profit] feels that it is important to protect the waters currently listed in Appendix B of Article 1. The proposed lists in Tables A and B do not appear to include the waters currently listed in Appendix B and the creation of Table C introduces uncertainty. Will those waters listed on Table C no longer be protected? Why was Table C created? What further study would indicate that a waterway should be removed from protections?*

**ADEQ Response:** ADEQ created the additional tables to provide clarity to stakeholders about the status of WOTUS determinations for Arizona waterways. ADEQ has not changed the regulatory scheme that applies to waters listed in Appendix B.

**Comment 3: Mining Group** - *[Mining Group] believes that the most prudent approach in the final version of the surface water protection rules would be for ADEQ to remove any type of suggested WOTUS list or any other form of WOTUS designations.*

*Such an approach is preferred because the status of the WOTUS definition under the CWA is in flux due to EPA's proposed "Revised Definition of 'Waters of the United States'" (see 86 Fed. Reg. 69,372 (Dec. 7,*

2021)) (final version of rule currently being reviewed by the Office of Management and Budget) and the pending U.S. Supreme Court review of the WOTUS-related decision in *Sackett v. EPA*, 8 F.4th 1075 (9th Cir. 2021) (oral argument heard October 3, 2022). Such an approach would avoid ADEQ creating potentially erroneous assumptions (which could only be changed by subsequent rulemaking) that certain waters are WOTUS even when ADEQ is not clear how WOTUS will be defined three months, six months, or a year from now.

Although we believe not including a list of WOTUS would be the preferred approach, we support ADEQ's addition of language to Table B (WOTUS Protected Surface Waters) of proposed R18-11-216 to clarify that a party can contest a specific water's status as WOTUS in a subsequent permit or enforcement proceeding, in a challenge to identification of the water as an impaired WOTUS, and/or in a challenge to a proposed TMDL for the water as an impaired WOTUS. Because of the regulatory and judicial uncertainty surrounding the definition of WOTUS, such a recognition of the tentative nature of the waters listed in Table B is appropriate.

We also support ADEQ's inclusion of a separate Table C that identifies certain water segments as historically regulated as WOTUS but that need further study. We interpret this table as simply listing waters that may qualify as WOTUS now or in the future, but for which additional analysis is necessary and which are not currently identified as "WOTUS protected surface waters" by rule. This reflects the reality that ADEQ has not had the resources to conduct a detailed jurisdictional analysis on every surface water in Arizona, especially those where a significant nexus analysis is required before jurisdiction can be asserted under current law.

Identifying that the WOTUS status of the waters on Table C is uncertain, rather than assuming they constitute WOTUS, is an appropriate approach if ADEQ wishes to have lists of waters in the final rule.

If ADEQ maintains Tables B and C in the final version of the surface water protection rules, [mining group] requests that the preamble language found at the bottom of page 2352, 28 A.A.R., and at the top of page 2353, 28 A.A.R. be revised to ensure that it is consistent with the lead-in language to both Table B (see 28 A.A.R. at 2416) and Table C (see 28 A.A.R. at 2420) of proposed R18-11-216. In addition, ADEQ should make clear that waters appearing on Table C ultimately may be determined not to constitute either a WOTUS or a non-WOTUS protected surface waters (e.g., an ephemeral water that does not possess a significant nexus with a traditional navigable water).

**ADEQ Response:** ADEQ appreciates the support in labeling tables and the suggestions provided in this comment. ADEQ has modified the headings in the final rulemaking to help provide clarity and consistency about how waters are regulated. ADEQ has listed all known WOTUS as part of the PSWL on either Table B or Table C because the new §49-221 requires that the PSWL contain "[a]ll WOTUS." Lastly, ADEQ has modified the table headings to create clarity that waters listed on Table B and Table C are regulated as WOTUS.

**Comment 4: Public Utility** - Under the SWPP, protected surface waters include all WOTUS (Waters of the United States) as defined by 42 U.S.C. § 1362(7) of the Federal Water Pollution Control Act (CWA) and waters of the state that are listed on the protected surface waters list under A.R.S. §49-221(G). A.R.S. § 49-202(38). The Protected Surface Water List (PSWL) in proposed rule A.A.C R18-11-216 identifies three categories of waters in Tables A through C: Non-WOTUS Protected Surface Waters, WOTUS Protected Surface Waters, and Historically Regulated as WOTUS and in Need of Further Study. SRP appreciates ADEQ's efforts to add clarity by distinguishing between WOTUS protected surface waters and non-WOTUS protected surface waters, consistent with the statutory framework. See A.R.S. § 49-202 (27) & (54). SRP believes this distinction will assist regulated entities in preparing permit applications because it makes clear which regulations apply to which waters, at least from ADEQ's perspective.

SRP also recognizes the continuing uncertainty regarding the scope of WOTUS impacts ADEQ's ability to make WOTUS/non-WOTUS determinations and that there will need to be an ongoing regulatory process to update Tables A through C. SRP understands that ADEQ began the process of making updated jurisdictional determinations, based on the currently applicable WOTUS definition. SRP also understands that those updated determinations are reflected in "Table A: Non-WOTUS Protected Surface Waters" and "Table B: WOTUS Protected Surface Waters." While the scope of WOTUS may change following the Supreme Court's decision in *Sackett v. U.S. Environmental Protection Agency* and future rulemakings by the U.S. Environmental Protection Agency, SRP recommends that ADEQ remove the language preceding Table B that identifies ADEQ's determinations as tentative, as such language creates confusion regarding the distinction between the waters listed in Table B and those identified in "Table C: Historically Regulated as WOTUS and in Need of Further Study" (Table C Waters).

It is unclear how Table C Waters fit within the statutory scheme of A.R.S. § 49-221(G) which identifies WOTUS and non-WOTUS protected surface waters. Because ADEQ previously determined such waters to be WOTUS, by including such waters in Appendix B of Title 18, Chapter 11 of the Arizona Administrative Code,<sup>1</sup> SRP interprets the proposed regulation to mean that ADEQ will regulate the Table C Waters as WOTUS until ADEQ has had the opportunity to make an updated jurisdictional determination. Nonetheless, SRP recommends that the regulation expressly state as such in the text preceding Table C. In addition, ADEQ should rename Table C to better reflect ADEQ's intent that the Table C Waters will be regulated as WOTUS until ADEQ makes a different regulatory determination.

SRP also asks that ADEQ clarify the process by which ADEQ intends to address the regulatory status of the Table C Waters after completing the updated jurisdictional determinations. ADEQ should provide for an open and transparent rulemaking process, subject to notice and comment from the public, as it makes determinations regarding the Table C Waters. SRP suggests that ADEQ take a systemic approach and assess waters within the same watershed or sub-watershed to allow interested parties the opportunity to

*provide information in a systematic and predictable basis. This formalized rulemaking process is necessary because many of the Table C Waters would be regulated as non-WOTUS protected waters under Table A if they are not considered WOTUS and placed on Table B. For example, the entirety of the Salt River below Granite Reef Dam would be regulated as a non-WOTUS protected water if it is not a WOTUS. See A.R.S. 49-221(G)(1)(b). Similarly, all perennial and intermittent tributaries to the eight major rivers in Arizona (Bill Williams, Colorado, Gila, Little Colorado, Salt, San Pedro, Santa Cruz and Verde) must be placed on Table A if they are not WOTUS. A.R.S. 49-221(G)(1)(3)(b).*

**ADEQ Response** - As a result of the above comments, ADEQ has provided clarifying language in both the preamble and the headers to each table on the PSWL. To once again clarify, waters that are listed under Table A are regulated by the standards listed in Article 2 that apply to non-WOTUS protected surface waters.

Waters that are listed under Table B are protected as WOTUS under ADEQ's current regulations, and are protected by water quality standards in Article 1. Waters that are listed under Table C are protected as WOTUS under ADEQ's current regulations, and are protected by the water quality standards in Article 1.

ADEQ will continue to adhere to the notice and comment process outlined in the Arizona Administrative Procedure act during any future SWPP rulemakings.

#### **ADEQ's Economic, Social, and Environmental Cost/Benefit (ESE) Analysis**

ADEQ received multiple comments regarding the ESE analysis that was submitted as part of the proposed rulemaking. Much of the commentary regarding the process used by ADEQ is not directed at the specific standards adopted or the waters protected under the program, but at variables used throughout the process. ADEQ has not significantly modified our economic analysis between the NPRM and the NFRM as a result of these comments. ADEQ has selected excerpts from 4 comments that the agency believes accurately express the differing viewpoints of the comments submitting pursuant to the agency's NPRM. These excerpts regarding this process are copied below. Some comments are not presented in their entirety as ADEQ is only addressing portions of letters that specifically mentioned the cost-benefit analysis in this section of the NFRM.

**Comment 1: Non-Profit** - *There is no requirement to consider the impacts and negative consequences, including the costs, of not establishing water-quality standards at a particular level for excluded ephemeral waters and springs that do not reach Traditional Navigable Waters. The ecosystem services provided by streams and springs should be part of any cost/benefit analysis.*

*Social justice and environmental justice should be considered as part of any analysis as well. The narrative accompanying the rule on page 18, Economic, Social and Cost-benefit analysis states, "1. If the water is not categorically excluded from the SWPP as defined in § 49-221 and the economic, social and environmental benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list, the water may be added to the PSWL." The rule should be modified to clarify that the water **shall** be added, rather than may be added to protect additional waters.*

*The rule includes no consideration of the value of cultural waters for the 22 Tribes and other Indigenous peoples. There is no requirement for protection for this use. This huge oversight in the legislation should be addressed in the implementation of the program. An example is the cost-benefit analysis used for Quitobaquito pond. It does not recognize the economic impact of harm to this pond relative to cultural value nor does it recognize the benefits. As is acknowledged by ADEQ, it also does not adequately address the importance as habitat for rare and endangered species (rule package page 2345).*

*The Arizona Department of Environmental Quality (ADEQ) should adopt and apply water-quality standards for non-WOTUS protected surface waters based on Outstanding Arizona Waters designation. Additionally, the Surface Water Protection Program should apply to ephemeral waterways and an aquatic and wildlife (ephemeral) designated use should be adopted.*

**Comment 2: Tribal Group** - *Of concern is the cost-benefit analysis in the proposed rule as it may be inadequate for properly recognizing and valuing water bodies that have cultural or spiritual importance to the Tribe and/or other Arizona tribes. Given the Arizona Pollutant Discharge Elimination permit for Resolution Copper Mine, LLC, and the resulting litigation initiated by the Tribe, the Tribe is wary of efforts to assign monetary value to cultural or spiritual resources. Furthermore, numerous off-reservation streams, washes and springs that are sacred to Arizona's Native American tribes may slip through the draft classification scheme.*

**Comment 3: Mining Group** - *Commenter has several concerns with ADEQ's proposed approach to calculating and considering the economic, social, and environmental costs and benefits that (1) would result from the adoption of a water quality standard at a particular level or for a particular water category for non-WOTUS surface waters (see A.R.S. § 49-221(A)(2)); or (2) would be used to determine whether to add or remove non-WOTUS surface waters from ADEQ's protected surface water list (see A.R.S. § 49-221(G)(4), (6)). These concerns include:*

- *ADEQ's cost-benefit approach does not appear to accurately evaluate the potential economic, social, and environmental costs and benefits of imposing water quality standards on non-WOTUS surface waters, given that ADEQ simply is proposing standards that are equal to those imposed on WOTUS waters using very conservative approaches and criteria following EPA guidance. The requirement for ADEQ to conduct a cost-benefit approach under A.R.S. § 49-221(A)(2) was intended to avoid imposition of national criteria adopted by EPA, which do not necessarily account for the unique nature of Arizona's waters, to non-WOTUS surface waters in Arizona. AMA recognizes that some of Arizona's existing surface water quality criteria for WOTUS waters, and which are being applied to non-WOTUS waters in the NPRM, do account for Arizona species or other Arizona-specific conditions. However, this is not true across the entire suite of criteria that are being proposed to be applied to non-WOTUS protected surface waters.*
- *There does not appear to be a separate cost-benefit approach or analysis when ADEQ is considering adding or removing non-WOTUS surface waters from the protected surface water list or when it is evaluating whether to apply EPA-based surface water quality standards to non-WOTUS waters. These are two different determinations that should consider different costs and benefits and potential approaches, yet that is not fully addressed in the NPRM. For instance, after discussing some cost and benefit factors and including a table on what ADEQ describes as class 1 through class 3 surface features, ADEQ concludes that based on its modeling it proposes to protect class 1 and class 2 waters with water quality standards that are like those applied to waters subject to only federal jurisdiction. See 28 A.A.R. at 2345. However, the only cost categories used were for "404 permits," "mitigation," and "ADEQ Admin." The costs*

categories do not make sense because the evaluated classes of surface waters are non-WOTUS and therefore would not be subject to 404 permitting or mitigation. In contrast, such waters would be subject to costs associated with potential AZPDES permitting (including under both individual and general permits), compliance with surface water quality standards at the same level as federally-regulated waters, potential impaired waters listings and TMDLs, compliance with best management practices for activities occurring within the ordinary high water mark of such waters or for certain activities within the bed and banks of upstream waters that materially impact the downstream non-WOTUS protected surface water. None of these costs are even listed, mentioned, or discussed in ADEQ's cost-benefit analysis.

- Commentor questions ADEQ's and its consultant's use of the joint EPA and Corps 2021 Economic Analysis for the Proposed Revised Definition of WOTUS Rule ("2021 Economic Analysis") as a basis for determining costs and benefits related to imposition of standards on non-WOTUS waters. Overall, we strongly disagree with using an economic model that was crafted specifically to justify a broad expansion of federal jurisdiction over surface waters in the United States as the basis for the cost/benefit analysis under Arizona's surface water protection program. Use of such an economic model likely resulted in biases towards overestimating benefits and underestimating costs.
- We also agree with many of the criticisms to the 2021 Economic Analysis contained within an expert report submitted to EPA and the Corps as an exhibit to the Waters Advocacy Coalition's comments on EPA's and the Corps' revised definition of WOTUS. See David Sunding, Ph.D., and Gina Waterfield, Ph.D., The Brattle Group, Review of the Environmental Protection Agency and Department of the Army 2021 Economic Analysis for the Proposed "Revised Definition of 'Waters of the United States'" Rule (Feb. 7, 2022) (copy attached and incorporated as part of these comments). The criticisms, which would apply to ADEQ's use of the 2021 Economic Analysis, include:
  - EPA and the Corps failed to explain the significant differences between the estimates of benefits and costs found in the 2021 Economic Analysis and the estimates used just two years prior by the same agencies for the Navigable Waters Protection Rule. See *id.* at 7.
  - The cost estimate analysis in the 2021 Economic Analysis fails to quantify costs associated with avoidance and minimization measures, even though such costs are likely to be significant in comparison with other identified permit costs. See *id.* at 9-10.
  - The cost estimate analysis in the 2021 Economic Analysis fails to quantify implicit costs, such as project delays or transferring projects from jurisdictional to non-jurisdictional areas. See *id.* at 10.
  - The benefit estimate analysis in the 2021 Economic Analysis relies heavily on a contingency valuation approach, which has a "tendency [for] survey respondents to provide inaccurate and inconsistent answers. The agencies do not discuss these important shortcomings of the studies that form the basis of their benefits estimate, or the likely bias as a result." *Id.* at 13.
  - The willingness to pay estimates relating to perceived benefits are derived from outdated and inaccurate studies. See *id.*
  - Because of the numerous issues outlined above with ADEQ's reliance on the EPA and Corps 2021 Economic Analysis, AMA is concerned with ADEQ's use of a benefit transfer approach when calculating costs and benefits and whether this approach, at least as applied by ADEQ for surface waters in Arizona, appropriately calculates potential costs and benefits related to either designation waters as non-WOTUS protected surface waters or imposition of water quality standards on non-WOTUS waters. The selection of the cost and benefit categories or inputs will drive the usefulness of this approach.

We disagree with many of the cost and benefit inputs used in McClure's second report (including in the table found at 28 A.A.R. at 2345) especially as applied to a cost/benefit analysis for determining whether to impose certain water quality standards on non-WOTUS protected surface waters.

**Comment 4: Conservation Group** - I have read ADEQ's document packet - Environmental , Social, and Economic Cost/Benefit Analysis. I certainly appreciate the complex nature of the task to assign costs and benefits to determine the selection and importance of waters to be included for protection.

*As the analysis provided by ADEQ and consultants in the documents reported, assigning costs is a much more straightforward task than determining benefits. This is especially true for waters that have perhaps a less clear determination of their value, or are appreciated by consumers or state residents in a way that defies current best attempts at estimating that value.*

*I understand the attempt to utilize the three scenarios in the document as a way to explain the range of possible cost/benefit analyses that could be accomplished with the tools that ADEQ is considering. However, the use of these particular scenarios and the analyses of the benefits provided in the examples gave cause for concern.*

*It is critical that all waters are valued for their important characteristics, many of which may not be adequately measured by the tools that you are considering. Some examples that are perhaps more likely to be erroneously valued are:*

- *waters that are home to, or provide habitat used by endangered or threatened species*
- *waters that are valued by anglers because they hold populations of wild, introduced trout (brown, rainbow, and brook trout) that are a rare commodity in Arizona due to the limited cold water habitat in our state*
- *waters that provide protection, and current or eventual catch and release fishing opportunity for recovery populations of native Gila or Apache trout.*

*A point of concern in your evaluation of waters related to fishing is whether the act of fishing is intended to result in consumption of the fish. While many of the waters on the ADEQ list fit that criteria, there are many more that do not. These waters are designated as catch and release waters by Arizona Game and Fish Department (AZGFD), and are of incredible value to the state.*

*Gila trout and our state fish, Apache trout, provide a useful example to our assertion. Both of these native trout were once listed as endangered in Arizona. Apache trout were downlisted to threatened in 1975, and Gila trout were downlisted in 2006 due to an incredible amount of work and investment by several agencies and organizations including: AZGFD, United States Forest Service (USFS), United States Fish and Wildlife Service (USFWS), the White Mountain Apache Tribe, and Trout Unlimited (TU). If the water quality where these recovery populations reside is not maintained, and that contributes to these fish being returned to their endangered status, then these agencies and organizations will incur tremendous cost to bring them back from that designation.*

*There is an economic driver component for protecting these fish that may not be accounted for in the Department's analysis as well. These native, threatened trout in the AZGFD identified recovery streams are highly sought by anglers, fly fishers in particular, who will travel great distances to catch and release these rare and beautiful trout.*

*Native Gila and Apache trout are valued by anglers across the state, as well as anglers from across the country and the world who are already coming to the recovery waters that have been opened to catch and release fishing in order to add these special trout to their catch list. AZGFD has a wild trout challenge that*

*anglers from across the country participate in. It is unclear if the economic benefit to the state as a result of anglers traveling to Arizona and the purchases they make (fishing license, fishing equipment, plane fare, rental cars, lodging, meals, etc.) is adequately calculated in your cost/benefit tools. This becomes further complicated by the fact that as AZGFD works to improve these identified recovery streams for Gila and Apache trout, that it sometimes takes several years for the populations to grow and stabilize to the point that catch and release fishing can occur on these streams.*

*There is another element of protecting these waters that are home to these native and wild trout and other protected species, that may not be adequately included in the calculations that we want to address. Many residents value these waters because they provide habitat for species that these residents do not want to see vanish from Arizona. That puts an additional premium on the quality of the water that is maintained in these streams. Your document notes incremental vs absolute attention to the water quality of a protected stream or lake. Absolute water quality is critical to these streams.*

*The value of maintaining the highest quality water possible is important to another concern that we have. There is the exponential cost to deal with these protected waters, after the fact, if they are spoiled. The Four Forest Restoration Initiative (4FRI) provides an example to what we mean. We have seen the devastation caused in our state by the ever increasing threat of wildfires. In the case of 4FRI, this footprint includes watersheds that are home to many of the trout streams that we feel are important to protect. It also supplies water to Rim Country communities, and is an extremely important water source for the Phoenix Metro area. Consider the minimal preventive costs of maintaining the quality of these protected waters to that of the treatment costs of severely tainted water before it can be used by people downstream. Add to that the restoration costs to the watershed if an important water source for millions is damaged. We are not sure that the Department's tools provide for this aspect of cost/benefit analysis.*

*We ask that ADEQ expand their search for tools that better capture the inherent value of Nature to a greater degree than the tools that Department has considered to this point. We offer this link to the*

*Intergovernmental Science-Policy platform on Biodiversity and Ecosystem Services (IPBES) "Assessment Report on the Diverse Values and Valuation of Nature": [https://ipbes.net/media\\_release/Values\\_Assessment\\_Published#:~:text=%E2%80%9CNature%20is%20what%20sustains%20us,left%20out%20of%20decision%20making](https://ipbes.net/media_release/Values_Assessment_Published#:~:text=%E2%80%9CNature%20is%20what%20sustains%20us,left%20out%20of%20decision%20making) as a possible source that the Department might want to explore. In addition to a review of this tool by ADEQ, we hope that a more thorough review by ADEQ of other possible tools to better capture the value of the kinds of waters we have highlighted will occur and result in strategies to better assess the true benefits of these valued waters.*

**ADEQ Answer** - The regulations adopted in this rulemaking accomplish two ESE analysis-related statutory requirements. First, the ESE analysis considers the water quality standards adopted by ADEQ, then applies those water quality standards to certain waters to ensure that the benefits of protecting any listed waters outweigh the cost of protecting those waters. Second, this rulemaking establishes a procedure for determining economic, social, and environmental cost/benefits in any future SWPP rulemaking.

The regulations adopted by ADEQ in this rulemaking at R18-2-213 are put in place to provide regulatory guardrails to any future SWPP rulemakings. These guidelines are a recognition that a rulemaking done pursuant to the existing statutory authority could take many forms. Potentially, future rulemaking could add or remove

waters from the PSWL without modifying water quality standards. The opposite is also true, ADEQ could modify water quality standards for non-WOTUS protected surface waters without modifying what waters are protected. The important part of the process is that the ESE valuation process must be tailored to the rulemaking that ADEQ is looking to accomplish.

The idea of a tailored economic analysis is extremely important in the context of this initial SWPP rulemaking. ADEQ performed two ESE analyses with the help of our contracted economists to ensure the requirements of the statute were met. As mentioned earlier in this preamble, one of the issues with the first analysis ADEQ completed is that it lacked specificity with regards to the variables that were being applied. To state that in another way, in a vacuum it's impossible to determine costs or benefits without applying the analysis in some specific way.

ADEQ's second ESE analysis addresses that deficiency and quantifies a set of standards that are protective of non-WOTUS protected surface waters without being overly burdensome. The cost of adopting these standards depends on the nature and type of discharge to the protected water body. At the time of this rulemaking, there are no permits currently issued for any discharges to non-wotus waters on the protected surface waters list. As applied, the only entity that will bear costs associated with the adopted standards is ADEQ for the purposes of water quality sampling and administration.

In the event that there is a permitted discharge to a non-WOTUS protected surface water, ADEQ has adopted water quality standards that could affect both the costs and benefits of the regulations in this NFRM. The mixing zones standards in R18-11-207, the natural background standards in R18-11-207, the schedule of compliance standard in R18-11-208, the variance standard in R18-11-209, and the site-specific standard rule in R18-11-210 are all water quality standards adopted in this rulemaking that could affect the enforceable limit of any permit issued under the new SWPP.

The hypothetical nature of any of the costs/benefits included in ADEQ's model are extremely important to consider because as adopted, there is no ascertainable costs/benefits that the agency can assign to the SWPP because there simply is not a permit that will be issued pursuant to it after adoption. ADEQ rulemaking requirements included establishing criteria for the economic, social and environmental costs and benefits for listing or delisting waters for state-level protection, and for setting standards for non-WOTUS and other waters of the state. Accordingly, the consulting team focused on variables pertaining to modeling the economic costs and benefits associated with decisions for adopting water quality standards for non-WOTUS waters and other waters of the state, and for listing or delisting waters for protection within a new Surface Water Protection Program as well as a parallel consideration in recognizing, at least a qualitative sense, the social effects associated with waterbody actions.

Pursuant to ADEQ's direction, the Consultants used a national study which analyzed economic effects of applying a surface water protection program, as a general framework for the Arizona-specific model. The

national study includes both national and state-level costs as well as estimates for benefits, along with a proposed framework for evaluating benefits at smaller levels of geography. Ultimately, the ADEQ model used in this rulemaking generally reflects the scope, methodology and data sources used in the national study, but the consultants adapted and supplemented the framework to address the policy actions that are most likely to occur in Arizona.

This approach is consistent with the requirements of the statute, and simultaneously gave ADEQ the specific type of analysis necessary to protect the listed waters, as well as a way to quantify the potential costs and benefits of the standards the agency is adopting. ADEQ released the consultants report to the public in May of this year for comment, and received no written comments on the material until publication of the NPRM. ADEQ has a statutory deadline of December 31st, 2022 to adopt the rules in this NFRM.

ADEQ appreciates the comments submitted on our ESE analysis, especially the reports that help quantify the costs and benefits of a potential surface water protection program in Arizona. The agency has cataloged these submitted studies for use in any future SWPP rulemaking.

Commenters also suggested additional costs or benefits categories that could be included in future rulemakings. These variables included environmental justice considerations, cultural impacts, prospective costs that could potentially be incurred if a water was determined to be impaired, benefits associated with the preservation of endangered species, and benefits associated with ecosystem services. ADEQ has noted these comments and will explore expanding our ESE analysis in any future rulemaking.

Each SWPP rulemaking is unique, and ADEQ encourages stakeholders to continue to engage on the topic of developing an appropriate ESE analysis for each individual iteration of this program. Variables that are determinative in one analysis may not be included in another. The rules adopted by ADEQ to provide regulatory guardrails in future SWPP rulemakings ensure that a public process relevant to the specific rule is provided by the agency whenever water quality standards are modified or waters are added or removed from the PSWL.

### **Typographical Errors**

**ADEQ Response** - ADEQ has addressed typographical errors pointed out by commenters in this NFRM. These changes are outlined in the modifications section of the NFRM.

### **Protection for Non-WOTUS Ephemeral Streams**

Through the rulemaking process, ADEQ has received multiple comments regarding the protection of ephemeral streams under the state program. The enabling legislation for the SWPP prevents ADEQ from adding those waters as non-WOTUS protected surface waters.

### **Request for the Addition or Removal of Certain Waters**

During the rulemaking process, ADEQ received comments from a number of parties asking to either add or remove waters from the Protected Surface Waters List.

ADEQ received requests to list the following waters, or portions of the following waters, on the Protected Surface Waters List:

- Benny Creek (LC)
- Benton Creek (LC)
- Grapevine Creek (Agua Fria drainage/MG)
- Soldier Creek - Black River (SR)
- Hayground Creek (SR)
- McKittrick Creek (UG)

ADEQ received requests to remove the following waters, or portions of the following waters, from the Protected Surface Waters List:

- Alvord Park Lake
- Cortez Park Lake
- Encanto Park Lake
- Garden Canyon Creek
- Mineral Creek
- Whitewater Draw
- Queen Creek

ADEQ uses a methodology documented across two technical papers to add or remove waters from the PSWL. The technical paper describing the process to add waters to the PSWL can be accessed here: [https://static.azdeq.gov/wqd/swpp/pswl\\_wp.pdf](https://static.azdeq.gov/wqd/swpp/pswl_wp.pdf). The technical paper that describes the WOTUS evaluation process can be accessed here: [https://static.azdeq.gov/wqd/swpp/sig\\_nex\\_tp.pdf](https://static.azdeq.gov/wqd/swpp/sig_nex_tp.pdf).

For those waters that were nominated for listing on the PSWL, WOTUS evaluations are ongoing to determine jurisdictional status. For waters that were requested to be removed, ADEQ removed Alvord Park Lake, Cortez Park Lake and Encanto Park Lake from the PSWL. These are non-WOTUS ornamental and urban lakes, which require confirmation from the lake owner for listing. The lake owner requested removal during the NPRM comment period. Garden Canyon Creek, Mineral Creek, Whitewater Draw and Queen Creek are currently listed on Appendix B and are waters listed in Table C. These waters need further evaluation to determine jurisdictional status.

**12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

None.

**a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

ADEQ's regulations do allow for general permits for many different types of facilities, but not all facilities qualify for general permits. In the case that a general permit does not apply this rule may require that entities that discharge to non-WOTUS protected surface water apply for an individual AZPDES permit. Requirements for discharge vary depending on the facility, so many of these discharges would not be able to receive coverage under a general permit.

**b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

The Clean Water Act and implementing regulations adopted by EPA apply to the subject of this rule, as described in Section 5 above. Article 2 of this rulemaking establishes water quality standards that are applicable to surface waters that are not protected under the Clean Water Act. These standards are not more stringent than those the standards implemented by federal law, but they apply to waters that may not be protected under federal law.

ADEQ was given explicit statutory authority to develop a program to protect these surface waters by HB2691(2021). That bill is codified at A.R.S. §§ 49-202.01, 49-221, 49-255.04, and 49-255.05.

**c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

No such analysis was submitted.

**13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:**

None.

**14. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was**

**changed between the emergency and the final rulemaking packages:**

**15. The full text of the rules follows:**

## **ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS**

### **R18-11-101. Definitions**

The following terms apply to this Article:

1. “Acute toxicity” means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. “Agricultural irrigation (AgI)” means the use of a surface water for crop irrigation.
3. “Agricultural livestock watering (AgL)” means the use of a surface water as a water supply for consumption by livestock.
4. “Annual mean” is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. “Aquatic and wildlife (cold water) (A&Wc)” means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. “Aquatic and wildlife (effluent-dependent water) (A&Wedw)” means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. “Aquatic and wildlife (ephemeral) (A&We)” means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. “Aquatic and wildlife (warm water) (A&Ww)” means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. “Arizona Pollutant Discharge Elimination System (AZPDES)” means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. “Assimilative capacity” means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. “Clean Water Act” means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. “Complete Mixing” means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. “Criteria” means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. “Critical flow conditions of the discharge” means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone’s receiving water as follows:
  - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
  - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
  - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.

15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
  - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
  - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
  - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.
17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water or portion of a surface water, classified under R18-11-113 that consists of a point source discharge of wastewater without which the surface water would be ephemeral. An effluent dependent water is a surface water that, without the point source discharge of wastewater, would be an ephemeral water. An effluent-dependent water may be perennial or intermittent depending on the volume and frequency of the point source discharge of treated wastewater.
20. "Ephemeral water" means a surface water ~~that has a channel that is at all times above the water table and~~ or portion of surface water that flows or pools only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:
 
$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO<sub>3</sub>) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.

27. "Intermittent water" means a ~~stream or reach~~ surface water or portion of surface water that flows continuously ~~only at~~ during certain times of the year and more than in direct response to precipitation, such as when it receives water from a spring, elevated groundwater table or from another surface source, such as melting snow or snowpack.
28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water or portion of surface water that flows continuously throughout the year.
33. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S § 49-201(29)
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macroinvertebrates and algae are collected from these reference condition streams for calculating the Ari-zona Indexes of Biological Integrity thresholds.
37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.

40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
  - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
  - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means ~~"Navigable waters"~~ "WOTUS" as defined in A.R.S. ~~§ 49-201(22)~~ § 49-201(53).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH<sub>3</sub>), ammonium ion (NH<sub>4</sub><sup>+</sup>), nitrite (NO<sub>2</sub>), and nitrate (NO<sub>3</sub>), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
48. "Urban lake" means a manmade lake within an urban landscape.
49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.
51. "Wadable" means a surface water can be safely crossed on foot and sampled without a boat.
52. "Wastewater" does not mean:
  - a. Stormwater,
  - b. Discharges authorized under the De Minimus General Permit,
  - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
  - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

#### Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO<sub>3</sub>, is determined according to the following criteria:
  - i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO<sub>3</sub>.
  - ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO<sub>3</sub>.
  - iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- e. pH is determined according to the following criteria:
  - i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
  - ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
  - iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- f. Table 1 abbreviations.
  - i. µg/L = micrograms per liter,
  - ii. mg/kg = milligrams per kilogram,
  - iii. pCi/L = picocuries per liter,

- iv. D = dissolved,
- v. T = total recoverable,
- vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
  - e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
  - LN = is the natural logarithm
  - CMC = Criterion Maximum Concentration (acute)
  - CCC= Criterion Continuous Concentration (chronic)

## **Appendix B. Surface Waters and Designated Uses**

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

### **Watersheds:**

BW = Bill Williams  
 CG = Colorado – Grand Canyon  
 CL = Colorado – Lower Gila  
 LC = Little Colorado  
 MG = Middle Gila  
 SC = Santa Cruz – Rio Magdalena – Rio Sonoyta  
 SP = San Pedro – Willcox Playa – Rio Yaqui  
 SR = Salt River  
 UG = Upper Gila  
 VR = Verde River

**Other Abbreviations:**

WWTP = Wastewater Treatment Plant

Km = kilometers

Watershed	Surface Waters	Segment Description and Location (Latitude and Longitudes are in NAD 83)	Lake Category	Aquatic and Wildlife				Human Health				Agricultural

**ARTICLE 2. ~~REPEALED~~ WATER QUALITY STANDARDS FOR NON-WOTUS PROTECTED SURFACE WATERS**

**R18-11-201. ~~Repealed~~ Definitions**

The following terms apply to this Article:

1. “Acute toxicity” means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. “Agricultural irrigation AZ (AgI AZ)” means the use of a non-WOTUS protected surface water for crop irrigation.
3. “Agricultural livestock watering AZ (AgL AZ)” means the use of a non-WOTUS protected surface water as a water supply for consumption by livestock.

4. “Aquatic and wildlife AZ (cold water) (A&Wc AZ)” means the use of a non-WOTUS protected surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
5. “Aquatic and wildlife AZ (warm water) (A&Ww AZ)” means the use of a non-WOTUS protected surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
6. “Assimilative capacity” means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
7. “Complete Mixing” means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
8. “Criteria” means elements of water quality standards expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
9. “Critical flow conditions of the discharge” means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone’s receiving water as follows:
  - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
  - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
  - c. For human health-based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
10. “Critical flow conditions of the receiving water” means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
  - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
  - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
  - c. For human health-based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
11. “Designated use” means a use specified on the Protected Surface Waters List for a non-WOTUS protected surface water.
12. “Domestic water source AZ (DWS AZ)” means the use of a non-WOTUS protected surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.

13. “Fish consumption AZ (FC AZ)” means the use of a non-WOTUS protected surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
14. “Full-body contact AZ (FBC AZ)” means the use of a non-WOTUS protected surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely, and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
15. “Geometric mean” means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$

16. “Hardness” means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO<sub>3</sub>) in milligrams per liter.
17. “Mixing zone” means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
18. “Non-WOTUS protected surface water” means a protected surface water designated in Table A of R18-11-216 or added to the PSWL by an emergency action authorized by A.R.S. §49-221(G)(7) that is not a WOTUS.
19. “Oil” means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
20. “Partial-body contact AZ (PBC AZ)” means the recreational use of a non-WOTUS protected surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and, sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
21. “Pollutant” means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance.
22. “Practical quantitation limit” means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
23. “Recharge Project” means a facility necessary or convenient to obtain, divert, withdraw, transport, exchange, deliver, treat, or store water to infiltrate or reintroduce that water into the ground.
24. “Toxic” means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.

25. “Urban lake” means a manmade lake within an urban landscape.
26. “Wastewater” does not mean:
  - a. Stormwater.
  - b. Discharges authorized under the De Minimus General Permit.
  - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
  - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
27. “Wetland” means, for the purposes of non-WOTUS protected surface waters, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.
28. “WOTUS” means waters of the state that are also navigable waters as defined by Section 502(7) of the Clean Water Act.
29. “WOTUS protected surface water” means a protected surface water that is a WOTUS.
30. “Zone of initial dilution” means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

**R18-11-202. ~~Repealed~~ Applicability**

- A.** The water quality standards prescribed in this Article apply to non-WOTUS protected surface waters.
- B.** The water quality standards prescribed in this Article do not apply to the following:
  1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is part of the waste treatment system;
  2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores including:
    - a. A pit,
    - b. Pregnant leach solution pond
    - c. Raffinate pond,
    - d. Tailing impoundment,
    - e. Decant pond,
    - f. Pond or a sump in a mine put associated with dewatering activity,
    - g. Pond holding water that has come into contact with a process or product that is being held for recycling,
    - h. Spill or catchment pond, or
    - i. A pond used for onsite remediation
  3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
  4. A surface water located on tribal lands.

5. WOTUS Protected Surface Waters

**R18-11-203. ~~Repealed~~ Designated Uses for Non-WOTUS Protected Surface Waters**

- A.** The designated uses for specific non-WOTUS protected surface waters are listed in the Protected Surface Waters List in this article. The designated uses that may be assigned to a non-WOTUS protected surface water are:
1. Full-body contact AZ.
  2. Partial-body contact AZ.
  3. Domestic water source AZ.
  4. Fish consumption AZ.
  5. Aquatic and wildlife AZ (cold water).
  6. Aquatic and wildlife AZ (warm water).
  7. Agricultural irrigation AZ, and
  8. Agricultural livestock watering AZ.
- B.** Numeric water quality criteria to maintain and protect water quality for the designated uses assigned to non-WOTUS protected surface waters are prescribed in R18-11-215. Narrative water quality standards to protect non-WOTUS protected surface waters are prescribed in R18-11-214.
- C.** If a non-WOTUS protected surface water has more than one designated use listed in the Protected Surface Waters List, the most stringent water quality criterion applies.
- D.** The Director shall revise the designated uses of a non-WOTUS protected surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in the Protected Surface Waters List.
- E.** The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria through a rulemaking action for any of the following reasons:
1. A naturally-occurring pollutant concentration prevents the attainment of the use;
  2. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
  3. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the non-WOTUS protected surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
  4. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use.

**R18-11-204. ~~Repealed~~ Interim, Presumptive Designated Uses**

- A.** The following water quality standards apply to a non-WOTUS protected surface water that is not listed on the Protected Surface Waters List but is added on an emergency basis pursuant to A.R.S. § 49-221(G)(7):

1. The aquatic and wildlife AZ (cold water use applies to a non-WOTUS protected surface water above 5000 feet in elevation;
2. The aquatic and wildlife AZ (warm water) applies to a non-WOTUS protected surface water below 5000 feet in elevation;
3. The full-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
4. The partial-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans in a way that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
5. The fish consumption AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
6. The domestic water source AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans as a source of potable water.
7. The agricultural irrigation AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used for crop irrigation.
8. The agricultural livestock watering AZ use applies to any non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used as a water supply for consumption by livestock.

**R18-11-205. ~~Repealed~~ Analytical Methods**

- A.** A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610 or an alternative method approved under A.A.C. R9-14-610(C).
- B.** A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

**R18-11-206. ~~Repealed~~ Mixing Zones**

- A.** The Director may establish a mixing zone for a point source discharge to a non-WOTUS protected surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B.** The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:

1. An identification of the pollutant for which the mixing zone is requested;
  2. A proposed outfall design;
  3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
  4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C.** The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
1. The assimilative capacity of the receiving water;
  2. The likelihood of adverse human health effects;
  3. The location of drinking water plant intakes and public swimming areas;
  4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
  5. Bioaccumulation;
  6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
  7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
  8. The size of the mixing zone;
  9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
  10. The concentration gradient of the pollutant within the mixing zone;
  11. Sediment deposition;
  12. The potential for attracting aquatic life to the mixing zone; and
  13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D.** Director determination.
1. The Director shall deny a request to establish a mixing zone if an applicable water quality standard will be violated outside the boundaries of the proposed mixing zone.
  2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E.** Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F.** The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- G.** Mixing zone requirements.
1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.

2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.

**H.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:

1. Chlordane,
2. DDT and its metabolites (DDD and DDE),
3. Dieldrin,
4. Dioxin,
5. Endrin,
6. Endrin aldehyde,
7. Heptachlor,
8. Heptachlor epoxide,
9. Lindane,
10. Mercury,
11. Polychlorinated biphenyls (PCBs), and
12. Toxaphene.

**R18-11-207. ~~Repealed~~ Natural background**

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is caused solely by naturally occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

**R18-11-208. ~~Repealed~~ Schedules of Compliance**

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;

4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

**R18-11-209. Repealed Variances**

- A.** Upon request, the Director may establish, by rule, a discharger-specific or water segment(s)-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B.** A person who requests a variance must demonstrate all of the following information:
1. Identification of the specific pollutant and water quality standard for which a variance is sought.
  2. Identification of the receiving surface water segment or segments to which the variance would apply.
  3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.
  4. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
  5. Documentation that the proposed term is only as long as necessary to achieve compliance with applicable water quality standards.
  6. Documentation that is appropriate to the type of designated use to which the variance would apply as follows:
    - a. For a water quality standard variance documentation must include a demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
      - i. Naturally occurring pollutant concentrations prevent attainment of the use;
      - ii. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
      - iii. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
      - iv. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification n a way that would result in the attainment of the use;
      - v. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;

- I. The Director shall periodically, but not more than every 5 years, reevaluate whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition during each rulemaking for this Article. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance during the rulemaking.
- J. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
- K. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.

**R18-2-210. ~~Repealed~~ Site Specific Standards**

- A. The Director shall adopt a site-specific standard by rule.
- B. The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
  - 1. Local physical, chemical, or hydrological conditions of a non-WOTUS protected surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
  - 2. The sensitivity of resident aquatic organisms that occur in a non-WOTUS protected surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in R18-2-215;
  - 3. Resident aquatic organisms that occur in a non-WOTUS protected surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in R18-2-215;
  - 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in R18-2-215. "Natural background" means the concentration of a pollutant in a non-WOTUS protected surface water due only to non-anthropogenic sources; or
  - 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a non-WOTUS protected surface water.
- C. Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically defensible procedure.
  - 1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
    - a. Identifies the pollutant;
    - b. Describes the reach's boundaries;
    - c. Describes the hydrologic regime of the waterbody;
    - d. Describes the scientifically defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;

- e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
- f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
- g. Demonstrates that all designated uses are protected; and
- h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration.

**R18-11-211. ~~Repealed~~ Enforcement of Non-permitted Discharges to Non-WOTUS Protected Surface Waters**

- A.** The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B.** Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

**R18-11-212. ~~Repealed~~ Statements of Intent and Limitations on the Reach of Article 2**

- A.** Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.
- B.** Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified as non-WOTUS protected surface waters on the Protected Surface Waters List. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified on the Protected Surface Waters List.
- C.** Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article.
- D.** Nothing in this Article requires the release of water from a dam or a flood control structure.

**R18-11-213. ~~Repealed~~ Procedures for Determining Economic, Social, and Environmental Cost and Benefits.**

- A.** The Director shall perform an economic, social, and environmental cost and benefits analysis that shows the benefits outweigh the costs before conducting any of the following rulemaking actions:
  - 1. Adopting a water quality standard that applies to non-WOTUS protected surface waters at a particular level or for a particular water category of non-WOTUS protected surface waters;

2. Adding a non-WOTUS protected surface water to the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(4) apply; or
3. Removing a non-WOTUS protected surface water from the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(6) apply.

**B.** The economic, social, and environmental cost and benefit analysis must include:

1. A justification of the valuation methodology used to quantify the costs or benefits of the rulemaking action;
2. A reference to any study relevant to the economic, social, and environmental cost and benefit analysis that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of the costs and benefits of the rulemaking action;
3. A description of any data on which an economic, social, and environmental cost and benefits analysis is based and an explanation of how the data was obtained and why the data is acceptable data.
4. A description of the probable impact of the rulemaking on any existing AZPDES permits that are impacted by the rulemaking action;
5. A description of the probable amount of additional AZPDES permits that will be required for known and ongoing point-source discharges after the rulemaking is completed that otherwise would not have been required if the Director did not undertake the rulemaking action; and
6. The administrative and other costs to ADEQ associated with the proposed rulemaking.

**C.** The Director shall publish a copy of the economic, social, and environmental cost and benefits analysis to the agency website prior to filing any rulemaking materials during any of the rulemaking actions listed in subsection (A) of this rule.

**D.** If for any reason enough data is not reasonably available to comply with the requirements of subsection (B) of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms.

**E.** The Director is not required to prepare the economic, social, and environmental cost and benefits analysis required by this rule when:

1. Adding or removing a WOTUS-protected surface water from the Protected Surface Waters List; or
2. Adding a water to the Protected Surface Waters List on an emergency basis pursuant to A.R.S. § 49-221(G)(7).

**R18-11-214. ~~Repealed~~ Narrative Water Quality Standards for Non-WOTUS Protected Surface Waters**

**A.** A non-WOTUS protected surface water shall not contain pollutants in amounts or combinations that:

1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
2. Cause objectionable odor in the area in which the non-WOTUS protected surface water is located;
3. Cause off-taste or odor in drinking water;
4. Cause off-flavor in aquatic organisms;
5. Are toxic to humans, animals, plants, or other organisms;
6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;

7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or

8. Change the color of the non-WOTUS protected surface water from natural background levels of color.

**B.** A non-WOTUS protected surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard

**C.** A non-WOTUS protected surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.

**R18-11-215. Numeric Water Quality Standards for Non-WOTUS Protected Surface Waters**

**A.** *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony-forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

<u><i>E. coli</i></u>	<u>FBC AZ</u>	<u>PBC AZ</u>
<u>Geometric mean (minimum of four samples in 30 days)</u>	<u>126</u>	<u>126</u>
<u>Statistical threshold value</u>	<u>410</u>	<u>576</u>

**B.** pH. The following water quality standards for non-WOTUS protected surface waters pH are expressed in standard units:

<u>pH</u>	<u>DWS AZ</u>	<u>FBC AZ, PBC AZ, A&amp;Ww AZ, A&amp;Wc AZ</u>	<u>AgI AZ</u>	<u>AgL AZ</u>
<u>Maximum</u>	<u>9.0</u>	<u>9.0</u>	<u>9.0</u>	<u>9.0</u>
<u>Minimum</u>	<u>5.0</u>	<u>6.5</u>	<u>4.5</u>	<u>6.5</u>

**C.** The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

<u>A&amp;Ww AZ</u>	<u>A&amp;Wc AZ</u>
<u>3.0° C</u>	<u>1.0° C</u>

**D.** Suspended sediment concentration.

1. The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:
2. The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

<u>A&amp;Wc AZ</u>	<u>A&amp;Ww AZ</u>
<u>25</u>	<u>80</u>

**E.** Dissolved oxygen. A non-WOTUS protected surface water meets the water quality standard for dissolved oxygen when either:

1. The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
2. The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

<u>Designated Use</u>	<u>Single sample minimum concentration in mg/L</u>
<u>A&amp;Ww AZ</u>	<u>6.0</u>
<u>A&amp;Wc AZ</u>	<u>7.0</u>

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

**F.** The tables in this subsection prescribe water quality criteria for individual pollutants by designated use:

**Table 1. Water Quality Criteria by Designated Use (see footnote)**

<u>Parameter</u>	<u>CAS</u>	<u>DWS AZ</u>	<u>FC AZ</u>	<u>FBC AZ</u>	<u>PBC AZ</u>	<u>A&amp;Wc AZ</u>	<u>A&amp;Wc AZ</u>	<u>A&amp;Ww AZ</u>	<u>A&amp;Ww AZ</u>	<u>Aql AZ</u>	<u>Aql</u>
	<u>NUMBER</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>Acute</u>	<u>Chronic</u>	<u>Acute</u>	<u>Chronic</u>	<u>(µg/L)</u>	<u>AZ</u>
						<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>	<u>(µg/L)</u>

Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO<sub>3</sub>, is determined according to the following criteria:

- i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO<sub>3</sub>.
  - ii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables in this rule for the convenience of the user.
- e. pH is determined according to the following criteria:
- i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
  - ii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables in this rule for the convenience of the user.
- f. Table 1 abbreviations.
- i. µg/L = micrograms per liter.
  - ii. mg/kg = milligrams per kilogram.
  - iii. pCi/L = picocuries per liter.
  - iv. D = dissolved.
  - v. T = total recoverable.
  - vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables in this rule for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
- e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
- LN = is the natural logarithm
- CMC = Criterion Maximum Concentration (acute)
- CCC= Criterion Continuous Concentration (chronic)

**Table 12. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Warmwater AZ, Unionid Mussels Present**

For the aquatic and wildlife warmwater AZ uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

**Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Coldwater AZ, Unionid Mussels Absent**

For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

**Table B. WOTUS Protected Surface Waters**

The waters listed in this table have been tentatively identified by ADEQ as WOTUS, under the law governing on 8/26/2022.

Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Further Study Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

**Watersheds:**

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

**Other Abbreviations:**

- WWTP = Wastewater Treatment Plant
- Km = kilometers

<u>Watershed</u>	<u>Surface Water</u>	<u>Segment Description and Location (Latitude and Longitudes are in NAD 83)</u>

**Table C. Historically Regulated as WOTUS and in Need of Confirmation**

The waters listed in this table have historically been and will continue to be regulated as WOTUS. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Further Study Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

**Watersheds:**

- \_\_\_\_\_ BW = Bill Williams
- \_\_\_\_\_ CG = Colorado – Grand Canyon
- \_\_\_\_\_ CL = Colorado – Lower Gila
- \_\_\_\_\_ LC = Little Colorado
- \_\_\_\_\_ MG = Middle Gila
- \_\_\_\_\_ SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- \_\_\_\_\_ SP = San Pedro – Willcox Playa – Rio Yaqui
- \_\_\_\_\_ SR = Salt River
- \_\_\_\_\_ UG = Upper Gila
- \_\_\_\_\_ VR = Verde River

**Other Abbreviations:**

WWTP = Wastewater Treatment Plant

Km = kilometers

**R18-2-217. Best Management Practices for non-WOTUS Protected Surface Waters**

**A.** The BMPs described in this rule are intended to ensure that activities within the ordinary high-water mark of perennial or intermittent non-WOTUS protected surface waters, or within the bed and bank of other waters that materially impact (i.e., are within ¼ mile upstream of) non-WOTUS protected surface waters, do not violate applicable surface water quality standards in the non-WOTUS protected surface waters. For purposes of this section, the activities described in the prior sentence will be referred to as “regulated activities.” Depending on the regulated activities conducted, not all of the BMPs described below may be applicable to a particular project. The owner or operator is responsible to consider the BMPs outlined below and to implement those necessary to ensure that the regulated activities will not violate applicable surface water quality standards in the non-WOTUS protected surface water.

**B.** The BMPs described below are not applicable to any activities that are addressed under an individual or general AZPDES permit that are otherwise regulated under A.R.S. Title 49.

**C.** Erosion and sedimentation control BMPs:

1. When flow is present in any non-WOTUS protected surface waters within a project area, flow shall not be altered except to prevent erosion or pollution of any non-WOTUS protected surface waters.
2. Any disturbance within the ordinary high-water mark of non-WOTUS protected surface waters or within the bed and banks of other waters, that is not intended to be permanently altered, shall be stabilized as soon as practicable to prevent erosion and sedimentation.
3. When flow in any non-WOTUS protected surface water is sufficient to erode, carry, or deposit material, regulated activities shall cease until:
  - a. The flow decreases below the point where sediment movement ceases; or
  - b. Control measures have been undertaken, i.e., equipment and material easily transported by flow are protected within non-erodible barriers or moved outside the flow area.
4. Silt laden or turbid water resulting from regulated activities should be managed in a manner to reduce sediment load prior to discharging.
5. No washing or dewatering of fill material should occur within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters. Other than the replacement of native fill or material used to support vegetation rooting or growth, fill placed within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water must resist washout whether such resistance is derived via particle size limits, presence of a binder, vegetation, or other armoring.

**D.** Pollutant management BMPs:

1. If regulated activities are likely to violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water, operations shall cease until the problem is resolved or until control measures have been implemented.
2. Construction material and/or fill (other than native fill or that necessary to support revegetation) placed within surface waters as a result of regulated activities shall not include pollutants in concentrations that will violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water.

**E.** Construction phase BMPs:

1. Equipment staging and storage areas or fuel, oil, and other petroleum products storage and solid waste containment should not be located within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water.
2. Any equipment maintenance, washing, or fueling shall not be done within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters with the following exception:

- a. Equipment too large or unwieldy to be readily moved, such as large cranes, may be fueled and serviced in non-WOTUS protected surface waters (but outside of standing or flowing water) provided material specifically manufactured and sold as spill containment is in place during fueling/servicing.
  3. All equipment shall be inspected for leaks, all leaks shall be repaired, and all repaired equipment shall be cleaned to remove any fuel or other fluid residue prior to use within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
  4. Washout of concrete handling equipment shall not take place within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
- F.** Post-construction BMPs:
1. Upon completion of regulated activities, areas within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters shall be promptly cleared of all forms, piling, construction residues, equipment, debris, or other obstructions.
  2. If fully, partially, or occasionally submerged structures are constructed of cast-in-place concrete instead of pre-cast concrete, steps will be taken using sheet piling or temporary dams to prevent contact between water (instream and runoff) and the concrete until it cures and until any curing agents have evaporated or are no longer a pollutant threat.
  3. Any permanent water crossings within the ordinary high-water mark of any perennial or intermittent in a non-WOTUS protected surface water (other than fords) shall not be equipped with gutters, drains, scuppers, or other conveyances that allow untreated runoff (due to events equal to or lesser in magnitude than the design event for the crossing structure) to directly enter a non-WOTUS protected surface water if such runoff can be directed to a local stormwater drainage, containment, and/or treatment system.
  4. Debris shall be cleared as needed from culverts, ditches, dips, and other drainage structures within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water to prevent clogging or conditions that may lead to a washout.
  5. Temporary structures constructed or imported materials shall be removed no later than upon completion of the regulated activities.
  6. Temporary structures constructed of native materials, if they provide an obstacle to flow or can contribute to or cause erosion, or cause changes in sediment load, shall be removed no later than upon completion of the regulated activities.
- G.** Design consideration BMPs:
1. All temporary structures constructed of imported materials and all permanent structures, including but not limited to, access roadways, culvert crossings, staging areas, material stockpiles, berms, dikes, and pads, shall be constructed so as to accommodate overtopping and resist washout by streamflow.
  2. Any temporary crossing, other than fords on native material, shall be constructed in such a manner so as to provide armoring of the stream channel. Materials used to provide this armoring shall not include anything easily transportable by flow. Examples of acceptable materials include steel plates, untreated wooden planks, pre-cast concrete planks or

blocks. Examples of unacceptable materials include clay, silt, sand, and gravel finer than cobble (roughly fist-sized). The armoring shall, via mass, anchoring systems, or a combination of the two, resist washout.

**H.** Notification.

1. The owner or operator of any regulated activities shall, five (5) days prior to initiation of the regulated activities, submit a notice to ADEQ on a form that includes basic information including the GPS location, the waterbody ID of the nearest non-WOTUS protected surface water, general description of planned activities, types of BMPs to be employed during the project, and phone number and email for a contact person. Work may proceed after five (5) calendar days have passed since the owner/operator provided notification to ADEQ unless ADEQ responds in writing to the contact person for the owner/operator.

**I.** Exclusions:

1. The BMPS and notification requirements in this section shall not apply to:
  - a. Activities that are already regulated under A.R.S. Title 49.
  - b. Discharges to a non-WOTUS protected surface water incidental to a recharge project.
  - c. Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
  - d. Maintenance but not construction of drainage ditches.
  - e. Construction and maintenance of irrigation ditches.
  - f. Maintenance of structures as dams, dikes, and levees.

**§ R18-11-101. Definitions**

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation (AgI)" means the use of a surface water for crop irrigation.
3. "Agricultural livestock watering (AgL)" means the use of a surface water as a water supply for consumption by livestock.
4. "Annual mean" is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. "Aquatic and wildlife (cold water) (A&Wc)" means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. "Aquatic and wildlife (effluent-dependent water) (A&Wedw)" means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. "Aquatic and wildlife (ephemeral) (A&We)" means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. "Aquatic and wildlife (warm water) (A&Ww)" means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. "Arizona Pollutant Discharge Elimination System (AZPDES)" means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.

11. "Clean Water Act" means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. "Criteria" means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
- a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
  - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
  - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
- a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
  - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
  - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.

17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water, classified under R18-11-113 that consists of a point source discharge of wastewater. An effluent-dependent water is a surface water that, without the point source discharge of wastewater, would be an ephemeral water.
20. "Ephemeral water" means a surface water that has a channel that is at all times above the water table and flows only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the  $n$ th root of the product of  $n$  items or values. The geometric mean is calculated using the following formula:
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate ( $\text{CaCO}_3$ ) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.
27. "Intermittent water" means a stream or reach that flows continuously only at certain times of the year, as when it receives water from a spring or from another surface source, such as melting snow.

28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water that flows continuously throughout the year.
33. *"Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S §49-201(29)*
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macro invertebrates and algae are collected from these reference condition streams for calculating the Arizona Indexes of Biological Integrity thresholds.

37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
- a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
  - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means
- "Navigable waters" as defined in A.R.S. §49-201(22).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH<sub>3</sub>), ammonium ion (NH<sub>4</sub><sup>+</sup>), nitrite (NO<sub>2</sub>), and nitrate (NO<sub>3</sub>), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion

through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.

48. "Urban lake" means a manmade lake within an urban landscape.

49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.

50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.

51. "Wadeable" means a surface water can be safely crossed on foot and sampled without a boat.

52. "Wastewater" does not mean:

a. Stormwater,

b. Discharges authorized under the De Minimus General Permit,

c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or

d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.

53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

**History:**

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Amended effective January 7, 1985 (Supp. 85-1). Amended by

**Ariz. Admin. Code R18-11-101 Definitions (Arizona  
Administrative Code (2022 Edition))**

---

adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) "Navigable Water", previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective 9/10/2019.

Footnotes

a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.

b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.

c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.

d. Hardness, expressed as mg/L CaCO<sub>3</sub>, is determined according to the following criteria:

i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO<sub>3</sub>.

ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO<sub>3</sub>.

iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.

e. pH is determined according to the following criteria:

i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.

ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.

**Table 1 Water Quality Criteria By Designated Use (see f) (Arizona Administrative Code (2022 Edition))**

---

iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.

f. Table 1 abbreviations.

i.  $\mu\text{g/L}$  = micrograms per liter,

ii.  $\text{mg/kg}$  = milligrams per kilogram,

iii.  $\text{pCi/L}$  = picocuries per liter,

iv. D = dissolved,

v. T = total recoverable,

vi. TTHM indicates that the chemical is a trihalomethane.

g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds  $80 \mu\text{g/L}$ , as a rolling annual average.

h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.

i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.

j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.

k. Abbreviations for the mathematical equations are as follows:

$e$  = the base of the natural logarithm and is a mathematical constant equal to 2.71828

$\text{LN}$  = is the natural logarithm

CMC = Criterion Maximum Concentration (acute)

CCC = Criterion Continuous Concentration (chronic)

**History:**

Appendix A repealed; new Appendix A, Table 1 adopted effective April 24, 1996 (Supp. 96-2). Appendix A, Table 1 amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 1 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 1 repealed; new Appendix A, Table 1 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 1 amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

**APPENDIX B. Surface Waters and Designated Uses**

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

**Watersheds:**

BW = Bill Williams

CG = Colorado - Grand Canyon

CL = Colorado - Lower Gila

LC = Little Colorado

MG = Middle Gila

SC = Santa Cruz - Rio Magdalena - Rio Sonoyta

SP = San Pedro - Willcox Playa - Rio Yaqui

SR = Salt River

UG = Upper Gila

VR = Verde River

**Other Abbreviations:**

WWTP = Wastewater Treatment Plant

Km = kilometers

Amended by final rulemaking at 22 A.A.R. 2328, effective 8/2/2016. Amended by final rulemaking at 25 A.A.R. 2515, effective 9/10/2019.

**§ 49-202. Designation of state agency**

A. The department is designated as the agency for this state for all purposes of the clean water act, including section 505, the resource conservation and recovery act, including section 7002, and the safe drinking water act. The department may take all actions necessary to administer and enforce these acts as provided in this section, including entering into contracts, grants and agreements, adopting, modifying or repealing rules, and initiating administrative and judicial actions to secure to this state the benefits, rights and remedies of such acts.

B. The department shall process requests under section 401 of the clean water act for certification of permits required by section 404 of the clean water act in accordance with subsections C through I of this section. Subsections C, D, G and I of this section apply to the certification of nationwide or general permits issued under section 404 of the clean water act. If the department has denied or failed to act on certification of a nationwide permit or general permit, subsections C through I of this section apply to the certification of applications for or notices of coverage under those permits.

C. The department shall review the application for section 401 certification solely to determine whether the effect of the discharge will comply with the water quality standards for WOTUS established by department rules adopted pursuant to section 49-221, subsection A, and section 49-222. The department's review shall extend only to activities conducted within the ordinary high watermark of WOTUS. To the extent that any other standards are considered applicable pursuant to section 401(a)(1) of the clean water act, certification of these standards is waived.

D. The department may include only those conditions on certification under section 401 of the clean water act that are required to ensure compliance with the standards identified in subsection C of this section. The department may impose reporting and monitoring requirements as conditions of certification under section 401 of the clean water act only in accordance with department rules.

E. The department may request supplemental information from the section 401 certification applicant if the information is necessary to make the certification determination pursuant to subsection C of this section. The department shall request this information in writing. The request shall specifically describe the information requested. After receipt of the applicant's written response to a request for supplemental information, the department shall either issue a written determination that the application is complete or request specific additional information. The applicant may

deem any additional requests for supplemental information as a denial of certification for the purposes of subsection I of this section. In all other instances, the application is complete on submission of the information requested by the department.

F. The department shall grant or deny section 401 certification and shall send a written notice of the department's decision to the applicant after receipt of a complete application for certification. Written notice of a denial of section 401 certification shall include a detailed description of the reasons for denial.

G. The department may waive its right to certification by giving written notice of that waiver to the applicant. The department's failure to act on an application is deemed a waiver pursuant to this subsection and section 401(a)(2) of the clean water act.

H. The department shall adopt rules specifying the information the department requires an applicant to submit under this section in order to make the determination required by subsections C and D of this section. Until these rules are adopted, the department shall require an applicant to submit only the following information for certification under this section:

1. The name, address and telephone number of the applicant.
2. A description of the project to be certified, including an identification of the WOTUS in which the certified activities will occur.
3. The project location, including latitude, longitude and a legal description.
4. A United States geological service topographic map or other contour map of the project area, if available.
5. A map delineating the ordinary high watermark of WOTUS affected by the activity to be certified.
6. A description of any measures to be applied to the activities being certified in order to control the discharge of pollutants to WOTUS from those activities.
7. A description of the materials being discharged to or placed in WOTUS.
8. A copy of the application for a federal permit or license that is the subject of the requested certification.

I. Pursuant to title 41, chapter 6, article 10 an applicant for certification may appeal a denial of certification or any conditions imposed on certification.

Any person who is or may be adversely affected by the denial of or imposition of conditions on the certification of a nationwide or general permit may appeal that decision pursuant to title 41, chapter 6, article 10.

J. Certification under section 401 of the clean water act is automatically granted for quarrying, crushing and screening of nonmetallic minerals in ephemeral waters if all of the following conditions are satisfied within the ordinary high watermark of jurisdictional waters:

1. There is no disposal of construction and demolition wastes and contaminated wastewater.
2. Water for dust suppression, if used, does not contain contaminants that could violate water quality standards.
3. Pollution from the operation of equipment in the mining area is removed and properly disposed.
4. Stockpiles of processed materials containing ten percent or more of particles of silt are placed or stabilized to minimize loss or erosion during flow events. for the purposes of this paragraph, "silt" means particles finer than 0.0625 millimeter diameter on a dry weight basis.
5. Measures are implemented to minimize upstream and downstream scour during flood events to protect the integrity of buried pipelines.
6. On completion of quarrying operations in an area, areas denuded of shrubs and woody vegetation are revegetated to the maximum extent practicable.

K. For the purposes of subsection J of this section, "ephemeral waters" means waters of the state that have been designated as ephemeral in rules adopted by the department.

L. Certification under section 401 of the clean water act is automatically granted for any license or permit required for:

1. Corrective actions taken pursuant to chapter 6, article 1 of this title in response to a release of a regulated substance as defined in section 49-1001 except for those off-site facilities that receive for treatment or disposal materials that are contaminated with a regulated substance and that are received as part of a corrective action.
2. Response or remedial actions undertaken pursuant to chapter 2, article 5 of this title or pursuant to CERCLA.

3. Corrective actions taken pursuant to chapter 5, article 1 of this title or the resource conservation and recovery act of 1976, as amended (42 United States Code sections 6901 through 6992).

4. Other remedial actions that have been reviewed and approved by the appropriate government authority and taken pursuant to applicable federal or state laws.

M. The department of environmental quality is designated as the state water pollution control agency for this state for all purposes of CERCLA, except that the department of water resources has joint authority with the department of environmental quality to conduct feasibility studies and remedial investigations relating to groundwater quality and may enter into contracts and cooperative agreements under section 104 of CERCLA for such studies and remedial investigations. The department of environmental quality may take all action necessary or appropriate to secure to this state the benefits of the act, and all such action shall be taken at the direction of the director of environmental quality as the director's duties are prescribed in this chapter.

N. The director and the department of environmental quality may enter into an interagency contract or agreement with the director of water resources under title 11, chapter 7, article 3 to implement the provisions of section 104 of CERCLA and to carry out the purposes of subsection M of this section.

**History:**

Amended by L. 2021, ch. 88,s. 2, eff. 9/29/2021. Amended by L. 2021, ch. 325,s. 3, eff. 9/29/2021.

**§ 49-203. Powers and duties of the director and department**

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
  - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
  - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
  - (c) Maintenance but not construction of drainage ditches.
  - (d) Construction and maintenance of irrigation ditches.
  - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.

7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter except for those fees associated with the dredge and fill permit program established pursuant to article 3.2 of this chapter. For services provided under the dredge and fill permit program, a state agency shall pay either:
  - (a) The fees established by the department under the dredge and fill permit program.
  - (b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.

12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before the adoption of these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.

13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.

2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1, 3.2 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter

to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

9. Adopt by rule a permit program for the discharge of dredged or fill material into WOTUS for purposes of implementing the permit program established by 33 United States Code section 1344.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the

**ARS 49-203 Powers and duties of the director and department  
(Arizona Revised Statutes (2022 Edition))**

---

consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

**History:**

Amended by L. 2022, ch. 204,s. 1, eff. 9/23/2022. Amended by L. 2021, ch. 325,s. 5, eff. 9/29/2021. Amended by L. 2018, ch. 280,s. 2, eff. 8/3/2018. Repealed by L. 2018, ch. 225,s. 11, eff. August 1, 2023 unless the U.S. E.P.A. approves the department of environmental quality's clean water act section 406 . Amended by L. 2018, ch. 225,s. 4, eff. 8/3/2018. Amended by L. 2018, ch. 170,s. 1, eff. 8/3/2018.

**§ 49-221. Water quality standards in general; protected surface waters list**

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-wotus protected surface waters, the director shall Apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to Paragraph 2 of this subsection. Rules regarding the following shall Not be adopted or applied as water quality standards for non-wotus Protected surface waters:

(a) Antidegradation.

(b) antidegradation Criteria.

(c) outstanding arizona Waters.

2. Adopt, by rule, water quality standards for Non-wotus protected surface waters, by December 31, 2022, Consistent with paragraph 1 of this subsection and as determined Necessary in the rulemaking process. In adopting those standards, The director shall consider the unique characteristics of this State's surface waters and the economic, social and Environmental costs and benefits that would result from the Adoption of a water quality standard at a particular level or for a Particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

1. The protection of the public health and the environment.

2. The uses that have been made, are being made or with reasonable probability may be made of these waters.

3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

1. The protection of public health and the environment.
2. The uses that are being made or may be made of the reclaimed water.
3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

(i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.

(ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected Surface waters list. The department shall publish the initial list On the department's website and in the arizona administrative Register within thirty days after the effective date of this Amendment to this section. Not later than december 31, 2022, the Department shall adopt by rule the protected surface waters list, Including procedures for determining economic, social and Environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action Pursuant to title 41, chapter 6, article 10 and may be appealed by Any party that provides evidence of an actual adverse effect that The party appealing the decision would suffer as a result of the Director's decision. All of the following apply to the Protected surface water list:

1. The protected surface waters list shall Include:

(a) All WOTUS.

(b) Any perennial, intermittent and Ephemeral reaches and any impoundments of the following rivers, not Including tributaries or reaches of waters wholly within tribal Jurisdiction or reaches of waters outside of the united States:

(i) The bill williams river, from the Confluence of the big sandy and santa maria rivers at 113°31'38.617"W, 34°18'22.373"N, To its Confluence with the colorado river at 114°8'9.854"W, 34°18'9.33"N.

(ii) The colorado river, from the Arizona-utah border at 111°32'35.741"W, 36°58'51.698"N, To the arizona-mexico border at 114° 43'12.564"W, 32°43'6.218"N.

(iii) The gila river, from the Arizona-new mexico border at 109°2'52.8"W, 32°41'11.2015"N, To the confluence with the colorado River at 114°33'28.145"W, 32°43'14.408"N.

(iv) The little colorado river, from The confluence of the east and west forks of the little colorado River at 109°28'7.131"W, 33°59'39.852"N, to its confluence with the colorado river at 111°49'4.693"W, 36°12'10.243"N.

(v) The salt river, from the Confluence of the black and white rivers at 110°13'39.5"W, 33°44'6.082"N, To the Confluence with the Gila river AT 112°18'5.704"W, 33°22'42.978"N.

(vi) The san pedro river, from the Arizona-mexico border at 110°9'1.704"W, 31°20'2.387"N, To the confluence with the gila river At 110°47'0.905"W, 32°59'5.671"N.

(vii) The santa cruz river, from its Origins in the canelo hills of southeastern arizona at 110°37'3.968"W, 31°27'39.21"N, To its Confluence with the Gila river AT 111°33'26.02"W, 32°41'39.058"N.

(viii) The verde river, from sullivan Lake at 112°28'10.588"W, 34°52'11.136"N, To its confluence with the Salt river at 111°39'48.32"W, 33°33'20.538"N.

(c) any non-wotus waters of the state That are added under paragraphs 3 and 4 of this Subsection.

2. notwithstanding paragraph 1 of this subsection, the Protected surface waters list shall not contain any of the Following non-WOTUS waters:

(a) Canals in the yuma project and Ditches, canals, pipes, impoundments and other facilities that are Operated by districts organized under Title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for Human consumption, except when added pursuant to paragraph 4 of This subsection and in response to a written request from the owner And operator of the ditch or canal until the owner and operator Withdraws its request.

(b) irrigated areas, including fields Flooded for agricultural production.

(c) Ornamental and urban ponds and Lakes such as those owned by homeowners' associations and golf Courses, except when added pursuant to

paragraph 4 of this Subsection and in response to a written request from the owner of The ornamental or urban pond or lake until the owner withdraws its Request.

(d) swimming pools and other bodies Of water that are regulated pursuant to section 49 \_ 104, Subsection b.

(e) Livestock and wildlife water Tanks and aquaculture tanks that are not constructed within a Protected surface water.

(f) stormwater control features.

(g) Groundwater recharge, water reuse And wastewater recycling structures, including underground storage Facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when Added pursuant to paragraph 4 of this subsection and in response to A written request from the owner of the groundwater recharge, water Reuse or wastewater recycling structure until the owner withdraws Its request.

(h) Water-filled depressions created As part of mining or construction activities or pits excavated to Obtain fill, sand or gravel.

(i) All waste treatment systems Components, including constructed wetlands, lagoons and treatment Ponds, such as settling or cooling ponds, designed to either convey Or retain, concentrate, settle, reduce or remove pollutants, either Actively or passively, from wastewater before discharge or to Eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those Prescribed in paragraph 1, subdivision (b) of This subsection.

(l) Lakes and ponds owned and managed By the united states department of defense and other surface waters Located on and that do not leave united states department of Defense property, except when added pursuant to paragraph 4 of this Subsection and in response to a written request from the united States department of defense until it withdraws its Request.

3. Unless listed in paragraph 2 of this subsection, the Director shall add the following non-wotus surface waters to the Protected surface waters list:

(a) all lakes, ponds and reservoirs That are public waters used as a drinking source, for recreational Or commercial fish consumption or for water-based

recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent Waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent Tributaries to the bill williams river, the colorado river, the Gila river, the little colorado river, the salt river, the san Pedro river, the santa cruz river and the verde river.

(d) Perennial or intermittent public Waters used for recreational or commercial fish Consumption.

(e) perennial or intermittent public Waters used for water-based recreation such as swimming, wading, Boating and other types of recreation in and on the Water.

(f) perennial or intermittent Wetlands adjacent to waters on the protected surface waters List.

(g) perennial or intermittent waters Of the state that cross into another state, the Republic of Mexico Or the reservation of a federally recognized tribe.

4. the director may add additional non-wotus surface Waters to the protected surface waters list if all of the following Apply:

(a) the water is not required to be Listed under paragraph 1 or 3 of this subsection.

(b) the water is not excluded under Paragraph 2 of this subsection.

(c) the economic, environmental and Social benefits of adding the water outweigh the economic, Environmental and social costs of excluding the water from the List.

5. the director shall remove any erroneously listed, Non-wotus waters from the protected surface waters list when the Water is excluded under paragraph 2 of this subsection and shall Not regulate discharges to those waters in the Interim.

6. the director shall remove non-wotus waters from the Protected surface waters list when the water is not required to be Listed under paragraph 3 of this subsection and the economic, Environmental and social benefits of removing the water outweigh The economic, environmental and social costs of retaining the water On the list.

7. the director, on an emergency basis, may add a water To the protected surface waters list if the director discovers an Imminent and substantial danger to public health or welfare or the Environment, if the water would otherwise qualify to be added under Paragraph 3 of this subsection. Notwithstanding any other law, the Emergency addition shall take effect immediately on the Director's determination that describes the imminent and Substantial danger in writing. Within thirty days after the Director's determination, the department shall publish a notice Of that determination in the arizona administrative register and on The department's website. Waters added under this subsection Shall be incorporated into the protected surface waters list during The next rulemaking that follows the addition.

**History:**

Amended by L. 2021, ch. 325,s. 7, eff. 9/29/2021. Amended by L. 2018, ch. 48,s. 46, eff. 8/3/2018.

**§ 49-222. Water quality standards for WOTUS**

A. Standards for the quality of WOTUS shall assure water quality, if attainable, which provides for protecting the public health and welfare, and shall enhance the quality of water taking into consideration its use and value for public water supplies, the propagation of fish and wildlife and recreational, agricultural, industrial and other purposes including navigation.

B. The director shall adopt standards for the quality of all WOTUS that establish numeric limitations on the concentrations of each of the toxic pollutants listed by the administrator pursuant to section 307 of the clean water act (33 United States Code section 1317).

C. In setting numeric standards for the quality of WOTUS, the director may consider the effect of local water quality characteristics on the toxicity of specific pollutants and the varying sensitivities of local affected aquatic populations to such pollutants, and the extent to which the natural flow of the stream is intermittent or ephemeral, as a result of which the instream flow consists mostly of treated wastewater effluent, except that such standards shall not, in any event, be inconsistent with the clean water act. In applying such standards the director may establish appropriate mixing zones.

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - REGULAR RULEMAKING

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 7, 2022

**SUBJECT: SCHOOL FACILITIES BOARD**  
Title 7, Chapter 6

**Amend:** R7-6-101, R7-6-205, R7-6-210, R7-6-211, R7-6-213, R7-6-215, R7-6-216, R7-6-220, R7-6-221, R7-6-227, R7-6-230, R7-6-235, R7-6-245, R7-6-246, R7-6-247, R7-6-258, R7-6-265, R7-6-270, R7-6-271, R7-6-275, R7-6-276, R7-6-301, R7-6-302, Article 5, R7-6-501, R7-6-502, R7-6-503, R7-6-504, R7-6-505, R7-6-506,

**Repeal:** R7-6-251, R7-6-260, R7-6-261, Article 6, R7-6-601

---

### **Summary:**

This regular rulemaking from the School Facilities Board (Board) seeks to amend twenty-nine (29) rules and repeal four (4) rules in Title 7, Chapter 6, Articles 1, 2, 3, 5, and 6 related to minimum standards for school facilities and equipment. Specifically, the Board indicates its rules were made in 2001. While some of the rules were amended in 2020 through an expedited rulemaking, the Board indicates the remaining rules have become inconsistent with current industry standards and Board practice, technological changes, and best practices regarding education. The Board indicates these rules are being updated to address these issues and implement recommendations identified in a Five-Year Review Report (5YRR) approved by the Council on November 3, 2020.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Board cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Board indicates it did not review or rely on any study in conducting this rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Board determined the following changes will have economic impact:

- R7-6-211, Classroom Fixtures and Equipment, is amended to allow electronic as well as non-electronic surfaces for classroom use. Electronic surfaces are more expensive than non-electronic surfaces. The estimated difference in cost is from \$300 to \$4,200 per surface depending on the kind chosen. A school facility requires multiple surfaces.
- R7-6-215, Classroom Air Quality, reduces the acceptable CO<sub>2</sub> level to 700 PPM above the ambient CO<sub>2</sub> level. This makes the requirement consistent with current industry standards. The Board estimates the cost of meeting this standard will be approximately \$75/unit annually.
- R7-6-221, Equipment for Learning and Technology Center, substitutes a multimedia display for a TV in the center. Depending on the kind of multimedia display chosen, the Board estimates an additional cost of \$1,920 to \$4,000 per unit.
- R7-6-235, Technology, requires a network connected multimedia device for every student rather than one device for every eight students. If each device costs approximately \$300, the cost to provide a device for each student rather than for every eight students would result in an increase of \$2,100/eight students.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The updated minimum standards are not intrusive. The minimum standards are consistent with industry standards and best practices regarding education. No alternative standards were considered.

6. **What are the economic impacts on stakeholders?**

School districts and the Board will be directly affected by, bear the costs of, and directly benefit from this rulemaking. School districts are required to ensure school facilities in the district meet the minimum standards. Because both the new school facilities and building renewal funds receive legislative appropriations, it is taxpayers who ultimately bear the costs of and directly benefit from this rulemaking.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Board indicates, between the Notice of Proposed Rulemaking and the Notice of Supplemental Proposed Rulemaking, multiple Sections were added; internal citations were corrected; the name of the Board was corrected; Article 6 was repealed; and changes were made to comply with requirements of the Secretary of State.

Between the Notice of Supplemental Proposed Rulemaking and the Notice of Final Rulemaking now before the Council, in response to stakeholder feedback, the Board indicates rule R7-6-502(E)(6) was revised to retain use of the word “contingency” rather than change it to “retention.” Council staff does not believe this change constitutes a substantially different rule pursuant to A.R.S. § 41-1025.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Board indicates that it received one (1) written comment from Carmen Wyckoff of the DLR Group, a copy of which is included in the final materials for the Council’s reference. The comment suggested, in rule R7-6-502(E)(6), the Board retain use of the word “contingency” rather than change it to “retention.” The Board made this revision as outlined above. The Board indicates no comments were made by persons who attended oral proceedings on June 28, 2022.

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rules do not require a permit, license, or agency authorization.

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Board indicates federal civil rights laws prohibiting discrimination are applicable to school facilities. The Board states the rules are not more stringent than federal law.

## **11. Conclusion**

This regular rulemaking from the Board seeks to amend twenty-nine (29) rules and repeal four (4) rules in Title 7, Chapter 6, Articles 1, 2, 3, 5, and 6 related to minimum standards for school facilities and equipment. The Board indicates its rules were made in 2001. While some of the rules were amended in 2020 through an expedited rulemaking, the Board indicates the remaining rules have become inconsistent with current industry standards and Board practice, technological changes, and best practices regarding education. The Board indicates these rules are being updated to address these issues and implement recommendations identified in a 5YRR approved by the Council on November 3, 2020.

The Board is seeking the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A). Council staff recommends approval of this rulemaking.

Ms. Nicole Sornsin, Chair  
The Governor's Regulatory Review Council  
100 North 15th Avenue, Ste. 305  
Phoenix, AZ 85007

**Re: A.A.C. Title 7. Education  
Chapter 6. School Facilities Oversight Board**

Dear Ms. Sornsin:

The attached final rule package is submitted for review and approval by the Council. The following information is provided for Council's use in reviewing the rule package:

- A. Close of record date: The rulemaking record was closed on June 28, 2022, following a period for public comment and an oral proceeding. This rule package is being submitted within the 120 days provided by A.R.S. § 41-1024(B).
- B. Relation of the rulemaking to a five-year-review report: The rulemaking relates, in part, to a five-year-review report approved by the Council on November 3, 2020.
- C. New fee: The rulemaking does not establish a new fee.
- D. Fee increase: The rulemaking does not increase an existing fee.
- E. Immediate effective date: An immediate effective date is not requested.
- F. Certification regarding studies: I certify the preamble accurately discloses the Board did not review or rely on a study in its evaluation of or justification for any rule in this rulemaking.
- G. Certification that the preparer of the EIS notified the JLBC of the number of new full-time employees necessary to implement and enforce the rule: I certify that none of the rules in this rulemaking will require a state agency to employ a new full-time employee. No notification was provided to JLBC.

H. List of documents enclosed:

1. Cover letter signed by the Administrator;
2. Notice of Final Rulemaking including the preamble, table of contents, and rule text;
3. Economic, Small Business, and Consumer Impact Statement

Sincerely,

A handwritten signature in black ink, appearing to read "Jack Smith", written in a cursive style.

Jack Smith  
Administrator

**2. Citations to the agency's statutory rulemaking authority to include both the authorizing statute (general) and the implementing statute (specific):**

Authorizing statute: A.R.S. §§ 41-5702(C)(6) and 41-5711(F)

Implementing statute: A.R.S. § 41-5711(F)

**3. The effective date for the rules:**

As specified under A.R.S. § 41-1032(A), the rule will be effective 60 days after the rule package is filed with the Office of the Secretary of State.

**a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**

Not applicable

**b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):**

Not applicable

**4. Citation to all related notices published in the Register to include the Register as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:**

Notice of Rulemaking Docket Opening, 27 A.A.R. 1661, October 8, 2021

Notice of Proposed Rulemaking, 27 A.A.R. 1617, October 8, 2021

Notice of Rulemaking Docket Opening, 28 A.A.R. 1154, May 27, 2022

Notice of Supplemental Proposed Rulemaking, 28 A.A.R. 1093, May 27, 2022

**5. The agency's contact person who can answer questions about the rulemaking:**

Name: Jack Smith, Administrator

Address: 100 N 15th Avenue, Suite 301

Phoenix, AZ 85007

Telephone: 602-421-1882

E-mail: [jack.smith@azdoa.gov](mailto:jack.smith@azdoa.gov)

Website: <https://sfb.az.gov>

**6. An agency's justification and reason why a rule should be made, amended, repealed , or renumbered, to include an explanation about the rulemaking:**

The Board's rules were made in 2001. Some of the rules were amended in 2020 through an expedited ruling making but no substantive changes were made at that time. As a result, the rules have become inconsistent with current industry standards and Board practice, technological changes, and best practices regarding education. The rules are being updated to address these issues and implement recommendations identified in a five-year-review report approved by the Council on November 3, 2020.

An exemption from Executive Order 2022-01 was provided for this rulemaking by Kaitlin Harrier, Director of the Governor's Office of Education, on March 8, 2022. Approval to submit the rulemaking to GRRC was provided by Ms. Harrier in an e-mail dated October 3, 2022.

**7. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The Board did not review or rely on a study in its evaluation of or justification for any rule in this rulemaking.

**8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

**9. A summary of the economic, small business, and consumer impact:**

The Board expects the rule amendments will have some economic impact. For example:

- R7-6-211, Classroom Fixtures and Equipment, is amended to allow electronic as well as non-electronic surfaces for classroom use. Electronic surfaces are more expensive than non-electronic surfaces. The estimated difference in cost is from \$300 to \$4,200 per surface depending on the kind chosen. A school facility requires multiple surfaces.
- R7-6-215, Classroom Air Quality, reduces the acceptable CO<sup>2</sup> level to 700 PPM above the ambient CO<sup>2</sup> level. This makes the requirement consistent with current industry standards. The Board estimates the cost of meeting this standard will be approximately \$75/unit annually.

- R7-6-221, Equipment for Learning and Technology Center, substitutes a multimedia display for a TV in the center. Depending on the kind of multimedia display chosen, the Board estimates an additional cost of \$1,920 to \$4,000 per unit.
- R7-6-235, Technology, requires a network connected multimedia device for every student rather than one device for every eight students. If each device costs approximately \$300, the cost to provide a device for each student rather than for every eight students would result in an increase of \$2,100/eight students.

**10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:**

Between the Notice of Proposed Rulemaking and the Notice of Supplemental Proposed Rulemaking, multiple Sections were added; internal citations were corrected; the name of the Board was corrected; Article 6 was repealed; and changes were made to comply with requirements of the Secretary of State.

The only change made between the Notice of Supplemental Proposed Rulemaking and the Notice of Final Rulemaking is described in item 11.

**11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to comments:**

The Board received one written comment from Carmen Wyckoff of the DLR Group. She suggested that in R7-6-502(E)(6), the Board retain use of the word “contingency” rather than change it to “retention.” The Board appreciates the comment and made the suggested change. The change is not substantial under the terms of A.R.S. § 41-1025(B). No comments were made by persons who attended the oral proceeding on June 28, 2022.

**12. All agencies shall list any other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

Under A.R.S. § 41-5711(J), the Board is required to submit a copy of a fiscal impact statement prepared with this rulemaking for review by the Joint Committee on Capital Review. The Board provided a copy of the economic impact statement required under A.R.S. § 41-1055 to the Joint Committee on Capital Review. The Committee gave a favorable review to the economic impact statement at a meeting on September 21, 2022.

**a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

The Board does not issue licenses or permits.

**b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

Civil rights laws prohibiting discrimination are federal laws applicable to school facilities. The rules are not more stringent than federal law.

**c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

No analysis was submitted.

**13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rule:**

None

**14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:**

None of the rules in the rulemaking was previously made, amended, or repealed as an emergency rule.

**15. The full text of the rules follows:**

## ARTICLE 1. DEFINITIONS

### R76101. Definitions

The definitions at A.R.S. §§ ~~15-2032~~ 41-5701 and 41-5711 apply to this Chapter. Additionally, unless otherwise specified, in this Chapter:

1. “Ambient CO<sup>2</sup> level” means the carbon dioxide level of the outside air.
2. “All-weather surface” means an area for vehicular use or parking that is surfaced with asphalt, concrete, chip seal, graded and compacted gravel, or other stabilized system.
3. ~~“Board” means the School Facilities Board.~~
- 4.3. “Decibel” means a unit for expressing the relative intensity of sounds.
- 5.4. “Eligible students” has the same meaning as prescribed at A.R.S. § 15-901.
- 6.5. “Equipment” means an item not affixed to the real property of a school facility.
- 7.6. “Exterior envelope” means the exterior walls, floor, and roof of a building.
- 8.7. “Fixture” means an item affixed to the real property of a school facility.
- 9.8. “Foot-candle” means the amount of illumination the inside surface of a one-foot-radius sphere would receive from a candle 7/8 inch in diameter burning at the exact center of the sphere at 7.776 grams per hour.
- 10.9. “FTE” means full-time equivalent.
- 11.10. “General classroom” means a space that can be configured for instruction in at least the areas of language arts, mathematics, and social studies.
- 12.11. “HVAC” means a heating, ventilation, and air conditioning system. The air conditioning system may or may not be refrigerated.
- 13.12. “IEP” means individualized educational plan, a legal document required by law for each public school child who needs special education.
- 14.13. “Normal conditions” means occupancy during regular school hours while the building system is operating.
- 15.14. “PPM” means parts per million.
- 16.15. “Random sample” means arbitrary selection through a process in which each classroom in each building has an equal chance of being selected.
- 17.16. “School facility” means a building or group of buildings and outdoor area that are administered together to comprise a school campus.
- 18.17. “School site” means one or more parcels of land where a school facility is located. More than one school facility may be located on a school site.
- 19.18. “Specialty classroom” means classroom square footage specifically designed for instruction in science, physical education, career and technical education, or art.

~~20-19.~~ “Student” means an individual:

- a. Enrolled at a school facility; and
- b. In average daily membership, which is defined at A.R.S. § 15-901.

~~2+20.~~ “Student body” means the number of students at a school facility.

## **ARTICLE 2. MINIMUM SCHOOL FACILITY GUIDELINES**

### **R76205. School Site**

- A.** A school ~~district shall ensure a school~~ site ~~shall have~~ has safe access, parking, drainage, and security to accommodate a school facility that complies with:
1. The minimum gross square footage requirements established in A.R.S. § ~~15-2011~~ 41-5711(C), for the number of students at the school facility; and
  2. This Chapter.
- B.** A school site provides safe access by having:
1. A student drop-off area; and
  2. A pedestrian pathway that allows students to enter the school facility through a designated point of entry without crossing vehicular traffic or by crossing vehicular traffic at a designated crosswalk.
- C.** A school site provides adequate parking by having an all-weather surface area large enough to accommodate one parking space per staff FTE and one visitor parking space per 100 students. A school site that is unable to provide adequate parking may have the sufficiency of parking at the school site determined by the Board using the following criteria:
1. Availability of street parking around the school facility;
  2. Availability of any nearby parking lots;
  3. Availability of public transit;
  4. Number of staff who drive to work on a daily basis; and
  5. The average number of visitors on a daily basis.
- D.** A school site provides adequate drainage if the school site is prepared in a manner consistent with the drainage and floodplain management standards of the jurisdiction in which the school site is located.
- E.** A school site provides adequate security if:
1. ~~there~~ There is a fenced or walled, outdoor, play or physical education area for preschool ~~students~~ children with disabilities and students in kindergarten through grade six. A school site that is unable to provide adequate security may have the sufficiency of security at the school site determined by the Board using the following criteria:
    - ~~1-a.~~ Amount of vehicular traffic near the school site;

- ~~2-b.~~ Existence of hazardous or natural barriers on or near the school site;
- ~~3-c.~~ The amount of animal nuisance near the school site; and
- ~~4-d.~~ Visibility of the outdoor, play or physical education area; and
- 2. The emergency response plan required under A.R.S. § 15-341(A) has been developed.

**R7-6-210. Classroom Square Footage**

- A. A school district shall have school facilities with the following minimum cumulative classroom square footage:
  - 1. For preschool ~~students~~ children with disabilities through grade three: 32 square feet per student;
  - 2. For grades four through six: 28 square feet per student;
  - 3. For grades seven and eight: 26 square feet per student; and
  - 4. For grades nine through 12: 25 square feet per student.
- B. Classroom square footage of a school facility is measured from interior wall to interior wall of a classroom and is the space required for teaching. Both general and specialty classrooms are included in the classroom square footage of a school facility.
- C. Cumulative classroom square footage is measured as follows:
  - 1. 100 percent of the classroom square footage usable for general classroom purposes and occupied throughout a day by the same students in programs for preschool ~~students~~ children with disabilities, kindergarten, and grades one through six;
  - 2. 90 percent of the classroom square footage usable for general and specialty classroom purposes in programs for students in grades seven and eight; and
  - 3. 85 percent of the classroom square footage usable for general and specialty classroom purposes in programs for students in grades nine through 12.
- D. Classroom square footage includes space allocated for any of the following purposes:
  - 1. Garment storage,
  - 2. Supply storage,
  - 3. Work counter; and
  - 4. Teacher or student collaboration.
- ~~E. An exterior space may be included in the classroom square footage of a school facility if the exterior space is covered and meets all other standards in this Chapter.~~

**R76211. Classroom Fixtures and Equipment**

Each general and specialty classroom shall:

1. Contain a work surface and seat for each student, teacher, and other individual regularly assigned to the classroom. The work surface and seat shall be:
  - a. Appropriate for the normal activity of the class conducted in the room, and
  - b. Capable of being moved into different configurations;
2. Have at least one or more, non-electronic or electronic, mounted or retractable, ~~surfaces~~ surface, at least three feet by five feet, which ~~fulfill~~ fulfills all of the following purposes:
  - a. Is erasable,
  - b. Is suitable for projection, and
  - c. Is suitable for display;
3. Have storage for classroom materials or conveniently accessible storage; and
4. Have secure storage for student records or conveniently accessible secure storage. Student records may be stored electronically.

**R76213. Classroom Temperature**

- ~~A.~~ A school facility shall have an HVAC or other system capable of maintaining a temperature between 68° and 82° F under normal conditions with an occupied classroom.
- ~~B.~~ ~~Except in areas where the elevation is above 5,000 feet, defective or non-operable air conditioners and evaporative coolers shall be replaced with air conditioning. Non-air conditioned schools with elevations less than 5,000 feet shall be air conditioned.~~

**R76215. Classroom Air Quality**

The CO<sup>2</sup> level in each general and specialty classroom shall not exceed ~~800~~ 700 PPM above the ambient CO<sup>2</sup> level.

**R7-6-216. Measuring Classroom Comfort**

To determine whether a school facility complies with the standards in R7-6-212 through R7-6-215:

1. Classroom lighting, temperature, acoustics, and air quality shall be measured at a work surface in the approximate center of a classroom under normal conditions; and
2. Measuring shall be performed for a random sample of 10 percent of the general, science, and art classrooms in each building of the school facility; ~~and~~
3. ~~All portable or modular buildings manufactured in the same year and installed at the school facility at the same time are considered a single building.~~

**R7-6-220. Learning and Technology Center**

- A. A school facility shall have a learning and technology center with space for students to access electronic and hard-copy research and reading materials. The learning and technology center shall include space for reading, listening, and viewing materials.
- B. For an elementary school facility ~~that serves at least 150 students~~, the learning and technology center shall have space equal to the ~~greater~~ lesser of 1000 square feet or the square footage equal to 20 square feet per student for 10 percent of the student body.
- C. For a middle or junior high or high school facility that serves at least 150 students, the learning and technology center shall have space equal to the ~~greater~~ lesser of 1200 square feet or the square footage equal to 20 square feet per student for 10 percent of the student body.

**R7-6-221. Equipment for Learning and Technology Center**

- A. The learning and technology center of a school facility shall contain the following minimum equipment:
  - ~~1. One linear foot of book shelf space per student;~~
  - ~~2.1. For a school facility of 150 or more students, one~~ One work surface and seat for every 20 students, minimum of 15, maximum of 75;
  - ~~3.2. One TV~~ multimedia display;
  - ~~4.3. Projection equipment and projection surface;~~
  - ~~5.4. Ten books per student; and~~
  - ~~6.5. An electronic or hard copy of each of the following:~~
    - a. Almanac,
    - b. Encyclopedia,
    - c. Atlas, and
    - d. Unabridged dictionary.
- B. If a hard-copy almanac, encyclopedia, or atlas is used, each shall have a publication date of ~~2000~~ 2015 or later.

**R7-6-227. Equipment List for Food Service**

- A. A school facility that receives, stores, prepares, and serves food to students shall have the following fixtures and equipment:
  - 1. One three-compartment sink,
  - 2. One double-stack oven or a warming oven,

3. One dishwasher if reusable dishes and silverware are used,
4. One hot-food holding appliance,
5. One range with hood,
6. One refrigerator,
7. One freezer, and
8. One milk refrigerator.

**B.** An alternative may be substituted for any item in subsection (A) if the alternative enables the school facility to receive, store, prepare, and serve food to students.

**C.** A school facility that receives, stores, and serves food prepared off the school site may ~~adjust~~ substitute equipment required for a warming kitchen for the items in subsection (A) ~~accordingly~~.

### **R7-6-230. Multiuse Space**

A school facility shall have a space capable of being used for student assembly. The space shall be:

1. Large enough to accommodate one-third of the student body, and
2. The same size or larger than an average classroom at the school facility, ~~and~~
3. ~~At least seven square feet multiplied by one-third of the student body in addition to the square footage of open aisle and exiting path space.~~

### **R76235. Technology**

A school facility shall provide at least one network connected multimedia device, ~~available for student use~~, for every ~~eight students~~ student. A multimedia device is a computer, tablet, or other smart device with internet access capable of presenting multimedia content.

### **R76245. Science Facilities**

**A.** A school facility with students in grades five through 12 shall have classroom square footage for delivery of practical instruction in science.

1. For grades five through eight, no classroom square footage is required other than as specified in R7-6-210.
2. For grades nine through 12, four square feet per student is required for practical instruction in science. The space shall not be smaller than the average classroom at the facility and may be used for other instruction when not needed for practical instruction in science.

- ~~B. Except as specified in R7-6-251, a~~ A school facility with students in grades five through 12 shall have the science fixtures and equipment specified in R7-6-246 for delivery of practical instruction in science.

**R7-6-246. Equipment List for Science Facilities**

- A. ~~Science facilities for~~ A school facility with students in grades nine through 12 shall have the following science-facility fixtures and equipment:
1. One demonstration table with non-corrosive surface per 250 students;
  2. Six laboratory stations with a non-corrosive surface per 250 students;
  3. One fume hood;
  4. One chemical storage unit per 1,000 students;
  5. One eyewash or safety shower station per 250 students;
  6. Access to one ~~dissecting~~ microscope per 25 students, minimum of 12 microscopes or the number equal to one-half the number of students in grades nine through 12 divided by 25, whichever is fewer; and
  7. One refrigerator.
- B. ~~Science facilities for~~ A school facility with students in grades five through 12 shall have the following science-facility fixtures and equipment:
1. One sink per 250 students;
  2. Access to one ~~compound~~ microscope per 25 students, minimum of 12 microscopes or the number equal to one-half the number of students in grades five through 12 divided by 25, whichever is fewer; and
  3. One balance per 250 students.

**R7-6-247. Arts Facilities; Career and Technical Education Facilities**

- A. ~~Except as specified in R7-6-251, a~~ A school facility with students in grades seven through 12 shall have space to deliver art education programs, including visual, music, and performing arts, and career and technical education programs.
- B. A school facility with students in grades seven through 12 shall have four square feet per student of space for art education and/or career and technical education. The space shall not be smaller than the average classroom at the facility and may be used for other instruction when not needed for instruction in the arts or career and technical education.

- C. A school facility with students in kindergarten through sixth grade may deliver art education in the classroom square footage specified in R7-6-210. Education in performing arts may be delivered to students in kindergarten through sixth grade in spaces such as a multiuse space, gymnasium, or cafeteria ~~if the spaces have appropriate acoustical treatment.~~

**R7-6-251. ~~Alternative Delivery Method Repealed~~**

~~A school district may use an alternative method to deliver instruction in art, science, or career and technical education. Before an alternative method is used, the school district shall:~~

- ~~1. Have the school district governing board determine the alternative method is capable of meeting the requirements established in the academic standards prescribed by the State Board of Education for the specific subject; and~~
- ~~2. Approve use of the alternative method.~~

**R76258. Administrative Space**

- A. A school facility shall have space for use by the administration of the school facility. For the school administrator, 150 designated square feet is required. For general administrative purposes, a space between 150 square feet and 1.5 square feet per student, as reasonable for the size of the anticipated student body, is required. ~~The maximum may be exceeded.~~
- B. A school facility shall have a dedicated space in which to isolate a sick student from the other students. This space shall be accessible to a restroom and large enough to accommodate one cot per 200 students, with a maximum of four cots.
- C. A school facility shall have work space available to the faculty that is in addition to any work space in or near a classroom. A space between 150 square feet and one square foot per student, as reasonable for the size of the anticipated student body, is required. The faculty work space may be in multiple locations throughout the school facility and may have more than one function.

**R76260. ~~Laws and Building Codes Repealed~~**

- ~~A. To the extent required by law, school buildings shall be in compliance with federal, state and local building and fire codes and laws that are applicable to the particular building. Existing school buildings are not required to comply with current requirements for new buildings unless this compliance is specifically mandated by law or by the building or fire code of the jurisdiction where the building is located.~~

~~B. At a minimum, the 1997 Uniform Building Code (UBC) is required to be met for new school facility construction and, as required, for building renovations in existing schools.~~

#### **R7-6-261. Energy Saving Measures Repealed**

~~Both construction of a new school facility and renewal of an existing school facility shall include energy conservation measures that will provide dollar savings in excess of the cost of the conservation measure within eight years of the construction or renewal.~~

#### **R76265. Building Systems**

A. As required under A.R.S. § ~~15-2011(B)(3)~~ 41-5702(L), building systems in a school facility shall be in working order and ~~capable of being~~ properly maintained. A building system is considered to be in working order and ~~capable of being~~ maintained if:

1. The system is ~~capable of being~~ operated as intended;
2. The system is ~~capable of being~~ maintained according to manufacturer's instructions;
3. Newly manufactured or refurbished replacement parts are available;
- ~~4. The remaining life expectancy of the system is at least three years;~~
- ~~5.4.~~ 4. The system is ~~capable of supporting~~ supports the gross square footage of the school facility; and
- ~~6.5.~~ 5. Components of the system present no imminent danger of personal injury.

B. Building systems required under A.R.S. § ~~15-2011(B)(3)~~ 41-5702(L) to be in working order and ~~capable of being~~ maintained include but are not limited to: roof, plumbing, telephone, electrical, and HVAC systems. Additionally, under this Chapter, ~~the following~~ building systems including but not limited to the following shall be in working order and ~~capable of being~~ properly maintained: fire alarm, two-way internal communication, network cabling, and security systems.

#### **R76270. Building Structural Soundness**

As required under A.R.S. § ~~15-2011(B)(4)~~ 41-5711(B)(4), all buildings of a school facility shall be structurally sound. A building of a school facility is considered structurally sound if the building passes a structural assessment performed by a professional engineer.

- ~~1. Presents no imminent danger of personal harm;~~
- ~~2. Has no visible signs of major decay or distress, and~~
- ~~3. Appears to have at least three years of remaining life expectancy.~~

**R76271. Exterior Envelope, Interior Surfaces, and Interior Finishes**

The exterior envelope, interior surfaces, and interior finishes of a school facility shall be safe and capable of being maintained.

1. An exterior envelope is safe and capable of being maintained if:
  - a. Walls and roof are constructed of materials requiring minimal maintenance, including painting;
  - b. Walls, roof, doors, and windows are weather tight under normal conditions with routine upkeep; and
  - c. The building structural systems support the loads imposed on them.
2. An interior surface is safe and capable of being maintained if it is:
  - a. Structurally sound;
  - b. Capable of supporting a finish; and
  - c. Capable of continuing in its intended use, with normal maintenance and repair, ~~for at least three years.~~
3. An interior finish is safe and capable of being maintained if it is:
  - a. Free of exposed lead paint;
  - b. Free of friable asbestos; and
  - c. Capable of continuing in its intended use, with normal maintenance and repair, ~~for at least three years.~~

**R76275. Minimum Gross Square Footage**

Each school district shall have sufficient school facilities, which comply with minimum school facility guidelines established in this Article, to meet the ~~per pupil~~ minimum adequate gross square footage requirements for ~~such the~~ district as determined by law, ~~for such district based on number and grade distribution of the students served by the district.~~

**R76276. Assessment of Minimum Gross Square Footage**

- A. Computation of the gross square footage of a school facility may be by ~~physical measure~~ measurement or by calculation based on architectural plan documents.
- B. The gross square footage of a school facility equals all space within the facility excluding space used for district administrative purposes.

- C. The gross square footage of a district shall equal the sum of the gross square footage of each school facility in the district.
- D. The minimum gross square footage of a district equals the sum of the products of the students in each grade or program for preschool children with disabilities or kindergarten ~~program~~ multiplied by the minimum adequate gross square footage requirements per ~~pupil~~ student, applicable to the district for such grade or program.
- E. For the purpose of assessment of minimum gross square footage, the number of ~~children~~ students in all grades and kindergarten shall be evenly distributed across all grades and kindergarten served by the district.

### ARTICLE 3. SQUARE FOOTAGE CALCULATIONS

#### **R76301. Square Footage Calculations**

- A. A school district may use Class A bonds to supplement any project funded by the ~~School Facilities~~ Board pursuant to ~~under~~ A.R.S. § 15-2021 or A.R.S. § 15-2041 41-5741. Pursuant to ~~Under~~ A.R.S. § 5-2002(H) 41-5702(H), when a school district adds square footage to the district through the construction of a new school facility using Class A bonds, the ~~School Facilities~~ Board shall not provide funding to supplement ~~construction of the new school~~ construction facility.
- B. When a school district adds square footage to the district through the construction of a new school facility using ~~either~~ Class B bonds; or ~~unrestricted capital outlay monies~~ other funds, the ~~School Facilities~~ Board shall not include the square footage of the new school facility in the ~~gross net~~ square footage of the school district for ~~purposes of calculating building renewal distributions pursuant to A.R.S. § 15-2031 and for~~ determining ~~needs~~ need for additional square footage pursuant to ~~under~~ A.R.S. §§ 15-2011 41-5711 and A.R.S. § 15-2041 41-5741.
- C. When a school district adds square footage to the district through the construction of a new school facility using Class A bonds, the ~~School Facilities~~ Board shall include the square footage of the new school facility in the ~~gross net~~ square footage of the school district for ~~purposes of calculating building renewal distributions pursuant to A.R.S. § 15-2031 and for~~ determining ~~needs~~ need for additional square footage pursuant to ~~under~~ A.R.S. §§ 15-2011 41-5711 and A.R.S. § 15-2041 41-5741.
- D. ~~A~~ If a school district ~~that~~ uses Class B bonds and/or ~~unrestricted capital outlay monies~~ other funds to add or replace square footage at existing ~~schools~~ school facilities, the ~~Board~~ shall ~~have~~ treat the additional square footage or replacement square footage ~~treated~~ as follows:
  1. ~~A school district that adds~~ If square footage is added to an existing school facility ~~with the use of~~ using Class B bonds or ~~unrestricted capital outlay monies~~ shall not have other funds, the ~~Board~~

~~will not include~~ the additional square footage ~~included in the determination of~~ determining minimum adequate square footage ~~pursuant to~~ under A.R.S. § ~~15-2011(C)~~ 41-5711(C), but the School Facilities Board ~~shall consider~~ will include the additional square footage ~~for purposes of~~ in determining adequacy of the functional components of the school facility as specified in ~~the~~ Minimum School Facilities Guidelines set forth in R7-6-201 through R7-6-285 Article 2.

- 2: A school district that both removes and adds square footage with the use of Class B bonds or ~~unrestricted capital outlay monies~~ shall not have the net additional square footage, ~~included in the determination of minimum adequate square footage pursuant to A.R.S. § 15-2011(C)~~, but the School Facilities Board shall consider the net additional square footage for purposes of ~~determining adequacy of the functional components of the school as specified in the Minimum School Facilities Guidelines set forth in R7-6-201 through R7-6-285~~.
  - 3: For purposes of calculating building renewal pursuant to A.R.S. § 15-2031, replacement square footage constructed with Class B bonds or ~~unrestricted capital outlay monies~~ shall be included, ~~but net additional square footage shall be excluded~~.
  - 4.2. If ~~a portion of the square footage is replaced~~ at an existing school facility is replaced with the use of using Class B bonds or ~~unrestricted capital outlay monies~~ other funds, the Board will determine the student capacity of the completed school facility ~~after completion of the project will be determined~~ in the same manner as it student capacity would have been determined ~~prior to~~ before the addition replacement. If Class B bonds or ~~unrestricted capital outlay monies~~ other funds are used to construct a complete replacement school facility, the Board will determine the student capacity of the completed school facility ~~once the project is completed will be based on the provisions of A.R.S. § 15-2011(C)~~ 41-5711(C).
  - 5.3. For purposes of this Section, replacement square footage ~~is defined as~~ means square footage constructed with Class B bonds or ~~unrestricted capital outlay monies~~ other funds that replaces existing square footage.
- E. If square footage is added to or replaced at an existing school facility ~~with the use of~~ using Class A bonds, the school district shall determine the student capacity of the facility after ~~completion of the project is completed using~~ will be determined in the same ~~manner as it~~ procedure the school district would have ~~been determined prior to~~ used before the addition or replacement.
- F. ~~The method of computing the funding and square footage for any expansion of a core facility previously funded by the School Facilities Board shall follow the same method that was used for computing the original core facility.~~

**R76302. Modification of Square Footage for Geographic Factors**

- A. The Board shall provide additional school facility square footage to a school district that has 100 or more students who: ~~In those school districts where students are~~
1. Are transported one hour or more via using the most reasonable and direct route; or where ~~students reside~~
  2. Live 45 miles or more from the closest school via using the most reasonable and direct route; and ~~where 100 or more students are affected by these conditions within the same region, the School Facilities Board shall provide additional school space to the district to accommodate the educational needs of the affected students.~~
- B. ~~However, the educational space provided may be modified as~~ If the Board provides additional school facility square footage under subsection (A), the Board shall make ~~sees fit in making~~ a conscientious effort to meet the Minimum Adequacy Guidelines without requiring an ~~extraordinary expenditures~~ expenditure of public funds.
- ~~B.C.~~ If an elementary school district that is not in a high school district unifies after June 30, 2005, the resulting unified school district may qualify for high school ~~space~~ square footage under A.R.S. § ~~15-2041~~ 41-5741 if it meets the following criteria:
- ~~1.~~ The elementary school district unifies after June 30, 2005; and
  - ~~2.1.~~ The resulting unified school district is projected to have more than 350 resident high school students being served in by one or more school districts other than the student's students' resident school district within three years following the current fiscal year; and
  - ~~3.2.~~ One of the following is true:
    - a. At least 350 of the high school students in the unified school district would travel 20 miles or more to ~~the a~~ receiving high school facility; or
    - b. The receiving high school district is projected to need additional high school ~~space~~ square footage within seven years. For purposes of this analysis, the projected average daily membership of the receiving high school district includes the high school students of both the receiving and sending school districts.

**ARTICLE 5. NEW SCHOOL FACILITY AND LAND FUNDING**

**R76501. Capital Plans**

If a school district's capital plan, developed ~~pursuant to~~ under A.R.S. § ~~15-2041~~ 41-5741, indicates ~~a the~~ the school district will need ~~for~~ a new school facility or an addition to an existing school facility within the next four years or ~~a need for~~ land within the next ~~ten~~ 10 years, the school district shall complete the

capital plan packet issued by the ~~School Facilities~~ Board and return the completed packet to the Board by the ~~announced~~ deadline prescribed under A.R.S. §41-5741.

**R7-6-502. Funding for New ~~Schools~~ School Facilities or Additional Square Footage**

- A. The Board shall prepare a New Construction Analysis for a school district that requests funding for additional square footage under the capital plan submitted under R7-6-501. The Board shall review ~~The~~ the data submitted by ~~each~~ the school district ~~requesting additional square footage under the capital plan shall be reviewed by staff to determine student capacity of the school district. :~~ Additionally, staff shall review and verify district student population projections, and ~~the~~ existing square footage in the district. ~~The staff shall prepare a New Construction Analysis for the district.~~ Board shall provide a copy of the New Construction Analysis to the applicable school district.
- B. ~~If the proposed~~ a school district proposes to locate a new school ~~facilities are located~~ facility in territory in the vicinity of ~~a military~~ an airport, as defined in A.R.S. § 28-8461, the Board shall provide notice to the ~~military~~ airport of the proposed new school facility ~~construction~~ and seek ~~the military airports~~ comments and analysis concerning whether the high noise or accident potential associated with airport operations is ~~compatibility of~~ compatible with the proposed school ~~facilities~~ facility ~~with the high noise or accident potential generated by military airport operations that may have an adverse effect on~~ and public health and safety. The Board shall consider ~~and analyze~~ the comments and analysis provided by the ~~military~~ airport ~~prior to making a final determination before deciding whether~~ to fund the new ~~square footage~~ school facility.
- C. At an open meeting and after reviewing the New Construction Analysis prepared under subsection (A) and hearing from members of the applicable school district, ~~The~~ the Board shall ~~make a decision regarding~~ decide the number of square feet and students to be funded for the district, the ~~appropriate~~ cost funding per square foot approved by the legislature, and the total budget based on the funding per square foot. ~~At the time the Board is making its decision, the New Construction Analysis shall be available to the Board members and the school district. The school district may address the Board at this time.~~
- D. ~~A school district that is approved for additional square footage shall have 60 days from the date of notification to officially accept, in writing, funding for the square footage approved by the Board or the approval shall expire. After a school district has accepted a project in writing and has signed~~ signs the Terms and Conditions for New School Funding, the Board ~~shall provide~~ may make five percent of the ~~monies~~ funds approved available for architectural and engineering fees ~~for projects of \$500,000 or~~

~~more.~~ The ~~individual~~ school district ~~shall be~~ is responsible for ~~establishing~~ deciding the actual ~~A and~~ E amount spent on architectural and engineering fees.

E. A school district that ~~receives approval~~ is approved for funding for additional square footage ~~from the Board~~ shall proceed with the design development plan and specifications for the project. ~~Two~~ The school district shall submit to the Board one or more copies of the proposed ~~educational goals or drawings, specifications, and schematic design, with and budget estimates are required to be submitted to the Board's staff.~~ The school district shall ensure items required to be included in the estimated budget are all elements of new construction, excluding land acquisition, are included in the estimated budget. These elements include, but are not limited to:

1. Architectural and engineering fees;
2. ~~Survey~~ Surveying, testing, obtaining permits, advertising, and printing;
3. Construction costs;
4. Furniture, fixtures, and equipment;
5. Any necessary project management; and
6. A ~~five~~ three percent contingency amount to ensure the completed project meets all Minimum Adequacy Guidelines. ~~After Board staff review, the school district shall proceed with a preliminary bid package.~~

F. ~~If the school district includes reasonable upgrades to the new construction project for energy conservation purposes, the Board shall provide funding upgrades above the formula based award to cover the full amount of the upgrade. Upgrades will only be funded if the upgrade receives pre-approval by the Board staff and the school district architect or engineer certifies that the upgrade will provide dollar savings in excess of the cost of the upgrade within an eight-year period.~~

~~G.F.~~ Upon review of the submitted schematic design, budget estimates and preliminary bid package, ~~the Board's~~ After reviewing the materials submitted under subsection (E), the Board staff shall ~~make a recommendation to the Board regarding the appropriateness of~~ decide whether to authorize the school district to proceed with construction of the additional square footage ~~and the efficiency and effectiveness of the plan.~~ The ~~staff recommendation shall be based~~ Board shall base the decision on whether the project is within the original scope and Board ~~approved budget (including square footage and number of students)~~ approval, the project meets the ~~building adequacy standards~~ Minimum Adequacy Guidelines, initial comments from the local building authority and whether revised student population projections continue to justify the additional square footage. If the Board ~~approves the project, authorizes~~ the school district ~~shall be authorized~~ to proceed, with the final bid package school district may initiate construction. ~~Prior to authorization to contract the school district shall document that it has obtained local (city, county or equivalent) building department approval. For projects~~ If the

Board determines a project is outside of the original scope and /or Board approved budget approval or that do does not meet the minimum adequacy guidelines Minimum Adequacy Guidelines, the Board may instruct the school district to resubmit the project, under subsection (E) or ~~the Board may~~ make an alternative decision. ~~Local~~ Other funds may be used by the school district in conjunction with the Board approved funding.

- ~~H.~~ Upon receipt of bids by the school district, ~~the Executive Director shall authorize the district to proceed with the contract if the school district has documented that it has obtained local (city, county or equivalent) building department approval, and the bid is within the original scope and Board approved budget, and meets the building adequacy standards. The Executive Director may make an alternative recommendation to the full Board.~~
- ~~I.~~ The Board-approved funding for additional square footage shall be available to the school district for one year from the date of notification. The bid process shall be completed within the one-year period. The Board shall consider requests for an extension beyond the one year and may grant an extension for good reason.
- ~~J.G.~~ The Board may modify or waive the requirements of this Section for good cause.

#### **R7-6-503. Funding for Land**

- A.** A school district that is approved for funding of a new school facility under R7-6-502, may ask the Board to provide funding to purchase land on which to locate the new school facility.
- B.** The School Facilities Board follows a three-step approval process, as described in subsections (C) through (E), before recommending whether to authorize for the funding of to purchase land that is classified as Step One - Justification of Need for Land; Step Two - Request to Purchase a Specific Site; and Step Three - Due Diligence for construction of a new school facility. The executive director Director may deviate from the three-step approval process to meet other circumstances as they arise, such as purchasing state-owned or condemned land, and condemnation and The Director shall bring such recommendations a recommendation regarding funding to purchase land to the full Board.
- B.C.** Step One, is the initial request justification of the need for land for new construction of a new school facility.: ~~A~~ If a school district that currently owns land, the school district shall demonstrate include in the justification;
  - 1. A list of all land parcels currently owned by the school district;
  - 2. The size and location of each district-owned land parcel; and
  - 3. Why the each district-owned property land parcel is not suitable for the needed new school facility in order for the school district to receive funding for the acquisition of land.

~~C.D.~~ Step Two, includes the following request to purchase a specific land site:

1. ~~The~~ A school district that requests to purchase a specific land site for construction of a new school facility shall provide the following to the Board:
  - a. ~~a~~ A map of the school district showing current ~~schools~~ school facilities and, for each school facility, the projected student population, grade levels served, and attendance boundaries ~~in various locations in the district, which supports the location of the new school at the requested site.~~ The school district shall also provide a listing of vacant parcels currently owned by the school district, (including the size of each parcel and its location);
  - b. ~~describe~~ A description the land site selection process;
  - c. ~~explain why~~ An explanation of why the land site requested was chosen over alternative sites;
  - d. ~~and summarize~~ A summary of any joint-use joint-use provisions or other intergovernmental agreements related to the land site requested; ~~and. The school district shall also provide a~~
  - e. The legal description, size, and estimated cost of the desired requested land site, the size of the site and an estimate of the cost of the site. The school district may provide information on more than one site. If the size of the requested land site is outside the range of acreage table approved by the Board, the school district shall justify the deviation.
2. The Board shall ~~make a decision regarding the site size for each site. The range of acreage table approved by the Board is provided to allow school districts some leeway in site selection. The school district shall provide special justification if the site size is not within the range shown on the range of acreage table. Allowances shall not be granted for additional acreage for limited use activities that are only remotely related to the teaching and learning enterprise. Limited use activities would include, but not be limited to, athletic fields that are only used for interscholastic competition rather than daily activities, and non-school related community functions. The site size will be based on the eventual size of the school, if expansion is planned. The school district may request a larger or smaller site if conditions require. The school district may purchase additional acres with local funds. School districts should give careful consideration to joint-use sites such as those which adjoin community parks and play grounds. The ranges indicated are not intended to dictate a minimum acreage if a joint-use agreement provides the school with access to adjoining public space~~ review the information submitted under subsection (D)(1) and either authorize or deny authorization for the school district to proceed to perform due diligence regarding the land site the school district proposes to purchase.

~~3-E.~~ Step Three, due diligence regarding the specific land site:

1. ~~If a~~ A school district that needs monies funds to verify, gather, and submit the information required ~~in Step Three, the school district~~ under subsection (E)(2) shall submit a cost estimate to

the Board; and the Board shall approve or disapprove the request ~~for monies to a maximum of \$30,000. The Board shall deduct any funds advanced to a school district to verify, gather, and submit the information required under subsection (E)(2) from the final amount authorized, if any.~~ Rather than allocating ~~monies funds to a~~ the school district to verify, gather, and submit information required ~~in Step Three under subsection (E)(2),~~ the Board may ~~approve the staff of the School Facilities Board to contract and pay~~ directly for ~~such the~~ services, ~~in which case the contractors will be paid directly by the Board.~~

~~D.2.~~ If the A school district ~~receives approval~~ authorized under subsection (D)(2) to ~~proceed to Step Three,~~ the following information ~~about~~ perform due diligence regarding the land site shall be acquired the school district proposes to purchase shall submit the following information to the Board:

~~1.a. An appraisal~~ Two appraisals of the land that ~~documents that~~ show the proposed cost of the land site is at or below the fair market value;

~~2.b.~~ Legal description of the land: site;

~~3.c. Level~~ Phase one environmental assessment completed within the last 180 days, plus the following factors (if not included):

~~a.i.~~ Hazardous materials;

~~b.ii.~~ Archaeology;

~~e.iii.~~ Endangered flora and fauna;

~~d.iv.~~ Noise;

~~e.v.~~ Soil Conditions conditions, and

~~f.vi. Adjacent~~ Identity of adjacent land owners and/or uses;

~~4.d. Boundary~~ American Land Title Association and Topographical Survey topographical survey;

~~5.e.~~ Drainage statement;

~~6.f. Site~~ Estimate of land-site development cost;

~~7.g.~~ Photographic survey (if required by applicable planning and zoning departments); and

~~8.h. Feasibility site~~ Site feasibility diagram-conceptual study developed by a design professional illustrating that shows the proposed development of the land site (based on the eventual size of the school, if there are plans for expansion), indicating. The site feasibility diagram shall include:

~~a.i.~~ Property lines and measurements;

~~b.ii.~~ Setbacks, right-of-ways, and easements;

~~e.iii.~~ Vehicular access and parking;

~~d.iv.~~ Pedestrian and bicycle access;

~~e.v.~~ Building zone;

~~f.vi.~~ Drainage concept;

- ~~g~~.vii. Utility routes or systems;
- ~~h~~.viii. Activity fields and courts;
- ~~i~~.ix. Limit-lines and calculation of usable area;
- ~~j~~.x. Existing features to be demolished or preserved; and
- ~~k~~.xi. Future expansion capability.

3. After reviewing the information provided by the school district under subsection (E)(2), the Board shall prepare a recommendation for the Division regarding whether to authorize purchase of the requested land site. The Board shall include in the recommendation the cost of the land site and applicable closing costs.
4. If the Division decides to authorize purchase of the requested land site, the Division shall request a funding appropriation from the legislature.

~~E.F.~~ Final distribution. ~~Final distribution of monies to purchase the site may be made by the Board if Step Three reveals no serious problem with the site. If the actual cost of the site does not exceed the Board approved amount, the Executive Director may make the final determination of site funding without further action by the Board. If monies were distributed to the school district to verify, gather and submit the information required based on a cost estimate, an adjustment for the actual cost shall be made at the time of the final distribution. If the legislature appropriates funding for purchase of the requested land site, the school district shall submit a written funding request to the Division. The Director shall make final distribution of funds to the school district.~~

**G.** Additional matters.

1. ~~The~~ A school district that receives funds under subsection (E)(1) shall provide documentation to the Board of the actual expenditures from the monies provided and the actual closing costs funds within 60 days of after the final distribution.
2. A school district that receives funding under subsection (F) shall provide documentation to the Board of actual closing costs after the final distribution. Expenditures exceeding the amount provided pursuant to subsection (C)(3) of this Section require approval by the Board.
3. If the site is rejected as a result of information gathered in Step Three completion of due diligence reveals a serious problem with the proposed site or if the actual cost of the requested site exceeds the amount approved by the Board, the school district may repeat Steps Two and Three with the three-step process for a new site.

~~F.H.~~ The Board may modify or waive the requirements of this Section for good cause.

#### **R7-6-504. Donations of Real Property**

- A. ~~A~~ If a school district wishes to receive funding to enable the school district seeking to acquire accept a donation of real property, by donation pursuant to as authorized under A.R.S. § 15-2041 41-5741, the school district shall complete and submit to the Board a the school site and school facility donation information requirements form and submit the form to the School Facilities Board that is available on the Board's website and provide information regarding the real property to be donated. The information requested on the form for land shall include, among other items, a district map identifying existing school sites and facilities, student population and the location of the donation. The information requested on the form for a facility shall include, among other items, the size of the facility, grade levels served and location. If all of the information required is not available the school district lacks some of the required information and if a school district needs monies funds to verify, gather, and submit the missing information required, it the school board shall submit a cost estimate request for the estimated amount to obtain the missing information at the same time it the school board submits the available information that is available.
- B. ~~If all information is available, the School Facilities Board staff shall analyze the request to accept the donation and make a recommendation to the Board. If all information is not available, the School Facilities Board staff shall analyze the request on the basis of whether the school district should be awarded the funds necessary to complete the information gathering process, and shall make a recommendation to the Board.~~
- B. At an open meeting and after reviewing the information submitted under subsection (A) and hearing from members of the applicable school district, At the time the Board is making its shall make a decision regarding funding to accept the donation of real property, the staff analysis and recommendation shall be available to the School Facilities Before the meeting, the analysis and recommendation of the Board shall be available to Board members and the applicant school district. The applicant school district may address the Board.
- C. ~~If the Board approval is to award approves awarding the school district funds necessary to complete the obtain all required information gathering process, the district shall be notified by the Board Staff shall notify the school district, and upon acceptance If the school district accepts the award, the school district may proceed to gather the additional required information required. Once When the additional required information is submitted to the Board, the Staff Board shall analyze the request to accept the donation and make a recommendation to the Board as stated in subsection (B) follow the procedures in subsection (B).~~

- D. If the Board approves funding to enable a the school district ~~request~~ to accept ~~the a~~ donation of real property, the Board ~~staff~~ shall notify the school district. ~~The distribution of 20 percent of the value of the accepted donation pursuant to A.R.S. § 15-2041 shall be awarded to the school district upon notification to the Board that the donation has been accepted by the district. The school district shall submit to the Board documentation of its that the governing board action accepted donation of the real property and documentation that the property title has been was transferred to the school district. Upon receipt of~~ When this documentation is received, the Board ~~staff~~ shall ~~be authorized~~ direct the Division, under A.R.S. § 41-5741(F), to distribute the approved to the school district 20 percent amount of the fair-market value of the portion of donated property usable for academic purposes.
- E. If ~~monies~~ funds were distributed to ~~the a school~~ district to ~~verify, gather and submit the information required based on an estimated cost,~~ under subsection (C) the Board shall make an adjustment for the actual cost shall be made at the time of the final distribution. The school district shall provide documentation to the Board of the actual expenditures from the monies funds provided. Expenditures An expenditure exceeding any amounts provided pursuant to R7-6-503(C)(3) shall require \$30,000 requires advance approval by the Board.
- F. ~~In determining~~ In conducting the analysis under subsection (B) to determine whether the real property proposed for donation is at an appropriate as a school facility site or a school facility, the ~~School Facilities-Board Staff analysis shall be based on~~ consider the following:
1. Location of the real property proposed for donation ~~of real property~~;
  2. ~~District needs~~ School district need for additional square footage to accommodate student capacity;
  3. ~~District needs~~ School district need for additional land ~~(for site donations only):~~ for a school facility;
  4. Usable acres in the proposed ~~for~~ donation, taking into consideration the School Facilities Board Board's adopted usable approved range of acreage requirements. table;
  5. ~~The ability of a~~ Whether the proposed site donation ~~to can~~ can accommodate a school facility that meets the minimum adequacy guidelines ~~(for site donations only); or the adequacy of a proposed school whether a proposed facility donation can be developed into a school facility that meets the minimum adequacy guidelines~~;
  6. Estimated ~~site~~ development costs;
  7. Age and condition of ~~the real property (for facility donation only):~~ a facility donation; and
  8. Portion of the real property that can be used for academic purposes.
- G. ~~If the School Facilities Board Staff recommendation is to authorize the district to accept the donation,~~ the Staff shall ~~prepare a recommended 20 percent distribution amount. The 20 percent distribution~~

~~recommendation will be based on the fair market value of the real property proposed for donation that is usable for academic purposes.~~

**H.G.** The Board may waive or modify the requirements of this Section for good cause.

**R7-6-505. Constructing ~~Bond-Funded Schools~~ Bond-funded School Facilities on Land Funded by the ~~School Facilities~~ Board**

- A. A school district that acquires land by sale or lease ~~pursuant to~~ under A.R.S. § ~~15-2041~~ 41-5741 may construct a new school facility on ~~that~~ purchased or leased land using Class A bonds. The Board will include the square footage of the new school facility ~~shall be included~~ in the gross square footage of the school district ~~for purposes of determining needs for~~ to determine whether additional square footage ~~and or~~ building renewal distributions are needed.
- B. A school district that acquires land by sale or lease ~~pursuant to~~ under A.R.S. § ~~15-2041~~ 41-5741 may construct a school facility on ~~that~~ the purchased or leased land using Class B bonds ~~provided that if~~ the school district ~~agrees~~ acknowledges in writing that when the school district qualifies for a new school facility funded by the ~~School Facilities~~ Board, ~~that the School Facilities Board will~~ shall not provide funding ~~for the~~ to lease or purchase of an additional site for ~~that~~ the school facility. The Board will not include the square footage of ~~the~~ a new school facility constructed with Class B ~~bond monies~~ bonds ~~shall not be included~~ in the gross square footage of the school district ~~for purposes of determining needs for~~ to determine whether additional square footage ~~and or~~ building renewal distributions are needed.

**R7-6-506. Providing Technical Assistance in the Form of Project Management**

- A. A school district that does not have the experience or resources to ~~successfully oversee~~ manage successfully construction of a new school ~~construction project~~ facility may request technical support from the Board ~~pursuant to~~ under A.R.S. § ~~15-2002(13)~~ 41-5702(D)(13) in the form of project management ~~services~~.
- B. The ~~Executive~~ Director may approve ~~the project management~~ or deny a request made under subsection (A). ~~Should~~ If the ~~Executive~~ Director ~~deny~~:
1. Denies the request, the school district ~~has the right to~~ may appeal the decision to the Board; and
  2. Approves the request, the school district shall agree to reimburse the Board from allocated funds the cost of any independent contractors the Board uses to provide the project-management technical assistance.

- C. The Board shall ensure the cost of the project management shall be made a part of project-management technical assistance, if needed, is included in the overall cost of the new school facility, and those funds shall be derived from the total allocation for the project provided made by the School Facilities Board for construction of the new school facility. Should If the allocation of funds that the school district receives pursuant to under A.R.S. § 15-2041 41-5741 satisfy both the base cost of the new school facility and plus the cost of the project management project-management technical assistance, then the Board shall not provide any additional funds to the school district for project management services project-management technical assistance.
- ~~D.~~ If the school district's request for project management services is approved, the school district shall agree to reimburse the Board from its allocated funds for the cost of any independent contractors that the Board uses to provide the project management services.
- ~~E.D.~~ The Board may provide the a school district with monies funds to pay for the project management services project-management technical assistance in addition to the monies funds the school district receives pursuant to under A.R.S. § 15-2041 provided 41-5741 if:
1. The school district demonstrates that the monies funds it receives pursuant to under A.R.S. § 15-2041 41-5741 are not sufficient to build a school facility that meets the building adequacy guidelines and pay the fees for the project management; and
  2. The school district demonstrates in writing to the Board's satisfaction that the school district does not have the experience or resources necessary to successfully complete construction of the new school construction project facility successfully.

## **ARTICLE 6. CONTINGENCY FUNDS REPEALED**

### **R76601. Allocation and Use of Contingency Monies Repealed**

- ~~A.~~ A sum equal to a percentage of the construction bid shall be set aside as a contingency fund to cover the cost of unknown conditions that could arise during construction. The School Facilities Board shall set aside an amount equal to five percent of the base cost for new construction and ten percent of the base cost for renovation of a structure or system replacement to cover these potential costs. Contingency funds are not part of the construction budget and are to be used only if needed. For deficiency corrections projects, any contingency funds which are not used shall be returned to the deficiency corrections fund. For projects funded by the new school facilities fund, any contingency funds which are not used may be used by the school district in accordance with A.R.S. § 15-2041.
- ~~B.~~ The mechanism that is used to spend contingency funds during construction is a "change order." There are three types of situations that generally require a change order:

1. ~~An unknown condition that was not determined until after construction was started and that requires a change, deletion or addition to the construction contract.~~
  2. ~~The school district has determined to change the scope of work and add to or delete from the contract.~~
  3. ~~A change is required to correct a discrepancy between what the contractor bid and what the architect and owner intended. This type of change order could be determined an “error or omission” on the part of the architect. If so, the owner should pursue the architect’s error and omissions insurance to recover the costs of the required change.~~
- ~~C. Change orders can be additive or subtractive to the construction contract and both should be used. All changes in the scope of the contract and the contract documents should be considered potential change orders. Change order should not be used to correct conditions known prior to or discovered during the bid process. These should be addendum items and made part of the bid.~~
- ~~D. The following conditions apply to the use of all contingency monies allocated to a specific project approved by the School Facilities Board. If the district wishes to issue change orders that do not comply with these rules, the associated costs shall be accounted for separately and not considered part of the approved project. In other words, they would need to be paid out of separate monies and would not be considered part of the approved project, even though they might be included in the same basic contract. These costs would be paid for using local funds.~~
1. ~~The school district may use contingency monies only to cover change orders that are to correct unknown conditions.~~
  2. ~~Contingency funds may not be used to cover change orders for the other two types of situations discussed in subsection (D) above: the district has determined to change the scope of work during construction by adding components, or a change is required to correct a discrepancy created by the architect that could be considered an error or omission by the architect.~~
  3. ~~For deficiency correction projects performed pursuant to A.R.S. § 15-2021 only, the Executive Director shall have the discretion to authorize the use of contingency funds for expansion of scope, to accommodate low budget estimates, and for all other project related costs.~~
  4. ~~Contingency monies shall not be used to pay for “bid add alternates.” These items are not part of the final approved project.~~
- ~~E. A school district whose deficiency correction projects are combined with the deficiency correction projects of one or more additional school districts pursuant to R7-6-401 shall have the contingency amount included as a percentage of the overall set of projects that have been grouped together for such purposes. The Executive Director shall have the discretion to use, transfer, and/or combine the contingency amounts for any projects within such a group to any other project within the group of~~

~~projects. The Executive Director's adjustment authority pursuant to R7-6-401 shall be considered as a percentage or sum of the overall group of projects.~~

**F.** ~~The Board may modify or waive the requirements of this Section for good cause.~~

**ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT<sup>1</sup>**

**TITLE 7. EDUCATION**

**CHAPTER 6. SCHOOL FACILITIES OVERSIGHT BOARD**

1. Identification of the rulemaking:

The Board's rules were made in 2001. Some of the rules were amended in 2020 through an expedited ruling making but no substantive changes were made at that time. As a result, the rules have become inconsistent with current industry standards and Board practice, technological changes, and best practices regarding education. The rules are being updated to address these issues and implement recommendations identified in a five-year-review report approved by the Council on November 3, 2020.

An exemption from Executive Order 2022-01 was provided for this rulemaking by Kaitlin Harrier, Director of the Governor's Office of Education, on March 8, 2022.

a. The conduct and its frequency of occurrence that the rule is designed to change:

Until the rulemaking is completed, the Board's rules will remain inconsistent with industry standards and Board practice, technological changes, and best practices regarding education.

b. The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed:

It is not good government for the Board to have rules that are inconsistent with industry standards and Board practice, technological changes, and best practices regarding education. This conduct potentially causes harm to the taxpayers who support construction, maintenance, and renewal of school facilities and the purchase of school equipment.

c. The estimated change in frequency of the targeted conduct expected from the rule change:

When the rulemaking is complete, the Board's rules will no longer be inconsistent with industry standards and Board practice, technological changes, and best practices regarding education.

2. A brief summary of the information included in the economic, small business, and consumer impact statement:

---

<sup>1</sup> If adequate data are not reasonably available, the agency shall explain the limitations of the data, the methods used in an attempt to obtain the data, and characterize the probable impacts in qualitative terms. (A.R.S. § 41-1055(C)).

The Board determined the rule amendments will have some economic impact. For example:

- R7-6-211, Classroom Fixtures and Equipment, is amended to allow electronic as well as non-electronic surfaces for classroom use. Electronic surfaces are more expensive than non-electronic surfaces. The estimated difference in cost is from \$300 to \$4,200 per surface depending on the kind chosen. A school facility requires multiple surfaces.
- R7-6-215, Classroom Air Quality, reduces the acceptable CO<sup>2</sup> level to 700 PPM above the ambient CO<sup>2</sup> level. This makes the requirement consistent with current industry standards. The Board estimates the cost of meeting this standard will be approximately \$75/unit annually.
- R7-6-221, Equipment for Learning and Technology Center, substitutes a multimedia display for a TV in the center. Depending on the kind of multimedia display chosen, the Board estimates an additional cost of \$1,920 to \$4,000 per unit.
- R7-6-235, Technology, requires a network connected multimedia device for every student rather than one device for every eight students. If each device costs approximately \$300, the cost to provide a device for each student rather than for every eight students would result in an increase of \$2,100/eight students.

3. The person to contact to submit or request additional data on the information included in the economic, small business, and consumer impact statement:

Name: Jack Smith, Administrator

Address: 100 N 15th Avenue, Suite 301  
Phoenix, AZ 85007

Telephone: 602-421-1882

E-mail: [jack.smith@azdoa.gov](mailto:jack.smith@azdoa.gov)

Website: <https://sfb.az.gov>

4. Persons who will be directly affected by, bear the costs of, or directly benefit from the rulemaking:

The Board establishes minimum standards for school facilities and equipment. School districts are required to ensure school facilities in the district, even those constructed fully or partially with bonds by choice of a district, meet the minimum standards. School districts and the Board will be directly affected by, bear the costs of, and directly benefit from this rulemaking. However, because both the new school facilities and building renewal funds receive legislative appropriations, it is taxpayers who ultimately bear the costs of and directly benefit from this rulemaking.

The Division of School Facilities administers three programs related to school facilities: the new school facilities fund (A.R.S. § 41-5741); building renewal grant fund (A.R.S. § 41-5731); and emergency deficiencies corrections fund (A.R.S. § 41-5721). Both the new school facilities fund and the building renewal grant fund receive a legislative appropriation. The emergency deficiencies corrections fund receives funding from the new school facilities fund.

Each school district is required to prepare an annual capital plan. If the capital plan shows the school district will need a new school facility or an addition to an existing school facility within four years or will need land for a new school facility within 10 years, the school district is required to submit the capital plan to the Board and request funding.

There are 217 school districts in Arizona. During FY2021, the Board awarded more than \$98,000,000 for new school facilities in five school districts. The Board also approved 1,341 building renewal grants, which are for primary building renewal, and cancelled 83 previously approved building renewal projects because the school district proceeded before authorization or did not proceed timely. The Board made distributions from the emergency deficiencies correction fund to eight school districts and cancelled two previously approved projects.

Each year, the legislature is required to adjust the amount allocated per square foot of new school facility construction based on economic factors. The square-foot allocation includes an amount for classroom fixtures, equipment, and technology. The legislature uses the square-foot allocation and the number and size of new construction projects approved by the Board to determine the amount to appropriate each year.

Regardless of the fund from which monies are distributed, a school district is required to ensure school facilities and equipment meets the minimum standards established by the Board. The minimum standards are updated in this rulemaking. Many of the amendments simply update statutory references and clarify language. Others, such as allowing a warming kitchen and removing specificity regarding microscopes provide flexibility to school districts and remove regulatory burdens. The Board determined the following changes will have economic impact:

- R7-6-211, Classroom Fixtures and Equipment, is amended to allow electronic as well as non-electronic surfaces for classroom use. Electronic surfaces are more expensive than non-electronic surfaces. The estimated difference in cost is from \$300 to \$4,200 per surface depending on the kind chosen. A school facility requires multiple surfaces.
- R7-6-215, Classroom Air Quality, reduces the acceptable CO<sup>2</sup> level to 700 PPM above the ambient CO<sup>2</sup> level. This makes the requirement consistent with current industry standards. The Board estimates the cost of meeting this standard will be approximately \$75/unit annually.
- R7-6-221, Equipment for Learning and Technology Center, substitutes a multimedia display for a TV in the center. Depending on the kind of multimedia display chosen, the Board estimates an additional cost of \$1,920 to \$4,000 per unit.
- R7-6-235, Technology, requires a network connected multimedia device for every student rather than one device for every eight students. If each device costs approximately \$300, the cost to provide a device for each student rather than for every eight students would result in an increase of \$2,100/eight students.

The Board incurred the cost of completing this rulemaking and will incur the cost of implementing it. The Division administers the funds awarded to school districts.

5. Cost-benefit analysis:

- a. Costs and benefits to state agencies directly affected by the rulemaking including the number of new full-time employees at the implementing agency required to implement and enforce the proposed rule:

The Board is the only state agency directly affected by the rulemaking. Its costs and benefits are described in item 4. The Board will not need additional full-time employees to implement or enforce the new minimum standards.

- b. Costs and benefits to political subdivisions directly affected by the rulemaking:

School districts are political subdivisions directly affected by the rulemaking. Their costs and benefits are described in item 4.

- c. Costs and benefits to businesses directly affected by the rulemaking:

No businesses are directly affected by the rulemaking.

6. Impact on private and public employment:

The rulemaking will have no impact on private or public employment.

7. Impact on small businesses<sup>2</sup>:

---

<sup>2</sup> Small business has the meaning specified in A.R.S. § 41-1001(21).

No businesses of any size are directly impacted by the rulemaking.

8. Cost and benefit to private persons and consumers who are directly affected by the rulemaking:

Private persons and consumers are not directly affected by the rulemaking.

9. Probable effects on state revenues:

Both the new school facilities fund and the building renewal grant fund receive legislative appropriations. The legislature adjusts the appropriation based on the annual square-foot allocation and the number and size of new construction projects approved by the Board. To the extent the updated minimum standards increase costs for classroom fixtures, equipment, and technology, there may be an impact on state revenues.

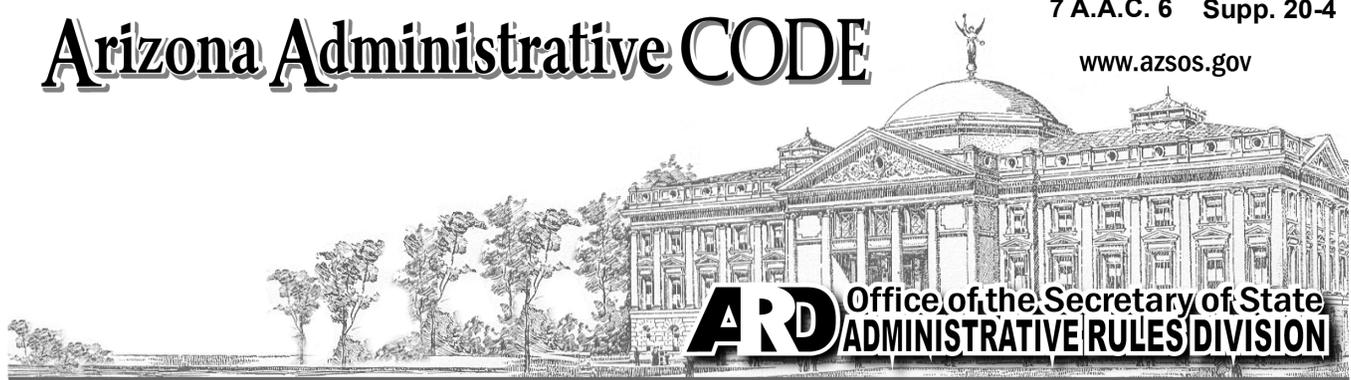

10. Less intrusive or less costly alternative methods considered:

The updated minimum standards are not intrusive. The minimum standards are consistent with industry standards and best practices regarding education. No alternative standards were considered.

**The release of this Chapter in Supp. 20-4 replaces Supp. 06-4, 1-22 pages**

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

---

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2019 is cited as Supp. 19-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority

note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State’s website, under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Rhonda Paschal, managing rules editor, assisted with the editing of this chapter.*

Administrative Rules Division  
 The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

**TITLE 7. EDUCATION**

**CHAPTER 6. SCHOOL FACILITIES BOARD**

*Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (Supp. 01-4).*

*Editor's Note: This Chapter contains rules which were adopted, amended, repealed, or renumbered under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6), pursuant to Laws 1998, 5th Special Session, Chapter 1, section 55, as amended by Laws 1999, Chapter 299, section 39. Because this Chapter contains rules which are exempt from the regular rulemaking process, it is printed on blue paper.*

*Title 7, Chapter 6, adopted by exempt rulemaking at 6 A.A.R. 597, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1).*

---------------------------	----

## CHAPTER 6. SCHOOL FACILITIES BOARD

**ARTICLE 1. DEFINITIONS****R7-6-101. Definitions**

The definitions at A.R.S. § 15-2032 apply to this Chapter. Additionally, unless otherwise specified, in this Chapter:

1. "Ambient CO<sup>2</sup> level" means the carbon dioxide level of the outside air.
2. "All-weather surface" means an area for vehicular use or parking that is surfaced with asphalt, concrete, chip seal, graded and compacted gravel, or other stabilized system.
3. "Board" means the School Facilities Board.
4. "Decibel" means a unit for expressing the relative intensity of sounds.
5. "Eligible students" has the same meaning as prescribed at A.R.S. § 15-901.
6. "Equipment" means an item not affixed to the real property of a school facility.
7. "Exterior envelope" means the exterior walls, floor, and roof of a building.
8. "Fixture" means an item affixed to the real property of a school facility.
9. "Foot-candle" means the amount of illumination the inside surface of a one-foot-radius sphere would receive from a candle 7/8 inch in diameter burning at the exact center of the sphere at 7.776 grams per hour.
10. "FTE" means full-time equivalent.
11. "General classroom" means a space that can be configured for instruction in at least the areas of language arts, mathematics, and social studies.
12. "HVAC" means a heating, ventilation, and air conditioning system. The air conditioning system may or may not be refrigerated.
13. "IEP" means individualized educational plan, a legal document required by law for each public school child who needs special education.
14. "Normal conditions" means occupancy during regular school hours while the building system is operating.
15. "PPM" means parts per million.
16. "Random sample" means arbitrary selection through a process in which each classroom in each building has an equal chance of being selected.
17. "School facility" means a building or group of buildings and outdoor area that are administered together to comprise a school campus.
18. "School site" means one or more parcels of land where a school facility is located. More than one school facility may be located on a school site.
19. "Specialty classroom" means classroom square footage specifically designed for instruction in science, physical education, career and technical education, or art.
20. "Student" means an individual:
  - a. Enrolled at a school facility; and
  - b. In average daily membership, which is defined at A.R.S. § 15-901.
21. "Student body" means the number of students at a school facility.

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Amended by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-102. Repealed****Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**ARTICLE 2. MINIMUM SCHOOL FACILITY GUIDELINES****R7-6-201. Application**

- A. The provisions of this Chapter are applicable to a school facility and equipment that are necessary to meet the minimum school facility guidelines established in this Article or to meet the gross square footage standards and are in addition to standards prescribed by law.
- B. Notwithstanding subsection (A), new construction projects and building renewal projects approved before the effective date of this rulemaking are exempt from changes made in this rulemaking.

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed; new Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-202. Reserved****R7-6-203. Reserved****R7-6-204. Reserved****R7-6-205. School Site**

- A. A school site shall have safe access, parking, drainage, and security to accommodate a school facility that complies with:
  1. The minimum gross square footage requirements established in A.R.S. § 15-2011, for the number of students at the school facility; and
  2. This Chapter.
- B. A school site provides safe access by having:
  1. A student drop-off area; and
  2. A pedestrian pathway that allows students to enter the school facility through a designated point of entry without crossing vehicular traffic or by crossing vehicular traffic at a designated crosswalk.
- C. A school site provides adequate parking by having an all-weather surface area large enough to accommodate one parking space per staff FTE and one visitor parking space per 100 students. A school site that is unable to provide adequate parking may have the sufficiency of parking at the school site determined by the Board using the following criteria:
  1. Availability of street parking around the school;
  2. Availability of any nearby parking lots;
  3. Availability of public transit;
  4. Number of staff who drive to work on a daily basis; and
  5. The average number of visitors on a daily basis.
- D. A school site provides adequate drainage if the school site is prepared in a manner consistent with the drainage and floodplain management standards of the jurisdiction in which the school site is located.
- E. A school site provides adequate security if there is a fenced or walled, outdoor, play or physical education area for preschool students with disabilities and students in kindergarten through grade six. A school site that is unable to provide adequate

## CHAPTER 6. SCHOOL FACILITIES BOARD

security may have the sufficiency of security at the school site determined by the Board using the following criteria:

1. Amount of vehicular traffic near the school site;
2. Existence of hazardous or natural barriers on or near the school site;
3. The amount of animal nuisance near the school site; and
4. Visibility of the outdoor, play or physical education area.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-206. Reserved**

**R7-6-207. Reserved**

**R7-6-208. Reserved**

**R7-6-209. Reserved**

**R7-6-210. Classroom Square Footage**

- A. A school district shall have school facilities with the following minimum cumulative classroom square footage:
1. For preschool students with disabilities through grade three: 32 square feet per student;
  2. For grades four through six: 28 square feet per student;
  3. For grades seven and eight: 26 square feet per student; and
  4. For grades nine through 12: 25 square feet per student.
- B. Classroom square footage of a school facility is measured from interior wall to interior wall of a classroom and is the space required for teaching. Both general and specialty classrooms are included in the classroom square footage of a school facility.
- C. Cumulative classroom square footage is measured as follows:
1. 100 percent of the classroom square footage usable for general classroom purposes and occupied throughout a day by the same students in programs for preschool students with disabilities, kindergarten, and grades one through six;
  2. 90 percent of the classroom square footage usable for general and specialty classroom purposes in programs for students in grades seven and eight; and
  3. 85 percent of the classroom square footage usable for general and specialty classroom purposes in programs for students in grades nine through 12.
- D. Classroom square footage includes space allocated for any of the following purposes:
1. Garment storage,
  2. Supply storage,
  3. Work counter; and
  4. Teacher or student collaboration.
- E. An exterior space may be included in the classroom square footage of a school facility if the exterior space is covered and meets all other standards in this Chapter.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-211. Classroom Fixtures and Equipment**

Each general and specialty classroom shall:

1. Contain a work surface and seat for each student, teacher, and other individual regularly assigned to the classroom. The work surface and seat shall be:
  - a. Appropriate for the normal activity of the class conducted in the room, and
  - b. Capable of being moved into different configurations;
2. Have one or more, non-electronic, mounted or retractable, surfaces, at least three feet by five feet, which fulfill all of the following purposes:
  - a. Is erasable,
  - b. Is suitable for projection, and
  - c. Is suitable for display;
3. Have storage for classroom materials or conveniently accessible storage; and
4. Have secure storage for student records or conveniently accessible secure storage. Student records may be stored electronically.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-212. Classroom Lighting**

Each general, science, and art classroom shall have a light system capable of maintaining at least:

1. Fifty foot-candles of light if the light is provided by incandescent, halogen, or fluorescent bulbs; or
2. Thirty foot-candles of light if the light is provided by LED (light emitting diode) bulbs.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-213. Classroom Temperature**

- A. A school facility shall have an HVAC system capable of maintaining a temperature between 68° and 82° F under normal conditions with an occupied classroom.
- B. Except in areas where the elevation is above 5,000 feet, defective or non-operable air conditioners and evaporative coolers shall be replaced with air conditioning. Non-air conditioned schools with elevations less than 5,000 feet shall be air-conditioned.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-214. Classroom Acoustics**

The sustained background sound level of each general, science, and art classroom shall be less than 55 decibels.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

## CHAPTER 6. SCHOOL FACILITIES BOARD

**R7-6-215. Classroom Air Quality**

The CO<sup>2</sup> level in each general and specialty classroom shall not exceed 800 PPM above the ambient CO<sup>2</sup> level.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-216. Measuring Classroom Comfort**

To determine whether a school facility complies with the standards in R7-6-212 through R7-6-215:

1. Classroom lighting, temperature, acoustics, and air quality shall be measured at a work surface in the approximate center of a classroom under normal conditions;
2. Measuring shall be performed for a random sample of 10 percent of the general, science, and art classrooms in each building of the school facility; and
3. All portable or modular buildings manufactured in the same year and installed at the school facility at the same time are considered a single building.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-217. Reserved**

**R7-6-218. Reserved**

**R7-6-219. Reserved**

**R7-6-220. Learning and Technology Center**

- A. A school facility shall have a learning and technology center with space for students to access electronic and hard-copy research and reading materials. The learning and technology center shall include space for reading, listening, and viewing materials.
- B. For an elementary school facility that serves at least 150 students, the learning and technology center shall have space equal to the greater of 1000 square feet or the square footage equal to 20 square feet per student for 10 percent of the student body.
- C. For a middle or junior high or high school facility that serves at least 150 students, the learning and technology center shall have space equal to the greater of 1200 square feet or the square footage equal to 20 square feet per student for 10 percent of the student body.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-221. Equipment for Learning and Technology Center**

- A. The learning and technology center of a school facility shall contain the following minimum equipment:
  1. One linear foot of book shelf space per student;
  2. For a school facility of 150 or more students, one work surface and seat for every 20 students, minimum of 15, maximum of 75;
  3. One TV;
  4. Projection equipment and projection surface;

5. Ten books per student; and
6. An electronic or hard copy of each of the following:
  - a. Almanac,
  - b. Encyclopedia,
  - c. Atlas, and
  - d. Unabridged dictionary.

- B. If a hard-copy almanac, encyclopedia, or atlas is used, each shall have a publication date of 2000 or later.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-222. Reserved**

**R7-6-223. Reserved**

**R7-6-224. Reserved**

**R7-6-225. Cafeteria**

A school facility shall have covered space in which students are able to eat within the school site, outside of classrooms. The space used as a cafeteria may have more than one function and may fulfill more than one requirement in this Chapter.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-226. Food Service**

- A. A school facility shall have space, fixtures, and equipment sufficient for receiving, storing, preparing, and serving food to students. The food service fixtures and equipment shall be in or accessible to the cafeteria space.
- B. A school facility shall ensure food service fixtures and equipment comply with county health codes.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-227. Equipment List for Food Service**

- A. A school facility that receives, stores, prepares, and serves food to students shall have the following fixtures and equipment:
  1. One three-compartment sink,
  2. One double-stack oven or a warming oven,
  3. One dishwasher if reusable dishes and silverware are used,
  4. One hot-food holding appliance,
  5. One range with hood,
  6. One refrigerator,
  7. One freezer, and
  8. One milk refrigerator.
- B. An alternative may be substituted for any item in subsection (A) if the alternative enables the school facility to receive, store, prepare, and serve food to students.
- C. A school facility that receives, stores, and serves food prepared off the school site may adjust the items in subsection (A) accordingly.

## CHAPTER 6. SCHOOL FACILITIES BOARD

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-228. Reserved**

**R7-6-229. Reserved**

**R7-6-230. Multiuse Space**

A school facility shall have a space capable of being used for student assembly. The space shall be:

1. Large enough to accommodate one-third of the student body,
2. The same size or larger than an average classroom at the school facility, and
3. At least seven square feet multiplied by one-third of the student body in addition to the square footage of open aisle and exiting path space.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

- A. A school facility with students in grades five through 12 shall have classroom square footage for delivery of practical instruction in science.
  1. For grades five through eight, no classroom square footage is required other than as specified in R7-6-210.
  2. For grades nine through 12, four square feet per student is required for practical instruction in science. The space shall not be smaller than the average classroom at the facility and may be used for other instruction when not needed for practical instruction in science.
- B. Except as specified in R7-6-251, a school facility with students in grades five through 12 shall have the science fixtures and equipment specified in R7-6-246 for delivery of practical instruction in science.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-246. Equipment List for Science Facilities**

- A. Science facilities for students in grades nine through 12 shall have the following fixtures and equipment:
  1. One demonstration table with non-corrosive surface per 250 students;
  2. Six laboratory stations with a non-corrosive surface per 250 students;
  3. One fume hood;
  4. One chemical storage unit per 1,000 students;
  5. One eyewash or safety shower station per 250 students;
  6. Access to one dissecting microscope per 25 students, minimum of 12 microscopes or the number equal to one-half the number of students in grades nine through 12 divided by 25, whichever is fewer; and
  7. One refrigerator.
- B. Science facilities for students in grades five through 12 shall have the following fixtures and equipment:
  1. One sink per 250 students;
  2. Access to one compound microscope per 25 students, minimum of 12 microscopes or the number equal to one-half the number of students in grades five through 12 divided by 25, whichever is fewer; and
  3. One balance per 250 students.

immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-247. Arts Facilities; Career and Technical Education Facilities**

- A. Except as specified in R7-6-251, a school facility with students in grades seven through 12 shall have space to deliver art education programs, including visual, music, and performing arts, and career and technical education programs.
- B. A school facility with students in grades seven through 12 shall have four square feet per student of space for art education and/or career and technical education. The space shall not be smaller than the average classroom at the facility and may be used for other instruction when not needed for instruction in the arts or career and technical education.
- C. A school facility with students in kindergarten through sixth grade may deliver art education in the classroom square footage specified in R7-6-210. Education in performing arts may be delivered to students in kindergarten through sixth grade in spaces such as a multiuse space, gymnasium, or cafeteria if the spaces have appropriate acoustical treatment.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-248. Repealed****Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Repealed by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-249. Physical Education and Comprehensive Health Program Facilities**

- A. A school facility shall have classroom square footage for indoor physical education activity and a comprehensive health program established in compliance with the academic standards prescribed by the State Board of Education.
- B. The indoor classroom square footage available for physical education activity shall be:
  1. For a school facility designed to serve no more than 50 students: at least 1,600 square feet in a single space;
  2. For a school facility designed to serve 51 to 125 students: at least 2,600 square feet in a single space;
  3. For a school facility designed to serve 126 to 600 students: at least 5,100 square feet, of which at least 2,600 square feet is in a single space; and
  4. For a school facility designed to serve more than 600 students: at least 7,500 square feet, which may include space that also serves as a cafeteria.
- C. The classroom square footage designated in subsection (B) may have more than one function including the comprehensive health program.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-250. Equipment for Physical Education Activity**

- A. A school facility shall have one hardscape equivalent in size to an outdoor basketball court per 300 students to a maximum of three hardscapes.
- B. A school facility with students in grades seven through 12 shall have a sports field appropriate for softball, hardball, football, track, soccer, or other sports.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-251. Alternative Delivery Method**

A school district may use an alternative method to deliver instruction in art, science, or career and technical education. Before an alternative method is used, the school district shall:

1. Have the school district governing board determine the alternative method is capable of meeting the requirements established in the academic standards prescribed by the State Board of Education for the specific subject; and
2. Approve use of the alternative method.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-252. Reserved****R7-6-253. Reserved****R7-6-254. Reserved****R7-6-255. Parent Work Space**

- A. If parents are invited to assist with school activities, a school facility shall include a work space large enough to accommodate the number of parents expected to assist with school activities at one time.
- B. The parent work space may be in multiple locations throughout the school facility and may have more than one function.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-256. Two-way Internal Communication System**

A school facility shall have a two-way internal communication system, such as a telephone between a central location and each general and specialty classroom, the learning and technology center, and the cafeteria.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-257. Fire Alarm**

A school facility shall have a fire alarm system as required by the State Fire Marshal.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

## CHAPTER 6. SCHOOL FACILITIES BOARD

**R7-6-258. Administrative Space**

- A. A school facility shall have space for use by the administration of the school. For the school administrator, 150 designated square feet is required. For general administrative purposes, a space between 150 square feet and 1.5 square feet per student, as reasonable for the size of the anticipated student body, is required. The maximum may be exceeded.
- B. A school facility shall have a dedicated space in which to isolate a sick student from the other students. This space shall be accessible to a restroom and large enough to accommodate one cot per 200 students, with a maximum of four cots.
- C. A school facility shall have work space available to the faculty that is in addition to any work space in or near a classroom. A space between 150 square feet and one square foot per student, as reasonable for the size of the anticipated student body, is required. The faculty work space may be in multiple locations throughout the school facility and may have more than one function.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-259. Reserved****R7-6-260. Laws and Building Codes**

- A. To the extent required by law, school buildings shall be in compliance with federal, state and local building and fire codes and laws that are applicable to the particular building. Existing school buildings are not required to comply with current requirements for new buildings unless this compliance is specifically mandated by law or by the building or fire code of the jurisdiction where the building is located.
- B. At a minimum, the 1997 Uniform Building Code (UBC) is required to be met for new school facility construction and, as required, for building renovations in existing schools.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-261. Energy Saving Measures**

Both construction of a new school facility and renewal of an existing school facility shall include energy conservation measures that will provide dollar savings in excess of the cost of the conservation measure within eight years of the construction or renewal.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-262. Reserved****R7-6-263. Reserved****R7-6-264. Reserved****R7-6-265. Building Systems**

- A. As required under A.R.S. § 15-2011(B)(3), building systems in a school facility shall be in working order and capable of being properly maintained. A building system is considered to be in working order and capable of being maintained if:
1. The system is capable of being operated as intended;

2. The system is capable of being maintained according to manufacturer's instructions;
3. Newly manufactured or refurbished replacement parts are available;
4. The remaining life expectancy of the system is at least three years;
5. The system is capable of supporting the gross square footage of the school facility; and
6. Components of the system present no imminent danger of personal injury.

- B. Building systems required under A.R.S. § 15-2011(B)(3) to be in working order and capable of being maintained include roof, plumbing, telephone, electrical, and HVAC systems. Additionally, under this Chapter, the following building systems shall be in working order and capable of being properly maintained: fire alarm, two-way internal communication, network cabling, and security systems.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-266. Reserved****R7-6-267. Reserved****R7-6-268. Reserved****R7-6-269. Reserved****R7-6-270. Building Structural Soundness**

As required under A.R.S. § 15-2011(B)(4), all buildings of a school facility shall be structurally sound. A building of a school facility is considered structurally sound if the building:

1. Presents no imminent danger of personal harm,
2. Has no visible signs of major decay or distress, and
3. Appears to have at least three years of remaining life expectancy.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-271. Exterior Envelope, Interior Surfaces and Interior Finishes**

The exterior envelope, interior surfaces, and interior finishes of a school facility shall be safe and capable of being maintained.

1. An exterior envelope is safe and capable of being maintained if:
  - a. Walls and roof are constructed of materials requiring minimal maintenance, including painting;
  - b. Walls, roof, doors, and windows are weather tight under normal conditions with routine upkeep; and
  - c. The building structural systems support the loads imposed on them.
2. An interior surface is safe and capable of being maintained if it is:
  - a. Structurally sound;
  - b. Capable of supporting a finish; and
  - c. Capable of continuing in its intended use, with normal maintenance and repair, for at least three years.
3. An interior finish is safe and capable of being maintained if it is:
  - a. Free of exposed lead paint;

## CHAPTER 6. SCHOOL FACILITIES BOARD

- b. Free of friable asbestos; and
- c. Capable of continuing in its intended use, with normal maintenance and repair, for at least three years.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-273. Reserved**

**R7-6-274. Reserved**

**R7-6-275. Minimum Gross Square Footage**

Each school district shall have sufficient school facilities, which comply with minimum school facility guidelines established in this Article, to meet the per pupil minimum adequate gross square footage requirements for such district as determined by law, for such district based on number and grade distribution of the students served by the district.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-276. Assessment of Minimum Gross Square Footage**

- A. Computation of the gross square footage of a school facility may be by physical measure or by calculation based on architectural plan documents.
- B. The gross square footage of a school facility equals all space within the facility excluding space used for district administrative purposes.
- C. The gross square footage of a district shall equal the sum of the gross square footage of each school facility in the district.
- D. The minimum gross square footage of a district equals the sum of the products of the students in each grade or program for preschool children with disabilities or kindergarten program multiplied by the minimum adequate gross square footage requirements per pupil, applicable to the district for such grade or program.
- E. For the purpose of assessment of minimum gross square footage, the number of children in all grades and kindergarten shall be evenly distributed across all grades and kindergarten served by the district.

**R7-6-285. Guidelines Exception**

The Board may grant an exception from any of the guidelines in this Chapter. To obtain an exception, the governing board of the school district shall submit a written request to the Board. The Board shall grant an exception if it determines the intent of the guideline is capable of being met by the school district in an alternative manner. If the Board grants the exception, the Board shall deem the school district meets the guideline and is not eligible for state funding to meet the guideline.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**ARTICLE 3. SQUARE FOOTAGE CALCULATIONS****R7-6-301. Square Footage Calculations**

- A. A school district may use Class A bonds to supplement any project funded by the School Facilities Board pursuant to A.R.S. § 15-2021 or A.R.S. § 15-2041. Pursuant to A.R.S. § 5-2002(H), when a school district adds square footage to the district through the construction of a new school using Class A bonds, the School Facilities Board shall not provide funding to supplement the new school construction.
- B. When a school district adds square footage to the district through the construction of a new school using either Class B bonds, or unrestricted capital outlay monies, the School Facilities Board shall not include the square footage of the new school in the gross square footage of the school district for purposes of calculating building renewal distributions pursuant to A.R.S. § 15-2031 and for determining needs for additional square footage pursuant to A.R.S. § 15-2011 and A.R.S. § 15-2041.
- C. When a school district adds square footage to the district through the construction of a new school using Class A bonds, the School Facilities Board shall include the square footage of the new school in the gross square footage of the school district for purposes of calculating building renewal distributions pursuant to A.R.S. § 15-2031 and for determining needs for additional square footage pursuant to A.R.S. § 15-2011 and A.R.S. § 15-2041.
- D. A school district that uses Class B bonds and/or unrestricted capital outlay monies to add or replace square footage at existing schools shall have the additional square footage or replacement square footage treated as follows:
  1. A school district that adds square footage to an existing school with the use of Class B bonds or unrestricted capital outlay monies shall not have the additional square footage included in the determination of minimum adequate square footage pursuant to A.R.S. § 15-2011(C), but the School Facilities Board shall consider the additional square footage for purposes of determining adequacy of the functional components of the school as specified in the Minimum School Facilities Guidelines set forth in R7-6-201 through R7-6-285.
  2. A school district that both removes and adds square footage with the use of Class B bonds or unrestricted capital outlay monies shall not have the net additional square

## CHAPTER 6. SCHOOL FACILITIES BOARD

footage included in the determination of minimum adequate square footage pursuant to A.R.S. § 15-2011(C), but the School Facilities Board shall consider the net additional square footage for purposes of determining adequacy of the functional components of the school as specified in the Minimum School Facilities Guidelines set forth in R7-6-201 through R7-6-285.

3. For purposes of calculating building renewal pursuant to A.R.S. § 15-2031, replacement square footage constructed with Class B bonds or unrestricted capital outlay monies shall be included, but net additional square footage shall be excluded.
  4. If square footage is replaced at an existing school with the use of Class B bonds or unrestricted capital outlay monies, the student capacity of the facility after completion of the project will be determined in the same manner as it would have been determined prior to the addition. If Class B bonds or unrestricted capital outlay monies are used to construct a complete replacement school, the student capacity of the facility once the project is completed will be based on the provisions of A.R.S. § 15-2011(C).
  5. For purposes of this Section, replacement square footage is defined as square footage constructed with Class B bonds or unrestricted capital outlay monies that replaces existing square footage.
- E. If square footage is added to or replaced at an existing school with the use of Class A bonds, the student capacity of the facility after completion of the project will be determined in the same manner as it would have been determined prior to the addition.
- F. The method of computing the funding and square footage for any expansion of a core facility previously funded by the School Facilities Board shall follow the same method that was used for computing the original core facility.

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed; new Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-302. Modification of Square Footage for Geographic Factors**

- A. In those school districts where students are transported one hour or more via the most reasonable and direct route or where students reside 45 miles or more from the closest school via the most reasonable and direct route, and where 100 or more students are affected by these conditions within the same region, the School Facilities Board shall provide additional school space to the district to accommodate the educational needs of the affected students. However, the educational space provided may be modified as the Board sees fit in making a conscientious effort to meet the Minimum Adequacy Guidelines without requiring extraordinary expenditures of public funds.
- B. If an elementary school district that is not in a high school district unifies after June 30, 2005, the resulting unified school district may qualify for high school space under A.R.S. § 15-2041 if it meets the following criteria:
  1. The elementary school district unifies after June 30, 2005; and
  2. The resulting unified school district is projected to have more than 350 resident high school students being served in school districts other than the student's resident school district within three years following the current fiscal year; and

3. One of the following is true:
  - a. At least 350 of the high school students would travel 20 miles or more to the receiving school facility; or
  - b. The receiving school district is projected to need additional high school space within seven years. For purposes of this analysis, the projected average daily membership of the receiving district includes the high school students of both the receiving and sending districts.

- R7-6-501. Capital Plans

If a school district's capital plan, developed pursuant to A.R.S. § 15-2041, indicates a need for a new school or an addition to an existing school within the next four years or a need for land within the next ten years, the school district shall complete the capital plan packet issued by the School Facilities Board and return the packet to the Board by the announced deadline.

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed; new Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

- R7-6-502. Funding for New Schools or Additional Square Footage

A. The data submitted by each school district requesting additional square footage under the capital plan shall be reviewed by staff to determine student capacity. Additionally, staff shall review and verify district student population projections and the existing square footage in the district. The staff shall prepare a New Construction Analysis for the district.

- B. If the proposed new school facilities are located in territory in the vicinity of a military airport as defined in A.R.S. § 28-8461, the Board shall provide notice to the military airport of the proposed new school facility construction and seek the military airports comments and analysis concerning compatibility of the proposed school facilities with the high noise or accident potential generated by military airport operations that may have an adverse effect on public health and safety. The Board shall consider and analyze the comments and analysis provided by the military airport prior to making a final determination to fund the new square footage.
- C. The Board shall make a decision regarding the number of square feet and students to be funded for the district, the appropriate cost per square foot and the total budget. At the time the Board is making its decision, the New Construction Analysis shall be available to the Board members and the school district. The school district may address the Board at this time.
- D. A school district that is approved for additional square footage shall have 60 days from the date of notification to officially accept, in writing, funding for the square footage approved by the Board or the approval shall expire. After a school district has accepted a project in writing and has signed the Terms and Conditions for New School Funding, the Board shall provide five percent of the monies approved for architectural and engineering fees for projects of \$500,000 or more. The individual school district shall be responsible for establishing the actual A and E amount.
- E. A school district that receives approval for additional square footage from the Board shall proceed with the design development plan and specifications for the project. Two copies of the proposed educational goals or specifications and schematic design, with budget estimates are required to be submitted to the Board's staff. The items required to be included in the estimated budget are all elements of new construction, excluding land acquisition. These elements include, but are not limited to:
  1. Architectural and engineering fees;
  2. Survey, testing, permits, advertising and printing;
  3. Construction costs;
  4. Furniture, fixtures and equipment;
  5. Any necessary project management; and
  6. A five percent contingency amount. After Board staff review, the school district shall proceed with a preliminary bid package.
- F. If the school district includes reasonable upgrades to the new construction project for energy conservation purposes, the Board shall provide funding upgrades above the formula based award to cover the full amount of the upgrade. Upgrades will only be funded if the upgrade receives pre-approval by the Board staff and the school district architect or engineer certifies that the upgrade will provide dollar savings in excess of the cost of the upgrade within an eight-year period.
- G. Upon review of the submitted schematic design, budget estimates and preliminary bid package, the Board's staff shall make a recommendation to the Board regarding the appropriateness of the school district to proceed with the additional square footage and the efficiency and effectiveness of the plan. The staff recommendation shall be based on whether the project is within the original scope and Board approved budget (including square footage and number of students), the project meets the building adequacy standards, initial comments from the local building authority and whether revised student population projections continue to justify the additional square footage. If the Board approves the project, the school district shall be authorized to proceed with the final bid package. Prior

## CHAPTER 6. SCHOOL FACILITIES BOARD

to authorization to contract the school district shall document that it has obtained local (city, county or equivalent) building department approval. For projects outside of the original scope and /or Board approved budget or that do not meet the minimum adequacy guidelines, the Board may instruct the school district to resubmit the project, or the Board may make an alternative decision. Local funds may be used by the school district in conjunction with the Board approved funding.

- H. Upon receipt of bids by the school district, the Executive Director shall authorize the district to proceed with the contract if the school district has documented that it has obtained local (city, county or equivalent) building department approval, and the bid is within the original scope and Board approved budget, and meets the building adequacy standards. The Executive Director may make an alternative recommendation to the full Board.
- I. The Board-approved funding for additional square footage shall be available to the school district for one year from the date of notification. The bid process shall be completed within the one-year period. The Board shall consider requests for an extension beyond the one year and may grant an extension for good reason.
- J. The Board may modify or waive the requirements of this Section for good cause.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-503. Funding for Land**

- A. The School Facilities Board follows a three-step approval process for the funding of land that is classified as Step One - Justification of Need for Land; Step Two - Request to Purchase a Specific Site; and Step Three - Due Diligence. The executive director may deviate from the three-step approval process to meet other circumstances as they arise, such as purchasing state-owned land and condemnation and bring such recommendations to the full Board.
- B. Step One is the initial request for land for new construction. A school district that currently owns land shall demonstrate that the district-owned property is not suitable for the needed new school in order for the school district to receive funding for the acquisition of land.
- C. Step Two includes the following:
  1. The school district shall provide a map of the district showing current schools and the projected student population, grade levels served and attendance boundaries in various locations in the district, which supports the location of the new school at the requested site. The school district shall also provide a listing of vacant parcels currently owned by the school district (including the size of each parcel and its location), describe the site selection process, explain why the site requested was chosen over alternative sites, and summarize any joint use provisions or other intergovernmental agreements related to the site. The school district shall also provide a legal description of the desired site, the size of the site and an estimate of the cost of the site. The school district may provide information on more than one site.
  2. The Board shall make a decision regarding the site size for each site. The range of acreage table approved by the Board is provided to allow school districts some leeway in site selection. The school district shall provide special justification if the site size is not within the range shown on the range of acreage table. Allowances shall not be granted for additional acreage for limited use activities that are only remotely related to the teaching and learning enterprise. Limited use activities would include, but not be limited to, athletic fields that are only used for inter-scholastic competition rather than daily activities, and non-school related community functions. The site size will be based on the eventual size of the school, if expansion is planned. The school district may request a larger or smaller site if conditions require. The school district may purchase additional acres with local funds. School districts should give careful consideration to joint-use sites such as those which adjoin community parks and play grounds. The ranges indicated are not intended to dictate a minimum acreage if a joint-use agreement provides the school with access to adjoining public space.
- 3. If a school district needs monies to verify, gather and submit the information required in Step Three, the school district shall submit a cost estimate to the Board, and the Board shall approve or disapprove the request for monies. Rather than allocating monies to a school district to verify, gather and submit information required in Step Three, the Board may approve the staff of the School Facilities Board to contract directly for such services, in which case the contractors will be paid directly by the Board.
- D. If the school district receives approval to proceed to Step Three, the following information about the site shall be acquired:
  1. An appraisal of the land that documents that the proposed cost is at or below the fair market value.
  2. Legal description of the land.
  3. Level one environmental assessment, plus the following factors (if not included):
    - a. Hazardous materials
    - b. Archaeology
    - c. Endangered flora and fauna
    - d. Noise
    - e. Soil Conditions
    - f. Adjacent land owners and/or uses
  4. Boundary and Topographical Survey
  5. Drainage statement
  6. Site development cost
  7. Photographic survey (if required by planning and zoning departments)
  8. Feasibility site diagram-conceptual study by a design professional illustrating proposed development of the site (based on the eventual size of the school, if there are plans for expansion), indicating:
    - a. Property lines and measurements
    - b. Setbacks, right-of-ways, and easements
    - c. Vehicular access and parking
    - d. Pedestrian and bicycle access
    - e. Building zone
    - f. Drainage concept
    - g. Utility routes or systems
    - h. Activity fields and courts
    - i. Limit-lines and calculation of usable area
    - j. Existing features to be demolished or preserved
    - k. Future expansion capability
- E. Final distribution of monies to purchase the site may be made by the Board if Step Three reveals no serious problem with the site. If the actual cost of the site does not exceed the Board approved amount the Executive Director may make the final determination of site funding without further action by the Board. If monies were distributed to the school district to verify, gather and submit the information required based on a cost estimate, an adjustment for the actual cost shall be made at the time of the final distribution. The school district shall provide documentation to the Board of the actual expenditures from

## CHAPTER 6. SCHOOL FACILITIES BOARD

the monies provided and the actual closing costs within 60 days of the final distribution. Expenditures exceeding the amount provided pursuant to subsection (C)(3) of this Section require approval by the Board. If the site is rejected as a result of information gathered in Step Three, the school district may repeat Steps Two and Three with a new site.

- F. The Board may modify or waive the requirements of this Section for good cause.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-504. Donations of Real Property**

- A. A school district seeking to acquire real property by donation pursuant to A.R.S. § 15-2041 shall complete the school site and school facility donation information requirements form and submit the form to the School Facilities Board. The information requested on the form for land shall include, among other items, a district map identifying existing school sites and facilities, student population and the location of the donation. The information requested on the form for a facility shall include, among other items, the size of the facility, grade levels served and location. If all of the information required is not available and if a school district needs monies to verify, gather and submit the information required, it shall submit a cost estimate at the same time it submits the information that is available.
- B. If all information is available, the School Facilities Board staff shall analyze the request to accept the donation and make a recommendation to the Board. If all information is not available, the School Facilities Board staff shall analyze the request on the basis of whether the school district should be awarded the funds necessary to complete the information gathering process, and shall make a recommendation to the Board. At the time the Board is making its decision, the staff analysis and recommendation shall be available to the School Facilities Board members and the applicant school district. The applicant school district may address the Board.
- C. If the Board approval is to award funds necessary to complete the information gathering process, the district shall be notified by the Board Staff and upon acceptance may proceed to gather the additional information required. Once the additional information is submitted to the Board, the Staff shall analyze the request to accept the donation and make a recommendation to the Board as stated in subsection (B).
- D. If the Board approves the district request to accept the donation, the Board staff shall notify the district. The distribution of 20 percent of the value of the accepted donation pursuant to A.R.S. § 15-2041 shall be awarded to the school district upon notification to the Board that the donation has been accepted by the district. The district shall submit documentation of its governing board action and documentation that the property title has been transferred to the district. Upon receipt of this documentation Board staff shall be authorized to distribute the approved 20 percent amount.
- E. If monies were distributed to the district to verify, gather and submit the information required based on an estimated cost, an adjustment for the actual cost shall be made at the time of the final distribution. The district shall provide documentation to the Board of the actual expenditures from the monies provided. Expenditures exceeding any amounts provided pursuant to R7-6-503(C)(3) shall require approval by the Board.
- F. In determining whether the real property proposed for donation is at an appropriate school site, the School Facilities Board Staff analysis shall be based on the following:
1. Location of the proposed donation of real property.

2. District needs for additional student capacity.
3. District needs for additional land (for site donations only).
4. Usable acres proposed for donation, taking into consideration School Facilities Board adopted usable acreage requirements.
5. The ability of a proposed site donation to accommodate a school facility that meets the minimum adequacy guidelines (for site donations only), or the adequacy of a proposed school facility donation.
6. Estimated site development costs.
7. Age and condition of the real property (for facility donation only).
8. Portion of real property that can be used for academic purposes.

- G. If the School Facilities Board Staff recommendation is to authorize the district to accept the donation, the Staff shall prepare a recommended 20 percent distribution amount. The 20 percent distribution recommendation will be based on the fair market value of the real property proposed for donation that is usable for academic purposes.
- H. The Board may waive or modify the requirements of this Section for good cause.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-505. Constructing Bond-Funded Schools on Land Funded by the School Facilities Board**

- A. A school district that acquires land by sale or lease pursuant to A.R.S. § 15-2041 may construct a school facility on that land using Class A bonds. The square footage of the new facility shall be included in the gross square footage of the school district for purposes of determining needs for additional square footage and building renewal distributions.
- B. A school district that acquires land by sale or lease pursuant to A.R.S. § 15-2041 may construct a school facility on that land using Class B bonds provided that the school district agrees in writing that when the school district qualifies for a new school funded by the School Facilities Board that the School Facilities Board will not provide funding for the lease or purchase of an additional site for that school. The square footage of the new facility constructed with Class B bond monies shall not be included in the gross square footage of the school district for purposes of determining needs for additional square footage and building renewal distributions.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**R7-6-506. Providing Technical Assistance in the Form of Project Management**

- A. A school district that does not have the experience or resources to successfully oversee a new school construction project may request technical support from the Board pursuant to A.R.S. § 15-2002(13) in the form of project management services.
- B. The Executive Director may approve the project management request. Should the Executive Director deny the request, the school district has the right to appeal the decision to the Board.
- C. The cost of the project management shall be made a part of the overall cost of the new school, and those funds shall be derived from the total allocation for the project provided by the School Facilities Board. Should the allocation of funds that the district receives pursuant to A.R.S. § 15-2041 satisfy the base cost of the new school plus the cost of the project man-

## CHAPTER 6. SCHOOL FACILITIES BOARD

agement, then the Board shall not provide any additional funds for project management services.

- D. If the school district's request for project management services is approved, the school district shall agree to reimburse the Board from its allocated funds for the cost of any independent contractors that the Board uses to provide the project management services.
- E. The Board may provide the school district with monies to pay for the project management services in addition to the monies the school district receives pursuant to A.R.S. § 15-2041 provided:
  1. The school district demonstrates that the monies it receives pursuant to A.R.S. § 15-2041 are not sufficient to build a school that meets the building adequacy guidelines and pay the fees for the project management; and
  2. The school district demonstrates in writing to the Board's satisfaction that the school district does not have the experience or resources necessary to successfully complete the new school construction project.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

- R7-6-507. **Reserved**
- R7-6-508. **Reserved**
- R7-6-509. **Reserved**
- R7-6-510. **Reserved**
- R7-6-511. **Repealed**

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**ARTICLE 6. CONTINGENCY FUNDS****R7-6-601. Allocation and Use of Contingency Monies**

- A. A sum equal to a percentage of the construction bid shall be set aside as a contingency fund to cover the cost of unknown conditions that could arise during construction. The School Facilities Board shall set aside an amount equal to five percent of the base cost for new construction and ten percent of the base cost for renovation of a structure or system replacement to cover these potential costs. Contingency funds are not part of the construction budget and are to be used only if needed. For deficiency corrections projects, any contingency funds which are not used shall be returned to the deficiency corrections fund. For projects funded by the new school facilities fund, any contingency funds which are not used may be used by the school district in accordance with A.R.S. § 15-2041.
- B. The mechanism that is used to spend contingency funds during construction is a "change order." There are three types of situations that generally require a change order:
  1. An unknown condition that was not determined until after construction was started and that requires a change, deletion or addition to the construction contract.
  2. The school district has determined to change the scope of work and add to or delete from the contract.
  3. A change is required to correct a discrepancy between what the contractor bid and what the architect and owner intended. This type of change order could be determined an "error or omission" on the part of the architect. If so,

the owner should pursue the architect's error and omissions insurance to recover the costs of the required change.

- C. Change orders can be additive or subtractive to the construction contract and both should be used. All changes in the scope of the contract and the contract documents should be considered potential change orders. Change order should not be used to correct conditions known prior to or discovered during the bid process. These should be addendum items and made part of the bid.
- D. The following conditions apply to the use of all contingency monies allocated to a specific project approved by the School Facilities Board. If the district wishes to issue change orders that do not comply with these rules, the associated costs shall be accounted for separately and not considered part of the approved project. In other words, they would need to be paid out of separate monies and would not be considered part of the approved project, even though they might be included in the same basic contract. These costs would be paid for using local funds.
  1. The school district may use contingency monies only to cover change orders that are to correct unknown conditions.
  2. Contingency funds may not be used to cover change orders for the other two types of situations discussed in subsection (B) above: the district has determined to change the scope of work during construction by adding components, or a change is required to correct a discrepancy created by the architect that could be considered an error or omission by the architect.
  3. For deficiency correction projects performed pursuant to A.R.S. § 15-2021 only, the Executive Director shall have the discretion to authorize the use of contingency funds for expansion of scope, to accommodate low budget estimates, and for all other project related costs.
  4. Contingency monies shall not be used to pay for "bid add alternates." These items are not part of the final approved project.
- E. A school district whose deficiency correction projects are combined with the deficiency correction projects of one or more additional school districts pursuant to R7-6-401 shall have the contingency amount included as a percentage of the overall set of projects that have been grouped together for such purposes. The Executive Director shall have the discretion to use, transfer, and/or combine the contingency amounts for any projects within such a group to any other project within the group of projects. The Executive Director's adjustment authority pursuant to R7-6-401 shall be considered as a percentage or sum of the overall group of projects.
- F. The Board may modify or waive the requirements of this Section for good cause.

**Historical Note**

Adopted by exempt rulemaking at 6 A.A.R. 917, effective April 30, 1999, filed in the Office of the Secretary of State January 13, 2000 (Supp. 00-1). Section repealed; new Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4).

**ARTICLE 7. MINIMUM SCHOOL FACILITY GUIDELINES FOR THE ARIZONA STATE SCHOOLS FOR THE DEAF AND BLIND****R7-6-701. Application**

- A. The provisions of Article 2 apply to the Arizona State Schools for the Deaf and Blind (ASDB), created under A.R.S. Title 15, Chapter 11, except as specified in this Article.

## CHAPTER 6. SCHOOL FACILITIES BOARD

- B. When a provision of Article 2 refers to a school district, the reference shall be interpreted to mean the ASDB governing board.
- C. If there is a conflict between a provision of this Chapter and a student's IEP, the IEP controls.
- D. Board funding for ASDB projects is subject to legislative authorization.

**R7-6-710. Classroom Square Footage Requirements for the ASDB**

- A. To accommodate the needs of ASDB students, the classroom square footage requirements of the ASDB differ from those of other school facilities as follows.
- B. Minimum cumulative classroom square footage:
  1. For preschool students with disabilities through kindergarten: 150 square feet per student; and
  2. For grades one through 12: 100 square feet per student.
- C. Learning and technology center:
  1. For an elementary school facility that serves at least 150 students, the greater of 1000 square feet or the square footage equal to 325 square feet per student for 10 percent of the student body; and
  2. For a middle or junior high or high school facility that serves at least 150 students, the greater of 1200 square feet or the square footage equal to 275 square feet per student for 10 percent of the student body.
- D. Multiuse space capable of being used for student assembly:
  1. Large enough to accommodate one-half of the student body plus parents and staff,
  2. The same size or larger than an average classroom at the ASDB, and
  3. At least 50 square feet multiplied by one-third of the student body in addition to the square footage of open aisle and exiting path space.
- E. Science facilities:
  1. For grades five through eight, no classroom square footage is required other than as specified in R7-6-710; and

2. For grades nine through 12, 10 square feet per student is required for practical instruction in science.
- F. Art facilities: For students in grades seven through 12, 10 square feet per student is required for art education.
  - G. Career and technical education facilities: For students in grades seven through 12, 40 square feet per student is required for career and technical education programs.
  - H. Physical education and comprehensive health program facilities: 125 square feet per student of indoor space is required for physical education and comprehensive health programs.
  - I. The spaces designated under subsections (C) through (H) shall not be smaller than the average classroom at the ASDB.
  - J. The spaces designated under subsections (E) through (H) shall not be:
    1. Included in the classroom square footage requirement; or
    2. Used for instruction other than the specialty instruction specified.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-711. Classroom Fixtures and Equipment**

- A. Each general and specialty classroom of the ASDB shall contain:
  1. Two work surfaces and seating for each student. The work surfaces and seat shall accommodate the special needs of a student who is deaf, blind, or has multiple disabilities; and
  2. One work surface and seat for the teacher and any other individual regularly assigned to the classroom.
- B. The ASDB shall provide the equipment and supplies necessary to meet the IEP of all students.

**R7-6-758. Administrative Space**

- A. A school facility shall have space for use by the administration of the school. For the school administrator, 150 designated square feet is required. For general administrative purposes, a space between 150 square feet and 7.5 square feet per student, as reasonable for the size of the anticipated student body, is required.
- B. A school facility shall have a dedicated space in which to isolate a sick student from the other students. This space shall be accessible to a restroom and large enough to accommodate one cot per 50 students, with a maximum of eight cots.
- C. A school facility shall have work space available to the faculty that is in addition to any work space in or near a classroom. A space between 150 square feet and one square foot per student, as reasonable for the size of the anticipated student body, is required. The faculty work space may be in multiple locations throughout the school facility and may have more than one function.
- D. A 9,500 square foot facility used for the administration of the Arizona School for the Deaf and Blind shall also be available.

**R7-6-780. Student Boarding Space**

Each ASDB campus shall provide safe and sanitary boarding for resident ASDB students as follows:

1. A student dormitory consisting of a shared living area and kitchen and a bedroom for each student in kindergarten through grade 12. The student dormitory shall provide at least 400 square feet of space per student, and
2. One laundry room for every student dormitory. The laundry room shall provide at least 100 square feet of space for every eight resident students.

**Historical Note**

New Section made by exempt rulemaking at 8 A.A.R. 287, effective June 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 26 A.A.R. 2963, with an immediate effective date of November 3, 2020 (Supp. 20-4).

**R7-6-781. Facility Requirements for ASDB Programs**

Each ASDB campus shall provide the following minimum square footage of space to support the ASDB program specified:

1. Audiology program. Five square feet per deaf student and one square foot per blind student;
2. Auditory training and speech therapy program. Three square feet per deaf student and one square foot per blind student;
3. Low-vision program. Three square feet per student;
4. Occupational and physical therapy program. Five square feet per student with a minimum of 1,500 square feet; and
5. Orientation and mobility program. Six square feet per blind student.

As of February 1, 2022

41-5701. Definitions

In this chapter, unless the context otherwise requires:

1. "Board" means the school facilities oversight board.
2. "Division" means the division of school facilities within the department of administration.

41-5701.01. Division of school facilities

- A. The division of school facilities is established within the department of administration.
- B. The director of the department of administration shall appoint the director of the division.

41-5701.02. School facilities oversight board; members; conflict of interest; violation; classification; change orders; notification

A. The school facilities oversight board is established within the division consisting of the following members who are appointed by the governor pursuant to section 38-211 in such a manner as to provide for approximate geographic balance and approximate balance between public and private members:

1. One member who represents a statewide organization of taxpayers.
2. One member who is a registered professional architect.
3. One member with knowledge and experience in school facilities management in a public school system.
4. One member who is a registered professional engineer.
5. Two members who are owners or officers of a private construction company, who have knowledge of and experience in constructing large commercial or government buildings and whose businesses do not include school construction.
6. One person who represents the business community.

B. In addition to the members appointed pursuant to subsection A of this section:

1. The superintendent of public instruction or the superintendent's designee shall serve as an advisory nonvoting member of the school facilities oversight board.
2. The director of the department of administration or the director's designee shall serve as an advisory nonvoting member of the school facilities oversight board.

C. Members of the school facilities oversight board serve four-year terms. The school facilities oversight board shall meet as often as the members deem necessary. A majority of the members constitutes a quorum for the transaction of business.

D. The unexcused absence of a member for more than three consecutive meetings is justification for removal by a majority vote of the board. If the member is removed, notice shall be given of the removal pursuant to section 38-292.

E. The governor shall fill a vacancy by appointment of a qualified person as provided in subsection A of this section.

F. Members of the board who are employed by government entities are not eligible to receive compensation. Members of the board who are not employed by government entities are entitled to payment of \$150 for each meeting attended, prorated for partial days spent for each meeting, up to \$2,500 each year. All members are eligible for reimbursement of expenses pursuant to title 38, chapter 4, article 2. These expenses and the payment of compensation are payable to a member from monies appropriated to the board from the new school facilities fund.

G. Members and employees of the school facilities oversight board are subject to title 38, chapter 3, article 8.

H. In addition to the requirements prescribed in subsection G of this section, employees of the school facilities oversight board may not have a direct or indirect financial interest in any property purchased, facility constructed or contract financed with monies made available by the board or any other public monies. A person who knowingly violates this subsection is guilty of a class 1 misdemeanor.

I. The division shall establish policies and procedures relating to building renewal grant change orders that include the following:

1. The division shall approve or reject a change order within two business days.
2. If a school district approves work referenced in a change order before the division approves the change order, the school district is responsible for the cost and construction of the project.

J. The division shall establish policies and procedures to ensure that it notifies school districts in a uniform manner and at least annually of the services and funding that are available from the board and the division for facility construction, renovation and repair projects. The division shall update and post this information on its website on or before July 1 of each year.

K. The division shall establish and maintain a list of the persons who are responsible for facilities management at each school district in this state. A school district shall promptly notify the division of any change to persons who are responsible for facilities management at that school district. The division shall update and post this information on its website on or before July 1 of each year.

L. Members of the school facilities oversight board may not solicit, accept or provide gifts that are prohibited by state law.

41-5702. Powers and duties; staffing; reporting requirements

A. The division shall:

1. Assess school facilities and equipment deficiencies and approve the distribution of grants as appropriate.
2. Maintain a database of school facilities to allow for the administration of the new school facilities formula and the building renewal grant fund. The facilities listed in the database must include all buildings that are owned by school districts. The division shall ensure that the database is updated on at least an annual basis. Each school district shall report to the division not later than September 1 of each year information as required by the division to administer the building renewal grant fund and by the school facilities oversight board to compute new school facilities formula distributions, including the nature and cost of major repairs, renovations or physical improvements to or replacement of building

systems or equipment that were made in the previous year and that were paid for either with local monies or monies provided from the building renewal grant fund. Each school district shall report any school or school buildings that have been closed, that are vacant or partially used pursuant to section 15-119 and that have been leased to another entity or that operate as a charter school. The division shall develop guidelines and definitions for the reporting prescribed in this paragraph and may review or audit the information, or both, to confirm the information submitted by a school district. Notwithstanding any other provision of this chapter, if a school district converts space that is listed in the database maintained pursuant to this paragraph to space that will be used for administrative purposes, the school district is responsible for any costs associated with converting, maintaining and replacing that space. If a building is significantly upgraded or remodeled, the division shall adjust the age of that school facility in the database as follows:

(a) Determine the building capacity value as follows:

(i) Multiply the student capacity of the building by the per pupil square foot capacity established by section 41-5741.

(ii) Multiply the product determined in item (i) of this subdivision by the cost per square foot established by section 41-5741.

(b) Divide the cost of the renovation by the building capacity value determined in subdivision (a) of this paragraph.

(c) Multiply the quotient determined in subdivision (b) of this paragraph by the currently listed age of the building in the database.

(d) Subtract the product determined in subdivision (c) of this paragraph from the currently listed age of the building in the database, rounded to the nearest whole number. If the result is a negative number, use zero.

3. Inspect, contract with a third party to inspect or certify school district self-inspections of school buildings at least once every five years to ensure compliance with the building adequacy standards prescribed in section 41-5711, the accuracy of the reporting of vacant and partially used buildings pursuant to this subsection and routine preventive maintenance guidelines as prescribed in this section with respect to constructing new buildings and maintaining existing buildings. The division shall randomly select twenty school districts every thirty months and provide for them to be inspected pursuant to this paragraph.

4. Develop prototypical elementary and high school designs. The division shall review the design differences between the schools with the highest academic productivity scores and the schools with the lowest academic productivity scores. The division shall also review the results of a valid and reliable survey of parent quality rating in the highest performing schools and the lowest performing schools in this state. The survey of parent quality rating shall be administered by the department of education. The division shall consider the design elements of the schools with the highest academic productivity scores and parent quality ratings in the development of elementary and high school designs. The division shall develop separate school designs for elementary, middle and high schools with varying pupil capacities.

5. Develop application forms, reporting forms and procedures to carry out the requirements of this article, including developing and implementing policies and procedures to:

(a) Ensure that the division and the school facilities oversight board, as applicable, notify school districts in a uniform manner of the services and funding available for school districts from the board or the division for facility construction, renovation and repair projects. The policies and procedures shall

require the division and the board to provide at least one annual communication to school districts in a manner prescribed by the division and shall require each school district to develop and maintain a list of persons who are responsible for facilities management at that school district.

(b) Establish a project eligibility assessment for all projects submitted for building renewal grant funding or emergency deficiencies correction funding, including establishing standardized criteria for project eligibility. Before the division formally approves a project, the staff of the division may review the costs and scope of the proposed project with persons and entities that have submitted bids on the project.

(c) Ensure that the division and the school facilities oversight board maintain standardized documentation of all projects submitted to the board and the division for consideration to receive services or a financial award from the board or the division. The board and the division shall maintain standardized documentation of any project awarded monies by the board or the division, including records of payments to school districts in a manner prescribed by the division. The standardized documentation shall include the following as part of the eligibility determination criteria:

(i) Whether the problem that the proposed project intends to address caused the building or facility to fall below the minimum school facility adequacy guidelines prescribed in section 41-5711.

(ii) Whether the school district performed the routine preventive maintenance required by section 41-5731 on the building or facility.

(d) Require a school district to submit contact information for each proposed project, including the name, email address and telephone number of persons who are responsible for facilities management at the school district.

(e) Require a school district to provide justification for each proposed project, including all of the following:

(i) The school district's use or planned use of the facility.

(ii) A detailed description of the problem and the school district's recommended solution.

(iii) Any completed professional study regarding the proposed project.

(iv) Any citation or report from government entities.

(v) The estimated cost of the proposed project, with documentation.

(vi) The project category.

(vii) A description of any local funding that will be used for the proposed project.

(viii) Documentation on associated insurance coverage, if applicable.

(f) Require that an initial application not be considered complete until all necessary information is submitted.

(g) Allow a school district to submit an incomplete application and request technical assistance from the staff of the board if the school district is unable to provide sufficient information in the initial application.

(h) If applicable, require that a complete application be received by the board at least fifteen business days before the next regularly scheduled board meeting in order for the application to be considered at that

meeting. An incomplete application may be considered at that meeting if both the staff of the board and the superintendent of the school district deem the project critical.

(i) Allow the staff of the board or the division, as applicable, to notify a school district in writing before review by the board or division that the proposed project does not meet eligibility criteria prescribed in this chapter. The written notification shall include documentation to support the determination that the proposed project does not meet the eligibility criteria prescribed in this chapter. The school district may directly appeal the determination of ineligibility to the director of the division. The school district may directly appeal the director's determination of ineligibility to the board.

(j) Prohibit the staff of the board or division from requesting that a school district withdraw a project application from review by the board or division if the initial review determines that the proposed project may be ineligible for monies pursuant to this chapter.

6. Submit electronically an annual report on or before December 15 to the speaker of the house of representatives, the president of the senate, the superintendent of public instruction, the secretary of state and the governor that includes the following information:

(a) A detailed description of the amount of monies distributed by the division under this chapter in the previous fiscal year.

(b) A list of each capital project that received monies from the division under this chapter during the previous fiscal year, a brief description of each project that was funded and a summary of the division's reasons for distributing monies for the project.

(c) A summary of the findings and conclusions of the building maintenance inspections conducted pursuant to this article during the previous fiscal year.

(d) A summary of the findings of common design elements and characteristics of the highest performing schools and the lowest performing schools based on academic productivity, including the results of the parent quality rating survey. For the purposes of this subdivision, "academic productivity" means academic year advancement per calendar year as measured with student-level data using the statewide nationally standardized norm-referenced achievement test.

7. On or before December 1 of each year, report electronically to the joint committee on capital review the amounts necessary to fulfill the requirements of section 41-5721 for the following three fiscal years. In developing the amounts necessary for this report, the division shall use the most recent average daily membership data available. On request from the division, the department of education shall make available the most recent average daily membership data for use in calculating the amounts necessary to fulfill the requirements of section 41-5721 for the following three fiscal years. The division shall provide copies of the report to the president of the senate, the speaker of the house of representatives and the governor.

8. On or before June 15 of each year, submit electronically detailed information regarding demographic assumptions and a proposed construction schedule for individual projects approved in the current fiscal year and expected project approvals for the upcoming fiscal year to the joint committee on capital review for its review. A copy of the report shall also be submitted electronically to the governor's office of strategic planning and budgeting. The joint legislative budget committee staff, the governor's office of strategic planning and budgeting staff and the division staff shall agree on the format of the report.

9. Every two years, provide school districts with information on improving and maintaining the indoor environmental quality in school buildings.

10. Adopt rules regarding the validation of adjacent ways projects pursuant to paragraph 11 of this subsection.

11. Validate proposed adjacent ways projects that are submitted by school districts as prescribed in section 15-995 pursuant to rules adopted by the division under paragraph 10 of this subsection.

12. Submit a monthly report to the school facilities oversight board that details each adjacent ways project validated pursuant to paragraph 11 of this subsection.

13. Brief the joint committee on capital review at least once each year regarding the use of monies from all of the following:

(a) The emergency deficiencies correction fund established by section 41-5721.

(b) The building renewal grant fund established by section 41-5731.

(c) The new school facilities fund established by section 41-5741.

B. The school facilities oversight board or the division may contract for the following services in compliance with the procurement practices prescribed in chapter 23 of this title:

1. Private services.

2. Construction project management services.

3. Assessments for school buildings to determine if the buildings have outlived their useful life pursuant to section 41-5741, subsection G or have been condemned.

4. Services related to land acquisition and development of a school site.

C. The school facilities oversight board shall:

1. Review and approve student population projections submitted by school districts to determine to what extent school districts are entitled to monies to construct new facilities pursuant to section 41-5741. The board shall make a final determination within five months after receiving an application from a school district for monies from the new school facilities fund.

2. Certify that plans for new school facilities meet the building adequacy standards prescribed in section 41-5711.

3. Review and approve or reject requests submitted by school districts to take actions pursuant to section 15-341, subsection G.

4. On or before December 15 of each year electronically submit a report to the speaker of the house of representatives, the president of the senate, the superintendent of public instruction, the secretary of state and the governor that includes the following information:

(a) A detailed description of the amount of monies the board distributed under this chapter in the previous fiscal year.

(b) A list of each capital project that received monies from the board under this chapter during the previous fiscal year, a brief description of each project that was funded and a summary of the board's reasons for distributing monies for the project.

(c) A summary of the findings and conclusions of the building maintenance inspections conducted pursuant to this article during the previous fiscal year.

5. On or before December 1 of each year, electronically report to the joint committee on capital review the amounts necessary to fulfill the requirements of section 41-5741 for the following three fiscal years. In developing the amounts necessary for this report, the board shall use the most recent average daily membership data available. On request from the board, the department of education shall make available the most recent average daily membership data for use in calculating the amounts necessary to fulfill the requirements of section 41-5741 for the following three fiscal years. The board shall provide copies of the report to the president of the senate, the speaker of the house of representatives and the governor.

6. Adopt minimum school facility adequacy guidelines to provide the minimum quality and quantity of school buildings and the facilities and equipment necessary and appropriate to enable pupils to achieve the educational goals of the Arizona state schools for the deaf and the blind. The board shall establish minimum school facility adequacy guidelines applicable to the Arizona state schools for the deaf and the blind.

7. On or before June 15 of each year, electronically submit to the joint committee on capital review for its review detailed information regarding demographic assumptions, a proposed construction schedule and new school construction cost estimates for individual projects approved in the current fiscal year and expected project approvals for the upcoming fiscal year. A copy of the report shall also be submitted electronically to the governor's office of strategic planning and budgeting. The joint legislative budget committee staff, the governor's office of strategic planning and budgeting staff and the board staff shall agree on the format of the report.

8. On or before December 31 of each year, report to the joint legislative budget committee on all class B bond approvals by school districts in that year. Each school district shall report to the board on or before December 1 of each year information required by the board for the report prescribed in this paragraph.

D. The director of the division shall serve as the director of the school facilities oversight board. The director may hire and fire necessary staff subject to chapter 4, article 4 of this title and as approved by the legislature in the budget. The staff of the school facilities oversight board is exempt from chapter 4, articles 5 and 6 of this title. The director:

1. Shall analyze applications for monies submitted to the board and to the division by school districts.
2. Shall assist the board and the division in developing forms and procedures for distributing and reviewing applications and distributing monies to school districts.
3. May review or audit, or both, the expenditure of monies by a school district for deficiencies corrections and new school facilities.
4. Shall assist the board and the division in preparing the board's and division's annual reports.
5. Shall research and provide reports on issues of general interest to the board and the division.
6. May aid school districts in developing reasonable and cost-effective school designs in order to avoid statewide duplicated efforts and unwarranted expenditures in the area of school design.
7. May assist school districts in facilitating the development of multijurisdictional facilities.
8. Shall assist the board and the division in any other appropriate matter or method as directed by the division and the members of the board.

9. Shall establish procedures to ensure compliance with the notice and hearing requirements prescribed in section 15-905. The notice and hearing procedures adopted by the board shall include the requirement, with respect to the board's consideration of any application filed after July 1, 2001 or after December 31 of the year in which the property becomes territory in the vicinity of a military airport or ancillary military facility as defined in section 28-8461 for monies to fund the construction of new school facilities proposed to be located in territory in the vicinity of a military airport or ancillary military facility, that the military airport receive notification of the application by first class mail at least thirty days before any hearing concerning the application.

10. May expedite any request for monies in which the local match was not obtained for a project that received preliminary approval by the state board for school capital facilities.

11. Shall expedite any request for monies in which the school district governing board submits an application that shows an immediate need for a new school facility.

12. Shall determine administrative completeness within one month after receiving an application from a school district for monies from the new school facilities fund.

13. Shall provide technical support to school districts as requested by school districts in connection with constructing new school facilities and maintaining existing school facilities and may contract directly with construction project managers pursuant to subsection B of this section. This paragraph does not restrict a school district from contracting with a construction project manager using district or state resources.

E. When appropriate, the board and the division shall review and use the statewide school facilities inventory and needs assessment conducted by the joint committee on capital review and issued in July, 1995.

F. The school facilities oversight board shall contract with one or more private building inspectors to complete an initial assessment of school facilities and equipment and shall inspect each school building in this state at least once every five years to ensure compliance with section 41-5711. A copy of the inspection report, together with any recommendations for building maintenance, shall be provided to the school facilities oversight board and the governing board of the school district.

G. The division or the board, as applicable, may consider appropriate combinations of facilities or uses in assessing and curing deficiencies pursuant to subsection A, paragraph 1 of this section and in certifying plans for new school facilities pursuant to subsection C, paragraph 2 of this section.

H. The board shall not award any monies to fund new facilities that are financed by A bonds that are issued by the school district.

I. The board or the division shall not distribute monies to a school district for replacing or repairing facilities if the costs associated with the replacement or repair are covered by insurance or a performance or payment bond.

J. The division may contract for construction services and materials that are necessary to correct existing deficiencies in school district facilities. The division may procure the construction services necessary pursuant to this subsection by any method, including construction-manager-at-risk, design-build, design-bid-build or job-order-contracting as provided by chapter 23 of this title. The construction planning and services performed pursuant to this subsection are exempt from section 41-791.01.

K. The division may enter into agreements with school districts to allow division staff and contractors access to school property for the purposes of performing the construction services necessary pursuant to subsection J of this section.

L. Each school district shall develop routine preventive maintenance guidelines for its facilities. The guidelines shall include plumbing systems, electrical systems, heating, ventilation and air conditioning systems, special equipment and other systems and for roofing systems shall recommend visual inspections performed by district staff for signs of structural stress and weakness. The guidelines shall be submitted to the division for review and approval. If on inspection by the division it is determined that a school district facility was inadequately maintained pursuant to the school district's routine preventive maintenance guidelines, the school district shall return the building to compliance with the school district's routine preventive maintenance guidelines.

M. The board and the division may temporarily transfer monies, or, if applicable, direct the division to transfer monies, between the emergency deficiencies correction fund established by section 41-5721 and the new school facilities fund established by section 41-5741 if all of the following conditions are met:

1. The transfer is necessary to avoid a temporary shortfall in the fund into which the monies are transferred.
2. The transferred monies are restored to the fund where the monies originated as soon as practicable after the temporary shortfall in the other fund has been addressed.
3. The board and the division report to the joint committee on capital review the amount of and the reason for any monies transferred.

N. After notifying each school district, and if a written objection from the school district is not received by the board or the division within thirty days after the notification, the board or the division may access public utility company records of power, water, natural gas, telephone and broadband usage to assemble consistent and accurate data on utility consumption at school facilities to determine the effectiveness of facility design, operation and maintenance measures intended to reduce energy and water consumption and costs. Any public utility that provides service to a school district in this state shall provide the data requested by the board or the division pursuant to this subsection.

O. The division or the board shall not require a common school district that provides instruction to pupils in grade nine to obtain approval from the division or the board to reconfigure its school facilities. A common school district that provides instruction to pupils in grade nine is not entitled to additional monies from the division or the board for facilities to educate pupils in grade nine.

P. A school district may appeal the denial of a request for monies pursuant to this chapter or any other appealable agency action by the division or the board pursuant to chapter 6, article 10 of this title. For the purposes of this subsection, "appealable agency action" has the same meaning prescribed in section 41-1092.

#### 41-5703. School facilities oversight board lease-to-own; fund; expiration

A. In order to fulfill the requirements of section 41-5741, the board may acquire school facilities for the use of one or more school districts by entering into one or more lease-to-own transactions in accordance with this section. For the purposes of this section, providing school facilities includes land acquisition, related infrastructure, fixtures, furnishings, equipment and costs of the lease-to-own transaction. The board may provide monies to provide school facilities in part pursuant to section 41-5741 and in part through a lease-to-own transaction.

B. A lease-to-own transaction may provide for:

1. The ground lease of the land for the facilities to a private entity for the term of the lease-to-own transaction or for a term of up to one and one-half times the term of the lease-to-own transaction, subject

to earlier termination on completion of performance of the lease-to-own agreement. The ground lessor may either be the school district or the board, whichever holds title to the land.

2. The lease of the completed school facilities by a private entity to the board for an extended term of years pursuant to a lease-to-own agreement.

3. The sublease of the completed school facilities by the board to the school district during the term of the lease-to-own agreement. The sublease shall provide for the use, maintenance and operation of the school facilities by the school district and for the transfer of ownership of the school facilities to the school district on completion of performance of the lease-to-own agreement.

4. The option for the board's purchase of the school facilities and transfer of ownership of the school facilities to the school district before the expiration of the lease-to-own agreement.

5. The services of trustees, financial advisors, paying agents, transfer agents, underwriters, lawyers and other professional service providers, credit enhancements or liquidity facilities and all other services considered necessary by the board in connection with the lease-to-own transaction, and related agreements and arrangements including arrangements for the creation and sale of certificates of participation evidencing proportionate interests in the lease payments to be made by the board pursuant to the lease-to-own agreement.

C. The sublease of the school facilities to the school district is subject to this section and to the provisions of the lease-to-own agreement. Neither a ground lease by the school district as lessor nor a sublease of the school facilities to the school district is required to be authorized by a vote of the school district electors. A ground lease is not subject to any limitations or requirements applicable to leases or lease-purchase agreements pursuant to section 15-342 or any other section of title 15 or this chapter.

D. Any school facility that is constructed through a lease-to-own agreement shall meet the minimum building adequacy standards set forth in section 41-5711.

E. School districts may use local monies to exceed the minimum adequacy standards and to build athletic fields and any other capital project for leased-to-own facilities.

F. The board shall include any square footage of new school facilities constructed through lease-to-own agreements in the computations prescribed in section 41-5711.

G. The lease-to-own fund is established consisting of monies appropriated by the legislature. The board shall administer the fund and distribute monies in the fund to make payments pursuant to lease-to-own agreements entered into by the board pursuant to this section, to make payments to or for the benefit of school districts pursuant to local lease-to-own agreements entered into by school districts pursuant to section 41-5704 and to pay costs considered necessary by the board in connection with lease-to-own transactions and local lease-to-own transactions. Payments by the board pursuant to a lease-to-own agreement or local lease-to-own agreement shall be made only from the lease-to-own fund. On notice from the board, the state treasurer shall invest and divest monies in the fund as provided by section 35-313, and monies earned from investment shall be credited to the lease-to-own fund.

H. A lease-to-own agreement entered into by the board pursuant to this section shall provide that:

1. At the completion of the lease-to-own agreement, ownership of the school facilities and land associated with the lease-to-own agreement shall be transferred to the school district as specified in the agreement.

2. The obligation of the board to make any payment under the lease-to-own agreement is a current expense, payable exclusively from appropriated monies, and is not a general obligation indebtedness of

this state or the board. The obligation of a school district to make expenditures under a sublease pursuant to subsection B, paragraph 3 of this section is a current expense, payable exclusively from budgeted monies, and is not a general obligation indebtedness of the school district.

3. If the legislature fails to appropriate monies or the board fails to allocate such monies for any periodic payment or renewal term of the lease-to-own agreement, the lease-to-own agreement terminates at the end of the current term and this state and the board are relieved of any subsequent obligation under the agreement and the school district is relieved of any subsequent obligation under the sublease.

4. The lease-to-own agreement shall be reviewed and approved by the attorney general before the agreement may take effect.

5. Before the agreement takes effect and after review by the attorney general, the project or projects related to the agreement shall be submitted for review by the joint committee on capital review.

I. The board may covenant to use its best efforts to budget, obtain, allocate and maintain sufficient appropriated monies to make payments under a lease-to-own agreement, but the lease-to-own agreement shall acknowledge that appropriating state monies is a legislative act and is beyond the control of the board or of any other party to the lease-to-own agreement.

J. The land and the school facilities on the land are exempt from taxation during the term of the lease-to-own agreement and during construction and subsequent occupancy by the school district pursuant to the sublease.

K. The powers prescribed in this section are in addition to the powers conferred by any other law. Without reference to any other provision of title 15, this chapter or any other law, this section is authority for the completion of the purposes prescribed in this section for the board to provide school facilities for use by school districts through lease-to-own transactions pursuant to this section without regard to the procedure required by any other law. Except as otherwise provided in this section, the provisions of title 15 and this chapter that relate to the matters contained in this section are superseded because this section is the exclusive law on these matters.

L. The board shall not enter into lease-to-own transactions, including any refinancings or refundings, pursuant to this section from and after May 15, 2006.

#### 41-5704. Local lease-to-own by school districts; expiration

A. In order to fulfill the requirements of section 41-5741, with the approval of the board, a school district may acquire school facilities by entering into a local lease-to-own transaction in accordance with this section. For purposes of this section, providing school facilities includes land acquisition, related infrastructure, fixtures, furnishings, equipment and costs of the local lease-to-own transaction. The board may provide monies to provide school facilities in part pursuant to section 41-5741 and in part through payments to or for the benefit of a school district for a local lease-to-own transaction.

B. A local lease-to-own transaction may provide for:

1. The ground lease of the land for the facilities to a private entity for the term of the local lease-to-own transaction or for a term of up to one and one-half times the term of the local lease-to-own transaction, subject to earlier termination on completion of performance of the local lease-to-own agreement. The ground lessor may either be the school district or the board, whichever holds title to the land.

2. The lease of the completed school facilities by a private entity to the school district for an extended term of years pursuant to a local lease-to-own agreement. The local lease-to-own agreement shall provide

for the use, maintenance and operation of the school facilities by the school district and for the transfer of ownership of the school facilities to the school district on completion of performance of the local lease-to-own agreement.

3. The option for the school district's purchase of the school facilities and transfer of ownership of the school facilities to the school district before the expiration of the local lease-to-own agreement.

4. The services of trustees, financial advisors, paying agents, transfer agents, underwriters, lawyers and other professional service providers, credit enhancements or liquidity facilities and all other services considered necessary by the school district or the board in connection with the local lease-to-own transaction, and related agreements and arrangements including arrangements for the creation and sale of certificates of participation evidencing proportionate interests in the lease payments to be made by the school district pursuant to the local lease-to-own agreement.

C. Neither a ground lease by the school district as lessor nor a local lease-to-own agreement is required to be authorized by a vote of the school district electors. A ground lease is not subject to any limitations or requirements applicable to leases or lease-purchase agreements pursuant to section 15-342 or any other section of title 15 or this chapter.

D. The board may make payments to or for the benefit of the school district from the lease-to-own fund established by section 41-5703 for the payment of amounts payable under the local lease-to-own agreement.

E. Any school facility that is constructed through a lease-to-own agreement shall meet the minimum building adequacy standards set forth in section 41-5711.

F. School districts may use local monies to exceed the minimum adequacy standards and to build athletic fields and any other capital project for leased-to-own facilities.

G. The board shall include any square footage of new school facilities constructed through lease-to-own agreements in the computations prescribed in section 41-5711.

H. A local lease-to-own agreement entered into by a school district pursuant to this section shall provide that:

1. At the completion of the lease-to-own agreement, ownership of the school facilities and land associated with the lease-to-own agreement shall be transferred to the school district as specified in the agreement.

2. The obligation of the school district to make any payment or expenditure under the local lease-to-own agreement is a current expense, payable exclusively from properly budgeted monies, and is not a general obligation indebtedness of this state, the board or the school district, and that any payment by the board to or for the benefit of the school district from the lease-to-own fund established by section 41-5703 for payments of amounts payable under the local lease-to-own agreement is a current expense, payable exclusively from appropriated monies, and is not a general obligation indebtedness of this state or the board.

3. If the school district fails to properly budget for payments under the local lease-to-own agreement or if the legislature fails to appropriate monies or the board fails to allocate monies for periodic payment to or for the benefit of the school district for payments under the local lease-to-own agreement, the local lease-to-own agreement terminates at the end of the current term and the school district, the board and this state are relieved of any subsequent obligation under the local lease-to-own agreement.

4. The local lease-to-own agreement shall be reviewed and approved by the attorney general before the agreement may take effect.

5. Before the agreement takes effect and after review by the attorney general, the project or projects related to the agreement shall be submitted for review by the joint committee on capital review.

I. The school district may covenant to use its best efforts to budget, obtain, allocate and maintain sufficient monies to make payments under a local lease-to-own agreement, but the local lease-to-own agreement shall acknowledge that budgeting school district monies is a governmental act of the school district governing board that may not be contracted away. The school facilities oversight board is not required to covenant to budget, obtain, allocate or maintain sufficient monies in the lease-to-own fund to make payments to or for the benefit of a school district for payments under a local lease-to-own agreement.

J. The land and the school facilities on the land are exempt from taxation during the term of the local lease-to-own agreement and during construction and subsequent occupancy by the school district pursuant to the local lease-to-own agreement.

K. The powers prescribed in this section are in addition to the powers conferred by any other law. Without reference to any other provision of title 15 or this chapter or any other law, this section is authority for the completion of the purposes prescribed in this section for school districts to provide school facilities through local lease-to-own transactions pursuant to this section without regard to the procedure required by any other law. Except as otherwise provided in this section, the provisions of title 15 or this chapter that relate to the matters contained in this section are superseded because this section is the exclusive law on these matters.

L. School districts shall not enter into lease-to-own transactions, including any refinancings or refundings, pursuant to this section from and after May 15, 2006.

#### 41-5705. Lease-to-own amount; expiration

A. In order to fulfill the requirements of section 41-5741, the board may enter into lease-to-own transactions for up to a maximum of \$200,000,000 in any fiscal year.

B. The board shall not enter into lease-to-own transactions, including any refinancings or refundings, pursuant to this section from and after May 15, 2006.

#### 41-5711. Minimum school facility adequacy requirements; definition

A. The board, as determined and prescribed in this chapter, shall provide funding to school districts for new construction as the number of pupils in the district fills the existing school facilities and requires more pupil space.

B. School buildings in a school district are adequate if all of the following requirements are met:

1. The buildings contain sufficient and appropriate space and equipment that comply with the minimum school facility adequacy guidelines established pursuant to subsection F of this section. The state shall not fund facilities for elective courses that require the school district facilities to exceed minimum school facility adequacy requirements. The board shall determine whether a school building meets the requirements of this paragraph by analyzing the total square footage that is available for each pupil in conjunction with the need for specialized spaces and equipment.

2. The buildings are in compliance with federal, state and local building and fire codes and laws that apply to the particular building, except that a school with an aggregate area of less than five thousand square feet is subject to permitting and inspection by a local fire marshal and is only subject to regulation or inspection by the office of the state fire marshal if the county, city or town in which the school is located does not employ a local fire marshal. An existing school building is not required to comply with current requirements for new buildings unless this compliance is specifically mandated by law or by the building or fire code of the jurisdiction where the building is located.

3. The building systems, including roofs, plumbing, telephone systems, electrical systems, heating systems and cooling systems, are in working order and are capable of being properly maintained.

4. The buildings are structurally sound.

C. The standards that shall be used by the board to determine whether a school building meets the minimum adequate gross square footage requirements are as follows:

1. For a school district that provides instruction to pupils in programs for preschool children with disabilities, kindergarten programs and grades one through six, eighty square feet per pupil in programs for preschool children with disabilities, kindergarten programs and grades one through six.

2. For a school district that provides instruction to up to eight hundred pupils in grades seven and eight, eighty-four square feet per pupil in grades seven and eight.

3. For a school district that provides instruction to more than eight hundred pupils in grades seven and eight, eighty square feet per pupil in grades seven and eight or sixty-seven thousand two hundred square feet, whichever is more.

4. For a school district that provides instruction to up to four hundred pupils in grades nine through twelve, one hundred twenty-five square feet per pupil in grades nine through twelve.

5. For a school district that provides instruction to more than four hundred and up to one thousand pupils in grades nine through twelve, one hundred twenty square feet per pupil in grades nine through twelve or fifty thousand square feet, whichever is more.

6. For a school district that provides instruction to more than one thousand and up to one thousand eight hundred pupils in grades nine through twelve, one hundred twelve square feet per pupil in grades nine through twelve or one hundred twenty thousand square feet, whichever is more.

7. For a school district that provides instruction to more than one thousand eight hundred pupils in grades nine through twelve, ninety-four square feet per pupil in grades nine through twelve or two hundred one thousand six hundred square feet, whichever is more.

D. The board may modify the square footage requirements prescribed in subsection C of this section or modify the amount of monies awarded to cure the square footage deficiency pursuant to this section for particular school districts based on extraordinary circumstances for any of the following considerations:

1. The number of pupils served by the school district.

2. Geographic factors.

3. Grade configurations other than those prescribed in subsection C of this section.

E. In measuring the square footage per pupil requirements of subsection C of this section, the board shall:

1. Use the projected one hundredth day average daily membership for the current school year.
  2. For each school, use the lesser of either:
    - (a) Total gross square footage.
    - (b) Student capacity multiplied by the appropriate square footage per pupil prescribed by subsection C of this section.
  3. Consider the total space available in all schools in use in the school district, except that the board shall allow an exclusion of the square footage for certain schools and the pupils within the schools' boundaries if the school district demonstrates to the board's satisfaction unusual or excessive busing of pupils or unusual attendance boundary changes between schools.
  4. Compute the gross square footage of all buildings by measuring from exterior wall to exterior wall. Square footage used solely for district administration, storage of vehicles and other nonacademic purposes shall be excluded from the net square footage.
  5. Include all portable and modular buildings.
  6. Include in the net square footage new construction funded wholly or partially by the board based on the square footage funded by the board. If the new construction is to exceed the square footage funded by the board, the excess square footage shall not be included in the net square footage if any of the following applies:
    - (a) The excess square footage was constructed before July 1, 2002 or funded by a class B bond, impact aid revenue bond or capital outlay override approved by the voters after August 1, 1998 and before June 30, 2002 or funded from unrestricted capital outlay expended before June 30, 2002.
    - (b) The excess square footage of new school facilities does not exceed twenty-five percent of the minimum square footage requirements pursuant to subsection C of this section.
    - (c) The excess square footage of expansions to school facilities does not exceed twenty-five percent of the minimum square footage requirements pursuant to subsection C of this section.
  7. Exclude square footage built under a developer agreement according to section 15-342, paragraph 33 until the board provides funding for the square footage under section 41-5741, subsection O.
  8. Include square footage that a school district has leased to another entity.
- F. The board shall adopt rules establishing minimum school facility adequacy guidelines. The guidelines shall provide the minimum quality and quantity of school buildings and facilities and equipment necessary and appropriate to enable pupils to achieve the academic standards pursuant to section 15-203, subsection A, paragraphs 12 and 13 and sections 15-701 and 15-701.01. At a minimum, the board shall address all of the following in developing these guidelines:
1. School sites.
  2. Classrooms.
  3. Libraries and media centers, or both.
  4. Cafeterias.

5. Auditoriums, multipurpose rooms or other multiuse space.
6. Technology.
7. Transportation.
8. Facilities for science, arts and physical education.
9. Other facilities and equipment that are necessary and appropriate to achieve the academic standards prescribed pursuant to section 15-203, subsection A, paragraphs 12 and 13 and sections 15-701 and 15-701.01.
10. Appropriate combinations of facilities or uses listed in this section.

G. The board may convene subcommittees as needed on specific issues, including school facility safety standards. Notwithstanding any other law, a school district that receives grant monies from the building renewal grant fund established by section 41-5731 or monies from the new school facilities fund established by section 41-5741 shall consider school facility safety standards when completing approved projects or constructing new school facilities with monies received from those funds.

H. The board shall consider the facilities and equipment of the schools with the highest academic productivity scores, as prescribed in section 41-5702, subsection A, paragraph 6, subdivision (d), and the highest parent quality ratings in the establishment of the guidelines.

I. The board may consider appropriate combinations of facilities or uses in assessing and curing existing deficiencies pursuant to section 41-5702, subsection A, paragraph 1 and in certifying plans for new school facilities pursuant to section 41-5702, subsection C, paragraph 2.

J. If the board makes any changes to the minimum adequacy requirements prescribed in this section, the board shall provide a fiscal impact statement of the effect of the proposed changes to the joint committee on capital review for review.

K. For the purposes of this section, "student capacity" means the capacity adjusted to include any additions to or deletions of space, including modular or portable buildings at the school. The board shall determine the student capacity for each school in conjunction with each school district, recognizing each school's allocation of space as of July 1, 1998, to achieve the academic standards prescribed pursuant to section 15-203, subsection A, paragraphs 12 and 13 and sections 15-701 and 15-701.01.

#### 41-5721. Emergency deficiencies correction fund; definition

A. The emergency deficiencies correction fund is established consisting of monies transferred from the new school facilities fund established by section 41-5741. The division shall administer the emergency deficiencies correction fund and distribute monies in accordance with the rules of the division to school districts for emergency purposes. The division shall not transfer monies from the new school facilities fund if the division, in conjunction with the school facilities oversight board, determines that the transfer will affect, interfere with, disrupt or reduce any capital projects that the board has approved pursuant to section 41-5741. The division shall transfer to the emergency deficiencies correction fund the amount necessary each fiscal year to fulfill the requirements of this section. Within thirty days after transferring monies to the emergency deficiencies correction fund, the division shall report to the director of the joint legislative budget committee and the director of the governor's office of strategic planning and budgeting the amount and source of the transfer. Monies in the emergency deficiencies correction fund are continuously appropriated and are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

B. If the division determines that there are insufficient monies in the emergency deficiencies correction fund to correct an emergency, the school district may correct the emergency pursuant to section 15-907.

C. If a school district has an emergency, the school district shall apply to the division for funding for the emergency. The school district's application shall disclose any insurance or building renewal monies available to the school district to pay for the emergency. Before applying to the division for funding for the emergency, the school district governing board shall issue an emergency declaration or resolution to be eligible for monies from the emergency deficiencies correction fund.

D. The division staff shall acknowledge receipt of the school district's application for emergency deficiencies funding in writing within five business days after receiving the application. The division staff shall include in the written acknowledgement of receipt to the school district any investigative, study or informational requirements from the school district, along with an estimated timeline to complete the requirements, necessary for the division staff to make a decision regarding funding.

E. The board shall review all policies and procedures that the division develops to administer this section.

F. For the purposes of this section, "emergency":

1. Means a serious need for materials, services or construction or expenses that exceeds the school district's adopted budget for the current fiscal year and that seriously threatens the functioning of the school district, the preservation or protection of property or public health, welfare or safety.

♣2. Includes all of the following:

(a) A situation that threatens life services such as adequate water supply, energy and wastewater.

♣(b) A situation in which a school district is under orders from an authority having jurisdiction for an unsafe environment such as the department of environmental quality, the occupational safety and health administration or the state fire marshal.

♣(c) The school district receives a professional and certified assessment showing that one or more facilities or systems are structurally unsafe and directly impact the functions of the school district with no alternative option available.

#### 41-5731. Building renewal grant fund; rules; definitions

A. The building renewal grant fund is established consisting of monies appropriated to the fund by the legislature. The division shall administer the fund and distribute monies to school districts for the purpose of maintaining the adequacy of existing school facilities. Monies in the fund are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

B. The division shall distribute monies from the building renewal grant fund based on grant requests from school districts to fund primary building renewal projects. Project requests shall be prioritized by the division, with priority given to school districts that have provided routine preventive maintenance on the facility. A school district must submit a preventive maintenance plan to the division to be eligible to receive monies from the building renewal grant fund. The division shall approve only projects that will be completed within twelve months, unless similar projects on average take longer to complete. A grant issued under this section expires twelve months after the grant request is approved unless the division issues an extension, except that if the division approves a project and determines that similar projects on average take longer than twelve months to complete, the division shall extend the grant expiration date based on the average amount of time that similar projects take to complete. The division shall establish a process by which a school district may request an extension under this subsection. On expiration of a

grant, a school district shall return any building renewal grant fund monies that the school district has not spent to the division for deposit in the building renewal grant fund. The division may spend monies from the fund for assessments to determine whether a grant from the fund is warranted under this section.

C. School districts that receive monies from the building renewal grant fund shall use these monies on projects for buildings or any part of a building in the division's database for any of the following:

1. Major renovations and repairs to a building that is used for student instruction or other academic purposes.
2. Upgrading systems and areas that will maintain or extend the useful life of the building.
3. Infrastructure costs.

D. Monies received from the fund shall not be used for any of the following purposes:

1. New construction.
2. Remodeling interior space for aesthetic or preferential reasons.
3. Exterior beautification.
4. Demolition.
5. Routine preventive maintenance.
6. Any project in a building, or part of a building, that is being leased to another entity.

E. Accommodation schools are not eligible for monies from the building renewal grant fund.

F. If the division or a court of competent jurisdiction determines that a school district received monies from the building renewal grant fund that must be reimbursed to the division due to legal action associated with improper construction by a hired contractor, the school district shall reimburse the division an agreed-on amount for deposit into the building renewal grant fund.

G. The division shall categorize each project that is eligible for monies from the building renewal grant fund as either critical or noncritical. The division shall adopt policies and procedures to prioritize critical projects and to designate critical projects as projects that immediately impact student safety or building closures or that result in operational disruptions. Critical projects have priority over any previously approved noncritical projects.

H. If the division determines that sufficient monies are not available for a noncritical project that the division has approved, the division shall notify the school district that submitted the project request that monies will be distributed from the building renewal grant fund for the project only if the legislature appropriates sufficient monies. If sufficient monies are not available in the fiscal year in which the project is awarded for a noncritical project, the noncritical project does not receive priority in the next fiscal year.

I. Building renewal grants pursuant to this section shall be used only for projects that serve an academic purpose.

J. The division shall do both of the following:

1. Implement policies and procedures to require a school district to report the preventive maintenance activities completed during the previous twelve months for the facility for which the monies are being requested.

2. Submit a monthly report to the school facilities oversight board that details how monies from the building renewal grant fund have been distributed.

K. In addition to establishing a project eligibility assessment under section 41-5702, subsection A, paragraph 5, subdivision (b), the division shall adopt rules regarding both of the following:

1. The approval of building renewal grants pursuant to this section.
2. Time frames for the division regarding all of the following with respect to this section:

- (a) Approving or denying grant requests for critical projects.
- (b) Notifying an applicant if the applicant's application is incomplete.
- (c) Providing regular updates to applicants regarding completed applications.
- (d) Distributing monies from the building renewal grant fund.

L. The board shall review all policies and procedures that the division develops to administer this section.

M. The division may spend monies from the fund for assessments to determine if a grant from the fund is warranted under this section.

N. For the purposes of this section:

1. "Primary building renewal projects" means projects that are necessary for buildings owned by school districts that are required to meet the minimum adequacy standards for student capacity and that fall below the minimum school facility adequacy guidelines, as adopted by the board pursuant to section 41-5711, for school districts that have provided routine preventive maintenance to the school facility.
2. "Routine preventive maintenance" means services that are performed on a regular schedule at intervals ranging from four times a year to once every three years, or on the schedule of services recommended by the manufacturer of the specific building system or equipment, and that are intended to extend the useful life of a building system and reduce the need for major repairs.
3. "Student capacity" has the same meaning prescribed in section 41-5711.

**41-5741. New school facilities fund; capital plan; reporting requirements**

A. The new school facilities fund is established consisting of monies appropriated by the legislature and monies credited to the new school facilities fund pursuant to section 37-221. The division shall administer the new school facilities fund and, at the direction of the school facilities oversight board, shall distribute monies, as a continuing appropriation, to school districts for the purpose of constructing new school facilities and for contracted expenses pursuant to section 41-5702, subsection B, paragraphs 2, 3 and 4.

B. The school facilities oversight board shall prescribe a uniform format for use by the school district governing board in developing and annually updating a capital plan that consists of each of the following:

1. Enrollment projections for the next five years for elementary schools and eight years for middle and high schools, including a description of the methods used to make the projections.

2. A description of new schools or additions to existing schools needed to meet the building adequacy standards prescribed in section 41-5711. The description shall include:

- (a) The grade levels and the total number of pupils that the school or addition is intended to serve.
- (b) The year in which it is necessary for the school or addition to begin operations.
- (c) A timeline that shows the planning and construction process for the school or addition.

3. Long-term projections of the need for land for new schools.

4. Any other necessary information required by the school facilities oversight board to evaluate a school district's capital plan.

5. If a school district pays tuition for all or a portion of the school district's high school pupils to another school district, the capital plan shall indicate the number of pupils for which the district pays tuition to another district. If a school district accepts pupils from another school district pursuant to section 15-824, subsection A, the school district shall indicate the projections for this population separately. This paragraph does not apply to a small isolated school district as defined in section 15-901.

C. If the capital plan indicates a need for a new school or an addition to an existing school within the next four years or a need for land within the next ten years, the school district shall submit its plan to the school facilities oversight board on or before September 1 and shall request monies from the new school facilities fund for the new construction or land. The board may require a school district to sell land that was previously purchased entirely with monies provided by the board if the board determines that the property is no longer needed within the ten-year period specified in this subsection for a new school or no longer needed within that ten-year period for an addition to an existing school. Monies provided for land are in addition to any monies provided pursuant to subsection D of this section.

D. At the direction of the board, the division shall distribute monies from the new school facilities fund for additional square footage as follows:

1. The board shall review and evaluate the enrollment projections. On or before December 15 of each year, following the submission of the enrollment projections, the board shall either approve the projections as submitted or revise the projections. In approving or revising the enrollment projections, the board shall use the average daily membership data available during the current school year. On request from the board, the department of education shall make available the most recent average daily membership data for use in revising the enrollment projections. In determining new construction requirements, the board shall determine the net new growth of pupils that will require additional square footage that exceeds the building adequacy standards prescribed in section 41-5711. If the projected growth and the existing number of pupils exceed three hundred fifty pupils who are served in a school district other than the pupil's resident school district, the board, the receiving school district and the resident school district shall develop a capital facilities plan on how to best serve those pupils. A small isolated school district as defined in section 15-901 is not required to develop a capital facilities plan pursuant to this paragraph.

2. If the average daily membership projections indicate that additional space will not be needed within the next two school years in order to meet the building adequacy standards prescribed in section 41-5711, the request shall be held for consideration by the board for possible future funding and the school district shall annually submit an updated plan until the additional space is needed.

3. If the average daily membership projections indicate that additional space will be needed within the next two school years in order to meet the building adequacy standards prescribed in section 41-5711, the board shall provide an amount as follows:

(a) Determine the number of pupils requiring additional square footage to meet building adequacy standards. This amount for elementary schools shall not be less than the number of new pupils for whom space will be needed in the next year and shall not exceed the number of new pupils for whom space will be needed in the next five years. This amount for middle and high schools shall not be less than the number of new pupils for whom space will be needed in the next four years and shall not exceed the number of new pupils for whom space will be needed in the next eight years.

(b) Multiply the number of pupils determined in subdivision (a) of this paragraph by the square footage per pupil. The square footage per pupil is ninety square feet per pupil for preschool children with disabilities, kindergarten programs and grades one through six, one hundred square feet for grades seven and eight, one hundred thirty-four square feet for a school district that provides instruction in grades nine through twelve for fewer than one thousand eight hundred pupils and one hundred twenty-five square feet for a school district that provides instruction in grades nine through twelve for at least one thousand eight hundred pupils. The total number of pupils in grades nine through twelve in the district shall determine the square footage factor to use for net new pupils. The board may modify the square footage requirements prescribed in this subdivision for particular schools based on any of the following factors:

(i) The number of pupils served or projected to be served by the school district.

(ii) Geographic factors.

(iii) Grade configurations other than those prescribed in this subdivision.

(iv) Compliance with minimum school facility adequacy requirements established pursuant to section 41-5711.

(c) Multiply the product obtained in subdivision (b) of this paragraph by the cost per square foot. The cost per square foot is \$270.24 for preschool children with disabilities, kindergarten programs and grades one through six, \$285.30 for grades seven and eight and \$330.30 for grades nine through twelve. The cost per square foot shall be adjusted annually for construction market considerations based on an index identified or developed by the joint legislative budget committee as necessary but not less than once each year. Each annual construction market adjustment applies to all projects approved by the school facilities board under this subsection during that year. The board shall multiply the cost per square foot by 1.05 for any school district located in a rural area. The board may only modify the base cost per square foot prescribed in this subdivision for particular schools based on geographic conditions or site conditions. Any extra monies received as a result of a modification based on geographic conditions or site conditions may be used to address unforeseen costs at any stage of a project under this section. For the purposes of this subdivision, "rural area" means an area outside a thirty-five-mile radius of a boundary of a municipality with a population of more than fifty thousand persons.

(d) Once the school district governing board obtains approval from the board for new facility construction monies, additional portable or modular square footage created for the express purpose of providing temporary space for pupils until the completion of the new facility and any additional space funded by the school district shall not be included by the board for the purpose of new construction funding calculations. On completion of the new facility construction project, any additional space funded by the school district shall be included as prescribed by this chapter and, if the portable or modular facilities continue in use, the portable or modular facilities shall be included as prescribed by this chapter, unless the board

approves their continued use for the purpose of providing temporary space for pupils until the completion of the next new facility that has been approved for funding from the new school facilities fund.

4. For projects approved after December 31, 2001, and notwithstanding paragraph 3 of this subsection, a unified school district that does not have a high school is not eligible to receive high school space as prescribed by section 41-5711 and this section unless the unified district qualifies for geographic factors prescribed by paragraph 3, subdivision (b), item (ii) of this subsection.

5. If a career technical education district leases a building from a school district, that building shall be included in the school district's square footage calculation for the purposes of new construction pursuant to this section.

6. If a school district leases a building to another entity, that building shall be included in the school district's square footage calculation for purposes of new construction pursuant to this section.

7. A school district shall qualify for monies from the new school facilities fund for additional square footage in a fiscal year only if the board has approved or revised its enrollment projection under paragraph 1 of this subsection on or before December 15 of the prior fiscal year.

E. Monies for architectural and engineering fees, project management services and preconstruction services shall be distributed on the completion of the analysis by the board of the school district's request. After receiving monies pursuant to this subsection, the school district shall submit a design development plan for the school or addition to the board before any monies for construction are distributed. If the school district's request meets the building adequacy standards, the board may review and comment on the district's plan with respect to the efficiency and effectiveness of the plan in meeting state square footage and facility standards before directing the distribution of the remainder of the monies. If the board modifies the cost per square foot as prescribed in subsection D, paragraph 3, subdivision (c) of this section, the board may deduct the cost of project management services and preconstruction services from the required cost per square foot. The board may decline to fund the project if the square footage is no longer required due to revised enrollment projections. The board may decline a portion of the funding if a portion of the square footage is no longer needed due to revised enrollment projections.

F. At the direction of the board, the division shall distribute the monies needed for land for new schools so that land may be purchased at a price that is less than or equal to fair market value and in advance of the construction of the new school. If necessary, the board may direct the division to distribute monies for land to be leased for new schools if the duration of the lease exceeds the life expectancy of the school facility by at least fifty percent. A school district shall not use land purchased or partially purchased with monies provided at the direction of the board for a purpose other than a site for a school facility without obtaining prior written approval from the board. A school district shall not lease, sell or take any action that would diminish the value of land purchased or partially purchased with monies provided at the direction of the board without obtaining prior written approval from the board. The proceeds derived through the sale of any land purchased or partially purchased, or the sale of buildings funded or partially funded, with monies provided at the direction of the board shall be returned to the state fund from which it was appropriated and to any other participating entity on a proportional basis. Except as provided in section 15-342, paragraph 33, if a school district acquires real property by donation at an appropriate school site approved by the board, the board shall direct the division to distribute an amount equal to twenty percent of the fair market value of the donated real property that can be used for academic purposes. The school district shall place the monies in the unrestricted capital outlay fund and increase the unrestricted capital budget limit by the amount of monies placed in the fund. Monies distributed under this subsection shall be distributed from the new school facilities fund. A school district that receives monies from the new school facilities fund for a donation of land pursuant to section 15-342, paragraph 33 shall not receive monies from the board or the division for the donation of real property pursuant to

this subsection. A school district shall not pay a consultant a percentage of the value of any of the following:

1. Donations of real property, services or cash from any of the following:

- (a) Entities that have offered to provide construction services to the school district.
- (b) Entities that have been contracted to provide construction services to the school district.
- (c) Entities that build residential units in that school district.
- (d) Entities that develop land for residential use in that school district.

2. Monies received under this chapter on behalf of the school district.

3. Monies paid by or at the direction of the board on behalf of the school district.

G. In addition to distributions to school districts based on pupil growth projections, a school district may submit an application to the board for monies from the new school facilities fund if one or more school buildings have outlived their useful life or have been condemned. If the board determines that the school district needs to build a new school building for these reasons, the board shall remove the square footage computations that represent the building from the computation of the school district's total square footage for purposes of this section. If the square footage recomputation reflects that the school district no longer meets building adequacy standards, the school district qualifies for a distribution of monies from the new school construction formula in an amount determined pursuant to subsection D of this section. The board may only modify the base cost per square foot prescribed in this subsection under extraordinary circumstances for geographic factors or site conditions.

H. School districts that receive monies from the new school facilities fund shall establish a district new school facilities fund and shall use the monies in the district new school facilities fund only for the purposes prescribed in this section. By October 15 of each year, each school district shall report to the board the projects funded at each school in the previous fiscal year with monies from the district new school facilities fund and shall provide an accounting of the monies remaining in the new school facilities fund at the end of the previous fiscal year.

I. If a school district has surplus monies received from the new school facilities fund, the school district may use the surplus monies only for capital purposes for the project for up to one year after completion of the project. If the school district possesses surplus monies from the new school construction project that have not been expended within one year of the completion of the project, the school district shall return the surplus monies to the division for deposit in the new school facilities fund.

J. The board's consideration of any application filed after December 31 of the year in which the property becomes territory in the vicinity of a military airport or ancillary military facility as defined in section 28-8461 for monies to fund the construction of new school facilities proposed to be located in territory in the vicinity of a military airport or ancillary military facility shall include, if after notice is transmitted to the military airport pursuant to section 41-5702 and before the public hearing the military airport provides comments and an analysis concerning compatibility of the proposed school facilities with the high noise or accident potential generated by military airport or ancillary military facility operations that may have an adverse effect on public health and safety, consideration and an analysis of the comments and an analysis provided by the military airport before making a final determination.

K. If a school district uses its own project manager for new school construction, the members of the school district governing board and the project manager shall sign an affidavit stating that the members

and the project manager understand and will follow the minimum adequacy requirements prescribed in section 41-5711.

L. The division shall establish a separate account in the new school facilities fund designated as the litigation account to pay attorney fees, expert witness fees and other costs associated with litigation in which the board pursues the recovery of damages for deficiencies correction that resulted from alleged construction defects or design defects that the board believes caused or contributed to a failure of the school building to conform to the building adequacy requirements prescribed in section 41-5711. Attorney fees paid pursuant to this subsection shall not exceed the market rate for similar types of litigation. On or before December 1 of each year, the board shall report to the joint committee on capital review the costs associated with current and potential litigation that may be paid from the litigation account.

M. Until the state board of education and the auditor general adopt rules pursuant to section 15-213, subsection J, the board may allow school districts to contract for construction services and materials through the qualified select bidders list method of project delivery for new school facilities pursuant to this section.

N. The board shall submit electronically a report on project management services and preconstruction services to the governor, the president of the senate and the speaker of the house of representatives by December 31 of each year. The report shall compare projects that use project management and preconstruction services with those that do not. The report shall address cost, schedule and other measurable components of a construction project. School districts, construction-manager-at-risk firms and project management firms that participate in a board-funded project shall provide the information required by the board in relation to this report.

O. If a school district constructs new square footage according to section 15-342, paragraph 33, the board shall review the design plans and location of any new school facility submitted by school districts and another party to determine whether the design plans comply with the adequacy standards prescribed in section 41-5711 and the square footage per pupil requirements pursuant to subsection D, paragraph 3, subdivision (b) of this section. When the school district qualifies for a distribution of monies from the new school facilities fund according to this section, the board shall direct the division to distribute monies to the school district from the new school facilities fund for the square footage constructed under section 15-342, paragraph 33 at the same cost per square foot established by this section that was in effect at the time of the beginning of the construction of the school facility. Before the board directs the division to distribute any monies pursuant to this subsection, the school district shall demonstrate to the board that the facilities to be funded pursuant to this section meet the minimum adequacy standards prescribed in section 41-5711. The agreement entered into pursuant to section 15-342, paragraph 33 shall set forth the procedures for the allocation of these funds to the parties that participated in the agreement.

P. Accommodation schools are not eligible for monies from the new school facilities fund.

Q. If the board approves a school district for funding from the new school facilities fund and the full legislative appropriation is not available to the school district in the fiscal year following the approval by the board, the school district may use any legally available monies to pay for the land or the new construction project approved by the board and may reimburse the fund from which the monies were used in subsequent years with legislative appropriations when those appropriations are made available by this state.

[41-5751. Authorization of state school facilities revenue bonds](#)

A. The board may issue negotiable revenue bonds pursuant to this article. If authorized by the legislature, bonds may be issued under this article in a principal amount not exceeding \$200,000,000 in a fiscal year to:

1. Provide monies to pay the cost of:

(a) Acquiring real property and constructing new school facilities as provided by section 41-5741.

(b) Bond related expenses including any expenses incurred by the board to issue and administer its bonds including underwriting fees and costs, trustee fees, financial consultant fees, printing and advertising costs, paying agent fees, transfer agent fees, legal, accounting, feasibility consultant and other professional fees and expenses, bond insurance or other credit enhancements or liquidity facilities, attorney and accounting fees and expenses related to credit enhancement, bond insurance or liquidity enhancement, remarketing fees, rating agency fees and costs, travel and telephone expenses and all other fees considered necessary by the board in order to market and administer the bonds.

2. Fully or partially fund any reserves or sinking accounts established by the bond resolution.

B. The board shall authorize the bonds by resolution. The resolution shall prescribe:

1. The fixed or variable rate or rates of interest, the date or dates on which interest is payable and the denominations of the bonds.

2. The date or dates of the bonds and maturity, within ten years after the date of issuance.

3. The form of the bonds.

4. The manner of executing the bonds.

5. The medium and place of payment.

6. The terms of redemption, which may provide for a premium for early redemption.

C. The bonds issued pursuant to this article shall be known as state school facilities revenue bonds.

#### 41-5752. Issuance and sale of revenue bonds

A. The board shall issue the bonds in the number and amount provided in the resolution.

B. The bonds shall be sold at public or private sale at the price and on the terms prescribed in the resolution at, above or below par.

C. The net proceeds of the sale of the bonds shall be deposited in the revenue bond proceeds fund established pursuant to section 41-5753.

#### 41-5753. School facilities revenue bond proceeds fund; use for new school facilities

A. If the board issues revenue bonds under this article, the board shall establish a school facilities revenue bond proceeds fund consisting of the net proceeds received from the sale of the bonds.

B. The board may use monies in the school facilities revenue bond proceeds fund only for the purposes provided in section 41-5751, subsection A. Monies in the revenue bond proceeds fund are exempt from lapsing under section 35-190.

C. The state treasurer or bond trustee shall administer and account for the school facilities revenue bond proceeds fund.

41-5754. School facilities revenue bond debt service fund

A. The board shall establish a school facilities revenue bond debt service fund consisting of monies transferred to the fund pursuant to sections 37-521 and 42-5030.01.

B. Monies in the school facilities revenue bond debt service fund may be used only for the purposes authorized by this article.

C. The state treasurer or bond trustee shall administer and account for the school facilities revenue bond debt service fund.

41-5755. Securing principal and interest

A. In connection with issuing bonds authorized by this article and to secure the principal and interest on the bonds, the board by resolution may:

1. Segregate the school facilities revenue bond debt service fund into one or more accounts and subaccounts and provide that bonds issued under this article may be secured by a lien on all or part of the monies paid into the school facilities revenue bond debt service fund or into any account or subaccount in the fund.

2. Provide that the bonds issued under this article are secured by a first lien on the monies paid into the school facilities revenue bond debt service fund as provided by section 37-521, subsection B, paragraph 1 and section 42-5030.01, and pledge and assign to or in trust for the benefit of the holder or holders of the bonds all or part of the monies in the school facilities revenue bond debt service fund, any account or subaccount in the fund or in the school facilities revenue bond proceeds fund as is necessary to secure and pay the principal, the interest and any premium on the bonds as they come due.

3. Establish priorities among bondholders based on criteria adopted by the board.

4. Set aside, regulate and dispose of reserves and sinking accounts.

5. Prescribe the procedure, if any, by which the terms of any contract with bondholders may be amended or abrogated, the amount of bonds the holders of which must consent to and the manner in which the consent may be given.

6. Provide for payment of bond related expenses from the proceeds of the sale of the bonds or other revenues authorized by this article and available to the board.

7. Provide for the services of trustees, cotrustees, agents and consultants and other specialized services with respect to the bonds.

8. Take any other action that in any way may affect the security and protection of the bonds or interest on the bonds.

9. Refund any bonds issued by the board, if these bonds are secured from the same source of revenues as the bonds authorized by this article, by issuing new bonds.

10. Issue bonds partly to refund outstanding bonds and partly for any other purpose consistent with this article.

B. Bonds issued to refund any bonds issued by the board as provided by subsection A, paragraphs 9 and 10 of this section are not subject to legislative authorization or the \$200,000,000 limit prescribed by section 41-5751, subsection A.

#### 41-5756. Lien of pledge

A. Any pledge made under this article is valid and binding from the time when the pledge is made.

B. The monies so pledged and received by the board to be placed in the school facilities revenue bond debt service fund are immediately subject to the lien of the pledge without any future physical delivery or further act. Any lien of any pledge is valid and binding against all parties that have claims of any kind against the board, regardless of whether the parties have notice of the lien. The official resolution or trust indenture or any instrument by which this pledge is created, when adopted by the board, is notice to all concerned of the creation of the pledge, and those instruments need not be recorded in any other place to perfect the pledge.

#### 41-5757. Bond purchase: cancellation

The board may purchase bonds for cancellation out of any monies available for the purchase, at a price of not more than either of the following:

1. If the bonds are redeemable at the time of the purchase, the applicable redemption price plus accrued interest to the next interest payment date on the bonds.

2. If the bonds are not redeemable at the time of the purchase, the applicable redemption price on the first date after the purchase on which the bonds become subject to redemption plus accrued interest to that date.

#### 41-5758. Payment of revenue bonds

A. The revenue bonds shall be paid solely from monies from the school facilities revenue bond debt service fund established by section 41-5754 and other monies that are credited to the school facilities revenue bond debt service fund.

B. The state treasurer or the paying agent for the revenue bonds shall cancel all revenue bonds when paid.

#### 41-5759. Investment of monies in school facilities revenue bond proceeds fund

A. As provided by section 41-5761, the board may authorize the state treasurer or bond trustee to invest monies in the school facilities revenue bond proceeds fund established by section 41-5753.

B. The order directing an investment shall state a specified time when the proceeds from the sale of the bonds will be used. The state treasurer or bond trustee shall make the investment in such a way as to mature at the specified date.

C. All monies earned as interest or otherwise derived from the investment of the monies in the school facilities revenue bond proceeds fund shall be credited to the school facilities revenue bond debt service fund established by section 41-5754.

#### 41-5760. Investment of monies in school facilities revenue bond debt service fund

A. The board may authorize the state treasurer or bond trustee to invest and reinvest any monies in the school facilities revenue bond debt service fund as provided by section 41-5761.

B. All monies earned as interest or otherwise derived from the investment of the monies in the school facilities revenue bond debt service fund shall be credited to that fund.

41-5761. Authorized investments of fund monies

A. On notice from the board, the state treasurer or bond trustee shall invest and divest monies in either the school facilities revenue bond proceeds fund or the school facilities revenue debt service fund in any of the following:

1. Obligations issued or guaranteed by the United States or any of the senior debt of its agencies, sponsored agencies, corporations, sponsored corporations or instrumentalities.
2. State, county or municipal bonds issued in this state on which the payments of interest have not been deferred.
3. Investment agreements and repurchase agreements collateralized by investments described in paragraph 1 of this subsection.

B. The purchase of the securities shall be made by the state treasurer or bond trustee on authority of a resolution of the board. The treasurer or bond trustee shall act as custodian of all securities purchased. The securities may be sold on an order of the board.

41-5762. Characteristics of bonds; negotiable; exemption from taxation; obligation; legal investments

A. Bonds issued under this article are fully negotiable within the meaning and for all purposes of the uniform commercial code, subject only to any provisions for registration, regardless of whether the bonds actually constitute negotiable instruments under the uniform commercial code.

B. The bonds, their transfer and the income from the bonds are at all times free from taxation in this state.

C. Bonds issued under this article:

1. Are obligations of the board. The members of the board and persons executing the bonds are not personally liable for payment of the bonds.
2. Are payable only according to their terms.
3. Are not general, special or other obligations of this state.
4. Do not constitute a debt of this state.
5. Are not enforceable against this state nor is payment of the bonds enforceable out of any monies other than the revenue pledged and assigned to, or in trust for the benefit of, the holder or holders of the bonds.
6. Are securities in which public officers and bodies of this state and of municipalities and political subdivisions of this state, all companies, associations and other persons carrying on an insurance business, all financial institutions, investment companies and other persons carrying on a banking business, all fiduciaries and all other persons who are authorized to invest in government obligations may properly and legally invest.
7. Are securities that may be deposited with public officers or bodies of this state and municipalities and political subdivisions of this state for purposes that require the deposit of government bonds or obligations.

41-5763. Effect of changing circumstances on bonds; agreement of state

A. Bonds issued under this article remain valid and binding obligations of the board notwithstanding that, before the delivery of the bonds, any of the persons whose signatures appear on the bonds cease to be members of the board.

B. An amendment of any provision of this article does not diminish or impair the validity of bonds issued under this article or the remedies and rights of bondholders.

C. This state pledges to and agrees with the holders of the bonds authorized by this article that this state will not limit, alter or impair the rights and remedies of the bondholders, until all bonds issued under this article, together with interest on the bonds, interest on any unpaid installments of principal or interest and all costs and expenses in connection with any action or proceedings by or on behalf of the bondholders, are fully met and discharged. The board, as agent for this state, may include this pledge and undertaking in its resolutions and indentures authorizing and securing the bonds.

41-5764. Validity of bonds; certification by attorney general

A. This article constitutes full authority for authorizing and issuing bonds without reference to any other law of this state. No other law with regard to authorizing or issuing obligations or that in any way impedes or restricts performing the acts authorized by this article may be construed to apply to any proceedings taken or acts done pursuant to this article.

B. The validity of bonds issued under this article does not depend on and is not affected by the legality of any proceeding relating to any action by the board in granting or lending monies or the acquisition, construction or improvement of any facility paid with monies provided by the board.

C. The board may submit to the attorney general revenue bonds to be issued under this article after all proceedings for authorizing the bonds have been completed. Within fifteen days after submission, the attorney general shall examine the bonds and pass on the validity of the bonds and the regularity of the proceedings. If the bonds and proceedings comply with the Constitution of Arizona and this article, and if the bonds when delivered and paid for will constitute binding and legal obligations of the board, the attorney general shall certify in substance that the bonds are issued according to the constitution and laws of this state. The certificate shall also state that the bonds are also validly secured by the obligation to transfer monies from designated sources of revenue, including income on the permanent state school fund established by section 37-521, to cover any insufficiencies.

D. The bonds shall recite that they are regularly issued pursuant to this article. That recital, together with the certification by the attorney general under subsection C of this section, constitutes prima facie evidence of the legality and validity of the bonds. From and after the sale and delivery of the bonds, they are incontestable by the board or this state.

41-5781. Authorization of state school improvement revenue bonds; expiration

A. The board may issue revenue bonds in a principal amount not to exceed \$800,000,000 pursuant to this article. The board may also issue qualified zone academy bonds within the meaning of section 1397e of the United States internal revenue code of 1986 or successor provisions pursuant to this article in a principal amount not to exceed \$20,000,000. The qualified zone academy bonds shall be separately accounted for within the school improvement revenue bond proceeds fund established by section 41-5783. All bonds authorized by this section may be issued for the following purposes:

1. To provide monies to pay the cost of bond-related expenses, including any expenses incurred by the board to issue and administer its bonds, including underwriting fees and costs, trustee fees, financial

consultant fees, printing and advertising costs, paying agent fees, transfer agent fees, legal, accounting, feasibility consultant and other professional fees and expenses, bond insurance or other credit enhancements or liquidity facilities, attorney and accounting fees and expenses related to credit enhancement, bond insurance or liquidity enhancement, remarketing fees, rating agency fees and costs, travel and telephone expenses and all other fees considered necessary by the board in order to market and administer the bonds.

2. To fully or partially fund any reserves or sinking accounts established by the bond resolution.

B. The board shall authorize the bonds by resolution. The resolution shall prescribe:

1. The fixed or variable rate or rates of interest, the date or dates on which interest is payable and the denominations of the bonds.

2. The date or dates of the bonds and maturity, within twenty years after the date of issuance.

3. The form of the bonds.

4. The manner of executing the bonds.

5. The medium and place of payment.

6. The terms of redemption, which may provide for a premium for early redemption.

C. The bonds issued pursuant to this article shall be known as state school improvement revenue bonds.

D. The authority of the board to issue school improvement revenue bonds pursuant to this article expires from and after June 30, 2003, except for bonds issued to refund any bonds issued by the board.

#### 41-5782. Issuance and sale of school improvement revenue bonds

A. The board shall issue the school improvement revenue bonds in the number and amount provided in the resolution.

B. The bonds shall be sold at public or private sale at the price and on the terms prescribed in the resolution at, above or below par.

C. The net proceeds of the sale of the bonds shall be deposited in the school improvement revenue bond proceeds fund established pursuant to section 41-5783.

#### 41-5783. School improvement revenue bond proceeds fund; use for school improvements

A. If the board issues revenue bonds under this article, the board shall establish a school improvement revenue bond proceeds fund consisting of the net proceeds received from the sale of the bonds.

B. The board may use monies in the school improvement revenue bond proceeds fund only for the purposes provided in section 41-5781, subsection A. Monies in the school improvement revenue bond proceeds fund are exempt from lapsing under section 35-190.

C. The state treasurer or bond trustee shall administer and account for the school improvement revenue bond proceeds fund.

#### 41-5784. School improvement revenue bond debt service fund

A. The board shall establish a school improvement revenue bond debt service fund consisting of monies received by the board pursuant to section 42-5029, subsection E and section 37-521, subsection B, paragraph 1. All monies received pursuant to section 42-5029, subsection E shall be accounted for separately and shall be used only for debt service of school improvement revenue bonds. All monies received pursuant to section 37-521, subsection B, paragraph 1 shall be accounted for separately and shall be used only for debt service of qualified zone academy bonds.

B. Monies in the school improvement revenue bond debt service fund may be used only for the purposes authorized by this article.

C. The state treasurer or bond trustee shall administer and account for the school improvement revenue bond debt service fund.

#### 41-5785. Securing principal and interest

A. In connection with issuing bonds authorized by this article and to secure the principal and interest on the bonds, the board by resolution may:

1. Segregate the school improvement revenue bond debt service fund into one or more accounts and subaccounts and provide that bonds issued under this article may be secured by a lien on all or part of the monies paid into the revenue bond debt service fund or into any account or subaccount in the fund.
2. Provide that the bonds issued under this article be secured by a first lien on the monies paid into the school improvement revenue bond debt service fund as provided by section 42-5029, subsection E, paragraph 1 and pledge and assign to or in trust for the benefit of the holder or holders of the bonds all or part of the monies in the school improvement revenue bond debt service fund, in any account or subaccount in the fund or in the school improvement revenue bond proceeds fund as is necessary to secure and pay the principal, the interest and any premium on the bonds as they come due.
3. Establish priorities among bondholders based on criteria adopted by the board.
4. Set aside, regulate and dispose of reserves and sinking accounts.
5. Prescribe the procedure, if any, by which the terms of any contract with bondholders may be amended or abrogated, the amount of bonds the holders of which must consent to and the manner in which the consent may be given.
6. Provide for paying bond-related expenses from the proceeds of the sale of the bonds or other revenues authorized by this article and available to the board.
7. Provide for the services of trustees, cotrustees, agents and consultants and other specialized services with respect to the bonds.
8. Take any other action that in any way may affect the security and protection of the bonds or interest on the bonds.
9. Refund any bonds issued by the board, if these bonds are secured from the same source of revenues as the bonds authorized by this article, by issuing new bonds, whether at or before maturity of the bonds being refunded.
10. Issue bonds partly to refund outstanding bonds and partly for any other purpose consistent with this article.

B. Bonds that are issued to refund any bonds that are issued by the board as provided by subsection A, paragraphs 9 and 10 of this section are not subject to legislative authorization or subject to the \$800,000,000 limit prescribed by section 41-5781, subsection A.

[41-5786. Lien of pledge](#)

A. Any pledge made under this article is valid and binding from the time when the pledge is made.

B. The monies so pledged and received by the board to be placed in the school improvement revenue bond debt service fund are immediately subject to the lien of the pledge without any future physical delivery or further act. Any lien of any pledge is valid and binding against all parties that have claims of any kind against the board, regardless of whether the parties have notice of the lien. The official resolution or trust indenture or any instrument by which this pledge is created, when adopted by the board, is notice to all concerned of the creation of the pledge, and those instruments need not be recorded in any other place to perfect the pledge.

[41-5787. Bond purchase: cancellation](#)

The board may purchase bonds for cancellation out of any monies available for the purchase at a price of not more than either of the following:

1. If the bonds are redeemable at the time of the purchase, the applicable redemption price plus accrued interest to the next interest payment date on the bonds.
2. If the bonds are not redeemable at the time of the purchase, the applicable redemption price on the first date after the purchase on which the bonds become subject to redemption plus accrued interest to that date.

[41-5788. Payment of revenue bonds](#)

A. The revenue bonds shall be paid solely from monies from the school improvement revenue bond debt service fund established pursuant to section 41-5784 and other monies that are credited to the school improvement revenue bond debt service fund.

B. The state treasurer or the paying agent for the revenue bonds shall cancel all revenue bonds when paid.

[41-5789. Investment of monies in school improvement revenue bond proceeds fund](#)

A. As provided by section 41-5791, the board may authorize the state treasurer or bond trustee to invest monies in the school improvement revenue bond proceeds fund established pursuant to section 41-5783.

B. The order directing an investment shall state a specified time when the proceeds from the sale of the bonds will be used. The state treasurer or bond trustee shall make the investment in such a way as to mature at the specified date.

C. All monies earned as interest or otherwise derived from the investment of the monies in the school improvement revenue bond proceeds fund shall be credited to the school improvement revenue bond debt service fund established by section 41-5784.

[41-5790. Investment of monies in school improvement revenue bond debt service fund](#)

A. The board may authorize the state treasurer or bond trustee to invest and reinvest any monies in the school improvement revenue bond debt service fund as provided by section 41-5791.

B. All monies earned as interest or otherwise derived from the investment of the monies in the school improvement revenue bond debt service fund shall be credited to that fund.

41-5791. Authorized investments of fund monies

A. On notice from the board, the state treasurer or bond trustee shall invest and divest monies in either the school improvement revenue bond proceeds fund or the school improvement revenue bond debt service fund in any of the following:

1. Obligations issued or guaranteed by the United States or any of the senior debt of its agencies, sponsored agencies, corporations, sponsored corporations or instrumentalities.
2. State, county or municipal bonds that are issued in this state and on which the payments of interest have not been deferred.
3. Investment agreements and repurchase agreements collateralized by investments described in paragraph 1 of this subsection.

B. The purchase of the securities shall be made by the state treasurer or bond trustee on authority of a resolution of the board. The treasurer or bond trustee shall act as custodian of all securities purchased. The securities may be sold on an order of the board.

41-5792. Characteristics of bonds; negotiable; exemption from taxation; obligation; legal investments

A. Bonds issued under this article are fully negotiable within the meaning and for all purposes of the uniform commercial code, subject only to any provisions for registration, regardless of whether the bonds actually constitute negotiable instruments under the uniform commercial code.

B. The bonds, their transfer and the income from the bonds are at all times free from taxation in this state.

C. Bonds issued under this article:

1. Are obligations of the board. The members of the board and persons executing the bonds are not personally liable for payment of the bonds.
2. Are payable only according to their terms.
3. Do not constitute a debt of this state.
4. Are not enforceable against this state nor is payment of the bonds enforceable out of any monies other than the revenue pledged and assigned to, or in trust for the benefit of, the holder or holders of the bonds.
5. Are securities in which public officers and bodies of this state and of municipalities and political subdivisions of this state, all companies, associations and other persons carrying on an insurance business, all financial institutions, investment companies and other persons carrying on a banking business, all fiduciaries and all other persons who are authorized to invest in government obligations may properly and legally invest.
6. Are securities that may be deposited with public officers or bodies of this state and municipalities and political subdivisions of this state for purposes that require the deposit of government bonds or obligations.

41-5793. Effect of changing circumstances on bonds; agreement of state

A. Bonds issued under this article remain valid and binding obligations of the board notwithstanding that before the delivery of the bonds any of the persons whose signatures appear on the bonds cease to be members of the board.

B. An amendment of any provision of this article does not diminish or impair the validity of bonds issued under this article or the remedies and rights of bondholders.

C. This state pledges to and agrees with the holders of the bonds authorized by this article that this state will not limit, alter or impair the rights and remedies of the bondholders until all bonds issued under this article, together with interest on the bonds, interest on any unpaid installments of principal or interest and all costs and expenses in connection with any action or proceedings by or on behalf of the bondholders, are fully met and discharged. The board, as agent for this state, may include this pledge and undertaking in its resolutions and indentures authorizing and securing the bonds.

41-5794. Validity of bonds: certification by attorney general

A. This article constitutes full authority for authorizing and issuing bonds without reference to any other law of this state. No other law with regard to authorizing or issuing obligations or that in any way impedes or restricts performing the acts authorized by this article may be construed to apply to any proceedings taken or acts done pursuant to this article.

B. The validity of bonds issued under this article does not depend on and is not affected by the legality of any proceeding relating to any action by the board in granting or lending monies or the acquisition, construction or improvement of any facility paid with monies provided by the board.

C. The board may submit to the attorney general revenue bonds to be issued under this article after all proceedings for authorizing the bonds have been completed. Within fifteen days after submission, the attorney general shall examine the bonds and pass on the validity of the bonds and the regularity of the proceedings. If the bonds and proceedings comply with the Constitution of Arizona and this article, and if the bonds when delivered and paid for will constitute binding and legal obligations of the board, the attorney general shall certify in substance that the bonds are issued according to the constitution and laws of this state.

D. The bonds shall recite that they are regularly issued pursuant to this article. That recital, together with the certification by the attorney general under subsection C of this section, constitutes prima facie evidence of the legality and validity of the bonds. From and after the sale and delivery of the bonds, they are incontestable by the board or this state.

---

### **Summary:**

This regular rulemaking from the Industrial Commission of Arizona (Commission) seeks to amend twenty (20) rules and repeal one (1) rule in Title 20, Chapter 5, Article 4 related to the standards and regulations for Arizona Boilers and Lined Hot Water Heaters.

Pursuant to A.R.S. §§ 23-474, 23-475, 23-476, the Industrial Commission of Arizona (the "Commission") is required to (1) adopt standards and regulations pursuant to section 23-475 and adopt other rules as are necessary, (2) recommend standards, regulations and amendments to the standards and regulations to the commission for approval or disapproval, and (3) propose adoption of national consensus standards or federal standards or draft such regulations as it considers necessary after conducting sufficient investigation through the division's employees

and through consultation with the boiler advisory board and other persons knowledgeable in the business for which the standards or regulations are being formulated.

Pursuant to A.R.S. § 41-1028, “[a]n agency may incorporate by reference in its rules, and without publishing the incorporated matter in full, all or any part of a code, standard, rule or regulation of...a nationally recognized organization or association, if incorporation of its text in agency rules would be unduly cumbersome, expensive or otherwise inexpedient.” The Commission is proposing to incorporate by reference the following national consensus codes and standards:

1. 2019 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VI, VII, VIII Division 1, 2, 3, IX, X
2. 2020 ASME Code for Pressure Piping, B31.1
3. 2019 ASME PVHO-1 Safety Standard for Pressure Vessels for Human Occupancy
4. 2017 ANSI Z21.10.3 American National Standard for Gas Water Heaters
5. 2018 ANSI/ASME CSD-1 American National Standard for Controls and Safety Devices for Automatically Fired Boilers
6. 2018 ANSI Z223.1 NFPA 54, National Fuel Gas Code
7. 2019 ANSI NFPA 85, Boiler and Combustion Systems Hazards Code
8. 2019 ANSI/NB-23, National Board Inspection Code
9. 2018 ASME Code for Pressure Piping B31.1
10. 2012 NB-27, Revision 1 (1/13), National Board of Boiler and Pressure Vessel Inspectors, A Guide for Blowoff Vessels

The Commission has provided a detailed description of the changes between the updated versions of these codes and standards and the older versions currently incorporated by reference in the Commission’s rules in Section 6 of the Preamble to the Notice of Final Rulemaking.

In addition to the incorporation of the codes and standards listed above, the Commission indicates the proposed amendments define electric boilers, direct fired pressure vessel, pressure vessel, PVHO, and unfired steam boiler; revise the definitions for the ASME Code, boiler, forced circulation hot water heater, national board registration number, and state identification number; bring the Boiler Advisory Board rule into compliance with the current version of A.R.S. §23-374 by repealing the rule; clarify the language in the rules to better define which rules apply to which owners; set forth a timeline for compliance with A.R.S. §23-485(D); update the requirements for an inspection report; clarify the frequency of inspection for a power boiler; clarify the frequency of internal inspections for boilers; adjust the requirements for preparation of inspection of a boiler; amend the procedure for obtaining a special inspector certificate which partially conflicts with A.R.S. §23-485; and update requirements for flow sensing devices.

**1. Are the rules legal, consistent with legislative intent, and within the agency’s statutory authority?**

The Commission cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Commission indicates it did not review or rely on any study in conducting this rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Industrial Commission states that they anticipate that the proposed rulemaking will have no adverse economic, small business, or consumer impact. They indicate that the rulemaking is intended to reduce regulatory burden by eliminating incorrect or confusing language in the current rules to allow for the affected stakeholders to have a clearer understanding of what is required. Additionally, they believe that by adopting the most current standards and codes the amendments would facilitate stakeholders in using more modern technology which may provide a cost benefit. Stakeholders include the Commission, owners, operators, users or inspectors of boilers, hot lined water heaters or pressure vessels.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Commission states they did not consider alternative methods.

6. **What are the economic impacts on stakeholders?**

The Commission indicates that because the proposed rules do not place new obligations, costs, or time constraints on employers, adoptions of the rules is not expected to impose administrative or other cost required for compliance in Arizona.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

Between the Notice of Proposed Rulemaking published in the Administrative Register and the Notice of Final Rulemaking now before the Council, the Commission indicates rule R20-5-404(A)(8) was amended to include the following phrase: “[t]his incorporation does not include any later amendments or editions of the incorporated matter,” to comply with the requirements for incorporation by reference in A.R.S. § 41-1028(B). Council staff does not believe this change constitutes a substantially different rule pursuant to A.R.S. § 41-1025.

**8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Commission indicates it received no comments regarding this rulemaking.

**9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rules do not require a permit, license, or agency authorization.

**10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Commission indicates there are no corresponding federal laws applicable to the subject of this rulemaking.

**11. Conclusion**

This regular rulemaking from the Commission seeks to amend twenty (20) rules and repeal one (1) rule in Title 20, Chapter 5, Article 4 related to the standards and regulations for Arizona Boilers and Lined Hot Water Heaters. Specifically, the Commission is proposing to incorporate by reference several updated national consensus codes and standards. Additionally, the Commission indicates the proposed amendments add definitions, revise existing definitions, bring rules into compliance with statute, clarify and update requirements, and amend procedures.

The Commission is requesting an immediate effective date pursuant to A.R.S. § 41-1032(A)(1), “[t]o preserve the public peace, health or safety.” Specifically, the Commission indicates the proposed amendments directly affect the health and safety of employees working in the State of Arizona and the Commission anticipates that the amended rules will help reduce workplace deaths, injuries, and illnesses. Council staff believes the Commission has provided sufficient information that demonstrates a need for an immediate effective date to preserve the public peace, health, or safety.

Council staff recommends approval of this rulemaking.

Title 20, Chapter 5, Rule R20-5-418 Non-standard Boilers, A.A.C. Title 20, Chapter 5, Rule R20-5-419 Request to Reinstall Boiler or Lined Hot Water Heater, A.A.C. Title 20, Chapter 5, Rule R20-5-420 Special Inspector Certificate under A.R.S. § 23-485, A.A.C. Title 20, Chapter 5, Rule R20-5-429 Variance, A.A.C. Title 20, Chapter 5, Rule R20-5-430 Forced Circulation Hot Water Heaters, A.A.C. Title 20, Chapter 5, Rule R20-5-431 Code Cases, and A.A.C. Title 20, Chapter 5, Rule R20-5-432 Historical Boilers

Dear Ms. Sornsins:

The Industrial Commission of Arizona (the "Commission") requests that the Governor's Regulatory Review Council (the "Council") approve the above-referenced rulemaking. Pursuant to A.A.C. R1-6-201(A)(1), the Commission provides the following information:

**a. The close of record date.**

October 11, 2022.

**b. Whether the rulemaking activity relates to a five-year review report and, if applicable, the date the report was approved by the Council.**

The subject rulemaking relates to the following five-year review report: Title 20, Chapter 5, Article 4, Arizona Boilers and Lined Hot Water Heaters approved June 4, 2019.

**c. Whether the rule establishes a new fee and, if it does, citation of the statute expressly authorizing the new fee.**

The subject rulemaking does not establish a new fee.

**d. Whether the rule contains a fee increase.**

The subject rulemaking does not contain a fee increase.

**e. Whether an immediate effective date is requested for the rule under A.R.S. § 41-1032.**

The Commission is requesting an immediate effective date under A.R.S. § 41-1032(A)(1) (“To preserve the public peace, health or safety.”). Pursuant to A.R.S. §§ 23-474, 23-475, 23-476, the Industrial Commission of Arizona (the “Commission”) is required to (1) adopt standards and regulations pursuant to section 23-475 and adopt other rules as are necessary, (2) recommend standards, regulations and amendments to the standards and regulations to the commission for approval or disapproval, and (3) propose adoption of national consensus standards or federal standards or draft such regulations as it considers necessary after conducting sufficient investigation through the division's employees and through consultation with the boiler advisory board and other persons knowledgeable in the business for which the standards or regulations are being formulated. The Commission is proposing to amend A.A.C. R20-5-401 (Applicability), A.A.C. R20-5-402 (Definitions), A.A.C. R20-5-404 Standards for Boilers, Lined Hot Water Heaters and Pressure Vessels), A.A.C. R20-5-406 (Repairs and Alterations), A.A.C. R20-5-407 (Inspection of Boilers, Lined Hot Water Heaters, Direct Fired Jacketed Steam Kettles and Issuance of Inspection Certificates), A.A.C. R20-5-408 (Frequency of Inspection), A.A.C. R20-5-409 (Notification and Preparation for Inspection), A.A.C. R20-5-410 (Report of Accident), A.A.C. R20-5-411 (Hydrostatic Tests), A.A.C. R20-5-412 (Automatic Low-water Fuel Cutoff Devices or Combined Water Feeding and Fuel Cutoff Devices), A.A.C. R20-5-413 (Safety and Safety Relief Valves), A.A.C. R20-5-415 (Boiler Blowdown, Blowoff Equipment and Drains), A.A.C. R20-5-416 (Maximum Allowable Working Pressure), A.A.C. R20-5-417 (Maintenance and Operations of Boilers, Hot Water Heaters and Direct Fired Jacketed Steam Kettles), A.A.C. R20-5-418 (Non-standard Boilers), A.A.C. R20-5-419 (Request to Reinstall Boiler or Lined Hot Water Heater, A.A.C. R20-5-420 (Special Inspector Certificates under A.R.S. § 23-485), A.A.C. R20-5-429 (Variance), A.A.C. R20-5-430 (Forced Circulation Hot Water Heaters), A.A.C. R20-5-431 (Code Cases) and A.A.C. R20-5-432 (Historical Boilers). Additionally, the Commission is proposing to repeal A.A.C. R20-5-403 (Boiler Advisory Board). The proposed amendments directly affect the health and

safety of employees working in the State of Arizona and the Commission anticipates that the amended rules will help reduce workplace deaths, injuries, and illnesses.

- f. A certification that the preamble discloses a reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.**

The Commission did not rely on a study for justification of the subject rulemaking.

- g. If one or more full-time employees are necessary to implement and enforce the rule, a certification that the preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee of the number of new full-time employees necessary to implement and enforce the rule.**

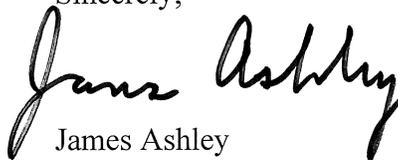

The Commission does not anticipate that it will be necessary to hire any new full-time employees to implement or enforce the subject rulemaking.

- h. A list of all documents enclosed.**

Governor's Office Approvals of Initial and Final Rulemaking  
Notice of Final Rulemaking  
Economic Impact Statement  
General and Specific Statutes Authorizing Rulemaking  
Defined Terms

Thank you for your consideration. Should you have any questions regarding the amendments, please contact Gaetano Testini, Chief Legal Counsel, at 602-542-5781.

Sincerely,

James Ashley  
Director

**2. Citations to agency’s statutory rulemaking authority to include the authorizing statute and the implementing statute:**

Authorizing statute: A.R.S. § 23-108.01

Implementing statute: A.R.S. §§ 23-474, 23-475, 23-476

Note: An exemption from Executive Order 2022-01 was provided for this rulemaking by Mr. Brian Norman, Policy Advisor in the Office of the Arizona Governor, by e-mail dated July 22, 2022. A second exemption from Executive Order 2022-01 was provided for this rulemaking by Mr. Brian Norman, Policy Advisor in the Office of the Arizona Governor, by e-mail dated October 11, 2022.

**3. The effective date of this rule:**

The Industrial Commission of Arizona (the “Commission”) requests an immediate effective date under A.R.S. § 41-1032(A)(1) (“To preserve the public peace, health or safety.”).

**a. If the agency selected a date earlier than the 60 day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**

The Commission requests an immediate effective date under A.R.S. § 41-1032(A)(1) (“To preserve the public peace, health or safety.”).

Pursuant to A.R.S. §§ 23-474, 23-475, 23-476, the Industrial Commission of Arizona (the “Commission”) is required to (1) adopt standards and regulations pursuant to section 23-475 and adopt other rules as are necessary, (2) recommend standards, regulations and amendments to the standards and regulations to the commission for approval or disapproval, and (3) propose adoption of national consensus standards or federal standards or draft such regulations as it considers necessary after conducting sufficient investigation through the division's employees and through consultation with the boiler advisory board and other persons knowledgeable in the business for which the standards or regulations are being formulated.

The Commission is proposing to amend A.A.C. R20-5-401 (Applicability), A.A.C. R20-5-402 (Definitions), A.A.C. R20-5-404 Standards for Boilers, Lined Hot Water Heaters and Pressure Vessels), A.A.C. R20-5-406 (Repairs and Alterations), A.A.C. R20-5-407 (Inspection of Boilers, Lined Hot Water Heaters, Direct Fired Jacketed Steam Kettles and Issuance of Inspection Certificates), A.A.C. R20-5-408 (Frequency of Inspection), A.A.C. R20-5-409 (Notification and Preparation for Inspection), A.A.C. R20-5-410 (Report of

Accident), A.A.C. R20-5-411 (Hydrostatic Tests), A.A.C. R20-5-412 (Automatic Low-water Fuel Cutoff Devices or Combined Water Feeding and Fuel Cutoff Devices), A.A.C. R20-5-413 (Safety and Safety Relief Valves), A.A.C. R20-5-415 (Boiler Blowdown, Blowoff Equipment and Drains), A.A.C. R20-5-416 (Maximum Allowable Working Pressure), A.A.C. R20-5-417 (Maintenance and Operations of Boilers, Hot Water Heaters and Direct Fired Jacketed Steam Kettles), A.A.C. R20-5-418 (Non-standard Boilers), A.A.C. R20-5-419 (Request to Reinstall Boiler or Lined Hot Water Heater, A.A.C. R20-5-420 (Special Inspector Certificates under A.R.S. § 23-485), A.A.C. R20-5-429 (Variance), A.A.C. R20-5-430 (Forced Circulation Hot Water Heaters), A.A.C. R20-5-431 (Code Cases) and A.A.C. R20-5-432 (Historical Boilers). Additionally, the Commission is proposing to repeal A.A.C. R20-5-403 (Boiler Advisory Board).

The proposed amendments directly affect the health and safety of employees working in the State of Arizona and the Commission anticipates that the amended rules will help reduce workplace deaths, injuries, and illnesses.

**4. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the record of the proposed rule:**

Notice of Rulemaking Docket Opening: 28 A.A.R. 2300, September 9, 2022.

Notice of Proposed Rulemaking: 28 A.A.R. 2243, September 9, 2022.

**5. The agency's contact person who can answer questions about the rulemaking:**

Name: Jessie Atencio, Director  
Address: Division of Occupational Safety and Health  
Industrial Commission of Arizona  
800 W. Washington St., Suite 203  
Phoenix, AZ 85007  
Telephone: (602) 542-5795  
Fax: (602) 542-1614  
E-mail: jessie.atencio@azdosh.gov

**6. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:**

Pursuant to A.R.S. §§ 23-474, 23-475, 23-476, the Industrial Commission of Arizona (the "Commission") is required to (1) adopt standards and regulations pursuant to section 23-475

and adopt other rules as are necessary, (2) recommend standards, regulations and amendments to the standards and regulations to the commission for approval or disapproval, and (3) propose adoption of national consensus standards or federal standards or draft such regulations as it considers necessary after conducting sufficient investigation through the division's employees and through consultation with the boiler advisory board and other persons knowledgeable in the business for which the standards or regulations are being formulated.

The Industrial Commission of Arizona is proposing to incorporate by reference the following national consensus codes and standards:

- (1) 2019 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VI, VII, VIII  
Division 1, 2, 3, IX, X
- (2) 2020 ASME Code for Pressure Piping, B31.1
- (3) 2019 ASME PVHO-1 Safety Standard for Pressure Vessels for Human  
Occupancy
- (4) 2017 ANSI Z21.10.3 American National Standard for Gas Water Heaters
- (5) 2018 ANSI/ASME CSD-1 American National Standard for Controls and Safety  
Devices for Automatically Fired Boilers
- (6) 2018 ANSI Z223.1 NFPA 54, National Fuel Gas Code
- (7) 2019 ANSI NFPA 85, Boiler and Combustion Systems Hazards Code
- (8) 2019 ANSI/NB-23, National Board Inspection Code
- (9) 2018 ASME Code for Pressure Piping B31.1
- (10) 2012 NB-27, Revision 1 (1/13), National Board of Boiler and Pressure Vessel  
Inspectors, A Guide for Blowoff Vessels

Copies of the incorporated materials are available for inspection or reproduction at the Arizona Division of Occupational Safety and Health, 800 West Washington Street, Room 203, Phoenix, AZ 85007, or may be obtained from National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 <http://www.nationalboard.org>, ASME International, Three Park Avenue, New York, NY 10016-5990 <http://www.asme.org>, or American National Standards Institute, at Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 <http://www.ansi.org>.

The 2019 ASME Boiler and Pressure Vessel Code provides requirements for design, fabrication, installation, and inspection of steam generating boilers, and hot water boilers intended for low pressure service that are directly fired by oil, gas, electricity, or coal. It contains appendices which cover approval of new material, methods of checking safety valve and safety relief valve capacity, examples of methods of checking safety valve and safety relief valve capacity, examples of methods of calculation and computation, definitions relating to boiler design and welding, and quality control systems. Rules pertaining to use of the H, HV, and HLW Code symbol stamps are also included.

The updated code develops a new non-mandatory appendix for fabrication of dissimilar metal welds for CSEF steel to austenitic materials, details rules for preheating and inter-pass temperatures, as well as interruption of welding and preheat, replaces elements describing "Authorized Observer" and "Laboratory Quality Control System" requirements with applicable references to ASME CA-1, adds four new "for information only" tables for BPV IV stress values, modernizes parts HC-403, HC-520, HA-404 and HA-504 to allow for the use of electronic signatures, adopts the 2016 Edition of ASNT SNT-TC-1a, adopts the 2016 Edition of ANSI/ASNT CP-189, revises Paragraph U-2(g) of Div. 1, to allow usage of Div. 2 for design methods not provided in Div. 1 as well as other recognized Standards or Codes, revises UG-14 to improve clarity, and to allow for the production of hollow cylindrical components with a greater range of diameters under qualifying conditions, relaxes post forming heat treatment rules in UCS-79 (Div. 1) and para. 6.1.2.3 (Div. 2) for thin wall pipe and tube after cold forming, permits pressure vessels being designed and constructed to the same design specifications to follow a single UDS, and their compliance to the UDS, streamlines the inspection process with regard to acoustic emission examination while maintaining a proper and meaningful inspection result, reduces unnecessarily severe requirements for the qualification test for cyclic fatigue to be more reflective of those in other industry standards that are less severe, yet which have proven safe for over 25 years eliminating the an artificial barrier to qualification of Section X Class III pressure vessels, clarifies requirements for stress calculations, revises fatigue test procedure, and revised burst test procedure to set the maximum allowable pressurization rate at 200 psi/sec, which is common within the industry.

The 2020 ASME Code for Pressure Piping, B31.1 details the design, materials,

fabrication, erection, test, inspection, operation, and maintenance of piping systems. Piping used with the Code includes pipe, flanges, bolting, gaskets, valves, pressure-relieving valves/devices, fittings, and the pressure-containing portions of other piping components.

The updated code contains numerous changes crucial for keeping the standard current, the list of updates in the beginning of the document comprises six pages. These changes include the allowance of either U.S. Customary (USC) or International System (SI, also known as metric) units, and the addition of new definitions for ferrous material, linear indication, rounded indication, maintenance, nonferrous, post weld hydrogen bakeout, and volumetric examination, special provisions for testing piping components and subassemblies, closure welds, and flanged joints, and new procedures as an alternative to hydrostatic and pneumatic testing,

The 2019 ASME PVHO-1 Safety Standard for Pressure Vessels for Human Occupancy provides requirements for the design, fabrication, inspection, testing, marking, and stamping of pressure vessels for human occupancy, having an internal or external pressure differential exceeding 2 psi. This Standard also provides requirements for the design, fabrication, inspection, testing, cleaning, and certification of piping systems for PVHOs. PVHOs include, but are not limited to, submersibles, diving bells, personnel transfer capsules, decompression chambers, recompression chambers, hyperbaric chambers, high altitude chambers, and medical hyperbaric oxygenation facilities.

The updated standard continues the work to address complete PVHO systems and PVHOs made from nonstandard materials. In support of this work, definitions in Mandatory Appendix II and various forms were added or updated to reflect the differences in approach to documenting the entire PVHO system as a whole, rather than as single or multiple pressure vessels /chambers. Additionally, changes were made to this edition in efforts to clarify several design standards and requirements for easier understanding and implementation by all users of this Standard.

The American National Standard for Gas Water Heaters, ANSI Z21.10.3 2017, applies to newly produced, large automatic storage water heaters having input ratings above 75,000 Btu/hr, instantaneous water heaters, circulating water heaters including booster water heaters, hereinafter referred to as water heaters or appliances, constructed entirely of new, unused parts and materials for use with: (1) natural gas, (2) manufactured gas, (3) mixed

gas, (4) liquefied petroleum gases, (5) LP gas-air mixtures, (6) liquefied petroleum gases only for recreational vehicle installation, (7) natural gas and liquefied petroleum gases when provision is made for the simple conversion from one gas to the other, for manufactured home (mobile home) installation, (8) natural gas and liquefied petroleum gases when provision is made for the simple conversion from one gas to the other, for recreational vehicle installation, and (9) combination potable water/space heating applications. This Standard also applies to water heaters with draft hoods which are factory equipped with automatic vent damper devices, and water heaters of other than the direct vent type which are factory equipped with electrically operated or mechanically actuated automatic flue damper devices.

The updated standard adds the requirement to provide means to vent gases to the outdoors for Category II, III, IV, and direct vent water heaters, new instruction manual requirements for Category II, III and IV water heaters, new marking requirements on rating plate for Category II, III and IV water heaters, new marking requirements for Type B vent water heaters, new marking requirements for Category II, III and IV water heaters, a category determination test, a test clause titled, "Capacities of tube type water heater" to determine the capacity of tube type water heaters to identify those models subject to a standby loss requirement. a revised hydrostatic pressure test to clarify that only the heat exchanger of a non-tank type water heater is hydrostatically tested, a vent system leakage test for Category II, III, or IV water heaters, and a clause titled, Method of test for measuring standby loss for tube type instantaneous water heaters with 10 or greater gallons of storage, because the current test for measuring standby loss is not applicable for gas-fired instantaneous water heaters, which is subject to US Federal maximum standby loss requirements.

The American National Standard for Controls and Safety Devices for Automatically Fired Boilers, ASME CSD-1-2018, covers requirements for the assembly, installation, maintenance, and operation of controls and safety devices on automatically operated boilers directly fired with gas, oil, gas-oil, or electricity, having fuel input ratings under 12,500,000 Btu/hr.

The updated code incorporates new and revised controls that were not covered in the 2006 version. This included fire eye control, pressure controls, and water level controls.

The 2018 ANSI Z223.1 NFPA 54, National Fuel Gas Code, provides industry-accepted guidance for the safe installation and operation of fuel gas piping systems, appliances, equipment, and accessories.

The 2018 edition includes updates based on recognized risks, recent research, and the techniques, materials, developments, and construction practices in use today. The 2018 edition includes revisions to piping requirements, which allows listed arc-resistant jacket or coated CSST to use the appliance's electrical grounding connector as the bonding means and recognizing stainless steel smooth wall pipe and tubing products as acceptable piping materials. Other changes include revising the minimum allowed wall thickness of carbon and stainless-steel pipe, permitting press-connect fittings as an acceptable joining method for pipe, and revising the venting requirements include requiring listing to the appropriate UL standards for plastic venting materials, factory-built chimneys, Type B and BW vents, chimney lining systems, and special gas vents.

The 2019 ANSI NFPA 85, Boiler and Combustion Systems Hazards Code, gives guidelines for boiler operator and maintenance training, as well as guidance for the strength of the structure, combustion and draft control equipment, interlocks, alarms, and other related controls that are essential to the safe operation of boilers and combustion systems and addresses minimum guidelines for the installation, operation, and maintenance of boilers. This code covers many types of boilers, such single and multiple burner boilers, atmospheric fluidized bed boilers, heat recovery steam generators, pulverized fuel systems, and stokers.

The updated code incorporates new and revised definitions for interlock, trip, and permissive and correlated terms related to these for consistency, adds new language to stipulate specification of auto ignition temperature for fuels over the range of expected operating conditions, specifies the allowed uses of Class 2 and Class 3 igniters, provides guidance on the frequency of testing for Multiple Burner Boiler interlocks, clarifies and revises operational leak test frequencies to specify the test, and clarifies that a combustion turbine purge is not needed on subsequent starts if purge credit is maintained.

The 2019 ANSI/NB-23 National Board Inspection Code, recognizes three important areas of post-construction activities where information, understanding, and following specific requirements will promote public and personal safety; these areas are installation,

inspection, and repairs and alterations. The NBIC provides rules, information, and guidance for post-construction activities.

The updated code redefines the requirements for pressure relief valves and adds test procedures and frequency requirements.

The 2018 ASME Code for Pressure Piping B31.1 prescribes minimum requirements for the design, materials, fabrication, erection, test, and inspection of power and auxiliary service piping systems for electric generation stations, industrial institutional plants, central and district heating plants.

The updated code adds the requirement that when outside of the Code the measures are to be documented in the engineering design, changes the ASME Certification Mark from ASME BPVC Section I to ASME CA-1 Conformity Assessment Requirement, adds an advisory that the cleaning and purging of flammable gas systems by be subject to the requirements of NFPA Standard 26, adds definitions of austenitizing; heat treatments, subcritical heat treatment; and heat treatments, tempering, revises definitions of covered piping systems (CPS), failure, heat treatments, reinforcement of weld, repair, and undercut, includes the requirement that metallic bellows expansion joints shall be in accordance with Mandatory Appendix P. which is compatible with standards by the Expansion Joint Manufacturers Association, Inc. (EJMA), removes Non Mandatory Appendix VI, and replaces certification requirements of many sections in the BPVC with ASME CA-1 Conformity Assessment Requirements which specifies the requirements for accreditation and certification of organizations supplying products and or services that are intended to conform the requirements of ASME standards.

The 2012 National Board of Boiler and Pressure Vessel Inspectors, A Guide for Blowoff Vessels, NB-27, Revision 1 (1/13) provides design information and guidance for boiler blowoff systems. If the design of boiler blowoff equipment is not covered in this publication, guidance should be obtained from both a competent engineering firm and the inspection authority of the jurisdiction in which the equipment is to be installed. The treatment of boiler water is an integral part of boiler operation, used to control scaling, corrosion, and deposits. Boiler water treatment often leads to the formation of solid particles that are initially suspended in the boiler water. Solids concentrated in boiler water tend to promote foaming and scaling with a resultant loss of heat transfer which may result

in overheating of the boiler tubes. Solids also may settle to the bottom of the boiler to form sludge. “Blowing off” part of the boiler water is a means of removing solids from the water while controlling boiler water levels.

The updated guide requires a 4” level drop for blowoff time and specifies the blowdown tank design and the linear formula used based on the diameter to ensure expanding steam won’t build up.

In addition to the incorporation of the codes and standards listed above, the proposed amendments define electric boilers, direct fired pressure vessel, pressure vessel, PVHO, and unfired steam boiler, revise the definitions for the ASME Code, boiler, forced circulation hot water heater, national board registration number, and state identification number, bring the Boiler Advisory Board rule into compliance with the current version of A.R.S. §23-374 by repealing the rule, clarify the language in the rules to better define which rules apply to which owners, set forth a timeline for compliance with A.R.S. §23-485(D), update the requirements for an inspection report, clarify the frequency of inspection for a power boiler, clarify the frequency of internal inspections for boilers, adjust the requirements for preparation of inspection of a boiler, amend the procedure for obtaining a special inspector certificate which partially conflicts with A.R.S. §23-485, and update requirements for flow sensing devices.

**7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The Commission did not review or rely on any study relevant to the proposed amended rules.

**8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable.

**9. A summary of the economic, small business and consumer impact:**

The Industrial Commission anticipates that the proposed rulemaking will have no adverse economic, small business, or consumer impact. The proposed rulemaking is intended to reduce

regulatory burden by eliminating incorrect or confusing language in the current rules to allow for the affected stakeholders to have a clearer understanding of what is required. Additionally, by adopting the most current standards and codes the amendments would facilitate stakeholders in using more modern technology which may provide a cost benefit.

**10. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:**

R20-5-404(A)(8) was amended to include the following phrase: “This incorporation does not include any later amendments or editions of the incorporated matter”, to comply with A.R.S. § 41-1028(B).

**11. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:**

No public comment was received regarding the proposed rulemaking.

**12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

**a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

The proposed amended rules do not require issuance of a regulatory permit or license.

**b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

There is not a federal law applicable to the subject of the proposed rulemaking.

**c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:**

No analysis was submitted.

**13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:**

The Industrial Commission of Arizona is proposing to incorporate by reference the following national consensus standards:

- (1) 2019 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VI, VII, VIII  
Division 1, 2, 3, IX, X and
- (2) 2020 ASME Code for Pressure Piping, B31.1
- (3) 2019 ASME PVHO-1 Safety Standard for Pressure Vessels for Human  
Occupancy
- (4) American National Standard for Gas Water Heaters, ANSI Z21.10.3 2017
- (5) American National Standard for Controls and Safety Devices for Automatically  
Fired Boilers, ANSI/ASME CSD-1-2019
- (6) ANSI Z223.1 NFPA 54, National Fuel Gas Code 2018
- (7) ANSI NFPA 85, Boiler and Combustion Systems Hazards Code, 2019 edition
- (8) National Board Inspection Code, ANSI/NB-23-2019
- (9) 2018 ASME Code for Pressure Piping B31.1
- (10) National Board of Boiler and Pressure Vessel Inspectors, A Guide for Blowoff  
Vessels, NB-27, Revision 1 (1/13) 2012 Edition

Copies of the incorporated materials are available for inspection or reproduction at the Arizona Division of Occupational Safety and Health, 800 West Washington Street, Room 203, Phoenix, AZ 85007, or may be obtained from National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 <http://www.nationalboard.org>, ASME International, Three Park Avenue, New York, NY 10016-5990 <http://www.asme.org>, or American National Standards Institute, at Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 <http://www.ansi.org>.

**14. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:**

Not applicable.

**15. The full text of the rules follows:**

**TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE  
CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA**

## ARTICLE 4. ARIZONA BOILERS AND LINED HOT WATER HEATERS

### Section

### R20-5-401. **Applicability**

This Article applies to all ~~boilers~~ Boilers, ~~lined hot water heaters~~ Lined Hot Water Heaters, and ~~pressure vessels~~ Pressure Vessels operated in Arizona, except the following:

1. ~~Boilers, lined hot water heaters~~ Lined Hot Water Heaters, and ~~pressure vessels~~ Pressure Vessels regulated by the United States Government;

2. Boilers, ~~lined hot water heaters~~ Lined Hot Water Heaters, and ~~pressure vessels~~ Pressure Vessels operated in private residences or ~~apartment complexes~~ Apartment Complexes of not more than six units; and
3. Boilers, ~~lined hot water heaters~~ Lined Hot Water Heaters, and ~~pressure vessels~~ Pressure Vessels operated on Indian reservations.
4. A ~~lined hot water heater~~ Lined Hot Water Heater that does not exceed any of the following:
  - a. Heat input of 200,000 ~~British thermal units per hour~~ BTU/hr;
  - b. Water temperature of 210° F; ~~and or~~
  - c. Nominal water containing capacity of 120 gallons.
5. An electric Boiler that does not exceed either of the following:
  - a. Tank volume of one-and-a-half cubic feet; or
  - b. MAWP of one hundred pounds per square inch or less, with a pressure relief system to prevent excess pressure.

**R20-5-402. Definitions**

~~In this Article, unless the text otherwise requires~~ In addition to the definitions provided in A.R.S. § 23-471, the following definitions apply to this Article:

1. “Act” means A.R.S. Title 23, Chapter 2, Article 11.
2. “Alteration” ~~or “alteration”~~ means any change in the item described on the original manufacturer’s data report which affects the pressure-containing capability of the ~~boiler~~ Boiler or ~~pressure vessel~~ Pressure Vessel, including but not limited to:
  - a. Non-physical changes such as an increase in the MAWP either internal or external, or
  - b. A reduction in minimum design temperature of a ~~boiler~~ Boiler or ~~pressure vessel~~ Pressure Vessel requiring additional mechanical tests.
3. “ANSI” means American National Standards Institute, Inc., ~~located at 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>.~~
4. “Apartment ~~house~~ Complex” means a building with multiple family dwelling units, ~~not used for commercial purposes, including condominiums and townhouses,~~ where ~~boilers~~ Boilers are located in a common area outside of the individual ~~dwelling units, such as a~~ Boiler room.
5. “Applicant” means an individual requesting permission to act as a ~~special inspector~~ Special Inspector under A.R.S. § 23-485.
6. “ASME ~~Code~~” means the American Society of Mechanical Engineers ~~Boiler and Pressure Vessel Code, Sections I, II, IV, V, VIII and IX, published by ASME International.~~
7. “ASME International” means a ~~not for profit professional organization that promotes the art, science and practice of mechanical and multidisciplinary engineering and allied sciences throughout the world~~
8. “Authorized Inspector” means an ~~authorized representative~~ Authorized Representative under A.R.S. § 23-471(1) or a ~~special inspector~~ Special Inspector under A.R.S. § 23-485.
9. “Authorized representative” means the boiler chief or boiler inspector employed ~~by the Division.~~

10. “Blowdown ~~tank~~ Tank” or “Blowdown ~~separator~~ Separator” means an ASME-stamped vessel designed to receive discharged steam or hot water from a ~~boiler~~ Boiler blowoff or blowdown piping system.
11. “Boiler” means a closed vessel in which fluid is heated for use external to itself, by the direct application of heat from the combustion of fuel, solid, liquid, or gaseous, or by the use of electricity.  
“BTU” means British thermal units.
12. “Certificate of Competency” means a person who has passed the National Board Exam.
13. “Certificate Inspection” means an internal inspection, when construction allows; otherwise, it means as complete an inspection as possible.
14. “Condemned” means a ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater that has been inspected and found to be unsafe by ~~an~~ the ~~Director or authorized inspector~~ Authorized Inspector and has been stamped or tagged with the code XXX AZ8 XXX.
15. “CSD-1” means Controls and Safety Devices for Automatically Fired Boilers, published by ASME ~~International~~, incorporated by reference in R20-5-404(A)(4).
16. “~~Direct fired jacketed steam kettle~~ Fired Jacketed Steam Kettle” means a ~~pressure vessel with inner and outer walls that is subject to steam pressure and stress, is used~~ to boil or heat liquids or to cook food, and falls under the scope of Section VIII, Division 1, Appendix 19 (Electrically Heated or Gas Fired Jacketed Steam Kettles) of the ASME Boiler and Pressure Vessel Code incorporated by reference in R20-5-404(A). ~~jacketed steam kettle having its own source of energy, such as gas or electricity for generating steam within the jacket’s walls.~~
17. “~~External inspection~~ Inspection” means an examination of a ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater performed by an ~~authorized inspector~~ Authorized Inspector when the ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater is in operation.
18. “~~Forced circulation~~ Circulation ~~hot water heater~~ Lined Hot Water Heater” means a Lined hot water heater Hot Water Heater used for potable water, a Lined hot water heater Hot Water Heater requiring movement of water to prevent overheating and failure of the tubes or coils, and has no definitive waterline.
19. “Fully ~~attended power boiler~~ Attended Power Boiler” means a ~~power boiler~~ Power Boiler that is operated by an individual who meets the requirements of R20-5-408(~~C~~-D), and whose primary function is the care, maintenance, and operation of the ~~boiler~~ Boiler and the equipment associated with the ~~boiler~~ Boiler system.
20. “High temperature water boiler” means a boiler in which water or other fluid is heated and operates at a pressure in excess of 160 psig (1.1 MPa) and/or temperature in excess of 250° F.
21. “Historical ~~boilers~~ Boilers” means steam ~~boilers~~ Boilers of riveted construction, preserved, restored, or maintained for hobby or demonstration use.  
“HS” means heating surface.
22. “Inspection certificate Certificate” means a document issued by the Division for operation of a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or

- direct fired-jacketed steam kettles Direct Fired Jacketed Steam Kettle when a certificate inspection Certificate Inspection has been successfully completed.
- 23: “Internal ~~inspection~~ Inspection” means a complete examination of the internal and external surfaces of a ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater by an ~~authorized inspector~~ Authorized Inspector after the ~~boiler~~ Boiler or ~~water heater~~ Lined Hot Water Heater is shut down.
- Heater Lined Hot Water Heater is shut down.
- 24: “Kw” means kilowatt.
- “Lined hot water heater” means the same as lined hot water storage heater defined in A.R.S. § 23-471(10) as a vessel which is closed except for openings through which water can flow, that includes the apparatus by which heat is generated and on which all controls and safety devices necessary to prevent pressures greater than 160 psig (1100 kPa gage) and water temperature greater than 210° F are provided, in which potable water is heated by the combustion of fuels, electricity, or any other heat source and removed for external use.
- 25: “MAWP” means maximum allowable working pressure.
- 26: “National Board Commissioned Inspector” means an individual who holds a valid and current National Board Commission issued by the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183.
- 27: “National Board Registration Number” means a unique number issued to a ~~boiler~~ Boiler, ~~Lined hot water heater~~ Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel by the manufacturer and recorded with the National Board of Boiler and Pressure Vessel Inspectors.
- 28: “NFPA” means National Fire Protection Association.
- 29: “Non-Standard Boiler” means any ~~boiler~~ Boiler, ~~Lined hot water heater~~ Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel that is not constructed or maintained to the standards incorporated by reference of this Article.
- “Out of Service” means to either: (1) physically sever or disconnect all sources of energy (water, gas, fuel, electricity, etc.); cap all fuel lines; and disconnect or remove all electrical lines from the ~~Boiler, Lined Hot Water Heater, or Pressure Vessel~~; or (2) to lock out and tag out the ~~Boiler, Hot Water Heater, or Pressure Vessel~~ per 29 C.F.R. §1910.147, OSHA, General Industry Regulations.
- 30: “Owner” or “Operator” means any individual or organization, including this state and all political subdivisions of this state, who have title, control or duty to control, vessels, the operation of one or more boilers, lined hot water heaters or pressure vessels.
- 31: “Portable ~~boiler~~ Boiler” means a ~~boiler~~ Boiler permanently affixed to a trailer with wheels, that is totally self-contained while operating, and not attached to any other object either by pipe, hose, or wire.
- “PVHO” means Pressure Vessels for Human Occupancy.
- 32: “Relief ~~valve~~ Valve” means an ASME-stamped automatic pressure relieving device designed for liquid service which is actuated by the pressure upstream of the valve and opens further with an increase in pressure above the stamped pressure.
- 33: “Repairs” means work necessary to restore a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel to operating condition that complies with this Article.

34. ~~“Safety relief valve Relief Valve”~~ means an ASME-stamped automatically pressure-actuated relieving device designed for use either as a ~~safety valve~~ Safety Valve or as a ~~relief valve~~ Relief Valve.
35. ~~“Safety valve Valve”~~ means an ASME-stamped automatic pressure relieving device designed for steam or vapor service which is actuated by the pressure upstream of the valve and characterized by full opening pop-action.
36. ~~“Secondhand”~~ means a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel that has changed both location and ownership since original installation.  
~~“Serves” means either mailing to the last known address of the receiving party, or transmitting by other means, including electronic transmission, with the written consent of the receiving party.~~
37. ~~“Shelter”~~ means a permanent structure that provides protection from the weather.
38. ~~“Special Inspector”~~ means ~~any authorized an~~ inspector who is issued an Arizona Commission ~~but is not employed by the State of Arizona~~ Special Inspector Certificate under R20-5-420.
39. ~~“State Identification Number”~~ means a unique number assigned by the Division to a ~~boiler~~ Boiler, ~~hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel installed in Arizona.
40. ~~“User”~~ means a person or entity that does not have legal title to a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel, but has control and responsibility for the operation of a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel.

**R20-5-403. Boiler Advisory Board Repeal**

~~A. Members of the boiler advisory board appointed by the Commission pursuant to A.R.S. § 23-474(2) §23-486 shall serve for a period of three years. At the end of each three-year term, the Commission may extend a member’s term an additional three years or replace any member with an individual representing similar interest within the industry. The board shall be composed of persons in the boiler industry and shall be balanced in representation with respect to industry, owner/operators, labor and the public.~~

~~B. The board shall hold an annual meeting and such other meetings as may be appropriate and shall conduct business at times and places arranged by the Commission.~~

**R20-5-404. Standards for Boilers, Lined Hot Water Heaters and Pressure Vessels**

A. The following apply to this Article:

1. An ~~owner~~ Owner, Operator, or user User, of a ~~boiler~~ Boiler, Lined Hot Water Heater or Pressure Vessel installed, repaired, replaced, or reinstalled in Arizona, six months after the effective date of this Article shall comply with the ~~2007-2019~~ 2007-2019 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, ~~VI, VII, VIII~~ VI, VII, VIII Division 1, 2, 3, IX, ~~X and B31.1 Power Piping, and addenda as of July~~ X and B31.1 Power Piping, and addenda as of July ~~1, 2007, ASME 2020~~ 1, 2007, ASME 2020 Code for Pressure Piping B31.1, and 2019 ASME PVHO-1 Safety Standard for Pressure Vessels for Human Occupancy incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the

ASME ~~International~~ at Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.

2. An ~~owner~~ Owner, Operator, or user User, of a ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel installed, repaired, replaced, or reinstalled in Arizona, before the effective date of this Article shall comply with subsection (A)(1), or the ASME Boiler and Pressure Vessel Code in effect at the time of the last installation, repair, replacement, or reinstallation of the ~~boiler~~ Boiler, ~~lined hot water heater~~ Lined Hot Water Heater, or ~~pressure vessel~~ Pressure Vessel in Arizona.
3. An ~~owner~~ Owner, Operator, or user User of a gas-fired ~~lined hot water heater~~ Lined Hot Water Heater installed, operated, repaired, replaced, or reinstalled in Arizona shall comply with the American National Standard for Gas Water Heaters, ANSI Z21.10.3 ~~2004~~ 2017, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ANSI, Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>.
4. An ~~owner~~ Owner, Operator, or user User, of a ~~boiler~~ Boiler installed, repaired, replaced, or reinstalled in Arizona after the effective date of this Article shall comply with the American National Standard for Controls and Safety Devices for Automatically Fired Boilers, ANSI/ASME CSD-1-~~2006~~ 2018, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated matter. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the ASME ~~International~~, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.
5. An ~~owner~~ Owner, Operator, or user User, of a ~~boiler~~ Boiler installed, repaired, replaced, or reinstalled in Arizona before the effective date of this Article shall comply with the American National Standard for Controls and Safety Devices for Automatically Fired Boilers in effect at the time of the last installation, repair, replacement or reinstallation of a ~~boiler~~ Boiler in Arizona. As an alternative, an ~~owner~~ Owner, Operator, or user User, of a ~~boiler~~ Boiler described in this subsection may comply with subsection (A)(4).
6. A permanent source of outside air shall be provided for each ~~boiler~~ Boiler and ~~lined hot water heater~~ Lined Hot Water Heater room to assure complete combustion of the fuel as required by ANSI Z223.1-~~2018~~ 2006, NFPA 54, National Fuel Gas Code incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated matter. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ANSI ~~the American National Standards Institute~~, at Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>
7. All new Power Boilers installed after the effective date of this subsection, having power piping, welded or mechanically assembled, (pipe, valves, and fittings) falling within the scope of ASME Code, Section I, shall be designed, constructed and listed on

the appropriate ASME Code, Section I, manufacturer's data report, P- 2A, P-4A, P-4B, P-6 as applicable, incorporated by reference in R20-5-404(A)(1).

8. An Owner, Operator, or User, of a Boiler installed, repaired, replaced, or reinstalled in Arizona having a capacity equal to or greater than 12,500,000 BTU/hr input after the effective date of this subsection shall comply with ANSI NFPA 85, Boiler and Combustion Systems Hazards Code, 2019 edition, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated matter. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ANSI, at Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>

B. The following registration requirements apply to this Article;

1. All ~~boilers~~ Boilers, and ~~lined hot water heaters~~ Lined Hot Water Heaters, and Pressure Vessels, including reinstalled and ~~secondhand~~ Secondhand boilers Boilers, shall be registered with the National Board of Boiler and Pressure Vessel Inspectors except for:

- a. ~~Non-s~~Standard boilers Boilers installed up to six months after the effective date of this Section ~~section~~,
- b. Cast iron ~~boilers~~ Boilers, and
- c. Cast aluminum ~~boilers~~ Boilers.

2. All fired and unfired ~~pressure vessels~~ Pressure Vessels installed or reinstalled on or after July 1, 2009, shall be registered with the National Board of Boiler and Pressure Vessel Inspectors.

C. The following installation, maintenance, and repair requirements apply to this Article.

1. An ~~owner~~ Owner, Operator, or user User shall ~~keep~~ maintain a signed copy of the Manufacturer's Data Report, and Manufacturer's/Installing Contractors Report for ASME CSD-1, if applicable for a ~~boiler~~ Boiler, or ~~lined hot water heater~~ Lined Hot Water Heater, or Pressure Vessel at the location of the ~~boiler~~ Boiler; or ~~lined hot water heater~~ Lined Hot Water Heater, or Pressure Vessel and make the reports available for review upon request from an ~~authorized inspector~~ Authorized Inspector.

2. A ~~boiler~~ Boiler shall have masonry or structural supports of sufficient strength and rigidity to safely support the ~~boiler~~ Boiler and its contents without any vibration in the ~~boiler~~ Boiler or its connecting piping.

3. There shall be at least 36 in. (915 mm) of clearance on each side of the ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater. Alternative clearances according to the manufacturer's recommendations are subject to approval by ~~the Division~~ an Authorized Inspector prior to installation of a ~~boiler~~ Boiler, or ~~lined hot water heater~~ Lined Hot Water Heater or Pressure Vessel.

4. A ~~boiler~~ Boiler with a manhole shall have at least five feet clearance between the ~~boiler~~ Boiler manhole and any wall, ceiling, or piping.

5. A newly constructed ~~boiler~~ Boiler room in excess of 500 square feet of floor area and containing one or more ~~boilers~~ Boilers with a fuel capacity of 1,000,000 BTU-~~per hour~~ /hr or a heating capacity greater than 285 Kw (electric), shall have at least two exits on each level of the ~~boiler~~ Boiler or ~~boilers~~ Boilers. The ~~owner or user~~ Owner, Operator, or User shall ensure each exit is remotely located from other exits.

6. An ~~owner~~ Owner, Operator, or user User shall keep a Boiler, boiler or Lined Hot Water Heater, or Pressure Vessel ~~lined hot water heater~~ room clean and with no obstructions to the ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel.
7. An ~~owner~~ Owner, Operator, or user User shall not store flammable or explosive materials in a Boiler boiler or Lined Hot Water Heater ~~lined hot water heater~~ room.
8. An ~~owner~~ Owner, Operator, or user User shall not store combustibles any less than three feet from any part of a ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel.
9. If a ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel is moved outside Arizona for temporary use or ~~repairs~~ Repairs, the ~~owner~~ Owner, Operator, or user User shall not reinstall the ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel in Arizona until ~~the owner or user~~ notifies and receives receiving verbal or written approval from the Division under R20-5-419 ~~to reinstall the boiler or lined hot water heater~~. If the Division grants approval ~~to reinstall the boiler or lined hot water heater~~, the ~~owner~~ Owner, Operator, or user User shall not operate the reinstalled ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel until ~~the owner or user~~ receives receiving an ~~inspection certificate~~ Inspection Certificate from the Division under this Article.
10. Before a new ~~power boiler~~ Power Boiler or a ~~used or s~~ Secondhand boiler Boiler or ~~pressure vessel~~ Pressure Vessel is installed, an inspection in accordance with R20-5-408 shall be made by an ~~authorized inspector of this state~~ Authorized Inspector or by a National Board Commissioned Inspector. This inspection is to assess the integrity of the vessel and evaluate the original design specification. Prior to installation, an application shall be filed by the ~~owner~~ Owner, Operator, or user User of the ~~boiler~~ Boiler or pressure vessel Pressure Vessel with the Division for approval. This application shall contain the following information:
  - a. Name of the ~~owner or user~~ Owner, Operator, or User;
  - b. Mailing address of ~~owner or user~~ Owner, Operator, or User;
  - c. Business telephone number of ~~owner or user~~ Owner, Operator, or User;
  - d. Installation name and address;
  - e. Installation date;
  - f. Start up date;
  - g. Name and address of ~~boiler/pressure vessel~~ Boiler or Pressure Vessel insurance company;
  - h. Arizona serial number of the ~~boiler/pressure vessel~~ Boiler or Pressure Vessel being replaced, if applicable;
  - i. Description of the new, ~~used or s~~ Secondhand power boiler/ pressure vessel Power Boiler or Pressure Vessel as to include:
    - i. Manufacture's name,
    - ii. Date manufactured,
    - iii. ~~Maximum allowable pressure~~ MAWP or temperature of ~~boiler/pressure vessel~~ Boiler or Pressure Vessel, and
    - iv. National Board registration number;

- j. Name, address, business phone number, cell phone number, fax number and state contractor's license number of company or individual that will be installing the ~~object~~ Boiler or Pressure Vessel;
  - k. Name, title, and phone number of the contact person on the site of installation; and
  - l. Signature, title, and date of the person submitting the application.
11. Before the ~~owner~~ Owner, Operator, or user User installing a ~~used~~ Secondhand boiler Boiler or pressure vessel Pressure Vessel, the ~~boiler or pressure vessel~~ Boiler or Pressure Vessel shall pass a hydrostatic test that is witnessed by an ~~authorized inspector, authorized representative~~ Authorized Inspector or by any National Board Commissioned inspector in accordance with R20-5-411.
12. An ~~owner~~ Owner, Operator, or user User of a ~~portable boiler~~ Portable Boiler shall notify an ~~authorized inspector~~ Authorized Inspector before installing the ~~portable boiler~~ Portable Boiler and shall not operate the ~~portable boiler~~ Portable Boiler until the ~~owner~~ Owner, Operator, or user User receives an ~~inspection certificate~~ Inspection Certificate from the Division.

**R20-5-406. Repairs and Alterations**

- A. If ~~repairs~~ Repairs or Alterations may affect the working pressure or safety of a ~~boiler~~ Boiler, Lined Hot Water Heater, or Pressure Vessel, an ~~owner, user, or operator~~ Owner, Operator, or User shall consult with an ~~authorized inspector~~ Authorized Inspector before having the ~~repairs~~ Repairs or Alterations made. The ~~authorized inspector~~ Authorized Inspector shall provide the ~~owner, user, or operator~~ Owner, Operator, or User information regarding the best method to repair or alter the ~~boiler~~ Boiler, Lined Hot Water Heater, or Pressure Vessel. The ~~owner, user, or operator~~ Owner, Operator, or User shall ensure that an ~~authorized inspector~~ Authorized Inspector inspects and approves the ~~repairs~~ Repairs and Alterations after the ~~repairs~~ Repairs or Alterations are made.
- B. Repairs and Alterations to ~~boilers~~ Boilers, Lined Hot Water Heaters, or Pressure Vessels shall conform to the applicable provisions of the National Board Inspection Code, ANSI/NB-23-~~2007~~ 2019 and ~~2007~~ addenda, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, at 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- C. An ~~owner or user~~ Owner, Operator, or User shall not permit an individual to remove or repair a safety appliance of a ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel in operation. An ~~owner or user~~ Owner, Operator, or User shall not permit a person to remove or repair a safety appliance of a ~~boiler~~ Boiler, or lined hot water heater Lined Hot Water Heater, or Pressure Vessel not in operation except as provided under the ASME Code. If an ~~owner or user~~ Owner, Operator, or User permits a person to remove a safety appliance from a ~~boiler or lined hot water heater~~ Boiler, Lined Hot Water Heater, or Pressure Vessel as provided under the ASME Code, then the ~~owner or user~~ Owner, Operator, or User shall ensure that the safety appliance is reinstalled in proper working order before the ~~boiler or lined hot water heater~~ Boiler, Hot Water Heater, or Pressure Vessel is placed back into operation.

- D. No person shall alter in any manner a ~~safety valve~~ Safety Valve, ~~relief valve~~ Relief Valve, or ~~safety relief valve~~ Safety Relief Valve, except by an organization qualified in accordance with The National Board Inspection Code, ANSI/NB-23 ~~2007~~ 2019 Edition, ~~and 2007 addenda~~ incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors at 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- E. Repairs of fittings or appliances shall comply with the requirements of the National Board Inspection Code, ANSI/NB-23-~~2007~~ 2019 Edition, ~~and 2007 addenda~~ incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, at 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- F. ~~Beginning six months after the effective date of this Section~~ On or after the effective date of this subsection, replacement of fittings or appliances shall comply with the requirements of the ~~2019~~ 2007 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VI, VII, VIII, Division 1, 2, 3, ~~and IX, X~~ and 2018 ASME Code for Pressure Piping B31.1, Power Piping, and addenda incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007. A copy of the incorporated material may also be obtained from ASME ~~International~~, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org>.

**R20-5-407. Inspection of Boilers, Lined Hot Water Storage Heaters, Direct Fired Jacketed Steam Kettles and Issuance of Inspection Certificates**

- A. An ~~authorized inspector~~ Authorized Inspector shall comply with the guidelines set forth in The National Board Inspection Code, ANSI/NB-23 ~~2007~~ 2019 Edition, ~~and 2007 addenda~~, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- B. If an ~~owner, user, or operator~~ Owner, Operator, or User fails to comply with the requirements for an inspection or pressure test under this Article, the Division shall withhold the ~~inspection certificate~~ Inspection Certificate until the ~~owner, user, or operator~~ Owner, Operator, or User complies with the requirements.
- C. An ~~authorized inspector~~ Authorized Inspector shall not engage in the sale of any object or device relating to, ~~boilers, lined hot water heaters, direct fired jacketed steam kettles or equipment associated with, boilers, or lined hot water heaters or direct fired jacketed steam kettles~~ Boilers, Lined Hot Water Heaters, or Direct Fired Jacketed Steam Kettles.

- D. Under A.R.S. § 23-485(D), the Special Inspector shall file ~~the an~~ inspection reports within 30 days of an inspection by entering data into the Division's Web-based inspection entry form, by submitting a paper inspection report issued by the Division, or by electronic transfer of data ~~between the insurance company's database and the Division's database~~. Whatever form of data transfer a Special Inspector chooses, there shall be no cost to the Division. The inspection report shall contain the following:
1. Whether it is a Certificate or non-Certificate ~~inspection~~ Inspection;
  2. Whether it is an ~~internal or external inspection~~ Internal Inspection, External Inspection, or both;
  3. Name of location, address and phone number of the object;
  4. Name, address and phone number of owner or responsible party;
  5. Contact person's name and phone number at the inspection location;
  6. State Identification Number;
  7. Inspection Certificate due date;
  8. Inspection Certificate duration;
  9. Install/reinstall date, if known;
  - 9: 10. Whether the object is active, inactive, Out-of-Service, standby, or scrapped;
  - 10: 11. MAWP permitted or allowed;
  - 11: 12. National Board registration number;
  - 12: 13. Name of the manufacturer and the year the object was built;
  - 13: 14. Special location in plant, if applicable;
  - 0- 15. Boiler type;
  - 0- 16. Purpose of the ~~boiler~~ Boiler;
  - 0- 17. Specify type of fuel used;
  - 0- 18. Whether the firing method is automatic, manual, or unknown;
  - 0- 19. Whether the fuel train is in compliance with CSD-1, NFPA 85, Z21.10.3 or other;
  - 0- 20. Whether the ~~boiler~~ Boiler is fully attended as per R20-5-408(C);
  - 0- 21. ~~Heating Surface/BTU Input/ Kilowatt (Kw) Size/~~input rate, as applicable;
  22. Size classification (HS/BTU/Kw);
  - 21: 23. Whether the heating surface type is stamped, computed, or unknown;
  - 22: 24. Minimum ~~safety valve~~ Safety Valve relief capacity required;
  - 23: 25. Whether the minimum ~~safety valve~~ Safety Valve relief capacity type is BTU/Hr, LBSs/Hr or unknown;
  - 24: 26. Number of temperature/pressure controls, as applicable;
  - 25: 27. Owner number assigned by the ~~owner~~ Owner to specifically identify object's location;
  - 26: 28. Inspection date;
  - 27: 29. Whether the ~~certificate~~ Inspection Certificate is posted;
  - 28: 30. Safety Valve ~~Total Capacity~~ total capacity;
  31. Safety Valve total capacity type (PPH/Hr or BTU/Hr);
  - 29: 32. Safety Valve #1 set pressure;
  - 30: 33. Safety Valve #2 set pressure;
  31. 34. Safety Valve #3 set pressure;
  35. Safety Valve code stamping (Example: V,HV,UV,UV3.TV,TD, OR NV);
  - 32: 36. Whether the object has been hydro tested;
  - 33: 37. Hydro Test (psi), if applicable;

- ~~34.~~ 38. Whether Pressure/Altitude Gage was tested;
- ~~35.~~ 39. Whether ~~of the~~ condition of the object is okay to issue an Inspection Certificate ~~ertificate~~;
- ~~36.~~ 40. Inspection comments, condition of ~~boiler~~ Boiler;
- ~~37.~~ 41. Violations noted;
- ~~38.~~ 42. Inspector name and ~~Arizona Commission~~ Special Inspector number; and
- ~~39.~~ 43. National Board Commission number.

- E. The Division shall issue to an ~~owner~~ Owner, Operator, or user User an ~~inspection certificate~~ Inspection Certificate within 30 calendar days of receipt of an inspection report that documents a ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle that complies with the Act and this Article. An ~~owner~~ Owner, Operator, or user User of a ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle shall post the ~~inspection certificate~~ Inspection Certificate in the establishment where the ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle is located.
- F. An ~~owner, user, or operator~~ Owner, Operator, or User shall ensure ~~than~~ that an ~~authorized inspector~~ Authorized Inspector tags or stamps a steam ~~boiler~~ Boiler with an identification number ~~assigned by the Division~~ immediately after installing, but before operating, a new steam ~~boiler~~ Boiler, or when an ~~authorized inspector~~ Authorized Inspector performs an initial ~~certificate inspection~~ Certificate Inspection of an existing steam ~~boiler~~ Boiler. The identification number shall be at least 5/16" in height and in the following format: AZ-# # # #.
- G. The Division shall mark with a metal dye stamp a ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater identified by the Division as not safe for further service, with the code "XXX AZ8 XXX" which shall designate that the ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater is ~~condemned~~ Condemned.
- H. For any conditions not covered by this Article, the applicable provisions of the ASME Code that was in effect in Arizona at the time of the installation of the ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater shall apply.

**R20-5-408. Frequency of Inspection**

- A. An ~~owner, user, or operator~~ Owner, Operator, or User, of a ~~an existing power boiler~~ Power Boiler; or ~~high temperature boiler~~ High Temperature Water Boiler shall ensure that an ~~authorized inspector~~ Authorized Inspector performs a ~~certificate inspection~~ Certificate Inspection; and/or an External Inspection ~~and~~ prior to operating the Power Boiler or High Temperature Water Boiler. A Certificate Inspection shall also be performed every 12 months thereafter and an external inspection External Inspection of the ~~power boiler~~ Power Boiler or High Temperature Water Boiler shall be performed every 12 months thereafter. An ~~authorized inspector~~ Authorized Inspector shall perform the ~~external inspection~~ External Inspection while the ~~power boiler~~ Power Boiler or High Temperature Water Boiler is in operation to ensure that safety devices ~~of the power boiler~~ are operating properly.
- B. An ~~authorized inspector~~ Authorized Inspector shall perform an ~~internal inspection~~ Internal Inspection and pressure test on a ~~boiler, lined hot water heater or pressure vessel~~ Boiler, Lined Hot Water Heater, or Pressure Vessel if the ~~inspector~~ Authorized Inspector determines from an ~~external inspection~~ External Inspection of the ~~boiler, lined hot water~~

- ~~heater or pressure vessel~~ Boiler, Lined Hot Water Heater, or Pressure Vessel that continued operation ~~of the boiler, lined hot water heater or pressure vessel~~ is a danger to the public or worker safety.
- C. The Division shall issue a 12-month ~~inspection certificate~~ Inspection Certificate to an ~~owner~~ Owner, Operator, or user ~~User~~ to operate a ~~fully attended power boiler~~ Fully Attended Power Boiler if:
1. An ~~owner~~ Owner, Operator, or user ~~User~~ ensures that an ~~authorized inspector~~ Authorized Inspector performs an ~~external safety inspection~~ External Inspection and audit of the operational methods and logs of the ~~fully attended power boiler~~ Fully Attended Power Boiler at least every 12 months and performs an ~~internal inspection~~ Internal Inspection of the ~~fully attended power boiler~~ Fully Attended Power Boiler at least every 36 months; and
  2. Continuous boiler water treatment is under the direct supervision of persons trained and experienced in water treatment for the purpose of controlling and limiting corrosion and deposits; and
  3. Records are available for review, that indicate:
    - a. The date, time, and reason the ~~boiler~~ Boiler is ~~out of service~~ Out of Service; and
    - b. Daily analysis of water samples that adequately show the conditions of the water and elements or characteristics that are capable of producing corrosion or other deterioration to the ~~boiler~~ Boiler or its parts; and
  4. Controls, safety devices, instrumentation, and other equipment necessary for safe operation are current, in service, calibrated, and meet the requirements of an appropriate safety code for the size ~~boilers~~ Boilers, such as NFPA 85, ASME CSD-1 Controls and Safety Devices for Automatically Fired Boilers, National Board Inspection Code ANSI/NB-23, and state requirements; and
  5. Inspection reports of an ~~authorized inspector~~ Authorized Inspector document that the ~~fully attended power boiler~~ Fully Attended Power Boiler complies with ~~A.R.S. § 23-471 et seq.~~ the Act and this Article.
- D. An ~~owner, user, or operator~~ Owner, Operator, or User of a ~~direct-fired jacketed steam kettle~~ Direct-Fired Jacketed Steam Kettle shall ensure that an ~~authorized inspector~~ Authorized Inspector performs a ~~certificate inspection~~ Certificate Inspection of the ~~direct-fired jacketed steam kettle~~ Direct-Fired Jacketed Steam Kettle at the time of installation, and every 24 months thereafter.
- E. An ~~owner, user, or operator~~ Owner, Operator, or User of a steam heating or process boiler ~~Boiler~~, not exceeding 15 p.s.i. ~~maximum allowable working pressure-MAWP~~, steam or vapor, shall ensure that an ~~authorized inspector~~ Authorized Inspector performs a ~~certificate inspection~~ Certificate Inspection and an External Inspection of the heating or process boiler every 24 months.
- F. An ~~owner~~ Owner, Operator, or user ~~User~~ of a hot water heating, ~~or hot water supply boiler~~ Boiler, or ~~lined hot water heater~~ Lined Hot Water Heater shall ensure that an ~~authorized inspector~~ Authorized Inspector performs a ~~certificate~~ Certificate Inspection and ~~external inspection~~ External Inspection of the hot water heating or hot water supply ~~boiler~~ Boiler or ~~lined hot water heater~~ Lined Hot Water Heater at the time the hot water heating, ~~or hot water supply boiler or lined hot water heater~~ is installed installation. An

inspection certificate issued by the Division following an inspection under this subsection shall not state an expiration date.

**R20-5-409. Notification and Preparation for Inspection**

- A. An ~~authorized inspector~~ Authorized Inspector shall perform a ~~certificate inspection~~ Certificate Inspection at a time mutually agreeable to the ~~inspector~~ Authorized Inspector and the ~~owner, user, or operator~~ Owner, Operator, or User.
- B. Before an ~~authorized inspector~~ Authorized Inspector performs an ~~internal inspection~~ Internal Inspection of a ~~boiler~~ Boiler, an ~~owner, user, or operator~~ Owner, Operator, or User shall:
1. Cool the furnace and combustion chambers;
  2. Drain the water from the ~~boiler~~ Boiler;
  3. Remove the manhole and handhole plates, wash-out plugs, ~~and~~ inspection plugs in water column connections, and disassemble all low-water fuel cutoff float chambers or bowls;
  4. Remove insulation or brickwork if necessary to determine the condition of the ~~boiler~~ Boiler, headers, furnace, supports, and other parts;
  5. Remove the pressure gauge for testing;
  6. Prevent any leakage of steam or hot water into the boiler by disconnecting the involved pipe or valve;
  7. Close, tag, and padlock the non-return and steam stop valves before opening the manhole or handhole covers and entering any part of the steam generating unit that is connected to a common header with other ~~boilers~~ Boilers. Open the free blow drain or cock between the non-return and steam stop valves;
  8. Close, tag, and padlock the blowoff valves after draining the ~~boiler~~ Boiler; and
  9. Open all drains and vent lines.

**R20-5-410. Report of Accident**

An ~~owner~~ Owner, Operator, or user User shall notify the Division within 24 hours of an explosion, severe overheating, or personal injury involving a ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle. A person shall not remove or disturb the involved ~~boiler, lined hot water heater, direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle or parts of the ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle before an investigation by an ~~authorized inspector~~ Authorized Inspector, except for the purpose of preventing personal injury or limiting consequential damage.

**R20-5-411. Hydrostatic Tests**

The ~~owner~~ Owner, Operator, or user User of a Boiler shall perform a hydrostatic or pneumatic pressure test in accordance with the code incorporated by reference in R20-5-404(A) and R20-5-406(B).

**R20-5-412. Automatic Low-water Fuel Cutoff Devices or Combined Water Feeding and Fuel Cutoff Devices**

- A. An ~~owner, user, or operator~~ Owner, Operator, or User shall ensure that low-water fuel cutoff devices or combined water feeding and fuel cutoff devices do not interfere with an ~~operator's~~ Operator's or ~~inspector's~~ Authorized Inspector's ability to safely clean, repair, or inspect a ~~boiler or lined hot water heater~~ Boiler, Lined Hot Water Heater, or Pressure Vessel.
- B. A low-water fuel cutoff device shall have a pressure rating not less than the set pressure of the ~~safety valve~~ Safety Valve or ~~safety relief valve~~ Safety Relief Valve.
- C. In addition to the requirements of subsections (A) and (B), all low-water fuel cutoffs and flow sensing devices shall be constructed and installed in accordance with applicable ASME Code and standards for ~~boilers~~ Boilers and ~~steam-jacked kettles~~ Direct Fired Jacketed Steam Kettle in R20-5-404(A).

**R20-5-413. Safety and Safety Relief Valves**

- A. A valve shall not be placed between a ~~safety valve~~ Safety Valve, Relief Valve, or a ~~safety relief valve~~ Safety Relief Valve and ~~installed on a boiler or lined hot water heater~~ the Boiler, Lined Hot Water Heater, or Pressure Vessel, or between a ~~safety valve~~ Safety Valve, Relief Valve, or a ~~safety relief valve~~ Safety Relief Valve and the discharge pipe attached to the ~~boiler or lined hot water heater~~ Boiler, Lined Hot Water Heater, or Pressure Vessel.
- B. When a ~~power boiler~~ Power Boiler is supplied with feed-water directly from a water main without the use of a feeding apparatus, ~~safety valves~~ Safety Valves shall not be set at a pressure greater than 94% of the lowest pressure obtained in the water main feeding the ~~boiler~~ Boiler;
- C. ~~Safety valves, safety relief valves and relief valves~~ Valves, Safety Relief Valves, and Relief Valves shall conform to the requirements of the ~~2007~~ 2019 ASME Boiler and Pressure Vessel Code, Section I, IV or VIII, ~~and addenda as of January~~ July 1, 2008, incorporated by reference as applicable. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ and may be obtained from ~~the~~ ASME, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.
- D. The resetting, repairing, and restamping of Safety Valves, Relief Valves, and Safety Relief Valves shall be done by a qualified valve repair organization holding a valid "VR" Certificate of Authorization issued by the National Board of Boiler and Pressure Vessel Inspectors. ASME valve manufacturers holding a valid "V," "HV," and "UV" Certificate(s) of Authorization may also do this work provided they also have a valid "VR" Certificate of Authorization issued by the National Board of Boiler and Pressure Vessel Inspectors.
- E. With jurisdictional approval, Owner, Operators, and Users of Boilers, Lined Hot Water Heaters, and Pressure Vessels may authorize external adjustments to bring installed Safety Valves, Relief Valves, and Safety Relief Valves back to the stamped set pressure when performed by the Owner's, Operator's, or User's trained, qualified, regular, and full-time employees. Refer to Supplement 7.10 of the National Board Inspection Code for guidelines regarding training, documentation, and the implementation of a quality system for the Owner, Operator, or User employees. All such external adjustments shall be resealed with a metal tag showing the identification of the organization making the

adjustments and the date. If any valve repairs are required, they shall be done by a qualified "VR" certificate holder.

**R20-5-415. Boiler Blowdown, Blowoff Equipment and Drains**

- A. Except as provided in this Section, an ~~owner or user~~ Owner, Operator, or User of blowdown and blowoff equipment shall comply with the National Board of Boiler and Pressure Vessel Inspectors, A Guide for Blowoff Vessels, NB-27, Revision 1 (1/13), Rules and Recommendations for the Design and Construction of Boiler Blowoff Systems, 1991 2012 Edition, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- B. Blowdown from a ~~boiler~~ Boiler is a hazard to life and property.
- C. Blowdown from a ~~boiler~~ Boiler shall pass through blowdown equipment that reduces pressure and temperature to levels not exceeding 5 p.s.i.g. and 140° F.
- D. The thickness of a blowdown vessel shall be at least 3/16".
- E. All blowdown equipment shall be fitted with openings that allow cleaning and inspection of the equipment.
- F. Blowdown ~~s~~Separators may be used with ~~boilers~~ Boilers instead of ~~boiler~~ Boiler ~~blowdown tanks~~ Blowdown Tanks, provided that ~~blowdown separators~~ Blowdown Separators are operated with a temperature gauge and water cooler to prevent drain water temperature from exceeding 140° F.
- G. In addition to the requirements of subsections (A) through (F), the following requirements apply to blowdown piping, valves and drains for ~~power boilers~~ Power Boilers:  
Each ~~power boiler~~ Power Boiler and ~~high temperature water boiler~~ High Temperature Water Boiler shall be installed and maintained according to ASME Code, Section 1 and B31.1, incorporated by reference in R20-5-404, at the time of installation.
- H. In addition to the requirements of subsections (A) through (F), the following requirements apply to bottom blowdown or drain valves for heating ~~boilers~~ Boilers and Lined hot water heaters ~~Hot Water Heaters~~:
  - 1. A hot water heating ~~boiler~~ Boiler or Lined hot water heater ~~Hot Water Heater~~ shall have a bottom blowdown or drain pipe connection fitted with a valve or cock connected with the lowest available water space with the minimum size of blowdown piping and valves as required by ASME Code, Section IV, incorporated by reference, in R20-5-404(A).
  - 2. Discharge outlets of blowdown pipes, ~~safety valves~~ Safety Valves, Relief Valves, or Safety Relief Valves, and other piping shall be located and structurally supported to prevent injury to individuals.

**R20-5-416. Maximum Allowable Working Pressure**

- A. The ASME Code under which a ~~boiler~~ Boiler, Lined Hot Water Heater, or Pressure Vessel was constructed and stamped shall determine the ~~maximum allowable working pressure~~ MAWP for the ASME-stamped boiler.

- B. If components in the ~~boiler~~ Boiler, or hot water system such as valves, pumps, expansion tanks, storage tanks or piping have a lesser working pressure rating than the ~~boiler~~ Boiler or ~~Lined hot water heater~~ Hot Water Heater, the pressure setting for the ~~safety~~ Safety Valve or ~~safety relief valve~~ Relief Valve, or Safety Relief Valve on the ~~boiler~~ Boiler or ~~Lined hot water heater~~ Hot Water Heater shall be based upon the component with the lowest ~~maximum allowable working pressure~~ MAWP rating.

**R20-5-417. Maintenance and Operation of Boilers, Lined Hot Water Heaters and Direct Fired Jacketed Steam Kettles**

- A. An ~~owner~~ Owner, Operator, or user User of a ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~ Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle constructed under the ASME Code, Sections I, IV or VIII Division 1, incorporated by reference in R20-5-404(A) shall comply with the manufacturer's maintenance and operation instructions for the ~~boiler, lined hot water heater or direct fired jacketed steam kettle~~.
- B. In addition to the requirements of subsection (A), an ~~owner~~ Owner, Operator, or user User of a ~~boiler~~ Boiler constructed under the ASME Code, Sections I, or IV shall comply with the following preventive maintenance schedule if the boiler contains the component or system listed.
1. On a daily basis, the ~~owner or user~~ Owner, Operator, or User shall:
    - a. Test the low-water fuel cutoff and alarm, and
    - b. Check the burner flame for proper combustion.
  2. On a weekly basis, the ~~owner or user~~ Owner, Operator, or User shall:
    - a. Check for proper ignition, and
    - b. Check the flame failure detection system.
  3. On a monthly basis, the ~~owner or user~~ Owner, Operator, or User shall:
    - a. Test all fan and air pressure interlocks,
    - b. Check the main burner safety shutoff valve,
    - c. Check the low fire start switch,
    - d. Test fuel pressure and temperature interlocks of oil-fired units, and
    - e. Test the high and low fuel pressure switch of gas-fired units.
  4. Every six months, the ~~owner or user~~ Owner, Operator, or User shall:
    - a. Inspect burner components;
    - b. Check flame failure system components, such as vacuum tubes, amplifier and relays;
    - c. Check wiring of all interlocks and shutoff valves; and
    - ~~d. Recalibrate all indicating and recording gauges; and~~
    - d. Check steam and blowdown piping and valves.
  5. Annually, the ~~owner~~ Owner, Operator, or user User shall:
    - a. Replace vacuum tubes, scanners, or flame rods in the flame failure system according to the manufacturer's instructions;
    - b. Check all coils and diaphragms; and
    - c. Test operating parts of all safety shutoff and control valves.
    - d. Unless there is other information to assess their accuracy or reliability, all pressure gages shall be removed, tested, and their readings compared to the readings of a calibrated standard test gage or a dead weight tester.

- C. An ~~owner~~ Owner, Operator, or user User of a ~~power boiler~~ Power Boiler or ~~high temperature boiler~~ High Temperature Water Boiler shall designate an individual who meets the requirements of subsection (D) to operate the ~~boiler~~ Boiler. An ~~owner~~ Owner, Operator, or user User may operate the ~~boiler~~ Boiler if the ~~owner~~ Owner, Operator, or user User meets the requirements of subsection (D).
- D. An ~~operator~~ Operator or User of a ~~power boiler or high temperature water boiler~~ Power Boiler or High Temperature Water Boiler shall meet the following minimum requirements:
1. Knowledge of and an ability to explain the function and operation of all safety controls of the ~~boiler~~ Boiler,
  2. Ability to start the ~~boiler~~ Boiler in a safe manner,
  3. Knowledge of all safe methods of feeding water to the ~~boiler~~ Boiler,
  4. Knowledge of and the ability to blow down the ~~boiler~~ Boiler in a safe manner,
  5. Knowledge of safety procedures to follow if water exceeds or drops below permissible safety levels, and
  6. Knowledge of and the ability to safely shut down the ~~boiler~~ Boiler.

**R20-5-418. Non-standard Boilers**

An ~~owner or user~~ Owner, Operator, or User shall remove from service a ~~boiler, hot water heater or pressure vessel~~ Boiler, Lined Hot Water Heater, or Pressure Vessel that does not bear an ASME stamp unless ~~the boiler owner or user request~~ a variance is requested under R20-5-429.

**R20-5-419. Request to Reinstall Boiler or Lined Hot Water Heater**

- A. The Division shall grant or deny approval to reinstall a ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater within three business days after an ~~owner~~ Owner, Operator, or user User requests approval ~~to reinstall the boiler or lined hot water heater~~. The order of the Division granting or denying approval ~~to reinstall a boiler~~ shall be in writing.
- B. The Division shall grant approval ~~to reinstall a boiler or lined hot water heater~~ if the ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater complies with A.R.S. § 23-471 et seq. ~~the Act~~ and this Article. The Division shall deny approval ~~to reinstall a boiler or lined hot water heater~~ if the ~~boiler or lined hot water heater~~ Boiler or Lined Hot Water Heater does not comply with A.R.S. § 23-471 et seq. ~~the Act~~ and this Article.
- C. An order of the Division denying approval ~~to reinstall a boiler~~ shall be final unless an ~~owner~~ Owner, Operator, or user User requests a hearing under A.R.S. § 23-479 within 15 days after the Division ~~Serves~~ mails the order. The ~~owner~~ Owner, Operator, or user User requesting a hearing shall have the burden to prove that a ~~boiler~~ Boiler or Lined Hot Water Heater meets the requirements of A.R.S. § 23-471 et seq. ~~the Act~~ and this Article.

**R20-5-420. Special Inspector Certificate under A.R.S. § 23-485**

A. ~~Review Time frames.~~ The Division shall administratively review an Applicant's application for a Special Inspector Certificate under A.R.S. § 23-485 within seven days of receipt of the application to determine if the application is complete. If the application is incomplete, the Division shall notify the Applicant in writing of the missing documentation or information necessary to comply with this Article.

1. Administrative Completeness Review:

- a. ~~The Division shall determine whether an application to take a written examination or request for a special inspector certificate under A.R.S. § 23-485 is complete within three days of receipt of the application or request. The Division shall inform the applicant whether the application or request is complete or incomplete by written notice. If the application or request is incomplete, the Division shall include in its written notice to the applicant a complete list of the missing information.~~
  - b. ~~The Division shall deem an application or request withdrawn if an applicant fails to file a complete application or request within 10 days of being notified by the Division that the application or request is incomplete unless the applicant obtains an extension to provide the missing information. An applicant may obtain an extension to submit the missing information by filing a written request with the Division no later than 10 days after the Division mails notice that the application or request is incomplete. The written request for an extension shall state the reasons the applicant is unable to meet the 10-day deadline. If an extension will enable the applicant to assemble and submit the missing information, the Division shall grant an extension of not more than 10 days and provide written notice of the extension to the applicant.~~
2. ~~Substantive review:~~
- a. ~~Application to take written examination under A.R.S. § 23-485(A). Within three days after the Division deems an application complete under subsection (B), the Division shall determine whether the applicant is eligible to take the National Board Examination.~~
  - b. ~~Request for special inspector certificate under A.R.S. § 23-485. Within three days after the Division deems a request complete under subsection (C), the Division shall determine whether the applicant meets the criteria of A.R.S. § 23-485 and subsection (C).~~
3. ~~Overall review. The overall review period shall be six days, unless extended under A.R.S. § 41-1072 et seq.~~
- B.** Application to take Written Examination under A.R.S. § 23485(A). The Division shall deem an application withdrawn if the Applicant fails to file a complete application within ten days of being notified by the Division that the application is incomplete pursuant to subsection A, unless the Applicant obtains an extension to provide the missing information. An Applicant may obtain an extension to submit the missing information by filing a written request with the Division no later than ten days after the Division Serves notice that the application is incomplete, stating the reasons why the Applicant is unable to meet the ten-day deadline.
- 1. ~~An individual requesting to take the written examination under A.R.S. § 23-485(A) shall complete an application to take the National Board Examination and submit the application to the Division at least 45 days before the date of the examination.~~
  - 2. ~~The application to take the National Board Examination shall be filed with the Division. An application is considered filed when it is received at the office of the Division and stamped by the Division with the date of filing.~~

3. ~~An application to take the National Board Examination shall be on a legible form, paper or electronic, issued to the Division, with the following information: a. Full legal name, b. e. d. e. f. State or country of residency, Mailing address, Telephone number, E-mail address, and Employer's name and address.~~
- C. ~~Application for Special Inspector Certificate under A.R.S. § 23-485.~~ An application for a special inspector certificate Special Inspector Certificate under A.R.S. § 23-485 is deemed complete under subsection (A)(1) when the following is filed with the Division:
1. ~~The applicant provides written~~ Written documentation demonstrating that the applicant Applicant holds a current commission issued by the National Board of Boiler and Pressure Vessel Inspectors certificate of competency as an inspector of boilers or lined hot water heaters for a state that has a standard of examination equal to that of Arizona or the applicant is a National Board Commissioned Inspector, and
  2. ~~The applicant provides proof~~ Proof of employment as a full-time full-time inspector for a company conducting business in Arizona with a certificate of accreditation as outlined in A.R.S. § 23-485 and whose duties as an inspector include making inspections of boilers or lined hot water heaters Boilers or Lined Hot Water Heaters to be used or insured by the such company and not for resale.
- D. If an ~~applicant~~ Applicant meets the criteria of A.R.S. § 23-485 and subsection (C) of this Section, the Division shall issue a ~~certificate~~ Special Inspector Certificate to the ~~applicant~~ Applicant within 15 calendar days under subsection (C). If an ~~a~~ Applicant fails to meet the criteria of A.R.S. § 23-485 and subsection (C) of this Section, the Division shall issue a written notice denying eligibility to the ~~a~~ Applicant. The Commission shall deem the notice denying eligibility final if an ~~a~~ Applicant does not request a hearing within 15 calendar days after the Division Serves mails the notice.
- E. ~~Written Examination under A.R.S. § 23-485(A).~~
1. ~~The written examination described in A.R.S. § 23-485(A) shall be the National Board Examination of the National Board of Boiler and Pressure Vessel Inspectors.~~
  2. ~~The Division shall administer the National Board Examination the first Wednesday and Thursday of every March, June, September, and December to eligible applicants. Within two days after the Division administers the National Board Examination, the Division shall return the examinations of eligible applicants to the National Board of Boiler and Pressure Vessel Inspectors. Examinations shall be graded by the National Board of Boiler and Pressure Vessel Inspectors.~~
  3. ~~The Division shall provide written notice to an applicant of the applicant's grade for the National Board Examination within three days after the Division receives notice of the grade from the National Board of Boiler and Pressure Vessel Inspectors.~~
  4. ~~The Division shall issue a certificate of competency to an applicant who passes the National Board Examination.~~
- F. ~~Issuance of Special Inspector Certificate. The Division shall issue a special inspector certificate, A.R.S. § 23-485, to an applicant no later than 15 calendar days after the Division determines that an applicant meets the criteria of A.R.S. § 23-485 and subsection (C).~~

**G.E. Hearing on Denial of Eligibility for Special Inspector Certificate.** A Hearing on the denial of eligibility for a Special Inspector Certificate shall be governed by the following provisions:

- and
1. A request for hearing protesting a ~~notice denial~~ of eligibility shall be in writing signed by the ~~a~~Applicant or the ~~a~~Applicant's legal representative. ~~The applicant shall and filed the request for hearing~~ with the Division.
  2. The Commission shall hold a hearing under A.R.S. § 41-1065. The hearing shall be ~~stenographically~~ recorded.
  3. The ~~C~~Chair of the Commission or designee shall preside over hearings held under this Section. The ~~C~~Chair shall apply the provisions of A.R.S. § 41-1062 et seq. to hearings held under this Section and shall have the authority and power of a presiding officer as described in A.R.S § 41-1062.
  4. A decision of the Commission to deny or grant eligibility for a ~~special inspector certificate~~ Special Inspector Certificate shall be based upon the criteria set forth in A.R.S. § 23-485 and this Section and shall be made by a majority vote of the quorum of Commission members present when the decision is rendered at a public meeting. After a decision is rendered at a public meeting, the Commission shall issue a written decision upon hearing which shall include findings of fact and conclusions of law, separately stated. An order of the Commission denying a ~~special inspector certificate~~ Special Inspector Certificate is final unless an applicant files a request for review within 15 days after the Commission Serves mails its order.
  5. A request for review shall be based upon one or more of the following grounds which have materially affected the rights of an ~~a~~Applicant:
    - a. Irregularities in the hearing proceedings or any order or abuse of discretion whereby the ~~a~~Applicant seeking review was deprived of a fair hearing;
    - b. Misconduct by the Division;
    - c. Accident or surprise which could not have been prevented by ordinary prudence;
    - d. Newly discovered material evidence that could not have been discovered with reasonable diligence and produced at the hearing;
    - e. Excessive or insufficient sanctions or penalties imposed at hearing;
    - f. Error in the admission or rejection of evidence, or errors of law occurring at, or during the course of, the hearing;
    - g. Bias or prejudice of the Division; and
    - h. The order, decision, or findings of fact are not justified by the evidence or are contrary to law.
  6. The Commission shall issue a decision upon review no later than 30 days after receiving a request for review.
  7. The Commission's decision upon review is final unless an ~~a~~Applicant seeks judicial review as provided in A.R.S. § 23-483.

**R20-5-429. Variance**

- A. Any ~~owner~~ Owner, Operator, or user User may apply to the Director for a variance from the requirements of this Article, upon demonstrating the construction, installation, and

operation of the ~~boiler~~ Boiler, Lined Hot Water Heater, or pressure vessel ~~Pressure Vessel~~ will maintain the same level of safety as prescribed by this ~~Article~~ Chapter. The Director shall issue a variance if the Director determines that the proponent of the variance has demonstrated the construction, installation, and operation of the ~~boiler or pressure vessel~~ Boiler, Lined Hot Water Heater, or Pressure Vessel will maintain the same level of safety as prescribed by this ~~Article~~ Chapter. The variance issued shall prescribe the construction, installation, operation, maintenance, and repair conditions that the ~~owner~~ Owner, Operator, or user ~~User~~ shall maintain.

- B. A variance may be modified or revoked upon application by an ~~owner~~ Owner, Operator, or User ~~owner, user~~ or the Director, on the Director's own motion at any time after six months from issuance if the owner or user ~~Owner, Operator, or User~~ has not complied with the variance or if the variance does not protect the health and safety of employees or general public.
- C. The application for a variance shall be made on the form issued by the Division and contains the following information:
1. Owner, Operator, or user's ~~User's~~ User name and company name;
  2. Mailing address;
  3. Telephone number;
  4. Fax number;
  5. Contact person;
  6. Contact person's telephone number;
  7. Address or location of proposed variance;
  8. Type of facility to include;
    - a. Variance description,
    - b. Justification for variance,
    - c. Component or system involved,
    - d. Supporting documentation for variance,
    - e. Identify the statute, rule, code or standard to justify the variance; and
  9. Printed name and title of ~~owner~~ Owner, Operator, or user ~~User~~, signature ~~owner~~ Owner, Operator, or user ~~User~~, and date.
- D. If an ~~owner or user~~ Owner, Operator, or User does not agree with the variance issued or revoked by the Director, a request for a hearing under A.R.S. § 23-479 can be made with the Commission.

**R20-5-430. Forced Circulation Lined Hot Water Heaters**

- A. All water tube or coil-type Lined hot water heaters ~~Hot Water Heaters~~ that require forced circulation to prevent overheating and failure of the tubes or coils shall have a safety control, to prevent burner operation at a flow rate inadequate to protect the Lined hot water heater ~~Hot Water Heater~~ unit against overheating, at all allowable firing rates. The safety control shall shut down the burner and prevent restarting until an adequate flow is restored. The flow sensing device shall be labeled and listed by a nationally recognized testing agency as a standard for limit controls complying with UL 353. This safety control shall be independent of any other operating controls.
- B. All water tube or coil-type Lined hot water heaters ~~Hot Water Heaters~~ that require forced circulation to prevent overheating and failure of the tubes or coils, shall have a manually operated remote shutdown switch or circuit breaker and shall be located just outside the Lined hot water heater ~~Hot Water Heater~~'s room door and marked for easy identification.

The shutdown switch shall be installed in a manner to safeguard against tampering. If a ~~Lined hot water heater~~ Hot Water Heater's room door is on the building exterior, the switch shall be located just inside the door. If there is more than one door to the ~~Lined hot water heater~~ Hot Water Heater's room, there shall be a switch located at each door. The remote shutdown switch or circuit breaker shall disconnect all power to the burner controls.

**R20-5-431. Code Cases**

Code cases approved for use by ~~the ASME Code Committee~~ are allowed to be used in the design, fabrication and testing of ~~boilers and pressure vessels~~ Boilers, Lined Hot Water Heaters, and Pressure Vessels provided approval from the ~~boiler chief~~ Chief Boiler Inspector is obtained prior to use.

**R20-5-432. Historical Boilers**

Historical boilers shall require an initial Certificate ~~Inspection~~ inspection by an ~~Authorized Inspector~~ authorized inspector in accordance with ~~The National Board Inspection Code~~, followed by a Certificate ~~Inspection~~ inspection every three years thereafter if stored inside a shelter, or annually if stored outdoors. The initial Certificate ~~Inspection~~ inspection shall include ultrasonic thickness testing of all pressure boundaries. Thinning of the pressure retaining boundary shall be monitored and recorded on the inspection report, ~~in accordance with R20-5-407(D), to the owner and the Division's electronic copy.~~

## **ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT**

### **TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE**

#### **CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA**

#### **ARTICLE 4. ARIZONA BOILERS AND LINED HOT WATER HEATERS**

**1. Identification of the proposed rulemaking:**

The Commission is proposing to amend A.A.C. R20-5-401 (Applicability), A.A.C. R20-5-402 (Definitions), A.A.C. R20-5-404 Standards for Boilers, Lined Hot Water Heaters and Pressure Vessels), A.A.C. R20-5-406 (Repairs and Alterations), A.A.C. R20-5-407 (Inspection of Boilers, Lined Hot Water Heaters, Direct Fired Jacketed Steam Kettles and Issuance of Inspection Certificates), A.A.C. R20-5-408 (Frequency of Inspection), A.A.C. R20-5-409 (Notification and Preparation for Inspection), A.A.C. R20-5-410 (Report of Accident), A.A.C. R20-5-411 (Hydrostatic Tests), A.A.C. R20-5-412 (Automatic Low-water Fuel Cutoff Devices or Combined Water Feeding and Fuel Cutoff Devices), A.A.C. R20-5-413 (Safety and Safety Relief Valves), A.A.C. R20-5-415 (Boiler Blowdown, Blowoff Equipment and Drains), A.A.C. R20-5-416 (Maximum Allowable Working Pressure), A.A.C. R20-5-417 (Maintenance and Operations of Boilers, Hot Water Heaters and Direct Fired Jacketed Steam Kettles), A.A.C. R20-5-418 (Non-standard Boilers), A.A.C. R20-5-419 (Request to Reinstall Boiler or Lined Hot Water Heater, A.A.C. R20-5-420 (Special Inspector Certificates under A.R.S. § 23-485), A.A.C. R20-5-429 (Variance), A.A.C. R20-5-430 (Forced Circulation Hot Water Heaters), A.A.C. R20-5-431 (Code Cases) and A.A.C. R20-5-432 (Historical Boilers). Additionally, the Commission is proposing to repeal A.A.C. R20-5-403 (Boiler Advisory Board).

**0. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the proposed rulemaking:**

Owners, operators, users or inspectors of boilers, hot lined water heaters or pressure vessels will be directly affected by the proposed rulemaking.

**0. A cost benefit analysis of the following:**

a. Costs and benefits to state agencies directly affected by the rulemaking, including the number of new full-time employees at the implementing agency required to implement and enforce the proposed rule:

The Commission does not anticipate an increase in costs from the new rulemaking. The Commission will not need to hire additional staff to enforce the new rules.

b. Costs and benefits to political subdivisions directly affected by the rulemaking:

Political subdivisions who own, operate or use boilers, hot lined water heaters or pressure heaters would enjoy the same benefits as outlined below to businesses affected by the proposed amendments.

c. Costs and benefits to businesses directly affected by the rulemaking:

The Industrial Commission anticipates that the proposed rulemaking will have no adverse economic, small business, or consumer impact. The proposed rulemaking is intended to reduce regulatory burden by eliminating incorrect or confusing language in the current rules to allow for the affected stakeholders to have a clearer understanding of what is required. Additionally, by adopting the most current standards and codes the amendments would facilitate stakeholders in using more modern technology which may provide a cost benefit.

**0. Impact on private and public employment in businesses, agencies and political subdivisions:**

Adoption of the new rules may increase the use of inspectors from qualifying businesses, stimulating economic growth.

**0. Impact on small businesses:**

a. Identification of the small businesses subject to the rulemaking:

Arizona small businesses who are owners, operators, users or inspectors of boilers, hot lined water heaters or pressure vessels will be directly affected by the proposed rulemaking.

b. Administrative and other costs required for compliance with the rulemaking:

The proposed rules do not place new obligations, costs, or time constraints on employers, adoption of the final rules is not expected to impose administrative or other costs required for compliance in Arizona.

c. Description of the methods that may be used to reduce the impact on small businesses:

The Commission did not consider methods of reducing the impact on small businesses.

- d. Cost and benefit to private persons and consumers who are directly affected by proposed rulemaking:

Private persons and consumers are not directly affected by this rulemaking.

**0. Probable effect on state revenues:**

The Commission anticipates state revenues remaining neutral.

**0. Less intrusive or less costly alternative methods considered:**

The Commission did not consider alternative methods.

**0. Data on which the rule is based:**

The Commission did not perform any studies as a basis for the rulemaking.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- matically Fired Boilers, published by ASME International, incorporated by reference in R20-5-404(A)(4).
16. "Direct fired jacketed steam kettle" means a pressure vessel with inner and outer walls that is subject to steam pressure and stress, is used to boil or heat liquids or to cook food, and falls under the scope of Section VIII, Division 1, Appendix 19 (Electrically Heated or Gas Fired Jacketed Steam Kettles) of the ASME Boiler and Pressure Vessel Code incorporated by reference in R20-5-404(A).
  17. "External inspection" means an examination of a boiler or lined hot water heater performed by an authorized inspector when the boiler or lined hot water heater is in operation.
  18. "Forced circulation hot water heater" means a hot water heater used for potable water, a hot water heater requiring movement of water to prevent overheating and failure of the tubes or coils, and has no definitive waterline.
  19. "Fully attended power boiler" means a power boiler that is operated by an individual who meets the requirements of R20-5-408(C), and whose primary function is the care, maintenance, and operation of the boiler and the equipment associated with the boiler system.
  20. "High temperature water boiler" means a boiler in which water is heated and operates at a pressure in excess of 160 psig (1.1 MPa) and/or temperature in excess of 250° F.
  21. "Historical boilers" means steam boilers of riveted construction, preserved, restored, or maintained for hobby or demonstration use.
  22. "Inspection certificate" means a document issued by the Division for the operation of a boiler, lined hot water heater or direct fired jacketed steam kettles when a certificate inspection has been successfully completed.
  23. "Internal inspection" means a complete examination of the internal and external surfaces of a boiler or lined hot water heater by an authorized inspector after the boiler or lined hot water heater is shut down.
  24. "Lined hot water heater" means the same as lined hot water storage heater defined in A.R.S. § 23-471(10) as a vessel which is closed except for openings through which water can flow, that includes the apparatus by which heat is generated and on which all controls and safety devices necessary to prevent pressures greater than 160 psig (1100 kPa gage) and water temperature greater than 210° F are provided, in which potable water is heated by the combustion of fuels, electricity, or any other heat source and removed for external use.
  25. "MAWP" means maximum allowable working pressure.
  26. "National Board Commissioned Inspector" means an individual who holds a valid and current National Board Commission issued by the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183.
  27. "National Board Registration Number" means a unique number issued to a boiler, hot water heater or pressure vessel by the manufacturer and recorded with the National Board of Boiler and Pressure Vessel Inspectors.
  28. "NFPA" means National Fire Protection Association.
  29. "Non-Standard Boiler" means any boiler, hot water heater or pressure vessel that is not constructed or maintained to the standards incorporated by reference of this Article.
  30. "Owner" or "Operator" means any individual or organization, including this state and all political subdivisions of this state, who have title, control or duty to control, the operation of one or more boilers, lined hot water heaters or pressure vessels.
  31. "Portable boiler" means a boiler permanently affixed to a trailer with wheels, that is totally self-contained while operating, and not attached to any other object either by pipe, hose or wire.
  32. "Relief valve" means an ASME-stamped automatic pressure relieving device designed for liquid service which is actuated by the pressure upstream of the valve and opens further with an increase in pressure above the stamped pressure.
  33. "Repairs" means work necessary to restore a boiler, lined hot water heater or pressure vessel to operating condition that complies with this Article.
  34. "Safety relief valve" means an ASME-stamped automatically pressure-actuated relieving device designed for use either as a safety valve or as a relief valve.
  35. "Safety valve" means an ASME-stamped automatic pressure relieving device designed for steam or vapor service which is actuated by the pressure upstream of the valve and characterized by full opening pop-action.
  36. "Secondhand" means a boiler, lined hot water heater or pressure vessel that has changed both location and ownership since original installation.
  37. "Shelter" means a permanent structure that provides protection from the weather.
  38. "Special Inspector" means any authorized inspector who is issued an Arizona Commission but is not employed by the state of Arizona.
  39. "State Identification Number" means a unique number assigned by the Division to a boiler, hot water heater or pressure vessel installed in Arizona.
  40. "User" means a person or entity that does not have legal title to a boiler, lined hot water heater or pressure vessel, but has control and responsibility for the operation of a boiler, lined hot water heater or pressure vessel.
- Historical Note**
- Former Rules B-2.1 through B-2.6. Former Section R4-13-402 repealed, new Section R4-13-402 adopted effective April 12, 1979 (Supp. 79-2). Amended effective March 31, 1981 (Supp. 81-2). Amended effective May 11, 1981 (Supp. 81-3). Amended effective May 31, 1985 (Supp. 85-3). Section R4-1-402 repealed, new Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-402 recodified from R4-13-402 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).
- R20-5-403. Boiler Advisory Board**
- A. Members of the boiler advisory board appointed by the Commission pursuant to A.R.S. § 23-474(2) shall serve for a period of three years. At the end of each three year term, the Commission may extend a member's term an additional three years or replace any member with an individual representing similar interest within the industry. The board shall be composed of persons in the boiler industry and shall be balanced in representation with respect to industry, owner/operators, labor and the public.
  - B. The board shall hold an annual meeting and such other meetings as may be appropriate and shall conduct business at times and places arranged by the Commission.
- Historical Note**
- Former Rules B-3.1 through B-3.3. Former Section R4-13-403 repealed, new Section R4-13-403 adopted effective April 12, 1978 (Supp. 79-2). Section R4-13-403 repealed, new Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-403 recodified from R4-13-403

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

(Supp. 95-1). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-404. Standards for Boilers, Lined Hot Water Heaters and Pressure Vessels****A.** The following apply to this Article:

1. An owner or user of a boiler installed, repaired, replaced, or reinstalled in Arizona, six months after the effective date of this Article shall comply with the 2007 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VIII Division 1, 2, 3, IX, and B31.1 Power Piping, and addenda as of July 1, 2007, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ASME International at Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.
2. An owner or user of a boiler, lined hot water heater or pressure vessel installed, repaired, replaced, or reinstalled in Arizona, before the effective date of this Article shall comply with subsection (A)(1), or the ASME Boiler and Pressure Vessel Code in effect at the time of the last installation, repair, replacement, or reinstallation of the boiler, lined hot water heater or pressure vessel in Arizona.
3. An owner or user of a gas-fired lined hot water heater installed, operated, repaired, replaced, or reinstalled in Arizona shall comply with the American National Standard for Gas Water Heaters, ANSI Z21.10.3-2004, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ANSI, Attn: Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>.
4. An owner or user of a boiler installed, repaired, replaced or reinstalled in Arizona after the effective date of this Article shall comply with the American National Standard for Controls and Safety Devices for Automatically Fired Boilers, ANSI/ASME CSD-1-2006, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated matter. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ASME International, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.
5. An owner or user of a boiler installed, repaired, replaced, or reinstalled in Arizona before the effective date of this Article shall comply with the American National Standard for Controls and Safety Devices for Automatically Fired Boilers in effect at the time of the last installation, repair, replacement or reinstallation of a boiler in Arizona. As an alternative, an owner or user of a boiler described in this subsection may comply with subsection (A)(4).
6. A permanent source of outside air shall be provided for each boiler and lined hot water heater room to assure complete combustion of the fuel as required by ANSI Z223.1-2006, NFPA 54, National Fuel Gas Code incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated matter. A copy of this referenced material is available for

review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from ANSI, Attn: Customer Service Department, 25 W. 43rd Street, 4th Floor, New York, NY 10036 or at <http://www.ansi.org/>.

**B.** The following registration requirements apply to this Article:

1. All boilers and lined hot water heaters, including reinstalled and secondhand boilers, shall be registered with the National Board of Boiler and Pressure Vessel Inspectors except for:
  - a. Non-standard boilers installed up to six months after the effective date of this Section,
  - b. Cast iron boilers, and
  - c. Cast aluminum boilers.
2. All fired and unfired pressure vessels installed or reinstalled on or after July 1, 2009, shall be registered with the National Board of Boiler and Pressure Vessel Inspectors.

**C.** The following installation, maintenance, and repair requirements apply to this Article.

1. An owner or user shall keep a signed copy of the Manufacturer's Data Report for a boiler or lined hot water heater at the location of the boiler or lined hot water heater and make the report available for review upon request from an authorized inspector.
2. A boiler shall have masonry or structural supports of sufficient strength and rigidity to safely support the boiler and its contents without any vibration in the boiler or its connecting piping.
3. There shall be at least 36 in. (915 mm) of clearance on each side of the boiler or lined hot water heater. Alternative clearances according to the manufacturer's recommendations are subject to approval by the Division prior to installation of boiler or lined hot water heater.
4. A boiler with a manhole shall have at least five feet clearance between the boiler manhole and any wall, ceiling, or piping.
5. A newly constructed boiler room in excess of 500 square feet of floor area and containing one or more boilers with a fuel capacity of 1,000,000 BTU per hour or a heating capacity greater than 285 Kw (electric), shall have at least two exits on each level of the boiler or boilers. The owner or user shall ensure each exit is remotely located from other exits.
6. An owner or user shall keep a boiler or lined hot water heater room clean and with no obstructions to the boiler or lined hot water heater.
7. An owner or user shall not store flammable or explosive materials in a boiler or lined hot water heater room.
8. An owner or user shall not store combustibles less than three feet from any part of a boiler or lined hot water heater.
9. If a boiler or lined hot water heater is moved outside Arizona for temporary use or repairs, the owner or user shall not reinstall the boiler or lined hot water heater in Arizona until the owner or user notifies and receives verbal or written approval from the Division under R20-5-419 to reinstall the boiler or lined hot water heater. If the Division grants approval to reinstall the boiler or lined hot water heater, the owner or user shall not operate the reinstalled boiler or lined hot water heater until the owner or user receives an inspection certificate from the Division under this Article.
10. Before a new power boiler or a used or secondhand boiler or pressure vessel is installed, an inspection shall be made by an authorized inspector of this state, or by a National Board Commission Inspector. This inspection is to assess

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

the integrity of the vessel and evaluate the original design specification. Prior to installation, an application shall be filed by the owner or user of the boiler or pressure vessel with the Division for approval. This application shall contain the following information:

- a. Name of the owner or user;
  - b. Mailing address of owner or user;
  - c. Business telephone number of owner or user;
  - d. Installation name and address;
  - e. Installation date;
  - f. Start up date;
  - g. Name and address of boiler/pressure vessel insurance company;
  - h. Arizona serial number of the boiler/pressure vessel being replaced, if applicable;
  - i. Description of the new, used or secondhand power boiler/ pressure vessel as to include:
    - i. Manufacture's name,
    - ii. Date manufactured,
    - iii. Maximum allowable pressure or temperature of boiler/pressure vessel, and
    - iv. National Board registration number;
  - j. Name, address, business phone number, cell phone number, fax number and state contractor's license number of company or individual that will be installing the object;
  - k. Name, title and phone number of the contact person on the site of installation; and
  - l. Signature, title and date of the person submitting the application.
11. Before the owner or user installing a used boiler or pressure vessel, the boiler or pressure vessel shall pass a hydrostatic test that is witnessed by an authorized inspector, authorized representative or by any National Board Commissioned inspector in accordance with R20-5-411.
12. An owner or user of a portable boiler shall notify an authorized inspector before installing the portable boiler and shall not operate the portable boiler until the owner or user receives an inspection certificate from the Division.

**Historical Note**

Former Rules B-4.1 through B-4.3. Former Section R4-13-404 repealed, new Section R4-13-404 adopted effective April 12, 1979 (Supp. 79-2). Amended subsection (P) by adding paragraph (7) and amended subsection (Q) effective October 3, 1980 (Supp. 80-5). Section R4-13-404 repealed, new Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-404 recodified from R4-13-404 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-405. Repealed****Historical Note**

Former Section R4-13-405 repealed effective April 12, 1979 (Supp. 79-2). New Section R4-13-405 adopted effective June 13, 1980 (Supp. 80-3). Section R4-13-405 repealed, new Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-405 recodified from R4-13-405 (Supp. 95-1). Repealed by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-406. Repairs and Alterations**

- A.** If repairs or alterations may affect the working pressure or safety of a boiler, an owner, user, or operator shall consult with an authorized inspector before having the repairs or alterations made. The authorized inspector shall provide the owner, user, or operator information regarding the best method to repair or

alter the boiler. The owner, user, or operator shall ensure that an authorized inspector inspects and approves the repairs and alterations after the repairs or alterations are made.

- B.** Repairs and alterations to boilers shall conform to the applicable provisions of the National Board Inspection Code, ANSI/NB-23-2007 Edition and 2007 addenda, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.national-board.org/>.
- C.** An owner or user shall not permit an individual to remove or repair a safety appliance of a boiler or lined hot water heater in operation. An owner or user shall not permit a person to remove or repair a safety appliance of a boiler or lined hot water heater not in operation except as provided under the ASME Code. If an owner or user permits a person to remove a safety appliance from a boiler or lined hot water heater as provided under the ASME Code, then the owner or user shall ensure that the safety appliance is reinstalled in proper working order before the boiler or lined hot water heater is placed back into operation.
- D.** No person shall alter in any manner a safety valve, relief valve, or safety relief valve, except by an organization qualified in accordance with The National Board Inspection Code, ANSI/NB-23 2007 Edition and 2007 addenda incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors at 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.national-board.org/>.
- E.** Repairs of fittings or appliances shall comply with the requirements of the National Board Inspection Code, ANSI/NB-23-2007 Edition and 2007 addenda incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- F.** Beginning six months after the effective date of this Section replacement of fittings or appliances shall comply with the requirements of the 2007 ASME Boiler and Pressure Vessel Code, Sections I, II, IV, V, VIII, Division 1, 2, 3, IX and B31.1 Power Piping, and addenda, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007. A copy of the incorporated material may also be obtained from ASME International, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org>.

**Historical Note**

Former Section R4-13-406 repealed effective April 12, 1979 (Supp. 79-2). New Section R4-13-406 adopted effective June 13, 1980 (Supp. 80-3). Section R4-13-406 repealed, new Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-406 recodified from R4-13-406 (Supp. 95-1). Amended effective October 9, 1998 (Supp.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-407. Inspection of Boilers, Lined Hot Water Heaters, Direct Fired Jacketed Steam Kettles and Issuance of Inspection Certificates**

- A.** An authorized inspector shall comply with the guidelines set forth in The National Board Inspection Code, ANSI/NB-23-2007 Edition and 2007 addenda, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- B.** If an owner, user, or operator fails to comply with the requirements for an inspection or pressure test under this Article, the Division shall withhold the inspection certificate until the owner, user, or operator complies with the requirements.
- C.** An authorized inspector shall not engage in the sale of any object or device relating to boilers, lined hot water heaters, direct fired jacketed steam kettles or equipment associated with boilers, or lined hot water heaters or direct fired jacketed steam kettles.
- D.** Under A.R.S. § 23-485(D), the Special Inspector shall file the inspection reports by entering data into the Division's Web-based inspection entry form, by submitting a paper inspection report issued by the Division or by electronic transfer of data between the insurance company's database and the Division's database. The inspection report shall contain the following:
1. Whether it is a Certificate or non-Certificate inspection;
  2. Whether it is an internal or external inspection;
  3. Name of location, address and phone number of the object;
  4. Name, address and phone number of owner or responsible party;
  5. Contact person's name and phone number at the inspection location;
  6. State Identification Number;
  7. Certificate due date;
  8. Certificate duration;
  9. Whether the object is active, inactive or scrapped;
  10. MAWP permitted or allowed;
  11. National Board registration number;
  12. Name of the manufacturer and the year the object was built;
  13. Special location in plant, if applicable;
  14. Boiler type;
  15. Purpose of the boiler;
  16. Specify type of fuel used;
  17. Whether the firing method is automatic, manual or unknown;
  18. Whether the fuel train is in compliance with CSD-1, NFPA 85, Z21.10.3 or other;
  19. Whether the boiler is fully attended as per R20-5-408(C);
  20. Heating Surface/BTU Input/ Kilowatt (Kw) Input, as applicable;
  21. Whether the heating surface type is stamped, computed or unknown;
  22. Minimum safety valve relief capacity required;
  23. Whether the minimum safety valve relief capacity type is BTU/Hr, LBS/Hr or unknown;
  24. Number of temperature/pressure controls, as applicable;
  25. Owner number assigned by the owner to specifically identify object's location;
  26. Inspection date;
  27. Whether the certificate is posted;
  28. Safety Valve Total Capacity;
  29. Safety Valve #1 set pressure;
  30. Safety Valve #2 set pressure;
  31. Safety Valve #3 set pressure;
  32. Whether the object has been hydro tested;
  33. Hydro Test (psi), if applicable;
  34. Whether Pressure/Altitude Gage was tested;
  35. Whether of the condition of the object is okay to issue a certificate;
  36. Inspection comments, condition of boiler;
  37. Violations noted;
  38. Inspector name and Arizona Commission number; and
  39. National Board Commission number.
- E.** The Division shall issue to an owner or user an inspection certificate within 30 calendar days of receipt of an inspection report that documents a boiler, lined hot water heater or direct fired jacketed steam kettle that complies with the Act and this Article. An owner or user of a boiler, lined hot water heater or direct fired jacketed steam kettle shall post the inspection certificate in the establishment where the boiler, lined hot water heater or direct fired jacketed steam kettle is located.
- F.** An owner, user, or operator shall ensure that an authorized inspector tags or stamps a steam boiler with an identification number assigned by the Division immediately after installing, but before operating, a new steam boiler, or when an authorized inspector performs an initial certificate inspection of an existing steam boiler. The identification number shall be at least 5/16" in height and in the following format: AZ-# # # #.
- G.** The Division shall mark with a metal dye stamp a boiler or lined hot water heater identified by the Division as not safe for further service, with the code "XXX AZ8 XXX" which shall designate that the boiler or lined hot water heater is condemned.
- H.** For any conditions not covered by this Article, the applicable provisions of the ASME Code that was in effect in Arizona at the time of the installation of the boiler or lined hot water heater shall apply.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-407 recodified from R4-13-407 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-408. Frequency of Inspection**

- A.** An owner, user, or operator of a power boiler shall ensure that an authorized inspector performs a certificate inspection and external inspection of the power boiler every 12 months. An authorized inspector shall perform the external inspection while the power boiler is in operation to ensure that safety devices of the power boiler are operating properly.
- B.** An authorized inspector shall perform an internal inspection and pressure test on a boiler, lined hot water heater or pressure vessel if the inspector determines from an external inspection of the boiler, lined hot water heater or pressure vessel that continued operation of the boiler, lined hot water heater or pressure vessel is a danger to the public or worker safety.
- C.** The Division shall issue a 12 month inspection certificate to an owner or user to operate a fully attended power boiler if:
1. An owner or user ensures that an authorized inspector performs an external safety inspection and audit of the operational methods and logs of the fully attended power boiler at least every 12 months and performs an internal inspection of the fully attended power boiler at least every 36 months;

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

2. Continuous boiler water treatment is under the direct supervision of persons trained and experienced in water treatment for the purpose of controlling and limiting corrosion and deposits.
  3. Records are available for review, that indicate:
    - a. The date, time, and reason the boiler is out of service; and
    - b. Daily analysis of water samples that adequately show the conditions of the water and elements or characteristics that are capable of producing corrosion or other deterioration to the boiler or its parts; and
  4. Controls, safety devices, instrumentation, and other equipment necessary for safe operation are current, in service, calibrated, and meet the requirements of an appropriate safety code for the size boilers, such as NFPA 85, ASME CSD-1 Controls and Safety Devices for Automatically Fired Boilers, National Board Inspection Code ANSI/NB-23, and state requirements.
  5. Inspection reports of an authorized inspector document that the fully attended power boiler complies with A.R.S. § 23-471 et seq. and this Article.
- D.** An owner, user, or operator of a direct-fired jacketed steam kettle shall ensure that an authorized inspector performs a certificate inspection of the direct-fired jacketed steam kettle every 24 months.
- E.** An owner, user, or operator of a heating or process boiler, not exceeding 15 p.s.i. maximum allowable working pressure, steam or vapor, shall ensure that an authorized inspector performs a certificate inspection of the heating or process boiler every 24 months.
- F.** An owner or user of a hot water heating or hot water supply boiler, or lined hot water heater shall ensure that an authorized inspector performs a certificate and external inspection of the hot water heating or hot water supply boiler or lined hot water heater at the time the hot water heating or hot water supply boiler or lined hot water heater is installed. An inspection certificate issued by the Division following an inspection under this subsection shall not state an expiration date.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-408 recodified from R4-13-408 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-409. Notification and Preparation for Inspection**

- A.** An authorized inspector shall perform a certificate inspection at a time mutually agreeable to the inspector and owner, user, or operator.
- B.** Before an authorized inspector performs an internal inspection of a boiler, an owner, user, or operator shall:
1. Cool the furnace and combustion chambers;
  2. Drain the water from the boiler;
  3. Remove the manhole and handhole plates, wash-out plugs, and inspection plugs in water column connections;
  4. Remove insulation or brickwork if necessary to determine the condition of the boiler, headers, furnace, supports, and other parts;
  5. Remove the pressure gauge for testing;
  6. Prevent any leakage of steam or hot water into the boiler by disconnecting the involved pipe or valve;
  7. Close, tag, and padlock the non-return and steam stop valves before opening the manhole or handhole covers and entering any part of the steam generating unit that is connected to a common header with other boilers. Open

the free blow drain or cock between the non-return and steam stop valves;

8. Close, tag, and padlock the blowoff valves after draining the boiler: and
9. Open all drains and vent lines.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-409 recodified from R4-13-409 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4).

**R20-5-410. Report of Accident**

An owner or user shall notify the Division within 24 hours of an explosion, severe overheating, or personal injury involving a boiler, lined hot water heater or direct fired jacketed steam kettle. A person shall not remove or disturb the involved boiler, lined hot water heater, direct fired jacketed steam kettle or parts of the boiler, lined hot water heater or direct fired jacketed steam kettle before an investigation by an authorized inspector, except for the purpose of preventing personal injury or limiting consequential damage.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-410 recodified from R4-13-410 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-411. Hydrostatic Tests**

The owner or user shall perform a hydrostatic or pneumatic pressure test in accordance with the code incorporated by reference in R20-5-404(A) and R20-5-406(B).

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-411 recodified from R4-13-411 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-412. Automatic Low-water Fuel Cutoff Devices or Combined Water Feeding and Fuel Cutoff Devices**

- A.** An owner, user, or operator shall ensure that low-water fuel cutoff devices or combined water feeding and fuel cutoff devices do not interfere with an operator's or inspector's ability to safely clean, repair, or inspect a boiler or lined hot water heater.
- B.** A low-water fuel cutoff device shall have a pressure rating not less than the set pressure of the safety valve or safety relief valve.
- C.** In addition to the requirements of subsections (A) and (B), all low-water fuel cutoffs and flow sensing devices shall be constructed and installed in accordance with applicable ASME Code and standards for boilers and steam jacketed kettles in R20-5-404(A).

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-412 recodified from R4-13-412 (Supp. 95-1). Amended effective October 9, 1998 (98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-413. Safety and Safety Relief Valves**

- A.** A valve shall not be placed between a safety valve or a safety relief valve and installed on a boiler or lined hot water heater, or between a safety valve or a safety relief valve and the dis-

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

charge pipe attached to the boiler or lined hot water heater.

- B. When a power boiler is supplied with feed-water directly from a water main without the use of a feeding apparatus, safety valves shall not be set at a pressure greater than 94% of the lowest pressure obtained in the water main feeding the boiler;
- C. Safety valves, safety relief valves and relief valves shall conform to the requirements of the 2007 ASME Boiler and Pressure Vessel Code, Section I, IV or VIII, and addenda as of January 1, 2008, incorporated by reference as applicable. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ and may be obtained from the ASME, Three Park Avenue, New York, NY 10016-5990 or at <http://www.asme.org/>.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2).

R20-5-413 recodified from R4-13-413 (Supp. 95-1).

Amended effective October 9, 1998 (Supp. 98-4).

Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-414. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2).

R20-5-414 recodified from R4-13-414 (Supp. 95-1).

Repealed by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-415. Boiler Blowdown, Blowoff Equipment and Drains**

- A. Except as provided in this Section, an owner or user of blowdown and blowoff equipment shall comply with the National Board Rules and Recommendations for the Design and Construction of Boiler Blowoff Systems, 1991 Edition, incorporated by reference. This incorporation does not include any later amendments or editions of the incorporated material. A copy of this referenced material is available for review at the Industrial Commission of Arizona, 800 W. Washington Street, Phoenix, AZ 85007 and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229-1183 or at <http://www.nationalboard.org/>.
- B. Blowdown from a boiler is a hazard to life and property.
- C. Blowdown from a boiler shall pass through blowdown equipment that reduces pressure and temperature to levels not exceeding 5 p.s.i.g. and 140° F.
- D. The thickness of a blowdown vessel shall be at least 3/16".
- E. All blowdown equipment shall be fitted with openings that allow cleaning and inspection of the equipment.
- F. Blowdown separators may be used with boilers instead of boiler blowdown tanks, provided that blowdown separators are operated with a temperature gauge and water cooler to prevent drain water temperature from exceeding 140° F.
- G. In addition to the requirements of subsections (A) through (F), the following requirements apply to blowdown piping, valves and drains for power boilers: Each power boiler and high temperature water boiler shall be installed and maintained according to ASME Code, Section I and B31.1, incorporated by reference in R20-5-404, at the time of installation.
- H. In addition to the requirements of subsections (A) through (F), the following requirements apply to bottom blowdown or drain valves for heating boilers and hot water heaters:
  1. A hot water heating boiler or hot water heater shall have a bottom blowdown or drain pipe connection fitted with a

valve or cock connected with the lowest available water space with the minimum size of blowdown piping and valves as required by ASME Code, Section IV, incorporated by reference, in R20-5-404(A).

2. Discharge outlets of blowdown pipes, safety valves and other piping shall be located and structurally supported to prevent injury to individuals.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2).

R20-5-415 recodified from R4-13-415 (Supp. 95-1).

Amended effective October 9, 1998 (Supp. 98-4).

Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-416. Maximum Allowable Working Pressure**

- A. The ASME Code under which a boiler was constructed and stamped shall determine the maximum allowable working pressure for the ASME-stamped boiler.
- B. If components in the boiler or hot water system such as valves, pumps, expansion tanks, storage tanks or piping have a lesser working pressure rating than the boiler or hot water heater, the pressure setting for the safety or safety relief valve on the boiler or hot water heater shall be based upon the component with the lowest maximum allowable working pressure rating.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2).

R20-5-416 recodified from R4-13-416 (Supp. 95-1).

Amended effective October 9, 1998 (Supp. 98-4).

Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-417. Maintenance and Operation of Boilers, Hot Water Heaters and Direct Fired Jacketed Steam Kettles**

- A. An owner or user of a boiler, hot water heater or direct fired jacketed steam kettle constructed under the ASME Code, Sections I, IV or VIII Division 1, incorporated by reference in R20-5-404(A) shall comply with the manufacturer's maintenance and operation instructions for the boiler, hot water heater or direct fired jacketed steam kettle.
- B. In addition to the requirements of subsection (A), an owner or user of a boiler constructed under the ASME Code, Sections I, IV, shall comply with the following preventive maintenance schedule if the boiler contains the component or system listed.
  1. On a daily basis, the owner or user shall:
    - a. Test the low-water fuel cutoff and alarm, and
    - b. Check the burner flame for proper combustion.
  2. On a weekly basis, the owner or user shall:
    - a. Check for proper ignition, and
    - b. Check the flame failure detection system.
  3. On a monthly basis, the owner or user shall:
    - a. Test all fan and air pressure interlocks,
    - b. Check the main burner safety shutoff valve,
    - c. Check the low fire start switch,
    - d. Test fuel pressure and temperature interlocks of oil-fired units, and
    - e. Test the high and low fuel pressure switch of gas-fired units.
  4. Every six months, the owner or user shall:
    - a. Inspect burner components;
    - b. Check flame failure system components, such as vacuum tubes, amplifier and relays;
    - c. Check wiring of all interlocks and shutoff valves;
    - d. Recalibrate all indicating and recording gauges; and
    - e. Check steam and blowdown piping and valves.
  5. Annually, the owner or user shall:

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- a. Replace vacuum tubes, scanners, or flame rods in the flame failure system according to the manufacturer's instructions;
  - b. Check all coils and diaphragms; and
  - c. Test operating parts of all safety shutoff and control valves.
- C. An owner or user of a power boiler or high temperature boiler shall designate an individual who meets the requirements of subsection (D) to operate the boiler. An owner or user may operate the boiler if the owner or user meets the requirements of subsection (D).
- D. An operator of a power boiler or high temperature water boiler shall meet the following minimum requirements:
- 1. Knowledge of and an ability to explain the function and operation of all safety controls of the boiler,
  - 2. Ability to start the boiler in a safe manner,
  - 3. Knowledge of all safe methods of feeding water to the boiler,
  - 4. Knowledge of and the ability to blow down the boiler in a safe manner,
  - 5. Knowledge of safety procedures to follow if water exceeds or drops below permissible safety levels, and
  - 6. Knowledge of and the ability to safely shut down the boiler.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-417 recodified from R4-13-417 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-418. Non-standard Boilers**

An owner or user shall remove from service a boiler, hot water heater or pressure vessel that does not bear an ASME stamp unless the boiler owner or user request a variance under R20-5-429.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). New Section adopted effective April 9, 1992 (Supp. 92-2). R20-5-418 recodified from R4-13-418 (Supp. 95-1). Amended effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-419. Request to Reinstall Boiler or Lined Hot Water Heater**

- A. The Division shall grant or deny approval to reinstall a boiler or lined hot water heater within three business days after an owner or user requests approval to reinstall the boiler or lined hot water heater. The order of the Division granting or denying approval to reinstall a boiler shall be in writing.
- B. The Division shall grant approval to reinstall a boiler or lined hot water heater if the boiler or lined hot water heater complies with A.R.S. § 23-471 et seq. and this Article. The Division shall deny approval to reinstall a boiler or lined hot water heater if the boiler or lined hot water heater does not comply with A.R.S. § 23-471 et seq. and this Article.
- C. An order of the Division denying approval to reinstall a boiler shall be final unless an owner or user requests a hearing under A.R.S. § 23-479 within 15 days after the Division mails the order. The owner or user requesting a hearing shall have the burden to prove that a boiler meets the requirements of A.R.S. § 23-471 et seq. and this Article.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-419 recodified from R4-13-419 (Supp. 95-1). New Sec-

tion adopted effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-420. Special Inspector Certificate under A.R.S. § 23-485****A. Review Time-frames.**

- 1. Administrative Completeness Review.
    - a. The Division shall determine whether an application to take a written examination or request for a special inspector certificate under A.R.S. § 23-485 is complete within three days of receipt of the application or request. The Division shall inform the applicant whether the application or request is complete or incomplete by written notice. If the application or request is incomplete, the Division shall include in its written notice to the applicant a complete list of the missing information.
    - b. The Division shall deem an application or request withdrawn if an applicant fails to file a complete application or request within 10 days of being notified by the Division that the application or request is incomplete, unless the applicant obtains an extension to provide the missing information. An applicant may obtain an extension to submit the missing information by filing a written request with the Division no later than 10 days after the Division mails notice that the application or request is incomplete. The written request for an extension shall state the reasons the applicant is unable to meet the 10-day deadline. If an extension will enable the applicant to assemble and submit the missing information, the Division shall grant an extension of not more than 10 days and provide written notice of the extension to the applicant.
  - 2. Substantive review.
    - a. Application to take written examination under A.R.S. § 23-485(A). Within three days after the Division deems an application complete under subsection (B), the Division shall determine whether the applicant is eligible to take the National Board Examination.
    - b. Request for special inspector certificate under A.R.S. § 23-485. Within three days after the Division deems a request complete under subsection (C), the Division shall determine whether the applicant meets the criteria of A.R.S. § 23-485 and subsection (C).
  - 3. Overall review. The overall review period shall be six days, unless extended under A.R.S. § 41-1072 et seq.
- B. Application to take Written Examination under A.R.S. § 23-485(A).**
- 1. An individual requesting to take the written examination under A.R.S. § 23-485(A) shall complete an application to take the National Board Examination and submit the application to the Division at least 45 days before the date of the examination.
  - 2. The application to take the National Board Examination shall be filed with the Division. An application is considered filed when it is received at the office of the Division and stamped by the Division with the date of filing.
  - 3. An application to take the National Board Examination shall be on a legible form, paper or electronic, issued to the Division, with the following information:
    - a. Full legal name,
    - b. State or country of residency,
    - c. Mailing address,

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- d. Telephone number,  
e. E-mail address, and  
f. Employer's name and address.
- C. Application for Special Inspector Certificate under A.R.S. § 23-485. An application for a special inspector certificate under A.R.S. § 23-485 is deemed complete under subsection (A)(1) when the following is filed with the Division:
1. The applicant provides written documentation that the applicant holds a certificate of competency as an inspector of boilers or lined hot water heaters for a state that has a standard of examination equal to that of Arizona or the applicant is a National Board Commissioned Inspector, and
  2. The applicant provides proof of employment as a full time inspector for a company conducting business in Arizona and whose duties as an inspector include making inspections of boilers or lined hot water heaters to be used or insured by the company and not for resale.
- D. If an applicant meets the criteria of A.R.S. § 23-485 and subsection (C), the Division shall issue a certificate to the applicant under subsection (C). If an applicant fails to meet the criteria of A.R.S. § 23-485 and subsection (C), the Division shall issue a written notice denying eligibility to the applicant. The Commission shall deem the notice denying eligibility final if an applicant does not request a hearing within 15 calendar days after the Division mails the notice.
- E. Written Examination under A.R.S. § 23-485(A).
1. The written examination described in A.R.S. § 23-485(A) shall be the National Board Examination of the National Board of Boiler and Pressure Vessel Inspectors.
  2. The Division shall administer the National Board Examination the first Wednesday and Thursday of every March, June, September, and December to eligible applicants. Within two days after the Division administers the National Board Examination, the Division shall return the examinations of eligible applicants to the National Board of Boiler and Pressure Vessel Inspectors. Examinations shall be graded by the National Board of Boiler and Pressure Vessel Inspectors.
  3. The Division shall provide written notice to an applicant of the applicant's grade for the National Board Examination within three days after the Division receives notice of the grade from the National Board of Boiler and Pressure Vessel Inspectors.
  4. The Division shall issue a certificate of competency to an applicant who passes the National Board Examination.
- F. Issuance of Special Inspector Certificate. The Division shall issue a special inspector certificate, A.R.S. § 23-485, to an applicant no later than 15 calendar days after the Division determines that an applicant meets the criteria of A.R.S. § 23-485 and subsection (C).
- G. Hearing on Denial of Eligibility for Special Inspector Certificate.
1. A request for hearing protesting a notice of eligibility shall be in writing and signed by the applicant or the applicant's legal representative. The applicant shall file the request for hearing with the Division.
  2. The Commission shall hold a hearing under A.R.S. § 41-1065. The hearing shall be stenographically recorded.
  3. The Chair of the Commission or designee shall preside over hearings held under this Section. The Chair shall apply the provisions of A.R.S. § 41-1062 et seq. to hearings held under this Section and shall have the authority and power of a presiding officer as described in A.R.S. § 41-1062.
  4. A decision of the Commission to deny or grant eligibility for a special inspector certificate shall be based upon the criteria set forth in A.R.S. § 23-485 and this Section and shall be made by a majority vote of the quorum of Commission members present when the decision is rendered at a public meeting. After a decision is rendered at a public meeting, the Commission shall issue a written decision upon hearing which shall include findings of fact and conclusions of law, separately stated. An order of the Commission denying a special inspector certificate is final unless an applicant files a request for review within 15 days after the Commission mails its order.
5. A request for review shall be based upon one or more of the following grounds which have materially affected the rights of an applicant:
    - a. Irregularities in the hearing proceedings or any order or abuse of discretion whereby the applicant seeking review was deprived of a fair hearing;
    - b. Misconduct by the Division;
    - c. Accident or surprise which could not have been prevented by ordinary prudence;
    - d. Newly discovered material evidence that could not have been discovered with reasonable diligence and produced at the hearing;
    - e. Excessive or insufficient sanctions or penalties imposed at hearing;
    - f. Error in the admission or rejection of evidence, or errors of law occurring at, or during the course of, the hearing;
    - g. Bias or prejudice of the Division; and
    - h. The order, decision, or findings of fact are not justified by the evidence or are contrary to law.
  6. The Commission shall issue a decision upon review no later than 30 days after receiving a request for review.
  7. The Commission's decision upon review is final unless an applicant seeks judicial review as provided in A.R.S. § 23-483.

**Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-420 recodified from R4-13-420 (Supp. 95-1). New Section adopted effective October 9, 1998 (Supp. 98-4). Amended by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-421. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-421 recodified from R4-13-421 (Supp. 95-1).

**R20-5-422. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-422 recodified from R4-13-422 (Supp. 95-1).

**R20-5-423. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-423 recodified from R4-13-423 (Supp. 95-1).

**R20-5-424. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-424 recodified from R4-13-424 (Supp. 95-1).

**R20-5-425. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-425 recodified from R4-13-425 (Supp. 95-1).

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

**R20-5-426. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-426 recodified from R4-13-426 (Supp. 95-1).

**R20-5-427. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-427 recodified from R4-13-427 (Supp. 95-1).

**R20-5-428. Repealed****Historical Note**

Repealed effective April 12, 1979 (Supp. 79-2). R20-5-428 recodified from R4-13-428 (Supp. 95-1).

**R20-5-429. Variance**

- A.** Any owner or user may apply to the Director for a variance from the requirements of this Article, upon demonstrating the construction, installation, and operation of the boiler or pressure vessel will maintain the same level of safety as prescribed by this Chapter. The Director shall issue a variance if the Director determines that the proponent of the variance has demonstrated the construction, installation, and operation of the boiler or pressure vessel will maintain the same level of safety as prescribed by this Chapter. The variance issued shall prescribe the construction, installation, operation, maintenance, and repair conditions that the owner or user shall maintain.
- B.** A variance may be modified or revoked upon application by an owner, user or the Director, on the Director's own motion at any time after six months from issuance if the owner or user has not complied with the variance or if the variance does not protect the health and safety of employees or general public.
- C.** The application for a variance shall be made on the form issued by the Division and contains the following information:
1. Owner or user's name and company name;
  2. Mailing address;
  3. Telephone number;
  4. Fax number;
  5. Contact person;
  6. Contact person's telephone number;
  7. Address or location of proposed variance;
  8. Type of facility to include;
    - a. Variance description;
    - b. Justification for variance;
    - c. Component or system involved;
    - d. Supporting documentation for variance;
    - e. Identify the statute, rule, code or standard to justify the variance; and
  9. Printed name and title of owner or user, signature of owner or user and date.
- D.** If an owner or user does not agree with the variance issued or revoked by the Director, a request for a hearing under A.R.S. § 23-479 can be made with the Commission.

**Historical Note**

New Section made by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-430. Forced Circulation Hot Water Heaters**

- A.** All water tube or coil-type hot water heaters that require forced circulation to prevent overheating and failure of the tubes or coils shall have a safety control, to prevent burner operation at a flow rate inadequate to protect the hot water heater unit against overheating, at all allowable firing rates. The safety control shall shut down the burner and prevent restarting until an adequate flow is restored.

- B.** All water tube or coil-type hot water heaters that require forced circulation to prevent overheating and failure of the tubes or coils, shall have a manually operated remote shut-down switch or circuit breaker and shall be located just outside the hot water heater room door and marked for easy identification. The shutdown switch shall be installed in a manner to safeguard against tampering. If a hot water heater room door is on the building exterior, the switch shall be located just inside the door. If there is more than one door to the hot water heater room there shall be a switch located at each door. The remote shutdown switch or circuit breaker shall disconnect all power to the burner controls.

**Historical Note**

New Section made by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-431. Code Cases**

Code cases approved for use by the ASME Code Committee are allowed to be used in the design, fabrication and testing of boilers and pressure vessels provided approval from the Chief Boiler Inspector is obtained prior to use.

**Historical Note**

New Section made by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**R20-5-432. Historical Boilers**

Historical boilers shall require an initial Certificate inspection by an authorized inspector, followed by a Certificate inspection every three years thereafter if stored inside a shelter, or annually if stored outdoors. The initial Certificate inspection shall include ultrasonic thickness testing of all pressure boundaries. Thinning of the pressure retaining boundary shall be monitored and recorded on the inspection report, in accordance with R20-5-407(D), to the owner and the Division's electronic copy.

**Historical Note**

New Section made by final rulemaking at 15 A.A.R. 1496, effective August 18, 2009 (Supp. 09-3).

**ARTICLE 5. ELEVATOR SAFETY****R20-5-501. Repealed****Historical Note**

Former Rule E-1. Amended effective November 9, 1979 (Supp. 79-6). R20-5-501 recodified from R4-13-501 (Supp. 95-1). Section repealed by final rulemaking at 9 A.A.R. 381, effective March 15, 2003 (Supp. 03-1).

**R20-5-502. Definitions**

The following definitions apply to this Article unless otherwise specified:

1. "ASME" means American Society of Mechanical Engineers.
2. "AZFS Key" means Arizona Firefighters Service Key, a universal key used by a firefighter to operate a conveyance during an emergency.
3. "Chief" means the head inspector of the Elevator Safety Section of the Division of Occupational Safety and Health.
4. "Elevator Safety Section" means the Elevator Safety Section of the Division of Occupational Safety and Health of the Industrial Commission of Arizona.
5. "Inspection" means the official determination by an inspector of the condition of all parts of the equipment on which the safe operation of an elevator depends.
6. "Major Alteration" means work performed to any conveyance that is not routine maintenance or repair.
7. "State Serial Number" is a unique number assigned by

## General and Specific Statutes

### **23-108.01. Powers and duties of director**

**A.** The director of the commission, under the supervision of the commission, shall administer the policies, powers and duties of the commission as prescribed by this chapter, and chapters 2 and 6 of this title.

**B.** The director of the commission may deny the salary of a commissioner if the commissioner does not provide documentation that explains what commission duties were completed for the day in which the commissioner is seeking a salary or if the commission duties were not related to preparing for or attending a commission meeting.

### **23-474. Duties of commission**

The commission shall:

1. Administer this article through the division of occupational safety and health.
2. Adopt standards and regulations pursuant to section 23-475 and adopt other rules as are necessary.
3. Exercise other powers as are necessary to carry out the duties and requirements of this article.

### **23-475. Duties of division**

The division shall:

1. Certify special inspectors as provided in section 23-485.
2. Inspect boilers, pressure vessels and lined hot water heaters under this article, except that beginning on July 1, 2017 the division may not inspect boilers, pressure vessels and lined hot water heaters.
3. Establish a schedule to require regular boiler, pressure vessel and lined hot water heater inspections.
4. Recommend standards, regulations and amendments to the standards and regulations to the commission for approval or disapproval.
5. Enforce, under section 23-478, all standards and regulations adopted by the commission.

### **23-476. Safety standards and regulations**

**A.** Safety standards and regulations shall be formulated in the following manner:

1. The division shall either propose adoption of national consensus standards or federal standards or draft such regulations as it considers necessary after conducting sufficient investigation through the division's employees and through consultation with the boiler advisory board and other persons knowledgeable in the business for which the standards or regulations are being formulated.
2. Proposed standards or regulations, or both, shall be submitted to the commission for its approval.

**B.** Any person who may be adversely affected by a standard or regulation issued pursuant to this article may at any time prior to the sixtieth day after such standard or regulation is promulgated file a complaint challenging the validity of such standard or regulation with the superior court of the county in which the person resides or has his or her principal place of business, for a judicial review of such standard or

regulation. The filing of such a complaint shall not, unless otherwise ordered by the court, operate as a stay of the standard or regulation. The determinations of the commission shall be conclusive if supported by substantial evidence in the record considered as a whole.

C. In case of conflict between standards and regulations, the regulations shall take precedence.

**41-1032. Effective date of rules**

A. A rule filed pursuant to section 41-1031 becomes effective sixty days after a certified original and two copies of the rule and preamble are filed in the office of the secretary of state and the time and date are affixed as provided in section 41-1031, unless the rule making agency includes in the preamble information that demonstrates that the rule needs to be effective immediately on filing in the office of the secretary of state and the time and date are affixed as provided in section 41-1031. A rule may only be effective immediately for any of the following reasons:

1. To preserve the public peace, health or safety.
2. To avoid a violation of federal law or regulation or state law, if the need for an immediate effective date is not created due to the agency's delay or inaction.
3. To comply with deadlines in amendments to an agency's governing statute or federal programs, if the need for an immediate effective date is not created due to the agency's delay or inaction.
4. To provide a benefit to the public and a penalty is not associated with a violation of the rule.
5. To adopt a rule that is less stringent than the rule that is currently in effect and that does not have an impact on the public health, safety, welfare or environment, or that does not affect the public involvement and public participation process.

B. Notwithstanding subsection A of this section, a rule making agency may specify an effective date more than sixty days after the filing of the rule in the office of the secretary of state if the agency determines that good cause exists for and the public interest will not be harmed by the later date.

C. This section does not affect the validity of an existing rule until the new or amended rule that is filed with the secretary of state is effective pursuant to this section.

**Defined Terms**

**R20-5-402. Definitions**

“Act” means A.R.S. Title 23, Chapter 2, Article 11.

“Alteration” means any change in the item described on the original manufacturer’s data report which affects the pressure-containing capability of the Boiler or Pressure Vessel, including but not limited to:

- a. Non physical changes such as an increase in the MAWP either internal or external, or

- b. A reduction in minimum design temperature of a boiler Boiler or pressure vessel Pressure Vessel requiring additional mechanical tests.

“ANSI” means American National Standards Institute, Inc.

“Apartment Complex” means a building with multiple family dwelling units, not used for commercial purposes, including condominiums and townhouses, where Boilers are located in a common area outside of the individual dwelling units, such as a Boiler room.

“Applicant” means an individual requesting permission to act as a Special Inspector under A.R.S. § 23-485.

“ASME” means the American Society of Mechanical Engineers

“Authorized Inspector” means an Authorized Representative under A.R.S. § 23-471(1) or a Special Inspector under A.R.S. § 23-485.

“Blowdown Tank” or “Blowdown Separator” means an ASME-stamped vessel designed to receive discharged steam or hot water from a Boiler blowoff or blowdown piping system.

“BTU” means British thermal units.

“Condemned” means a Boiler or Lined Hot Water Heater that has been inspected and found to be unsafe by an Authorized Inspector and has been stamped or tagged with the code XXX AZ8 XXX.

“CSD-1” means Controls and Safety Devices for Automatically Fired Boilers, published by ASME, incorporated by reference in R20-5-404(A)(4).

“Direct Fired Jacketed Steam Kettle” means a jacketed steam kettle having its own source of energy, such as gas or electricity for generating steam within the jacket’s walls.

“External Inspection” means an examination of a Boiler or Lined Hot Water Heater performed by an Authorized Inspector when the Boiler or Lined Hot Water Heater is in operation.

“Forced Circulation Lined Hot Water Heater” means a Lined Hot Water Heater used for potable water, a Lined Hot Water Heater requiring movement of water to prevent overheating and failure of the tubes or coils, and has no definitive waterline.

“Fully Attended Power Boiler” means a Power Boiler that is operated by an individual who meets the requirements of R20-5- 408(C D), and whose primary function is the care, maintenance, and operation of the Boiler and the equipment associated with the Boiler system.

“Historical Boilers” means steam Boilers preserved, restored, or maintained for hobby or demonstration use.

“HS” means heating surface.

“Inspection Certificate” means a document issued by the Division for the operation of a Boiler, Lined Hot Water Heater, or Direct Fired Jacketed Steam Kettle when a Certificate Inspection has been successfully completed.

“Internal Inspection” means a complete examination of the internal and external surfaces of a Boiler or Lined Hot Water Heater by an Authorized Inspector after the Boiler or Lined Hot Water Heater is shut down.

“Kw” means kilowatt.

“MAWP” means maximum allowable working pressure.

“National Board Commissioned Inspector” means an individual who holds a valid and current National Board Commission issued by the National Board of Boiler and Pressure Vessel Inspectors.

“National Board Registration Number” means a unique number issued to a Boiler, Lined Hot Water Heater, or Pressure Vessel by the manufacturer and recorded with the National Board of Boiler and Pressure Vessel Inspectors.

“NFPA” means National Fire Protection Association.

“Non-Standard Boiler” means any Boiler, Lined Hot Water Heater, or Pressure Vessel that is not constructed or maintained to the standards incorporated by reference of this Article.

“Out of Service” means to either: (1) physically sever or disconnect all sources of energy (water, gas, fuel, electricity, etc.); cap all fuel lines; and disconnect or remove all electrical lines from the Boiler, Lined Hot Water Heater, or Pressure Vessel; or (2) to lock out and tag out the Boiler, Hot Water Heater, or Pressure Vessel per 29 C.F.R. §1910.147, OSHA, General Industry Regulations.

“Portable Boiler” means a Boiler permanently affixed to a trailer with wheels, that is totally self-contained while operating, and not attached to any other object either by pipe, hose, or wire.

“PVHO” means Pressure Vessels for Human Occupancy.

“Relief Valve” means an ASME-stamped automatic pressure relieving device designed for liquid service which is actuated by the pressure upstream of the valve and opens further with an increase in pressure above the stamped pressure.

“Repairs” means work necessary to restore a Boiler, Lined Hot Water Heater, or Pressure Vessel to operating condition that complies with this Article.

“Safety Relief Valve” means an ASME-stamped automatically pressure-actuated relieving device designed for use either as a Safety Valve or as a Relief Valve.

“Secondhand” means a Boiler, Lined Hot Water Heater, or Pressure Vessel that has changed both location and ownership since original installation.

“Serves” means either mailing to the last known address of the receiving party, or transmitting by other means, including electronic transmission, with the written consent of the receiving party.

“Shelter” means a permanent structure that provides protection from the weather.

“Special Inspector” means an inspector who is issued a Special Inspector Certificate under R20-5-420.

“State Identification Number” means a unique number assigned by the Division to a Boiler, Lined Hot Water Heater, or Pressure Vessel installed in Arizona.

“User” means a person or entity that does not have legal title to a Boiler, Lined Hot Water Heater, or Pressure Vessel, but has control and responsibility for the operation of a Boiler, Lined Hot Water Heater, or Pressure Vessel.

**ARIZONA MEDICAL BOARD**

Title 4, Chapter 16, Article 2

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - ONE-YEAR REVIEW REPORT

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 22, 2022

**SUBJECT:** **ARIZONA MEDICAL BOARD**  
Title 4, Chapter 16, Article 2

---

### Summary

This One-Year Review Report (1YRR) from the Arizona Medical Board (Board) relates to rules in Title 4, Chapter 16, Article 2 regarding fees and charges for licensure. These rules were amended under an exemption provided by Laws 2021, Ch. 320, § 24, an emergency measure that was created to expand the availability of telehealth services in order to meet the health care needs of Arizonans. In a rulemaking that went into effect on September 22, 2021, the Board established the fee for out-of-state health care providers to register to provide telehealth services in Arizona. In this rulemaking, the Board also amended the time frame table to include the applicable time frames for registration as an out-of-state health care provider of telehealth services.

The Board submitted this 1YRR pursuant to A.R.S. § 41-1095.

1. **Has the agency analyzed whether the rules are authorized by statute?**

Yes, the Board cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

Because Laws 2021, Chapter 320, Sec. 24 exempted the Board from complying with A.R.S. Title 41, Chapter 6, the Board did not prepare an economic, small business, and consumer impact statement at the time that the rulemaking was completed. In the 11 months since the rule went into effect, the Board has received 25 applications to register as an out-of-state provider of telehealth services. The Board approved 22 of these applications. One application was not approved because the applicant did not have an active license in another jurisdiction. Two other applications were not approved due to pending receipt of required documentation.

Under R4-16-205(B), the 25 applicants each paid \$500 for registration. As a result, under A.R.S. § 32-1406, the Board deposited \$1,250 into the state's general fund and \$11,250 into the Arizona Medical Board fund.

For all applications received, the Board acted within the time frames specified in Table 1.

Stakeholders include the Board and out-of-state providers of telehealth that would like to provide their services in Arizona.

**3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Board indicates that when the Legislature enacted A.R.S. § 36-3606, the legislature determined that the benefits of allowing out-of-state providers to register to provide telehealth services outweighed the costs to the state.

The only authority provided to the Board under A.R.S. § 36-3606 is to establish a one-time-only registration fee. For this one-time fee, the Board is required to evaluate the information submitted by an out-of-state provider, supervise compliance for as long as the provider chooses to provide telehealth services to Arizona residents, and receive and evaluate annual updates from the provider. Based on the legislature's cost-benefit determination and the limited authority provided under A.R.S. § 36-3606, the Board concludes that the benefits of the rule outweigh the costs.

The time frames listed in Table 1 run against the Board. These time frames do not regulate out-of-state health care providers.

In the provided supplemental materials, the Board indicates that the fee amount is reasonable compared to the telehealth registration fees established by other states. Additionally, the Board indicates that the fee amount is comparable to the standard licensure fees. Council staff believes that the Board has adequately shown that the rules impose the least burden and costs to those regulated.

**4. Has the agency received any written criticisms of the rules since the rule was adopted?**

No, the Board has not received any written criticisms of the rules since the rule was adopted.

**5. Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Board indicates that the rules are clear, concise, and understandable.

**6. Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Board indicates that the rules are consistent with other rules and statutes.

**7. Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Board indicates that the rules are effective in achieving their objectives.

**8. Has the agency analyzed the current enforcement status of the rules?**

Yes, the Board states that the rules are enforced as written.

**9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

No, the Board indicates that the rules are not more stringent than corresponding federal law.

**10. Has the agency completed any additional process required by law?**

Not applicable; no additional process is required.

**11. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

No, the rules do not require the issuance of a permit or license. R4-16-205 and Table 1 only specify the required fee.

**12. Conclusion**

Council staff finds that the Board submitted an adequate report pursuant to A.R.S. § 41-1095. Council staff recommends approval of this report.

**RE: Arizona Medical Board  
One-year-review Report  
R4-16-205 and Table 1**

Dear Ms. Sornsins:

Please find enclosed the referenced one-year-review report. The report is due to be submitted by September 22, 2022.

The Board complies with A.R.S. § 41-1091.

For questions about this report, please contact the Board's executive director, Patricia McSorley, at 480-551-2791 or [patricia.mcsorley@azmd.gov](mailto:patricia.mcsorley@azmd.gov).

Sincerely,

Patricia McSorley  
Executive Director

**ONE-YEAR-REVIEW REPORT**  
**TITLE 4. PROFESSIONS AND OCCUPATIONS**  
**CHAPTER 16. ARIZONA MEDICAL BOARD**  
**Submitted for November 1, 2022**

INTRODUCTION

The legislature enacted Laws 2021, Chapter 320, as an emergency measure to expand use of telehealth in meeting the health-care needs of Arizonans. The statute (A.R.S. § 36-3606) included a provision allowing a health care provider not licensed in this state to provide telehealth services to individuals in Arizona if the out-of-state health care provider registered with Arizona’s applicable regulatory board and paid a fee specified by the regulatory board. The Board established the fee for an out-of-state health care provider to register to provide telehealth services in Arizona in a rulemaking that went into effect on September 22, 2021. The Board also amended the Board’s time frame table to include the new registration.

As required under A.R.S. § 41-1095(A), this report focuses on the Board’s review of R4-16-205 and Table 1, the two provisions amended under the exemption provided by Laws 2021, Chapter 320, Sec. 24.

Statute that generally authorizes the agency to make rules: A.R.S. § 32-1403(A)(8)

1. Specific statute authorizing the rule: A.R.S. §§ 36-3606(A)(3) and 41-1073

2. Objective of the rule:

R4-16-205. Fees and Charges: The objective of this rule is to establish the fees the Board charges for the licenses, certificates, and registrations it issues.

Table 1. Time Frames: The objective of this rule is to provide notice of the amount of time the Board requires to act on an application.

3. Is the rule effective in achieving its objective? Yes

4. Were there written criticisms of the rule, including written analyses questioning whether the rule is based on valid scientific or reliable principles or methods? No
5. Is the rule consistent with other rules and statutes? Yes
6. Is the rule enforced as written? Yes
7. Is the rule clear, concise, and understandable? Yes

8. Estimated economic, small business, and consumer impact of the rule:

Because Laws 2021, Chapter 320, Sec. 24, exempted the Board from complying with A.R.S. Title 41, Chapter 6, the Board did not prepare an economic, small business, and consumer impact statement when the rulemaking was done. In the 11 months since the rule went into effect, the Board has received 25 applications to register as an out-of-state provider of medical services by telehealth. The Board has approved 22 of the registrations. One application was not approved because the applicant did not have an active license in another jurisdiction. The remaining two applications are pending receipt of required documentation

Under R4-16-205(B), the 25 applicants paid \$500 each to register. This means that under A.R.S. § 32-1406, the Board deposited \$1,250 into the state’s general fund and \$11,250 into the Arizona Medical Board fund.

The Board acted within the time frames specified in Table 1 for all the applications.

9. Has the agency received any business competitiveness analyses of the rule? No
10. If applicable, whether the agency completed additional processes required by law: NA
11. A determination after analysis that the probable benefits of the rule outweigh within this state the probable costs of the rule and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective:

When the legislature enacted A.R.S. § 36-3606, the legislature determined the benefits from allowing registration of out-of-state providers to practice medicine by telehealth outweigh the costs to the state.

The legislature established the paperwork cost when it specified the content of an application that must be submitted and established multiple compliance requirements at A.R.S. § 36-3606(A)(2) through (A)(9), (B), and (C). In establishing these paperwork and compliance requirements, the legislature determined the requirements imposed the least burden and costs on out-of-state providers practicing medicine by telehealth necessary to achieve the underlying regulatory objective.

The only authority provided to the Board under A.R.S. § 36-3606 is to establish a one-time-only registration fee. The fee is the only compliance cost established by the Board in the reviewed rules. For this one-time fee, the Board is required to evaluate the application information submitted by the out-of-state provider, supervise compliance for as long as the out-of-state provider may choose to provide telehealth services to residents of Arizona, and receive and evaluate an annual update from the out-of-state provider. The legislature did not authorize the Board to establish a fee for the annual renewal of the registration by an out-of-state provider of telehealth services.

The rules reviewed for this report comply with the minimal authority the legislature provided to the Board. R4-16-205 establishes the fee the Board charges for an out-of-state health care provider to register to provide telehealth services in Arizona. In establishing the fee amount, the Board assumed registered out-of-state providers would maintain their telehealth registrations because the only cost to the out-of-state providers is to submit a renewal registration form. The Board is required to supervise compliance of the out-of-state providers and process the annual registration forms without authority to charge a renewal fee. Because this is the only authority provided to the Board and because the legislature determined there is benefit in allowing out-of-state providers of services by telehealth to register to provide the services in Arizona, the Board concludes the benefits of the rule outweigh the costs.

The time frames listed in Table 1 run against the Board. The time frames do not regulate out-of-state health care providers.

12. Is the rule more stringent than corresponding federal laws? No

13. For a rule that requires issuance of a regulatory permit, license, or agency authorization, whether the rule complies with A.R.S. § 41-1037:

Neither R4-16-205 nor Table 1 requires issuance of a permit, license, or other authorization. The requirements for registration are established in statute. The rule simply specifies the fee required.

November 21, 2022

Governor's Regulatory Review Council  
100 N. 15<sup>th</sup> Ave., Ste. 305  
Phoenix, AZ 85007

Via email: [grrc@azdoa.gov](mailto:grrc@azdoa.gov)

Dear Members of the Governor's Regulatory Review Council:

This response is being submitted on behalf the Arizona Medical Board (AMB). A similar response was included in the revised One Year Review Report addressing the telehealth registration fee by the Arizona Regulatory Board of Physician Assistants (ARBoPA).

At its meeting on November 1, 2022, the Governor's Regulatory Review Council (GRRC), granted the AMB a postponement to address the questions raised by GRRC members regarding the fees charged by other states who offer a registration process to out-of-physicians seeking to provide telehealth care in a state in which they are not licensed to practice.

In an email dated November 10, 2022, GRRC Staff also presented similar questions related to the One Year Review Report addressing the telehealth registration filed by the ARBoPA.:

GRRC staff is seeking clarification and/or revision to ARBoPA's 1YRR in the following areas:

- **11. Determination that the probable benefits of the rule outweigh the probable costs; least burden and costs analysis**
  - As you likely recall, during the November Council meeting, the Council discussed a similar matter (establishing a fee for out-of-state providers of telehealth services) while considering the Arizona Medical Board's Five-Year Review Report for Title 4, Chapter 16, Article 2. Based on its previous discussion, the Council seems likely to inquire as to (1) what led the Board to establish the \$200 fee amount for out-of-state telehealth providers and (2) how this amount compares to that of other states. Given these likely concerns, GRRC staff would recommend adding additional information to Section 11 of the report to address these areas.
- **12. Is the rule more stringent than corresponding federal laws?**
  - In addition to the existing response ("No"), GRRC staff would recommend explicitly clarifying whether applicable federal law exists.

Currently, there are only 6 other states, like Arizona, that offer an out-of-state physician/physician assistant the ability to practice via telehealth by way of a registration.

States with Telehealth Registration and Fees:

1. Florida No fee
2. West Virginia \$175 for an MD and PA \$100
3. Vermont MD- \$ and PA \$ 175
4. Indiana No fee
5. Minnesota \$75 Annually, plus an application fee of \$100
6. Kansas \$100

A majority of the states, and the standard at this time, is that a physician/physician assistant who wishes to practice telemedicine in the state where a patient is located, must be licensed in and pay the licensing fee associated with practice in that state.

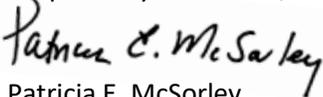

Both the AMB and the ARBoPA applied the “reasonable” standard approach when setting the telehealth registration fee permitted by statute, considering both the cost of the administration and the oversight of the telemedicine registration, including the lack of a renewal fee associated with the annual updating of the registration. The fees were not set to create a barrier or to limit out of state providers from practicing telemedicine within Arizona. The established fees for the telehealth registration are consistent with the fees currently charged for licensure. The MD licensure fee is \$ 500, with a renewal fee of \$500 every two years. The PA licensure fee for two years is \$370 prorated at time of licensure, with a renewal fee of \$370 every two-years.

Currently, the Agency has a licensing department consisting of 12 employees working continuously on the various license application types offered in the State of Arizona: initial license, licensure by endorsement, compact license, universal recognition license, transitional training permit, temporary license, and the telehealth registration. The same staff also processes license applications for physician assistants as well as renewals for the current active licensees (28,352 physicians and 4385 physician assistants).

Taking into consideration the range of fees set by the minority of states that have a telehealth registration, and after reviewing the one-time fees set by the AMB and the ARBoPA for the administration and oversight of the telehealth registration, it would be reasonable to conclude that the probable benefit outweighs to cost to those registering to provide telehealth services in Arizona.

The function of professional licensing and regulation is a state’s right and there are no federal laws giving or providing telehealth registration.

Respectfully submitted,

Patricia E. McSorley  
Executive Director

## TITLE 4. PROFESSIONS AND OCCUPATIONS

### CHAPTER 16. ARIZONA MEDICAL BOARD

---

#### **R4-16-205. Fees and Charges**

- A.** As specifically authorized under A.R.S. § 32-1436(A), the Board establishes and shall collect the following fees:
1. Application for a license through endorsement, USMLE Step 3, or Endorsement with SPX Examination, \$500;
  2. Issuance of an initial license, \$500, prorated from date of issuance to date of license renewal;
  3. Renewal of license for two years, \$500;
  4. Application to reactivate an inactive license, \$500;
  5. Locum tenens registration, \$350;
  6. Annual registration of an approved internship, residency, clinical fellowship program, or short-term residency program, \$50;
  7. Annual teaching license at an approved school of medicine or at an approved hospital internship, residency, or clinical fellowship program, \$250;
  8. Five-day teaching permit at an approved school of medicine or at an approved hospital internship, residency, or clinical fellowship program, \$100;
  9. Initial registration to dispense drugs and devices, \$200;
  10. Annual renewal to dispense drugs and devices, \$150;
  11. Penalty fee for late renewal of an active license, \$350; and
  12. Application for temporary license, \$250.
- B.** Under the specific authority provided by A.R.S. § 36-3606(A)(3), the Board establishes and shall collect the following fee to register as an out-of-state health care provider of telehealth services: \$500.
- C.** The fees specified in subsections (A) and (B) are nonrefundable unless A.R.S. §§ 32-1436(C) or 41-1077 applies.
- D.** As specifically authorized under A.R.S. § 32-1436(B), the Board establishes the following charges for the services listed:
1. Processing fingerprints to conduct a criminal background check, \$50;
  2. Providing a duplicate license, \$50;
  3. Verifying a license, \$10 per request;
  4. Providing a copy of records, documents, letters, minutes, applications, and files, \$1 for the first three pages and 25¢ for each additional page;
  5. Providing a copy of annual allopathic medical directory, \$30; and
  6. Providing an electronic medium containing public information about licensed physicians, \$100.

**Table 1. Time Frames****Time Frames (in calendar days)**

<b>Type of License</b>	<b>Overall Time Frame</b>	<b>Administrative Review Time Frame</b>	<b>Time to Respond to Deficiency Notice</b>	<b>Substantive Review Time Frame</b>	<b>Time to Respond to Request for Additional Information</b>
Initial License by Examination or Endorsement	240	120	365	120	90
Biennial License Renewal	90	45	60	45	60
Locum Tenens or Pro Bono Registration	120	60	90	60	30

One-year Training Permit	40	20	30	20	30
Annual Registration to Dispense Drugs and Devices	150	45	30	105	30
Registration as an Out-of-state Health Care Provider of Telehealth Services	40	20	30	20	30

32-1403. Powers and duties of the board; compensation; immunity; committee on executive director selection and retention

A. The primary duty of the board is to protect the public from unlawful, incompetent, unqualified, impaired or unprofessional practitioners of allopathic medicine through licensure, regulation and rehabilitation of the profession in this state. The powers and duties of the board include:

1. Ordering and evaluating physical, psychological, psychiatric and competency testing of licensed physicians and candidates for licensure as may be determined necessary by the board.
2. Initiating investigations and determining on its own motion whether a doctor of medicine has engaged in unprofessional conduct or provided incompetent medical care or is mentally or physically unable to engage in the practice of medicine.
3. Developing and recommending standards governing the profession.
4. Reviewing the credentials and the abilities of applicants whose professional records or physical or mental capabilities may not meet the requirements for licensure or registration as prescribed in article 2 of this chapter in order for the board to make a final determination whether the applicant meets the requirements for licensure pursuant to this chapter.
5. Disciplining and rehabilitating physicians.
6. Engaging in a full exchange of information with the licensing and disciplinary boards and medical associations of other states and jurisdictions of the United States and foreign countries and the Arizona medical association and its components.
7. Directing the preparation and circulation of educational material the board determines is helpful and proper for licensees.
8. Adopting rules regarding the regulation and the qualifications of doctors of medicine.
9. Establishing fees and penalties as provided pursuant to section 32-1436.
10. Delegating to the executive director the board's authority pursuant to section 32-1405 or 32-1451. The board shall adopt substantive policy statements pursuant to section 41-1091 for each specific licensing and regulatory authority the board delegates to the executive director.
11. Determining whether a prospective or current Arizona licensed physician has the training or experience to demonstrate the physician's ability to treat and manage opiate-dependent patients as a qualifying physician pursuant to 21 United States Code section 823(g)(2)(G)(ii).

B. The board may appoint one of its members to the jurisdiction arbitration panel pursuant to section 32-2907, subsection B.

C. There shall be no monetary liability on the part of and no cause of action shall arise against the executive director or such other permanent or temporary personnel or professional medical investigators for any act done or proceeding undertaken or performed in good faith and in furtherance of the purposes of this chapter.

D. In conducting its investigations pursuant to subsection A, paragraph 2 of this section, the board may receive and review staff reports relating to complaints and malpractice claims.

E. The board shall establish a program that is reasonable and necessary to educate doctors of medicine regarding the uses and advantages of autologous blood transfusions.

F. The board may make statistical information on doctors of medicine and applicants for licensure under this article available to academic and research organizations.

G. The committee on executive director selection and retention is established consisting of the Arizona medical board and the chairperson and vice chairperson of the Arizona regulatory board of physician assistants. The committee is a public body and is subject to the requirements of title 38, chapter 3, article 3.1. The committee is responsible for appointing the executive director pursuant to section 32-1405. All members of the committee are voting members of the committee. The committee shall elect a chairperson and a vice chairperson when the committee meets but no more frequently than once a year. The chairperson shall call meetings of the committee as necessary, and the vice chairperson may call meetings of the committee that are necessary if the chairperson is not available. The presence of eight members of the committee at a meeting constitutes a quorum. The committee meetings may be held using communications equipment that allows all members who are participating in the meeting to hear each other. If any discussions occur in an executive session of the committee, notwithstanding the requirement that discussions made at an executive session be kept confidential as specified in section 38-431.03, the chairperson and vice chairperson of the Arizona regulatory board of physician assistants may discuss this information with the Arizona regulatory board of physician assistants in executive session. This disclosure of executive session information to the Arizona regulatory board of physician assistants does not constitute a waiver of confidentiality or any privilege, including the attorney-client privilege.

H. The officers of the Arizona medical board and the Arizona regulatory board of physician assistants shall meet twice a year to discuss matters of mutual concern and interest.

I. The board may accept and expend grants, gifts, devises and other contributions from any public or private source, including the federal government. Monies received under this subsection do not revert to the state general fund at the end of a fiscal year.

### 36-3606. Interstate telehealth services; registration; requirements; venue; exceptions

A. A health care provider who is not licensed in this state may provide telehealth services to a person located in this state if the health care provider complies with all of the following:

1. Registers with this state's applicable health care provider regulatory board or agency that licenses comparable health care providers in this state on an application prescribed by the board or agency that contains all of the following:

(a) The health care provider's name.

(b) Proof of the health care provider's professional licensure, including all United States jurisdictions in which the provider is licensed and the license numbers. Verification of licensure in another state shall be made through information obtained from the applicable regulatory board's website.

(c) The health care provider's address, email address and telephone number, including information if the provider needs to be contacted urgently.

(d) Evidence of professional liability insurance coverage.

(e) Designation of a duly appointed statutory agent for service of process in this state.

2. Before prescribing a controlled substance to a patient in this state, registers with the controlled substances prescription monitoring program established pursuant to chapter 28 of this title.

3. Pays the registration fee as determined by the applicable health care provider regulatory board or agency.

4. Holds a current, valid and unrestricted license to practice in another state that is substantially similar to a license issued in this state to a comparable health care provider and is not subject to any past or pending disciplinary proceedings in any jurisdiction. The health care provider shall notify the applicable health care provider regulatory board or agency within five days after any restriction is placed on the health care provider's license or any disciplinary action is initiated or imposed. The health care provider regulatory board or agency registering the health care provider may use the national practitioner databank to verify the information submitted pursuant to this paragraph.

5. Acts in full compliance with all applicable laws and rules of this state, including scope of practice, laws and rules governing prescribing, dispensing and administering prescription drugs and devices, telehealth requirements and the best practice guidelines adopted by the telehealth advisory committee on telehealth best practices established by section 36-3607.

6. Complies with all existing requirements of this state and any other state in which the health care provider is licensed regarding maintaining professional liability insurance, including coverage for telehealth services provided in this state.

7. Consents to this state's jurisdiction for any disciplinary action or legal proceeding related to the health care provider's acts or omissions under this article.

8. Follows this state's standards of care for that particular licensed health profession.

9. Annually updates the health care provider's registration for accuracy and submits to the applicable health care provider regulatory board or agency a report with the number of patients the provider served in this state and the total number and type of encounters in this state for the preceding year.

B. A health care provider who is registered pursuant to this section may not:

1. Open an office in this state, except as part of a multistate provider group that includes at least one health care provider who is licensed in this state through the applicable health care provider regulatory board or agency.

2. Provide in-person health care services to persons located in this state without first obtaining a license through the applicable health care provider regulatory board or agency.

C. A health care provider who fails to comply with the applicable laws and rules of this state is subject to investigation and both nondisciplinary and disciplinary action by the applicable health care provider regulatory board or agency in this state. For the purposes of disciplinary action by the applicable health care provider regulatory board or agency in this state, all statutory authority regarding investigating,

rehabilitating and educating health care providers may be used. If a health care provider fails to comply with the applicable laws and rules of this state, the applicable health care provider regulatory board or agency in this state may revoke or prohibit the health care provider's privileges in this state, report the action to the national practitioner database and refer the matter to the licensing authority in the state or states where the health care provider possesses a professional license. In any matter or proceeding arising from such a referral, the applicable health care provider regulatory board or agency in this state may share any related disciplinary and investigative information in its possession with another state licensing board.

D. The venue for any civil or criminal action arising from a violation of this section is the patient's county of residence in this state.

E. A health care provider who is not licensed to provide health care services in this state but who holds an active license to provide health care services in another jurisdiction and who provides telehealth services to a person located in this state is not subject to the registration requirements of this section if either of the following applies:

1. The services are provided under one of the following circumstances:

(a) In response to an emergency medication condition.

(b) In consultation with a health care provider who is licensed in this state and who has the ultimate authority over the patient's diagnosis and treatment.

(c) To provide after-care specifically related to a medical procedure that was delivered in person in another state.

(d) To a person who is a resident of another state and the telehealth provider is the primary care provider or behavioral health provider located in the person's state of residence.

2. The health care provider provides fewer than ten telehealth encounters in a calendar year.

#### 41-1073. Time frames; exception

A. No later than December 31, 1998, an agency that issues licenses shall have in place final rules establishing an overall time frame during which the agency will either grant or deny each type of license that it issues. Agencies shall submit their overall time frame rules to the governor's regulatory review council pursuant to the schedule developed by the council. The council shall schedule each agency's rules so that final overall time frame rules are in place no later than December 31, 1998. The rule regarding the overall time frame for each type of license shall state separately the administrative completeness review time frame and the substantive review time frame.

B. If a statutory licensing time frame already exists for an agency but the statutory time frame does not specify separate time frames for the administrative completeness review and the substantive review, by rule the agency shall establish separate time frames for the administrative completeness review and the substantive review, which together shall not exceed the statutory overall time frame. An agency may establish different time frames for initial licenses, renewal licenses and revisions to existing licenses.

C. The submission by the department of environmental quality of a revised permit to the United States environmental protection agency in response to an objection by that agency shall be given the same effect

as a notice granting or denying a permit application for licensing time frame purposes. For the purposes of this subsection, "permit" means a permit required by title 49, chapter 2, article 3.1 or section 49-426.

D. In establishing time frames, agencies shall consider all of the following:

1. The complexity of the licensing subject matter.
2. The resources of the agency granting or denying the license.
3. The economic impact of delay on the regulated community.
4. The impact of the licensing decision on public health and safety.
5. The possible use of volunteers with expertise in the subject matter area.
6. The possible increased use of general licenses for similar types of licensed businesses or facilities.
7. The possible increased cooperation between the agency and the regulated community.
8. Increased agency flexibility in structuring the licensing process and personnel.

E. This article does not apply to licenses issued either:

1. Pursuant to tribal state gaming compacts.
2. Within seven days after receipt of initial application.
3. By a lottery method.

**ARIZONA REGULATORY BOARD OF PHYSICIAN ASSISTANTS**

Title 4, Chapter 17, Article 2

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - ONE-YEAR REVIEW REPORT

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 21, 2022

**SUBJECT:** ARIZONA REGULATORY BOARD OF PHYSICIAN ASSISTANTS  
Title 4, Chapter 17, Article 2

---

### Summary

This One-Year Review Report (1YRR) from the Arizona Regulatory Board of Physician Assistants (Board) relates to rules in Title 4, Chapter 17, Article 2 regarding fees and charges for licensure. These rules were amended under an exemption provided by Laws 2021, Chapter 320, Section 24, an emergency measure that was created to expand the availability of telehealth services in order to meet the health care needs of Arizonans. In a rulemaking that went into effect on September 22, 2021, the Board established the fee for out-of-state health care providers to register to provide physician assistant services by telehealth in Arizona. In this rulemaking, the Board also amended the time frame table to include the applicable time frames for registration as an out-of-state provider of telehealth services.

The Board submitted this 1YRR pursuant to A.R.S. § 41-1095.

**1. Has the agency analyzed whether the rules are authorized by statute?**

Yes, the Board cites both general and specific statutory authority for these rules.

**2. Summary of the agency's economic impact comparison and identification of stakeholders:**

Because Laws 2021, Chapter 320, Sec. 24 exempted the Board from complying with A.R.S. Title 41, Chapter 6, the Board did not prepare an economic, small business, and consumer impact statement at the time that the rulemaking was completed. In the 11 months since the rule went into effect, the Board has not received any applications to register as an out-of-state provider of physician assistant services by telehealth. As a result, the Board has received no registration fees.

**3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Board indicates that when the Legislature enacted A.R.S. § 36-3606, the legislature determined that the benefits of allowing out-of-state providers to register to provide telehealth services outweighed the costs to the state.

The only authority provided to the Board under A.R.S. § 36-3606 is to establish a one-time-only registration fee of \$200. For this one-time fee, the Board is required to evaluate the information submitted by an out-of-state provider, supervise compliance for as long as the provider chooses to provide telehealth services to Arizona residents, and receive and evaluate annual updates from the provider. Based on the legislature's cost-benefit determination and the limited authority provided under A.R.S. § 36-3606, the Board concludes that the benefits of the rule outweigh the costs.

The time frames listed in Table 1 run against the Board. These time frames do not regulate out-of-state health care providers.

The Board indicates that the fee amount is reasonable compared to the telehealth registration fees established by other states. Additionally, the Board indicates that the fee amount is comparable to the standard licensure fees. Council staff believes that the Board has adequately shown that the rules impose the least burden and costs to those regulated.

**4. Has the agency received any written criticisms of the rules since the rule was adopted?**

No, the Board has not received any written criticisms of the rules since the rule was adopted.

**5. Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Board indicates that the rules are clear, concise, and understandable.

**6. Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Board indicates that the rules are consistent with other rules and statutes.

**7. Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Board indicates that the rules are effective in achieving their objectives.

**8. Has the agency analyzed the current enforcement status of the rules?**

Yes, the Board states that the rules are enforced as written.

**9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

No, the Board indicates that there is no corresponding federal law.

**10. Has the agency completed any additional process required by law?**

Not applicable; no additional process is required.

**11. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

No; the rules do not require the issuance of a permit or license. R4-17-204 and Table 1 only specify the required fee.

**12. Conclusion**

Council staff finds that the Board has submitted an adequate report pursuant to A.R.S. § 41-1095. Council staff recommends approval of this report.

**RE: Arizona Regulatory Board of Physician Assistants  
One-year-review Report  
R4-17-204 and Table 1**

Dear Ms Sornsin:

Please find enclosed the referenced one-year-review report. The report is due to be submitted by September 22, 2022.

The Board complies with A.R.S. § 41-1091.

For questions about this report, please contact the Board's executive director, Patricia McSorley, at 480-551-2791 or [patricia.mcsorley@azmd.gov](mailto:patricia.mcsorley@azmd.gov).

Sincerely,

Patricia McSorley  
Executive Director

**ONE-YEAR-REVIEW REPORT**  
**TITLE 4. PROFESSIONS AND OCCUPATIONS**  
**CHAPTER 17. ARIZONA REGULATORY BOARD OF PHYSICIAN ASSISTANTS**  
**Submitted for November 1, 2022**

INTRODUCTION

The legislature enacted Laws 2021, Chapter 320, as an emergency measure to expand use of telehealth in meeting the health-care needs of Arizonans. The statute (A.R.S. § 36-3606) included a provision allowing a health care provider not licensed in this state to provide telehealth services to individuals in Arizona if the out-of-state health care provider registered with Arizona’s applicable regulatory board and paid a fee specified by the regulatory board. The Board established the fee for an out-of-state health care provider to register to provide telehealth services in Arizona in a rulemaking that went into effect on September 22, 2021. The Board also amended the Board’s time frame table to include the new registration.

As required under A.R.S. § 41-1095(A), this report focuses on the Board’s review of Table 1 and R4-17-204, the two provisions amended under the exemption provided by Laws 2021, Chapter 320, Sec. 24.

Statute that generally authorizes the agency to make rules: A.R.S. § 32-2504(C)

1. Specific statute authorizing the rule: A.R.S. §§ 36-3606(A)(3) and 41-1073

2. Objective of the rule:

Table 1. Time Frames (in days): The objective of this rule is to provide notice of the amount of time the Board requires to act of an application.

R4-17-204. Fees and Charges: The objective of this rule is to establish the fees the Board charges for the licenses and registrations it issues.

3. Is the rule effective in achieving its objective? Yes

4. Were there written criticisms of the rule, including written analyses questioning whether the rule is based on valid scientific or reliable principles or methods? No
5. Is the rule consistent with other rules and statutes? Yes
6. Is the rule enforced as written? Yes
7. Is the rule clear, concise, and understandable? Yes

8. Estimated economic, small business, and consumer impact of the rule:

Because Laws 2021, Chapter 320, Sec. 24, exempted the Board from complying with A.R.S. Title 41, Chapter 6, the Board did not prepare an economic, small business, and consumer impact statement when the rulemaking was done. In the 11 months since the rule went into effect, the Board has received no applications to register as an out-of-state provider of physician assistant services by telehealth. As a result, the Board has received no registration fees and has deposited no monies in the state's general fund or the Arizona Medical Board fund.

The Board acts within the time frames specified in Table 1.

9. Has the agency received any business competitiveness analyses of the rule? No
10. If applicable, whether the agency completed additional processes required by law: NA
11. A determination after analysis that the probable benefits of the rule outweigh within this state the probable costs of the rule and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective:

When the legislature enacted A.R.S. § 36-3606, the legislature determined the benefits from allowing registration of out-of-state providers of physician assistant services by telehealth outweigh the costs to the state. The legislature established the paperwork cost when it specified the content of an application that must be submitted and established multiple compliance requirements at A.R.S. § 36-3606(A)(2) through (A)(9), (B), and (C). In establishing these paperwork and compliance requirements, the legislature determined the requirements imposed the least burden and costs on out-

of-state providers of physician assistant services by telehealth necessary to achieve the underlying regulatory objective.

The only authority provided to the Board under A.R.S. § 36-3606 is to establish a one-time-only registration fee. The fee is the only compliance cost established by the Board in the reviewed rules. For this one-time fee, the Board is required to evaluate the application information submitted by the out-of-state provider, supervise compliance for as long as the out-of-state provider may choose to provide telehealth services to residents of Arizona, and receive and evaluate an annual update from the out-of-state provider. The legislature did not authorize the Board to establish a fee for the annual renewal of the registration by an out-of-state provider of telehealth services.

The rules reviewed for this report comply with the minimal authority the legislature provided to the Board. R4-17-204 establishes the fee the Board charges for an out-of-state health care provider to register to provide telehealth services in Arizona. In establishing the fee amount, the Board assumed registered out-of-state providers would maintain their telehealth registrations because the only cost to the out-of-state providers is to submit a renewal registration form. The Board is required to supervise compliance of the out-of-state providers and process the annual registration forms without authority to charge a renewal fee. Because this is the only authority provided to the Board and because the legislature determined there is benefit in allowing out-of-state providers of services by telehealth to register to provide the services in Arizona, the Board concludes the benefits of the rule outweigh the costs.

The time frames listed in Table 1 run against the Board. The time frames do not regulate out-of-state health care providers.

Currently, there are only 6 other states, like Arizona, that offer an out-of-state physician/physician assistant the ability to practice via telehealth by way of a registration.

#### States with Telehealth Registration and Fees:

1. Florida No fee
2. West Virginia \$175 for an MD and PA \$100
3. Vermont MD- \$ and PA \$ 175
4. Indiana No fee
5. Minnesota \$75 Annually, plus an application fee of \$100
6. Kansas \$100

A majority of the states, and the standard at this time, is that a physician/physician assistant who wishes to practice telemedicine in the state where a patient is located, must be licensed in and pay the licensing fee associated with practice in that state

Both the AMB and the ARBoPA applied the “reasonable” standard approach when setting the telehealth registration fee, considering both the cost of the administration and the oversight of the telemedicine registration, including the lack of a renewal fee associated with the annual updating of the registration. The fees were not set to create a barrier or to limit out of state providers from practicing telemedicine within Arizona. The established fees for the telehealth registration are consistent with the fees currently charged for licensure. The MD licensure fee is \$ 500, with a renewal fee of \$500 every two years. The PA licensure fee for two years is \$370 prorated at time of licensure, with a renewal fee of \$370 every two-years.

Currently, the Agency has a licensing department consisting of 12 employees working continuously on the various license application types offered in the State of Arizona: initial license, licensure by endorsement, Compact license, Universal Recognition License Medical Graduate Training Permit, temporary license, and the telehealth training permit. The same staff also process license applications for physician assistants. The same licensing staff also process the renewals for the 28,352 physicians and the 4385 physician assistants.

Taking into consideration the range of fees set by the minority of states that have a telehealth registration, and after reviewing the one-time fees set by the AMB and the ARBoPA for the administration and oversight of the telehealth registration, it would be reasonable to conclude that the probable benefit outweighs to cost to those registering to provide telehealth services in Arizona.

12. Is the rule more stringent than corresponding federal laws?

The function of professional licensing and regulation is a state’s right and there are no federal laws giving or providing telehealth registration.

13. For a rule that requires issuance of a regulatory permit, license, or agency authorization, whether the rule complies with A.R.S. § 41-1037:

Neither R4-17-204 nor Table 1 requires issuance of a permit, license, or other authorization. The requirements for registration are established in statute. The rule simply specifies the fee required.

**TITLE 4. PROFESSIONS AND OCCUPATIONS**

**CHAPTER 17. ARIZONA REGULATORY BOARD OF PHYSICIAN ASSISTANTS**

Table 1. Time Frames (in days)

Type of License	Overall Time Frame	Administrative Review Time Frame	Time to Respond to Deficiency Notice	Substantive Review Time Frame	Time to Respond to Request for Additional Information
Regular License including schedule II or schedule III controlled substances approval R4-17-203	120	30	365	90	90
License Renewal R4-17-206	75	30	60	45	60
Registration as an Out-of-state Health Care Provider of Telehealth Services A.R.S. § 36-3606(A)(3)	40	20	30	20	30

**R4-17-204. Fees and Charges**

- A. As expressly authorized under A.R.S. § 32-2526(A)(1) through (4), the Board shall charge the following fees:
1. License application - \$125.00;
  2. Regular license - \$370.00, prorated for each month remaining in the biennial period;
  3. Regular license renewal - \$370.00 if the renewal application is postmarked no later than the applicant's birthdate; and
  4. Penalty for late renewal - \$100.00.
- B. Under the specific authority provided by A.R.S. § 36-3606(A)(3), the Board establishes and shall collect the following fee to register as an out-of-state health care provider of telehealth services: \$200.
- C. The fees specified in subsections (A) and (B) are nonrefundable unless A.R.S. §§ 32-2526(B) or 41-1077 applies.
- D. As expressly authorized under A.R.S. § 32-2526(A)(5) through (9), the Board establishes the following charges for providing the services listed:
1. Duplicate license - \$25.00;
  2. Copies of Board documents - \$1.00 for first three pages, \$.25 for each additional page;
  3. Medical Directory (CD-ROM) - \$30.00;
  4. Data Disk - \$100.00; and

32-2504. Powers and duties; delegation of authority; rules; subcommittees; immunity

A. The board shall:

1. As its primary duty, protect the public from unlawful, incompetent, unqualified, impaired or unprofessional physician assistants.
  2. License and regulate physician assistants pursuant to this chapter.
  3. Order and evaluate physical, psychological, psychiatric and competency testing of licensees and applicants the board determines is necessary to enforce this chapter.
  4. Review the credentials and the abilities of applicants for licensure whose professional records or physical or mental capabilities may not meet the requirements of this chapter.
  5. Initiate investigations and determine on its own motion whether a licensee has engaged in unprofessional conduct or is or may be incompetent or mentally or physically unable to safely perform health care tasks.
  6. Establish fees and penalties pursuant to section 32-2526.
  7. Develop and recommend standards governing the profession.
  8. Engage in the full exchange of information with the licensing and disciplinary boards and professional associations of other states and jurisdictions of the United States and foreign countries and a statewide association for physician assistants.
  9. Direct the preparation and circulation of educational material the board determines is helpful and proper for its licensees.
  10. Discipline and rehabilitate physician assistants pursuant to this chapter.
  11. Certify physician assistants for thirty-day prescription privileges for schedule II, schedule III, schedule IV and schedule V controlled substances that are opioids or benzodiazepine and ninety-day prescription privileges for schedule II, schedule III, schedule IV and schedule V controlled substances that are not opioids or benzodiazepine if the physician assistant either:
    - (a) Within the preceding three years of application, completed forty-five hours in pharmacology or clinical management of drug therapy or at the time of application is certified by a national commission on the certification of physician assistants or its successor.
    - (b) Met any other requirement established by board rule.
- B. The board may delegate to the executive director the board's authority pursuant to this section or section 32-2551. The board shall adopt a substantive policy statement pursuant to section 41-1091 for each specific licensing and regulatory authority the board delegates to the executive director.
- C. The board may make and adopt rules necessary or proper for the administration of this chapter.

D. The chairperson may establish subcommittees consisting of board members and define their duties as the chairperson deems necessary to carry out the functions of the board.

E. Board employees, including the executive director, temporary personnel and professional medical investigators, are immune from civil liability for good faith actions they take to enforce this chapter.

F. In performing its duties pursuant to subsection A of this section, the board may receive and review staff reports on complaints, malpractice cases and all investigations.

G. The chairperson and vice chairperson of the Arizona regulatory board of physician assistants are members of the committee on executive director selection and retention established by section 32-1403, subsection G, which is responsible for the appointment of the executive director pursuant to section 32-1405.

### 36-3606. Interstate telehealth services; registration; requirements; venue; exceptions

A. A health care provider who is not licensed in this state may provide telehealth services to a person located in this state if the health care provider complies with all of the following:

1. Registers with this state's applicable health care provider regulatory board or agency that licenses comparable health care providers in this state on an application prescribed by the board or agency that contains all of the following:

(a) The health care provider's name.

(b) Proof of the health care provider's professional licensure, including all United States jurisdictions in which the provider is licensed and the license numbers. Verification of licensure in another state shall be made through information obtained from the applicable regulatory board's website.

(c) The health care provider's address, email address and telephone number, including information if the provider needs to be contacted urgently.

(d) Evidence of professional liability insurance coverage.

(e) Designation of a duly appointed statutory agent for service of process in this state.

2. Before prescribing a controlled substance to a patient in this state, registers with the controlled substances prescription monitoring program established pursuant to chapter 28 of this title.

3. Pays the registration fee as determined by the applicable health care provider regulatory board or agency.

4. Holds a current, valid and unrestricted license to practice in another state that is substantially similar to a license issued in this state to a comparable health care provider and is not subject to any past or pending disciplinary proceedings in any jurisdiction. The health care provider shall notify the applicable health care provider regulatory board or agency within five days after any restriction is placed on the health care provider's license or any disciplinary action is initiated or imposed. The health care provider regulatory

board or agency registering the health care provider may use the national practitioner databank to verify the information submitted pursuant to this paragraph.

5. Acts in full compliance with all applicable laws and rules of this state, including scope of practice, laws and rules governing prescribing, dispensing and administering prescription drugs and devices, telehealth requirements and the best practice guidelines adopted by the telehealth advisory committee on telehealth best practices established by section 36-3607.

6. Complies with all existing requirements of this state and any other state in which the health care provider is licensed regarding maintaining professional liability insurance, including coverage for telehealth services provided in this state.

7. Consents to this state's jurisdiction for any disciplinary action or legal proceeding related to the health care provider's acts or omissions under this article.

8. Follows this state's standards of care for that particular licensed health profession.

9. Annually updates the health care provider's registration for accuracy and submits to the applicable health care provider regulatory board or agency a report with the number of patients the provider served in this state and the total number and type of encounters in this state for the preceding year.

B. A health care provider who is registered pursuant to this section may not:

1. Open an office in this state, except as part of a multistate provider group that includes at least one health care provider who is licensed in this state through the applicable health care provider regulatory board or agency.

2. Provide in-person health care services to persons located in this state without first obtaining a license through the applicable health care provider regulatory board or agency.

C. A health care provider who fails to comply with the applicable laws and rules of this state is subject to investigation and both nondisciplinary and disciplinary action by the applicable health care provider regulatory board or agency in this state. For the purposes of disciplinary action by the applicable health care provider regulatory board or agency in this state, all statutory authority regarding investigating, rehabilitating and educating health care providers may be used. If a health care provider fails to comply with the applicable laws and rules of this state, the applicable health care provider regulatory board or agency in this state may revoke or prohibit the health care provider's privileges in this state, report the action to the national practitioner database and refer the matter to the licensing authority in the state or states where the health care provider possesses a professional license. In any matter or proceeding arising from such a referral, the applicable health care provider regulatory board or agency in this state may share any related disciplinary and investigative information in its possession with another state licensing board.

D. The venue for any civil or criminal action arising from a violation of this section is the patient's county of residence in this state.

E. A health care provider who is not licensed to provide health care services in this state but who holds an active license to provide health care services in another jurisdiction and who provides telehealth services to a person located in this state is not subject to the registration requirements of this section if either of the following applies:

1. The services are provided under one of the following circumstances:

(a) In response to an emergency medication condition.

(b) In consultation with a health care provider who is licensed in this state and who has the ultimate authority over the patient's diagnosis and treatment.

(c) To provide after-care specifically related to a medical procedure that was delivered in person in another state.

(d) To a person who is a resident of another state and the telehealth provider is the primary care provider or behavioral health provider located in the person's state of residence.

2. The health care provider provides fewer than ten telehealth encounters in a calendar year.

**41-1073. Time frames; exception**

A. No later than December 31, 1998, an agency that issues licenses shall have in place final rules establishing an overall time frame during which the agency will either grant or deny each type of license that it issues. Agencies shall submit their overall time frame rules to the governor's regulatory review council pursuant to the schedule developed by the council. The council shall schedule each agency's rules so that final overall time frame rules are in place no later than December 31, 1998. The rule regarding the overall time frame for each type of license shall state separately the administrative completeness review time frame and the substantive review time frame.

B. If a statutory licensing time frame already exists for an agency but the statutory time frame does not specify separate time frames for the administrative completeness review and the substantive review, by rule the agency shall establish separate time frames for the administrative completeness review and the substantive review, which together shall not exceed the statutory overall time frame. An agency may establish different time frames for initial licenses, renewal licenses and revisions to existing licenses.

C. The submission by the department of environmental quality of a revised permit to the United States environmental protection agency in response to an objection by that agency shall be given the same effect as a notice granting or denying a permit application for licensing time frame purposes. For the purposes of this subsection, "permit" means a permit required by title 49, chapter 2, article 3.1 or section 49-426.

D. In establishing time frames, agencies shall consider all of the following:

1. The complexity of the licensing subject matter.

2. The resources of the agency granting or denying the license.

3. The economic impact of delay on the regulated community.

4. The impact of the licensing decision on public health and safety.

5. The possible use of volunteers with expertise in the subject matter area.

6. The possible increased use of general licenses for similar types of licensed businesses or facilities.

7. The possible increased cooperation between the agency and the regulated community.

8. Increased agency flexibility in structuring the licensing process and personnel.

E. This article does not apply to licenses issued either:

1. Pursuant to tribal state gaming compacts.

2. Within seven days after receipt of initial application.

3. By a lottery method.

**ARIZONA STATE BOARD OF INVESTMENT**

Title 2 Chapter 13, Article 2 (AZ 529, Arizona's Education Savings Plan)

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - ONE-YEAR REVIEW REPORT

---

**MEETING DATE:** Dec 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** October 21, 2022

**SUBJECT: ARIZONA STATE BOARD OF INVESTMENT**  
Title 2 Chapter 13, Article 2 (AZ 529, Arizona's Education Savings Plan)

---

### Summary

This One Year Review Report (1YRR) from the Arizona State Board of Investment (Board) relates to Title 2 Chapter 13, Article 2 regarding Arizona's Education Savings Plan, AZ 529. Amendments to these rules were adopted in an exempt rulemaking pursuant to Laws 2020, Chapter 88 which granted the Board a one time exemption from the Administrative Procedures Act (APA) in Title 41, Chapter 6 of the Arizona Revised Statutes. A copy of the Notice of Exempt Rulemaking is included with the final materials for the Council's reference.

This Session Law transferred the Arizona Family College Savings Program from the Arizona Commission for Postsecondary Education to the Office of the Arizona State Treasurer as Program Administrator and the Board as Program Trustee. These rules support the Board's objectives to reflect the new structure and operation of the AZ529 within the Arizona State Treasurer and remove and update any outdated rules language and terminology.

The Board submitted this 1YRR pursuant to ARS § 41-1095.

#### **1. Has the agency analyzed whether the rules are authorized by statute?**

Yes. The Board cites both general and specific statutory authority for these rules.

**2. Summary of the agency's economic impact comparison and identification of stakeholders:**

No economic impact analysis was submitted as the Board indicates no economic, small business, or consumer impact was implicated.

**3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Board states that the rules provide necessary guidance for making contributions, disclosing fees, changing beneficiaries and making qualified withdrawals from AZ529 Plans, but minimize paperwork and compliance costs. The rules received one comment during development, but the Board states that the comment was addressed.

**4. Has the agency received any written criticisms of the rules since the rule was adopted?**

No, the Board has not received any written criticisms of the rules since the rule was adopted.

**5. Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Board indicates the rules are overall clear, concise, and understandable.

**6. Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Board indicates the rules are consistent with other rules and statutes.

**7. Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Board indicates the rules are effective in achieving their objectives.

**8. Has the agency analyzed the current enforcement status of the rules?**

Yes, the Board indicates the rules are enforced as written.

**9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Section 529 of the Internal Revenue Service Code is applicable to the subject of the rule. The rules are not more stringent than this federal law.

**10. Has the agency completed any additional process required by law?**

The Board indicates no additional process was required.

**11. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

The Board indicates that the current rules also do not require the issuance of a license or agency authorization. However, ARS § 15-1872 requires the Board to approve financial institutions to act as depositories and managers of the AZ529 Plan.

**12. Conclusion**

Council staff finds that the Board submitted an adequate report pursuant to ARS § 41-1095. The Board is not proposing any additional action. Council Staff requests placement on the five year review timeline moving forward as any further rulemaking revisions will comply with all regular rulemaking requirements. Council staff also recommends approval of the report.

**RE: State Board of Investment**  
**One-Year Review Report for 2 A.A.C. 13, Article 2**

Dear Ms. Sornsin,

As requested, here is a cover letter for the One-Year Review Report that was originally submitted from the State Board of Investment on September 12, 2022.

The One-Year Review Report is for 2 A.A.C. 13, Article 2 for the Council's review and approval which was due on September 28, 2022.

Additionally, the Board complies with A.R.S. § 41-1091.

For questions about this report, please contact Jeffrey Ong at 602-542-7880 or [jeffreyo@aztreasury.gov](mailto:jeffreyo@aztreasury.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "Kimberly Yee".

The Honorable Kimberly Yee  
Arizona State Treasurer and Chairwoman, State Board of Investment

**STATE BOARD OF INVESTMENT  
ONE-YEAR REVIEW REPORT  
2 A.A.C. 13, ARTICLE 2  
September 28, 2022**

Pursuant to [A.R.S. § 41-1095](#), the Arizona State Board of Investment (Board) submits a one-year review report for [2 A.A.C. 13, Article 2](#).

[Laws 2020, Chapter 88](#), exempted the Board from the rulemaking requirements of Title 41, Chapter 6, Arizona Revised Statutes, for one-year after the effective date of October 1, 2020, for the purpose of adopting rules relating to the AZ529, Arizona’s Education Savings Plan. The current rules were amended and adopted by the Board and were effective on September 28, 2021.

**Summary of Findings**

Additionally, as required by [A.R.S. § 41-1095](#), the Board is providing a concise analysis of the following:

**1. The rule's effectiveness in achieving its objectives, including a summary of any available data supporting the conclusions reached.**

- [Laws 2020, Chapter 88](#) transferred the Arizona Family College Savings Program (subsequently renamed to AZ529, Arizona’s Education Savings Plan by [Laws 2021, Chapter 188](#)) from the Arizona Commission for Postsecondary Education (Commission) to the Office of the Arizona State Treasurer (ASTO) as Program Administrator and the Board as Program Trustee, effective October 1, 2020. During the transfer, all Program rules previously adopted by the Commission were in full force until superseded by rules adopted by ASTO or the Board, as applicable.
- As filed by the Board in a Notice of Exempt Rulemaking on September 23, 2021 and effective September 28, 2021, the Board amended the rules to: a) update the existing rules to reflect the new Administrator and Trustee structure; b) remove any antiquated, redundant or unnecessary rule language; c) update the rule language accordingly in light of any changes in federal and state law, regulation and guidance since the previous 2003 update; and d) recodify the rules from their previous location in A.A.C. Title 7 (Education) under the Commission to the current location for the Board rules in A.A.C. Title 2 (Administration).
- Accordingly, the current rules support the Board’s objectives to reflect the new structure and operation of the AZ529, Arizona’s Education Savings Plan (AZ529 Plan), within ASTO and remove and update any outdated rules language and terminology. With these amended rules, the ASTO promoted the AZ529 Plan to help families across Arizona save for not only traditional education, but career and technical opportunities. Since the ASTO took over administration of the AZ529 Plan, in October 2020, there have been 20,950 new accounts added in just over 22 months. Assets under management have increased by 14.6% in that same time frame to \$1.86 billion.

**2. Written criticisms of the rule received since the rule was adopted, including any written analyses submitted to the agency questioning whether the rule is based on valid scientific or reliable principles or methods.**

- The agency did not receive any written criticisms for the rule since it was adopted.

**3. Authorization of the rule by existing statutes.**

- The rules are authorized by A.R.S. §§ [15-1872\(B\)](#) and [15-1875\(L\)](#).
- Furthermore, as stipulated by [Laws 2020, Chapter 88](#), the Board was exempted from the rulemaking requirements of Title 41, Chapter 6, Arizona Revised Statutes, for one-year after the effective date of October 1, 2020, for the purpose of adopting rules relating to the AZ529 Plan. The current rules were amended and adopted by the Board and were effective on September 28, 2021.

**4. Whether the rule is consistent with statutes or other rules made by the agency and current agency enforcement policy.**

- The rules are consistent with [A.R.S. § 15-1872\(B\)](#) which allows the Board to adopt rules to assist in implementing and administering the AZ529 Plan.
- Additionally, as required by [A.R.S. § 15-1875\(L\)](#), the adopted rules prevent contributions on behalf of a designated beneficiary that are in excess of those necessary to pay qualified higher education expenses and outline oversight procedures for aggregating the total balance of multiple accounts.
- At its monthly meeting, the State Board of Investment reviews the oversight and performance of the AZ529 Plan. This includes addressing any issues that need enforcement if they arise to ensure program providers are in compliance with all the rules.

**5. The clarity, conciseness and understandability of the rule.**

- Since the ASTO took over administration of the AZ529 Plan in October 2020, new accounts have increased by 20,950 in just over 22 months. During that same time, assets under management have increased by 14.6% to \$1.86 billion. These results are attributable to the clarity and understandability of the rules that govern the AZ529 Plan making it easier for any family to open an AZ529 account.

**6. The estimated economic, small business and consumer impact of the rule.**

- No economic, small business or consumer impact is implicated.

**7. Any analysis submitted to the agency by another person regarding the rule's impact on this state's business competitiveness as compared to the competitiveness of businesses in other states.**

- The agency did not receive any analysis from another person that compares the rule's impact on the business competitiveness of this state to other states.

**8. If applicable, that the agency completed any additional process required by law, including the requirement for the agency to publish otherwise exempt rules or provide the public with an opportunity to comment on the rules.**

- There were no other additional processes required by law to be completed.

**9. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective.**

- The current rules were thoroughly reviewed by the Board with comments from one stakeholder, Fidelity Investments, which were subsequently addressed. These rules clearly define the ASTO as Administrator and the Board as Trustee for the AZ529 Plan and provide a balanced approach to oversee and regulate the respective financial institutions that are plan providers to ensure compliance, sound investments and maximum growth for the AZ529 Plan, yet minimizing paperwork and compliance costs.
- Additionally, these rules provide AZ529 Plan participants necessary guidance for making contributions, disclosing fees, changing beneficiaries and making qualified withdrawals, while allowing participants to choose the AZ529 provider that is the best investment approach for them.

**10. A determination that the rule is not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law.**

- Section 529 of the Internal Revenue Service Code is applicable to the subject of the rule. The rule is not more stringent than this federal law.

**11. For rules that require the issuance of a regulatory permit, license or agency authorization, whether the rule complies with section 41-1037.**

- The current rules do not require the issuance of a permit, license or agency authorization. However, A.R.S. § 15-1872 requires the Board to approve financial institutions to act as depositories and managers of the AZ529 Plan.

**B. An agency may also include as part of the report the text of a proposed expedited rule pursuant to section 41-1027.**

- At this time, the Board does not wish to propose an expedited rule.

**Certification that the agency is in compliance with A.R.S. § 41-1091**

- The Board certifies that it is in compliance with [A.R.S. § 41-1091](#) regarding substantive policy statements. As required, by [A.R.S. § 41-1013 \(B\)\(7\)](#), the Board filed a notice of exempt rulemaking on September 23, 2021 which was published in the Arizona Administrative Register (Volume 27, Issue 41) on October 8, 2021.

**Proposed Course of Action**

- The Board has reviewed the rules adopted under the rulemaking exemption and determined that at this time there are no rules that should be amended or repealed.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

---

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2021 is cited as Supp. 21-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the Code in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note

to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing Chapters using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.*

Administrative Rules Division  
 The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

**TITLE 2. ADMINISTRATION**

**CHAPTER 13. STATE BOARD OF INVESTMENT**

Authority: A.R.S. §§15-1872(B) and 15-1875(L)

**Supp. 21-3**

*Editor's Note: The name of the State Board of Deposit was changed to the State Board of Investment by Laws 1998, Ch. 69, § 6, effective May 7, 1998 (Supp. 06-1).*

**CHAPTER TABLE OF CONTENTS**

**ARTICLE 1. GENERAL PROVISIONS**

*Article 1, consisting of Sections R2-13-101 through R2-13-103, adopted effective July 12, 1996 (Supp. 96-3).*

*Former Article 1, consisting of Sections R2-13-01 and R2-13-02, adopted as an emergency action effective April 25, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-2). Emergency expired.*

**ARTICLE 2. AZ529, ARIZONA'S EDUCATION SAVINGS PLAN**

## CHAPTER 13. STATE BOARD OF INVESTMENT

**ARTICLE 1. GENERAL PROVISIONS****R2-13-101. Definitions**

In this Article, unless otherwise specified, the following terms mean:

1. "General Accounting Office" means the General Accounting Office of the Department of Administration.
2. "General Fund" means the General Fund of the State as defined in A.R.S. § 35-141.
3. "Servicing Bank" means the bank awarded the servicing bank contract pursuant to A.R.S. § 35-315(C).
4. "Servicing Bank Contract" means the contract awarded pursuant to A.R.S. § 35-315.

**Historical Note**

Adopted effective July 12, 1996 (Supp. 96-3). R2-13-101(3) reflects corrected A.R.S. citation (Supp. 06-1). R2-13-101(1) revised at request of the Board, Office File No. M11-215, filed June 7, 2011 (Supp. 11-2).

**R2-13-102. Servicing Bank Charges Account**

- A. As authorized by A.R.S. § 35-315(B), General Fund interest earnings shall be deposited monthly into a General Fund account known as the "Servicing Bank Charges Account" to the extent necessary to pay for current servicing charges.
- B. Claims for servicing bank charges shall be paid from the Servicing Bank Charges Account. After each payment the General Accounting Office shall transfer any remaining interest earnings in the Servicing Bank Charges Account into the General Fund.

**Historical Note**

Adopted effective July 12, 1996 (Supp. 96-3). R2-13-102(A) reflects corrected A.R.S. citation (Supp. 06-1). R2-13-102(B) revised at request of the Board, Office File No. M11-215, filed June 7, 2011 (Supp. 11-2).

**R2-13-103. Information Required to be Submitted with Servicing Bank's Monthly Statement**

This Servicing Bank shall deliver to the state treasurer its monthly account analysis statement for services rendered in the preceding month which shall include the number and type of transactions performed, amount and time duration of deposits, and any other information required under the servicing bank contract.

**Historical Note**

Adopted effective July 12, 1996 (Supp. 96-3).

**ARTICLE 2. AZ529, ARIZONA'S EDUCATION SAVINGS PLAN****R2-13-201. Definitions**

- A. "Account year" means the period beginning on October 1 and ending on September 30 of each year.
- B. "A.R.S." means Arizona Revised Statutes.
- C. "Board" means the Arizona State Board of Investment.
- D. "Cash" means currency, bills and coin in circulation, or converting a negotiable instrument to cash by endorsing and presenting to a financial institution for deposit. An automatic transfer, cashier's check, certified check, money order, payroll deposit, traveler's check, personal check, and wire transfer will be treated as cash. Deposits will also be accepted by credit card.
- E. "Code" means the Internal Revenue Service Code of 1986, as amended, or the corresponding provision of any future United States Internal Revenue law.
- F. "Distributee" means the designated beneficiary or the account owner who receives or is treated as receiving a distribution from an account. If a distribution is made directly to the designated beneficiary or to an eligible educational institution for

the benefit of the designated beneficiary, the designated beneficiary is the distributee. In all other circumstances, the account owner is the distributee.

- G. "Eligible educational institution" means an institution of higher education that qualifies under § 529 of the Code as an eligible educational institution.
- H. "Financial institution" means a financial institution as defined in A.R.S. § 15-1871(6).
- I. "Negotiable instrument" means negotiable instrument as defined in A.R.S. § 47-3104.
- J. "Qualified Tuition Program" means a qualified tuition program as defined in § 529 of the Code.
- K. "Treasurer" means the Office of the Arizona State Treasurer.

**Historical Note**

New Section R2-13-201 recodified from Section R7-3-501 at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-202. Cash Contributions; Fees**

- A. Contributions to accounts in all qualified tuition programs shall be made only in cash as defined in R2-13-201.
- B. Application fee. The application fee is \$10. Application fees shall be forwarded to the Treasurer at the end of the month in which the account is opened. A financial institution may waive the application fee but will nevertheless be responsible for tendering to the Treasurer \$10 for each new account opened; said tender to be made at the end of the month in which the account is opened. The Treasurer shall review the application fee every 24 months and recommend to the Board whether the application fee should be adjusted.
- C. Reasonable fees and charges. Reasonable fees and charges may be levied against a qualified tuition program pursuant to an agreement for services between a financial institution and the Board. Fees shall be forwarded to the Treasurer at the end of each month.

**Historical Note**

New Section R2-13-202 recodified from Section R7-3-502 with clerical amendments made at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-203. Changing Designated Beneficiary**

An account owner may change the designated beneficiary so long as the new designated beneficiary is a member of the family, as defined in § 529 of the Code, A.R.S. § 15-1871(8) or both, of the previously named designated beneficiary. The account owner must certify and provide to the financial institution the name, address, social security number, and relationship of the new designated beneficiary to the previously named designated beneficiary on a form prescribed by the financial institution and approved by the Treasurer. The change shall be effective upon the financial institution's receipt of such certification.

**Historical Note**

New Section R2-13-203 recodified from Section R7-3-503 at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-203 repealed, new Section R2-13-203 renumbered from R2-13-204 and amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-204. Account Balance Limitations**

## CHAPTER 13. STATE BOARD OF INVESTMENT

- A. For each designated beneficiary, the balance in all qualified tuition programs, as defined in § 529 of the Code, shall not exceed the lesser of:
1. The product (rounded down to the nearest multiple of \$1000) of 7 and the average one year's undergraduate tuition, fees, room and board at the ten independent four year eligible educational institutions as measured and last published by the College Board's Independent College 500 Index that have the largest total direct charges. For purposes of this subsection, "total direct charges" means the charges determined for each eligible educational institution by multiplying the eligible educational institution's undergraduate enrollment by the reported tuition, fees, room and board for an on-campus student at the eligible educational institution; or
  2. The cost in current dollars of qualified higher education expenses the account owner reasonably anticipates the designated beneficiary will incur.
- B. No person shall make any contribution to a qualified tuition program during an account year that would cause the sum of the account balances in all qualified tuition programs of the designated beneficiary as of the first day of the account year plus contributions made during the account year less withdrawals during the account year to or from any such account to exceed the maximum allowable balance set forth in subsection (A). Any excess contributions with respect to a designated beneficiary shall be promptly withdrawn as a non-qualified withdrawal or transferred to another account in accordance with A.R.S. § 15-1875(E) or A.R.S. § 15-1875(F).
- C. No financial institution shall accept for deposit in any account a contribution if the contribution would cause the sum of the values (as of the beginning of an account year) of all qualified tuition programs of the designated beneficiary that are managed by the financial institution and contributions to such accounts less withdrawals from such accounts during the account year to exceed the maximum allowable balance set forth in subsection (A).
- D. Each year, the Board shall review the amounts set forth in subsection (A).
- E. Persons making a contribution to an account shall certify that as to the account's designated beneficiary, and to the best of the contributor's knowledge, the contribution shall not cause the balances in all qualified tuition programs to exceed the account balance limitations described in subsection (A).
- F. If the Treasurer determines that contributions have been made to program accounts in violation of subsection (B) or (C), the Treasurer shall notify the Board, the designated beneficiary and the account owners of all accounts of such designated beneficiary. The account owners shall have 60 days after receipt of such notice to reduce the balances of the qualified tuition programs through distributions and/or changes in beneficiaries to a level less than or equal to the maximum account balance described in subsection (A). If the balances are not appropriately reduced, the Treasurer will disqualify such accounts in reverse order of their date of opening until the sum of the balances in the accounts does not exceed the maximum allowable balance set forth in subsection (A). This subsection shall not apply to any contribution made at a time when such contributions did not cause the account balance limits to be exceeded.

**Historical Note**

New Section R2-13-204 recodified from Section R7-3-504 at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-204 renumbered to R2-13-203, new Section R2-13-204 renumbered from

R2-13-205 and amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-205. Withdrawals; Uses of Withdrawn Funds**

- A. An account owner may withdraw funds from an account at any time. The designated beneficiary of an account shall not have any authority to withdraw funds from an account unless the account is structured to give the designated beneficiary such right of withdrawal upon matriculation or upon incurring qualified higher education expenses as defined in A.R.S. § 15-1871(12) and § 529 of the Code.
- B. Neither the Board nor the Treasurer are responsible for tracking how withdrawn funds are used. It is the responsibility of the account owner to ensure that withdrawn funds are used for qualified higher education expenses as defined in A.R.S. § 15-1871(12) and § 529 of the Code, and to substantiate any exemption from tax or penalty.

**Historical Note**

New Section R2-13-205 recodified from Section R7-3-505 with clerical amendments made at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-205 renumbered to R2-13-204, new Section R2-13-205 renumbered from R2-13-206 and amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-206. Oversight of Financial Institutions**

- A. Disclaimer of state liability. Unless otherwise expressly agreed upon by the Treasurer in writing, every document pertaining to the AZ529, Arizona's Education Savings Plan shall clearly indicate that "The account is not insured by the state of Arizona and neither the principal deposited nor the investment return is guaranteed by the state of Arizona." A rubber stamp may be used to imprint this language on deposit slips, account statements, payroll stubs, or other documents pertaining to the AZ529, Arizona's Education Savings Plan. This language may also be hand-written or typed or provided by any other method to facilitate compliance.
- B. No Investment Direction. A financial institution shall not permit an account owner to move funds, once deposited, that in any way would result in investment direction of the funds or earnings on the funds except to the extent permissible under § 529 of the Code and any applicable regulations and guidance.
- C. Reporting Requirements.
  1. At least quarterly, every financial institution shall provide each account owner with a statement. The statement shall list a beginning balance, all activity during the quarter, including any interest paid or dividends earned, and an ending balance. Additionally, the statement for the fourth quarter shall include the following information: an annual beginning balance, an annual total of the interest earned or dividends paid, a year-end balance, and any distributions paid.
  2. Within the time-frames established by the Code, financial institutions, at the request of the Treasurer, shall provide Form 1099Q to all distributees.
  3. A copy of the statement described in (C)(1) and (2) shall be sent to the Treasurer. Additionally, each financial institution shall provide the Treasurer with the information required by A.R.S. § 15-1874(H).
- D. Access to books and records. No contractor shall have access to the books and records of a financial institution or Program Manager unless the Treasurer or its designee first approves, with or without modification, such request for access.
- E. Non-renewal. The Board's failure to renew a contract with a financial institution shall not be construed as "good cause" as referred to in A.R.S. § 15-1874(I).

## CHAPTER 13. STATE BOARD OF INVESTMENT

## F. Marketing programs.

1. Any financial institution or group of financial institutions that wishes to engage in its own marketing program for the AZ529, Arizona's Education Savings Plan may do so provided that any proposed marketing program is first submitted to the Treasurer for review. If, within 60 days, the Treasurer does not notify the financial institution or group of financial institutions, in writing, that the proposed marketing program is rejected or requires modifications, the proposed marketing program shall be deemed approved.
2. Any financial institution or group of financial institutions that chooses to engage in its own marketing program may petition the Treasurer for a credit against future marketing fees.

**Historical Note**

New Section R2-13-206 recodified from Section R7-3-506 at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-206 renumbered to R2-13-205, new Section R2-13-206 renumbered from R2-13-207 and amended by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-207. IRS Regulations, Rulings, Notices, and Other Guidance**

- A. If (i) the Internal Revenue Service issues on or after February 27, 2002, any regulation, ruling, notice or other precedential guidance on procedures or activities that a qualified tuition program may adopt or undertake without jeopardizing its exemption under § 529 of the Code, (ii) such guidance is less restrictive than any rule contained in this Article, and (iii) the more restrictive rule was not mandated by A.R.S. §§ 15-1871 to 15-1877, then the more restrictive rule shall be deemed lib-

eralized to the maximum extent possible without violating A.R.S. §§ 15-1871 through 15-1877 or any requirements for a program to qualify as a qualified tuition program under § 529 of the Code.

- B. If (i) the Internal Revenue Service issues on or after February 27, 2002, any regulation, ruling, notice or other precedential guidance on procedures or activities that a qualified tuition program shall or shall not adopt or undertake to avoid jeopardizing its exemption under § 529 of the Code and (ii) the rules contained in this Article or the statutes contained in A.R.S. §§ 15-1871 to 15-1877 do not include such requirement or prohibition, then these rules shall be deemed amended to the maximum extent possible without violating A.R.S. §§ 15-1871 through 15-1877 to adopt such requirement or prohibition.

**Historical Note**

New Section R2-13-207 recodified from Section R7-3-507 with clerical amendments made at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-207 renumbered to R2-13-206, new Section R2-13-207 renumbered from R2-13-208 by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

**R2-13-208. Renumbered****Historical Note**

New Section R2-13-208 recodified from Section R7-3-508 with clerical amendments made at 27 A.A.R. 1656, with an immediate effective date of September 23, 2021; Section R2-13-208 renumbered to R2-13-207 by exempt rulemaking at 27 A.A.R. 1650, effective September 28, 2021 (Supp. 21-3).

State of Arizona  
Senate  
Fifty-fourth Legislature  
Second Regular Session  
2020

**CHAPTER 88**  
**SENATE BILL 1528**

AN ACT

AMENDING SECTIONS 15-1871, 15-1872, 15-1873, 15-1874, 15-1875, 15-1878, 15-1879, 35-311 AND 41-172, ARIZONA REVISED STATUTES; AMENDING TITLE 41, CHAPTER 1, ARTICLE 4, ARIZONA REVISED STATUTES, BY ADDING SECTION 41-175; APPROPRIATING MONIES; RELATING TO THE FAMILY COLLEGE SAVINGS PROGRAM.

(TEXT OF BILL BEGINS ON NEXT PAGE)

1 Be it enacted by the Legislature of the State of Arizona:

2 Section 1. Section 15-1871, Arizona Revised Statutes, is amended to  
3 read:

4 15-1871. Definitions

5 In this article, unless the context otherwise requires:

6 1. "Account" means an individual trust account in the fund  
7 established as prescribed in this article.

8 2. "Account owner" means the person who enters into a tuition  
9 savings agreement pursuant to this article, who is an account owner within  
10 the meaning of section 529 of the internal revenue code and who is  
11 designated at the time an account is opened as having the right to  
12 withdraw monies from the account before the account is disbursed to or for  
13 the benefit of the designated beneficiary.

14 ~~3. "Commission" means the commission for postsecondary education~~  
15 ~~established by section 15-1851.~~

16 ~~4. "Committee" means the family college savings program oversight~~  
17 ~~committee.~~

18 3. "BOARD" MEANS THE STATE BOARD OF INVESTMENT.

19 ~~5.~~ 4. "Designated beneficiary" means a person who qualifies as a  
20 designated beneficiary under section 529 of the internal revenue code and,  
21 except as provided in section 15-1875, subsections P and Q, with respect  
22 to an account, who is designated at the time the account is opened as the  
23 person whose qualified higher education expenses are expected to be paid  
24 from the account or, if this designated beneficiary is replaced in  
25 accordance with section 15-1875, subsections D, E and F, the replacement  
26 beneficiary.

27 ~~6.~~ 5. "Eligible educational institution" means an institution of  
28 higher education that qualifies under section 529 of the internal revenue  
29 code as an eligible educational institution.

30 ~~7.~~ 6. "Financial institution" means THE STATE TREASURER'S OFFICE  
31 OR any bank, commercial bank, national bank, savings bank, savings and  
32 loan association, credit union, insurance company, brokerage firm or other  
33 similar entity that is authorized to do business in this state.

34 ~~8.~~ 7. "Fund" means the family college savings program trust fund  
35 that constitutes a public instrumentality of this state and that is  
36 established by section 15-1873.

37 ~~9.~~ 8. "Member of the family" means any of the following:

38 (a) A son or daughter of a person or a descendant of the son or  
39 daughter of the person.

40 (b) A stepson or stepdaughter of a person.

41 (c) A brother, sister, stepbrother or stepsister of a person. For  
42 the purposes of this subdivision, "brother" and "sister" includes a  
43 brother or sister by the half-blood.

44 (d) The father or mother of a person or the ancestor of the father  
45 or mother of a person.

1 (e) A stepfather or stepmother of a person.

2 (f) A son or daughter of a person's brother or sister. For the  
3 purposes of this subdivision, "brother" and "sister" includes a brother or  
4 sister by the half-blood.

5 (g) A brother or sister of the person's father or mother. For the  
6 purposes of this subdivision, "brother" and "sister" includes a brother or  
7 sister by the half-blood.

8 (h) A son-in-law, daughter-in-law, father-in-law, mother-in-law,  
9 brother-in-law or sister-in-law of a person.

10 (i) The spouse of a person or the spouse of any individual  
11 described in this paragraph.

12 (j) A first cousin of a person.

13 (k) Any individual who meets the criteria for family membership  
14 described in this paragraph as a result of legal adoption.

15 ~~10.~~ 9. "Nonqualified withdrawal" means a withdrawal from an  
16 account other than one of the following:

17 (a) A qualified withdrawal.

18 (b) A withdrawal made as the result of the death or disability of  
19 the designated beneficiary of an account.

20 (c) A withdrawal that is made on the account of a scholarship, or  
21 the allowance or payment described in section 135(d)(1)(B) or (C) of the  
22 internal revenue code, and that is received by the designated beneficiary,  
23 but only to the extent of the amount of this scholarship, allowance or  
24 payment.

25 (d) A rollover or change of designated beneficiary.

26 ~~11.~~ 10. "Person" means an individual, an individual's legal  
27 representative or any other legal entity authorized to establish a savings  
28 account under section 529 of the internal revenue code and the  
29 corresponding regulations.

30 ~~12.~~ 11. "Program" means the family college savings program that is  
31 established under this article and that constitutes a qualified tuition  
32 program as defined in section 529 of the internal revenue code.

33 ~~13.~~ 12. "Qualified higher education expenses":

34 (a) Means:

35 (i) Tuition, fees, books, supplies, room and board and equipment  
36 required for a designated beneficiary to enroll at or attend an eligible  
37 educational institution.

38 (ii) Expenses for special needs services in the case of a special  
39 needs beneficiary that are incurred in connection with enrolling or  
40 attending, if these expenses meet the definition of qualified higher  
41 education expenses in section 529 of the internal revenue code.

42 (iii) Expenses to purchase a computer, peripheral equipment,  
43 computer software or internet access and related services if the computer  
44 equipment, software or services are to be used primarily by the  
45 beneficiary during the years the beneficiary is enrolled at an eligible

1 educational institution and if these expenses meet the definition of  
2 qualified higher education expenses in section 529 of the internal revenue  
3 code.

4 (iv) EXPENSES FOR FEES, BOOKS, SUPPLIES AND EQUIPMENT REQUIRED FOR  
5 A DESIGNATED BENEFICIARY TO PARTICIPATE IN AN APPRENTICESHIP PROGRAM THAT  
6 IS REGISTERED AND CERTIFIED WITH THE UNITED STATES SECRETARY OF LABOR  
7 UNDER SECTION 1 OF THE NATIONAL APPRENTICESHIP ACT (50 STAT. 664; 29  
8 UNITED STATES CODE SECTION 50) IF THESE EXPENSES MEET THE DEFINITION OF  
9 QUALIFIED HIGHER EDUCATION EXPENSES IN SECTION 529 OF THE INTERNAL REVENUE  
10 CODE.

11 (b) Includes tuition to enroll in or attend an elementary or  
12 secondary public, private or religious school pursuant to section 529 of  
13 the internal revenue code.

14 (c) INCLUDES AMOUNTS PAID AS PRINCIPAL OR INTEREST ON ANY QUALIFIED  
15 EDUCATION LOAN AS DEFINED IN SECTION 221(d) OF THE INTERNAL REVENUE CODE  
16 OF THE DESIGNATED BENEFICIARY OR A BROTHER, SISTER, STEPBROTHER OR  
17 STEPSISTER OF THE DESIGNATED BENEFICIARY PURSUANT TO SECTION 529 OF THE  
18 INTERNAL REVENUE CODE.

19 ~~14.~~ 13. "Qualified withdrawal" means a withdrawal from an account  
20 to pay ~~either~~ ANY OF THE FOLLOWING:

21 (a) The qualified higher education expenses of the designated  
22 beneficiary of the account, but only if the withdrawal is made in  
23 accordance with this article.

24 (b) Tuition of less than \$10,000 to enroll in or attend an  
25 elementary or secondary public, private or religious school pursuant to  
26 section 529 of the internal revenue code of the designated beneficiary of  
27 the account, but only if the withdrawal is made in accordance with this  
28 article.

29 (c) AMOUNTS PAID AS PRINCIPAL OR INTEREST ON ANY QUALIFIED  
30 EDUCATION LOAN AS DEFINED IN SECTION 221(d) OF THE INTERNAL REVENUE CODE  
31 OF THE DESIGNATED BENEFICIARY OR A BROTHER, SISTER, STEPBROTHER OR  
32 STEPSISTER OF THE DESIGNATED BENEFICIARY, BUT ONLY IF THE WITHDRAWAL IS  
33 MADE IN ACCORDANCE WITH THIS ARTICLE. THE AMOUNT OF QUALIFIED WITHDRAWALS  
34 UNDER THIS ARTICLE WITH RESPECT TO THE LOANS OF ANY DESIGNATED BENEFICIARY  
35 OR A BROTHER, SISTER, STEPBROTHER OR STEPSISTER OF THE DESIGNATED  
36 BENEFICIARY MAY NOT EXCEED \$10,000, REDUCED BY THE AMOUNT OF WITHDRAWALS  
37 SO TREATED FOR ALL PRIOR TAXABLE YEARS.

38 ~~15.~~ 14. "Section 529 of the internal revenue code" means section  
39 529 of the internal revenue code of 1986, as amended, and the final  
40 regulations issued pursuant to that section.

41 15. "TREASURER" MEANS THE STATE TREASURER.

42 16. "Trust interest" means an account owner's interest in the fund  
43 created by a tuition savings agreement for the benefit of a designated  
44 beneficiary.

1       ~~D.~~ A. The ~~committee~~ BOARD shall ~~recommend~~ APPROVE financial  
2 institutions ~~for approval by the commission~~ to act as the depositories and  
3 managers of family college savings accounts pursuant to section 15-1874.

4       ~~E.~~ B. The ~~committee~~ BOARD may ~~submit proposed~~ ADOPT rules ~~to the~~  
5 ~~commission~~ to assist in ~~the implementation~~ IMPLEMENTING and ~~administration~~  
6 ~~of~~ ADMINISTERING this article.

7       ~~F.~~ C. Members of the ~~committee~~ BOARD are immune from personal  
8 liability with respect to all actions that are taken in good faith and  
9 within the scope of the ~~committee's~~ BOARD'S authority.

10       Sec. 3. Section 15-1873, Arizona Revised Statutes, is amended to  
11 read:

12       15-1873. Treasurer; powers and duties; family college savings  
13 program trust fund

14       A. The ~~commission~~ TREASURER shall:

15       1. Develop and implement the program in a manner consistent with  
16 this article ~~through the adoption of~~ BY ADOPTING rules, guidelines and  
17 procedures.

18       2. Retain professional services, if necessary, including  
19 accountants, auditors, consultants and other experts.

20       3. Seek rulings and other guidance from the United States  
21 department of the treasury and the internal revenue service relating to  
22 the program.

23       4. Make changes to the program required for the participants in the  
24 program to obtain the federal income tax benefits or treatment provided by  
25 section 529 of the internal revenue code.

26       5. Interpret, in rules, policies, guidelines and procedures, ~~the~~  
27 ~~provisions of~~ this article broadly in light of its purpose and objectives.

28       6. Charge, impose and collect administrative fees and service  
29 charges in connection with any agreement, contract or transaction relating  
30 to the program.

31       7. Negotiate and select the financial institution or institutions  
32 to act as the depository and manager of the program in accordance with  
33 this article. ON APPROVAL BY THE BOARD, THE TREASURER MAY USE EXISTING  
34 INVESTMENT FUNDS ESTABLISHED PURSUANT TO SECTIONS 35-314.03, 35-316 AND  
35 35-326 FOR THIS PURPOSE.

36       ~~8. As an agency of this state, act as trustee of the fund.~~

37       ~~9.~~ 8. Maintain the program on behalf of this state as required by  
38 section 529 of the internal revenue code.

39       ~~10.~~ 9. Enter into tuition savings agreements with account owners  
40 pursuant to this article.

41       B. The family college savings program trust fund is established  
42 consisting of the assets of the family college savings program. The  
43 ~~commission~~ TREASURER shall administer the fund and THE BOARD shall act as  
44 the ~~sole trustee~~ TRUSTEE of the fund. Monies in the fund are continuously  
45 appropriated. The fund is designated a public instrumentality of this

1 state that is created for an essential public purpose. Trust interests in  
2 the fund shall be designated by the ~~commission~~ TREASURER for each account  
3 owner. The fund shall be separated into a trust account and an operating  
4 account. The trust account shall include amounts received by the family  
5 college savings program from account owners pursuant to tuition savings  
6 agreements and interest and investment income earned by the fund. The  
7 ~~commission~~ TREASURER shall make transfers from the trust account to the  
8 operating account as necessary for the immediate payment of obligations  
9 under tuition savings agreements, operating expenses and administrative  
10 costs of the family college savings program. The ~~commission~~ TREASURER  
11 shall deposit and invest monies or other amounts in the fund with  
12 financial institutions in accordance with section 15-1874.

13 Sec. 4. Section 15-1874, Arizona Revised Statutes, is amended to  
14 read:

15 15-1874. Use of contractor as account depository and manager

16 A. The ~~commission~~ TREASURER shall implement the operation of the  
17 program through the use of one or more financial institutions to act as  
18 the depositories of the fund and managers of the program. Under the  
19 program, persons may submit applications for enrollment in the program and  
20 establish accounts in the fund at the financial institution. Monies paid  
21 by account owners to the fund for deposit in accounts maintained by the  
22 fund at a financial institution shall be paid to the financial institution  
23 as an agent of the fund and the tuition savings agreements shall provide  
24 that all monies paid by account owners to fund accounts held at financial  
25 institutions are being paid to the fund.

26 B. The ~~committee~~ TREASURER shall solicit proposals from financial  
27 institutions to act as the depositories of fund monies and managers of the  
28 program. Financial institutions that submit proposals must describe the  
29 financial instruments that will be held in accounts. ~~The commission shall~~  
30 ~~select proposals from financial institutions to act as depositories and~~  
31 ~~managers, and~~ The solicitation and selection process is exempt from the  
32 procurement code requirements of title 41, chapter 23.

33 C. On the recommendation of the ~~committee~~ TREASURER, the ~~commission~~  
34 BOARD shall select the financial institution or institutions to implement  
35 the program from among bidding financial institutions that demonstrate the  
36 most advantageous combination, both to potential program participants and  
37 this state, of the following factors:

- 38 1. Financial stability and integrity.
- 39 2. The safety of the investment instruments being offered, taking  
40 into account any insurance provided with respect to these instruments.
- 41 3. The ability of the investment instruments to track estimated  
42 costs of higher education as calculated by the ~~commission~~ TREASURER and  
43 provided by the financial institution to the account holder.

1           4. The ability of the financial institutions, directly or through a  
2 subcontract, to satisfy ~~record-keeping~~ RECORDKEEPING and reporting  
3 requirements.

4           5. The financial institution's plan for promoting the program and  
5 the investment it is willing to make to promote the program.

6           6. The fees, if any, proposed to be charged to persons for  
7 maintaining accounts.

8           7. The minimum initial deposit and minimum contributions that the  
9 financial institution will require for the investment of fund monies and  
10 the willingness of the financial institution to accept contributions  
11 through payroll deduction plans and other deposit plans.

12           8. Any other benefits to this state or its residents included in  
13 the proposal, including an account opening fee payable to the ~~commission~~  
14 TREASURER by the account owner and an additional fee from the financial  
15 institution for statewide program marketing by the ~~commission~~ TREASURER.

16           D. ~~ON APPROVAL BY THE BOARD~~, the ~~commission~~ TREASURER shall enter  
17 into a contract with a financial institution, or except as provided in  
18 subsection E of this section, contracts with financial institutions, to  
19 serve as program managers and depositories. Program management contracts  
20 shall provide the terms and conditions by which financial institutions  
21 shall sell interests in the fund to account owners, invest monies in the  
22 fund and manage the program.

23           E. The ~~commission~~ BOARD may select more than one financial  
24 institution and investment for the program if both of the following  
25 conditions exist:

26           1. The United States internal revenue service has provided guidance  
27 that giving a contributor a choice of two investment instruments under a  
28 state plan will not cause the plan to fail to qualify for favorable tax  
29 treatment under section 529 of the internal revenue code.

30           2. The ~~commission~~ TREASURER concludes that the choice of instrument  
31 vehicles is in the best interest of college savers and will not interfere  
32 with the promotion of the program.

33           F. A program manager shall:

34           1. Take all action required to keep the program in compliance with  
35 the requirements of this article and all action not contrary to this  
36 article or its contract to manage the program so that it is treated as a  
37 qualified tuition plan under section 529 of the internal revenue code.

38           2. Keep adequate records of each of the fund's accounts, keep each  
39 account segregated from each other account and provide the ~~commission~~  
40 TREASURER with the information necessary to prepare statements required by  
41 section 15-1875, subsections M, N and O or file these statements on behalf  
42 of the ~~commission~~ TREASURER.

43           3. Compile and total information contained in statements required  
44 to be prepared under section 15-1875, subsections M, N and O and provide  
45 these compilations to the ~~commission~~ TREASURER.

1           4. If there is more than one program manager, provide the  
2 ~~commission~~ TREASURER with this information to assist the ~~commission~~  
3 TREASURER to determine compliance with section 15-1875, subsection L.

4           5. Provide representatives of the ~~commission~~ TREASURER, including  
5 other contractors or other state agencies, access to the books and records  
6 of the program manager to the extent needed to determine compliance with  
7 the contract.

8           6. Hold all accounts in the name of and for the benefit of the fund  
9 and this state.

10          G. Any contract executed between the ~~commission~~ TREASURER and a  
11 financial institution pursuant to this section shall be for a term of at  
12 least three years and not more than seven years.

13          H. The ~~commission~~ BOARD may terminate a contract with a financial  
14 institution at any time for good cause on the recommendation of the  
15 ~~committee~~ TREASURER. If a contract is terminated pursuant to this  
16 subsection, the ~~commission~~ TREASURER shall take custody of accounts held  
17 at that financial institution and shall seek to promptly transfer the  
18 accounts to another financial institution that is selected as a program  
19 manager and into investment instruments as similar to the original  
20 investments as possible.

21          I. If the ~~commission~~ TREASURER determines not to renew the  
22 appointment of a financial institution as a program manager, the  
23 ~~commission~~ BOARD may take action consistent with the interests of the  
24 program and the accounts and in accordance with its duties as the trustee  
25 of the fund, including termination of all services or continuation of  
26 certain management and administrative services of that financial  
27 institution for accounts of the program managed by that financial  
28 institution during its term as a program manager, if any continuation of  
29 services is only permitted under the following conditions:

30           1. The ~~commission~~ TREASURER and the financial institution enter  
31 into a written agreement specifying the rights of the program and the  
32 ~~commission~~ TREASURER and the responsibilities of the financial  
33 institution, including the standards that continue to be applicable to the  
34 accounts as accounts of the program.

35           2. Any services provided by the financial institution to accounts  
36 continue to be subject to the control of the ~~commission~~ BOARD as the  
37 trustee of the fund with responsibility of all accounts of the program.

38          Sec. 5. Section 15-1875, Arizona Revised Statutes, is amended to  
39 read:

40           15-1875. Program requirements

41          A. The program shall be operated through the use of accounts in the  
42 fund established by account owners. Payments to the fund for  
43 participation in the program shall be made by account owners pursuant to  
44 tuition savings agreements. An account may be opened by any person who

1 desires to invest in the fund and to save to pay qualified higher  
2 education expenses by satisfying each of the following requirements:

3 1. Completing an application in the form prescribed by the  
4 ~~commission~~ TREASURER. The application shall include the following  
5 information:

6 (a) The name, address and social security number or employer  
7 identification number of the contributor.

8 (b) The name, address and social security number of the account  
9 owner if the account owner is not the contributor.

10 (c) The name, address and social security number of the designated  
11 beneficiary.

12 (d) The certification relating to no excess contributions required  
13 by subsection L of this section.

14 (e) Any other information that the ~~commission~~ TREASURER may  
15 require.

16 2. Paying the onetime application fee established by the ~~commission~~  
17 TREASURER.

18 3. Making the minimum contribution required by the ~~commission~~  
19 TREASURER or by opening an account.

20 4. Designating the type of account to be opened if more than one  
21 type of account is offered.

22 B. Any person may make contributions to an account after the  
23 account is opened.

24 C. Contributions to accounts may be made only in cash.

25 D. An account owner may change the designated beneficiary of an  
26 account to an individual who is a member of the family of the former  
27 designated beneficiary in accordance with procedures established by the  
28 ~~commission~~ TREASURER.

29 E. On the direction of an account owner, all or a portion of an  
30 account may be transferred to another account of which the designated  
31 beneficiary is a member of the family of the designated beneficiary of the  
32 transferee account.

33 F. Changes in designated beneficiaries and rollovers under this  
34 section are not ~~permitted~~ ALLOWED if the changes or rollovers would  
35 violate either of the following:

36 1. Subsection L of this section, relating to excess contributions.

37 2. Subsection I of this section, relating to investment choice.

38 G. Each account shall be maintained separately from each other  
39 account under the program.

40 H. Separate records and accounting shall be maintained for each  
41 account for each designated beneficiary.

42 I. A contributor to, account owner of or designated beneficiary of  
43 any account may not direct the investment, within the meaning of section  
44 529 of the internal revenue code, of any contributions to an account or  
45 the earnings from the account.

1 J. If the ~~commission~~ TREASURER terminates the authority of a  
2 financial institution to hold accounts and accounts must be moved from  
3 that financial institution to another financial institution, the  
4 ~~commission~~ TREASURER shall select the financial institution and type of  
5 investment to which the balance of the account is moved unless the  
6 internal revenue service provides guidance stating that allowing the  
7 account owner to select among several financial institutions that are then  
8 contractors would not cause a plan to cease to be a qualified tuition  
9 plan.

10 K. Neither an account owner nor a designated beneficiary may use an  
11 interest in an account as security for a loan. Any pledge of an interest  
12 in an account is of no force and effect.

13 L. On the recommendation of the ~~committee~~ TREASURER, the ~~commission~~  
14 BOARD shall adopt rules to prevent contributions on behalf of a designated  
15 beneficiary in excess of those necessary to pay the qualified higher  
16 education expenses of the designated beneficiaries. The rules shall  
17 address the following:

18 1. Procedures for aggregating the total balances of multiple  
19 accounts established for a designated beneficiary.

20 2. The establishment of a maximum total balance for the purpose of  
21 prohibiting contributions to accounts established for a designated  
22 beneficiary if the contributions would cause the maximum total balance to  
23 be exceeded.

24 3. The ~~commission~~ BOARD shall review the quarterly reports received  
25 from participating financial institutions and certify that the balance in  
26 all qualified tuition programs, as defined in section 529 of the internal  
27 revenue code, of which that person is the designated beneficiary does not  
28 exceed the lesser of:

29 (a) A maximum college savings amount established by the ~~commission~~  
30 BOARD from time to time.

31 (b) The cost in current dollars of qualified higher education  
32 expenses that the contributor reasonably anticipates the designated  
33 beneficiary will incur.

34 4. Requirements that any excess contributions with respect to a  
35 designated beneficiary be promptly withdrawn in a nonqualified withdrawal  
36 or rolled over to another account in accordance with this section.

37 M. If there is any distribution from an account to any person or  
38 for the benefit of any person during a calendar year, the distribution  
39 shall be reported to the internal revenue service and the account owner or  
40 the designated beneficiary to the extent required by federal law.

41 N. The financial institution shall provide statements to each  
42 account owner at least once each year within thirty-one days after the  
43 twelve-month period to which they relate. The statement shall identify  
44 the contributions made during a preceding twelve-month period, the total  
45 contributions made through the end of the period, the value of the account

1 as of the end of this period, distributions made during this period and  
2 any other matters that the commission requires be reported to the account  
3 owner.

4 O. Statements and information returns relating to accounts shall be  
5 prepared and filed to the extent required by federal or state tax law.

6 P. A state or local government or organizations described in  
7 section 501(c)(3) of the internal revenue code may open and become the  
8 account owner of an account to fund scholarships for persons whose  
9 identity will be determined after an account is opened.

10 Q. In the case of any account described in subsection P of this  
11 section, the requirement that a designated beneficiary be designated when  
12 an account is opened does not apply and each person who receives an  
13 interest in the account as a scholarship shall be treated as a designated  
14 beneficiary with respect to the interest.

15 R. Any social security numbers, addresses or telephone numbers of  
16 individual account holders and designated beneficiaries that come into the  
17 possession of the ~~commission~~ TREASURER are confidential, are not public  
18 records and shall not be released by the ~~commission~~ TREASURER.

19 S. An account owner may transfer ownership rights to another  
20 eligible account owner.

21 T. An account owner may designate successor account owners.

22 U. Through December 31, 2025, on direction of an account owner, up  
23 to \$15,000 of an account may roll over to an achieving a better life  
24 experience act account established pursuant to 26 United States Code  
25 section 529A.

26 Sec. 6. Section 15-1878, Arizona Revised Statutes, is amended to  
27 read:

28 15-1878. Limits of article

29 A. ~~Nothing in~~ This article ~~shall be construed to~~ DOES NOT:

30 1. Give any designated beneficiary any rights or legal interest  
31 with respect to an account unless the designated beneficiary is the  
32 account owner.

33 2. Guarantee that a designated beneficiary will be admitted to an  
34 eligible educational institution or be allowed to continue enrollment at  
35 or graduate from an eligible educational institution located in this state  
36 after admission.

37 3. Establish state residency for a person merely because the person  
38 is a designated beneficiary.

39 4. Guarantee that amounts saved pursuant to the program will be  
40 sufficient to cover the qualified higher education expenses of a  
41 designated beneficiary.

42 B. ~~Nothing in~~ This article ~~establishes~~ DOES NOT ESTABLISH any  
43 obligation of this state or any agency or instrumentality of this state to  
44 guarantee for the benefit of any account owner, contributor to an account  
45 or designated beneficiary any of the following:

- 1           1. The return of any amounts contributed to an account.
- 2           2. The rate of interest or other return on any account.
- 3           3. The payment of interest or other return on any account.
- 4           4. Tuition rates or the cost of related higher education
- 5 expenditures.

6           C. Under rules adopted by the ~~commission~~ TREASURER, every contract,  
7 application, deposit slip or other similar document that may be used in  
8 connection with a contribution to an account shall clearly indicate that  
9 the account is not insured by this state and neither the principal  
10 deposited nor the investment return is guaranteed by this state.

11           Sec. 7. Section 15-1879, Arizona Revised Statutes, is amended to  
12 read:

13           15-1879. Annual report

14           The ~~commission~~ TREASURER shall submit an annual report to the  
15 speaker of the house of representatives, the president of the senate and  
16 the governor by March 1 that summarizes the ~~commission's~~ TREASURER'S  
17 findings and recommendations concerning the program established by this  
18 article.

19           Sec. 8. Section 35-311, Arizona Revised Statutes, is amended to  
20 read:

21           35-311. State board of investment; membership; powers and  
22 duties

23           A. The state board of investment is established consisting of the  
24 state treasurer, the director of the department of administration or the  
25 director of the department of administration's designee, the director of  
26 the department of insurance and financial institutions or the director of  
27 the department of insurance and financial institutions' designee and two  
28 individuals appointed by the state treasurer, one of whom has verifiable  
29 expertise in investment management and one of whom represents a public  
30 entity with current deposits in a local government investment pool. The  
31 state treasurer is chairman of the board. The board shall keep an  
32 accurate record of its proceedings. A certified copy of the record is  
33 prima facie evidence of the matters appearing in the record in any  
34 court. A meeting of the board may be called at any time by the chairman  
35 or a majority of the board members.

36           B. The state board of investment shall:

- 37           1. Hold regular monthly meetings.
- 38           2. Review investments of treasury monies.
- 39           3. Serve as ~~trustees~~ TRUSTEE of the permanent state land funds and  
40 ~~provide management of~~ MANAGE the assets of the funds consistent with the  
41 requirements of article X, section 7, Constitution of Arizona.
- 42           4. Serve as ~~trustees~~ TRUSTEE of any endowments established pursuant  
43 to section 35-314.03.

44           5. SERVE AS TRUSTEE OF THE FAMILY COLLEGE SAVINGS PROGRAM  
45 ESTABLISHED BY TITLE 15, CHAPTER 14, ARTICLE 7.

1 C. The state treasurer shall furnish to the board of investment at  
2 its regular monthly meeting a report of the performance of current  
3 investments and a report of the current investments as of the close of  
4 business of the preceding month. The state treasurer shall make these  
5 reports available for inspection by the public during normal working hours  
6 at the office of the state treasurer for a period of time of not less than  
7 two years after the date of the report.

8 D. The board of investment may order the state treasurer to sell  
9 any of the securities, and any order shall specifically describe the  
10 securities and fix the time period during which they are to be sold.  
11 Securities so ordered to be sold shall be sold for cash by the state  
12 treasurer at the current market price. The state treasurer and the  
13 members of the board are not accountable for any loss occasioned by sales  
14 of securities at prices lower than their book value. Any loss shall be  
15 charged against earnings received from interest or capital gains on the  
16 applicable treasury monies.

17 E. The board may establish standards in addition to those  
18 established by section 35-317, subsection A for the qualification of  
19 agents acting pursuant to section 35-317, subsection B.

20 Sec. 9. Section 41-172, Arizona Revised Statutes, is amended to  
21 read:

22 41-172. Powers and duties; administering oaths; appointment  
23 of deputy state treasurer

24 A. The state treasurer shall:

25 1. Authenticate writings and documents certified by ~~him~~ THE STATE  
26 TREASURER with the TREASURER'S seal of ~~his~~ office.

27 2. Receive and keep in secure custody all monies that belong to ~~the~~  
28 THIS state and that are not required to be received and kept by some other  
29 person.

30 3. File and keep the documentation delivered to the treasurer when  
31 monies are deposited into the treasury.

32 4. Deliver to each person depositing money into the treasury a  
33 confirmation showing the date, amount and depositing agency and shall  
34 provide a unique identifying number for each confirmation.

35 5. Pay warrants drawn by the department of administration in the  
36 order in which they are presented.

37 6. Keep an account of all monies received and disbursed, and keep  
38 separate accounts of the different funds and appropriations of ~~money~~  
39 MONIES.

40 7. Give information in writing as to the condition of the state  
41 treasury, or on any subject relating to the duties of the treasurer, at  
42 the request of a member of the legislature.

43 8. Deliver to the governor and the department of administration,  
44 monthly, an accurate statement of receipts and expenditures of public  
45 monies for the preceding month, containing a complete exhibit of all the

1 public monies received and paid from the state treasury, showing, under  
2 separate heads, on what accounts and from what sources received, and for  
3 what particular object or service the monies have been paid. The  
4 treasurer shall deliver to the governor a similar statement on or before  
5 November 1 each year for the preceding fiscal year. The statement shall  
6 also include an estimate of the invested balance including the general  
7 fund share of that balance as of June 30 of the preceding fiscal year.  
8 The statements are public records available for inspection at the office  
9 of the state treasurer.

10 9. On or before February 1 of each year, in coordination with the  
11 director of the department of administration, submit to the joint  
12 legislative budget committee a report explaining any differences between  
13 the department of administration's estimate of the previous fiscal year's  
14 state general fund ending balance submitted pursuant to section 35-131 and  
15 the state treasurer's estimate of the invested balance including the **STATE**  
16 general fund share of that balance as of June 30 of the previous fiscal  
17 year submitted pursuant to paragraph 8 **OF THIS SUBSECTION**.

18 10. Exercise those specific powers of the surveyor-general as a  
19 member of the selection board established under section 37-202.

20 **11. ADMINISTER THE FAMILY COLLEGE SAVINGS PROGRAM ESTABLISHED BY**  
21 **TITLE 15, CHAPTER 14, ARTICLE 7.**

22 B. The state treasurer may administer all oaths prescribed by law  
23 in matters touching the duties of the office of the state treasurer,  
24 subject to chapter 4, article 4 of this title, may appoint a deputy state  
25 treasurer, may qualify and select investment managers or advisors pursuant  
26 to section 35-318 and shall perform other duties required by other laws of  
27 this state.

28 C. Employees of the state treasurer's office are subject to chapter  
29 4, article 4 of this title. For prospective or current employees of the  
30 state treasurer's office, the state treasurer may:

31 1. Require the submission of a full set of fingerprints for the  
32 purpose of obtaining a state and federal criminal records check pursuant  
33 to section 41-1750 and Public Law 92-544. The department of public safety  
34 may exchange this fingerprint data with the federal bureau of  
35 investigation.

36 2. Conduct a periodic review of credit standing.

37 Sec. 10. Title 41, chapter 1, article 4, Arizona Revised Statutes,  
38 is amended by adding section 41-175, to read:

39 41-175. Family college savings program advisory committee:  
40 membership; duties; committee termination

41 **A. THE STATE TREASURER SHALL APPOINT A FAMILY COLLEGE SAVINGS**  
42 **PROGRAM ADVISORY COMMITTEE TO ASSIST THE TREASURER IN PROMOTING AND**  
43 **RAISING AWARENESS OF THE FAMILY COLLEGE SAVINGS PROGRAM ESTABLISHED BY**  
44 **TITLE 15, CHAPTER 14, ARTICLE 7 TO RESIDENTS OF THIS STATE, WITH EMPHASIS**  
45 **ON INCREASING ACCESS TO THE PROGRAM AMONG ECONOMICALLY DISADVANTAGED,**

1 MINORITY AND UNDERREPRESENTED STUDENT POPULATIONS. THE ADVISORY COMMITTEE  
2 SHALL INCLUDE ALL OF THE FOLLOWING:

3 1. THE STATE TREASURER OR THE STATE TREASURER'S DESIGNEE, WHO  
4 SERVES AS CHAIRPERSON OF THE COMMITTEE.

5 2. TWO MEMBERS WHO REPRESENT COMMUNITY COLLEGE DISTRICTS IN THIS  
6 STATE, ONE OF WHOM REPRESENTS A COMMUNITY COLLEGE DISTRICT IN A COUNTY  
7 WITH A POPULATION OF FIVE HUNDRED THOUSAND PERSONS OR MORE AND ONE OF WHOM  
8 REPRESENTS A COMMUNITY COLLEGE DISTRICT IN A COUNTY WITH A POPULATION OF  
9 LESS THAN FIVE HUNDRED THOUSAND PERSONS.

10 3. ONE MEMBER WHO REPRESENTS A UNIVERSITY UNDER THE JURISDICTION OF  
11 THE ARIZONA BOARD OF REGENTS.

12 4. ONE MEMBER WHO REPRESENTS AN ACCREDITED PRIVATE EDUCATIONAL  
13 INSTITUTION IN THIS STATE OFFERING ASSOCIATE, BACCALAUREATE OR HIGHER  
14 DEGREES.

15 5. ONE MEMBER WHO REPRESENTS AN ACCREDITED PRIVATE EDUCATIONAL  
16 INSTITUTION OFFERING PRIVATE VOCATIONAL TRAINING IN THIS STATE.

17 6. ONE MEMBER WHO IS A TEACHER AND WHO CURRENTLY PROVIDES CLASSROOM  
18 INSTRUCTION IN THIS STATE.

19 7. ONE MEMBER WHO REPRESENTS A FEDERALLY RECOGNIZED INDIAN TRIBE IN  
20 THIS STATE.

21 8. ONE MEMBER WHO REPRESENTS A UNITED STATES DEPARTMENT OF  
22 LABOR-APPROVED APPRENTICESHIP PROGRAM.

23 9. TWO PUBLIC MEMBERS WHO ARE RESIDENTS OF THIS STATE.

24 B. THE COMMITTEE SHALL DO BOTH OF THE FOLLOWING:

25 1. ASSIST AND MAKE RECOMMENDATIONS TO THE STATE TREASURER REGARDING  
26 PROMOTIONAL AND INFORMATIONAL ACTIVITIES RELATING TO THE FAMILY COLLEGE  
27 SAVINGS PROGRAM.

28 2. MEET AT LEAST ONCE EACH CALENDAR QUARTER. A MAJORITY OF THE  
29 MEMBERSHIP CONSTITUTES A QUORUM FOR THE TRANSACTION OF BUSINESS.

30 C. COMMITTEE MEMBERS ARE NOT ELIGIBLE TO RECEIVE COMPENSATION OR  
31 REIMBURSEMENT OF EXPENSES.

32 D. THE STATE TREASURER'S OFFICE SHALL PROVIDE NECESSARY STAFF  
33 SERVICES TO THE COMMITTEE.

34 E. THE COMMITTEE ESTABLISHED BY THIS SECTION ENDS ON JULY 1, 2028  
35 PURSUANT TO SECTION 41-3103.

36 Sec. 11. Transfer; effect; succession; cooperation

37 A. All administrative matters, contracts and judicial and  
38 quasi-judicial actions, whether completed, pending or in process, of the  
39 commission for postsecondary education that relate to the family college  
40 savings program established by title 15, chapter 14, article 7, Arizona  
41 Revised Statutes, are transferred, on the effective date of this act, and  
42 retain the same status with the state treasurer.

43 B. All rules adopted by the commission for postsecondary education  
44 pursuant to title 15, chapter 14, article 7, Arizona Revised Statutes,

1 remain in full force until superseded by rules adopted by the state board  
2 of investment or the state treasurer, as applicable.

3 C. All FTE positions, property and records, all data and  
4 investigative findings, all obligations and all appropriated and  
5 nonappropriated monies remaining unspent and unencumbered of the  
6 commission for postsecondary education relating to the family college  
7 savings program pursuant to title 15, chapter 14, article 7, Arizona  
8 Revised Statutes, are transferred to the state treasurer and may be used  
9 for the purposes of this act.

10 D. The commission for postsecondary education shall cooperate and  
11 coordinate with the state treasurer to ensure the successful transition of  
12 the family college savings program from the commission to the state  
13 treasurer during the transfer period.

14 Sec. 12. Exemption from rulemaking

15 For the purposes of this act, the state board of investment is  
16 exempt from the rulemaking requirements of title 41, chapter 6, Arizona  
17 Revised Statutes, for one year after the effective date of this act for  
18 the purpose of adopting rules relating to the family college savings  
19 program pursuant to title 15, chapter 14, article 7, Arizona Revised  
20 Statutes, as amended by this act.

21 Sec. 13. Legislative intent

22 The legislature intends that the term of renewal of an existing  
23 appointment of a financial institution as a depository or manager of the  
24 family college savings program pursuant to title 15, chapter 14, article  
25 7, Arizona Revised Statutes, as amended by this act, that occurs before  
26 the effective date of this act not be for more than one year after the  
27 date of renewal and that no new contracts with one or more financial  
28 institutions to act as depositories or managers be entered into before the  
29 effective date of this act.

30 Sec. 14. Effective date

31 This act is effective from and after September 30, 2020.

APPROVED BY THE GOVERNOR JUNE 5, 2020.

FILED IN THE OFFICE OF THE SECRETARY OF STATE JUNE 5, 2020.

**ARS 15-1872 AZ529, Arizona's education savings plan; state board  
of investment; rules; powers and duties (Arizona Revised  
Statutes (2022 Edition))**

---

**§ 15-1872. AZ529, Arizona's education savings plan; state board of  
investment; rules; powers and duties**

A. The board shall approve financial institutions to act as the depositories and managers of AZ529, Arizona's education savings plan accounts pursuant to section 15-1874.

B. The board may adopt rules to assist in implementing and administering this article.

C. Members of the board are immune from personal liability with respect to all actions that are taken in good faith and within the scope of the board's authority.

**History:**

Amended by L. 2021, ch. 188,s. 3, eff. 9/29/2021. Amended by L. 2020, ch. 88,s. 2, eff. 10/1/2020.

**§ 15-1875. Plan requirements**

A. The plan shall be operated through the use of accounts in the fund established by account owners. Payments to the fund for participation in the plan shall be made by account owners pursuant to tuition savings agreements. An account may be opened by any person who desires to invest in the fund and to save to pay qualified higher education expenses by satisfying each of the following requirements:

1. Completing an application in the form prescribed by the treasurer. The application shall include the following information:

(a) The name, address and social security number or employer identification number of the contributor.

(b) The name, address and social security number of the account owner if the account owner is not the contributor.

(c) The name, address and social security number of the designated beneficiary.

(d) The certification relating to no excess contributions required by subsection L of this section.

(e) Any other information that the treasurer may require.

2. Paying the onetime application fee established by the treasurer.

3. Making the minimum contribution required by the treasurer or by opening an account.

4. Designating the type of account to be opened if more than one type of account is offered.

B. Any person may make contributions to an account after the account is opened.

C. Contributions to accounts may be made only in cash.

D. An account owner may change the designated beneficiary of an account to an individual who is a member of the family of the former designated beneficiary in accordance with procedures established by the treasurer.

E. On the direction of an account owner, all or a portion of an account may be transferred to another account of which the designated beneficiary is a member of the family of the designated beneficiary of the transferee account.

F. Changes in designated beneficiaries and rollovers under this section are not allowed if the changes or rollovers would violate either of the following:

1. Subsection L of this section, relating to excess contributions.
2. Subsection I of this section, relating to investment choice.

G. Each account shall be maintained separately from each other account under the plan.

H. Separate records and accounting shall be maintained for each account for each designated beneficiary.

I. A contributor to, account owner of or designated beneficiary of any account may not direct the investment, within the meaning of section 529 of the internal revenue code, of any contributions to an account or the earnings from the account.

J. If the treasurer terminates the authority of a financial institution to hold accounts and accounts must be moved from that financial institution to another financial institution, the treasurer shall select the financial institution and type of investment to which the balance of the account is moved unless the internal revenue service provides guidance stating that allowing the account owner to select among several financial institutions that are then contractors would not cause a plan to cease to be a qualified tuition plan.

K. Neither an account owner nor a designated beneficiary may use an interest in an account as security for a loan. Any pledge of an interest in an account is of no force and effect.

L. On the recommendation of the treasurer, the board shall adopt rules to prevent contributions on behalf of a designated beneficiary in excess of those necessary to pay the qualified higher education expenses of the designated beneficiaries. The rules shall address the following:

1. Procedures for aggregating the total balances of multiple accounts established for a designated beneficiary.
2. The establishment of a maximum total balance for the purpose of prohibiting contributions to accounts established for a designated beneficiary if the contributions would cause the maximum total balance to be exceeded.
3. The board shall review the quarterly reports received from participating financial institutions and certify that the balance in all qualified tuition

programs, as defined in section 529 of the internal revenue code, of which that person is the designated beneficiary does not exceed the lesser of:

(a) A maximum college savings amount established by the board from time to time.

(b) The cost in current dollars of qualified higher education expenses that the contributor reasonably anticipates the designated beneficiary will incur.

4. Requirements that any excess contributions with respect to a designated beneficiary be promptly withdrawn in a nonqualified withdrawal or rolled over to another account in accordance with this section.

M. If there is any distribution from an account to any person or for the benefit of any person during a calendar year, the distribution shall be reported to the internal revenue service and the account owner or the designated beneficiary to the extent required by federal law.

N. The financial institution shall provide statements to each account owner at least once each year within thirty-one days after the twelve-month period to which they relate. The statement shall identify the contributions made during a preceding twelve-month period, the total contributions made through the end of the period, the value of the account as of the end of this period, distributions made during this period and any other matters that the treasurer requires be reported to the account owner.

O. Statements and information returns relating to accounts shall be prepared and filed to the extent required by federal or state tax law.

P. A state or local government or organizations described in section 501(c)(3) of the internal revenue code may open and become the account owner of an account to fund scholarships for persons whose identity will be determined after an account is opened.

Q. In the case of any account described in subsection P of this section, the requirement that a designated beneficiary be designated when an account is opened does not apply and each person who receives an interest in the account as a scholarship shall be treated as a designated beneficiary with respect to the interest.

R. Any social security numbers, addresses or telephone numbers of individual account holders and designated beneficiaries that come into the possession of the treasurer are confidential, are not public records and shall not be released by the treasurer.

S. An account owner may transfer ownership rights to another eligible account owner.

T. An account owner may designate successor account owners.

U. Through December 31, 2025, on direction of an account owner, up to \$15,000 of an account may roll over to an achieving a better life experience act account established pursuant to 26 United States Code section 529A.

**History:**

**DEPARTMENT OF ENVIRONMENTAL QUALITY**  
Title 18, Chapter 7

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 8, 2022

**SUBJECT:** Department of Environmental Quality  
Title 18, Chapter 7

---

This Five-Year-Review Report (5YRR) from the Department of Environmental Quality relates to rules in Title 18, Chapter 7 regarding Remedial Action. The report covers the following Articles:

**Article 2** - Soil Remediation Standards

**Article 3** - Prospective Purchaser Agreement

**Article 5** - Voluntary Remediation Program

**Article 6** - Declaration of Environmental Use Restriction Fee

In the last 5YRR the Department proposed to amend several of its rules if any material changes were made to the rules. The Department indicates they did not complete a rulemaking because no substantive changes were warranted.

### **Proposed Action**

Currently, the Department is proposing to amend several of its rules to improve their overall clarity, conciseness, understandability, and effectiveness. The Department plans to submit a rulemaking to the Council by July 2023.

1. **Has the agency analyzed whether the rules are authorized by statute?**

Yes, the Department cites to both general and specific statutory authority.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

According to the Department:

- The economic impacts of Article 2 have not changed substantially from the last Five-Year Review Report.
- While the fees rates in Article 3 increased, the Department believes the fees represent the least burden possible to property owners, evidenced by the pace of applications for Prospective Purchaser Agreements (PPAs).
  - From 2017 to March 2022 there have been 14 executed PPAs (plus 9 pending approval).
  - From 2017 to March 2022 there were 23 PPA applications (6 were Water Quality Assurance Revolving Fund (WQARF) sites).
  - The average cost is \$2,500 for WQARF sites and \$3,600 for those that are not on the WQARF registry.
- The Voluntary Remediation Program (Article 5) provides benefits to property owners and the community while minimizing the economic impact to small businesses. The fees to participate in the program have not changed since 2001.
  - As of March 2022, there are 51 active sites in the VRP.
  - From 2017 to March 2022, there was an average of 8 sites added per year.
  - Fees collected average about \$350,000 a year over the last five years.
- The rulemaking for the fee rules in Article 6 was exempt from an EIS, but the Department believes that this Article does not have a substantial economic impact on the state's economy, small businesses, or consumers.

Stakeholders include the Department, property owners, and the general public.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The agency believes that the benefits of protecting public health and the environment are greater than the costs imposed by these rules.

4. **Has the agency received any written criticisms of the rules over the last five years?**

Yes, the Department received two comments to the rules, and adequately responded the comments.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Department indicates the rules are overall clear, concise, and understandable with the exception of the following:

**R18-7-201** - Definitions  
**Appendix B**. 1997 Soil Remediation Levels (SRLs)  
**R18-7-301** - Prospective Purchaser Agreement Fee

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Department indicates the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Department indicates the rules are effective in achieving their objectives with the exception of the following:

**R18-7-502** - Application Fee  
**R18-7-503** - Deposit  
**R18-7-506** - Voluntary Remediation Program Accounting  
**R18-7-507** - Account Reconciliation

8. **Has the agency analyzed the current enforcement status of the rules?**

Yes, the Department indicates the rules are enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Not applicable. There are no corresponding federal laws to the rules.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rules were adopted before July 29, 2010.

11. **Conclusion**

For the specific reasons mentioned in the report, the Department is proposing several of its rules to improve their overall clarity, conciseness, understandability, and effectiveness. The Department plans to submit a rulemaking to the Council by July 2023.

Council staff recommends approval of this report.

Douglas A. Ducey  
Governor

Re: Submittal of Five Year Rule Review Report for A.A.C. Title 7, Chapter 16, Articles 2, 3, 5, and 6

Dear Chair Sornsins:

I am pleased to submit to you, pursuant to A.R.S. § 41-1056 and A.A.C. R1-6-301, our agency's 5-Year Review Report for Title 18, Chapter 7, Article 2 [Soil Remediation Standards], Article 3 [Prospective Purchaser Agreement], Article 5 [Voluntary Remediation Program], Article 6 [Declaration of Environmental Use Restriction Fee].

Pursuant to A.R.S. § 41-1056(A), I certify that ADEQ is in compliance with A.R.S. § 41-1091 requirements for filing of notices of substantive policy statements and annual publication of a substantive policy statement directory.

Please contact Dena Kalamchi in the Waste Programs Division at 602-771-5215, or [kalamchi.dena@azdeq.gov](mailto:kalamchi.dena@azdeq.gov), if you have any questions.

Sincerely,

Misael Cabrera, P.E.  
Director

**8/26/2022**

**1. Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. §§ 41-1003 and 49-104(B)(4).

Specific Statutory Authority: A.R.S. §§ 49-104(B)(16), 49-152(A)(1), 49-152(K), 49-152(M), 49-158(G), 49-158(J), 49-179, 49-186, 49-285.01(H), and Laws 2000, Chapter 225, §13.

**2. The objective of each rule:**

<b>Rule</b>	<b>Objective</b>
R18-7-201	The rule’s objective is to provide definitions necessary for the administration of 18 A.A.C. 7, Article 2.
R18-7-202	The rule describes the extent to which 18 A.A.C. 7, Article 2 is applicable. The rule applies to persons who undertake soil remediation activities; both those who have a legal duty to do so and those who conduct voluntary remediation. The rule also describes the transition from the old standards in Appendix B to the new standards in Appendix A.
R18-7-203	The rule summarizes the objectives that must be met for the remediation of contaminated soil to protect public health and the environment.
R18-7-204	The rule describes how a person may remediate to a background contaminant concentration and how background remediation standards are to be established.
R18-7-205	The rule describes how a person may remediate to residential or non-residential soil remediation levels as appropriate for the use of the property. It also provides further details with respect to the use of the pre-determined standards in Appendices A and B.
R18-7-206	The rule describes how a person may remediate to a residential or non-residential site-specific remediation level as determined by a site-specific human health risk assessment. It also establishes human health risk assessment methodologies and factors to use.
R18-7-207	The rule specifies a site-specific remediation level for nitrate or nitrite contaminated soil.
R18-7-208	The rule lists the circumstances under which a property owner is required to execute and record a Declaration of Environmental Use Restriction (DEUR) and provides the authorizing statute for more complete details.
R18-7-209	The rule describes the procedures for the Department issuing a Letter of Completion, or an alternative closure document for a property.
R18-7-210	The rule’s objective is to inform property owners and persons conducting soil remediation when a Notice of Remediation is required and what the notice is to contain. Additionally, the rule sets forth the requirements for the Department’s soil remediation repository.

Appendix A	The objective of Appendix A is to provide a list of contaminants of concern and the soil clean up levels associated with each. The Appendix provides the predetermined soil remediation levels for several clean up scenarios: residential, non-residential, and residential levels for carcinogens where the property use is a school or facility where children are reasonably expected to be in frequent, repeated contact with the soil (the 10-6 column).
Appendix B	The objective of Appendix B was to preserve the list of contaminants of concern and soil cleanup levels for certain grandfathered sites from the 1997 rules. Sites that were characterized before May 5, 2007 had the option to use Appendix B, and then had three years to meet the 1997 SRLs in Appendix B. After that date, the updated SRLs from Appendix A applied to them.
R18-7-301	The Department may enter into an agreement with the prospective purchaser of a contaminated property who meets certain qualifications. Under the agreement, the Department will provide to the purchaser a written release and a covenant not to sue for existing contamination at the facility. A.R.S. § 49-285.01 allows the Department to charge the prospective purchaser a reasonable fee for the preparation and execution of the agreement. This rule's objective is to establish details and procedures related to the fee.
R18-7-501	The rule provides three definitions necessary for the administration of 18 A.A.C. 7, Article 5.
R18-7-502	The rule establishes an efficient application process and establishes a nonrefundable application fee for the VRP, as required by A.R.S. § 49-179(A), to ensure that the Department recovers the costs of reviewing an application, requesting additional information, determining the applicant's eligibility to participate in the program, and providing other application-related services.
R18-7-503	The rule establishes a efficient process for VRP applicants to pay advance deposits to be applied against the Department's reimbursable costs, as authorized by A.R.S. § 49-179(C).
R18-7-504	The rule implements the provisions of A.R.S. § 49-179 relating to the reimbursement of program costs.
R18-7-505	The rule establishes the hourly rate the Department may charge applicants for certain reimbursable costs and services.
R18-7-506	The rule establishes a efficient method of communicating statements to program participants. The rule implements the provision in A.R.S. § 49-179(C) that requires the Department to provide applicants with documentation supporting its claims for reimbursement consistent with generally accepted accounting principles.
R18-7-507	The rule establishes a efficient method of communicating statements to program participants. The rule identifies the procedure that the Department will use to reconcile the total amount of site-specific reimbursable costs incurred by the Department against the total amount of funds paid by the applicant to determine the final amount due to or from the applicant.
R18-7-601	The rule's objective is to provide definitions necessary for the administration of 18 A.A.C. 7, Article 6.
R18-7-602	The rule describes the extent to which 18 A.A.C. 7, Article 6 is applicable. The rule applies to properties where the owner has elected to use an institutional control and/or an engineering control to reduce the potential for exposure to contaminants on the property, or to leave contamination in place with contaminant levels that are between residential and non-residential soil standards.
R18-7-603	The rule states that a fee must be paid to the Department prior to the property owner recording a DEUR.
R18-7-604	The rule provides a graduated fee schedule and informs property owners how specific costs will be included in calculating the fee for a DEUR.
R18-7-605	The rule's objective is to provide a mechanism for property owners to postpone payment of the portion of the fee to release the DEUR.
R18-7-606	The rule's objective is to clarify that a property owner must pay an additional fee to the Department if the property owner wishes to request a modification to an existing DEUR.

3. **Are the rules effective in achieving their objectives?** Yes X No \_\_

The rules are effective except as indicated below.

Rule	Explanation
R18-7-502	The rule does not allow for ACH or wire transfers and therefore does not effectively meet the rule objective for efficient payment.
R18-7-503	The rule does not allow for ACH or wire transfers and therefore does not effectively meet the rule objective for efficient payment.
R18-7-506	The rule does not allow for emailing of billing statements and therefore does not effectively meet the rule objective for efficient statement communication.
R18-7-507	The rule does not allow for emailing of billing statements and therefore does not effectively meet the rule objective for efficient statement communication.

4. **Are the rules consistent with other rules and statutes?** Yes X No \_\_

5. **Are the rules enforced as written?** Yes X No \_\_

6. **Are the rules clear, concise, and understandable?** Yes X No \_\_

Except as indicated below, the rules are clear, concise, and understandable.

Rule	Explanation
R18-7-201	In the definition of “carcinogen”, there is an outdated link for an EPA guidance document. The correct link is now: <a href="https://www.epa.gov/sites/production/files/2013-09/documents/cancer_guidelines_final_3-25-05.pdf">https://www.epa.gov/sites/production/files/2013-09/documents/cancer_guidelines_final_3-25-05.pdf</a> . The Department plans to update the link in an expedited rulemaking to improve clarity and understandability.
Appendix B	Appendix B has become outdated because no sites exist that were characterized before May 5, 2010 where soil remediation can still be conducted with Appendix B standards. In an expedited rulemaking, ADEQ plans to repeal Appendix B and remove any references thereto in Chapter 7 to improve clarity.
R18-7-301	Subsection (F) requires publication of legal notice but does not describe the manner or location for publication. Language from R18-1-401(A) would otherwise apply here, which describes guidance for when “notice procedures are not otherwise prescribed by statute or rule”: notice shall be published “at least once, in one or more newspapers of general circulation in the county or counties concerned.” To improve rule clarity and understandability, the Department plans to amend the rule in an expedited rulemaking to clarify notice requirements.

7. **Has the agency received written criticisms of the rules within the last five years?** Yes X No \_\_

Rule	Explanation
R18-7-203(B)	<u>Criticism 1</u> [ <i>summarized, full comment attached</i> ]: The Arizona Chamber of Commerce believes R18-7-203 is inconsistent with A.R.S. § 49-152(C) because it doesn’t expressly require consideration of engineering controls, such as a barrier or cap, to meet standard or site-specific soil remediation standards.  The commenter suggests that the following text is added as 203(B)(4): “An engineering control as defined in A.R.S. § 49-151 shall be taken into consideration when determining whether the contaminants remaining in the soil after remediation meet the requirements of this subsection, so long as a ‘declaration of environmental use restriction’ under A.R.S. § 49-152 is

	<p>recorded in each county where the contaminants and engineering control remain.”</p> <p><u>Response 1:</u> ADEQ appreciates the comment. If the department receives approval from the Governor, the department will work with stakeholders to address this issue in the next rulemaking.</p> <p><u>Criticism 2</u> [<i>summarized, full comment attached</i>]: R18-7-203 does not specify how protection of aquifer water quality should be measured.</p> <p>The commenter suggests that the following text is added as 203(B)(5): “When determining whether soil remediation will cause or threaten to cause a violation of aquifer water quality standards, the Department shall make that determination from the applicable point of compliance for groundwater protection.”</p> <p><u>Response 2:</u> ADEQ appreciates the comment. ADEQ commits to working with this stakeholder and will consider this suggestion in the next rulemaking.</p>
--	---

**8. Economic, small business, and consumer impact comparison:**

**Article 2. Soil Remediation Standards**

ADEQ does not believe that the economic impact of this article has changed substantially from the last Five-Year Review Report. These soil remediation level (SRL) rules were amended by the Department in May 2007. An Economic, Small Business, and Consumer Impact Statement (EIS) was prepared for that rulemaking and is submitted with this report.

The May 2007 EIS for Article 2 was primarily based on two categories of changes made to the SRLs. First, although the same formulas were used to calculate safe levels and allowable risk levels remained the same with one exception, soil levels were updated. For example, residential SRLs were changed for 521 chemicals, some higher some lower. These balanced out so that little extra burden was imposed on the universe of sites to be remediated. ADEQ has determined that for this category, the economic impact has not changed because overall, the type of contaminated sites being subject to the SRLs has not changed. Although, there is much less MTBE contamination now, TCE and PCE contamination remains significant. Then, as now, the impact from the incremental increases and decreases in costs associated with updated SRLs were and are relatively small compared to overall project costs.

The other category of change was a more protective standard required for remediation of sites intended to be used as a school or child care facility. The economic impact of this category was small because so few sites are affected and has not differed significantly from the May 2007 EIS. ADEQ has noted that while the remediation standards have not changed in the last five years, costs have increased. ADEQ staff and other operating costs related to Article 2 have increased since 2007. Fluctuations are caused by the amount of work coming into the Department where the Article 2 rules need to be applied.

**Article 3. Prospective Purchaser Agreement**

This article was amended by the Department and approved by GRRC in March of 2006. An EIS was prepared in conjunction with that rulemaking and is submitted with this report. The primary economic impact of these rules is the cost of a Prospective Purchaser Agreement (PPA). In the last making of the rule, the initial fee was increased from \$900 to \$2500, and the hourly rate was increased from \$30 to \$73 to allow the program to continue. As shown below, applications for a PPA continue at a moderate pace; evidence that property owners continue to exercise the option to obtain a PPA. ADEQ believes that these

fees represent the least burden possible since that was the case when they were enacted and inflation suggests that, if anything, they would go up, an option not studied or thought necessary at this time.

- From 2017 to March 2022 there have been 14 executed PPAs (plus 9 pending approval).
- From 2017 to March 2022 there were 23 PPA applications (6 were Water Quality Assurance Revolving Fund (WQARF) sites).
- The average cost is \$2,500 for WQARF sites and \$3,600 for those that are not on the WQARF registry.

**Article 5. Voluntary Remediation Program**

An EIS was prepared when these rules were adopted and is submitted with this report. The greatest economic benefit of the Voluntary Remediation Program (VRP) is putting contaminated, and perhaps stigmatized, property to beneficial use affording the owner and community financial benefits. Obtaining a no further action (NFA) determination is a great benefit to participants and allows them to return their property to beneficial use or sell at a higher price than if the property was not remediated. The fees required to participate in the VRP program have not changed since 2001. The rules allow small businesses to pay VRP fees under a schedule to minimize the economic impact to small businesses.

- As of March 2022, there are 51 active sites in the VRP.
- From 2017 to March 2022, there was an average of 8 sites added per year.
- Fees collected average about \$350,000 a year over the last five years.

**Article 6. Declaration of Environmental Use Restriction Fee**

The rulemaking for these fee rules was exempt from the provisions of Title 41, Chapter 6, Article 3 under Laws 2000, Chapter 225, § 13. Accordingly, an EIS was not prepared for that rulemaking. The current actual economic, small business and consumer impact is summarized here. ADEQ believes that this Article does not have a substantial economic impact on the state’s economy, small businesses or consumers.

Declaration of Environmental Use Restriction (DEUR) fees typically involve a property owner paying the respective fees, but political subdivisions are also affected. Cities, counties, a university, and the State of Arizona have executed and recorded DEURs under this program. The DEUR is a restrictive covenant that restricts use of a carefully described contaminated area to nonresidential uses to reduce the potential for exposure to the contaminants. It is used if the owner of contaminated property chooses not to remediate the contamination to the safer residential levels and can accept the restriction because the intended use is nonresidential, such as a warehouse or a factory.

It is the owner’s choice to remediate through DEUR or to clean up to residential standards. Therefore, this article is generally used when the benefits exceed the costs. Contaminated property can benefit from a DEUR recorded to allow the owner to remediate to lower standards if higher standards are not necessary.

- From 2017 to 2022, ADEQ approved and recorded 12 DEURs, processed 7 DEUR modifications, and processed 4 DEUR releases.
- The cost to the owner runs from about \$6,000 to a maximum of approximately \$25,000. Almost all of the fees contained in Article 6 are flat fees, except an hourly rate that is listed in the rule.
- From 2017 to March 2022, the DEUR Program has collected \$131,110 in DEUR fees.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes  No
10. **Has the agency completed the course of action indicated in the agency’s previous five-year-review report?**

Rule	Explanation
R18-7-201	<u>2017 Proposed Course of Action:</u>

	<p>ADEQ proposes to remove text related to Appendix B from the definition of “soil remediation level” in an expedited rulemaking that will repeal Appendix B and be proposed in 2017.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> The Department indicated if any material changes were made to 18 A.A.C. 7, such as modifying fees in Articles 5 and 6, this subsection would be amended. The Department did not undertake that rulemaking and, thus, did not amend this rule.</p>
R18-7-202	<p><u>2017 Proposed Course of Action:</u> ADEQ proposes to remove text related to Appendix B in R18-7-202(E) in an expedited rulemaking that will repeal Appendix B and be proposed in 2017.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> The Department indicated if any material changes were made to 18 A.A.C. 7, such as modifying fees in Articles 5 and 6, this subsection would be amended. The Department did not undertake that rulemaking and, thus, did not amend this rule.</p>
R18-7-205	<p><u>2017 Proposed Course of Action:</u> ADEQ proposes to remove the reference to Appendix B from subsection (A) of this rule in an expedited rulemaking that will repeal Appendix B and be proposed in 2017.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> The Department indicated if any material changes were made to 18 A.A.C. 7, such as modifying fees in Articles 5 and 6, this subsection would be amended. The Department did not undertake that rulemaking and, thus, did not amend this rule.</p>
Appendix B	<p><u>2017 Proposed Course of Action:</u> ADEQ believes that Appendix B has become outdated because no sites exist that were characterized before May 5, 2007 where soil remediation can still be conducted with Appendix B standards. ADEQ plans to propose an expedited rulemaking to repeal Appendix B and amend text in 3 other Sections in Article 2 where reference is made to Appendix B (R18-7-201, 202, and 205). If the department receives approval from the Governor to adopt permanent fee rules in Articles 5 and 6, ADEQ will repeal Appendix B in that rulemaking.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> The Department indicated Appendix B would be repealed if any material changes were made to 18 A.A.C. 7. The Department did not undertake this rulemaking yet because it is not a substantive change that warranted a separate rulemaking.</p>
R18-7-301	<p><u>2017 Proposed Course of Action:</u> If the department receives approval from the Governor to adopt permanent fee rules in Articles 5 and 6 of 18 A.A.C. 7, the department will clarify the publication requirement described below:</p> <p>The Department has analyzed the clarity, conciseness, and understandability of this rule. Subsection (F) requires the department to publish a legal notice. It appears that only a single publication is required but there is no indication of where the notice should be published. A department rule in 18 A.A.C. 1 provides some guidance by stating that when “notice procedures are not otherwise prescribed by statute or rule” notice shall be published “at least once, in one or more newspapers of general circulation in the county or counties concerned”. (R18-1-401(A)) This language could</p>

	<p>be inserted in R18-7-301. Other than this, the rule in 18 A.A.C. 7, Article 3 is clear, concise, and understandable.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> The Department indicated if any material changes were made to 18 A.A.C. 7, such as modifying fees in Articles 5 and 6, this subsection would be amended. The Department did not have any necessary substantive changes and, thus, did not undertake a rulemaking for this chapter.</p>
<p>R18-7-501 R18-7-502 R18-7-503 R18-7-504 R18-7-505 R18-7-506 R18-7-507</p>	<p><u>2017 Proposed Course of Action:</u> In the last 5-year review report, ADEQ believed it would have the resources to propose permanent fee rules by December 2013, but that it would have to evaluate the current fees in order to request an exemption from the Governor’s Office. Due to other rulemaking priorities, ADEQ has not evaluated the current fees or requested an exemption for this rulemaking as of June, 2017. However, ADEQ has begun soliciting suggestions from customers in preparation for a VRP fee rulemaking it expects to submit to GRRC in October, 2019.</p> <p>Although the Article 5 interim fee rules are working effectively, the Department believes its recent emphasis on simplicity and waste reduction make this a good time to update these rules. ADEQ will be submitting a request for a rule making exception to the Governor in time for a rulemaking to be submitted to GRRC in October, 2019. It should be noted that as part of the information needed to make a request to the Governor for a permanent fee rulemaking, ADEQ must determine whether to propose increasing, decreasing, or keeping the fees the same. It is uncertain whether an exemption under the current rulemaking moratorium would apply to the rule unless the fees or administrative burden decreased.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> ADEQ has evaluated the current fee structure and does not believe a change is necessary at this time as there were no notable issues with fees from the past five years and the Department believes the current fee structure is effective as is. The Department will amend the rules to add electronic payment options in a rulemaking but does not believe a fee structure change is necessary anymore.</p>
<p>R18-7-601 R18-7-602 R18-7-603 R18-7-604 R18-7-605 R18-7-606</p>	<p><u>2017 Proposed Course of Action:</u> Although the Article 6 interim fee rules are working effectively, the Department believes its recent emphasis on simplicity and waste reduction make this a good time to update these rules. ADEQ will be submitting a request for a rule making exception to the Governor in time for a rulemaking to be submitted to GRRC in October, 2019. It should be noted that as part of the information needed to make a request to the Governor for a permanent fee rulemaking, ADEQ must determine whether to propose increasing, decreasing, or keeping the fees the same. It is uncertain whether an exemption under the current rulemaking moratorium would apply to the rule unless the fees or administrative burden decreased.</p> <p><u>Completed:</u> No</p> <p><u>Explanation:</u> ADEQ has evaluated the current fee structure and does not believe a change is necessary at this time as there were no notable issues with fees from the past five years and the Department believes the current fee structure is effective as is. The Department will amend the rules to add electronic payment options in a rulemaking but does not believe a fee structure change is necessary anymore.</p>

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

Article	Analysis
<p><b>Article 2</b></p>	<p>The costs of Soil Remediation Standards in Article 2 include costs required to remediate a site to safe soil standards. The exact cost varies greatly depending on the site, but it is the choice of the person remediating to meet one of up to five standards (background, a choice of residential or non-residential predetermined standards, or site-specific risk assessment at either residential or non-residential levels). This gives maximum control to impacted entities to choose the lowest possible cost for the intended use of the property while attaining the regulatory objective of clean soil. The benefits include reduced adverse health effects, and uniform standards that apply equally to large and small facilities.</p> <p>ADEQ believes the benefits of protecting public health and the environment by remediating hazardous contamination is a state priority and outweighs the remediation cost to site owners. This article grants site owners control over how they wish to remediate in an effort to minimize the cost and maximize the environmental benefit.</p>
<p><b>Article 3</b></p>	<p>The costs of Article 3 include the fee for a prospective purchaser agreement. The prospective purchaser bears the cost but participation is voluntary. There is also an option to “pay as you go” and withdraw the prospective purchaser agreement request without incurring more charges. The benefits of receiving a prospective purchaser agreement include a written covenant not to sue or hold a prospective purchaser liable for existing contamination under WQARF or CERCLA which can cost several millions of dollars. Another added benefit is returning land to its beneficial use by allowing the sale of property without the purchaser having to worry about future liabilities. Applications for a PPA continue at a moderate pace, evidence that property owners have continued to exercise the option to obtain a PPA. ADEQ believes that these fees still represent the least burden possible since that was demonstrated when they were enacted and inflation suggests that, if anything, the costs and fees would go up, an option not studied or thought necessary at this time.</p> <p>The Department assumes that the prospective purchaser has weighed the upfront costs with the estimated benefits and decided that the benefits exceed the costs. ADEQ believes the benefit of this article outweighs any cost on the applicant while providing an option to return land to beneficial use while addressing health and environmental hazards.</p>
<p><b>Article 5</b></p>	<p>The costs of Article 5 include the VRP application fee and the time required to file and process the application. The costs include a \$2,000 nonrefundable application fee (nonrefundable by statute) and a deposit of \$4,000. The department may request additional deposits in amounts not to exceed \$4,000 to fund work performed at the rate of \$110/hr. These small deposits allow the department to accommodate small owners by allowing for more manageable fee amounts over smaller time intervals. The benefit of Article 5 is the opportunity to receive a no further action (NFA) determination while managing your own cleanup. ADEQ believes that these fees still represent the least burden possible since that was demonstrated when they were enacted and inflation suggests that, if anything, the costs and fees would go up, an option not studied or thought necessary at this time.</p> <p>Due to the voluntary nature of this program and high participation rate, ADEQ believes that the benefits of ADEQ oversight combined with an NFA determination are greater than their costs. ADEQ currently believes these rules impose the least burden and cost on the regulated community consistent with the objective of this self-funded program to incentivize owners to remediate.</p>

<b>Article 6</b>	<p>The costs of Article 6 include Declaration of Environmental Use Restriction (DEUR) fees. The DEUR fee rules in this Article impose the least burden and cost necessary to achieve the objective of reducing the potential for exposure to contaminants on the property. The fee calculations were based on department costs from 2003 and earlier. Postponement of a portion of the fee related to release of the DEUR is also a burden-reducing feature. Accepting a use restriction or engineering control on a property may affect the intended use of the property only minimally, but may save significantly on remediation expense and time. The benefit of a DEUR on property allows the owner to pause or halt cleanup of the parcel at a point that is still above residential standards but is adequate for the owner’s non-residential plans for the property. Furthermore, site owners may apply to modify the DEUR if they wish to remediate to a residential standard. ADEQ believes that the fees represent the least burden possible since that was demonstrated when they were enacted and inflation suggests that, if anything, the costs and fees would go up, an option not studied or thought necessary at this time.</p> <p>The fee costs or restriction is minimal compared to the amount the regulated community saves by halting remediation. This article allows a good balance between remediating to safe standards while not hindering site owners financially. Due to the voluntary nature of this “attachment” to property rights, ADEQ believes that DEURs have been shown to have benefits greater than their costs.</p>
------------------	--

12. **Are the rules more stringent than corresponding federal laws?** Yes \_\_\_ No X

These rules relate to the state VRP and WQARF programs and therefore there is no corresponding federal law.

13. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

These rules were adopted before July 29, 2010.

14. **Proposed course of action**

Contingent upon the approval of Governor’s Office, ADEQ anticipates conducting a rulemaking to address the course of action outlined in the table below. The Department anticipates submitting the rulemaking to GRRC by July 2023. The Department also commits to work with stakeholders to understand written criticisms in Section 7 and will consider these changes in the rulemaking.

Rule	Potential Amendment
R18-7-201	<p>The text in the “soil remediation level” definition related to Appendix B could be removed if Appendix B is repealed.</p> <p>The EPA guidance document link is no longer active and the link should be updated to the one below so the regulated community can find it.  <a href="https://www.epa.gov/sites/production/files/2013-09/documents/cancer_guidelines_final_3-25-05.pdf">https://www.epa.gov/sites/production/files/2013-09/documents/cancer_guidelines_final_3-25-05.pdf</a></p>
R18-7-202	Remove text related to Appendix B in 202(E) and (G) as no sites exist that use Appendix B and it will be repealed.
R18-7-203 (B)	The department will work with stakeholders to identify in rule how and under what circumstances engineering controls, such as a barrier or cap, should be considered to meet a site-specific soil remediation standard.

<b>Rule</b>	<b>Potential Amendment</b>
R18-7-205(A)	Remove reference to Appendix B as no VRP sites exist that use Appendix B and Appendix B will be repealed.
Appendix B	Repeal and remove Appendix B. This Appendix has become outdated because no existing sites were characterized before May 5, 2010 where soil remediation can still be conducted with Appendix B standards.
R18-7-301	Subsection (F) requires publication of legal notice but does not describe the location for the publication. Language can be added to specify.
R18-7-502	Add ACH and wire transfers as options for fee submittal to modernize the requirement and meet the rule objective.
R18-7-503	Add ACH and wire transfers as options for fee submittal to modernize the requirement and meet the rule objective.
R18-7-506	Add email option for statement communication to modernize the requirement and meet the rule objective.
R18-7-507	Add email option for statement communication to modernize the requirement and meet the rule objective.

**TITLE 18. ENVIRONMENTAL QUALITY**  
**CHAPTER 7. DEPARTMENT OF ENVIRONMENTAL QUALITY**  
**REMEDIAL ACTION**

*Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (01-4).*

*Editor's Note: The proposed summary action amending the heading of Chapter 7 was remanded by the Governor's Regulatory Review Council (August 4, 1999), which revoked the interim effectiveness of the change as of January 22, 1999. The heading of Chapter 7 before the proposed summary action has been restored (Supp. 99-3).*

*Editor's Note: Chapter 7 heading repealed; new heading adopted; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4).*

*Editor's Note: At the request of the Department of Environmental Quality, interim rules removed in Articles 1 & 2 (Supp. 97-3) by the emergency expiring were reinstated. The Department determined these emergency rules were in effect until permanent rules were adopted pursuant to Laws 1995, Ch. 232, § 5, and Laws 1996, Chapter 151, § 9. Under these Laws the Department was required to "adopt risk based remediation standards formally by rule pursuant to A.R.S. § 49-152(A) ... no later than August 1, 1997."; and the "interim standards adopted pursuant to A.R.S. § 49-152(A)(1)(a) and (b) ... as emergency rules shall remain in effect until the formally established rules are adopted." The interim rules have not been reprinted because permanent final rules have now been filed. Refer to Supp. 97-1 for interim emergency rules (Supp. 97-4).*

*Editor's Note: A Section of this Chapter was adopted under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 1997, Ch. 296, §§ 3(E) and (G), (10) and (11). Although exempt from certain provisions of the rule-making process, the Department was required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 97-3).*

*Editor's Note: Some Sections of Chapter 7 were exempt from the rulemaking process (Laws 1995, Ch. 232, § 5). However the Department was required to provide a notice of hearing and public hearing before adoption of the emergency rules. The emergency rules were approved by the Attorney General (Supp. 96-1). Editor's note added to clarify exemptions of emergency adoptions (Supp. 97-1).*

**ARTICLE 1. EXPIRED**

*Article 1, consisting of Section R18-7-110, expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).*

*The proposed summary action renumbering Section R18-7-110 to R18-7-101 was remanded by the Governor's Regulatory Review Council (August 4, 1999), which revoked the interim effectiveness of the changes as of January 22, 1999. The numbering of Article 1 before the proposed summary action has been restored (Supp. 99-3).*

*Article 1, consisting of Sections R18-7-101 thru R18-7-109 repealed; R18-7-110 renumbered to R18-7-101; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4).*

*Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as permanent rules effective December 22, 1987.*

*Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as an emergency effective September 17, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.*

*Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as an emergency effective June 17, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.*

*Article 1 consisting of Sections R9-20-102, R9-20-104 through R9-20-106 and R9-20-111 adopted as an emergency effective March 6, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.*

*Article 1 consisting of Sections R9-20-102, R9-20-104 through R9-20-106 and R9-20-111 adopted as an emergency effective December 5, 1986 pursuant to A.R.S. § 41-1003, valid for only 90 days. Emergency expired.*

R18-7-105. Repealed  
R18-7-106. Repealed  
R18-7-107. Repealed  
R18-7-108. Repealed  
R18-7-109. Repealed  
R18-7-110. Expired

**ARTICLE 2. SOIL REMEDIATION STANDARDS**

*Article 2, consisting of interim Sections R18-7-201 through R18-7-209 and Appendices A through C, replaced by new permanent Sections, adopted effective December 4, 1997. Appendix D emergency expired (Supp. 97-4).*

*Article 2, consisting of Sections R18-7-201 through R18-7-209 and Appendices A through D, removed in Supp. 97-3 reinstated at the request of the Department. Refer to Supp. 97-1 for interim rules. Introduction stating the emergency expired has been removed for clarity (Supp. 97-4).*

*Article introduction revised below to clarify exemptions of emergency adoption (Supp. 97-1).*

*Article 2, consisting of Sections R18-7-201 through R18-7-209 and Appendices A through D, adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5. The Sections are in effect until permanent rules are adopted and in place by August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1).*

 Appendix D. Emergency Expired

### ARTICLE 3. PROSPECTIVE PURCHASER AGREEMENT

*Article 3, consisting of Section R18-7-301, adopted effective January 14, 1997 (Supp. 97-1).*

#### Section

- R18-7-301. Prospective Purchaser Agreement Fee

### ARTICLE 4. REPEALED

*Article 4, consisting of Section R18-7-401, repealed by final rulemaking at 15 A.A.R. 232, effective March 7, 2009 (Supp. 09-1).*

*Article 4, consisting of Section R18-7-401, repealed. New Article 4, consisting of Section R18-7-401, adopted effective October 21, 1998 (Supp. 98-1).*

*Article 4, consisting of Section R18-7-401, adopted under an exemption from A.R.S. Title 41, Chapter 6 effective August 5, 1997 (Supp. 97-3).*

#### Section

- R18-7-401. Repealed

### ARTICLE 5. VOLUNTARY REMEDIATION PROGRAM

*Article 5, consisting of Sections R18-7-501 through R18-7-507, adopted by exempt rulemaking at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).*

#### Section

- R18-7-501. Definitions  
 R18-7-502. Application Fee  
 R18-7-503. Deposit  
 R18-7-504. Voluntary Remediation Program Reimbursement  
 R18-7-505. Hourly Reimbursement Rate  
 R18-7-506. Voluntary Remediation Program Accounting  
 R18-7-507. Account Reconciliation

### ARTICLE 6. DECLARATION OF ENVIRONMENTAL USE RESTRICTION FEE

*Article 6, consisting of R18-7-601 through R18-7-606, made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).*

#### Section

 R18-7-602. Applicability  
 R18-7-603. Fee  
 R18-7-604. Fee Calculation  
 R18-7-605. Postponement of the Release Portion of the DEUR Fee  
 R18-7-606. DEUR Modification Fee

### ARTICLE 1. EXPIRED

*Article 1, consisting of Section R18-7-110, expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).*

### R18-7-101. Repealed

#### Historical Note

Adopted as an emergency effective December 5, 1986,

pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Adopted, without change, as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-102 was renumbered as Section R18-7-101, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-101 repealed; new Section renumbered from R18-7-110; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Summary renumbering action revoked; former numbering of Sections R18-7-101 and R18-7-110 restored effective January 22, 1999. Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

### R18-7-102. Repealed

#### Historical Note

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-104 was renumbered as Section R18-7-102, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-102 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

### R18-7-103. Repealed

#### Historical Note

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-103 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

### R18-7-104. Repealed

#### Historical Note

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-

2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-104 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

**R18-7-105. Repealed****Historical Note**

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-105 was renumbered as Section R18-7-105, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-105 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

**R18-7-106. Repealed****Historical Note**

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-106 was renumbered as Section R18-7-106, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-106 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

**R18-7-107. Repealed****Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3).

Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-107 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

**R18-7-108. Repealed****Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-108 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

*Editor's Note: Emergency amendment R18-7-109, removed in Supp. 97-3, was reinstated at the request of the Department. Refer to Supp. 97-1 for emergency rule. This Section was subsequently amended under the regular rulemaking process effective (Supp. 97-4). This Section was repealed by summary action (Supp. 98-4).*

**R18-7-109. Repealed****Historical Note**

Adopted as an emergency effective December 6, 1986, pursuant to A.R.S. § 41-1003 valid for only 90 days. Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-111 was renumbered as Section R18-7-109, amended and readopted as an emergency effective June 18, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). Section amended by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Amendment adopted permanently effective December 4, 1997 (Supp. 97-4). R18-7-109 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

**R18-7-110. Expired****Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-110 renumbered by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Summary renumbering action revoked; former numbering of Sections R18-7-101 and R18-7-110 restored effective January 22, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).

*Editor's Note: Emergency adopted Article 2 removed in Supp. 97-3, was reinstated at the request of the Department. Refer to Supp. 97-1 for emergency Sections. New Sections were subsequently adopted under the regular rulemaking process (Supp. 97-4).*

**ARTICLE 2. SOIL REMEDIATION STANDARDS****R18-7-201. Definitions**

In addition to the definitions provided in A.R.S. §§ 49-151 and 49-152, the following definitions apply in this Article:

1. "Aquifer Protection Permit Program" means the system of requirements prescribed in A.R.S. Title 49, Chapter 2, Article 3 and A.A.C. Title 18, Chapter 9, Articles 1 through 7.
2. "Background" means a concentration of a naturally occurring contaminant in soils.
3. "Carcinogen" or "carcinogenic" means the potential of a contaminant to cause cancer in humans as determined by lines of evidence in accordance with a narrative classification in "Guidelines for Carcinogen Risk Assessment", EPA/630/P-03/001F, March 2005, (and no future editions), which is incorporated by reference. "Guidelines for Carcinogen Risk Assessment" is available from ADEQ and at <http://cfpub.epa.gov/ncea/raf/recordisplay.cfm?deid=116283>.
4. "Child care facility" means any permanent facility on a property or portion of property in which care or supervision is provided for children below the age of 18, unaccompanied by a parent or guardian, for periods of less than 24 hours per day. Child care facility does not include private homes or facilities that care for fewer than five children.
5. "Contact" means exposure to a contaminant through ingestion, inhalation, or dermal absorption.
6. "Contaminant" means a substance regulated by the programs listed in R18-7-202(A) or R18-7-202(B) or defined in A.R.S. § 49-171(2).
7. "Department" means the Arizona Department of Environmental Quality.
8. "Deterministic risk assessment methodology" means a site-specific human health risk assessment, performed using a specific set of input variables, exposure assumptions, and toxicity criteria, represented by point estimates for each receptor evaluated, which results in a point estimate of risk.
9. "Declaration of Environmental Use Restriction" or "DEUR" means a restrictive covenant as described in A.R.S. § 49-152.

10. "Ecological community" means an assemblage of populations of different species within a specified location in space and time.
11. "Ecological receptor" means a specific ecological community, population, or individual organism, protected by federal or state laws and regulations, or a local population that provides an important natural or economic resource, function, and value.
12. "Ecological risk assessment" means a scientific evaluation of the probability of an adverse effect to ecological receptors from exposure to specific types and concentrations of contaminants. An ecological risk assessment contains four components: identification of potential contaminants; an exposure assessment; a toxicity assessment; and a risk characterization.
13. "Engineering control" means a remediation method, such as a barrier or cap, which is used to prevent or minimize exposure to contaminants, and includes technologies that reduce the mobility or migration of contaminants.
14. "Excess lifetime cancer risk" means the increased risk of developing cancer above the background cancer occurrence levels due to exposure to contaminants.
15. "Exposure" means contact between contaminants and organisms.
16. "Exposure pathway" means the course a contaminant takes from a source to an exposed organism. Each exposure pathway includes a source or release from a source, an exposure point, and an exposure route. If the exposure point differs from the source, transport/exposure media (that is, air, water) are also included.
17. "Exposure point" means a location of potential contact between a contaminant and an organism.
18. "Exposure route" means the way a contaminant comes into contact with an organism (that is, by ingestion, inhalation, or dermal contact).
19. "Groundwater" means water in an aquifer as defined in A.R.S. § 49-201(2).
20. "Hazard Index" means the sum of hazard quotients for multiple substances and/or multiple exposure pathways, or the sum of hazard quotients for chemicals acting by a similar mechanism and/or having the same target organ.
21. "Hazardous Waste Management Program" means the system of requirements prescribed in A.R.S. Title 49, Ch. 5, Article 2 and 18 A.A.C. 8, Article 2.
22. "Hazard quotient" means the value which quantifies non-carcinogenic risk for one chemical for one receptor population for one exposure pathway over a specified exposure period. The hazard quotient is equal to the ratio of a chemical-specific intake to the reference dose.
23. "Imminent and substantial endangerment to the public health or the environment" has the meaning found in A.R.S. § 49-282.02(C)(1).
24. "Institutional control" means a legal or administrative tool or action taken to reduce the potential for exposure to contaminants.
25. "Letter of Completion" means a Departmental statement that indicates whether the property in question has met the soil remediation standards in this Article.
26. "Migrate" or "migration" means the movement of contaminants from the point of release, emission, discharge, or spillage: through the soil profile; by volatilization from soil to air and subsequent dispersion to air; and by water, wind, or other mechanisms.
27. "Non-carcinogen" means a contaminant that has the potential upon exposure to an individual to cause adverse health effects other than cancer.

28. “Non-residential site-specific remediation level” means a level of contaminants remaining in soil after remediation that results in a cumulative excess lifetime cancer risk between  $1 \times 10^{-6}$  and  $1 \times 10^{-4}$  and a Hazard Index no greater than 1 based on non-residential exposure assumptions.
29. “Nuisance” means the activities or conditions that may be subject to A.R.S. § 49-141.
30. “Person” means any public or private corporation, company, partnership, firm, association, or society of persons, the federal government and any of its departments or agencies, this state or any of its agencies, departments, political subdivisions, counties, towns, municipal corporations, as well as a natural person.
31. “Population” means an aggregate of individuals of a species within a specified location in space and time.
32. “Probabilistic risk assessment methodology” means a site-specific human health risk assessment, performed using probability distributions of input variables and exposure assumptions that take into account the variability and uncertainty of these values, which results in a range or distribution of possible risk estimates.
33. “Reasonable Maximum Exposure” or “RME” means the highest human exposure case that is greater than the average, but is still within the range of possible exposures to humans at a site.
34. “Remediate” or “remediation” has the meaning found in A.R.S. § 49-151.
35. “Reference dose” means the toxicity factor expressed as a threshold level in units of (mg/kg-day) at which non-cancer effects are not expected to occur.
36. “Repository” means the Department’s database, established under A.R.S. § 49-152(E), from which the public may view information pertaining to remediation projects.
37. “Residential site-specific remediation level” means a level of contaminants remaining in the soil after remediation that results in a cumulative excess lifetime cancer risk between  $1 \times 10^{-6}$  and  $1 \times 10^{-4}$  and a Hazard Index no greater than 1 based on residential exposure assumptions.
38. “Residential use” has the meaning found in A.R.S. § 49-151.
39. “School” means any public institution under the jurisdiction of the Arizona State Board of Education or the Arizona State Board for Charter Schools, or any non-public institution, established for the purposes of offering instruction to children attending any grade from preschool through grade 12.
40. “Site-specific human health risk assessment” means a scientific evaluation of the probability of an adverse effect to human health from exposure to specific types and concentrations of contaminants. A site-specific human health risk assessment contains four components: identification of potential contaminants; an exposure assessment; a toxicity assessment; and a risk characterization.
41. “Soil” means all earthen materials, including moisture and pore space contained within earthen material, located between the land surface and groundwater including sediments and unconsolidated accumulations produced by the physical and chemical disintegration of rocks.
42. “Soil remediation level” or “SRL” means a pre-determined risk-based standard based upon the total contaminant concentration in soil, developed pursuant to A.R.S. § 49-152(A)(1) and listed in Appendix A or, as applicable, in Appendix B.
43. “Solid Waste Management Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 4, and the rules adopted under those statutes.
44. “Special Waste Management Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 4, Article 9 and 18 A.A.C. 13, Articles 13 and 16.
45. “Underground Storage Tank Program” or “UST Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 6, Article 1 and 18 A.A.C. 12.
46. “Water Quality Assurance Revolving Fund” or “WQARF” means the system of requirements prescribed in A.R.S. Title 49, Ch. 2, Article 5 and 18 A.A.C. 16.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-201 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-202. Applicability

- A.** This Article applies to a person legally required to conduct soil remediation by any of the following regulatory programs administered by the Department:
1. The Aquifer Protection Permit Program.
  2. The Hazardous Waste Management Program.
  3. The Solid Waste Management Program.
  4. The Special Waste Management Program.
  5. The Underground Storage Tank Program.
  6. The Water Quality Assurance Revolving Fund.
  7. Any other program under A.R.S. Title 49 that regulates soil remediation.
- B.** This Article also applies to a person who is not legally required to conduct soil remediation, but who chooses to do so under any program administered by the Department.
- C.** The requirements of this Article apply in addition to any specific requirements of the programs described in subsections (A) or (B).
- D.** This Article is limited to soil remediation.
- E.** A person who is remediating a site shall comply with the numeric soil remediation standards identified in either Appendix A or Appendix B if both of the following conditions are met. If either subsection (1) or subsection (2) is not met, a person who is remediating a site shall comply with the numeric soil remediation standards identified in Appendix A.
1. The site was characterized before May 5, 2007. A site is considered characterized when the laboratory analytical results of the soil samples delineating the nature, degree, and extent of soil contamination have been received by the person conducting the remediation.
  2. The site was remediated or a risk assessment completed before May 5, 2010. A risk assessment or remediation is considered completed when site closure, that meets the conditions in R18-7-209, has been requested.
- F.** Nothing in this Article limits the Department’s authority to establish more stringent soil remediation levels in response to:
1. A nuisance.
  2. An imminent and substantial endangerment to the public health or the environment.

**G.** This Article does not apply to persons remediating soil to numeric soil remediation levels specified in the following documents and entered into, issued, or approved before May 5, 2007:

1. Orders of the Director;
2. Orders of any Court;
3. Work agreements approved by the Director pursuant to A.R.S. § 49-282.05;
4. Closure plans approved by the Director pursuant to R18-8-265;
5. Post-closure permits approved by the Director pursuant to R18-8-270;
6. Records of Decision approved by the Director pursuant to R18-16-410;
7. Records of Decision approved by the Director pursuant to R18-16-413; and
8. Records of Decision approved by the Director pursuant to 40 CFR 300.430(f)(5).

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-202 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-203. Remediation Standards

- A.** A person subject to this Article shall remediate soil so that any concentration of contaminants remaining in the soil after remediation is less than or equal to one of the following:
1. The background remediation standards prescribed in R18-7-204.
  2. The pre-determined remediation standards prescribed in R18-7-205.
  3. The site-specific remediation standards prescribed in R18-7-206.
- B.** A person who conducts a soil remediation based on the standards in R18-7-205, R18-7-206, R18-7-207 shall remediate soil so that any concentration of contaminants remaining in the soil after remediation does not:
1. Cause or threaten to cause a violation of Water Quality Standards prescribed in 18 A.A.C. 11. If the remediation level for a contaminant in the soil is not protective of aquifer water quality and surface water quality, the person shall remediate soil to an alternative soil remediation level that is protective of aquifer water quality and surface water quality.
  2. Exhibit a hazardous waste characteristic of ignitability, corrosivity, or reactivity as defined in R18-8-261(A). If the remediation level for a contaminant in the soil results in leaving soils that exhibit a hazardous waste characteristic other than toxicity, the person shall remediate soil to an alternative soil remediation level such that the soil does not exhibit a hazardous waste characteristic other than toxicity.
  3. Cause or threaten to cause an adverse impact to ecological receptors. If the Department determines that the remediation level for a contaminant in soil may impact ecological receptors based on the existence of ecological

receptors and complete exposure pathways, the person shall conduct an ecological risk assessment. If the ecological risk assessment indicates that any concentration of contaminants remaining in the soil after remediation causes or threatens to cause an adverse impact to ecological receptors, the person shall remediate soil to an alternative soil remediation level, derived from the ecological risk assessment, that is protective of ecological receptors.

- C.** Soil vapor concentration may be used to estimate the total contaminant concentration in soil if the Department determines that the soil vapor concentration methodology will not be invalidated by the soil, hydrogeology, or other characteristics of the site.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 59; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-203 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-204. Background Remediation Standards

- A.** A person may elect to remediate to a background concentration for a contaminant.
- B.** A person who conducts a remediation to a background concentration for a contaminant shall establish the background concentration using all of the following factors:
1. Site-specific historical information concerning land use.
  2. Site-specific sampling of soils unaffected by a release, but having characteristics similar to those of the soils affected by the release.
  3. Statistical analysis of background concentrations using the 95th percentile upper confidence limit.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-204 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-205. Pre-determined Remediation Standards

- A.** A person may elect to remediate to the residential or non-residential soil remediation levels (SRLs) in Appendix A. If allowed under R18-7-202(E), a person may also elect to remediate to the residential or non-residential SRLs in Appendix B.
- B.** A person who conducts remediation pursuant to this Article shall remediate to the residential SRL on any property where there is residential use at the time remediation is completed.
- C.** A pre-determined contaminant standard established by federal law or regulation may be used for polychlorinated biphenyl cleanups regulated pursuant to the Toxic Substances Control

Act (TSCA) at 40 CFR 761.120 et seq., however, the Department has no regulatory authority to issue a Letter of Completion in TSCA-regulated cleanups.

- D. A person who elects to utilize a residential or non-residential SRL for the following known human carcinogens shall remediate to a  $1 \times 10^{-6}$  excess lifetime cancer risk: benzene, benzidine, bis (chloromethyl) ether, chromium VI, diethylstilbestrol, direct black 38, direct blue 6, direct brown 95, nickel subsulfide, and vinyl chloride.
- E. Except as provided below, a person who elects to remediate to a residential SRL may utilize a  $1 \times 10^{-5}$  excess lifetime cancer risk for any carcinogen other than a known human carcinogen. If the current or currently intended future use of the contaminated site is a child care facility or school where children below the age of 18 are reasonably expected to be in frequent, repeated contact with the soil, the person conducting remediation shall remediate to a  $1 \times 10^{-6}$  excess lifetime cancer risk.
- F. For contaminants that exhibit both carcinogenic and non-carcinogenic effects, the numeric standard that is lower (more protective) shall apply.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-205 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-206. Site-specific Remediation Standards

- A. A person may elect to remediate to a residential or a non-residential site-specific remediation level derived from a site-specific human health risk assessment.
- B. A person who conducts a remediation to a residential or a non-residential site-specific remediation level shall use one of the following site-specific human health risk assessment methodologies:
  1. A deterministic methodology. If a deterministic methodology is used, reasonable maximum exposures shall be evaluated for future use scenarios.
  2. A probabilistic methodology. If a probabilistic methodology is used, it shall be no less protective than the 95th percentile upper bound estimate of the distribution.
  3. An alternative methodology commonly accepted in the scientific community. An alternative methodology is considered accepted in the scientific community if it is published in peer-reviewed literature, such as a professional journal or publication of standards of general circulation, and there is general consensus within the scientific community that the methodology is sound.
- C. A person who conducts a remediation to a site-specific remediation level shall remediate to the residential site-specific remediation level on any property where there is residential use at the time remediation is completed.
- D. A person conducting a remediation to a residential or a non-residential site-specific remediation level shall remediate the contaminants in soil to a Hazard Index no greater than 1 and a cumulative excess lifetime cancer risk from  $1 \times 10^{-6}$  to  $1 \times 10^{-4}$ . The following site-specific factors shall be evaluated when determining the cumulative excess lifetime cancer risk:

1. The presence of multiple contaminants.
2. The existence of multiple pathways of exposure.
3. The uncertainty of exposure.
4. The sensitivity of the exposed population.
5. Other program-related laws and regulations that may apply.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-206 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-207. Site-specific Remediation Standards for Nitrates and Nitrites

A person who conducts remediation of nitrates or nitrites shall remediate to a site-specific remediation level pursuant to R18-7-203(B)(1), (2), and (3).

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-207 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Section repealed; new Section made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

#### R18-7-208. Declaration of Environmental Use Restriction (DEUR)

A property owner who elects to leave contamination on a property that exceeds the applicable residential standard for the property under R18-7-205 or R18-7-206, or elects to use an institutional control or an engineering control to meet the requirements of R18-7-205, R18-7-206, or R18-7-207, shall record a DEUR pursuant to A.R.S. § 49-152 and comply with the related provisions of that statute and applicable rules.

#### Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Former R18-7-208 renumbered to R18-7-209; new R18-7-208 made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

**R18-7-209. Letter of Completion or Alternative Closure Document**

- A.** If a person requests a Letter of Completion or an alternative closure document, a person shall submit, at a minimum, the following information to the applicable Departmental program listed in R18-7-202(A) or described in R18-7-202(B):
1. A description of the actual activities, techniques, and technologies used to remediate soil at the site, including the legal mechanism in place to ensure that any institutional and engineering controls are maintained.
  2. Documentation that requirements prescribed in R18-7-203(A) and R18-7-203(B)(1) and (2) have been satisfied.
  3. If the Department determines pursuant to R18-7-203(B)(3) that an ecological risk assessment is required, documentation that the requirements prescribed in R18-7-203(B)(3) have been satisfied.
  4. Soil sampling analytical results that are representative of the area remediated, including documentation that the laboratory analysis of samples has been performed by a laboratory licensed by the Arizona Department of Health Services under A.R.S. § 36-495 et seq. and 9 A.A.C. 14, Article 6.
  5. A statement signed by the person conducting the remediation certifying the following: I certify under penalty of law that this document and all attachments are, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violations.
- B.** The applicable Departmental program described in R18-7-202(A) or R18-7-202(B) shall evaluate the information described in R18-7-209(A). The Department may request additional information, or if the Department verifies compliance with the soil remediation standards set forth under this Article and closure requirements of the applicable program or programs identified in R18-7-202(A) or described in R18-7-202(B), the Department shall issue a Letter of Completion, or an alternative closure document provided for by statute or rule that certifies the soil standards in this Article have been achieved.
- C.** The applicable Departmental program described in R18-7-202(A) or R18-7-202(B) may revoke or amend any Letter of Completion or alternative closure document described in R18-7-209(B) if any of the information submitted pursuant to R18-7-208 or R18-7-209(A) is inaccurate or if any condition was unknown to the Department when the Department issued the Letter of Completion or alternative closure document.

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Former R18-7-209 renumbered to R18-7-210; new R18-7-209 renumbered from R18-7-208 and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

**R18-7-210. Notice of Remediation and Repository**

- A.** A person conducting soil remediation shall submit a Notice of Remediation to the applicable Departmental program listed in R18-7-202(A) or R18-7-202(B) before beginning remediation. A person conducting a soil remediation to address an immediate and substantial endangerment to public health or the environment and who has notified the Department in accordance with notification requirements prescribed in A.R.S. § 49-284 is not required to submit a Notice of Remediation before beginning remediation. Any person who continues soil remediation after the immediate and substantial endangerment has been abated shall submit a Notice of Remediation. A Notice of Remediation shall include all of the following information:
1. The name and address of the real property owner;
  2. The name and address of the remediating party;
  3. A legal description and street address of the property;
  4. A list of each contaminant to be remediated;
  5. The background concentration, SRL, or site-specific remediation level selected to meet the remediation standards;
  6. A description of the current and post-remediation property use as either residential or non-residential;
  7. The rationale for the selection of residential or non-residential remediation; and
  8. The proposed technologies for remediating the site.
- B.** The Department shall maintain a repository available to the public for information regarding sites where soil is remediated. The Repository shall include a listing of sites for which a Notice of Remediation has been submitted or a Letter of Completion or alternative closure document has been issued.
1. For sites where a Notice of Remediation has been filed, the Repository shall contain the date the notice was filed and the information submitted as described in subsection (A).
  2. For sites where a Letter of Completion or alternative closure document has been issued, the Repository shall contain the following:
    - a. The name and address of the real property owner;
    - b. The name and address of the remediating party;
    - c. A legal description and street address of the property;
    - d. A listing of each contaminant that was remediated;
    - e. The background concentration, SRL, or site-specific remediation level selected to meet the remediation standard;
    - f. A description whether the residential or non-residential standard was achieved;
    - g. A description of any engineering or institutional control used to remediate the site; and
    - h. The date when the Letter of Completion or alternative closure document was issued.

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Section R18-7-210 renumbered from R18-7-209 and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

## Appendix A. Soil Remediation Levels (SRLs)

CONTAMINANT	CASRN	Class	Residential (mg/kg)			Non-residential (mg/kg)
			Carcinogen		Non-carcinogen	
			10 <sup>-6</sup> Risk	10 <sup>-5</sup> Risk		
Acephate	30560-19-1	ca, nc	63	630	240	2,000

Zinc phosphide	1314-84-7	nc			23	310
Zineb	12122-67-7	nc			3,100	31,000
NA indicates not applicable.						
Class is the classification of the chemical. “ca” indicates carcinogenic effects; “nc” indicates non-carcinogenic effects. Chemicals that have both carcinogenic and non-carcinogenic effects are classified “ca, nc”.						
* Indicates SRL is based on the chemical-specific saturation level in soil for volatile organic chemicals only.						
** Indicates SRL is based on a 100% saturation ceiling limit for non-volatile organic chemicals.						
<sup>1</sup> Arsenic standards are not risk-based standards, but based on background.						
<sup>2</sup> Cyanide (free): Free cyanide is a subset of total cyanides. If any ADHS approved method for total cyanide reports a concentration exceeding this standard, further analyses to differentiate free cyanide from other cyanide metal complexes is required.						
<sup>3</sup> Cyanide (hydrogen): If the cyanide concentrations using any method exceed the hydrogen cyanide standard, then hydrogen cyanide vapor samples should be collected at the site.						
<sup>4</sup> PCBs, low-risk mixture: Use if laboratory analysis confirms that the total PCB concentration consists of 0.5 percent or less of congeners that contain five or more chlorines and that no dioxin-like congeners are present.						
<sup>5</sup> PCBs, high-risk mixture: Use if only total PCB concentration is reported by any ADHS licensed analytical method, or if laboratory analysis confirms that the total PCB concentration consists of more than 0.5 percent congeners that contain five or more chlorines or that dioxin-like congeners are present.						
Bold indicates adequate evidence to classify the chemical as a known human carcinogen.						
CASRN is the Chemical Abstract System Registry Number.						

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix A adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Amended to correct measurement units in columns 5 and 6 from “mg/k” to “mg/kg” (Supp. 01-4). Former Appendix A renumbered to Appendix B; new Appendix A made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

\* = 1% free-phase analysis

# = Based on IEUBK Model

~ = Based on natural background

N/A = Not Applicable

**CARCINOGENICITY CLASSIFICATIONS:**

A = Known human carcinogen

B1 = Probable human carcinogen, with limited data indicating human carcinogenicity.

B2 = Probable human carcinogen, with inadequate or no evidence of carcinogenicity in humans. Sufficient evidence for carcinogenicity in laboratory animals.

C = Possible human carcinogen.

D = Not classifiable as to human carcinogenicity.

E = Evidence of noncarcinogenicity in humans.

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix B adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Former Appendix B repealed; new Appendix B renumbered from Appendix A and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

**Appendix C. Repealed**

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix C adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Appendix C repealed by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

**Appendix D. Emergency Expired**

**Historical Note**

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Historical note from Supp. 97-3 stating emergency expired removed for clarity; interim emergency rule reinstated at the request of the Department. Emergency expired effective December 4, 1997 (Supp. 97-4).

**ARTICLE 3. PROSPECTIVE PURCHASER AGREEMENT**

**R18-7-301. Prospective Purchaser Agreement Fee**

- A.** An applicant for a prospective purchaser agreement with the Department under A.R.S. § 49-285.01 shall pay to the Department the fee prescribed in this Article. The Department shall not refund a fee once it accepts an application.
- B.** An applicant for a prospective purchaser agreement shall pay a fee for each prospective purchaser agreement application submitted to the Department for review. The fee includes:
1. An initial charge as prescribed in subsection (C);
  2. An hourly charge, if the conditions of subsection (D)(1) apply;
  3. The publication costs for the legal notice as prescribed in subsection (F); and
  4. A charge, as prescribed in subsection (D)(2), if an applicant requests a settlement.
- C.** An applicant shall pay an initial charge of \$2,500 for an application for a prospective purchaser agreement requiring minimal review for property within a site that is listed in the Water Quality Assurance Revolving Fund (WQARF) registry under A.R.S. § 49-287.01. For property that is not on the WQARF registry, an applicant shall pay an initial charge of \$3,600 for an application for a prospective purchaser agreement. The initial charge covers direct and indirect Department costs. An application for a prospective purchaser agreement requiring minimal review is one that requires 34 or fewer hours of review time for a site on the WQARF registry or 49 or fewer hours for a site not on the WQARF registry.
- D.** In addition to the initial charge described in subsection (C), the applicant shall pay the following charges, if applicable:

1. An hourly charge for reviewing a prospective purchaser agreement that requires more than the hours for review covered by the initial charge in subsection (C). The additional charge is \$73 per hour for Department staff time and Assistant Attorney General time.
  2. A charge in the amount of \$2,000, to accompany a request for a settlement that includes immunity from contribution claims for existing contamination, if requested under A.R.S. § 49-285.01. If costs for the settlement exceed \$2,000, the remainder of the costs will be paid for through the terms of the settlement.
- E.** The applicant may agree in writing to pay charges that exceed the initial charge described in subsection (C). Unless the applicant has so agreed, when the Department believes that the costs associated with the prospective purchaser agreement have begun to exceed the initial charge, the Department shall stop work on the prospective purchaser agreement and notify the applicant in writing. The applicant shall notify the Department in writing, within 30 days of the Department's notification under this subsection, whether the applicant wishes the Department to continue work on the application and to incur additional costs. The Department shall terminate the application if the applicant does not provide written confirmation within 30 days that it wishes the Department to continue work on the application.
- F.** The Department shall publish a legal notice announcing an opportunity for public comment on the prospective purchaser agreement. The legal notice shall include:
1. A general description of the contents of the agreement;

2. The location where information regarding the agreement can be obtained;
  3. The name and address of the Department contact where comments may be sent; and
  4. The time and date that the comment period closes.
- G.** The initial charge described in subsection (C) is due when the applicant submits the prospective purchaser agreement application to the Department. The publication cost specified in subsection (B)(3), and any hourly charge described in subsection (D)(1), are due within 30 days of the date the invoice is sent by the Department. Fee charges are payable to the state of Arizona, and shall be paid in full before the Department executes a prospective purchaser agreement.

#### Historical Note

Adopted effective February 7, 1997; filed with the Office of the Secretary of State January 14, 1997 (Supp. 97-1). Amended by final rulemaking at 12 A.A.R. 345, effective March 11, 2006 (Supp. 06-1).

*Editor's Note: The heading for the following Article was amended by exempt rulemaking at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).*

*Editor's Note: The following Article was originally adopted under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 1997, Ch. 296, §§ 3(E) & (G), 10 & 11. Although exempt from certain provisions of the rulemaking process, the Department was required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 97-3).*

#### ARTICLE 4. REPEALED

##### R18-7-401. Repealed

#### Historical Note

Adopted effective August 5, 1997, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 1997, Ch. 296, §§ 3(E) & (G), 10 & 11 (Supp. 97-3). Section R18-7-401 repealed; new Section R18-7-401 adopted effective October 21, 1998 (Supp. 98-4). Repealed by final rulemaking at 15 A.A.R. 232, effective March 7, 2009 (Supp. 09-1).

*Editor's Note: The rules in the following Article were adopted as interim rules under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 2000, Ch. 225, § 13. Although exempt from certain provisions of the rulemaking process, the Department is required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 01-1).*

#### ARTICLE 5. VOLUNTARY REMEDIATION PROGRAM

##### R18-7-501. Definitions

The following definitions shall apply in this Article, unless the context otherwise requires:

“Applicant” means a person who participates in the Voluntary Remediation Program. Participation in the Voluntary Remediation Program begins when the Department receives an application under A.R.S. § 49-173 and continues until any one of the following occurs:

The Department grants the applicant’s request for a no further action determination.

The applicant provides the Department with notice of the applicant’s intent to withdraw from the program.

The Department terminates the applicant’s participation under A.R.S. § 49-178(B).

“Department” means the Arizona Department of Environmental Quality.

“Voluntary Remediation Program” means the program authorized under A.R.S. Title 49, Chapter 1, Article 5.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

##### R18-7-502. Application Fee

- A.** At the time of filing an application to participate in the Voluntary Remediation Program, the applicant shall pay a nonrefundable application fee in the amount of \$2,000.00.
- B.** The application fee shall be in the form of a company check, cashier’s check, certified check, or money order made payable to the Arizona Department of Environmental Quality.
- C.** Except as provided in subsection (D), an application does not meet the requirements in A.R.S. § 49-173 unless accompanied by the application fee. The Department shall not review an application until the application fee is paid in full.
- D.** At the request of an applicant that is a small business as defined under A.R.S. § 41-1001, the Department may review and approve an application upon receipt of a partial payment of the application fee in an amount approved by the Department and an agreement to pay the remainder of the fee in scheduled installments.
- E.** An applicant that withdraws or is terminated from participation in the Voluntary Remediation Program may reapply to the program by submitting an application that meets the requirements of A.R.S. § 49-173, including payment of the application fee.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

##### R18-7-503. Deposit

- A.** At the time that an applicant submits a work plan under A.R.S. § 49-175 or a report under A.R.S. § 49-181, the applicant shall submit to the Department an initial deposit of \$4,000.00.
- B.** The deposit shall be in the form of a company check, cashier’s check, certified check, or money order made payable to the Arizona Department of Environmental Quality.
- C.** The Department shall begin review of the applicant’s work plan or the report submitted under A.R.S. § 49-181 upon receipt of the initial deposit.
- D.** Upon receipt of the initial deposit, the Department shall establish a site-specific deposit account identified by a unique account number. The Department shall charge all incurred reimbursable costs attributable to the applicant’s site against the site-specific deposit account.
- E.** If, at any time during the applicant’s participation in the program, the balance in the site-specific deposit account falls below \$1,000.00 and the Department reasonably estimates that the reimbursable costs chargeable to the account will exceed the amount available in the account, the Department shall mail or fax a written request that the applicant submit an additional deposit in an amount not to exceed \$4,000.00. The Department may request any number of additional deposits, in amounts of \$4,000.00 or less, at any time that the conditions of this subsection are met.

F. If any requested additional deposit is not received within 30 days after the Department mails or faxes the request in subsection (E) and the Department determines that the applicant's site specific account balance is insufficient to support continued program participation, the Department shall mail a written notice of deficiency under A.R.S. § 49-178 and shall notify the applicant that work on the site may be suspended until the additional deposit is received. If the Department does not receive the requested additional deposit within 60 days after the notice of deficiency is mailed or faxed and the applicant does not dispute the Department's determination that the site specific account balance is insufficient to support continued program participation, the Department may terminate the applicant's participation in the program. An applicant whose participation is terminated under this subsection may reapply to the program as provided in R18-7-502(E).

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

#### R18-7-504. Voluntary Remediation Program Reimbursement

A. The applicant shall reimburse the Department, at an hourly reimbursement rate established under R18-7-505, for time spent by Voluntary Remediation Program staff on activities specifically related to the applicant's site, including the following:

1. Review of the application submitted under A.R.S. § 49-173, including review of any modifications requested by the Department or the applicant or additional information submitted by the applicant.
2. Review of the work plan submitted under A.R.S. § 49-175, including review of any modifications requested by the Department under A.R.S. § 49-177 or by the applicant or the Department under A.R.S. § 49-180.
3. Review of progress reports submitted as part of a work plan under A.R.S. § 49-175 or as requested by the Department under A.R.S. § 49-177 or A.R.S. § 49-180.
4. Consideration by the Department under A.R.S. § 49-176(D) of written comments submitted in response to a public notice providing an opportunity to comment or a public meeting.
5. Participation in public hearings required by the Department under A.R.S. § 49-176(D).
6. Site inspections under A.R.S. § 49-177 and site investigations under A.R.S. § 49-181, including time spent in travel to and from the site.
7. Review of the report and request for a no further action determination submitted under A.R.S. § 49-181, including review of any modifications requested by the applicant or the Department.
8. Time spent in reviewing a request submitted by an applicant under A.R.S. § 49-182 for approval of a remedial action under A.R.S. § 49-285.
9. Time spent in meetings or discussions requested by the applicant or the Department.

B. The applicant shall reimburse the Department for the site-specific costs of goods and services contracted by the Department including:

1. Reasonable and necessary attorneys' fees billed to the Department by the Attorney General for legal services, including legal fees billed for representation in regard to appeals or dispute resolution under A.R.S. § 49-185.

2. Costs incurred by the Department for work provided under a contract described in A.R.S. § 49-179(D)(1) or A.R.S. § 49-179(D)(2).
3. Reasonable and necessary travel costs incurred in the performance of activities described in subsections (A)(5), (A)(6), or (A)(9) or performed at the request of the applicant.
4. Other reasonable site related expenses documented in writing by the Department.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

#### R18-7-505. Hourly Reimbursement Rate

The hourly reimbursement rate is \$110.00 per hour.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

#### R18-7-506. Voluntary Remediation Program Accounting

Within a reasonable time after the end of each calendar quarter, the Department shall mail or fax each applicant a statement itemizing reimbursable costs charged against the site-specific deposit account and a summary of account activity during that quarter. The statement shall be in a form consistent with generally accepted accounting principles.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

#### R18-7-507. Account Reconciliation

A. Within a reasonable time after completion of the remediation work at the site, or after termination or withdrawal of the applicant from participation in the program, the Department shall prepare and mail or fax to the applicant a final statement which shall include:

1. An itemization of site-specific reimbursable costs incurred by the Department but not previously reported in a quarterly statement.
2. The total amount of site-specific reimbursable costs incurred by the Department during the course of the project, including the costs reported in subsection (A)(1).
3. The total amount submitted as deposits by the applicant and applied by the Department to the applicant's site-specific deposit account during the course of the project, plus the amount paid by the applicant as an application fee.

B. If the final statement shows that the amounts submitted or paid during the course of the project are less than the Department's reimbursable costs, the applicant shall be responsible for and shall pay, within 30 days after receipt of the final statement, the difference between the costs incurred and the amounts submitted or paid.

C. If the final statement shows that the amounts submitted or paid during the course of the project are more than the Department's reimbursable costs and the Department's reimbursable costs exceed \$2,000.00, the Department shall return to the applicant, within a reasonable time period, the difference between the amounts submitted or paid and the costs incurred.

D. If the final statement shows that the amounts submitted or paid during the course of the project are more than the Depart-

ment's reimbursable costs and the Department's reimbursable costs total \$2,000.00 or less, the Department shall retain the applicant's nonrefundable application fee of \$2,000.00 and shall return to the applicant the amount of any deposits submitted.

- E. The Department may withhold any program approval or no further action determination until the applicant has paid any amount due and payable under the final statement.

#### Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

### ARTICLE 6. DECLARATION OF ENVIRONMENTAL USE RESTRICTION FEE

*Article 6, consisting of R18-7-601 through R18-7-606, made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).*

#### R18-7-601. Definitions

The following definitions shall apply in this Article, unless the context otherwise requires:

“APP mine sites” means mining facilities which are subject to the aquifer protection permit provisions of Arizona Revised Statutes Title 49, Chapter 2, Article 3.

“Department” means the Arizona Department of Environmental Quality.

“DEUR” means declaration of environmental use restriction, as described in A.R.S. §§ 49-152 and 49-158. It is an institutional control and a restrictive covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns, and inures to the benefit of the Department and the state.

“Fee” means the fee authorized by A.R.S. §§ 49-152(K) and 49-158(G).

“Engineering control” has the meaning in A.R.S. § 49-151.

“Institutional control” has the meaning in A.R.S. § 49-151.

“Modification” means modification of a DEUR that continues to address the same spill or release, and the same contaminants, as in the original DEUR. No other changes are considered a modification of a DEUR, but would be the subject of a separate DEUR.

“One-time activities” includes reviewing and/or approving legal descriptions, control areas, contaminants, institutional or engineering controls, and draft DEUR documents.

“Ongoing activities” includes reviewing written reports, conducting site inspections, or otherwise verifying maintenance of institutional or engineering controls.

“Underground storage tanks” means those underground storage tanks defined and regulated under A.R.S. Title 49, Chapter 6, Article 1.

“WQARF sites” means sites that are listed on the site registry specified in A.R.S. § 49-287.01 and are the subject of remedial action pursuant to A.R.S. Title 49, Chapter 2, Article 5. A property that is within a registry site boundary, but does not involve a contaminant of concern identified for that registry site and is not the subject of remedial action pursuant to the above Chapter 2, is not a WQARF site for the purpose of this Section.

#### Historical Note

New Section made by exempt rulemaking at 10 A.A.R.

573, effective February 20, 2004 (Supp. 04-1).

#### R18-7-602. Applicability

The provisions of this Article apply to properties where the owner has elected to use an institutional control and/or an engineering control to reduce the potential for exposure to contaminants on the property, or to leave contamination on the property that exceeds the applicable residential soil standard for the property. The owner of such property shall record, in each county where the property is located, a restrictive covenant labeled “declaration of environmental use restriction,” that contains the information required by A.R.S. §§ 49-152 or 49-158, as approved by the Department. The owner shall submit the information on a form provided by the Department.

#### Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

#### R18-7-603. Fee

Except as provided in R18-7-605, before recording the DEUR or DEUR modification, property owners shall pay to the Department a fee as provided in R18-7-604 by company, cashier, or certified check, or money order, or other method approved by the Department.

#### Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

#### R18-7-604. Fee Calculation

- A. Property owners who use only an institutional control shall pay to the Department a fee that is the sum of the following:
1. \$825, representing Department costs to perform one-time activities;
  2. An amount representing the costs of ongoing activities performed by the Department that is one of the following:
    - a. For properties contaminated only by a petroleum release from one or more underground storage tanks: \$110 multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years; or
    - b. For all other properties: \$220 multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years;
  3. \$770, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);
  4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
  5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).
- B. Property owners who use an engineering control without groundwater monitoring shall pay a fee to the Department that is the sum of the following:
1. \$1,595, representing Department costs to perform one-time activities;
  2. \$660, representing Department costs of annual ongoing activities, multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years;
  3. \$1,320, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);

4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
  5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).
- C.** Property owners who use an engineering control with ground-water monitoring, and owners of WQARF sites and APP mine sites, shall pay to the Department a fee that is the sum of the following:
1. \$3,740, representing Department costs for performing one-time activities;
  2. A component of the fee to be determined on a case-by-case basis, at \$55 per hour, based on both:
    - a. The number of hours per year that the Department projects will be required for ongoing activities performed by the Department for the property, not to exceed 70 hours per year; and
    - b. The number of years that the Department projects the property will require ongoing activities, not to exceed 30 years;
  3. \$1,870, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);
  4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
  5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).

**Historical Note**

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

**R18-7-605. Postponement of the Release Portion of the DEUR Fee**

Property owners may elect to postpone payment of the portion of the fee to release the DEUR, described in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3), on the condition that payment of the reasonable and necessary costs of releasing the DEUR is made with the request to the Department to release the DEUR from the property. Property owners electing to use this option acknowledge that the future amount of the release portion of the DEUR fee will be the amount established by this Article at the time the request for the release of the DEUR is filed with the Department, which may be greater than the amount described in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3) at the time the DEUR is recorded.

**Historical Note**

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

**R18-7-606. DEUR Modification Fee**

A property owner who wishes to request a modification to an existing DEUR pursuant to A.R.S. §§ 49-152(I)(2), 49-152(J)(2), 49-158(E), or 49-158(F) shall pay to the Department a fee, representing Department costs to review and render a decision on the request to modify the DEUR. The fee shall accompany the proposed modification, and shall be in the form of company, cashier, or certified check, or money order, or other method approved by the Department. The fee shall be the amount specified in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3), as appropriate for the category of site as described in R18-7-604(A), R18-7-604(B), or R18-7-604(C).

**Historical Note**

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

41-1003. Required rule making

Each agency shall make rules of practice setting forth the nature and requirements of all formal procedures available to the public.

#### 49-104. Powers and duties of the department and director

##### A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through the regulation of the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and no more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Utilize any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title, but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes shall be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department may establish by rule a fee as a condition of licensure, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. The department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, article 8 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on:

(a) The direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly

related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

(b) The availability of other funds for the duties performed.

(c) The impact of the fees on the parties subject to the fees.

(d) The fees charged for similar duties performed by the department, other agencies and the private sector.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203, except that state agencies are exempt from paying those fees that are not associated with the dredge and fill permit program established pursuant to chapter 2, article 3.2 of this title. For services provided under the dredge and fill permit program, a state agency shall pay either:

(a) The fees established by the department under the dredge and fill permit program.

(b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

#### 49-152. Soil remediation standards; restrictions on property use

A. Notwithstanding any other remediation levels established under this title, the director shall approve remediation levels calculated in accordance with this subsection and shall accomplish the following for remediation of contaminated soil to protect public health and the environment in accordance with the applicable provisions of this title and section 33-434.01:

1. Establish predetermined risk based standards by rule. At a minimum, separate standards shall be established for residential and nonresidential exposure assumptions. Until risk based remediation standards are formally established by rule, the director shall establish interim standards adopting:

(a) The Arizona health based guidance levels developed by the department of health services to include a health based standard for total petroleum hydrocarbons as the standards for residential uses.

(b) The guidance levels in subdivision (a) of this paragraph modified to reflect the United States environmental protection agency published assumptions for exposures that are not residential as the standards for nonresidential uses. The initial adoption of these interim standards shall be effective by December 15, 1995 and shall be deemed emergency rules pursuant to section 41-1026.

2. Issue guidance on methods for calculating case-by-case, site specific risk based remediation levels in accordance with risk assessment methodologies that are accepted in the scientific community and shall not preclude the use of newly developed risk assessment methodologies that are accepted in the scientific community.

B. The owner of a property may elect to remediate the property to meet a site specific residential or nonresidential risk based remediation standard or a predetermined residential or nonresidential risk based remediation standard. The property is suitable for unrestricted use if it has been remediated without the use of engineering or institutional controls to meet either of the following:

1. The predetermined residential risk based remediation standard.

2. A site specific risk based hazard index equal to or less than one or a risk of carcinogenic health effects that is less than or equal to the range of risk levels set forth in 40 Code of Federal Regulations section 300.430(e)(2)(i)(A)(2), based on residential exposure.

C. If the owner has elected to use an engineering or institutional control to meet the standards prescribed in subsection B of this section, or if the owner has elected to leave contamination on the property that exceeds the applicable residential standard for the property at a site remediated under programs, settlements or orders administered by the department under this title, the owner shall record in each county where the property is located an institutional control that consists of a restrictive covenant that is labeled "declaration of environmental use restriction" pertaining to the area of the property necessary to protect the public health and the environment. A person who is conducting a remedial action, remediation, corrective action or response action that requires an institutional or engineering control and who is not the owner of the property shall obtain written consent from the owner before implementing the institutional control or constructing the engineering control. On implementation of the institutional or engineering control, the owner shall record a declaration of environmental use restriction in each county where the property is located. If the institutional control or engineering control will affect right-of-way that is owned, maintained or controlled by a public entity for public benefit, the person shall also obtain the public entity's written consent before implementing the institutional control or constructing the engineering control. The declaration of environmental use restriction shall limit by legal description:

1. The area of the property where the institutional control or engineering control shall be maintained.

2. The area of the property to be restricted to nonresidential use, because contamination remains on the property above the standards prescribed in subsection B, paragraph 1 or 2 of this section.

D. At the written request of the owner of property that is subject to a declaration of environmental use restriction, the director shall determine whether release or modification of the declaration of environmental use restriction is appropriate. If a release has been requested, the director shall make this determination within sixty days after the date of the property owner's request. If the director determines that release of the declaration of environmental use restriction is appropriate, the director shall record in each county where the property is located a notice releasing the declaration of environmental use restriction. The declaration of environmental use restriction is perpetual unless released pursuant to this section. The director shall determine that release of a declaration of environmental use restriction is appropriate if the property has been remediated, without the use of institutional controls or engineering controls, to either:

1. Meet predetermined risk based remedial standards for residential exposure assumptions.
2. Present a risk based hazard index equal to or less than one from noncancer health effects and a risk estimate of carcinogenic health effects equal to or less than the range of risk levels set forth in 40 Code of Federal Regulations section 300.430(e)(2)(i)(A)(2).

E. The department shall establish a repository in the department listing sites remediated under programs administered by the department under this title. The repository shall include the name and address of the owner of the property, when the remediation was conducted, the legal description and street address of the property, the applicability of section 33-434.01, the type of financial assurance mechanism that is being used, if applicable, and a description of the purpose of the declaration of environmental use restriction.

F. When recorded, an owner's declaration of environmental use restriction under subsection B of this section is a covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns and inures to the benefit of the department and the state. If notice of the declaration of environmental use restriction that includes a specific description of the area of the property that is subject to the declaration of environmental use restriction is contained in the repository maintained by the department pursuant to subsection E of this section, a declaration of environmental use restriction may not be extinguished, limited or impaired through any of the following:

1. Sale of a real property tax lien.
2. Foreclosure of a tax lien.
3. Foreclosure of any mortgage, deed of trust or other encumbrance or lien on the property.
4. Adverse possession.
5. Exercise of eminent domain.
6. Application of the doctrine of abandonment, the doctrine of waiver or any other common law doctrine.

G. Each party to a declaration of environmental use restriction shall incorporate the terms of the declaration of environmental use restriction into any lease, license or other agreement that is signed by the party and that grants a right with respect to the property that is subject to the declaration of environmental use restriction. The incorporation may be in full or by reference.

H. A declaration of environmental use restriction is sufficient if it contains all of the following information:

1. A legal description and the address of the area of the property that is subject to the declaration.
2. The date that remediation was completed and a map of the area of the property that is subject to the declaration.
3. A description of the environmental contaminants that were the subject of the remediation, remedial action, corrective action or response action.

4. A statement that more detailed information is available at the department, including the address at which that information will be maintained.
5. A notarized signature of a department official indicating approval of the declaration of environmental use restriction.
6. The notarized signature of the owner.

I. If institutional controls are used in addition to a declaration of environmental use restriction to satisfy the requirements of this section, the declaration of environmental use restriction, in addition to the information required by subsection H of this section, shall include all of the following:

1. A statement documenting any requirements for maintenance of the institutional control, including a description of the institutional control and the reason it must remain in place to protect public health and the environment.
2. A statement indicating that if any person desires to cancel or modify the institutional control in the future, the person must obtain prior written approval from the department pursuant to this section.
3. A statement acknowledging the department's right of access to the property at all reasonable times to verify that institutional controls are being maintained.

J. If engineering controls are used to satisfy the requirements of this section, the declaration of environmental use restriction, in addition to the information required by subsection H of this section, shall include all of the following:

1. A statement of all requirements for maintenance of the engineering control including a description of the control, the date it was constructed and the reason it must remain in place to protect public health and the environment.
2. A statement that if any person desires to change the engineering controls in the future that person shall obtain prior written approval from the department.
3. A statement acknowledging the department's right of access to the property at all reasonable times to verify that engineering controls are being maintained.
4. A brief description of the engineering control plan and financial assurance mechanism prescribed by section 49-152.01, if applicable.

K. When the declaration of environmental use restriction is recorded or modified, an owner electing to use institutional or engineering controls to satisfy the requirements of this section shall pay the department a fee established by rule. If the control is an institutional control, the owner shall submit to the department a written report once each calendar year regarding the status of the institutional control. If the control is an engineering control, the owner shall maintain the engineering control on the property to ensure that it continues to protect public health and the environment and shall inspect each engineering control at least once each calendar year. Within thirty days after each inspection, the owner shall submit to the department a written report that:

1. Describes the condition of the engineering control.
2. States the nature and cost of all restoration made to the engineering control during the calendar year.
3. Includes current photographs of the engineering control.
4. Describes the status of the financial assurance mechanism prescribed by section 49-152.01, if applicable, and a certification that the financial assurance mechanism is being maintained.

L. The department shall provide a copy of the declaration of environmental use restriction to the local jurisdiction with zoning and development plan approval for the property. The receipt of this copy does not create any new obligation or confer additional powers on the local jurisdiction. A declaration of environmental use restriction does not authorize a use of property that is otherwise prohibited by zoning ordinances or other ordinances or laws. A declaration of environmental use restriction may include activity limitations and use restrictions that would otherwise be permitted by zoning ordinances or other ordinances or laws.

M. The department shall adopt rules as necessary to implement this section. These rules may be combined with any rules necessary to implement section 49-158.

N. The department may enter on the property at all reasonable times to assess the condition of each engineering control. When the department enters on property to assess the condition of an engineering control, the department shall:

1. Provide twenty-four hours' advance notice of the entry to the property owner, if practicable.
2. Allow the owner or an authorized representative of the owner to accompany the department representative.
3. Present photographic identification on entry of the property.
4. Provide the owner or an authorized representative of the owner with notice of the right to have a duplicate sample or split of any sample taken during the inspection if the duplicate or split of any sample would not prohibit an analysis from being conducted or render an analysis inconclusive.

O. Nothing in this section shall preclude the department from initiating an action under other provisions of state or federal law.

#### 49-158. Restrictions on property use; enforcement of engineering and institutional controls

A. Notwithstanding any other provisions of this title, if a remedial action, remediation or corrective action performed pursuant to this title or a response action performed pursuant to CERCLA as defined in section 49-201 includes an institutional control or an engineering control and the remedial action, remediation, corrective action or response action is not subject to section 49-152, the owner of the property on which the institutional control or engineering control is located, on implementation of the institutional control or on construction of the engineering control, shall record in each county where the property is located a restrictive covenant that is labeled "declaration of environmental use restriction". A person who is conducting a remedial action, remediation, corrective action or response action that requires an institutional or engineering control and who is not the owner of the property shall obtain written consent from the owner before implementing the institutional control or constructing the engineering control. On implementation of the institutional control or construction of the engineering control, the owner shall record a declaration of environmental use restriction in each county where the property is located. If the institutional control or engineering control will affect right-of-way that is owned, maintained or controlled by a public entity for public benefit, the person shall also obtain the public entity's written consent before implementing the institutional control or constructing the engineering control. The declaration of environmental use restriction shall limit by legal description the area of the property where the institutional control or engineering control shall be maintained.

B. When recorded, an owner's declaration of environmental use restriction under subsection A of this section is a covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns and inures to the benefit of the department and the state. If notice of the declaration of environmental use restriction that includes a specific description of the area of the property that is subject to the declaration of environmental use restriction is contained in the repository maintained by the department pursuant to section 49-152, subsection E, a declaration of environmental use restriction may not be extinguished, limited or impaired through any of the following:

1. Issuance of a tax deed.
2. Foreclosure of a tax lien.
3. Foreclosure of any mortgage, deed of trust or other encumbrance or lien on the property.
4. Adverse possession.
5. Exercise of eminent domain.
6. Application of the doctrine of abandonment, the doctrine of waiver or any other common law doctrine.

C. Each party to a declaration of environmental use restriction shall incorporate the terms of the declaration of environmental use restriction into any lease, license or other agreement that is signed by the party and that grants a right with respect to the property that is subject to the declaration of environmental use restriction. The incorporation may be in full or by reference.

D. A declaration of environmental use restriction is sufficient if it contains all of the following information:

1. A legal description and the address of the area of the property that is subject to the declaration.
2. The date that remediation, remedial action, corrective action or response action was completed and a map of the area of the property that is subject to the declaration.
3. A description of the environmental contaminants that were the subject of the remediation, remedial action, corrective action or response action.

4. A statement that more detailed information is available at the department including the address at which that information will be maintained.

5. A notarized signature of a department official indicating approval of the declaration of environmental use restriction.

6. The notarized signature of the owner or owners of the property.

E. If institutional controls are used in addition to the declaration of environmental use restriction, the declaration of environmental use restriction, in addition to the information required by subsection D of this section, shall include the same elements required pursuant to section 49-152, subsection I.

F. If engineering controls are used, the declaration of environmental use restriction, in addition to the information required by subsection D of this section, shall include the same elements required pursuant to section 49-152, subsections F through J and section 49-152.01.

G. When a declaration of environmental use restriction is recorded or modified, an owner shall pay to the department a fee established by rule. The owner shall follow the same requirements for institutional controls and engineering controls pursuant to section 49-152, subsection K and section 49-152.01.

H. The department shall provide a copy of the declaration of environmental use restriction to the local jurisdiction with zoning and development plan approval for the property. A declaration of environmental use restriction does not authorize a use of property that is otherwise prohibited by zoning ordinances or other ordinances or laws. A declaration of environmental use restriction may include activity limitations and use restrictions that would otherwise be permitted by zoning ordinances or other ordinances or laws. The receipt of this copy does not create any new obligation or confer additional powers on the local jurisdiction.

I. The department may enter the property pursuant to section 49-152. The department may also enforce this section as prescribed by section 49-152.02.

J. The department shall adopt rules as necessary to implement this section.

K. When the department enters on property pursuant to this section to verify that engineering controls are being maintained, the department shall meet the same requirements pursuant to section 49-152, subsection N.

L. At the written request of the owner of property that is subject to a declaration of environmental use restriction recorded pursuant to subsection A of this section, the director shall determine whether release or modification of the declaration of environmental use restriction is appropriate. If a release has been requested, the director shall make this determination within sixty days after the date of the property owner's request. If the director determines that release of a declaration of environmental use restriction is appropriate, the director shall record in each county where the property is located a notice releasing the declaration of environmental use restriction. Release by the director under this subsection is appropriate if maintenance of the institutional control or engineering control is no longer necessary to protect public health and the environment.

M. Nothing in this section shall preclude the department from initiating an action under other provisions of state or federal law.

49-179. Application fees; reimbursement of costs of review

A. Each application submitted under section 49-173 shall be accompanied by a nonrefundable fee to be established by rule.

B. An applicant shall reimburse the department for the reasonable and necessary costs of actions taken by the department pursuant to this section and sections 49-173 through 49-178, 49-180, 49-181, 49-182 and 49-185.

C. Reimbursable costs include time spent by the department's employees and the costs of goods and services contracted by the department to carry out the activities described in subsection B of this section. Time spent by the department's employees shall be reimbursed at a rate to be established by rule based upon the estimated direct and indirect costs to the department of conducting these activities. The department shall provide documentation to the applicant to support its claims for reimbursement consistent with generally accepted accounting principles. The department may require an applicant to pay an advance deposit to be applied against the department's reimbursable costs following the department's approval of an application under section 49-174. If an approved application is terminated or withdrawn pursuant to section 49-178, the applicant shall reimburse the department for its costs incurred prior to the termination or withdrawal.

D. The department may contract with an outside consultant to perform any technical review required to review a work plan submitted pursuant to section 49-175 or a report submitted pursuant to section 49-181 or to oversee work performed pursuant to a work plan approved pursuant to section 49-177 as follows:

1. The department may contract any work for which costs are reimbursable pursuant to subsection B of this section if the contract rate is less than or equal to the rate charged for time spent by the department's employees.
2. The department may contract any work upon the request of an applicant to establish deadlines for a review of a work plan or a task under an approved work plan if the applicant agrees to reimburse the department for the charges of the outside consultant.

49-186. Rules; no licensing

A. The department shall adopt rules as necessary to implement section 49-179. The adoption of rules under this section is not a prerequisite for implementation of this article.

B. Title 41, chapter 6, article 7.1 and section 41-1009 do not apply to this article.

**DEPARTMENT OF ENVIRONMENTAL QUALITY**  
Title 18, Chapter 1

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 8, 2022

**SUBJECT:** Arizona Department of Environmental Quality  
Title 18, Chapter 1

---

This Five-Year-Review Report from the Department of Environmental Quality (5YRR) relates to rules in Title 18, Chapter 1 regarding Administration. The report covers the following Articles:

**Article 1** - Definitions

**Article 2** - Administrative Appeals

**Article 3** - Public Participation in Rulemaking

**Article 4** - Public Notice and General Public Hearings

**Article 5** - Licensing Time-Frames

In the last 5YRR of these rules the Department proposed to amend rules in Article 1 (Definitions), and proposed to submit a rulemaking to the Council by December 2017. The Department indicates they did not complete the changes due to the rule moratorium.

### **Proposed Action**

Currently, the Department is proposing to amend its rules to improve their overall effectiveness and consistency with other rules and statutes. The Department plans to submit an Expedited Rulemaking to the Council by May 2023.

1. **Has the agency analyzed whether the rules are authorized by statute?**

Yes, the Department cites to both general and specific statutory authority.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Arizona Department of Environmental Quality (ADEQ) reviewed rules in Title 18 Chapter 1 regarding administration of appeal, public participation in rulemaking, public notice and general public hearings and licensing time frames. The Department indicates that, in general, the articles in this chapter do not impose compliance and reporting requirements on the general public. The Department states that any economic impact from the rules is expected to be minimal with any probable costs outweighed by the benefits from clearly articulated procedures. Stakeholders include the Department, applicants for licenses required by ADEQ and the general public.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department believes that the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs necessary to achieve the underlying regulatory objectives.

4. **Has the agency received any written criticisms of the rules over the last five years?**

Yes, the Department received several comments regarding these rules. The Department adequately responded to each comment.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Department indicates the rules are overall clear, concise, and understandable.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Department indicates the rules are overall consistent with other rules and statutes with the exception of the following:

**R18-1-101** - Definitions

**R18-1-503** - Administrative Completeness Review Time-Frame Operation;  
Administrative Completeness.

**Table 12.** Solid Waste Licenses

**Table 14.** Landfill Licenses

**Table 20.** Voluntary Program Remediation Licenses

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Department indicates the rules are overall effective in achieving their objectives with the exception of the following:

**R18-1-306** - Written Criticism of Rules

**Table 12.** Solid Waste Licenses

**Table 14.** Landfill Licenses

**Table 20.** Voluntary Program Remediation Licenses

8. **Has the agency analyzed the current enforcement status of the rules?**

Yes, the Department indicates the rules are enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

There are no corresponding federal laws.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rules were adopted before July 29, 2010.

11. **Conclusion**

As mentioned above, and for the specific reasons mentioned in the report, the Department is proposing to amend some of the rules to improve their overall effectiveness and consistency with other rules and statutes. The Department plans to submit an Expedited Rulemaking to the Council by May 2023.

Council staff recommends approval of this report.

Douglas A. Ducey  
Governor

ARIZONA DEPARTMENT  
OF  
ENVIRONMENTAL QUALITY

Misael Cabrera  
Director

**Re: Submittal of Five-Year Review Report for A.A.C. Title 18, Chapter 1, Articles 1, 2, 3, 4, and 5**

Dear Chair Sornsin:

I am pleased to submit to you, pursuant to A.R.S. § 41-1056 and A.A.C. R1-6-301, our agency's Five-Year Review Report for A.A.C. Title 18, Chapter 1, Articles 1, 2, 3, 4, and 5: Department of Environmental Quality - Administration

Pursuant to A.R.S. § 41-1056(A), I certify that ADEQ is in compliance with A.R.S. § 41-1091 requirements for filing of notices of substantive policy statements and annual publication of a substantive policy statement directory.

Please contact Edwin Slade, Administrative Counsel at 602-771-2242 or [slade.edwin@azdeq.gov](mailto:slade.edwin@azdeq.gov), if you have any questions.

Sincerely,

Misael Cabrera, P.E.  
Director

**Article 5: Licensing Time-frames**

General Statutory Authority: A.R.S. § 41-1003 and A.R.S. § 49-104(B)(4).

Specific Statutory Authority: A.R.S. §§ 41-1072 through 41-1076.

2. **The objective of each rule:**

<b><u>Rule</u></b>	<b><u>Objective</u></b>
<b>R18-1-101. Definitions.</b>	The purpose of this rule is to define the terms that 1) are necessary to help members of the general public read and understand Chapter 1, 2) have a meaning outside the normal, common meaning of the term, 3) are acronyms or shortened forms used in Chapter 1, and 4) are actually used in Chapter 1.
<b>R18-1-205. Notice of Intent to Rely on License Application Components as Submitted 2</b>	This purpose of this rule is to describe both the content and the effect of using the notice of intent to rely on the application components as submitted under licensing time-frames. It gives applicants a means to respond to Department requests to the appeals process.
<b>R18-1-301. Agency Record</b>	This purpose of this rule is to describe where and when the public can review agency records.
<b>R18-1-302. Petition for Rule Adoption, Amendment or Repeal</b>	This purpose of this rule is to provide procedures for petitioning the Department to repeal, amend, or adopt a rule. The rule is designed to promote public participation and also complies with the statutory requirements of A.R.Ss. § 41-1033.
<b>R18-1-303. Written Comments During Rulemaking</b>	This purpose of this rule is to describe when written comments are deemed submitted and the effect of timely submissions. The rule imposes requirements designed to provide the public means to comment on the record which must be considered by the Department in the rulemaking process.
<b>R18-1-304. Written Comments During Rulemaking</b>	This purpose of this rule is to provide for oral proceedings and is designed to promote public participation.
<b>R18-1-306. Written Criticism of Rule</b>	This purpose of this rule is to provide procedures for submitting written criticisms on a rule.
<b>R18-1-401. Notice</b>	This purpose of this rule is to describe public notice requirements. The rule imposes public notice requirements designed to inform the public of events that are of public interest plus provide means by which the public can participate in these events. The rule is designed to promote public participation.

<p><b>R18-1-402. General Public Hearing Procedures</b></p>	<p>This purpose of this rule is to provide procedures for general public hearings where the Department does not include specific public hearing procedures but a hearing is required. The rule is designed to promote public participation.</p>
<p><b>R18-1-501. Definitions</b></p>	<p>This purpose of this rule is to define the terms that 1) are necessary to help members of the general public read and understand Article 5, 2) have a meaning outside the normal, common meaning of the term, 3) are acronyms and shortened forms used in Article 5, and 4) are actually used in Article 5.</p>
<p><b>R18-1-502. Applicability; Effective Date</b></p>	<p>This purpose of this rule is to prescribe the applicability of the rule and describes what licenses are subject to time frames. The rule assists prospective applicants with determining if the sections apply to their matter.</p>
<p><b>R18-1-503. Administrative Completeness Review Time-frame Operation; Administrative Completeness</b></p>	<p>This purpose of this rule is to describe the administrative completeness review time-frame operation so licensees understand when the Department will begin the administrative completeness review.</p>
<p><b>R18-1-504. Substantive Review Time-frame Operation; Requests for Additional Information</b></p>	<p>This purpose of this rule is to describe the substantive review time-frame operation so licensees have some idea of length of time for review.</p>
<p><b>R18-1-505. Overall Time-frame Operation</b></p>	<p>This purpose of this rule is to describe the cumulative operation of multiple components for the overall time frame operation so licensees have some idea of the length of time for review.</p>
<p><b>R18-1-506. Time-frame Extension Operation</b></p>	<p>This purpose of this rule is to prescribe the starting, suspending, and ending of the time-frame extension. Subsection (A) identifies the starting of the time-frame and clarifies that the time-frame must 1st be created by a R18-1-510 time-frame extension agreement. Subsection (B) identifies the ending of the time-frame. Subsections (C) and (D) clarify that the time-frame responds to R18-1-504 comprehensive requests and R18-1-509 supplemental request agreements. Subsection (E) identifies one other section that may also control the running of this time-frame.</p>
<p><b>R18-1-507. Ending of Time-frames; Licensing Decisions; Withdrawal; Notice of Licensing Time-frames Nonapplicability</b></p>	<p>This purpose of this rule is to prescribe the actions that may end a time-frame and the process for denying a license. Subsection (A), (E), and (F) identify actions that will terminate a time-frame. Subsections (B) through (D) identify the situations in which the Arizona Department of Environmental Quality (ADEQ) may deny a license.</p>

<p><b>R18-1-508. Licensing Time-frames Pre-application Agreements</b></p>	<p>This purpose of this rule is to prescribe the terms of pre-application agreements that may be offered by the Department for the benefit of applicants. None of these agreements are required. This Section represents the compromise in balancing between establishing fixed times established under the licensing time frame (LTF) laws leading to sanctions and the increased work and flexibility needed by the Department to respond to an applicant's desire not to submit all components complete at one time and at the beginning of the process.</p>
<p><b>R18-1-509. Licensing Time-frames Supplemental Request Agreements</b></p>	<p>This purpose of this rule is to prescribe the terms of supplemental request agreements. Title 41, Chapter 6, article 7.1 (Article 7.1) identifies and describes such agreements. Subsection (A) clarifies that an applicant and the Department may enter into any number of supplemental request agreements with the time-frames suspending each time but that suspensions can last only until the receipt of missing information identified in the agreements. Subsection (B) prescribes the minimum terms that every supplemental request agreement must contain. These agreements are necessary because applicants do not always submit all of the information in their applications that is sufficient to make a reasoned licensing decision.</p>
<p><b>R18-1-510. Licensing Time-frames Extension Agreements</b></p>	<p>This purpose of this rule is to describe the terms of time-frame extension agreements. Article 7.1 identifies and describes such agreements. Subsection (A) clarifies that an applicant and the Department may enter into any number of time-frame extension agreements. Subsection (B) prescribes how to determine the base time that, in turn, determines the maximum extent to which the sum of all agreements can extend the time-frames. Subsection (C) prescribes the minimum terms that every time-frame extension agreement must contain.</p>
<p><b>R18-1-511. Licensing Time-frames Changed Application</b></p>	<p>This purpose of this rule is to prescribe the terms of changed application agreements. The Department may offer these agreements for the benefit of applicants. The alternative to a changed application agreement is for the applicant to withdraw a pending application and resubmit as a new application with the desired changes. This Section balances the need of the applicant to minimize fee expenditure with the limitations on Departmental resources and the desire of other applicants for the timely resolution of their license applications.</p>

<p><b>R18-1-516. Reassignment of License Category</b></p>	<p>This purpose of this rule is to prescribe the conditions under which the Department may unilaterally reassign the license category of an application and then notify the applicant of the change. This Section gives the Department the necessary flexibility to reassign licenses to different categories when circumstances warrant while protecting the rights of applicants.</p>
<p><b>R18-1-517. Application Withdrawal</b></p>	<p>This purpose of this rule is to explain that all time-frames for applications end when that application is withdrawn.</p>
<p><b>R18-1-518. Emergencies and Upset Conditions</b></p>	<p>This purpose of this rule is to prescribe the conditions under which the Department may suspend certain provisions of this Article. Two types of suspension are available: (1) a moratorium on the starting of time-frames on new applications and (2) the suspension of time-frames for applications already in process.</p>
<p><b>R18-1-519. Public Hearings; Public Meetings; Public Notice Periods</b></p>	<p>This purpose of this rule is to prescribe the applicability of the licensing time-frames to the noticing and holding of public hearings when such hearings are required before the Department may grant a license. The Section is needed to guarantee that notices and hearings are deemed valid.</p>
<p><b>R18-1-520. Notice of Intent to Rely on the Application Components as Submitted</b></p>	<p>This purpose of this rule is to respond to certain appealable agency actions that Article 7.1 requires the Department to take during the pendency of a license application that are subject to the notice requirements of A.R.S. § 41-1092.03 and hearings before a department of administrative law judge. At least two Article 7.1 required actions fall into this category if they suspend the time-frames: the R18-1-503 notice of administrative deficiencies and the R18-1-504 substantive request for additional information. This rule provides other similar instances. This rule promotes the smooth operation of time-frames because the decision to issue the R18-1-503 notice or R18-1-504 request (and thus suspend the time-frames) is determinative of an applicant’s “legal rights, duties, or privileges” subject to A.R.S. §§ 41-1092 through 41-1092.11. Without the notice provisions provided in this rule, an applicant could pursue immediate appeals of R18-1-503 notices and R18-1-504 requests, causing needless complications to the operation of the time-frames, a consequence not addressed in Article 7.1.</p>
<p><b>R18-1-521. Notice of Intent to Rely on the License Category</b></p>	<p>This rule is similar to the notice of intent to rely on application components submitted described immediately above and relates to R18-1-516. The decision to issue the notification of a changed license category in R18-1-516 is</p>

	determinative of an applicant’s “legal rights, duties, or privileges” subject to A.R.S. §§ 41-1092 through 41-1092.11, and without these notice provisions an applicant could pursue immediate appeals of R18-1-516.
<b>R18-1-522. Notice of Change of Applicant's Agent for Receiving Licensing Time-frames Notices</b>	This purpose of this rule is to provide the method by which an applicant may change the designation of its agent for receipt of licensing time-frames notices.
<b>R18-1-523. Refunds, Fee Excusals, and Penalties</b>	This purpose of this rule is to prescribes Department procedures for determining and making license refunds, fee excusals, and penalty payments.
<b>R18-1-524. Site Inspections</b>	This purpose of this rule is to harmonize the requirements of Article 7.1 and A.R.S. § 41-1009 governing Department duties concerning site inspections by clarifying that the Department will limit the extent of its site inspections when made as an application component for an application subject to Article 7.1 so that no further notifications or other requirements under A.R.S. § 41-1009 will apply after the inspection is complete.
<b>R18-1-525. Licensing Time-frames; Application Components</b>	This rule references the license tables accompanying this rule. These tables, Table 1 through Table 22 are found in Part II of Article 5 and are the actual operational “time frames” which the Department must achieve.
<b>Table 1. Class I Air Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Class I Air Licenses.
<b>Table 2. Class II Air Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Class II Air Licenses.
<b>Table 3. Open Burn Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Open Burn Licenses.
<b>Table 4. Vehicle Emission Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Vehicle Emission Licenses.
<b>Table 5. Safe Drinking Water Construction Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Safe Drinking Water Construction Licenses.
<b>Table 7. Pesticide Contamination Prevention Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Pesticide Contamination Prevention License.

<b>Table 8. Safe Drinking Water Monitoring and Treatment Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Safe Drinking Water Monitoring and Treatment Licenses.
<b>Table 10. Water Permit</b>	This purpose of this table is to describe the licensing time-frames for Water Permits.
<b>Table 11. Surface Water Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Surface Water Licenses.
<b>Table 12. Solid Waste Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Solid Waste Licenses.
<b>Table 13. Special Waste Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Special Waste Licenses.
<b>Table 14. Landfill Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Landfill Licenses
<b>Table 15. Biohazardous Medical Waste Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Biohazardous Medical Waste Licenses.
<b>Table 16. Waste Tire, Lead Acid Battery, and Used Oil License</b>	This purpose of this table is to describe the licensing time-frames and application components for Waste Tire, Lead Acid Battery, and Used Oil License.
<b>Table 17. Hazardous Waste Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Hazardous Waste Licenses.
<b>Table 18. Underground Storage Tank Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Underground Storage Tank Licenses.
<b>Table 20. Voluntary Program Remediation Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Voluntary program Remediation Licenses.
<b>Table 21. Pollution Prevention Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Pollution Prevention Licenses.
<b>Table 22. Multi-Program Licenses</b>	This purpose of this table is to describe the licensing time-frames and application components for Multi-Program Licenses.

3. Are the rules effective in achieving their objectives? Yes  No

The rules are effective in achieving their objectives. Minor clarifications can be made as described in the table below.

Rule	Explanation
<b>R18-1-306. Written Criticism of Rule</b>	R18-1-306(C) contains an outdated reference to Arizona Revised Statute (A.R.S.) §41-1054. This statute was renumbered and transferred to A.R.S. §41-1056 effective Jan. 1, 1995.
<b>Table 12. Solid Waste Licenses</b>	The permits listed in Table 12 are solid waste APPs, issued under the same authority as APPs in the Water Quality Division (Table 10). There are inconsistencies in the timeframes between Table 10 and 12. Table 12 also includes some additional categories that Table 10 does not.
<b>Table 14. Landfill Licenses</b>	There is no LTF for the Mining Landfill General Permit (A.A.C. R18-13-802) established in 2014.
<b>Table 20. Voluntary Program Remediation Licenses</b>	Group I refers to a statute that was repealed in 2008 and should be repealed. ADEQ no longer issues these licenses.

4. Are the rules consistent with other rules and statutes? Yes  No

The rules are consistent with the rules and statutes of Arizona and the United States. Minor clarifications can be made as described in the table below.

Rule	Explanation
<b>R18-1-101. Definitions.</b>	Two amendments are needed to incorporate the Uniform Administrative Hearing Procedures in title 41, Chapter 6, Article 10 which applies to appeals of agency decisions under A.R.S. § 49-114. First, A.R.S. § 41-1092 needs to be added to the list of statutes that contain definitions which are applicable to 18 A.A.C. 1. Second, the definition of hearing officer should be deleted from definitions in R18-1-101 since the ADEQ no longer appoints hearing officers. Formal

	hearings challenging ADEQ actions are now resolved in a hearing before the OAH under A.R.S. § 49-114.
<b>R18-1-503 Administrative Completeness Review Time-frame Operation; Administrative Completeness</b>	The rule as worded could be interpreted to be inconsistent with Title 41 licensing timeframes for administrative completeness review.
<b>Table 12. Solid Waste Licenses</b>	Some of the permits listed in Table 12 are solid waste APPs, issued under the same authority as APPs in the Water Quality Division (Table 10). There are inconsistencies in the timeframes between Table 10 and 12.
<b>Table 14. Landfill Licenses</b>	There is no LTF for the Mining Landfill General Permit (A.A.C. R18-13-802) that was established in 2014. Some of the permits listed in Table 14 are solid waste APPs, issued under the same authority as APPs in the Water Quality Division (Table 10). There are inconsistencies in the timeframes between Table 10 and 14.
<b>Table 20. Voluntary Program Remediation Licenses</b>	Group I refers to a statute that was repealed in 2008 and should be repealed. ADEQ no longer issues these licenses.

5. **Are the rules enforced as written?** Yes  No

The rules are enforced as written.

6. **Are the rules clear, concise, and understandable?** Yes  No

The rules are clear, concise, and understandable except as noted below.

7. **Has the agency received written criticisms of the rules within the last five years?**

Yes  No

<b>Rule</b>	<b>Explanation</b>
<b>Article 1-4 Generally</b>	<p><u>Comment 1:</u> These rules were developed prior to the ongoing pandemic and are obsolete. Public participation must include electronic access to all aspects of the rulemaking process.</p> <p><u>Response 1:</u> ADEQ appreciates this comment. ADEQ now provides notice on its website in addition to the published</p>

	<p>State register. ADEQ conducts hearings virtually and allows for participation through electronic communication. Occasionally, some hearings are conducted in-person when the community requests in-person hearings. ADEQ follows all statutes and rules regarding notices and meetings.</p>
<p><b>Article 1-4 Generally</b></p>	<p><u>Comment 2:</u> With expected challenges from both transmissible disease and from the monetary and greenhouse gas emission costs associated with travel, the rules need to make it easier for the public to participate via electronic communication, for all aspects of the public process, including, but not limited to, filing petitions and participating in hearings.</p> <p><u>Response 2:</u> ADEQ appreciates this comment. ADEQ now provides notice on its website in addition to the published State register. ADEQ conducts hearings virtually and allows for participation through electronic communication. Occasionally, some hearings are conducted in-person when the community requests in-person hearings. ADEQ follows all statutes and rules regarding notices and meetings.</p>
<p><b>Article 1-4 Generally</b></p>	<p><u>Comment 3:</u> There is so much legalese that few will become aware of the full content; however, that is by nature, unavoidable.</p> <p><u>Response 3:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 1-4 Generally</b></p>	<p><u>Comment 4:</u> All information provided by ADEQ is written in legalese and not intended to be readily understood. There is a belief by ADEQ their rules, regulations, bulletins are clear, concise, understandable and they are if one is versed in governmental legalese, but not to the man on the street.</p> <p><u>Response 4:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 1-4 Generally</b></p>	<p><u>Comment 5:</u> I'd like to see a rule added granting ADEQ power to make an extension to a rule if requested. These requests should be allowed on a case by case review basis. For instance, in the medical waste section there is a rule not permitting the transfer of medical waste from one vehicle to another except in emergency situations. If ADEQ had the authority to receive an exemption from a licensee. I could submit a specific exemption based on my specific business</p>

	<p>and situation, whereas ADEQ could look at all these factors and with RULE authority make an exemption. ADEQ has no rules in place giving them authority to receive an exemption request and review it.</p> <p><u>Response 5:</u> ADEQ appreciates this comment. ADEQ will consider this amendment if there is any future rulemaking for medical waste rules. This amendment would broaden the scope of general rule exemptions and may be better addressed in a medical waste rule, specifically. Please contact our Waste Division if you have a specific request.</p>
<p><b>R18-1-205. Notice of Intent to Rely on License Application Components as Submitted</b></p>	<p><u>Comment 6:</u> Grant the license unconditionally, meaning that the Department did not add conditions not requested by the applicant. "Unconditionally" should not be included anywhere in the application.</p> <p><u>Response 6:</u> ADEQ appreciates this comment. Any conditions in a license must be authorized by law or rule. An issued license is appealable should an applicant believe there are conditions included that are not lawful.</p>
<p><b>R18-1-401. Notice</b></p>	<p><u>Comment 7:</u> Article 4, Section A could be improved by requiring publication of notice on general public hearings to the ADEQ website at least 30 days prior to the meeting, with all the required information listed in Sections A and B.</p> <p><u>Response 7:</u> ADEQ appreciates this comment. ADEQ does provide notice on its website at least 30 days prior to a meeting. ADEQ will consider adding this requirement if the rules are amended for other reasons. ADEQ follows all statutes and rules regarding notices and meetings.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 8:</u> Very long and hard to find what I am looking for. Not when you test in the summer when school is not in session. Do not test schools during the summer.</p> <p><u>Response 8:</u> ADEQ appreciates this comment. ADEQ is not sure of the intention of this comment. The subject matter of this Article concerns licensing time frames. Please contact our Drinking Water section if you have a specific issue.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 9:</u> Need to extend certification for distribution grades.</p> <p><u>Response 9:</u> ADEQ appreciates this comment.</p>

<p><b>Article 5 Generally</b></p>	<p><u>Comment 10:</u> From the perspective of a managing owner, the clause is missing notation for "best intent of requirement," in our current employment environment, all of us as employers are experiencing an unprecedented turn over either of employees or lack thereof, with this in mind, can you please add clauses that are not detrimental to a small business owner if we happen to be late in submitting or completing, as long as we prove that we did not try to complete but were limited to resources. Second item, the submission process is not always captured and in the past it showed for our company is not always captured and in the past, it showed for our company that we had submitted and had to resubmit. With that in mind, if a delay is caused by the software or lack of personnel in an agency, again will not leave a negative record on the private company.</p> <p>Offer longer terms, as long as company has complied and has no fines. OK to increase the fee that is comparable to the number of years extended.</p> <p>Thank you.</p> <p><u>Response 10:</u> ADEQ appreciates this comment. Please raise any specific issues about submissions or difficulty meeting compliance timeframes with our ADEQ staff. This Chapter does not address compliance submissions.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 11:</u> If I were a Lawyer this would be more comprehensible. Simplify the actions required to understand what is being asked.</p> <p><u>Response 11:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 12:</u> In the past I have been charged for admin review process timing at \$125.00 per hour. Very costly and there is no control over the time spent on rereview and what you will be charged for. In addition to the permit fee. There is no timing on the permit other than the overall time. You provide a service which is needed and if the admin person is slow to review the requester pays the price with no notice or time frame until you get the bill. There should be some controls in this area.</p> <p><u>Response 12:</u> ADEQ appreciates this comment. ADEQ charges fees based on established fee rules. The \$122.00 per hour was established as an average hourly fee considering the</p>

	<p>different types of review and expertise necessary to process the license. Fees also have maximum amounts allowable. ADEQ is continuously improving its permitting process. Please see data on how recent improvements led to faster permitting timeframes. <a href="http://www.azdeq.gov/ams">http://www.azdeq.gov/ams</a></p> <p>Please feel free to discuss your specific ideas for improvement with our permitting managers and Department leadership.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 13:</u> Why does it take so long to grant permits, if you have standards upfront you should only have to look at what is not standard? This should minimize the time and personnel needed to do the job.</p> <p>Spend the time to create standards in your process in order to achieve compliance in a timely manner, make it easier for people to do their job and your customers to be in compliance instead of making it a huge undertaking for everyone involved.</p> <p><u>Response 13:</u> ADEQ appreciates this comment. ADEQ is continuously improving its permitting process. Please see data on how recent improvements led to faster permitting timeframes. <a href="http://www.azdeq.gov/ams">http://www.azdeq.gov/ams</a></p> <p>Please feel free to discuss your specific ideas for improvement with our permitting managers and Department leadership.</p>
<p>Article 5 Generally</p>	<p><u>Comment 14:</u> If you create a survey for people's input, I hope you listen and make changes, or least take them under consideration. Lack of manpower should not be the issue and or punish the requestor with delays. There is no pricing on this article for administration fees?</p> <p><u>Response 14:</u> ADEQ appreciates this comment. ADEQ's program fees are located in program rules, not within this rule, but the rules that contain fees are referenced within this Article in the licensing timeframe tables.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 15:</u> Time frames need to be examined to determine if reasonable. If I read the section correctly, completeness can take over 400 days.</p> <p><u>Response 15:</u> ADEQ appreciates this comment. ADEQ is continuously improving its permitting process. Please see data on how recent improvements led to faster permitting timeframes. <a href="http://www.azdeq.gov/ams">http://www.azdeq.gov/ams</a></p> <p>Please feel free to discuss your specific ideas for improvement with our permitting managers and Department leadership.</p>

<p><b>Article 5 Generally</b></p>	<p><u>Comment 16:</u> Issues with Article 5 being clearly defined or the ability to understand the content.</p> <p><u>Response 16:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 17:</u> The reporting process is becoming more difficult, but once the upload section(s) were understood and how to report it is somewhat easier. Reporting in general is becoming more difficult.</p> <p><u>Response 17:</u> ADEQ appreciates this comment.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 18:</u> Need a summary so that extensive study of the rule is not necessary.</p> <p><u>Response 18:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to enhance rule language to provide clarity.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 19:</u> ADEQ doesn't follow their own rules or timeframes.</p> <p><u>Response 19:</u> ADEQ follows all laws and rules. Please contact ADEQ with specific instances so that we may address your concerns.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 20:</u> It would be nice if the medical waste transporter license request came earlier than a couple weeks before due.</p> <p><u>Response 20:</u> ADEQ appreciates this comment and will consider whether Department practice can be improved.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 21:</u> The Licensing Table in rule is different than the licensing table in delegation agreements with the counties.</p> <p><u>Response 21:</u> ADEQ appreciates this comment. Counties that are delegated ADEQ authority to issue licenses are required to issue licenses according to ADEQ's licensing timeframes.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 22:</u> Too much wording &amp; C.Y.A. pages upon pages of outlining the desire to modify certification frequency.</p> <p><u>Response 22:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to enhance rule language to provide clarity.</p>

<p><b>Article 5 Generally</b></p>	<p><u>Comment 23:</u> 5 years is too long for any emissions officer to go without recertification. Perhaps a stretch of 4 years without the burden of “over-testing” from a too-frequent schedule and not so far apart that fundamentals become hazy &amp; specifics forgotten.</p> <p><u>Response 23:</u> ADEQ appreciates this comment. The recertification process for emissions inspectors is biannual according to R18-2-1016. There is no five-year certification process. All emissions inspector licenses are active for 2 years. The inspector can renew the license up to 60 days prior to the license expiration.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 24:</u> If 2 businesses share the same property, make thing easier for using the same testing equipment for both company’s retail fleets.</p> <p><u>Response 24:</u> ADEQ appreciates this comment. If two businesses are part of the same parent company, then they are permitted to utilize the same testing equipment. Two businesses merely sharing real estate does not entitle them to share the same equipment. This is outlined in R18-2-1019. There are equipment certification and liability concerns that the Department must consider.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 25:</u> Too much legalese. Rules need to be published in a way that anyone reading it can understand them.</p> <p><u>Response 25:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 26:</u> No lay person has the time to review and read or understand this section. Lawyer must have written this to protect the agency. Leave it alone.</p> <p><u>Response 26:</u> ADEQ appreciates this comment. ADEQ will continue to look for ways to improve rule language to provide clarity.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 27:</u> Provide test kits for water sampling.</p> <p><u>Response 27:</u> ADEQ appreciates this comment.</p>
<p><b>Article 5 Generally</b></p>	<p><u>Comment 28:</u> The LTF rules work when the agency and applicants use them properly. I had an instance last year where APP did not use LTF statute or rules properly and they forced me to withdrawal the application. Rare instance, but</p>

	<p>extremely frustrating... I recommend if the rules stay in place, that all programs must follow them and not make up their own method of how they want to run a clock. Staff was too goal focused on LEAN to meet time clocks and did not provide review according to statute.</p> <p><u>Response 28:</u> ADEQ occasionally works with applicants to suggest that an application is withdrawn when significant time will elapse before the applicant can provide required information, in lieu of denying an application which will cause the applicant to lose fees already submitted. If ADEQ staff inappropriately made a request for you to withdraw an application, please notify ADEQ leadership so that ADEQ can investigate and, if necessary, hold staff accountable.</p>
<p><b>R18-1-507. Ending of Time-frames; Licensing Decisions; Withdrawal; Notice of Licensing Time-frames Nonapplicability</b></p>	<p><u>Comment 29:</u> Does A.A.C. R18-1-507(B) mean the Department can deny an applicant even if no RAIS, nor CRAI letter was issued by the Department?</p> <p><u>Response 29:</u> No, ADEQ will not deny a license if it has not followed the appropriate notification and issuance letters required by law and rule.</p>

**8. Economic, small business, and consumer impact comparison:**

**Article 1. Definitions**

This section defines terms and does not impose compliance and reporting requirements on applicants; therefore, there is no economic impact, in and of itself.

**Article 2. Administration Appeals**

This section provides appeal procedures and does not impose compliance and reporting requirements on applicants. The overall impact is expected to be minimal with any probable costs outweighed by the benefits of clearly articulated procedures to appeal an agency decision. Economic costs could be generated during the time an applicant spends preparing for an informal settlement conference or an administrative appeal, however, these costs are expected to be less than the reapplying if the appeal process were not available to an applicant.

**Article 3. Public Participation in Rulemaking**

This section provides procedures for public participation in rulemaking and does not impose compliance and reporting requirements on the general public. The overall impact

is expected to be minimal with any probable costs outweighed by the benefits of clearly articulated procedures for the public to participate in agency rule makings.

**Article 4. Public Notice and General Public Hearings**

This section provides public notice and public hearing requirements when such is not prescribed by rule or statute. Economic costs would be generated during the time spent coordinating and responding to notices and participating in hearings. However, the overall impact is expected to be minimal with any probable costs outweighed by the benefits of clearly articulated procedures in all cases for public notices and public hearings.

**Article 5. Licensing Time-frames**

This section does not create new licenses but add time-frames to existing licenses. Economic costs could be generated during the time an applicant applies for a license and the time it is granted.

**9. Has the agency received any business competitiveness analysis of the rules?**

Yes \_\_\_ No X

ADEQ has not received any analysis submitted by another person that compares the rules’ impact on Arizona’s business competitiveness to the impact on businesses in other states.

**10. Has the agency completed the course of action indicated in the agency’s previous five-year report?**

ADEQ did not propose any course of action except to retain the current rules.

<u>Rule</u>	<u>Explanation</u>
R18-1-101. Definitions.	2017: A rule moratorium remains in effect; therefore, ADEQ did not file a Notice of Final Rulemaking with GRRC in December, 2017 to update this section.
Article 2: administrative Appeals	2017: Retain the current rules.
Article 3: Public Participation in Rulemaking	2017: Retain the current rules.

Article 4: Public Notice and General Public Hearings	2017: Retain the current rules.
Article 5: Licensing Time-Frames	2017: Retain the current rules.

**11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

<b><u>Rule</u></b>	<b><u>Explanation</u></b>
Article 1: Definitions.	This rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.
Article 2: Administrative Appeals	The rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.
Article 3: Public Participation in Rulemaking	The rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.
Article 4: Public Notice and General Public Hearings	The rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.
Article 5: Licensing Time-Frames	The rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.

**12. Are the rules more stringent than corresponding federal laws? Yes \_\_ No X**

**Article 1. Definitions**

None of the definitions are more stringent than federal law.

**Article 2. Administration Appeals**

None of the rules in this section are more stringent than federal law.

**Article 3. Public Participation in Rulemaking**

None of the rules in this section are more stringent than federal law.

**Article 4. Public Notice and General Public Hearings**

None of the rules in this section are more stringent than federal law.

**Article 5. Licensing Time-frames**

There is no corresponding federal law; therefore, none of the selections are more stringent. None of the rules in this section are more stringent than federal law.

13. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

These rules were adopted before 2010.

14. **Proposed course of action:**

**Article 1. Definitions**

Due to competing priorities, no risk to mission operations, and extensive stakeholder outreach necessary for this rulemaking, ADEQ has lowered the priority of this rulemaking and has no scheduled update at this time. Retain the rule.

**Article 2. Administration Appeals**

No provisions are planned. Retain the rules.

**Article 3. Public Participation in Rulemaking**

No provisions are planned. Retain the rules.

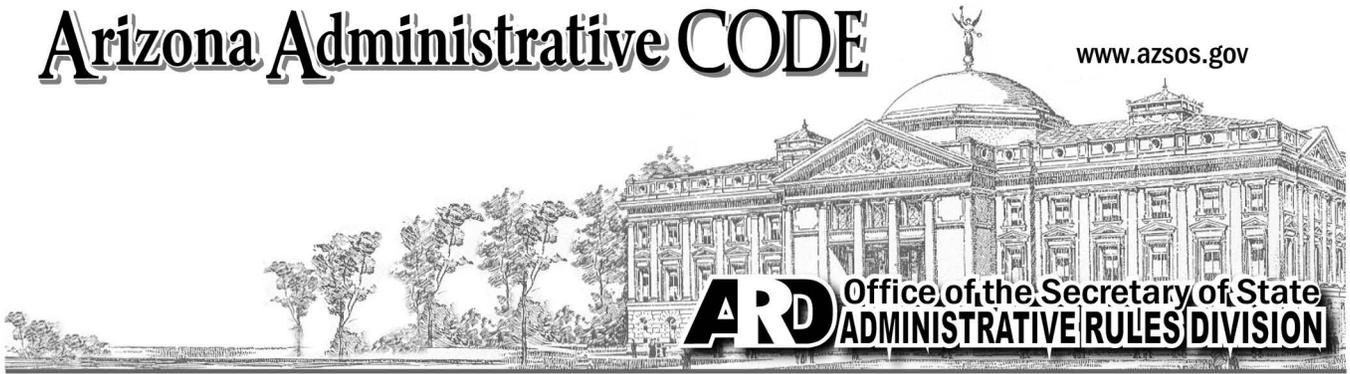

**Article 4. Public Notice and General Public Hearings**

No provisions are planned. Retain the rules.

**Article 5. Licensing Time-frames**

Provided an exemption from the Rulemaking Moratorium is granted for an expedited rulemaking, ADEQ anticipates submitting the final rulemaking to GRRC by 5/30/23. ADEQ will the proposed changes in the table below.

<u>Rule</u>	<u>Proposed Change</u>
<b>R18-1-101. Definitions</b>	Delete the definition of “hearing officer” because ADEQ no longer appoints hearing officers and the term is no longer cited in the rules.
<b>R18-1-306. Written Criticism of Rule</b>	Update outdated reference to A.R.S. §41-1054 to A.R.S. §41-1056.
<b>R18-1-503 Administrative Completeness Review Time-frame Operation; Administrative Completeness</b>	Ensure clarity between ADEQ's administrative completeness review rule and the Arizona statutes that state when ADEQ begins the administrative completeness review.
<b>Table 12. Solid Waste Licenses</b>	Align the substantive review time-frames (SRTF) in Tables 10 and 12, for the following license categories (LC) in Table 12: 3, 5, 7, 9, 10, 11.
<b>Table 14. Landfill Licenses</b>	Align the substantive review time-frames (SRTF) in Tables 10 and 14, for the following license categories (LC) in Table 14: 4, 10, 12, 16, 17, 18. Add a licensing category for Mining Landfill General Permit.
<b>Table 15. Biohazardous Medical Waste Licenses</b>	In Licensing Category 3, update “No” to “Yes” under “Subject to Sanctions.” Add a line referencing the fee rule in R18-13-1409.
<b>Table 16. Waste Tire, Lead Acid Battery, and Used Oil Licenses</b>	In Licensing Category 1, update “No” to “Yes” under “Subject to Sanctions.” Add a line referencing the fee rule in R18-13-1211 through R18-13-1212 (waste tires).
<b>Table 17. Hazardous Waste Licenses</b>	In Licensing Category 26, update “Yes” to “No” under “Subject to Sanctions.” Remove reference to fee rule.
<b>Table 20. Voluntary Program Remediation Licenses</b>	Remove Group I. Change “Group II” to “Group I.” Correct reference to CFR from (c)(1)(C) to (c)(3)

## TITLE 18. ENVIRONMENTAL QUALITY

### CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

The table of contents on page one contains links to the referenced page numbers in this Chapter.  
Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of  
July 1, 2022 through September 30, 2022

[Table 10.](#)      [Water Permit Licensing Time-Frames \(Business Days\)](#) ..... [25](#)

#### Questions about these rules? Contact:

Department: Arizona Department of Environmental Quality  
Water Quality Division  
Address: 1110 W. Washington St.  
Phoenix, AZ 85007  
Website: <https://azdeq.gov/UIC>  
Name: Jon Rezabek, Legal Specialist

**The release of this Chapter in Supp. 22-3 replaces Supp. 17-2, 1-36 pages.**

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

### RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.*

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

## ARTICLE 1. DEFINITIONS

**R18-1-101. Definitions**

The definitions in A.R.S. § 41-1001, except for the definition of “person”, shall apply to this Chapter. In addition, the terms in this Chapter shall have the following meanings:

1. “Attorney general” means the attorney general of the state of Arizona and includes any assistant attorneys general or other attorneys appointed by the Office of the Attorney General to represent the Department at a contested case.
2. “Department” means the Department of Environmental Quality.
3. “Director” means the Director of the Department of Environmental Quality or the Director’s designee.
4. “General public hearing” means a hearing, subject to the requirements of Article 4, held to obtain comment from the public with respect to Department actions. “General public hearing” shall not include oral proceedings, or contested case hearings.
5. “Hearing officer” means an individual appointed by the Director to perform the duties described in R18-1-203 at any contested case hearing.
6. “Oral proceeding” means a proceeding held during the rulemaking process, as described by A.R.S. § 41-1023.
7. “Person” means an individual, employee, officer, managing body, trust, firm, joint stock company, consortium, public or private corporation, including a government corporation, partnership, association, state, a political subdivision of this state, or commission or the United States Government or a federal facility, interstate body or other entity.
8. “Presiding officer” means any individual appointed by the Director to perform the duties described in R18-1-304 at any oral proceeding.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

## ARTICLE 2. ADMINISTRATIVE APPEALS

**R18-1-201. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-202. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 3772, effective September 22, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-203. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-204. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-205. Notice of Intent to Rely on License Application Components as Submitted**

- A. If the Department submits to a license applicant a notice that the application is missing required components, is substantively deficient, or is otherwise deficient, or submits to a license applicant a request for additional information to enable the Department to reach a decision to grant the license, then the Department shall include a brief explanation of the basis of or reason for the notice or request.
- B. If a license applicant receives a notice from the Department that the application is lacking application components, is substantively deficient, or is otherwise deficient, or receives from the Department a request for additional information, the applicant, in lieu of submitting some or all of the components or information identified by the Department, may submit to the Department a written notice of intent to rely on the application components as submitted. The applicant shall submit the notice of intent to rely on the application components as submitted within the time specified in the Department’s notice of deficiencies or request for additional information. If the Department’s notice of deficiencies or request for additional information does not specify a time, then the applicant shall submit the notice of intent to rely on the application components as submitted within 60 days after the mailing date of the Department’s notice of deficiencies or request for additional information.
- C. A notice of intent to rely on the application components as submitted shall include the following:
  1. Name of the applicant.
  2. License application number or other identification.
  3. Date of the Department notice or request in question.
  4. Identification of the application component or components objected to with reasons for the objection or objections.
  5. A statement that the applicant intends to rely on the application components as submitted as the basis upon which the Department may determine whether to grant or deny the license.
- D. A license applicant may submit additional license application components or other information at the same time the applicant submits a notice of intent to rely on the application components as submitted.
- E. The Department, after receiving a notice of intent to rely on the license application components as submitted, shall do one of the following:
  1. Rescind its request for the application component or components objected to in the notice.
  2. Modify its request for the application component or components objected to in the notice.
  3. Grant the license unconditionally, meaning that the Department did not add conditions not requested by the applicant.
  4. Grant the license with conditions, meaning that the Department added conditions not requested by the applicant.
  5. Deny the license.
- F. To the extent that a licensing provision of the Arizona Revised Statutes requires different treatment of licensing notifications

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

of application deficiencies or licensing requests for additional information, this Section does not apply.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-206. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-207. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed; new Section adopted by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 1575, effective April 28, 2017 (Supp. 17-2).

**R18-1-208. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-209. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-210. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-211. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-212. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-213. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-214. Reserved****R18-1-215. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-216. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-217. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-218. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**R18-1-219. Repealed****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section repealed by final rulemaking at 5 A.A.R. 2854, effective July 30, 1999 (Supp. 99-3).

**ARTICLE 3. PUBLIC PARTICIPATION IN RULEMAKING****R18-1-301. Agency Record**

The official rulemaking record is located in the Department and may be reviewed any working day, Monday through Friday, from 8:00 a.m. until 5:00 p.m., except state holidays.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**R18-1-302. Petition for Rule Adoption, Amendment or Repeal**

- A.** Any person requesting that the Department adopt, amend, or repeal a rule, pursuant to A.R.S. § 41-1033, shall submit a petition as prescribed in this Section before such request may be considered by the Department.
- B.** Each petition shall contain:
1. The name and current address of the person submitting the petition.
  2. If the request is for adoption of a new rule, a statement of that fact, followed by the specific language of the proposed rule.
  3. If the request is for amendment of a current rule, a statement of that fact, followed by the A.A.C. number and title of the rule being proposed for amendment. This shall be followed by the specific language of the current rule; any language to be deleted shall be struck out but clearly readable, and any language to be added by the proposed amendment shall be underlined.
  4. If the request is for repeal of a current rule, a statement of this fact, followed by the A.A.C. number and title of the rule being proposed for repeal.
  5. The signature of the person submitting the petition.
  6. The reason the rule should be adopted, amended or repealed.
- C.** The petition may contain any information to support subsection (B)(6) of this Section, including:

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

1. Any statistical data or other justification, with clear reference to any exhibits which may be attached to the petition;
  2. An identification of what persons or segment of the public the petitioner believes would be affected and how they would be affected;
  3. If the petitioner is a public agency, the petition may also contain a summary of issues raised in any public hearing which may be relevant, or any written comments offered by the public;
  4. The identification of any statute which the petitioner believes gives the Department the authority to adopt, amend, or repeal the rule.
- D.** Within 60 calendar days of the receipt by the Director of a complete petition, the Department shall act in accordance with A.R.S. § 41-1033 as follows:
1. If the petition results in the initiation of a rulemaking, the procedures for rulemaking, set forth in Title 41, Chapter 6, Article 3, Arizona Revised Statutes, shall be followed.
  2. If the petition is denied, a written notice stating the basis of denial shall be issued by the Director to the person filing the petition.
  3. The original petition and a copy of any notice of denial shall be placed in the official record and remain there for five years to be considered in the course of the Department's five-year rule review process.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**R18-1-303. Written Comments During Rulemaking**

- A.** Any member of the public may comment upon a rule proposed by the Department by submitting written comments on the proposed rule to the Director.
- B.** Any document is considered to have been submitted on the date it is received by the Department. If a document is mailed, this date shall be the date on the postmark.
- C.** All written comments received during the period specified by A.R.S. § 41-1023(A) shall be considered by the Department.
- D.** All original written comments on proposed rules shall be placed in the official record.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**R18-1-304. Oral Proceedings**

- A.** Requests for oral proceedings, as prescribed in A.R.S. § 41-1023, shall:
  1. Be filed with the Director;
  2. Include the name and current address of the person making the request;
  3. Refer to the proposed rule and include the date and issue of the Arizona Administrative Register in which the notice was published, if known.
- B.** The oral proceeding shall be recorded either by an electronic recording device or stenographically, and any resulting cassette tapes or transcripts, registers and all written comments received shall become part of the official record.
- C.** The procedures the presiding officer shall use to conduct oral proceedings shall include:
  1. Voluntary registration of attendees. Identification shall not be required, however, in order for a person to attend an oral proceeding.
  2. Registration of persons intending to speak. Registration information shall include the registrant's name, representa-

tative capacity, if applicable, and a brief summary of intended oral remarks.

3. Opening of the record. Opening remarks by the presiding officer shall summarize the rulemaking activities to date and the importance and purpose of public comments, and present the agenda.
  4. A statement by Department representatives. The statement shall explain the contents, purpose and intended operation of the proposed rulemaking, including the economic impact and any adverse impact on small businesses.
  5. A public oral comment period. Public oral comments may be limited to a reasonable time period, as determined by the presiding officer. Comments may be limited to prevent undue repetition.
  6. Further presentations. The Department may present additional information during an oral proceeding, after public comments are received. Any person shall have the opportunity to respond to this presentation during the proceeding.
  7. Closing remarks. The presiding officer shall identify relevant, future rulemaking dates and shall announce the location where the record may be reviewed and the date and time of close of record.
- D.** Within 10 working days of close of the record of an oral proceeding, or a longer period if approved by the Director, the presiding officer shall file a written memorandum summarizing the contents of all oral presentations made during the proceeding, and shall transmit any original cassette tapes and written submissions to the Director.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**R18-1-305. Expired****Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3). Section expired under A.R.S. § 41-1056(E) at 8 A.A.R. 5018, effective August 31, 2002 (Supp. 02-4).

**R18-1-306. Written Criticism of Rule**

- A.** Any person may file a written criticism of an effective rule with the Director.
- B.** The criticism shall clearly identify the rule addressed, and specify why the existing rule is inadequate, unduly burdensome, unreasonable or otherwise considered to be improper.
- C.** The Director shall acknowledge receipt of any criticism within 10 working days and shall place the criticism in the official record, for review by the Department, pursuant to A.R.S. § 41-1054.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**ARTICLE 4. PUBLIC NOTICE AND GENERAL PUBLIC HEARINGS****R18-1-401. Notice**

- A.** When notice is required by statute or rule, and notice procedures are not otherwise prescribed by statute or rule, the Department shall:
  1. Publish the notice as a legal notice at least once, in one or more newspapers of general circulation in the county or counties concerned;
  2. Include in the notice the following information:
    - a. The major issue under consideration or a description of the reason for the action;

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

- b. The Department's proposed action and effective date for that action;
  - c. The location where relevant, nonconfidential documents may be obtained and reviewed during normal business hours;
  - d. The name, address and telephone number of a person within the Department who may be contacted for further information;
  - e. The location where public comments may be addressed, and the date and time by which comments shall be received.
- B.** In addition to meeting the requirements in subsection (A), a notice for a general public hearing shall include the following information:
- 1. The time and location of the general public hearing;
  - 2. A statement to the effect that any person may appear at the hearing and present views, either orally or in writing;
  - 3. The time by which a decision shall be reached;
  - 4. The exact nature of the action or issues to be discussed.
- C.** The notice for a general public hearing described in this Section shall be published at least 30 days prior to the date of the hearing unless otherwise prescribed by statute or rule.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**R18-1-402. General Public Hearing Procedures**

- A.** If a general public hearing is required by statute or by rule, the hearing shall be noticed as required in R18-1-401.
- B.** The Department shall maximize the opportunity for public participation at a general public hearing and shall consider all of the following when scheduling the general public hearing:
- 1. A location in or near the geographical area of the issue addressed in the hearing, and easily accessible to a majority of the affected public;
  - 2. A time which can facilitate public attendance;
  - 3. Other hearings concerning the public, in the same geographical area, which may be scheduled for the same time and location.
- C.** The Department may schedule persons wishing to speak, and Department personnel knowledgeable about the issue shall be present to provide information.
- D.** A general public hearing shall be conducted so as to do both of the following:
- 1. Inform the public of the exact nature of the action or issue, and
  - 2. Allow time for persons to make statements and submit written comments.
- E.** The person presiding at a general public hearing shall maintain order and may allot equitable time periods for oral comment by participants.
- F.** A general public hearing shall be recorded by means of an electronic device or stenographically.
- G.** The record of a general public hearing shall be maintained by the Department and made available for public inspection, during normal business hours, at the location specified in the public notice. The record of the hearing shall include the agenda, written comments submitted before the close of record, and the tape or transcript of the hearing.

**Historical Note**

Adopted effective July 7, 1988 (Supp. 88-3).

**ARTICLE 5. LICENSING TIME-FRAMES****R18-1-501. Definitions**

In addition to the definitions provided in A.R.S. § 41-1001, § 41-1072, and R18-1-101, the following definitions apply to this Article:

1. "Administrative completeness" or "administratively complete" means Department receipt of all application components required by statute or rule and necessary to enable the Department to issue a notice of administrative completeness under A.R.S. § 41-1074 and thereby end the administrative completeness review time-frame and start the substantive review time-frame.
2. "Administrative completeness review" means the process of clerical verification by the Department to determine whether the submitted application components meet the requirements of administrative completeness.
3. "Applicant" means a person who requests the Department to issue a license.
4. "Applicant response" means a written response from the applicant to a Department notice that complies with all the following:
  - a. The response identifies the applicant.
  - b. The response identifies the Department notice.
  - c. The response is addressed to the Department employee identified in the Department notice as the designated recipient of the notice.
  - d. The response contains the required information identified in the Department notice or the response contains a notice under R18-1-520 to rely on the application components as submitted.
5. "Application" means a request to the Department to issue a license to the requestor when that request is in writing and complies with R18-1-502 and R18-1-503(A).
6. "Application clerk" means a Department employee with authority to receive applications for a specific license or an application component or applicant response.
7. "Application component" means a document, other written information, or fee required by statute or rule and submitted to the Department in support of an application.
8. "Companion category" means one of an association of two or more consecutive categories, shown on the license tables with paired license names, and containing a distinction between "standard" and "complex", between "without a public hearing" and "with a public hearing", or "without a public meeting" and "with a public meeting".
9. "Complex" means an application category that requires significantly more Department resources to review the application than applications processed in a companion standard category due to the size, novelty, complexity, or technical difficulty expressed in the application.
10. "Comprehensive request for additional information" means a Department notification made after the administrative completeness review time-frame that:
  - a. Contains a list of information required by statute or rule and necessary before the Department may grant the license; and
  - b. Suspends the running of days within the time-frames.
11. "Day" means business day and excludes Saturdays, Sundays, and state holidays.
12. "Department notification" or "Department notice" means written communication by the Department to an applicant in person or at the mailing or electronic address identified on the application. The Department may notify the applicant at the applicant's electronic address only if the appli-

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

- cant provides that address as part of an application component. The notification is effective:
- a. If mailed, on the date of its postmark.
  - b. If delivered in person by a Department employee or agent, on the date of delivery.
  - c. If delivered electronically, on the date of delivery to the electronic address.
13. "Department receipt" of an application component or an applicant response means one of the following days:
    - a. If the component or response is handed to an application clerk by the applicant, the day of actual receipt by the application clerk.
    - b. If the component or response is mailed, five days after the postmark identifying the mailing date.
    - c. If the component or response is delivered to an electronic address of an application clerk, one day after the date of delivery to the electronic address.
    - d. If the Department notifies the applicant of receipt within five days after the date of actual receipt, the day of actual receipt of the component or response by the application clerk.
    - e. If delivered during an application moratorium or time-frame suspension declared under R18-1-518, the day after the moratorium or suspension ends.
  14. "Electronic address" means either a telephone number for facsimile document communication (fax) or an electronic mail (e-mail) address. "Electronic address" does not mean a telephone number for voice or TDD (telephone device for the deaf) communication.
  15. "Fee excusal" means the sanction imposed on a Department fund under A.R.S. § 41-1077(A) that requires the Department to excuse further fees required from the applicant by the Department.
  16. "Initial fee" means that part of the fee required to be submitted under R18-1-503(A).
  17. "License category" means a category identified on a license table.
  18. "License table" means a table within this Article.
  19. "Licensing time-frame" means any of the time-frames identified in A.R.S. §§ 41-1072 through 41-1079, the operation of which requires the Department to report its compliance level for overall time-frames to the Governor's Regulatory Review Council under A.R.S. § 41-1078(A).
  20. "Licensing time-frame agreement" means an agreement made under any of the Sections R18-1-508 through R18-1-512.
  21. "Penalty" means the sanction imposed on a Department fund under A.R.S. § 41-1077(B).
  22. "Phased application" means an application processed pursuant to a licensing time-frame agreement that allows the applicant to submit application components in two or more phases with each phase providing for administrative completeness review.
  23. "Pre-application" means the period prior to Department receipt of an applicant's first application component submittal under R18-1-503(A).
  24. "Presumptive administrative completeness" means the expiration of the administrative completeness review time-frame and the automatic start of the running of days within the substantive review time-frame under A.R.S. § 41-1074(C) as a result of the Department failing to issue a notice of administrative completeness under A.R.S. § 41-1074(A).
  25. "Presumptive overall time-frame" means the sum of the days shown for the administrative completeness review and substantive review time-frames on the license tables for that license category and may be different from the actual overall time-frame because the presumptive overall time-frame does not include a lengthening of the time-frame due to a time-frame extension agreement or a shortening of the time-frame due to early starting of the substantive review time-frame caused by the issuance of a notice of administrative completeness.
  26. "Presumptive substantive review time-frame" means the days shown for the substantive review time-frame on the license tables for a license category.
  27. "Refund" means the sanction imposed on a Department fund under A.R.S. § 41-1077(A) that requires the Department to refund fees already paid by the applicant into that fund.
  28. "Request for additional information" means a Department notification or contact made after the administrative completeness review time-frame and that identifies information required by statute or rule and necessary before the Department may grant the license.
  29. "Sanction" means a refund, fee excusal, or penalty under A.R.S. § 41-1077.
  30. "Site inspection" means an inspection performed by the Department under A.R.S. § 41-1009 as part of a required component of an application for a license shown on the license tables.
  31. "Substantive review" means the process of qualitative evaluation by the Department of application components to determine whether the components meet all requirements in statute or rule and necessary to grant the license. "Substantive review" does not include clerical verification of the components nor does it include Department investigations resulting from reporting or notification requirements.
  32. "Time-frame extension" means the entire period after the overall time-frame would otherwise expire and during which an application is not subject to sanctions. The substantive review and overall time-frames continue in effect and do not expire during the time-frame extension.
  33. "Withdrawn application" means an application that has ceased to be subject to this Article due to the applicant's request that the Department cease all consideration of the application under R18-1-517. An applicant's ability to withdraw an application is not governed by this Article.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).

**R18-1-502. Applicability; Effective Date**

- A. This Article does not apply to any of the following:
1. A license not requiring an application.
  2. A license conferred by a notification to the Department of an event, activity, or facility and that is not conferred by the Department in the form of a written license issued to the prospective licensee in response to the notification.
  3. A license issued at the Department's initiative.
  4. A license issued by default if the Department does not make a licensing decision within a time identified in statute or rule.

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

5. A license not identified in a category shown on the license tables.
  6. A license required under an abatement or compliance order or consent agreement, if a time-frame in the order or consent agreement is different than the time-frame for the license category. The time-frame in the order or consent agreement shall supersede the time-frame for the license category.
  7. An application for which the applicant is not the prospective licensee.
  8. Compliance activity by licensees in conformance with an issued license except for license renewal or revision activity.
  9. Contractual activity under A.R.S. § 41-1005(A)(15).
  10. Activity that leads to the revocation, suspension, annulment, or withdrawal of a license.
- B.** If an application becomes subject to this Article, it remains subject to the terms of the original license category in which it was classified unless the application is withdrawn, is altered by a licensing time-frames agreement, or is changed under R18-1-516. If altered by a licensing time-frames agreement, the terms of the original license category are modified only to the extent expressly stated in the licensing time-frames agreement.
- C.** If an Arizona statute or other rule in this Title conflicts with this Article, the statute or other rule governs except that only this Article determines whether an applicant is entitled to a refund and fee excusal due to Department failure to notify an applicant of a licensing decision within a licensing time-frame under A.R.S. § 41-1077(A).
- Historical Note**  
New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).
- R18-1-503. Administrative Completeness Review Time-frame Operation; Administrative Completeness**
- A.** The administrative completeness review time-frame for an application begins on the day of Department receipt of the first component submittal in support of the application that contains all the following:
1. Identification of the applicant.
  2. If the license is for a facility, identification of the facility.
  3. Name and mailing address of the applicant and, if applicable, the applicant's agent authorized by the applicant to receive all notices issued by the Department under this Article.
  4. Identification of the license category in which the application shall be first processed. If companion categories are shown on a license table for this license, the application shall be first processed in the companion category that is determined as follows:
    - a. If "standard" and "complex" categories are shown, in the "standard" category.
    - b. If "without a public hearing" and "with a public hearing" are shown, in the "without a public hearing" category.
    - c. If "without a public meeting" and "with a public meeting" are shown, in the "without a public meeting" category.
  5. Completed Department application form if required for the license category.
  6. Initial fee if required for the license category.
7. All application components required by statute or rule necessary for the Department to determine whether an application is administratively complete.
- B.** The administrative completeness review time-frame for an application ends on the earlier of the following days:
1. The day the Department notifies the applicant that the application is administratively complete under A.R.S. § 41-1074.
  2. If the Department does not notify the applicant that the application is administratively complete under A.R.S. § 41-1074, the last day shown for the administrative completeness review time-frame for the relevant license category on the license tables.
- C.** If a notice of administrative deficiencies states that the Department is suspending the running of days within the time-frames until the applicant supplies the missing information identified on a comprehensive list of specific deficiencies included with the notice, the running of days within the administrative completeness review time-frame suspends on the day of notification.
- D.** If suspended, the running of days within the administrative completeness review time-frame remains suspended from the time of the first notice under subsection (C) of this Section until the applicant supplies the Department all missing information identified on the comprehensive list of specific deficiencies.
- E.** If the Department determines that an applicant has submitted all application components required by statute or rule within the administrative completeness review time-frame and necessary to allow the Department to grant the license, the Department shall notify the applicant that the application is administratively complete under A.R.S. § 41-1074.
- F.** If presumptive administrative completeness occurs:
1. Further notices of administrative deficiencies issued under subsection (C) of this Section will not suspend the running of days within the substantive review or overall time-frames and
  2. The Department does not waive the requirement for the applicant to submit all application components necessary to allow the Department to grant the license.
- G.** The running of days within the administrative completeness review time-frame also suspends and resumes under R18-1-518 (emergencies).
- Historical Note**  
New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).
- R18-1-504. Substantive Review Time-frame Operation; Requests for Additional Information**
- A.** The substantive review time-frame for an application begins on one of the following days:
1. If the Department notifies the applicant that the application is administratively complete before the expiration of the administrative completeness review time-frame, one day after notification.
  2. If the Department does not notify the applicant that the application is administratively complete before the expiration of the administrative completeness review time-frame, one day after expiration.
- B.** The substantive review time-frame for an application ends on the earlier of the following days:

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

1. The day of Department notification that it has made a licensing decision under A.R.S. § 41-1076 and R18-1-507.
  2. The last day shown for the substantive review time-frame for the license category on the license tables.
- C.** If the Department notifies the applicant to respond to a comprehensive request for additional information, the running of days within the substantive review time-frame is suspended beginning on the day of Department notification. The Department may issue only one comprehensive request that suspends the running of days within the substantive review time-frame under A.R.S. § 41-1075(A).
- D.** The running of days within the substantive review time-frame remains suspended from the time of the notice under subsection (C) until the applicant supplies all missing information to the Department.
- E.** The running of days within the substantive review time-frame also suspends and resumes under R18-1-518 (emergencies).

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).

**R18-1-505. Overall Time-frame Operation**

- A.** The overall time-frame for an application begins on the same day as the administrative completeness review time-frame.
- B.** The running of days within the overall time-frame suspends and resumes in concert with the administrative completeness and substantive review time-frames and time-frame extensions.
- C.** The duration of the overall time-frame equals the sum of all the following days unless altered by R18-1-508 (licensing time-frames pre-application agreements) or R18-1-511 (changed licensing time-frames agreements):
1. The lesser of:
    - a. The number of days shown for the administrative completeness review time-frame on the license tables, or
    - b. The actual number of days for the administrative completeness review time-frame if the Department notifies the applicant under R18-1-503(E) that the application is administratively complete before the expiration of the administrative completeness review time-frame;
  2. The lesser of:
    - a. The number of days shown for the substantive review time-frame on the license tables,
    - b. The actual number of days for the substantive review time-frame if the Department notifies the applicant of a licensing decision under R18-1-504(B)(1), or
    - c. The actual number of days for the substantive review time-frame if the applicant causes the time-frames to end under R18-1-507(D); and
  3. The number of days added by one or more licensing time-frames extension agreements under R18-1-510.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).

**R18-1-506. Time-frame Extension Operation**

- A.** If created by a licensing time-frames extension agreement under R18-1-510, the time-frame extension for an application begins one day after the substantive review and overall time-frames would otherwise expire and operates as if they were still in operation.
- B.** The time-frame extension for an application ends on one of the following days, whichever is earlier:
  1. The day of Department notification that it has made a licensing decision under A.R.S. § 41-1076 and R18-1-507.
  2. The day shown for the expiration of the time-frame extension identified in the time-frame extension agreement.
- C.** The Department may notify an applicant to respond to one comprehensive request for additional information during the time-frame extension on the same terms as prescribed in R18-1-504 except that the Department shall not make more than one comprehensive request for additional information under both R18-1-504 and this Section.
- D.** An applicant and the Department may enter into one or more licensing time-frames supplemental request agreements during the time-frame extension on the same terms as prescribed in R18-1-509.
- E.** The running of days within the time-frame extension also suspends and resumes under R18-1-518 (emergencies).

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-507. Ending of Time-frames; Licensing Decisions; Withdrawal; Notice of Licensing Time-frames Nonapplicability**

- A.** Department notification of the grant or denial of a license ends the running of all licensing time-frames for an application.
- B.** The Department may deny a license if the applicant submits incomplete or inaccurate information in response to a notice of administrative deficiencies under R18-1-503, a request for additional information or a comprehensive request for additional information under R18-1-504, a supplemental request for additional information under R18-1-509, or any other deficiency in the application that prevents the Department from exercising its authority to grant the license.
- C.** The Department may deny a license if the applicant fails to respond in a reasonably timely manner to a notice of administrative deficiencies under R18-1-503, a request for additional information or a comprehensive request for additional information under R18-1-504, or a supplemental request for additional information under R18-1-509, and the deficiency in the application prevents the Department from exercising its authority to grant the license. In determining whether an applicant has failed to respond to a notice or request in a reasonably timely manner and the deficiency in the application prevents the Department from exercising its authority to grant the license, the Department shall consider the following factors:
  1. The nature of the information requested.
  2. The time that an applicant has been given in the notice or request to respond relative to the overall time-frame for that category of license.
  3. The extent to which the Department's ability to process applications for that license category or related license categories is adversely affected by overdue responses for information.
- D.** Department notice of the denial of a license shall include all the following:
  1. A justification for the denial under A.R.S. § 41-1076(1).

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

2. An explanation of the applicant's right to appeal the action under A.R.S. §§ 41-1076(2) and 41-1092.03(A).
3. An explanation of the applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.
- E.** The following actions by the applicant are sufficient to end all time-frames for an application:
1. Withdrawing the application under R18-1-517.
  2. Entering into a changed licensing time-frames agreement under R18-1-511.
- F.** If the Department determines during its review of an application that the application is not subject to this Article, the Department shall notify the applicant that the application is not subject to this Article. The Department notification shall contain the Department's reason for making the determination. Department notification under this subsection causes all time-frames for the application to end.
- Historical Note**  
New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).
- R18-1-508. Licensing Time-frames Pre-application Agreements**
- A.** An applicant and the Department may enter into a licensing time-frames pre-application agreement to allow the applicant to do one or more of the following:
1. Submit certain application components in one or more phases during the substantive review time-frame.
  2. Coordinate the licensing time-frames requirements of this Article with expedited application review by a private consultant under contract with the Department for that purpose.
  3. Coordinate the licensing time-frames requirements of this Article with an applicant's requirements to apply for and obtain other approvals reasonably related to the subject matter of the application.
- B.** A licensing time-frames pre-application agreement shall contain at least the following terms:
1. Unless otherwise specified in the agreement, all requirements of this Article remain in effect.
  2. A waiver under A.R.S. § 41-1004 by the applicant of its rights to the number of time-frame days identified on the license tables in consideration of the Department allowing the applicant to enter into a licensing time-frames pre-application agreement.
  3. Identification of application components.
  4. The number of days for the administrative completeness review time-frame and the substantive review time-frame. Time spent in pre-application review shall not count toward the running of days within the time-frames.
  5. A fee adjustment, if appropriate.
  6. Identification of the license category within which the Department shall begin processing the application.
- C.** A licensing time-frames pre-application agreement that allows the applicant to submit certain application components in one or more phases during the substantive review time-frame shall contain at least the terms identified in subsection (B) of this Section and the following terms:
1. The overall time-frame shall not be less than the presumptive overall time-frame identified in subsection (B)(6) of this Section.
  2. The administrative completeness review time-frame shown for the license category identified in subsection (B)(6) of this Section shall apply only to the first application phase.
  3. The applicant may submit components otherwise required for administrative completeness in subsequent phases during the substantive review time-frame only to the extent that the agreement specifies deadlines for each subsequent application phase and identifies the application components required in each subsequent phase. The Department may notify the applicant to respond to a notice of administrative deficiencies within 15 days after each subsequent submittal or the deadline identified in the agreement for each subsequent phased application component submittal.
  4. The Department may suspend the running of days within the time-frames once in each application phase with a comprehensive request for additional information on the same terms as prescribed under R18-1-504.
- D.** The Department shall consider all the following factors when determining whether to enter into a licensing time-frames pre-application agreement:
1. The complexity of the licensing subject matter. The Department shall not enter into an agreement if the presumptive substantive review time-frame is less than 90 days.
  2. The resources of the Department. The Department shall not enter into an agreement if the Department determines that either the negotiation of the agreement or the terms of the agreement are likely to require the Department to expend additional resources to the significant detriment of other applicants.
  3. The impact on public health and safety or the environment. The Department shall not enter into an agreement if the Department determines that the terms of the agreement are likely to cause a significant increase or change in the nature of the potential detrimental effects of the facility or activity to be governed by the license on public health and safety or the environment.
- Historical Note**  
New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).
- R18-1-509. Licensing Time-frames Supplemental Request Agreements**
- A.** An applicant and the Department may enter into one or more licensing time-frames supplemental request agreements to allow the suspension of the running of days within the relevant substantive review and overall time-frames and time-frame extensions pending a response from the applicant to a supplemental request for additional information under A.R.S. § 41-1075(A). A request for additional time alone is not a valid justification for a supplemental request agreement.
- B.** A licensing time-frames supplemental request agreement shall contain at least the following terms:
1. Unless otherwise specified in the agreement, all requirements of this Article remain in effect.
  2. A list of the additional information requested.
  3. The running of days within the relevant substantive review and overall time-frames and time-frame extensions shall suspend and resume under Sections R18-1-504 through R18-1-506.

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-510. Licensing Time-frames Extension Agreements**

- A. An applicant and the Department may enter into one or more time-frames extension agreements to extend the substantive review and overall time-frames under A.R.S. § 41-1075(B).
- B. The total of all time-frames extension agreements may extend the time-frames no more than 25% of the number of days beyond the presumptive overall time-frame or, if identified as a fixed number in an R18-1-508 pre-application agreement, the presumptive overall time-frame in that agreement. A calculation that results in a fraction of a day shall be rounded to the nearest day.
- C. A time-frames extension agreement shall contain at least the following terms:
  1. Unless specified otherwise in the agreement, all requirements of this Article remain in effect.
  2. The number of time-frame extension days.
  3. The agreement creates a time-frame extension that operates under R18-1-506.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-511. Licensing Time-frames Changed Application Agreements**

- A. An applicant and the Department may enter into a licensing time-frames agreement to allow the applicant to change information previously submitted in support of a license application and to supersede the time-frames of that application with new time-frames. A changed licensing time-frames agreement causes all time-frames on the application to end under R18-1-507(D) and creates a new set of time-frames that operates under the agreement.
- B. A changed licensing time-frames agreement shall contain at least the following terms:
  1. Unless specified otherwise in the agreement, all requirements of this Article remain in effect.
  2. A waiver under A.R.S. § 41-1004 by the applicant of its rights to the number of time-frame days identified on the license tables in consideration of the Department allowing the applicant to change the information submitted in support of a changed application.
  3. Identification of application components required in support of the changed application.
  4. The number of time-frame days applicable to the changed application.
  5. A fee adjustment, if appropriate.
  6. Identification of the license category within which the Department shall continue processing the changed application.
- C. The Department shall consider all the following factors when determining whether to enter into a changed licensing time-frames agreement:
  1. The complexity of the licensing subject matter. The Department shall not enter into an agreement if the presumptive substantive review time-frame is less than 30 days.
  2. The resources of the Department. The Department shall not enter into an agreement if the Department determines that either the negotiation of the agreement or the terms of the agreement are likely to require the Department to

expend additional resources to the significant detriment of other applicants.

3. The impact on public health and safety or the environment. The Department shall not enter into an agreement if the Department determines that the terms of the agreement are likely to cause a significant increase or change in the nature of the potential detrimental effects of the facility or activity to be governed by the license on public health and safety or the environment.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-512. Reserved****R18-1-513. Repealed****Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3). Section repealed by final rulemaking at 13 A.A.R. 1854, effective June 30, 2007 (Supp. 07-2).

**R18-1-514. Reserved****R18-1-515. Reserved****R18-1-516. Reassignment of License Category**

- A. The Department may reassign an application to a different category if an evaluation of the application components indicates that a change is necessary in the category in which the application is classified. The Department shall notify the applicant of the change in the license category at which time the reassignment shall take effect. The Department notice shall contain the Department's reason for making the reassignment to a different license category. After receiving Department notification, the applicant may submit an R18-1-521 notice of intent to rely on the license category in effect before Department notification.
- B. If a public hearing or public meeting is requested for an application for a license that requires the Department to hold a public hearing or public meeting on a proposed licensing decision if requested, the Department shall reassign the application from a license category not providing for a public hearing or public meeting to the companion category so providing.
- C. Reassignment may include a change from a standard to a companion complex category if such categories are shown on the license tables.
- D. Reassignment to a new license category under this Section means only that the time-frames for the application expire on the days shown for the new license category rather than the previous category.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-517. Application Withdrawal**

Withdrawal of an application causes all time-frames for that application to end.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-518. Emergencies and Upset Conditions**

- A. The Director may declare a moratorium on the starting of time-frames for new applications or may declare a suspension

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

of all time-frames for one or more license categories identified on the license tables upon a determination that the starting of time-frames for new applications or the continued running of days within the time-frames on existing applications in that license category is likely to result in sanctions for those applications due to emergencies including:

1. Diversion of Department resources to respond to pollution prevention emergency activity,
  2. Loss of use of premises,
  3. Computer failure, or
  4. Lack of access to a site inspection location due to weather or other natural conditions.
- B.** A declaration of a time-frame moratorium or suspension under subsection (A) of this Section shall be in writing and shall include all the following:
1. The reason for the time-frame moratorium or suspension.
  2. Identification of the license categories subject to the time-frame moratorium or suspension.
  3. If relevant, restriction of the declaration to one or more application review or site inspection locations.
  4. Expiration of the time-frame moratorium or suspension by a date certain.
- C.** The Director may revoke declarations or issue successive declarations. The Director shall ensure that the duration of a time-frame moratorium or suspension under subsection (A) of the Section is limited to the shortest time necessary to address the emergency.
- D.** A declaration of a time-frame moratorium or suspension under subsection (A) of this Section affects only the operation of the time-frames and does not prohibit the Department from acceptance or continued review of license applications.
- E.** A declaration of a time-frame moratorium or suspension under subsection (A) of this Section applies only to applications and license categories that are subject to sanctions

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-519. Public Hearings; Public Meetings; Public Notice Periods**

The suspension or expiration of the substantive review time-frame does not invalidate public hearings, public meetings, or public notice periods required by law to occur before a decision by the Department to grant a license.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-520. Notice of Intent to Rely on the Application Components as Submitted**

- A.** An applicant, instead of submitting some or all of the application components identified by the Department, may submit an R18-1-205 notice of intent to rely on the application components as submitted in response to either of the following:
1. Receiving a notice of administrative deficiencies issued by the Department during the administrative completeness review time-frame.
  2. Receiving a comprehensive request for additional information or a supplemental request for additional information issued by the Department after the administrative completeness review time-frame.
- B.** If the Department decides under R18-1-205 to rescind or modify the identification of the application component or components objected to by the applicant, the Department shall make

the decision within 15 days after Department receipt of the applicant's R18-1-205 notice. If, at the time of the decision, the running of days within the time-frames is suspended:

1. A decision to rescind the identification of all application components identified in the notice shall resume the running of days within the time-frames.
  2. A decision to rescind less than all or to modify the identification of one or more application components identified in the notice, shall allow the running of days within the time-frames to remain suspended in accordance with the Department notice identified in subsections (A)(1) or (A)(2) of this Section.
- C.** If, within 15 days after Department receipt of the applicant's R18-1-205 notice, the Department has not notified the applicant of a decision to rescind or modify the identification of the application component or components complained of in the notice, the running of days within the time-frames, if suspended, shall resume.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-521. Notice of Intent to Rely on the License Category**

- A.** Upon Department notification that the Department has changed the license category under R18-1-516, an applicant may submit a notice of intent to rely on the license category in effect before the Department notification.
- B.** The applicant's notice under subsection (A) of this Section shall include all of the following:
1. Identification of the applicant.
  2. Identification of the license application.
  3. Identification of the date of the Department notice.
  4. A statement that the applicant intends to rely on the license category in effect before Department notification of the R18-1-516 license category change as the basis upon which the Department shall make a licensing decision.
- C.** Upon receipt of an applicant's notice under subsection (A) of this Section, the Department shall do one of the following:
1. Rescind the change under subsection (D) of this Section.
  2. Make a licensing decision under R18-1-507(A) and process the decision in the changed category identified under R18-1-516.
  3. Allow the license category to revert under subsection (E) of this Section.
- D.** If the Department decides to rescind the change in the license category, the Department shall notify the applicant of the decision within 15 days after Department receipt of the applicant's notice under subsection (A) of this Section and shall continue to process the application in the license category on which the applicant is relying.
- E.** If, within 15 days after Department receipt of the applicant's notice under subsection (A) of this Section, the Department has not notified the applicant of a decision under subsection (C) of this Section, the license category shall revert to the category in effect before the R18-1-516 Department notification with the same effect on the time-frames as described in subsection (D) of this Section.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-522. Notice of Change of Applicant's Agent for Receiving Licensing Time-frames Notices**

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

- A. An applicant may change the designation of its agent identified under R18-1-503(A)(3) for receiving Department licensing time-frames notification.
- B. To change the designation of the agent, the applicant shall submit a notice that complies with all the following to the application clerk:
  1. Identification of the applicant.
  2. Identification of the application.
  3. Name and mailing address of the current agent authorized to receive all notices issued by the Department under this Article.
  4. Name and mailing address of the new agent authorized to receive all notices issued by the Department under this Article.
  5. Date when the applicant's authorization of the new agent will be effective.
  6. Certification by the applicant that the information given under this subsection is true.
- C. Upon Department receipt of the applicant's notice under subsection (B) of this Section, the Department shall notify the applicant of the date of receipt. The effective date of the change of applicant's agent shall not be less than three days after Department receipt of the notice.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-523. Refunds, Fee Excusals, and Penalties**

- A. An application is subject to sanctions under A.R.S. § 41-1077 only if the application is governed by this Article and requires a fee that is deposited in a Department fund. In addition, an application is subject to penalties under A.R.S. § 41-1077(B) only if it is subject to a substantive review time-frame as indicated on the license tables. An application withdrawn before the expiration of the overall time-frame is not subject to sanctions.
- B. The Department shall make a refund and fee excusal to an applicant for an application if the Department determines both of the following:
  1. The overall time-frame for that application expired prior to Department notification of a licensing decision under R18-1-507(A).
  2. The applicant is the prospective licensee of the application.
- C. The Department shall issue a refund and make a fee excusal within 15 days after the Department makes a determination that a refund and fee excusal is due.
- D. A refund and fee excusal is limited to the specific application giving rise to the refund and fee excusal and does not include a refund or payment excusal for services requested by the applicant beyond the scope of the application. A refund is limited to the amount actually received from the applicant by the Department for the review of the specific application giving rise to the refund and does not include interest.
- E. The Department shall pay to the state general fund a penalty for an application if the Department determines both of the following:

1. The overall time-frame for that application expired prior to Department notification of a licensing decision under R18-1-507(A)
  2. On the last calendar day of the month, the Department still has not made a licensing decision under R18-1-507(A).
- F. If an application accumulates excused fees, the Department shall calculate the penalty each month to include both the penalty due for the current month plus any additional penalties now due for previous months resulting from the continued accumulation of excused fees during the current month.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-524. Site Inspections**

- A. If a site inspection is a required application component for a license category, an applicant complies with the requirement to submit a site inspection application component if either of the following is met:
  1. The applicant makes all necessary areas of a site available for inspection by the Department at a mutually agreed-upon time and for the period of time necessary for the Department to complete the site inspection.
  2. The Department determines that the conditions of a license are such that a site inspection will provide no additional required information in order for the Department to make a licensing decision under R18-1-507(A)(1) or R18-1-507(A)(2).
- B. If made, a site inspection shall be performed under A.R.S. § 41-1009. The purpose of a site inspection application component is to allow the Department to identify what site specific facts may be determinative of required license conditions in order to make a licensing decision under R18-1-507(A)(1) or R18-1-507(A)(2).
- C. The Department shall prepare an inspection report under A.R.S. § 41-1009(D) for every site inspection made. The inspection report shall state both of the following:
  1. The Department's action resulting from the inspection is completed.
  2. Whether the applicant complied with subsection (A)(1) of this Section.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

**R18-1-525. Licensing Time-frames; Application Components**  
The administrative completeness review time-frame days, the substantive review time-frame days, and the references to application components for each license category subject to this Article are shown on the license tables.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3343, effective August 13, 1999 (Supp. 99-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 1. DEPARTMENT OF ENVIRONMENTAL QUALITY - ADMINISTRATION

<b>Class III Well Permit and Modification</b>	A.R.S. §§ 49-203, 49-257.01	35	186	221
No public hearing	A.A.C. R18-9-C616	35	231 <sup>1</sup>	266
Public hearing	18 A.A.C. 9, Article 6, Part G			
<b>Class V Well Individual Permit and Modification</b>	A.R.S. §§ 49-203, 49-257.01	35	186	221
No public hearing	A.A.C. R18-9-C616	35	231 <sup>1</sup>	266
Public hearing	18 A.A.C. 9, Article 6, Part I			
<b>Class VI Well Permit and Modification</b>	A.R.S. §§ 49-203, 49-257.01	35	249	284
No public hearing	A.A.C. R18-9-C616	35	294 <sup>1</sup>	329
Public hearing	18 A.A.C. 9, Article 6, Part J			

<sup>1</sup> A request for a public hearing allows the Department 60 days to publish the notice of public hearing and for the official comment period. Forty-five business days are added to the substantive review time-frame.

<sup>2</sup> Each request for an alternative design, installation, or operational feature under R18-9-A312(G) to a Type 4 General Permit adds eight business days to the substantive review time-frame.

<sup>3</sup> EPA reserves the right, under 40 CFR 123.44, to take 90 days to supply specific grounds for objection to a draft or proposed permit when a general objection is filed within the review period. The first 30 days run concurrently with the Department’s official comment period. Forty-five business days will be added to the substantive review time-frame to allow for the EPA review.

<sup>4</sup> If a request for a variance is submitted to the Department, 40 CFR 124.62 requires that specific variances are subject to review by EPA. Under 40 CFR 123.44, EPA reserves the right to take 90-days to approve or deny the variance. Sixty-four business days will be added to the substantive review time-frame to allow for the EPA review.

<sup>5</sup> “Major facility” means any NPDES “facility or activity” classified as such by the EPA in conjunction with the Director.

<sup>6</sup> “Minor facility” means any facility that is not classified as a major facility.

**Historical Note**

41-1003. Required rule making

Each agency shall make rules of practice setting forth the nature and requirements of all formal procedures available to the public.

## 41-1092. Definitions

In this article, unless the context otherwise requires:

1. "Administrative law judge" means an individual or an agency head, board or commission that sits as an administrative law judge, that conducts administrative hearings in a contested case or an appealable agency action and that makes decisions regarding the contested case or appealable agency action.
2. "Administrative law judge decision" means the findings of fact, conclusions of law and recommendations or decisions issued by an administrative law judge.
3. "Adversely affected party" means:
  - (a) An individual who both:
    - (i) Provides evidence of an actual injury or economic damage that the individual has suffered or will suffer as a direct result of the action and not due to being a competitor or a general taxpayer.
    - (ii) Timely submits comments on the license application that include, with sufficient specificity, the questions of law, if applicable, that are the basis for the appeal.
  - (b) A group or association that identifies, by name and physical address in the notice of appeal, a member of the group or association who would be an adversely affected party in the individual's own right.
4. "Appealable agency action" means an action that determines the legal rights, duties or privileges of a party, including the administrative completeness of an application other than an application submitted to the department of water resources pursuant to title 45, and that is not a contested case. Appealable agency actions do not include interim orders by self-supporting regulatory boards, rules, orders, standards or statements of policy of general application issued by an administrative agency to implement, interpret or make specific the legislation enforced or administered by it or clarifications of interpretation, nor does it mean or include rules concerning the internal management of the agency that do not affect private rights or interests. For the purposes of this paragraph, administrative hearing does not include a public hearing held for the purpose of receiving public comment on a proposed agency action.
5. "Director" means the director of the office of administrative hearings.
6. "Final administrative decision" means a decision by an agency that is subject to judicial review pursuant to title 12, chapter 7, article 6.
7. "Licensee":
  - (a) Means any individual or business entity that has been issued a license by a state agency to engage in any business or activity in this state and that is subject to a licensing decision.
  - (b) Includes any individual or business entity that has applied for such a license and that appeals a licensing decision pursuant to section 41-1092.08 or 41-1092.12.
8. "Office" means the office of administrative hearings.
9. "Self-supporting regulatory board" means any one of the following:
  - (a) The Arizona state board of accountancy.
  - (b) The barbering and cosmetology board.
  - (c) The board of behavioral health examiners.

- (d) The Arizona state boxing and mixed martial arts commission.
- (e) The state board of chiropractic examiners.
- (f) The state board of dental examiners.
- (g) The state board of funeral directors and embalmers.
- (h) The Arizona game and fish commission.
- (i) The board of homeopathic and integrated medicine examiners.
- (j) The Arizona medical board.
- (k) The naturopathic physicians medical board.
- (l) The Arizona state board of nursing.
- (m) The board of examiners of nursing care institution administrators and assisted living facility managers.
- (n) The board of occupational therapy examiners.
- (o) The state board of dispensing opticians.
- (p) The state board of optometry.
- (q) The Arizona board of osteopathic examiners in medicine and surgery.
- (r) The Arizona peace officer standards and training board.
- (s) The Arizona state board of pharmacy.
- (t) The board of physical therapy.
- (u) The state board of podiatry examiners.
- (v) The state board for private postsecondary education.
- (w) The state board of psychologist examiners.
- (x) The board of respiratory care examiners.
- (y) The state board of technical registration.
- (z) The Arizona state veterinary medical examining board.
- (aa) The acupuncture board of examiners.
- (bb) The Arizona regulatory board of physician assistants.
- (cc) The board of athletic training.
- (dd) The board of massage therapy.

41-1092.01. Office of administrative hearings; director; powers and duties; fund

A. An office of administrative hearings is established.

B. The governor shall appoint the director pursuant to section 38-211. At a minimum, the director shall have the experience necessary for appointment as an administrative law judge. The director also shall possess supervisory, management and administrative skills, as well as knowledge and experience relating to administrative law.

C. The director shall:

1. Serve as the chief administrative law judge of the office.

2. Make and execute the contracts and other instruments that are necessary to perform the director's duties.

3. Subject to chapter 4, article 4 of this title, hire employees, including full-time administrative law judges, and contract for special services, including temporary administrative law judges, that are necessary to carry out this article. An administrative law judge employed or contracted by the office shall have graduated from an accredited college of law or shall have at least two years of administrative or managerial experience in the subject matter or agency section the administrative law judge is assigned to in the office.

4. Make rules that are necessary to carry out this article, including rules governing ex parte communications in contested cases.

5. Submit a report to the governor, speaker of the house of representatives and president of the senate by November 1 of each year describing the activities and accomplishments of the office. The director's annual report shall include a summary of the extent and effect of agencies' utilization of administrative law judges, court reporters and other personnel in proceedings under this article and recommendations for changes or improvements in the administrative procedure act or any agency's practice or policy with respect to the administrative procedure act. The director shall provide a copy of the report to the secretary of state.

6. Secure, compile and maintain all decisions, opinions or reports of administrative law judges issued pursuant to this article and the reference materials and supporting information that may be appropriate.

7. Develop, implement and maintain a program for the continuing training and education of administrative law judges and agencies in regard to their responsibilities under this article. The program shall require that an administrative law judge receive training in the technical and subject matter areas of the sections to which the administrative law judge is assigned.

8. Develop, implement and maintain a program of evaluation to aid the director in the evaluation of administrative law judges appointed pursuant to this article that includes comments received from the public.

9. Annually report the following to the governor, the president of the senate and the speaker of the house of representatives and provide a copy of this report to the secretary of state by December 1 for the prior fiscal year:

(a) The number of administrative law judge decisions rejected or modified by agency heads.

(b) By category, the number and disposition of motions filed pursuant to section 41-1092.07, subsection A to disqualify office administrative law judges for bias, prejudice, personal interest or lack of expertise.

(c) By agency, the number and type of violations of section 41-1009.

10. Schedule hearings pursuant to section 41-1092.05 on the request of an agency or the filing of a notice of appeal pursuant to section 41-1092.03.

D. The director shall not require legal representation to appear before an administrative law judge.

E. Except as provided in subsection F of this section, all state agencies supported by state general fund sources, unless exempted by this article, and the registrar of contractors shall use the services and personnel of the office to conduct administrative hearings. All other agencies shall contract for services and personnel of the office to conduct administrative hearings.

F. An agency head, board or commission that directly conducts an administrative hearing as an administrative law judge is not required to use the services and personnel of the office for that hearing.

G. Each state agency, and each political subdivision contracting for office services pursuant to subsection I of this section, shall make its facilities available, as necessary, for use by the office in conducting proceedings pursuant to this article.

H. The office shall employ full-time administrative law judges to conduct hearings required by this article or other laws as follows:

1. The director shall assign administrative law judges from the office to an agency, on either a temporary or a permanent basis, at supervisory or other levels, to preside over contested cases and appealable agency actions in accordance with the special expertise of the administrative law judge in the subject matter of the agency.

2. The director shall establish the subject matter and agency sections within the office that are necessary to carry out this article. Each subject matter and agency section shall provide training in the technical and subject matter areas of the section as prescribed in subsection C, paragraph 7 of this section.

I. If the office cannot furnish an office administrative law judge promptly in response to an agency request, the director may contract with qualified individuals to serve as temporary administrative law judges. These temporary administrative law judges are not employees of this state.

J. The office may provide administrative law judges on a contract basis to any governmental entity to conduct any hearing not covered by this article. The director may enter into contracts with political subdivisions of this state, and these political subdivisions may contract with the director for the purpose of providing administrative law judges and reporters for administrative proceedings or informal dispute resolution. The contract may define the scope of the administrative law judge's duties. Those duties may include the preparation of findings, conclusions, decisions or recommended decisions or a recommendation for action by the political subdivision. For these services, the director shall request payment for services directly from the political subdivision for which the services are performed, and the director may accept payment on either an advance or reimbursable basis.

K. The office shall apply monies received pursuant to subsections E and J of this section to offset its actual costs for providing personnel and services.

L. The office shall receive complaints against a county, a local government as defined in section 9-1401 or a video service provider as defined in section 9-1401 or 11-1901 and shall comply with the duties imposed on the office pursuant to title 9, chapter 13 for complaints involving local governments and title 11, chapter 14 for complaints involving counties.

41-1092.02. Appealable agency actions; application of procedural rules; exemption from article

A. This article applies to all contested cases as defined in section 41-1001 and all appealable agency actions, except contested cases with or appealable agency actions of:

1. The state department of corrections.
2. The board of executive clemency.
3. The industrial commission of Arizona.
4. The Arizona corporation commission.
5. The Arizona board of regents and institutions under its jurisdiction.
6. The state personnel board.
7. The department of juvenile corrections.
8. The department of transportation, except as provided in title 28, chapter 30, article 2.
9. The department of economic security except as provided in section 46-458.
10. The department of revenue regarding:
  - (a) Income tax or withholding tax.
  - (b) Any tax issue related to information associated with the reporting of income tax or withholding tax unless the taxpayer requests in writing that this article apply and waives confidentiality under title 42, chapter 2, article 1.
11. The board of tax appeals.
12. The state board of equalization.
13. The state board of education, but only in connection with contested cases and appealable agency actions related to either:
  - (a) Applications for issuance or renewal of a certificate and discipline of certificate holders and noncertificated persons pursuant to sections 15-203, 15-505, 15-534, 15-534.01, 15-535, 15-545 and 15-550.
  - (b) The Arizona empowerment scholarship account program pursuant to title 15, chapter 19.
14. The board of fingerprinting.
15. The department of child safety except as provided in sections 8-506.01 and 8-811.

B. Unless waived by all parties, an administrative law judge shall conduct all hearings under this article, and the procedural rules set forth in this article and rules made by the director apply.

C. Except as provided in subsection A of this section:

1. A contested case heard by the office of administrative hearings regarding taxes administered under title 42 shall be subject to section 42-1251.
2. A final decision of the office of administrative hearings regarding taxes administered under title 42 may be appealed by either party to the director of the department of revenue, or a taxpayer may file and appeal directly

to the board of tax appeals pursuant to section 42-1253.

D. Except as provided in subsections A, B, E, F and G of this section and notwithstanding any other administrative proceeding or judicial review process established in statute or administrative rule, this article applies to all appealable agency actions and to all contested cases.

E. Except for a contested case or an appealable agency action regarding unclaimed property, sections 41-1092.03, 41-1092.08 and 41-1092.09 do not apply to the department of revenue.

F. The board of appeals established by section 37-213 is exempt from:

1. The time frames for hearings and decisions provided in section 41-1092.05, subsection A, section 41-1092.08 and section 41-1092.09.

2. The requirement in section 41-1092.06, subsection A to hold an informal settlement conference at the appellant's request if the sole subject of an appeal pursuant to section 37-215 is the estimate of value reported in an appraisal of lands or improvements.

G. Auction protest procedures pursuant to title 37, chapter 2, article 4.1 are exempt from this article.

41-1092.03. Notice of appealable agency action or contested case; hearing; informal settlement conference; applicability

A. Except as provided in subsection D of this section, an agency shall serve notice of an appealable agency action or contested case pursuant to section 41-1092.04. The notice shall:

1. Identify the statute or rule that is alleged to have been violated or on which the action is based.
2. Identify with reasonable particularity the nature of any alleged violation, including, if applicable, the conduct or activity constituting the violation.
3. Include a description of the party's right to request a hearing on the appealable agency action or contested case.
4. Include a description of the party's right to request an informal settlement conference pursuant to section 41-1092.06.

B. A party may obtain a hearing on an appealable agency action or contested case by filing a notice of appeal or request for a hearing with the agency within thirty days after receiving the notice prescribed in subsection A of this section. The notice of appeal or request for a hearing may be filed by a party whose legal rights, duties or privileges were determined by the appealable agency action or contested case. A notice of appeal or request for a hearing also may be filed by a party who will be adversely affected by the appealable agency action or contested case and who exercised any right provided by law to comment on the action being appealed or contested, provided that the grounds for the notice of appeal or request for a hearing are limited to issues raised in that party's comments. The notice of appeal or request for a hearing shall identify the party, the party's address, the agency and the action being appealed or contested and shall contain at least the following:

1. A concise statement of the reasons for the appeal or request for a hearing.
2. Detailed and complete information regarding all questions of law, if applicable, that are the basis for the appeal.
3. All relevant supporting documentation.
4. How the party is an adversely affected party, if applicable.

C. The agency shall notify the office of the appeal or request for a hearing and the office shall schedule an appeal or contested case hearing pursuant to section 41-1092.05, except as provided in section 41-1092.01, subsection F.

D. If good cause is shown an agency head may accept an appeal or request for a hearing that is not filed in a timely manner.

E. This section does not apply to a contested case if the agency:

1. Initiates the contested case hearing pursuant to law other than this chapter and not in response to a request by another party.
2. Is not required by law, other than this chapter, to provide an opportunity for an administrative hearing before taking action that determines the legal rights, duties or privileges of an applicant for a license.

#### 41-1092.07. Hearings

A. A party to a contested case or appealable agency action may file a nonperemptory motion with the director to disqualify an office administrative law judge from conducting a hearing for bias, prejudice, personal interest or lack of technical expertise necessary for a hearing.

B. The parties to a contested case or appealable agency action have the right to be represented by counsel or to proceed without counsel, to submit evidence and to cross-examine witnesses.

C. The administrative law judge may issue subpoenas to compel the attendance of witnesses and the production of documents. The subpoenas shall be served and, on application to the superior court, enforced in the manner provided by law for the service and enforcement of subpoenas in civil matters. The administrative law judge may administer oaths and affirmations to witnesses.

D. All parties shall have the opportunity to respond and present evidence and argument on all relevant issues. All relevant evidence is admissible, but the administrative law judge may exclude evidence if its probative value is outweighed by the danger of unfair prejudice, by confusion of the issues or by considerations of undue delay, waste of time or needless presentation of cumulative evidence. The administrative law judge shall exercise reasonable control over the manner and order of cross-examining witnesses and presenting evidence to make the cross-examination and presentation effective for ascertaining the truth, avoiding needless consumption of time and protecting witnesses from harassment or undue embarrassment.

E. All hearings shall be recorded. The administrative law judge shall secure either a court reporter or an electronic means of producing a clear and accurate record of the proceeding at the agency's expense. Any party that requests a transcript of the proceeding shall pay the costs of the transcript to the court reporter or other transcriber.

F. Unless otherwise provided by law, the following apply:

1. A hearing may be conducted in an informal manner and without adherence to the rules of evidence required in judicial proceedings. Neither the manner of conducting the hearing nor the failure to adhere to the rules of evidence required in judicial proceedings is grounds for reversing any administrative decision or order if the evidence supporting the decision or order is substantial, reliable and probative.

2. Copies of documentary evidence may be received in the discretion of the administrative law judge. On request, the parties shall be given an opportunity to compare the copy with the original.

3. Notice may be taken of judicially cognizable facts. In addition, notice may be taken of generally recognized technical or scientific facts within the agency's specialized knowledge. The parties shall be notified either before or during the hearing or by reference in preliminary reports or otherwise of the material noticed including any staff memoranda or data and they shall be afforded an opportunity to contest the material so noticed. The agency's experience, technical competence and specialized knowledge may be used in the evaluation of the evidence. An agency-issued license that substantially complied with the applicable licensing requirements establishes a prima facie demonstration that the license meets all state and federal legal and technical requirements and the license would protect public health, welfare and the environment. An adversely affected party may rebut a prima facie demonstration by presenting clear and convincing evidence demonstrating that one or more provisions in the license violate a specifically applicable state or federal requirement. If an adversely affected party rebuts a prima facie demonstration, the applicant or licensee and the agency director may present additional evidence to support issuing the license.

4. On application of a party or the agency and for use as evidence, the administrative law judge may permit a deposition to be taken, in the manner and on the terms designated by the administrative law judge, of a witness who cannot be subpoenaed or who is unable to attend the hearing. The administrative law judge may order subpoenas for the production of documents if the party seeking the discovery demonstrates that the party has reasonable need of the materials being sought. All provisions of law compelling a person under subpoena to

testify are applicable. Fees for attendance as a witness shall be the same as for a witness in court, unless otherwise provided by law or agency rule. Notwithstanding section 12-2212, subpoenas, depositions or other discovery shall not be permitted except as provided by this paragraph or subsection C of this section.

5. Informal disposition may be made by stipulation, agreed settlement, consent order or default.

6. Findings of fact shall be based exclusively on the evidence and on matters officially noticed.

7. A final administrative decision shall include findings of fact and conclusions of law, separately stated. Findings of fact, if set forth in statutory language, shall be accompanied by a concise and explicit statement of the underlying facts supporting the findings. Conclusions of law shall specifically address the agency's authority to make the decision consistent with section 41-1030.

G. Except as otherwise provided by law:

1. At a hearing on an agency's denial of a license or permit or a denial of an application or request for modification of a license or permit, the applicant has the burden of persuasion.

2. At a hearing on an agency action to suspend, revoke, terminate or modify on its own initiative material conditions of a license or permit, the agency has the burden of persuasion.

3. At a hearing on an agency's imposition of fees or penalties or any agency compliance order, the agency has the burden of persuasion.

4. At a hearing held pursuant to chapter 23 or 24 of this title, the appellant or claimant has the burden of persuasion.

H. Subsection G of this section does not affect the law governing burden of persuasion in an agency denial of, or refusal to issue, a license renewal.

41-1092.09. Rehearing or review

A. Except as provided in subsection B of this section:

1. A party may file a motion for rehearing or review within thirty days after service of the final administrative decision.
2. The opposing party may file a response to the motion for rehearing within fifteen days after the date the motion for rehearing is filed.
3. After a hearing has been held and a final administrative decision has been entered pursuant to section 41-1092.08, a party is not required to file a motion for rehearing or review of the decision in order to exhaust the party's administrative remedies.

B. A party to an appealable agency action of or contested case with a self-supporting regulatory board shall exhaust the party's administrative remedies by filing a motion for rehearing or review within thirty days after the service of the administrative decision that is subject to rehearing or review in order to be eligible for judicial review pursuant to title 12, chapter 7, article 6. The board shall notify the parties in the administrative decision that is subject to rehearing or review that a failure to file a motion for rehearing or review within thirty days after service of the decision has the effect of prohibiting the parties from seeking judicial review of the board's decision.

C. Service is complete on personal service or five days after the date that the final administrative decision is mailed to the party's last known address.

D. Except as provided in this subsection, the agency head, executive director, board or commission shall rule on the motion within fifteen days after the response to the motion is filed or, if a response is not filed, within five days of the expiration of the response period. A self-supporting regulatory board shall rule on the motion within fifteen days after the response to the motion is filed or at the board's next meeting after the motion is received, whichever is later.

**41-1092.10. Compulsory testimony; privilege against self-incrimination**

A. A person may not refuse to attend and testify or produce evidence sought by an agency in an action, proceeding or investigation instituted by or before the agency on the ground that the testimony or evidence, documentary or otherwise, required of the person may tend to incriminate the person or subject the person to a penalty or forfeiture unless it constitutes the compelled testimony or the private papers of the person that would be privileged evidence either pursuant to the fifth amendment of the Constitution of the United States or article II, section 10, Constitution of Arizona, and the person claims the privilege before the production of the testimony or papers.

B. If a person asserts the privilege against self-incrimination and the agency seeks to compel production of the testimony or documents sought, the office or agency as provided in section 41-1092.01, subsection F may issue, with the prior written approval of the attorney general, a written order compelling the testimony or production of documents in proceedings and investigations before the office or agency as provided in section 41-1092.01, subsection F or apply to the appropriate court for such an order in other actions or proceedings.

C. Evidence produced pursuant to subsection B of this section is not admissible in evidence or usable in any manner in a criminal prosecution, except for perjury, false swearing, tampering with physical evidence or any other offense committed in connection with the appearance made pursuant to this section against the person testifying or the person producing the person's private papers.

#### 49-104. Powers and duties of the department and director

##### A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through the regulation of the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and no more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Utilize any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title, but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes shall be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department may establish by rule a fee as a condition of licensure, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. The department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, article 8 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on:

(a) The direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly

related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

(b) The availability of other funds for the duties performed.

(c) The impact of the fees on the parties subject to the fees.

(d) The fees charged for similar duties performed by the department, other agencies and the private sector.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203, except that state agencies are exempt from paying those fees that are not associated with the dredge and fill permit program established pursuant to chapter 2, article 3.2 of this title. For services provided under the dredge and fill permit program, a state agency shall pay either:

(a) The fees established by the department under the dredge and fill permit program.

(b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

**DEPARTMENT OF HEALTH SERVICES**

Title 9, Chapter 6

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

---

**MEETING DATE:** December 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** November 8, 2022

**SUBJECT:** Department of Health Services  
Title 9, Chapter 6

---

This Five-Year-Review Report from the Department of Health Services relates to rules in Title 9, Chapter 6, Article 7 regarding Required Immunizations for Child Care or School Entry.

In the last 5YRR of these rules the Department proposed to amend its rules, and completed an expedited rulemaking in 2018.

### **Proposed Action**

The Department indicates the rules are overall clear, concise, understandable, effective, and consistent with other rules and statutes, and therefore not proposing any changes to the rules.

**1. Has the agency analyzed whether the rules are authorized by statute?**

Yes, the Department cites to both general and specific statutory authority.

**2. Summary of the agency's economic impact comparison and identification of stakeholders:**

An economic, small business, and consumer impact statement (EIS) was provided in the 2002 rulemaking. The EIS estimated that the Department would incur between \$1,000 and \$10,000 in costs for promulgating and enforcing the rules, but that no other persons directly affected by the rulemaking would incur additional costs. The Department anticipated that schools and child care providers would benefit from the Department's ability to temporarily suspend or discontinue an immunization requirement, and that persons newly authorized to access immunization records, and the general public, would benefit from increased access to immunization records and from having rules that are more clear, concise, and understandable. The Department believes that the costs and benefits identified in the 2002 EIS are generally consistent with the actual costs and benefits of the rules.

The Department believes that the changes in the rules, as described above, have made the rules more effective and have enabled schools, child care providers, parents, and the general public on the immunization requirements to attend a school and/or child care. Having rules that are more easily understood, complied with, and enforced are estimated to have provided a significant benefit to the general public. On the basis of the information described above, the Department estimates that the actual costs and benefits experienced by persons affected by the rules are generally consistent with the costs and benefits considered in developing the rules.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department continues to use the rules without increased cost or burden. The Department believes that the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective, despite the minor updates to be made to the rules.

4. **Has the agency received any written criticisms of the rules over the last five years?**

No, the Department indicates they did not receive any written criticisms to the rules.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

Yes, the Department indicates the rules are clear, concise, and understandable.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

Yes, the Department indicates the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

Yes, the Department indicates the rules are effective in achieving their objectives.

**8. Has the agency analyzed the current enforcement status of the rules?**

Yes, the Department indicates the rules are enforced as written.

**9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Not applicable. There are no corresponding federal laws.

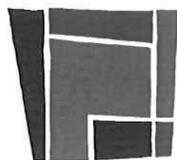

**10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rules do not require the issuance of a general permit or license.

**11. Conclusion**

The Department finds the rules to be overall clear, concise, understandable, effective, and consistent with other rules and statutes. The Department is not proposing any changes to the rules.

Council staff recommend approval of this report.

RE: ADHS, A.A.C. Title 9, Chapter 6, Article 7, Five Year Review Report

Dear Ms. Sornsin:

Please find enclosed the Five-Year Review Report from the Arizona Department of Health Services (Department) for A.A.C. Title 9, Chapter 6, Article 7 Required Immunizations for Child Care or School Entry which is due on September 30, 2022.

The Department reviewed the following rules in A.A.C. Title 9, Chapter 6, Article 7 with the intention that those rules do not expire under A.R.S. § 41-1056(J).

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this report, please contact Emily Carey at 602-542-5121 or [emily.carey@azdh.gov](mailto:emily.carey@azdh.gov).

Sincerely,

A handwritten signature in black ink, appearing to read 'Stephanie Elzenga', written over a horizontal line.

Five-Year-Review Report

Title 9. Health Services

Chapter 6. Department of Health Services – Communicable Diseases and Infestations

Article 7. Required Immunizations for Child Care or School Entry

September 2022

1. **Authorization of the rule by existing statutes:**

Authorizing statutes: A.R.S. §§ 36-136(A)(7) and 36-136(G)

Implementing statutes: A.R.S. §§ 15-872, 15-873, 15-874, 36-136(I)(1), 36-672, 36-674, and 36-883

2. **The objective of each rule:**

Rule	Objective
R9-6-701	To define terms used in the Article so the reader can consistently interpret the requirements.
R9-6-702	To specify immunizations required for child care or school entry.
R9-6-703	To specify the responsibilities of individuals and local health agencies for administering vaccines.
R9-6-704	To establish the standards for documentary proof of immunization or immunity to a disease listed in R9-6-702.
R9-6-705	To specify the responsibilities for a child care administrator or a school administrator related to immunizations.
R9-6-706	To establish exemptions from immunizations.
R9-6-707	To specify the requirements for reporting immunization information to the Department of a local health agency.
R9-6-708	To specify the persons to whom the Department may release immunization information.

3. **Are the rules effective in achieving their objectives?**

Yes  No

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

Rule	Explanation

4. **Are the rules consistent with other rules and statutes?**

Yes  No

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

Rule	Explanation

--	--

5. **Are the rules enforced as written?** Yes  No

*If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency’s proposal for resolving the issue.*

Rule	Explanation

6. **Are the rules clear, concise, and understandable?** Yes  No

*If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.*

Rule	Explanation

7. **Has the agency received written criticisms of the rules within the last five years?** Yes  No

*If yes, please fill out the table below:*

Rule	Explanation

8. **Economic, small business, and consumer impact comparison (summary):**

Arizona Revised Statutes (A.R.S.) § 36-136(I)(1) requires the Arizona Department of Health Services (Department) to “define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases.” A.R.S. § 36-672 requires the Department to adopt rules specifying immunization requirements for school attendance. A.R.S. § 15-872 requires the development by rule of standards for documentary proof of immunization or exemption from immunization. A.R.S. § 15-873 authorizes exemptions from school immunization requirements for personal beliefs or medical reasons, and A.R.S. § 36-883(C) authorizes exemptions from child care immunization requirements for religious beliefs. The Department has adopted the Arizona Administrative Code (A.A.C.) Title 9, Chapter 6, Article 7, rules to implement the related statutes. The rules in 9 A.A.C. 6, Article 7 establish requirements related to immunization requirements for child care attendance and school entry, including exemptions from the immunization requirements.

During the 2021-2022 school year, 5.7% of children in child care had a religious exemption, and 0.53% had a medical exemption. For children in kindergarten, 6.6% of the children had a personal exemption, and 0.47% had a medical exemption. For children in sixth grade, 7.4% of the children had a personal exemption, and 0.27% had a medical exemption.

The rules in 9 A.A.C. 6, Article 7 were last revised by expedited rulemaking published in the Arizona

Administrative Register (A.A.R.) at 24 A.A.R. 2682, effective September 4, 2018. The rulemaking removed obsolete and redundant requirements, simplified the rules, made the rules more consistent with standard medical practices, and allowed for improved electronic recordkeeping. This included allowing the federally required VIS document, describing a vaccine, the disease it protects against, description of risks and benefits, and contraindications, to be provided “in writing,” as defined in R9-6-701. The rules in R9-6-701 and R9-6-702 were amended to remove redundant definitions and requirements, and to make the rules more consistent with standard medical practices. Amendments in section R9-6-702 included adding two new tables to simplify the rules and make the immunization requirements more clear, concise and understandable. The rules in R9-6-703 were revised to clarify the responsibilities of the parent and individuals administering vaccinations to children. Rules in R9-6-704 and R9-6-705 were revised to provide administrators of schools and child care facilities more understandable procedures and policies on documentation of proof of immunization. In R9-6-706 and R9-6-707, the rules were amended to provide clarify on exemptions from immunizations, and the reporting requirements that school and child care administrators are required to submit documentation to the Department. Lastly, the rules in R9-7-708 were revised to include a statutory reference and a clarification of a Department program.

An economic, small business, and consumer impact statement (EIS) was provided in the 2002 rulemaking. The EIS report the comparison, annual cost/revenues as designated as “minimal” when less than \$1,000.00; “moderate” when between \$1,000.00 and \$10,000.00; “substantial” when \$10,000.00 or more; and “significant” when meaningful or important, but not readily subject to quantification. The EIS estimated that the Department would incur moderate costs for promulgating and enforcing the rules, but that no other persons directly affected by the rulemaking would incur additional costs. The Department anticipated that schools and child care providers would benefit from the Department’s ability to temporarily suspend or discontinue an immunization requirement, and that persons newly authorized to access immunization records, and the general public would benefit from increased access to immunization records and from having rules that are more clear, concise, and understandable. The Department believes that the costs and benefits identified in the 2002 EIS are generally consistent with the actual costs and benefits of the rules.

The Department believes that the changes in the rules, as described above, have made the rules more effective and have enabled schools, child care providers, parents, and the general public on the immunization requirements to attend a school and/or child care. Having rules that are more easily understood, complied with, and enforced are estimated to have provided a significant benefit to the general public. On the basis of the information described above, the Department estimates that the actual costs and benefits experienced by persons affected by the rules are generally consistent with the costs and benefits considered in developing the rules.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes \_\_\_ No √

10. **Has the agency completed the course of action indicated in the agency’s previous five-year-review report?**

*Please state what the previous course of action was and if the agency did not complete the action, please explain why not.*

In the 2017 five-year review report, the Department proposed to conduct a rulemaking. The Department completed this course of action through an expedited rulemaking at 24 A.A.R. 2682, effective September 4, 2018.

**11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The Department continues to use the rules without increased cost or burden. The Department believes that the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective, despite the minor updates to be made to the rules.

**12. Are the rules more stringent than corresponding federal laws? Yes \_\_\_ No**

*Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?*

The rules are not related to any federal laws.

**13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

The rules do not require the issuance of a regulatory permit, license, or agency authorization.

**14. Proposed course of action:**

*If possible, please identify a month and year by which the agency plans to complete the course of action.*

The Department believes the current rules in 9 A.A.C. 6, Article 7 are sufficient to protect the public's health and safety. Therefore, the Department does not plan to amend the rules unless a threat or substantive issue affecting public health and safety arises.

## ARTICLE 7. REQUIRED IMMUNIZATIONS FOR CHILD CARE OR SCHOOL ENTRY

### R9 6 701. Definitions

In addition to the definitions in A.R.S. § 36-671 and R9-6-101, the following definitions apply in this Article, unless otherwise specified:

1. "Child" means:
  - a. An individual 18 years of age or less, or
  - b. An individual more than 18 years of age attending school.
2. "Child care" means:
  - a. A child care facility as defined in A.R.S. § 36 881; or
  - b. A child care group home as defined in A.R.S. § 36 897.
3. "Child care administrator" means an individual, or the individual's designee, having daily control and supervision of a child care.
4. "Day" means a calendar day, and excludes the:
  - a. Day of the act or event from which a designated period of time begins to run, and
  - b. Last day of the period if a Saturday, Sunday, or official state holiday.
5. "Document" means information in written, photographic, electronic, or other permanent form.
6. "Enroll" means to accept for attendance at a school or child care.
7. "Entry" means the first day of attendance at a child care or at a specific grade level in a school.
8. "Immunization registry" means an electronic database maintained by a governmental health agency for the storage of immunization data for vaccines.
9. "In writing" means on paper or in a printable electronic format.
10. "Medical exemption" means the written certification described in A.R.S. § 15-873(A)(2).
11. "Nurse" means a:
  - a. Registered nurse, as defined in A.R.S. § 32-1601; or
  - b. Practical nurse, as defined in A.R.S. § 32-1601.
12. "Parent" means:
  - a. A natural or adoptive mother or father,
  - b. A legal guardian appointed by a court of competent jurisdiction, or
  - c. A "custodian" as defined in A.R.S. § 8-201.
13. "Physician" has the same meaning as in A.R.S. § 15-871.
14. "Registered nurse practitioner" has the same meaning as in A.R.S. § 32-1601.
15. "School-based or child care-based vaccination information system" means an electronic database used and maintained by a school, child care, or group of schools or child cares for the storage of immunization data for vaccines.
16. "Signature" means:
  - a. A handwritten or stamped representation of an individual's name or a symbol intended to represent an individual's name, or
  - b. An electronic signature as defined in A.R.S. § 44-7002.

### R9 6 702. Required Immunizations for Child Care or School Entry

Except as provided in R9-6-706, documentary proof of immunization, according to Table 7.1 or Table 7.2, for each of the following diseases is required for child care or school entry:

1. Diphtheria;
2. Tetanus;
3. Pertussis;
4. Hepatitis A, for a child 1 through 5 years of age in child care in Maricopa County;
5. Hepatitis B;
6. Poliomyelitis;
7. Measles (rubeola);
8. Mumps;
9. Rubella (German Measles);
10. *Haemophilus influenzae* type b, for a child two months through 59 months of age;
11. Varicella; and
12. Meningococcal disease.

**Table 7.1. Immunization Requirements for Child Care or School Entry**

Key:

DTaP	=	Diphtheria, tetanus, and acellular pertussis vaccine
DTP	=	Diphtheria, tetanus, and pertussis vaccine
Hep A	=	Hepatitis A vaccine
Hep B	=	Hepatitis B vaccine
Hib	=	<i>Haemophilus influenzae</i> type b vaccine
MMR	=	Measles, mumps, and rubella vaccine
MCV4	=	Quadrivalent meningococcal vaccine
Polio	=	Inactivated poliomyelitis vaccine (IPV) or trivalent oral poliomyelitis vaccine (tOPV)
Td	=	Tetanus and diphtheria vaccine
Tdap	=	Tetanus, diphtheria, and acellular pertussis vaccine
VAR	=	Varicella vaccine
Kindergarten	=	The grade level in a school that precedes first grade

**A. Vaccine Doses Required for Child Care Attendance**

Vaccine Against <input type="checkbox"/>	Age <input type="checkbox"/>	2 months	4 months	6 months	12 months	15 months	18 months	19-59 months
Diphtheria, Tetanus, Pertussis		DTaP 1	DTaP 2	DTaP 3	---	DTaP 4	---	Documented 4 DTaP
Hepatitis B		Hep B 1	Hep B 2	---	Hep B 3	---	---	Documented 3 Hep B
<i>Haemophilus influenzae</i> type b		Hib 1	Hib 2	Hib 3 <sup>1</sup>	---	Hib 3 or 4 <sup>1</sup>	---	Documented 3-4 Hib, as specified in Note 3
Poliomyelitis		Polio 1 <sup>2</sup>	Polio 2 <sup>2</sup>	---	Polio 3 <sup>2</sup>	---	---	Documented 3 Polio
Measles, Mumps, Rubella		---	---	---	MMR 1	---	---	Documented 1 MMR
Varicella		---	---	---	VAR 1	---	---	Documented 1 VAR
Hepatitis A (Maricopa County only)		---	---	---	Hep A 1	---	Hep A 2	Documented 2 Hep A

<sup>1</sup> The recommended schedule for a four-dose Hib vaccine is two, four, and six months of age with a booster dose at 12-15 months of age. The recommended schedule for a three-dose Hib vaccine is two and four months of age with a booster dose at 12-15 months of age.

<sup>2</sup> Bivalent and monovalent oral poliomyelitis vaccines do not meet these immunization requirements. An oral poliomyelitis vaccine received before April 2016 is assumed to be trivalent oral poliomyelitis vaccine, unless otherwise specified, and to satisfy immunization requirements.

**B. Vaccine Doses Required for School Attendance**

A child at any age within the range designated by the black bar is required to have documentation of the indicated number of doses of the specified vaccine.

Vaccine Against <input type="checkbox"/>	Age <input type="checkbox"/>	4 - 6 years and attendance in Kindergarten or 1st grade	7 - 10 years	11 years or older
Diphtheria, Tetanus, Pertussis		4 to 6 DTP/DTaP <sup>1</sup>	3 or 4 tetanus-diphtheria containing vaccines <sup>2</sup>	3 to 5 tetanus-diphtheria-containing vaccines, including 1 Tdap <sup>2,3</sup>

<b>Meningococcal invasive disease</b>	---	---	<b>1 MCV4</b>
<b>Hepatitis B</b>	<b>3 to 4 Hep B<sup>4</sup></b>		<b>2 to 4 Hep B<sup>4, 5</sup></b>
<b>Poliomyelitis</b>	<b>3 or 4 Polio<sup>6</sup></b>		
<b>Measles, Mumps, Rubella</b>	<b>2 MMR</b>		
<b>Varicella zoster</b>	<b>1-2 VAR<sup>7</sup></b>		

1 Only four doses of DTP/DTaP are required if the fourth dose of DTP/DTaP was received after the child's fourth birthday; otherwise an additional dose is required after the child's fourth birthday, up to a maximum of six doses.

2 Only three doses of tetanus-diphtheria-containing vaccine are required if the first dose of tetanus-diphtheria-containing vaccine was received on or after the child's first birthday; otherwise four are required.

3 One dose of Tdap is required if five years have passed since the date of the child's last dose of tetanus-diphtheria-containing vaccine and the child has not received Tdap. At least one dose of a tetanus-diphtheria-containing vaccine is required to have been administered within the previous 10 years.

4 Only three doses are required if the third dose was received at or after the child was 24 weeks of age; otherwise four are required.

5 Only two doses, at least four months apart, are required if the child received the adolescent series using the Merck Recombivax HB Adult Formulation vaccine when the child was 11-15 years of age.

6 Bivalent and monovalent oral poliomyelitis vaccines do not meet these immunization requirements. An oral poliomyelitis vaccine received before April 2016 is assumed to be trivalent oral poliomyelitis vaccine, unless otherwise specified, and to satisfy immunization requirements. Only three doses are required if the third dose was received after the child's fourth birthday and at least six months after the second dose; otherwise four doses are required, with the last received after the child's fourth birthday. Poliomyelitis vaccine is not required for individuals 18 years of age or older.

7 One dose is required if received by a child between 12 months and 12 years of age. A child who received a first dose of VAR at 13 years of age or older is required to receive a second dose if at least four weeks have passed since the date of the first dose.

**Table 7.2. Immunization Schedule for a Child Who Has Not Completed the Vaccine Series Required in Table 7.1 before Entry into a Child Care or School**

A. If a child does not meet the applicable requirements in Table 7.1, the child is required to have the first dose of vaccine for each of the diseases indicated in R9-6-702 before school entry or no later than 15 calendar days after child care entry.

B. If a child does not meet the applicable requirements in Table 7.1, the child is required to have the second and subsequent doses of vaccine for each of the diseases indicated in R9-6-702 either:

1. Before school entry or no later than 15 calendar days after child care entry, or
2. At the intervals specified below.

Vaccine Against <input type="checkbox"/>	Intervals between Doses				
	Dose <input type="checkbox"/>	2nd Dose	3rd Dose	4th Dose	5th Dose
<b>Diphtheria, Tetanus, Pertussis</b>					
Child < 7 years of age (DTP or a combination of DTP and DTaP)		No sooner than four weeks after the first dose	No sooner than four weeks after the second dose	No sooner than six months after the third dose	No sooner than six months after the fourth dose, if the fourth dose was received at < 4 years of age
Child 7 through 10 years of age (Tetanus-diphtheria containing vaccines)		No sooner than four weeks after the first dose	No sooner than six months after the second dose	No sooner than six months after the third dose, if the first dose was received at < 12 months of age	---
Child > 10 years of age (Tetanus-diphtheria containing vaccine, including one Tdap)		No sooner than four weeks after the first dose	No sooner than six months after the second dose	No sooner than six months after the third dose, if the first dose was received at < 12 months of age	---
<b>Poliomyelitis</b>					

Child < 4 years of age	No sooner than four weeks after the first dose	No sooner than four weeks after the second dose	No sooner than six months after the third dose, if the third dose was received at < 4 years of age	---
Child between 4 and 18 years of age	No sooner than four weeks after the first dose	No sooner than six months after the second dose	No sooner than six months after the third dose, if the third dose was received at < 4 years of age	---
<b>Measles, Mumps, Rubella</b> Child 4 years of age or older	No sooner than one month after the first dose	---	---	---
<b><i>Haemophilus influenzae type b</i></b>				
Child 7-11 months of age	No sooner than two months after the first dose	---	---	---
Child 12-14 months of age	No sooner than two months after the first dose	No sooner than two months after the second dose if the first or second dose was received at < 12 months of age	---	---
Child 15-59 months of age	---  (A child 15 through 59 months of age is required to have one dose of vaccine.)	---	---	---
<b>Hepatitis B</b>	No sooner than four weeks after the first dose  (Only two doses, at least four months apart, are required if the child received the adolescent series using the Merck Recombivax HB Adult Formulation vaccine when the child was 11-15 years of age.)	No sooner than four months after the first dose and two months after the second dose for a child $\geq$ 24 weeks of age who did not receive the adolescent series.	---	---
<b>Hepatitis A</b> (Maricopa County only)	No sooner than six months after the first dose	---	---	---
<b>Varicella</b> (A child 12 months through 12 years of age is required to have one dose of vaccine.)	No sooner than one month after the first dose for a child 13 years of age or older	---	---	---

**R9 6 703. Responsibilities of Individuals and Local Health Agencies for Administering Vaccines**

- A. Upon request of a parent, a local health agency shall provide for the immunization of a child against any disease listed in R9-6-702.
- B. An individual administering a vaccine shall ensure that the dosage and route by which the vaccine is administered is:

1. As recommended by the Centers for Disease Control and Prevention, or
2. According to the manufacturer's recommendations.
- C.** Before administering a vaccine to a child, the individual administering the vaccine shall:
  1. Provide the child's parent with the following information in writing:
    - a. A description of the disease,
    - b. A description of the vaccine,
    - c. A statement of the risks of the disease and the risks and benefits of immunization, and
    - d. Contraindications for administering the vaccine; and
  2. Obtain documentation from the child's parent confirming that the child's parent:
    - a. Was provided the information described in subsection (C)(1),
    - b. Was provided an opportunity to read the information described in subsection (C)(1),
    - c. Was provided an opportunity to ask questions, and
    - d. Requests that the designated vaccine be administered to the child.
- D.** Following the administration of a vaccine, the individual administering the vaccine shall provide to the child's parent or, if a child is immunized at school, to the child to give to the child's parent:
  1. Information in writing about:
    - a. The vaccine administered,
    - b. The reactions to the vaccine that might be expected, and
    - c. The course of action if a reaction to the vaccine occurs that may require medical attention; and
  2. Documentary proof of immunization, according to A.R.S. § 36-674 and R9-6-704(A).

**R9 6 704. Standards for Documentary Proof of Immunization or Immunity**

- A.** An administrator of a school or a child care administrator shall accept any of the following as documentary proof of immunization for a child:
  1. A copy of a document recording the immunizations administered to the child that contains:
    - a. The child's name;
    - b. The child's date of birth;
    - c. The type of vaccine administered;
    - d. The month, day, and year of each immunization; and
    - e. The name of the individual administering the vaccine or the name of the entity that the individual administering the vaccine represents;
  2. A document from an Arizona school or child care recording the child's immunizations, including a print-out from a school-based or child care-based vaccination information system, that contains, in a Department-provided format:
    - a. The child's name;
    - b. The child's date of birth;
    - c. The type of vaccine administered;
    - d. The month, day, and year of each immunization;
    - e. The name and address of the school or child care; and
    - f. The name and signature of the individual at the school or child care providing the document to the child's parent and the date signed;
  3. A document from a school in another state recording the child's immunizations; or
  4. A printout from an immunization registry containing the information in subsections (A)(1)(a) through (e).
- B.** An administrator of a school or a child care administrator shall accept a certification of medical exemption from immunization due to immunity, as specified in R9-6-706(D), as documentary proof of immunity for a child.

**R9 6 705. Responsibilities of Administrators of Schools, Child Care Administrators, and the Department**

- A.** An administrator of a school or a child care administrator shall ensure that:
  1. For each child attending the school or child care, one of the following is maintained at the school or child care for each disease listed in R9-6-702:
    - a. Documentary proof of immunization, as specified in R9-6-704(A), according to Table 7.1;
    - b. Documentary proof of immunization, as specified in R9-6-704(A), demonstrating compliance with Table 7.2;
    - c. Documentary proof of immunity, as specified in R9-6-704(B) and according to R9-6-706(D); or
    - d. A statement of exemption from immunization, as specified in R9-6-706(A) through (C);
  2. Lists are maintained at the school or child care of children who:
    - a. Do not have documentary proof of:
      - i. Immunization for each disease listed in R9-6-702, according to Table 7.1; or
      - ii. Immunity for each disease listed in R9-6-702, according to R9-6-706(D);
    - b. Do not have documentary proof according to subsection (A)(1)(a) or (c) but are in compliance with Table 7.2; or
    - c. Have a statement of exemption from immunization, according to R9-6-706(A), (B), or (C), for any of the diseases listed in R9-6-702;
  3. Except as provided in subsection (D), for a child enrolled in school who does not have one of the documents in subsection (A)(1) for each disease listed in R9-6-702:

- a. The child's parent is notified in writing at the time of school enrollment or, for an enrolled child, at the time of review of immunization documentation that the child:
  - i. Is not in compliance with Arizona immunization requirements; and
  - ii. Except as required by 42 U.S.C. 11301, will be excluded from school entry, according to A.R.S. § 15-872(B), unless the documentation required in subsection (A)(1) is provided for each disease listed in R9-6-702 before school entry; and
- b. The child is excluded from school entry if the required documentation is not provided before school entry; and
- 4. Except as provided in subsection (D), for a child enrolled in a child care who does not have one of the documents in subsection (A)(1) for each disease listed in R9-6-702:
  - a. The child's parent is notified in writing before or at the time of child care entry or, for an enrolled child, at the time of review of immunization documentation that the child:
    - i. Is not in compliance with Arizona immunization requirements, and
    - ii. May attend the child care for not more than 15 days from the date of child care entry without providing one of the documents in subsection (A)(1) for each disease listed in R9-6-702; and
  - b. The child is excluded from child care entry if the required documentation is not provided for the child within 15 days following child care entry.
- B.** If an administrator of a school or a child care administrator questions the accuracy of a document provided for a child as documentary proof of immunization or immunity and is unable to verify the accuracy of the document, the administrator of the school or the child care administrator shall notify the child's parent in writing that:
  - 1. For a child attending a school:
    - a. The administrator of the school cannot verify compliance with Arizona immunization requirements on the basis of the documents provided; and
    - b. Except as required by 42 U.S.C. 11301, the child will be excluded from school entry, according to A.R.S. § 15-872(B), until the child's parent provides to the school documentation that meets the requirements in R9-6-704 or R9-6-706;
  - 2. For a child attending a child care:
    - a. The child care administrator cannot verify compliance with Arizona immunization requirements on the basis of the documents provided; and
    - b. The child may attend the child care for not more than 15 days after the date of child care entry without the child's parent providing to the child care documentation that meets the requirements in R9-6-704 or R9-6-706; and
  - 3. The child's parent may bring the child to a physician, a registered nurse practitioner, a local health agency, or, as authorized under A.R.S. § 32-1974, a pharmacist as defined in A.R.S. § 32-1901 to:
    - a. Review the child's immunization history,
    - b. Provide needed immunizations, and
    - c. Provide the required documentation.
- C.** An administrator of a school or a child care administrator shall not allow a child to attend the school or child care during an outbreak of a disease listed in R9-6-702, as determined by the Department or a local health agency, for which the child lacks:
  - 1. Documentary proof of immunization, according to R9-6-704(A); or
  - 2. Documentary proof of immunity, according to R9-6-704(B).
- D.** If the Department receives notification from the Centers for Disease Control and Prevention that there is a shortage of a vaccine for a disease listed in R9-6-702, or that the amount of a vaccine for a disease listed in R9-6-702 is being limited, the Department shall:
  - 1. Determine whether:
    - a. Compliance with exclusion requirements in subsections (A)(3) and (4) is suspended for the vaccine in limited supply, or
    - b. A different vaccine or a combination of different vaccines may substitute for the vaccine in limited supply;
  - 2. Provide notification in writing to each school and child care in this state:
    - a. Of the shortage or limitation of the vaccine;
    - b. Whether the Department is:
      - i. Suspending compliance with exclusion requirements in subsections (A)(3) and (4) on the basis of the vaccine in limited supply; or
      - ii. Recommending an alternative vaccine or combination of vaccines to satisfy the requirement R9-6-702 for the vaccine in limited supply and, if so, the Department's recommendation; and
    - c. If known, when the shortage or limitation of the vaccine is expected to end and the vaccine to be available; and
  - 3. Upon receiving notification from the Centers for Disease Control and Prevention that the vaccine is available, notify each school and child care in this state:
    - a. That the vaccine is available, and
    - b. If applicable, the date that compliance with exclusion requirements in subsections (A)(3) and (4) will be reinstated.
- E.** The Department shall notify each school and child care in this state if the Department no longer requires compliance with subsection (A) for a disease listed in R9-6-702.

## **R9 6 706.Exemptions from Immunizations**

**A.** For a child attending a school, the child is exempt from the applicable immunization requirements in R9-6-702 for personal beliefs, as allowed by A.R.S. § 15-873(A)(1), if the child's parent submits to the school a statement of exemption from immunization for personal beliefs, in a Department-provided format, that contains:

1. The parent's name,
2. The child's name,
3. The child's date of birth,
4. The immunizations from which the child's parent is requesting an exemption,
5. A statement that the parent is requesting the exemption based on personal beliefs, and
6. The signature of the child's parent and the date signed.

**B.** For a child attending a child care, the child is exempt from the applicable immunization requirements in R9-6-702 for religious beliefs, as allowed in A.R.S. § 36-883(C), if the child's parent submits to the child care a statement of exemption from immunization for religious beliefs, in a Department-provided format, that contains:

1. The parent's name,
2. The child's name;
3. The child's date of birth;
4. The immunizations from which the child's parent is requesting an exemption;
5. A statement that the parent is requesting the exemption based on religious beliefs, and
6. The signature of the child's parent and the date signed.

**C.** A child is exempt from the applicable immunization requirements in R9-6-702, as allowed by A.R.S. § 15-873(A)(2), if the child's parent submits to a school or child care a certification of medical exemption from immunization, in a Department-provided format, that contains:

1. The parent's name;
2. The child's name;
3. The child's date of birth;
4. The immunizations from which the child's parent is requesting an exemption;
5. A statement that the parent is requesting a medical exemption according to A.R.S. § 15-873(A)(2);
6. Statements from a physician or registered nurse practitioner that:
  - a. The immunizations specified according to subsection (C)(4) may be harmful to the child's health;
  - b. Indicate the specific nature of the medical condition or circumstance that precludes immunization;
  - c. Indicate whether the medical exemption is permanent or temporary; and
  - d. If the medical exemption is temporary, provide the date the medical exemption ends;
7. The signature of the physician or registered nurse practitioner providing the medical exemption and the date signed; and
8. The signature of the child's parent and the date signed;

**D.** A child is exempt from the applicable immunization requirements in R9-6-702 due to immunity if the child's parent submits to a school or child care:

1. A certification of medical exemption from immunization due to immunity, in a Department-provided format, that contains:
  - a. The parent's name;
  - b. The child's name;
  - c. The child's date of birth;
  - d. The name of each disease for which the child's parent is requesting an exemption from immunization requirements;
  - e. A statement that the parent is requesting a medical exemption from immunization due to the child's immunity to a disease;
  - f. A statement from a physician or registered nurse practitioner that the physician or registered nurse practitioner has determined that the child is immune to the disease specified according to subsection (D)(1)(d), for which an exemption from immunization requirements is being requested, based on:
    - i. For measles, rubella, or varicella, a review by the physician or registered nurse practitioner of laboratory evidence of immunity for the child; or
    - ii. For a disease other than measles, rubella, or varicella, a review by the physician or registered nurse practitioner of either:
      - (1) Laboratory evidence of immunity for the child, or
      - (2) The medical records of the physician or registered nurse practitioner;
  - g. The signature of the physician or registered nurse practitioner providing the medical exemption and the date signed; and
  - h. The signature of the child's parent and the date signed; and
2. If applicable, a copy of the laboratory evidence of immunity.

**E.** An administrator of a school or a child care administrator shall:

1. Include a child's exemption from the requirements in R9-6-702 in the documentation required in R9-6-705(A)(1); and
2. If a child has a temporary medical exemption:
  - a. Allow the child to attend a school or child care until the date the temporary exemption ends; and

- b. At least 30 calendar days before the temporary medical exemption ends, notify the child's parent in writing of the date by which the child is required to complete all immunizations.

**R9 6 707. Reporting Requirements**

**A.** By November 15 of each year, an administrator of a school shall submit to the Department a report, in a Department-provided format, that contains:

1. The name, the physical address, and, if different, the mailing address of the school;
2. The date of the report;
3. Whether the school is a:
  - a. Charter school, as defined in A.R.S. § 15-101;
  - b. Private school, as defined in A.R.S. § 15-101; or
  - c. Public school, as defined in A.R.S. § 15-101;
4. The name, email address, and telephone number of an individual to contact for the school;
5. The name and district number of the school district, if applicable;
6. The county in which the school is located;
7. The number of children enrolled at the school in designated grades, as of the date of the report; and
8. The number of children in each of the designated grades who:
  - a. Have received each immunization required according to Table 7.1;
  - b. Have received an immunization required according to Table 7.1 or submitted a certification of medical exemption from immunization due to immunity, according to R9-6-706(D), for each of the diseases in R9-6-702, including the number for each disease for which certification of medical exemption from immunization due to immunity was submitted;
  - c. Have an exemption from immunization for personal beliefs, according to R9-6-706(A), for one or more of the diseases in R9-6-702, including the number for each disease;
  - d. Have a medical exemption from immunization, according to R9-6-706(C) for one or more of the diseases in R9-6-702, including:
    - i. The number for each disease, and
    - ii. Whether the medical exemption is temporary or permanent; or
  - e. Are receiving immunizations required according to Table 7.2, and the number of doses of each vaccine received.

**B.** By November 15 of each year, a child care administrator shall submit to the Department a report, in a Department-provided format, that contains:

1. The name, the physical address, and, if different, the mailing address of the child care;
2. The date of the report;
3. The name, email address, and telephone number of an individual to contact for the child care;
4. The Department license or certificate number of the child care, as applicable;
5. The name of the child care administrator; and
6. The number of children attending the child care who are at least 18 months of age and not attending a school, as of the date of submission of the report, in each of the following categories:
  - a. Children who have received each immunization required according to Table 7.1;
  - b. Children who have received an immunization required according to Table 7.1 or submitted a certification of medical exemption from immunization due to immunity, according to R9-6-706(D), for each of the diseases in R9-6-702, including the number for each disease for which laboratory evidence of immunity was submitted;
  - c. Children who have an exemption from immunization for religious beliefs, according to R9-6-706(B), for one or more of the diseases in R9-6-702, including the number for each disease;
  - d. Children who have a medical exemption from immunization, according to R9-6-706(C), for one or more of the diseases in R9-6-702, including:
    - i. The number for each disease, and
    - ii. Whether the medical exemption is temporary or permanent; or
  - e. Children who are receiving immunizations required according to Table 7.2, and the number of doses of each vaccine received.

**R9 6 708. Release of Immunization Information**

In addition to the persons who have access to immunization information according to A.R.S. § 36 135(D), and consistent with the limitations in A.R.S. § 36 135(E) and (H), the Department may release immunization information to:

1. An authorized representative of a local health agency for the control, investigation, analysis, or follow-up of disease;
2. A child care administrator, to determine the immunization status of a child in the child care;
3. An authorized representative of the federal Women, Infants, and Children Program administered by the Department, to determine the immunization status of children enrolled in the federal Women, Infants, and Children Program;
4. An individual or organization authorized by the Department to conduct medical research to evaluate medical services and health-related services, as defined in A.R.S. § 36-401, health quality, immunizations data quality, and efficacy; or
5. An authorized representative of an out-of-state agency, including:
  - a. A state health department,
  - b. A health agency,

- c. A school or child care,
- d. A health care provider, or
- e. A state agency that has legal custody of a child.

## Statutory Authority

### 36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.
2. Perform all duties necessary to carry out the functions and responsibilities of the department.
3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.
4. Administer and enforce the laws relating to health and sanitation and the rules of the department.
5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.
6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.
7. Prepare sanitary and public health rules.
8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to

the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact.

The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the

requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

**15-872. Proof of immunization; noncompliance; notice to parents; civil immunity**

A. The director of the department of health services, in consultation with the superintendent of public instruction, shall develop by rule standards for documentary proof.

B. A pupil shall not be allowed to attend school without submitting documentary proof to the school administrator unless the pupil is exempted from immunization pursuant to section 15-873.

C. Each public school shall make full disclosure of the requirements and exemptions as prescribed in this section and section 15-873.

D. On enrollment, the school administrator shall suspend that pupil if the administrator does not have documentary proof and the pupil is not exempted from immunization pursuant to section 15-873.

E. Notwithstanding subsections B and D of this section, a pupil may be admitted to or allowed to attend a school if the pupil has received at least one dose of each of the required immunizations prescribed pursuant to section 36-672 and has established a schedule for the completion of required immunizations. The parent, guardian or person in loco parentis of a pupil shall present to the school administrator documentary proof of the immunizations received and a schedule prepared by the pupil's physician or registered nurse practitioner or a health agency for completion of additional required immunizations.

F. The school administrator shall review the school immunization record for each pupil admitted or allowed to continue attendance pursuant to subsection E of this section at least twice each school year until the pupil receives all of the required immunizations and shall suspend a pupil as prescribed in subsection G of this section who fails to comply with the immunization schedule. Immunizations received by a pupil shall be entered in the pupil's school immunization record.

G. Unless proof of an exemption from immunization pursuant to section 15-873 is provided, a pupil who is admitted or allowed to continue to attend and who fails to comply with the immunization schedule within the time intervals specified by the schedule shall be suspended from school attendance until

documentary proof of the administration of another dose of each appropriate immunizing agent is provided to the school administrator.

H. The provisions of subsections B, D and E of this section do not apply to homeless pupils until the fifth calendar day after enrollment.

I. A school and its employees are immune from civil liability for decisions concerning the admission, readmission and suspension of a pupil that are based on a good faith implementation of the requirements of this article.

#### 15-873. Exemptions; nonattendance during outbreak

A. Documentary proof is not required for a pupil to be admitted to school if one of the following occurs:

1. The parent or guardian of the pupil submits a signed statement to the school administrator stating that the parent or guardian has received information about immunizations provided by the department of health services and understands the risks and benefits of immunizations and the potential risks of nonimmunization and that due to personal beliefs, the parent or guardian does not consent to the immunization of the pupil.

2. The school administrator receives written certification that is signed by the parent or guardian and by a physician or a registered nurse practitioner, that states that one or more of the required immunizations may be detrimental to the pupil's health and that indicates the specific nature and probable duration of the medical condition or circumstance that precludes immunization.

B. An exemption pursuant to subsection A, paragraph 2 is only valid during the duration of the circumstance or condition that precludes immunization.

C. Pupils who lack documentary proof of immunization shall not attend school during outbreak periods of communicable immunization-preventable diseases as determined by the department of health services or local health department. The department of health services or local health department shall transmit notice of this determination to the school administrator responsible for the exclusion of the pupils.

#### 15-874. Records; reporting requirements

A. Each pupil's immunizations shall be recorded on the school immunization record. The school immunization record shall be a standardized form developed by the department of health services in conjunction with the department of education and provided by the department of health services and shall be a part of the mandatory permanent student record. The records are open to inspection by the department of health services and the local health department.

B. Each immunization record shall contain at least the following information:

1. The pupil's name and birth date.

2. The date of the pupil's admission to the school.

3. The type of immunizing agents administered to the pupil.

4. The date each dose of immunizing agent is administered to the pupil.
  5. The established schedule for completion of immunizations if the pupil is admitted to or allowed to continue to attend a school pursuant to section 15-872, subsection E.
  6. Laboratory evidence of immunity if this evidence is presented as part of a pupil's documentary proof.
  7. If an exemption from immunization as provided in section 15-873 is submitted to the school administrator, the date the exemption is submitted and the reason for the exemption.
  8. Additional information prescribed by the director of the department of health services by rule.
- C. A school shall transfer an immunization record with the mandatory permanent student record and provide at no charge, on request, a copy of the immunization record to the parent or guardian of the pupil.
- D. By November 30 of each school year, each school district and private school shall complete and file a report with the local health department and the department of health services, using forms provided by the department of health services. The report shall state the number of pupils attending who have completed required immunizations or who have submitted laboratory evidence of immunity, the number of pupils attending with uncompleted required immunizations and the number of pupils attending with an exemption from immunization pursuant to section 15-873.

**36-672. Immunizations; department rules; prohibitions**

- A. Consistent with section 15-873, the director shall adopt rules prescribing required immunizations for school attendance, the approved means of immunization and indicated reinforcing immunizations for diseases, and identifying types of health agencies and health care providers that may sign a laboratory evidence of immunity. The rules shall include the required doses, recommended optimum ages for administration of the immunizations, persons who are authorized representatives to sign on behalf of a health agency and other provisions necessary to implement this article.
- B. The director, in consultation with the superintendent of public instruction, shall develop by rule standards for documentary proof.
- C. The following immunizations are not required for school attendance:
1. The immunization against the human papillomavirus.
  2. An immunization for which a United States food and drug administration emergency use authorization has been issued.
- D. An immunization must be prescribed by a rule adopted pursuant to subsection A of this section before the immunization may be required for in-person school attendance.
- E. Pursuant to section 1-602, this section does not preclude a parent's right to make health care decisions for the parent's minor child.

**36-674. Providing proof of immunization**

A physician, local health department or school nurse administering an immunization shall furnish documentary proof of immunization to the person immunized or, if that person is a child, to the child's parent or guardian or the person in loco parentis of the child.

**36-883. Standards of care; rules; classifications**

A. The director of the department of health services shall prescribe reasonable rules regarding the health, safety and well-being of the children to be cared for in a child care facility. These rules shall include standards for the following:

1. Adequate physical facilities for the care of children, such as building construction, fire protection, sanitation, sleeping facilities, isolation facilities, toilet facilities, heating, ventilation, indoor and outdoor activity areas and, if provided by the facility, transportation safely to and from the premises.
2. Adequate staffing per number and age groups of children by persons who are qualified by education or experience to meet their respective responsibilities in the care of children.
3. Activities, toys and equipment to enhance the development of each child.
4. Nutritious and well-balanced food.
5. Encouragement of parental participation.
6. Exclusion of any person from the facility whose presence may be detrimental to the welfare of children.

B. The department shall adopt rules pursuant to title 41, chapter 6 and section 36-115.

C. Any rule that relates to educational activities, physical examination, medical treatment or immunization shall include appropriate exemptions for children whose parents object on the ground that it conflicts with the tenets and practices of a recognized church or religious denomination of which the parent or child is an adherent or member.

D. The department of health services shall conduct a comprehensive review of its rules at least once every two years. Before conducting this review, the department shall consult with agencies and organizations that are knowledgeable about the provision of child care facilities to children, including:

1. The department of economic security.
2. The department of education.
3. The office of the state fire marshal.
4. The league of Arizona cities and towns.
5. Citizen groups.
6. Licensed child care facility representatives.

7. The department of child safety.

E. The department shall designate appropriate classifications and establish corresponding standards pertaining to the type of care offered. These classifications shall include:

1. Facilities offering infant care.
2. Facilities offering specific educational programs.
3. Facilities offering evening and nighttime care.

F. Rules for the operation of child care facilities shall be stated in a way that clearly states the purpose of each rule.

# GOVERNOR'S REGULATORY REVIEW COUNCIL

## ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

---

**MEETING DATE:** Dec 6, 2022

**TO:** Members of the Governor's Regulatory Review Council (Council)

**FROM:** Council Staff

**DATE:** Oct 24, 2022

**SUBJECT: BOARD OF PSYCHOLOGIST EXAMINERS**  
Title 4, Chapter 26, Article 4, Behavior Analysis

---

### Summary

This Five-Year Review Report (5YRR) from the Board of Psychologist Examiners relates to rules in Title 4, Chapter 26, Articles 4 (Behavioral Analysis).

In the 2017 5YRR, the Board indicated it did not intend to amend or repeal any of the reviewed rules. However, new statutory requirements, stakeholder requests, and shifting education and training requirements prompted the Board to amend certain rules. The Board conducted a regular rulemaking to amend rules 403 (Application for Initial License), 407 (License for Reciprocity), and 409 (Continuing Education Requirement) and created rule 404.2 (Supervised Experience Requirement). This regular rulemaking was approved by the Council on October 2, 2018. An additional regular rulemaking was submitted to the Council for approval at the October 4, 2022 Council meeting.

### Proposed Action

At this time there is no proposed course of action as the Board submitted a regular rulemaking that was approved in part and returned in part at the October 4, 2022 Council meeting.

**1. Has the agency analyzed whether the rules are authorized by statute?**

Yes. The Department cites both general and specific statutory authority for these rules

**2. Summary of the agency's economic impact comparison and identification of stakeholders:**

The Board states that the economic impact of the rules has not differed from original economic impact statements at adoption of rules. All rules made have had minimal or no economic impact on the Board, other state agencies, private entities, small businesses, and consumers.

The Board collected \$157,985 in behavior analyst program revenue in fiscal year 2021. This revenue primarily consisted of application and licensing fees, with a small amount of revenue collected for other services. The Board has 4.5 full time employees (FTEs); approximately 1.75 FTEs are assigned to the regulatory responsibilities of behavior analysts.

Stakeholders include the Board, applicants for behavioral analyst licensure, and behavioral analyst licensees.

**3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Board states that notwithstanding any costs imposed by statutes or caused by the rules of other agencies, the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective.

**4. Has the agency received any written criticisms of the rules over the last five years?**

The Board indicates that they have not received any written criticisms of the rules in the last five years

**5. Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Board states that the rules are clear, concise, and understandable.

**6. Has the agency analyzed the rules' consistency with other rules and statutes?**

The Board states that the rules are consistent with other rules and statutes.

**7. Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Board states that the rules are generally effective in achieving its objectives.

**8. Has the agency analyzed the current enforcement status of the rules?**

The Board states they enforce the rules as written and in a consistent and fair manner.

**9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Board indicates there is no corresponding federal law applicable to the reviewed rules and therefore this item does not apply.

**10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

All the reviewed rules were adopted after July 29, 2010. All the licenses for which a fee is established under R4-26-402 comply with A.R.S. § 41-1037 because they are issued to qualified individuals to conduct activities that are substantially similar in nature.

**11. Conclusion**

Because a regular rulemaking has already been submitted to address these rules, Council staff believes the Board has submitted an adequate report and recommends approval of the report.

**1. Authorization of the rule by existing statutes**

The agency rules are authorized under A.R.S. § 32-2063(A)(1). The specific statutes that authorize specific rules are listed here:

<b>Rule</b>	<b>Statute</b>
R4-26-401. Definitions	A.R.S. § 32-2091
R4-26-402. Fees and Charges	A.R.S. § 32-2091.01(A) and (B)
R4-26-403. Application for Initial License	A.R.S. §§ 32-2091.02 and 32-2091.04
R4-26-404. Examination Requirement	A.R.S. § 32-2091.03(A)
R4-26-404.1. Education Requirement	A.R.S. § 32-2091.03(A)
R4-26-404.2. Supervised Experience Requirement	A.R.S. § 32-2091.03(A)
R4-26-405. Coursework Requirement	A.R.S. § 32-2091.03(A)
R4-26-406. Ethical Standard	A.R.S. § 32-2091(12)(dd)
R4-26-407	This rule is repealed.
R4-26-408. License Renewal	A.R.S. § 32-2091.07
R4-26-409. Continuing Education Requirement	A.R.S. § 32-2091.07(E)
R4-26-410. Voluntary Inactive Status	A.R.S. § 32-2091.06(E)
R4-26-411. License Reinstatement	A.R.S. §§ 32-2091.06(G) and 32-2091.07
R4-26-412. Client Records	A.R.S. §§ 32-2091(2) and 32-2091.13
R4-26-413. Change of Name, Mailing Address, E-mail Address, or Telephone Number	A.R.S. §§ 32-2091.06(F) and 32-2091.07(C)
R4-26-414. Complaints and Investigations	A.R.S. §32-2091.09(A)

R4-26-415. Informal Interview	A.R.S. § 32-2091.09(G)
R4-26-416. Rehearing or Review of Decision	A.R.S. § 41-1092.09
R4-26-417. Licensing Time Frames	A.R.S. § 41-1073

2. **The objective of each rule:**

<b>Rule</b>	<b>Objective</b>
R4-26-401. Definitions	The objective of the rule is to define terms used in the context of statute and rule in a manner not adequately provided by a dictionary. This rule facilitates comprehension of certain terms found elsewhere in the rules.
R4-26-402. Fees and Charges	The objective of this rule is to specify the fees the Board charges for its licensing activities. This rule clarifies to the applicant the precise fee amount to submit as A.R.S. § 32-2091.01(A) and (B) establish the maximum fee the Board is authorized to charge.
R4-26-403. Application for Initial License	The objective of the rule is to specify the required content of an application for licensure and the supporting documentation required under A.R.S. §§ 32-2091.02 and 32-2091.04. Prospective applicants and other interested parties obtain clarity from this rule with respect to the questions that are posed on the licensure application.
R4-26-404. Examination Requirement	The objective of the rule is to specify the required examination and its passing standard for purposes of licensure, the authority for which is at A.R.S. § 32-2091.03(A).
R4-26-404.1. Education Requirement	The objective of the rule is to provide specific criteria that the Board applies to determine whether an applicant's academic degree meets requirements for licensure as required by A.R.S. § 32-2091.03(A).
R4-26-404.2. Supervised Experience Requirement	The objective of this rule is to set forth procedures under A.R.S. § 32-2091.03(A) pertaining to supervised experience requirements and to provide guidance and clarification to trainees and supervisors before training begins. Training programs may tailor training experiences to meet licensure requirements based on the rule; potential applicants also obtain clarity of the training requirements for licensure prior to applying.
R4-26-405. Coursework Requirement	The objective of the rule is to provide the specific criteria that the Board applies to determine whether an applicant's academic coursework meets requirements for licensure as required by A.R.S. § 32-2091.03(A). Potential applicants also obtain clarity of the academic requirements for licensure prior to applying.
R4-26-406. Ethical Standard	The objective of the rule is to incorporate by reference the ethical standards contained in the Ethics Code for Behavior Analysts (Code) adopted by the Behavior Analyst Certification Board (BACB) effective January 1, 2022, for compliance with A.R.S. § 32-2091(12)(dd). This rule informs licensees and the public that Arizona licensed behavior analysts are to adhere to the ethical standards and principles of the Code.
R4-26-407	This rule has been repealed.
R4-26-408. License Renewal	Pursuant to A.R.S. § 32-2091.07, the objective of the rule is to set forth the deadlines for timely renewal of licenses, specify the contents of an application for renewal of licenses, and provide information pertaining to the continuing education audit conducted by the Board. This rule informs licensees what is required information to provide with a license renewal application, outlines the license renewal process, and it provides clarification pertaining to the continuing education audit.

R4-26-409. Continuing Education Requirement	The objective of the rule is to establish the continuing education requirements authorized under A.R.S. § 32-2091.07(E). This rule provides specific continuing education requirements licensees must complete, identifies what options are available to licensees with respect to continuing education, and explains what constitutes qualifying activities and activity providers.
R4-26-410. Voluntary Inactive Status	The objective of the rule is to establish the specific requirements pursuant to A.R.S. § 32-2091.06(E) for license reinstatement from inactive to active status, and for compliance with the requirement to maintain and update professional knowledge and capability to practice as a behavior analyst. This rule clarifies the reinstatement process for inactive licensees who wish to change that status, and prescribes the continuing education hours required for reinstatement.
R4-26-411. License Reinstatement	The objective of this rule is to specify the requirements and procedures for applying for licensure reinstatement from inactive to active status pursuant to A.R.S. §§ 32-2091.06(G) and 32-2091.07. This rule clarifies the application process for inactive licensees who wish to understand and comply with the requirements.
R4-26-412. Client Records	The objective of this rule is to clarify the manner in which a licensee is required to maintain confidential client records in accordance with A.R.S. §§ 32-2091(2) and 32-2091.13. This rule protects the public by enforcing that confidential information is not disclosed except under certain specific circumstances.
R4-26-413. Change of Name, Mailing Address, E-mail Address, or Telephone Number	The objective of this rule is to provide notice to licensees the Board communicates with them using the information the licensee has provided pursuant to A.R.S. §§ 32-2091.06(F) and 32-2091.07(C). This requirement helps ensure a licensee is aware of the requirement and the importance to keep the Board apprised of changes in contact information.
R4-26-414. Complaints and Investigations	The objective of this rule is to specify who may file a complaint, and what is required of a complainant under the authority of A.R.S. §32-2091.09(A). This rule brings clarity to what is necessary to effectively facilitate the Board's investigation.
R4-26-415. Informal Interview	The objective of the rule is to set forth the process used by the Board to notice a licensee prior to conducting an informal interview, as well as the process for conducting an informal interview in accordance with A.R.S. § 32-2081(I). This rule provides procedural guidelines to licensees, attorneys, complainants, as well as information to the general public.
R4-26-416. Rehearing or Review of Decision	The objective of this rule is to specify the procedures and standards for requesting a rehearing or review of a Board decision under A.R.S. § 41-1092.09 and 41-1062(B). This rule provides procedural information for licensees and their attorneys who may wish to file a motion for rehearing or review under A.R.S. § 12-901.
R4-26-417. Licensing Time Frames	Pursuant to A.R.S. § 41-1073, the objective of the rule is to set forth the general time frames for completion of applications for licensure filed with the Board. This rule provides current or future applicants with due process time frames in which to expect certain application notices and a decision by the Board regarding the application for licensure.
R4-26-418. Mandatory Reporting Requirement	The objective of this rule is to inform a licensee of the statutory requirement that the licensee is required by A.R.S. §32-3208 to timely notify the Board of certain criminal charges. This rule enables the Board to fulfill its obligation to protect the public.

**3. Are the rules effective in achieving their objectives?**

**Yes**  **No**

The Board's reviews of the rules at various points in time in 2020 and in 2021 concluded that the rules are generally

effective in achieving their objectives. The Board effectively protects the public within its statutory authority by evaluating applicant's qualifications for licensure; investigating allegations of unprofessional conduct; adjudicating complaints; and taking appropriate remedial, corrective, and disciplinary action.

4. Are the rules consistent with other rules and statutes? Yes  No

5. Are the rules enforced as written? Yes  No

The Board enforces the rules as written, and in a consistent and fair manner. No complaints concerning the Board's enforcement of the rules have been submitted to the Governor's Regulatory Review Council.

6. Are the rules clear, concise, and understandable? Yes  No

7. Has the agency received written criticisms of the rules within the last five years? Yes No

8. Economic, small business, and consumer impact comparison:

The economic impact of the rules has not differed from original economic impact statements at adoption of rules. All rules made have had minimal or no economic impact on the Board, other state agencies, private entities, small businesses, and consumers. In this comparison, Minimal means less than \$1,000, moderate means \$1,000, to \$10,000 and substantial means more than \$10,000.

The Board collected \$157,985 in behavior analyst program revenue in fiscal year 2021. This revenue primarily consisted of application and licensing fees, with a small amount of revenue collected for other services (such as fees collected for processing public records requests). The Board has 4.5 FTEs; approximately 1.75 FTEs are assigned to the regulatory responsibilities of behavior analysts.

9. Has the agency received any business competitiveness analyses of the rules? Yes No

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

In the 2017 five-year-review report, the Board indicated it did not intend to amend or repeal any of the reviewed rules. However, new statutory requirements, stakeholder requests, shifting education and training requirements of the BACB, and the identification of superfluous fees have prompted the Board to amend certain rules in 2020, and again in a rulemaking scheduled for review by the Governor's Regulatory Review Council during its October 4, 2022 meeting.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

Notwithstanding any costs imposed by statutes or caused by the rules of other agencies, the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective.

12. Are the rules more stringent than corresponding federal laws? Yes No

There is no federal law specifically applicable to the reviewed rules.

**13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. §41-1037 or explain why the agency believes an exception applies:**

All the reviewed rules were adopted after July 29, 2010. All the licenses for which a fee is established under R4-26-402 comply with A.R.S. § 41-1037 because they are issued to qualified individuals to conduct activities that are substantially similar in nature.

**14. Proposed course of action**

Consistent with the Board's ongoing review of the effectiveness of the rules, the Board is currently proposing some revisions to certain rules that include eliminating unnecessary fees, adding language reflecting the new fingerprint clearance card application requirement (enacted in statute in 2021), defining a reciprocity application pathway, updating coursework requirements to align with those of the Behavior Analyst Certification Board (BACB), and identifying additional continuing education specifications and options for license renewal.

STATE	APPLICATION FEE	RENEWAL FEE	# OF CONTINUING EDUCATION UNITS	APPLICATION PROCESSING TIME FRAMES?
CT	\$ 350.00	\$ 175.00	30 (Consistent with the BACB requirements)	None

<b>Regulatory Cost per Licensee/Applicant</b>	<b>\$421</b>	<b>\$422</b>
<b>Per Licensee fee (90%) less credit card fees</b>	<b>\$445</b>	<b>\$445</b>

**§ R4-26-401. Definitions**

A. The definitions in A.R.S. §32-2091 apply in this Article.

B. Additionally, in this Article:

1. "Accredited" means an institution of higher education:

a. In the U.S. is listed with the Council for Higher Education Accreditation,

b. In Canada is a member of the Universities Canada, and

c. Outside of the U.S. or Canada is determined by a member of the National Association of Credential Evaluation Services to have standards substantially similar to those of an institution of higher education in the U.S. or Canada.

2. "Advertising" means any media used to disseminate information regarding the qualifications of a behavior analyst in order to solicit clients for behavior analysis services, regardless of whether the behavior analyst pays for the advertising.

3. "Applicant" means an individual who applies to the Board for an initial or renewal license.

4. "BACB" means the Behavior Analyst Certification Board, Inc.<sup>®</sup>.

5. "Confidential information" means:

a. Minutes of an executive session of the Board except as provided under A.R.S. §38-431.03(B);

b. A record that is classified as confidential by a statute or rule applicable to the Board;

c. Materials relating to an investigation by the Board, including a complaint, response, client record, witness statement, investigative report, and any information relating to a client's diagnosis, treatment, or personal family life; and

d. The following regarding an applicant or licensee:

i. College or university transcripts if requested from the Board by a person other than the applicant or licensee;

ii. Home address, telephone number, and e-mail address;

iii. Test scores;

iv. Date of birth;

v. Place of birth; and

vi. Social Security number.

6. "Gross negligence" means an extreme departure from the ordinary standard of care.

7. "Inactive status" means a behavior analyst maintains a license as a behavior analyst but is prohibited from practicing behavior analysis or holding oneself out as practicing behavior analysis in Arizona.

8. "License period" means:

a. For a licensee who holds an odd-numbered license, the two years between the first day of the month after the licensee's birth month of one odd-numbered year and the last day of the licensee's birth month of the next odd-numbered year; and

b. For a licensee who holds an even-numbered license, the two years between the first day of the month after the licensee's birth month of one even-numbered year and the last day of the licensee's birth month of the next even-numbered year.

9. "Mitigating circumstances that prevent resolution" means factors the Board considers in reviewing allegations against an applicant or licensee of unprofessional conduct occurring in another regulatory jurisdiction when the allegations would not prohibit licensure in Arizona. The factors may include:

a. Nature of the alleged conduct,

b. Severity of the alleged conduct,

c. Recentness of the alleged conduct,

d. Actions taken by the applicant to remedy potential violations, and

e. Whether the alleged conduct was an isolated incident or part of a recurring pattern.

10. "Party" means the Board, an applicant, a licensee, or the state.

11. "Psychometric testing materials" means manuals, instruments, protocols, and questions or stimuli used in testing.

12. "Raw test data" means test scores, client responses to test questions or stimuli, and a behavior analyst's notes and recordings concerning client statements and behavior during examination.

13. "Regulatory jurisdiction" means a state or territory of the United States, the District of Columbia, or a foreign country with authority to grant or deny entry into a profession or occupation.

14. "Renewal year" means:

a. Each odd-numbered year for a licensee who holds an odd-numbered license, and

b. Each even-numbered year for a licensee who holds an even-numbered license.

15. "Supervised experience" means supervised independent fieldwork, practicum, or intensive practicum.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-402. Fees and Charges**

A. As specifically authorized by A.R.S. §§32-2091.01(A) and 32-2091.07(B), the Board establishes and shall collect the following fees:

1. Application for an active license: \$350;
2. Renewal of an active license: \$500;
3. Renewal of an inactive license: \$85;
4. Issuance of an initial license: \$500; and
5. Reinstatement of expired license: \$200.

B. Under the specific authority provided by A.R.S. §36-3606(A)(3), the Board establishes and shall collect the following fee to register as an out-of-state health care provider of telehealth services: \$600.

C. As specifically authorized by A.R.S. §32-2091.01(B), the Board establishes and shall collect the following charges for the services specified:

1. Duplicate license: \$25;
2. Duplicate renewal receipt: \$5;
3. Copy of the Board's statutes and rules: \$5;
4. Verification of a license: \$2;
5. Audio recording of a Board meeting: \$10 per meeting;
6. Electronic medium containing the name and address of all licensees: \$.05 per name;
7. Customized electronic medium containing the name and address of all licensees: \$.25 per name;
8. Customized electronic medium: \$.35 per name; and
9. Copy of Board records, letters, minutes, applications, files, policy statements, and other non-confidential documents: \$.25 per page.

D. Except as provided by law, including A.R.S. §41-1077, the fees listed in subsections (A) and (B) are not refundable.

**History:**

**Ariz. Admin. Code R4-26-402 Fees and Charges (Arizona  
Administrative Code (2022 Edition))**

---

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final exempt rulemaking at 27 A.A.R. 1272, effective 9/1/2021.

**§ R4-26-403. Application for Initial License**

A. An individual who wishes to practice as a behavior analyst and is qualified under A.R.S. §32-2091.02 shall complete and submit an application form, which is available from the Board office and on its website.

B. Additionally, an applicant shall submit:

1. An original, un-retouched, passport-quality photograph that is no larger than 1.5 X 2 inches in size and taken no more than 60 days before the date of application;
2. The application fee required under R4-26-402;
3. A written request that Board staff verify with the BACB that the applicant passed the examination referenced in R4-26-404;
4. As required under A.R.S. §41-1080(A), the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law; and
5. The Board's Mandatory Confidential Information form.

C. Additionally, an applicant shall ensure that the following is submitted directly to the Board:

1. Verification of supervised experience that meets the standards specified in R4-26-404.2. For the purpose of licensure, the Board shall accept the following as verification of supervised experience:
  - a. From the supervisor of the experience:
    - i. A copy of the BACB final experience verification form, signed by the supervisor, submitted by the applicant to the BACB when the applicant applied to the BACB for certification; or
    - ii. A completed Board verification form; or
  - b. From the applicant. If the applicant demonstrates to the Board that a supervisor cannot be located, or at the request of the Board, the applicant may submit a copy of each BACB final experience verification form the applicant submitted to the BACB when the applicant applied to the BACB for certification; and
  - c. If the Board requires additional information, the Board shall accept from the applicant or supervisor of the experience:

- i. copy of the plan required under R4-26-404.2(C)(6), and
  - ii. Letters or other documentation from third parties who observed the supervisory relationship;
2. Official transcript for the graduate degree required under R4-26-404.1 submitted by the accredited institution of higher education that awarded the degree;
  3. Official transcript or other official document demonstrating the applicant completed the coursework required under R4-26-405 submitted by the accredited institution of higher education or BACB-approved program in which the coursework was completed; and
  4. Verification of licensure, certification, or registration by another regulatory jurisdiction submitted by the regulatory jurisdiction.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 24 A.A.R. 3100, effective 12/11/2018. Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-404. Examination Requirement**

To be licensed as a behavior analyst in Arizona, an individual shall take and pass the examination administered by the BACB for Board Certified Behavior Analysts as part of its certification process.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017.

**§ R4-26-404.1. Education Requirement**

A. This Section does not apply to an applicant who was certified as a behavior analyst by the BACB before January 1, 2015.

B. To be licensed as a behavior analyst in Arizona, an individual shall have a master's degree or higher completed:

1. From an accredited institution of higher education and
2. In a program that meets the requirements specified by the BACB.

**History:**

Adopted by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-404.2. Supervised Experience Requirement**

A. Application of this Section:

1. This Section does not apply to an individual who was certified by the BACB with at least 1500 hours of supervised experience before January 1, 2015; and

2. This Section applies in part to an individual who was certified by the BACB with fewer than 1500 hours of supervised experience before January 1, 2015. To be licensed in Arizona, the individual shall complete additional hours of supervised experience to meet the 1500-hour requirement under A.R.S. §32-2091.03 and ensure all hours of supervised experience obtained after December 31, 2014, meet the requirements of this Section.

B. To be licensed as a behavior analyst in Arizona, an individual shall have completed 1500 hours of supervised experience. The Board shall accept, for the purpose of licensure, hours of supervised experience obtained on or after January 1, 2015, that meet the following standards:

1. Supervised independent fieldwork. The supervisee shall be supervised at a frequency that meets the standards of the BACB at the time of supervision;

2. Practicum. The supervisee shall:

a. Participate in a practicum in behavior analysis within a program approved by the BACB;

b. Achieve a passing grade in the practicum;

c. Obtain graduate-level academic credit for the practicum; and

d. Be supervised at a frequency that meets the standard of the BACB at the time of supervision;

3. Intensive practicum. The supervisee shall:

a. Participate in an intensive practicum in behavior analysis within a program approved by the BACB;

b. Achieve a passing grade in the intensive practicum;

c. Obtain graduate-level academic credit for the intensive practicum; and

d. Be supervised at a frequency that meets the standards of the BACB at the time of supervision;

**Ariz. Admin. Code R4-26-404.2 Supervised Experience  
Requirement (Arizona Administrative Code (2022 Edition))**

---

4. Combination of experience categories. The supervisee may accrue hours of supervised experience in a single category or may combine any two or three categories listed in subsections (B)(1) through (3). However, the supervisee shall accrue supervised experience in only one category in each supervisory period; and
5. For all categories of supervised experience, the supervisee shall accrue:
  - a. No fewer than 20 hours and no more than 130 hours, including time spent in supervision, each month; or
  - b. The number of hours that meets the standards of the BACB at the time of supervision.
- C. Standards for supervised experience.
  1. Onset of supervised experience. The Board shall not accept, for the purpose of licensure, hours of supervised experience completed before attending courses required under R4-26-405. However, the Board shall accept hours of supervised experience completed concurrent with attending courses required under R4-26-405.
  2. Appropriate activities. The Board shall accept, for the purpose of licensure, hours of supervised experience that demonstrate participation in supervised experiences with various populations, at various sites, with multiple supervisors, and including all of the following activity areas:
    - a. Conducting assessments related to behavioral intervention;
    - b. Designing, implementing, and monitoring skill-acquisition and behavior-reduction programs;
    - c. Overseeing implementation of behavior-analytic programs by others;
    - d. Training, designing behavioral systems, and managing performance; and
    - e. Performing other activities directly related to behavior analysis such as attending planning meetings regarding the behavior analytic program, researching literature related to the program, and talking with others about the program.
  3. Appropriate clients. The Board shall accept, for the purpose of licensure, hours of supervised experience with appropriate clients.
    - a. An appropriate client is one for whom behavior-analytic services are suitable.

b. A client is not appropriate if:

- i. The client is related to the supervisee,
- ii. The client's primary caretaker is related to the supervisee, or
- iii. The supervisee is the client's primary caretaker.

4. Supervisor qualifications. The Board shall accept, for the purpose of licensure, hours of supervised experience only if the supervisor:

a. Was licensed by the state in which the supervision occurred during the period of supervised experience; or

b. If licensure of behavior analysts was not available or not in effect in the state in which the supervision occurred or during the period of supervised experience, was certified as a behavior analyst by the BACB; and

c. Was not related to, subordinate to, or employed by the supervisee during the period of supervised experience. Employment does not include payment made to the supervisor by the supervisee for supervisory services.

5. Nature of supervision. The Board shall accept, for the purpose of licensure, hours of supervised experience that are effective in improving and maintaining the behavior-analytic, professional, and ethical skills of the supervisee.

a. Effective supervision includes:

i. Developing performance expectations for the supervisee;

ii. Observing the supervisee and providing performance feedback on behavior-analytic activities with clients in the natural environment. In person, on-site observation is preferred but use of web cameras, video record, video conferencing, or a similar means that provides synchronous observation is acceptable;

iii. Modeling technical, professional, and ethical behavior for the supervisee;

iv. Guiding behavioral case conceptualization, problem solving, and decision making skills of the supervisee;

v. Reviewing written materials prepared by the supervisee such as behavior programs, data sheets, and reports;

vi. Providing oversight and evaluation of the effects of the supervisee's delivery of behavioral service; and

vii. Evaluating the effects of supervising the supervisee; and

b. Effective supervision may be conducted:

i. Individually for at least half of the total supervised hours in each supervisory period; and

ii. In groups of two to 10 supervisees for no more than half of the total supervised hours in each supervisory period.

6. Supervision plan. The Board shall accept, for the purpose of licensure, hours of supervised experience for which the supervisee and supervisor executed a written plan before starting the supervised experience, which includes the following:

a. States the responsibilities of both the supervisor and supervisee;

b. Requires the supervisor to complete eight hours of supervision training provided by BACB;

c. Includes a description of appropriate activities and instructional objectives;

d. Specifies the measurable circumstance under which the supervisor will complete the supervisee's Experience Verification Form;

e. Delineates the consequences if either supervisor or supervisee does not comply with the plan;

f. Requires the supervisee to obtain written permission from the supervisee's employer or manager when applicable; and

g. Requires both the supervisor and supervisee to comply with the ethical standard specified at R4-26-406.

7. Multiple supervisors or settings. The Board shall accept, for the purpose of licensure, hours of supervised experience provided by multiple supervisors or at multiple settings if all the hours of supervised experience meet the standards specified in subsections (C)(1) through (7) (6).

**History:**

Adopted by final rulemaking at 24 A.A.R. 3100, effective 12/11/2018.

Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-405. Coursework Requirement**

A. This Section does not apply to an applicant who was certified as a behavior analyst by the BACB before January 1, 2015.

B. To be licensed as a behavior analyst in Arizona, an individual shall complete, as part of or in addition to the coursework necessary to obtain the graduate degree required under R4-26-404.1, 270 classroom hours of graduate-level instruction. The individual shall ensure that the classroom hours include the following content areas:

1. Ethical and professional conduct in behavior analysis: 45 hours;
2. Concepts and principles of behavior analysis: 45 hours;
3. Research methods in behavior analysis: 45 hours:
  - a. Measurement and data analysis: 25 hours; and
  - b. Experimental design: 20 hours;
4. Applied behavior analysis: 105 hours:
  - a. Fundamental elements of behavior change and specific behavior change procedures: 45 hours;
  - b. Identification of the problem and assessment: 30 hours;
  - c. Intervention and behavior change considerations: 10 hours;
  - d. Behavior change systems: 10 hours; and
  - e. Implementation, management, and supervision: 10 hours; and
- 5.

Discretionary content related to behavior analysis: 30 hours.

C. The Board shall accept classroom hours of graduate-level instruction completed at an accredited institution of higher education or in a program approved by the BACB.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017.

**§ R4-26-406. Ethical Standard**

The In fulfilling its responsibilities under law, the Board shall rely on the most current version of the BACB Professional and Ethical Compliance Code for Behavior Analysts, published by the BACB and available for review at the Board office and online at [www.BACB.com](http://www.BACB.com) unless the Board determines public health and safety is not sufficiently protected by the current version of the BACB Professional and Ethical Compliance Code for Behavior Analysts.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-408. License Renewal**

A. A license issued by the Board, whether active or inactive, expires on the last day of a licensee's birth month during the licensee's renewal year.

B. The Board shall provide a licensee with 60 days' notice of the license renewal deadline. Failure to receive the notice does not excuse failure to renew timely.

C. To renew a license, a licensee shall, on or before the last day of the licensee's birth month during the licensee's renewal year, submit to the Board a renewal application form, which is available from the Board office and on its website.

D. Additionally, to renew a license, a licensee shall submit:

1. The license renewal fee required under R4-26-402; and
2. If the documentation previously submitted under R4-26-404(B) was a limited form of work authorization issued by the federal government, evidence that the work authorization has not expired

E. If a completed application is timely submitted under subsections (C) and (D) to renew an active license, the licensee may continue to practice behavior analysis under the active license until notified by the Board that the application for renewal has been approved or denied. If the Board denies license renewal, the licensee may continue to practice behavior analysis until the last day for seeking review of the Board's decision or a later date fixed by a reviewing court.

F. Under A.R.S. §32-2091.07, the license of a licensee who fails to submit a renewal application on or before the last day of the licensee's birth month during the licensee's renewal year expires and the licensee shall immediately stop practicing as a behavior analyst in Arizona.

G. A behavior analyst whose license expires under subsection (F) may have the license reinstated by submitting the following to the Board within two months after last day of the licensee's birth month during the licensee's renewal year:

1. The license renewal application required under subsection (C) and the document required under subsection (D)(2),
2. A sworn affidavit that the applicant has not practiced as a behavior analyst in Arizona since the applicant's license expired, and

3. The license renewal and license reinstatement fees.

H. A behavior analyst whose license expires under subsection (F) and who fails to have the license reinstated under subsection (G) may have the license reinstated by:

1. Complying with subsection (G) within one year after the last day of the licensee's birth month during the licensee's renewal year, and
2. Providing proof of competency and qualifications to the Board.

I. A behavior analyst whose license expires under subsection (F) and who fails to have the license reinstated under subsection (G) or (H) may be licensed again only by complying with R4-26-403.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-409. Continuing Education Requirement**

A. A licensee shall complete a minimum of 30 hours of continuing education during each license period. A licensee shall ensure that at least four hours of continuing education addresses ethics.

B. During a licensee's first license period, the licensee shall complete a pro-rated number of continuing education hours. To determine the number of continuing education hours required during the first license period, the licensee shall multiply the number of whole months from the month of license issuance to the end of the license period by 1.25.

C. A licensee shall ensure that each continuing education program provides the necessary understanding of current developments, skills, or procedures related to the practice of behavior analysis. The following provide the necessary understanding of current developments, skills, or procedures related to the practice of behavior analysis:

1. College or university graduate coursework that directly relates to behavior analysis and is provided by an accredited educational institution: 15 hours of continuing education for each semester hour completed and 10 hours of continuing education for each quarter hour completed; a course syllabus and transcript are required for documentation;
2. Continuing education programs offered by a BACB-approved provider: One hour of continuing education for each hour of participation; a certificate or letter from the BACB-approved provider is required for documentation;
3. Self-study or correspondence course that is directly related to behavior analysis and offered by a BACB-approved provider or approved or offered by an accredited educational institution: Hours of continuing education determined by the course provider; a certificate or letter from the BACB-approved provider or a course syllabus and transcript from the accredited educational institution are required for documentation;
4. Online course that is directly related to behavior analysis and offered by a BACB-approved provider or approved or offered by an accredited educational institution: Hours of continuing education determined by the course provider; a certificate or letter from the BACB-approved provider or a course syllabus and transcript from the accredited educational institution are required for documentation;
5. Teaching a continuing education program offered by a BACB-approved provider or teaching a graduate university or college course offered by an accredited educational institution: One hour of continuing education for

each hour taught; for graduate courses taught, 15 hours of continuing education for each semester hour completed and 10 hours of continuing education for each quarter hour completed;

6. Credentialing activities or events pre-approved for continuing education and initiated by the BACB: One hour of continuing education for each hour of participation; documentation from the BACB is required;

7. Publication of a peer-reviewed article or text book on the practice of behavior analysis or serving as a reviewer or action editor of an article pertaining to behavior analysis: eight hours of continuing education for one publication and one hour of continuing education for one review; and

8. Attending a Board meeting: Three hours for attending a morning or afternoon session of a Board meeting and six hours for attending a full-day Board meeting.

D. The number of hours of continuing education is limited as follows:

1. No more than 50 percent of the required hours may be obtained from teaching a continuing education program or course under subsection (C)(5). A licensee shall not obtain continuing education hours for teaching the same continuing education program or course more than once during each licensing period. A licensee shall earn no continuing education hours for participating as a member of a panel at a continuing education program or course;

2. No more than 25 percent of the required hours may be obtained from continuing education under each of subsections (C)(3), (6) and (7).

3. No more than six of the required hours may be obtained under subsection (C)(8). Hours obtained under subsection (C)(8) may be used to complete the ethics requirement under subsection (A).

4. Hours obtained in excess of the minimum required during a license period shall not be carried over to a subsequent license period.

E. A licensee shall obtain a certificate or other evidence of attendance from the provider of each continuing education program or course attended that includes the following:

1. Name of the licensee;

2. Title of the continuing education;

3. Name of the continuing education provider;

4. Date, time, and location of the continuing education; and

5. Number of hours of continuing education obtained.

F. A licensee shall maintain the evidence of attendance described in subsection (E) for two licensing periods and make the evidence available to the Board upon request.

G. The Board may audit a licensee's compliance with the continuing education requirement. The Board may deny license renewal or take other disciplinary action against a licensee who fails to obtain or document the required continuing education hours. The Board may discipline a licensee who commits fraud, deceit, or misrepresentation regarding the continuing education hours.

H. A licensee who cannot comply with the continuing education requirement for good cause may seek an extension of time in which to comply by submitting a written request to the Board with the timely submission of the renewal application required under R4-26-408.

1. Good cause includes but is not limited to illness or injury of the licensee or a close family member, death of a close family member, birth or adoption of a child, military service, relocation, natural disaster, financial hardship, or residence in a foreign country for at least 12 months of the license period.

2. The Board shall not grant an extension longer than one year.

3. A licensee who obtains hours of continuing education during an extension of time provided by the Board shall ensure the hours are reported only for the license period extended.

4. A licensee who cannot comply with the continuing education requirement within an extension may apply to the Board for inactive license status under A.R.S. §32-2091.06(E).

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final rulemaking at 24 A.A.R. 3100, effective 12/11/2018.

**§ R4-26-410. Voluntary Inactive Status**

A. A licensed behavior analyst may request that the Board place the license on inactive status for one of the following reasons:

1. The behavior analyst no longer provides behavior analysis services in Arizona,
2. The behavior analyst is retired, or
3. The behavior analyst is physically or mentally incapacitated or otherwise disabled.

B. To place a license on inactive status, a licensee shall comply with R4-26-408.

C. To remain licensed, a licensee on inactive status shall comply with R4-26-408 on or before the last day of the licensee's birth month during the licensee's renewal year.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017.

**§ R4-26-411. License Reinstatement**

A licensee seeking reinstatement from an inactive to an active license shall:

1. Comply with the provisions of R4-26-408(C) and (D);
2. Submit evidence of completing a pro-rated number of hours of continuing education. The licensee shall calculate the number of continuing education hours required by multiplying the number of whole months that the license was on inactive status by 1.25; and
3. Complete any other requirements the Board determines are necessary to ensure that the licensee has maintained and updated the licensee's ability to practice as a behavior analyst.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3).

**§ R4-26-412. Client Records**

A. A licensee shall not condition release of a client's record on payment for services by the client or a third party.

B. A licensee shall release a client's raw test data to another licensed behavior analyst only after obtaining the client's informed, written consent to the release. Without a client's informed, written consent, a licensee shall release the client's raw test data only to the extent required by law or under court order compelling production.

C. A licensee shall retain all client records under the licensee's control for at least six years from the date of the last client activity. If a client is a minor, the licensee shall retain the client's record for at least three years past the client's 18th birthday or six years from the date of the last client activity, whichever is longer.

D. Audio or video tapes created primarily for training or supervisory purposes are exempt from the requirement of subsection (C).

E. A licensee who is notified by the Board or municipal, state, or federal officials of an investigation or pending case shall retain all records relating to the investigation or case until the licensee receives written notice that the investigation is complete or the case is closed.

F. A licensee may retain client records in electronic form. The licensee shall ensure that client records in electronic form are stored securely and a backup copy is maintained.

G. The provisions of this Section apply to all licensees including those on inactive status.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3).

**§ R4-26-413. Change of Name, Mailing Address, E-mail Address,  
or Telephone Number**

A. The Board shall communicate with a licensee using the contact information provided to the Board. To ensure timely communication from the Board, a licensee shall notify the Board, in writing, within 30 days of any change of name, mailing address, e-mail address, or residential or business telephone number.

B. A licensee who reports a name change shall submit to the Board legal documentation that explains the name change.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3).

**§ R4-26-414. Complaints and Investigations**

A. Anyone, including the Board, may file a complaint. A complainant shall ensure that a complaint filed with the Board involves:

1. An individual licensed under this Article; or
2. An individual, including an applicant, believed to be engaged in the unlicensed practice of behavior analysis.

B. Complaint requirements. A complainant shall:

1. Submit the complaint to the Board in writing; and
2. Provide the following information:
  - a. Name and business address of licensee or other individual who is the subject of complaint;
  - b. Name and address of complainant;
  - c. Allegations constituting unprofessional conduct;
  - d. Details of the complaint with pertinent dates and activities;
  - e. Whether the complainant has contacted any other organization regarding the complaint; and
  - f. Whether the complainant has contacted the licensee or other individual concerning the complaint and if so, the response, if any.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017.

**§ R4-26-415. Informal Interview**

A. As authorized by A.R.S. §32-2091.09, the Board may facilitate investigation of a complaint by conducting an informal interview. The Board shall send written notice of an informal interview to the individual who is the subject of the complaint, by personal service or certified mail, return receipt requested, at least 30 days before the informal interview.

B. The Board shall ensure that the written notice of informal interview contains the following information:

1. The time, date, and place of the informal interview;
2. An explanation of the informal nature of the proceedings;
3. The individual's right to appear with legal counsel who is authorized to practice law in Arizona or without legal counsel;
4. A statement of the allegations and issues involved with a citation to relevant statutes and rules;
5. The individual's right to a formal hearing under A.R.S. Title 41, Chapter 6, Article 10 instead of the informal interview;
6. The licensee's right, as specified in A.R.S. §32-3206, to request a copy of information the Board will consider in making its determination; and
7. Notice that the Board may take disciplinary action as a result of the informal interview if it finds the individual violated A.R.S. Title 32, Chapter 19.1, Article 4, or this Article;

C. The Board shall ensure that an informal interview proceeds as follows:

1. Introduction of the respondent and, if applicable, the complainant, any other witnesses, and legal counsel for the respondent;
2. Introduction of the Board members, staff, and Assistant Attorney General present;
3. Swearing in of the respondent, complainant, and witnesses;
4. Brief summary of the allegations and purpose of the informal interview;
5. Optional opening comment by the respondent and complainant;
6. Questioning of the respondent and witnesses by the Board;

7. Questioning of the complainant by the respondent through the Chair;
8. Optional additional comments by the respondent and complainant; and
9. Deliberation by the Board.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 26 A.A.R. 1017, effective 7/4/2020.

**§ R4-26-416. Rehearing or Review of Decision**

A. The Board shall provide for a rehearing and review of its decisions under A.R.S. Title 41, Chapter 6, Article 10.

B. Except as provided in subsection (H), a party is required to file a motion for rehearing or review of a decision of the Board to exhaust the party's administrative remedies.

C. A party may amend a motion for rehearing or review at any time before the Board rules on the motion.

D. The Board may grant a rehearing or review for any of the following reasons materially affecting a party's rights:

1. Irregularity in the proceedings of the Board or any order or abuse of discretion that deprived the moving party of a fair hearing;
2. Misconduct of the Board, its staff, or an administrative law judge;
3. Accident or surprise that could not have been prevented by ordinary prudence;
4. Newly discovered material evidence that could not, with reasonable diligence, have been discovered and produced at the hearing;
5. Excessive or insufficient penalty;
6. Error in the admission or rejection of evidence or other errors of law occurring at the hearing or during the progress of the proceedings; and
7. The findings of fact or a decision is not justified by the evidence or is contrary to law.

E. The Board may affirm or modify a decision or grant a rehearing or review to all or some of the parties on all or some of the issues for any of the reasons listed in subsection (D). An order modifying a decision or granting a rehearing or review shall specify with particularity the grounds for the order. If a rehearing or review is granted, the rehearing or review shall cover only the matters specified in the order.

F. Within 30 days after the date of a decision and after giving the parties notice and an opportunity to be heard, the Board may, on its own initiative, order a rehearing or review of its decision for any reason it might have granted a rehearing or review on motion of a party. The Board may grant a motion for rehearing or review, timely served, for a reason not stated in the

motion. An order granting a rehearing or review shall specify with particularity the grounds on which the rehearing or review is granted.

G. When a motion for rehearing is based upon affidavits, they shall be served with the motion. An opposing party may, within 15 days after service, serve opposing affidavits.

H. If, in a particular decision, the Board makes a specific finding that the immediate effectiveness of the decision is necessary for preservation of the public health, safety, or welfare and that a rehearing or review of the decision is impracticable, unnecessary, or contrary to the public interest, the decision may be issued as a final decision without an opportunity for a rehearing or review.

I. An application for judicial review of any final Board decision may be made under A.R.S. §12-901 et seq.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3).

**§ R4-26-417. Licensing Time Frames**

A. For the purpose of A.R.S. §41-1073, the Board establishes the following time frames:

1. Initial license.

a. Overall time frame: 120 days,

b. Administrative completeness review time frame: 30 days, and

c. Substantive review time frame: 90 days;

2. Renewal license.

a. Overall time frame: 150 days,

b. Administrative completeness review time frame: 60 days, and

c. Substantive review time frame: 90 days; and

3. Initial registration as an out-of-state health care provider of telehealth services.

a. Overall time frame: 120 days,

b. Administrative completeness review time frame: 30 days, and

c. Substantive review time frame: 90 days.

B. An applicant and the Executive Director of the Board may agree in writing to extend the substantive review and overall time frames by no more than 25% of the overall time frame.

C. The administrative completeness review time frame begins when the Board receives the application materials required under R4-26-403, R4-26-408(C) and (D), or as prescribed under A.R.S. §36-3606. During the administrative completeness review time frame, the Board shall notify the applicant that the application is either complete or incomplete. If the application is incomplete, the Board shall specify in the notice what information is missing.

D. An applicant whose application is incomplete shall submit the missing information to the Board within 240 days for an initial license. Both the administrative completeness review and overall time frames are suspended from the date of the Board's notice under subsection (C) until the Board receives all of the missing information.

E. Upon receipt of all missing information, the Board shall notify the applicant that the application is complete. The Board shall not send a separate notice of completeness if the Board grants or denies a license within the administrative completeness review time frame listed in subsection (A)(1)(b) or (A)(2)(b).

F. The substantive review time frame begins on the date of the Board's notice of administrative completeness.

G. If the Board determines during the substantive review that additional information is needed, the Board shall send the applicant a comprehensive written request for additional information.

H. An applicant who receives a request under subsection (G) shall submit the additional information to the Board within 240 days. Both the substantive review and overall time frames are suspended from the date of the Board's request until the Board receives the additional information.

I. An applicant may receive a 30-day extension of the time provided under subsection (D) or (H) by providing written notice to the Board before the time expires. If an applicant fails to submit to the Board the missing or additional information within the time provided under subsection (D) or (H) or the time as extended, the Board shall close the applicant's file. To receive further consideration, a person whose file is closed shall re-apply.

J. Within the overall time frame listed in subsection (A), the Board shall:

1. Grant a license if the Board determines that the applicant meets all criteria required by statute and this Article; or
2. Deny a license if the Board determines that the applicant does not meet all criteria required by statute and this Article.

K. If the Board grants a license under subsection (J)(1), the Board shall send the applicant a notice explaining that the Board shall issue the license only after the applicant pays the license issuance fee specified under R4-26-402 and pro-rated as prescribed under A.R.S. §32-2091.07(A).

L. If the Board denies a license, the Board shall send the applicant a written notice explaining:

1. The reason for denial, with citations to supporting statutes or rules;
2. The applicant's right to appeal the denial by filing an appeal under A.R.S. Title 41, Chapter 6, Article 10;

3. The time for appealing the denial; and
  4. The applicant's right to request an informal settlement conference.
- M. If a time frame's last day falls on a Saturday, Sunday, or official state holiday, the next business day is the time frame's last day.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3). Amended by final rulemaking at 23 A.A.R. 215, effective 3/5/2017. Amended by final exempt rulemaking at 27 A.A.R. 1272, effective 9/1/2021.

**§ R4-26-418. Mandatory Reporting Requirement**

A. As required by A.R.S. §32-3208, an applicant or licensee who is charged with a misdemeanor involving conduct that may affect client safety or a felony shall provide written notice of the charge to the Board within 10 days after the charge is filed.

B. A list of reportable misdemeanors is available on the Board's website.

**History:**

Section made by final rulemaking at 18 A.A.R. 2490, effective September 11, 2012 (Supp. 12-3).

**§ 32-2063. Powers and duties**

A. The board shall:

1. Administer and enforce this chapter and board rules.
2. Regulate disciplinary actions, the granting, denial, revocation, renewal and suspension of licenses and the rehabilitation of licensees pursuant to this chapter and board rules.
3. Prescribe the forms, content and manner of application for licensure and renewal of licensure and set deadlines for the receipt of materials required by the board.
4. Keep a record of all licensees, board actions taken on all applicants and licensees and the receipt and disbursal of monies.
5. Adopt an official seal for attesting licenses and other official papers and documents.
6. Investigate charges of violations of this chapter and board rules and orders.
7. Subject to title 41, chapter 4, article 4, employ an executive director who serves at the pleasure of the board.
8. Annually elect from among its membership a chairman, a vice chairman and a secretary, who serve at the pleasure of the board.
9. Adopt rules pursuant to title 41, chapter 6 to carry out this chapter and to define unprofessional conduct.
10. Engage in a full exchange of information with other regulatory boards and psychological associations, national psychology organizations and the Arizona psychological association and its components.
11. By rule, adopt a code of ethics relating to the practice of psychology. The board shall base this code on the code of ethics adopted and published by the American psychological association. The board shall apply the code to all board enforcement policies and disciplinary case evaluations and development of licensing examinations.
12. Adopt rules regarding the use of telepractice .
13. Before the board takes action, receive and consider recommendations from the committee on behavior analysts on all matters relating to licensing and regulating behavior analysts, as well as regulatory changes pertaining to

the practice of behavior analysis, except in the case of a summary suspension of a license pursuant to section 32-2091.09, subsection E.

14. Beginning January 1, 2022, require each applicant for an initial or temporary license or a license renewal pursuant to this chapter to have applied for a fingerprint clearance card pursuant to title 41, chapter 12, article 3.1. If an applicant is issued a valid fingerprint clearance card, the applicant shall submit the valid fingerprint clearance card to the board with the completed application. If an applicant applies for a fingerprint clearance card and is denied, the applicant may request that the board consider the application for licensure notwithstanding the absence of a valid fingerprint clearance card. The board, in its discretion, may approve an application for licensure despite the denial of a valid fingerprint clearance card if the board determines that the applicant's criminal history information on which the denial is based does not alone disqualify the applicant from licensure.

B. Subject to title 41, chapter 4, article 4, the board may employ personnel it deems necessary to carry out this chapter. The board, in investigating violations of this chapter, may employ investigators who may be psychologists. The board or its executive director may take and hear evidence, administer oaths and affirmations and compel by subpoena the attendance of witnesses and the production of books, papers, records, documents and other information relating to the investigation or hearing.

C. Subject to section 35-149, the board may accept, expend and account for gifts, grants, devises and other contributions, monies or property from any public or private source, including the federal government. The board shall deposit, pursuant to sections 35-146 and 35-147, monies received pursuant to this subsection in special funds for the purpose specified, and monies in these funds are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

D. Compensation for all personnel shall be determined pursuant to section 38-611.

**History:**

Amended by L. 2021, ch. 210,s. 1, eff. 9/29/2021. Amended by L. 2017, ch. 273,s. 3, eff. 11/1/2017. Amended by L. 2014, ch. 258,s. 2, eff. 7/24/2014. L12, ch 321, sec 62.

**§ 32-2091. Definitions**

In this article, unless the context otherwise requires:

1. "Active license" means a current license issued by the board to a person licensed pursuant to this article.
2. "Adequate records" means records that contain, at a minimum, sufficient information to identify the client, the dates of service, the fee for service, the payments for service and the type of service given and copies of any reports that may have been made.
3. "Behavior analysis" means the design, implementation and evaluation of systematic environmental modifications by a behavior analyst to produce socially significant improvements in human behavior based on the principles of behavior identified through the experimental analysis of behavior. Behavior analysis does not include cognitive therapies or psychological testing, neuropsychology, psychotherapy, sex therapy, psychoanalysis, hypnotherapy and long-term counseling as treatment modalities.
4. "Behavior analysis services" means the use of behavior analysis to assist a person to learn new behavior, increase existing behavior, reduce existing behavior and emit behavior under precise environmental conditions. Behavior analysis includes behavioral programming and behavioral programs.
5. "Behavior analyst" means a person who is licensed pursuant to this article to practice behavior analysis.
6. "Client" means:
  - (a) A person or entity that receives behavior analysis services.
  - (b) A corporate entity, a governmental entity or any other organization that has a professional contract to provide services or benefits primarily to an organization rather than to an individual.
  - (c) An individual's legal guardian for decision making purposes, except that the individual is the client for issues that directly affect the individual's physical or emotional safety and issues that the legal guardian agrees to specifically reserve to the individual.
7. "Exploit" means an action by a behavior analyst who takes undue advantage of the professional association with a client, student or supervisee for the advantage or profit of the behavior analyst.

8. "Health care institution" means a facility that is licensed pursuant to title 36, chapter 4, article 1.
9. "Incompetent as a behavior analyst" means that a person who is licensed pursuant to article 4 of this chapter lacks the knowledge or skills of a behavior analyst to a degree that is likely to endanger the health of a client.
10. "Letter of concern" means an advisory letter to notify a licensee that while there is insufficient evidence to support disciplinary action the board believes the licensee should modify or eliminate certain practices and that continuation of the activities that led to the information being submitted to the board may result in action against the license.
11. "Supervisee" means a person who acts under the extended authority of a behavior analyst to provide behavioral services and includes a person who is in training to provide these services.
12. "Unprofessional conduct" includes the following activities, whether occurring in this state or elsewhere:
- (a) Obtaining a fee by fraud or misrepresentation.
  - (b) Betraying professional confidences.
  - (c) Making or using statements of a character tending to deceive or mislead.
  - (d) Aiding or abetting a person who is not licensed pursuant to this article in representing that person as a behavior analyst.
  - (e) Gross negligence in the practice of a behavior analyst.
  - (f) Sexual intimacies or sexual intercourse with a current client or a supervisee or with a former client within two years after the cessation or termination of treatment. For the purposes of this subdivision, "sexual intercourse" has the same meaning prescribed in section 13-1401.
  - (g) Engaging or offering to engage as a behavior analyst in activities that are not congruent with the behavior analyst's professional education, training and experience.
  - (h) Failing or refusing to maintain and retain adequate business, financial or professional records pertaining to the behavior analysis services provided to a client.
  - (i) Committing a felony, whether or not involving moral turpitude, or a misdemeanor involving moral turpitude. In either case, conviction by a

court of competent jurisdiction or a plea of no contest is conclusive evidence of the commission.

(j) Making a fraudulent or untrue statement to the board or its investigators, staff or consultants.

(k) Violating any federal or state law that relates to the practice of behavior analysis or to obtain a license to practice behavior analysis.

(l) Practicing behavior analysis while impaired or incapacitated to the extent and in a manner that jeopardizes the welfare of a client or renders the services provided ineffective.

(m) Using fraud, misrepresentation or deception to obtain or attempt to obtain a behavior analysis license or to pass or attempt to pass a behavior analysis licensing examination or in assisting another person to do so.

(n) Unprofessional conduct in another jurisdiction that resulted in censure, probation or a civil penalty or in the denial, suspension, restriction or revocation of a certificate or license to practice as a behavior analyst.

(o) Providing services that are unnecessary or unsafe or otherwise engaging in activities as a behavior analyst that are unprofessional by current standards of practice.

(p) Falsely or fraudulently claiming to have performed a professional service, charging for a service or representing a service as the licensee's own if the licensee has not rendered the service or assumed supervisory responsibility for the service.

(q) Representing activities or services as being performed under the licensee's supervision if the behavior analyst has not assumed responsibility for them and has not exercised control, oversight and review.

(r) Failing to obtain a client's informed and written consent to release personal or otherwise confidential information to another party unless the release is otherwise authorized by law.

(s) Failing to make client records in the behavior analyst's possession promptly available to another behavior analyst on receipt of proper authorization to do so from the client, a minor client's parent, the client's legal guardian or the client's authorized representative or failing to comply with title 12, chapter 13, article 7.1.

(t) Failing to take reasonable steps to inform or protect a client's intended victim and inform the proper law enforcement officials if the behavior

analyst becomes aware during the course of providing or supervising behavior analysis services that a client intends or plans to inflict serious bodily harm on another person.

(u) Failing to take reasonable steps to protect a client if the behavior analyst becomes aware during the course of providing or supervising behavior analysis services that a client intends or plans to inflict serious bodily harm on self.

(v) Abandoning or neglecting a client in need of immediate care without making suitable arrangements for continuation of the care.

(w) Engaging in direct or indirect personal solicitation of clients through the use of coercion, duress, undue influence, compulsion or intimidation practices.

(x) Engaging in false, deceptive or misleading advertising.

(y) Exploiting a client, student or supervisee.

(z) Failing to report information to the board regarding a possible act of unprofessional conduct committed by another behavior analyst who is licensed pursuant to this article unless this reporting violates the behavior analyst's confidential relationship with a client pursuant to this article. A behavior analyst who reports or provides information to the board in good faith is not subject to an action for civil damages.

(aa) Violating a formal board order, consent agreement, term of probation or stipulated agreement issued under this article.

(bb) Failing to furnish information in a timely manner to the board or its investigators or representatives if requested or subpoenaed by the board as prescribed by this article.

(cc) Failing to make available to a client or to the client's designated representative, on written request, a copy of the client's record, excluding raw test data, psychometric testing materials and other information as provided by law.

(dd) Violating an ethical standard adopted by the board.

(ee) Representing oneself as a psychologist or permitting others to do so if the behavior analyst is not also licensed as a psychologist pursuant to this chapter.

**§ 32-2091.01. Fees**

A. The board, by a formal vote, shall establish fees for the following relating to the licensure of behavior analysts:

1. An application for an active license.
2. An application for a temporary license.
3. Renewal of an active license.
4. Issuance of an initial license.

B. The board may charge additional fees for services it deems necessary and appropriate to carry out this article. These fees shall not exceed the actual cost of providing the service.

C. The board shall not refund fees except as otherwise provided in this article. On special request and for good cause, the board may return the license renewal fee.

**§ 32-2091.02. Qualifications of applicant**

A person who wishes to practice as a behavior analyst must be licensed pursuant to this article. An applicant for licensure must meet all of the following requirements:

1. Submit an application as prescribed by the board.
2. Be at least twenty-one years of age.
3. Pay all applicable fees prescribed by the board.
4. Have the physical and mental capability to safely and competently engage in the practice of behavior analysis.
5. Not have committed any act or engaged in any conduct that would constitute grounds for disciplinary action against a licensee pursuant to this article.
6. Not have had a professional license or certificate refused, revoked, suspended or restricted in any regulatory jurisdiction in the United States or in another country for reasons that relate to unprofessional conduct. If the board finds that the applicant committed an act or engaged in conduct that would constitute grounds for disciplinary action in this state, the board shall determine to its satisfaction that the conduct has been corrected, monitored and resolved. If the matter has not been resolved, the board shall determine to its satisfaction that mitigating circumstances exist that prevent its resolution.
7. Not have voluntarily surrendered a license or certificate in another regulatory jurisdiction in the United States or in another country while under investigation for reasons that relate to unprofessional conduct. If another jurisdiction has taken disciplinary action against an applicant, the board shall determine to its satisfaction that the cause for the action was corrected and the matter resolved. If the matter has not been resolved by that jurisdiction, the board shall determine to its satisfaction that mitigating circumstances exist that prevent its resolution.
8. Not have a complaint, allegation or investigation pending before another regulatory jurisdiction in the United States or another country that relates to unprofessional conduct. If an applicant has any such complaints, allegations or investigations pending, the board shall suspend the application process and may not issue or deny a license to the applicant until the complaint, allegation or investigation is resolved.

9. Beginning January 1, 2022, have applied for a fingerprint clearance card pursuant to title 41, chapter 12, article 3.1.

**History:**

Amended by L. 2022, ch. 59,s. 75, eff. 9/23/2022. Amended by L. 2021, ch. 210,s. 7, eff. 9/29/2021.

**§ 32-2091.03. Educational and training standards for licensure**

A. An applicant for licensure as a behavior analyst must meet standards adopted by the state board of psychologist examiners, including meeting graduate-level education and supervised experience requirements and passing a national examination. The state board of psychologist examiners shall adopt standards consistent with the standards set by a nationally recognized behavior analyst certification board, except that:

1. The number of hours required for supervised experience must be at least one thousand five hundred hours of supervised work experience .
2. If the experience was obtained in a state that licensed behavior analysts at the time of the supervised work experience, the supervisor must be licensed in the state where the behavior analysis trainee services were provided.

B. The standards adopted for supervised experience must also be consistent with the standards set by a nationally recognized behavior analyst certification board. If the state board of psychologist examiners does not agree with a standard set by a nationally recognized behavior analyst certification board, the state board may adopt an alternate standard.

**History:**

Amended by L. 2021, ch. 210,s. 8, eff. 9/29/2021. Amended by L. 2014, ch. 166,s. 1, eff. 7/24/2014.

**§ 32-2091.04. Reciprocity**

The board may issue a license to a person as a behavior analyst if the person is licensed or certified by a regulatory agency of another state that imposes requirements that are substantially equivalent to those imposed by this article at an equivalent or higher practice level as determined by the board, pays the fee prescribed by the board and meets all of the following requirements:

1. Submits a written application prescribed by the board.
2. Documents to the board's satisfaction proof of initial licensure or certification at an equivalent designation for which the applicant is seeking licensure in this state and proof that the license or certificate is current and in good standing.
3. Documents to the board's satisfaction proof that any other license or certificate issued to the applicant by another state has not been suspended or revoked. If a licensee or certificate holder has been subjected to any other disciplinary action, the board may assess the magnitude of that action and make a decision regarding reciprocity based on this assessment.
4. Meets any other requirements prescribed by the board by rule.

**History:**

Amended by L. 2022, ch. 59,s. 76, eff. 9/23/2022.

**§ 32-2091.06. Temporary licenses; inactive status; reinstatement to active status**

A. If the board requires an additional examination, it may issue a temporary license to a behavior analyst who is licensed or certified under the laws of another jurisdiction if the behavior analyst applies to the board for licensure and meets the educational, experience and first examination requirements of this article.

B. A temporary license issued pursuant to this section is effective from the date the application is approved until the last day of the month in which the applicant receives the results of the additional examination.

C. The board shall not extend, renew or reissue a temporary license or allow it to continue in effect beyond the period authorized by this section.

D. The board's denial of an application for licensure terminates a temporary license.

E. The board may place on inactive status and waive the license renewal fee requirements for a person who is temporarily or permanently unable to practice as a behavior analyst due to physical or mental incapacity or disability. An initial request for the waiver of renewal fees shall be accompanied by the renewal fee for an active license, which the board shall return if the waiver is granted. The board shall judge each request for the waiver of renewal fees on its own merits and may seek the verification it deems necessary to substantiate the facts of the situation. A behavior analyst who is retired is exempt from paying the renewal fee. A behavior analyst may request voluntary inactive status by submitting to the board an application on a form prescribed by the board and an affirmation that the behavior analyst will not practice as a behavior analyst in this state for the duration of the voluntary inactive status and by paying the required fee as prescribed by the board by rule.

F. A behavior analyst who is on any form of inactive status shall renew the inactive status every two years by submitting a renewal form provided by the board and paying any applicable fee as prescribed by the board by rule. A notice to renew is fully effective by mailing the renewal application to the licensee's last known address of record in the board's file. Notice is complete at the time of its deposit in the mail. A behavior analyst who is on inactive status due to physical or mental incapacity or disability or retirement shall use the term "inactive" to describe the person's status and shall not practice as a behavior analyst.

**ARS 32-2091.06 Temporary licenses; inactive status;  
reinstatement to active status (Arizona Revised Statutes (2022  
Edition))**

---

G. A behavior analyst on inactive status may request reinstatement of the license to active status by applying to the board. The board shall determine whether the person has been or is in violation of any provisions of this article and whether the person has maintained and updated the person's professional knowledge and capability to practice as a behavior analyst. The board may require the person to take or retake the licensure examinations and may require other knowledge or skill training experiences. If approved for active status, the person shall pay a renewal fee that equals the renewal fee for the license to be reinstated.

H. Beginning January 1, 2022, an applicant for a temporary license pursuant to this section shall have applied for a fingerprint clearance card pursuant to title 41, chapter 12, article 3.1.

**History:**

Amended by L. 2021, ch. 210, s. 9, eff. 9/29/2021.

**§ 32-2091.07. Active license; issuance; renewal; expiration;  
continuing education**

A. If the applicant satisfies all of the requirements for licensure pursuant to this article, the board shall issue an active license and shall prorate the fee for issuing that license for the period remaining until the last day of the birth month of the applicant of the next odd-numbered year or even-numbered year pursuant to subsection B, paragraph 1 or 2 of this section.

B. A person holding an active or inactive license shall apply to renew the license on or before the last day of the birth month of the licensee every other year as follows:

1. In each odd-numbered year, if the licensee holds an odd-numbered license.

2. In each even-numbered year, if the licensee holds an even-numbered license.

C. The application shall include any applicable renewal fee as prescribed by the board by rule. Except as provided in section 32-4301 or 41-1092.11, a license expires if the licensee fails to renew the license on or before the last day of the licensee's birth month of the licensee's renewal year pursuant to subsection B of this section. A licensee may reinstate an expired license by paying a reinstatement fee as prescribed by the board by rule within two months after the last day of the licensee's birth month of that year. Beginning two months after the last day of the licensee's birth month during the licensee's renewal year until the last day of the licensee's birth month the following year, a licensee may reinstate the license by paying a reinstatement fee as prescribed by the board by rule and providing proof of competency and qualifications to the board. This proof may include continuing education, an oral examination, a written examination or an interview with the board. A licensee whose license is not reinstated within a year after the last day of the licensee's birth month of the licensee's renewal year may reapply for licensure as prescribed by this article. A notice to renew is fully effective by mailing or electronically providing the notice to the licensee's last known address of record or last known email address of record in the board's file. Notice is complete at the time of deposit in the mail or when the email is sent.

D. A person renewing a license shall attach to the completed renewal form a report of disciplinary actions or restrictions placed against the license by another state licensing or disciplinary board or disciplinary actions or sanctions imposed by a state or national behavior analysis ethics committee or health care institution. The report shall include the name and address of

the sanctioning agency or health care institution, the nature of the action taken and a general statement of the charges leading to the action.

E. A person who renews an active license to practice behavior analysis in this state shall satisfy a continuing education requirement designed to provide the necessary understanding of current developments, skills, procedures or treatment related to the practice of behavior analysis in the amount and during the period the board prescribes. The board shall prescribe documentation requirements.

F. A person who applies for an initial RENEWAL of a license pursuant to this section on or after January 1, 2022 shall possess or have applied for a fingerprint clearance card pursuant to title 41, chapter 12, article 3.1.

**History:**

Amended by L. 2021, ch. 210,s. 10, eff. 9/29/2021. Amended by L. 2014, ch. 166,s. 4, eff. 4/30/2017.

**§ 32-2091.09. Grounds for disciplinary action; duty to report; immunity; proceedings; board action; notice requirements; civil penalty**

A. The board on its own motion may investigate evidence that appears to show that a behavior analyst is incompetent as a behavior analyst, guilty of unprofessional conduct or mentally or physically unable to safely engage in the practice of behavior analysis. A health care institution shall, and any other person may, report to the board information that appears to show that a behavior analyst is incompetent as a behavior analyst, guilty of unprofessional conduct or mentally or physically unable to safely engage in the practice of behavior analysis. The board shall notify the licensee about whom information has been received as to the content of the information within one hundred twenty days after receiving the information. A person who reports or provides information to the board in good faith is not subject to an action for civil damages. The board, if requested, shall not disclose the name of the person providing information unless this information is essential to proceedings conducted pursuant to this section. The board shall report a health care institution that fails to report as required by this section to the institution's licensing agency.

B. A health care institution shall inform the board if the privileges of a licensee to practice in that institution are denied, revoked, suspended or limited because of actions by the licensee that appear to show that the person is incompetent as a behavior analyst, guilty of unprofessional conduct or mentally or physically unable to safely engage in the practice of behavior analysis, along with a general statement of the reasons that led the health care institution to take this action. A health care institution shall inform the board if a licensee under investigation resigns the licensee's privileges or if a licensee resigns in lieu of disciplinary action by the health care institution. Notification must include a general statement of the reasons for the resignation.

C. The board may require the licensee to undergo any combination of mental, physical or psychological competence examinations at the licensee's expense and shall conduct investigations necessary to determine the competence and conduct of the licensee.

D. Except as provided in subsection E of this section, the committee on behavior analysts shall review all complaints against behavior analysts and, based on the information provided pursuant to subsection A or B of this section, shall submit its recommendations to the full board.

E. If the board finds, based on the information it receives under subsection A or B of this section, that the public health, safety or welfare requires

**ARS 32-2091.09 Grounds for disciplinary action; duty to report; immunity; proceedings; board action; notice requirements; civil penalty (Arizona Revised Statutes (2022 Edition))**

---

emergency action, the board may order a summary suspension of a license pending proceedings for revocation or other action. If the board issues this order, the board shall serve the licensee with a written notice of complaint and formal hearing pursuant to title 41, chapter 6, article 10, setting forth the charges made against the licensee and the licensee's right to a formal hearing before the board or an administrative law judge within sixty days. The board shall notify the committee on behavior analysts of any action taken pursuant to this subsection.

F. If the board finds that the information provided pursuant to subsection A or B of this section is not of sufficient seriousness to merit direct action against the licensee, the board may take any of the following actions:

1. Dismiss if the board believes the information is without merit.
2. File a letter of concern.
3. Issue a nondisciplinary order requiring the licensee to complete a prescribed number of hours of continuing education in an area or areas prescribed by the board to provide the licensee with the necessary understanding of current developments, skills, procedures or treatment.

G. If the board believes the information provided pursuant to subsection A or B of this section is or may be true, the board may request an informal interview with the licensee. If the licensee refuses to be interviewed or if pursuant to an interview the board determines that cause may exist to revoke or suspend the license, the board shall issue a formal complaint and hold a hearing pursuant to title 41, chapter 6, article 10. If as a result of an informal interview or a hearing the board determines that the facts do not warrant revocation or suspension of the license, the board may take any of the following actions:

1. Dismiss if the board believes the information is without merit.
2. File a letter of concern.
3. Issue a decree of censure.
4. Fix a period and terms of probation best adapted to protect the public health and safety and to rehabilitate or educate the licensee. Probation may include temporary suspension for not more than twelve months, restriction of the license or restitution of fees to a client resulting from violations of this article. If a licensee fails to comply with a term of probation, the board may file a complaint and notice of hearing pursuant to title 41, chapter 6, article 10 and take further disciplinary action.

**ARS 32-2091.09 Grounds for disciplinary action; duty to report; immunity; proceedings; board action; notice requirements; civil penalty (Arizona Revised Statutes (2022 Edition))**

---

5. Enter into an agreement with the licensee to restrict or limit the licensee's practice or activities in order to rehabilitate the licensee, protect the public and ensure the licensee's ability to safely engage in the practice of behavior analysis.

6. Issue a nondisciplinary order requiring the licensee to complete a prescribed number of hours of continuing education in an area or areas prescribed by the board to provide the licensee with the necessary understanding of current developments, skills, procedures or treatment.

H. If the board finds that the information provided pursuant to subsection A or B of this section warrants suspension or revocation of a license, the board shall hold a hearing pursuant to title 41, chapter 6, article 10. Notice of a complaint and hearing is fully effective by mailing a true copy to the licensee's last known address of record in the board's files. Notice is complete at the time of its deposit in the mail.

I. The board may impose a civil penalty of at least \$300 but not more than \$3,000 for each violation of this article or a rule adopted under this article. The board shall deposit, pursuant to sections 35-146 and 35-147, all monies it collects from civil penalties pursuant to this subsection in the state general fund.

J. If the board determines after a hearing that a licensee has committed an act of unprofessional conduct, is mentally or physically unable to safely engage in the practice of behavior analysis or is incompetent as a behavior analyst, the board may do any of the following in any combination and for any period of time it determines necessary:

1. Suspend or revoke the license.
2. Censure the licensee.
3. Place the licensee on probation.

K. A licensee may submit a written response to the board within thirty days after receiving a letter of concern. The response is a public document and shall be placed in the licensee's file.

L. A letter of concern is a public document and may be used in future disciplinary actions against a licensee. A decree of censure is an official action against the behavior analyst's license and may include a requirement that the licensee return fees to a client.

**ARS 32-2091.09 Grounds for disciplinary action; duty to report; immunity; proceedings; board action; notice requirements; civil penalty (Arizona Revised Statutes (2022 Edition))**

---

M. Except as provided in section 41-1092.08, subsection H, a person may appeal a final decision made pursuant to this section to the superior court pursuant to title 12, chapter 7, article 6.

N. If during the course of an investigation the board determines that a criminal violation may have occurred involving the delivery of behavior analysis services, it shall inform the appropriate criminal justice agency.

**History:**

Amended by L. 2021, ch. 210, s. 11, eff. 9/29/2021. Amended by L. 2017, ch. 273, s. 5, eff. 11/1/2017.

**§ 32-2091.13. Confidential communications**

A. The confidential relations and communications between a client and a person who is licensed pursuant to this article, including temporary licensees, are placed on the same basis as those provided by law between an attorney and client. Unless the client waives the behavior analyst-client privilege in writing or in court testimony, a behavior analyst shall not voluntarily or involuntarily divulge information that is received by reason of the confidential nature of the behavior analyst's practice. The behavior analyst shall divulge to the board information it requires in connection with any investigation, public hearing or other proceeding. The behavior analyst-client privilege does not extend to cases in which the behavior analyst has a duty to report information as required by law.

B. The behavior analyst shall ensure that client records and communications are treated by clerical and paraprofessional staff at the same level of confidentiality and privilege required of the behavior analyst.

**§ 41-1073. Time frames; exception**

A. No later than December 31, 1998, an agency that issues licenses shall have in place final rules establishing an overall time frame during which the agency will either grant or deny each type of license that it issues. Agencies shall submit their overall time frame rules to the governor's regulatory review council pursuant to the schedule developed by the council. The council shall schedule each agency's rules so that final overall time frame rules are in place no later than December 31, 1998. The rule regarding the overall time frame for each type of license shall state separately the administrative completeness review time frame and the substantive review time frame.

B. If a statutory licensing time frame already exists for an agency but the statutory time frame does not specify separate time frames for the administrative completeness review and the substantive review, by rule the agency shall establish separate time frames for the administrative completeness review and the substantive review, which together shall not exceed the statutory overall time frame. An agency may establish different time frames for initial licenses, renewal licenses and revisions to existing licenses.

C. The submission by the department of environmental quality of a revised permit to the United States environmental protection agency in response to an objection by that agency shall be given the same effect as a notice granting or denying a permit application for licensing time frame purposes. For the purposes of this subsection, "permit" means a permit required by title 49, chapter 2, article 3.1 or section 49-426.

D. In establishing time frames, agencies shall consider all of the following:

1. The complexity of the licensing subject matter.
2. The resources of the agency granting or denying the license.
3. The economic impact of delay on the regulated community.
4. The impact of the licensing decision on public health and safety.
5. The possible use of volunteers with expertise in the subject matter area.
6. The possible increased use of general licenses for similar types of licensed businesses or facilities.
7. The possible increased cooperation between the agency and the regulated community.

8. Increased agency flexibility in structuring the licensing process and personnel.

E. This article does not apply to licenses issued either:

1. Pursuant to tribal state gaming compacts.
2. Within seven days after receipt of initial application.
3. By a lottery method.

**§ 41-1092.09. [Repealed Effective 1/1/2028] Rehearing or review**

A. Except as provided in subsection B of this section:

1. A party may file a motion for rehearing or review within thirty days after service of the final administrative decision.
2. The opposing party may file a response to the motion for rehearing within fifteen days after the date the motion for rehearing is filed.
3. After a hearing has been held and a final administrative decision has been entered pursuant to section 41-1092.08, a party is not required to file a motion for rehearing or review of the decision in order to exhaust the party's administrative remedies.

B. A party to an appealable agency action of or contested case with a self-supporting regulatory board shall exhaust the party's administrative remedies by filing a motion for rehearing or review within thirty days after the service of the administrative decision that is subject to rehearing or review in order to be eligible for judicial review pursuant to title 12, chapter 7, article 6. The board shall notify the parties in the administrative decision that is subject to rehearing or review that a failure to file a motion for rehearing or review within thirty days after service of the decision has the effect of prohibiting the parties from seeking judicial review of the board's decision.

C. Service is complete on personal service or five days after the date that the final administrative decision is mailed to the party's last known address.

D. Except as provided in this subsection, the agency head, executive director, board or commission shall rule on the motion within fifteen days after the response to the motion is filed or, if a response is not filed, within five days of the expiration of the response period. A self-supporting regulatory board shall rule on the motion within fifteen days after the response to the motion is filed or at the board's next meeting after the motion is received, whichever is later.

**History:**

For repeal eff. 1/1/2028, see 41-3027.05.

CONSIDERATION AND DISCUSSION OF ARIZONA MEDICAL BOARD'S 4 A.A.C. 16, ARTICLE 2 1YRR THAT WAS TABLED FOR DISCUSSION AT THE NOVEMBER 1, 2022 COUNCIL MEETING

## **Telemedicine Policies**

### *Board by Board Overview*

#### **Document summary:**

##### Licensure

- Forty-nine (49) state boards, plus the medical boards of District of Columbia, Puerto Rico, and the Virgin Islands, require that physicians engaging in telemedicine are licensed in the state in which the patient is located.
- Ten (10) states issue a special purpose license, telemedicine license or certificate to practice telemedicine across state lines.
- Seven (8) states require physicians to register or receive a waiver if they wish to practice across state lines.
- Five (5) states offer reciprocal, regional or extraterritorial licenses for interstate practice.
- Two (2) states allows for consultative services to be rendered across state lines.

##### Reimbursement - Medicaid

- All states and the District of Columbia provide reimbursement for some form of live video in Medicaid fee-for-service.
- Twenty-five (25) states reimburse for store-and-forward.
- Thirty-four (34) states reimburse for remote patient monitoring.
- Thirty-four (34) states reimburse for audio-only.
- Seventeen (17) states reimburse for all three, with certain limitations.

##### Reimbursement – Private Payer

- Forty-three (43) states and the District of Columbia govern private payer telehealth reimbursement policies.
- Twenty-four (24) states have private payer parity laws.

<sup>9</sup> Beginning on July 1, 2023, a health care professional who is not otherwise licensed, certified, or registered to practice in Vermont may obtain a Telehealth Registration to provide health care services in Vermont via telehealth to a total of not more than 10 unique patients or clients for a period of not more than 120 consecutive days from the date the Telehealth Registration was issued. OR practitioners may obtain a Telehealth License to provide healthcare services in Vermont via telehealth to a total of not more than 20 unique patients or clients located in Vermont during the two-year license term.

<sup>10</sup> Interim Telehealth Registrations are available from April 1, 2022, through June 30, 2023 for osteopathic physicians only. These Interim Telehealth Registrations expire on June 30, 2023. Osteopaths who are licensed in good standing in another state and wish to provide healthcare in Vermont via telehealth after June 30, 2023, will be required to obtain a Telehealth Registration or Telehealth License.

CONSIDERATION AND DISCUSSION OF ARIZONA DEPARTMENT OF ADMINISTRATION'S  
INTENT TO EXPIRE TITLE 2, CHAPTER 15, ARTICLE 2 PURSUANT TO A.R.S. § 41-1052(M)

*Effective date: September 29, 2021*

**GOVERNOR'S REGULATORY REVIEW COUNCIL  
NOTICE OF INTENT TO EXPIRE RULES**

1. Agency name: Arizona Department of Administration
2. Title and its heading: Title 2, Administration
3. Chapter and its heading: Chapter 15, Department of Administration - General Services Division
5. Article and its heading: Article 2

Pursuant to A.R.S. § 41-1052(M), the Arizona Department of Administration provides to the Governor's Regulatory Review Council a Notice of its Intent to Expire the following rules: R2-15-201 through R2-15-209

Pursuant to A.R.S. § 41-1052(M), the Arizona Department of Administration seeks to expire the rules listed above for the following reasons: Laws 2021, First Regular Session, Chapter 413 (SB 1829) transferred ADOA's State Motor Vehicle Fleet to ADOT upon the general effective date of September 29, 2021.

Governor's Regulatory Review Council  
100 North 15<sup>th</sup> Ave., Suite 402  
Phoenix, AZ 85007

**RE:** Arizona Department of Insurance and Financial Institutions – Financial Institutions Division, Real Estate Appraisal - Five Year Review Report due September 2023  
Request to Reschedule

Dear Chairperson Sornsin:

The Arizona Department of Insurance and Financial Institutions ("DIFI") respectfully requests to reschedule the Five-Year Review for Title 4, Chapter 46 (Arizona Department of Insurance and Financial Institutions – Financial Institutions Division, Real Estate Appraisal) currently due by September 30, 2023.

Pursuant to Arizona Revised Statutes § 41-1056(H), the Chair may reschedule a report that is scheduled for review if the agency substantially revised the rule within two years before the due date of the report as scheduled by the Council.

In compliance with Arizona Administrative Code R1-6-302(A), DIFI submits the following information:

1. DIFI is requesting to reschedule the Five-Year Review for Title 4, Ch. 46, Articles 1 (General Provisions), 2 (Registration, Licensure, and Certification as an Appraiser), 3 (Complaint Investigations), 3.1 (Rules of Practice and Procedure before the Director), 4 (Appraisal Management Companies), 5 (Course Approval), and 6 (Property Tax Agents).
2. DIFI substantially revised the rules in this Chapter within two years of the due date of the Five-Year Review Report. The Five-Year Review Report is due September 30, 2023 and the Council approved the rulemaking on April 5, 2022.
  - a. DIFI substantially revised the entire Chapter 46.
    - i. The revisions consisted of replacing the title of "Superintendent" with "Director" and removing unnecessary references to the Superintendent throughout the Chapter; updating the title of the DIFI throughout the Chapter; revising the definition of "Disciplinary Action" to provide a clearer distinction between disciplinary and non-disciplinary actions; defining "Federally Regulated Appraisal Management Company" and "Property

Tax Agent;" lengthening licensing timeframes to be consistent with other license types within the division and DIFI; updating incorporation by reference materials; adding a requirement to submit biennial National registry fees; increasing the length of time for a supervisory appraiser to report the end of an engagement of a trainee appraiser to encourage compliance; removing inapplicable references to A.R.S. § 41-1080(A) (citizenship documentation); removing the requirement for an applicant to provide proof of credentialing in other states; eliminating the requirement to submit multiple fingerprint clearance cards if the DIFI has a valid card on file; increasing the time for an applicant to take and pass the qualifying exam from 30 to 90 days; adding reporting requirements for criminal convictions and civil judgments based on fraud, misrepresentation or deceit in the making of any appraisal and for owners of AMCs to report actions by a state regulator, or any professional or occupational credentialing authority; granting the Director expanded tools for reaching a settlement in a disciplinary matter; allowing for late-renewal of an AMC registration; clarifying qualifications for a course instructor; and expanding the timeframe for renewal of course approval.

- ii. DIFI believes these changes are substantial because they impact both the regulated community and the agency in significant ways. They are designed to reduce confusion and encourage compliance by the regulated entities who made no public comments when the rule was exposed for comment. They are also designed to bring Real Estate Appraisal more in line with the division and with DIFI as a whole and to eliminate any disparate provisions that are unnecessary while maintaining provisions that are necessary for Real Estate Appraisal to perform its regulatory functions.
- iii. The Council approved the Notice of Final Rulemaking on April 5, 2022. ([https://grrc.az.gov/sites/default/files/meeting-reports/4.5.2022%20Action%20Report\\_0.pdf](https://grrc.az.gov/sites/default/files/meeting-reports/4.5.2022%20Action%20Report_0.pdf))
- iv. The Secretary of State published the Notice of Final Rulemaking on May 6, 2022 with an effective date of June 11, 2022. (28 A.A.R. 893, May 6, 2022) ([https://apps.azsos.gov/public\\_services/register/2022/18/contents.pdf](https://apps.azsos.gov/public_services/register/2022/18/contents.pdf))

Thank you for your consideration of this request. If you have any questions or need further information, please contact Mary Kosinski at (602) 364-3476 or [mkosinski@azinsurance.gov](mailto:mkosinski@azinsurance.gov).

Sincerely,

Evan G. Daniels  
Director

Subject: DES/DDD Article 9 Study for GRRC from District Central Independent Oversight Committee

To: [grrc@azdoa.gov](mailto:grrc@azdoa.gov) <[grrc@azdoa.gov](mailto:grrc@azdoa.gov)>

To Nicole Sornsin, Simon Larscheidt, and Members of the GRRC Committee:

By way of introduction, I am Linda Mecham, currently serving as DDD District Central IOC Chair. Our son, Mark, was served by DDD for 43 years, until his passing last year. I got involved with the IOC (then, the Human Rights Committee) because I had an issue with Mark's Day Program Provider. I presented our issue to the Committee, the Committee thought they could help, and then invited me to join. That was in 2002.

For nearly 40 years, Article 9 has been the guiding light for not only all things DDD in the state of Arizona, but also a template that many other states have followed to insure that these individuals with developmental disabilities/intellectual disabilities, are treated with respect and dignity, rather than the institutional model which was rampant with abuse and neglect, as well as physical and chemical restraints. As the years have passed, and as more information has become available regarding the many issues these individuals face in their daily lives, policy has been updated to reflect the needs, That has always worked because Article 9 is Principle based. Because Article 9 is a basic set of principles, that allow for change, through either additions or deletions to policy, to fit specific needs or

circumstances as they arise, changes in (or complete rewrites to) the original Article 9 are totally unnecessary because Article 9 establishes the parameters for the what can and cannot be done. Those basic parameters do not change in order for anyone to have a life of dignity and respect.

The path the IOCs have taken to get us to this point has been a rocky one. DDD told us that they did not think we were working with them in good faith. I was involved with the second rewrite. While serving on that committee, and because we were making changes to the "Attorney General" approved rewrite, I asked if this rewrite would need to go back to the Attorney General's office. I was told that it never went to the AG's office, whereas we were told previously that it was at the AG's office for their review. When I questioned that, I was told that DDD's internal stakeholders reviewed it. We were never told who the internal stakeholders were, or their expertise, either DDD or legal. I soon realized that not only were we working on Article 9, but we were also working on the policies to support the new Article 9. I felt that was presumptuous, as we didn't even have the Article 9 approved, and that if they were truly working within a time frame for completion from ADOA, how did they have time to write policy? (No answer to that question.) Upon completion of the second rewrite, which was several months ago, we continued to ask DDD how the Article 9 update was progressing. We were repeatedly told it was in progress. In our recent Statewide IOC meeting, we asked DDD Director Zane Garcia-Ramadan about the Article 9 update. He told us it had been sent to GRRC! We were stunned. In the "spirit of working together", and for all of the time we had invested in Article 9, we thought we were going to be able to review it before it went to GRRC. I don't know if DDD is required by law to put the second rewrite out for public comment, but given the negative comments from families, agencies, and providers, I thought that DDD should have done that. Article 9 affects everyone in the DDD community, and if so

many people are willing to take the time to send in comments, I would think that in "good faith", DDD would present the final document to the public. MANY changes needed to be made. Zane did tell us, after announcing that it had been sent to GRRC, that he would send us a copy of the final draft, which he did a few days later, and that he would also let us know when it was coming up for review by GRRC. I bookmarked GRRC in the Google search so that I could check on it myself...I didn't trust him to let us know.

Senator Barto suggested that I send our Annual Report to you so that you can have a glimpse into what we do, as well as an extensive review of both Article 9 and the Abuse and Neglect curriculum for the Members. We have been very involved in both of these in order to protect the members. The Article 9 report contains our comments and concerns for the original rewrite, and the Abuse and Neglect curriculum attachment also has our questions, DDD's non answers, and then our follow-up questions to them. The bottom line was that this inappropriate curriculum was presented to the DDD individuals in the Day Program setting (generally, and per policy) for a year, and then they would review it. The only data they collected was whether a DDD member took the curriculum. We have had many reports from parents regarding the inappropriate behavior that is new to their child/adult that was not being displayed prior the presentation of this curriculum.

I realize that the Abuse and Neglect curriculum is not the issue at hand. I included it in our annual report because it is something we have been heavily involved with for the past 15 months. I point it out to you as a illustration of how DDD has "listened" to us, but then continues to implement something that is clearly wrong for these DDD individuals. I fear that if the current version of Article 9 goes through, the doors are unlocked to returning AZ back to institutional homes for these precious

individuals who have potential for growth, for opportunity to experience life, and to be loved in a home environment, whether their natural homes or in a group setting with individuals who become their families. Article 9, as it currently exists, provides for that, and has for the past 40 years. It is the backbone of everything the IOCs do, everything we read, and everything we defend. It still works. I have likened it to my friends and colleagues..."Article 9 is like the Ten Commandments. They are old, but they are still relevant."

I look forward to being able to express some thoughts at Tuesday's meeting. I don't know how to sign on to do that, but would very much like to do so.

Thank you,  
Linda Mecham

---

## INDEPENDENT OVERSIGHT COMMITTEE

November 1, 2022

The Honorable Karen Fann  
President, Arizona State Senate  
1700 West Washington Street  
Phoenix, Arizona 85007

The Honorable Russell Bowers  
Speaker, Arizona House of Representatives  
1700 West Washington Street  
Phoenix, Arizona 85007

Dear President Fann and Speaker Bowers,

On behalf of the DDD Central Independent Oversight Committee, please find the 2021-22 Annual Report that outlines our committee's activities and recommendations. The report was prepared in accordance with the requirements of A.R.S. § 41-3804(H).

Thank you for your continued support of the committee volunteers that are protecting those in need.

Sincerely,  
Linda S. Mecham  
Chair

Carolyn Wilmer, Family Member/Health Care

Lisa Witt, School Psychologist/Family Member

Eduarda Yates, Parent/Advocate

The District Central Independent Oversight Committee reviews, by law, all incidents of abuse, neglect and human rights violations of the members who reside in Central Arizona. Revised Statute 41-3801 defines and explains the duties of the Independent Oversight Committees:

**A. The independent oversight committee on persons with developmental disabilities is established in the department of administration to promote the rights of clients who are receiving developmental disabilities services pursuant to title 36, chapter 5.1.**

**B. The committee shall be organized pursuant to this section and the requirements of section 41-3804.**

**C. The director of the department may establish additional committees for each district office established pursuant to section 41-1961 or to oversee the activities of any service provider.**

**D. Each independent oversight committee established pursuant to this section shall consist of at least seven and not more than fifteen members appointed by the director of the department with expertise in at least one of the following areas:**

- 1. Psychology.**
- 2. Law.**
- 3. Medicine.**
- 4. Education.**
- 5. Special education.**
- 6. Social work.**
- 7. Criminal justice.**

**E. Each independent oversight committee shall include at least two parents of children who receive services from the division of developmental disabilities.**

**F. The division of developmental disabilities shall provide to each independent oversight committee information regarding incidents of:**

- 1. Possible abuse or neglect or violations of rights.**
- 2. Physical abuse, sexual abuse and other abuse.**
- 3. Accidental injury.**
- 4. Missing clients.**
- 5. Behavioral emergency measures.**
- 6. Medication errors, including theft of medication or missing medication.**
- 7. Death.**
- 8. Suicide attempts.**
- 9. Hospitalizations.**
- 10. Incarcerations.**
- 11. Theft of client property or money.**
- 12. Property destruction.**

**G. The Division of Developmental Disabilities in the Department of Economic Security must allow the Independent Oversight Committee on persons with development disabilities thirty days to review new policies and major policy changes before the Division submits the policies or changes for Public Comment.**

This Fiscal Year, there were 7,758 Incident Reports for District Central IOC, while the number of Members served in District Central was 9,643, as of June 30, 2022. Additionally, 447 Behavior Treatment Plans were reviewed in District Central.

### **DDD MEMBERS WITH EXTREME BEHAVIORS/ARIZONA STATE HOSPITAL**

As the IOC reviews both the Incident Reports and the Behavior Treatment Plans, we become aware of issues that need to be addressed. One such issue was the fact that 2 District Central Members served by the Division are currently residing at the Arizona State Hospital. They are not given the opportunity for Active Treatment, they are locked in seclusion, and per the Incident Reports, are heavily medicated to control their behaviors and activity. We have been informed that because of the severity of the behaviors, it would be inappropriate to house these individuals outside of ASH. We are currently requesting a quarterly update on these individuals. Additionally, because Active Treatment is not being offered, and because they are not Cognitively able to understand why mechanical restraints are used on them or why they are in locked seclusion, (both of which are prohibited for DDD Members per Article 9, because Article 9 does not apply to ASH), we are asking the Division several questions: How much money is being sent to ASH to care for these individuals? Could this same amount of money be used to provide a setting (home) outside of ASH where they could get the rights afforded to them per Article 9, and still be in a safe environment, both for them and the community? This issue is a fairly new one, and we will continue to pursue it in the coming year. We are also in early discussion with the ASH IOC as well.

In addition to the two members at ASH, it has also been a concern that there are DDD members who have severe behavioral health concerns and that it is very difficult to work with them in the group home setting. After reading the Behavior Treatment Plans, and reviewing them in the Program Review meetings, the strategies and methodologies in the plan are not working with some of these individuals. These members are also taken to ASH, which is also very concerning. We believe that facilities are needed which can be locked, and then hire staff who have received a higher level of training for this complex level of care. DDD has a step-down unit, but it is currently occupied. There needs to be more than just one. When we asked DDD if anyone is looking into a resolution for these members with the severe behaviors, we were told that DDD leadership is working with the leadership from the two health plans (United Healthcare and Mercy Care) to be able to develop better residential options for DDD members who have these more extreme challenges. There are options involving "step-down" units for behavior, but, as stated previously, vacancy is a problem. Per DDD, This is a big topic and warrants additional conversation at a broader level with the Health Plans. Group Homes are staffed with individuals that are not trained to deal with these extreme behavioral needs. This is an issue District Central IOC will continue to pursue.

Another possible solution to this issue, as discussed by one of our IOC members, is that she is working with a group of mental health practitioners who are training to serve our DDD members. The goal is to provide an acute care system that bridges care after hospitalization, providing temporary placement for DDD members, better care in and reduced stays at an ER, as well as placement for lower IQ, aggressive individuals.

## **TRANSGENDER ISSUES IN GROUP HOMES**

Through attendance at Program Review Committee, we became aware of two members who are dealing with transgender issues. We have asked what DDD's policy is on transgender members in group homes. The staff expressed difficulties working with these individuals, and that they were not equipped to work with them. This is an issue we will continue to pursue in the coming year.

## **CLIENT FUNDS AND SERVICES**

A pretty consistent issue that is noted while attending Program Review Committee is that the Member's funds are over the \$2,000.00 limit, as allowed by AHCCCS/ALTHCS. The Spending Plans that we see are those members whose representative payee is either a Public Fiduciary or DDD. If ALTHCS reviews the bank account, and the member is over the threshold, the member could lose all services. AHCCCS/ALTHCS has been very lenient during the COVID period, and given the fact that most members received additional funds during this time. However, they are starting to request accountability again, and it would be devastating for the members to lose all services, through no fault of their own. The DDD policy, as we understand it, is that Client Funds notifies the team when the funds are at \$1000.00, to begin a spend-down plan. At \$1500, they team is notified again and the spend down should be completed before the individual reaches the \$2000. The problem was that the Support Coordinators were not given access to the member's accounts in order to review. All information came from Client Funds. Recently, access to view the Member's account was "unlocked" to the Support Coordinator, which allowed a more timely review of funds so that a timely spend down can occur if needed. Additionally, a new policy is out for public comment at this time regarding this issue, and that the Support Coordinator is allowed to approve expenditures up to \$499. Any expense above \$499 will need a supervisor's approval. I would like to think that District Central IOC bringing this issue to DDD's attention had something to do with the new direction and policy!

## **DENTAL CARE CONCERNS AND SEDATION**

District Central IOC was contacted by a family who was having difficulty getting dental treatment for their son, who is an individual served by DDD. We discovered that many dentists state that if the patient has a trach or any serious medical concerns, the treatment would need to be performed at a hospital.

Currently, St. Joseph's Hospital is the only hospital that offers this service. However, because the reimbursement from the health plans is not sufficient, St. Joseph's limits the number of dental cases performed. There are many members on the waiting list. This issue has been elevated to AHCCCS as a care concern.

A representative from United Healthcare reported that they are working closely with AHCCCS through updates from DDD for other ways that dental and anesthesia can be provided outside of a dental office and in an operating room or a facility that provides the same services available and allows the dental provider as well as an anesthesiologist to come on board and provide services. Banner is a current partner and they are currently discussing opportunities, but the health plans are also working with St Joseph's to gain more information as to how or why there has been a limitation

on providing dental services. The health plans are also working with the dental college, as well as other facilities who would be willing to work with an anesthesiologist. Prior authorizations are being received by United Health Care, and they will follow through until the services are provided, working to ensure that the appointments are scheduled in a timely manner.

### **AMMONIA TOXICITY FROM DEPAKOTE (VALPROIC ACID)**

District Central IOC received a report from a member that her son was in the hospital due to Ammonia Toxicity from his medication, Depakote. As the committee continued the discussion, it was learned that of the 11 members on the committee, 5 of us had a son or daughter, on Depakote, and 4 of the 5 had been hospitalized for ammonia toxicity. The 5<sup>th</sup> member's doctor had her daughter's blood serum levels regularly checked for the toxicity. By the time we could get a doctor's attention that this was not normal behavior, hospitalization was needed. We determined that if this issue was affecting nearly half of our committee, it should be an issue elevated to Dr. Dekker, DES medical director. He was kind enough to come to our next meeting, having researched the subject, including the number of DDD members taking Depakote. He reported the seriousness of the side effects, and that about 20% of the members could be affected by this medication. In addition to the information that was sent out by DES/DDD to families and providers to be aware of this medication and possible side effects, we, as IOC members sitting on the Program Review Committee, notice if a member is taking Depakote. If he is, we remind the team of the importance of getting the serum levels in order to prevent the ammonia toxicity. (A build-up of ammonia in the liver)

### **PAIN SCALE**

The Pain Scale is a topic that we have been discussing for several years. We sent a letter to DDD, requesting information on the pain scale assessment tool, and were told that there was, at that time, no pain scale assessment tool. It was recommended that DDD implement this into the system. There are times when DDD members have behaviors, but the team needs to make sure that the behaviors are not because of pain. Most often, the only way to determine this is through the use of a pain scale. Frequently, behaviors are treated with medication, and then more medication, however the cause could be because of pain, which is not resolved with the introduction of more psychotropic medications.

Because we have been discussing this for several years, to no avail, District Central IOC made a motion, listing our concerns, and requesting that DES/DDD develop a pain scale, also a section in the "Risk Assessment" section of the Person Centered Planning Document, which indicates that in some situations, members who are non-verbal, may communicate by hitting themselves to indicate they are in pain. A written explanation in the Planning Document of what the pain indicators are should also be included so that staff will not automatically assume the member is having a behavior and that there is a need for additional medication.

Dr. Dekker attended the following meeting, expressed his appreciation for bringing this important issue to his attention, and then explained several pain scale assessments that could be implemented for the members served by the Division, depending on cognitive

and language skills, leaning heavily towards the FLACC scale, (Face, Legs Activity, Cry, and Consolability) for DDD members.

Additionally, Arizona Senate Bill 1162 (from this last session, thank you Senator Barto!) provides that the pain management providers that are working with known chronic pain members can continue to prescribe pain medication without fear of prosecution. Also, The US Supreme Court determined that pain management is a human right and that as a right it cannot be taken away. The member can be treated for pain if the parent or guardian asks for a stronger than prescribed pain medication. This can no longer be blocked.

Because of this recent ruling, we will request that because pain management is a human right, that it be added into DDD policy as well as Article 9.

### **POST COVID RETURN TO DAY PROGRAMS**

It was learned that in spite of CDC guidelines and the American Disability Act, there were still Day Programs that were not allowing members to attend unless masks were worn. Many members served by the Division do not understand the rationale for masks, are tactically sensitive and cannot wear a mask, or have breathing issues where the mask is inappropriate. When the agencies were contacted by parents, informing them that they were not in compliance with the CDC guidelines, as well as violating the ADA, they still refused attendance unless the member was wearing a mask, all day. Even though this was brought to DDD's attention, the issue continued. Families and group homes either kept the member at home, or found other placement if available.

Another issue that came to our attention was that because of staffing issues, members could not return to the Day Program or Work program, especially if that member had an enhanced ratio staffing.

DDD is using the American Rescue Plan funds to increase the direct care staff salaries, so hopefully that will allow more members to return to their Programs.

### **PERSON CENTERED SERVICE PLAN**

DDD has adopted a new document, which will replace the former Individual Service Plan, and is now called the Person Centered Service Plan. DDD reported that this document is a plan that AHCCCS built, with other managed care organizations. Our IOC was concerned with several items: that this new document loses some of the important information that was formerly in the Individual Service Plan, and in our opinion, is necessary to include in order to have a complete picture of the individual, such as "History of the Individual" and "What Works and Doesn't Work for Me". Additionally, the Spending Plan is located in a drop down menu, and often times the Support Coordinator is not aware that it is available, and so it is missing. There needs to be additional training for the Support Coordinators, and families need to be aware of the changes. For example, if information from the old ISP is not included in the new PCSP, a family can request that it be included. However, this requires a very active, diligent, and aware parent/guardian to realize the difference. DDD should make this information available to families.

Previously, in the 90 day meetings which review and update the Person Centered Service Plan, required by AHCCCS, unless it was the Annual Review, the meetings only took about 15-30 minutes. With the new PCSP, the meetings are lasting approximately 2 hours, every 90 days.

Additionally, the Behavior Treatment Plan contains information that the PCSP does not contain. However, not every member has a Behavior Plan. District Central would like to see consistent information required for each member. The only way to ensure that this happens is for it to be included in the Person Centered Service Plan.

## **ARTICLE 9**

District Central has been actively involved in the drafts of the proposed Article 9. Attached to this Annual Report are the questions and concerns that we had regarding the proposed Article. In spite of repeatedly asking what the current status is, DDD's response is that they have no updates since the second Public Comment time period expired. We are still waiting for and extremely interested in the final draft, as Article 9 is the basis for what we, as an Independent Oversight Committee, follow to ensure that the rights and protections of the individuals served by the Division of Developmental Disabilities are secure and in place.

## **ABUSE AND NEGLECT CURRICULUM**

As a result of the sexual abuse and resulting pregnancy of a DDD Member, residing at Hacienda, Governor Ducey requested a curriculum for abuse and neglect awareness. A committee was formed, which determined a curriculum for Providers and Staff (Direct Care Workers) which would provide guidelines to recognize, avoid, and report any incidents of abuse and neglect. In addition to the curriculum for the Providers, a second curriculum was adopted from the state of Massachusetts, for the Members served by DDD.

District Central IOC has no issue with the curriculum for the Providers. We do, however, have many concerns about the curriculum for the Members served by the Division. We did not become aware of this curriculum until after it had become policy and was actually being distributed and taught. We discovered that the portion of Policy for the Member Curriculum that went out for Public Comment was merely a summary of the curriculum, not the content in its entirety. Upon review of the content, we noted that, first, it is twice as long as the curriculum for the Providers. The examples used to explain a point are extremely beyond the cognitive levels of the general DDD population. Secondly, the policy states that while the curriculum for the Providers MAY be used, the curriculum for the Members MUST be used in teaching the curriculum. (It cannot be tailored for the needs and cognitive level of the individual being taught.)

Additionally, the course will be taught in the Day Program. Our concern was who would be teaching this curriculum? What credentials does the instructor have? What if there are PTSD effects that result from this curriculum? (If a member has been previously abused, would this curriculum trigger memories that most Direct Care Staff providers are not equipped to handle?)

When we asked DDD what data they were collecting as a result of this curriculum, the response was *whether the member had taken the course or not*. We were speechless! No additional data, such as post-instructional behaviors that are new.

We were instructed to draft our questions and send them via a motion to the DDD Director. We did, and the responses from DDD were less than satisfactory. IOC was then told that our recourse was to have a phone conversation with the Director, which we did. At this point, the curriculum had been in circulation for about 6 months. We were told, basically, that they were going to continue to present the curriculum until the one year anniversary. (July 2022) At that point DDD would have the curriculum go out for Public Comment again, at which point changes could be made.

During the past year, we have read Incident Reports and have heard from parents that their child is now exhibiting new sexual behavior. When we asked if Quality Management could follow up with whether the individual named in the Incident Report had taken the Course, we were told that it was beyond their “scope of investigation”. When we elevated this concern, we were told that “Behavioral Health was involved.”

The guardians must give permission for this curriculum to be presented to the individual. We have spoken to numerous parents who weren’t even aware of what the curriculum was. As previously state, the Member Curriculum content that went out for Public Content was a SUMMARY of the content, so even if a parent was following the new policies being adopted by DDD, they would not have been able to review the entire content. (We still have not received an answer to our question as to whether a “summary” of a policy is sufficient to meet the legal standards of notification prior to adoption.) We shared the link with the families (which is difficult to navigate) and many contacted us to thank us for sharing the information and, upon their review, noted that permission would not be given. Regarding the permission forms, each agency created their own form. One form was 3 pages long, which included the link for the curriculum, as well as additional sites for better information; a second form was one page, which included the link; a third form was a simple permission form which contained no information regarding the curriculum. We suggested that DDD provide a consistent permission form, especially to reduce liability, as well as collect more data than just attendance.

Just to give you an example of the activities used to present the concepts: the Member is handed an umbrella and told to hold the umbrella over his/her head. The Presenter then throws popcorn on top of the member. The Member is supposed to understand the *symbolism* in this activity: The umbrella represents the information in the course, that will protect him/her from being abused. The popcorn represents the abuse from which they are being protected. This is an abstract concept symbolically, and not one that easily comprehended by most DDD members.

There are concepts taught in this curriculum, slides presented, and activities to participate in, which could so very easily introduce ideas not yet considered by the members (i.e. suicide), or trigger PTSD reactions that a Day Program staff is not prepared to address. Also, as stated previously, the Provider curriculum is not the same as the Member curriculum, which leads us to ask, “Who is training the Instructor to present this curriculum? Does the Instructor take both classes, as they are different? Why is there a need for two different curriculums?”

Needless to say, District Central is VERY CONCERNED about this curriculum. Our questions, DDD's responses, and our follow-up questions are attached to this document.

### **LEGISLATIVE ASSISTANCE**

As a result of not being aware of the Abuse and Neglect Concern, and knowing that the Developmental Disabilities Advisory Council has a provision regarding notification of Proposed Policies, we asked Senator Barto to propose legislation that would give IOC's the same privileges that the DDAC has regarding the review of policies before they go out for public comment. She did propose (SB 1231 an addition to ARS 38-4101, letter G: The Division of Developmental Disabilities in the Department of Economic Security must allow the Independent Oversight Committee on persons with development disabilities thirty days to review new policies and major policy changes before the Division submits the policies or changes for Public Comment.)

This will give us the opportunity to review the policies, and then meet as a body to discuss and vote on our remarks. When we did not have the additional 30 days, we were not always able to meet as a body to discuss and vote per the Open Meeting Law.

This additional time allows for that.

We thank Senator Barto for her continued support, for her concern for the Members served by the Division, including the Behavioral Health members, and the needs these individuals have for additional care and support. We also thank the entire Legislature for passing the Bills proposed by Senator Barto, and others, and look forward to continued cooperation as we all work to better the lives of Arizona citizens served by DDD.

### **INTRODUCTION OF NEW MEMBERS**

We appreciate the assistance we have received from both DDD and the community as we work to improve and increase our IOC membership. This year we have gained 3 new members, who come with a variety of experience and knowledge, which gives our committee a greater base for understanding and thoughtful discussion as we review Incident Reports and Behavior Plans, while always seeking to protect the rights of the individuals served by DDD.

While we gained three new members, we lost a very dear friend this year, our fearless leader of so many years, Karen VanEpps, who succumbed to breast cancer.

A few tributes from our IOC members:

"Karen Van Epps search for help for her sister with developmental disabilities led to her becoming a champion advocate for all of us the past 40+ years. She tirelessly worked publicly and within the Division of DD recommending and/or changing policy that infringe on the rights of the DD population. Karen always strived for "quality of life" services and the fundamental right to be treated with dignity and respect. Everyone in the community of DD has directly or indirectly benefited from Karen's extensive advocacy. It has been a privilege to have worked with Karen on the Human Rights Committee (now IOC) and we tremendously miss her. " Carol McNulty

“Even though I have a severely disabled daughter that has been in the DDD system for over 30 years, I really didn't know a whole lot about the inner workings of that system. I was asked to join the then titled "Human Rights Committee" by Linda Mecham. I didn't know what I was getting myself into! As I timidly attended my first meeting of the District Central Committee, Karen approached me with a warm welcome, a smile and words of encouragement. She taught me so much! Everyone was always throwing out names and acronyms with ease and I was usually lost, but Karen was always so patient and knowledgeable and answered my questions without making me feel inferior or dumb. I was always in awe of her dedication and enthusiasm as she worked tirelessly for this under-served population. Every time that I mentioned a problem that Amy was experiencing at her group home, Karen went to great lengths to help me find ways to solve the issue. She would call me several days later to see how things were going and if we had resolved the problem. I have always said that even though having a handicapped child is a challenge, with it comes many blessings. One of those blessings was getting to work with and know Karen. She will always be my hero!” Debbie Stapley

“The DDD community lost its most enduring advocate this year. Karen was a friend to all in need, a warm voice on the phone, and the source of calm and reason in sometimes chaotic times. She never wavered in pursuit of bettering lives and in doing what is right above all.” Sherry Howard Wilhelmi

“Karen VanEpps was a true advocate for as long as I knew her. She was involved in getting Partners in Policymaking started in AZ. She was involved in The Arc of Arizona and Arizona Consortium for Children with Chronic Illness. I got to know Karen better working with her on the Human Rights Committee/Independent Oversight Committee. she worked tirelessly for Persons With Intellectual Disabilities and advocated at the AZ legislature for the issues that were an issue raised at HRC/IOC. She put long hours in volunteering in a variety of capacities helping Persons With Intellectual Disabilities and informing members of the committees to be better advocates for Persons With Intellectual Disabilities.” Eva Hamant

“I was having an issue with my son's Day Program. I didn't know if what they were asking me to do was appropriate, so a friend suggested that I attend the Human Rights Committee Meeting. I was very nervous, but presented my concerns. Karen was the chair, and when I finished my remarks, she said she thought they could do something about this and would be getting back in touch with me. As I got up to leave, Karen thanked me for coming, and then asked me if I wanted to join the Committee! I knew about this committee, and no, I didn't want to join!! But I thought that if they were going to help me, the least I could do is join! And that was the beginning of a friendship that I don't think will ever be replaced. I learned that Karen and her Mother were very involved, as were so many others, from the very beginning: in the inception of Article 9, the sale of the Institutions in Phoenix and Tucson, the establishment of the Trust Fund (funds from the property sales), and participated in so many other committees and groups which promote the well-being of DDD Members. Karen knew the history. Karen knew the answers. Karen knew why things were supposed to be “that” way. Karen traveled all over the country, attending seminars and conferences, learning everything there was to learn, and then brought it back to Arizona for us to adopt and implement.

While we are doing our best to carry on in the legacy Karen left us, it will never be the same. District Central IOC, as well as the entire state of Arizona, lost a true friend to us all when she passed away.

We have tried to pick up the pieces, regroup, and carry on, and while we are doing our best, she will be forever missed, and always in our hearts.” Linda S. Mecham

Thank you for taking the time to read through our Annual Report. Please do not hesitate to contact us if you have any questions, concerns, thoughts, or insights that could help us (District Central IOC) as we continually work to promote the protections, welfare, and opportunities for the Individuals served by the Division of Developmentally Disabilities.

Respectfully Submitted,

*Linda S. Mecham*

Linda S. Mecham  
DDD District Central Independent Oversight Committee Chairperson

#### 2. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing Statute: A.R.S. 41-1954 (A) (3) and 36-554(C) (6)

Implementing statute: A.R.S . 36-552, 36-554, and 41-1954 (A) (1) (h)

**3. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the record of the proposed rule:**

Notice of Rulemaking Docket Opening: 27 A.A.R. 619, April 23, 2021 (*in this issue*)

**4. The agency's contact person who can answer questions about the rulemaking:**

Name: Christian Eide

Address: Department of Economic Security  
P.O. Box 6123, Mail Drop 1292  
Phoenix, AZ 85005

or

Department of Economic Security  
1717 W. Jefferson, Mail Drop 1292  
Phoenix, AZ 85007

Telephone: (480) 340-8303

Fax: (602) 542-6000

E-mail: [ceide@azdes.gov](mailto:ceide@azdes.gov)

**5. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:**

Article 9 contains rules on Applicability, Prohibitions, ISPP Team Responsibilities, Program Review Committee (PRC), Monitoring Behavior Treatment Plans, Training, Sanctions, Emergency Measures, and Behavior Modifying Medications. The purpose of the rulemaking is to add, amend, and repeal rules to conform to current practice and terminology, ad to make the rules more clear, concise, and understandable. The Department last amended this Article in 1994. A Five-Year Review Report on Chapter 6 was approved by the Governor's Regulatory Review Council on December 1, 2015.

#5 Justification to amend or repeal a rule—Make the rule more “concise, clear and understandable—The revision only complicates the language

**6. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation or of justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The Department did not review or rely on any study relevant to the rules.

#6 Reference to a study relevant to the rule—Department answer—The Department did not review or rely on any study relevant to the rules.

**7. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable.

#7 Showing of good cause—DD says not applicable.

**8. The preliminary summary of the economic, small business, and consumer impact:**

The economic impact of the rulemaking is expected to be minimal (less than \$1,000) for all persons involved in the rulemaking and the application process. The persons directly impacted by this rulemaking are individuals who are applicants to the Division of Developmental Disabilities (Division) who voluntarily seek services through the Division. The rulemaking does not impose any obligation on the individual or applicant to accept or participate in services without informed consent. Consumers who apply to the Division will benefit from clear and updated requirements and processes. There are no negative impacts on small businesses as a result of this rulemaking. The Department and members of the public will benefit from the revision of Article 9 because the proposed rulemaking will make the provisions for member's behavior management more clear, concise, and understandable.

#8 Consumer impact—makes management of member's behavior management more "clear, concise, and understandable".

**9. The agency's contact person who can answer questions about the economic, small business and consumer impact statement:**

Name: Christian Eide

Address: Department of Economic Security  
P.O. Box 6123, Mail Drop 1292  
Phoenix, AZ 85005  
or  
Department of Economic Security  
1717 W. Jefferson, Mail Drop 1292  
Phoenix, AZ 85007

Telephone: (480) 340-8303  
Fax: (602) 542-6000  
E-mail: [ceide@azdes.gov](mailto:ceide@azdes.gov)

**10. The time, place and nature of the proceedings to make, amend, repeal, or renumber the rule, or if no proceeding is scheduled, where, when. And how persons may request an oral proceeding on the proposed rule**

- 11. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A>R>S> 41-1052 and 41-1055 shall respond to the following questions:**

No other matters are prescribed.

- a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

This rule does not require a permit.

- b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

Not Applicable.

- c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

No analysis was submitted.

#11. b. No federal law is applicable???

- 12. A list of any incorporated by reference material as specified in A>R>S> 41-1028 and its locations in the rules:**

None

- 13. The full text of the rules follows:**

<u>"Unsafe Behavior"</u>	<u>R6-6-901(B)</u>

**B. The following definitions apply to this Article:**

1. "Abuse" means the same as "abusive treatment" under A.R.S. § 36-569.
2. "Article 9 Instructor" means an individual approved by the Division to conduct training as outlined in R6-6-908.
3. "Aversive Stimulus" means the presentation of an unpleasant stimulus with the intent to induce changes in behavior.
4. "Behavior Plan" means an integrated, individualized, written treatment plan, based on a Behavioral Health Professional's provisional or principal diagnosis and assessment of behavior and the treatment needs, abilities, resources, and circumstances of a Member, that includes:
  - a. One or more treatment goals;
  - b. One or more treatment methods;
  - c. The date when the Member's Behavior Plan will be reviewed;
  - d. The dated signature of the Member or the Member's legal representative; and
  - e. The dated signature of the Behavioral Health Professional.

Will all behavior treatment plans need to be authored by a BHP, as defined in R6-6-901

Will all behavior treatment plans require an assessment of behavior?

Not all BHPs are permitted to diagnosis (e.g., behavior analyst)

- 5. “Behavioral Health Professional means:**
- a. A. An Individual licensed under A.R.S Title 32, Chapter 33, whose scope of practice allows the individual to:**
    - i. Independently engage in the practice of behavioral health as defined in A.R.S. 32-3251, or**
    - ii. Except for a licensed substance abuse technician, engage in the practice of behavioral health as defined in A.R. S. 32-3251 under direct supervision as defined in A.A.C. R4-6-101;**
  - b. A psychiatrist, as defined in A.R.S. 36-501;**
  - c. A psychologist, as defined in A.R.S. 32-3061;**
  - d. A physician, as defined in A.R.S. 32-1401;**
  - e. A registered nurse practitioner licensed as an adult psychiatric and mental health nurse;**
  - f. A behavior analyst, as defined in A.R.S. 32-2091**
  - g. A registered nurse with:**
    - i. A psychiatric-mental health nursing certification, or**
    - ii. One year of experience providing behavioral health services.**

“Behavioral Professional” means; a through g None of the “professionals” indicates a knowledge of developmental disabilities.

This will be an access to care issue. Please refer to the number of Qualified Vendors that were approved to provide Habilitation Consultation services to get an estimate on how many Qualified Vendors were conducting assessments and writing plans when the program was funded by DDD. I would also suggest meeting with the health plans to identify how many vendors offer services to adults with an intellectual/developmental disability (I/DD) to determine their capacity. Looking at the number of current behavior treatment plans required for all districts and dividing that by the number of qualified vendor personnel that meet the behavior health professional credentials and that work with people with an I/DD will provide an estimate on if R6-6-901 (B) (4) is realistic.

- 6. “Behavioral Health Therapeutic Home” means a residence that provides room and board, assists in acquiring daily living skills, coordinates transportation to scheduled appointments, monitors behaviors, assists in the self-administration of medication, and provides feedback to a Support coordinator related to behavioral health services under the clinical oversight of a Behavioral Health Professional.**

“Behavioral Health Therapeutic Home” does not exist as a DD option  
Will group homes under the Division become Behavioral Health Therapeutic Homes now?

- 7. “Business Day” means 8:00 a.m. to 5:00 p.m. Monday through Friday, excluding holidays listed in A.R.S. 1-301.**

8. “Chemical Restraint” means medication administered as a method of restricting a Member’s freedom of movement, physical activity, or access to the Member’s own body that is not routine treatment for a Member’s medical or behavioral health condition.

Chemical Restraint—does not prohibit this. This is definitely prohibited in Article 9.

9. “Direct Care Worker” means a person who is employed or contracted to provide primary personal care, guidance, or supervision to a Member in the Service Provider’s care.

10. “Emergency Safety Situation” means unanticipated Unsafe Behavior.

11. “Escape Extinction” means the discontinuation of negative reinforcement for a behavior.

12. “Inappropriate Behavior” means a Member’s actions which a Behavioral Health Professional, Service Provider, or Planning Team reasonably believes to be impeding an individual’s ability to optimally function in society.

13. “IOC” means an Independent Oversight Committee, established under A.R.S. 41-3801.

14. “Managing Employee” means a general manager, business manager, administrator, director, or other individual who exercises operational or managerial control over, or who directly or indirectly conducts the day-to-day operation of a Service Provider.

15. “Member” means the same as “Client: as defined in A.R.S 36.551.

16. “Overcorrection” means, for the purpose of the Article, a group of procedures designed to reduce Inappropriate Behavior, such as:

- a. Requiring a Member to improve the environment to a state better than existed prior to the occurrence of the Inappropriate Behavior; or
- b. Requiring a Member to repeatedly practice a behavior by engage in effortful behavior directly or logically related to repairing damage caused by the Member’s behavior as a tactic to evoke behavioral change.

17. “Physical Intervention” means a technique used on an emergency basis by an individual who is providing care or service to a Member to restrict the movement of the Member by direct physical contact to prevent the Member from seriously harming self or others.

18. “Planning Document” means a written statement of services that is separate from the Behavioral Plan and shall be provided to a Member, including Habilitation goals and objectives, that is developed following an initial eligibility determination and revised after periodic reevaluations.

19. “Planning Team” means a group of people including:
- a. The Member;
  - b. A Responsible Person
  - c. The Support Coordinator;
  - d. Other State of Arizona Department of Economic Security staff, as necessary; and
  - e. Any Service Provider selected by the Member, Responsible Person, or the Department.

The member should be able to invite anyone they want to join their planning team. The only mention of whom a member can invite is a service provider. What if they want their pastor or a non-DDD funded employer, family friend, etc.

20. “Psychotropic Medication” means behavior-modifying medication that affects a Member’s mental status, behavior, or perception.
21. “Quality Management Professional” means an individual charged with the evaluation and assessment of Member care and services to ensure adherence to standards of care and appropriateness of services.
22. “Seclusion” means, for the purpose of the Article, restricting a Member to a room or area, through the use of locked doors or any other device or method that precludes the Member from freely exiting the room or area, or that a reasonably prudent person would believe precludes the Member from freely exiting the room or area. In the case of a community residence, restricting a Member to the residential site, according to specific provisions of a Planning Document, physician’s orders, or court order, does not constitute Seclusion.
23. “Service Provider” means any individual or entity as defined in A.R.S. 36-551 as well as Division staff who administer direct services to Members.
24. “Support Coordinator” means the same as “Case Manager” as defined in A.R.S. 36-551.
25. “Unsafe Behavior” means a Member’s action or activity, whether intentional, unintentional, or negligent that causes a risk of imminent harm to the Member or others.

### **R6-6-901 R6-6-902. Applicability**

These rules apply to:

1. All programs operated, licensed, certified, supervised or financially supported by the Division.
2. All habilitation programs as defined in A.R.S. § 36-551(18), as well as all interventions included in this Article, shall be addressed in the client's ISPP.

A. This Article applies to all programs operated, licensed certified, supervised, or financially supported by the Division in accordance with A.R.S. 36-552, 39-2939, or 36-2940, and includes all Behavior Plans implemented or monitored by a Service Provider in accordance with this Article.

Will behavioral health providers that are funded through Mercy Care or UHC be responsible for following Article 9 if they are conducting a functional behavior assessment (FBA) or a functional analysis (FA) in the members home? If so, how is that going to be communicated to them?

B. For services provided in healthcare institutions as listed in R9-10-102(A), this Article only applies to the following:

1. Intermediate Care Facilities for Individuals with Intellectual Disabilities;
2. Nursing Care Institutions;
3. Adult Behavioral Health Therapeutic Homes; and
4. Behavioral Health Respite Homes.
- 5.

C. For behavioral health services authorized in accordance with A.R.S. 36-2939(A)(2), this Article only applies to:

1. Behavioral Health Therapeutic Homes; and
2. Behavioral Health Respite Homes.

D. This Article does not apply to:

1. Health and medical services authorized under A.R.S. 36-2939(A)(5); or
2. Dental services authorized under A.R.S. 36-2939(A)(6).

### **R6-6-902. R6-6-903. Prohibitions**

A. The following behavioral intervention techniques are prohibited:

1. The use of seclusion (locked time-out rooms).
2. The use of overcorrection.
3. The application of noxious stimuli.
4. Physical restraints, including mechanical restraints, when used as a negative consequence to a behavior.

B. The use of behavior modifying medications is prohibited, except as specified in R6-6-909, if:

1. They are administered on an "as needed" or "PRN" basis; or
2. They are in dosages which interfere with the client's daily living activities; or
3. They are used in the absence of a behavior treatment plan.

C. No person shall implement a behavior treatment plan which:

1. Is not included as a part of the ISPP; and
2. Falls under R6-6-903(A), without approval of the PRC.

A Service Provider shall not:

1. Abuse or Neglect a member.
2. Use a restricted technique under R6-6-904 with a Member as a negative consequence, or
3. Use Psychotropic Medication as a Chemical Restraint.

service providers shall not use psychotropic medicines as chemical restraint.  
How will this be enforced?

A, B,C ABOVE: all eliminated. Reinstate

## **R6-6-904. Restricted Techniques**

- A. The PRC is prohibited from approving Behavior Plans that include the use of restricted techniques that meet any of the following criteria:
1. Overcorrection as a form of punishment;
  2. Seclusion in a room, whether locked or where egress is prevented;
  3. Aversive Stimuli as a punishment;
  4. Physical Intervention, including Mechanical Restraints, as a punishment; or
  5. Techniques that in intent or execution violate a Member's rights as specified in A.R.S. 35-551.01 or other applicable laws, cause physical or psychological pain or harm to a member, or are used as a form of punishment.
- B. A Service Provider may only see the following techniques when the techniques are included in a Behavior Plan approved by the PRC and in the manner specified in the approved Behavior Plan:
1. Escape Extinction;  
escape extinction should never be allowed.
  2. Response Cost;  
mentions response cost, but is not defined in the definition list.
  3. Physical Intervention, including Mechanical Restraints;
  4. Administration of Psychotropic Medication for the purposes of behavior modification unless an exception is granted by the Division; or  
administration of psychotropic medicines for the purpose of behavior modification which seems to be a chemical restraint that is prohibited.
  5. Other techniques identified by the Division or the Planning Team as having the potential to:
    - a. Infringe on a Member's legally mandated rights.
    - b. Cause either physical or psychological pain or harm, or
    - c. Be used as a form of punishment.

Who at DDD would be responsible for approving the use of a psychotropic medication as a PRN? How would the approval or denial be communicated to the Qualified Vendor?

Restricted Techniques, 1 through 5, Remove

Revised R6-6-904. is of concern because with approval from PRC, restricted techniques can now be approved in a Behavior Plan. Those techniques include; Escape extinction, response cost, physical intervention including mechanical restraints and other techniques having the potential to infringe on members rights and protection from harm. The new revision changes the rule on PRN psychotropic medication granting an exception from the Division

### **R6-6-904. R6-6-905 ISPP Planning Team Responsibilities**

Upon receipt of the PRC's response and as part of its development of the client's ISPP, the ISPP team shall either:

1. Implement the approved behavior treatment plan; or
2. Accept the PRC recommendation and incorporate the revised behavior treatment plan into the ISPP; or
3. Reject the recommendation in whole or in part and develop a new behavior treatment plan to be resubmitted to the PRC and Human Rights Committee.

The Planning Team shall:

1. Participate in the development of a Behavior Plan to modify a Member's Unsafe Behaviors or Inappropriate Behaviors to improve the Member's quality of life.
2. Submit all new or revised Behavior Plans to the PRC for approval.
3. Comply with the determination of the PRC or reject the PRC recommendations and participate in redeveloping the Behavior Plan for resubmission to the PRC.

**R-6-6-905** does not mention including the planning document nor the IR that occurred since the last PRC approved in the BTP. this would help IOC to see if a violation of member's rights and the IR to see if a trend due to the previous BTP alternative behavior/target behaviors.

### **Section R6-6-903. R6-6-906 - Program Review Committee (PRC)**

A. The ISPP team shall submit to the PRC and Human Rights Committee any behavior treatment plan which includes:

1. Techniques that require the use of force.
2. Programs involving the use of response cost.
3. Programs which might infringe upon the rights of the client pursuant to applicable federal and state laws, including A.R.S. § 36-551.01.
4. The use of behavior-modifying medications.
5. Protective devices used to prevent a client from sustaining injury as a result of the client's self-injurious behavior.

B. The PRC shall be responsible for approving or disapproving plans specified in subsection (A) above and any other matters referred by an ISPP team member.

C. The PRC shall review and respond in writing within ten working days of receipt of a behavior treatment plan from the ISPP team, either approving or disapproving the plan. The response shall be signed and dated by each member present and shall be transmitted to the ISPP team with a copy to the chairperson of the Human Rights Committee for review and recommendations at its next regularly scheduled meeting pursuant to R6-6-1701 et seq. The response shall include:

1. A statement of agreement that the interventions approved are the least intrusive and present the least restrictive alternative.
2. Any special considerations or concerns including any specific monitoring instructions.
3. Any recommendations for change, including an explanation of the recommendations.

D. Each PRC shall issue written reports, as prescribed by the Division, summarizing its activities, findings and recommendations while maintaining client confidentiality.

1. On a monthly basis, report to a designated Division representative, with a copy to the chairperson of the Human Rights Committee.

2. On an annual basis, by December 31 of each calendar year, report to the Assistant Director of the Division of Developmental Disabilities, with a copy to the Developmental Disabilities Advisory Council.

E. The PRC shall be composed of, but not be limited to, the following persons designated by the District Program Manager:

1. The District Program Manager or his designee, who shall act as a chairperson.

2. A person directly providing habilitation services to clients.

3. A person qualified, as determined by the Division, in the use of behavior management techniques, such as a psychologist or psychiatrist.

4. A parent of an individual with a developmental disability but not the parent of the individual whose program is being reviewed.

5. A person with no ownership in a facility and who is not involved with providing services to individuals with developmental disabilities.

6. An individual with a developmental disability when appropriate.

A. The PRC shall include the following persons designated by the Division:

1. A Division employee who shall act as the PRC chairperson and who is a non-voting member of the PRC;

The PRC is not a voting member but should be a voting member as usually the person most trained by DDD.

2. A person qualified in the use of behavior management techniques, such as a Behavioral Health Professional;

3. A member of the IOC;

IOC is mentioned as required attendance, but IOC are volunteers and don't always have the free time, especially if they work or have a child/adult with IDD. Maybe mileage or a stipend would incentivize attending since reading and attending PRC is over the 10 hrs. AOA suggests for IOC volunteers.

Article 9 now requires an IOC member to be on the PRC committee. IOC members are volunteers. How will the district cope with the fact that we don't have enough IOC members to volunteer their time for PRC meetings?

4. A Quality Management Professional; and

What are the qualifications for someone to be considered a quality management professional? Per the definition located in R6-6-901 (B) (21) there are no specific certifications or training required.

5. A community member from at least one of the following categories:

a. A parent of an individual with a Developmental Disability who is not the parent of the Member being reviewed;

b. A person with no other personal or professional relationship with the Division;

or

c. An individual with a Developmental Disability.

Is the community member a mandatory attendance and how will DDD know if they are qualified to read the BTP and review it at the PRC meeting.

- B. The PRC shall meet to review and approve or deny all submitted Behavior Plans.
  - C. The PRC chairperson shall send the PRC's written determination to the Planning Team within five Business Days of the meeting described in R6-6-906(B).
    - 1. PRC approval of a Behavior Plan shall include:
      - a. A statement of agreement that the interventions approved are the Least Intrusive least restrictive interventions, and that the interventions are in compliance with R6-6-904.
      - b. Any special considerations or concerns including specific monitoring instructions; and
      - c. Any formatting or PRC procedural or documentation changes in the Behavior Plan that need to be made and resubmitted to the PRC before the Behavior Plan is considered fully approved.
    - 2. PRC denial of a Behavior Plan shall include:
      - a. The reason for denial;
      - b. Recommendations for changes to the Behavior Plan; and
      - c. An explanation of the recommendations.
- F. A PRC shall be separate from but a complement to the ISPP team, and the Human Rights Committee established pursuant to R6-6-1701 et seq.

### **R-6-906**

In the former R-6-903 (A) (4) a behavior treatment plan was needed for anyone that lived in a DDD funded residential placement that took behavior modifying medications. With the deletion of this requirement, are members no longer required to have a behavior treatment plan just because they live in a DDD funded residential program and take behavior modifying medications? If so, how is it determined if a plan is needed or not, who makes that decision, what is the criteria, how often is the topic revisited? Provider Representatives are no longer a part of the Program Review Committee. It is important to have provider representatives included since they are the ones that work with the members daily therefore, they have a good idea of what would work or not work with a member, if a staff would be able to understand the plan and they provide suggestions based off their experiences working with members with the same target behaviors.

### **Section R6-6-905. - Monitoring Behavior Treatment Plans R6-6-907 Implementing Behavior Plans**

Each ISPP team shall specifically designate and record in the ISPP the name of a member of the team, excluding those direct service staff responsible for implementing the approved behavior treatment plan, who shall:

- A. After a Behavior Plan is approved by the PRC, the Division shall identify all Service Providers subject to the Behavior Plan and provide a copy of the approved Behavior Plan to those Service Providers.
- B. A Service Provider identified in R-6-6-907(A) shall:
  - 1. Ensure that the behavior treatment plan Behavior Plan is implemented as approved by the PRC.
  - 2. Ensure that all persons individuals implementing the behavior treatment plan Behavior Plan have received appropriate training as specified in R6-6-906 R6-6-908 and as appropriate for the Member's Behavior Plan;
  - 3. Maintain training records of all individuals specified in R6-6-907(B)(2);

- 3-4 Ensure that objective, and accurate data are maintained in the client's record;
- 4-5 Evaluate, at least monthly, collected data and other relevant information as a measure of the effectiveness of the **behavior treatment plan** Behavior Plan; and
- 5-6 Conduct on-site observations of the implementation of the Behavior Plan **not less than** at least twice per month and prepare, sign, and place in the **client's Member's** record a report of all observations.

Are the "at least two times per month" observations per member or per location that the member's plan is implemented in? (e.g., two times in the DTA and two times in the group home)

A Behavior Plan no longer requires documentation that the guardian or the individual has signed "informed consent" for psychotic medication.

Who is funding and training the service providers for the BTP that they have to train their staff to implement?

Nowhere does the rule mention that the person writing the BTP knows the individual for whom the BTP is written nor that the writer attends the planning team where the team agrees to the BTP.

### **Section R6-6-906. R6-6-908 – Training**

A. Any person who is involved in the use of a behavior treatment plan shall be trained by the Division or trained by an instructor approved by the Division prior to such involvement.

B. Initial training shall cover at a minimum:

1. Provisions of law related to:

- a. Interventions; particularly this Article and 42 CFR 483.450 October 1, 1992), incorporated herein by reference and on file with the Office of the Secretary of State;
- b. Legally mandated rights of individuals with developmental disabilities; particularly A.R.S. §§ 36-551.01, 36-561 and 42 CFR 483.420 (October 1, 1992), incorporated herein by reference and on file with the Office of the Secretary of State;
- c. Confidentiality; particularly A.R.S. §§ 41-1959 and 36-586.01 and 42 CFR 483.410(c)(2) (October 1, 1992), incorporated herein by reference and on file with the Office of the Secretary of State.
- d. Abuse and neglect prohibitions pursuant to A.R.S. § 36-569.

2. Intervention techniques, treatment and services, particularly addressing the risks and side effects that may adversely affect clients.

especially important to include,  
excludes testing for tardive dyskinesia

3. A general orientation to:

- a. Division goals with respect to the provision of services to people with developmental disabilities.
- b. Related policies and instructions of the Division.

C. With respect to the use of interventions, training shall include hands-on or practical experience to be conducted by instructors approved by the Division, using a curriculum approved by the Division, and who have experience in the actual use of interventions as opposed to administrative responsibility for such use.

D. In addition to initial training, the Division shall ensure that refresher training is available as necessary to maintain currency in knowledge and recent technical trends related to intervention for the management of inappropriate behavior.

E. Physical management techniques shall only be used by those persons specifically trained in their use.

F. The following records and documents related to training shall be maintained by the Division for five years and be available for public inspection.

1. A summary of the training plan adopted by the Division in compliance with this Section, including schedules, instructors, topics, and expressed parameters of the hands-on or practical experience component of the training.
2. Required special knowledge, skills, training, education or experience of the instructors related to managing inappropriate behaviors.
3. A list of persons satisfactorily completing initial and refresher courses and course dates.

G. The Division shall review the training plan at least every two years for compliance with all applicable provisions of law and Division policy as well as for the protection of clients.

#### Reinstate DDD training,

- A. A Service Provider shall ensure Managing Employees, Direct Care Workers, and supervisors of Direct Care Workers successfully complete Article 9 Training.
- B. All training under this Article shall be taught by an Article 9 Instructor using the curriculum and method approved by the Division.
- C. Article 9 training shall include:
  1. The requirements, restrictions, and purpose of this Article;
  2. Interventions, including those described in this Article;
  3. Legally mandated Members' rights;
  4. Confidentiality requirements; and
  5. Division policies and procedures relating to this Article.
- D. Article 9 training shall be completed:
  1. For initial training, within 90 calendar days of hire or before working directly with Members without supervision from someone with a current certification in Article9, whichever is earlier; and
  2. For recertification as directed by the Division.

### **Section R6-6-907 –~~Section R6-6-909~~ - Sanctions**

For programs operated, licensed, certified, supervised or financially supported by the Division, failure to comply with any part of this Article may be grounds for suspension or revocation of a license, for termination of contract, employment, or for any other applicable administrative or judicial remedy.

The Division may impose sanctions for failure to comply with any part of this Article, including:

1. Suspension or revocation of a license or certification;
2. Termination of a contract;
3. Termination of individuals directly employed by the State of Arizona;
4. Prohibition against contact with Members; and
5. Any other administrative, contractual, or judicial remedies.

### **Old Sanctions—Reinstate**

### **Section R6-6-908 - Emergency Measures REPEALED**

A. Physical management techniques employed in an emergency to manage a sudden, intense, or out-of-control behavior shall:

1. Use the least amount of intervention necessary to safely physically manage an individual.
2. Be used only when less restrictive methods were unsuccessful or are inappropriate.
3. Be used only when necessary to prevent the individual from harming self or others or causing severe damage to property.
4. Be used concurrently with the uncontrolled behavior.
5. Be continued for the least amount of time necessary to bring the individual's behavior under control.
6. Be appropriate to the situation to ensure safety.

B. When an emergency measure, including the use of behavior modifying medications pursuant to R6-6-909(D), is employed to manage a sudden, intense, out-of-control behavior, the person employing that measure shall:

1. Immediately report the circumstances of the emergency measure to the person designated by the Division and to the responsible person.
2. Provide, within one working day, a complete written report of the circumstances of the emergency measure to the responsible person, the case manager, the chairperson of the Program Review Committee, and the Human Rights Committee.
3. Request that the case managers reconvene the ISPP team to determine the need for a new or revised behavior treatment plan when any emergency measure is used two or more times in a 30-day period or with any identifiable pattern.

C. Upon receipt of a written report as specified in subsection (B)(2) above, the PRC shall:

1. Review, evaluate and track reports of emergency measures taken; and
2. Report, to a person designated by the Division, instances of possible excessive or inappropriate use of emergency measures on a case-by-case basis for corrective action.

### **Emergency Measures need to be reinstated**

**Section R6-6-909 - Behavior-modifying Medications REPEALED**

A. The Division shall make available the services of a consulting psychiatrist who shall review cases and provide recommendations to prescribing physicians to ensure that the medication prescribed is the most appropriate in type and dosage to meet the client's needs.

B. Behavior-modifying medications shall be prescribed and administered only:

1. When, in the opinion of a licensed physician, they will be effective in producing an increase in appropriate behaviors; and it can be justified that the harmful effects of the behavior clearly outweigh the potential negative effects of the behavior modifying medication.
2. As part of a behavior treatment plan in the ISPP.
3. With the informed consent of the responsible person.

C. The Division shall provide the following monitoring, in addition to that specified in R6-6-905, for all behavior treatment plans that include the use of a behavior-modifying medication:

1. Ensure that collected data relative to the client's response to the medication is evaluated, at least quarterly, at a medication review by the physician and the member of the ISPP team designated pursuant to R6-6-905 and other members of the ISPP team as needed.
2. Ensure that each client receiving a behavior-modifying medication is screened for side effects, and Tardive Dyskinesia as needed, and that the results of such screening are:
  - a. Documented in the client's case record;
  - b. Provided immediately to the physician, responsible person, and ISPP team for appropriate action if the screening results are positive; and
  - c. Provided to the Program Review Committee and the Human Rights Committee within 15 working days for review of screening results that are positive.

D. In the event of an emergency, a physician's order for a behavior modifying medication may, if appropriate, be requested for a specific one-time emergency use. The person administering the medication shall immediately report it pursuant to R6-6-908(B).

E. The responsible person shall immediately be notified of any changes in medication type or dosage.

Reinstate Behavioral modifying medications R6-5-909.

B.3 Removes informed consent. Where is informed consent for the psychotropic medicines and BTP in the Rule?

C. Data is not collected, medication is not evaluated quarterly ,

C.2 Screening for Tardive Dyskinesia is eliminated.

These would all be against the person's rights and is important to retain.

## Section R6-6-910 – Renumbered

- A. In the event of an Emergency Safety Situation that is not covered by the Member’s Behavior Plan, a Service Provider, its employees, or its agents may apply Physical Interventions in accordance with R6-6-910(B) to ensure the safety of the Member or others.
- B. Physical Interventions used during an Emergency Safety Situation shall be:
  - 1. The least amount of intervention necessary to safely manage an Emergency Safety Situation;
  - 2. Used only when less restrictive methods are unsuccessful or are inappropriate;
  - 3. Used only when necessary to prevent the Member from harming self or others;
  - 4. Implemented during the Emergency Safety Situation for the least amount of time necessary; and
  - 5. Performed only by individuals trained in the implementation of Division-approved intervention techniques.
- C. The Planning Team shall reevaluate a Behavior Plan when Physical Intervention is used in response to an Emergency Safety Situation two or more times in a period of 30 calendar days or with any identifiable pattern.

Use of Emergency measures does not mention using for behavior and the need to stop the emergency measure when the behavior stops.

### CONCLUDING THOUGHTS

When Article 9 was developed, literally the whole state was represented by DD staff and families. It has stood the test of time since 1994. According to page 604, #5, the reason the rule should be amended is to make it clear, concise, and understandable. (This has never been a problem). #6 shows that the State did not review or rely on any study relevant to the rule. #7 says a “showing of good cause as to why the rulemaking is necessary” is not applicable. #11 does not indicate that any federal law is applicable to the changes.

PRC has left out a provider of DD services on the committee, The Chair is not allowed to vote and perhaps, most important is that each committee is to have a behavioral professional . This has not happened in District Central. It does not mention that a Behavior Plan must be accompanied by a Planning Document.

Karen Van Epps, District Central IOC Chair

Quote, “Article 9 has had a significant impact in improving quality of life for many individuals. The sense of community has become the focus as many people, who at one time resided within the confines of an institution, now experience the fulfillment of value as community members. The role of service provider has shifted, from one of controller, to partner in support of individuals”.

The new revisions are in conflict with;

ARS 36-55.01 Developmentally disabled persons rights guaranteed

ARS 36-551. Prohibiting certain treatment or drugs; use of aversive stimuli

DD members are much different from behavioral health members and need the protections that the Article 9 provided. It is very important to retain the language of Article 9 as originally written or if changes are made, they should only be made for clarification. The fear is that the proposed rules may necessitate institutional care for DD members instead of promoting community living as demanded by Medicaid/CMS.  
Carol McNulty, District Central IOC Vice-Chair

DD members are much different from behavioral health members and need the protections that the Article 9 provided. It is very important to retain the language of Article 9 as originally written or if changes are made, they should only be made for clarification. The fear is that the proposed rules may necessitate institutional care for DD members instead of promoting community living as demanded by Medicaid/CMS.

Who was included in this rewrite process? This current revision seems distinctly slanted toward Behavioral Health, rather than DDD with IOC oversight.

A clear definition of the following is needed to be in place:

What are the violations and what needs to be approved.

Definition of techniques that are required for PRC approval.

Definition of "emergency measure", and when is it to be reported. No reporting measures are included in the new revision. All Emergency measures are removed.

("emergency measures can only be used in concurrent with the behavior"). Replaced with "Least amount of time for least amount of force", but does not define that it must be concurrent with the behavior, which infers there may be an offset, which means member may be restrained longer than the behavior. This needs clarification.

Removed language that states members shall be protected from chemical restraints.

This gives permission for medications to be administered at the whim of someone who just may not want to be bothered with the Member.

Tardive Dyskinesia check has been removed. This is vital to the protection and health of the Member.

Where is Informed Consent?

DDD has been assured that Article 9 training will not change fundamentally, other than specific revisions to the new Article 9, but where are the guarantees for that, if the basis for the current article 9 training is being removed regarding the Member's rights and restrictions.

This new article 9 sets up the perfect model for a medical model/institutions.

What was the purpose of this rewrite? "To make it clear, concise, and understandable." Pg. 604, #5, #6 and #7. It is not clear, concise, and understandable. This language is not easily understood by those who would oversee its implementation.

If only a behavioral health professional is to write the plan, how is the training of the plan going to be translated from the behavioral health professional to the Direct Care Staff who are directly responsible for implementing it with the member? If a BCBA is paid to write the plan, where is the funding and facilitation for training the plan, once it is approved? This is an Access to Care concern. Even if the funding is in place, how accessible is the professional to the planning teams and members?

The revision does not state that the planning team will not be writing the plan, it says they will be *active* in writing the plan. However, they can't write a plan with any of the restricted techniques without the oversight or direct intervention of the behavioral health professional. It is unclear what access or ability a planning team will have to write a plan. If all plans have to be approved or facilitated by a behavioral health professional, then what plans are left that can be written without one? With this rewrite, we are removing the ability of a planning team to write a plan by themselves.

Historically, Article 9 was all about promoting the potential of our members to interact in the community. This revision of Article 9 as being presented by Behavioral Health has nothing to do with promoting individuality or potential in the community. This initiates a path to going back to an institutional model where we can keep people safe, and if that is accomplished by chemical restraint, then that will be acceptable.

Bottom Line: We are moving away from enforcing rights and moving back towards an institutionalized model to where we can chemical restrain people to ensure their safety. It has nothing to do with their potential or their interaction in the community. This is against the Medicaid model, which is promoting a strong interaction with the community. This is a time warp back to institutionalization.

In closing, traditionally, Article 9 was written to protect vulnerable adults in residential settings, whether they do or do not have a guardian/responsible person, from abuse and neglect. This new rewrite does not accomplish that goal. Is this level of support needed for all members served by DDD? Are these changes really in the best interest of the Members and supporting them to meet their potential in the community as opposed to just keeping them safe in a medical model by chemical restraints, and do they support guidelines from Medicaid? This new rewrite of Article 9 is setting the stage for a behavioral health model: Behavioral health will come into the group home to implement the plan twice a week. Staff will not implement the plan. Thus, the way DDD does services now is going to change. There will not be consistency within the group home, the DTA, the community using the same language and the same techniques. By removing safeguards currently in place, and in rewriting Article 9, the program will be moved into a behavioral health model, which is not the DDD model.

Linda Mecham; Compiled from IOC Meeting held May 24, 2021 @ 10:00 AM

Individuals with intellectual and developmental disabilities (I/DD) should be assured safety and security within the context of dignity of risk, autonomy, and choice. It is essential that we promote each individual's ability to be valued, fully participating members of the community and to engage in meaningful and relevant activities. [A 2018 report published by the Council on Quality and Leadership, entitled, "Restraint, Restrictive Interventions, and Seclusion of People with Intellectual and Developmental Disabilities"](#) notes that while hotly contested, there is inconclusive evidence of their effectiveness. In fact, the study notes that their use increases the risk of death, injury, and psychological harm not only for people with disabilities, but for the individuals employed to support them.

Article 9 in Arizona historically, proactively, and positively supported the positive and adaptive behavior of individuals with I/DD. Article 9 has been used as a template for the development of best practice and model policies for supporting individuals with I/DD across the country. One example is the [Jensen Settlement Agreement in Minnesota](#), the result of a lawsuit filed against DHS in 2009 alleging that the former Minnesota

Extended Treatment Options (METO) program used restraint and seclusion in a way that broke the law and violated the rights of people with disabilities. Jensen required person-centered thinking, positive behavioral supports and serving people in the most-integrated setting consistent with the person's goals, dreams, and aspirations. It is therefore, of great concern that the revised Article 9 would seem to allow certain elements historically prohibited. A review of recent reports from the DDD Independent Oversight Committee's indicate that there is an overall theme in the response by individuals with I/DD to their behavioral treatment plans: a lack of trained and passionate direct care workers results in individuals with I/DD feeling that they are rushed, disrespected and as a result they engage in behaviors deemed "inappropriate".

### **Restraints, Restrictive Interventions, Response Cost, Seclusion**

We are particularly concerned with the following changes to Article 9, and suggest the following:

*Overcorrection as a form of punishment* -- should be explicitly prohibited without the modifier "as a form of punishment".

*Aversive stimuli as a punishment* -- should be explicitly prohibited without the modifier "as a form of punishment".

*Response Cost* -- should be explicitly prohibited without the modifier "as part of a Behavior Plan approved by the PRC.

*Physical Intervention, including mechanical restraints* -- should be explicitly prohibited without the modifier "as part of a Behavior Plan approved by the PRC.

Psychotropic Medication- should expressly include provisions for informed consent for the initial administration of any psychotropic medication, changes in doses, and screening protocols for side effects. PRN medications for the purpose of behavior management should be prohibited.

Escape Extinction -- should be explicitly prohibited.

### **Behavior Plans**

We concur with prior suggestions from the DDD Independent Oversight Committees: DDD should develop a standard template for Behavior Treatment Plans with participation and input from legal guardians, identify antecedent behaviors and ensure that the individuals developing the plan have familiarity with the individual with I/DD.

The proposed rule should require that behavior plans include documentation of proactive techniques to identify triggers, interventions to be utilized before behaviors escalate and skills training to support individuals to improve their self-regulation and/or use alternative and augmentative communication to enable them to communicate when they are stressed, in pain, etc.,

### **PRC Membership**

The revisions to the membership may result in a lack of experience and expertise in supporting individuals with I/DD. While we agree that PRCs should also include representatives with Quality Management and Behavioral Management backgrounds, it is important to maintain inclusion of representatives with experience in providing training and skill development to individuals with I/DD (habilitation providers), and District Program Management staff as voting members.

## Training

There appears to be an elimination of the requirement that all individuals within the Division and its qualified vendors complete Article 9 training. This training ensures that everyone, from front line staff to executives are aware of the importance of maintaining the human rights of individuals with I/DD. Further, it does not appear that the Behavioral Health professionals and Quality Management professionals appointed to the PRCs will be required to complete Article 9 training.

## Data Collection

The requirement that within one working day a report must be submitted when emergency measures are utilized has been deleted. Further, the reference that planning teams convene to develop a new behavior treatment plan if one does not already exist has also been deleted and should be added. The Independent Oversight Committees have repeatedly requested a standardized format for reporting incidents across regions and reference to this data collection, tracking, trending, reporting and relevant changes to policies and procedures should also be included in any revision to Article 9.

## Conclusion

Integrating acute, behavioral, HCBS and LTSS approaches should continue to support the strengths, choices, autonomy, and integrity to supporting individuals with I/DD. The National Association of State Directors of Developmental Disabilities Services (NASDDDS) affirmed a similar position [opposing aversive interventions and promoting positive behavior supports in 2015](#). Any revisions to Article 9 should affirmatively reject the use of interventions that have the potential to cause pain and harm, whether physical or psychological.

Diedre Freedman, District West IOC Chair

## **ADDENDUM #2: ABUSE AND NEGLECT (CHAPTER 64)**

### **QUESTIONS SUBMITTED TO DDD REGARDING ABUSE AND NEGLECT (CHAPTER 64)**

*From District Central Independent Oversight Committee*

The training material for Instructors and Providers was sent out for Public Comment, and per Chapter 64 of the Policies manual, MAY be used to teach the concepts. The training material/curriculum for Members did not go out for Public Comment, and per Chapter 64 of the Policies Manual, states that the material MUST, not MAY, be used. The training material/Curriculum referred to is found in on the DDD Website under the heading "Abuse and Neglect".

Why did the training material for the Members NOT go out for Public Comment?

Why is the curriculum for the Instructors and Providers different from the curriculum for the Members?

Who will teach the curriculum to the Members in the DTA setting, per Chapter 64, if the Member is dually enrolled in a group home and DTA? Is that instructor qualified to deal with the possible damaging psychological effects this training may have on the Member, based on possible past experiences of abuse or neglect?

If the Member is a visual learner, rather than an auditory learner, could the slides present an impression that is not intended? For example, is biting one's arm acceptable behavior? Is putting one's hand on (especially) the private, personal areas of another's body acceptable behavior? If the member is not able to express what the slides are conveying to him/her, how can the Instructor correct that misconception?

What is the Opt-in/Opt-out process for Members?

If a Responsible Person (IE Guardian) is involved, does that person have prior knowledge from DDD that this curriculum is being taught to the Member for whom they are responsible? What is that process of informing a Responsible Person, since what is being taught to the Member did not go out for Public Comment?

If the Member is responsible for himself, what is the process for him/her to opt in or out without actually viewing the material before it is presented?

With the inclusion of over 100 slides, the time it would take to review the material is too long for most Members. What is the plan to divide this up?

Have you considered that doing this in the DTA setting could provide an atmosphere of exclusion if the Member opts out of this Instruction?

Since this is to be reviewed annually, per chapter 64, does the Opt-in, Opt-out take place every year? Because of the sensitive nature of the curriculum, should that document be included in the Planning Document/Person Centered Plan?

### IOC QUESTIONS; DDD RESPONSES; IOC QUESTIONS TO DDD RESPONSES ABUSE AND NEGLECT (CHAPTER 64)

Key: **Bold/Black: Original IOC questions:**

Blue: Responses from DDD

- *Italicized Bullet points: IOC responses to DDD answers*

The training material for Instructors and Providers was sent out for Public Comment, and per Chapter 64 of the Policies manual, **MAY** be used to teach the concepts. The training material/curriculum for Members did not go out for Public Comment, and

- **per Chapter 64 of the Policies Manual, states that the material MUST, not MAY, be used. The training material/Curriculum referred to is found on the DDD Website under the heading "Abuse and Neglect".** The Division determined that we would help offset costs to deliver abuse prevention training after receiving public feedback about the amount of time and resources that Qualified Vendors would need to expend to implement. For this reason and to ensure that members were offered consistent training, we determined that we would require one training curriculum for all members. Members are NOT required to take the training.
- *The question had nothing to do with how providers were being paid to train staff. We understand the premise behind consistency in training content but many members will not understand the content the way it is presented in the MUST use material*
- **Why did the training material for the Members NOT go out for Public Comment?**
  - **Response:** The original posting of Chapter 64 had a summary version of the training-although it's not required that DES DDD get Public feedback for training. The Division needed to get the source documents from

Massachusetts and then update them to align with Arizona laws and rules and to brand the DES logo etc. This occurred after the original posting and took some time. **We** determined that it was in the best interest of the community to make the training available after the formatting was completed. **We** plan to provide a process to gather additional public feedback once vendors have provided the training for a full year.

- *With the importance of this material, more than a summary should have gone out. Why would DDD not want feedback on this? Is it within the law that a summary is adequate for Public Comment, or must it be the document in its entirety? Did anything ever come back from someone with knowledge of law?*
- *Training (Methodology) vs Curriculum (Content): Mincing words: Training on how the curriculum (Chapter 64) does not need Public Comment. The Curriculum (Chapter 64) needs to go out for Public Comment.*
- *NON-RESPONSIVE ANSWER: Why did the material for Members NOT go out for Public Comment?*
- *Cost effectiveness: cheaper to do it this way...Offensive...individual needs are not being met due to cost...???*
- *“WE DETERMINED” THAT IT WAS IN THE BEST INTEREST OF THE COMMUNITY...WHO IS “WE”...SENSITIVE STUFF...NOT OK...WHERE ARE THE COMMUNITY GUIDELINES? SOME KIND OF PUBLIC DETERMINATION.*
- *STEWARDS OF THE MONEY...WHERE WAS PUBLIC INPUT RE THIS VERY DEFINITIVE SEX ED TRAINING?*
- *DID AHCCCS REVIEW THIS?*
- *ABUSE AND NEGLECT COMMITTEE NEVER OK'D THIS ACTION (per two members of that committee)*
- **Why is the curriculum for the Instructors and Providers different from the curriculum for the Members**
  - *Response: This member training was one that was recommended by the Sexual Violence & I/DD Collaborative chaired by the ADDPC. Awareness and Action was developed in Massachusetts (MA) by and for self-advocates.*
  - <https://disabilityinfo.org/records/awareness-and-action-aa/>
- *Responsible Person/Family Members should be involved in approving curriculum, i.e. the need for Public Comment*
- *There is only 1 DDD Member on the ADDPC committee and he works full time, and does not represent the majority of Members served by DDD. The training is for members that participate in DTAs and live in group homes. The training is not reflective of the member's abilities that participate in the 2 targeted programs/services.*
- *IF A MEMBER LIVES AT HOME, BUT ATTENDS A DTA, IS HE REQUIRED TO TAKE THE MATERIAL?*
- *WHERE IS CULTURAL DIVERSITY SENSITIVITY?*
- *NO PRE-TEACHING*
- *NON-RESPONSIVE ANSWER: Why is the material different for Providers and Members?*

NO PROBLEM WITH PROVIDER CURRICULUM...THE WAY YOU PROTECT THE MEMBERS IS BY TRAINING THE STAFF: IF THE ADULTS IN THE ROOM ARE TRAINED THEY CAN PROTECT THE MEMBERS THROUGH THIS TRAINING.

- **Who will teach the curriculum to the Members in the DTA setting, per Chapter 64, if the Member is dually enrolled in a group home and DTA? Is that instructor qualified to deal with the possible damaging psychological effects this training may have on the Member, based on possible past experiences of abuse or neglect?**
  - **Response:** Chapter 64 requires the DTA to offer the training and if the member does not attend a DTA, then the Group Home provider offers the training. Members and guardians decide if they want to take the training or not. The vendor determines who does the training but there is a comprehensive instructor guide and a participant guide posted. We understand that not all training is going to be a fit for all individuals.
- **BE A FIT FOR ALL INDIVIDUALS.** In the response to the first question the reply was “we determined that we would require one training curriculum for all members.” Confusion: If DDD determined, with the support of ONE person from a disability advocacy organization, no matter how little he had in common with those for the whom the training is being provided, why is it appropriate to only offer 1 training instead of meeting the needs of the specific members abilities?
- *“Not all training is going to be a fit for all individuals.”*
- *One size does not fit all in the DDD world. This seems to be an admission that the curriculum needs to be individualized per the member who participates.*
- *See Member Bill of Rights, Letter O: “Right to express human sexuality and receive appropriate training;” This is violating the Member Bill of Rights, as this is not appropriate training for all Members.*
- *NON-RESPONSIVE ANSWER: How will one know if psychological damage is or has been done? Professionals trained in the DDD population and psychiatry need to be involved.*
- *TRAINING VS CURRICULUM...need to be consistent is whether referring to the Training of the Curriculum or the curriculum itself (the content)*
- *18 YEAR OLD (STAFF) TEACHING THE CURRICULUM????? INSTRUCTOR NEEDS TO BE EXPERIENCED IN THE SUBJECT....*
- *THE MEMBER WILL WANT TO TALK ABOUT THEIR EXPERIENCE, BUT CURRICULUM DOES NOT ALLOW FOR THIS...NEEDS TO BE INDIVIDUALIZED...Who will the Member talk to? Again, is the listener qualified to have that discussion with the Member?*
- **If the Member is a visual learner, rather than an auditory learner, could the slides present an impression that is not intended? For example, is biting one’s arm acceptable behavior? Is putting one’s hand on (especially) the private, personal areas of another’s body acceptable behavior? If the member is not able to express what the slides are conveying to him/her, how can the Instructor correct that misconception?**

- o **Response** Members and guardians decide if they want to take the training or not. We plan to provide a process to gather additional public feedback once vendors have provided the training for a full year.
- *Feedback after 1 year is not acceptable: Results in possible traumatization of members for a year then collect the data on the traumatization? The only data being collected at this time is whether the Member took the course or not.*
- *The Responsible Person/Guardian needs to view the training material before the member participates in it. The only way to view the curriculum is on the website. The website is not user friendly, even for us that know how to access it. Does this mean that the Member is his own guardian that he will have to review the material before determining if it is appropriate for him, in order to participate in the course?*
- *What does the questionnaire for feedback include? Parents? Vendors? Members?*
- *From an IOC member's child (who is served by the Division): THE PICTURES DID NOT MAKE ANY SENSE. EXPLANATION NEEDED. NOT GOOD. COLORS: THE PEOPLE IN HER WOULD NOT UNDERSTAND RED IS STOP AND GREEN IS GO...*
- *WHERE IS THE PRETEACHING? (MEMBER)*
- **NON-RESPONSIVE ANSWER:** *Could the slides present an impression that is not intended? For example, is biting one's arm acceptable behavior? Is putting one's hand on (especially) the private, personal areas of another's body acceptable behavior? If the member is not able to express what the slides are conveying to him/her, how can the Instructor correct that misconception?*
- **What is the Opt-in/Opt-out process for Members?**
  - o **Response:** *The vendor offers the training and documents which members it was offered to. Members and guardians decide if they want to take the training or not.*
- *There is no required documentation for the member if he opted in or out. Can Providers put the names of all members on an Excel sheet, make a random announcement, and that is sufficient?*
- **If a Responsible Person (IE Guardian) is involved, does that person have prior knowledge from DDD that this curriculum is being taught to the Member for whom they are responsible? DDD: Vague question....**
  - o **Response:** *Yes. Members and guardians decide if they want to take the training or not.*
- *HOW IS DDD INFORMING THE RESPONSIBLE PERSON ABOUT THE TRAINING AND THE CONTENT? This SHOULD BE DONE THROUGH BLASTS, SNAIL MAIL AND BY THE DDD SCS AT EACH ISP MEETING. This is a DDD requirement. DDD should be the responsible for sharing the information with the Responsible Person/Guardian.*
- *There cannot be in "Informed Consent" (per Article 9) without knowing what the curriculum is.*
- **NON-RESPONSIVE ANSWER:** *How can there be Prior knowledge? Did not go out for Public Comment and yet it is in Policy.*

- **What is that process of informing a Responsible Person, since what is being taught to the Member did not go out for Public Comment?**

- o **Response:** The staff (Recognizing and Reporting Abuse, Neglect and Exploitation of Vulnerable Populations and member (Arizona Awareness & Action - Recognizing, Reporting and Responding to Abuse, Neglect and Exploitation) training curriculum are posted to the DES DDD website.
  - o <https://des.az.gov/services/disabilities/developmental-disabilities/vendors-providers/current/training>
- *NON-RESPONSIVE ANSWER: How can there be Prior knowledge? Did not go out for Public Comment and yet it is in Policy.*
- *HOW IS DDD INFORMING THE RESPONSIBLE PERSON ABOUT THE TRAINING AND THE CONTENT? This should be done through NEWSLETTERS, blasts, snail mail, and by the DDD Support Coordinators at each Planning Document/Personal Centered Plan Meeting. This is a DDD requirement. DDD should be responsible for sharing the information with the Responsible Person/Guardian.*
- *MOST OF WHERE I LIVE IS NOT WIRED FOR INTERNET. THIS DOES NOT WORK.*
- *CULTURAL SENSITIVITY AND DIVERSITY.*

- **If the Member is responsible for himself, what is the process for him/her to opt in or out without actually viewing the material before it is presented?**

- o **Response:** Qualified vendors should share information about what the training covers. Members and guardians decide if they want to take the training or not. They do not need to opt out.
- *NON-RESPONSIVE ANSWER:  
Since, PER ARTICLE 9, consent is required. In order to obtain written consent, all relevant information would need to be provided, which in this case is the training. In order to get consent from a member who is his own responsible person, PER Art 9, the Member would need to see the training. Circular logic but that is what would need to be done to comply.*
- *Regarding the last sentence, "They do not need to opt": Would a provider need to really do anything besides provide a list of members to DDD as verification that the class was offered, since they do not need to know who opts out?*
- *There cannot be "Informed Consent" (per Article 9) without knowing/VIEWING what the curriculum is.*
- *DDD should provide a standardized form for Members to opt-in/Opt-out. District Central IOC has seen 4 different permission forms from 4 different Providers. Each is different, each protects the Member and/or the Provider in different ways. One gave very detailed account of content, one merely mentioned the location on the DDD website, with the other two somewhere in between. DDD should be responsible enough to provide protection from all liability for everyone involved, including the Member.*
- **With the inclusion of over 100 slides, the time it would take to review the material is too long for most Members. What is the plan to divide this up?**
  - o **Response:** Vendors are to offer and provide this during routine service delivery (for example as part of the structured day programming) so they can offer the training in multiple sessions to fit member needs.

- *In a normal slide presentation, with discussion, the time allotment is about 1-2 minutes per slide. Knowing the training would need to typically be broken into 30-45 minutes per training, with the possibility of covering one slide every 4-5 minutes, this course could possible take: (session @ ½ hour @ 5 min slide= 6 slides per session = Seventeen 30 minute sessions. Finish up the course, if divided equally, at the end of the year...just in time to begin again. Why must this be taught annually? Is this annual renewal required for the Providers as well?*
- *Trauma from past incidents could result in behaviors and/or chaos in the middle of the presentation. Needs to be individualized, per Members Bill of Rights, letter O. "Right to express human sexuality and receive appropriate training;"*
- *NON-ANSWER: DDD is leaving this up to the Provider/Vendor. Again, needs to be individualized.*
- ***Have you considered that doing this in the DTA setting could provide an atmosphere of exclusion if the Member opts out of this Instruction?***
  - *Response: Members choose activities in Day Services that they want to do. This means often groups of members getting day services participate in different activities. This follows the same principle.*
- *But, if it is a responsible person, other than the member that is choosing for the Member to participate in the training, that takes away the Member choosing what they want to do at the DTA! SO yes, it is exclusionary. (If a Member's friends are all in the media room watching slides, and he is not allowed, per Guardian, then yes, he will feel excluded. Lack of understanding; his group is participating in something he cannot participate in.) DTA Calendar is very structured: 1-2 items in the AM; 1-2 items in the PM, depending on Staffing, space, etc.*
- ***Since this is to be reviewed annually, per chapter 64, does the Opt-in, Opt-out take place every year? Because of the sensitive nature of the curriculum, should that document be included in the Planning Document/Person Centered Plan?***
  - *Response: Annually, members and guardians decide if they want to take the training or not. Qualified vendors are required to maintain documentation of the offer. It's not currently required to be documented in the PCSP.*
- *Because of the possibility of being exclusionary, this should be listed in the rights section of the Planning Document/Person Centered Plan. Additionally, in the acknowledgement section of the Planning Document/Person Centered Plan, acknowledgement from the Responsible Person/Guardian/Member that the DDD SC informed the responsible person of the training and the content to qualify for "informed consent", per Article 9.*
- *Why should this be presented every year? Is that the requirement for the Providers/Staff?*
- *IF THIS IS SO IMPORTANT WHY IS IT NOT PRESENTED AT THE 90 DAY MEETING WITH THE MEMBER AND THE TEAM? ONE MEMBER HAS HAD 3 MEETINGS, SC WAS UNAWARE OF TRAINING WHEN GUARDIAN MENTIONED THE TRAINING. THIS IS THE PLACE WHERE TWEAKING CAN TAKE PLACE. NOT APPROPRIATE AT ALL.*
- *Could become a risk; should be listed on the risk assessment*
- *Ask for an interim report since it has been rolled out since July. Share data.*
- ***Refer to 41-3804 N:*** *If a committee's request for information or records from a department or service provider is denied, including an objection pursuant to subsection G of this section, and if requested by the committee, at least one representative of the department or service provider and at least one committee*

member shall meet and confer within five business days after the date of the request or on a later date that is agreed to by both parties and shall in good faith attempt to resolve the objection informally and cooperatively. After meeting and conferring, the committee may request in writing that the director of a department review this decision. The director shall timely conduct the review and, not later than twenty-one calendar days, after receiving the request for review, the director shall deliver to the committee a written decision explaining in detail the factual and legal basis and reasoning for the department's decision. The department shall bear the costs of conducting the review. A final agency decision made pursuant to this subsection is subject to judicial review pursuant to title 12, chapter 7, article 6. The department shall not release any information or records during the period an appeal may be filed or is pending:

- **41-3804 G**: Each committee shall submit written objections to specific problems or violations of client rights by the department or service provider through the director of the department of administration for review by the director of the department that is responsible for the client. The director of the department shall deliver to the committee a detailed written response to each written objection within twenty-one calendar days after receiving the objection from the department of administration.

## Introduction, study purpose and direction

ADEQ rulemaking requirements include establishing criteria for the economic, social and environmental costs and benefits for listing or delisting waters for state-level protection, and for setting standards for non-WOTUS and other waters of the state. Accordingly, this assignment is understood by the consulting team (Consultants) to focus on services pertaining to modeling the economic costs and benefits associated with decisions for adopting water quality standards<sup>1</sup> for non-WOTUS waters and other waters of the state, and for listing or delisting waters for protection within a new Surface Water Protection Program. A parallel consideration in this assignment is recognizing, in at least a qualitative sense, the social effects associated with waterbody actions. Appendix A, Rulemaking and BCA relationships, summarizes generalized rule-making requirements and related components of the benefit/cost analysis (BCA).

Pursuant to ADEQ's direction, the Consultants used a national study<sup>2</sup> published by EPA and the Department of the Army, which analyzed economic effects of changes in the definition of WOTUS, as a general framework for the Arizona-specific BCA model. The EPA document includes national and state-level costs as well as estimates for benefits, along with a proposed framework for evaluating benefits at smaller levels of geography. Whereas the ADEQ BCA model generally reflects the scope, methodology and data sources used in the EPA document, the EPA framework was adapted and supplemented by the Consultants to address the types of policy actions that are most likely to occur in Arizona. These adaptations are described in more detail in subsequent sections of this report.

To expedite the framework for the BCA with respect to this assignment, ADEQ identified three different "case study" classes of waterbodies that could involve designation as non-WOTUS protected surface waters, along with specific waterbodies to represent each class, as shown below:

Class 1 – Sky Island Stream. Representative Water – Stronghold Canyon, Cochise County

Sky Islands are isolated mountain ranges in southeastern Arizona. These mountains contain a number of perennial or intermittent surface waters that have no significant nexus to a traditionally navigable water. The streams will die out in the deserts surrounding the sky island but are still important components of Arizona's overall hydrology.

Class 2 – Isolated Lakes. Representative Water – Pintail Lake, near Show Low

Allen Severson Memorial Wildlife Area/Pintail Lake is known in abbreviated form as "Pintail Lake." This wildlife area is actually a man-made wetland created from treated wastewater, and is recognized nationally as one of the first of its kind in the country.

Class 3 – Ecologically, Culturally, or Historically significant water. Representative Water – Quitobaquito Pond, Organ Pipe Cactus National Monument in Pima County

---

<sup>1</sup> The Consultants' understanding with respect to "standards" in this particular assignment is that standards can relate to a designation or other status of a waterbody but that modeling efforts addressed herein are not expected to include quantified changes in standards for specific contaminants or a quantified interpretation of any such changes in terms of benefits and costs. However, BCA modeling methods can be structured to recognize potential future measures and/or changes pertaining to standards.

<sup>2</sup> *Economic Analysis For The Proposed Revised Definition of WOTUS Rule*. 2021. The study, referred to as "the EPA document" in this report, is a joint effort of the Environmental Protection Agency (EPA) and the Department of the Army.

As a part of Organ Pipe Cactus National Monument, the National Park Service, in 1961, removed all old structures from the Quitobaquito Pond site, drained and deepened the pond, and constructed improvements to accommodate visitors and help protect the area.

This report addresses the application of a BCA process using the three classes of waterbodies above, while also referencing conditions that could apply to Arizona waterbodies in general. The BCA model described in this report is included as a separate submittal to ADEQ in spreadsheet format. The model addresses all three case-study water bodies within a single modeling framework.

Subsequent sections in this report are titled as follows:

EXECUTIVE SUMMARY

WORKING WITH ANALYSIS GUIDANCE IN EPA DOCUMENT

CONSIDERATION OF OTHER BENEFIT/COST MODELING IN ARIZONA

WATERBODY CLASS-SPECIFIC CONDITIONS AND CONSIDERATIONS; BENEFIT/COST CATEGORIES IN ANALYSIS FRAMEWORK

MODEL PROCESS AND STRUCTURE

SOCIAL BENEFIT/COST CONSIDERATIONS AND CATEGORIES RELATED TO WATERBODY ACTIONS

BCA MODEL SUMMARY RESULTS

A series of Appendices are also attached, addressing various technical issues.

## Executive summary

The three case-study waterbodies provide a contrasting and otherwise informative set of examples by which to illustrate various aspects of how the BCA model is structured, the influence of the surrounding population base, the range of results generated, and the sensitivity of these results to certain basic data variables. In addition to a quantitative analysis based on the data available for various cost and benefit factors, the model incorporates a framework for addressing additional, qualitative aspects of a BCA for Arizona waterbodies. These qualitative components add context to the quantified portion of the BCA and reflect potential elements of a BCA that could be considered for quantitative treatment in some later iteration/refinement of the modeling process. Including these qualitative discussions also helps illustrate certain limitations in the current modeling process.

The quantitative elements of the BCA model synthesize the following types of information:

- Key characteristics of the three case-study waterbodies for which the BCA process will be performed and which influence the application of various cost and benefit factors.
- Number of households within “local” and “non-local” areas with respect to each of the three case-study waterbodies – defined as 50-mile radius rings and 100 to 150-mile outer ring “donuts,” for local and non-local areas, respectively, to which benefits factors are applied. Other demographic data were also assembled for each waterbody’s local area for purposes of environmental justice considerations.
- Quantified cost and benefit factors to apply to the waterbodies and to the households in the two types of analysis areas.
- Factors for updating cost and benefit estimates derived (by others) in preceding years and for discounting streams of costs and benefits estimated to occur over a subsequent 20-year period.
- Cost and benefit totals for each waterbody, and the ratio of benefits to costs.
- Demographic conditions applicable to Environmental Justice considerations, within each of the three local analysis areas.

Qualitative aspects of the BCA are summarized in a series of tables that discuss the broad implications of additional benefit and cost categories not quantified in the current model, Environmental Justice observations based on the quantified demographic data, and the sensitivity of model results to various quantified variables, including how results compared to certain Arizona-specific cost and benefit estimates in the EPA document.

Summarized quantified benefit and cost relationships for the three water bodies are shown in the following table. (Note that the willingness-to-pay (WTP) concept<sup>3</sup> is discussed in additional detail in subsequent sections of this report.)

Cost and Benefit Factors	Class 1 - sky island stream - Cochise Stonghold Cyn.	Class 2 - isolated lake - Pintail Lake & marshes	Class 3 - unique waterbody - Quitobaquito Pond
Size (acres or acre-equivalents (Class 1))	21.76	65.00	0.50
Forested?	Yes	Yes	No
<b>Costs and benefits over a 20-yr. period, discounted</b>			
<b>Costs</b>			
404 permits	\$9,344	\$9,344	\$9,344
Mitigation			
ADEQ Admin	\$62,641	\$111,067	\$74,938
<b>Total</b>	<b>\$71,985</b>	<b>\$120,411</b>	<b>\$84,282</b>
<b>Benefits, from willingness-to-pay (WTP) factors</b>			
Local	\$5,509,181	\$7,840,675	\$3,151
Non-local	\$8,635,112	\$54,780,036	\$4,066
<b>Total</b>	<b>\$14,144,293</b>	<b>\$62,620,711</b>	<b>\$7,216</b>
Arizona component	\$14,982,646	\$68,136,424	\$8,045
<b>Benefit/cost comparison</b>			
Total benefits, Arizona	\$14,982,646	\$68,136,424	\$8,045
Total costs	\$71,985	\$120,411	\$84,282
Benefits/costs (first number in ratio: __ to 1)	208.1	565.9	0.10

Affected populations (number of households) within local and non-local areas of the three case-study areas are shown below.

Affected households	Cochise Stonghold	Pintail Lake & marshes	Quitobaquito Pond
Local: Current	72,184	47,219	6,934
Local: Projected	74,867	47,718	9,483
Non-local: Current	986,121	2,089,641	61,461

<sup>3</sup> As described in more detail later in the report, willingness-to-pay (WTP) is a common measure for economic valuation of non-market goods (such as protected waterbodies). WTP is essentially the dollar amount a household within a waterbody's impact area would be willing to pay (on either a one-time or annual basis, depending on how the analysis is framed) to protect the waterbody.

Of the three case-study waterbodies, Stronghold Canyon and Pintail Lake both have benefit/cost ratios well in excess of 1. Quitobaquito Pond has the opposite condition – a very low B/C ratio, of 0.1. This very small waterbody was assigned a small area for non-local affected households, compared to the other cases, and the populations in both local and non-local areas are particularly small due to the remoteness of the waterbody. consequently, minimal benefit values were generated in the model partly due to those conditions. A more meaningful issue, however, is that the “willingness-to-pay” (WTP) approach to estimate benefits does not encompass a way of capturing the value for the vital role of the pond in protecting rare and endangered species.

The EPA document includes figures for Arizona that represent annualized costs and benefits over a 20-year projection period, based on their estimates of average annual increases in wetland acreage that would receive protected status or other attention. With this information, it is possible, in theory, to compare the EPA findings with the results of the ADEQ BCA model, on a per-acre and/or per-household basis. The cost components of the BCA model with respect to the three case study waterbodies are understood to be, perhaps, atypically minimal, given the somewhat protected nature of the three waterbodies and their physical settings. On a per-acre basis, the EPA cost figures for Arizona are considerably higher. Benefit factors per-household and per-acre in EPA are also considerably higher than what is reflected in the BCA model. To some extent, this could be based on how EPA allocated varying benefit amounts by waterbodies’ settings, defined local versus non-local populations, or other factors in their modeling process that are not replicable by the Consultants. Regardless of such effects, one conclusion from this comparative review is that the BCA model results are conservatively derived.

Based on the discussions in this report concerning the EPA approach to quantifying benefits, and the Consultants’ use of benefit factors for the BCA model derived from a study relied upon heavily by EPA in their document, the Consultants do not recommend at this time an upward adjustment in the model’s benefit factors based on the comparison with EPA figures.

## Working with analysis guidance in EPA document

As noted above, a national analysis completed by EPA in 2021 was used as a framework or template for the Arizona-specific BCA model. In addition to including specific data resources relevant to the Arizona model, the EPA document provides insight into the conceptual foundations for this type of analysis.

Benefit/cost analysis for environmental protection policies is inherently challenging due to the “non-market” nature of many environmental resources. Whereas the *costs* of environmental regulation tend to be readily quantifiable (or at least reasonably estimable) by the affected parties, the *benefits* often relate to “goods and services” (e.g., clean recreational water and healthy fish populations) that are not traded in markets and therefore are not subject to market-based pricing.

Since the economic value of non-market environmental resources – how much the public would be willing to pay for them (or to improve their quality) – is not revealed in market prices, academic economists have developed a variety of methods for valuing non-market goods. In practice these valuation techniques have been applied in a wide range of circumstances where it is desirable to quantify resource values in dollar terms. Although the conceptual validity of these valuation methodologies is recognized (and sometimes also called into question) in academic, legal and policymaking contexts, in practice they are often costly and procedurally challenging to correctly apply, are difficult for the public to understand, and are subject to wide variations in resulting benefit values.

Given these challenges, the concept of **benefit transfer** (BT) – deriving benefit values from previously completed studies and applying them in new but similar contexts – has substantial appeal to public agencies faced with the need to complete a diverse range of benefit/cost studies. The concept was applied in the EPA document cited above. However, this approach comes with challenges of its own, including finding case studies that align with the local policy under consideration.

In addition to the specific challenges associated with BT studies, environmental BCA’s in general are subject to the following key complexity: The need to distinguish between the total value of a resource versus the marginal value of an incremental change in that resource. Similarly to the approach taken in the EPA document that is key to this assignment, BCA studies frequently focus on the total value to society of a particular environmental resource in a particular region (e.g., the total value of protecting recreational waters in a particular state or county). This information can be useful for benchmarking purposes, but it has a somewhat different purpose from the types of questions that ADEQ needs to address within its economic modeling process, which is focused on the effects of designating a specific water body to one category or another (or possibly to incremental changes resulting from a specific change in a specific water quality standard).<sup>4</sup>

Partly in response to the analytical challenges summarized above, ADEQ requested, for purposes of this assignment, that the Consultants follow the benefit and cost estimating procedures outlined in the EPA document cited above. This approach offered the following three types of advantages:

1. The EPA document reflects acceptance of both a) the sometimes-contentious BT approach to estimating benefits related to waterbody decisions, and b) the “bounds,” at least for now, of the categories of benefits and costs to apply to waterbody benefit/cost analyses in Arizona;

---

<sup>4</sup> Consistent with the EPA document on which the Arizona BCA framework is based, the initial BCA model developed by the Consultants focuses primarily on impacts associated with overall protection of waterbodies; it does not address the effects of specific water quality standards. However, references to water quality standards are included in this report as “placeholders” for potential future augmentations of the ADEQ model to address a broader range of water protection policies.

2. The document summarizes very recent analytical decision-making by EPA (which is generally comparable on a national scale to the types of actions Arizona may enact at the state level); and
3. Use of this material provides ADEQ with defensible frameworks for analyses conducted for waters of the state.

Applying the material in the EPA document also required some interpretation by the Consultants. First, the nationwide and state-by-state approaches that EPA takes in its analyses must be understood in terms of how they apply to individual waterbodies within any particular state. Within the EPA document, the cost analysis is limited to public and private costs associated with the Section 401 program.<sup>5</sup> In particular, three categories of costs are addressed: a) administrative costs to the affected state agency for Section 401 reviews; b) direct costs (to private permittees) of Section 404 USACE permits; and c) direct costs (also assumed to be borne by private permittees) of implementing mitigation measures required under Section 404 permits. Costs are quantified at the state level for the 404 program, based on estimates of the number of permits that would be generated by changes in definition of waters, and then the direct costs (to permittees) of permits and related mitigation measures, and also additionally related administrative costs to the State (401). EPA provides information on cost estimates related to the 404 program, and this information is used within ADEQ's BCA modeling framework under the assumption that the cost estimates on a per-unit (or per-permit) basis would be generally applicable to Arizona, even if the programs are not administered by the state. As with the stream of benefits over time, costs incurred in future years are discounted to the present.

These cost factors may be minimally relevant to the three case study examples (or to other types of water protection policies for which ADEQ needs to prepare a BCA). Since one of the case study sites is within a national monument, one is a relatively isolated mountain stream, and one relies on treated wastewater, activities requiring a Section 404 permit would be unlikely or very limited in these areas irrespective of changes in the definition of waters. Nevertheless, the concepts and approach described above are reflected in the BCA model in limited amounts, and can be applied to Arizona waters generally. (As documented elsewhere in this report, the default cost factors derived from the EPA document have been supplemented by Arizona-specific data supplied by ADEQ. These data encompass ADEQ's administrative costs for a wide range of rulemaking activities [see Appendix D] – beyond the EPA's limited focus on the Section 401 program.)

### The relationship of the BCA model to EPA methodology for the treatment of costs and benefits accruing over time

In the EPA document, “annualized” costs (per-household and total) were produced for each state based on an assumed number of permits per wetland acre (and with an assumed annual increase of permits and acres), with costs projected over a 20-year analysis horizon. Benefits were treated similarly, incorporating estimates of the number of households within a “local” (as opposed to non-local) relationship to the universe of a state's (annually increasing) wetlands. The 20-year “cash flows” of both costs and benefits were then discounted to a present value, and subsequently converted to an annualized figure – expressing that “bundle” of costs and benefits over 20 years as a year-by-year amount. The annualizing process makes sense as a way to normalize findings within a system-wide analysis (where protective policies are likely to be applied to a number of new sites/projects in a given year), such as that applicable to an entire state and then a series of states, extending over some period of

---

<sup>5</sup> Under Section 401 of the Clean Water Act (CWA), a federal agency may not issue a permit or license to conduct any activity that may result in any discharge into waters of the United States unless a Section 401 water quality certification is issued, or certification is waived. States and authorized tribes where the discharge would originate are generally responsible for issuing water quality certifications. In cases where a state or tribe does not have authority, EPA is responsible for issuing certification.

time.<sup>6</sup> When dealing with individual projects, within the framework of the ADEQ BCA model, the discounting of future cost and benefit payments and receipts to present values continues to be relevant, but the annualizing process is unnecessary.

The ADEQ BCA model incorporates the 20-year period used by EPA (a reasonable cost and benefit time horizon related to individual projects), as well as the EPA's assumed 3% discount rate, which is appropriate for representing a household's trade-off of present and future dollars, without consideration for inflation.<sup>7</sup> (The discounting concept applied here is the same as in any financial analysis, where the intent is to recognize that dollars/benefits received, or costs incurred, in the future are worth less to the affected party than if those things happened in the present.) In this regard, cost and benefit figures over time are expressed in the ADEQ model in 2022 dollars, with no increase due to inflation.

## Estimates of benefits based on a Benefits Transfer approach

The EPA report focuses on assigning monetary values to benefits associated with wetland expansion/preservation, specifically through a meta-analysis of multiple wetland valuation studies that together provide insights into estimates of the public's willingness-to-pay (WTP)<sup>8</sup> for wetland preservation, using a BT (benefits transfer) approach.<sup>9</sup> The nature of this type of meta-analysis combines many different conditions and considerations, which are specific to each study's location, wetland conditions, study vision, etc. and so results tend to vary among the series of studies analyzed. The derived estimates can then be both generalized and also viewed in terms of the influence of the differing various individual conditions on monetary valuation. The Consultants applied various procedures to reinterpret the WTP findings presented in the EPA document (as well as the source study that EPA relied heavily upon to produce the WTP estimates – Moeltner et al.<sup>10</sup>), and incorporated them into the ADEQ BCA model. The following conditions were key to this reinterpretation process:

1. Moeltner (2019, Table 5), produced actual dollar amounts of willingness to pay per household, per acre, for each of four key types of wetlands contexts, for which meaningful differences in households' WTP were identified in the study analysis (shown in order of most to least WTP amount): 1) Local, forested, 2) Local, non-forested, 3) Non-local, forested, and 4) Non-local, non-forested.
2. EPA used the same four categorical distinctions in their generation of state-level estimates of WTP (EPA document, Appendix C, page 126, with amounts shown in Appendix D) but did not publish the actual figures.

---

<sup>6</sup> When dealing with individual projects, within the framework of the ADEQ BCA model, the discounting of cost and benefit streams over time is relevant, but annualizing the discounted amounts serves no particular purpose, since there is no system-wide comparison to consider, but rather the cost and benefit relationship for a particular waterbody (in which case the annualizing process is conceptually confusing). The EPA figures do, however, provide an estimate of total benefits for the state (expressed in terms of the dollar amounts the public would be willing to pay for specified annual acreages of wetlands protected), which can serve as a way to compare the estimates produced by the ADEQ BCA model.

<sup>7</sup> The EPA document also gives figures using a 7% discount rate.

<sup>8</sup> Given the non-market nature of environmental "goods" (such as protected wetlands and waterbodies), willingness-to-pay cannot be observed through normal market metrics (i.e., prices). As such, economists have developed various methodologies for measuring WTP for non-market goods, including survey methods ("contingent valuation") in which the public is directly queried about WTP for the protection of specific environmental resources.

<sup>9</sup> Under the BT approach, WTP estimates from previous studies are "transferred" to new analyses and policy decisions. Since the contexts for the resources evaluated in the previous studies are usually not exactly comparable to the resources/setting being evaluated in the new analysis, BT analyses rely on regression analyses to define the specific variables that influence the public's WTP for a particular resource. This regression analysis is intended to allow the data from the previous studies to be meaningfully applied in other contexts.

<sup>10</sup> Klaus Moeltner et al. Waters of the United States: Upgrading wetland valuation via benefit transfer. *Ecological Economics*, 164 (2019).

3. The database EPA used to generate their numbers was very similar to that used in the Moeltner study, except for being supplemented by seven additional cases generated within two Canadian studies.
4. Other variables within the regression formulas used in both the Moeltner and EPA studies, representing benefits such as recreation (“cultural”) and fish consumption (“provisioning”), as well as variations in household income, could in theory have been treated similarly to the four contextual conditions named above, i.e., by analytically distinguishing their contribution to the overall WTP amount. This could help refine WTP estimates as they relate to specific waterbodies. However, on closer examination of the regression results from the meta-analysis, such distinctions could not be justified on the basis of statistical validity of the individual variables of interest in the estimating equation.

Based on the preceding discussion, the Consultants adopted the approach represented in point #1 above, using the Moeltner-study values produced for the four household-location contexts as inputs for the BCA model. This approach captures the major distinctions in WTP estimates as they would apply to specific cases. The Consultants acknowledge, however, that the figures derived as described above and used in the present BCA model should be considered “placeholders” for future refined WTP estimates for Arizona waterbodies. These estimates would be derived either through new, ideally Arizona-based studies set up specifically for this purpose, or through additional/expanded meta-analysis work if and when additional studies become available. These later analyses could also generate supplemental data to support expanded distinctions within WTP estimates, pertinent to other specific benefit categories of interest (beyond the four household-location distinctions adopted from EPA), such as various forms of recreation.

There are other possible ways to interpret and adapt the WTP findings of the EPA document to the BCA model. For example, the individual studies that were used in the meta-analysis to derive EPA’s WTP estimates could be reviewed to reselect one or more studies or sets of studies that would appear to apply more directly to Arizona conditions and any specific variables of particular interest. The findings from the most appropriate study or studies would then be analyzed, recorded and applied to the model. However, because one of the main reasons for the meta-analysis is to purposefully combine results from many different studies (and generally, the more the better), which also lessens the chance for any one study to overly influence the results, paring down the group of studies analyzed works against this advantage. Also, these kinds of studies (addressing individual waters) are particularly sensitive to details of how they were structured, how questionnaires<sup>11</sup> were developed and administered, and the contextual relationship between waterbody and the interview subjects. Lacking a first-hand knowledge of these kinds of things adds uncertainty to the “transferability” of findings from any particular WTP study. One other issue is the potential for conveying a sense of confidence in a WTP estimate, through the kinds of manipulations described above, when the underlying data and processes still fall short of providing a strong statistical foundation.

Finally, for purposes of this assignment, certain waters of the state, including one of the case study examples, may not necessarily meet the official (federal or Arizona) definition of “wetlands.” – which are the exclusive focus of the EPA’s benefits analysis. Nevertheless, the value of a wetland to the public is assumed to be similar enough to the case study situations, and other potentially affected waters in Arizona, to allow the use of EPA’s benefit modeling procedure (adapted as noted herein) to derive Arizona estimates. A key point of this is that EPA, and the Consultants initially by default, are dealing with two different, even if overlapping, broad classes of waters,<sup>12</sup>

---

<sup>11</sup> As noted previously, valuation studies for non-market environmental goods often rely on direct surveys of the public to assess WTP for contemplated environmental improvements. The structure of the questionnaires for these surveys is critical to the usefulness and statistical validity of the derived responses.

<sup>12</sup> From *Supplementary Material to the Economic Analysis for the Proposed “Revised Definition of ‘Waters of the United States’” Rule*. U.S. Environmental Protection Agency and Department of the Army. November 18, 2021. [Part] E. ARIZONA (page 6). Definition of Waters of the State: All waters within the jurisdiction of the state including all perennial or intermittent streams, lakes, ponds, impounding reservoirs, marshes, watercourses, waterways, wells, aquifers, springs, irrigation systems,

*definitionally*: for costs (any jurisdictional water) and for benefits (wetlands, again by default based on the BT meta-analysis EPA used to derive its estimates in the EPA document).

## General limitations and other reinterpretations of EPA’s benefit and cost treatments

### Benefits

EPA acknowledges certain limitations in its relatively constrained approach to identifying benefits resulting from protecting the quality of water. Moreover, a specific/individual waterbody being evaluated may provide unique environmental and economic benefits beyond the EPA-calculated values for “typical” wetlands. Topics EPA mentions as left unaddressed<sup>13</sup> include: the benefits of wetland carbon sequestration, the ability of wetlands to help allay the future effects of climate change, such as severe weather events, and the ability of wetlands to reduce soil erosion and retain flood waters (p. 86). Further, it should be emphasized that the EPA document – which exclusively addresses the benefits associated with protection of *wetlands* – specifically does not address benefits associated with drinking water standards.

### Costs

Cost considerations mentioned in the EPA report (*but not quantified* except for 401-related costs as they relate to the 404 program) are summarized in the following statement:

“The definition of ‘waters of the United States’ has a substantial effect on the implementation of other Clean Water Act (CWA) programs, including the section 303(c) water quality standards program, the section 311 oil spill prevention program, the section 401 water quality certification program, and the section 402 NPDES permit program. A revised definition of ‘waters of the United States’ would affect these CWA programs at both the federal and state level. Potential effects may vary based on a state’s authority under their own state law to address aquatic resources and their capacity to address these aquatic resources through non-regulatory efforts” (EPA document Executive Summary page xiv).

In general, however, certain costs of implementing environmental protection policies tend to be more readily quantifiable than the benefits, in part because some costs are typically experienced as administrative costs to regulatory agencies and direct “out of pocket” expenses by affected/regulated parties who are often in a position (in terms of access to internal proprietary business data, etc.) to accurately estimate these cost impacts.

## Consideration of other benefit/cost modeling in Arizona

### Overview

At ADEQ’s direction, the Consultants reviewed a series of Arizona-related documents within ADEQ’s developing on-line library. Among the purposes to be served through this review was to recognize the potential contribution that other economic analyses conducted for programs of interest to state agencies could have for the BCA format (present and future) for Arizona waters. Items noted as having “future” applicability are not included in the

---

drainage systems, and other bodies or accumulations of surface, underground, natural, artificial, public or private water situated wholly or partly in or bordering on the state. Definition of Wetlands: An area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

<sup>13</sup> In one discussion stating that they “omit known sources of benefits that are inherently difficult to quantify” (EPA document, p. xi).

present BCA model, but are listed here as topics that could be added later to expand the scope and enhance the overall functionality of the model. These findings are summarized in Table 1 below. The annotated bibliography resulting from this analysis is attached as Appendix B.

Benefits related to spending by recreationists	4, 5	Both studies provide some quantified data for visitor expenditures. The reference cited for document #4, entitled " <i>The 1987-1988 Use Study of Arizona State Parks Visitors</i> ," for the Arizona State Parks Board in 1989, provides an additional relevant data	Future and potential present <sup>b</sup>
Visitor expenditures related to birdwatching and riparian environments	7	Tracking how visitor spending distributes within a finite region of natural attractions; potential to help define affected areas (Southeast Arizona)	Future and potential present

a. Document reference number, as per Appendix B.

b. It may be appropriate, for some waterbodies that are strongly associated with, for example, a specialized recreational activity, to incorporate analyses related to such activities, where data and findings have been articulated in previous studies. In such cases, the potential for double-counting must be recognized, if a multi-factor analysis tool is also in use. See Table 3.

## Other BCA considerations including evolving BCA concepts

ADEQ might consider, for future BCA studies, focusing on the potential impacts of an *individual policy variable* (e.g., a proposed change in a single standard for a specific contaminant). This makes sense from a policy standpoint but does not necessarily align with the way that the public/consumers think about the value of water quality. For example, rather than thinking of a single water quality standard in isolation, consumers are likely to think of "good" or "safe" drinking water as a "package" based on multiple standards and qualities. Moreover, the availability of previous studies from which a BT analysis could be constructed is likely to be limited for specific contaminants/topics.

Conceptual issues that are likely to continue into the future include the fact that there are "camps" of proponents of alternate ways to think about environmental benefits and costs. These groups tend to frame the issue broadly, for example by using the term "ecosystem services" to help emphasize the comprehensive nature of this topic. Proponents of different concepts also invent new terminology. For example, "nature-based solutions," and "nature's contributions to people."<sup>14</sup> As the authors of this cited work point out, these concept titles, with their

different shades of meaning around the same theme, can help define a theoretical concept even though they do not necessarily articulate a workable concept in terms of, for example, translating specific conceptual conditions to dollar values.

## **Waterbody class-specific conditions and considerations; benefit/cost categories in analysis framework**

Variations in conditions among the three case-study waterbody classes used in this analysis call attention to differing potential benefit and cost categories that could apply to each. Table 2 summarizes various conditions and categories of benefits and costs as they apply to the three cases. While Table 2 introduces the complexity of the variety represented by the three cases, Table 3 elaborates on how various cost and benefit categories begin to translate into an analysis framework, present and potential future.

**TABLE 2. BENEFIT AND COST CATEGORIES IN RELATION TO 3 CASE STUDY CLASSES**

	Case Study Classes

Table Notes:

- a. Benefit category assumed to be embodied in this variable, but could not be directly confirmed.
- b. As applied to state-level estimates in EPA document.
- c. Or otherwise is particularly relevant and not expected to be represented sufficiently within another benefit category (including a WTP function), and within which care must be exercised to avoid double-counting of expenditures that could be embodied in other benefit categories, from WTP or other compilation of special-use expenditures (e.g. recreationists’ spending related to some specific activity).
- d. Advances in quantifying could occur through future WTP studies and/or expenditure studies of relevant participants.
- e. These analyses may be specific to Arizona, or to elsewhere in the US or Canada.
- f. These program titles are: section 303(c) water quality standards, section 311 oil spill prevention, and section 402 NPDES permits.
- g. This may include “cultural” values such as historic significance.

Class 1 – Sky Island Stream: Stronghold Canyon, in Cochise County

Class 2 – Isolated Lakes: Pintail Lake, near Show Low

Class 3 – Ecologically, Culturally, or Historically significant water: Quitobaquito Pond, Organ Pipe Cactus National Monument, in Pima County

## Model process and structure

The working BCA model for ADEQ, in the form of a Microsoft Excel workbook, is a companion piece to this report. Components of the model are outlined within this section.

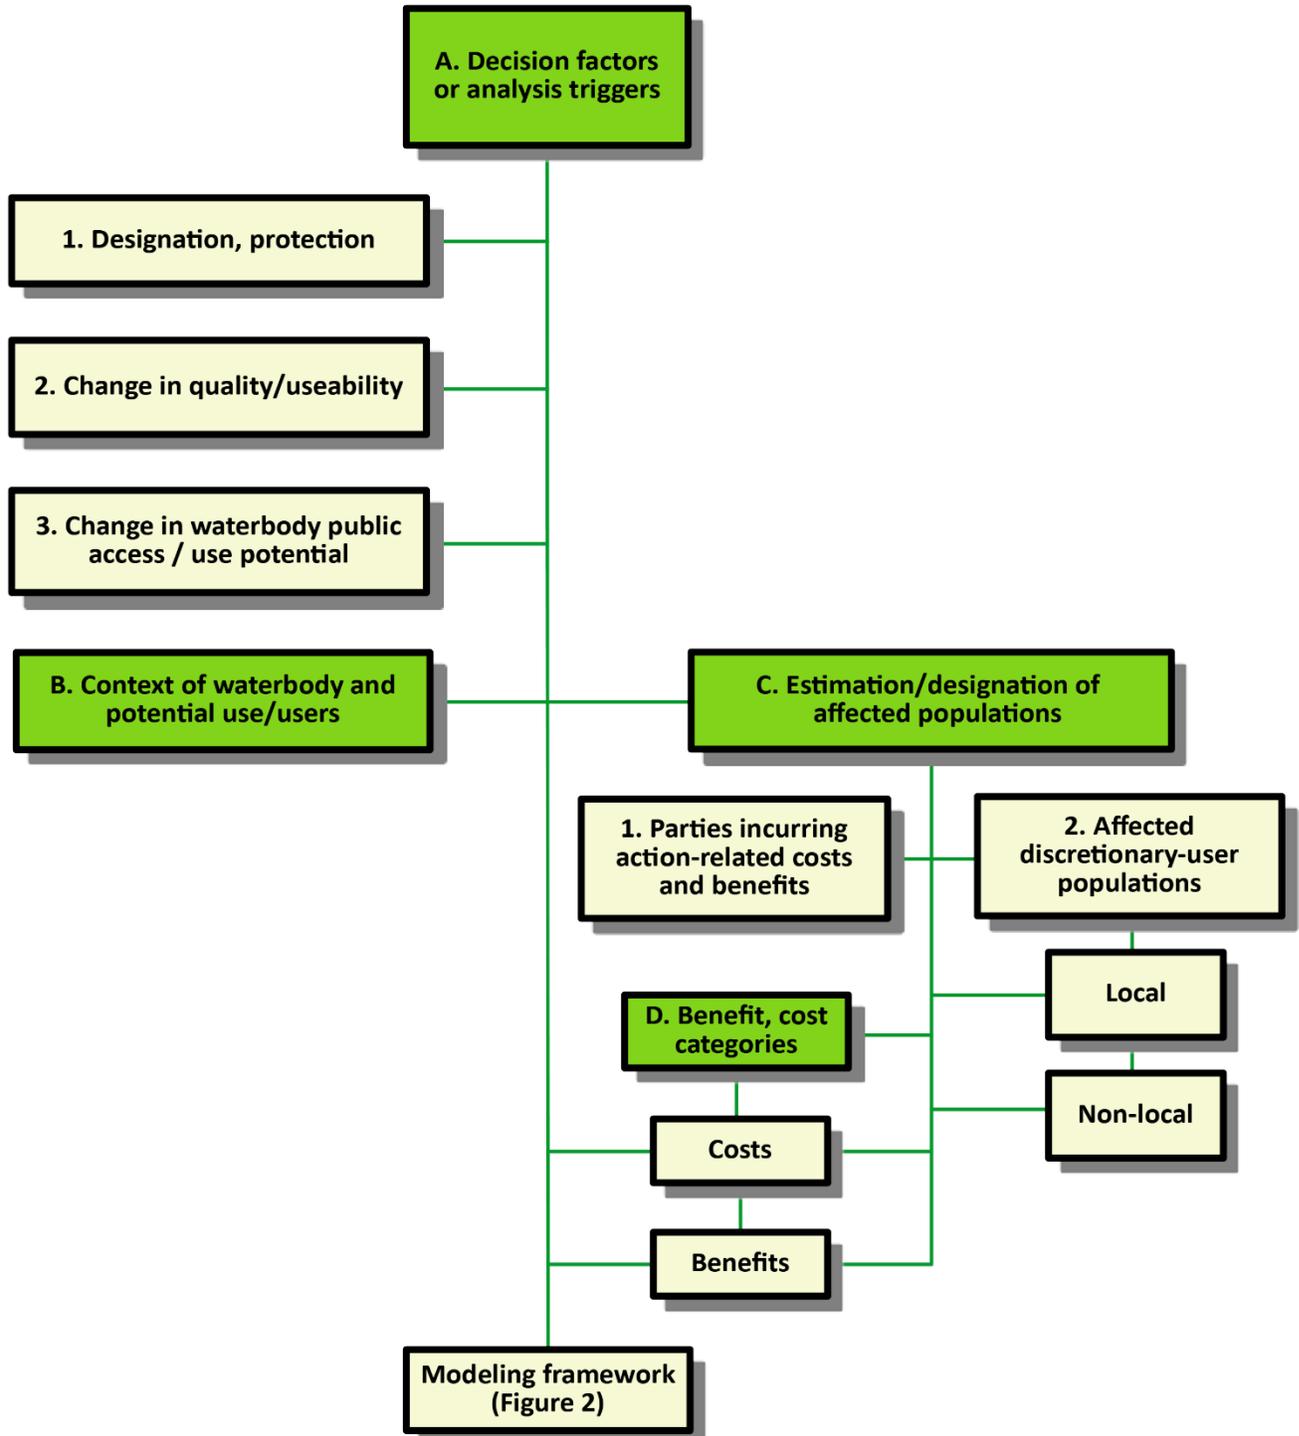

### Analysis scoping

The overall modeling process includes both an initial scoping exercise, Figure 1, and the working BCA model, summarized on Figure 2. Both the scoping exercise and working model are structured in response to other material in this report, and especially Tables 2 and 3, preceding, which address a range of considerations and benefit/cost categories pertaining to the three case study classes and also Arizona waterbodies in general. Figure 1 illustrates the following procedural steps related to scoping the benefit/cost analytical process:

- Identify the basis and context for the BCA relative to a particular waterbody.
- Align the purposes of the BCA with different types of potentially affected populations.
  - Action-related parties, if identifiable, and their “out-of-pocket” cost and benefit categories
  - Discretionary users:
    - Specialized user subsets (e.g. recreationists), if any
    - Other regular-use parties
    - Other segments of the population assumed to have primarily appreciative value.
- Identify benefits for discretionary users as measured through benefit transfer measures (and potentially other measures in the future) applicable to defined user categories.
- Investigate potential costs and their associated user types.

The scoping process is summarized in Figure 1, and described in additional detail following the figure.

FIGURE 1. ANALYSIS SCOPING FLOWCHART

Key components of Figure 1 are outlined below, with a numbering system that reflects the figure elements. The outline addresses universal issues relative to a BCA for Arizona water bodies, beyond the scope of topics that apply to any one or all of the three case study classes:

**A. Decision factors or action “triggers” that would initiate an accounting of costs and/or benefits**

1. Designation of a waterbody, giving it a status that preserves, protects, or enhances its level of usability, which may or may not include items 2 or 3 below.
2. Change<sup>15</sup> in quality sufficient to create the potential for change of use for new/expanded uses to occur, which could involve any of the following activities, roughly in order of lower to higher quality standards and use intensity:
  - Irrigation, presumably as an incidental and not primary use.
  - Support for/augmentation of ancillary uses adjacent to waters or where waters are recognizably integral to the overall area experience. Ancillary uses could include any or all non-water-based recreational activities, including hiking, birding and other wildlife watching, hunting, camping, etc.
  - Boating, which implies some level of aesthetic acceptability as well as regulatory sanction.
  - Fishing and other aquatic habitat protection.
  - Various cultural/ceremonial activities.
  - Full body contact.
  - Drinking water.
  - Habitat protection/restoration, including for rare and endangered species.
3. Change in public access to, and/or use potential of, a waterbody, due to:
  - Regulatory/jurisdictional change, including change in designation or in other protection status.
  - Change in related infrastructure, facilitating access for specific activities.

**B. Contextualizing the analysis setting**

1. Assessing how waterbody use would be affected by surrounding conditions, including: other associated locational assets, jurisdictional boundaries (especially those related to tribal communities), accessibility (physical and with respect to information about), and climate conditions and other defining characteristics. This assessment could affect the following:
  - How affected-population (households) areas are selected.
  - Possible adjustments to benefit and cost factors, or at the least notations as to how observed conditions might affect estimates under some refined estimating procedures that may be applicable in the future.
2. Assessing potential for cultural considerations, and implications. This assessment would be based on the following types of considerations:
  - Presence of indigenous populations within a selected “local” market area (and the process of selecting the local area would also involve recognizing the potential for including such populations).

---

<sup>15</sup> In some cases, the “change” might not be an *improvement* in water quality but might instead be a protective measure that *maintains an existing level of quality* (i.e., protecting it from deterioration that would potentially occur in the absence of designation).

Compiling data for the local market area would also include specific recognition of other minority groups as part of the process of incorporating Environmental Justice considerations into the analysis. (This topic is also addressed in a subsequent section of the report.)

- Contact with cultural representatives (as available) in indigenous communities within the local market area and perhaps also in the “first tier” circle beyond the selected market area.
- Internet/literature search for indications of possible cultural linkages to waterbody or surrounding area, on the part of any Arizona American Indian tribe/nation.
- Discussions with umbrella organizations serving Arizona indigenous communities, such as the Intertribal Council of Arizona (ITCA) to identify any databases referencing relevant cultural/sacred sites.

### C. Designation and estimation of affected populations

1. Assess whether available uses are associated with one or more specific subsets of the population, e.g. recreationists:
  - Compile the bases/sources for identifying such users and considering their “market area.”
  - Identify potential parties that would interact with the waterbody in ways that would tend to incur *action-related* costs and benefits.
2. Select affected populations (# households): local and non-local:
  - Establish methodology, select variables, etc. including using a GIS system for household-area selection, which is compatible with EPA guidance as described below:
    - For the BCA model, the Consultants followed a concept in the EPA document, Appendix H, detailing how EPA would modify its methods for deriving two of the variables in the estimating equations related to WTP: 1) affected number of households, and 2) household incomes for this affected group (for this version of the model, applicable to Environmental Justice issues). In this modified method, a geographic information system (GIS) is used to select the areas in which households are assumed to have either a “local” or “non-local” (but still relevant) relationship to any given wetland or set of wetlands. This allows for more precise delineations of potentially affected households, including extension of any specific wetland/analysis area across state boundaries.
    - To determine the number of households in local and non-local areas for the case study waterbodies, the BCA model uses a GIS system to select Census block group areas based on two concentric circles, and aggregate the household data for the inner circle and the outer ring (the non-local area). Areas for the three case study classes are shown on Figure 3. The outer ring, 150 miles for Stronghold Canyon and Pintail Lake, was set at 100 miles for Quitobaquito Pond, reflecting the smaller size of that waterbody.

Projected future households were also estimated, so that benefits extending over time would reflect population change. Projections were available at the county level for both Arizona and New Mexico.<sup>16</sup> Households selected in the GIS system were assigned to counties, and the county-level projections used to estimate the 20-year future household count (with the assumption that

---

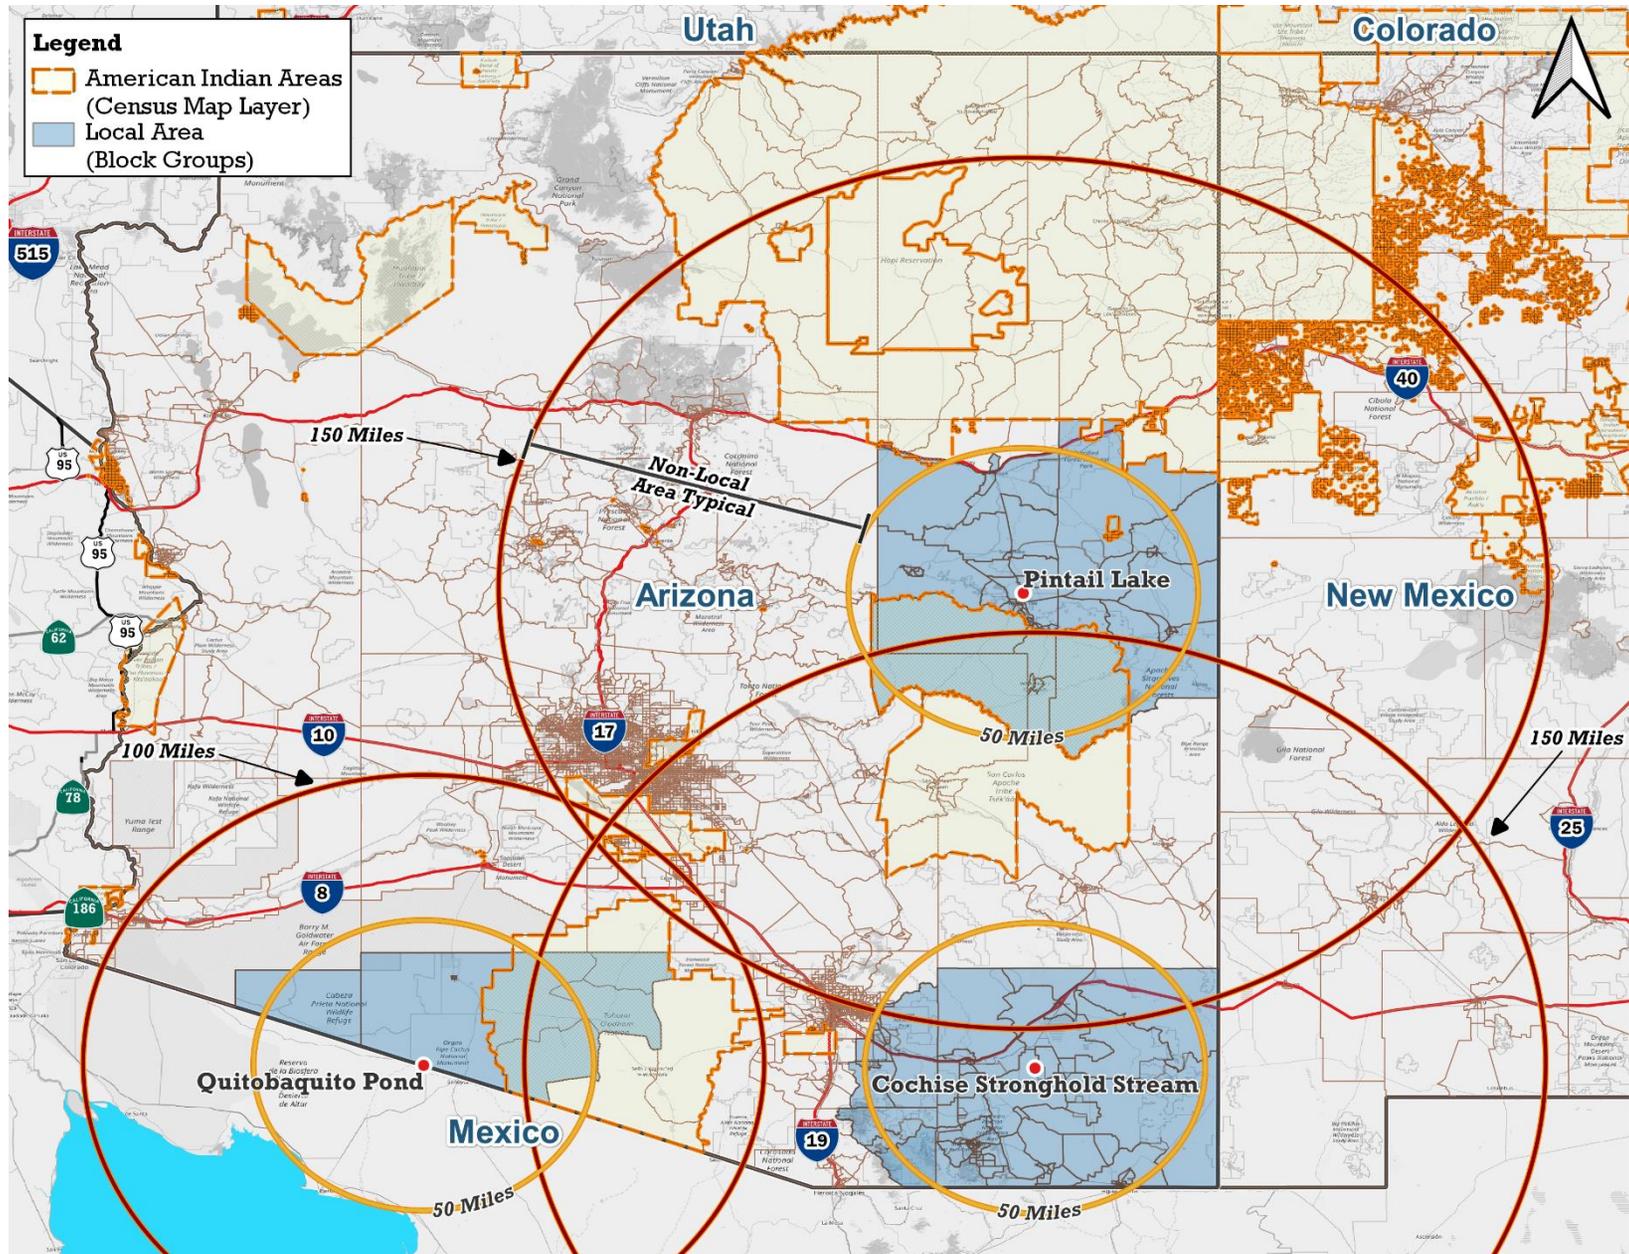

<sup>16</sup> Arizona Department of Administration, Office of Employment & Population Statistics, 12/28/2018. Arizona State and County Population Projections: 2018 To 2055, Medium Series. University of New Mexico, Geospatial & Population Studies. UNM GPS Preliminary County Projections V2020.

projected changes were uniform across the entire county). For the case study examples, some counties exhibited negative growth for the analysis period. To project benefits over the 20-year analysis period, one-half of the projected increase in households was added to the base year number to represent the average number over the analysis period.<sup>17</sup>

---

<sup>17</sup> Depending on the location of a protected waterbody, the non-local (and possibly even the local) areas benefitting from the waterbody may extend into adjacent states (e.g., New Mexico, as in 2 of the 3 case study examples in this report) given standardized distances that households are assumed to be willing to travel (for example) to enjoy recreational areas. In these cases, the relevant area of the adjacent state is included in the household count used to calculate WTP for protected waters. Within the analysis, benefits accruing to Arizona households are provided as a separate subtotal. In cases where a waterbody's theoretical impact area (based on a fixed radius) extends south of the U.S. border into Mexico, the area south of the border is not include in the household calculations (since the border and related travel restrictions are presumed to effectively preclude these households from deriving significant benefits from protected waterbodies in the U.S.).

FIGURE 3. LOCAL AND NON-LOCAL AREA SELECTIONS FOR 3 CASE-STUDY CLASSES

- The White Mountain region has a substantial seasonal population, which represents an additional 16,630 households in the area on a part-time basis. Within the modeling process, this seasonal household segment is assumed to be relevant to the “local area” associated with Pintail Lake. The number of seasonal households is derived from Census data on vacant housing by type, with the relevant type being “held for seasonal, recreational, or occasional use.” Households in these units are not counted as part of the resident total, so they are an additional segment of the local “buying” population, and this segment must also be factored downward to represent the proportion of the year they are in residence locally. No attempt has been made to project the growth of this segment.

To estimate the proportion of the year within which seasonal residents affect the local economy, data on restaurant/bar sales by month for Navajo County<sup>18</sup> were reviewed to determine the pattern of sales above a baseline level, including the proportion of those sales amounts in relation to the total annual sales. On the basis of this review, a factor of 25% was applied to the seasonal household count (i.e., only one-quarter of the seasonal households (using housing units as a proxy) were counted as additional). Note that the 25% factor does not necessarily mean that one family/party is staying in the unit for three months of the year; there could be multiple parties with varying periods of use, adding up to the equivalent of 25% of a permanent household.

- Destination visitors to Organ Pipe Cactus National Monument that may also visit or otherwise become aware of Quitobaquito Pond constitute another component of local-area benefiting households. In the BCA model, this number is intended to represent only the visitors who are “materially involved” in the monument, through overnight camping, trail use, etc., and the estimate is further factored downward to reflect the fact that the pond is in a remote location within the Monument. Levels of visitation (for recreational visitors) have been relatively low in recent years, compared to figures in the 2000-2010 period, and consequently the visitor component has been projected to increase over time, in the model.

### 3. Compile data for affected discretionary-user populations (# households):

- Define an appropriate market area for use categories associated with the waterbody; that is, the maximum practical distance from which potential users could be assumed to come to the waterbody.
  - For Local involvement assumed to constitute “regular use.”
  - For Non-local involvement that may primarily consist of “appreciative value,” and infrequent or even no physical attendance.

A variety of considerations had a bearing on the selection and size of these areas, including similar concepts discussed in the EPA document (Appendix H), the size of analogous areas in the BT meta-analysis source documents used by Moultnier et al. (2019) and subsequently by EPA, and the Consultants experience with delineating trade areas associated with various types of economic activity. Ultimately, these selections are a matter of judgment about apparent reasonableness.

### 4. Relate considerations of defining and measuring the affected households to EPA guidance:

- Selected households fall into two major categories: local and non-local. The non-local areas (selected by a circle from the waterbody center point) have some overlap among the separate case study waters (and this is likely to be a typical condition within Arizona waterbodies analyzed); but because the benefits are based on number of acres or some equivalent measure of the waterbodies, each

---

<sup>18</sup> Northern Arizona University Economic Policy Institute, Gross Sales by County by Sector, 2019-2021. <https://in.nau.edu/wp-content/uploads/sites/212/Gross-Sales-County-2021-vs.-2019.pdf>

selected set of households is treated as unique to its related waterbody, or to multiple waterbodies if that is the case, and therefore not subject to double-counting considerations.

#### **D. Categories of costs and benefits**

1. Define the universe of currently quantifiable direct cost and benefit categories, initially determined by those identified in EPA documentation. As discussed above, designations of affected populations (households) according to their Local or Non-local relationship to the waterbody is an important distinction, as the level of WTP benefit estimates applicable to each group varies accordingly. Another key characteristic affecting households' WTP with respect to the analyzed water body is whether its setting is "forested" or "non-forested."
2. Assess the potential for *action-related* costs and benefits to arise based on the combination of specific waterbody and actions related thereto, by compiling the bases/sources for identifying and quantifying action-related costs and benefits.

### Defining characteristics of the BCA quantitative model

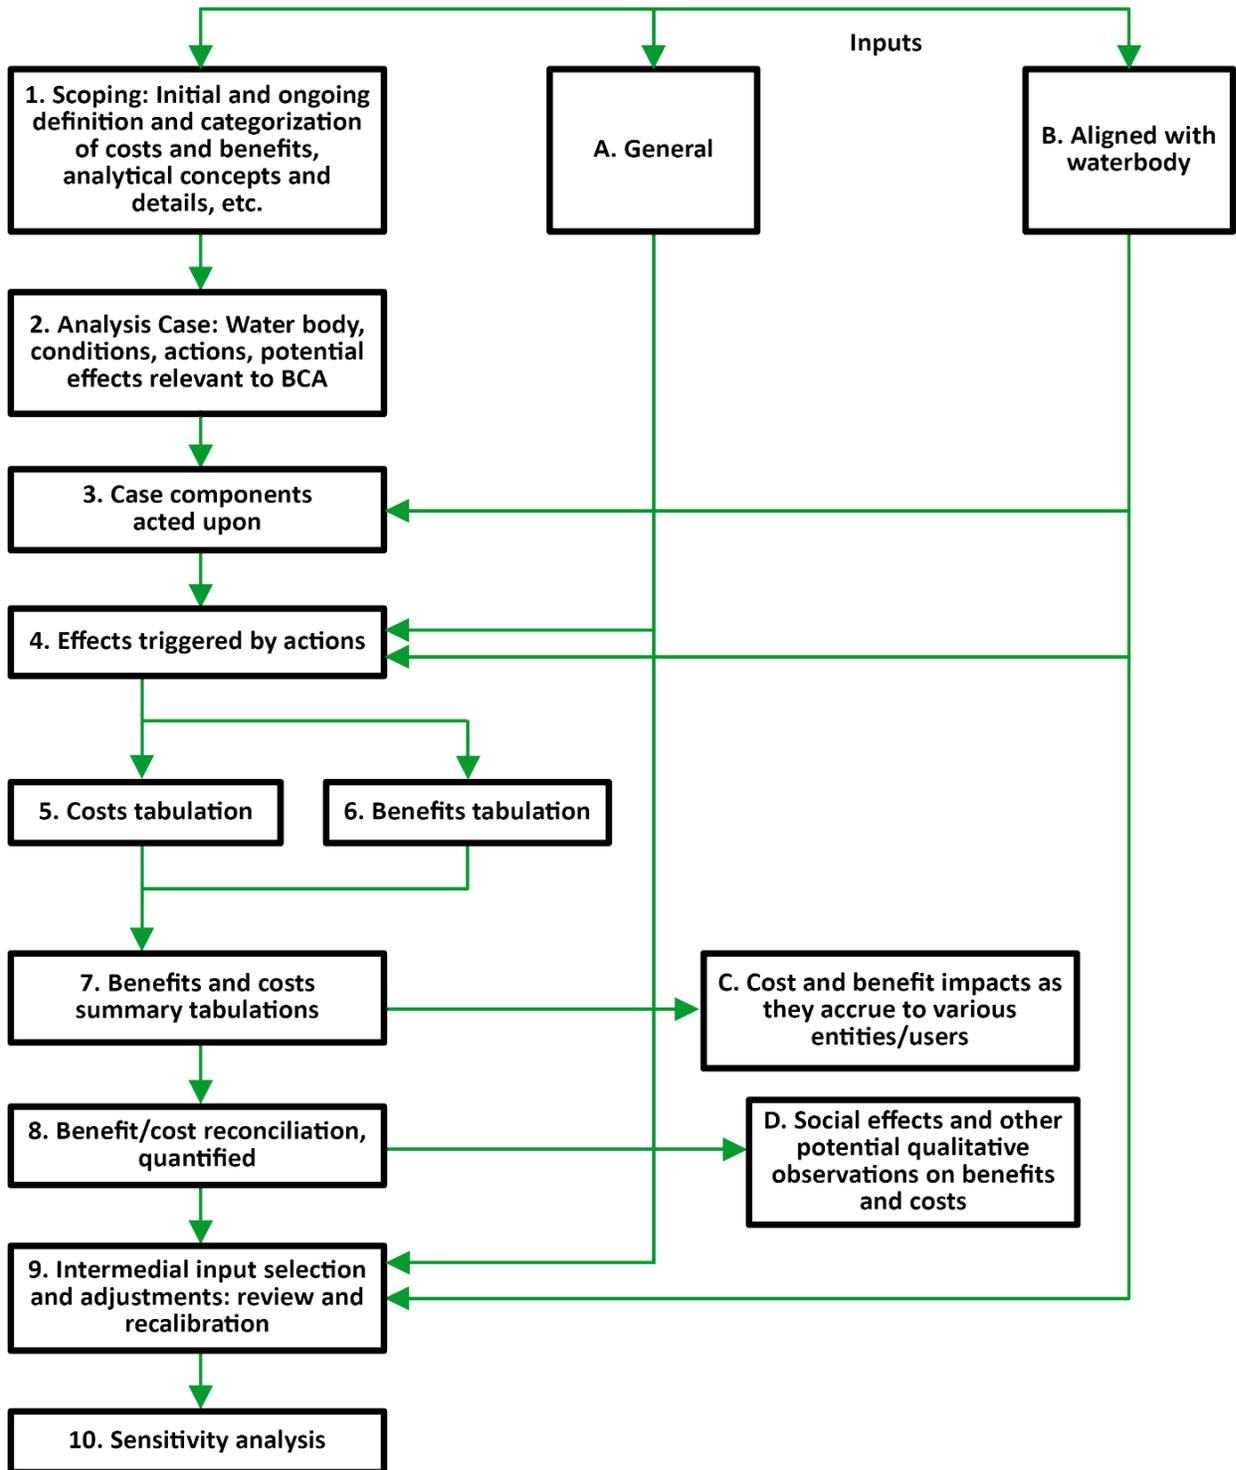

The model is designed to:

- Illustrate how different cases, conditions, etc. fit into a framework having multiple commonalities along with distinct components.
- Both summarize a process and link, conceptually and computationally, to submodels and databases that relate to the whole.
- Be user-friendly, "transportable," and adaptable.
- Encompass complexity and still remain comprehensible and media-manageable.

Physical structure and key components:

The model is based on an Excel workbook with multiple tabs, with submodels/databases linking to the main table series. Figure 2 provides readers of this report, and potential model users, with an overview of the model structure and components.

FIGURE 2. BASIC MODEL STRUCTURE

Key components of the model are described below (letters and numbers match the diagram labeling and are therefore not necessarily sequential).

Item A. Inputs, general, may include:

- Standards by water type, if/as applicable to current or future modeling efforts, and relationships to uses, etc.
- Per-user (or per-something-else, depending on possible future analytical direction) dollar values tied to specific water use types, such as specific recreation activities, etc. (Note: the current BCA model does not include these types of distinctions; all “use” benefits are assumed (at this stage of the ADEQ BCA model development) to be a part of the overall WTP for wetlands protection, as defined by the EPA document. The concept is included here due to the inherent limitations of EPA’s WTP formulation as currently documented.)
- Cost factors: permitting or other compliance (dollars by permit or some other unit), for public and private entities; ADEQ administrative costs based on categories shown in Appendix D, estimated by ADEQ staff for each of the three case studies classes, for use in the BCA model (and this “checklist” concept could generally be applied to also indicate links to other related costs such as permitting, etc. where applicable); possible user charges per unit by type; and consideration of other factors such as health impacts (as burden), as applicable or practical at this level of analysis (current or future). Factors may be directly quantifiable in economic terms, and/or indirectly quantifiable in economic terms or as social effects (as relevant).
- Benefit categories:
  - Directly quantifiable economic benefits, as WTP dollar values on a per-household, per-acre basis.
  - Benefits applicable, as dollars on some unit basis, to participants in specific activities, recreational or other.
  - Benefits indirectly quantifiable in economic terms, or identifiable and addressed on qualitative terms only, including economic and social effects (as relevant).
- Discount rates to apply to future costs and the stream of annual benefits both local and non-local households would experience (based on the WTP approach).

Item B. Inputs, aligned with WTP categorical distinctions:

- Distinctions include: forested, non-forested, and possible other categories, and other conditions specific to the waterbody (all as applicable to current or future modeling formats, with some categories as placeholders for quantitative analysis that may occur in the future, but that in the interim might be recognized for qualitative discussion only).
- Cost factors: any variation from general factors based on specifics of waterbody; opportunity costs.
- Selection of local and non-local affected households, as described in relation to Figure 1 Scoping.

Item 9. Recalibration, as appropriate:

- Maintaining “adding up”<sup>19</sup> integrity in the course of producing benefit and cost estimates related to any single waterbody. This is accomplished primarily by examining estimates for individual waterbodies in comparison with Arizona-wide estimated annualized totals for costs and WTP benefits, which would be initially informed by EPA documentation of estimated state-level costs and benefits.

---

<sup>19</sup> See the Glossary (Appendix C) for an explanation of the “adding up” condition applied to this type of analysis.

Item 10. Sensitivity analysis component:

- Reviewing how the overall model structure relates to the specific analysis conditions in ways that could tend to over- or underestimate costs and/or benefits.
- Considering whether and to what extent results of a BCA could be unduly skewed or otherwise unusually sensitive, based on some modeling input or some particular characteristic of the waterbody being analyzed. This would be addressed initially by reviewing: 1) market area designations, 2) identified cost and benefit categories, and 3) cost and benefit factors applied to the estimating model. If warranted by the review, inputs and factors may then be modified, modified model results examined for effects of the sensitivity testing, and modeling components adjusted if necessary, along with accompanying notations.

Item C. Affected entities:

- For benefits: geographic and demographic general description of affected households that are both “local” and “non-local” with respect to waterbody.
- For costs: types of entities affected, with costs allocated among them to extent possible.

Item D. Social effects:

- Documenting Environmental Justice conditions. Data on disadvantaged minority populations within local and non-local market areas are compiled as part of the documentation of demographic conditions within these areas, which at a minimum, for all populations, includes number of households and household incomes as well as racial/ethnic designations by geographic sub-area (determined and illustrated through a GIS system that will also be the tool applied to data compilation). (EJ considerations are discussed in additional detail in a subsequent section.)
- Categories that may be quantified in the future, but in the interim addressed qualitatively as discussed in the following section.

## Social benefit/cost considerations and categories related to waterbody actions

### General

The model structure described in Figure 2 represents primarily the *quantitative* segment of the analysis. The analysis structure includes recognition of *qualitative* components of the BCA assessment, including:

- Benefit and cost elements that might be quantified in future ADEQ BCA frameworks, but might be only qualitatively addressed in the interim, as discussed below and indicated in Tables 2 and 3.
- Environmental Justice considerations, as discussed in the following sections.

What social conditions are likely to relate to the kinds of economic considerations in waterbody benefit/cost analyses? In the context of the BCA framework for waterbodies, given that quantification of effects is limited to certain categories by practical necessity, other effects that could in theory be *quantified*, and may be so in some future time, could in the meantime be *recognized as a social effect* if relevant. For example, when permit and mitigation costs are tied to an action that decreases the usability of a waterbody, former users will have a loss of utility and will likely attempt to find a substitute location, if possible. For those in close proximity, substitute locations would likely impose additional burdens (including costs), and could also result in the social (and economic) burden of dealing with decreased property values.

Degradation of a waterbody could also have a negative effect on the social cohesion of a community in close proximity. Conversely, social benefits tied to waterbody improvements/preservation could include an increase (or stabilizing effect) in social cohesion and property values, for communities in proximity.

## Environmental Justice considerations, methods of addressing, including the particular case of indigenous communities

The concept of Environmental Justice (EJ), as a component of social impacts, is relevant to actions affecting waterbodies. EJ is commonly understood to apply to disadvantaged minority populations. At EPA, where the concept of Environmental Justice is integral to policy-making, EJ is specifically defined as applying to “people of color, low-income, and indigenous communities.” (See Appendix E for other details on EPA and EJ.) Indigenous communities, in relation to Arizona waterbodies as well as other environmental considerations, are particularly relevant to EJ considerations, based in part on the unique characteristics of Indian Country, including the following:

- Tribal nations are sovereign entities, having complicated relationships with federal, state, and local governments in the US. While actions of these jurisdictions can directly affect indigenous communities, not all of the representational, legal, policy, and other protections of these jurisdictions can be assumed to apply to indigenous communities, or if they do apply, in the same way (or through the same mechanisms) as for non-native areas. Consequently, typical ways of addressing EJ issues in non-native communities cannot be automatically assumed to fulfill the needs of indigenous peoples.
- Many indigenous communities and their populations have historically been economically disadvantaged, and to the extent this is still the case, it would be another reason for EJ considerations to apply.
- Economic principles applied to BCA processes typically reflect “the economy” of the non-native world, which might or might not be fully representative of the economy of any particular indigenous community. This is a matter for analysts to be aware of, and which might be incorporated more formally into BCA processes for waterbodies at some future time.
- For indigenous community members, natural features, including waterbodies (which may or may not be completely “natural”), may embody cultural or religious significance in addition to utilitarian values.

## BCA model summary results

Selected tables from the ADEQ BCA model (also included in the separate electronic workbook) are reproduced in this section. The table titles and description of contents shown below.

#	Table title	Topics, for each of 3 case study waterbodies
	<b>Tables of quantified data</b>	
4	Key project descriptive variables	Size of waterbody and other descriptive information
5	Applicable quantified cost and benefit categories, over time, discounted	Enumeration of costs and benefits by primary categories; linkages to computational tables and databases
6	Benefit/cost comparison	Figures leading up to and including the benefit/cost ratio
7	Affected households	Enumeration of households in designated local and nonlocal areas, including special population segments such as seasonal, etc.; links to computational tables
8	Potential Environmental Justice components and characteristics, for	Demographic data pertinent to Environmental Justice considerations; links to population databases

#	Table title	Topics, for each of 3 case study waterbodies
	Local areas; Arizona	
<b>Tables of primarily non-quantified, qualitative observations on findings</b>		
9	Categories for potential future elaboration	Cost and benefit topics that may be quantified at a later date and could be addressed qualitatively in the interim, including references to relevancy to the case study waters
10	Social costs and benefits effects quantifiable, with some addressed qualitatively in interim	Topics treated similarly to Table 6 and also having a potential social dimension; summary of Environmental Justice indicators
11	Sensitivity review	Implications of variation in characteristics of the three case study waterbodies for analysis results; notes on comparisons of BCA model results with EPA document findings for Arizona

Tables 4 through 8 summarize key characteristics and the quantities associated with estimated costs, benefits, affected households within two different WTP categories, and populations associated with environmental Justice considerations – for the three case study classes.

**TABLE 4. KEY PROJECT DESCRIPTIVE VARIABLES**

Descriptive Variable	Class 1 - sky island stream	Class 2 - isolated lake	Class 3 - unique waterbody
Name	Cochise Stonghold	Pintail Lake & marshes (1)	Quitobaquito Pond
Size (acres or acre-equivalents (Class 1))	21.76	65	0.5
Forested?	Yes	Yes	No
Primary distinguishing characteristics	Stream, isolated segment	Lake and marshland; bird habitat	Pond; threatened/ endangered species

1. Consists of Pintail Lake and South Marsh (both artificial). Pintail is 3 ponds, 50 acres of water, and nesting islands; South Marsh fluctuates from 15 to 50 acres of flooded meadow. A total of 65 acres is applied to the BCA model.

**TABLE 5. APPLICABLE QUANTIFIED COST AND BENEFIT CATEGORIES, OVER TIME, DISCOUNTED**

Cost and Benefit Categories	Cochise Stonghold	Pintail Lake	Quitobaquito Pond
<b>Costs</b>			
404 permits	\$9,344	\$9,344	\$9,344

Arizona component	1,319,865	2,700,399	105,306

**TABLE 8. POTENTIAL ENVIRONMENTAL JUSTICE COMPONENTS AND CHARACTERISTICS, FOR LOCAL AREAS; ARIZONA**

Percent of Population by Category	AZ	Cochise Stonghold	Pintail Lake	Quitobaquito Pond
<b>Race</b>				
White alone	73.8%	82.7%	69.4%	42.9%
Black or African American alone	4.5%	4.0%	1.4%	0.2%
American Indian and Alaska Native alone	4.3%	1.0%	21.2%	47.8%
Asian alone	3.3%	1.9%	0.4%	0.0%
Native Hawaiian and Other Pacific Islander alone	0.2%	0.2%	0.1%	0.0%
Some other race alone	6.9%	2.7%	3.5%	3.4%
Two or more races	7.0%	7.5%	4.1%	5.7%
Not Hispanic or Latino	68.5%	69.7%	85.0%	74.8%
<b>Hispanic or Latino</b>	31.5%	30.3%	15.0%	25.2%
<b>Households Below Poverty Level</b>	12.8%	12.0%	18.0%	28.2%

Summaries of qualitative observations for selected variables related to the analysis, for the three case studies, are shown on Tables 9 through 11. Material on these tables represents typical commentary on waterbody topics that are intended to add perspective to the BCA process.

**TABLE 9. CATEGORIES FOR POTENTIAL FUTURE ELABORATION**

Cost and Benefit Category	Cochise Stronghold	Pintail Lake	Quitobaquito Pond
<b>Cost categories</b>			
User charges	Not addressed	Not addressed	Not addressed
<b>Benefit categories</b>			
<i>Recreation, direct water:</i>			
Fishing (recreational), FBC (swimming, other immersive), PBC (partial-body contact, incl. boating)	?	No fishing or body contact	Limited if any ??
<i>Recreation, in area, direct or indirect assoc. with water:</i>			
Hunting, Camping, Hiking, Backpacking, Rock climbing, Equestrian, Birding	Waterbody meaningfully enhances experience	Waterbody meaningfully enhances experience	Activities available in National Monument; minimal connection with waterbody
Fish consumption	?	No	Limited if any
Habitat: aquatic, wildlife, rare and endangered	Relevant	Relevant	Rare/endangered key aspect of waterbody
Cultural observances/significance	Historic connection	Historically notable use of wastewater	Indigenous ceremonial connection
Local/closest merchants and receipts	A few businesses are directly involved in immediate area	Very close to Show Low businesses	Few if any businesses in close proximity

**TABLE 10. SOCIAL COSTS AND BENEFITS EFFECTS QUANTIFIABLE, WITH SOME ADDRESSED QUALITATIVELY IN INTERIM**

Cost and Benefit Effects	Cochise Stronghold	Pintail Lake	Quitobaquito Pond
<b>Cost effects, if degradation of waterbody asset were to occur</b>			
Loss of utility/usefulness			Use by local tribal members is very important
Social, household burden of dealing with decreased property	Negligible issue here	Negligible issue here	Negligible issue here
Diminishment of social cohesion of a community	Minimal issue here	Minimal issue here	Potentially major issue given ceremonial significance of waterbody
<b>Benefit effects</b>			
Enhanced utility	Maintaining the asset is assumed to be sufficient		
Enhanced personal wealth and (potentially unpredictable) social effects of increased property values	Negligible issue here	Negligible issue here	Negligible issue here
Enhanced social cohesion of a community	Maintaining the asset is assumed to be sufficient		
Environmental justice (see Table 8)	Local population demographic profile is similar to state as a whole	Local population demographic profile exhibits high % of American Indian population and relatively high poverty level compared to AZ	Local population demographic profile exhibits very high % of American Indian population and very high poverty level, compared to AZ

**TABLE 11. SENSITIVITY REVIEW**

Sensitivity Issue	Cochise Stronghold	Pintail Lake	Quitobaquito Pond
<b>Analysis issues by waterbody</b>	Translation of stream length to acreage is based on 50' buffer factor mentioned in EPA but not definitively verified as applicable to WTP concept	As largest waterbody of 3 cases, plus location relative to populated areas in state, benefits far exceed other 2 waterbodies, based on methods applied	Very small waterbody was assigned small areas for local & non-local affected households, so minimal benefit #s. WTP approach does not capture value for vital role in protecting rare and endangered species
<b>Comparisons to EPA document</b>	The cost components of the BCA model with respect to the three case study waterbodies are understood to be, perhaps, atypically minimal, given the somewhat protected nature of the waterbodies and their settings. The EPA cost figures for Arizona are considerably higher. Benefit factors per-household and per-acre in EPA are also considerably higher than what is reflected in the BCA model.		
	While it is theoretically possible to compare the EPA results with the results of the ADEQ BCA model, on a per-acre and/or per-household basis, EPA figures can vary from the BCA model due to how EPA allocated varying benefit amounts by waterbodies' settings, local versus non-local populations, etc., or other factors in their modeling process that are not replicable by the Consultants. Regardless of such effects, one conclusion from this comparative review is that the BCA model results are conservatively derived. Based on other discussions in this report, including comments on EPA's approach to quantifying benefits, the Consultants do not recommend at this time an upward adjustment in the model's benefit factors based on the comparison with EPA figures.		

## Appendix A. Rulemaking and BCA relationships

GENERALIZED RULE-MAKING REQUIREMENTS <sup>20</sup>	BENEFIT/COST MODELING FRAMEWORK
Identification of the rulemaking and summary of the economic, small business and consumer impact statement	Analyses would typically include summaries of results, including by affected parties
An identification of the persons who will be directly affected by, bear the costs of or directly benefit from the rule making	Affected populations are specifically identified within the analysis, partly in order to quantify per-household effects where possible, and to identify potential environmental justice communities. As it relates to environmental justice (and also, more generally, to impacted private parties such as businesses), it is understood that comprehensive BCA may include the need for direct consultations with affected communities/entities.
A benefit/cost analysis addressing the following:	
<ul style="list-style-type: none"> <li>The probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the rule making</li> </ul>	Agency costs are one of the identified quantified cost categories (the existing model incorporates general factors from the EPA document as well as Arizona-specific data supplied by ADEQ)
<ul style="list-style-type: none"> <li>The probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the rule making</li> </ul>	Although not generally included as part of the initial analysis framework, political subdivisions would largely be part of an expanded, future analysis in which secondary effects (e.g., indirect and induced costs and benefits as documented through an IMPLAN model) would be considered along with direct effects. Such analyses typically include a fiscal component.
<ul style="list-style-type: none"> <li>The probable costs and benefits to businesses directly affected by the rule making</li> </ul>	Although not generally included as part of the initial analysis framework, part of the recommended potential future expansion of the B/C analysis is to identify businesses that interact directly with affected waterbody users and estimate their costs, sales, etc. resulting from the action
A general description of the probable impact on private and public employment in businesses, agencies and political subdivisions of this state directly affected by the rule making. (Includes reference to private persons and consumers who are directly affected by the rule-making.)	As per the preceding items, future analyses that would include the use of tools such as IMPLAN would incorporate estimates of employment as well as dollars relating to direct costs, sales, etc.
A statement of the probable impact of the rule making on small businesses	See above, relative to economic B/C effects
A statement of the probable effect on state revenues	See above, relative to B/C effects for political subdivisions
A description of any less intrusive or less costly alternative methods of achieving the purpose of the rule making	The B/C analysis framework provides a basis for quantitatively comparing the effects of various components of costs and benefits
A description of any data on which a rule is based, data validity, etc.	Analyses would typically include documentation of data sources, reasons for using particular sources, etc.

<sup>20</sup> *Generalized Rule-Making Requirements* in the table are distilled from the following document in ADEQ's online resource library: *GREAT RESOURCE 2017-06-20 EIS info and examples of water and air bookmarked.*

## Appendix B. Annotated Bibliography

### 1. Arizona Administrative Register

*Summary:* The Administrative Register (Register) is a legal publication published by the Administrative Rules Division that contains information about rulemaking activity in the state of Arizona. The issues referenced below include code sections being amended and introduced to Chapter 11, which involves the Department of Environmental Quality Water Quality Standards.

*Study Resource:* These publications mainly refer to and make reference to topics that contribute to the Economic, Small Business, and Consumer Impact Statements. The studies referred to and referenced in this publication provide a brief summary of tourism, agriculture, or other benefits as well as cost categories or data produced from the findings. The following items are addressed in individual registers cited below:

Arizona Administrative Register (1995). Notice of Proposed Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 1, Issue 50.

*Publication Study Resource:* Proposed new section to the modification of water quality standards on the grounds of net ecological benefit based on the following criteria:

1. The discharge of effluent creates or supports an ecologically valuable aquatic; wetland, or riparian habitat in an area where such resources are limited
2. The cost of treatment to comply with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent rather than upgrade treatment
3. It is feasible for a point source discharger to completely eliminate the discharge of effluent
4. The environmental benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with elimination of the discharge and destruction of the effluent dependent ecosystem
5. All practicable point source control discharge programs, including local pretreatment, waste minimization, and source reduction programs are implemented
6. The discharge of effluent under a modified water quality standard will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water
7. The discharge of effluent will not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.

Arizona Administrative Register (1996). Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards For Surface Waters – Economic Small Business and Consumer Impact Statement, Volume 2, Issue 20.

*Publication Study Resource:* The adopted Net Ecological Benefit rule provides a benefit to the owners of wastewater treatment plants that support or create effluent dependent waters because it provides a mechanism for relief from a water quality standard that otherwise might force costly treatment plant upgrades. The adopted rule also provides ecosystem benefits in that it provides a regulatory incentive to maintain and preserve in-stream flows in areas where riparian and aquatic resources are limited. The continued discharge of effluent may provide net ecological benefits, even though an applicable water quality standard is not being met. Examples of possible ecological benefits include:

- A. Enhancement, expansion or restoration of aquatic and riparian habitat for native, threatened or endangered aquatic species, or for migratory waterfowl
- B. Provision or enhancement of habitat or food sources for native, threatened and endangered species that are terrestrial
- C. Enhancement of species diversity
- D. Enhancement or restoration of riparian values (e.g. cottonwood/willow habitat, improved bird and wildlife habitat)

Arizona Administrative Register (2001). Notice of Proposed Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 7, Issue 11.

*Publication Study Resource:* Proposed decision criteria for *Social and economic impact of Tier 3 antidegradation protection*: The Director may take into consideration the potential social and economic impact of a unique water classification and the establishment of Tier 3 antidegradation protection, including:

- a. Impact of a prohibition of new point source discharges and expansion of existing point source discharges, including possible limits on discharges to the tributaries of a proposed unique water and possible impacts on growth and development.
- b. Impact of possible future restrictions on land use activities in a unique water's watershed, including cattle grazing, timber harvesting, mining, recreation, and agriculture.
- c. The impact of stricter requirements for §401 certification of federal permits and licenses, including NPDES and §404 permits.
- d. Impact on private property rights and the potential for regulatory "takings."
- e. Ecosystem and preservation values.

Arizona Administrative Register (2002). Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 8, Issue 13.

Arizona Administrative Register (2008). Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 14, Issue 52.

Arizona Administrative Register (2016). Agency Certificate Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 22, Issue 36.

*Publication Study Resource:* ADEQ proposed to eliminate the requirement that a discharger have a plan to eliminate the discharge under active consideration as part of what must be demonstrated. Communities and developers should benefit by eliminating an extra burden in seeking to use high quality effluent to create aquatic and riparian ecosystems.

Arizona Administrative Register (2017). Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 23, Issue 6.

*Publication Study Resource:* Estimated costs and benefits to consumers and the public mentioned in recreation activities (e.g., Ironman at Tempe Town Lake), fishing activities, and agricultural productivity.

Arizona Administrative Register (2019). Notice of Final Rulemaking, Title 18, Environmental Quality, Chapter 11, Department of Environmental Quality, Water Quality Standards, Volume 25, Issue 5.

*Publication Study Resource:* See notes regarding interface with AOT studies under *Agriculture in Arizona's Economy* and *The Economic Contributions of Water-related Outdoor Recreation in Arizona*, below.

## **2. Agriculture in Arizona's Economy**

*Summary:* This report explores agriculture's contribution to the Arizona economy by examining the entire agribusiness system in Arizona.

*Study Resource:* The economic contribution analysis was conducted using input-output modeling and the premiere software for this type of analysis, IMPLAN Version 3.1. IMPLAN is a modeling system of a regional economy that is based on national averages of production conditions. This model was refined based on the best available data to more accurately reflect production conditions in Arizona.

*Applicability to current benefit/cost estimating procedures:* Uses IMPLAN system to translate *direct* economic effects of some action into *secondary* effects, reflecting the multiplier effects of actions through the economic system. The practice represented by this modeling tool, widely used in economic impact assessments, would be a logical eventual extension of cost and benefit estimating for Arizona water bodies.

Kerna, A., & Frisvold, G. (2014). *Agriculture in Arizona's Economy: An Economic Contribution Analysis. Department of Agricultural & Resource Economics. University of Arizona.*

## **3. Buehman Canyon Creek – Economic Benefits of Unique Water Designation Study of Buehman Canyon Creek**

*Summary:* This study reviews the economic benefits of Buehman Canyon Creek for the consideration of determining the water body as a unique water designation.

*Study Resource:* Provides guidance on factors that need to be considered in a comprehensive examination of costs and benefits in the economic impact statement for proposed unique water designation.

*Applicability to current benefit/cost estimating procedures:* This study mentions economic benefits that are quantifiable, but does not include the data methodology used to support the economic benefits associated with the proposed unique water designation for Buehman Canyon Creek.

Colby, B.G. (1996) *Buehman Canyon Creek – Economic Benefits of Unique Water Designation Study – March 1996. Arizona Department of Environmental Quality.*

## **4. The Economic Benefits of Recreation in Rural Arizona**

*Summary:* This report provides a summary analysis of tourism and recreation as factors influencing the state's economy and local economy's within the state.

*Study Resource:* This report summarizes park recreation tourism economic benefits, the benefits to rural areas, and the need to develop more facilities to access recreation lands. Drawing from the published survey of visitors of Arizona State Parks conducted between 1987-1988, visitors were asked how much money their group spent during their trip within 50 miles of the state park they were visiting, average expenditures were produced per visitor group per trip and were applied to park attendance counts to document total expenditures spent within 50 miles of state parks by visitors in 1987.

*Applicability to current benefit/cost estimating procedures:* The reference cited for this document, entitled "*The 1987-1988 Use Study of Arizona State Parks Visitors*," for the Arizona State Parks Board in 1989, provides some quantified data for visitor expenditures that lends itself to capturing economic benefits of this type.

Spear, S. (1989) Rural Arizona... The Economic Benefits of Recreation, A Summary Analysis of Tourism and Recreation as Factors Influencing State and Local Economies. *Arizona State Parks Board Statewide Planning Section*.

## **5. The Economic Contributions of Water-related Outdoor Recreation in Arizona**

*Summary:* A study of outdoor recreational activity on or along the water to estimate the level of participation in the state and the contributions from these activities to the county and state economies.

*Study Resource:* The analysis is structured around estimating three sets of metrics: participation, spending, and economic contributions. Participation estimates for this study relied largely on two data sources to characterize outdoor recreation on or along the water. Economic Contributions were estimated by combining spending estimates with data that models economic sector interactions in a given geography. Expenditure data were collected for different categories (e.g., groceries, fuel, equipment, etc.) as part of the OIA survey, which enabled allocation of spending to specific economic sectors. These data were then run through an IMPLAN™ model of the Arizona statewide economy using software produced by MIG, Inc. The resulting county-level and water-specific estimates reflect the contribution that outdoor recreation in those locales has on the statewide economy. Appendix A in the document provides additional background information on economic contributions.

*Applicability to current benefit/cost estimating procedures:* See notes on IMPLAN under *Agriculture in Arizona's Economy*. The Arizona Office of Tourism (AOT) sponsors periodic generalized studies related to Arizona visitors, including types of activities, expenditures, economic impacts, etc. To the extent that benefit/cost modeling of water bodies/designations is expanded into specific consideration of benefits related to riparian-focused activities, these location/activity-specific studies (#4 as well as this one) can add to the specificity of benefits associated with activities of particular interest.

Southwick Associates (2019). The Economic Contributions of Water-related Outdoor Recreation in Arizona: A Technical Report on Study Scope, Methods, and Procedures. *Audubon Arizona*.

## **6. Socioeconomic consequences of mercury use and pollution**

*Summary:* In the past, human activities often resulted in mercury releases to the biosphere with little consideration of undesirable consequences for the health of humans and wildlife. This paper outlines the pathways through which humans and wildlife are exposed to mercury.

*Study Resource:* This paper examines the life cycle of mercury from a global perspective and then identifies several approaches to measuring the benefits of reducing mercury exposure, policy options for reducing Hg emissions, possible exposure reduction mechanisms, and issues associated with mercury risk assessment and communication for different populations. This study also briefly reviews the methods used to quantify the benefits to human health associated with reduced mercury exposure, which include Benefit-cost Analysis and the Cost-effectiveness Analysis.

*Applicability to current benefit/cost estimating procedures:* This paper does not include any quantifiable data used in its review of the Benefit-cost Analysis or Cost-effectiveness Analysis.

Swain, E. B., Jakus, P. M., Rice, G., Lupi, F., Maxson, P. A., Pacyna, J. M., ... & Veiga, M. M. (2007). Socioeconomic consequences of mercury use and pollution. *Ambio*, 45-61.

## **7. Nature-based Tourism and the Economy of Southeastern Arizona**

*Summary:* This study documents expenditures in the Sierra Vista area by visitors to the San Pedro Riparian National Conservation Area (RNCA) and by bird watchers at Ramsey Canyon Preserve. Information on visitor

expenditures, characteristics and preferences is reported, along with implications for nature-based tourism in southeastern Arizona. This study examined visitation to only two natural areas and so economic impacts reported here represent only a portion of the impacts of visitor spending associated with all nature preserves located in southeastern Arizona. The study indicates that 95% of visitors to Ramsey Canyon and the San Pedro RNCA go to at least one other site in southern Arizona on a typical visit to the area, and make expenditures in communities located near these sites.

*Study Resource:* The expenditure analysis indicates the importance of an overnight stay for communities to experience significant economic benefits from visitors.

*Applicability to current benefit/cost estimating procedures:* See notes regarding interface with AOT studies under *The Economic Contributions of Water-related Outdoor Recreation in Arizona*, above.

Crandall, K., Leones, J., & Colby, B. G. (1992). *Nature-based Tourism and the Economy of Southeastern Arizona: Economic Impacts of Visitation to Ramsey Canyon Preserve and the San Pedro Riparian National Conservation Area, Final Report*. Department of Agricultural and Resource Economics, the University of Arizona.

## **8. Notes on inclusion of source studies and data preparation for wetlands meta-data**

*Summary:* This memorandum provides reasons for excluding specific wetland valuation studies from the meta-data that was used in the meta-analysis for estimating national benefits in the *Economic Analysis for the Proposed "Revised Definition of 'Waters of the United States'" Rule* (U.S. EPA and Army, 2021).

*Study Resource:* Provides an overview of valuation scenarios considered in literature and the assumptions made to fill in data gaps for each study used for wetlands meta-data.

*Applicability to current benefit/cost estimating procedures:* Provides a critical meta-analysis of literature and studies that support estimating national benefits in the *Economic Analysis for the Proposed "Revised Definition of 'Waters of the United States'" Rule* (U.S. EPA and Army, 2021).

ICF. 2021. Notes on inclusion of source studies and data preparation for wetlands meta-data. Memorandum to Todd Doley and Steve Whitlock. November 22, 2021.

## **9. Using Meta-Analysis for Large-Scale Ecosystem Service Valuation: Progress, Prospects, and Challenges**

*Summary:* This article discusses prospects and challenges related to the use of meta-regression models (MRMs) for ecosystem service benefit transfer, with an emphasis on validity criteria and post-estimation procedures given sparse attention in the ecosystem services literature. Includes a meta-analysis of willingness to pay for water quality changes that support aquatic ecosystem services, and the application of the model to estimate water quality benefits under alternative riparian buffer restoration scenarios in New Hampshire's Great Bay Watershed. These illustrations highlight the advantages of MRM benefit transfers, together with the challenges and data needs encountered when quantifying ecosystem service values.

*Study Resource:* The illustrated case study discussed in this paper helps to demonstrate how evaluations of issues can help clarify the suitability of Meta-Regression Modeling (MRM) predictions for benefit transfers.

*Applicability to current benefit/cost estimating procedures:* This illustrates benefit transfers using scenarios of potential water quality, setting variables, geospatial and socioeconomic data for benefit transfer scenarios, the data methodology, indexing calibration, WTP estimate predictions per household, and the challenges for Large-Scale Ecosystem Service Valuations.

Johnston, R. J., & Bauer, D. M. (2020). Using meta-analysis for large-scale ecosystem service valuation: progress, prospects, and challenges. *Agricultural and Resource Economics Review*, 49(1), 23-63

#### **10. Economic Analysis for the Proposed “Revised Definition of ‘Waters of the United States’” Rule**

*Summary:* This Economic Analysis (EA) assesses the potential impacts of the proposed changes to the definition of “waters of the United States” based on the potential effects to Clean Water Act (CWA) programs that rely on that definition.

*Study Resource:* Provides an overview of economic analysis under the primary and secondary baselines for the CWA. The paper discusses the multiple components of the secondary baseline assessment, and provides estimates of the benefits and costs associated with this assessment, by states and for the US.

*Applicability to current benefit/cost estimating procedures:* This report provides broad guidance for estimating costs and benefits, key components of which, including benefits based on WTP, and various cost categories, were incorporated into a recommended BCA modeling structure for ADEQ.

U.S. Environmental Protection Agency and Department of the Army. (2021). *Economic Analysis for the Proposed “Revised Definition of ‘Waters of the United States’” Rule.*

[https://www.epa.gov/system/files/documents/2021-11/revised-definition-of-wotus\\_nprm\\_economic-analysis.pdf](https://www.epa.gov/system/files/documents/2021-11/revised-definition-of-wotus_nprm_economic-analysis.pdf)

#### **11. Supplementary Material to the Economic Analysis for the Proposed “Revised Definition of ‘Waters of the United States’” Rule**

*Summary:* This document includes the Compendium of State and Tribal Regulations for CWA programs by state that corresponds to the *Economic Analysis for the Proposed “Revision Definition of ‘Waters of the United States’” Rule* report cited above.

*Study Resource:* See *Economic Analysis for the Proposed “Revision Definition of ‘Waters of the United States’” Rule* report cited above.

*Applicability to current benefit/cost estimating procedures:* Adds additional context to the approach EPA used in preparing estimates of costs and benefits, as addressed in *Revised Definition of ‘Waters of the United States Rule.*

U.S. Environmental Protection Agency and Department of the Army. (2021). *Supplementary Material to the Economic Analysis for the Proposed “Revised Definition of ‘Waters of the United States’” Rule.*

[https://www.epa.gov/system/files/documents/2022-01/epa-hq-ow-2021-0602-0087\\_content.pdf](https://www.epa.gov/system/files/documents/2022-01/epa-hq-ow-2021-0602-0087_content.pdf)

#### **12. Upgrading Wetland Valuation via Benefit Transfer**

*Summary:* This study uses updated meta-data on wetland valuation to illustrate how a state-of-the-art meta-regression framework that is consistent with economic theory can be adapted to generate benefit transfer predictions for incremental changes in wetland acreage over space and time. This study also applies this framework to estimate losses in benefits for realistic changes in wetland acreage for some sub-watersheds, as can be expected under the proposed re-definition of the “Waters of the United States” to be protected under the Clean Water Act (CWA).

*Study Resource:* This study provides an illustration of how recent advances in meta-analytic methods could be applied to value changes in wetland acreage regionally or nationally.

*Applicability to current benefit/cost estimating procedures:* This study compiles an updated meta-data set on willingness to pay (WTP) to preserve or restore wetlands in the United States, drawing from 17 primary valuation

studies as current as 2016. This study also takes advantage of recent advances in meta-regression modeling and computation of predicted benefits via the econometric framework proposed in the previous Moeltner 2019 study within the context of valuing surface water quality changes via Benefit Transfers (BT).

Moeltner, K., Balukas, J. A., Besedin, E., & Holland, B. (2019). Waters of the United States: Upgrading wetland valuation via benefit transfer. *Ecological Economics*, 164, 106336.

## Appendix C. Glossary of terms used in this document

**Action-related** [referring to costs and benefits and associated parties]: A category of out-of-pocket expenses, or proceeds derived, resulting from some interaction with the waterbody or related aquatic assets.

**Adding up**: A constraining function in Benefit Transfer analysis in which analysts maintain the intent to limit WTP estimates applicable to any one waterbody so that they are consistent with estimates applicable to incremental increases in the size, number, etc. of analyzed waterbodies – in other words, so that individual WTP totals are not greater than a WTP estimate that would apply to all relevant waterbodies collectively within a given geographic area.

**Appreciative value**: The value placed on a waterbody due partially or entirely to the satisfaction (appreciation) of knowing that it exists (or serves certain purposes through its existence), and where physical contact or proximity may be infrequent or even nonexistent. Also sometimes referred to as “nonuse” or “passive use” of a waterbody-type resource.

**Benefit transfer (BT)**: The analytical method of projecting benefits documented through a study conducted for one place and time to, usually, some other place and time. In the context of this document, BT applies to studies estimating users willingness-to-pay (WTP to have some waterbody asset at some level of usability).

**Discretionary-user populations**: 1) Recreationists, directly related to a waterbody or indirectly related to it as part of an overall environment being experienced; 2) Persons whose involvement with a waterbody may primarily consist of “appreciative value,” and infrequent or even no physical attendance; and 3) Persons with a cultural or ceremonial relationship with the waterbody.

**Local and non-local market (user) areas**: Terminology from EPA documentation referring to 1) an affected population (in number of households) with some degree of proximity to an analyzed waterbody (local), and 2) a more-remote (non-local), regional-scale population (# households) that attaches some value to the analyzed waterbody based primarily on being aware of its existence, and not dependent on physical proximity.

**Regular use** [of waterbody]: Waterbody use activities associated with a localized population having relatively convenient access.

**Willingness to pay (WTP)**: A technique applied, generally in survey research, to derive value estimates for some asset for which direct payments are not applicable. For example, a waterbody is not likely to be accessed by means of a gated entrance where a fee is extracted; so users of the waterbody are queried, through a survey process, as to what they would be willing to pay to access it (or to simply have it existing and serving various purposes).

**WOTUS**: Waters of the United States.

## Appendix D. ADEQ project capacity worksheet for application to estimating waterbody management administrative costs

Project Prioritization Matrix	Product or Service (Widget)	Number of Widgets Produced	Avg. Touch Time per Widget, hr	First Pass Yield, %	Avg. Rework Touch Time/Widget, hrs.	Total Rework Time, hrs.	Total Touch Time, hrs. (incl. rework)
<b>Total</b>							<b>16,323.6</b>

Administrative Functions	Legal Research, Federal Statutes or Rules	5	16.0	80%	3.2	16.0	96.0
Administrative Functions	Legislative or Regulatory Supporting Documents (Flowcharts, EIS, Studies, State by State Analysis, etc.)	5	32.0	80%	6.4	32.0	192.0

## Appendix E. EPA and Environmental Justice

EJ concepts in EPA policy-making are summarized in the following excerpts from EPA webpages:

“EPA's [environmental justice] goal is to provide an environment where all people enjoy the same degree of protection from environmental and health hazards and equal access to the decision-making process to maintain a healthy environment in which to live, learn, and work.”<sup>21</sup>

EPA has developed an Environmental Justice mapping and screening tool called EJScreen, which combines environmental and demographic indicators in maps and reports. Material below is taken from their documentation of this tool, as noted:

“EJScreen allows users to access high-resolution environmental and demographic information [at the Census block group level] for locations in the United States, and compare their selected locations to the rest of the state, EPA region, or the nation. The tool may help users identify areas with:

- People of color and/or low-income populations
- Potential environmental quality issues
- A combination of environmental and demographic indicators that is greater than usual
- Other factors that may be of interest”<sup>22</sup>

EJScreen uses an “EJ Index” that combines demographic factors in a particular location with a single environmental factor relevant to that location, and consequently has the capability to show each environmental indicator and each demographic indicator, one at a time. There are eleven EJ Indexes (with names such as, for example, Traffic Proximity, Lead Paint, Hazardous Waste Proximity) in EJScreen reflecting 12 environmental indicators.<sup>23</sup>

One of the indexes, titled “Wastewater Discharge,” deals specifically with water issues. Generally, however, this tool would appear to have limited application for recognizing environmental justice considerations within the BCA modeling framework related to this assignment. The indexing approach, with its focus on combining hazards with demographic data, actually complicates the primary intent of environmental justice related to the recommended benefit/cost modeling, which is to identify, initially, minority (including indigenous) and low-income populations that could be affected by waterbody decisions. This identification step then provides additional specific context within which to consider affected populations in relation to anticipated waterbody actions.

- The following states require physicians to register or receive a waiver if they wish to practice across state lines.

Arizona  
Florida  
Indiana  
Kansas  
Maine  
Minnesota  
Vermont  
Washington  
West Virginia

Other state fees to follow.

The Arizona Medical Board does not have an algorithm to determine licensing fees. All licenses/registrations are worked on continuously by licensing staff.
