         $Log_{10}NR$ is the number of "Control" microorganisms in colony forming units per gram of waste solids which were not recovered in the non-treated, processed waste residue;
         $Log_{10}RT$ is the number of viable "Test" microorganisms in colony forming units per gram of waste solids recovered in treated, processed waste residue.

D. A treater shall employ the appropriate methodology to determine efficacy of the treatment technology following the protocols in subsection (C) that are congruent with the treatment method.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1416. Recycled Materials

A. Once a generator places biohazardous medical waste in a red bag as required in R18-13-1407, a person shall not remove any of the biohazardous medical waste from the bag until the biohazardous medical waste has been treated as required in R18-13-1415.

B. A generator of biohazardous medical waste intending to recycle any portion of the biohazardous medical waste shall segregate that portion of biohazardous medical waste from the portion of biohazardous medical waste that will not be recycled. The generator shall do either of the following:
1. Treat the biohazardous medical waste intended for recycling as required in R18-13-1415 before sending the treated medical waste to a recycler.

2. Follow the requirements in R18-13-1406, R18-13-1407, and R18-13-1408, before either contracting with a transporter to haul or self-hauling the biohazardous medical waste to a treatment facility for treatment. After treatment, the treated medical waste may be sent to a recycler.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3).

R18-13-1417. Disposal Facilities: Design and Operation

An operator of a municipal solid waste landfill that accepts untreated biohazardous medical waste shall comply with all of the following in design and operational requirements:

1. Accept biohazardous medical waste only if packaged according to R18-13-1407.
2. Keep the biohazardous medical waste disposal area separate from the general purpose disposal area.
3. Clearly label the biohazardous medical waste disposal area, informing persons that the disposal area contains untreated medical waste.
4. Not drive directly over deposited medical waste. The operator shall achieve compaction by first spreading a layer of soil that is sufficiently thick to prevent compaction equipment from coming into direct contact with the waste, or dragging waste over the area.
5. Cover the biohazardous medical waste with 6 inches of compacted soil at the end of the working day or more often as necessary to prevent vector breeding and odors.
6. Not allow salvaging of untreated biohazardous medical waste from the landfill.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1418. Discarded Drugs

Discarded drugs that are not hazardous waste, not returned to the manufacturer, and not segregated and labeled on site for transport to a treatment facility shall be destroyed on site by the generator of such drugs by any method that prevents the drugs' use prior to placing the waste out for collection. If federal or state law prescribes a specific method for destruction of discarded drugs, the generator shall comply with that law.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1419. Medical Sharps

A. Medical sharps shall be handled as follows:
1. A generator who treats biohazardous medical waste on site shall place medical sharps in a sharps container after rendering them incapable of creating a stick hazard by using an encapsulation agent or any other process that prevents a stick hazard. Medical sharps encapsulated or processed in this manner are considered to be solid waste.
2. A generator who ships biohazardous medical waste off site for treatment shall either:
   a. Place medical sharps in a medical sharps container and follow the requirements of R18-13-1406, or
   b. Package and send medical sharps to a treatment facility via a mail-back system as prescribed by the instructions provided by the mail-back system operator. The generator shall retain proof of shipping.

B. Notwithstanding subsections (A)(1) and (2), the following syringes do not have to be placed in a medical sharps container:
1. Syringes that have never had a needle (sharp) attached.
2. Syringes where a needle or sharp had been attached and has been separated from the syringe so that no stick or puncture hazard remains with the syringe.

C. Syringes that are exempted by subsections (B)(1) and (2) from being placed in a medical sharps container are not biohazardous medical waste, and may be treated as a solid waste, if they are not composed of biohazardous items listed in R18-13-1401(4) and do not contain discarded drugs or another regulated substance.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1420. Additional Handling Requirements for Certain Wastes

A. A person who treats the following biohazardous medical waste categories shall meet the following additional requirements:
1. Cultures and stocks shall be incinerated, autoclaved, or treated by an alternative medical waste treatment method that meets the treatment standards set forth in R18-13-1415(A). If cultures and stocks are shipped off site for treatment or disposal, they shall be packaged inside a watertight primary container with absorbent packing materials. The primary container shall be placed inside a watertight secondary inner container that is then placed inside an outer container with sufficient cushioning material to prevent shifting between the secondary inner container and the outer container. If federal or state law prescribes specific requirements for packaging and transporting this waste, the treater shall comply with that law.
2. Trace chemotherapy waste shall be incinerated or disposed of in either an approved solid waste or hazardous waste disposal facility.
3. Experimental or research animal waste shall be handled as follows:
   a. Autoclave bedding on site or package as described in R18-13-1407 for off-site treatment or landfilling.
   b. Incinerate animal carcasses on site, or if taken off site for treatment, comply with one of the following requirements:
      i. Package the waste in a leakproof, covered container, label the contents and send to an incinerator or a Department-approved landfill, or
      ii. If treated by a method other than incineration, pre-process by grinding, then treat by a method that achieves the standards of R18-13-1415(A).

B. If a treater uses grinding in combination with another treatment method described in this Article, the treater shall conduct it in a closed system to prevent humans from being exposed to the release of the waste into the environment. If grinding is used for medical sharps, the grinding shall render the medical sharps incapable of creating a stick hazard.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801

(December 3, 2021), effective January 4, 2022 (Supp. 21-4).

ARTICLE 15. RECODIFIED

Editor's Note: The recodification at 7 A.A.R. 2522 described below erroneously moved Sections into 18 A.A.C. 9, Article 9. Those Sections were actually recodified to 18 A.A.C. 9, Article 10. See the Historical Notes for more information (Supp. 01-4).

Article 15, consisting of Sections R18-13-1501 through R18-13-1514 and Appendix A, recodified to 18 A.A.C. 9, Article 9 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2).

R18-13-1501. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-902 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1002 (Supp. 01-4).

R18-13-1502. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-901 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1001 (Supp. 01-4).

R18-13-1503. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-903 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1003 (Supp. 01-4).

R18-13-1504. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-904 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1004 (Supp. 01-4).

R18-13-1505. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-905 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1005 (Supp. 01-4).

R18-13-1506. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-906 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1006 (Supp. 01-4).

R18-13-1507. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-907 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1007 (Supp. 01-4).

R18-13-1508. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-908 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1008 (Supp. 01-4).

R18-13-1509. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-909 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1009 (Supp. 01-4).

R18-13-1510. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-910 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1010 (Supp. 01-4).

R18-13-1511. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-911 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1011 (Supp. 01-4).

R18-13-1512. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-912 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1012 (Supp. 01-4).

R18-13-1513. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-913 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1013 (Supp. 01-4).

R18-13-1514. Recodified

Historical Note

Adopted effective April 23, 1996 (Supp. 96-2). Section recodified to R18-9-914 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to R18-9-1014 (Supp. 01-4).

Appendix A. Recodified

Historical Note

Appendix A, "Procedures to Determine Annual Biosolids Application Rates", adopted effective April 23, 1996 (Supp. 96-2). Appendix A recodified to 18 A.A.C. 9, Article 9 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Previous note correction: Section actually recodified to 18 A.A.C. 9, Article 10 (Supp. 01-4).

ARTICLE 16. BEST MANAGEMENT PRACTICES FOR PETROLEUM CONTAMINATED SOIL

Article 16, consisting of Sections R18-13-1601 through R18-13-1614, recodified from 18 A.A.C. 8, Article 16 at 8 A.A.R. 5172, effective November 27, 2002; Section and subsection citations within this Article were also updated under A.R.S. § 41-1011(C) (Supp. 02-4).

R18-13-1601. Definitions

In addition to definitions in A.R.S. § 49-851 and A.A.C. R18-13-1301, the terms in this Article shall have the following meanings:

1. "Accumulation site" means an area or site at which PCS from one or more points of generation under the control of the generator of PCS is accumulated for more than 12 hours but less than 90 days prior to treatment, storage, or disposal.
2. "Containment system" means a system designed to contain an accumulation of special waste which meets the design and performance standards in R18-13-1608 and either R18-13-1609 or R18-13-1611.
3. "Excavated" means removed from the earth by scraping or digging a hole or cavity in the earth's surface or otherwise removed from the earth's surface.
4. "Facility" or "special waste receiving facility" means a treatment facility, storage facility, or disposal facility which has been approved by the Director in accordance with A.R.S. § 49-857 or has qualified for Interim Use Facility status pursuant to A.R.S. § 49-858.
5. "Hazardous waste" means hazardous waste as defined in A.R.S. § 49-921(5).
6. "Non-fuel, non-solvent petroleum product" means a petroleum-based substance refined from virgin crude oil that is not used as a solvent or fuel including mineral oils and hydraulic oils.
7. "Non-regulated soils" means soils that are neither hazardous waste, PCS, nor solid waste PCS, and which do not constitute an environmental nuisance pursuant to A.R.S. §§ 49-141 through 49-144.
8. "PCS" or "petroleum-contaminated soils" means soils *excavated for storage, treatment or disposal containing* one or more of the contaminants in the list below at the following concentrations:
   a. Benzene greater than or equal to 1.4 mg/kg,
   b. Toluene greater than or equal to 650 mg/kg,
   c. Ethylbenzene greater than or equal to 400 mg/kg,
   d. Total Xylenes greater than or equal to 420 mg/kg,
   e. Anthracene greater than or equal to 240,000 mg/kg,
   f. Benz(A)anthracene greater than or equal to 21 mg/kg,
   g. Benzo(A)pyrene greater than or equal to 2.1 mg/kg,
   h. Benzo(B)fluoranthene greater than or equal to 21 mg/kg,
   i. Benzo(K)fluoranthene greater than or equal to 210 mg/kg,
   j. Chrysene greater than or equal to 2,000 mg/kg,
   k. Dibenz(A,H)anthracene greater than or equal to 2.1 mg/kg,
   l. Fluoranthene greater than or equal to 22,000 mg/kg,
   m. Fluorene greater than or equal to 26,000 mg/kg,
   n. Indenopyrene greater than or equal to 21 mg/kg,
   o. Naphthalene greater than or equal to 190 mg/kg,
   p. Pyrene greater than or equal to 29,000 mg/kg.
9. "PCS disposal facility" means a site or special waste receiving facility at which the disposal of PCS has been approved by the Director pursuant to A.R.S. § 49-857 or has qualified for Interim Use Facility status pursuant to A.R.S. § 49-858.
10. "Petroleum" means petroleum as defined in A.R.S. § 49-1001(11).
11. "Point of compliance" means point of compliance as defined in A.R.S. § 49-244.
12. "Special waste shipper" means a person who transports special waste for off-site treatment, storage, or disposal.
13. "Solid waste PCS" means excavated soils contaminated with petroleum that are not hazardous waste and not PCS but that contain one or more of the contaminants in the list below at the following concentrations:
   a. Benzene greater than or equal to 0.65 but less than 1.4 mg/kg;
   b. Toluene greater than or equal to 650 mg/kg;
   c. Ethylbenzene greater than or equal to 400 mg/kg;
   d. Total Xylenes greater than or equal to 270 but less than 420 mg/kg;
   e. Anthracene greater than or equal to 22,000 but less than 240,000 mg/kg;
   f. Benz(A)anthracene greater than or equal to 6.9 but less than 21 mg/kg;
   g. Benzo(A)pyrene greater than or equal to 0.69 but less than 2.1 mg/kg;
   h. Benzo(B)fluoranthene greater than or equal to 6.9 but less than 21 mg/kg;
   i. Benzo(K)fluoranthene greater than or equal to 69 but less than 210 mg/kg;
   j. Chrysene greater than or equal to 680 but less than 2,000 mg/kg;
   k. Dibenz(A,H)anthracene greater than or equal to 0.69 but less than 2.1 mg/kg;
   l. Fluoranthene greater than or equal to 2,300 but less than 22,000 mg/kg;
   m. Fluorene greater than or equal to 2,700 but less than 26,000 mg/kg;
   n. Indenopyrene greater than or equal to 6.9 but less than 21 mg/kg;
   o. Naphthalene greater than or equal to 56 but less than 190 mg/kg;
   p. Pyrene greater than or equal to 2,300 but less than 29,000 mg/kg.
14. "Storage" means the holding of PCS for a period of more than 90 days but less than one year.
15. "Storage facility" means a special waste receiving facility which engages in storage and which has been approved by the Director pursuant to A.R.S. § 49-857 or has qualified for Interim Use Facility status pursuant to A.R.S. § 49-858.
16. "Temporary treatment facility" means an on-site treatment facility, or an off-site treatment facility owned or operated by the generator of PCS, where the PCS is treated to reduce the contaminants that make it PCS and which complies with the requirements of R18-13-1610.
17. "Treatability study" means a study in which a special waste is subjected to a treatment process to determine any one or more of the following:
   a. Whether the waste is amenable to the treatment process,
   b. What pretreatment is required,
   c. The optimal process conditions needed to achieve the desired treatment,
   d. The efficiency of a treatment process,
   e. The characteristics and volumes of residual contaminants from a particular treatment process,
   f. Toxicological and health effects.
18. "Treatment facility" means a special waste receiving facility at which PCS is treated to reduce the PCS contaminants and, if in the state of Arizona, has been Department-approved pursuant to A.R.S. § 49-857 or has qualified for Interim Use Facility status pursuant to A.R.S. § 49-858.

Historical Note

Recodified from R18-8-1601 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final

expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1602. Applicability

A. The Director declares that PCS, as defined in R18-13-1601(8), constitutes a special waste as defined in A.R.S. § 49-851(A)(9). Except as otherwise provided in this Section and R18-13-1603, PCS shall be treated, stored, and disposed of in accordance with this Article. PCS shall not be diluted with any material or substance for purposes of avoiding applicability of these rules.

B. PCS which is used in a treatability study shall comply with all of the following:

1. The owner or operator of the facility where a treatability study is to be conducted shall notify the Department of its intent to conduct a treatability study at least 30 days prior to the commencement of the treatability study.
2. The total quantity of PCS used in the treatability study shall not exceed 5000 kilograms, unless evidence is provided which justifies the need for a larger quantity and permission to use a larger amount is granted by the Director.
3. The owner or operator of the facility shall maintain records detailing the treatability study and the results obtained in accordance with R18-13-1614.
4. The treatability study shall be completed and the PCS shall be removed from the site within one year from commencement of the study.
5. Upon completion of the treatability study, the owner or operator of a facility shall dispose of the PCS used in the treatability study in accordance with this Article.
6. Sampling of the PCS shall be conducted in accordance with R18-13-1604(B) and (C) before and after the treatability study is performed.
7. The performance of the treatability study shall not result in an environmental nuisance pursuant to A.R.S. §§ 49-141 through 49-144.

C. PCS which is excavated pursuant to the requirements of A.R.S. Title 49, Chapter 6, Underground Storage Tank Regulation, and which is not removed from the site, shall comply with the requirements of R18-13-1610 and R18-13-1612.

D. PCS incorporated into asphalt for use in paving is not subject to other provisions of this Article if the owner or operator of the facility where the asphalt is produced does all of the following:

1. Notifies the Department in writing at least 30 days prior to commencing such incorporation,
2. Maintains records in accordance with R18-13-1614,
3. Stores the PCS prior to incorporation in accordance with R18-13-1611.

E. Requirements in this Article for Department-approved facilities do not apply to facilities that are out of state or in Indian Country.

Historical Note

Recodified from R18-8-1602 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1603. Exemptions

A. Solid waste PCS are exempt from the provisions of this Article, except for the requirements in R18-13-1604, and are subject to A.R.S. § 49-761 et seq.

B. Non-regulated soils are exempt from the provisions of this Article, except for the requirements in R18-13-1604, and are exempt from the requirements of A.R.S. § 49-761 et seq.

C. Asphaltic cement which is not hazardous waste is exempt from the requirements of this Article.

D. Soils which are contaminated with petroleum, which have been generated by households, and which are not hazardous waste, shall be exempt from the requirements of this Article.

Historical Note

Recodified from R18-8-1603 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1604. Waste Determination

A. A generator of excavated soil contaminated with petroleum shall determine whether the soil is PCS, solid waste PCS, or non-regulated soil. The basis for the determination shall be maintained for at least three years and shall be made available to the Department upon request. The generator shall make such determination using either of the following methods:

1. Testing the soil pursuant to subsection (B) of this Section. Laboratory analysis of these samples shall be performed by a laboratory licensed by the Arizona Department of Health Services. Approved testing methods, which identify concentrations for total recoverable extraction of contaminants, shall be used.
2. Application of knowledge of the characteristics of the contaminated soil in light of the known or potential source of the contamination. The Department may require sampling to confirm the accuracy of applied knowledge.

B. Sampling of soils contaminated with petroleum shall be performed in accordance with a site-specific written sampling plan which is consistent with the requirements set forth in either of the following:

1. "Test Methods for Evaluating Solid Waste", EPA SW-846, 3rd Edition Volume II: Field Manual, Physical/Chemical Method, Chapter Nine (SW-846 Third Edition), 1986, Environmental Protection Agency, Washington, D.C. and no future editions or amendments, incorporated herein by reference and on file with the Department and the Office of the Secretary of State.
2. "Quality Assurance Project Plan", Chapter 9, May 1991 Edition, Arizona Department of Environmental Quality, Phoenix, Arizona and no future editions or amendments incorporated herein by reference and on file with the Department and the Office of the Secretary of State.

C. If soil excavated during the initial investigation of a site to determine the extent of contamination is PCS, the PCS may be returned into the excavation site from which the soil was removed if all of the following conditions are met:

1. There is no freestanding liquid within the excavation, unless the State Fire Marshal or other jurisdictional fire authority directs otherwise, and the requirements of subsections (C)(2) and (3) are met.
2. The owner or operator provides notification to the Department that the PCS has been returned to the excavation within 14 days after the return of the PCS to the excavation.
3. The owner or operator completes a site characterization within 120 days and implements remediation within 150 days after the date the site characterization began.

Historical Note

Recodified from R18-8-1604 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final

expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1605. Transportation

A. PCS transported to a special waste receiving facility in Arizona shall be transported by a special waste shipper which has met the requirements of R18-13-1303.

B. A special waste shipper shall transport the PCS in closed containers pursuant to R18-13-1611(E) or shall ensure that any vehicle used to transport the PCS is loaded and covered in such a manner that the contents will not blow, fall, leak, or spill from the vehicle.

C. A special waste shipper transporting PCS to a special waste receiving facility in Arizona, except a facility located on Indian country, shall deliver PCS to a special waste receiving facility approved by the Department.

Historical Note

Recodified from R18-8-1605 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

R18-13-1606. Fees

In accordance with A.R.S. §§ 49-855(C)(2) and 49-863, the treatment, storage, or disposal facility in this state that first receives a shipment of PCS shall remit to the Department a fee of $4.50 per ton but not more than $45,000 per generator site per year for PCS that is transported to the facility.

Historical Note

Recodified from R18-8-1606 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-1607. Facility Approval; Application

A. PCS shall be treated, stored, or disposed only at a PCS disposal facility, storage facility, treatment facility, or temporary treatment facility. A facility located in Arizona shall not be constructed or operated prior to obtaining written approval from the Department, except as provided for in A.R.S. § 49-858.

B. The owner or operator of a PCS treatment, storage, or disposal facility shall submit an application to the Department which contains all of the information required in accordance with A.R.S. § 49-762.

C. In addition to the requirements specified in A.R.S. § 49-762, the application shall contain all of the following:

1. A vicinity map, in a scale not over 1:24,000, which shows where the facility is located with respect to the surroundings, including an indication of the use of the adjacent properties.
2. An engineering report which includes all of the following:
   a. Detailed plans and specifications for the entire facility including manufacturer's performance data and design features of treatment, pollution control, and monitoring equipment.
   b. A site description which includes general information on the geology, hydrogeology, soils, and land use. If a facility is located within the pollution management area of a facility for which an aquifer protection permit has been issued under A.R.S. § 49-241 et seq., then the applicant may resubmit or incorporate by reference the general information.
   c. A background soil sampling plan and results which characterize the site, including the rationale used to determine the locations, depths, and number of samples.
3. A site map, in a scale not to exceed 1:2,400, which clearly identifies where the PCS shall be deposited, containment berms, fencing and security measures, access roads, any improvements, wells, and location of surface water courses.
4. An operational plan which includes all of the following:
   a. General description of the daily operations of the facility and the processes, techniques, or methods to be employed;
   b. The source, amount, concentration of contaminants, and any other relevant information concerning the PCS to be handled;
   c. The schedule for sampling the PCS during treatment to evaluate treatment methods;
   d. Description of plans for final use and disposal of PCS and remediated soil, liners, piping, carbon canisters, and any other contaminated equipment;
   e. Procedures to ensure that only waste which has been characterized is received and that hazardous waste is not received;
   f. Procedures for random inspection of incoming loads to verify that only waste which has been characterized is accepted;
   g. Procedures for collecting and managing run-off which comes in contact with PCS;
   h. Procedures for recordkeeping of all inspection results, training of personnel, and sampling results;
   i. Procedures to control public access, and prevent unauthorized entry and illegal dumping.
5. A contingency plan for emergency preparedness which describes alternatives for storage, treatment, or disposal.
6. A closure plan which includes:
   a. A description of the steps necessary to close the facility, the specific proposed closure activities, and an implementation schedule;
   b. Information on site conditions and characterization of the waste received during the life of the facility;
   c. A description of the sampling plan utilized to sample background soil beneath the site following closure;
   d. A description of plans for use of the land site after closure;
   e. A description of post-closure care.
7. An affidavit that the proposed facility is in compliance with local zoning requirements in effect at the time the application is submitted.

D. Following completion of construction of a facility and prior to placement of PCS on the site, the owner or operator shall submit to the Department a construction certification report, including as-built plans which indicate any changes to the design or operational plans for the facility.

E. Plans required in accordance with this Section shall be sealed by a professional engineer registered in the state of Arizona, if required by statute.

F. A facility shall be in compliance with all other applicable federal, state, and local approvals or permits which are required for the design, construction, and operation of the facility.

Historical Note

Recodified from R18-8-1607 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1608. General Design and Performance Standards

A. A facility which receives PCS for treatment, storage, or disposal shall be designed and operated to ensure compliance

with the following performance standards relating to aquifer protection:
1. Pollutants discharged shall in no event cause or contribute to a violation of Aquifer Water Quality Standards, at the applicable point of compliance, or, if the facility is a municipal solid waste landfill, it shall comply with the requirements of A.R.S. § 49-761.01(C).
2. Any pollutant discharged shall not further degrade, at the applicable point of compliance, the quality of any aquifer that already violates an Aquifer Water Quality Standard for that pollutant.

B. A facility which receives PCS for treatment, storage, or disposal shall meet the general design criteria of either subsection (B)(1) or (2) as follows:
1. The PCS shall be held within a containment system designed and constructed to preclude the migration of contaminants into subsurface soil, groundwater, or surface water. The containment system shall meet the following criteria:
   a. Maintain a maximum permeability coefficient of no more than 1×10^{-7} cm/sec;
   b. Be designed to provide structural integrity throughout the life of the facility;
   c. Be designed in accordance with the applicable design criteria set forth in subsection (C) of this Section and R18-13-1609 through R18-13-1613; or
2. An alternative design shall contain, at a minimum, all of the following and shall demonstrate that the design will limit discharges listed in A.R.S. § 49-243(D) to the maximum extent practicable:
   a. The hydrogeologic setting of the facility and the capacity of the liner and soils to preclude discharge to groundwater or surface water;
   b. The operating methods, processes, or other alternatives to be used at the facility;
   c. Additional factors which would influence the quality and mobility of the leachate produced and the potential for that leachate to migrate to groundwater or surface water.

C. A PCS treatment, storage, or disposal facility shall meet the following general design criteria:
1. The facility shall be designed to prevent run-on and run-off. The design shall provide run-on control for the peak discharge from a 24-hour, 25-year storm event. Run-off shall be collected and controlled for at least the water volume resulting from a 24-hour, 25-year storm event.
2. The facility shall not restrict the flow of the 100-year floodplain, reduce temporary water storage capacity of the floodplain, or be maintained in a manner which results in a washout or inundation of the PCS.
3. The owner or operator shall control public access and shall prevent unauthorized vehicular traffic and illegal dumping.
4. The owner or operator shall manage any standing water that has come into contact with the PCS in accordance with rules promulgated pursuant to A.R.S. § 49-761 et seq.

D. A facility which manages PCS in accordance with the requirements of this Article shall be exempt from the aquifer protection permit requirements in accordance with A.R.S. § 49-250(B)(21).

E. A facility which has been issued an aquifer protection permit from the Department shall be exempt from the requirements of subsections (A) and (B) of this Section but shall comply with the requirements of subsection (C).

Historical note

Recodified from R18-8-1608 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1609. Treatment Facility

A. The owner or operator of a PCS treatment facility shall obtain approval from the Department prior to commencement of construction or operation and shall comply with all of the following:
1. Not dilute PCS as a method of treatment, except as allowed in the approved plan for the facility;
2. Treat the PCS or, if the chosen treatment process fails to remediate the soil to below the regulatory thresholds, dispose of the PCS pursuant to R18-13-1613.
3. Sample the treated soil and provide the results of the sampling to the Department within 45 days of completion of the treatment.

B. A PCS treatment facility designed in accordance with R18-13-1608(B)(1) shall comply with the following specific design criteria:
1. At a minimum, a containment system shall include a clay, synthetic, concrete, or asphalt liner component which is placed upon a foundation or prepared subgrade which supports the liner, and resists pressure gradients above and below the liner, to prevent failure due to settlement, compression, or uplift.
2. During construction or installation of a containment system, liners and cover systems shall be inspected for uniformity, damage, and imperfections. Immediately after construction or installation is completed, and prior to placement of PCS within the containment system, the systems shall be checked for both of the following:
   a. Synthetic liners and covers shall be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters.
   b. Concrete, asphalt, and soil-based liners and covers shall be inspected for imperfections including lenses, cracks, channels, root holes, or other structural non-uniformities that may cause an increase in the permeability of the liner or cover.
3. The liner component shall consist of one of the following:
   a. A synthetic liner which is compatible with the waste and which has a minimum 6” buffer layer of sand or soil between the liner and the PCS.
   b. A compacted soil or admixed liner provided with a minimum 6” buffer layer of sand or soil between the liner and the PCS.
   c. An asphalt or reinforced concrete liner which is not in the drainage area of a dry well and is free of unsealed cracks and seams.
4. Aeration equipment shall be limited to the area above the buffer layers indicated in subsections (B)(2)(a) and (b).
5. The owner or operator of the facility shall utilize protective measures to ensure containment system integrity during placement, treatment, or removal of the PCS.
6. PCS stored at a treatment facility prior to treatment shall be stored in accordance with the requirements of R18-13-1611.

Historical Note

Recodified from R18-8-1609 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

R18-13-1610. Temporary Treatment Facility

A. The owner or operator of a temporary treatment facility shall treat and remove all PCS from the temporary treatment facility

within one year from the date of commencement of receipt of PCS for treatment. PCS shall not be diluted to meet any treatment requirement, except in accordance with the approved plan.

B. A temporary treatment facility shall obtain approval from the Department prior to commencing construction or operation. In lieu of the requirements of R18-13-1607(C), an application for approval shall contain all of the following:
1. An affidavit signed by the owner or operator of the temporary treatment facility which states that the facility will comply with the requirements of this Article;
2. An affidavit that the proposed facility is in compliance with local zoning requirements in effect at the time the application is submitted;
3. Application information required pursuant to A.R.S. § 49-762.03(C)) for plan approval for temporary treatment facilities;
4. A vicinity map, in a scale not over 1:24,000, which shows where the facility is located with respect to the surroundings, including an indication of the use of the adjacent properties;
5. A site description which includes general information on the geology, hydrogeology, soils, and land use;
6. A background soil sampling plan and results which characterize the site, including the rationale used to determine the locations, depths and number of samples;
7. A site map, in a scale not to exceed 1:2,400, which clearly identifies where the PCS shall be deposited, containment berms, fencing and security measures, access roads, any improvements, wells, and location of surface water courses;
8. An operational plan which includes all of the following:
   a. General description of the daily operations of the facility and the processes, techniques, or methods to be employed;
   b. The source, amount, concentration of contaminants, and any other relevant information concerning the PCS to be handled;
   c. The schedule for sampling the PCS during treatment to evaluate treatment methods;
   d. Description of plans for final use and disposal of PCS and remediated soil, liners, piping, carbon canisters, and any other contaminated equipment;
9. A closure and post-closure care plan which includes both of the following:
   a. A description of the steps necessary to close the facility, the specific proposed closure activities, and an implementation schedule;
   b. A description of the sampling plan utilized to sample background soil beneath the site following closure.

C. A temporary treatment facility shall not be operated for more than one year unless a one-time extension is granted by the Department. The Department may grant an extension of up to one additional year if all of the following are met:
1. The inability to perform is caused by events beyond the control of the owner or operator, including acts of God, which include flood, tornado, earthquake, and causes beyond the owner's or operator's control including fire, explosion, unforeseen strikes or work stoppages, riot, sabotage, public enemy, war, requirements established by courts of competent jurisdiction, and other governing law. Financial inability to perform shall not be justification for an extension.
2. The owner and operator submits to the Department verifiable documentation which includes all of the following:
   a. A description of the circumstances causing any delay;
   b. Evidence of the existence of the circumstance;
   c. A description of past, present, and future measures taken or to be taken by the owner or operator to prevent or minimize any delay;
   d. A timetable by which the owner and operator will resume and complete required performance.
3. The request is received at least 60 days prior to the expiration of the year in which the facility first received PCS. Where the Department grants an extension, that extension shall be granted prior to the expiration of the deadline and communicated to the owner or operator in writing.

D. A temporary treatment facility shall meet the design criteria as specified in R18-13-1608 and R18-13-1609(B).

E. PCS stored at a temporary treatment facility prior to treatment shall be stored in accordance with the requirements of R18-13-1611.

F. In accordance with A.R.S. §§ 49-762.03(C), a temporary treatment facility shall be exempt from the notice and public hearing requirements set forth in A.R.S. § 49-762.04(A).

Historical Note

Recodified from R18-8-1610 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1611. Storage Facility

A. A shipment of PCS shall not be stored for a period exceeding one year from the date the PCS is received.

B. Each shipment of contaminated soil shall be identified by source and stored in a manner which does not allow commingling of different shipments until all sampling results have been obtained. PCS shall be stored within an approved containment system and shall not be commingled with treated soils.

C. A PCS storage facility shall obtain approval from the Department prior to commencement of construction or operation. A PCS storage facility designed in accordance with R18-13-1608(B)(1) shall comply with either of the following:
1. The containment system shall meet the requirements of R18-13-1609(B).
2. The PCS shall be stored in tanks or containers which meet the requirements of subsection (E) of this Section.

D. A PCS storage area or each tank or container used for storage shall be marked as follows:

CAUTION: CONTAINS PETROLEUM-CONTAMINATED SOIL
GENERATOR NAME:
GENERATOR ID#:
ACCUMULATION START DATE:

The owner or operator of the storage facility shall fill in the accumulation start date at the time the PCS is placed into storage. The letters shall be legible, not obstructed from view, on a high contrast background, and sufficiently durable to equal or exceed the duration of storage. Lettering size shall be 2.5 cm (1 inch) and in Sans Serif, Gothic, or Block style.

E. A tank or container used to store PCS shall meet all of the following requirements:
1. Prevent leakage of PCS and any free liquids from the tank or container;
2. Be made of, or lined with, materials which will not react with the PCS;
3. Be kept closed during storage except to add or remove PCS;

4. Not be opened, handled, or stored in a manner which may rupture the tank or container or cause it to leak;
5. Shall be inspected monthly by the owner or operator of the storage facility for leaks and for deterioration. A written record of the inspection shall be prepared at the time of the inspection and shall document corrective action, if any, taken as a result of the inspection.

F. A PCS storage facility at which PCS is stored in piles shall comply with both of the following:
1. All storage piles shall be covered or otherwise managed to control wind dispersal of the PCS.
2. Storage piles of PCS shall be inspected weekly and a written record of the inspection shall be prepared at the time of the inspection which documents any corrective action taken as a result of the inspection. The record shall document detection of any of the following:
   a. Deterioration, malfunctions, or improper operation of run-on and run-off control systems;
   b. Malfunctioning of wind dispersal control systems;
   c. The presence of leachate in and the malfunctioning of any leachate collection and removal systems.

Historical Note

Recodified from R18-8-1611 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

R18-13-1612. Accumulation Sites

A. PCS from one or more points of generation under the control of a single generator may be accumulated in an accumulation site under the control of that generator for up to 90 days prior to shipment of the PCS to a storage, disposal, or treatment facility.

B. An accumulation site shall comply with the storage facility requirements set forth in R18-13-1611, except subsection (A) of that Section. An accumulation site shall not be required to comply with the requirements in R18-13-1607.

C. While PCS is at an accumulation site, the owner or operator shall control public access and prevent unauthorized vehicular traffic and illegal dumping. PCS shall be managed to prevent the PCS from being exposed to storm water run-on or run-off.

Historical Note

Recodified from R18-8-1612 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

R18-13-1613. Disposal

A. PCS shall be disposed at a special waste receiving facility which has been approved for the disposal of PCS, or at a hazardous waste management facility as defined in R18-13-260(E)(13).

B. A PCS disposal facility designed in accordance with R18-13-1608(B)(1) shall comply with the following specific design criteria:
1. The disposal facility shall be designed with a composite liner, as defined in subsection (B)(2), and a leachate collection system that is designed and constructed to maintain less than a 12-inch depth of leachate over the liner.
2. For purposes of this Section, "composite liner" means a system consisting of two components: the upper component shall consist of a minimum 30-mil flexible membrane liner (FML) and the lower component shall consist of at least a two-foot layer of compacted soil with a permeability coefficient of no more than 1×10^{-7} cm/sec. FML components consisting of high density polyethylene (HDPE) shall be at least 60 mil thick. The FML component shall be installed in direct and uniform contact with the compacted soil component.

Historical Note

Recodified from R18-8-1613 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1614. Records

Records required to be kept pursuant to this Article shall be maintained by the owner or operator and made available for inspection by the Director for a period of three years or longer during the course of an enforcement action or litigation.

Historical Note

Recodified from R18-8-1614 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

ARTICLE 21. SOLID WASTE LANDFILL REGISTRATION FEES

Article 21, consisting of Sections R18-13-2101 through R18-13-2103, made by final rulemaking at 9 A.A.R. 1770, effective July 14, 2003 (Supp. 03-2).

R18-13-2101. Definitions

In addition to the definitions in A.R.S. §§ 49-701 and 49-701.01, for the purpose of this Article, the terms used in this Article have the following meanings:
1. "Defined time period" means the 12-month period that begins on July 1 of a calendar year and ends on June 30 of the following calendar year and consists of the actual number of calendar days in that 12-month period.
2. "Disposal fee invoice" means the quarterly landfill disposal fee invoice the Department mails to a landfill operator, on which the landfill operator indicates the amount of waste received and the amount of the disposal fees owed to the Department as required under A.R.S. § 49-836.
3. "Full quarter" means any of the standard fiscal quarters of the defined time period for which a municipal solid waste landfill accepted waste on or before the first day of the quarter and on or after the last day of that quarter.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1770, effective July 14, 2003 (Supp. 03-2). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-2102. Annual Registration Fee for an Existing Solid Waste Landfill

A. An existing solid waste landfill, except those described in subsection (C), shall pay an annual registration fee within 30 days of receipt of an invoice from the Department according to the following:
1. For municipal solid waste landfills that received less than 12,000 tons during the defined time period, $1,250.
2. For municipal solid waste landfills that received at least 12,000 tons but less than 60,000 tons during the defined time period, $2,500.
3. For municipal solid waste landfills that received at least 60,000 tons but less than 225,000 tons during the defined time period, $7,500.
4. For municipal solid waste landfills that received 225,000 tons or more during the defined time period, $12,500.

5. Non-municipal solid waste landfills shall pay a flat fee of $3,750.
6. Solid waste landfills that are closed to the public and that accept nonhazardous waste only shall pay a flat fee of $3,750.

B. The Department shall determine the amount of waste received by a municipal solid waste landfill by one of the following methods:
1. For a municipal solid waste landfill that accepted waste over the entire defined time period:
   a. As the reported tons of solid waste received on the disposal fee invoice; or
   b. As the reported units of compacted or uncompacted solid waste received on the disposal fee invoice and reported under A.R.S. § 49-836(A)(1); or
2. For a municipal solid waste landfill that accepted waste for only a portion of the defined time period, but no less than a full quarter, the Department shall project the total amount of waste that would have been received by the landfill over the entire defined time period, using one of the following methods:
   a. For a municipal solid waste landfill that reported receiving waste for at least a full three quarters but less than the entire defined period, the amount of waste for the remaining quarter is the total amount of the waste reported for the full three quarters divided by three;
   b. For a municipal solid waste landfill that reported receiving waste for at least a full two quarters but less than three quarters, the amount of waste for the remaining two quarters is the same as the total amount of waste reported for the two full quarters; or
   c. For a municipal solid waste landfill that reported receiving waste for at least one full quarter but less than two quarters, the amount of waste for the remaining three quarters is the total of the amount of the waste reported for the full quarter multiplied by three.

C. For a municipal solid waste landfill that accepted waste for less than a full quarter, the annual landfill registration fee is $1,250.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1770, effective July 14, 2003 (Supp. 03-2). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-2103. Annual Landfill Registration: Due Date and Fees

A. An operator of a new solid waste landfill shall register the solid waste landfill and pay the landfill registration fee as follows:
1. The operator shall pay the initial landfill registration fee within 30 days of the date that the Department approves the facility plan. The initial landfill registration fee is $1,250.
2. Registration is valid for one year, except if the landfill is initially registered during October, November, or December of a calendar year, the next landfill registration due date is December 31 of the following calendar year and each calendar year thereafter unless released from the annual landfill registration requirement as specified in subsection (C).
3. The annual registration fee remains $1,250 until the first annual registration period after the first full quarter of the defined time period.

B. After the first full quarter, the Department shall calculate the annual registration fee according to R18-13-2102, and specify the fee on the Department's annual landfill registration invoice for the solid waste landfill. The Department shall calculate and the solid waste landfill shall pay the annual landfill registration fee until the first registration period after the solid waste landfill stops accepting waste during a fiscal quarter of the defined time period.

C. From the time a solid waste landfill stops accepting waste as specified in subsection (B), until the owner or operator of the solid waste landfill is released from its obligation to provide financial assurance for closure as required by A.R.S. §§ 49-761 or 49-770, the annual registration fee is $1,250.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1770, effective July 14, 2003 (Supp. 03-2). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-2703. Expired

Historical Note

New Section made by exempt rulemaking at 16 A.A.R. 848, effective July 1, 2010 (Supp. 10-2). Section and fee table expired under A.R.S. § 41-1056(J) at 22 A.A.R. 2984, effective September 15, 2016 (Supp. 16-3).

44-1302. Sale of new tires; fees; acceptance of waste tires; notice; definition

(Rpld. 1/1/26)

A. Until the effective date of the fees authorized pursuant to subsection N of this section, a retail seller of new motor vehicle tires shall collect a fee of two percent of the purchase price for each tire sold but not more than $2 for each tire sold, which shall be listed separately on any invoice.

B. Until the effective date of the fees authorized pursuant to subsection N of this section, if in a sale of a motor vehicle by a manufacturer to a wholesaler or retailer the cost of the tires as a separate component of the motor vehicle is not specified by the manufacturer, the fee per tire to be collected shall not exceed one-half of the maximum fee allowed under this section for a motor vehicle with a gross vehicle weight under ten thousand pounds.

C. Until the effective date of the fees authorized pursuant to subsection N of this section, a wholesale seller of new motor vehicle tires who sells tires to this state or a political subdivision of this state or who sells tires to a private entity that does not resell the tires shall collect a fee of two percent of the purchase price for each tire sold but not more than $2 for each tire sold, which shall be listed separately on any invoice.

D. The fee shall be paid to the department of revenue for deposit on a quarterly basis in the waste tire fund established by section 44-1305. Unless the context otherwise requires, title 42, chapter 5, article 1 governs the administration of the fees imposed by this section, except that:

1. A separate license is not required for the fee imposed by this section. The fee shall be reported and paid on forms prescribed by the department.

2. A separate bond is not required of employees of the department in administering the fee.

3. The fee imposed by this section may be included without segregation in any notice and lien filed for unpaid transaction privilege taxes.

4. The fee imposed by this section shall not be included in computing the tax base, gross proceeds of sales or gross income from the sale of new motor vehicle tires for the purposes of title 42, chapter 5 and is not subject to any transaction privilege, sales, use or other similar tax levied by a city, town, or special taxing district.

E. A retail seller of new motor vehicle tires or a wholesale seller of new motor vehicle tires shall accept waste tires from customers at the point of transfer. A seller shall accept up to the number of new tires sold at that point of transfer annually and may accept additional tires from customers. The seller shall accept tires from a customer if the customer presents a receipt within thirty days after the date of purchase. This subsection does not apply to sellers of new motor vehicles.

F. A designated waste tire collection site established pursuant to section 44-1304, subsection G, shall require a manifest for the disposal of waste tires at the site and shall establish registration procedures for the collection site.

G. A seller of motor vehicle tires or the seller's designee complying with this section shall provide a manifest to the designated collection site established pursuant to section 44-1304, subsection G, to dispose of waste tires and shall be preregistered at the designated collection site.

H. A county or private enterprise under contract with a county may refuse to accept waste tires and may impose a tire tipping fee, not exceeding an amount necessary to recover the costs of administering a waste tire program

established pursuant to section 44-1305, if any of the following conditions exists:

1. The private enterprise is not receiving waste tire fund monies from the county pursuant to section 44-1305.

2. Waste tires are manifested as originating outside of the county.

3. A seller of motor vehicle tires complying with subsection E of this section, is not preregistered at a collection site where registration is required.

4. The county's pro rata share of the total waste tire fund is two percent or less, and after a year of receiving monies from the waste tire fund, the county determines that the cost of waste tire disposal exceeds the amount received.

I. A designated waste tire collection site established pursuant to section 44-1304, subsection G, shall not refuse to accept waste tires from a resident of the county who is not a seller of motor vehicle tires and shall not impose a tire tipping fee for up to five waste tires per year from a resident of the county who is not a seller of motor vehicle tires. Such waste tire collection sites may impose a tire tipping fee on waste tires in excess of five tires per year from a resident of the county who is not a seller of motor vehicle tires.

J. A seller of motor vehicle tires who is subject to subsection E of this section shall post a written notice that is clearly visible in the public sales area of the establishment and that contains the following language:

It is unlawful to throw away a motor vehicle tire.

Recycle all used tires.

This retailer is required to accept scrap tires if any new or recapped tires are purchased here. When any new tire is purchased, an additional fee will be charged.

K. An advertisement or other printed promotional material related to the retail sale of tires shall contain the following notice in bold print:

State or local taxes or surcharges for environmental protection will be an extra charge.

L. A credit of $.10 per tire is allowed against the fee imposed by this article for expenses incurred by the payer of the fee for accounting for and reporting the fees.

M. This section does not apply to a person whose retail sales of new motor vehicle tires are not in the ordinary course of business.

N. The director of environmental quality shall establish by rule the fees, including any associated maximum fees, required by subsection A, B or C of this section.

O. For the purposes of this section, "retail seller of new motor vehicle tires" and "wholesale seller of new motor vehicle tires" includes those persons who sell or lease new motor vehicles to others in the ordinary course of business.

44-1303. Waste tire collection sites; registration

A. An owner or operator of a waste tire collection site shall register with the department of environmental quality and provide the department with information concerning the site's location and size and the approximate number of waste tires that are stored at the site and shall initiate steps to comply with this article.

B. Any waste tire collection site that is established after July 20, 2011 shall register with the department before beginning operation and shall pay a registration fee. After July 20, 2011, the director shall establish by rule a registration fee, including a maximum fee. Registration fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

44-1304.01. Storage, disposal, discard or abandonment of used motor vehicle tires; registration fees; violation; classification; exception

A. It is unlawful to store one hundred or more used motor vehicle tires outdoors as follows:

1. In any fashion that exceeds twenty feet in height.

2. In a pile that is more than one hundred fifty feet from a twenty foot wide access route that allows fire control apparatus to approach the pile. Access routes between and around tire piles shall be at least twenty feet wide and maintained free of accumulations of rubbish, equipment or other materials. Access routes shall be spaced so that a maximum grid system unit of fifty feet by one hundred fifty feet is maintained.

3. Within three feet of any property line.

4. In any fashion that exceeds six feet in height if the used tires are stored between three and ten feet of any property line.

5. Within fifty feet of any area in which smoking of tobacco or any other substance by persons is allowed. "No smoking" signs shall be posted in suitable and conspicuous locations.

6. At any area in which the used motor vehicle tires are stored and in which electrical wiring, fixtures or appliances do not comply with the national electrical code.

7. Without placing class "2A-10BC" type fire extinguishers at well marked points throughout the storage area so that the travel distance from any point in the storage area to a fire extinguisher is not more than seventy-five feet.

8. Without prior registration of the site with the department of environmental quality. The registration shall be on a form approved by the department and shall include the site's location, the name of the owner of the property, the name of the owner or operator of the business storing the waste tires, if applicable, and the type and approximate quantity of waste tires stored at the site. For any waste tire collection site that is operating on September 26, 2008, the owner of the property shall register pursuant to this paragraph on or before November 25, 2008. For any person who stores one hundred or more used motor vehicle tires outdoors after July 20, 2011, the operator shall pay a registration fee. After July 20, 2011, the department shall establish by rule a registration fee, including a maximum fee. Registration fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

B. A person who knowingly discards or abandons five hundred or more motor vehicle tires, discards or abandons any motor vehicle tires for commercial purposes except as provided in section 44-1304, or otherwise knowingly performs any act prohibited by subsection A of this section involving five hundred or more motor vehicle tires is guilty of a class 5 felony.

C. The attorney general may enforce this section.

D. For the purposes of this section, used motor vehicle tires do not include tires that have been recapped and have not yet been put back into service.

44-1322. Disposal of lead acid batteries

A. The disposal of lead acid batteries in landfills and the incineration of those batteries is prohibited.

B. An owner or operator of a solid waste disposal facility shall not knowingly accept a lead acid battery for disposal.

C. A lead acid battery shall be discarded or disposed of only as follows:

1. A lead acid battery retailer or wholesaler may deliver a lead acid battery to any one of the following:

(a) A permitted secondary lead smelter.

(b) A battery manufacturer.

(c) A collection or recycling facility authorized by the federal environmental protection agency or the department of environmental quality.

(d) In the case of battery retailers only, an agent of a battery wholesaler.

2. A person other than a lead acid battery retailer or wholesaler may deliver a lead acid battery to any one of the following:

(a) A lead acid battery retailer or wholesaler.

(b) A permitted secondary lead smelter.

(c) A collection or recycling facility authorized by the federal environmental protection agency or the department of environmental quality.

D. The director of the department of environmental quality shall register collection and recycling facilities that accept lead acid batteries. The director shall require collection and recycling facilities that handle lead acid batteries to pay an initial registration fee and annual fee established by rule. The director shall deposit, pursuant to sections 35-146 and 35-147, registration fees in the solid waste fee fund established by section 49-881.

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-706. Waste programs general permits; rules; fee

A. The department may establish a general permit for any permit or license issued pursuant to this chapter. The general permit consists of the following:

1. The director may issue by rule a general permit for a defined class of facilities, activities or practices if all of the following apply:

(a) The cost of issuing individual permits or licenses cannot be justified by any environmental or public health benefit that may be gained from issuing individual permits.

(b) The facilities, activities or practices in the class are substantially similar in nature.

(c) The director is satisfied that appropriate conditions under a general permit for operating the facilities or conducting the activity or practice will meet the applicable requirements prescribed in this chapter for the facility, activity or practice.

2. In addition to other applicable enforcement actions, if a person is in substantial noncompliance with the conditions of a general permit, the director may revoke coverage under the general permit for that person and require that the person obtain an individual permit. A general permit may be revoked, modified or suspended by rule if the director determines that any of the conditions prescribed in paragraph 1 no longer apply.

3. Rules adopted pursuant to paragraph 1 may require a person seeking coverage under a general permit to notify the director of the person's intent to operate pursuant to the general permit and to pay the applicable fee established by the director by rule.

B. The director shall establish by rule fees for general permits pursuant to this section, including maximum fees. Fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

49-747. Annual registration of solid waste landfills; fee; disposition of revenue

A. All solid waste landfills shall be registered annually with the department.

B. The director shall establish a procedure for mailing registration forms each year to the owners of all solid waste landfills. The registration is valid for one year after the date of registration.

C. At the time of registration, the owner of a solid waste landfill shall pay to the department an annual fee. The department shall establish by rule an annual fee, including a maximum fee.

D. All monies collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881. The director may authorize the expenditure of monies from the solid waste fee fund to pay the reasonable and necessary costs of administering the registration program pursuant to section 49-881.

49-761. Rulemaking authority for solid waste facilities; exemption; financial assurance; recycling facilities

A. The department shall adopt rules regarding the storage, processing, treatment and disposal of solid waste as prescribed by subsections B through M of this section. In adopting rules, the department shall consider the nature of the waste streams at the facilities to be regulated. The department shall also consider other applicable federal and state laws and rules in an effort to avoid practices or requirements that duplicate, are inconsistent with or will result in dual regulation with other applicable rules and laws. Facilities that obtain and maintain coverage under a general permit established by the department pursuant to section 49-706 are exempt from rules adopted pursuant to this section. In adopting rules for solid waste facilities, the director may include requirements for corrective actions in response to a release, as defined in section 49-281, from a solid waste facility that violates or results in a violation of any provision of this chapter, rule adopted pursuant to this chapter or solid waste facility plan approved pursuant to this chapter. These rules shall be consistent with section 49-762.08, subsection B, subsection C, paragraphs 1 and 2 and subsections D and E.

B. For purposes of administering 42 United States Code section 6945, as amended November 8, 1984, 40 C.F.R. part 258 is adopted by reference except as prescribed by paragraph 2 of this subsection. This subsection, as it applies to municipal solid waste landfills, governs if there is any conflict between this subsection and any other statute relating to solid waste. Municipal solid waste landfill facility plans submitted pursuant to section 49-762 shall comply with this subsection. In administering this subsection or in adopting or administering any rules adopted pursuant to this subsection, the department shall ensure that any discretion allowed to a director of an approved state pursuant to the federal regulations is maintained. The following apply to the department's administration of 42 United States Code section 6945 and to the department's adoption of rules for municipal solid waste landfills:

1. The department may adopt rules for municipal solid waste landfills. Rules adopted pursuant to this paragraph shall not be more stringent than or conflict with 40 C.F.R. part 258 for nonprocedural standards, except that the department may adopt aquifer protection standards that are more stringent than 40 C.F.R. part 258 if those standards are consistent with and not more stringent than standards developed pursuant to chapter 2, article 3 of this title, or if the standards are adopted pursuant to article 9 of this chapter. Rules adopted pursuant to this paragraph are effective on the concurrence of the administrator with this state's municipal solid waste landfill program.

2. 40 C.F.R. part 258, table I is not adopted in its entirety. The department shall use aquifer water quality standards that have been adopted by the department pursuant to section 49-223 and shall use those portions of table I that are more restrictive than the standards adopted pursuant to section 49-223.

C. The department shall adopt rules for those solid waste land disposal facilities that are not municipal solid waste landfills and that are not regulated by the coal combustion residuals program established pursuant to article 11 of this chapter. Rules adopted pursuant to this subsection shall not be more stringent than or conflict with 40 C.F.R. part 257, subparts A and B for nonprocedural standards, except that the department may adopt aquifer protection standards that are more stringent than 40 C.F.R. part 257, subparts A and B if these standards are consistent with and not more stringent than standards developed pursuant to chapter 2, article 3 of this title, or if the standards are adopted pursuant to article 9 of this chapter. In administering this subsection, the department shall ensure that any discretion allowed to a director of an approved state pursuant to the federal regulations is maintained in the department's rules. Aquifer protection provisions adopted pursuant to this subsection do not apply to an owner or operator of a solid waste facility if the owner or operator submits an administratively complete application for an aquifer protection permit pursuant to chapter 2, article 3 of this title before the date that the owner or operator is required to submit a solid waste facility plan.

D. The department shall adopt rules to define biohazardous medical waste and to regulate biohazardous medical waste and medical sharps to include all of the following:

1. A definition for biohazardous medical waste that includes wastes that contain material that is likely to transmit etiologic agents that have been shown to cause or contribute to increased human morbidity or mortality of

epidemiologic significance. The department shall consult with the department of health services in making this determination.

2. Reasonably necessary rules regarding the storage, collection, transportation, treatment and disposal of biohazardous medical waste and medical sharps, beginning with the placement by the generator of the waste in containers for the purpose of waste collection. The department shall require payment of a fee for the licensure of a transporter of biohazardous medical waste. The department shall establish by rule a fee for the licensure of a transporter of biohazardous medical waste, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881. In the case of self-hauling of waste by the generator, all storage facilities under the generator's control and all waste handling practices including storage, treatment and transportation shall be in accordance with these rules. The department shall also adopt reasonably necessary rules regarding the tracking of biohazardous medical waste and medical sharps.

3. Rules that require facilities that receive plan approval under section 49-762, subsection A, paragraph 3 to pay an annual fee as established by rule. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881.

E. The department may adopt reasonably necessary rules regarding the storage, collection, transportation, treatment and disposal of nonbiohazardous medical waste beginning with the placement by the generator of the waste in containers for the purpose of waste collection. In the case of self-hauling of the waste by the generator, all storage facilities under the generator's control and all waste handling practices including storage, treatment and transportation shall be in accordance with these rules.

F. The department shall adopt rules for the application of sludge from a wastewater treatment facility to land for use as fertilizer or beneficial soil amendment. For the purposes of this subsection, "sludge" has the same meaning as sewage sludge as defined in 40 Code of Federal Regulations section 122.2 in effect on January 1, 1998.

G. The department shall adopt rules regarding the storage, processing, treatment or disposal of solid waste at solid waste facilities that are identified in section 49-762.01. The rules shall allow the owner or operator to certify compliance with the department's statutes and rules instead of obtaining a solid waste facility plan approval. The rules shall provide that the applicant at its option may request approval of a solid waste facility plan rather than certifying compliance.

H. The department shall issue by rule best management practices for the classes of solid waste facilities set forth in section 49-762.02. The department shall establish fees in rules for solid waste facilities. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881.

I. The department shall adopt reasonably necessary rules establishing minimum standards for storing, collecting, transporting, disposing and reclaiming solid waste, including garbage, trash, rubbish, manure and other objectionable wastes. These rules shall provide for inspecting premises, containers, processes, equipment and vehicles, and for abating as environmental nuisances any premises, containers, processes, equipment or vehicles that do not comply with the minimum standards of these rules. The rules adopted pursuant to this subsection do not apply to sites that are either regulated by section 49-762, 49-762.01 or 49-762.02 or exempted from the definition of solid waste facility in section 49-701 or from the definition of solid waste in section 49-701.01. Notwithstanding any other provision of this subsection, rules adopted pursuant to this subsection shall apply to defining environmental nuisances pursuant to section 49-141.

J. The department shall adopt rules relating to financial assurance requirements. The rules shall indicate the types of financial assurance mechanisms to be required and the content, terms and conditions of each financial mechanism, including circumstances under which the department may take action on the financial assurance mechanism for facility closure, postclosure care if necessary and corrective action for known releases. The department shall establish fees in rule. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881. The financial assurance mechanisms shall include all of the following:

1. Surety bond.

2. Certificate of deposit.

3. Trust fund with pay-in period.

4. Letter of credit.

5. Insurance policy.

6. Certificate of self-insurance.

7. Deposit with the state treasurer.

8. Evidence of ability to meet any of the following:

(a) Corporate financial test.

(b) Local government financial test.

(c) Corporate guarantee test.

(d) Local government guarantee test.

(e) Political subdivision financial test that shall require the department to consider the entity's bond rating, income stream, assets, liabilities and assessed valuation of taxable property.

9. Multiple financial assurance mechanisms.

10. Additional financial assurance mechanisms that may be acceptable to the director.

K. The department shall adopt rules that prescribe standards to be used in determining if a site is a recycling facility.

L. The director may adopt rules that prescribe standards to be used in determining if a solid waste facility includes significant solid waste transfer activities that warrant the facility's regulation as a transfer facility.

M. The department shall adopt facility design, construction, operation, closure and postclosure maintenance rules for biosolids processing facilities and waste composting facilities that must obtain plan approval pursuant to section 49-762. The department shall require facilities that receive plan approval pursuant to section 49-762 to pay an annual fee. The department shall establish by rule the annual fee. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881.

49-762.03. Solid waste facility plan approval

A. Except as provided in subsections C and E of this section, the owner or operator of a solid waste facility identified in section 49-762 shall obtain the department's approval of a solid waste facility plan as follows:

1. For a new solid waste facility and before commencing construction of the solid waste facility, the owner or operator shall obtain approval of a solid waste facility plan that satisfies rules adopted by the director.

2. For an existing solid waste facility, the owner or operator shall file with the department a solid waste facility plan within one hundred eighty days after the effective date of rules adopted pursuant to section 49-761 that contain design and operation standards for that type of solid waste facility. An existing solid waste facility may continue to operate while the department reviews the plan.

B. For a solid waste facility subject to site approval pursuant to section 49-767, a solid waste facility plan shall not be submitted to the department until the site for the solid waste facility has been approved pursuant to section 49-767. For all new solid waste landfills, a solid waste facility plan shall provide evidence of compliance with or the inapplicability of city, town or county zoning ordinances.

C. The director shall grant temporary authorization to operate a new solid waste facility if in the director's opinion the solid waste facility is needed immediately and could not be properly planned in advance.

D. An owner or operator of more than one solid waste facility that conducts similar activities with similar waste streams may prepare and implement a single plan that covers all of its facilities if it has received prior approval from the director and has complied with rules regarding single plans that are adopted by the director.

E. The director by rule may exempt from some or all of the facility plan approval requirements those solid waste facilities that are located in unincorporated areas and that are used for disposal by any single family residence located on the same property or those solid waste facilities that do not present a threat to public health and safety and the environment.

F. The department shall collect from the applicant reasonable fees established by the director by rule for the approval of the plan, including costs for the processing, review, approval or disapproval of the plan. The director shall establish by rule fees for costs incurred by the department for the processing, review, approval or disapproval of the plan up to the established maximum fees. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

G. The department may contract with private consultants for the purposes of assisting the department in reviewing solid waste facility plan approvals to determine whether a facility meets the criteria of section 49-762.04. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant. If the department contracts with a consultant under this section, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding section 49-881, fees collected by the department for expedited plan review shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881 and used for payment of the costs of the consultant services. Fees received for the purpose of expedited plan review are not subject to appropriation.

49-762.05. Self-certification procedures; rules

A. The owner or operator of a solid waste facility identified in section 49-762.01 shall comply with the self-certification requirements prescribed by this section and rules adopted by the director.

B. The owner or operator of a new solid waste facility may be required by rule to submit some or all of the following information to the department before the start of construction:

1. Design and operational plans or other documents necessary to describe the design of the facility and the practices and methods that are or will be used to comply with the design and operation rules adopted by the director for that type of facility.

2. A demonstration of financial assurance in accordance with section 49-770.

3. A demonstration of compliance with either local zoning laws or section 49-767.

4. A demonstration of the issuance of other environmental permits that are required by statute.

5. A copy of the public notice in a newspaper of general circulation in the area in which a new solid waste facility will be located. The public notice shall state the intent to construct and operate a new solid waste facility pursuant to this subsection.

C. The owner or operator of an existing solid waste facility may be required by rule to submit some or all of the information described in subsection B, paragraphs 1 through 4 of this section within one hundred eighty days after the adoption of design and operation rules for that type of facility.

D. The owner or operator shall maintain all documents required by statute or rule at the solid waste facility or any other location as determined by rule, and those documents shall be made available for inspection pursuant to section 49-763.

E. An owner or operator making a substantial change to a solid waste facility shall submit documentation to the department before the start of construction stating that the facility will remain in compliance with the design and operation rules for that type of facility. The owner or operator of a solid waste facility that makes any changes in its compliance with subsection B, paragraph 2 or 3 of this section shall submit copies of those changes to the department.

F. A person making a submittal under this section shall certify in writing that the information submitted is true, accurate and complete to the best of the person's knowledge and belief.

G. Self-certified facilities identified in section 49-762.01 are not subject to the location restrictions of section 49-772.

H. The department shall collect from the applicant registration fees. The department shall establish by rule registration fees, including maximum fees. Fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

I. An owner or operator of more than one solid waste facility identified in section 49-762.01 that conducts similar activities with similar waste streams may submit one self-certification filing for all such facilities if the owner or operator has received prior approval from the director and has complied with rules for self-certification that are adopted by the director.

49-802. Federal used oil program; incorporation by reference; rulemaking

A. The department shall administer 42 United States Code section 6935, as amended on January 1, 1997, as the used oil program for this state. For that purpose, 40 Code of Federal Regulations part 279, as amended on January 1, 1997, is adopted by reference. For purposes of this program, the United States, the environmental protection agency and the administrator shall be applied to mean this state, the department and the director, respectively.

B. The department may adopt rules for the administration of the federal program. Rules adopted pursuant to this subsection shall not be more stringent than or conflict with 40 Code of Federal Regulations part 279. The department shall require an annual registration fee established by rule for handlers of used oil that are required to obtain a United States environmental protection agency identification number pursuant to 40 Code of Federal Regulations part 279. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881.

C. The following requirements apply in addition to 40 Code of Federal Regulations part 279:

1. A used oil collection center, as defined in 40 Code of Federal Regulations part 279, shall register with the department by obtaining an identification number from the department. A request for an identification number shall include:

(a) The company name.

(b) The name of the owner of the company.

(c) The mailing address and telephone number of the company.

(d) The location of the collection center.

(e) A description of the type of used oil activity at the company.

2. A person who sends used oil fuel to a person who burns the used oil fuel for energy recovery shall certify to the burner that the used oil fuel has been analyzed or otherwise tested for compliance with the used oil specifications in 40 Code of Federal Regulations part 279.

3. Each used oil fuel transporter, used oil fuel marketer and used oil processor and re-refiner, as defined in 40 Code of Federal Regulations part 279, shall submit to the department a written report annually. The report shall be submitted within thirty days after the end of the calendar year to which the report applies, and it shall contain a copy of the tracking information required to be kept pursuant to 40 Code of Federal Regulations part 279 or a summary of such tracking information on a reporting form supplied by the department.

4. Each person who burns used oil fuel in devices identified in 40 Code of Federal Regulations section 279.61(a)(1) through (3) shall submit to the department a written annual report. The report shall be submitted to the department by February 1 for the previous calendar year and shall contain the following information:

(a) The name, address and telephone number of the person reporting.

(b) The name, address and telephone number of the burner facility.

(c) The United States environmental protection agency identification number of the burner facility.

(d) The total volume of on-specification used oil burned.

(e) The period being reported.

(f) The total volume of self-generated used oil burned on site.

(g) The total volume of used oil fuel burned.

(h) A summary of the tracking information required to be kept pursuant to 40 Code of Federal Regulations part 279.

5. Used oil fuel marketers and used oil fuel burners shall label all tanks that store on-specification used oil with the words "on-specification used oil". The department may sample and test used oil or used oil fuel to determine its properties or characteristics as prescribed in this article and rules adopted pursuant to this article.

6. A household "do-it-yourselfer" used oil generator, as defined under 40 Code of Federal Regulations part 279, shall send its used oil to a "do-it-yourselfer" collection station, a household hazardous waste collection center, a used oil collection center, a used oil fuel marketer or a used oil processor or refiner.

D. In administering this section or in adopting or administering rules pursuant to this section, the department shall maintain the level of discretion that is permitted pursuant to applicable federal rules.

E. Any client names or related identifying data required to be submitted to the department pursuant to this section are confidential.

49-836. Solid waste landfill disposal fees

A. Each operator of a solid waste landfill or facility shall make the fee payments required by this section as determined by the department. Monies from fees shall be deposited in the recycling fund established by section 49-837 and the solid waste fee fund established by section 49-881. Fees shall be calculated and paid as follows until the effective dates of rules adopted pursuant to subsection G of this section:

1. A disposal fee of $.25 for each six cubic yards of uncompacted solid waste, $.25 for each three cubic yards of compacted solid waste or $.25 per ton of solid waste received at landfills regulated by the department. From and after June 30, 2005, all $.25 collected in disposal fees shall be deposited in the recycling fund.

2. A solid waste landfill that receives only waste generated on site shall compute the fee by using one of the following methods:

(a) By actual volume or weight.

(b) By estimate based on landfill capacity use, volume or number of waste loads or any other reasonable means for approximating the volume or weight of disposed waste.

3. Facilities that generate waste from recycling solid waste, effluent from a secondary wastewater treatment plant or wastewaters shall pay one-half of the fee calculated pursuant to paragraph 1 of this subsection. The maximum annual amount paid by a facility for on-site disposal of waste generated from recycling shall not exceed $15,000. The fee for these facilities may be computed based on the dry or dewatered weight or volume of the waste generated from recycling.

B. Each fee payment shall be accompanied by a form prepared and furnished by the department and completed by the operator. The form shall state the total volume or weight of solid waste disposed of at that landfill during the payment period and shall provide any other information deemed necessary by the department. The form shall be signed by the operator.

C. A person who for a fee disposes of waste in a solid waste landfill that is not regulated by the department shall keep accurate records of the waste disposed of in those landfills and shall remit a fee to the department at the same rate and in the same manner as provided in subsection A of this section or rules adopted pursuant to subsection G of this section.

D. For solid waste landfills that are operated pursuant to section 49-741 and that do not have on-site operators or scales, the fee shall be based on a formula that multiplies the population of the political subdivisions served by the landfill by $.07. From and after June 30, 2005, all fees shall be deposited in the recycling fund. The fee shall be paid in the same manner as provided in subsection A of this section or rules adopted pursuant to subsection G of this section.

E. This section or any rules adopted pursuant to subsection G of this section do not apply to:

1. Persons disposing of a load containing less than six cubic yards of uncompacted solid waste or three cubic yards of compacted solid waste.

2. A site used solely for the reclamation of land through the introduction of landscaping rubble or inert material.

3. Material produced in connection with a mining or metallurgical operation.

F. Solid waste management service companies and agencies affected by the landfill disposal fees established by this section may adjust the fees charged to customers by passing through to the customers the additional costs.

G. The department shall establish by rule the solid waste landfill disposal fees.

49-855. Best management practices; fee; criteria

A. The director shall adopt, by rule, best management practices for the treatment, storage and disposal of each waste to be designated as a special waste pursuant to this article.

B. In adopting best management practices for a special waste, the director shall consider:

1. The availability, effectiveness, economic feasibility and technical feasibility of alternative handling or management technologies and practice.

2. The potential nature and severity of the effect on public health and the environment resulting from the special waste.

3. Circumstances under which the practices shall be applied, including climatological, geological and hydrogeological conditions.

4. Consistency with other federal and state laws, rules and regulations in an effort to avoid practices or requirements that duplicate, are inconsistent with or result in dual regulation under other federal and state laws, rules and regulations.

C. The best management practices adopted by the director shall contain procedures necessary for the protection of public health and the environment for the transportation, treatment, storage and disposal of special wastes. Additional items to be contained in the best management practices shall include at least:

1. A designated time of not less than ninety days beyond which a waste may not be stored.

2. A fee for each ton of special waste that is transported to a facility in this state for treatment, storage or disposal. The department shall establish by rule a fee for each ton of special waste that is transported to a facility in this state for treatment, storage or disposal, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

D. The director may adopt special waste best management practices that apply to the treatment, storage or disposal of those wastes that are not regulated as hazardous wastes under federal laws or regulations.

E. The director may enact special waste best management practices that are more stringent than federal laws or regulations that govern polychlorinated biphenyls pursuant to the toxic substances control act (15 United States Code section 2605) if the director determines in writing that:

1. The additional regulation is necessary to protect public health or the environment.

2. There is a scientific basis for the additional regulation based on appropriate environment testing and analytical data.

3. The additional regulation is technically feasible.

F. This section does not preclude the director from adopting best management practices under this article, which incorporate management practices applicable to the treatment, storage or disposal of those wastes that are not regulated as hazardous wastes under federal laws or regulations.

G. The department shall require facilities that generate, transport or receive special waste to pay an annual fee. The department shall establish by rule an annual fee. The department shall deposit, pursuant to sections 35-146 and 35-147, fees in the solid waste fee fund established by section 49-881. Facilities that pay registration fees pursuant to section 49-747 are exempt from the fee prescribed by this section.

49-857. Special waste management plans; director; approval; fee

A. Except as provided in section 49-858, a facility that plans to manage special waste for treatment, storage or disposal shall apply for and obtain approval of the director.

B. The application shall include all of the following:

1. A complete solid waste facility plan pursuant to section 49-762 that includes a special waste management plan component that complies with best management practices adopted pursuant to section 49-855 for each special waste for that portion of the facility that is engaged in the treatment, storage or disposal of special waste.

2. Evidence of compliance with permit filing requirements pursuant to this title.

C. The director shall collect from the applicant a reasonable fee based on the state's total costs in processing the plan. The director may amend an existing rule or adopt a new rule to establish criteria for those costs. Monies from fees shall be deposited in the solid waste fee fund established by section 49-881.

D. A facility at which the treatment, storage or disposal of special waste occurs only as a result of an episodic release at that facility shall not be subject to the special waste management plan requirements of this section. The special waste shall be managed pursuant to applicable best management practices.

44-1301. Definitions

In this article, unless the context otherwise requires:

1. "Damage" means any cracking, bubbling, cutting, chunking or separation of the tire sidewall or tread, including exposed body ply or belt material, or any visible deterioration of the tire bead or inner liner.

2. "Improper repair" means any puncture repair of damage larger than one-fourth of an inch, any puncture repair to a tire sidewall, the tread shoulder or belt edge area, or a puncture repair that has not been both sealed or patched on the inside and repaired with a cured rubber stem through to the outside.

3. "Motor vehicle" means any automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination or other vehicle operated on the roads of this state, used to transport persons or property and propelled by power other than muscular power, but motor vehicle does not include traction engines, vehicles that run only on a track, bicycles or mopeds.

4. "Off road motor vehicle" means any automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, heavy equipment used in mining or metallurgical operations, agriculture, construction or earth moving, airplanes or other vehicles operated off the roads of this state, used to transport persons or property or used for agricultural, construction or earth moving activities and propelled by power other than muscular power, but off road motor vehicle does not include traction engines, vehicles that run only on a track, bicycles or mopeds.

5. "Person" means any public or private corporation, company, partnership, firm, association or society of persons, the federal government and any of its departments or agencies, this state or any of its agencies, departments, political subdivisions, counties, towns or municipal corporations, as well as a natural person.

6. "Waste tire" means a motor vehicle tire that is no longer suitable for its original intended purpose because of wear, damage, improper repair or manufacturer's recall.

7. "Waste tire collection site" means a site where waste tires are collected before being offered for recycling or reuse and where more than five hundred tires are kept on site on any day.

8. "Wear" means the reduction of the major groove depth of the tire to two thirty-seconds of an inch.

49-701. Definitions

In this chapter, unless the context otherwise requires:

1. "Administratively complete plan" means an application for a solid waste facility plan approval that the department has determined contains each of the components required by statute or rule but that has not undergone technical review or public notice by the department.

2. "Administrator" means the administrator of the United States environmental protection agency.

3. "Advanced recycling":

(a) Means a manufacturing process to convert post-use polymers and recovered feedstocks into basic hydrocarbon raw materials, feedstocks, chemicals, monomers, oligomers, plastics, plastics and chemical feedstocks, basic and unfinished chemicals, crude oil, naphtha, liquid transportation fuels and coatings and other products such as waxes and lubricants through processes that include pyrolysis, gasification, depolymerization, catalytic cracking, reforming, hydrogenation, solvolysis and other similar technologies.

(b) Does not include solid waste management, processing, incineration or treatment.

4. "Advanced recycling facility":

(a) Means a facility that receives, stores and converts post-use polymers and recovered feedstocks using advanced recycling.

(b) Includes a manufacturing facility that is subject to applicable provisions of law and department rules for air quality, water quality and waste and land use.

(c) Does not include a solid waste facility, processing facility, treatment facility, materials recovery facility, recycling facility or incinerator.

5. "Beneficial use of CCR" means that all of the following conditions apply:

(a) The CCR provides a functional benefit.

(b) The CCR substitutes for the use of a virgin material, which conserves natural resources that would otherwise need to be obtained through practices such as extraction.

(c) The use of the CCR meets relevant product specifications, regulatory standards or design standards when available, and when those standards are not available, the CCR is not used in excess quantities.

(d) For unencapsulated use of CCR involving placement of twelve thousand four hundred tons or more on the land in nonroadway applications, the user demonstrates, keeps records and provides documentation on request, that environmental releases to groundwater, surface water, soil and air are comparable to or lower than those from analogous products made without CCR, or that environmental releases to groundwater, surface water, soil and air will be at or below relevant regulatory and health-based benchmarks for human and ecological receptors during use.

6. "CCR pile":

(a) Means any noncontainerized accumulation of solid, nonflowing CCR that is placed on the land.

(b) Does not include a CCR that is beneficially used off-site.

7. "CCR program approval" means United States environmental protection agency approval of the Arizona coal combustion residuals program in accordance with 42 United States Code section 6945(d)(1).

8. "CCR surface impoundment" or "impoundment" means a natural topographic depression, man-made excavation or diked area, which is designed to hold an accumulation of CCR and liquids, and the CCR unit treats, stores or disposes of CCR.

9. "Closed solid waste facility" means any of the following:

(a) A solid waste facility other than a CCR unit that ceases storing, treating, processing or receiving for disposal solid waste before the effective date of design and operation rules for that type of facility adopted pursuant to section 49-761.

(b) A public solid waste landfill that meets any of the following criteria:

(i) Ceased receiving solid waste before July 1, 1983.

(ii) Ceased receiving solid waste and received at least two feet of cover material before January 1, 1986.

(iii) Received approval for closure from the department after completing a postclosure care and monitoring plan as required by permit or plan approval.

(c) A public composting plant or a public incinerating facility that closed in accordance with an approved plan.

10. "Coal combustion residuals" or "CCR" means fly ash, bottom ash, boiler slag and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.

11. "Coal combustion residuals landfill" or "CCR landfill":

(a) Means an area of land or an excavation that receives CCR and that is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine or a cave.

(b) Includes sand and gravel pits and quarries that receive CCR or CCR piles and any use of CCR that does not meet the definition of a beneficial use of CCR.

12. "Coal combustion residuals unit" or "CCR unit":

(a) Means any CCR landfill, CCR surface impoundment or lateral expansion of a CCR unit or a combination of more than one of these units.

(b) Includes both new and existing units, unless otherwise specified.

13. "Construction debris" means solid waste derived from the construction, repair or remodeling of buildings or other structures.

14. "County" means:

(a) The board of supervisors in the context of the exercise of powers or duties.

(b) The unincorporated areas in the context of area of jurisdiction.

15. "Demolition debris" means solid waste derived from the demolition of buildings or other structures.

16. "Depolymerization" means a manufacturing process through which post-use polymers are broken into smaller molecules such as monomers and oligomers or raw, intermediate or final products, plastics and chemical feedstocks, basic and unfinished chemicals, crude oil, naphtha, liquid transportation fuels, waxes, lubricants, coatings and other basic hydrocarbons.

17. "Discharge" has the same meaning prescribed in section 49-201.

18. "Existing CCR landfill" means a CCR landfill that receives CCR both before and after October 19, 2015, or for which construction commenced before October 19, 2015 and that receives CCR on or after October 19, 2015. For the purposes of this paragraph, "commenced construction" means the owner or operator of a CCR landfill has obtained the federal, state and local approvals or permits necessary to begin physical construction and a continuous on site, physical construction program had begun before October 19, 2015.

19. "Existing CCR surface impoundment" means a CCR surface impoundment that meets one of the following conditions:

(a) Receives CCR both before and after October 19, 2015.

(b) For which construction commenced before October 19, 2015 and that receives CCR on or after October 19, 2015. For the purposes of this paragraph, "commenced construction" means the owner or operator of a CCR surface impoundment has obtained the federal, state and local approvals or permits necessary to begin physical construction and a continuous on site, physical construction program had begun before October 19, 2015.

20. "Existing solid waste facility" means a solid waste facility other than a CCR unit that begins construction or is in operation on the effective date of the design and operation rules adopted by the director pursuant to section 49-761 for that type of solid waste facility.

21. "Facility plan" means any design or operating plan for a solid waste facility or group of solid waste facilities other than a permit issued under article 11 of this chapter.

22. "40 C.F.R. part 257, subparts A and B" means 40 Code of Federal Regulations part 257, subparts A and B in effect on May 1, 2004.

23. "40 C.F.R. part 258" means 40 Code of Federal Regulations part 258 in effect on May 1, 2004.

24. "Gasification" means a manufacturing process through which recovered feedstocks are heated and converted into a fuel and gas mixture in an oxygen-deficient atmosphere and the mixture is converted into valuable raw, intermediate and final products, including plastic monomers, chemicals, waxes, lubricants, chemical feedstocks, crude oil, diesel, gasoline, diesel and gasoline blendstocks, home heating oil and other fuels, including ethanol and transportation fuel, that are returned to economic utility in the form of raw materials, products or fuels.

25. "Household hazardous waste" means solid waste as described in 40 Code of Federal Regulations section 261.4(b)(1) as incorporated by reference in the rules adopted pursuant to chapter 5 of this title.

26. "Household waste":

(a) Means any solid waste, including garbage, rubbish and sanitary waste from septic tanks, that is generated from households, including single and multiple-family residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds and day use recreation areas.

(b) Does not include construction debris, landscaping rubble or demolition debris.

27. "Inert material":

(a) Means material that satisfies all of the following conditions:

(i) Is not flammable.

(ii) Will not decompose.

(iii) Will not leach substances in concentrations that exceed applicable aquifer water quality standards prescribed by section 49-201, paragraph 22 when subjected to a water leach test that is designed to approximate natural infiltrating waters.

(b) Includes concrete, asphaltic pavement, brick, rock, gravel, sand, soil and metal, if used as reinforcement in concrete.

(c) Does not include special waste, hazardous waste, glass or other metal.

28. "Land disposal" means placement of solid waste in or on land.

29. "Landscaping rubble" means material that is derived from landscaping or reclamation activities and that may contain inert material and not more than ten percent by volume of vegetative waste.

30. "Lateral expansion" means, for the purposes of the coal combustion residuals program established pursuant to article 11 of this chapter, a horizontal expansion of the waste boundaries of an existing CCR landfill or existing CCR surface impoundment made after October 19, 2015.

31. "Management agency" means any person responsible for the day-to-day operation, maintenance and management of a particular public facility or group of public facilities.

32. "Medical waste":

(a) Means any solid waste that is generated in the diagnosis, treatment or immunization of a human being or animal or in any research relating to that diagnosis, treatment or immunization, or in the production or testing of biologicals.

(b) Includes discarded drugs.

(c) Does not include hazardous waste as defined in section 49-921 other than very small quantity generator waste.

33. "Municipal solid waste landfill" means any solid waste landfill that accepts household waste, household hazardous waste or very small quantity generator waste.

34. "New solid waste facility" means a solid waste facility that begins construction or operation after the effective date of design and operating rules that are adopted pursuant to section 49-761 or article 11 of this chapter for that type of solid waste facility.

35. "On site" means the same or geographically contiguous property that may be divided by public or private right-of-way if the entrance and exit between the properties are at a crossroads intersection and access is by crossing the right-of-way and not by traveling along the right-of-way. Noncontiguous properties that are owned by the same person and connected by a right-of-way that is controlled by that person and to which the public does not have access are deemed on site property. Noncontiguous properties that are owned or operated by the same person regardless of right-of-way control are also deemed on site property.

36. "Person" means any public or private corporation, company, partnership, firm, association or society of persons, the federal government and any of its departments or agencies, this state or any of its agencies, departments, political subdivisions, counties, towns or municipal corporations, as well as a natural person.

37. "Post-use polymer":

(a) Means a plastic to which all of the following apply:

(i) The plastic is derived from any industrial, commercial, agricultural or domestic activities.

(ii) The plastic is not mixed with solid waste or hazardous waste on site or during processing at the advanced recycling facility.

(iii) The plastic's use or intended use is as a feedstock for manufacturing crude oil, fuels, feedstocks, blendstocks, raw materials or other intermediate products or final products using advanced recycling.

(iv) The plastic has been sorted from solid waste and other regulated waste but may contain residual amounts of solid waste such as organic material and incidental contaminants or impurities such as paper labels and metal rings.

(v) The plastic is processed at an advanced recycling facility or held at an advanced recycling facility before processing.

(b) Does not include solid waste or municipal waste.

38. "Process" or "processing" means the reduction, separation, recovery, conversion or recycling of solid waste.

39. "Public solid waste facility" means a transfer facility and any site owned, operated or used by any person for the storage, processing, treatment or disposal of solid waste that is not generated on site.

40. "Pyrolysis" means a manufacturing process through which post-use polymers are heated in the absence of oxygen until melted, are thermally decomposed and are then cooled, condensed and converted into valuable raw, intermediate and final products, including plastic monomers, chemicals, waxes, lubricants, chemical feedstocks, crude oil, diesel, gasoline, diesel and gasoline blendstocks, home heating oil and other fuels, including ethanol and transportation fuel, that are returned to economic utility in the form of raw materials, products or fuels.

41. "Recovered feedstocks":

(a) Means one or more of the following materials that have been processed so that they may be used as feedstock in an advanced recycling facility:

(i) Post-use polymers.

(ii) Materials for which the United States environmental protection agency has made a nonwaste determination pursuant to 40 Code of Federal Regulations section 241.3(c) or has otherwise determined are feedstocks and not solid waste.

(b) Does not include:

(i) Unprocessed municipal solid waste.

(ii) Materials that are mixed with solid waste or hazardous waste on site or during processing at an advanced recycling facility.

42. "Recycling facility" means a solid waste facility that is owned, operated or used for the storage, treatment or processing of recyclable solid waste.

43. "Salvaging" means the removal of solid waste from a solid waste facility with the permission and in accordance with rules or ordinances of the management agency for purposes of productive reuse.

44. "Scavenging" means the unauthorized removal of solid waste from a solid waste facility.

45. "Solid waste facility" means a transfer facility and any site owned, operated or used by any person for the storage, processing, treatment or disposal of solid waste, very small quantity generator waste or household hazardous waste but does not include the following:

(a) A site at which less than one ton of solid waste that is not household waste, household hazardous waste, very small quantity generator waste, medical waste or special waste and that was generated on site is stored, processed, treated or disposed in compliance with section 49-762.07, subsection F.

(b) A site at which solid waste that was generated on site is stored for ninety days or less.

(c) A site at which nonputrescible solid waste that was generated on site in amounts of less than one thousand kilograms per month per type of nonputrescible solid waste is stored and contained for one hundred eighty days or less.

(d) A site that stores, treats or processes paper, glass, wood, cardboard, household textiles, scrap metal, plastic, vegetative waste, aluminum, steel or other recyclable material and that is not a waste tire facility, a transfer facility or a recycling facility.

(e) A site where sludge from a wastewater treatment facility is applied to the land as a fertilizer or beneficial soil amendment in accordance with sludge application requirements.

(f) A closed solid waste facility.

(g) A solid waste landfill that is performing or has completed postclosure care before July 1, 1996 in accordance with an approved postclosure plan.

(h) A closed solid waste landfill performing a onetime removal of solid waste from the closed solid waste landfill, if the operator provides a written notice that describes the removal project to the department within thirty days after completion of the removal project.

(i) A site where solid waste generated in street sweeping activities is stored, processed or treated before disposal at a solid waste facility authorized under this chapter.

(j) A site where solid waste generated at either a drinking water treatment facility or a wastewater treatment facility is stored, processed, or treated on site before disposal at a solid waste facility authorized under this chapter, and any discharge is regulated pursuant to chapter 2, article 3 of this title.

(k) A closed solid waste landfill where development activities occur on the property or where excavation or removal of solid waste is performed for maintenance and repair if the following conditions are met:

(i) When the project is completed there will not be an increase in leachate that would result in a discharge.

(ii) When the project is completed the concentration of methane gas will not exceed twenty-five percent of the lower explosive limit in on-site structures, or the concentration of methane gas will not exceed the lower explosive limit at the property line.

(iii) Protection has been provided to prevent remaining waste from causing any vector, odor, litter or other environmental nuisance.

(iv) The operator provides a notice to the department containing the information required by section 49-762.07, subsection A, paragraphs 1, 2 and 5 and a brief description of the project.

(l) Agricultural on-site disposal as provided in section 49-766.

(m) The use, storage, treatment or disposal of by-products of regulated agricultural activities as defined in section 49-201 and that are subject to best management practices pursuant to section 49-247 or by-products of livestock, range livestock and poultry as defined in section 3-1201, pesticide containers that are regulated pursuant to title 3, chapter 2, article 6 or other agricultural crop residues.

(n) Household hazardous waste collection events held at a temporary site for not more than six days in any calendar quarter.

(o) Wastewater treatment facilities as defined in section 49-1201.

(p) An on-site single-family household waste composting facility.

(q) A site at which five hundred or fewer waste tires are stored.

(r) A site at which mining industry off-road waste tires are stored or are disposed of as prescribed by rules in effect on February 1, 1996, until the director by rule determines that on-site recycling methods exist that are technically feasible and economically practical.

(s) A site at which underground piping, conduit, pipe covering or similar structures are abandoned in place in accordance with applicable state and federal laws.

(t) An advanced recycling facility that converts recovered feedstocks to manufacture raw materials and intermediate and final products.

46. "Solid waste landfill":

(a) Means a facility, area of land or excavation in which solid wastes are placed for permanent disposal.

(b) Does not include a land application unit, surface impoundment, injection well, coal combustion residuals landfill, compost pile or waste pile or an area containing ash from the on-site combustion of coal that does not contain household waste, household hazardous waste or very small quantity generator waste.

47. "Solid waste management" means the systematic administration of activities that provide for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid waste in a manner that protects public health and safety and the environment and prevents and abates environmental nuisances.

48. "Solid waste management plan" means the plan that is adopted pursuant to section 49-721 and that provides guidelines for the collection, source separation, storage, transportation, processing, treatment, reclamation and disposal of solid waste in a manner that protects public health and safety and the environment and prevents and abates environmental nuisances.

49. "Solvolysis":

(a) Means a manufacturing process through which post-use polymers are purified with the aid of solvents, allowing additives and contaminants to be removed and producing polymers capable of being recycled or reused without first being reverted to a monomer.

(b) Includes hydrolysis, aminolysis, ammonoloysis, methanolysis and glycolysis.

50. "Storage" means the holding of solid waste.

51. "Transfer facility":

(a) Means a site that is owned, operated or used by any person for the rehandling or storage for ninety days or less of solid waste that was generated off site for the primary purpose of transporting that solid waste.

(b) Includes those facilities that include significant solid waste transfer activities that warrant the facility's regulation as a transfer facility.

52. "Treatment" means any method, technique or process used to change the physical, chemical or biological character of solid waste so as to render that waste safer for transport, amenable for processing, amenable for

storage or reduced in volume.

53. "Vegetative waste":

(a) Means waste derived from plants, including tree limbs and branches, stumps, grass clippings and other waste plant material.

(b) Does not include processed lumber, paper, cardboard and other manufactured products that are derived from plant material.

54. "Very small quantity generator waste" means hazardous waste in quantities as defined by rules adopted pursuant to section 49-922.

55. "Waste pile" means any noncontainerized accumulation of solid, nonflowing waste that is used for treatment or storage.

56. Waste tire does not include tires used for agricultural purposes as bumpers on agricultural equipment or as ballast to maintain covers at an agricultural site, or any tire disposed of using any of the methods in section 44-1304, subsection D, paragraphs 1, 2, 3, 5 through 8 and 11 and means any of the following:

(a) A tire that is no longer suitable for its original intended purpose because of wear, damage or defect.

(b) A tire that is removed from a motor vehicle and is retained for further use.

(c) A tire that has been chopped or shredded.

57. "Waste tire facility" means a solid waste facility at which five thousand or more waste tires are stored outdoors on any day.

49-801. Definitions

In addition to the definitions in 40 Code of Federal Regulations, part 279, the following definitions apply to this article:

1. "Off-specification used oil" means used oil which exceeds any of the allowable levels in 40 Code of Federal Regulations section 279.11.

2. "On-specification used oil" means used oil that is not off-specification used oil.

3. "Used oil" includes oil that has been contaminated as a result of handling, transportation or storage.

49-831. Definitions

In this article, unless the context otherwise requires:

1. "Agency" means this state or a state agency, county, municipality or political subdivision.

2. "Collection" means the act of picking up post-consumer secondary materials from homes, businesses, governmental agencies, institutions or industrial sites.

3. "Consumer" means a person who purchases a product for use, consumption or any purpose other than resale.

4. "Municipal or county solid waste" means any garbage, trash, rubbish, refuse, sludge from a waste treatment plant, water supply treatment plant or pollution control facility and other discarded material, including solid, liquid, semisolid or contained gaseous material but not including domestic sewage or hazardous waste.

5. "Municipality" means an incorporated city or town with a population of more than five thousand persons.

6. "Natural resources" means the supply of materials, not made by man, that are used for making goods.

7. "Paper" means newspaper, high grade office paper, fine paper, bond paper, offset paper, xerographic paper, duplicator paper and related types of cellulosic material containing not more than ten percent by weight or volume of noncellulosic material such as laminates, binders, coatings or saturants.

8. "Plastic container" means a container that is hermetically sealed or made airtight with a metal or plastic cap with a minimum wall thickness of not less than 0.010 inches and that is composed of thermoplastic synthetic polymeric materials.

9. "Plastics" means a specific polymer or mix of polymers in combination with various amounts of plasticizers, stabilizers, colorants, fillers and other organic and inorganic compounds.

10. "Post-consumer material":

(a) Means a discard generated by a business or residence that has fulfilled its useful life.

(b) Includes discards from industrial or manufacturing processes.

11. "Process" or "processing" means the reduction, separation, recovery, conversion or recycling of solid waste.

12. "Recyclable material" means post-consumer materials that may be collected, separated, cleansed, treated or reconstituted and returned to the economic stream in the form of raw materials or products.

13. "Recycled" means a process by which post-consumer materials are collected, separated, cleansed, treated or reconstituted and returned to the economic stream in the form of raw materials or products.

14. "Recycled materials" means those materials that have been separated from the municipal or county solid waste stream, processed and returned to the economic stream in the form of raw materials or products.

15. "Recycling" means the process of collecting, separating, cleansing, treating and reconstituting post-consumer materials that would otherwise become solid waste and returning them to the economic stream in the form of raw material for reconstituted products that meet the quality standards necessary to be used in the marketplace, but does not include incineration or other similar processes.

16. "Recycling program" means the program prepared and adopted by this state and approved by the department to implement the recycling program goals of this state or a program prepared and adopted by a county or municipality of this state.

17. "Reuse" means the return of a commodity into the economic stream for use in the same kind of application as before without change in its identity.

18. "Source reduction" means any action that causes a net reduction in the generation of solid waste and includes reducing the use of nonrecyclable materials, replacing disposable materials and products with reusable materials and products, reducing packaging, reducing the amount of yard waste generated, establishing garbage rate structures with incentives to reduce the amount of wastes that generators produce and increasing the efficiency of the use of paper, cardboard, glass, metal, plastic and other materials in the manufacturing process. Source reduction does not include the following:

(a) Steps taken after the material becomes solid waste or actions that would impact air or water resources in lieu of land, such as incineration or pyrolysis or burning for energy recovery.

(b) Replacing disposable material or products with alternative disposable materials or products.

19. "Storage" means the containment or holding of materials, either on a temporary or long-term basis, in such a manner as not to constitute disposal of such materials.

20. "Used oil" means any oil that has been refined from crude or synthetic oil and, as a result of use, storage or handling, that has become unsuitable for its original purpose due to the presence of impurities or loss of original properties but that may be suitable for further use and may be economically recyclable.

21. "Waste generator" means a person, business, government agency or other organization that produces solid waste.

22. "Waste stream" means the solid waste material output of a community, region or facility.

23. "Waste tire" means a tire that is no longer suitable for its original intended purpose because of wear, damage or defect.

24. "Wastepaper" means recyclable paper and paperboard, including high grade office paper, computer paper, fine paper, bond paper, offset paper, xerographic paper, duplicator paper and corrugated paper.

49-851. Definitions; applicability

A. In this article, unless the context otherwise requires:

1. "Best management practices" means a method or combination of methods that is used in the treatment, storage and disposal of a special waste and that achieves the maximum practical cost effective protection of public health or the environment.

2. "On site" means at or on the same or geographically contiguous property that may be divided by public or private right-of-way, provided the entrance and exit between the properties are at a crossroads intersection and access is by crossing as opposed to travel along the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way that that person controls and to which the public does not have access are also on-site property.

3. "Petroleum contaminated soils" means soils excavated for storage, treatment or disposal containing benzene, toluene, ethylbenzene, total xylenes, acenaphthylene, anthracene, benz(A)anthracene, benzo(A)pyrene, benzo(B)fluoranthene, benzo(K)fluoranthene, cyrysene, dibenz(A, H)anthracene, fluoranthene, fluorene, indenopyrene, naphthalene or pyrene in concentrations in excess of levels determined by the director pursuant to section 49-152 to protect the public health and the environment.

4. "Shipper" means a person who transports a special waste in commerce.

5. "Special waste" means a solid waste as defined in section 49-701.01, other than a hazardous waste, that requires special handling and management to protect public health or the environment and that is listed in section 49-852 or in rules adopted pursuant to section 49-855. Special waste does not include return flows from irrigated agriculture, medical waste, used oil or by-products of a regulated agricultural activity, as defined in section 49-201, that are subject to best management practices under section 49-247, by-products of livestock, range livestock and poultry as defined in section 3-1201, pesticide containers regulated pursuant to title 3, chapter 2, article 6 or waste that contains radioactive materials that are subject to a permit or regulation under the atomic energy act of 1954 (42 United States Code section 2011; 68 Stat. 919), as amended, or title 30, chapter 4.

6. "Storage" means the holding of special waste for a period of not more than one year unless a lesser period of time is designated by the director pursuant to best management practices rules. The director shall not designate a storage time of less than ninety days.

B. Defining or categorizing any material as a special waste under this article shall not affect the duty of care or breach of that duty for a cause of action for personal injury or for a workers' compensation claim arising from the handling of any materials.

Governor's Regulatory Review Council
100 N. 15th Ave #305
Phoenix, AZ 85007

Re: Phoenix's Comments on Solid Waste Fee Increases Rulemaking

Dear Members of the Governor's Regulatory Review Council (GRRC),

The City of Phoenix (Phoenix) participated in the Arizona Department of Environmental Quality's (ADEQ) stakeholder process and expressed concerns regarding the solid waste fee increase rulemaking. Recently, ADEQ has made changes to the proposed rule in response to stakeholder input, and we appreciate ADEQ's willingness to work toward compromises that address many of the concerns raised by Phoenix and others.

While we acknowledge that the revised rules are an improvement over the initial proposal, Phoenix still has concerns regarding the significant fee increases and the need to ensure that all fees collected are used exclusively for their intended purposes. Below are the updates ADEQ has made in response to stakeholder concerns:

- **Solid Waste Landfill Disposal Fees:** There will be no CPI increases on the landfill disposal fees after the initial fee increase.
- **CPI Adjustment Date:** The CPI Adjustment date was set from January 2026 to July 2026 and would follow annually every July.
- **CPI Cap:** The CPI for solid waste fees will be capped at 4% with advanced notification of the CPI increase amount.

Phoenix remains concerned about the need to ensure that fees collected are used to support the intended regulatory budget needs of ADEQ and implementation of a recycling grant program. While we are supportive of ADEQ's programs and the need to increase fees to administer a robust recycling grant program, the concern remains, these funds will instead be reallocated toward other state budget needs as we have seen in the past.

Again, Phoenix appreciates ADEQ's efforts to compromise and address stakeholder concerns. The updated rule improves the initial proposal and reflects ADEQ's commitment to collaboration. However, concerns remain regarding the financial impacts of the fee increases and the need for enhanced transparency and accountability to ensure fees are used for their intended purposes.

Thank you for considering our feedback. We appreciate GRRC's efforts to ensure Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities.

Respectfully,

Felipe Moreno

Felipe Moreno
Public Works Director
City of Phoenix

ADEQ Supplemental Information – 18 A.A.C. 13 Solid Waste Fees

ADEQ appreciates the opportunity to provide the following supplemental information as requested by the Council following the November 22, 2024 Study Session on the 18 A.A.C. 13 Solid Waste Fees rulemaking.

Background

Following the steep economic downturn in the late 2000s and resulting severe state budget shortfalls, many state programs lost funding from the Arizona General Fund. The Arizona Solid Waste Program (AZ-SWP) was one such program. In response, the state legislature passed HB2705, granting fee rulemaking authority to ADEQ in 2012 to implement a fee-based program model for the first time for AZ-SWP. While representing a critical first step towards the goal of a fully fee-based and self-funded program, over the last decade time has proven the fee program first established in 2012 is not enough to cover AZ-SWP costs and more work is now necessary to fully realize this goal.

Since this time, AZ-SWP has faced continuing budget shortfalls, which have sharply increased in the last five years. Since FY2019, overall SWP's costs have increased by approximately $1,500,000, from $2,000,000 to $3,500,000. Since 2012, the Phoenix metro area has experienced inflation of 48.52%. Further, for the last 12 years since fees were last set in 2012, ADEQ has not had the ability to adjust fees to account for a shifting economic landscape due to one-time rulemaking authorities, while experiencing expanded Program responsibility and greater costs related to regulatory and oversight activities. For example, since 2012, the number of regulated solid waste facilities has increased by 333% from approximately 460 facilities to 2,000 facilities.

As such, the State Legislature passed HB2367 this last legislative session with an emergency clause for immediate enactment. It is now with the legislative authority and mandate pursuant to HB2367 that ADEQ seeks to establish fee levels and a fee program to ensure ADEQ can meet its minimum statutory mandates to administer the solid waste program. In addition, stable funding will allow ADEQ to provide more certainty to the regulated community in terms of permit review cycle times and more robust compliance assistance for small businesses that often struggle with understanding and applying solid waste regulatory requirements.

I. This fee rulemaking is in direct response to a legislative mandate from the state legislature to ensure Solid Waste Programs be a self-funded, fee-based program.

HB2705. In response to the loss of General Fund revenues and to address the need to establish a fee-based funding mechanism, the Arizona State Legislature passed Laws 2011, 1st regular session, Ch. 220 (HB2705).

At the Arizona House Environment Committee Hearing on February 15, 2011, the ADEQ Legislative Liaison stated that the previous state budget swept remaining General Fund appropriations to the Agency. To ensure the continuation of vital state programs, including the solid waste fees contemplated in HB2705, the legislature passed this emergency fee authority. At the same hearing, the ADEQ Waste Program Director testified that this bill is necessary to address the loss of the remaining $5.7 million General Fund appropriation to ADEQ that was primarily directed towards the Solid Waste Fee Fund. The fees to be established by rule following HB2705 were not designed to grow the program, but instead replace the loss of General Fund revenues to ensure the stability of the program. At the hearing, a House member questioned if there would be measures in place to ensure fees would not be increased to a point where registration to operate the business became cost prohibitive. The ADEQ Waste Program Director explained there is a maximum fee cap for those fees subject to an hourly rate review and for special waste generation.

Also at the hearing, the ADEQ Director testified that there is no commensurate or comparable federal program for solid waste management. Without the necessary funding, ADEQ would be forced to scale back regulatory oversight and compliance assistance for solid waste management, including inspections and responding to citizen complaints, with no federal program or agency able to step in to assume these functions.

At the Senate Natural Resources and Transportation Committee Hearing on March 21, 2011 a representative from the City of Phoenix spoke in support of HB2705, expressing gratitude to ADEQ and the bill sponsor for a robust stakeholder process.

Arizona State Agency Fee Commission. From the 2012 Arizona State Agency Fee Commission Report (Fee Report), the State Agency Fee Commission (Commission) examined the fees and funding structure of several state agencies, including ADEQ. As noted in the Commission's Fee Report, prior to 2012 the Waste Programs Division was heavily funded by General Fund monies. However, with the loss of General Fund monies for AZ-SWP, it became necessary, as authorized and mandated by statute, to implement a fee-based, self-funded program. Based on their review of funding structures across agencies, the Commission developed a number of general recommendations, including:

1. Limit cross-subsidization among programs. When agencies have several programs with different purposes, fees collected from one program should not pay the costs of another program.

2. Fees should reflect the cost of the service. The cost of the service provided, including any direct and indirect costs, should be as close as practicable to the fee charged.

3. The General Fund should not fund specialty programs. An agency's funding structure should be such that fees are collected for specific services that the agency provides. The General Fund should only support programs that broadly benefit the public.

In the Commission's review and analysis of the Waste Programs Division and the Solid Waste Fee Fund, the Commission further developed specific recommendations for ADEQ. These include:

1. Keep the current fee structure unchanged while continuing to monitor and adjust fee levels as necessary to produce proper revenue for programs.

2. ADEQ should be allowed to utilize revenues from the Recycling Fund to fulfill the original intent.

The findings and recommendations from the Commission have driven ADEQ's fee and funding structure, both for the initial rulemaking undertaken in 2012 to establish program fees for the first time, and also for this current rulemaking to ensure fee levels are set commensurate with costs and reflective of the actual direct and indirect costs associated with each corresponding regulatory activity.

HB2367. This is reaffirmed through Laws 2024, 2nd Regular Session, Ch. 121 (HB2367), the legislative authority and mandate for this current rulemaking. At the Arizona House Natural Resources, Energy & Water Committee Hearing on February 13, 2024, the ADEQ Chief Legislative Liaison testified the Solid Waste Fee Fund is projected to have a negative balance by the end of FY2025 if revenues are not increased. Further, currently approximately only half of the regulated community are paying fees. This has resulted in a situation where current fee payers are subsidizing those who are not paying fees. Ultimately, expenditures from other funds are necessary to keep the program solvent; namely, the Recycling Fund. At the Senate Natural Resources, Energy and Water Committee Hearing on March 14, 2024, the ADEQ Chief Legislative Liaison testified again on the bill, stating these fees are necessary to ensure the program has structural stability. For these reasons, HB2367 was an emergency measure, seeking an immediate effective date so the Agency could begin the rulemaking process as soon as possible. Additionally, HB2367 specifies in the Legislative Intent of the bill that all fees established must be based on "the department's direct and indirect costs associated with the type of activity or facility that is assessed a fee".

As such, this rulemaking seeks to establish a fee program that is fair to all those regulated facilities and entities subject to fees as first directed by the Legislature in 2012 with Laws 2011, 1st regular session, Ch. 220 (HB2705), affirmed by the findings of the State Agency Fee Commission in the Commission's Fee Report, and now mandated pursuant to Laws 2024, 2nd Regular Session, Ch. 121 (HB2367).

II. Solid Waste Programs within the Arizona Department of Environmental Quality have underfunded and unmet mission needs.

AZ-SWP has pressing mission needs due to ongoing staffing and funding shortages. Approximately 30% of known current regulated solid waste facilities have never been inspected by ADEQ. This need for greater inspection and oversight capacity is reinforced by the growing number of facilities in the state, as the number of regulated solid waste facilities has increased 333% since 2012.

Further, ADEQ has been unable to promulgate 12 statutorily mandated solid waste rules for over a decade due to staffing shortages. A.R.S. § 49-761 requires the Department to adopt various rules for solid waste facilities, such as requirements for storing, processing, treating, and disposing of solid waste; best management practices for these facilities; and financial assurance requirements for facility closure. ADEQ is committed to pursuing these rulemakings in the future as staffing and resources allow to further the AZ-SWP mission of ensuring the continued health of our solid waste ecosystem to preserve and promote public health and the environment.

Further, ADEQ will need additional resources to address emerging contaminants such as Polyfluoroalkyl substances (PFAS), which national data suggest may be present at landfills and other types of solid waste facilities. As our understanding and regulatory landscape surrounding PFAS continues to grow and develop, additional resources will be necessary to properly address this evolving issue.

III. Review of solid waste fees structures in other states.

While ADEQ is ultimately guided by its statutory mandate as iterated by HB2367 stating fees established pursuant to the rulemaking be based on the "direct and indirect costs associated with the type of activity or facility that is assessed a fee", ADEQ did survey fee structures and schedules of other states.

ADEQ found that states have a variety of ways through which they fund their solid waste programs. One of the most common funding mechanisms is a disposal surcharge, or tipping fee, levied on waste disposal. The Arizona landfill disposal fee was first established in 1991 by statute at $0.25/ton. Under this rulemaking, this fee is being established in rule and adjusted for inflation to $0.58/ton. Comparatively, other states set their tipping fees at highly variable rates:

- Illinois[1]: $2.00/ton deposited into the Solid Waste Management Fund. To note: this tonnage fee results in approximately $20 million annually, per 2014 EPA reporting.

[1] 415 ILCS 5/22.15

- Indiana[2]: fees range from $0.50 to $0.60 per ton depending on the facility type
- Wisconsin[3]: beginning in 2009, $5.70/ton as an environmental repair fee deposited into the Environmental Repair Fund.
- Utah[4]: establishes variable rates based on waste classification (*See*):
    - Municipal solid waste: $0.13/ton
    - Construction/demolition, waste tires, or petroleum contaminated soil: $0.50/ton
    - Ash, slag, mining waste, or cement kiln dust: $2.50/ton
- Colorado: $0.83/ton solid waste user fee. *See* 6 CCR 1007-2 - 1.7.4. To note: this user fee resulted in $18 million in revenue for CY2022.
- Texas: $0.94/ton. *See* (30 TAC), Sections 330.673 and 326.87.
- Iowa: $4.25/ton into the Solid Waste Account of the Groundwater Protection Fund. *See* §455B.310, 455E.11. To note: this tonnage fee resulted in $8 million in revenue for CY2020.

Another primary source of funding for state solid waste programs is annual general fund appropriations. This was the case for AZ-SWP until 2012. The program support from general fund appropriations can be substantial. For example, a 2014 EPA report found that for Indiana, general fund money covers approximately 37% of annual program costs, approximately $1.6 million, while Wisconsin receives an annual allotment based on Full Time Equivalents.[5] In 2010 New Mexico reported 59% of the state solid waste bureau's budget sources came from the state general fund.[6]

Facility fees are an additional source of revenue. It is pursuant to HB2367 that AZ-SWP is mandated to establish facilities fees based upon the direct and indirect costs associated with the type of activity or facility that is assessed a fee. It is challenging to compare fee schedules between states as regulatory & statutory classification of facilities varies state to state. However, ADEQ surveyed annual operation and facility fees across various states.

- Indiana[7]:
    - Municipal Solid Waste Landfill (MSWLF) or Nonmunicipal Solid Waste Landfill (Non-MSWLF greater than 500 tons per day (TPD) = $45,000
    - MSWLF or Non-MSWLF 250-499 TPD = $25,900
    - MSWLF or Non-MSWLF 100-249 TPD = $12,070
    - MSWLF or Non-MSWLF less than 100 TPD = $3,450

---

[5] EPA, State Funding Mechanisms for Solid Waste Disposal and Recycling Programs, June 2014, Publication No. 905Q14001.
[6] New Mexico Solid Waste Bureau, 2009 New Mexico Solid Waste Annual Report, August 2009.
[7] IC 13-16; IC 13-20-21-3

- Restricted Waste Site 1 = $41,250
- Restricted Waste Site 2 = $35,000
- Restricted Waste Site 3 = $15,000
- Processing Facility = $3,500
- Incinerator
  - Greater than 500 TPD = $40,000
  - 250-499 TPD = $15,000
  - 100-249 TPD = $7,000
  - Less than 100 TPD = $2,000

- Utah[8]: landfills owned by a political subdivision or municipality are subject to an annual fee ranging between $800 to $66,000, depending on the annual tonnage.
  - Various tonnage fees paid by commercial solid waste disposal facility or incinerator
    - Municipal solid waste: $0.13/ton
    - Construction/demolition, waste tires, PCS: $0.50/ton
    - Ash, slag, mining waste, cement kiln dust: $2.50/ton
- Nevada[9]:
  - Initial and annual municipal landfill with:
    - Less than 500 tons/day: $5,000
    - Greater than 500 tons/day: $65,000
  - Initial and annual industrial solid waste landfill with:
    - Less than 500 tons/day: $5,000
    - Greater than 500 tons/day: $20,000
  - Postclosure: 50% of fee for first 5 years, 10% of fee for each year after
  - Permit modification requiring public notice: 50% of initial fee
  - Septage tank pumping contractor: $322 per pumping unit
- Colorado[10]: establishes a fee review schedule at $121/hr with a ceiling for each review activity:
  - Waste design and operating plan: $35,000
  - Transfer station operating plan: $10,000
  - Groundwater monitoring reports: $3,000
  - Waste design/operating plan: $35,000
  - Design & operation plan modification: $25,000
- Illinois[11]: establishes *See*
  - Between 100,000 cubic yards and 150,000 cubic yards disposed per year: $52,630
  - Between 50,000 and 100,000 cubic yards disposed per year: $23,790

---

[8] UT 19-6-119
[9] NAC 444.6395
[10] 6 CCR 1007-2 - 1.7.4
[11] 415 ILCS 5/22.15

- Between 10,000 cubic yards and 50,000 cubic yards disposed per year: $7,260
- If not more than 10,000 cubic yards disposed per year: $1,050

Another common funding mechanism states use to support solid waste management, and specifically for waste tire management and tire recycling programs, is a fee applied to the purchase of every new tire in the state. Arizona also has had a fee on the sale of new tires since the fee was first established in statute in the early 1990s. This is generally a flat fee on each new tire sold in the state. Arizona is different from many other states in that the tire sale fee is a percentage of the sale price of the tire sold, up to an established cap. This rulemaking establishes this fee in statute, preserves the current rate of 2% on each tire sold, and adjusts the cap based on inflation from $2.00 to $4.66. The Arizona new tire sale fee is deposited into the Waste Tire Fund for the purpose of waste tire programs pursuant to A.R.S. § 44-1305. Other state new tire sales fees include:

- Illinois[12]: $2.50 per new or used tire sold
- Indiana[13]: $0.25 per new tire sold
- Ohio[14]: $1.00 per new tire sold. To note: $0.50 of this fee is set aside for a special Water Conservation District Assistance Fund, and is set to sunset June 30, 2026.
- Colorado[15]: $.55 per new tire sold
- Alabama[16]: $1 per new tire sold
- Alaska[17]: $2.50 per new tire sold
- Mississippi[18]: $1 per tire sold under 24 inches, $2 for per tire sold over 24 inches
- Kentucky[19]: $2 per new tire sold
- Louisiana[20]: $2.25 per each passenger/light truck tire sold, $5 per each medium truck tire sold, and $10 per each off-road tire sold

Through the course of surveying other state solid waste fee structuring and funding mechanisms, ADEQ found that both the fee levels, fee scheduling, and funding sources for solid waste programs vary greatly. A portion of states fund their solid waste programs through varying levels of general fund appropriations. Others rely on a particular fee mechanism as a primary funding source for overall solid waste program operations, such as a higher user (tonnage or tipping) fee.

[20] La. Admin. Code tit. 33 § VII-10519

Further, the regulatory and statutory classification of facilities can vary state-to-state and the role and level of regulatory involvement of state environmental agencies varies state-to-state. Some states establish fee levels for certain classes of facilities that are much higher than those proposed in this rulemaking, such as landfill annual registration fees. Based on facility classification, some states charge fees for program activities that ADEQ does not charge fees for, such as groundwater monitoring reports. Further, as ADEQ proposes fee levels that are commensurate with the direct and indirect costs to the Agency with the type of activity or facility that is assessed a fee, some of the proposed fees by ADEQ are higher than those other states often charge for these class of facilities, such as for used oil handlers.

While surveying fee levels and funding structures of other states is informative to the Agency in establishing a workable and equitable fee program, ultimately ADEQ was guided by its statutory mandates as discussed above to establish fees based upon the Agency's direct and indirect costs.

IV. ADEQ is committed to expenditure and usage of fees to their intended purposes.

ADEQ appreciates the need from stakeholders for assurance of enhanced transparency and accountability to ensure fees are used for their intended purposes. ADEQ is committed to the success and efficacy of the AZ-SWP. The statutorily prescribed uses of program funds that ADEQ has access to for the administration of AZ-SWP guide the Agency in the use of those funds. It is those uses of funds as stated in law that are the intended purpose of revenues generated from fees that ADEQ is committed to. For AZ-SWP, the two relevant funds are:

1. Solid Waste Fee Fund (SWFF): A.R.S. § 49-881 both establishes the SWFF and prescribes what those funds may be used for. A.R.S. § 49-881(A) lists all the specific fees throughout the Solid Waste Program that are directed to the SWFF. A.R.S. 49-881(B) states all the fees collected pursuant to subsection (A) may be expended only for the solid waste control programs associated with the fee. As such, ADEQ is mandated under law to expend those fee funds deposited into the SWFF only for those solid waste programs associated with the fees.

2. Recycling fund: As with the SWFF, funds in the Recycling Fund are only for those statutorily prescribed purposes as listed under law. A.R.S. § 49-837(B) establishes the monies in the Recycling Fund shall be used for the administration of the Arizona Recycling Program, including distribution of recycling grants, public information and public education, and technical assistance programs. While ADEQ is further authorized to expend from the Recycling Fund on solid waste control program activities, ADEQ is committed to apportioning the greatest portion feasible of the Recycling Fund towards grants and contracts and other stated uses to further the mission of the Arizona Recycling Program.

ADEQ is committed to continual program oversight and accountability. Program leadership analyzes the effectiveness of programs annually and reports to the Director on program revenues and costs as necessary to meet ADEQ's statutory mandates. However, while ADEQ is committed to the usage of funds from the SWFF and Recycling Fund for their stated purposes, appropriation authority rests solely with the state legislature.

V. There is no federal corollary to assume solid waste regulatory management in the absence of a state solid waste program.

There is not a single, overarching "federal solid waste management program" in the United States. Instead, the primary federal law governing solid waste management is the Resource Conservation and Recovery Act (RCRA). RCRA establishes certain minimum standards and a basic framework for managing hazardous and non-hazardous solid waste, including regulations for design and operation of landfills. Specifically for non-hazardous solid waste, Subtitle D of RCRA encourages states to develop comprehensive plans to manage industrial solid waste and municipal solid waste, sets criteria for municipal solid waste landfills and other solid waste disposal facilities, and prohibits the open dumping of solid waste.

However, states play the primary role in implementation, monitoring, and compliance of RCRA requirements. States play the lead role in implementing non-hazardous waste programs under Subtitle D of RCRA. EPA has developed regulations to set minimum national technical standards for how disposal facilities should be designed and operated. States issue permits and conduct inspections and oversight to ensure compliance with EPA and state regulations.

DEPARTMENT OF WATER RESOURCES
Title 12, Chapter 15

Amend: Article 7; R12-15-701; R12-15-710; R12-15-711; R12-15-720; R12-15-723; R12-15-724; R12-15-725

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: November 5, 2024; December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 18, 2024

SUBJECT: **DEPARTMENT OF WATER RESOURCES**
Title 12, Chapter 15

Amend: Article 7; R12-15-701; R12-15-710; R12-15-711; R12-15-720; R12-15-723; R12-15-724; R12-15-725

Staff Update:

This rulemaking was previously considered at the October 29, 2024 Study Session and November 5, 2024 Council Meeting. Due to robust discussion, and to ensure sufficient time was given to accept comments from the public pursuant to A.R.S. § 41-1052(I), at the November 5, 2024 Council Meeting the Council voted to table consideration of this rulemaking to the current meeting cycle. Council staff has continued to collect public comments submitted directly to the Council. Public comments through November 18, 2024 have been included in the materials for the Council's reference. Additionally, on November 8, 2024, Council staff received a follow-up memorandum from the Department of Water Resources (Department) in response to questions/concerns raised during the last meeting cycle, which is also included in the final materials for the Council's reference.

Summary:

This regular rulemaking from the Department seeks to amend seven (7) rules in Title 12, Chapter 15, Article 7 regarding Assured and Adequate Water Supply. Specifically, the

Department indicates the rule changes seek to address challenges that water providers face in pursuing a new Designation of 100-year Assured Water Supply (Designation) under the current rules. The Department indicates this rulemaking affects the Phoenix and Pinal active management areas (AMAs) only. The Department states it does not repeal nor substantively revise any current Assured Water Supply (AWS) rules. Rather, the Department indicates the rulemaking amends the AWS rules to create an additional, alternative path for a water provider to obtain a designation in AMAs where physical availability of groundwater cannot be demonstrated in the AWS model. The Department indicates the alternative designation of Assured Water Supply (ADAWS) concept creates a voluntary path to designation for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining.

1. **<u>Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?</u>**

   The Department cites both general and specific statutory authority for these rules.

2. **<u>Do the rules establish a new fee or contain a fee increase?</u>**

   This rulemaking does not establish a new fee or contain a fee increase.

3. **<u>Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?</u>**

   The Department indicates it did not review any study relevant to this rulemaking.

4. **<u>Summary of the agency's economic impact analysis:</u>**

The ADAWS rulemaking seeks to create an additional pathway for water providers to voluntarily seek a designation. The rulemaking creates a new opportunity for water providers who had previously faced challenges in achieving designation and reduces the regulatory burden for designation modification via an expedited process. Benefits for those directly affected by ADAWS are expected to be substantial when compared to a designation under the traditional rules or no designation: the monetary benefit afforded to providers through the groundwater allowance volume granted in ADAWS is significant and addresses a key financial barrier that has challenged water providers seeking to achieve a traditional designation of assured water supply. The costs associated with the rulemaking are expected to be minimal; however, state agencies such as the Department may incur costs when hiring additional staff to process an increase in applications.

5. **<u>Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?</u>**

The Department has determined that any costs associated with ADAWS are outweighed by the benefits when compared to the available alternatives.

6. **What are the economic impacts on stakeholders?**

Persons who will be directly affected by, bear the costs of, or directly benefit from this Assured Water Supply rule modification for the Phoenix and Pinal active management areas (AMAs) include state agencies such as the Department; political subdivisions, including counties, cities, and towns that seek economic development or provide municipal water, private municipal water providers, as well as the Central Arizona Groundwater Replenishment District; land subdivision developers; and homeowners and homebuyers in the Phoenix and Pinal AMAs. Generally, costs for those directly affected by the voluntary pursuit of an ADAWS are expected to be minimal compared to the currently available alternatives. State agencies may incur costs when hiring additional staff necessary to process an increase in applications.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department indicates there were no changes between the Notice of Proposed Rulemaking published in the Administrative Register on August 23, 2024 and the Notice of Final Rulemaking now before the Council for consideration.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Department indicates it received 233 total comments related to this rulemaking, with 226 of those comments in support of the ADAWS rules. The Department indicates four comments asked questions or raised concerns with the rulemaking, and three comments were neutral. The Department indicates examples of supportive comments include statements that the implementation of ADAWS will ensure that both current and future developments are supported by a reliable water portfolio and that ADAWS will facilitate a sustainable water supply that is crucial to long-term growth and economic stability. The comments received by the Department and the Department's responses are summarized in Section 12 of the Preamble to the Notice of Final Rulemaking. Additionally, copies of the public comments received have been included in the final materials for the Council's reference. Council staff believes the Department has adequately responded to public comments related to this rulemaking.

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially

similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates, while the rules do not require a permit, they do describe the criteria for a designation of Assured Water Supply, which is a license. The Department states a designation is a general permit authorized under A.R.S. § 45-576. As such, Council staff believes the Department is in compliance with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates there is no corresponding federal law.

11. Conclusion

This regular rulemaking from the Department seeks to amend seven (7) rules in Title 12, Chapter 15, Article 7 regarding Assured and Adequate Water Supply. Specifically, the Department indicates the rule changes seek to address challenges that water providers face in pursuing a new Designation of 100-year Assured Water Supply (Designation) under the current rules. The Department indicates this rulemaking affects the Phoenix and Pinal AMAs only. The Department states it does not repeal nor substantively revise any current AWS rules. Rather, the Department indicates the rulemaking amends the AWS rules to create an additional, alternative path for a water provider to obtain a designation in AMAs where physical availability of groundwater cannot be demonstrated in the AWS model. The Department indicates the ADAWS concept creates a voluntary path to designation for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining.

The Department is seeking an immediate effective date for these rules pursuant to A.R.S. § 41-1032(A)(4) and (5) stating the rules provide a benefit to the public and a penalty is not associated with a violation of the rule and the Department is adopting rules that are less stringent than the rules that is currently in effect and do not have an impact on the public health, safety, welfare or environment, and do not affect the public involvement and public participation process. Council staff believes the Department has provided adequate justification for an immediate effective date.

Council staff has received numerous written comments pursuant to A.R.S. § 41-1052(I) both in support of, and opposition to, the Department's rulemaking. Copies of these written comments are included with the final materials for the Council's reference. As additional comments are submitted, they will also be circulated to the Council members.

Council staff recommends approval of this rulemaking.

KATIE M. HOBBS
GOVERNOR

THOMAS BUSCHATZKE
DIRECTOR

ARIZONA DEPARTMENT OF WATER RESOURCES
1110 WEST WASHINGTON STREET, SUITE 310
PHOENIX, ARIZONA 85007

Governor's Regulatory Review Council
100 N. 15th Avenue Suite 302
Phoenix, AZ 85007

Re: Arizona Department of Water Resources Rule Package

Dear Governor's Regulatory Review Council:

Pursuant to A.A.C. R1-6-202(A), the Arizona Department of Water Resources ("ADWR") submits this final rule package to the Council for placement on the Council Agenda. This rule package amends R12-15-701, R12-15-710, R12-15-711, R12-15-720, R12-15-723, R12-15-724 and R12-15-725. ADWR requests that these rules be placed on the agenda for the Council's November 5, 2024 meeting.

ADWR provides the following information regarding the rule package, as required by A.A.C. R1-6-202(A):

a) The record for this rulemaking closed on September 23, 2024 at 5:00 p.m.

b) All the amendments are justified under A.R.S. § 41-1027(A)(7) because they will not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of persons regulated.

c) The rulemaking activity does not relate to ADWR's five-year rule review report.

d) ADWR certifies that that the preamble discloses a reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.

e) Additionally, the following documents are included in this rule package as required by A.A.C. R1-6-202(A)(1)(e) in the following order:

1. This cover letter.
2. The Notice of Final Rulemaking required by A.A.C. R1-6-202, including the preamble, table of contents for the rulemaking, and text of each rule (**attachment A1**).
3. The written comment received by the agency concerning the rulemaking (**attachment A2**).

4. A copy of the general and specific statutes authorizing the rule, including relevant statutory definitions (**attachment A3**).
5. The Economic, Small Business and Consumer Impact Statement (**attachment A4**).
6. The Certification of submission of the Economic, Small Business and Consumer Impact Statement to the JLBC (**attachment A5**).
7. A copy of the existing rules (**attachment A6**).
8. Written approval for an exemption to the rulemaking moratorium from Patrick J. Adams, Water Policy Advisor for Governor Hobbs dated August 7, 2024 (**attachment A7**).
9. Written final approval for an exemption to the rulemaking moratorium from Patrick J. Adams, Water Policy Advisor for Governor Hobbs dated October 7, 2024 (**attachment A8**).

Thank you for your assistance in this matter. If you have any questions or need additional information, please contact Emily Petrick, ADWR Deputy Counsel, at (602) 771-8472.

Sincerely,

Thomas Buschatzke
Director

Enclosures: as listed

NOTICE OF FINAL RULEMAKING

TITLE 12. NATURAL RESOURCES

CHAPTER 15. DEPARTMENT OF WATER RESOURCES

PREAMBLE

1. Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039(B) by the governor on:

October 7, 2024

2. Article, Part, or Section Affected (as applicable)	**Rulemaking Action**
Article 7, Assured Water Supply	Amend
R12-15-701	Amend
R12-15-710	Amend
R12-15-711	Amend
R12-15-720	Amend
R12-15-723	Amend
R12-15-724	Amend
R12-15-725	Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 45-105(b)(1) and 45-576(H)

Implementing statute: A.R.S. § 45-576

4. The effective date of the rule:

This rule shall become effective immediately after a certified original and preamble are filed in the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is _________.

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

To provide a benefit to the public and a penalty is not associated with a violation of the rule and to adopt a rule that is less stringent than the rule that is currently in effect.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Rulemaking Docket Opening: volume 30 A.A.R. page 2640, Issue Date: August 23, 2024, Issue Number: 34, File number: R24-156

Notice of Proposed Rulemaking: volume 30 A.A.R. page 2623, Issue Date: August 23, 2024, Issue Number: 34, File number: R24-154

6. The agency's contact person who can answer questions about the rulemaking:

Name: Emily Petrick

Website: www.azwater.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Prior to seeking approval of a plat or a public report, A.R.S. § 45-576 requires the developer of a subdivision to obtain a certificate of Assured Water Supply ("certificate") from the Arizona Department of Water Resources ("ADWR") or a commitment of service from a municipal provider with a designation from ADWR that its service area has an Assured Water Supply ("designation"). In order to obtain a certificate or a designation, an applicant must satisfy several criteria, set forth in the Arizona Administrative Code, Title 12, Chapter 15, Article 7. Among those criteria is a requirement that any water supply be physically available for 100 years, pursuant to A.A.C. R12-15-716.

To demonstrate physical availability of groundwater, "the applicant shall submit a hydrologic study, using a method of analysis approved by the Director, that accurately describes the hydrology of the affected area" which demonstrates that after 100 years of pumping in the area, including pumping to serve the demands in the application, water will not exceed a certain depth below land surface (referred to in the rule as "100-year depth-to-static water level"). A.A.C. R12-15-716(B)(2). In areas where ADWR has a numerical groundwater flow model, including all of the initial active management areas ("AMAs") the applicant is expected to use ADWR's most recent model and the associated Assured Water Supply projection run as the method of analysis.

In ADWR's 2019 Assured Water Supply projection run for the Pinal AMA ("2019 Pinal model"), the model was unable to simulate the withdrawal of all groundwater to meet demands over the 100-year projection period, resulting in substantial "unmet demands" throughout the Pinal AMA. Additionally, the 100-year depth in a large region of the AMA exceeded the 1,100-foot limit for the Pinal AMA set forth in A.A.C. R12-15-716(B)(2)(b). As a result, the 2019 Pinal model could not be used to support applications for Assured Water Supply determinations, including designations and certificates, based on groundwater in the Pinal AMA. Although certain statutory and regulatory changes have been made to allow some flexibility, subdivision growth outside designations

has substantially slowed in the Pinal AMA.

In June 2023, ADWR released an updated groundwater flow model for the Phoenix AMA, including an Assured Water Supply projection run ("2023 Phoenix model"), which, like the 2019 Pinal model, was unable to simulate the withdrawal of all groundwater necessary to meet demands over the 100-year projection period, and showed exceedance of the 1,000-foot depth limit for the Phoenix AMA set forth in A.A.C. R12-15-716(B)(2)(a). As with the 2019 Pinal model, the 2023 Phoenix model could not be used to support applications for Assured Water Supply determinations, including designations and certificates, based on groundwater in the Phoenix AMA.

Although the program rules allow for the use of supplies other than groundwater withdrawn in the AMA, there are substantial barriers to obtaining those supplies and the infrastructure necessary to satisfy the rule requirements. Groundwater has been inexpensive as an Assured Water Supply source, relative to other water supplies. Additionally, many alternative water supplies face legal, financial and infrastructure barriers.

For example, surface water supplies from an in-state stream would likely require the acquisition of land with an appurtenant right to retire the existing use, as well as an authorization by ADWR of the severance and transfer of the right for use on the intended lands. Any infrastructure required to divert from the stream and deliver the water to the proposed subdivision or service area may be subject to separate permitting requirements, financing challenges, and time for construction. The acquisition of on-River Colorado River water for use in central Arizona (to be delivered through the CAP system) requires a recommendation from ADWR in order to begin the process with the Secretary of the Interior to transfer the contract entitlement – which faces significant hurdles that have yet to be completed. The transportation of groundwater from other basins into the Phoenix and Pinal AMAs is subject to the requirements in Title 45, Chapter 2, Article 8.1, but also faces substantial infrastructure hurdles. The most cost-effective method, delivery through the CAP system, requires approval of and/or agreements with the Secretary and the Central Arizona Water Conservation District ("CAWCD"). At this time, such agreements cannot be finalized until the Secretary approves certain water quality requirements and an agreement with CAWCD. Even for the use of effluent, a water treatment facility must be constructed and, if the water will not be used directly after treatment, an underground recharge facility and recovery wells must be permitted and constructed. Financing for significant infrastructure costs for all of the options described is often dependent on obtaining some or all of the necessary approvals, and the time for construction varies depending on the nature of the project.

Additionally, ADWR must consider all water supplies in the system that are used to serve all water demands. If a municipal provider is relying on groundwater withdrawn within the AMA to serve its customers in combination with other supplies (often referred to as "commingling"), the groundwater must satisfy the Assured Water Supply criteria, including physical availability. Alternatively, sufficient alternative supplies must be obtained to replace all groundwater use. Therefore, an application for a certificate or a designation under the current rules would require the replacement of all AMA groundwater supplies in the municipal provider's system in order to satisfy the physical availability criteria in the Phoenix and Pinal AMAs.

Some stakeholders have suggested that ADWR could consider only the availability of the new supplies relative to the new demands, particularly for certificate applicants. However, such an approach ignores the reality that when the groundwater supply is no longer

available to that provider, the municipal provider will be forced to reduce deliveries to *all* customers. Absent some legal constraint that requires the delivery of the alternative supply to the new subdivision (such as a surface water right that is appurtenant only to the subdivision lands), the new subdivision would be subject to the shortage associated with the groundwater supply just like all other customers in the service area. Therefore, even a developer that is willing to work with a municipal provider to bring in new, non-groundwater supplies cannot proceed with subdivision development if the municipal provider will continue to serve some volume of groundwater to the subdivision.

Governor's Water Policy Council Recommendation:

On January 9, 2023, Governor Katie Hobbs issued an Executive Order to establish the Governor's Water Policy Council ("Council"). The Council encompassed a diverse group of stakeholders with representation from agriculture, water providers, Tribes, executive agency cabinet officers, cities, the business community, industry, conservation organizations, university experts, and the Arizona legislature. Governor Hobbs charged the Council with two objectives, one of which was to produce a package of policy recommendations which strengthen the Assured Water Supply Program and ensure the protection of groundwater resources while enabling continued, sustainable growth.

The Council and its committees met 20 times between May 17, 2023, and November 29, 2023. Members were asked to reach out to their constituents throughout the process to receive additional perspectives on the Assured Water Supply Program, and to bring those perspectives to each meeting. The Assured Water Supply Committee met seven times over the course of six months to develop recommendations for the Council for changes to Assured Water Supply policies - legislatively, administratively, or by executive action - to address the challenges revealed by Assured Water Supply modeling projections, while continuing to:

- Strengthen the integrity of the Assured Water Supply program.
- Protect consumers and aquifers.
- Ensure future growth is not reliant on mined groundwater.

The Committee developed several Assured Water Supply Program recommendations that were approved by the Council as recommendations to the Governor, including a recommendation to amend the Program rules to create an alternative means to obtain a designation of Assured Water Supply, creating a pathway for water providers to grow incrementally on alternative supplies while reducing groundwater mining. This proposed rulemaking is an implementation of that recommendation.

Given the commingling constraints and the legal barriers and costs of acquiring alternative water supplies, the Committee focused on the municipal provider, and the potential for designation, as the path most suited to transitioning to non-groundwater supplies in the Phoenix and Pinal AMAs. However, many undesignated municipal providers with anticipated growth also have existing "legacy" customers that pre-date the Assured Water Supply rules (first adopted in 1995), or even the 1980 Groundwater Management Act. These legacy customers have relied on groundwater without any replenishment requirements or associated costs. Therefore, a sudden imposition of replenishment requirements for all groundwater use would create a financial shock for the municipal provider and, depending on how those costs are managed, potentially their customers. This financial impact is addressed in the rulemaking through the granting of a groundwater allowance in R12-15-724 and R12-15-725. While there may be additional hurdles

for private water companies subject to regulation by the Arizona Corporation Commission, the initial costs of enrollment as a member service area and the overall costs of replenishment of groundwater uses apply to cities and towns, as well as private water companies.

In the development of a path to designation, members of the Committee recognized the importance of replacing existing groundwater use in addition to acquiring new supplies for growth. This component is significant because this alternative path to designation allows the applicant to demonstrate an assured water supply by showing it will reduce that groundwater use over time despite current projections. The declining availability of groundwater in the Phoenix and Pinal AMAs necessitates a shift from reliance on groundwater to alternative supplies for existing uses as well as any new growth. Moreover, while the alternative path to designation might include a component to reduce the financial burden of replenishment, the most cost-effective way to do so is by using an alternative supply in the first place.

Rule Amendments:

The alternative designation of Assured Water Supply (“ADAWS”) concept creates a pathway for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining. Existing groundwater pumping is grandfathered into the Designation. Physical availability is grandfathered, and a groundwater allowance is granted to provide consistency with the goal without replenishment. “New Alternative Water Supplies” can be added to the Designation portfolio. Groundwater can be used in the interim period before supplies are delivered. A portion of the new supplies (25%) will be used to substitute for existing groundwater pumping to facilitate a transition away from groundwater.

R12-15-701:

Two new definitions are added. “New Alternative Water Supplies” is a defined term used in the ADAWS concept and rule language. “Unreplenished groundwater” is a defined term intended to capture legacy groundwater uses that are not subject to replenishment because they predate the Assured Water Supply rules. The term is used for purposes of calculating the groundwater allowance for ADAWS designations pursuant to the amendments in R12-15-724 and R12-15-725.

R12-15-710:

The groundwater volumes associated with existing certificates and existing groundwater pumping and non-groundwater recovered outside the area of impact based on annual reporting for 2023 will be “grandfathered in” for purposes of physical availability. Analyses of Assured Water Supply are not included. The volume of groundwater and stored water recovered outside the area of impact calculated in R12-15-710(H) and (I) represents a volume of water that will be deemed physically available for an applicant for a new designation of assured water supply. Although the volume calculated in R12-15-710(H) and (I) uses estimated demand associated with unbuilt certificates of assured water supply as a metric for the total volume that will be deemed physically available, the rules do not require or provide for any transfer or pledging of those certificates to the applicant’s designation. In the event a designation expires or is otherwise terminated, any certificate previously issued in the designated provider's service area would remain in effect.

The grandfathered volume is subject to reduction under the provisions related to alternative supplies. New growth will be supported

by alternative supplies. The ADAWS applicant must enroll as a member service area of the CAGRD. Pursuant to Arizona Senate Bill SB 1181 (2024), the municipal provider may exercise an option to transition customers that are already enrolled as member lands from their member land status into the member service area status over a ten-year period. The water provider will also receive a lump sum groundwater allowance, based on deliveries in 2023. The water provider will then decide how to manage groundwater allowance usage, water supply deliveries, CAGRD reporting, and billing individual customers for CAGRD assessments.

"New Alternative Supplies" refers to water supplies other than groundwater withdrawn in the Phoenix or Pinal AMA (subject to the location of the application) that were not served in 2023, including effluent, surface water, CAP water, and transported groundwater. ADWR has acknowledged that if an ADAWS applicant (including for a modification) has an existing water supply that is recovered outside the area of impact (and therefore part of the grandfathered groundwater volume), then the municipal provider may subsequently construct and obtain a permit for a recovery well within the area of impact of storage. In such a scenario, the water supply to be recovered within the area of impact becomes a New Alternative Water Supply.

New Alternative Supplies may be delivered directly or stored and recovered within the area of impact. They may be added to the Designation to serve new growth. The grandfathered groundwater volume will be reduced by 25% of the new supplies to facilitate an incremental transition away from groundwater over time. In the case of a New Alternative Water Supply that is created by the establishment of a recovery well within the area of impact of storage, the grandfathered groundwater volume will be reduced by 25% of the New Alternative Supply thus created.

New Alternative Supplies must meet AWS requirements for designations, including physical, continuous, and legal availability and financial capability. Adding New Alternative Supplies to the Designation that will require future infrastructure construction would be evaluated under ADWR's existing rules for designations. The provider must include a construction plan and schedule demonstrating that construction will be completed in a timely manner. All major permits and approvals and environmental compliance necessary for the unbuilt water infrastructure must be completed before the designation is issued.

R12-15-711:

The term of an ADAWS designation issued under R12-15-710(H) or (I) may not be greater than 15 years. The rule is also being amended to allow for an "expedited modification" during the term of the designation to include an additional non-groundwater supply. For an expedited modification, ADWR would review only AWS requirements for that additional supply (and the associated reduction in the grandfathered groundwater volume) and the demand schedule. The determinations regarding all other water supplies in the most recent designation would not be subject to review. This rule amendment applies to all designated providers, not just those with an ADAWS designation. This will reduce the administrative burdens for ADWR and applicants, without reducing protections to consumers.

R12-15-720:

ADWR's current financial capability rule for designations allows for flexibility on financing for cities and towns. Under the rule, a city or town may submit evidence demonstrating that "financing mechanisms are in place to construct adequate delivery, storage and treatment works in a timely manner." This flexibility is extended to private water companies. In recent years, private water

companies have identified alternative financing mechanisms that may not require approval by the Arizona Corporation Commission or otherwise fall within a strict reading of the financial capability rule. Extending this flexibility to private water companies acknowledges the constant changes in financing mechanisms while maintaining consumer protections.

R12-15-723:

To ensure that ADAWS provisions, including the groundwater allowance, could be fairly applied within the Pinal AMA, ADWR needed to address historic extinguishment credits in the Pinal AMA. The original rules adopted in 1995 provided for generous calculation of extinguishment credits in the Pinal AMA, including a volume of water that renews annually, and any unused volume "rolls over" for use in subsequent years. In combination with a similarly generous groundwater allowance for certificates, the resulting volume could exceed the actual demands of the subdivision. In 2007, ADWR modified the rules for consistency with the management goal in the Pinal AMA, revising the calculation of extinguishment credits and groundwater allowances in the Pinal AMA to a lump sum. Inclusion of the groundwater allowances associated with certificates issued prior to 2007 in the groundwater allowance for ADAWS could potentially reduce other replenishment requirements in the service area. To avoid this outcome, while maintaining the status quo, R12-15-723 is modified to clarify that in the Pinal AMA, such extinguishment credits will maintain their value but may only be applied to groundwater use within the subdivision to which they are pledged.

R12-15-724 and R12-15-725:

As mentioned above, the rules for groundwater allowances in the Phoenix AMA and in the Pinal AMA are modified to allow for a volume of groundwater to be used consistent with the management goal and not subject to replenishment. The provider may choose one of two calculations, both based on water deliveries in calendar year 2023. The municipal provider may decide how to manage this groundwater allowance. For example, a municipal provider could choose to use primarily groundwater throughout its service area in the first several years before delivering a New Alternative Supply and to use the groundwater allowance to avoid or reduce replenishment requirements. Another municipal provider might elect to preserve the groundwater allowance and apply it to legacy customers to reduce or avoid replenishment costs that might otherwise be passed on to those legacy customers.

Conclusion:

ADWR held three informal public meetings to discuss this proposed rule language and an additional rule amendment to allow a similar path for certificates based on commingled water supplies ("Commingling proposal"). At the first public meeting on April 22, 2024, ADWR described both the ADAWS concept and the Commingling proposal, as well as rule language that would implement both, answered questions, and invited written comments. At the second informal public meeting on May 1, 2024, ADWR allowed an opportunity for public comments. At the third informal public meeting on July 26, 2024, ADWR provided background information, a summary of comments received and ADWR's responses, and a description of changes to the rule language resulting from comments. Additionally, ADWR announced that the ADAWS concept would be proposed in a separate rulemaking from the Commingling proposal, though both rulemaking packages are intended to proceed in parallel. A formal public hearing on the Proposed Rulemaking was held on September 23, 2024 where ADWR received oral comments and written comments. Those comments provided general support for the rulemaking and are discussed in Section 12 of this Notice.

The ADAWS rulemaking addresses the challenges that non-designated water providers have had in obtaining a designation. It

addresses previously unconstrained groundwater pumping that is not subject to the Assured Water Supply Program, reduces unmet demand by ultimately reducing groundwater pumping over the 100-year period, and facilitates incremental growth and a steady transition from groundwater to alternative supplies such as surface water, effluent, or transported supplies. ADWR anticipates that at least three municipal providers in the Phoenix and Pinal AMAs will apply for a designation under the ADAWS concept in the coming years. Additional municipal providers may also pursue the ADAWS designation based on the success of "early adopters."

The ADAWS concept will ensure that all new growth is supported by water supplies, other than groundwater withdrawn in the Phoenix and Pinal AMAs, while reducing and replenishing existing groundwater pumping. Existing customers of municipal providers who are designated under ADAWS will also benefit because their municipal provider will be less reliant on groundwater supplies and will have a more diverse portfolio. Designating these municipal providers will also subject all water uses in their respective service areas to the Assured Water Supply requirements – not just subdivisions. The replacement of existing groundwater uses, combined with the increase in replenishment for legacy groundwater uses, will also likely benefit other residents throughout the basin by extending the availability of groundwater in the Phoenix and Pinal AMAs.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

None

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

10. A summary of the economic, small business, and consumer impact:

The ADAWS proposed rulemaking seeks to address challenges that water providers face in pursuing a new Designation of 100-year Assured Water Supply (designation) under the current rules. This rulemaking affects the Phoenix and Pinal AMAs only. It does not repeal nor substantively revise any current AWS rules. Rather, it amends the AWS rules to create an additional, alternative path for a water provider to obtain a designation in AMAs where physical availability of groundwater cannot be demonstrated in the Assured Water Supply (AWS) model. The ADAWS concept creates a voluntary path to designation for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining.

Persons who will be directly affected by, bear the costs of, or directly benefit from this AWS rule modification for the Phoenix and Pinal AMAs include: (1) state agencies such as the Department; (2) political subdivisions, including counties, cities, and towns that seek economic development or provide municipal water, private municipal water providers, as well as the CAGRD; (3) land subdivision developers; and (4) homeowners and homebuyers in the Phoenix and Pinal AMAs.

The ADAWS rulemaking seeks to create an additional pathway for water providers to voluntarily seek a designation; the alternatives to ADAWS include seeking a designation under the traditional designation rules or continuing without a designation. Therefore, specific costs, benefits and impacts in the Economic Impact Statement were assessed against these two alternatives.

Benefits for those directly affected by ADAWS are expected to be substantial when compared to a designation under the traditional rules or no designation. ADAWS allows for additional development within a water provider's service area by a granting a volume

of physically available groundwater and groundwater allowance while also facilitating a reduction in groundwater use over time and ensuring that some previously unreplenished groundwater pumping within a provider's service area will be replenished. ADWR has analyzed the monetary benefit afforded to providers through the groundwater allowance volume granted in ADAWS, as compared to the groundwater allowance granted under the traditional designation rules. The benefit is significant and addresses a key financial barrier that has challenged water providers seeking to achieve a traditional designation of assured water supply.

Generally, costs for those directly affected by voluntary pursuit of an ADAWS are expected to be minimal compared to the currently available alternatives: a designation under the traditional rules or no designation. However, because the proposed ADAWS rules create a new opportunity for water providers who had previously faced challenges in achieving designation, and creates an expedited process for all designated providers that reduces the regulatory burden for designation modification, state agencies such as ADWR may incur costs when hiring additional staff necessary to process an increase in applications.

Any costs associated with ADAWS are outweighed by the benefits when compared to the available alternatives.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Not applicable

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment: ADWR received 233 total comments, with 226 of those comments in support of the ADAWS rules. Four comments asked questions or raised concerns with the rulemaking, and three comments were neutral. Examples of supportive comments include statements that the implementation of ADAWS will ensure that both current and future developments are supported by a reliable water portfolio and that ADAWS will facilitate a sustainable water supply that is crucial to long-term growth and economic stability.

Response:

ADWR appreciates the large number of supportive comments.

Comment: Five water providers expressed support for the ADAWS rules, with two expressing a desire to apply for an ADAWS designation expeditiously.

Response:

ADWR appreciates the support and is pursuing an immediate effective date for the proposed rules. ADWR has also begun meeting with water providers interested in pursuing an ADAWS designation to discuss the application process.

Comment: Developers, and water providers interested in pursuing ADAWS, requested removing the 25% reduction in the groundwater calculation or reducing the percentage considerably ((including a request that it be reduced to 4% and below). Some water providers interested in pursuing ADAWS, and some developers, recommended limiting the 25% reduction in the groundwater calculation to no more than the unreplenished groundwater use within the ADAWS provider's service area.

Response:

The ADAWS rules provide an option for designation if physical availability of groundwater cannot be demonstrated through hydrologic modeling. R12-15-710(H) deems a volume of groundwater as physically available according to the calculation in the rule.

The percentage reduction in the calculation of physically available groundwater must strike a balance between supporting new growth and reducing existing and approved groundwater uses in the long-term to provide an assured water supply. A reduction of only 4% would likely have little effect on ensuring physical availability of groundwater and would not offer sufficient protection to consumers. Under current assured water supply rules (and without the ADAWS rules), if a water provider seeking a designation is unable to demonstrate physical availability of groundwater through a hydrologic model, the provider would be required to obtain alternative water supplies sufficient to cover 100% of its demands. This would be significantly more costly to providers than the ADAWS option.

The 25% reduction in the groundwater calculation relates to demonstrating physical availability of groundwater, regardless of whether the groundwater is replenished or unreplenished (which relates to consistency with the management goal). Initial ADAWS applications and designations are unlikely to include large volumes of New Alternative Water Supplies. ADWR can evaluate the program over time, as well as aquifer conditions in the Phoenix and Pinal AMAs, and may consider creating a maximum volume or other limitation on the 25% reduction in the groundwater calculation.

In response to the suggestion that a 4% reduction in groundwater use is appropriate because the recent Phoenix AMA assured water supply model run shows that 4% of groundwater demands are unmet, this does not address the larger deficit in the Pinal AMA, nor does it acknowledge that the unmet demand is concentrated in the areas where growth is likely to occur in the Phoenix AMA, particularly within ADAWS-eligible service areas.

Comment: Several commenters refer to the 25% reduction in the physically available groundwater calculation as a "tax" that the Department does not have the authority to authorize. Some developers commented that the 25% reduction in the groundwater calculation is unreasonable and unconstitutional, and reference *Sheetz v. El Dorado County*, California, 601 U.S. 267 (2024).

Response:

The 25% reduction in the physically available groundwater calculation is not a tax. It also imposes no fee on developers. The rules deem an initial volume of groundwater as physically available based on the calculation in the rule, and that volume reduces over time as new growth and supplies are added to the water provider's designation. The ADAWS rules are available when a volume of groundwater cannot be demonstrated as physically available in a hydrologic model. Therefore, it is important that the rules provide a pathway to reducing groundwater use over time as new supplies become available to provide an assured water supply to residents. ADWR will not collect any revenue based on this rulemaking, other than the existing application fees authorized by statute and rule.

Comment: Developers, and some providers interested in pursuing ADAWS, stated they believed effluent was being "taxed" twice, and expressed a desire to see effluent exempt from the 25% reduction.

Response:

The 25% reduction in the groundwater calculation relates to how the initial physically available volume of groundwater will be calculated and reduced over time as new growth and supplies are added to the designation. It does not impose a tax on any of the water supplies.

Comment: Several commentors expressed a desire to see an incentive included in the ADAWS rules for the conversion of agricultural lands to urban uses. Additionally, some water providers requested to allow groundwater volumes resulting from such an "Ag to Urban" program to be added to an ADAWS designation.

Response:

There is no agricultural to urban conversion program at this time, and therefore, this is outside the scope of this rulemaking. If there are additional volumes of groundwater that may be appropriate to include in the future, the rule can be amended in the future to address those groundwater volumes.

Comment: Some commentors stated that the Economic, Small Business and Consumer Impact Statement (EIS) lacks any quantification of the 25% "tax"; that ADWR did not adequately consider alternatives that allocate different portions of the burden to various land uses; and that the Water Infrastructure Finance Authority (WIFA) could have presented less intrusive and less costly alternatives.

Response:

As described in ADWR's responses above, the 25% reduction in the physically available groundwater calculation is not a tax. The ADAWS rules are available when a volume of groundwater cannot be demonstrated as physically available in a hydrologic model. Therefore, it is important that the rules provide a pathway to reducing groundwater use over time as new alternative supplies become available to provide an assured water supply to residents. Water providers are not required to use the ADAWS rules. As described in the EIS, if the ADAWS rulemaking did not move forward, water providers would be in the same position as they are now, but without an additional option. Water providers will retain their existing discretion and authority to determine how costs are managed and distributed. In addition, nothing in this rulemaking prevents or prohibits a water provider from utilizing opportunities offered by WIFA. Suggestions that WIFA be given additional statutory authority are outside the scope of this rulemaking.

Comment: Some commenters stated that ADWR failed to disclose any study justifying limitation of the proposed rules to only the Phoenix and Pinal AMAs.

Response:

The Phoenix and Pinal AMA assured water supply model runs have been publicly available since 2023 and 2019, respectively, as commenters acknowledge. However, the ADAWS rulemaking is limited to the Phoenix and Pinal AMAs based on interests of stakeholders and the discussions to date. If there is interest in pursuing a similar path for other AMAs in the future, ADWR will consider additional rulemakings at that time.

Comment: Some commenters stated that the 25% reduction in the physically available groundwater calculation would mean that "25% of such well and facilities will no longer be deemed 'used and useful' in the eyes of the Arizona Corporation Commission for cost recovery purposes."

Response:

This comment applies to private water providers regulated by the Arizona Corporation Commission. Water providers' wells will likely remain useful for many reasons. Water providers typically must maintain multiple wells, beyond the daily capacity requirements, to provide redundancy and security to a water system. Groundwater wells are also typically necessary to ensure there are backup supplies available. In addition, many water providers may use wells to recover water supplies that have been stored underground.

Comment: Several commentors expressed a desire to see language added to the rules affirming that certificates of assured water supply will be honored should a designation issued under the ADAWS rules lapse.

Response:

This language was included in the preamble and explains the intent of the physically available groundwater calculation in the ADAWS rules. Additionally, A.A.C. R12-15-709 provides the criteria for revoking a certificate. If a certificate is not revoked, it will remain in effect if the designation expires or is revoked.

Comment: Several commentors requested clarification on how the proposed groundwater availability reductions would function.

Response:

R12-15-710(H) provides the calculation for how the volume of groundwater deemed as physically available will be calculated. The starting volume of groundwater is totaled according to R12-15-710(H)(1). Each New Alternative Water Supply included in the designation is multiplied by twenty-five percent. The total of each New Alternative Water Supply (multiplied by twenty-five percent) is then subtracted from the starting volume of groundwater in R12-15-710(H)(1).

Comment: Some commentors expressed a desire to see additional oversight added to the rule language, such as requiring annual reports on whether an ADAWS provider is on track with acquiring New Alternative Water Supplies, building infrastructure to use these supplies, and monitoring of how its groundwater allowance is being utilized.

Response:

All designated providers are required to report according to A.A.C. R12-15-711(A). Under that rule, the Director may require "[a]ny other information the Director may reasonably require to determine whether the designated provider continues to meet the criteria for a designation of assured water supply." ADWR will evaluate whether additional reporting information should be added to annual reporting forms for designated providers with ADAWS volumes to ensure that the provider is continuing to meet the criteria in the rules.

Comment: Some commenters expressed a desire for a shorter initial designation period for an ADAWS provider, especially if the water provider's volume of New Alternative Supply is relatively small. Other comments requested that the designation term not be limited to 15 years.

Response:

A New Alternative Water Supply must meet all assured water supply requirements to be included in the designation, which ensures that speculative water supplies cannot be added to the designation to support growth. The ADAWS designation term was limited to a number of years that is typical of most designation terms. Those initial designation terms may be modified in the future. In addition, water providers may seek an expedited modification during the term to add additional alternative water supplies.

Comment: Some commenters stated that the rules are premature as to the Phoenix AMA based on ongoing discussions of "updating the model," referencing specifically the Phoenix AMA hydrologic model.

Response:

The ADAWS rules do not change the existing groundwater physical availability requirements for hydrologic modeling (in particular, A.A.C. R12-15-716(B)). Applicants seeking to demonstrate physical availability using a groundwater model may continue to apply and will receive a decision from ADWR under those rules. However, as indicated by ADWR previously, ADWR's recent hydrologic modeling projections show insufficient physical availability of groundwater for current applications in the Pinal and Phoenix AMAs. This rulemaking allows applicants to include some groundwater volume in a new designation of assured water supply without attempting to modify or update the current model and without waiting for others to do so.

Comment: Some commenters stated that the cost of the 25% reduction in the physically available groundwater calculation will be borne by landowner/developers/homebuilders and that the EIS does not adequately capture this impact.

Response:

As explained in the EIS, the water provider will decide how water supply costs are passed through to customers. This is the case for all designated providers (including those that do not include groundwater under the ADAWS rules). As water supplies diminish and become more costly, water providers must decide how to pass on those costs to existing water users and new development. Notably, in addition to the water supplies required to support new growth, this rulemaking also requires that new supplies be available to replace existing groundwater pumping. This will increase the certainty and reliability of the water supplies for existing customers, as well as new growth.

Comment: Some commentors expressed concern regarding the impact of the rules on the CAGRD replenishment obligation. Some providers interested in seeking a designation expressed a desire to see minimum reporting requirements established during a ramp up period to offset costs, while others recommended more robust reporting requirements. The CAGRD expressed support for the rulemakings based on their own analysis showing a reduction in future replenishment obligation compared to the replenishment obligation if the providers remain undesignated.

Response:

Minimum reporting requirements for water providers under Member Service Area Agreements are established by CAGRD, and are therefore outside the scope of this rulemaking. ADWR thanks CAGRD for its support.

Comment: Some developers and other commentors state that the rules exceed the Department's authority and state that AMAs having unmet demand is not a classification recognized by Arizona law.

Response:

The ADAWS rules do not define or include the term unmet demand. ADWR uses the term "unmet demand" as a shorthand way to describe water demands that are required to be included in hydrologic models but cannot be simulated in the model because insufficient water is available, and therefore relates to groundwater physical availability under A.A.C. R12-15-716(B). While the ADAWS rules do not define or include the term "unmet demand," A.R.S. § 45-576 would not limit ADWR from referencing this term in future rules because it concerns groundwater physical availability.

The ADAWS rules do not exceed the subject matters in A.R.S. § 45-576. The rules specifically provide optional criteria for demonstrating an assured water supply, as defined by A.R.S. § 45-576(M). Demonstrating physical availability of water supplies has always been incorporated as a crucial component of the assured water supply program. Providing an alternative method to demonstrate the physical availability of groundwater, therefore, is also within the scope of A.R.S. § 45-576(M).

Comment: Some developers and water providers expressed concern regarding the cost of acquiring New Alternative Water Supplies and building infrastructure. Other commenters stated that EIS should have specifically evaluated the cost of certain water supplies.

Response:

Water providers are not required to apply for an ADAWS and may continue to operate under the existing assured water supply rules. Each water provider has a unique water portfolio and unique infrastructure capabilities and may evaluate whether ADAWS provides a suitable path forward. Costs of alternative water supplies are not unique to ADAWS but are relevant to all assured water supply determinations. As groundwater supplies continue to diminish, alternative water supplies will be important for all assured

water supply determinations. Under current assured water supply rules (and without the ADAWS rules), if a water provider seeking a designation is unable to demonstrate physical availability of groundwater through a hydrologic model, the provider would be required to obtain alternative water supplies sufficient to cover 100% of its demands. This would be significantly more costly to providers than the ADAWS option. As the EIS recognizes, it is difficult to predict how many applications may be received and the amount of growth that will be enabled through ADAWS. The water infrastructure that will be needed for alternative water supplies is unique to each water provider, its current portfolio and demand projections. However, ADAWS provides an additional pathway to include a volume of groundwater without hydrologic modeling.

In addition, as the EIS recognizes, the ADAWS rules provide a separate groundwater allowance to water providers (relating to groundwater replenishment), which will significantly reduce the groundwater replenishment costs compared to a pursuing a traditional designation under existing rules. Likewise, A.R.S. § 48-3771(F), et seq., provides flexibility to ADAWS water providers in transitioning to a CAGRD member service area.

Comment: Some commenters requested that ADWR consider the impact of A.R.S. § 48-3771(F) and related provisions.

Response:

ADWR is having conversations with the CAGRD and potentially affected water providers to ensure that the transfer of the groundwater allowance associated with certificates of assured water supply is consistent with statute and does not disrupt existing accounting practices more than necessary. As ADWR, the CAGRD and water providers obtain greater understanding of the implementation requirements, ADWR will consider whether any additional clarification will require a rulemaking, substantive policy statement, or other guidance. ADWR will also ensure that subdivision residents or other landowners are not negatively affected by implementation.

Comment: Some commenters expressed concern about the timeframes associated with the application and review period.

Response:

Licensing timeframes for ADAWS applications will be subject to the same licensing timeframe rules as for other designation applications. Any changes to the licensing timeframe rules are outside the scope of this rulemaking.

Comment: One commenter stated that the potential impacts of development of alternative water supplies needs to be assessed, evaluated, and, where possible, mitigated.

Response:

Any alternative water supplies included in the designation must satisfy existing assured water supply requirements. ADWR does not have authority to require mitigation of impacts.

Comment: Some commenters expressed concern about serious consequences in both cost and regulatory time as it relates to how quickly housing projects can move forward and requested a transition period where housing development may move forward before a designation under ADAWS is issued.

Response:

ADWR may only issue assured water supply determinations that meet assured water supply requirements. ADWR also notes that the costs of eliminating assured water supply requirements for new growth (in other words, allowing growth to occur without demonstrating sufficient water is available to satisfy the new water demand) could be astronomical and would be particularly devastating to individual homebuyers who find themselves without any water supply.

Comment: Some commenters objected to using 2023 as the calculation year for the physically available groundwater volume (under R12-15-710(H)(1)) and for the groundwater allowance (R12-15-724(A)(4)(a)) and instead requested that the water provider be able to use any of the three years prior to its submission of the application.

Response:

ADWR intentionally included a specific year of groundwater pumping to avoid creating any incentive for water providers to increase their groundwater use in the short term to obtain a large starting volume of physically available groundwater or groundwater allowance. For example, using any of the 3 years prior to the application would allow a water provider to stop using existing surface water supplies and effluent, and rely entirely on groundwater for one year, then apply for an ADAWS assuming 100% groundwater use in its system. All of the surface water supplies and effluent would then be "New Alternative Supplies" and the water provider could direct those toward growth while effectively increasing its typical groundwater use in the long term. In another example, a water provider could wait until after it has begun serving groundwater to certain large water users that do not require an assured water supply, and then seek an ADAWS, in order to maximize its physically available groundwater and groundwater allowance. Using 2023 as a fixed year for determining the physically available groundwater volume and the groundwater allowance preserves the goal of the ADAWS rulemaking: to facilitate a reduction in groundwater use over time to provide an assured water supply to residents and homeowners.

Comment: Some commenters requested that ADWR require a periodic reconsideration of the amount of the percentage reduction in the groundwater calculation, if aquifer conditions improve due to replenishment or otherwise, or if groundwater modeling is updated such that there are no unmet demands attributable to municipal groundwater uses.

Response:

The ADAWS rules provide for a calculation of physically available groundwater for water providers seeking a designation when they cannot show the groundwater is physically available through a hydrologic model. Therefore, if aquifer conditions improve, water providers designated through ADAWS may seek to modify their designation using the standard method of demonstrating physical availability of groundwater. Additionally, ADWR is required to evaluate its rules every five years. If aquifer conditions improve and/or if substantial volumes of New Alternative Water Supplies are incorporated, ADWR may consider revising the rules to limit the percentage reduction of groundwater.

Comment: One commenter requested that "that the reduction to the groundwater volume calculated in proposed rule 12-15-710(H)(3) and (I)(2) occur two years after the New Alternative Water Supply meets the requirements of an assured water supply, to provide time for the Municipal Provider to bring the new supply into their system."

Response:

The supplies in a water provider's application must be sufficient to cover the current, committed and projected demands in a water provider's service area for the term of the designation. This proposal would not be consistent with how designations are issued under the AWS rules. However, the designated provider may allocate their annual use of individual supplies as they deem appropriate or necessary. The quantification of water supplies in the designation is not a limitation on the annual volume of any water supply that may be used in any year.

Comment: One commenter requested to "add to subsection (H)(1) those volumes of groundwater, reserved under one or more analysis of assured water supply for lands served or to be served by an ADAWS applicant, in amounts that the analysis holders voluntarily cut-over to the applicant's portfolio of physically-available groundwater when platting occurs on lands covered by the analysis."

Response:

The initial groundwater volume is calculated based on existing uses and issued certificates because those uses are authorized to move forward in an undesignated water provider's service area regardless of the rulemaking. If groundwater included in analyses of assured water supply were included in the volume in proposed A.A.C. R12-15-710(H)(1), a considerably larger reduction of the initial groundwater volume would be necessary for each New Alternative Supply, and it is likely that sufficient groundwater may not be available to satisfy demands in some cases.

Comment: One commenter stated that the EIS should have contained analysis on the cost of well movement or other infrastructure improvements to improve access to groundwater supplies to achieve greater groundwater physical availability when compared to the anticipated costs of acquiring the New Alternative Water Supplies.

Response:

This is already permissible under the existing provisions of A.A.C. R12-15-716(B). Nothing in this rulemaking prohibits any applicant from relying on that option in seeking to demonstrate the physical availability of groundwater.

Comment: One commenter stated that continued reductions in the water provider's groundwater portfolio would be inconsistent with A.R.S. § 45-576(M), and invalid under A.R.S. § 41-1030(A).

Response:

Without the ADAWS rules and if the water provider cannot demonstrate physical availability of groundwater with a hydrologic model, there would not be any groundwater available for a new designated provider's water portfolio. The proposed rules provide a calculation for how a volume of groundwater may be included as physically available and consistent with the management goal in the designation and provide an assured water supply to residents. The calculation is not inconsistent with A.R.S. § 45-576(M) or invalid under A.R.S. § 41-1030(A).

Comment: Some commenters stated that the EIS did not adequately consider less burdensome alternatives.

Response:

The Governor's Water Policy Council recommended 30% as a reasonable reduction in the physically available groundwater calculation as new alternative supplies are added to the designation. ADWR further reduced the percentage to 25% in the ADAWS rules based on stakeholder input. A reduction to 25% is less burdensome to water providers but maintains the integrity of the assured water supply program and ensures that groundwater use will be meaningfully reduced as growth occurs to protect consumers and homeowners. The alternatives proposed by some commenters that would allow more groundwater in designations (such as reductions of 0%) without ensuring future groundwater availability cannot be considered as "alternatives" because they reduce the assured water supply standards required by statute. Likewise, alternatives that relate to seeking a determination using hydrologic modeling are already allowed by current assured water supply rules for physical availability, which have not changed.

13. **All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

    a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

    While the proposed rules do not require a permit, they do describe the criteria for a designation of Assured Water Supply, which

is a license. Arguably, a designation is a general permit as authorized under A.R.S. 45-576.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Not applicable

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

Not applicable

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable

13. The full text of the rules follows:

Rule text begins on the next page.

53. "New Alternative Water Supply" means a volume of water that is not groundwater withdrawn from an AMA and that was not served within the service area of the municipal provider in the calendar year 2023 for the Phoenix and Pinal AMAs. The Director shall use the annual report submitted by the municipal provider for calendar year 2023, as verified by the Director, for purposes of this paragraph.

~~53~~54. "New municipal provider" means a municipal provider that began serving water for non-irrigation use after January 1, 1990.

~~54.~~55 "Owner" means:

a. For an analysis, certificate, or water report applicant, a person who holds fee title to the land described in the application; or
b. For a designation applicant, the person who will be providing water service according to the designation.

~~55~~56. "Perennial" means a stream that flows continuously.

~~56~~57. "Persons per household" means a measure obtained by dividing the number of persons residing in housing units by the number of housing units.

~~57~~58. "Physical availability determination" means a letter issued by the Director stating that an applicant has demonstrated all of the criteria in R12-15-702(C).

~~58~~59. "Plat" means a preliminary or final map of a subdivision in a format typically acceptable to a platting entity.

~~59~~60. "Potential purchaser" means a person who has entered into a purchase agreement for land that is the subject of an application for a certificate or an assignment of a certificate.

~~60~~61. "Projected demand" means the 100-year water demand at build-out, not including committed or current demand, of customers reasonably projected to be added and plats reasonably projected to be approved within the designated provider's service area and reasonably anticipated expansions of the designated provider's service area.

~~61~~62. "Proposed municipal provider" means a municipal provider that has agreed to serve a proposed subdivision.

~~62~~63. "Purchase agreement" means a contract to purchase or acquire an interest in real property, such as a contract for purchase and sale, an option agreement, a deed of trust, or subdivision trust agreement.

~~63~~64. "Remedial groundwater" means groundwater withdrawn according to an approved remedial action project, but does not include groundwater withdrawn to provide an alternative water supply according to A.R.S. § 49-282.03.

~~64~~65. "Service area" means:

a. For an application for an analysis of adequate water supply, a water report, or a designation of adequate water supply, the area of land actually being served water for a non-irrigation use by the municipal provider and additions to the area that contain the municipal provider's operating distribution system for the delivery of water for a non-irrigation use;

b. For an application for a designation of adequate water supply according to A.R.S. § 45-108(D), the area of land actually being served water for a nonirrigation use by each municipal provider that serves water within the city or town, and additions to the area that contain each municipal provider's operating distribution system for the delivery of water for a non-irrigation use; or

c. For an application for a certificate or designation of assured water supply, "service area" has the same meaning as prescribed in A.R.S. § 45-402.

~~65~~66. "Subdivision" has the same meaning as prescribed in A.R.S. § 32-2101.

~~66~~67. "Superfund site" means the site of a remedial action undertaken according to CERCLA.

~~67~~68. "Surface water" means any surface water as defined in A.R.S. § 45-101, including CAP water and Colorado River water.

69. "Unreplenished groundwater" means the volume of groundwater withdrawn within the service area of a municipal provider after subtracting the groundwater used consistent with the management goal of the AMA pursuant to R12-15-722.

~~68~~70. "Water Quality Assurance Revolving Fund site" or "WQARF site" means a site of a remedial action undertaken according to A.R.S. Title 49, Chapter 2, Article 5.

~~69~~71. "Water report" means a letter issued to the Arizona Department of Real Estate by the Director for a subdivision stating whether an adequate water supply exists according to A.R.S. § 45-108 and this Article.

5. No change

E. The Director shall designate the applicant as having an assured water supply if the applicant demonstrates all of the following:
1. Sufficient supplies of water are physically available to meet the applicant's estimated water demand, according to the criteria in R12-15-716 or as provided in subsection (G), (H) or (I) of this Section;
2. Sufficient supplies of water are continuously available to meet the applicant's estimated water demand, according to the criteria in R12-15-717;
3. Sufficient supplies of water are legally available to meet the applicant's estimated water demand, according to the criteria in R12-15-718;
4. The proposed sources of water are of adequate quality, according to the criteria in R12-15-719;
5. The applicant has the financial capability to construct adequate delivery, storage, and treatment works in a timely manner according to the criteria in R12-15-720;
6. Any proposed groundwater use is consistent with the management plan in effect at the time of the application, according to the criteria in R12-15-721; and
7. Any proposed use of groundwater withdrawn within an AMA is consistent with the management goal, according to the criteria in R12-15-722.

F. No change

G. For an application seeking to modify a designation of assured water supply that does not include a volume of groundwater or stored water recovered outside the area of impact pursuant to subsection (H) or (I) of this Section, the Director shall not review the physical availability of the volume of groundwater and stored water to be recovered outside the area of impact sought to be included in the designation if the total volume of those sources sought to be included in the designation does not exceed the total volume of those sources included in the previous designation of assured water supply that are required to be accounted for pursuant to A.A.C. R12-15-716(B)(3)(c)(ii), minus the sum of the following:
1. The volume of groundwater withdrawn by the applicant since the previous designation of assured water supply order issuance date; and
2. The volume of stored water recovered outside the area of impact by the applicant since the previous designation of assured water supply order issuance date.

H. For a new application for a designation of assured water supply in the Phoenix and Pinal Active Management Areas, a volume of groundwater and stored water recovered outside the area of impact, as calculated in subsection (H)(1), (2) and (3) of this Section, shall be deemed physically available if the Director determines that a New Alternative Water Supply included in the application meets the

requirements in R12-15-716 through R12-15-720. The volume of groundwater and stored water recovered outside the area of impact shall be calculated as follows:

1. Add the total volume of groundwater withdrawn and stored water recovered outside the area of impact within the service area of applicant during the calendar year 2023 to the estimated groundwater and stored water recovered outside the area of impact demand for unbuilt portions of issued certificates of assured water supply as of 2023 that are or will be within the service area of the applicant, and multiply the sum by 100;
2. Multiply 25 percent of each New Alternative Water Supply included in the designation by 100; and
3. Subtract the total volume calculated in subsection (H)(2) of this Section from the total volume calculated in subsection (H)(1).
4. The Director shall use the annual report submitted by the municipal provider for calendar year 2023, as verified by the Director, for purposes of this calculation.

I. For an application seeking to modify a designation of assured water supply that includes a volume of groundwater and stored water recovered outside the area of impact pursuant to subsection (H) of this Section, the following apply:

1. The 100-year volume calculated pursuant to subsection (H) of this Section shall be reduced by the volume of groundwater withdrawn and stored water recovered outside the area of impact by the applicant since the previous designation order issuance date; and
2. The 100-year volume calculated pursuant to subsection (H) of this Section shall be further reduced by 25 percent of the 100-year volume of each New Alternative Water Supply included in any modified designation but not included in the previous designation.

J. The Director shall not include any additional sources of groundwater withdrawn from the AMA or stored water recovered outside the area of impact in the AMA in a designation of assured water supply that includes a volume of groundwater and stored water recovered outside the area of impact pursuant to subsection (H) or (I) of this Section.

K. An applicant that includes a volume of groundwater or stored water recovered outside the area of impact pursuant to subsection (H) or (I) of this Section must be enrolled as a member service area with the CAGRD.

J. During the term of the designation, a designated provider may request an expedited modification of the designation to include additional water supplies that do not include groundwater or stored water recovered outside the area of impact from an AMA. The Director shall review only the following for an expedited modification under this subsection:

1. The proposed current, committed and projected demands under the current term of the designation; and
2. The assured water supply requirements for the additional water supply pursuant to R12-15-710(I), if applicable, and R12-15-716 through R12-15-722.

R12-15-720. Financial Capability

A. No change
1. No change
2. No change
3. No change

B. No change

C. The Director shall determine that an applicant for a designation has the financial capability to construct adequate delivery, storage, and treatment works if the applicant demonstrates one or more of the following for each of those facilities:

1. The applicant has constructed adequate delivery, storage, and treatment works;

2. The applicant has entered into written agreements requiring a potential developer to construct adequate delivery, storage, and treatment works;
3. The applicant has submitted evidence demonstrating that financing mechanisms are in place to construct adequate delivery, storage, and treatment works in a timely manner;
~~3~~4. If the applicant is a city or town, the applicant has~~:~~
   ~~a. Adopted~~ adopted a five year capital improvement plan that provides for the construction, or the commencement of construction, of adequate delivery, storage, and treatment works in a timely manner, and has submitted a certification by the applicant's chief financial officer that finances are available to implement that portion of the five-year plan; or
   ~~b. Submitted evidence demonstrating that financing mechanisms are in place to construct adequate delivery, storage, and treatment works in a timely manner; or~~
~~4~~5. If the applicant is a private water company, the applicant has received approval from the Arizona Corporation Commission for financing the construction of adequate delivery, storage, and treatment works.

G. Extinguishment credits that have not been pledged to a certificate or designation may be conveyed within the same AMA. Extinguishment credits pledged to a certificate or designation shall not be conveyed to another person, except that:
   1. If extinguishment credits are pledged to a certificate that is later assigned or reissued, any unused credits are transferred, by operation of this subsection, to the assigned or reissued certificate. If the certificate is partially assigned or reissued, a pro rata share of the unused extinguishment credits is transferred to each assigned or reissued certificate according to the estimated water demand.
   2. If extinguishment credits are pledged to a certificate for a subdivision that is later served by a designated provider or a municipal provider that is applying for a designation~~,~~:
      a. ~~any~~ Any unused extinguishment credits may be used to support the municipal provider's designation as long as the municipal provider serves the subdivision and remains designated~~.~~;
      b. For a designation in the Pinal AMA that is issued pursuant to R12-15-710(H) or (I), the extinguishment credits may only be applied to groundwater delivered to the subdivision that is the subject of the certificate;
      c. ~~if~~ If the municipal provider is no longer serving the subdivision or if the municipal provider loses its designated status, any unused extinguishment credits shall revert, by operation of this subsection, to the certificate to which they were originally pledged.

R12-15-724. Phoenix AMA Calculation of Groundwater Allowance and Extinguishment Credits

A. The Director shall calculate the groundwater allowance for a certificate or designation in the Phoenix AMA as follows:

1. If the application is for a certificate, multiply the applicable allocation factor in the table below by the annual estimated water demand for the proposed subdivision.

MANAGEMENT PERIOD	ALLOCATION FACTOR
Third	4
Fourth	2
Fifth	1
After Fifth	0

2. If the application is for a designation and the applicant provided water to its customers prior to February 7, 1995, multiply 7.5 by the total volume of water provided by the applicant to its customers from any source during calendar year 1994, consistent with the municipal conservation requirements established for the applicant pursuant to Section 5-103(A)(1) of the Second Management Plan for the Phoenix AMA.
3. If the application is for a designation and the applicant commenced providing water to its customers on or after February 7, 1995, the applicant's groundwater allowance is zero acre-feet, except as provided in subsection (A)(4) of this Section.
4. If the application is for a designation that includes a volume of groundwater or stored water recovered outside the area of impact pursuant to R12-15-710(H), the groundwater allowance shall be calculated as follows:
   a. the applicant may select either of the following calculations if the volume does not exceed the applicant's 2023 unreplenished groundwater deliveries multiplied by 100:
      i. multiply 30 by the total groundwater deliveries during the calendar year 2023 to customers not enrolled as a member land in the CAGRD; or
      ii. multiply 20 by the total water deliveries from any source during the calendar year 2023 to customers not enrolled as a member land in the CAGRD.
   b. add the remaining groundwater allowance for each issued certificate of assured water supply that is or will be within the service area of the applicant to the volume calculated under subsection (A)(4)(a) of this Section.
   c. the Director shall use the annual report submitted by the municipal provider for calendar year 2023, as verified by the Director, for purposes of this calculation.
45. For each calendar year of a designation, the Director shall calculate the volume of incidental recharge for a designated provider within the Phoenix AMA and add that volume to the designated provider's groundwater allowance. The Director shall calculate the volume of incidental recharge by multiplying the provider's total water use from any source in the previous calendar year by the standard incidental recharge factor of 4%. A designated provider may apply for a variance from the standard incidental recharge factor as provided in A.R.S. § 45-566.01(E)(1). The Director may establish a different incidental recharge factor for the designated provider if the provider demonstrates to the satisfaction of the Director that the ratio of the average annual amount of incidental recharge expected to be attributable to the provider during the management period, to the average amount of water expected to be withdrawn, diverted, or received for delivery by the provider for use within its service area during the management period, is different than 4%.

B. No change

1. No change
2. No change
   a. No change
   b. No change

R12-15-725. Pinal AMA Calculation of Groundwater Allowance and Extinguishment Credits

A. The Director shall calculate the groundwater allowance for a certificate or designation in the Pinal AMA as follows:

1. If the application is for a certificate:
   a. If the certificate application is filed before January 1, 2019, multiply the annual estimated water demand for the proposed subdivision by 10.
   b. If the certificate application is filed on or after January 1, 2019, the groundwater allowance shall be zero.
2. If the application is for a designation:
   a. If the applicant was designated as having an assured water supply as of October 1, 2007:
      i. Multiply the applicant's service area population as of October 1, 2007 by 125 gallons per capita per day and multiply the product by 365 days. The service area population shall be determined using the methodology set forth in Section 5-103(D) of the Third Management Plan for the Pinal AMA.
      ii. Convert the number of gallons determined in subsection (A)(2)(a)(i) into acre-feet by dividing the number by 325,851 gallons.
      iii. Determine the number of residential lots within plats that were recorded as of October 1, 2007 but not served water as of that date, and to which the applicant commenced water service by January 1, 2010.

iv. Multiply the number of lots determined in subsection (A)(2)(a)(iii) by 0.35 acre-foot per lot.
v. Add the volume from subsection (A)(2)(a)(ii) and the volume from subsection (A)(2)(a)(iv) of this Section.

b. If the applicant provided water to its customers before October 1, 2007 but was not designated as having an assured water supply as of that date, and a complete and correct application for designation was filed before January 1, 2012, multiply the applicant's service area population as of October 1, 2007 by 125 gallons per capita per day and multiply the product by 365 days. The service area population shall be determined using the methodology in Section 5-103(D) of the Third Management Plan for the Pinal AMA.

c. If the applicant provided water to its customers before October 1, 2007 but was not designated as having an assured water supply as of that date, and a complete and correct application for designation was filed on or after January 1, 2012, the applicant's groundwater allowance is zero acre-feet, except as provided in subsection (A)(2)(e) of this Section.

d. If the applicant commenced providing water to its customers on or after October 1, 2007, the applicant's groundwater allowance is zero acre-feet, except as provided in subsection (A)(2)(e) of this Section.

e. If the application is for a designation that includes a volume of groundwater or stored water recovered outside the area of impact pursuant to R12-15-710(H), the groundwater allowance shall be calculated as follows: The applicant may select either of the following calculations if the volume does not exceed the applicant's 2023 unreplenished groundwater deliveries multiplied by 100:
i. Multiply 30 by the total groundwater deliveries during the calendar year 2023 to customers not enrolled as a member land in the CAGRD;
ii. Multiply 20 by the total water deliveries from any source during the calendar year 2023 to customers not enrolled as a member land in the CAGRD;
iii. Add the remaining groundwater allowance for each issued certificate of assured water supply that is or will be withdrawn within the service area of the applicant to the volume calculated under subsection (A)(2)(e)(i) or (A)(2)(e)(ii) of this Section; and
iv. The Director shall use the annual report submitted by the municipal provider for calendar year 2023, as verified by the Director, for purposes of this calculation.

3. For each calendar year of a designation, the Director shall calculate the volume of incidental recharge for a designated provider within the Pinal AMA and add that volume to the designated provider's groundwater allowance. The Director shall calculate the volume of incidental recharge by multiplying the provider's total water use from any source in the previous calendar year by the standard incidental recharge factor of 4%. A designated provider may apply for a variance from the standard incidental recharge factor by submitting a hydrologic study demonstrating, to the satisfaction of the Director, that the ratio of the average annual amount of incidental recharge expected to be attributable to the designated provider during the management period to the average annual amount of water expected to be withdrawn, diverted or received for delivery by the designated provider for use within its service area during the management period is different than 4%. The hydrologic study shall include the amount of water withdrawn, diverted or received for delivery by the designated provider for use within its service area during each of the preceding five years and the amount of incidental recharge that was attributable to the designated provider during each of those years. The Director may establish a different incidental recharge factor for the designated provider upon such demonstration.

ASSURED WATER SUPPLY RULE MODIFICATIONS TO PROVIDE AN ALTERNATIVE PATH TO DESIGNATION OF A 100-YEAR ASSURED WATER SUPPLY (ADAWS) IN THE PHOENIX AND PINAL AMAS AND TO ALLOW CERTIFICATE OF ASSURED WATER SUPPLY APPLICANTS IN THE PHOENIX AND PINAL AMAS TO COMMINGLE WATER SUPPLIES FOR A LIMITED TERM

A.R.S. § 41-1055(B)
ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT

The Governor's Water Policy Council (Council) was established by Executive Order on January 9, 2023, and encompassed a diverse group of stakeholders appointed by Governor Hobbs including representation from agriculture, water providers, Tribes, executive agency cabinet officers, cities, the business community, industry, conservation organizations, university experts, and the Arizona legislature. Two committees were established by the Council, including the Assured Water Supply (AWS) Committee. The AWS Committee was charged to review and make recommendations for changes to Assured Water Supply policies to address the challenges revealed by Assured Water Supply modeling projections, while continuing to (1) strengthen the integrity of the Assured Water Supply program, (2) protect consumers and aquifers, and (3) ensure future growth is not reliant on mined groundwater.

At the September 27, 2023, AWS Committee meeting, the Arizona Department of Water Resources (ADWR, or the Department) introduced an "Alternative Path to Designation of a 100-year Assured Water Supply" (ADAWS) proposal, which was drafted by the Department in coordination with a group of Council members and stakeholders. On November 29, 2023, the Department provided the Governor's Office with five policy recommendations from the Governor's Water Policy Council. The Council's AWS Program recommendations provided a launch point and guidance for drafting new rules to provide a means to obtaining a Designation of AWS in Active Management Areas (AMAs) where unmet demand exists in the model projection. Among these recommendations was the proposed ADAWS, which requires amendments to Arizona Administrative Code (A.A.C.) R12-15-701, et. sec.

The ADAWS rulemaking seeks to address challenges that some water providers face in pursuing a new Designation of 100-year Assured Water Supply (DAWS) under the current rules. The ADAWS concept creates a path for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining. The Department expects the rulemaking to have long-term economic benefits while also providing greater long-term protection for groundwater supplies by promoting the use of renewable water resources, requiring replenishment of new groundwater uses, and reducing overall groundwater reliance through time.

The 1980 Groundwater Management Act created four AMAs (the Phoenix, Pinal, Prescott and Tucson AMAs) where groundwater use is actively managed. In 1994, a fifth AMA (the Santa Cruz

AMA), was created out of a portion of the Tucson AMA. Each AMA has a management goal, and the Department is required by statute to adopt AWS rules to assist in the attainment of that goal. The Department manages the AWS program within the five AMAs pursuant to A.R.S. § 45-576. The program is designed to sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning. The AWS program requires new subdivisions[1] to demonstrate a 100-year water supply is legally, physically, and continuously available before recording plats or selling parcels within an AMA. The groundwater supply must also be consistent with the management goal and management plan of the AMA.

The Assured Water Supply Program requires the Department to evaluate the available water supply for 100 years. ADWR uses basin-scale groundwater flow models to evaluate groundwater conditions in the AMAs based on the rules, policies, and requirements of the Assured Water Supply Program. Recent updates to the ADWR Phoenix and Pinal AMA groundwater models project a shortfall in groundwater supplies in the 100-year which indicate unmet AWS demands. Under current rules, ADWR may not approve the issuance of designations and certificates that rely on groundwater if the groundwater model submitted with the application does not demonstrate physical availability of groundwater.

Groundwater physical availability issues in the Phoenix and Pinal AMA models primarily affect fast-growth areas in portions of the AMAs that rely on groundwater. These are the areas in which most new development has been occurring. Many of these communities were initially able to develop because they were able to prove physical availability of groundwater, subject to replenishment. For new growth to occur under current conditions and the traditional AWS rules, developers in these areas will need to find renewable supplies (such as surface water or reclaimed water), the municipality or water provider must secure enough renewable supplies to become designated without the inclusion of groundwater in the portfolio.

In addition to the overriding issue of physical availability, many water providers desiring to obtain a DAWS face further hurdles to doing so, including:

- Assuming legacy groundwater use from subdivisions that predate the AWS rules or assuming uses that fall outside of the subdivision definition requires the provider to make the groundwater use consistent with the AMA management goal. Taking on the necessary replenishment costs can be significant.
- Limited renewable supplies.
- Historic barriers to cost recovery for the expense and effort of securing renewable supplies and applying for designation.
- When the original AWS rules were promulgated, existing providers at the time were allowed to transition from reliance on groundwater to renewable supplies under a DAWS, including certain exemptions and groundwater allowances.

[1] The AWS requirement applies to each new "subdivision" as defined by A.R.S. § 32-2101(56).

- When considering an AWS application, ADWR must consider all water supplies in a system that are relied on to serve water demands. If a municipal provider is relying on groundwater withdrawn within the AMA to serve its customers in combination with other supplies (often referred to as "commingling"), the groundwater must satisfy the Assured Water Supply criteria, including physical availability. Therefore, an application for a certificate or a designation under the current rules that could not demonstrate physical availability of groundwater would be required to demonstrates that there are sufficient non-groundwater supplies to satisfy all the demands in the municipal provider's system in order to satisfy the physical availability criteria.

The Department is proposing the ADAWS rule modification to enable undesignated providers that currently serve groundwater to existing customers to become designated as having an assured water supply. ADAWS requires the use of alternative supplies to serve new growth and incentivizes providers to replace current groundwater uses with alternative supplies. Expanding the options to obtain a DAWS allows water providers in the Phoenix and Pinal AMAs to develop long-term solutions to water supply requirements as such supplies are necessary to meet the demands of the community it serves while reducing the overall reliance on groundwater and long-term impact on the aquifer.

The declining availability of groundwater in the Phoenix and Pinal AMAs necessitates a shift from reliance on groundwater to alternative supplies for existing uses as well as any new growth. In the development of a path to designation, members of the AWS Committee of the Council recognized the importance of replacing existing groundwater use in addition to acquiring new supplies for growth. ADAWS enables the applicant to demonstrate an assured water supply by showing it will reduce groundwater use over time. Moreover, while ADAWS includes a component to reduce the financial burden of replenishment, the most cost-effective way to do so is by using an alternative supply in the first place, which the proposed rulemaking incentivizes.

While it is uncertain which water providers or developers might apply for a determination under these modified rules, the amendments are expected to contribute to the realization of short-term and long-term economic benefits. The Department expects that the amendments will result in reduced costs to some persons and political subdivisions over the short term and that they have the potential to reduce total groundwater withdrawals over the long term. Due to the often-long lead times required to secure alternative water supplies, it could take time for potentially eligible providers to apply for designation through this path, but they will have certainty to begin making the necessary arrangements. Overall, the Department expects these rule amendments to assist the local community in overcoming the hurdles of development in areas with limited physical availability of groundwater while maintaining and promoting the goals and standards relating to groundwater use in the Phoenix and Pinal AMAs.

The Department believes the proposed amendments strike an appropriate balance between preserving the existing AWS rules, which promote sustainability of water supplies for future

development, and providing a new path for development that will ultimately be less reliant on groundwater, furthering the management goals of the AMAs.

1. An Identification of the Rulemakings

This Economic Impact Statement addresses two rulemakings proposed by the Department. While both rulemakings below are described in this EIS because of similarities, neither is dependent on the other in terms of moving forward.

- The ADAWS rulemaking affects the Phoenix and Pinal AMAs only. It does not repeal nor substantively revise any current AWS rules. Rather, it amends the AWS rules to create an additional, alternative path for a water provider to obtain a designation where physical availability of groundwater cannot be demonstrated in the AWS model. The ADAWS concept creates a voluntary path to designation for water providers reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining.

- The commingling rulemaking applies to Certificate of Assured Water Supply (CAWS) applicants in the Phoenix and Pinal AMAs and amends the AWS rules to create an additional, voluntary alternative path for an applicant to obtain a certificate based on non-groundwater sources commingled with groundwater where physical availability of groundwater cannot be demonstrated in the AWS model.

This rulemaking intends to facilitate a path for economic development that strikes a balance between continuing to meet the State's long-term groundwater management goals and continuing to drive new growth toward renewable water supply reliance. Historically, developers and water providers could more readily utilize groundwater to initiate a DAWS or secure a CAWS. Absent the ADAWS rulemaking, the high cost of developing sufficient renewable supplies and infrastructure to meet the DAWS or CAWS application requirements may be overly burdensome to developers and water providers and the current AWS rules would otherwise provide few other options for such applicants to responsibly and equitably facilitate growth.

To create the ADAWS path, the Department is amending A.A.C. R12-15-710 to add section H, which provides an alternative designation path in the Phoenix and Pinal AMAs which would enable designations to include groundwater that is grandfathered and could not otherwise be included under the current AWS rules. The Department is also amending A.A.C. R12-15-710 to add section I, which provides that, for an application to modify an ADAWS, the grandfathered groundwater included in the ADAWS volume will be reduced by the volume of groundwater utilized since the previous ADAWS was issued and also reduced by a portion equal to 25% of any new alternative water supply to be included in the modified designation. The amendments in A.A.C. R12-15-710(H) through (K) present the full concept for a new ADAWS path, including that the applicant must enroll the ADAWS as a member service area (MSA) of the Central Arizona Groundwater Replenishment District (CAGRD) and therefore, all excess groundwater use

pursuant to the ADAWS would be subject to replenishment. The Department is also modifying A.A.C. R12-15-711(D) to establish that the initial term of an ADAWS is no greater than 15 years.

In addition to the primary ADAWS amendments to A.A.C. R12-15-710, the Department is making conforming amendments to A.A.C. R12-15-701 and R12-15-711 to consistently incorporate the provisions of the ADAWS. A.A.C. R12-15-724 specifies that the groundwater allowances in the Phoenix AMA and in the Pinal AMA are modified to allow for a volume of groundwater to be used consistent with the management goal and not subject to replenishment. The provider may choose one of two calculations, both based on water deliveries in calendar year 2023. The Department's amendment of A.A.C. R12-15-725(A)(2)(e) also adds an alternative calculation of a groundwater allowance for providers seeking an ADAWS in the Pinal AMA only and adds detail on how the groundwater allowance would be uniquely calculated based on 2023 groundwater deliveries plus any remaining groundwater allowance associated with an issued CAWS that will be served by the ADAWS applicant. A.A.C. R12-15-723(G)(b) now provides that under an ADAWS, extinguishment credits (ECs) that were already pledged to a CAWS can only be applied to groundwater delivered to that original CAWS subdivision to ensure the original subdivision remains the beneficiary of the ECs.

To improve one of the AWS criteria requirements for both the ADAWS and current DAWS, the Department is amending A.A.C. R12-15-720(C)(3) to allow all AWS applicants the ability to prove the financial capability criteria by submitting “evidence demonstrating that financing mechanisms are in place to construct adequate delivery, storage, and treatment works in a timely manner.” Prior to this rulemaking, this provision had only been available to is a city or town.

To further improve the AWS program, with the Department’s addition of A.A.C. R12-15-711(J), all DAWS holders gain the ability to request an expedited modification of a designation if the modification is only being sought to include additional renewable water supplies, allowing providers to incrementally and more easily add supplies and enable additional growth in their service area.

In conjunction with the ADAWS path, the Department is amending A.A.C. R12-15-704 to add section N, which allows a source of supply that is not groundwater or stored water outside the area of impact, but is served through a distribution system that is commingled with those supplies to be considered physically available supply for applications for CAWS in the Pinal and Phoenix AMAs if the following apply:

1. The application must include proposed non-groundwater source of supply of equal volume to the committed demand of the proposed subdivision
2. Proposed supply must be a new supply not already served in calendar year 2023
3. The proposed supply would equal 25% of the estimated demand to substitute for existing use of groundwater or stored supply outside of the area of impact

No AWS rules are repealed through this rulemaking.

For a complete description of the amendments to the AWS rules, refer to the Arizona Administrative Register, Volume 30, Issue 34, August 23, 2024.

2. Persons Who Will Be Directly Affected by, Bear the Costs of, or Directly Benefit from the Rulemaking

Throughout this Impact Statement, the rule amendments are compared to obtaining an AWS determination under the existing rules, which remain in effect, or having no AWS determination.

Because rule changes to enable ADAWS and limited-term commingling of water supplies for CAWS represent additional, alternative paths to applying for and securing an AWS, and as they are not a requirement nor a revision to existing paths to an AWS, the Department expects there will be minimal change in the costs borne by those affected.

It is difficult to predict how many applications may be received and the extent of the growth that will be enabled through these amendments; however, to the extent these amendments are availed, they will provide significant to substantial benefits by enabling new development supported by sustainable water supplies while continuing to protect finite groundwater supplies.

Entities which will directly affected by, bear the costs of, or directly benefit from the AWS rule amendments in the Phoenix and Pinal AMAs include: (1) state agencies such as the Department; (2) political subdivisions, including counties, cities, and towns that seek economic development or provide municipal water, private municipal water providers, as well as the Central Arizona Groundwater Replenishment District (CAGRD);[2] (3) subdivision developers; and (4) homeowners and homebuyers in the Phoenix and Pinal AMAs.

a. *Persons or Entities Directly Benefiting from the Rulemaking*

- **The State**. The proposed rulemaking reduces barriers to determinations of assured water supply and enables a path for sustainable growth, while upholding the integrity of the Assured Water Supply program, protecting consumers and aquifers, and ensuring future growth is not reliant on mined groundwater.

- **Landowners in undesignated areas**. There is a potential benefit that lands that would not otherwise be developed due to minimal water resource options might become more attractive to developers under this rulemaking.

- **Water Providers**. Providers in the Phoenix and Pinal AMAs face several barriers to designation; most significantly, current model projections show a lack of physical

---

[2] The CAGRD is a division of the Central Arizona Water Conservation District, which is a multi-county water conservation district and a political subdivision. *See* Arizona Constitution, Art. 13, § 7; A.R.S. § 48-3702.

availability of groundwater. Meanwhile, non-AWS supply uses can continue, further depleting limited groundwater supplies. Water providers (public or private) will benefit from the additional path to designation because it enables providers to make the necessary agreements and investments in alternative supplies and infrastructure as service area demands develop, and an ADAWS will include a potentially significant volume of groundwater allowance that is not required to be replenished to assist in managing replenishment costs associated with the designation. ADAWS will allow additional subdivision growth within the provider's service area, while halting previously unconstrained non-AWS groundwater use, protecting and reducing groundwater use over time and providing more water security for the provider, residents, and businesses. The commingling modification to the rules will provide a pathway for development while a provider is working toward a designation, providing them the benefit of serving new homes in the short-term while reducing the risk of potential groundwater shortage.

- **Subdivision developers**. Those who develop and build new subdivisions may have new options to obtain an assured water supply determination, particularly if they are unable to obtain an AWS determination based on groundwater under current rules. Likewise, if a provider is able to obtain a designation under ADAWS, subdivision developers within the service area(s) covered by the ADAWS will no longer need to obtain a separate AWS determination.

- **Existing designated providers**. Existing designated providers desiring to add renewable supplies and expedite their modification applications will benefit from having an expedited regulatory review, as the entire designation is not reviewed, only the additional demands and the relevant water supply that the provider is seeking to add to its designation. This will spare providers the significant investment of staff time and expense involved in the full modification process and allow incremental growth as they are able to acquire additional supplies, even if they are relatively small volumes.

- **Businesses, including small businesses, that support homebuilding**. Those who provide materials and services to support the homebuilding industry may see relatively moderate benefits following this rulemaking, to the extent that homebuilding to support population growth pressure continues and local and regional businesses that support homebuilding are re-engaged.

- **Homeowners**. Persons who purchase new homes in subdivisions with AWS determinations based on renewable supplies and replenished groundwater. Because ADAWS provides an additional path to subdivision development, it could increase inventory of new homes available while also ensuring that new homes have a 100-year assured water supply determination. Those persons who purchase homes in these subdivisions would receive lower property tax assessments if the water provider

were a CAGRD member service area because the homeowner is not directly responsible for paying a CAGRD replenishment assessment. Under the new commingling rules, homeowners are likely to experience lower property tax assessments because the home's replenishment obligation will be reduced by the inclusion of commingled renewable supplies.

- **CAGRD**. Depending on developer and water provider participation in the new path to an AWS determination, the CAGRD may see a reduction in its replenishment obligations through time as groundwater reliance is reduced, potentially lowering administrative and renewable water supply costs and providing for additional capacity to replenish excess groundwater on behalf of its remaining members under its current Plan of Operation.

b. ***Persons Directly Bearing the Costs of the Rulemaking***

- **ADWR.** The Department will require additional staff to review and process ADAWS and CAWS applications as well as expedited DAWS and ADAWS modification applications and to manage annual reporting and accounting requirements.

- **CAGRD**. If CAGRD's membership and/or annual groundwater replenishment obligations increase as a result of the rulemaking, particularly if water providers are slower to develop renewable supplies to replace groundwater reliance, CAGRD may incur increased costs associated with acquiring additional replenishment supplies and may require increased administrative capacity to meet its statutory obligations. However, under such a scenario, CAGRD would also generate additional enrollment fees, activation fees, and annual assessments, helping to offset and manage the added costs.

- **ADAWS water ratepayers and homeowners served by CAWS with commingled groundwater**. Under the ADAWS, the costs associated with the acquisition of water supplies, infrastructure, enrollment in the CAGRD, and the expense t to replenish groundwater supplies to meet existing requirements for consistency with management goal under ADAWS would be borne by the utility ratepayers. These factors and the associated costs are highly variable and unique to the provider and its circumstances. How these costs are distributed among the ratepayers is determined by the utility through ratemaking processes, which are specific to the provider and community. This is no different than under the existing rules. However, ADAWS includes a larger groundwater allowance as compared to traditional designation rules. Both the ADAWS and the commingling modification include a requirement to offset a certain amount of existing groundwater use with new alternative water supplies. There will be an additional cost passed on to ratepayers (ADAWS) or to homeowners (commingling) as initial groundwater supplies are offset

with renewable supplies. The long-term security, however, provided by renewable supplies and the value of the groundwater allowance will reduce the impact.

- **Groundwater users.** The rulemakings would enable new development to move forward in a service area even if there are groundwater physical availability issues in the groundwater model. Through ADAWS, a groundwater allowance will also be granted, meaning that some groundwater pumping could proceed without replenishment (as compared to traditional designation), which could have some initial impacts on the aquifer. However, negative impacts are mitigated under ADAWS because some previously unreplenished groundwater uses will be replenished, and only groundwater pumping that would already continue absent ADAWS will continue under ADAWS, reducing groundwater pumping within the service area over time.

3. Cost – Benefit Analysis

These amendments create no new requirements; they provide additional voluntary options for water providers and developers to secure determinations of AWS. Water providers and developers may continue to rely on existing rules.

The ADAWS rulemaking creates an additional pathway for water providers to seek a designation; they may still seek designation under the existing rules or continue without a designation if they choose. Likewise, the proposed commingling rule amendment creates an additional pathway to obtain a certificate of assured water supply; the option to include apply for a certificate under the existing rules or not remains. Therefore, specific costs, benefits and impacts of this rulemaking were assessed against these two alternatives—pursuing a determination of AWS under the existing rules or not pursuing a determination.

Benefits for those directly affected by ADAWS are expected to be substantial when compared to a designation under the traditional rules or no designation. ADAWS allows for additional development within a water provider's service area by a granting a volume of physically available groundwater and groundwater allowance while also facilitating a reduction in groundwater use over time and ensuring that some previously unreplenished groundwater pumping within a provider's service area will be replenished.

ADWR analyzed the monetary value afforded to providers through the groundwater allowance volume granted in ADAWS relative to the groundwater allowance granted under the traditional designation rules. The benefit is significant and addresses a key financial barrier that has challenged water providers seeking to achieve a traditional designation of assured water supply.

An ADAWS provider that newly enrolls in CAGRD as an MSA, as required by this rulemaking (A.A.C. R12-15-710(K)), may utilize a portion of the groundwater allowance to avoid reporting its groundwater deliveries to its service area as "excess groundwater" requiring CAGRD

replenishment. The value of the groundwater allowance is substantial in that it could be used to directly replace a portion of the ADAWS provider's reported replenishment obligation to the CAGRD.

For every acre-foot of groundwater delivered that is not subject to CAGRD minimum reporting requirements and for which the provider may utilize the groundwater allowance to meet consistency with the management goal, the provider will benefit from a cost savings equal to the per-acre-foot replenishment fee. In other words, since the groundwater allowance may serve as a direct substitute for a portion of the replenished groundwater obligation, the groundwater allowance will have an equivalent value to the CAGRD replenishment fee in the year it is utilized.

The CAWCD Board-approved 2024 replenishment fee for an MSA in the Phoenix AMA is $856 per acre-foot of excess groundwater use, a rate that is projected to increase by approximately 4% per year through 2029. In the Pinal AMA, the 2024 replenishment fee is $875 per acre-foot of excess groundwater use in the Pinal AMA, projected to increase by approximately 3.6% per year through 2029.

The 2024 value of a theoretical groundwater allowance of 272,000 acre-feet—a realistic example—is equivalent to over $232 million based on CAGRD's published rates. As described above, CAGRD rates are projected to continue to increase, which could result in the groundwater allowance being of greater value over time, given that a provider will utilize the allowance over time.

Benefits for those directly affected by the proposed CAWS (A.A.C. R12-15-704) rule amendments are expected to be substantial when compared to obtaining a certificate under the existing rules or having no certificate. The proposed rule changes allow for additional development within a water provider's service area by allowing a certificate based on supplies commingled with groundwater while also requiring the water provider to obtain an additional volume of new alternative supplies (30% of the certificate demand) to replace the water provider's existing groundwater deliveries.

Generally, costs for those directly affected by voluntary pursuit of an ADAWS or CAWS obtained with commingled groundwater supplies are expected to be minimal compared to the currently available alternatives. However, because the proposed ADAWS rules create a path forward for water providers in AMAs where there is insufficient physical availability of groundwater, create an expedited process for all designated providers that reduces the regulatory and financial burden for designation modification, and may re-open the pursuit of CAWS applications in the Phoenix and Pinal AMAs, state agencies such as ADWR will incur costs to hire additional staff necessary to process an increase in applications.

Any costs associated with the proposed rule amendments are outweighed by the benefits when compared to the available alternatives. The rulemaking will have a long-term benefit to groundwater supplies in the Phoenix and Pinal AMAs and will support Assured Water Supply

program objectives to sustain the state's economic health by preserving groundwater resources, promoting long-term water supply planning, and strengthening water security.

a. *Probable Benefits and Costs to Agencies*

- **ADWR**:
  Benefits. The proposed rulemaking supports the Department's mission to safeguard the health, safety and economic welfare of the public by protecting, conserving and enhancing Arizona's water supplies in a bold, thoughtful and innovative manner by reducing barriers to determinations of assured water supply and enabling a path for sustainable growth, while upholding the integrity of the Assured Water Supply program, protecting consumers and aquifers, and ensuring future growth is not reliant on mined groundwater.

- *Costs.* The ADAWS and commingling rules will have multiple impacts to future staff workload as compared to the traditional rules or no options for an AWS determination. Since these rule amendments present new, optional paths, their precise impact on staffing needs is unknown. New ADAWS applications will be limited in number, but the application process will require substantial staff time, expertise, and legal review. The expedited modification option has the potential to increase the frequency of review of new alternative supplies for ADAWS applications as well as for traditional DAWS holders; however, the expedited modification requires only a partial review as compared to the traditional modification of a DAWS, which required a review of the entirety of the designation application. The Department also anticipates the commingling rule change may increase the number of certificate applicants because it creates a path to development despite the unmet demands in the Phoenix and Pinal groundwater AWS models. The rule amendments will create additional reporting, accounting, and oversight for staff to manage. Overall, depending on how extensively providers use these alternative paths, the Department may need to add one to two additional staff.

- **Other Agencies**:
  Benefits.
  No benefits to other agencies were identified. However, in the absence of these alternatives, AWS applicants will likely continue to face challenges obtaining AWS determinations under current rules, and the perception that insufficient water exists for businesses and development in the Phoenix and Pinal AMAs would have repercussions for the state. These alternative paths enable development on renewable supplies while reducing groundwater mining in the long-term, continuing

Arizona's legacy of secure water supplies and sustainable development and economic growth in an arid environment

Costs. ADWR has not identified specific costs to other agencies but notes that there could be an increase in public reports issued by Arizona Department of Real Estate.

b. ***Probable Benefits and Costs to Political Subdivisions***

- **Municipal Water Providers:**

Benefits. Water providers seeking an AWS determination will benefit from the ADAWS in comparison to the traditional rules or no AWS determination, particularly due to (1) additional paths to acquire an AWS determination, (2) the ability to include a physically available volume of groundwater in the determination without the need for a supporting groundwater model run, and (3) a longer timeline during which to acquire and develop water supplies to support the demands of its service area. The rulemaking could effectively enable a municipal water provider to recover costs for the expense and effort of securing renewable supplies over a longer period of time, and to do so more equitably by distributing the costs of such supplies on its current water customers and on future customers through future growth.

Costs. Compared to the traditional rules, there are no identified additional costs. If there were, a provider would be likely to utilize the traditional DAWS path. Water providers that choose the ADAWS path over the traditional designation rules or no determination will incur additional or new groundwater replenishment costs due to the requirement to enroll as a Member Service Area of the CAGRD. However, as described above, the provider may offset these costs by utilizing the groundwater allowance provided under this rulemaking, which would be a very substantial savings.

Water providers utilizing the ADAWS and commingling rules will be required to reduce existing groundwater pumping. However, the new paths provided by the rulemaking are less costly compared to the traditional rules, because under those rules, if insufficient physical availability of groundwater exists, the provider would only be able to secure an AWS determination if they develop alternative, non-groundwater supplies to cover 100% of the water demands in the determination for 100 years. Overall, for a water provider seeking to serve new developments or a subdivision development, the benefits of ADAWS and commingling outweigh the costs and provide an alternative path if they are not able to obtain a designation or certificate under current rules.

- **CAGRD**:

  Benefits. Under the rule amendments, CAGRD could see a reduction in Member Lands (MLs) served by CAWS if a new ADAWS provider subsumes those certificates in a new Member Service Area (MSA). Administering services for MSAs typically requires less staff time for CAGRD compared to the administration of MLs. Per a CAGRD staff analysis presented to the CAWCD Board, CAGRD expects the rule amendments will result in a lower future replenishment obligation compared to its operations under the traditional rules or no designation, due in large part to the groundwater offset requirement when new alterative water supplies are added during an ADAWS modification.

  Costs. CAGRD has seen little to no new subdivision enrollment in the Phoenix and Pinal AMAs since the Department's release of the groundwater model projections showing unmet AWS demands. With this new rulemaking, CAGRD's administrative costs may increase in the near-term if applications, enrollments, and excess groundwater deliveries increase pursuant to new determinations, and replenishment costs may increase to accommodate new members requiring replenishment services in the near term. However, CAGRD has sufficient mechanisms in place to develop the rate and fees necessary to cover the costs of its services.

  Political subdivisions:

  Benefits. Compared to the traditional rules or no AWS determination, political subdivisions may experience an increase in sales tax and property tax revenue under the rulemaking if homebuilding and its associated support industries are able to expand or remain active in the Phoenix and Pinal AMAs.

  Costs. None identified.

c. *Probable Benefits and Costs to Business, Including Small Business*

- **Business, Including Small Business:**

  Benefits. These amendments do not directly impact business, including small business, as they do not impose additional requirement, but rather amend the rules to enable additional options that have advantages over the existing rules.

  Businesses and small businesses that directly develop or are linked to the development of subdivisions will benefit over the short-term from greater certainty that development can proceed and benefit over the long term from the economic growth fostered by the amendments.

  Costs. None identified.

- **Private water providers**:

  Impacts would be the same as those for cities and towns that are water providers. See Part 3(b) "Municipal Water Providers" above.

- **Developers:**

  Benefits. Applicants that are unable to demonstrate physical availability of groundwater with groundwater modeling would not be able to obtain a certificate or designation of AWS based on groundwater under the current rules and could not proceed with development. These amendments provide a pathway forward.

  ADAWS will enable additional water providers to receive designations with some physically available groundwater supplies, allowing additional development to occur within their service areas in the near term and averting the necessity of applying for certificates.

  The commingling rule modifications will enable additional subdivision growth under certificates through June 30, 2027, allowing time to shift to a full designation under ADAWS and providing opportunity for developers to construct subdivisions and sell new homes in the short term. This rule amendment has the effect of allowing additional development to move forward if it could not move forward under traditional rules.

  Costs. The water provider will decide how water supply costs are passed through to a developer. Compared to the traditional rules or no designation, these alternatives could allow for additional development.

d. ***Probable Benefits and Costs to Private Persons and Consumers***

- **Homeowners, lessees, and renters:**

  Benefits. Homeowners, lessees, and renters may see benefits in subdivisions served by ADAWS determinations as (1) former CAGRD ML homes may no longer be responsible for direct payment of CAGRD annual assessments, (2) the water provider need not recoup the cost from current water ratepayers of a 100% alternative water supply portfolio to achieve a designation, as under the traditional rules (without a groundwater model demonstrating physical availability of groundwater), and (3) the ADAWS provider provides the ratepayer with greater water security as it reduces its reliance on groundwater, develops alternative supplies, and is responsible for excess groundwater replenishment through the CAGRD. Additionally, a homeowner, lessee

or renter may have increased housing options within an ADAWS water provider's service area, compared to the traditional rules or no designation.

The commingling rule modifications will provide benefits because water providers will replace some existing groundwater pumping with alternative supplies, which will provide greater water security.

Costs. Compared to the alternative of not securing a designation, the water provider could incur and pass on to its water ratepayers the water acquisition and replenishment costs. However, the rule amendments create a new groundwater allowance option that is intended to offset replenishment costs, to the benefit of homeowners/water users.

- **Landowners:**

  Benefits. In some instances, properties in undesignated areas might become more attractive to developers under this rulemaking compared to the traditional rules since it potentially expands developable areas that were previously more limited in water supply options, benefiting owners of lands that could not otherwise be developed.

  Costs. None identified.

This Cost-Benefit Analysis shows that the probable costs to agencies, political subdivisions, business, private persons and consumers resulting from adoption of the proposed rule changes would be minimal. The Department believes the rulemaking will result in greater net benefits to the state and other parties largely stemming from continued growth and development in the Phoenix and Pinal AMAs while at the same time addressing groundwater use concerns and further upholding the Department's long-term groundwater management goals in the Phoenix and Pinal AMAs.

4. Probable Impact on Private and Public Employment in Business, Agencies, and Political Subdivisions

The Department anticipates a significant positive impact on employment as a result of this rulemaking, which provides new AWS alternatives to public and private water providers and previously designated water providers. The probable impacts may be positive for developers, private and public water providers, and cities and towns, as the rulemaking allows a path to economic development that will not be reliant on groundwater in the long-term and will uphold the Department's standards to reach the management goal of each AMA.

5. Probable Impact on Small Business

See Part 3(c) "Probable Benefits and Costs to Business, Including Small Business" above.

6. Probable Effect on State Revenues

Excise, income, property, and sales taxes are expected remain stable to increasing longer-term as growth increases at a sustainable pace in the Pinal and Phoenix AMAs. No new fees or charges are included in this rulemaking. Absent this rulemaking, the State could see decreased tax revenues due to the current AWS rules providing limitations to develop on groundwater, and therefore limiting the geographic extent of new developments to those areas that have previously secured an AWS determination. The Department will need to increase staff as a consequence of adopting the rulemaking.

7. Less Intrusive or Less Costly Alternative Methods of Achieving the Rulemaking

The Department provides qualitative descriptions of each alternative's impacts below because it is not possible to obtain adequate data regarding the specific monetary impacts of each alternative discussed.

- **No Action**: A no action alternative would fail to achieve the objectives of the rulemaking, the Governor's Water Policy Council, and the stakeholders who contributed to the development of the proposed amendments. Without the rulemaking, developers and water providers could continue to face substantial barriers to securing determinations of AWS, and opportunities for additional development in the Phoenix and Pinal AMAs could be limited.

  This rulemaking demonstrates the state's ability to adapt to water supply constraints and enable additional growth, while maintaining the integrity of the Assured Water Supply program, protecting consumers and aquifers, and ensuring future growth is not reliant on mined groundwater.

- **Delay rulemaking**: Maintain current AWS rules, unchanged. However, Governor Hobbs, her Water Policy Council, and stakeholders identified an urgent need for solutions to the challenges revealed by the AWS modeling, and these amendments are the solutions developed in response to that. Water providers have communicated that this rulemaking needs to be implemented immediately and that without a clear path forward, they will not be able to justify making the necessary investments in acquiring supplies and constructing necessary infrastructure. These costs will only increase as the rulemaking is delayed and would provide no benefit.

8. Description of Data on Which the Rule Modification is Based

Because this rulemaking amends the AWS rules to create new paths to an AWS application that providers or developers may voluntarily pursue, the Department could not evaluate quantitative impacts to water users, services areas, or aquifer conditions without being overly speculative on

which areas or water users in the Phoenix and Pinal AMAs might apply for these determinations and the types of water supplies or infrastructure that could be included. The proposed amendments are based on the Department's understanding of the limitations faced by developers and water providers under the current AWS rules, recent groundwater modeling projections, the recommendations provided by the Governor's Water Policy Council and its expert Council members, and the Department's Assured Water Supply program's ongoing objective to provide consumer protection and sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning.

DATE

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, which we believe will create a sustainable water supply in the Pinal AMA.

Through this letter, I am expressing my direct support for the new rules and encouraging their adoption as soon as possible.

As a Pinal County business owner, I know it is important to have a vibrant economy that inspires growth and attracts more high quality workers who can become valued members of our community.

A stable water supply is crucial for maintaining strong property values, supporting businesses, and fostering the overall economic health and quality of life in our community.

I genuinely appreciate this initiative, as new water rules will mark a crucial step forward for all of Pinal County.

Sincerely,

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a company Greenstone has intimate knowledge of Arizona's assured water supply rules and Arizona water markets. With this background we support these rules. Without these changes we feel there will be unintended negative consequences to Pinal AMA groundwater supplies. Some of these negative impacts are outlined below:

- It is an accepted fact that converting land from agricultural use to municipal and industrial leads to far less groundwater withdrawals. Under the status quo agricultural lands not part of an existing Designation of Assured Water Supply (DAWS) or a Certificate of Assured Water Supply (CAWS) are essentially condemned to stay in high groundwater use agricultural. It is a misconception that these lands will eventually transition from agriculture as water levels fall. In fact there are numerous examples throughout the west that show agricultural water users will continue to invest in deeper wells (Ogallala Aquifer, Eastern New Mexico, Eastern Arizona, Central Valley California). This is already happening in the Pinal AMA where irrigation districts and individuals are making long-term investments into deeper and larger wells.

- Parties that have significant investments into land will find ways to develop their property in a manner that skirts Assured Water Supply rules. This skirting will lead to more unaccounted-for groundwater withdrawals.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Re: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Pinal Partnership is a non-profit membership organization formed in 2005 that leads responsible economic development in Pinal County by joining public, private and non-profit efforts. We have 24 Board of Directors and over 200 members that represent a broad range of industries and communities in Pinal County which allows us to find problems and work on solutions, collectively.

As President/CEO of Pinal Partnerhip, I am expressing Pinal Partnership's support for developing new Assured Water Supply Rules (ADAWS) and encourage their adoption as soon as possible. The ADAWS allows water providers who are currently not designated as having an Assured Water Supply to secure an Assured Water Supply. Existing residents and businesses will benefit from this, because the ADAWS requires water providers to offset existing groundwater pumping with a new non-groundwater supply as new developments come online creating a sustainable water supply for the Pinal AMA that in turn has a direct impact on all aspects of our economy in Pinal County.

On behalf of Pinal Partnership's Board of Directors and its members, we appreciate all the efforts of the Governor's Office and ADWR staff. These new Assured Water Supply rules are an important step forward. If you require additional information, please feel free to contact me @ 480 239-9391 or tony@pinalpartnership.com.

Sincerely,

Tony Smith, President/CEO Pinal Partnership

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

Ranchette Investors LLC has owned land since 2006 which it plans to develop. If these rules are not adopted, we will move forward with plans to develop that will not include subdividing, but nevertheless use groundwater. This groundwater will be unaccounted for.

We feel these rule changes will allow us to develop responsibility under Assured Water Supply rules and offset any groundwater we use, or allow our water provider to acquire other renewable supplies to meet our needs. This type of development will be of much greater economic value to Pinal County and will also benefit the aquafer by accounting for groundwater use if any.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Mike Malano

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

On behalf of the Rose Law Group, I am writing this letter in support of the Arizona Department of Water Resources' (ADWR) recent efforts, in conjunction with the Governor's office, to support new Assured Water Supply rules. Particularly, we believe the proposed ADAWS rules will significantly benefit the prospects of a sustainable water supply in the Pinal AMA going forward.

By permitting landowners to incorporate new non-groundwater sources into their overall water portfolio, ADAWS would allow landowners new methods to reach their water demands and even lessen the dependence on groundwater sources, paving the way for a more-sustainable water supply in Pinal County.

Under existing rules, landowners without a Certificate of Assured Water Supply but who could otherwise secure non-groundwater sources to meet demands are still unable to develop. ASAWS rules would ensure these landowners—who demonstrate ability to provide and protect water supply—may utilize their land to its fullest potential. Changes in land use and population require Pinal County to continue developing residential, commercial, and industrial infrastructure, and the flexibility afforded to landowners with ASAWS rules would help the County remain an attractive and economically diverse place for generations.

Once again, we appreciate and support the efforts of the Governor's office and ADWR staff, putting our full support behind the proposed ADAWS rules.

Sincerely,

Jordan R. Rose

Pinal County Water Augmentation Authority

September 5, 2024

Sharon Scantlebury, Docket Supervisor
Arizona Department of Water Resources
1110 W. Washington St. Ste 310
Phoenix, AZ 85007

Dear Ms. Scantlebury:

The Pinal County Water Augmentation Authority would like to offer strong support for the proposed amendment to the Pinal AMA Assured Water Supply (AWS) Rules; specifically, the Alternative Path to Designation of a 100-year Assured Water Supply (ADAWS) provisions. The Authority believes that this will help to create a sustainable water supply for the Pinal AMA, and foster regulatory stability which are important to all aspects of our regional economy.

As Chairman of the Authority, I appreciate that the proposed rule change will require an offset to existing groundwater pumping with new, non-groundwater supplies as development occurs. This should provide for a more diversified water portfolio for the area, creating a more sustainable water supply for current residents and businesses. It should also help provide a path forward for new subdivision development that is not already covered by a Certificate of Assured Water Supply, where as under the current regulatory structure no such path practically exists.

I believe that stabilizing the regulatory environment can provide all sectors of our economy confidence that their homes, businesses, and land will continue to have value as we will have a sustainable water supply. Additionally, the new rules foster the co-existence of agricultural and municipal water demands, providing for a natural progression of subdivision development that is consistent with a market-driven economy.

I would like to add my thanks for all the efforts of ADWR staff and the Governor's Office in getting the policy discussion to this point and would encourage the adoption of the new rules as soon as possible.

Sincerely,

William E. Collings

RE: Comments pertaining to Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record on August 23, 2024

Dear Ms. Scantlebury,

Thank you for including the Pinal AMA in the above mentioned rulemaking for the Alternative path for a Designation of Assured Water Supply (ADAWS). We appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules.

We believe the ADAWS will help to allow economic growth to occur while simultaneously making water supply portfolios more sustainable. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

For many years now ADWR has not approved a new final determination of an assured water supply in the Pinal Active Management Area based on groundwater due to concerns of groundwater availability. The ADAWS will allow ADWR to issue new Designations of Assured Water Supply and subdivisions can move forward. The process also requires the use of new non-local groundwater which will increase sustainability in Pinal County.

I am grateful for all the hard work that went into this by ADWR's staff and the Governor's Office. While much more work needs to be done and it is important that Pinal AMA remains included in all water management discussions, this is a meaningful step forward for Pinal County.

Thank you,

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to find water solutions in the Pinal AMA. We have been intricately involved as a stakeholder in the effort to find reasonable water solutions in that region since the initial efforts of ADWR to reassess water in Pinal AMA nearly a decade ago. We very much appreciate the current effort to develop these new Assured Water Supply rules in the form of ADAWS. We believe that will introduce a crucial path forward to create a sustainable water supply in the Pinal AMA.

A sustainable water supply is very important to all aspects of our economy and quality of life in Pinal County. It is vital to find a balanced solution that protects our most precious natural resource, water, while also supporting reasonable affordability and thoughtful economic and housing development growth.

We are multi-generational Arizonans going back to 1878 with a deep heritage in farming, ranching, land development, home building, job creation, technology development, and overall economic development. We even have family who labored a century ago on the dam and reservoir infrastructure that is so foundational to our water and economy today. The ADAWS program is one of many initiatives our generation is taking on to secure innovative and sustainable life in Arizona for the future.

Again, thank you for the efforts of the Governor's Office and ADWR staff and the great work to find a way forward.

Sincerely,

Jason Barney

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner / developer within the Pinal AMA, these rules are important to allow for responsible development of land that otherwise would not be developable. The current rules provide no path forward for development. We believe that the ADAWS would create a sustainable water supply for the Pinal AMA that would attract and keep world class industry as well as housing and commercial development in areas where affordable growth is desperately needed.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Tim Brislin
President
Harvard Investments

RE: **Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record**

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner with land in Superior, AZ, ("0" S Richard Ave 6) the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Gary Smith

RE: **Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record**

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner with land in Florence, AZ, (at Anthem @ Merrill Ranch) the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Franklin acquired, in 2017, and currently owns a development project as part of the Anthem subdivision at Merrill Ranch. This property is located within that portion of what was Johnson Utilities, and now EPCOR's, Certificate of Convenience and Necessity located in Pinal County, AZ. The property is also located withing the Pinal Active Management Area and most importantly is "shovel ready."

Working with ADWR, the Town of Florence and EPCOR we have been unable to secure approval for water extension to our property for the past 7 years. We are hopeful that passage of these new rules will allow this project to move forward for the benefit of the Town and many who seek to live there.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

Pinal Land Holdings is a leading developer in Arizona with projects throughout the state including Inland Port Arizona ("IPAZ") and numerous utlity scale solar sites. IPAZ is home to Nikola Motor Company and Procter & Gamble and we are actively working with the Arizona Commerce Authority to attract additional manufactures to the region. These companies evaluate several factors when selecting a site and one of the top factors that has lead to so much success at IPAZ has been available and affordable housing in the region.

As President/CEO of a company that is on the forefront of some of the state's largest economic development wins, I am writing to thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. These rules will support affordable homes and economic success for our state while continuing to protect consumers and the underground aquifers.

Arizona has a history of forward thinking water regulation and we appreciate the efforts of the Governor's Office and ADWR staff on these important steps forward for all of Pinal County.

Sincerely,

Jackob Andersen
President & CEO

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

Saint Holdings is a leading developer in Arizona with projects such as Central Arizona Commerce Park ("CAZCP") in Casa Grande. CAZCP is home to many companies including Lucid Motors, Tractor Supply Company and several supply chain companies for the semiconducter industry that employ thousands of area residents. These companies evaluate several factors when selecting a site and one of the top factors that has lead to so much success at CAZCP has been available and affordable housing in the region.

As President/CEO of a company that is on the forefront of some of the state's largest economic development wins, I am writing to thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. These rules will support affordable homes and economic success for our state while continuing to protect consumers and the underground aquifers.

Arizona has a history of forward thinking water regulation and we appreciate the efforts of the Governor's Office and ADWR staff on these important steps forward for all of Pinal County.

Sincerely,

Jackob Andersen

RE: **Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record**

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner with land in Queen Valley, AZ, (at Silver King & Williams Roads) the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Gary Smith
Manager

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal and Phoenix AMAs. As you are aware, Pinal County is divided between the Phoenix and Pinal AMAs. While I understand the rules are different in the Pinal AMA than the Phoenix AMA for good reason, it is important that an assured water supply can be secured in Pinal County on both sides of the AMA boundary so we can make sure all Pinal County communities benefit from these positive changes.

A sustainable water supply is important to all aspects of Pinal County's economy. Through this letter, I am expressing my direct support for the new rules and encouraging their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are important steps forward for all of Pinal County.

Sincerely,

Mayor Mila Besich

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

On behalf of the Casa Grande Chamber of Commerce and Tourism Office Board of Directors, I am writing to thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a business, it is important to have a vibrant economy that attracts more businesses and high-quality workers who can live and work in our communities. The ADAWS allows water providers who are currently not designated as having an Assured Water Supply to secure an Assured Water Supply. Existing residents and businesses will benefit from this, because the ADAWS requires water providers to offset existing groundwater pumping with a new non-groundwater supply as new developments come online. This will result in further diversifying the water provider's water supply portfolio creating a more sustainable water supply for existing residents and businesses. A sustainable water supply is foundational to a strong economy that supports strong property values, businesses and our overall quality of life.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Renée Louzon-Benn
Executive Director
Casa Grande Chamber of Commerce and Tourism Office

Dear Ms. Scantlebury:

RE: Keeping the American Dream Alive

Dear Ms. Scantlebury:

People have been moving to Arizona for decades to improve their station in life. Many started new businesses, employing workers and creating a society that makes us all proud.

Pinal County has been able to attract more than its fair share of vigorous, modern and sustainable businesses. One of the major reasons for the stampede to Pinal, is that business owners knew that their employees could easily achieve the American Dream of home ownership. Additionally, many Phoenix and Tucson residents have been priced out of their local market but were able to find value in Pinal.

New development of single-family housing has practically come to a standstill because the water supply has been turned off. In the short run, reducing the supply of homes will raise prices. In the long run it makes us look like poor civic managers and will discourage businesses from locating to Arizona.

Arizona has a long history of collaboration on water issues for the public benefit. It would be a shame if this legacy ended today.

Sincerely yours,

Rebecca Roberts

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a business, it is important to have a vibrant economy that attracts more businesses and high quality workers who can live and work in our communities. The Assured Water Supply Designation (ADAWS) offers a significant opportunity for our water providers to secure a more reliable and sustainable water supply. Currently, some water providers in our area do not have an Assured Water Supply, but with ADAWS, they will be required to offset their current groundwater pumping by sourcing new, non-groundwater supplies as new developments are built. This diversification of water sources will directly benefit both existing residents and businesses, ensuring a more sustainable and dependable water supply. A stable water supply is crucial for maintaining strong property values, supporting businesses, and fostering the overall economic health and quality of life in our community.

As a landowner without a Certificate of Assured Water Supply, these rules are important to me because the new rules under ADAWS provide a practical path for developing new subdivisions on land not covered by a CAWS, which was not possible under the current rules. Previously, landholders needed to either secure non-groundwater supplies to offset all groundwater pumping within a water provider's service area or build an isolated water system to bring the supply to the new development. With ADAWS, landholders only need to secure a non-groundwater supply for their property, and the water provider can integrate it into the existing system. This approach saves costs and contributes to a more sustainable water supply for residents and businesses.

As a part of the industrial economy, these rules are important to me because in addition to the benefits of a sustainable water supply for attracting and retaining world-class industries, ADAWS also

4492 W Kitty Hawk Chandler, AZ 85226

supports the development of nearby housing needed to draw the skilled workforce required for the jobs and careers these industries create.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Dan Erickson, Managing Member

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

On behalf of Lucid Motors, thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS. As the largest employer in Pinal County, sustainable growth is imperative as we continue to expand our operations and footprint in Casa Grande, AZ. We believe Arizona Water Company is well suited to provide the best support as an "Alternative Path to Designation of a 100-year Assured Water Supply" (ADAWS) provider to ensure a sustainable water supply in the Pinal AMA that meets the regional administrative and water needs for all users.

Through this letter, I am expressing our direct support for the new rules and encourage their adoption as soon as possible. Currently, we employ over 2000+ full-time Lucid team members and are growing. Through this growth, we will require additional water utilization to support our expanding operations, future supplier business needs, and employee housing. Our experience with Arizona Water Company has been superb and they have been a reliable utility partner since the beginning. By granting Arizona Water Company the authority to serve as an ADAWS provider, you will help us meet these future needs in a prompt manner by local response through a water utility company that we have a relationship with and who knows our business.

We appreciate your time and consideration. The future of Arizona's economic development and business success relies on sustainable and local water management policy. This initiative is a step in the right direction for all water users in the Pinal AMA. Once again, we thank you and appreciate the efforts of the Governor's Office and ADWR staff.

Re: Alternative Designation of Assured Water Supply Rules

Dear Ms. Scantlebury:

The City of Buckeye's goal is to obtain an Assured Water Supply designation, enabling us to directly manage our water resources. The Arizona Department of Water Resources (ADWR) Alternative Designation of Assured Water Supply (ADAWS) program offers a potential pathway for Buckeye to achieve this designation while providing a necessary transition period to acquire new renewable resources and reduce reliance on groundwater supplies. While we value the efforts of ADWR and the Governor's Office in developing ADAWS, we have reservations regarding the near-term viability of the program for our community.

As Buckeye has expressed on multiple occasions, we are particularly concerned about the fairness of the financial impacts of R12-15-710(H.2). This rule mandates a 25 percent groundwater offset for each new alternative water supply included in the designation, which places a significant cost burden on the city and our ratepayers. The intended benefits of this rule can be achieved with a lower offset percentage, allowing more flexibility to transition to renewable sources. Furthermore, as noted during the informal rules process, the 25 percent offset also applies to effluent generated from new alternative water supplies. Because this water would effectively be subject to the rule multiple times, the actual offset would far exceed 25 percent. This compounding effect would further increase the financial burden on Buckeye's water ratepayers, one that residents in other cities do not bear.

We must also emphasize that the cost burdens of reducing groundwater pumping and addressing unmet demand in the Phoenix Active Management Area (AMA) should not be placed solely on ADAWS providers. The groundwater deficit impacts the entire Phoenix AMA, and the ADAWS rules should be revised to ensure the offset requirement is applied equitably across all currently designated water providers and not just potential ADAWS applicants.

The financial impacts of these rules could potentially be mitigated through additional regulatory or legislative changes. We commend the Legislature, the Governor's Office, Central Arizona Project, and ADWR for their efforts on SB1181, which provides greater flexibility for providers to collaborate with the Central Arizona Groundwater Replenishment District (CAGRD) on the service area agreement required by R12-15-710(K). This is a crucial step in enhancing the feasibility of ADAWS. However, more work remains to be done, and Buckeye cannot move forward with ADAWS until there is a solution to the agricultural-to-urban land conversion proposal negotiated during the legislative session. Converting water-intensive agricultural land to residential use is crucial for Buckeye's future growth, as it will provide the necessary resources and certainty for the success of the

530 EAST MONROE AVENUE | BUCKEYE, ARIZONA | 85326
623.349.6991 | DCOTTERMAN@BUCKEYEAZ.GOV | BUCKEYEAZ.GOV

ADAWS program. This conversion will also yield significant long-term benefits for the aquifer, potentially saving over 100,000 acre-feet of water annually in the Buckeye area. We recommend amending R12-15-710(J) to allow groundwater volume resulting from the agricultural-to-urban conversion program to be added to the ADAWS. This change would provide an additional and crucial source of water for meeting our assured supply requirements while also conserving significant amounts of groundwater.

Infrastructure requirements also represent a significant barrier for Buckeye's participation in ADAWS. The city's planning area covers 640 square miles, encompassing multiple separate water service areas, each with distinct needs and available resources. These systems are not interconnected, and current regulations prevent us from pursuing an ADAWS designation for the entire city without significant infrastructure investment. This investment, which involves connecting the systems, is not part of the city's current five-year capital improvement plan. As a result, Buckeye may need to pursue separate ADAWS designations for each service area, leaving some regions in a state of uncertainty until connections are established and new alternative supplies are secured. A short-term solution to this issue is crucial.

Finally, the City of Buckeye has concerns about the timeframes associated with ADWR's review and processing of ADAWS applications. As mentioned in the Economic Impact Statement, the ADAWS application process demands *substantial* staff time, expertise, and legal review. Using our experience with ADWR and the Harquahala transportation order process (a process that is objectively less comprehensive than the anticipated ADAWS process) as an example, the ADAWS process could extend over several years, underscoring the need for interim solutions and alternative options for ADAWS participants during the application review period.

Continued collaboration will be required to develop and implement a variety of innovative water policies that account for the unique challenges facing Buckeye. While ADAWS may be one aspect of our long-term water strategy, it is only part of the solution. New water resources, conservation efforts, substantial investments in infrastructure, and policy refinements will all be necessary to ensure sustainable growth in the years and decades to come. We respectfully request that ADWR and the Governor's Office consider revising the ADAWS rules and lifting the current moratorium, allowing us the time and flexibility to work on these solutions while permitting sustainable housing development to resume.

As one of the fastest-growing cities in the nation, Buckeye is essential to meeting the region's affordable housing demands. We cannot afford to remain in a state of uncertainty. Implementing innovative water resource solutions is essential—not just for our city, but for the economic health and growth of the entire region and state. We appreciate the efforts of ADWR and the Governor's Office and remain committed to working with all stakeholders to establish fair and equitable means to secure a resilient water future that supports growth, manages water resources effectively, and ensures long-term sustainability for all of Arizona.

Thank you for your consideration. Please let us know if we can provide any additional information.

Sincerely,

Dan Cotterman
Buckeye City Manager

RE: **Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record**

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner with land in Florence, AZ, (at Anthem @ Merrill Ranch) the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Franklin acquired, in 2017, and currently owns a development project as part of the Anthem subdivision at Merrill Ranch. This property is located within that portion of what was Johnson Utilities, and now EPCOR's, Certificate of Convenience and Necessity located in Pinal County, AZ. The property is also located withing the Pinal Active Management Area and most importantly is "shovel ready."

Working with ADWR, the Town of Florence and EPCOR we have been unable to secure approval for water extension to our property for the past 7 years. We are hopeful that passage of these new rules will allow this project to move forward for the benefit of the Town and many who seek to live there.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA.

As a part of the agricultural economy, these rules are important to me because they provide me with the freedom to transition my land from agricultural to urban use when it is the right time for me and my family. These rules will provide a more natural progression from agriculture to municipal consistent with market forces.

A sustainable water supply is very important to all aspects of our economy in Pinal County. The ADAWS will help give all sectors of the economy confidence that their homes, businesses, industries and land will continue to be valuable because we will have a truly sustainable water supply. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Gail Robertson

Support for the Proposed ADAWS and Commingling Rules

RECEIVED

SEP 17 2024

LEGAL
DEPT OF WATER RESOURCES

Dear Ms. Scantlebury,

I am writing to express my profound gratitude for the diligent efforts undertaken by the Governor's Office and the Arizona Department of Water Resources (ADWR) in formulating the new Assured Water Supply regulations. The introduction of the ADAWS is a commendable initiative that promises to secure a resilient water supply for the Pinal Active Management Area (AMA), which is of paramount importance.

The economic vitality of Pinal County is inextricably linked to the availability of a reliable water supply. It is with this understanding that I convey my unequivocal support for the proposed rules. Their timely implementation is crucial, and I urge for their swift adoption.

I would like to reiterate my appreciation for the commitment shown by both the Governor's Office and the ADWR team. This progressive move is a significant milestone in ensuring the long-term sustainability of our county's water resources.

Yours sincerely,

Dear Ms. Scantlebury:

Re: Alternative Designation of Assured Water Supply Rules

The Town of Queen Creek is a rapidly growing community in the Southeastern portion of the Phoenix Active Management Area (AMA) which currently services approximately 43,000 meters and 135,000 people both in and outside the Town limits. For over a decade, the Town has been working towards acquiring additional water resources in order to reduce our groundwater dependence, save taxpayer funds and ultimately work towards a designation status. Prior to the introduction of the Alternative Designation of Assured Water Supply (ADAWS) rules, the traditional designation process would have been extremely difficult for municipal providers, like the Town, to take advantage of due to the groundwater allowance calculations and the handling of non-replenished (legacy) groundwater use within the service area. Furthermore, the Phoenix AMA Groundwater model released by the Arizona Department of Water Resources (ADWR) in 2023 halted all new assured water supply determinations involving any component of groundwater, based on a 4% deficit in the groundwater basin over the next 100 years. For these reasons and others, the Town would like to commend the Governor's Office and ADWR for pursuing the ADAWS concept as a potential pathway forward for providers such as Queen Creek.

The proposed ADAWS rules make great strides in addressing the prior inhibitors, however; we do want to comment on some additional opportunities for further improvement that would assist municipal providers, like the Town, to ultimately pursue a form of designation. The entities that are most likely to apply under the ADAWS rules are younger municipalities or private utilities who received little to no Central Arizona Project (CAP) water, have little to no alternative surface water supplies, and have so far developed largely on groundwater. Many of the surface water supplies available in Arizona were previously divvied up among the more established communities. In Queen Creek's case, the Town has no Salt River Project (SRP) supplies and a CAP Municipal and Industrial (M&I) allocation of only 495-acre feet per year, which is only about 2% of its total water demand. Whereas, many of the currently designated cities received CAP/SRP supplies that were 80 to 100% of their buildout demand. Additionally, many of the water providers whom are designated now, have large amounts of non-groundwater supplies; including, SRP, CAP and tribal settlement water acquired at significantly reduced costs compared to the current market.

The Town has implemented strategies to move away from groundwater for the benefit of the aquifer as well as from the increasing rates of Central Arizona Groundwater Replenishment District (CAGRD) water. As the Department is aware, we have been working to acquire new water resources and invest in the necessary

infrastructure for their acquisition and implementation. With the limited supplies Arizona already faces, water is in high demand. The cost of acquiring new alternative supplies will only increase, and the competition for those supplies will grow exponentially as providers attempt to qualify for the ADAWS.

Prices are further exacerbated by the fact that the country has been experiencing unprecedented inflation, particularly in the construction fields. Significant infrastructure is necessary to develop, treat, and move these new resources. For example, the Town of Queen Creek had received a price estimate of $14.5 Million for a 5-mile pipeline project back in 2021, that same project is now being quoted for $36 Million.

Becoming an alternatively designated provider also requires the provider to become a Member Service Area of the CAGRD, which means that the provider will immediately incur the cost of replenishment at approximately $800/acre foot for any groundwater we use outside of existing Member Lands in addition to the existing legacy groundwater users. This means that the Town will not only have to expend considerable funds to purchase our own water supplies to offset groundwater, but we will be required to pay CAGRD replenishment costs at the same time. The complexities of the financing for these cumulative costs needs to be taken into consideration. Our Town Council will be faced with difficult choices in approving and allocating these costs across the diverse economic sectors of our service territory. In addition to the statutory requirements under A.R.S. 41-1052 D. 3, the high cost of acquiring water resources for ADAWS applicants makes it critical that the Department select the regulatory alternative that imposes the least burden and cost on providers attempting to become designated.

Consistent with our prior communications to ADWR, we have further elaborated on our financial and other concerns in the hope of continuing to work collaboratively with the Department as the rulemaking proceeds.

> 25% Groundwater Offset
>
> According to the ADAWS draft rules, applicants are required to provide 25% of the new alternative water supply in the designation to be used to offset current groundwater use. Within the rules, ADWR has not provided data suggesting why a 25% offset alternative poses the least burden and cost to the regulated community. In fact, the Department's Phoenix AMA model shows a 4% deficit in all sectors of groundwater use, including agriculture and exempt wells. Meanwhile, the 25% offset seems to recognize that the new ADAWS providers are being required to make up for groundwater use by others, including currently designated providers. A reduced offset level closer to the identified 4% deficit would be a less burdensome and costly option.
>
> Additionally, the 25% offset does not end until all groundwater volumes under the ADAWS are eliminated and the alternatively designated provider is completely transitioned off of groundwater. In fact, the rules do not explicitly address what will happen if the provider is completely transitioned off groundwater but continues to acquire new alternative supplies.
>
> Furthermore, in the grandfathered groundwater calculation of the draft rules, it combines current groundwater use with groundwater demand associated with unbuilt certificates. This scenario creates a large portion of the grandfathered groundwater volume based on groundwater supplies that have been certificated and proven to be available for 100 years under the assured water supply process.
>
> We respectfully request the rules be amended, as appropriate, to limit the 25% offset to no more than the unreplenished groundwater use within the ADAWS provider's service area at the time on which the ADAWS is based (presumably 2023). Otherwise, the Town would be forced to lose a portion of

an already proven assured water supply. Furthermore, ADWR should also identify a maximum percentage and have the flexibility to adjust this rate based on the current status of the deficit and/or up until the point when the provider can fully replenish their groundwater needs.

Effluent

The Town of Queen Creek believes the 25% offset required for all new alternative supplies should not be applied to any new effluent, or at a minimum, be reduced due to water and infrastructure costs (this adds approximately $40 Million in treatment costs/1,000-acre feet of water). Effluent is considered a recycled water supply and will be generated from the non-groundwater supplies brought in for new growth. Requiring an offset on effluent would inherently apply a double assessment on the same supply of water. In the groundwater management plans there are incentives in place for facilities or entities to use effluent instead of other supplies. For example, in the Phoenix AMA Industrial Conservation Program for turf related facilities, effluent use is counted as 0.6 acre feet/1 acre foot of use against the calculated allotment for the facility. Treating the effluent like other supplies of water in the ADAWS draft rules does not align with ADWR's current practices for effluent use and does not pose the least burden or costs to ADAWS applicants.

If every new block of effluent pledged to the designation requires a 25% offset, there will need to be a "true-up" process after every modification. Since effluent that is pledged to a designation is typically based on current production plus estimated future generation, there could be misalignment on what is actually produced (versus estimated) after the designation period. Therefore, if production is less than what was estimated, the effluent would have given more for the 25% offset than what the effluent supplies actually produce. In that scenario, if the provider decides to pledge more effluent to the designation, they will pay double for the offset when the effluent production is recalculated unless there is a reconciliation. The draft rules do not seem to perceive, or address, this problem.

Minimum CAGRD Reporting Requirement

The Town appreciates that ADWR has included in the draft ADAWS rules a new calculation for groundwater allowance to help reduce the costs of the inherit replenishment fees associated with any groundwater use. A groundwater allowance of 426,000 acre feet for Queen Creek's designation is helpful and necessary for the designation process to work; however, it is important to mention that under the current standard of CAGRD enrollment, there is a minimum reporting requirement of 2/3 of groundwater use.

Under these requirements if a water provider uses 1,000 acre feet of groundwater they could only apply 333 acre feet of groundwater allowance or other credits to offset their replenishment costs. This would only save $264,000 out of the $800,000 it costs to replenish the 1,000 acre feet of groundwater.

This immediate cost of replenishment occurs, of course, at the same time the proposed designated provider is actively attempting to acquire alternative non-groundwater supplies, at significant expense, to reduce the use of groundwater within the service area. The double financial impact of replenishment costs for groundwater use that is not required to be replenished under existing law, together with the cost of acquiring new alternative supplies and the infrastructure necessary to use those supplies, may place the alternative designation concept outside the financial ability of the Town.

Therefore, it is imperative that CAGRD and the providers applying for a designation under the ADAWS rules work together to determine a minimum reporting requirement that the provider can afford while insuring CAGRD can acquire enough funds for operations and resource acquisition. If these terms cannot be agreed upon by both parties, the ADAWS may not be a viable option for the water provider.

Agriculture to Urban Conversion Incentive

During the 2024 Legislative Session, the Arizona Legislature passed Senate Bill 1172, otherwise known as the Ag-to-Urban bill, but it was ultimately vetoed by the Governor. The passage of this legislation and/or a subsequent rulemaking by ADWR to accomplish the same, is the most significant incentive for the Town in formally pursing the path outlined in the proposed ADAWS rules. The Town has a long history of agricultural roots and many acres of farmlands still remain. An incentive needs to be established in order for the conversion of agricultural acres to urban development, which currently hold unreplenished grandfathered groundwater rights. Beginning in 2025, land owners can no longer relinquish their irrigation rights for extinguishment credits. By next year, the State will lose this remaining incentive of converting agriculture lands to development and reducing the overall use of groundwater.

As we move forward, the State needs to find a workable solution to fill that void and with limited physical availability and access issues for water, the Ag-to-Urban concept is a necessary solution. ADWR's own analysis shows there could be as much as an 11-million-acre feet reduction in groundwater use over the next 100 years in the Phoenix AMA if the agriculture to urban program was implemented. The Ag-to-Urban concept is one of the most cost effective ways for the Town to continue to acquire new supplies for a designation.

In conclusion, the Town of Queen Creek would like to thank ADWR and the Governor's Office for their work on the creation of the draft ADAWS rules. We appreciate the opportunity to provide commentary on the rules themselves as well as other implications. These rules, combined with the opportunity for an agricultural to urban conversion program in the Phoenix AMA, have the potential to lay the foundation for a much needed revision to the designation process while protecting our groundwater resources. The Town looks forward to future collaboration and further development of the rules to find constructive solutions for the aquifer and for all interested parties.

Sincerely,

Bruce R. Gardner

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to the Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record.

Dear Ms. Scantlebury:

As a landowner holding an existing CAWS, we want to extend our thanks for the efforts of the Governor's Office and all staff at the Arizona Department of Water Resources ("ADWR") for working with the various interested parties to develop the new Assured Water Supply rules more particularly the ("ADAWS"), which will most certainly assist to create a sustainable water supply in the Pinal AMA.

To allow landowner's existing CAWS to be incorporated into the ADAWS will provide us the opportunity along with others (residents, businesses, etc.) to incorporate new non-groundwater supply methods thus reducing the reliance on groundwater. We appreciate that the ADAWS will protect and honor existing CAWS and that if landowner is unable to maintain its Designation, the existing CAWS will be reactivated and provided the same level of land entitlement as without an ADAWS.

We support the adoption of the new ADAWS for the economic benefit to Pinal County and its communities as soon as possible.

Again, thank you to the Governor's Office and ADWR for all its efforts and your forward vision to a long-term resolution for a sustainable water supply.

Sincerely,

Tom Tait
Landowner

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

As the City Manager of the City of Casa Grande, I want to thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. The City of Casa Grande, along with other municipal and private water providers, have been working collectively to find realistic solutions that manage water sustainability and growth within the Pinal AMA for close to a decade. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

I believe you will find that governmental entities, private developers, and residents within Pinal County agree that this proposed solution is a feasible resolve to our current and future management and oversight of this precious resource. It also provides a path for growth and development for our community, Pinal County, and the State of Arizona. The ADAWS allows water providers who are currently not designated as having an Assured Water Supply a path to secure the appropriate water supplies to ensure sustainability of the aquifer concurrently with managing the economic development and growth of a community. Existing residents and businesses will benefit from this because the ADAWS requires water providers to offset existing groundwater pumping with a new non-groundwater supply as new developments come online.

This balanced approach, along with the implementation of additional conservation measures and new innovative strategies is the correct proposition. I appreciate the efforts of everyone involved. This is an important step forward.

Sincerely,

Larry D. Rains
City Manager

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. **Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.**

As landowner without a Certificate of Assured Water Supply, these rules are important to me because they provide a path for new subdivision development on lands not already covered by a CAWS. Under the current rules, there is no practical path forward. We would either need to secure a non-groundwater supply and offset all groundwater pumping inside a water provider's service area in addition to securing water for the new development, or alternatively, we would need to secure a non-groundwater supply to offset the demands of the new development and in addition build an isolated water system that would bring the new supply physically to the proposed subdivision, not touch the existing water system. Under the ADAWS, the landholder only needs to secure a non-groundwater supply for its property, and the water provider can introduce the water supply into the existing water system avoiding costs associated with building an isolated system. This will not only save the landholder money, but it will create a more sustainable water supply for all residents and businesses.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Mike Kern

New Assured Water Supply Rules

1 message

Kathleen J Singh <newfie222@me.com>
To: docketsupervisor@azwater.gov

Wed, Sep 18, 2024 at 1:14 PM

Dear Ms. Scantlebury,

Thank you for the attention and efforts of the Governor's Office and the Arizona Department of Water Resources staff, along with stakeholders to develop new Assured Water Supply rules, especially the ADAWS. As a Casa Grande and Eloy landowner, having a sustainable water supply with an affordable water bill is very important. As someone who owns farm land in Eloy, I am very concerned about having a sustainable water supply. The new rules answer my concerns by allowing municipal and agricultural water supply needs to both be met. I fully supportive new rules, ad hope that they will be enacted as soon as possible.

Sincerely,
Kathleen Singh

New Assured Water Supply Rules Addendum

1 message

Kathleen J Singh <newfie222@me.com> Wed, Sep 18, 2024 at 1:38 PM
To: docketsupervisor@azwater.gov

Dear Ms. Scantlebury,

My letter in support of the new Assured Water Supply rules was mistakenly sent before proof reading. The last sentence should read as follows, I fully support the new rules, and hope that they are enacted as soon as possible.

Thank you,
Kathleen Singh

September 18th, 2024

Dear Ms. Scantlebury:

RE: American Resort Communities development
of a NEON RANCH resort in Pinal County and the new ADAWS Rules

We appreciate the efforts of your ADWR team with the Governor's Office in working for the many stakeholders like us who have been trying to develop a resort in Pinal County for three years. The new Assured Water Supply (ADAWS) rules will create a sustainable water supply in the Pinal PMA and release the concern of debt and equity firms who are reluctant to invest with us on the resort if "the water story is not figured out". Some firms have redlined AZ for their continued growth on misinformation we have to realign each day.

Water is important to all of us and it directly impacts our economy more than any other concern. The lack of it stops any of us in our tracks. That is why we are in full support for the new rules and we want to see their adoption as soon as practical so we can move forward.

Please continue the good work and accept tour support for the new rules.

Sincerely,

Jim Mullin

Re: Comments on Draft Rules for Alternative Pathway to Designation

Business for Water Stewardship (BWS) supports developing rules for an Alternative Pathway to Designation (ADAWS) for undesignated water providers in the Phoenix Active Management Area (AMA), as well as a set of rules that would apply in the Pinal AMA. ADAWS is an opportunity to provide communities the tools and flexibility to take positive and sustainable actions to shore up water supply and reduce groundwater reliance. Further, it is BWS' view that this can be a tool for regulatory relief and a way to open access to other water solutions the State needs, without further compromising Arizona's groundwater.

Our organization is committed to building consensus among business interest to:

- Advance innovation in Arizona for conservation, recharge, direct potable reuse, flexible water leasing, and overall efficiency;
- Secure Arizona's groundwater across the entire State, which is fundamental to Arizona's water reputation;
- Advocate for long-term Colorado River water supply solutions;
- Ensure economic viability and ecological resilience across Arizona.

Business for Water Stewardship believes a carefully crafted ADAWS approach can help create a predictable and secure water supply for Arizona, and we appreciate the opportunity to provide comments on the proposed ADAWS rules. Please do not hesitate to contact me if you have any questions or would like to discuss further.

Sincerely,
Todd Reeve, CEO

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Central Arizona Irrigation and Drainage District (CAIDD) thanks you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA.

CAIDD is an agricultural water provider consisting of more than 80,000 acres in Pinal County. These rules are important because they provide a means to orderly transition land from agricultural to urban use and decrease reliance on local groundwater supplies. As Pinal County continues to adapt to ongoing Colorado River shortages, transitioning agricultural land to less water intensive urban use is a crucial tool to help preserve our water supplies and will benefit agriculture and the overall Pinal County economy.

A sustainable water supply is very important to all Pinal County residents and industry. The ADAWS will help give all sectors of the economy confidence that their homes, businesses, industries and land will continue to thrive with a truly sustainable water supply. CAIDD supports the new rules and encourages their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Ron McEachern

Re: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, we are expressing our direct support for the new rules and encourage their adoption as soon as possible.

As a landowner without a Certificate of Assured Water Supply, these rules are important to us because they provide a long-awaited path forward. We are the owners of approximately 300 acres comprised of 923+ single-family residential lots with approved preliminary plats. Unfortunately, and for the better part of 7 years, we have been unable to move our development forward and deliver affordable residential lots within Pinal County due to current rules. Under the ADAWS, the landholder only needs to secure a non-groundwater supply for its property, and the water provider can introduce the water supply into the existing water system avoiding costs associated with building an isolated system. This will not only save the landholder money but provides a solution to a problem that has held us up for years, and will create a more sustainable water supply for all residents and businesses.

Once again, we appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Bob Karber

Re: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources ("ADWR") for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner, these rules are important to me because the new rules provide hope for new subdivision development on lands that do not already have a Certificate of Assured Water Supply. There is no practical path forward under the existing rules without, in addition to securing water for new development, also building an isolated water system to bring the new supply physically to the proposed subdivision without commingling into the existing water system. This will avoid costs associated with building an isolated system that would otherwise create a less secure water system for my land as well as existing AWC customers.

The ADAWS is good for all sectors of the economy because it gives us the confidence that our homes, businesses, industries and land will continue to be valuable because we will have a truly sustainable water supply.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Robert W. Nicholson

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a 400 acre landowner holding existing Certificates of Assured Water Supply, these rules are important to me because the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Justin Hastings

Re: Comments on Rules for Alternative Pathway to Designation

Dear Director Buschatzke,

The Arizona Municipal Water Users Association (AMWUA) believes the designation framework is the best path for future development to remain consistent with the tenets of the Assured Water Supply Program. Arizona's economic success and our way of life is a direct result of the ten AMWUA cities and other designated municipal water providers who have invested in water resources and infrastructure to prove a 100-year assured water supply. AMWUA and its members recognize first-hand the benefits gained from wise water management under their designations.

We are supportive of the rules for the Alternative Pathway to Designation (ADAWS) for undesignated water providers in the Phoenix and Pinal Active Management Areas (AMAs). These rules have the potential to reduce unmet demand in these AMAs, which would be beneficial for water management and the economy. Our own analysis of the ADAWS rules indicates that, as currently written, they would reduce groundwater pumping over a 100-year period.

As noted in our May 3, 2024 comments regarding the draft ADAWS rules, we strongly support the 25% reduction in groundwater physical availability for each New Alternative Water Supply acquired by a provider. This required cut ensures ADAWS reduces groundwater pumping and facilitates a transition towards renewable supplies. We are equally supportive of the expedited process for modifying a designation to include additional water supplies, which will reduce the hurdles to bringing in new water and streamline the administrative process.

We also highlighted in our May 3, 2024 comments that the groundwater allowances given to ADAWS providers are substantial and will rival or exceed those of our members, who have held designations for nearly 30 years and collectively serve over half the state's population. The volume of physically available groundwater granted to ADAWS providers is similarly large. Since the Phoenix and Pinal AMA Groundwater Models have shown demand will exceed supply over the next 100 years, we recommend that ADWR encourage CAGRD to establish appropriate minimum reporting requirements for ADAWS providers so that these providers are disincentivized from over-relying on unreplenished groundwater pumping.

We strongly believe ADWR's effective administration of ADAWS will be critical to ensure that it sufficiently protects the aquifer and safeguards the groundwater set aside as physically available for existing designated providers. As we have previously indicated in our May 3, 2024 comments, ADWR should consider additional oversight measures for ADAWS providers that are within ADWR's current regulatory authority to pursue. These measures include requiring, as part of the annual reports every designated provider must submit, information on whether an ADAWS provider is on

track with acquiring New Alternative Water Supplies, building infrastructure to use these supplies, and monitoring of how its groundwater allowance is being utilized. Additionally, ADWR could consider a shorter initial designation period for an ADAWS provider, especially if the provider's volume of New Alternative Water Supply is relatively small.

We believe that the ADAWS rules provide a rigorous path for undesignated providers to obtain a designation, which is achievable through dedicated commitment and investment. We acknowledge that the success of ADAWS depends in part on how many undesignated providers will rise to the challenge and pursue designation under this new regulatory framework. Although renewable water supplies are limited in volume and increasingly expensive, designations provide an invaluable benefit to our desert communities. By creating the framework for water providers to plan and invest in their systems and demonstrate a 100-year assured water supply for all their residential and commercial customers, these new designations will help ensure that Arizona will remain thriving and prosperous for current and future generations.

Respectfully,

Warren Tenney
Executive Director

Dear Ms. Scantlebury,
I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.
While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is because I am interested in building a race garage at the track and possibly a trackside home.
I appreciate all the efforts of the Governor’s Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.
Sincerely,
Andrea Wellington
Podium Club Member

Re: Alternative Path to Designation of Assured Water Supply rulemaking

Dear Ms. Scantlebury,

On behalf of Audubon Southwest—the regional office of the National Audubon Society covering Arizona and New Mexico, this correspondence represents our initial response to the proposed rulemaking related to the Alternative Path to Designation of Assured Water Supply (ADAWS).

Audubon protects birds, and the places they need, today and tomorrow. In the desert southwest, the importance of water must be underscored, for birds and for people. We know both need safe and reliable water supplies to thrive. In support of that mission, Audubon is a member of the Water for Arizona Coalition. In 2022, Water for Arizona published its Arizona Water Security Plan, which highlights six key issues that Arizona must tackle to improve our shared water outlook. One of those issues: Renew the Groundwater Management Act and update the rules for managing groundwater within the Active Management Areas (AMAs).

On behalf of Audubon Southwest, I was appointed to serve as a member of the Governor's Water Policy Council. As the Department is aware, Governor Hobbs charged her Council with two objectives and corresponding committees: 1) to produce a package of policy recommendations that strengthen the Assured Water Supply (AWS) Program and ensure the protection of groundwater resources while enabling continued, sustainable growth, and 2) to develop proposals and recommendations for a new rural groundwater management framework.

The Assured Water Supply Committee of the Governor's Water Policy Council was established to review and make recommendations for updates to Assured Water Supply policies to address the challenges revealed by Assured Water Supply modeling projections, while being guided by these principles:

- Strengthen the integrity of the Assured Water Supply program
- Protect consumers and aquifers
- Ensure future growth is not reliant on mined groundwater

In June 2023, the most recent Phoenix AMA groundwater model was released, which found all physically available groundwater within the AMA was fully allocated—indicating that groundwater could no longer be used as a source to establish a proposed subdivision had a 100-year water supply. As a result, subdivision developments within the Phoenix and Pinal AMAs now must seek alternative water supplies to prove they have secured a 100-year water supply.

Designations of Assured Water Supply affirm that a Designated Provider (water utility or municipality), can demonstrate adequate investment and planning in their water supply portfolio such that the urban growth occurring within their boundaries has the assurance of a 100-year water supply. Conversely,

individual Certificates of Assured Water Supply occurs at a subdivision-by-subdivision level, with no requirement to ensure a 100-year water supply after the initial analysis.

There is a general recognition that for those who want to become Designated Providers, some adjustments to the current rules are needed to offer a path for responsible, incremental growth, while alternative water supplies are brought online. Finding a way to allow for responsible growth in the *near* term, while upholding the consumer protections of the Assured Water Supply Program for the *long* term, is critical to our collective water future. It is essential that these needed adjustments occur without undermining the Assured Water Supply Program and the Groundwater Management Act.

One of the proposals we put forth as a Council was the Alternative Path to Designation of Assured Water Supply (ADAWS) Proposal, which could encourage more water providers and municipalities to become "designated."

The ADAWS proposal approved by the Governor's Water Policy Council features a 30 percent reduction in grandfathered groundwater pumping as new water supplies are brought on to facilitate an incremental transition away from groundwater over time. However, the current rules propose a 25 percent reduction. It is difficult to determine from the information provided if the current 25 percent proposed reduction is consistent with advancing the respective AMA management goals.

Additionally, given alternative water supplies will likely come from places outside the area where they will be used, from an environmental and community perspective, the potential impacts of the development of these alternative water supplies needs to be assessed, evaluated, and, where possible, mitigated. All pertinent environmental reviews should be conducted in an open and transparent manner. When evaluating the viability and feasibility of obtaining alternative water supplies, there should be no degradation of existing laws and protections.

The Alternative Path to Designation of Assured Water Supply rulemaking process allows for a targeted opportunity to encourage eligible water providers and municipalities to obtain a Designation. Over the long term, the ADAWS rule could reduce groundwater mining while benefiting customers purchasing a home within a Designated Provider's service area because they would experience expanded protections and investments in water supplies beyond groundwater, if done correctly. It should not, however, be used to expand reliance on fossil groundwater or to weaken the consumer protections that are essential to the Assured Water Supply Program and Groundwater Management Act.

Thank you for this opportunity to provide comments on this rulemaking process.

Sincerely,

Haley Paul
Arizona Policy Director, Audubon Southwest

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a part of the Pinal County dairy and farming economy, these rules are important to our business as it simultaneously protects agriculture's water supply while encouraging development in areas of Pinal County best suited for growth. It is important to have a vibrant economy that attracts more businesses and high quality workers who can live and work in our communities.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Jim Boyle

Re: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the team at the Arizona Department of Water Resources (ADWR) for their collaboration with stakeholders in developing the new Assured Water Supply rules, and in particular the policy recommendation that is the "Alternative Path to Designation of a 100-Year Assured Water Supply". A reliable and sustainable water supply is crucial to the continued prosperity and future development of Pinal County's economy, and I am confident these regulations will help establish a sustainable water supply for the Pinal Active Management Area.

With this letter, I am voicing my full support for the proposed rules and strongly urge swift implementation of the rules.

As an agricultural landowner with family that farms in Pinal County, these rules will provide a smooth runway—as market conditions dictate, of course—for agricultural operations to eventually transition into residential and commercial development.

Once again, I want to acknowledge the efforts of the Governor's Office and ADWR staff in taking this critical step and doing the work that will benefit all of Pinal County.

Sincerely,

Nathan Cooley

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA.

A sustainable water supply is very important to all aspects of our economy in Pinal County. As a direct stakeholder in over 1,000 acres in Pinal County, through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

David Sellers

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner without a Certificate of Assured Water Supply, these rules are important to me because I have taken the necessary step towards developing my property but did not get the application in in time for the CAWS. I own just short of 200 acres between Coolidge and Casa Grande in the vicinity of Central Arizona College. I have an Arizona Water Company main line running on two sides of the property.

As a part of the agricultural economy, these rules are important to me because we have practiced water efficiency in farming operations for many years under the guidelines of the Grandfathered Water Rights efforts. Literally stewards of the land in knowing that development may be a possibility someday.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. This is an important step forward for all of Pinal County,

Sincerely,

W. Brian Hanger

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I own or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Darren Webster

Dear Ms. Scantlebury:

I am writing to add my vigorous support to the proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not currently a resident of Pinal County, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The racetrack represents the first project at this unique master-planned, multi-use community, a community that is the main reason that I sold my house in Scottsdale a few years ago with the goal of moving to the track allowing me to continue enjoying a lifelong passion for cars and motorcycles.

The development only needs new water rules to begin in earnest, which is especially important to me personally, as I do plan on making this my home. A sustainable water supply is the cornerstone of this dream, in addition to being the driver of all aspects for a strong economy in Pinal County.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Yours Sincerely,

Jens Plougmann

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a full time resident, my wife and I are part time residents. I am a member of the Podium Club at Attesa, and we live in the Casa Grande area 4-6 months per year. The race track I love represents the first project at this unique master-planned, multi-use community. Attesa only needs new water rules to begin development in earnest.

This is especially important to me. One reason I became a member, is because we are interested in moving to a trackside home that we own in the Casa Grande area. We might even built a race shop at the track, if complete development takes place.

We would love to be full time residents of Arizona. Developing Attesa can make that happen for us.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR). I encourage the approval and adoption of the new rules as soon as possible.

Thank you for your time.

Sincerely,

Wm Schwab

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is that I am interested in moving to a trackside home that I will own.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Clyde Van Blarcum

Dear Ms. Scantlebury:

I'm a current resident of Pima County and a potential resident of Pinal County. I'm a member of the Podium Club at Attesa and would like to build a home there and take up residency. I'm also interested in setting up my business at Attesa, so on both a personal and professional level, I am concerned with reliable sources of water. The proposed new ADAWS rules would benefit me, my family, and my business, as well as many others associated with Attesa and other developing businesses in Pinal County.

Thanks for your consideration,
Doug Wellington

Sept. 21, 2024

Dear Ms. Scantlebury:

The new rules regarding an Assured Water Supply for Pinal County are an appropriate step for growth in the area.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. "My" race track (the one I am an initial member of) represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in building a race shop at the track. As long as the track is successful I will continue to support the hotels, restaurants and businesses in Casa Grande

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Elliott Freireich

Dear Ms Scantlebury,

I am a resident of Pinal County, specifically Maricopa. Please accept this letter as my support for the new Assured Water Supply rules for Pinal County.

I do appreciate the efforts of the Governors office and the Arizona Department of Water Resources for working on these new rules, which will certainly help the economy or our county.

Living in Arizona for many decades makes us all aware of how crucial a stable water supply is to maintain our property, business and lifestyles we enjoy in our community

Thanks you for pushing this solution forward.

Sincerely,

Gordon E Levy

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **ANDERSON RD 80, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Attaway & 287, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

PODIUM CLUB MEMBER

DATE: 09/22/2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I own or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Chris Thompson

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Fast Track Rd 80, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

Sharon Scantlebury
Docket Supervisor
Arizona Department of Water Resources
1110 W. Washington St. Suite 310
Phoenix, AZ 85007

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Florence PG 53, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking

---

Gray Fowler <gray_fowler@yahoo.com> Sun, Sep 22, 2024 at 9:19 AM
To: docketsupervisor@azwater.gov
Cc: info@podiumclub.com

22 Sept. 2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.
While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I own or building a race shop at the track.
I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,
Gray Fowler

Phoenix, AZ 85007

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Hunt Highway Commercial, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen
Manager

PODIUM CLUB MEMBER

September 22, 2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I own or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Judy Purze

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Petersen Eloy 501, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

New Assured Water Supply Rules

1 message

Rob Wallschlaeger <robwallschlaeger@pricetransfer.com> Sun, Sep 22, 2024 at 8:06 PM
To: "docketsupervisor@azwater.gov" <docketsupervisor@azwater.gov>

September 22, 2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande, its many Restaurants, Businesses and Hotels. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Rob Wallschlaeger

RE: Comments Pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc, which manages properties in Pinal County, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of **Vickie L Hayes 56, LLC**, I wholeheartedly support the adoption of these new rules and encourage their swift implementation to benefit all stakeholders in Pinal County.

Thank you once again for your dedication to this important issue.

Sincerely,

Tanner Petersen

Ms. Scantlebury

Arizona Department of Water Resources

1110 W. Washington St.

Phoenix, AZ 85007

Dear Ms. Scantlebury,

I am writing to express my strong support for the new Assured Water Supply rules being proposed for Pinal County. Though I do not live in the area year-round, I own property in Pinal County and will soon be building and residing there part-time. The stability and management of water resources are critical, not only to property owners like myself but to the future economic and environmental health of the region.

I deeply appreciate the efforts from the Governor's Office and the Arizona Department of Water Resources in working to establish these new rules. A sustainable and reliable water supply is essential for protecting property values, fostering business growth, and enhancing the quality of life for the entire community.

Thank you for pushing forward with these critical changes. I fully support this effort and look forward to the positive impact it will bring to Pinal County.

Sincerely,

Scot Dietz

Dear Ms. Scantlebury:

I am writing in support of your proposed new rules regarding an Assured Water Supply for Pinal County.

I am not a Pinal County resident, but a strong supporter of the Podium Club at Attesa. The inability to get a required water certificate has stalled development at Arizona's premier race circuit and motorsports club, including the construction and sale of trackside homes, race shops, condos, and more. This issue has postponed jobs, tourism and growth. It has halted track expansion and upgrades necessary to host major, nationally televised race events.

A water rule change will release the brakes and let them build. Pinal County and Casa Grande will benefit.

I strongly encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Aaron Johnson

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I can own, or building a race shop at the track.

I appreciate all the efforts of the Governor’s Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,
Adam Kennel

Dear Ms. Scantlebury:

I support the new rules you are proposing for an Assured Water Supply for Pima County. I have visited the Podium club and believe the changes in the rules to allow them to continue development would benefit the city, county and state. I'm not a resident of the Pima county but liked what I saw while visiting the Podium Club site.

I hope you get the support needed to get these changes made so development can continue.

Sincerely,

Alvin Hamilton

Dear Ms. Scantlebury:

As a resident of Pinal County, please accept this letter as my direct support for the new Assured Water Supply rules for Pinal County.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working to develop these new rules, which will certainly go a long way in building a more vibrant economy.

We all know how a stable water supply is crucial for maintaining strong property values, supporting businesses, and fostering overall economic health and a higher quality of life in our community.

Thank you for pushing this solution forward.

Sincerely,

Amy Maldonado

Re: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024, and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources ("ADWR") for working with stakeholders and directly with AWC, to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in both the Phoenix and Pinal AMAs.

AWC takes its responsibility to provide safe and reliable water service to its customers seriously. When AWC acquires new customers, it does so in consideration of its obligation to provide water service indefinitely to those customers. With such a commitment, AWC is also committed to managing the water resources for those customers strategically, sustainably, and for the long term. AWC's water resource management strategy is two-fold: (1) obtain and maintain a diverse water supply, and (2) promote the efficient use of those water supplies.

AWC believes the new ADAWS rules are aligned with AWC's stated responsibility and strategy. AWC also strives to develop and protect a diverse portfolio of water supplies and associated infrastructure that balances system redundancy with affordable water prices. We believe the new ADAWS rules address AWC's need to accomplish this additional objective specifically by allowing us to repurpose our CAP water and use it as a new alternative water supply and by allowing for the continued use of groundwater allowances associated with existing certificates of assured water supply and by providing, with appropriate limitations, the continued use of extinguishment credits. Without these specific provisions, it would not be possible for AWC to pursue a designation of assured water supply at all.

A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. These rules, for both the Phoenix and Pinal AMAs, are a very important step forward for AWC. If you have any questions, please do not hesitate to reach out to me, or to Terri Sue C. Rossi, my Vice-President – Water Resources.

Very truly yours,

Fredrick K. Schneider

Dear Ms. Scantlebury,

The Central Arizona Water Conservation District (CAWCD) which manages and operates the Central Arizona Groundwater Replenishment District (CAGRD), appreciates the opportunity to comment on the two rulemakings proposed by the Arizona Department of Water Resources (ADWR).

Since its inception in the mid-1990s, the CAGRD has assisted landowners, cities, towns, and private water providers located in its service area in complying with Arizona's Assured Water Supply (AWS) program. The CAGRD serves its members by replenishing the groundwater they pump in excess of the limits established by the AWS Rules. This groundwater replenishment is critical to ensuring central and southern Arizona's long-term groundwater management goals.

The CAGRD is committed to continuing its important replenishment role under the newly proposed amendments - the Alternative Path to Designation of Assured Water Supply (ADAWS) and the Commingling rulemaking for Certificates of Assured Water Supply (CAWS).

Under the rule amendments, the CAGRD could see a large number of current Member Lands (MLs) become incorporated into a new Member Service Area (MSA). This shift in CAGRD membership will have operational and financial implementation impacts that will need to be addressed. Some of these will require close coordination with ADWR and likely statutory changes to CAGRD's Annual Membership Dues calculations.

The CAGRD will also need to work closely with potential water providers considering this alternative path to a designation to determine a reasonable reliance on the CAGRD under our

Member Service Area agreement. This reliance will take into consideration the water providers' existing water portfolio, their ADAWS groundwater allowance, and whether or not they will opt to temporarily keep their current MLs financially responsible for CAGRD replenishment under recently passed SB 1181.

In addition to these operational considerations, under the ADAWS proposal, the initial amount of groundwater that must be consistent with the Management Goal of the AMA increases, which could result in a greater replenishment obligation for the CAGRD. However, CAGRD has analyzed the anticipated impacts and determined that the combination of groundwater allowances, the alternative water supply requirements, and the observed reporting activities of existing MSAs will likely result in a reduction in future replenishment obligation compared to the replenishment obligation if the providers remained undesignated.

The CAGRD looks forward to continuing to work with the Governor's office, ADWR, and our stakeholders to ensure the State's long-term groundwater management goals are met as the AWS program evolves.

Sincerely,

Laura Grignano
CAGRD Manager

Dear Ms. Scantlebury:

I am writing in support of your proposed new rules regarding an Assured Water Supply for Pinal County.

I am not a Pinal County resident, but I strongly support the Podium Club at Attesa. The inability to get a required water certificate has stalled development at Arizona's premier race circuit and motorsports club, including the construction and sale of trackside homes, race shops, condos, and more. This issue has postponed jobs, tourism, and growth. It has halted track expansion and upgrades necessary to host major, nationally televised race events.

A water rule change will release the brakes and let them build. Pinal County and Casa Grande will benefit.

I strongly encourage you to approve and adopt the new rules as soon as possible.

Sincerely,

Chris Merrill

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County, especially Coolidge.

Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible. Please let me know if you have any questions or need any further information.

Kind Regards

Gilbert Lopez, City Manager

RE: ADAWS rule proposal

Dear Ms. Scantlebury-

I am writing on behalf of EPCOR Water Arizona. We are a private utility in Arizona with service areas across the state both inside and outside of Active Management Areas (AMAs). Collectively we serve over 368,000 fellow Arizonans. We have been actively involved in the development of the ADAWS from its inception at the Governors Water Policy Council through the development of the draft rules. EPCOR supports the proposed rules as they support sound water management and represent a positive move forward to encourage the use of renewable water supplies for growth in the Phoenix and Pinal AMA's.

Several language changes have occurred since the initial drafts of the rules were presented by the Department. The early presentations included examples of how the proposed ADAWS rule would function.

Those examples no longer match the current rule proposal as filed with the Secretary of State. EPCOR requests a clarification of the examples with the latest version as filed with the Secretary of State to ensure that a clear understanding of how the proposed groundwater availability reductions would function is available to stakeholders.

Thank you for the opportunity to comment and we look forward to your clarification.

Douglas W. Dunham

Re: Home Builders Association of Central Arizona Comments on Proposed Alternative Designation of Assured Water Supply Rules

Dear Ms. Scantlebury:

On behalf of the Home Builders Association of Central Arizona ("HBACA" or "Association") please accept the following comments on the Department's proposed rules related to the Alternative Designation of Assured Water Supply ("ADAWS") process. Notice of Proposed Rulemaking published in the Arizona Administrative Register on August 23, 2024, Volume 30, Issue 34. The HBACA is a trade association representing the residential construction and development industry. The Association acts as a source of timely and reliable information concerning the state of the local building industry and works to eliminate overly restrictive and costly building laws and regulations which drive up the cost of housing. Since 1951, the HBACA has served as the voice of the home building industry.

The release of the Pinal Active Management Area Groundwater Model in 2019 and the Phoenix Active Management Area Groundwater Model in June, 2023, and the moratorium imposed by Governor Hobbs on new determinations of assured water supply in the Phoenix metropolitan region, have adversely affected the residential for-sale housing industry disproportionately and unfairly. For the last nearly 30 years, for-sale residential housing, being developed on "subdivided land" as referenced in A.R.S. § 45-576, has been the most sustainable user of groundwater within the Active Management Areas. All homes built for sale have either been constructed in and served by a provider holding a designation of assured supply, or they have been issued Certificates of Assured Supply. In either case, for these three decades, for-sale residential housing's use of groundwater has been officially determined to be consistent with the achievement of the Phoenix and Pinal Active Management Area goals. In the Phoenix Active

Management Area, this has been primarily through 100% replenishment through the Central Arizona Groundwater Replenishment District ("CAGRD").

This is in sharp contrast to other groundwater uses in the Active Management Areas, most notably agricultural users, and those industrial (including multi-family for-rent housing) users in areas outside of the existing designated providers. These uses require no assured water supply, have no replenishment obligations, and are some of the largest consumers of groundwater. Yet the Phoenix groundwater model and the moratorium have had no effect or negative impact on these users. Instead, we have seen a boom in industrial development, build-for-rent housing, and commercial development based on minor land divisions.

All of this occurred during Arizona's nationally recognized housing supply and affordability crisis. Queen Creek, Buckeye, the west Phoenix areas served by EPCOR, and Pinal County are some of the fastest growing communities in the United States. However, subdivisions in these areas have been literally on hold since 2019 in Pinal County and as early as the summer of 2022 in most of the Phoenix Active Management Area, with no realistic end in sight. Investment in Arizona housing is delayed, infrastructure is stalled due to lack of a clear path to development, and housing prices are escalating rapidly due to the lack of supply. Homeownership is now a distant longing for many Arizonans. This is a matter that should be of deep concern to the administrative governance of the State of Arizona.

The solution to these water issues, thus far, has been to attempt to create a formula upon which the fastest growing, but undesignated water providers in the Phoenix and Pinal Active Management Areas might pursue an "alternative path" toward a designation of assured supply. To this end, the Arizona Department of Water Resources ("ADWR" or "Department") has drafted, circulated, and now formally submitted a proposed set of rules to create this alternative designation concept, commonly referred to as "ADAWS."

The HBACA supports the ADAWS concept for Queen Creek, Buckeye, and private utilities such as EPCOR and Arizona Water Company to become designated water providers. However, as the industry most impacted by these rules, we believe it is vital that the Department's rules are workable and fair. Additionally, the rules should be the least economically burdensome process for those providers and their constituent customers, particularly home builders and homeowners. Moreover, our home building industry must be allowed to continue to build and grow new planned communities to create a revenue base for those providers' acquisition of new water resources and the infrastructure necessary to produce, treat, and deliver those resources. The infrastructure costs funded by development impact fees to deliver water are already creating an impediment to new home construction, and a financially burdensome ADAWS will only compound this existing problem. This is not a home builder only problem. Without the infrastructure investment made by home builders, other land uses (i.e., commercial and industrial) will have nothing to tie into. Finally, we want to ensure that our members' projects that are currently on hold can immediately resume and begin to generate a return on the billions of dollars of stranded investment in those areas.

In these areas, we find the proposed rules fall short. The financial burdens of the ADAWS concept will once again fall unfairly and disproportionately on the home building industry, which is always at the front end of the water development requirements of any municipal water provider. There is no immediate or temporary relief for stalled subdivisions to resume large scale infrastructure projects necessary to achieve ultimate water service and, as importantly, sewer and wastewater treatment and storage facilities. The state imposed tax (variously called an "offset" or "premium") on new water supplies brought in by development cannot realistically be borne by the water provider, and will ultimately fall on the land developer and, in turn, on the eventual homeowner. There is no assurance that the program will be implemented quickly, and all indications are that the complexities of resolving an application for an ADAWS will take months if not years to complete.

Nor do we believe that the true economic impacts of the proposed ADAWS rules have been accurately considered, The Department has prepared, and posted on its website, an Economic, Small Business, and Consumer Impact Statement ("Impact Statement") that we have also reviewed. We asked Elliot D. Pollack & Company to review it as well and provide their experienced insight into the economic impact of these rules. They have prepared a memorandum summary of their findings, which we have attached to these comments for your consideration.

One area where the HBACA could see significant improvement in the proposed ADAWS concept is for the proposed tax on new alternative water supplies be directed to, and limited to, those sectors of the municipal service area that are responsible for the groundwater "mining" that the Department is trying to prevent. If the definition of "Alternative New Supply" were modified to require the provider to quantify the volume of water dedicated to non-subdivided land (which has heretofore not been contributing to mined groundwater) and reduce the provider's reduction of available groundwater only equivalent to that amount, much of the disproportionate hardship on developers of subdivided land would be removed. We have further discussed this improvement at the end of our analysis here.

With this background, we turn our attention to the specific issues we perceive in the proposed ADAWS rules.

<u>The Proposed Rule is Not an Option; It is a Licensing Requirement</u>

The preamble to the proposed rule strenuously attempts to depict the ADAWS as a mere option available to those municipal providers that may choose to pursue it. In fact, subdivided land development has been stalled in the fastest growing communities for the last two years in Maricopa County and five years in Pinal County. and every indication from the Department is that no new determination of assured water supply will be issued in the Phoenix or Pinal Active Management Areas unless the (currently undesignated) municipal provider complies with the ADAWS. While we recognize that the Department is contemplating another rule (the "commingling rule") that might allow some temporary relief, there are problems with that rule as well, which we address in a separate set of comments.

The reality is that the Department has done all in its power to make the ADAWS the only option to restart large scale residential development. As such, it is difficult to view the ADAWS as anything less than a mandatory requirement for residential growth in the currently undesignated provider municipal service areas.

The Proposed Rules are Grounded on a Faulty Groundwater Model Premise

A.R.S. § 41-1052(D)(8) requires that the preamble to the proposed rule disclose a reference to any study relied upon in the agency's justification for the rule. In the ADWR preamble, under Item 7, the Department lists "none" as the answer to this requirement. Nevertheless, the Department does reference both the "2019 Pinal model" and the "2023 Phoenix model" to establish the premise that there is currently no physically available groundwater to support a determination of an assured water supply in the Pinal or Phoenix Active Management Areas. These "models" are computer numeric studies that attempt to predict future water levels in the aquifers underlying these Active Management Areas. As noted in the preamble, the conclusion of these models, according to the Department, is that there are "unmet demands" within the model study area, and isolated areas where depth to water may exceed 1,000 feet (1,100 in Pinal) below land surface. Based on this premise, the Department concludes that the proposed alternative path to designation is justified because "Any costs associated with ADAWS are outweighed by the benefits when compared to the available alternatives." If one assumes that groundwater is not an alternative, then the "available alternatives" are few if any.

There are several problems with the reliance on these models to create the premise. First, the Department justifies lack of groundwater based on a notion of "unmet demand." These words do not appear in any statute or rule relating to the assured water supply program. It is a standard created wholly by the Department's interpretation and implementation of its rules, rather than the text of the rules, or the statutes. Furthermore, the calculation of an "unmet demand" is determined largely by placement of hypothetical wells by the Department in the future projections of the model domain. Landowners within the Hassayampa Sub-Basin of the Phoenix Active Management Area have engaged Matrix New World Engineering to do an in-depth analysis of the 2023 Phoenix Model. The results of that study have been submitted to the Department for review, and through that process, several adjustments have been made. But the final result of the Matrix model is that reasonable placement of wells within the model wholly eliminates the unmet demand cited by the Department across the entire municipal, assured water supply, and long-term storage credit recovery wells associated with the model domain.

Secondly, isolated depths to water across the entire Active Management Area may exist in some areas where rising terrain, impermeable underground deposits, and thin saturated aquifer zones contribute to lack of available groundwater at those specific locations. A.R.S. § 45-576, the statute which governs the foundation of the assured water supply program, does not require available groundwater in all areas. Rather, it focuses on "sufficient" groundwater that is "continuously available to satisfy the water needs of the proposed use." This is a site-specific determination that does not justify a conclusion that a depth to water issue in Apache Junction means that there is no physically available groundwater in central Buckeye. In fact, central

Buckeye is generally regarded as a "waterlogged" area where depth to water is exceedingly shallow—20-30 feet below land surface.

Thus, use of the 2019 Pinal model and the 2023 Phoenix model to justify the cost to benefit analysis of the rules creates an unrealistic, and statutorily unjustified restraint on the physical availability of groundwater that would support alternatives to the proposed rule. These alternatives would cost dramatically less to home builders and affected citizens than the proposed ADAWS alternative.

- The rule proposal is deficient on its face because it does not adequately disclose the nature of, and the extent of the impact of, the 2019 Pinal model and the 2023 Phoenix model as required by A.R.S. § 41-1052(D)(8).
- The Council should consider whether these models have been tested or subjected to peer review publications, such as the Matrix study. A.R.S. § 41-1052(G)(4). Particularly, inquiry should be made as to whether the assumptions underlying the Department's projection period of the model have been reviewed by anyone outside of the Department.
- The Council should consider whether the methodology and approach of these models are generally accepted in the scientific community, and particularly whether they are consistent with legislative intent or beyond the agency's statutory authority. A.R.S.§§ 41-1052(G)(6); 41-1052(D)(5); 45-576(M).

<u>The 25% Tax on New Alternative Supplies is Arbitrary</u>

The 2023 Phoenix model relied upon by ADWR to justify this rule, despite its faults as noted above, only projects a 4% deficit in available groundwater across the entire Phoenix Active Management Area model domain during the 100 year projection period. Only 2% of this projected shortfall is in the municipal/assured water supply/long-term storage credit recovery sector. Thus, for assured water supply purposes, this 2% shortfall is the "problem" sought to be reconciled by the proposed ADAWS concept.

Yet, under this proposed rule, the ADAWS applicant is first required to acquire or deploy a New Alternative Supply in order to qualify as an ADAWS applicant and, once acquired, the applicant is required to devote 25% of that new supply to a reduction in currently lawful groundwater use. This reduction is not tailored to any provider's actual use of groundwater or any relative contribution that provider or its customers may have made to any groundwater overdraft. Rather, it is an across the board requirement that seeks to force the ADAWS applicant to reduce its groundwater use by a factor of more than six times the projected shortfall in the entire Active Management Area.

No rationale, study, calculation, or empirical data is provided by the Department to support or justify the 25% tax on the New Alternative Supply. It is barely even mentioned in the preamble to the rule and is treated as if it were a benefit to the provider to "facilitate a transition away from groundwater."

As a simple proposition, requiring a few municipal water providers to bear a 25% groundwater tax on newly acquired or deployed non-groundwater resources to cure a 2% (or at most 4%) deficit largely created by others cannot be an "alternative that imposes the least burden and cost to persons regulated by the rule." A.R.S. § 41-1052(D)(3).

- No empirical evidence is offered by the Department to justify the 25% tax on a New Alternative Supply, making it an arbitrary percentage without rational basis on a cost/benefit analysis.

<u>The 25% Tax on New Alternative Supplies is an Unreasonable Extraction</u>

Similar to the arbitrary nature under which the 25% groundwater tax is imposed, the 25% tax on new supplies is a quasi-legislative exaction that exceeds the need to prove physically available groundwater under the assured water supply statute (A.R.S. § 45-576) and under a straightforward and reasonable interpretation of the assured water supply rules. If the modeling results show a 2% shortfall in the municipal/assured water supply groundwater (a determination that may still be subject to challenge), the exaction of a 25% reduction in groundwater available to the A-DAWS provider does not have a sufficient nexus to home building, exceeds home builders' proportionate impact on groundwater, and is contrary to the ruling in *Sheetz v. El Dorado County, California*, No. 22-1074, 601 U.S. ____ (April 12, 2024).

In both the preamble to the rules and in the Impact Statement, the Department characterizes the ADAWS concept as an "additional voluntary option[s]" to the existing rules that "create no new requirements." The Impact Statement goes on to state that "specific costs, benefits and impacts of this rulemaking were assess[ed] against these two alternatives—pursuing a determination of AWS [assured water supply] under the existing rules or not pursuing a determination." This analysis overlooks the fact that it is essentially impossible, at least in the most affected communities, to "pursue a determination of AWS under the existing rules." The ADAWS is not a voluntary option—it is the only option available to obtain new determinations of assured water supply in non-designated service areas or not to obtain a determination at all. When viewed realistically, the components of the ADAWS, particularly the 25% tax, is a mandated extraction to be able to continue development of subdivided land.

- The 25% tax on a New Alternative Supply is a government extraction on new development of subdivided land that is disproportionate to the need and not reasonably related to the problem, making it illegal under existing law and therefore not in compliance with A.R.S. § 41-1052(D)(3).

<u>The 25% Tax on New Alternative Supplies will Directly Affect Home Builders</u>

The preamble to the proposed rule and the Impact Statement build on the Department's characterization that any cost associated with compliance with the new rules will be borne by the water provider. For example, the Impact Statement (page 8) suggests that all costs will be borne by municipal provider ratepayers but "How these costs are distributed among the ratepayers is determined by the utility through ratemaking processes, which are specific to the provider and the community." As far as the cost impact to developers, the Impact Statement goes on (page

14) to state that the "water provider will decide how water supply costs are passed through to a developer. Compared to the traditional rules or no designation, these alternatives could allow for additional development."

- This is a rather naïve or intentionally misdirected view of the how the costs will actually be borne. It is common knowledge, certainly among experts in the water field, that utility service start-up costs for new development (water resource acquisition, infrastructure, regulatory compliance) are borne by the developer. In the case of ADAWS, a 25% tax on new supplies sufficient to allow development will be a cost to be passed on to developers, with the "understanding" that these costs are mandated by state law, not municipal provider regulation, and are therefore simply a cost of doing business. To assert that the economic cost of ADAWS will have no effect on small businesses, such as small home building concerns, is not justifiable (Impact Statement at page 13—Costs to Small Businesses—"None Identified"). From the HBACA perspective, as vetted with our constituent members over the course of many discussions, the cost of a New Alternative Supply, including the 25% tax, will be borne by the landowner/developer/homebuilder. The Department designed this tax to force water providers to reduce groundwater use. Yet, it is being imposed on the one industry that does not mine groundwater, does not contribute materially to any groundwater deficit, and does not receive any benefit over the traditional assured water supply program in place until the groundwater moratoriums became effective. The Impact Statement thus does not accurately reflect the true costs of the proposed rule and does not accurately reflect who will bear those costs, making it not generally accurate as required by A.R.S. § 41-1052(D)(2).
- The cost/benefit analysis does not address the inequity of imposing financial burdens on the homebuilding industry and makes no effort to select alternatives that impose the least burden on this particular industry that will be highly regulated by the rule.

The 25% Tax Is Compounded by the Need to "Gross Up" the Alternative Supply

Because the Department's characterization of the economic burden of the 25% tax falling solely on the water provider, it also overlooks the side of the equation that is concerned with meeting a specific quantity of water demand. For example, if a development needs 100 acre feet of water per year to satisfy the projected demand, and the developer is required to cover that demand, the developer must bring 100 acre feet net to the provider. If the developer attempts to bring 125 acre feet to meet the demand plus the 25% tax, the developer will still come up short. This is because the tax is imposed on the total quantity of the new supply. Proposed Rule A.A.C. R12-15-710 (H)(2) and (I)(2). If the New Alternative Supply Volume is 125 acre feet, the rule instructs that the 25% of the new volume shall be multiplied by 100 then subtracted from the provider's existing groundwater supply. Thus, the 25% of the 125 acre feet (31.25 acre feet) is the basis of the deduction. Translated back to the projected annual demand, this leaves only 93.75 acre feet to service the new development.

This calculation is familiar to anyone attempting to contemplate what gross amount is required to yield a desired net benefit, It is often referred to as a "gross up" calculation derived from the standard formula:

$$\text{Gross amount needed to offset new subdivision demand} = \frac{\text{Net amount homebuilder would have to convey to provider}}{1 - \text{25 percent "tax" on New Alternative Water Supply}}$$

$$\text{Gross amount needed to offset new subdivision demand} = \frac{100 \text{ AF/yr}}{1 - .25}$$

$$\text{Gross amount needed to offset new subdivision demand} = 133.33 \text{ AF/yr}$$

To the extent that any developer is required to cover the projected demand of a new development, it will be based on the net amount required to service that development. The acquired supply will have to be "grossed up" to yield the desired net. The tax to the developer is thus 33.33%, not 25%.

- The Rule package does not accurately calculate the true cost of the 25% tax because it fails to recognize the need to achieve a specific net increase in available water in order to provide sufficient resources for planned development.

The 25% Tax on is Further Compounded on Effluent

The definition of New Alternative Supply does, and is apparently intended to, cover the recycled and reclaimed water of effluent. As development occurs, new sewer collection and treatment systems are built. The reclaimed water (effluent) is generally recharged into the aquifer and later recovered, either on an annual or long-term basis. To be included within a designation, including ADAWS, the provider collecting, treating and eventually using the effluent must show that it is reliable under the terms of the assured water supply program. In years past, this effluent was considered a resource for new growth and, in many cases, the effluent created by large master planned communities was dedicated to the continued and ongoing development of those communities.

Under the ADAWS program, new growth will be required to bring 133.33% of its projected demand to the municipal provider to obtain a commitment of water service. The effluent generated by the development, if used for an addition to the ADAWS, will again be subject to a 25% tax to further reduce groundwater use within the provider's service area. This means that the water resource brought to the service area as a new supply will be taxed twice, and beyond, as each new iteration of effluent becomes subject to the tax.

Furthermore, the significant infrastructure required to collect, treat, and utilize effluent will also be subject to the 25% tax, as it will be producing a water supply that will be used to replace an existing supply that requires much less infrastructure. The Impact Statement, and the proposed rule package as a whole, does not consider or address this lost cost, most of which will be passed on to the homebuilding industry as the homebuilding industry is generally required to design, engineer, and construct this infrastructure as part of the cost of obtaining municipal water service.

Again, if the quantity of effluent is being used for new growth, and a specific quantity is needed to meet a proposed new growth demand, the "gross-up" calculation again applies, meaning that the provider must in fact dedicate 133.33% of the effluent to offsetting groundwater if it is to meet a net 100% volume for new growth.

- The Impact Statement does not accurately reflect the true costs of the proposed rule as it relates to infrastructure required to collect, treat, and utilize effluent and does not accurately reflect who will bear those costs, making it not generally accurate as required by A.R.S. § 41-1052(D)(2).

The Proposed Rule Exceeds the Statutory Authority of the Assured Water Supply Program

As frequently stated in the rule preamble and the Impact Statement, the principal goal of the assured water supply program is to provide consumer protection to those who choose to purchase homes in Arizona. Its fundamental purpose is to review whether or not a water supply for a development based on subdivided land will be secure for the next 100 years. The statutory guidance of A.R.S. § 45-576(M) is clear: "For the purposes of this section, "assured water supply" means ... Sufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years." This is a directive to ensure that the needs of the proposed use will be available, not a legislative directive to require, incentivize, or prohibit the use of any one particular water resource.

The HBACA understands that the protection of Arizona's aquifers is a legitimate state concern and that unbridled use of groundwater will lead to depletion of the groundwater resource. But the proposed rule attempts to use the assured water supply program to correct some shortcomings of the 1980 Groundwater Management Act on the back of certain uniquely identified water users, namely developers of subdivided land—which is basically synonymous with the development of for-sale residential housing. The homebuilding industry has been subject to the most stringent requirements of protecting the aquifers of the Phoenix and Pinal Active

Management Areas since the adoption of the assured water supply rules in 1995. Each subdivided development has been required to show, and do its part, to eliminate the use of mined groundwater within these Active Management Areas, either through the use of credits accrued from retirement of agricultural land or through active, and costly, groundwater replenishment.

The proposed rule seeks to impose yet an additional burden on the development of subdivided land by requiring the reduction in heretofore legal use of groundwater by only those municipal providers that do not currently have a designation of assured water supply. Furthermore, no distinction is drawn between water use sectors that are contributing to the use of "mined" groundwater and those, like for-sale residential housing, that are not. Rather, the clear impact of the rule package as a whole is to place the financial burden of reducing the unreplenished use of groundwater on the very sector of the economy that is not the source of the problem. The justification of the entire rule hinges on the benefits that the state as a whole might realize from enhanced groundwater restrictions, while ignoring the fact that the cost burden will fall largely on the homebuilding industry.

The assured water supply program is a vital part of the State's water management and a program that is vigorously supported by the homebuilding industry, but this program has its limits. By first creating an absolute prohibition on the legitimate use of groundwater, then proposing an "alternative option" to a moratorium on new subdivided land development, the cost of which will be borne largely by the homebuilding industry, the Department seeks to balance the groundwater budget by taxing those who are least responsible for the imbalance.

- The proposed ADAWS Rule is inconsistent with the intent of A.R.S. § 45-576 and beyond the agency's statutory authority, and thus not subject to approval under A.R.S. § 41-1052(D)(5).
- The proposed ADAWS Rule is made under a specific grant of authority but exceeds the subject matter areas listed in A.R.S. § 45-576, thus not complying with A.R.S § 41-1030(D)(1).

Suggested Modifications to the Proposed Rule to Place the Burden Where it Belongs

The HBACA recognizes that designations of assured water supply can be an excellent water management program for the Active Management Areas. To that end, we support a program that would provide an opportunity to overcome the current moratoriums in the Pinal and Phoenix Active Management Areas. We believe, however, that the proposed ADAWS rule takes an unsophisticated broadside approach to a complex problem of assigning the relative burden of the problem sought to be solved. We believe this could be largely mitigated if the rules were refined to accomplish the following:

- The mandatory reduction of the provider's current groundwater portfolio should be in direct proportion to the provider's current unreplenished groundwater use, rather than a one size fits all 25% tax on every provider.

- The cost of the reduction in current groundwater use should be targeted at those users within the provider's service area that have (heretofore and before the ADAWS is issued) been using groundwater without a replenishment obligation. This can be accomplished by creating a mechanism in the rule to determine the annual (translated to 100 year as appropriate) volume of this unreplenished use, then requiring the provider to offset that use by a percentage each year. This would tie the tax on new alternative supplies directly to offset groundwater mining and allow the provider justification for imposing that tax on industries other than the homebuilding industry.
- The mandatory reduction should have a limit. Once a provider becomes designated, and has reduced its groundwater consumption by the volume represented by heretofore unreplenished groundwater use, the tax should terminate.
- The tax should not be applied to effluent, which is an efficiency use of the water in the new alternative supply. Once taxed, that new supply should not be taxed again. A refinement may be to assign the tax to the relative percentage of heretofore unreplenished groundwater use within the provider's service area to again tie the tax to the mining problem sought to be solved.

These refinements do not address some of the underlying problems with the ADAWS approach, as discussed above, but they would make the program more palatable to the homebuilding industry, which is the major sector affected by the proposed ADAWS rule.

While the HBACA cannot support the ADAWS rules as proposed, we can work with the Department to make changes that would resolve the unfairness of the impact to our industry.

Very truly yours,

Jackson Moll

Re: ADWR A.R.S. § 41-1055(B) ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT Review

Dear Ms. Scantlebury:

Elliott D. Pollack & Company was asked to conduct an initial review of the Economic, Small Business, and Consumer Impact Statement (EIS) produced by the Arizona Department of Water Resources (ADWR) for rule modifications titled, *"ASSURED WATER SUPPLY RULE MODIFICATIONS TO PROVIDE AN ALTERNATIVE PATH TO DESIGNATION OF A 100-YEAR ASSURED WATER SUPPLY (ADAWS) IN THE PHOENIX AND PINAL AMAS AND TO ALLOW CERTIFICATE OF ASSURED WATER SUPPLY APPLICANTS IN THE PHOENIX AND PINAL AMAS TO COMMINGLE WATER SUPPLIES FOR A LIMITED TERM"*. Our review does not opine on water policy. Rather, it focused on the merits of the Economic Impact Statement to determine if the probable economic costs and benefits to affected persons were properly identified.

Overall, the EIS only provided a narrative. It is lacking in critical analyses that support its assumptions or financial metrics that could inform affected persons of the costs or benefits of the proposed rulemaking. We also found several instances where persons directly affected by the proposed rulemaking were not identified. We found no evaluation within the EIS of any alternative policies that could achieve the stated goals. Lastly, there is no information explaining how current or proposed policies are impacting affected regions or Arizona's competitive position. This results in an incomplete Economic Impact Statement and does not properly inform the regulated public.

Assumptions

The EIS notes an important assumption related to the physical availability of water in the Phoenix and Pinal AMAs, citing ADWR's recent groundwater model results which lead to their decision to halt the issuance of designations and certificates that rely on groundwater. As the EIS states "For new growth to occur under current conditions and the traditional AWS rules, developers in these areas will need to find renewable supplies (such as surface water or reclaimed water), the municipality or water provider must secure enough renewable supplies to become designated without the inclusion of groundwater in the portfolio." The results obtained from the models were the basis to form the policy decision to halt the issuance of

designations and certificates. This moratorium created the immediate need for the proposed rulemaking due to the economic costs from the initial policy decision that could follow.

It is our understanding that the methodology used in those models has been seriously questioned and ADWR's resulting policy decisions were issued without public input. Stakeholders have identified the main reason for there being any "unmet demand" was the placement of wells in the model, a process that stakeholders found to be extremely arbitrary and included many well locations that a municipal provider would not use in placing its own wells. The "Updated Model" prepared by water resource engineering experts Matrix Solutions Inc, indicates that all of the volume currently reserved in Analyses of Assured Water Supply are in fact physically available.

Apart from that those concerns, the modeling conclusions themselves did not appear to represent an immediate emergency, yet drastic policy decisions were initiated, necessitating solutions to mitigate the economic costs that would follow. We question whether such urgency in enacting the initial policy to halt economic growth was warranted without an analysis of the regulatory assumptions. Affording additional time for further analysis on such a crucial topic would be enormously beneficial to the state, its political subdivisions, businesses, and Arizona residents. The further absence in the EIS of potential alternatives, outlining cost and benefit comparisons, or any resulting conclusions as to how this rulemaking was determined to be in the highest and best interest of the state is alarming.

Another underlying assumption of EIS for the rule modifications made by the Department is that they expect this rulemaking "to have long-term economic benefits" by providing an alternative path to obtaining a Designation of 100-year Assured Water Supply (DAWS). The Department points out that the rulemaking will reduce costs and add flexibility which will enable new development that could not occur under current AWS rules. We see no analysis supporting the claim for long-term economic benefits, which should include an analysis of the policies on economic competitive positioning (both locally for ADAWS regions and nationally as a state). The barriers of obtaining limited renewable supplies, purchasing all projected water demand before placing development in service, and replacing groundwater appear to remain a substantial financial burden to ADAWS applicants.

There are several economic benefits claimed within the EIS for some affected persons, which include increased housing supply, mitigating population growth disruptions, increasing land values, lowering property tax burdens, increasing state revenues, and supporting the homebuilding industry. There appears to be consensus that the existing AWS rules created economic harm by halting new investment and growth within the affected areas. The EIS only demonstrates that the proposed rulemaking *reduces* current barriers and costs compared to current AWS rules but does not demonstrate whether the new rulemaking reduces those barriers sufficiently enough to enable lost growth and investment to resume as it could under the previous system.

Affected Persons Not Identified/Costs not Explained

We find the approach taken to analyzing the economic benefits and costs in the EIS to be flawed. The approach only compares the rule modification to the existing AWS rules. Thus, the EIS fails to identify or calculate many costs of the proposal to affected persons, including the cost of new water supply, the cost of new infrastructure, and their ripple effects. This should be rectified. The following are several examples:

- **Non-Designated Providers.** The EIS fails to adequately explain the costs to a non-designated provider in order to achieve designated status with additional replenishment obligations applicable to existing development and the requirements for new development.

- **Homeowners.** The EIS claims that homeowners who purchase new homes in subdivisions with AWS determinations based on renewable supplies and replenished groundwater would receive lower property tax assessments if the water provider were a CAGRD member service area because the homeowner is not directly responsible for paying a CAGRD replenishment assessment. This fails to identify the additional costs associated with higher water rates that would be inevitable. The water provider or municipality would recover the costs of replenishment through water rates. Any conversion from CAGRD replenishment obligation would fall to the water provider and, ultimately, the customer. No analysis is provided comparing reduced property taxes to increased water rates.

  Another gap in the economic analysis is the cost of shifting existing member lands from a replenishment obligation paid through the CAGRD to acquiring new non-groundwater water supplies to eliminate the replenishment obligation altogether. That cost analysis should include an assessment of the fact that as Member Lands, these subdivisions have already paid significant fees to CAGRD to acquire supplies to meet replenishment obligations. By rolling these subdivisions into ADAWS, such lands would in essence be starting over in acquiring new supplies. This cost impact merits in depth analysis, which is lacking.

  The EIS also does not identify higher costs to new homeowners in the form of higher home prices that would be necessary to develop homes in ADAWS regions. Reduced housing affordability also impacts local economic conditions and the state.

- **Existing Non-Subdivision Development.** The EIS does not identify new costs to existing businesses or residents in affected areas that currently have no replenishment obligation. Increased water rates to existing customers are highly likely to recover the cost of procuring and delivering renewable water supplies.

- **Future Commercial/Industrial Development.** The EIS does not identify the increased costs to developers or potential users of commercial or industrial (non-subdivision) development in the affected areas. Increases in cost of development and operating costs also impacts local economic conditions and the state.

Alternatives

The EIS provides no substantive assessment of alternative courses of action to ADAWS that could have less adverse economic impact, such as changes in rules, policy or practices that would result in greater physical availability of groundwater. There is no mention of potentially less costly solutions or comparing the cost to develop and procure renewable water supplies to systems currently in place like the CAGRD. As mentioned previously, ADWR stifles any analysis in the EIS with the assumption that there is no physical availability of groundwater to support new growth and as such, the only path forward for such growth is ADAWS as proposed by ADWR. Yet, there is no indication in the EIS that ADWR has assessed any regulatory ways to identify greater supplies of groundwater to be physically available.

An example of an alternative, mentioned previously in our review, is well movement. At a minimum, ADWR should have assessed the cost of well movement or other infrastructure improvements to improve access to groundwater supplies to achieve greater physical availability compared to the anticipated costs of acquiring the New Alternative Water Supplies.

A financial analysis and comparison are warranted to support the proposed rulemaking to other alternatives and the EIS is lacking any such analyses. There appears to be sufficient resources and available expertise to indicate whether the new rule amendments are the best solution to sufficiently reduce costs, induce economic activity, and achieve sustainability goals.

Competitive Positioning

There is no mention of how current or proposed policies affect the competitive positioning of either the ADAWS regions to neighboring municipalities or the State of Arizona to other states and countries. While the proposed rulemaking provides an alternative path to development compared to current AWS rules, the costs associated for the anticipated new development are not outlined or compared to the cost to develop elsewhere. The cost of development within the affected areas under the proposed rulemaking will be substantially higher and will vary widely from location to location within each service area. This will affect home affordability and the viability of commercial and industrial projects. Additionally, local water rates will rise from their current levels across the water providers service area.

An analysis of short-term and long-term competitive positioning is warranted for inclusion in the EIS. This would provide clarity on the potential magnitude of any expected benefits that the EIS claims. It would also identify challenges to mitigate in order to improve the competitiveness of affected regions and the state.

Sincerely,

Danny Court
Principal, Senior Economist

DATE 9-23-24

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I can own, or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Henry Hill

Re: Comments to August 23, 2024 Proposed Rules on Alternative Designation of Assured Water Supply ("ADAWS"), published in the Arizona Administrative Record, Vol. 30, Issue 34, Pages 2623-2633 (the "ADAWS Proposed Rules")

Dear Sir or Madam:

On behalf of Howard Hughes Holdings, Inc. and its affiliates (collectively, "Howard Hughes"),[1] we appreciate the opportunity to comment on the proposed rules on Alternative Designation of Assured Water Supply ("ADAWS") referenced above. Howard Hughes is a national, vertically integrated real estate developer, and owner and developer of the Teravalis Masterplanned Community in Buckeye. Comprising the former Douglas Ranch and Trillium projects, Teravalis covers 37,000 acres and will support more than 100,000 homes and approximately 300,000 people by the time development is completed over the next several decades. Water is a critical concern for us and planning water supply and usage over the life of the project is one of the most important things we do. Since our arrival in Arizona, we have worked with both City of Buckeye and the Arizona Department of Water Resources ("ADWR") on water issues affecting our community and intend to continue to do so over the life of the project.

We have two major concerns with the ADAWS rules going forward:

Existing certificates of assured water supply must be protected. Floreo, the initial phase of Teravalis, is underway in reliance on certificates of assured water supply issued by ADWR. The proposed ADAWS rules allow a municipal provider enrolling in the program to rely on "estimated groundwater . . . demand for unbuilt portions of issued certificates of assured water supply . . . ." It is essential to us that the groundwater already reserved in the certificates issued for Floreo be protected and utilized for the development of Floreo and that this provision not be used to support growth off of the project. The preamble to the proposed rules indicates that the certificates will be honored should a designation issued under the ADAWS rules lapse, but this assurance must be included in the rules themselves.

[1] HHC Douglas Ranch Member, LLC, Douglas Ranch Development Holding Company, LLC, Douglas Ranch Land Company, LLC, Trillium Management Development Holding Company, LLC, Trillium Land Company, LLC, and Trillium Development Holding Company, LLC.

Issued Analyses of Assured Water Supply should also be protected. Two separate Analyses of Assured Water Supply were issued by ADWR for the former Douglas Ranch lands lying within Teravalis. As with certificates, Analyses are important considerations for investors in masterplanned communities as they represent a reservation of groundwater that can be relied upon over the life of the project, to provide assurances that water will be there to support the massive investments that masterplanned communities represent. In this rulemaking, ADWR should provide a mechanism whereby the reserved groundwater in existing Analyses continue to be protected and can be utilized by the municipal water provider to support subdivision development on Analysis lands. This would both provide the City with a source of water to support growth in Teravalis and other masterplanned communities holding Analyses, thereby reducing the need for new supplies to support growth within the community.

We continue to review and consider the ADAWS proposal and intend to work with the City and ADWR in making this concept work going forward. We appreciate the opportunity to comment. We are including as an attachment, more detailed comments on the proposal.

Sincerely,

Charley Freericks
President – Phoenix Region
Howard Hughes

Detailed Comments of Howard Hughes to the August 23, 2024 Proposed Rules on Alternative Designation of Assured Water Supply ("ADAWS"), published in the Arizona Administrative Record, Vol. 30, Issue 34, Pages 2623-2633 (the "ADAWS Proposed Rules")

General Comments

Need for a Transition Period. The process of implementing ADAWS is likely to take a significant amount of time. A municipal provider cannot even apply for an ADAWS until that provider acquires a New Alternative Water Supply that meets the various criteria of an assured water supply. Meantime, the Department should resume issuing certificates of assured water supply ("Certificates") as an interim measure. All of the major groundwater management tools, including the Groundwater Management Act itself in 1980 and the implementation of replenishment obligations and the assured water supply ("AWS") program rules in the mid-1990s, have included a transition process to implement new requirements over time. Yet here, with the release of the Phoenix AMA Model and simultaneous announcement of a moratorium on new Certificates, the entire program has been turned on a dime. As we note below, we do not believe that there is actually a 4% deficit in demand under the Phoenix AMA Model if reasonable well locations are used, but even if there is, a 4% shortfall – less than half of which is due to municipal groundwater demand – does not provide a basis for upending the entire existing system.

Most of the ADAWS Proposed Rules are Premature as to the Phoenix AMA[1]. The underlying premise for proposing much of this Rules package is the Department's conclusion of a groundwater deficit in the Phoenix AMA. However, as the Department is aware, there have been continuing discussions with the Department about the Phoenix AMA Model and its underlying assumptions. Matrix New World has prepared an update to the Phoenix AMA Model (the "Updated Model") and submitted that update to the Department for review months ago. The Updated Model demonstrates that, through well movement alone, unmet demand in the Phoenix AMA would be resolved. Until these discussions are concluded, it is completely premature to propose a Rules package based on a premise that may or may not be accurate.

SB 1181, adopted in the last legislative session, requires the Department to adopt amended rules by January 1, 2025, <u>but only as to the incorporation of extinguishment credits and groundwater allowances associated with member lands into a designation of assured water supply</u>. (SB1181, Sec. 6) This issue is dealt with in proposed amendments to rule A.A.C. 12-15-724. Due to the legislative deadline, the proposed amendments to rule 12-15-724 is the only portion of the ADAWS Proposed Rules that must be considered at this time.

Specific Comments on Draft Rules

Although there may need to be significant changes to the ADAWS Proposed Rules based on the Updated Model, we submit the following comments to the ADAWS Proposed Rules for the Department's consideration:

[1] The Howard Hughes projects are all based in the Phoenix AMA, and our comments accordingly focused on that AMA.

A. <u>Preamble</u>

The ADAWS Proposed Rules would allow an ADAWS holder to rely in part on the physical availability of groundwater equal to the water demand of unbuilt subdivisions or lots that have Certificates. We hold two existing unbuilt Certificates and need assurances that this practice will not undermine the validity of those Certificates. The preamble language states: "In the event a designation expires or is otherwise terminated, any certificate previously issued in the designated provider's service area would remain in effect." This position needs to be expressly stated in the rules themselves so there is no uncertainty for Certificate holders. The Department is allowing the ADAWS holder to determine the water demand represented by these unbuilt subdivisions or lots and to include a groundwater volume based on that water demand in the holder's water portfolio for service to anyone within the provider's service area. In addition, this physically available groundwater is subject to the 25% reduction in the provider's groundwater portfolio under proposed rule 12-15-710(H)(3) and -710(I). If the Department ultimately revokes the provider's ADAWS or refuses to extend it, the Certificate for these subdivisions could be undermined.

Objection: For the reasons stated above, we object to the omission from the ADAWS Proposed Rules of a statement protecting existing Certificate, if an ADAWS lapses or terminates. We request that the Department amend the ADAWS Proposed Rules to add new subsection 711(K) as follows: "K. If a designated provider's designated status expires or is otherwise terminated, any certificate previously issued in the designated provider's service area would remain in effect."

B. <u>Proposed Rules 12-15-710(H), (I) & J</u>

1. **<u>Timing of Applying for ADAWS</u>**. A municipal provider cannot even apply for an ADAWS until the applicant has a New Alternative Water Supply that meets all the requirements of the assured water supply rules. This creates tremendous potential for delay in obtaining an ADAWS. Proposed rule 12-15-710(H)(1) uses 2023 as the year for calculating the municipal provider's groundwater portfolio. But, by the time the provider has a New Alternative Water Supply and submits an application, the 2023 numbers could be significantly out-of-date and not reflective of the most-current groundwater pumping by that provider. Any increase in groundwater pumping occurring after 2023 would erode the portion of the New Alternative Water Supply available for future growth and make it harder for the provider to meet its current, committed and projected water demands.

Objection: For the reasons stated above, in proposed rule 12-15-710(H)(1), we object to the use of the calendar year 2023 and request that the Department allow the municipal provider to use any of the three calendar years prior to submission of the ADAWS application, so long as the annual report submitted for the selected calendar year has been verified by the ADWR Director.

2. **<u>Deemed Groundwater Volume—Analyses</u>**. Under proposed rule 12-15-710(H), the physically-available groundwater volume is based initially on the water provider's current water

demands that are served with groundwater[2] and the water demands of unbuilt portions of issued Certificates of Assured Water Supply that would be expected to be served by the provider. Future growth would be supported by New Alternative Water Supplies. The formula ignores the groundwater supplies reserved by ADWR to Analyses of Assured Water Supply, which were intended to serve new subdivisions. These Analyses were duly issued by ADWR under its assured water supply rules, were obtained in good faith by their holders and relied upon by their holders in making very large capital investments in their proposed communities for such things as planning, designing and permitting. The current AWS rules protect the groundwater supply recognized in Analyses from subsequent assured water supply determinations. A.A.C. R12-15-703(F)(1). But, under the ADAWS Proposed Rules, the Analyses are rendered worthless.

The ADAWS proposal should be modified to allow these Analyses to remain in place, and to allow development that occurs within masterplanned communities holding these Analyses to rely on that reserved groundwater when developing. Including the groundwater volume reserved under Analyses of Assured Water Supply would ensure that the municipal providers applying for an ADAWS will have a reasonable amount of water available for growth from the outset, particularly in communities under development already in reliance on an Analysis. It is critical to our clients that an ADAWS have multiple years of "running room" because major infrastructure investment will not occur unless there is confidence that the ADAWS will be in place when it comes time to plat. The communities planned under the Analyses are very large and take years to build out. Starting off with a reasonable volume of physically-available groundwater to support future growth within these communities would honor ADWR's decision to issue the Analyses in the first place and would allow the municipal provider to hold an initial designation of reasonable length.

Objection: For the reason stated above, in proposed rule 12-15-710 (H)(1), we object to the omission of the groundwater reserved under Analyses of Assured Water Supply from the calculation of physically available supply. We request that ADWR add to subsection (H)(1) those volumes of groundwater, reserved under one or more Analyses of Assured Water Supply for lands served or to be served by an ADAWS applicant, in amounts that the analysis holders voluntarily cut-over to the applicant's portfolio of physically-available groundwater when platting occurs on lands covered by the Analysis.

3. **Reduction in Groundwater Volume**. Under proposed rules 12-15-710 (H) and 710(I), the physically-available groundwater volume would be immediately reduced by a volume equal to 25 percent of the New Alternative Water Supply identified in the initial application or the modification, as applicable. The result is that, at most, only 75 percent of the New Alternative Water Supply could be used for future projected water demands, because 25 percent of the New Alternative Water Supply would be needed to replace the reduction in the physically-available groundwater volume.

There are a number of significant problems associated with this 25 percent cut in the volume of physically-available groundwater.

[2] We recognize that the groundwater-pumped calculation includes stored water that the provider recovers from wells that are located outside the area of impact.

- Unreasonable Reduction. The percentage is unreasonable, given the actual projected groundwater shortfall in the Phoenix AMA. This 25 percent cut is 12.5 times the projected groundwater shortfall of 2 percent identified by the Phoenix AMA Model as attributable to municipal groundwater uses. Any percentage that is higher than 2 percent would impose on the ADAWS applicant the responsibility to account for draws on the aquifer that are the result of agricultural, industrial and commercial pumping. Also, as noted above, we expect that the Department will conclude that there is no 100-year groundwater deficit in the Phoenix MAA based on the Updated Model. If that expectation proves correct, any automatic reduction in the provider's groundwater portfolio upon acquisition of New Alternative Water Supplies will be unreasonable and unnecessary. Finally, the percentage is also unreasonable because it does not take into account the obligation of the municipal provider to replenish a portion of its so-called legacy pumping. The aquifer will benefit simply by the municipal provider becoming a member service area in the CAGRD.

- Unconstitutional Exaction. The structure created by the proposed rules would very likely result in the owner of property being required to purchase new water supplies well in excess of the estimated volume needed for the owner's new development. Such a requirement would be an exaction and, accordingly, the extra volume of New Alternative Water Supplies an unconstitutional taking under the principles of *Sheetz v. El Dorado County, California*, No. 22-1074 (April 12, 2024).

- No End to Groundwater Reductions. There is no limit on the total reduction in the volume of physically-available groundwater. Apparently, the volume of groundwater is reduced by 25 percent of each New Alternative Water Supply until there is no physically-available groundwater left in the provider's portfolio. Assuming that there is some groundwater deficit in the Phoenix AMA, any reduction in the groundwater portfolio of the water providers should be aimed at reversing only that portion of the deficit that is attributable to municipal providers. Otherwise, the municipal sector would be bearing responsibility for that portion of the groundwater deficit caused by agriculture, industry, or commercial pumpers.

- Overreach under Arizona Law. The Groundwater Code allows groundwater to be considered as physically available once the purported groundwater deficit is resolved, either because of refinements to the Phoenix AMA Model or use of New Alternative Water Supplies, or some other reason. A.R.S. § 45-576(M). The water provider's groundwater portfolio should not be automatically reduced to zero without any consideration of the condition of the aquifer.

  In addition, issuing an ADAWS is a licensing decision. Requiring the municipal provider to absorb a 25 percent cut in its New Alternative Water Supplies is a licensing requirement that is not authorized by or consistent with the assured water supply statutes which do not require any such cut and, therefore, is invalid under A.R.S. § 41-1030(A).

- Effluent. Whatever the percentage ends up being, no cut should apply to New Alternative Water Supplies consisting of effluent, if and to the extent that the new effluent supply is attributable to other New Alternative Water Supplies served by the applicant. Otherwise, the Department would be imposing a 25 percent cut on the New Alternative Water Supply when it is initially added to the water provider's portfolio and imposing another 25 percent cut when that Supply is used and returned as effluent. This result is simply unfair to the provider.

- Delay in Actual Use. The immediate reduction in the physically-available groundwater volume does not take into account the possibility that the New Alternative Water Supply will not be immediately available to replace the reduced groundwater volume. This could happen, for example, if the applicant proves that they have the financial capability to construct adequate water delivery, storage and treatment works for their water supplies, but the water delivery, storage and treatment facilities are not in place and operational at the time the application is submitted or approved. The provider would have a reduction in its physically-available groundwater supply before the provider can bring the New Alternative Water Supplies online to replace those reduced supplies. Any lag in the immediate availability of the New Alternative Water Supplies will adversely affect the ability of the applicant to meet its current, committed and projected water demands.

- Financial Burdens. The automatic 25 percent reduction will greatly increase the costs of water acquisition for municipal providers that wish to apply for an ADAWS. The water provider would have to pay for a New Alternative Water Supply for new growth, plus an amount needed to offset the reduction in groundwater supplies. This will create a significant financial burden on the providers and their water customers.

  To offset the cost impact on their customers, we anticipate that municipal providers would require the development community to pay most, if not all, of the costs of acquiring New Alternative Water Supplies. This could entail the purchase of supplies equal to the expected water demands of a new development, plus an additional volume to make up for the 25 percent reduction. For example, if a new development has a projected water demand at buildout of 500 AF, the amount of new water needed to account for that development (including the need to offset the loss of physically-available groundwater) would be 666.66 AF (.75 x 666.66 = 500). Thus, the structure will greatly increase the overall cost of developing lots and, accordingly, the price of new homes on those lots at a time when housing costs and availability are already very challenging.

Objections: For the reasons stated above:

(a) In proposed rules 12-15-710(H)(2) and (I)(2), we object to the 25 percent cut to the physically-available groundwater volume. We request that the Department change 25 percent to 2 percent for so long as the Phoenix AMA Model projects a groundwater shortfall of 2 percent attributable to municipal groundwater uses. We reserve the right to continued discussion with the Department about the Phoenix AMA Model and its projections and the Updated Model.

(b) In proposed rules 12-15-710(H)(2) and (I)(2), we object to the application of any cut to New Alternative Water Supplies consisting of effluent. We request that the Department exempt all New Alternative Water Supplies that consist of effluent from any cut, to the extent that the effluent was generated from the delivery of New Alternative Water Supplies by the water provider.

(c) In proposed rule 12-15-710(H)(3) and (I)(2), we object to the reduction in the physically-available groundwater volume immediately following the determination by the Director that the New Alternative Water Supply meets the requirements of an assured water supply. We request that the reduction to the groundwater volume calculated in proposed rule 12-15-710(H)(3) and (I)(2) occur two years after the New Alternative Water Supply meets the requirements of an assured water supply, to provide time for the Municipal Provider to bring the new supply into their system.

(d) In proposed rule 12-15-710(I)(2), we object to the continual application of the 25 percent cut to all New Additional Water Supplies. We request that the Department require a periodic reconsideration of the amount of the percentage cut and the need for any reduction at all, if aquifer conditions improve due to replenishment or otherwise, or if the Phoenix AMA Model is updated such that there are no unmet demands attributable to municipal groundwater uses.

(e) We object to proposed rule 12-15-710(J). We request that the Department amend that rule so that additional sources of groundwater may be added to a provider's portfolio, even if that provider holds an ADAWS, if aquifer conditions improve due to replenishment or otherwise, or if the Phoenix AMA Model is updated such that there are no unmet demands attributable to municipal groundwater uses.

C. **Groundwater Allowance under amended Rule 12-15-724**. The proposed ADAWS rules include proposed amendments A.A.C. R12-15-724 pertaining to the calculation of the groundwater allowances held under a Designation. Under the current assured water supply rules, a municipal provider applying today for a Designation would receive no groundwater allowance. Under the proposed amendments to R12-15-724, ADAWS applicants would receive a groundwater allowance based on either their groundwater pumping in 2023 or their total water deliveries in 2023, plus the unused groundwater allowances of Certificates within the provider's service area.

1. **Timing of Application**. In proposed rule 724(A)(4)(a), ADWR again uses 2023 as the calendar year for calculating the municipal provider's groundwater allowance. As noted in Section B.1 above, a municipal provider may not be able to apply for an ADAWS for some time, because the municipal provider must wait until it has a New Alternative Water Supply that qualifies as an assured water supply before it may apply.

Objection: In proposed rule 724(A)(4)(a), we object to the use of the calendar year 2023. We request that the Department allow the municipal provider to use any of the three calendar years prior to submission of the ADAWS application in the calculation of its groundwater allowance, so long as the annual report submitted for the selected calendar year has been verified by the ADWR Director.

2. **Certificate Groundwater Allowances/SB1181**. Under subsection 724(A)(4)(b), the unused groundwater allowance for issued Certificates is added to the calculation of the municipal provider's overall groundwater allowance. Because of SB1181, this shifting of the entire groundwater allowance at the outset of the designation is problematic.

Under SB1181, municipal providers who apply for an ADAWS may elect to delay assuming the replenishment obligation of member lands for up to ten years. Thereafter, the municipal provider may phase in their assumption of the replenishment obligation over another period of up to ten years. If a municipal provider makes an election to delay its assumption of a member lands' replenishment obligations, that municipal provider should not also immediately have rights to the remaining groundwater allowances for those member lands transferred to it. Otherwise, all groundwater delivered to member lands would be considered "excess" groundwater, and the member land owners will have to pay for replenishment services on all groundwater delivered to them. In other words, the member lands would continue to bear the replenishment obligation, but would no longer have the means of reducing that obligation through their groundwater allowance.

Objection: For the reason stated above, we object to proposed rule 12-15-724(A)(4)(b), because it does not take into account the possible delay in the applicant's assumption of the replenishment obligations of member lands, as allowed under SB1181. We request that:

(a) ADWR delay the transfer of any of the remaining groundwater allowances under Certificates of Assured Water Supply, if an applicant for an ADAWS notifies the Director, pursuant to A.R.S. § 48-3771(G), that the applicant elects not to assume the member lands' replenishment obligation; and

(b) After the applicant begins to assume a percentage of the member lands' replenishment obligation under A.R.S. § 48-3771(I), ADWR must transfer a portion of the volume of remaining groundwater allowances to the applicant once per year, in an amount equal to 10 percent of the balance existing when the applicant begins to assume a percentage of the member lands' replenishment obligation under A.R.S. § 48-3771(I), with such transfers to continue until the allowance is exhausted.

D. **Term of Designation.** Under proposed rule 12-15-711(D), the initial term of an ADAWS is limited to 15 years. However, under current assured water supply rules, there is no limit on the Designation's term other than that imposed by limitations of water resources or water demand projections. The current rules require only that a Designation be reviewed at least every 15 years. The different treatment of ADAWS is unwarranted and unfair, and seems to lack any obvious explanation.

Objection: For the reason stated above, we object to the 15-year limit of an ADAWS initial term. We request that the length of the initial term of an ADAWS be based on the same rules as are applicable to other Designations.

E. **Economic Impact Analysis**. We have not had time to fully review and assess the "Economic, Small Business, and Consumer Impact Statement" issued with the proposed ADAWS rules, but an initial review indicates that no substantive assessment of alternative courses of action

to ADAWS that would have less adverse economic impact has been undertaken. Specifically, the analysis that was done assumes that there is no physical availability of groundwater to support new growth and as such, the only path forward for such growth is ADAWS as proposed by ADWR. This ignores the basic fact that ADWR's assumption that there is no physical availability of groundwater is based on ADWR's own restrictive view of physical availability and is not based on statute. Yet, ADWR has not done an assessment of regulatory ways to identify greater supplies of groundwater to be physically available.

A simple example is well movement. The Phoenix AMA Model and subsequent moratorium on new Certificates was issued without public input and is plainly flawed. The main reason for there being any "unmet demand" is the placement of wells in the model, a process that was extremely arbitrary and included many well locations that a municipal provider would not use in placing its own wells. The Updated Model prepared by Matrix in fact, shows that all of the volume currently reserved in Analyses of Assured Water Supply are in fact physically available. At a minimum, ADWR should have assessed the cost of well movement or other infrastructure improvements in improve access to groundwater supplies to achieve greater physical availability when compared to the anticipated costs of acquiring the New Alternative Water Supplies.

The other obvious gap in the economic analysis is the cost of shifting existing member lands from a replenishment obligation paid through the CAGRD to acquiring new non-groundwater water supplies to eliminate the replenishment obligation altogether. That cost analysis should include an assessment of the fact that as Member Lands, these subdivisions have already paid significant fees to CAGRD to acquire supplies to meet replenishment obligations. By rolling these subdivisions into ADAWS, such lands would in essence be starting over in acquiring new supplies. This cost impact merits in-depth analysis, which is lacking.

E. **Other Issues**.

1. **Technical Change to Proposed Rule 12-15-725(A)(2)(e)(iii)**. There appears to be an error in this proposed rule. Considering changing it as follows: "iii. Add the remaining groundwater allowance. . . to the volume calculated under subsection (A)(2)(e)**(i) or (A)(2)(e)(ii), as selected by the applicant; and**". Delete the "or" at the end of this subsection (iii).

DATE 9/23/2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I can own, or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the ArizonaDepartment of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Igor Sokolov

Dear Ms. Scantlebury:

I am writing in support of your proposed new rules regarding an Assured Water Supply for Pinal County.

I am not a Pinal County resident, but a strong supporter of the Podium Club at Attesa. The inability to get a required water certificate has stalled development at Arizona's premier race circuit and motorsports club, including the construction and sale of trackside homes, race shops, condos, and more. This issue has postponed jobs, tourism and growth. It has halted track expansion and upgrades necessary to host major, nationally televised race events.

A water rule change will release the brakes and let them build. Pinal County and Casa Grande will benefit.

I strongly encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Josh Tybur

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Maricopa-Stanfield Irrigation & Drainage District (MSIDD) thanks you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA.

MSIDD is an agricultural water provider consisting of more than 80,000 acres in Pinal County. These rules are important because they provide a means to orderly transition land from agricultural to urban use and decrease reliance on local groundwater supplies. As Pinal County continues to adapt to ongoing Colorado River shortages, transitioning agricultural land to less water intensive urban use is a crucial tool to help preserve our water supplies and will benefit agriculture and the overall Pinal County economy.

A sustainable water supply is very important to all Pinal County residents and industry. The ADAWS will help give all sectors of the economy confidence that their homes, businesses, industries and land will continue to thrive with a truly sustainable water supply. MSIDD supports the new rules and encourages their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Brian Yerges
General Manager
Maricopa-Stanfield Irrigation & Drainage District

Subject: Support for New Assured Water Supply Rules for Pinal County

Dear Ms. Scantlebury,

There are moments when the decisions we make today shape the kind of future we all want to live in. The proposed Assured Water Supply rules for Pinal County represent one of those pivotal choices. While I may not reside in the area year-round, I own property in Pinal County and plan to build and spend part of the year here.

Why does this matter? Water is not just a resource; it is the foundation upon which our communities grow, thrive, and sustain themselves. These new rules are not just about ensuring water supply—they're about securing the future for businesses, homeowners, and the next generation that will call Pinal County home.

The efforts of the Arizona Department of Water Resources and the Governor's Office to bring this initiative forward are not just appreciated, they are essential. A reliable and well-managed water supply will lead to stronger communities, sustainable growth, and a better quality of life for all of us.

Thank you for driving this important change. Your leadership today is shaping a brighter, more prosperous tomorrow for Pinal County, and I fully support this initiative.

Sincerely,
Renee Stone

Dear Ms. Scantlebury:

I am writing in support of your proposed new rules regarding an Assured Water Supply for Pinal County.

I am not a Pinal County resident, but a strong supporter of the Podium Club at Attesa. The inability to get a required water certificate has stalled development at Arizona's premier race circuit and motorsports club, including the construction and sale of trackside homes, race shops, condos, and more. This issue has postponed jobs, tourism and growth. It has halted track expansion and upgrades necessary to host major, nationally televised race events.

A water rule change will release the brakes and let them build. Pinal County and Casa Grande will benefit.

I strongly encourage the approval and adoption of the new rules as soon as possible.

Sincerely, Rich Reininger

Dear Ms. Scantlebury:

As a resident of Pinal County, please accept this letter as my direct support for the new Assured Water Supply rules for Pinal County.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working to develop these new rules, which will certainly go a long way in building a more vibrant economy.

We all know how a stable water supply is crucial for maintaining strong property values, supporting businesses, and fostering overall economic health and a higher quality of life in our community.

Thank you for pushing this solution forward.

Sincerely,

Robert Maldonado

Dear Mr. Scantlebury,

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa. Because of this, I'm a very frequent visitor to Casa Grande. The Podium Club represents the first project at this unique master planned, multi-use community. It only needs the new water rules to begin development in earnest, which is especially important to me. One of the many reasons I became a member is because I'm very interested in moving to the area and building a race shop at the track.

I appreciate the efforts of the Govenor's Office and the staff at the Arizona Department of Water Resources (ADWR). I encourage the approval an adoption of the new rules as soon as possible.

Sincerely,

Tim Rose

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA.

As a part of the agricultural economy, these rules are important to me because they provide me with the freedom to transition my land from agricultural to urban use when it is the right time for me and my family. These rules will provide a more natural progression from agriculture to municipal consistent with market forces.

A sustainable water supply is very important to all aspects of our economy in Pinal County. The ADAWS will help give all sectors of the economy confidence that their homes, businesses, industries and land will continue to be valuable because we will have a truly sustainable water supply. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

Once again, I appreciate all the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County.

Sincerely,

Bryan M Hartman

Re: **Comments to August 23, 2024 Proposed Rules on Alternative Designation of Assured Water Supply ("ADAWS"), published in the Arizona Administrative Record, Vol. 30, Issue 34, Pages 2623-2633 (the "ADAWS Proposed Rules")**

Dear Sir or Madam:

We represent the following owners and developers of master planned communities in the Buckeye area: Buckeye Tartesso, LLC and Buckeye Tartesso II, LLC, developers of Tartesso; Belmont Infraco LLC, owner of Belmont; DMB White Tank, LLC, the developer of Verrado; Festival Ranch North, LLC, owner of North Star Ranch; and KEMF WP 2.2, LLC, owner of WestPark. Their developments are all substantial, active projects within the City of Buckeye and/or Maricopa County in the Phoenix AMA and each are holders of Analyses of Assured Water Supply. Each of these developers has made very large capital investments in their projects and has been working diligently on developing solutions to the groundwater challenges in Buckeye and throughout the Phoenix AMA that will allow new residential development to continue in a responsible and economically-sound manner. These developers' collective investments in support of affordable housing in the Buckeye area are far in excess of $1 billion.

We appreciate the efforts of the Department in developing an ADAWS proposal. Unfortunately, as currently embodied in the ADAWS Proposed Rules, the ADAWS concept is unworkable without significant modifications, including increasing the amount of groundwater that an ADAWS holder can rely upon. In addition, we are very concerned that most of the ADAWS Proposed Rules are simply premature, because there is no resolution on the accuracy or appropriate application of the Phoenix AMA groundwater flow model released by the Department in 2023 (the "Phoenix AMA Model"). We have the following general comments on the process, followed by specific comments on the ADAWS Proposed Rules.

General Comments

Need for a Transition Period. The process of implementing ADAWS is likely to take a significant amount of time. A municipal provider cannot even apply for an ADAWS until that provider acquires a New Alternative Water Supply (defined in proposed rule 12-15-701(53)) that meets the various criteria of an assured water supply. Meantime, the Department should resume issuing certificates of assured water supply ("Certificates") as an interim measure. All of the major groundwater management tools, including the Groundwater Management Act itself in 1980 and the implementation of replenishment obligations and the assured water supply ("AWS") program rules in the mid-1990s, have included a transition process to implement new requirements over time. Yet here, with the release of the Phoenix AMA Model and simultaneous announcement of a moratorium on new Certificates, the entire program has been turned on a dime. As we note below, we do not believe that there is actually a 4% deficit in demand under the Phoenix AMA Model if reasonable well locations are used, but even if there is, a 4% shortfall – less than half of which is due to municipal groundwater demand – does not provide a basis for upending the entire existing system.

Most of the ADAWS Proposed Rules are Premature as to the Phoenix AMA[1]. The underlying premise for proposing much of this Rules package is the Department's conclusion that there is a groundwater deficit in the Phoenix AMA. However, as the Department is aware, there have been continuing discussions with the Department about the Phoenix AMA Model and its underlying assumptions. Matrix New World has prepared an update to the Phoenix AMA Model (the "Updated Model") and submitted that update to the Department for review months ago. The Updated Model demonstrates that, through well movement alone, unmet demand in the Phoenix AMA would be resolved. Until these discussions are concluded, it is completely premature to propose a Rule package based on a premise that may or may not be accurate.

SB 1181, adopted in the last legislative session, requires the Department to adopt amended rules by January 1, 2025, but only as to the incorporation of extinguishment credits and groundwater allowances associated with member lands into a designation of assured water supply. (SB1181, Sec. 6) This issue is dealt with in proposed amendments to rule A.A.C. 12-15-724. Due to the legislative deadline, the proposed amendments to rule 12-15-724 are the only portion of the ADAWS Proposed Rules that must be considered at this time.

Specific Comments on Draft Rules

[1] Our clients are all based in the Phoenix AMA, and our comments are accordingly focused on that AMA.

Although there may need to be significant changes to the ADAWS Proposed Rules based on the Updated Model, we submit the following comments to the ADAWS Proposed Rules for the Department's consideration:

A. Preamble

The ADAWS Proposed Rules would allow an ADAWS holder to rely in part on the physical availability of groundwater equal to the water demand of unbuilt portions of existing Certificates. A number of our clients hold existing unbuilt Certificates and need assurances that this practice will not undermine the validity of those Certificates. The preamble language states: "In the event a designation expires or is otherwise terminated, any certificate previously issued in the designated provider's service area would remain in effect." This position needs to be expressly stated in the rules themselves so there is no uncertainty for Certificate holders. The Department is allowing the ADAWS holder to determine the water demand represented by the unbuilt portions of existing Certificates and to include a groundwater volume based on that water demand in the holder's water portfolio for service to anyone within the provider's service area. In addition, this physically available groundwater is subject to the 25% reduction in the provider's groundwater portfolio under proposed rules 12-15-710(H)(2), (3) and -710(I). If the Department ultimately revokes the provider's ADAWS or refuses to extend it, the Certificates for these subdivisions could be undermined.

Objection: For the reasons stated above, we object to the omission from the ADAWS Proposed Rules of a statement protecting existing Certificates if an ADAWS lapses or terminates. We request that the Department amend the ADAWS Proposed Rules to add new subsection 12-15-711(K) as follows: "K. If a designated provider's designated status expires or is otherwise terminated, any certificate previously issued in the designated provider's service area would remain in effect."

B. Proposed Rules 12-15-710(H), (I) & (J)

1. **Timing of Applying for ADAWS**. A municipal provider cannot even apply for an ADAWS until the applicant has a New Alternative Water Supply that meets all the requirements of the assured water supply rules. This creates tremendous potential for delay in obtaining an ADAWS. Proposed rule 12-15-710(H)(1) uses 2023 as the year for calculating the municipal provider's groundwater portfolio. But, by the time the provider has a New Alternative Water Supply and submits an application, the 2023 numbers could be significantly out-of-date and not reflective of the most-current groundwater pumping by that provider. Any increase in groundwater pumping occurring after 2023 would erode that portion of the New Alternative Water Supply available for future growth and make it harder for the provider to meet its current, committed and projected water demands.

Objection: For the reasons stated above, in proposed rule 12-15-710(H)(1), we object to the use of the calendar year 2023 and request that the Department allow the municipal provider to use any of the three calendar years prior to submission of the ADAWS application, so long as the annual report submitted for the selected calendar year has been verified by the ADWR Director.

2. **Deemed Groundwater Volume—Analyses**. Under proposed rule 12-15-710(H), the physically-available groundwater volume is based initially on the water provider's current water demands that are served with groundwater[2] and the water demands of unbuilt portions of Certificates that would be expected to be served by the provider. Future growth would be supported by New Alternative Water Supplies. The formula ignores the groundwater supplies reserved by ADWR to Analyses of Assured Water Supply, which were intended to serve new subdivisions. These Analyses were duly issued by ADWR under its assured water supply rules, were obtained in good faith by their holders and relied upon by their holders in making very large capital investments in their proposed communities for such things as planning, designing and permitting. The current AWS rules protect the groundwater supply recognized in Analyses from subsequent assured water supply determinations. A.A.C. R12-15-703(F)(1). But, under the ADAWS Proposed Rules, the Analyses are rendered worthless.

The ADAWS proposal should be modified to allow these Analyses to remain in place, and to allow development that occurs within master-planned communities holding these Analyses to rely on that reserved groundwater when developing. Including the groundwater volume reserved under Analyses of Assured Water Supply would ensure that the municipal providers applying for an ADAWS will have a reasonable amount of water available for growth from the outset, particularly in communities already under development in reliance on an Analysis. It is critical to our clients that an ADAWS have multiple years of "running room" because major infrastructure investment will not occur unless there is confidence that the ADAWS will be in place when it comes time to plat. The communities planned under the Analyses are very large and take years to build out. Starting off with a reasonable volume of physically-available groundwater to support future growth within these communities would honor ADWR's decision to issue the Analyses in the first place and would allow the municipal provider to hold an initial designation of reasonable length.

Objection: For the reason stated above, in proposed rule 12-15-710 (H)(1), we object to the omission of the groundwater reserved under Analyses of Assured Water Supply from the calculation of physically-available supply. We request that ADWR add to subsection (H)(1) those volumes of groundwater, reserved under one or more analysis of assured water supply for lands served or to be served by an ADAWS applicant, in amounts that the analysis holders voluntarily

[2] We recognize that the groundwater-pumped calculation includes any stored water that the provider recovers from wells that are located outside the area of impact.

cut-over to the applicant's portfolio of physically-available groundwater when platting occurs on lands covered by the analysis.

3. **Reduction in Groundwater Volume**. Under proposed rules 12-15-710 (H) and 710(I), the physically-available groundwater volume would be immediately reduced by a volume equal to 25 percent of the New Alternative Water Supply identified in the initial application or the modification, as applicable. The result is that, at most, only 75 percent of the New Alternative Water Supply could be used for future projected water demands, because 25 percent of the New Alternative Water Supply would be needed to replace the reduction in the physically-available groundwater volume.

There are a number of significant problems associated with the requirement that 25 percent of New Alternative Water Supplies be used to offset the volume of physically-available groundwater.

- Unreasonable Reduction. The percentage is unreasonable, given the actual projected unmet demand in the Phoenix AMA. This 25 percent offset is 12.5 times the projected groundwater shortfall of 2 percent identified in the Phoenix AMA Model as attributable to municipal groundwater uses. Any percentage that is higher than 2 percent would impose on the ADAWS applicant the responsibility to account for draws on the aquifer that are the result of agricultural, industrial and commercial pumping. Also, as noted above, we expect that the Department will conclude that there is no 100-year groundwater deficit in the Phoenix AMA based on the Updated Model. If that expectation proves correct, any automatic reduction in the provider's groundwater portfolio upon acquisition of New Alternative Water Supplies will be unreasonable and unnecessary. Finally, the percentage is also unreasonable because it does not take into account the obligation of the municipal provider to replenish a portion of its so-called legacy pumping. The aquifer will benefit simply by the municipal provider becoming a member service area in the CAGRD.

- Unconstitutional Exaction. The requirement that 25 percent of New Alternative Water Supplies be used to offset the volume of physically-available groundwater results in an unconstitutional taking under the principles recently reaffirmed in *Sheetz v. El Dorado County, California*, 601 U.S. 267 (2024). We anticipate that, as a direct result of the 25 percent offset, property developers will be required by their water provider to purchase new water supplies well in excess of the estimated volume needed for the owner's new development. The extra water supplies will be needed to make up for the reduction in the water provider's groundwater portfolio under proposed rules 710(H)(2), (3) and 701(I). In effect, the property developer would be paying for a volume of water to serve its new development, plus an amount that would be used to resolve regional groundwater issues that are not

caused by that developer. The resulting exaction would be an unconstitutional taking under *Sheetz.*

- No End to Groundwater Reductions. There is no limit on the total reduction in the volume of physically-available groundwater. Apparently, the volume of groundwater is reduced by 25 percent of each New Alternative Water Supply until there is no physically-available groundwater left in the provider's portfolio. Assuming that there is some groundwater deficit in the Phoenix AMA, any reduction in the groundwater portfolio of the water providers should be aimed at reversing only that portion of the deficit that is attributable to municipal providers. Otherwise, the municipal sector would be bearing responsibility for that portion of the groundwater deficit caused by agriculture, industry, or commercial pumpers.

- Overreach under Arizona Law. The Groundwater Code allows groundwater to be used to prove an assured water supply. A.R.S. § 45-576(M)(1). Once the purported groundwater deficit is resolved in the Phoenix AMA, either because of refinements to the Phoenix AMA Model or use of New Alternative Water Supplies, or some other reason, groundwater will be available once again for assured water supply purposes. At that point, the continued reductions in the water provider's groundwater portfolio would be inconsistent with A.R.S. § 45-576(M), and invalid under A.R.S. § 41-1030(A).

- Effluent. Whatever the percentage ends up being, no cut should apply to New Alternative Water Supplies consisting of effluent, if and to the extent that the new effluent supply is attributable to other New Alternative Water Supplies served by the applicant. Otherwise, the Department would be imposing a 25 percent cut on the New Alternative Water Supply when it is initially added to the water provider's portfolio and imposing another 25 percent cut when that Supply is used and returned as effluent. This result is simply unfair to the provider.

- Delay in Actual Use. The immediate reduction in the physically-available groundwater volume does not take into account the possibility that the New Alternative Water Supply will not be immediately available to replace the reduced groundwater volume. This could happen, for example, if the applicant proves that they have the financial capability to construct adequate water delivery, storage and treatment works for their water supplies, but the water delivery, storage and treatment facilities are not in place and operational at the time the application is submitted or approved. The provider would have a reduction in its physically-available groundwater supply before the provider can bring the New Alternative Water Supplies online to replace those reduced supplies. Any lag in the immediate

availability of the New Alternative Water Supplies will adversely affect the ability of the applicant to meet its current, committed and projected water demands.

- Excessively Burdensome. The automatic 25 percent reduction will greatly increase the costs of water acquisition for municipal providers that wish to apply for an ADAWS. The water provider would have to pay for a New Alternative Water Supply for new growth, plus an amount needed to offset the reduction in groundwater supplies. This will create a significant financial burden on the providers and their water customers.

  To offset the cost impact on their customers, we anticipate that municipal providers would require the development community to pay most, if not all, of the costs of acquiring New Alternative Water Supplies. This could entail the purchase of supplies equal to the expected water demands of a new development, plus an additional volume to make up for the 25 percent reduction. For example, if a new development has a projected water demand at buildout of 500 AF, the amount of new water needed to account for that development (including the need to offset the loss of physically-available groundwater) would be 666.66 AF (.75 x 666.66 = 500). Thus, the structure will greatly increase the overall cost of developing lots and, accordingly, the price of new homes on those lots at a time when housing costs and availability are already very challenging.

Objections: For the reasons stated above:

(a) In proposed rules 12-15-710(H)(2) and (I)(2), we object to the 25 percent cut to the physically-available groundwater volume. We request that the Department change 25 percent to 2 percent for so long as the Phoenix AMA Model projects a groundwater shortfall of 2 percent attributable to municipal groundwater uses. We reserve the right to continued discussion with the Department about the Phoenix AMA Model and its projections and the Updated Model.

(b) In proposed rules 12-15-710(H)(2) and (I)(2), we object to the application of any cut to New Alternative Water Supplies consisting of effluent. We request that the Department exempt all New Alternative Water Supplies that consist of effluent from any cut, to the extent that the effluent was generated from the delivery of New Alternative Water Supplies by the water provider.

(c) In proposed rule 12-15-710(H)(3) and (I)(2), we object to the reduction in the physically-available groundwater volume immediately following the determination by the Director that the New Alternative Water Supply meets the requirements of an assured water supply. We request that the reduction to the groundwater volume calculated in proposed rule 12-15-710(H)(3) and (I)(2) occur two years after the New Alternative Water Supply meets the

requirements of an assured water supply, to provide time for the Municipal Provider to bring the new supply into their system.

(d) In proposed rule 12-15-710(I)(2), we object to the continual application of the 25 percent cut to all New Additional Water Supplies. We request that the Department require a periodic reconsideration of the amount of the percentage cut and the need for any reduction at all, if aquifer conditions improve due to replenishment or otherwise, or if the Phoenix AMA Model is updated such that there are no unmet demands attributable to municipal groundwater uses.

(e) We object to proposed rule 12-15-710(J). We request that the Department amend that rule so that additional sources of groundwater may be added to a provider's portfolio, even if that provider holds an ADAWS, if aquifer conditions improve due to replenishment or otherwise, or if the Phoenix AMA Model is updated such that there are no unmet demands attributable to municipal groundwater uses.

C. **Groundwater Allowance under amended Rule 12-15-724**. The proposed ADAWS rules include proposed amendments A.A.C. R12-15-724 pertaining to the calculation of the groundwater allowances held under a Designation. Under the current assured water supply rules, a municipal provider applying today for a Designation would receive no groundwater allowance. Under the proposed amendments to R12-15-724, ADAWS applicants would receive a groundwater allowance based on either their groundwater pumping in 2023 or their total water deliveries in 2023, plus the unused groundwater allowances of Certificates within the provider's service area.

1. **Timing of Application**. In proposed rule 724(A)(4)(a), ADWR again uses 2023 as the calendar year for calculating the municipal provider's groundwater allowance. As noted in Section B.1 above, a municipal provider may not be able to apply for an ADAWS for some time, because the municipal provider must wait until it has a New Alternative Water Supply that qualifies as an assured water supply before it may apply.

Objection: In proposed rule 724(A)(4)(a), we object to the use of the calendar year 2023. We request that the Department allow the municipal provider to use any of the three calendar years prior to submission of the ADAWS application in the calculation of its groundwater allowance, so long as the annual report submitted for the selected calendar year has been verified by the ADWR Director.

2. **Certificate Groundwater Allowances/SB1181**. Under subsection 724(A)(4)(b), the unused groundwater allowance for issued Certificates is added to the calculation of the municipal provider's overall groundwater allowance. Because of SB1181, this shifting of the entire groundwater allowance at the outset of the designation is problematic.

Under SB1181, municipal providers who apply for an ADAWS may elect to delay assuming the replenishment obligation of member lands for up to ten years. Thereafter, the municipal provider may phase in their assumption of the replenishment obligation over another period of up to ten years. If a municipal provider makes an election to delay its assumption of a member land's replenishment obligations, that municipal provider should not also immediately have rights to the remaining groundwater allowances for those member lands transferred to it. Otherwise, all groundwater delivered to member lands would be considered "excess" groundwater, and the member land owners will have to pay for replenishment services on all groundwater delivered to them. In other words, the member lands would continue to bear the replenishment obligation, but would no longer have the means of reducing that obligation through their groundwater allowance.

Objection: For the reason stated above, we object to proposed rule 12-15-724(A)(4)(b), because it does not take into account the possible delay in the applicant's assumption of the replenishment obligations of member lands, as allowed under SB1181. We request that:

(a) ADWR delay the transfer of any of the remaining groundwater allowances under Certificates of Assured Water Supply, if an applicant for an ADAWS notifies the Director, pursuant to A.R.S. § 48-3771(G), that the applicant elects not to assume the member lands' replenishment obligation; and

(b) After the applicant begins to assume a percentage of the member lands' replenishment obligation under A.R.S. § 48-3771(I), ADWR must transfer a portion of the volume of remaining groundwater allowances to the applicant once per year, in an amount equal to 10 percent of the balance existing when the applicant begins to assume a percentage of the member lands' replenishment obligation under A.R.S. § 48-3771(I), with such transfers to continue until the allowance is exhausted.

D. **Economic Impact Analysis**. We have not had time to fully review and assess the "Economic, Small Business, and Consumer Impact Statement" issued with the proposed ADAWS rules, but an initial review indicates that no substantive assessment of alternative courses of action to ADAWS that would have less adverse economic impact has been undertaken. Specifically, the analysis that was done assumes that there is no physical availability of groundwater to support new growth and as such, the only path forward for such growth is ADAWS as proposed by ADWR. This ignores the basic fact that ADWR's assumption that there is no physical availability of groundwater is based on ADWR's own restrictive view of physical availability and is not based on statute. Yet, ADWR has not done an assessment of regulatory ways to identify greater supplies of groundwater to be physically available.

A simple example is well movement. The Phoenix AMA Model and subsequent moratorium on new Certificates was issued without public input and is plainly flawed. The main

reason for there being any "unmet demand" is the placement of wells in the model, a process that was extremely arbitrary and included many well locations that a municipal provider would not use in placing its own wells. The Updated Model prepared by Matrix in fact, shows that all of the volume currently reserved in Analyses of Assured Water Supply are in fact physically available. At a minimum, ADWR should have assessed the cost of well movement or other infrastructure improvements in improve access to groundwater supplies to achieve greater physical availability when compared to the anticipated costs of acquiring the New Alternative Water Supplies.

The other obvious gap in the economic analysis is the cost of shifting existing member lands from a replenishment obligation paid through the CAGRD to acquiring new non-groundwater water supplies to eliminate the replenishment obligation altogether. That cost analysis should include an assessment of the fact that as Member Lands, these subdivisions have already paid significant fees to CAGRD to acquire supplies to meet replenishment obligations. By rolling these subdivisions into ADAWS, such lands would in essence be starting over in acquiring new supplies. This cost impact merits in-depth analysis, which is lacking.

E. **Other Issues**.

1. **Term of Designation**. Under proposed rule 12-15-711(D), the initial term of an ADAWS is limited to 15 years. However, under current assured water supply rules, there is no limit on the Designation's term other than that imposed by limitations of water resources or water demand projections. The current rules require only that a Designation be reviewed at least every 15 years. The different treatment of ADAWS is unwarranted and unfair and seems to lack any obvious explanation.

Objection: For the reason stated above, we object to the 15-year limit of an ADAWS initial term. We request that the length of the initial term of an ADAWS be based on the same rules as are applicable to other Designations.

2. **Technical Change to Proposed Rule 12-15-725(A)(2)(e)(iii)**. There appears to be an error in this proposed rule. Considering changing it as follows: "iii. Add the remaining groundwater allowance. . . to the volume calculated under subsection (A)(2)(e)**(i) or (A)(2)(e)(ii), as selected by the applicant; and**". Delete the "or" at the end of this subsection (iii).

Thank you for considering these comments. We look forward to continuing to work with you on the development of these important proposed rules.

Sincerely,

FENNEMORE CRAIG, P.C.

To: docketsupervisor@azwater.gov

Dear Ms. Scantlebury:

I am writing in support of your proposed new rules regarding an Assured Water Supply for Pinal County.

I am not a Pinal County resident, but a strong supporter of the Podium Club at Attesa. The inability to get a required water certificate has stalled development at Arizona's premier race circuit and motorsports club, including the construction and sale of trackside homes, race shops, condos, and more. This issue has postponed jobs, tourism and growth. It has halted track expansion and upgrades necessary to host major, nationally televised race events.

A water rule change will release the brakes and let them build. Pinal County and Casa Grande will benefit.

I strongly encourage the approval and adoption of the new rules as soon as possible.

Sincerely Thomas Brawner

Docket Supervisor - ADWR <docketsupervisor@azwater.gov>

RESIDENT

DATE 9/23/24
Dear Ms. Scantlebury:
As a resident of Pinal County, please accept this letter as my direct support for the new Assured Water Supply rules for Pinal County.
I appreciate all the efforts of the Governor's Office and thestaff at the Arizona Department of Water Resources (ADWR) for working to develop these new rules, which will certainly go a long way in building a more vibrant economy.
We all know how a stable water supply is crucial for maintaining strong property values, supporting businesses,and fostering overall economic health and a higher qualityof life in our community.
Thank you for pushing this solution forward.
Sincerely,
Tiffanie Gillespie

Dear Ms. Scantlebury,

As a resident of Pinal County, I am writing to express my strong support for the new Assured Water Supply rules. These rules are vital for ensuring a stable water supply, which is essential for maintaining property values, supporting businesses, and fostering economic growth in our community. I appreciate the efforts of the Governor's Office and the Arizona Department of Water Resources (ADWR) in developing this important initiative.

In addition to living in Gold Canyon, I am a member of the Podium Club at Attesa and am considering purchasing a second home near the racetrack. This track, designed to world-class standards, has the potential to attract high-visibility race teams and organizations such as the Fédération Internationale de l'Automobile (FIA) and the International Motor Sports Association (IMSA), which could significantly boost the local economy. In 2019, the global motorsports industry generated nearly $190 billion and supported 1.5 million jobs, highlighting its economic impact.

The future development of this community, including my interest in owning a home and race shop near the track, hinges on the approval of these new water rules. I strongly encourage their swift adoption to support both local growth and broader economic benefits.

Thank you for your leadership on this important issue.

Sincerely,

Tommy Felix

DATE: 09/23/2024

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new **Assured Water Supply** rules, which I believe will create a sustainable water supply in the Pinal AMA.

I would like to take this opportunity to express my direct support for the new rules and encouraging their adoption as soon as possible.

As a Pinal County business owner, I know it is important to have a vibrant economy that inspires growth and attracts more high quality workers who can become valued members of our community.

A stable water supply is crucial for maintaining strong property values, supporting businesses, and fostering the overall economic health and quality of life in our community.

I genuinely appreciate this initiative, as new water rules will mark a crucial step forward for all of Pinal County.

Sincerely,

Re: Alternative Designation of Assured Water Supply Rules

Dear Ms. Scantlebury:

On behalf of Valley Partnership, representing 350 Company Partners and almost 2,000 Members, including the cities within Maricopa county as well as Maricopa County advocating for sustainable responsible development, we are writing in response to the Arizona Department of Water Resources (ADWR) draft Alternative Designation of Assured Water Supply (ADAWS) rules which offers a pathway for undesignated water providers to achieve a designation while providing a transition period during which the provider acquires new renewable resources and reduces their reliance on groundwater.

It is vitally important that as we continue to examine how potential ADAWS providers would enter and work through the process of acquiring new sustainable water sources to grow and reduce current groundwater use that we understand the benefits this will provide constituents throughout the Phoenix AMA. The users within the new ADAWS service area will be given an additional level of certainty by now being within a designation. But it is also important to note that within a designated provider's service area all water that is delivered is accounted for agnostic of use, so adding additional area within the Phoenix AMA served by an ADAWS will have a long-term benefit to the aquifer. Equally important is the signal of certainty that would be sent to our current residents as well as capital looking to invest in our community by not only having the ADAWS process but also service providers utilizing that process.

We all must acknowledge the real and near-term monetary costs that will be encountered by providers as they pursue an ADAWS and acquire additional resources as an ADAWS. We have all been confronted with the inflationary environment of the past few years and its impact on basic operations. This occurring at the same time providers are competing with others to acquire an ever-smaller amount of available wet water resources in our current uncertain world will only cause prices to rise. With price pressures being what they are, we should do all we can to ensure there are not overly burdensome regulations and continually support policy changes that impact the ability of water providers, both ADAWS and designated, to support smart growth policies that over time improve the health of the aquifer.

As a state we have already done this. Last legislative session SB1181 was signed into law, which provides greater flexibility for providers to collaborate with the Central Arizona Groundwater Replenishment District (CAGRD). This legislation was vital in helping providers with the fiscal impacts associated with ADAWS. While a proposal allowing the conversion of Agriculture-to-Urbanized uses did not become law last year, it was worked on by numerous stakeholders and is a good policy that needs to find a way forward. A number of potential ADAWS providers would directly benefit from the proposal while

again improving the long-term health of the aquifer for all residents within the Phoenix AMA. We also must not lose focus on the need to access additional sustainable water resources to all in Arizona and the Phoenix AMA. Not only is the success of ADAWS providers based on their ability to access these new resources, but as we continue to attract new residents and industries these resources will be required by designated providers as well. As we all are aware, the forces of supply and demand are as prominent in water markets as any other. The more we can do to ensure a healthy water market where wet water resources are available and accessible, the more controlled water increases will be.

In conclusion, Valley Partnership would like to thank ADWR and the Governor's Office for their work throughout the process of these draft ADAWS rules. We have appreciated the opportunity to provide feedback on the rules and their impact on our region. As stated earlier, these rules have the potential through an updated designation process to ensure that more Arizonans are receiving their water supplies from a designated provider. This provides current and future consumers additional certainty while improving the health of the aquifer, benefiting all current and future residents in our region. We must not lose focus on the benefits that we all receive through a successful ADAWS program utilized by a number of currently undesignated providers. This is why we must continue to work directly with these currently undesignated providers to better understand how the proposed rule would impact their ability to utilize the ADAWS proposal and what other proposals or variables could impact their success implementing the program. We look forward to continuing to work on this rule and other policies impacting the not only ADAWS providers but all providers as we confront our ever-evolving water future.

Sincerely,

Clark Princell

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, we are expressing our direct support for the new rules and encourage their adoption as soon as possible.

As a major landowner holding existing Certificates of Assured Water Supply, these rules are important to us because the ADAWS protects and honors existing CAWS. The existing CAWS are not deleted, but rather placed in an inactive status. The ADAWS instead largely honors the "groundwater allowances" and "extinguishment credits" already pledged to existing CAWS by providing mechanisms for incorporating them into the ADAWS. Should the water provider be unable to maintain its Designation, the existing CAWS would be reactivated and provide the same level of land entitlement as without an ADAWS.

Once again, we appreciate the efforts of the Governor's Office and ADWR staff. These are an important step forward for all of Pinal County,

Sincerely,

Barry Dluzen

9/23/2024

Dear Ms. Scantlebury:

I am writing in staunch support of your proposed new rules regarding an Assured Water Supply for Pinal County.

While I am not a resident, I am a member of the Podium Club at Attesa, and a very frequent visitor to Casa Grande. The race track I love represents the first project at this unique master-planned, multi-use community. It only needs new water rules to begin development in earnest, which is especially important to me personally, as one reason I became a member is became I am interested in moving to a trackside home that I can own, or building a race shop at the track.

I appreciate all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) and encourage the approval and adoption of the new rules as soon as possible.

Sincerely,

Wesley & Marissa Hanson

ARTICLE 7. ASSURED AND ADEQUATE WATER SUPPLY

R12-15-701. Definitions - Assured and Adequate Water Supply Programs

In addition to any other definitions in A.R.S. Title 45 and the management plans in effect at the time of application, the following words and phrases in this Article shall have the following meanings, unless the context otherwise requires:

1. "Abandoned plat" means a plat for which a certificate or water report has been issued and that will not be developed because of one of the following:
   a. The land has been developed for another use; or
   b. Legal restrictions will preclude approval of the plat.
2. "ADEQ" means the Arizona Department of Environmental Quality.
3. "Adequate delivery, storage, and treatment works" means:
   a. A water delivery system with sufficient capacity to deliver enough water to meet the needs of the proposed use;
   b. Any necessary storage facilities with sufficient capacity to store enough water to meet the needs of the proposed use; and
   c. Any necessary treatment facilities with sufficient capacity to treat enough water to meet the needs of the proposed use.
4. "Adequate storage facilities" means facilities that can store enough water to meet the needs of the proposed use.
5. "Affiliate" means a person who, directly or indirectly through one or more intermediaries, controls, is controlled by or is under common control with the person specified.

6. "AMA" means an active management area as defined in A.R.S. § 45-402.
7. "Analysis" means an analysis of assured water supply or an analysis of adequate water supply.
8. "Analysis holder" means a person to whom an analysis of assured water supply or an analysis of adequate water supply is issued and any current owner of land included in the analysis.
9. "Analysis of adequate water supply" means a determination issued by the Director stating that one or more criteria required for a water report pursuant to R12-15-713 have been demonstrated for a development.
10. "Analysis of assured water supply" means a determination issued by the Director stating that one or more criteria required for a certificate of assured water supply pursuant to R12-15-704 have been demonstrated for a development.
11. "Annual authorized volume" means, for an approved remedial action project, the annual authorized volume specified in a consent decree or other document approved by ADEQ or the EPA, except that:
    a. If no annual authorized amount is specified in a consent decree or other document approved by ADEQ or the EPA, the annual authorized volume is the largest volume of groundwater withdrawn pursuant to the approved remedial action project in any year prior to January 1, 1999.
    b. If the Director increases the annual authorized volume pursuant to R12-15-729(C), the annual authorized volume is the amount approved by the Director.
12. "Annual estimated water demand" means the estimated water demand divided by 100.
13. Approved remedial action project" means a remedial action project approved by ADEQ under A.R.S. Title 49, or by the EPA under CERCLA.
14. "Authorized remedial groundwater use" means, for any year, the amount of remedial groundwater withdrawn pursuant to an approved remedial action project and used by a municipal provider during the year, not to exceed the annual authorized volume of the project.
15. "Build-out" means a condition in which all water delivery mains are in place and active water service connections exist for all lots.
16. "CAP water" means:
    a. All water from the Colorado River or from the Central Arizona Project works authorized in P.L. 90-537, excluding enlarged Roosevelt reservoir, which is made available pursuant to a subcontract with a multi-county water conservation district.
    b. Any additional water not included in subsection 16(a) of this Section that is delivered by the United States Secretary of the Interior pursuant to an Indian water rights settlement through the Central Arizona Project.
17. "Central Arizona Groundwater Replenishment District" or "CAGRD" means a multi-county water conservation district acting in its capacity as the entity established pursuant to A.R.S. § 48-3771, et seq., and responsible for replenishing excess groundwater
.
18. "Central distribution system" means a water system that qualifies as a public water system pursuant to A.R.S. § 49-352.
19. "CERCLA" or "Comprehensive Environmental Response, Compensation, and Liability Act of 1980" has the same meaning as prescribed in A.R.S. § 49-201.
20. "Certificate" means a certificate of assured water supply issued by the Director for a subdivision pursuant to A.R.S. § 45-576 et seq. and this Article.
21. "Certificate holder" means any person included on a certificate, except the following:
    a. Any person who no longer owns any portion of the property included in the certificate, and
    b. Any potential purchaser for whom the purchase contract has been terminated or has expired.
22. "Certificate of convenience and necessity" means a certificate required by the Arizona Corporation Commission, pursuant to A.R.S. § 40-281, which allows a private water company to serve water to customers within its certificated area.
23. "Colorado River water" means water from the main stream of the Colorado River. For purposes of this Article, Colorado River water does not include CAP water.
24. "Committed demand" means the 100-year water demand at build-out of all recorded lots that are not yet served water within the service area of a designation applicant or a designated provider.
25. "County water augmentation authority" means an authority formed pursuant to A.R.S. Title 45, Chapter 11.
26. "Current demand" means the 100-year water demand for existing uses within the service area of a designation applicant or designated provider, based on the annual report for the previous calendar year.
27. "Depth-to-static water level" means the level at which water stands in a well when no water is withdrawn by pumping or by free flow.
28. "Designated provider" means:
    a. A municipal provider that has obtained a designation of assured or adequate water supply; or
    b. A city or town that has obtained a designation of adequate water supply pursuant to A.R.S. § 45-108(D).
29. "Designation means a decision and order issued by the Director designating a municipal provider as having an assured water supply or an adequate water supply.
30. "Determination of adequate water supply" means a water report, a designation of adequate water supply, or an analysis of adequate water supply.
31. "Determination of assured water supply" means a certificate, a designation of assured water supply, or an analysis of assured water supply.

32. "Development" means either a subdivision or an unplatted development plan.
33. "Diversion works" means a structure or well that allows or enhances diversion of surface water from its natural course for other uses.
34. "Drought response plan" means a plan describing a variety of conservation and augmentation measures, especially the use of backup water supplies, that a municipal provider will utilize in operating its water supply system in times of a water supply shortage. The plan may include the following:
    a. An identification of priority water uses consistent with applicable public policies.
    b. A description of sources of emergency water supplies.
    c. An analysis of the potential use of water pressure reduction.
    d. Plans for public education and voluntary water use reduction.
    e. Plans for water use bans, restrictions, and rationing.
    f. Plans for water pricing and penalties for excess water use.
    g. Plans for coordination with other cities, towns, and private water companies.
35. "Drought volume" means 80% of the volume of a surface water supply, determined by the Director under R12-15-716 to be physically available on an annual basis to a certificate holder or a designated provider.
36. "Dry lot development" means a development or subdivision without a central water distribution system.
37. "EPA" means the United States Environmental Protection Agency.
38. "Estimated water demand" means:
    a. For a certificate or water report, the Director's determination of the 100-year water demand for all uses included in the subdivision;
    b. For a designation, the sum of the following:
        i. The Director's determination of the current demand;
        ii. The Director's determination of the committed demand; and
        iii. The Director's determination of the projected demand during the term of the designation; or
    c. For an analysis, the Director's determination of the water demand for all uses included in the development.
39. "Existing municipal provider" means a municipal provider that was in operation and serving water for non-irrigation use on or before January 1, 1990.
40. "Extinguish" means to cause a grandfathered right to cease to exist through a process established by the Director pursuant to R12-15-723.
41. "Extinguishment credit" means a credit that is issued by the Director in exchange for the extinguishment of a grandfathered right and that may be used to make groundwater use consistent with the management goal of an AMA.
42. "Firm yield" means the minimum annual diversion for the period of record which may include runoff releases from storage reservoirs, and surface water withdrawn from a well.
43. "Gray water" has the same meaning as provided in A.R.S. § 49-201.
44. "Gray water reuse system" means a system constructed to reuse gray water that meets the requirements of the rules adopted by ADEQ for gray water systems.
45. "Management plan" means a water management plan adopted by the Director according to A.R.S. § 45-561 et seq.
46. "Mandatory adequacy jurisdiction" means a city, town, or county that requires an adequate water supply determination by the Director as a condition of approval of a plat according to A.R.S. § 9-463.01(J) or (O) or A.R.S. § 11-823(A).
47. "Master-planned community" has the same meaning as provided in A.R.S. § 32-2101.
48. "Median flow" means the flow which is represented by the middle value of a set of flow data that are ranked in order of magnitude.
49. "Member land" has the same meaning as provided in A.R.S. § 48-3701.
50. "Member service area" has the same meaning as provided in A.R.S. § 48-3701.
51. "Multi-county water conservation district" means a district established according to A.R.S. Title 48, Chapter 22.
52. "Municipal provider" has the same meaning as provided in A.R.S. § 45-561.
53. "New municipal provider" means a municipal provider that began serving water for non-irrigation use after January 1, 1990.
54. "Owner" means:
    a. For an analysis, certificate, or water report applicant, a person who holds fee title to the land described in the application; or
    b. For a designation applicant, the person who will be providing water service according to the designation.
55. "Perennial" means a stream that flows continuously.
56. "Persons per household" means a measure obtained by dividing the number of persons residing in housing units by the number of housing units.
57. "Physical availability determination" means a letter issued by the Director stating that an applicant has demonstrated all of the criteria in R12-15-702(C).
58. "Plat" means a preliminary or final map of a subdivision in a format typically acceptable to a platting entity.
59. "Potential purchaser" means a person who has entered into a purchase agreement for land that is the subject of an application for a certificate or an assignment of a certificate.

60. "Projected demand" means the 100-year water demand at build-out, not including committed or current demand, of customers reasonably projected to be added and plats reasonably projected to be approved within the designated provider's service area and reasonably anticipated expansions of the designated provider's service area.
61. "Proposed municipal provider" means a municipal provider that has agreed to serve a proposed subdivision.
62. "Purchase agreement" means a contract to purchase or acquire an interest in real property, such as a contract for purchase and sale, an option agreement, a deed of trust, or a subdivision trust agreement.
63. "Remedial groundwater" means groundwater withdrawn according to an approved remedial action project, but does not include groundwater withdrawn to provide an alternative water supply according to A.R.S. § 49-282.03.
64. "Service area" means:
    a. For an application for an analysis of adequate water supply, a water report, or a designation of adequate water supply, the area of land actually being served water for a non-irrigation use by the municipal provider and additions to the area that contain the municipal provider's operating distribution system for the delivery of water for a non-irrigation use;
    b. For an application for a designation of adequate water supply according to A.R.S. § 45-108(D), the area of land actually being served water for a non- irrigation use by each municipal provider that serves water within the city or town, and additions to the area that contain each municipal provider's operating distribution system for the delivery of water for a non-irrigation use; or
    c. For an application for a certificate or designation of assured water supply, "service area" has the same meaning as prescribed in A.R.S. § 45-402.
65. "Subdivision" has the same meaning as prescribed in A.R.S. § 32-2101.
66. "Superfund site" means the site of a remedial action undertaken according to CERCLA.
67. "Surface water" means any surface water as defined in A.R.S. § 45-101, including CAP water and Colorado River water.
68. "Water Quality Assurance Revolving Fund site" or "WQARF site" means a site of a remedial action undertaken according to A.R.S. Title 49, Chapter 2, Article 5.
69. "Water report" means a letter issued to the Arizona Department of Real Estate by the Director for a subdivision stating whether an adequate water supply exists according to A.R.S. § 45-108 and this Article.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Amended by emergency rulemaking at 11 A.A.R. 2706, effective June 29, 2005 for 180 days (Supp. 05-2). Emergency renewed for 180 days at 12 A.A.R. 144, effective December 23, 2005 (Supp. 05-4). Emergency expired. Amended by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 28 A.A.R. 909 (May 6, 2022), with an immediate effective date of April 11, 2022 (Supp. 22-2).

R12-15-702. Physical Availability Determination

A. A person may apply for a physical availability determination by submitting an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and providing the following information with the application:
1. The proposed source of water for which the applicant is seeking a determination of physical availability,
2. Evidence that the applicant has complied with subsection (C) of this Section, and
3. Any other information that the Director reasonably deems necessary to determine whether water is physically available in the area that is the subject of the application.

B. Each applicant shall sign an application for a physical availability determination. If an applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee or other person who performs similar decision-making functions for the applicant shall sign the application. If the applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the determination, the authorized representative may sign the application on the applicant's behalf.

C. An applicant for a physical availability determination shall demonstrate the following:
1. The volume of water that is physically available for 100 years in the area that is the subject of the application, according to the criteria in R12-15-716.
2. That the proposed sources of water will be of adequate quality, according to the criteria in R12-15-719.

D. After a complete application is submitted, the Director shall review the application and associated evidence to determine whether the applicant has demonstrated all of the criteria in subsection (C) of this Section. If the Director determines that the applicant has demonstrated all of the criteria in subsection (C) of this Section, the Director shall issue a physical availability determination.

E. Any person applying for a determination of assured water supply or a determination of adequate water supply may use an existing physical availability determination for purposes of R12-15-716. The Director shall consider any changes in hydrologic conditions for purposes of R12-15-716.

F. The issuance of a physical availability determination does not reserve any water for purposes of this Article.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2).

TITLE 12. NATURAL RESOURCES

CHAPTER 15. DEPARTMENT OF WATER RESOURCES

Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-703. Analysis of Assured Water Supply

A. A person proposing to develop land that will not be served by a designated provider may apply for an analysis of assured water supply before applying for a certificate. An applicant for an analysis must be the owner of the land that is the subject of the application or have the written consent of the owner. The commissioner of the Arizona State Land Department may apply for an analysis for land owned by the state of Arizona or may consent to the inclusion of such land in an application.

B. An applicant for an analysis shall submit an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and attach the following:

1. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is submitted, demonstrating the ownership of the land that is the subject of the application;
2. A description of the development, including:
   a. A map of the land uses included in the development,
   b. A list of water supplies proposed to be used by the development,
   c. A summary of land use types included in the development, and
   d. An estimate of the water demand for the land uses included in the development; and
3. Evidence that the applicant has complied with subsection (E) of this Section.

C. An applicant shall sign the application for an analysis. If an applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If the applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the analysis, the authorized representative may sign the application on the applicant's behalf.

D. After a complete application is submitted, the Director shall determine the estimated water demand of the development.

E. The Director shall issue an analysis if an applicant demonstrates one or more of the following:

1. Sufficient supplies of water are physically available to meet all or part of the estimated water demand of the development for 100 years, according to the criteria in R12-15-716.
2. Sufficient supplies of water are continuously available to meet the estimated water demand of the development for 100 years, according to the criteria in R12-15-717.
3. Sufficient supplies of water are legally available to meet the estimated water demand of the development for 100 years, according to the criteria in R12-15-718.
4. The proposed sources of water are of adequate quality, according to the criteria in R12-15-719.
5. Any proposed groundwater use is consistent with the management plan in effect at the time of the application, according to the criteria in R12-15-721.
6. Any proposed groundwater use is consistent with the management goal, according to the criteria in R12-15-722.

F. For 10 years after the Director issues an analysis, or a longer period allowed under subsections (H) or (I) of this Section:

1. If groundwater is a source of supply in the analysis and the applicant demonstrates that groundwater is physically available under subsection (E)(1) of this Section, the Director shall consider that supply of groundwater reserved for the use of the proposed development in subsequent determinations of physical availability pursuant to R12-15-716(B).
2. If an analysis holder applies for a certificate for a subdivision located on land included in the analysis, the Director shall presume that a criterion demonstrated in the analysis remains satisfied with respect to the subdivision, unless the Director has received new evidence demonstrating that the criterion is not satisfied. If the Director issues the certificate, the Director shall reduce the volume of groundwater reserved pursuant to subsection (F)(1) of this Section by the amount of the estimated water demand for the certificate that will be met with groundwater.

G. The Director shall reduce the amount of groundwater considered reserved for use of the development upon request by the analysis holder. If the analysis holder requesting a reduction is not the person to whom the analysis was issued, the Director shall reduce the amount of reserved groundwater only if the person to whom the analysis was issued or that person's designee consents to the request for reduction. The person to whom the analysis was issued shall notify the Director in writing of the name of the person's designee for purposes of this subsection.

H. The analysis holder may apply to the Director for a five-year extension of the time period in subsection (F) of this Section by submitting an application on a form prescribed by the Director no earlier than 36 months before the end of the time period and no later than 30 days before the end of the time period. If an extension is granted, the analysis holder may apply to the Director for an additional five-year extension by submitting an application on a form prescribed by the Director no earlier than 36 months before the end of the extended time period and no later than 30 days before the end of the extended time period. The Director shall extend the time period for no more than two successive five-year periods under this subsection if the analysis holder demonstrates one of the following:

1. The analysis holder has made a substantial capital investment in developing the land included in the analysis.
2. The analysis holder has made material progress in developing the land included in the analysis.
3. Progress in developing the land included in the analysis has been delayed for reasons outside the control of the analysis holder.

I. After the Director grants two five-year extensions pursuant to subsection (H) of this Section, the Director may extend the time period for additional five-year periods if the analysis holder files a timely application pursuant to subsection (H) of this Section and demonstrates one of the criteria in subsections (H)(1), (2), or (3) of this Section.

J. The Director shall review an application for an analysis or an application for an extension pursuant to subsections (H) or (I) of this Section pursuant to the licensing time-frame provisions in R12-15-401.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Amended by emergency rulemaking at 11 A.A.R. 2706, effective June 29, 2005 for 180 days (Supp. 05-2). Emergency renewed for 180 days at 12 A.A.R. 144, effective December 23, 2005 (Supp. 05-4). Emergency expired. Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-703.01. Repealed

Historical Note

New Section made by final rulemaking at 7 A.A.R. 3038, effective June 18, 2001 (Supp. 01-2). Section repealed by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-704. Certificate of Assured Water Supply

A. An application for a certificate shall be filed by the current owner of the land that is the subject of the application. Potential purchasers and affiliates may also be included as applicants.

B. An applicant for a certificate shall submit an application on a form prescribed by the Director with the fee required by R12-15-103(C) and provide the following:

1. One of the following forms of proof of ownership for each applicant to be listed on the certificate:
   a. For an applicant that is the current owner, one of the following:
      i. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is filed, demonstrating that the applicant is the owner of the land that is the subject of the application; or
      ii. Evidence that the CAGRD has reviewed and approved evidence that the applicant is the owner of the land that is the subject of the application.
   b. For an applicant that is a potential purchaser, evidence of a purchase agreement;
   c. For an applicant that is an affiliate of another applicant, a certification by the other applicant of the affiliate status;
2. A plat of the subdivision;
3. An estimate of the 100-year water demand for the subdivision;
4. If the subdivision is enrolled as a member land in the CAGRD and the applicant proposes to install gray water reuse systems in the subdivision, sufficient information for the Director to determine the appropriate reduction in demand;
5. A list of all proposed sources of water that will be used by the subdivision;
6. Evidence that the criteria in subsection (F) or (G) are met; and
7. Any other information that the Director reasonably determines is necessary to decide whether an assured water supply exists for the subdivision.

C. Each applicant shall sign the application for a certificate. If an applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If an applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the certificate, the authorized representative may sign the application on the applicant's behalf.

D. The Director shall give public notice of an application for a certificate as provided in A.R.S. § 45-578.

E. After a complete application is submitted, the Director shall review the application and associated evidence to determine:

1. The estimated water demand of the subdivision. If the subdivision is enrolled in the CAGRD and the applicant demonstrates that gray water reuse systems will be installed in the subdivision, the Director shall reduce the estimated water demand of the subdivision by the volume the Director determines is likely to be saved through the gray water reuse systems;
2. The amount of the groundwater allowance for the subdivision, as provided in R12-15-724 through R12-15-727; and
3. Whether the applicant has demonstrated all of the requirements in subsection (F) or (G).

F. Except as provided in subsection (G), the Director shall issue a certificate if the applicant demonstrates all of the following:

1. Sufficient supplies of water are physically available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-716;
2. Sufficient supplies of water are continuously available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-717;

3. Sufficient supplies of water are legally available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-718;
4. The sources of water are of adequate quality, according to the criteria in R12-15-719;
5. The applicant has the financial capability to construct adequate delivery, storage, and treatment works for the subdivision, according to the criteria in R12-15-720;
6. The proposed use of groundwater withdrawn within an AMA is consistent with the management plan in effect at the time of the application, according to the criteria in R12-15-721; and
7. The proposed use of groundwater withdrawn within an AMA is consistent with the achievement of the management goal, according to the criteria in R12-15-722.

G. If the Director previously issued a certificate for the subdivision, the Director shall issue a new certificate to the applicant if the applicant demonstrates that all of the requirements in subsection (F) are met or that all of the following apply:
1. Any changes to the plat for which the previous certificate was issued are not material, according to the criteria in R12-15-708;
2. If groundwater is a proposed source of supply for the subdivision, the proposed groundwater withdrawals satisfied the physical availability requirements in effect at the time the complete and correct application for the previous certificate was submitted;
3. Any proposed sources of water, other than groundwater, are physically available to satisfy the estimated water demand that will not be satisfied with groundwater, according to the criteria in R12-15-716;
4. Any proposed sources of water other than groundwater are continuously available to satisfy the estimated water demand that will not be satisfied with groundwater, according to the criteria in R12-15-717;
5. The proposed uses of groundwater withdrawn within an AMA were consistent with the achievement of the management goal according to the criteria in effect at the time the complete and correct application for the previous certificate was submitted; and
6. The applicant demonstrates that the requirements in subsections (F)(3) through (6) are met.

H. Before issuing a certificate, the Director shall classify the certificate for the purposes of R12-15-705 and R12-15-706 as follows:
1. Type A certificate. The Director shall classify the certificate as a Type A certificate if the applicant meets the criteria in R12-15-720(A)(1) and all of the subdivision's estimated water demand will be met with one or more of the following:
   a. Groundwater served by a proposed municipal provider pursuant to an existing service area right;
   b. Groundwater served by a proposed municipal provider pursuant to a pending service area right, if the proposed municipal provider currently holds or will hold the well permit;
   c. CAP water served by a municipal provider pursuant to the proposed municipal provider's non-declining, long-term municipal and industrial subcontract;
   d. Surface water served by a proposed municipal provider pursuant to the proposed municipal provider's surface water right or claim;
   e. Effluent owned and served by a proposed municipal provider; or
   f. A Type 1 grandfathered right appurtenant to the land on which the groundwater will be used and held by a proposed municipal provider.
2. Type B certificate. The Director shall classify all certificates that do not meet the requirements of subsection (H)(1) as Type B certificates.

I. The Director shall review an application for a certificate pursuant to the licensing time-frame provisions in R12-15-401.

J. An owner of six or more lots is not required to obtain a certificate if all of the following apply:
1. The lots comprise a subset of a subdivision for which:
   a. A plat was recorded before 1980; or
   b. A certificate was issued before February 7, 1995;
2. No changes were made to the plat since February 7, 1995; and
3. Water service is currently available to each lot.

K. A new owner of all or a portion of a subdivision for which a plat has been recorded is not required to obtain a certificate if all of the following apply:
1. The Director previously issued a Type A certificate for the subdivision pursuant to subsection (H)(1) or R12-15-707;
2. Water service is currently available to each lot; and
3. There are no material changes to the plat for which the certificate was issued, according to the criteria in R12-15-708.

L. An owner of six or more lots in the Pinal AMA is not required to obtain a certificate if all of the following apply:
1. A plat for the subdivision was recorded before October 1, 2007;
2. There have been no material changes to the plat according to the criteria in R12-15-708, since October 1, 2007;
3. The proposed municipal provider was designated as having an assured water supply when the plat was recorded, but is no longer designated as having an assured water supply; and
4. Water service is currently available to each lot.

M. A person may request a letter stating that the owner is not required to obtain a certificate pursuant to subsection (J), (K), or (L) by submitting an application on a form prescribed by the Director and attaching evidence that the criteria of subsection (J), (K), or (L) are met. Upon receiving an application pursuant to this subsection, the Director shall:
1. Review the application pursuant to the licensing time-frame provisions in R12-15-401.
2. Determine whether the criteria of subsection (J), (K), or (L) are met.

3. If the Director determines that the criteria of subsection (J) are met, issue a letter to the applicant and the Arizona Department of Real Estate stating that the current owner is not required to obtain a certificate.
4. If the Director determines that the criteria of subsection (K) or (L) are met, issue a letter to the applicant and the Arizona Department of Real Estate stating that the current owner and any future owners are not required to obtain a certificate.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by final rulemaking at 13 A.A.R. 1394, effective October 1, 2007 (Supp. 07-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2). Amended by final expedited rulemaking at 28 A.A.R. 909 (May 6, 2022), with an immediate effective date of April 11, 2022 (Supp. 22-2).

R12-15-705. Assignment of Type A Certificate of Assured Water Supply

A. The certificate holder of a Type A certificate and the assignee may apply for approval of an assignment of the Type A certificate within the time allowed by A.R.S. § 45-579(A). The assignee may file the application if there is no certificate holder. The application shall be submitted on a form prescribed by the Director with the initial fee required by R12-15-103(C), and the applicant shall provide the following:
   1. One of the following forms of proof of ownership for each assignee:
      a. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is submitted to the Director and demonstrating that the assignee is the owner of the land that is the subject of the proposed assignment; or
      b. If the assignee is a potential purchaser, evidence of a purchase agreement;
   2. A current plat of the subdivision;
   3. An estimate of the 100-year water demand for the subdivision, based on the current plat;
   4. Certification by each applicant that:
      a. The proposed municipal provider has not changed and has agreed to continue to serve the subdivision after the assignment; and
      b. All water supplies listed on the current certificate are physically, continuously, and legally available to meet the estimated water demand of the subdivision after the assignment.

B. Each applicant shall sign the application for an assignment of a Type A certificate. If an applicant is not a natural person, the entity's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If an applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land included in the certificate, the authorized representative may sign the application on behalf of the applicant.

C. Upon receiving an application for an assignment of a Type A certificate, the Director shall post the notice required by A.R.S. § 45-579(E).

D. If the Director determines that the application meets the criteria of A.R.S. § 45-579(A), the Director shall issue a Type A certificate to each applicant. A Type A certificate issued under this subsection shall retain the issue date, the number of lots, and the estimated water demand shown on the original certificate, except as provided in subsection (E) of this Section. The Director shall determine that the application meets the criteria of A.R.S. § 45-579(A) if all of the following apply:
   1. The application is submitted within the time allowed by A.R.S. § 45-579(A);
   2. The assignee is the owner or a potential purchaser of the portion of the subdivision that is the subject of the assignment;
   3. There have been no material changes to the plat for which the original certificate was issued, according to the criteria in R12-15-708;
   4. Neither the applicant nor a predecessor in interest has impaired the manner in which consistency with management goal requirements were satisfied when the original certificate was issued; and
   5. The applicant makes the certifications required in subsection (A)(4) of this Section.

E. In the case of a partial assignment, the Director shall determine whether changes to the plat are material according to R12-15-708. The Director shall issue a Type A certificate to the assignee for the portion of the subdivision that is the subject of the assignment and for the number of lots and the estimated water demand of the current plat of the portion of the subdivision that is the subject of the assignment. The Director shall issue a Type A certificate to the certificate holder for the portion of the subdivision retained by the certificate holder and for the remainder of the number of lots and the remainder of the estimated water demand. The sum of the number of lots and the sum of the amount of the estimated water demand shown on each certificate shall equal the total number of lots and the total estimated water demand shown on the certificate being assigned.

F. The Director shall review an application for an assignment of a Type A certificate of assured water supply pursuant to the licensing time-frame provisions in R12-15-401.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 4390, effective November 22, 2002 (Supp. 02-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-706. Assignment of Type B Certificate of Assured Water Supply

A. The certificate holder of a Type B certificate or a certificate issued before the effective date of this Section that has not been classified pursuant to R12-15-707 and the assignee may apply for approval of an assignment of the certificate to another person within the time allowed by A.R.S. § 45-579(A). The assignee may file the application if there is no certificate holder. The application shall be submitted on a form prescribed by the Director with the initial fee required by R12-15-103(C), and the applicant shall provide the following:
1. One of the following forms of proof of ownership for each assignee:
   a. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is submitted to the Director and demonstrating that the assignee is the owner of the land that is the subject of the proposed assignment; or
   b. If the assignee is a potential purchaser, evidence of a purchase agreement;
2. A current plat of the subdivision;
3. An estimate of the 100-year water demand for the subdivision, based on the current plat;
4. Evidence that all necessary water rights, permits, licenses, contracts, and easements have been or will be assigned to the assignee of the certificate;
5. Evidence that the assignee has the financial capability to construct adequate delivery, storage, and treatment works for the subdivision according to the criteria in R12-15-720;
6. Evidence that all water supplies listed on the current certificate are physically, continuously, and legally available to meet the estimated water demand of the subdivision after the assignment;
7. Evidence that the proposed municipal provider has not changed and has agreed to serve the subdivision after the assignment;
8. If the applicant requests that the Director classify the certificate pursuant to subsection (E) of this Section, evidence that the requirements of R12-15-704(H)(1) are satisfied;
9. Any other information that the Director reasonably deems necessary to determine whether the application meets the criteria of A.R.S. § 45-579.

B. Each applicant shall sign the application for an assignment of a certificate. If an applicant is not a natural person, the entity's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If an applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the certificate, the authorized representative may sign the application on the applicant's behalf.

C. Upon receiving an application for an assignment, the Director shall post the notice required by A.R.S. § 45-579(E).

D. Except as provided in subsection (E) of this Section, if the Director determines that the application meets the criteria of A.R.S. § 45-579(A), the Director shall issue a Type B certificate to each applicant. A Type B certificate issued under this subsection shall retain the issue date, the number of lots, and the estimated water demand shown on the original certificate, except as provided in subsection (F) of this Section. The Director shall determine that the application meets the criteria of A.R.S. § 45-579(A) if all of the following apply:
1. The application is submitted within the time allowed by A.R.S. § 45-579(A);
2. The assignee is the owner or potential purchaser of the portion of the subdivision that is the subject of the assignment;
3. There have been no material changes to the plat for which the original certificate was issued, according to the criteria in R12-15-708;
4. The applicant demonstrates the financial capability to construct adequate delivery, storage, and treatment works for the subdivision according to the criteria in R12-15-720;
5. All necessary water rights, permits, licenses, contracts, and easements have been or will be assigned to the assignee of the certificate;
6. All water supplies listed on the current certificate are physically, continuously, and legally available to meet the estimated water demand of the subdivision after the assignment;
7. Neither the applicant nor a predecessor in interest has impaired the manner in which consistency with management goal requirements were satisfied when the original certificate was issued; and
8. The proposed municipal provider has agreed to serve the subdivision after the assignment.

E. The applicant may include in the application a request to classify the certificate as a Type A certificate. If the Director determines that the request meets the requirements of R12-15-704(H)(1), the Director shall classify the certificate as a Type A certificate.

F. In the case of a partial assignment, the Director shall determine whether changes to the plat are material according to R12-15-708. The Director shall issue a Type B certificate to the assignee for the portion of the subdivision that is the subject of the assignment and for the number of lots and the estimated water demand of the current plat of the portion of the subdivision that is the subject of the assignment. The Director shall issue a Type B certificate to the certificate holder for the portion of the subdivision retained by the certif-

icate holder and for the remainder of the number of lots and the remainder of the estimated water demand. The sum of the number of lots and the sum of the amount of the estimated water demand shown on each certificate shall equal the total number of lots and the total estimated water demand shown on the certificate that is being assigned.

G. The Director shall review an application for an assignment of a Type B certificate pursuant to the licensing time-frame provisions in R12-15-401.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-707. Application for Classification of a Type A Certificate

A. A holder of a Type B certificate or a certificate issued before the effective date of this Section may apply to the Director to classify the certificate as a Type A certificate by submitting an application on a form prescribed by the Director with the initial fee prescribed in R12-15-103(C), and attaching evidence that the certificate meets the requirements of R12-15-704(H)(1).

B. At least one certificate holder shall sign the application for classification of a certificate as a Type A certificate. If the applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If the applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the certificate, the authorized representative may sign the application on behalf of the applicant.

C. If the applicant demonstrates that the requirements of R12-15-704(H)(1) are met, the Director shall classify the certificate as a Type A certificate and issue a Type A certificate to each certificate holder.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-708. Material Plat Change; Application for Review

A. A certificate or a water report is applicable to the original plat for which the certificate or water report was issued and to a revised plat, unless the plat changes are material according to subsections (C) and (D).

B. If a plat is revised after the Director issues a certificate or a water report and the changes to the plat are material according to subsection (C) or (D), the holder may:
1. Apply for a new certificate or water report for the revised plat,
2. Use the original plat for which the certificate or water report was issued, or
3. Revise the plat so that any changes are not material according to subsections (C) and (D).

C. Changes to the plat for which a certificate or a water report has been issued are material if any of the following apply:
1. The 100-year water demand for the revised plat equals the 100-year water demand for the certificate or water report and the number of lots on the plat has increased by more than:
   a. For subdivisions of six to 10 lots: one lot;
   b. For subdivisions of 11 to 499 lots: 10%, rounding up to the nearest whole number; or
   c. For subdivisions of 500 lots or more: 50 lots.
2. The 100-year water demand for the revised plat exceeds the estimated water demand for the certificate or water report, unless all of the following apply:
   a. The 100-year water demand for the revised plat does not exceed the estimated water demand for the certificate or water report by more than 10%, rounding to the nearest whole acre-foot, or by more than 25 acre-feet per year, whichever is less;
   b. The 100-year water demand is not greater than the supply demonstrated to be physically, continuously, and legally available at the time of issuance of the certificate or water report, and that water supply remains physically, continuously, and legally available; and
   c. For a certificate, one of the following applies:
      i. The subdivision is enrolled as a member land in the CAGRD;
      ii. Groundwater is not included as a source of supply; or
      iii. The subdivision is located in the Pinal AMA and the 100-year water demand for the revised plat will not exceed the sum of the amount of the groundwater allowance and the amount of any extinguishment credits pledged to the certificate, including extinguishment credits pledged after the certificate was issued.
   d. The number of lots on the revised plat has not increased by more than:
      i. For subdivisions of six to 10 lots: one lot;

ii. For subdivisions of 11 to 499 lots: 10%, rounding up to the nearest whole number; or
iii. For subdivisions of 500 or more: 50 lots.
3. For a certificate, additional land is included in the plat, unless all of the following apply:
a. The land included in the original plat for which the certificate was issued is located in a master-planned community;
b. The outer boundaries of the master-planned community have not expanded;
c. If the land included in the original plat for which the certificate was issued is enrolled as a member land in the CAGRD, the additional land has also been enrolled in the CAGRD; and
d. A certificate has been issued for the additional land.

D. Changes to a portion of a plat are not material if one of the following applies:
1. The changes to the portion of the plat being reviewed are not material according to subsection (C) when compared to the equivalent portion of the plat for which the certificate was issued;
2. The changes to the entire revised plat are not material according to subsection (C) when compared to the entire plat for which the certificate was issued; or
3. For a partial assignment pursuant to R12-15-705 or R12-15-706, the plat for the portion of the subdivision retained by the certificate holder could be configured so that changes to the total number of lots and the estimated water demand for the entire subdivision, including the portion under consideration, are not material according to subsection (C). For purposes of this subsection, the Director may require the applicant to submit evidence demonstrating whether changes to the plat are material. However, the Director shall not require the applicant to submit a plat for the retained portion of a subdivision, unless the materiality of changes to the plat cannot be determined with any other evidence.

E. A person may apply for a review of a revised plat to determine whether any changes to the plat are material as follows:
1. The applicant shall submit an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and shall attach the revised plat.
2. The Director shall review the revised plat and the plat for which the certificate or water report was originally issued to determine whether any changes are material according to the criteria in subsections (C) and (D).
3. The Director shall issue a letter to the applicant stating whether any changes to the plat are material and identifying which changes, if any, are material. If the Director determines that the changes to the plat are not material, the Director's letter shall state that the certificate or water report is applicable to the revised plat.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2). Amended by final expedited rulemaking at 28 A.A.R. 909 (May 6, 2022), with an immediate effective date of April 11, 2022 (Supp. 22-2).

R12-15-709. Certificate of Assured Water Supply; Revocation

A. The Director may revoke a certificate if an assured water supply does not exist.
B. The Director shall not revoke a certificate if any of the residential lots within the plat have been sold.
C. If the Director determines that a certificate should be revoked, the Director shall provide for an administrative hearing, in accordance with A.R.S. Title 41, Chapter 6, Article 10. To determine whether a certificate should be revoked, the Director shall use the standards in place at the time the original application was submitted for the certificate.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-710. Designation of Assured Water Supply

A. A municipal provider applying for a designation of assured water supply shall submit an application on a form prescribed by the Director with the fee required by R12-15-103(C) and provide the following:
1. The applicant's current demand;
2. The applicant's committed demand;
3. The applicant's projected demand for the proposed term of the designation;
4. If the applicant is seeking a reduction in the estimated water demand because gray water reuse systems will be installed, sufficient information for the Director to determine the appropriate reduction in demand;
5. The proposed term of the designation, which shall not be less than two years;
6. Evidence that the criteria in subsection (E) are met; and
7. Any other information that the Director determines is necessary to decide whether an assured water supply exists for the municipal provider.

B. An application for a designation shall be signed by:
1. If the applicant is a city or town, the city or town manager or a person employed in an equivalent position. The application shall also include a resolution of the governing body of the city or town, authorizing that person to sign the application; or

2. If the applicant is a private water company, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant.

C. The Director shall give public notice of an application for designation in the same manner as provided for certificates in A.R.S. § 45-578. For an application to modify a designation of assured water supply to which subsection (G) applies, the physical availability of the groundwater and stored water to be recovered outside the area of impact of storage sought to be included in the designation shall not be grounds for an objection.

D. After a complete application is submitted, the Director shall review the application and associated evidence to determine:
1. The annual volume of water physically, continuously, and legally available for at least 100 years;
2. The term of the designation, which shall not be less than two years;
3. The applicant's estimated water demand. If the applicant demonstrates that gray water reuse systems will be installed, the Director shall reduce the estimated water demand for the subdivision by the volume the Director determines is likely to be saved through the gray water reuse systems;
4. The applicant's groundwater allowance; and
5. Whether the applicant has demonstrated compliance with all requirements in subsection (E).

E. The Director shall designate the applicant as having an assured water supply if the applicant demonstrates all of the following:
1. Sufficient supplies of water are physically available to meet the applicant's estimated water demand, according to the criteria in R12-15-716, except as provided in subsection (G);
2. Sufficient supplies of water are continuously available to meet the applicant's estimated water demand, according to the criteria in R12-15-717;
3. Sufficient supplies of water are legally available to meet the applicant's estimated water demand, according to the criteria in R12-15-718;
4. The proposed sources of water are of adequate quality, according to the criteria in R12-15-719;
5. The applicant has the financial capability to construct adequate delivery, storage, and treatment works in a timely manner according to the criteria in R12-15-720;
6. Any proposed groundwater use is consistent with the management plan in effect at the time of the application, according to the criteria in R12-15-721; and
7. Any proposed use of groundwater withdrawn within an AMA is consistent with the management goal, according to the criteria in R12-15-722.

F. The Director shall review an application for a designation of assured water supply pursuant to the licensing time-frame provisions in R12-15-401.

G. For an application seeking to modify a designation of assured water supply, the Director shall not review the physical availability of the volume of groundwater and stored water to be recovered outside the area of impact sought to be included in the designation if the total volume of those sources sought to be included in the designation does not exceed the total volume of those sources included in the previous designation of assured water supply that are required to be accounted for according to R12-15-716(B)(3)(c)(ii), minus the sum of the following:
1. The volume of groundwater withdrawn by the applicant since the previous designation of assured water supply order issuance date; and
2. The volume of stored water recovered outside the area of impact by the applicant since the previous designation of assured water supply order issuance date.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2). Amended by final expedited rulemaking at 28 A.A.R. 909 (May 6, 2022), with an immediate effective date of April 11, 2022 (Supp. 22-2).

R12-15-711. Designation of Assured Water Supply; Annual Report Requirements, Review, Modification, Revocation

A. A designated provider shall include in the annual report required by A.R.S. § 45-632 the following information for the preceding calendar year:
1. The designated provider's committed demand;
2. The demand at build-out for customers with which the designated provider has entered into an agreement to serve water, other than committed demand;
3. A report regarding the designated provider's compliance with water quality requirements;
4. The depth-to-static water level of all wells from which the designated provider withdrew water; and
5. Any other information the Director may reasonably require to determine whether the designated provider continues to meet the criteria for a designation of assured water supply.

B. If there is a change of ownership, the subsequent owner of a designated provider shall notify the Director in writing of the change in ownership within 90 days.

C. The Director shall review a designation at least every 15 years following issuance of the designation to determine whether the designation should be modified or revoked. To determine whether the designation should be modified or revoked, the Director shall use the standards in place at the time of review.

D. The Director may modify a designation for good cause, including a merger, division of the designated provider, or a change in ownership of the designated provider.

E. A designated provider may request a modification of the designation at any time pursuant to R12-15-710.

F. The Director may revoke a designation if:

1. After notifying the designated provider and initiating a review of the designated provider's status, the Director determines that the designated provider has less water, according to the criteria in R12-15-710(E), than the amount required for a 100-year supply for the provider's:
   a. Current demand,
   b. Committed demand, and
   c. Projected demand during the next two calendar years;
2. The designated provider fails to construct adequate delivery, storage, and treatment works in a timely manner;
3. ADEQ or another governmental entity with equivalent jurisdiction has determined, after notice and an opportunity for a hearing, that the designated provider is in significant noncompliance with A.A.C. Title 18, Chapter 4 and is not taking action to resolve the noncompliance; or
4. The designated provider has violated its management plan requirements for two or more consecutive calendar years, and one of the following applies:
   a. The provider fails to amend its water use plan in a manner that the Director determines will achieve compliance, or
   b. The provider fails to sign a stipulated agreement to remedy the violation.

G. If the Director determines that a designation of assured water supply should be revoked, the Director shall provide for an administrative hearing, in accordance with A.R.S. Title 41, Chapter 6, Article 10.

H. If a designated provider's designated status terminates, the provider may apply for re-designation at anytime after termination.

I. Notwithstanding any other provision in this Article, a decision and order of the Director designating a city, town, or private water company as having an assured water supply is not affected by this Article solely because the rule numbers cited in the decision and order may have changed after the effective date of the decision and order.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-712. Analysis of Adequate Water Supply

A. A person proposing to develop land outside an AMA that will not be served by a designated provider may apply for an analysis of adequate water supply before applying for a water report. An applicant for an analysis must be the owner of the land that is the subject of the application or have the written consent of the owner. The commissioner of the Arizona State Land Department may apply for an analysis for land owned by the state of Arizona outside an AMA or may consent to the inclusion of such land in an application.

B. An applicant for an analysis shall submit an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and attach the following:

1. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is submitted to the Director, demonstrating the ownership of the land that is the subject of the application;
2. A description of the development, including:
   a. A map of the land uses included in the development,
   b. A list of water supplies proposed to be used by the development,
   c. A summary of land use types included in the development, and
   d. An estimate of the water demand for the land uses included in the development; and
3. Evidence that the applicant has complied with subsection (E) of this Section.

C. An applicant shall sign the application for an analysis. If an applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If the applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land that is the subject of the water report, the authorized representative may sign the application on the applicant's behalf.

D. After a complete application is submitted, the Director shall determine the estimated water demand of the development.

E. The Director shall issue an analysis if an applicant demonstrates one or more of the following:

1. Sufficient supplies of water are physically available to meet all or part of the estimated water demand of the development for 100 years, according to the criteria in R12-15-716;
2. Sufficient supplies of water are continuously available to meet the estimated water demand of the development for 100 years, according to the criteria in R12-15-717;
3. Sufficient supplies of water are legally available to meet the estimated water demand of the development for 100 years, according to the criteria in R12-15-718;

4. The proposed sources of water are of adequate quality, according to the criteria in R12-15-719.

F. For 10 years after the Director issues an analysis, or a longer period allowed under subsections (H) or (I) of this Section:
1. If groundwater is a source of supply in the analysis and the applicant demonstrates that groundwater is physically available under subsection (E)(1), the Director shall consider that supply of groundwater reserved for the use of the proposed development in subsequent determinations of physical availability pursuant to R12-15-716(B).
2. If an analysis holder applies for a water report for a subdivision located on land included in the analysis, the Director shall presume that a criterion demonstrated in the analysis remains satisfied with respect to the subdivision, unless the Director has received new evidence demonstrating that the criterion is not satisfied. If the Director issues the water report, the Director shall reduce the volume of groundwater reserved pursuant to subsection (F)(1) of this Section by the amount of the estimated water demand for the water report that will be met with groundwater.

G. The Director shall reduce the amount of water considered reserved for use of the development upon request by the analysis holder. If the analysis holder requesting a reduction is not the person to whom the analysis was issued, the Director shall reduce the amount of reserved groundwater only if the person to whom the analysis was issued or that person's designee consents to the request for reduction. The person to whom the analysis was issued shall notify the Director in writing of the person's designee for purposes of this subsection.

H. The analysis holder may apply to the Director for a five-year extension of the time period in subsection (F) of this Section by submitting an application on a form prescribed by the Director no earlier than 36 months before the end of the time period and no later than 30 days before the end of the time period. If an extension is granted, the analysis holder may apply to the Director for an additional five-year extension by submitting an application on a form prescribed by the Director no earlier than 36 months before the end of the extended time period and no later than 30 days before the end of the extended time period. The Director shall extend the time period for no more than two successive five-year periods under this subsection if the analysis holder demonstrates one of the following:
1. The analysis holder has made a substantial capital investment in developing the land included in the analysis.
2. The analysis holder has made material progress in developing the land included in the analysis.
3. Progress in developing the land included in the analysis has been delayed for reasons outside the control of the analysis holder.

I. After the Director grants two five-year extensions pursuant to subsection (H) of this Section, the Director may extend the time period for additional five-year periods if the analysis holder files a timely application pursuant to subsection (H) of this Section and demonstrates one of the criteria in subsections (H)(1), (2), or (3) of this Section.

J. The Director shall review an application for an analysis or an application for an extension pursuant to subsections (H) or (I) of this Section pursuant to the licensing time-frame provisions in R12-15-401.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-713. Water Report

A. An application for a water report shall be filed by the current owner of the land that is the subject of the application.

B. An applicant for a water report shall submit an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and provide the following:
1. A title report, condition of title report, limited search title report, or recorded deed, dated within 90 days of the date the application is filed and demonstrating that the applicant is the owner of the land that is the subject of the application;
2. A plat of the subdivision;
3. An estimate of the 100-year water demand for the subdivision;
4. A list of all proposed sources of water that will be used by the subdivision;
5. If the applicant is seeking a finding that the subdivision has an adequate water supply, evidence that the criteria in subsection (E) are met; and
6. Any other information that the Director reasonably determines is necessary to decide whether an adequate water supply exists for the subdivision.

C. Each applicant shall sign the application for a water report. If an applicant is not a natural person, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant shall sign the application. If an applicant submits a letter, signed by the applicant and dated within 90 days of the date the application is submitted, authorizing a representative to submit applications for permits regarding the land to be included in the water report, the authorized representative may sign the application on the applicant's behalf.

D. After a complete application is submitted, the Director shall review the application and associated evidence to determine:
1. The estimated water demand of the subdivision,
2. Whether the applicant has demonstrated all of the requirements in subsection (E).

E. The Director shall determine that the subdivision has an adequate water supply if the applicant demonstrates all of the following:

1. Sufficient supplies of water are physically available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-716;
2. Sufficient supplies of water are continuously available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-717;
3. Sufficient supplies of water are legally available to meet the estimated water demand of the subdivision, according to the criteria in R12-15-718;
4. The proposed sources of water will be of adequate quality, according to the criteria in R12-15-719;
5. The applicant has the financial capability to construct adequate delivery, storage, and treatment works for the subdivision according to the criteria in R12-15-720.

F. The Director shall issue a water report to the applicant that states whether the applicant has complied with the requirements in subsection (E).

G. The Director shall review an application for a water report pursuant to the licensing time-frame provisions in R12-15-401.

H. The Director may review or modify a water report if the Director receives new evidence regarding the criteria in subsection (E). The Director shall not modify a water report pursuant to this subsection if any of the residential lots included in the plat have been sold. To determine whether a water report should be modified pursuant to this subsection, the Director shall use the standards in place at the time the original application was submitted for the water report. If the Director modifies a water report, the Director shall:

1. Provide for an administrative hearing pursuant to A.R.S. Title 41, Chapter 6, Article 10; and
2. Notify the Arizona Department of Real Estate.

I. An owner of land that is the subject of a water report may request a modification of the water report at any time by submitting an application in accordance with subsection (B). To determine whether a water report should be modified pursuant to this Section, the Director shall use the standards in place at the time of review.

J. A water report is subject to the provisions of R12-15-708.

K. An owner of a subdivision that is located within a mandatory adequacy jurisdiction and that will be served Colorado River water by a municipal provider may apply for an exemption from the requirement to obtain an adequate water supply determination from the director or a commitment of water service from a designated provider according to A.R.S. § 45108.03(A)(1)(b) by submitting an application on a form prescribed by the Director and demonstrating that the criteria in subsection (K)(2) are met. Upon receiving an application according to this subsection, the Director shall:

1. Review the application according to the licensing time frame provisions in R12-15-401.
2. Determine whether the applicant has demonstrated that all of the following apply:
   a. Sufficient supplies of water will not be legally available to meet the estimated water demand of the subdivision in a timely manner because the municipal provider will serve Colorado River water to the subdivision and the municipal provider does not currently have the legal right to serve the Colorado River water to the subdivision;
   b. The municipal provider currently has an entitlement to Colorado River water, according to the criteria in R12-15-718(G);
   c. The municipal provider will have the legal right to serve the Colorado River water to the subdivision within 20 years;
   d. An interim water supply will be used to serve the subdivision until the municipal provider has the legal right to serve the Colorado River water to the subdivision and the interim water supply meets all of the criteria in subsection (E), except that the supply will be available for the interim period and not for 100 years; and
   e. When the municipal provider has the legal right to serve the Colorado River water to the subdivision, the Colorado River water supply will meet all of the criteria in subsection (E).
3. If the Director determines that the criteria of subsection (K)(2) are met, issue a letter to the applicant, the platting authority, and the Arizona Department of Real Estate stating that the owner is exempt from the requirement to obtain an adequate water supply determination from the director or a commitment of water service from a designated provider.

L. An owner of a subdivision that is located within a mandatory adequacy jurisdiction and that will be served by a water supply project under construction may apply for an exemption from the requirement to obtain an adequate water supply determination from the director or a commitment of water service from a designated provider according to A.R.S. § 45-108.03(A)(1)(a) by submitting an application on a form prescribed by the Director and demonstrating that the criteria in subsection (L)(2) are met. Upon receiving an application according to this subsection, the Director shall:

1. Review the application according to the licensing time frame provisions in R12-15-401.
2. Determine whether the applicant has demonstrated that all of the following apply:
   a. Sufficient supplies of water will not be available to meet the estimated water demand of the subdivision in a timely manner because the physical works for delivering water to the subdivision are not complete;
   b. The physical works for delivering water to the subdivision are under construction and will be completed within 20 years;
   c. An interim water supply will be used to serve the subdivision until the physical works for delivering water to the subdivision are fully constructed and the interim water supply meets all of the criteria in subsection (E), except that supply will be available for the interim period and not for 100 years; and
   d. When the physical works for delivering water to the subdivision are fully constructed, the water supply will meet all of the criteria in subsection (E).
3. If the Director determines that the criteria of subsection (L)(2) are met, issue a letter to the applicant, the platting authority, and the Arizona Department of Real Estate stating that the owner is exempt from the requirement to obtain an adequate water supply determination from the director or a commitment of water service from a designated provider.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2). Amended by final expedited rulemaking at 28 A.A.R. 909 (May 6, 2022), with an immediate effective date of April 11, 2022 (Supp. 22-2).

R12-15-714. Designation of Adequate Water Supply

A. A municipal provider applying for a designation of adequate water supply shall submit an application on a form prescribed by the Director with the initial fee required by R12-15-103(C), and the following:
1. The applicant's current demand;
2. The applicant's committed demand;
3. The applicant's projected demand for the proposed term of the designation;
4. The proposed term of the designation, which shall not be less than two years;
5. Evidence that the criteria in subsection (E) of this Section are met; and
6. Any other information that the Director determines is necessary to decide whether an adequate water supply exists for the municipal provider.

B. A city or town, other than a municipal provider, that is applying for a designation shall submit an application on a form prescribed by the Director with the initial fee required in R12-15-103(C), and provide the following:
1. The current demand of the applicant's service area;
2. The committed demand of the applicant's service area;
3. The projected demand of the applicant's service area for the proposed term of the designation;
4. The proposed term of the designation, which shall not be less than two years; and
5. Evidence that the requirements in A.R.S. § 45-108(D) are met.

C. An application for a designation shall be signed by:
1. If the applicant is a city or town, the city or town manager or a person employed in an equivalent position. The application shall also include a resolution of the governing body of the city or town, authorizing that person to sign the application; or
2. If the applicant is a private water company, the applicant's authorized officer, managing member, partner, trust officer, trustee, or other person who performs similar decision-making functions for the applicant.

D. After a complete application is submitted, the Director shall review the application and associated evidence to determine:
1. The annual volume of water that is physically, continuously, and legally available for at least 100 years;
2. The term of the designation, which shall not be less than two years;
3. The estimated water demand for the applicant's service area for 100 years; and
4. Whether the applicant has demonstrated compliance with all requirements in subsection (E) or (F) of this Section.

E. The Director shall designate the applicant has having an adequate water supply pursuant to subsection (A) of this Section if the applicant demonstrates all of the following:
1. Sufficient supplies of water are physically available to meet the applicant's estimated water demand, according to the criteria in R12-15-716;
2. Sufficient supplies of water are continuously available to meet the applicant's estimated water demand, according to the criteria in R12-15-717;
3. Sufficient supplies of water are legally available to meet the applicant's estimated water demand, according to the criteria in R12-15-718;
4. The proposed sources of water are of adequate quality, according to the criteria in R12-15-719; and
5. The applicant has the financial capability to construct adequate delivery, storage, and treatment works in a timely manner according to the criteria in R12-15-720.

F. The Director shall issue a designation pursuant to subsection (B) of this Section if the applicant demonstrates that the requirements of A.R.S. § 45-108(D) are met.

G. The Director shall review an application for a designation of adequate water supply pursuant to the licensing time-frame provisions in R12-15-401.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

R12-15-715. Designation of Adequate Water Supply; Annual Report Requirements, Review, Modification, Revocation

A. By March 31 of each calendar year, a designated provider shall submit the following information for the preceding calendar year on a form provided by the Director:

1. The designated provider's committed demand;
2. The demand at build-out for customers with which the designated provider has entered into an agreement to serve water, other than committed demand;
3. A report regarding the designated provider's compliance with water quality requirements;
4. The depth-to static water level of all wells from which the designated provider withdrew water;
5. A report regarding volume of water withdrawn, diverted, or received from each source for delivery to customers;
6. Any other information the Director may reasonably require to determine whether the designated provider continues to meet the criteria for a designation of adequate water supply.

B. If there is a change of ownership, the subsequent owner of a designated provider shall notify the Director in writing of the change in ownership within 90 days.

C. The Director shall review a designation at least every 15 years following issuance of the designation to determine whether the designation should be modified or revoked.

D. The Director may modify a designation for good cause, including a merger, division of the designated provider, or a change in ownership of the designated provider. A designated provider may request a modification of the designation at any time pursuant to R12-15-714. To determine whether the designation should be modified, the Director shall use the standards in place at the time of review.

E. The Director may revoke a designation if:

1. After notifying the designated provider and initiating a review of the designated provider's status, the Director deter mines that the designated provider has less water, according to the criteria in R12-15-714(E), than the amount required for a 100-year supply for the provider's:
   a. Current demand,
   b. Committed demand, and
   c. Projected demand for the next two calendar years;
2. The designated provider fails to construct adequate delivery, storage, and treatment works in a timely manner; or
3. ADEQ or another governmental entity with equivalent jurisdiction has determined, after notice and an opportunity for a hearing, that the designated provider is in significant noncompliance with A.A.C. Title 18, Chapter 4 and is not taking action to resolve the noncompliance.

F. To determine whether the designation should be revoked, the Director shall use the standards in place at the time of review. If the Director determines that a designation of adequate water supply should be revoked, the Director shall provide for an administrative hearing, in accordance with A.R.S. Title 41, Chapter 6, Article 10.

G. If a designated provider's designated status terminates, the provider may apply for re-designation at anytime after termination.

H. Notwithstanding any other provision in this Article, a decision and order of the Director designating a city, town, or private water company as having an assured water supply is not affected by this Article solely because the rule numbers cited in the decision and order may have changed after the effective date of the decision and order.

Historical Head

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-716. Physical Availability

A. The volume of a proposed source of water that is physically available to an applicant for a determination of assured water supply or a determination of adequate water supply is the amount determined by the Director to be physically available pursuant to subsections (B) through (L) of this Section.

B. If the proposed source is groundwater, the applicant shall submit a hydrologic study, using a method of analysis approved by the Director, that accurately describes the hydrology of the affected area. Except as provided in subsection (D) of this Section, the Director shall determine that the proposed volume of groundwater will be physically available for the proposed use if both of the following apply:

1. The groundwater will be withdrawn as follows:
   a. Except as provided in subsection (B)(1)(b) of this Section, from wells owned by the applicant or the proposed municipal provider that are located within the service area of the applicant or the proposed municipal provider or from proposed wells that the Director determines are likely to be constructed for future uses of the applicant or the proposed municipal provider.
   b. If the application is for a dry lot development, from wells that the Director determines are likely to be constructed on individual lots.
2. Except as provided in subsection (C) of this Section, the groundwater will be withdrawn from depths that do not exceed the applicable maximum 100-year depth-to-static water level according to the following:

Type and location of development	Maximum 100-year depth-to-static water level

a. Developments in Phoenix, Tucson, or Prescott AMAs, except dry lot developments	1000 feet below land surface
b. Developments in Pinal AMA, except dry lot developments	1100 feet below land surface
c. Developments outside AMAs, except dry lot developments	1200 feet below land surface
d. Dry lot developments	400 feet below land surface

3. The Director shall calculate the projected 100-year depth-to-static water level by adding the following for the area where groundwater withdrawals are proposed to occur:
   a. The depth-to-static water level on the date of application.
   b. The projected declines caused by existing uses, using the projected decline in the 100-year depth-to-static water level during the 100-year period after the date of application, calculated using records of declines for the maximum period of time for which records are available up to 25 calendar years before the date of application. If evidence is provided to the Director of likely changes in pumpage patterns and aquifer conditions, as opposed to those patterns and conditions occurring historically, the Director may determine projected declines using a model rather than evidence of past declines.
   c. The projected decline in the depth-to-static water level during the 100-year period after the date of application, calculated by adding the projected decline from each of the following that are not accounted for in subsection (B)(3)(b) of this Section:
      i. The estimated water demand of issued certificates and water reports that will be met with groundwater or stored water recovered outside the area of impact of the stored water, not including the demand of subdivided lots included in abandoned plats;
      ii. The estimated water demand of designations that will be met with groundwater or stored water recovered outside the area of impact of the stored water; and
      iii. The groundwater reserved for developments for which the Director has issued an analysis pursuant to R12-15-703 or R12-15-712.
   d. The projected decline in depth-to-static water level that the Director projects will result from the applicant's proposed use over a 100-year period.

C. The Director shall lower the maximum 100-year depth-to-static water level requirement specified in subsection (B)(2) of this Section for an applicant seeking a determination of adequate water supply if the applicant demonstrates both of the following:
1. Groundwater is available at the lower depth; and
2. The applicant has the financial capability to obtain the groundwater at the lower depth, according to the criteria in R12-15-720.

D. If the proposed source is groundwater that will be withdrawn from a groundwater basin outside an AMA and transported into an AMA, the Director shall determine that the proposed volume of groundwater will be physically available if both of the following apply:
1. The groundwater will be withdrawn from wells owned by the applicant or the proposed municipal provider or from proposed wells that the Director determines are likely to be constructed for the future uses of the applicant or the proposed municipal provider.
2. Withdrawal of the groundwater will comply with any depth-to-static water level criteria, decline rate criteria, and volume limitation criteria prescribed by statute. If there are no applicable depth-to-static water level criteria prescribed by statute, withdrawal of the groundwater shall comply with the depth-to-static water level criteria in subsection (B)(2) of this Section.

E. Subject to subsection (L) of this Section, if the proposed source of water is surface water, other than CAP water, or Colorado River water, the Director shall determine the annual volume of water that is physically available for the proposed use, taking into consideration the priority date of the right or claim, by calculating 120% of the firm yield of the proposed source at the point of diversion as limited by the capacity of the diversion works; except that if the applicant demonstrates that an alternative source of water will be physically available during times of shortage in the proposed surface water supply, the Director shall determine the annual volume of water available by calculating 100% of the median flow of the proposed source at the point of diversion as limited by the capacity of the diversion works. The Director shall determine the firm yield or median flow as follows:
1. By calculating the firm yield or median flow at the point of diversion based on at least 20 calendar years of flow records from the point of diversion, unless 20 calendar years of records are unavailable and the Director determines that a shorter period of record provides information necessary to determine the firm yield or median flow; or
2. By calculating the firm yield or median flow at the point of diversion using a hydrologic model that projects the firm yield or median flow, taking into account at least 20 calendar years of historic river flows, changes in reservoir storage facilities, and pro-

jected changes in water demand. The yield available to any applicant may be composed of rights to stored water, direct diversion, or normal flow rights. If the permit for the water right was issued less than five years before the date of application, the Director shall require the applicant to submit evidence, as applicable, in accordance with this subsection.

F. Subject to subsection (L) of this Section, if the proposed source of water is CAP water, the Director shall determine the annual volume of water that is physically available for the proposed use as follows:
1. If the applicant or the proposed municipal provider has a non-declining, long-term municipal and industrial subcontract for CAP water, calculate 100% of the annual amount of water established in the subcontract.
2. If the applicant has a lease for Indian priority CAP water, calculate 100% of the annual amount of water established in the lease.
3. If the applicant has a subcontract for CAP water other than a non-declining, long-term municipal and industrial subcontract or a lease for Indian priority CAP water:
   a. If the applicant submits evidence of sufficient backup water supplies, calculate 100% of the annual amount of water established in the subcontract. The applicant may establish backup water supplies by one or more of the following:
      i. A drought response plan;
      ii. Long-term storage credits;
      iii. A contract for water with a multi-county water conservation district; or
      iv. Evidence of other backup supplies that are physically, continuously, and legally available.
   b. If the applicant does not submit evidence of sufficient backup water supplies pursuant to subsection (F)(3)(a) of this Section, calculate the percentage of the annual amount of water established in the subcontract that reasonably reflects the reliability of the applicant's CAP water supply.

G. Subject to subsection (L) of this Section, if the proposed source of water is Colorado River water, the Director shall determine the annual volume of water that is physically available for the proposed use as follows:
1. If the priority of the contract for Colorado River water provides reliability equal to or better than CAP municipal and industrial water, calculate 100% of the annual amount of water established in the contract.
2. If the contract for Colorado River water provides reliability that is less than CAP municipal and industrial water:
   a. If the applicant submits evidence of sufficient backup water supplies, calculate 100% of the annual amount of water in the contract. The applicant may establish backup water supplies by one or more of the following:
      i. A drought response plan;
      ii. Long-term storage credits;
      iii. A contract for water with a multi-county water conservation district; or
      iv. Evidence of other backup supplies that are physically, continuously, and legally available.
   b. If the applicant does not submit evidence of sufficient backup water supplies pursuant to subsection (G)(2)(a) of this Section, calculate the percentage of the annual amount of water established in the contract that reasonably reflects the reliability of the applicant's Colorado River water supply.

H. Subject to subsection (I) of this Section, if the proposed source of water is effluent, the Director shall determine the annual volume of water that will be physically available by evaluating the current, metered production or the projected production of effluent. The volume of effluent that is physically available shall not include the following:
1. If the effluent will be delivered directly from a wastewater treatment plant, the volume of effluent that exceeds the applicant's estimated water demand that will be met with effluent; and
2. The volume of effluent that does not comply with any applicable water quality requirements for the proposed use of the effluent.

I. If the proposed source of water is stored water to be recovered from recovery wells, the Director shall determine the volume of water that is physically available for the proposed use as follows:
1. If the stored water is represented by long-term storage credits in existence on the date of application, the amount that is physically available is the amount that may be recovered pursuant to the credits in a manner consistent with A.R.S. Title 45, Chapter 3.1, subject to subsection (I)(3) of this Section.
2. If the applicant proposes to use long-term storage credits that do not exist on the date of application or recover stored water on an annual basis pursuant to A.R.S. § 45-851.01, the Director shall evaluate the following in determining whether to include the proposed credits or the water proposed to be stored and recovered annually in the amount of water that is physically available for the applicant's proposed use:
   a. The terms of a contract to obtain water to store in a storage facility;
   b. The physical, continuous, and legal availability of the water proposed to be stored;
   c. The presence of an existing storage facility that will be available for use for the proposed storage;
   d. The existence of all required permits of an adequate duration; and
   e. Whether recovery of the stored water will comply with subsection (I)(3) of this Section.
3. If the applicant proposes to recover the stored water from recovery wells located outside the area of impact of storage, the stored water will be considered physically available only if sufficient water exists for the withdrawals consistent with both of the following:
   a. The maximum 100-year depth-to-static water level requirements established in subsection (B)(2) of this Section; and
   b. Any criteria for the withdrawals prescribed in the management plan in effect at the time of the application.

J. If the applicant will obtain the source of water through a water exchange agreement, the Director shall determine that the water is physically available for the proposed use if the applicant submits evidence that the source of water the applicant or the applicant's customers will use will be physically available in accordance with the terms of this Section.

K. In the case of two or more pending, conflicting, complete and correct applications for determinations of assured water supply or determinations of adequate water supply, the Director shall give priority to the application with the earliest priority date. The priority date of an application for a determination of assured water supply or determination of adequate water supply shall be the date that a complete and correct application is filed with the Director. The Director shall consider an application complete and correct if it contains all the information required and the Director verifies that the information is accurate.

L. For a certificate applicant that proposes to use surface water, the Director shall determine that the proposed source is physically available only if the applicant demonstrates one of the following:

1. The land that is the subject of the application is a member land of the CAGRD.
2. The applicant has independently obtained the surface water supply.
3. The proposed municipal provider would satisfy the criteria in R12-15-722 if the municipal provider were subject to those requirements.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-717. Continuous Availability

A. The Director shall determine that an applicant will have sufficient supplies of water that will be continuously available for 100 years if the applicant submits sufficient evidence that adequate delivery, storage, and treatment works will be in place in a timely manner to make the water available to the applicant or the applicant's customers for 100 years and the applicant meets any applicable requirements in subsections (B) through (G) of this Section.

B. If the proposed source of water is groundwater, the applicant shall demonstrate that wells of a sufficient capacity will be constructed in a timely manner to serve the proposed uses on a continuous basis for 100 years.

C. If the proposed source of water is surface water other than CAP water or Colorado River water, the applicant shall demonstrate that a continuous supply will exist because of one or more of the following:

1. The projected volume to be diverted from the source is perennial at the point of diversion;
2. Adequate storage facilities will be available to the applicant in a timely manner to store water for use when a volume of surface water is not available at the point of diversion to satisfy the applicant's water demands;
3. The applicant has presented evidence of supplies of other sources of water that the Director has determined will be physically, continuously, and legally available to supplement the applicant's proposed surface water supplies;
4. The applicant or the proposed municipal provider will withdraw surface water from wells of sufficient capacity to meet the applicant's estimated water demand on a continuous basis for 100 years; or
5. The applicant has submitted a drought response plan that the Director has determined will conserve or augment a volume of water equal to the volume of water that is subject to drought.

D. If the proposed source of water is CAP water or Colorado River water, the applicant shall demonstrate that a continuous supply is available because of one or more of the following:

1. Adequate storage facilities will be available to the applicant in a timely manner to store water when a volume of CAP water or Colorado River water is not available to meet the applicant's water demands;
2. The applicant has presented evidence of supplies of other sources of water that the Director has determined will be physically, continuously, and legally available to the applicant to supplement the proposed CAP water or Colorado River water supplies; or
3. The applicant has submitted a drought response plan that the Director has determined will conserve or augment a volume of water equal to the volume subject to drought.

E. If the proposed source of water is effluent, the applicant shall demonstrate that the capability to use the effluent to meet the demands of the proposed use will not be affected by any fluctuations in the supply of the effluent.

F. If the proposed source of water is stored water to be recovered from recovery wells, the applicant shall demonstrate that recovery wells of a sufficient capacity will be constructed in a timely manner to serve the proposed use on a continuous basis for 100 years.

G. If an applicant will obtain the source of water through a water exchange agreement, the applicant shall demonstrate that the source of water the applicant or the applicant's customers will use will be continuously available in accordance with the terms of this Section.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Amended by emergency rulemaking at 11 A.A.R. 2706, effective June 29, 2005 for 180 days (Supp. 05-2). Emergency renewed for 180 days at 12 A.A.R. 144, effective December 23, 2005 (Supp. 05-4). Emergency expired. Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-718. Legal Availability

A. The Director shall determine that an applicant will have sufficient supplies of water that will be legally available for at least 100 years if the applicant submits all of the applicable information required by this Section.

B. If the applicant is an applicant for a certificate or a water report, the applicant shall submit the following, as applicable:
1. A Notice of Intent to Serve agreement between the owner of the land to be included in the subdivision and the proposed municipal provider, stating the proposed municipal provider's intent to serve the subdivision;
2. If the proposed municipal provider is a city or town, evidence indicating that the proposed subdivision is located within the incorporated limits of the city or town or evidence of the legal right of the city or town to serve water to the subdivision outside the city or town's incorporated limits; or
3. If the proposed municipal provider is a private water company, one of the following:
   a. Evidence that the proposed municipal provider has a certificate of convenience and necessity approved by the Arizona Corporation Commission and the subdivision is located within the geographic area described in the certificate of convenience and necessity or any other area in which the Arizona Corporation Commission authorizes the private water company to serve water;
   b. Evidence that the proposed municipal provider has an order preliminary issued by the Arizona Corporation Commission authorizing the municipal provider to provide water service and the proposed subdivision is located within the area described in the order preliminary; or
   c. Evidence that the proposed municipal provider is not a public service corporation regulated by the Arizona Corporation Commission.

C. If the applicant is a private water company applying for a designation, the applicant shall submit evidence that the applicant has a certificate of convenience and necessity approved by the Arizona Corporation Commission, or has been issued an order preliminary by the Arizona Corporation Commission for a certificate of convenience and necessity, authorizing the applicant to serve the proposed use.

D. If a proposed source of water is groundwater to be withdrawn within an AMA, the applicant shall submit evidence that the applicant or the proposed municipal provider has one or more of the following:
1. A service area right;
2. An applicable non-irrigation grandfathered right to withdraw groundwater, in an amount sufficient to serve the proposed use; or
3. A pending notice of intent to establish a new service area and all of the following apply:
   a. The notice of intent to establish a new service area identifies the proposed subdivision,
   b. The applicant or the proposed municipal provider has obtained a permit for any wells used to establish the service area right,
   c. The proposed municipal provider has obtained a water right or recovery well permit to establish the service area right, and
   d. The water right is of sufficient volume and duration to meet the estimated water demand of the proposed subdivision until the anticipated date of issuance of a service area right.

E. If a proposed source of water is surface water other than CAP water or Colorado River water:
1. The applicant shall submit evidence that the applicant or the proposed municipal provider has a certificated surface water right, decreed water right, or a pre-1919 claim for the proposed source. If the applicant or the proposed municipal provider does not hold a surface water right or claim, but will receive water pursuant to a water right or claim that is appurtenant to the land that is the subject of the application, the applicant shall submit evidence of the water right or claim and evidence that the water right or claim may neither be legally withheld nor severed and transferred by the right holder or claimant.
2. If the certificated surface water right or decreed water right pre-dates the date of application by at least five years, or the applicant submits a pre-1919 claim, the applicant shall submit one of the following:
   a. Evidence that the surface water supply has been used pursuant to the applicable water right or claim within the five years before the date of application;
   b. Evidence that a court has determined that the right has not been abandoned; or
   c. Evidence that the non-use would not have resulted in an abandonment of the right pursuant to A.R.S. § 45-189.
3. The Director shall determine that the volume of water that is legally available pursuant to a certificated surface water right, a decreed water right, or a pre-1919 claim is equal to the face value of the right or claim. If the right or claim is subsequently adjudicated, the Director shall determine the volume of water that is legally available based on the adjudicated amount of water.

F. Subject to subsections (M) and (N) of this Section, if a proposed source of water is CAP water, the applicant shall submit evidence that the applicant or the proposed municipal provider has entered into a subcontract with a multi-county water conservation district for the proposed volume of CAP water. The Director shall presume that a 50-year long-term, non-declining municipal and industrial subcontract is sufficient evidence of the legal availability of the volume of CAP water specified in the subcontract for 100 calendar years.

G. Subject to subsections (M) and (N) of this Section, if a proposed source of water is Colorado River water, the applicant shall submit evidence of one of the following:
1. The applicant or the proposed municipal provider has a contract with the United States Secretary of the Interior for the proposed supply; or
2. The applicant has obtained an allocation of Colorado River water from an entity to which all of the following apply:
   a. The entity holds a contract for Colorado River water with the United States Secretary of the Interior;
   b. The entity provides Colorado River water to the proposed municipal provider;
   c. The entity has allocated a sufficient volume of the Colorado River water to the subdivision; and

d. The area that the entity may serve, described in the contract with the United States Secretary of the Interior, includes the subdivision.

H. If a proposed source of water is effluent, the applicant shall submit evidence that the applicant or the proposed municipal provider has the legal right to use the effluent.

I. If the applicant will obtain a proposed source of water through a written contract other than a water exchange agreement, a contract between a certificate applicant and the municipal provider proposed to serve the applicant, a contract with the United States Secretary of the Interior for Colorado River water, or a subcontract with a multi-county water conservation district, the applicant shall submit evidence that the person providing the water under the contract has a legal right to the water in accordance with the terms of this Section and that the terms of the contract will ensure that the proposed source of water will be delivered to the applicant or to the proposed subdivision. The Director shall determine the term of years for which the proposed source of water is legally available based on the term of years remaining in the contract. The Director shall determine the quantity of water legally available based on the volume established in the contract.

J. If the applicant will obtain a proposed source of water through a water exchange agreement, the applicant shall submit evidence that the water exchange agreement satisfies the requirements of A.R.S. Title 45, Chapter 4.

K. If the Director can determine the proposed source of water to be physically and continuously available only because of the use of storage facilities by the applicant or by the proposed municipal provider, the applicant shall submit evidence of the applicant's or the proposed municipal provider's legal right to store water in the storage facilities.

L. If the applicant proposes to use long-term storage credits, the applicant shall submit evidence that the applicant or the proposed municipal provider has the legal right to use the credits under A.R.S. Title 45, Chapter 3.1.

M. If a proposed supply of water is Colorado River water or CAP water leased from an Indian community, the applicant shall submit evidence that the water leased has a priority equal to or higher than CAP municipal and industrial water, evidence that the Indian community is expressly authorized by an Act of Congress to lease the water for use off Indian community lands, evidence of the lease, and evidence of one of the following:

1. The proposed water supply is available under the lease for at least 100 years from any time during the year in which the applicant submits the application.
2. The term of the lease has less than 100 years remaining in the year in which the applicant submits the application and a supplemental water supply, together with the leased water, provides a 100-year water supply. The applicant shall demonstrate that the supplemental water supply is physically, continuously, and legally available and, if such supplemental supply is groundwater, that use of the groundwater is consistent with the management goal of the AMA. If the supplemental supply is water recovered through the use of long-term storage credits, the applicant shall also submit the following, as applicable:
   a. If the applicant is to use the long-term storage credits before the beginning of the lease term, evidence that the applicant or the proposed municipal provider has obtained a recovery well permit that allows the applicant or the proposed municipal provider to recover water pursuant to the long-term storage credits; or
   b. If the long-term storage credits will be accrued in the future, evidence that the applicant or the proposed municipal provider will accrue the long-term storage credits within 20 years after the effective date of the designation, certificate, or water report by storing the water under an issued water storage permit at a permitted storage facility and that no more than 20 years of the applicant's supplemental water supply will be provided by the long-term storage credits.

N. If the Director previously determined that Colorado River water or CAP water leased from an Indian community was legally available to a designated provider for 100 years, the Director shall determine that the designated provider continues to have a legally available supply of water for 100 years for the annual amount of water available under the lease if:

1. The lease has at least 50 years remaining in its term or the lease has at least 40 years remaining in its term and the designated provider submits evidence to the Director of active and ongoing negotiations with the Indian community to renew or re-negotiate the lease; and
2. One of the following applies:
   a. No more than 15% of the total water supplies that the designated provider establishes as physically, continuously, and legally available during any year are obtained through leases with Indian communities;
   b. Groundwater will be physically, continuously, and legally available to the designated provider at the end of the lease term to substitute for the leased water for the remainder of the 100-year period, and the projected use of groundwater is consistent with the management goal of the AMA. For purposes of this subsection, the designated provider may demonstrate that the proposed use is consistent with the management goal by entering into a written agreement with the Director under which the designated provider agrees to replace through replenishment or underground storage any groundwater used at the end of the lease term if groundwater use is not consistent with the management goal. The written agreement shall provide that specific performance is the only remedy in the event of default;
   c. A non-groundwater source of water will be physically, continuously, and legally available at the end of the lease term to substitute for the leased water for the remainder of the 100-year period; or
   d. The designated provider's governing board or council submits a resolution requesting that the designated provider be allowed to increase its projected use of Indian lease water from 15%, as allowed by subsection (N)(2)(a) of this Section, to 20%, and the Director finds that all of the following apply:

i. No more than 20% of the total water supplies that the designated provider establishes as physically, continuously, and legally available during any year are obtained through leases with Indian communities;
ii. No more than 15% of the total water supplies that the designated provider establishes as physically, continuously, and legally available during any year are obtained through any single lease with an Indian community; and
iii. The designated provider does not meet the requirements of subsections (N)(2)(a), (b), or (c) of this Section.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-719. Water Quality

A. Except as provided in subsection (B) of this Section, when reviewing an application for a determination of assured water supply or a determination of adequate water supply, the Director shall determine that the water supply is of adequate quality if one of the following applies:
1. The applicant certifies on the application that the applicant or the proposed municipal provider will be regulated by ADEQ, or another governmental entity with equivalent jurisdiction, as a public water system pursuant to A.R.S. § 49-351, et seq., unless ADEQ, or another governmental entity with equivalent jurisdiction, has determined, after notice and an opportunity for a hearing, that the public water system is in significant noncompliance with A.A.C. Title 18, Chapter 4 and is not taking action to resolve the noncompliance; or
2. The applicant has submitted results of a lab analysis demonstrating that the water meets water quality requirements in accordance with A.A.C. Title 18, Chapter 4, or that the water will meet these requirements after treatment that is required by law. The lab analysis shall be based on water withdrawn from a well representative of the well or wells from which water will be withdrawn for the proposed use, conducted in compliance with sample collection and analysis requirements in A.A.C. Title 18, Chapter 4, and completed within 60 days of the date the application is submitted to the Director. If ADEQ waives any of the water quality or sample collection and analysis requirements in A.A.C. Title 18, Chapter 4, the Director shall not require the applicant to meet the waived requirements.

B. If a well or a proposed well from which water will be withdrawn for the proposed use is located within one mile of a WQARF site or Superfund site, the Director shall determine that the water supply is of adequate quality only if the applicant submits a contaminant migration and mitigation analysis, demonstrating that the water supply will continue to meet the requirements in A.A.C. Title 18, Chapter 4 for 100 years. The contaminant migration and mitigation analysis may include the impact of any mitigation or treatment, including mitigation or treatment required pursuant to a consent decree.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-720. Financial Capability

A. The Director shall determine that an applicant for a certificate or a water report has the financial capability to construct adequate delivery, storage, and treatment works if the applicant demonstrates one or more of the following:
1. The applicant will submit its final plat to a qualified platting authority;
2. The applicant has constructed adequate delivery, storage, and treatment works, and water service is available to each lot; or
3. The applicant has posted a performance bond with the platting authority for the entire cost of adequate delivery, storage, and treatment works.

B. Upon receiving evidence that a platting authority has established standards for proof of financial capability to construct adequate delivery, storage, and treatment works, pursuant to A.R.S. § 9-463.01(C)(8) or A.R.S. § 11-806.01(G), the Director shall classify the platting authority as a qualified platting authority. The Director shall maintain a list of qualified platting authorities.

C. The Director shall determine that an applicant for a designation has the financial capability to construct adequate delivery, storage, and treatment works if the applicant demonstrates one or more of the following for each of those facilities:
1. The applicant has constructed adequate delivery, storage, and treatment works;
2. The applicant has entered into written agreements requiring a potential developer to construct adequate delivery, storage, and treatment works;
3. If the applicant is a city or town, the applicant has:
   a. Adopted a five year capital improvement plan that provides for the construction, or the commencement of construction, of adequate delivery, storage, and treatment works in a timely manner, and has submitted a certification by the applicant's chief financial officer that finances are available to implement that portion of the five-year plan; or
   b. Submitted evidence demonstrating that financing mechanisms are in place to construct adequate delivery, storage, and treatment works in a timely manner; or
4. If the applicant is a private water company, the applicant has received approval from the Arizona Corporation Commission for financing the construction of adequate delivery, storage, and treatment works.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-721. Consistency with Management Plan

A. The Director shall determine whether a designation applicant's projected use of groundwater withdrawn within an active management area is consistent with the management plan as follows:

1. If the applicant is providing water to customers as of the date of application, the applicant's projected water use is consistent with the management plan if either of the following apply:
   a. The applicant is in compliance with its applicable management plan requirements in the most recent calendar year for which data is available before the date of application; or
   b. The applicant has signed a stipulation and consent order that is in effect on the date of the application, or that becomes effective during the time of review of the application, to remedy non-compliance with the management plan requirements and the applicant is in compliance with the terms of the stipulation and consent order.
2. If the applicant has not commenced serving water to customers as of the date of application, the applicant shall submit a water use plan that demonstrates to the Director that compliance with management plan requirements will be achieved through the use of conservation or augmentation measures.
3. If the applicant has a pending request for an administrative review or variance from its management plan requirements, the Director shall not make a finding regarding compliance with this Section until the Director has issued a final decision and order on the request or the request has been withdrawn.

B. The Director shall determine that a certificate applicant's projected use of groundwater withdrawn within an AMA is consistent with the management plan if the applicant submits a water use plan for the subdivision that includes both of the following:

1. Information demonstrating that compliance with management plan requirements will be achieved through conservation or augmentation measures; and
2. All information required to calculate the water requirements for each proposed water use.

C. A certificate applicant for a subdivision of 50 or fewer lots is exempt from the requirements of this rule.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-722. Consistency with Management Goal

A. For the Phoenix, Prescott, or Tucson AMAs, the Director shall calculate the volume of groundwater that may be used consistent with the management goal of the AMA in which the proposed use is located for at least 100 years by adding the following:

1. The amount of the groundwater allowance, according to R12-15-724(A), R12-15-726(A), or R12-15-727(A).
2. The amount of any extinguishment credits pledged to the certificate or designation, according to R12-15-724(B), R12-15-726(B), or R12-15-727(B).
3. Any groundwater that is consistent with the achievement of the management goal pursuant to A.R.S. Title 45, Chapter 2.

B. The Director shall determine that a proposed groundwater use in the Phoenix, Prescott, or Tucson AMA is consistent with the management goal of the AMA if the volume calculated in subsection (A) is equal to or greater than the portion of the applicant's estimated water demand to be met with groundwater.

C. For a certificate in the Pinal AMA, the Director shall calculate the volume of groundwater that may be used consistent with the management goal of the AMA for at least 100 years by adding the following:

1. The amount of the groundwater allowance, according to R12-15-725(A)(1).
2. The amount of any extinguishment credits pledged to the certificate for a grandfathered right that was extinguished on or after January 1, 2019, according to R12-15-725(B), except that annual reported use of such extinguishment credits to make groundwater use consistent with the management goal is limited to the following percentages of groundwater use from the sixth year after certificate issuance:

Years After Certificate Issuance	Percentage of Total Groundwater Use that May Be Made Consistent with the Pinal AMA Management Goal with Extinguishment Credits Pledged to Certificate
Years Six through Ten	75%
Years Eleven through Fifteen	50%

Years Sixteen through Twenty	25%
Years Twenty-one and After	0%

3. The amount of any extinguishment credits pledged to the certificate for a grandfathered right that was extinguished on or after October 1, 2007 and before January 1, 2019.
4. The amount of any extinguishment credits pledged to the certificate for a grandfathered right that was extinguished before October 1, 2007. The Director shall calculate the amount of the extinguishment credits by multiplying the annual amount of the credits by 100.
5. Any groundwater that is consistent with achievement of the management goal pursuant to A.R.S. Title 45, Chapter 2.

D. For a certificate in the Pinal AMA, the Director shall determine that the proposed groundwater use is consistent with the management goal of the AMA if the volume calculated in subsection (C) is equal to or greater than the portion of the applicant's estimated water demand to be met with groundwater.

E. For a designation in the Pinal AMA, the Director shall calculate the volume of groundwater that may be used consistent with the management goal of the Pinal AMA on an annual basis for at least 100 years by adding the following for each year during the 100-year period:

1. The amount of the groundwater allowance, according to R12-15-725(A)(2). If any of the groundwater allowance is not used during a year, the unused groundwater allowance shall not be added to the volume calculated under this subsection for the following year.
2. The amount of any extinguishment credits pledged to the designation for a grandfathered right that was extinguished on or after January 1, 2019, divided by the number of years remaining in which the credits may be used pursuant to R12-15-725(B). These credits shall be included in the calculation only for those years in which the credits may be used. If any of the extinguishment credits were originally pledged to a certificate and are being used to support the municipal provider's designation pursuant to R12-15-723(G)(2), the extinguishment credits shall not be limited by the percentages in subsection (C)(2) of this section.
3. The amount of any extinguishment credits pledged to the designation for a grandfathered right that was extinguished on or after October 1, 2007 and before January 1, 2019, divided by 100. Extinguishment credits for a grandfathered right that was extinguished on or after October 1, 2007 and before January 1, 2019 may be used in any year.
4. The annual amount of any extinguishment credits pledged to the designation for a grandfathered right that was extinguished before October 1, 2007. The following shall apply if any of the extinguishment credits are not used during a calendar year:
   a. If the extinguishment credits were pledged to the designation before October 1, 2007, any extinguishment credits not used during a calendar year shall be added to the volume calculated under this subsection for the following calendar year.
   b. If the extinguishment credits are pledged to the designation on or after October 1, 2007, any of the extinguishment credits not used during a calendar year shall not be added to the volume calculated under this subsection for the following calendar year, except that if the extinguishment credits were originally pledged to a certificate before October 1, 2007 and are used to support the municipal provider's designation pursuant to R12-15-723(G)(2), any of the extinguishment credits not used during a calendar year shall be added to the volume calculated under this subsection for the following calendar year.
5. Any groundwater that is consistent with the achievement of the management goal pursuant to A.R.S. Title 45, Chapter 2.

F. For a designation in the Pinal AMA, the Director shall determine that the proposed groundwater use is consistent with the management goal of the Pinal AMA if the volume calculated in subsection (E) for each year during the 100-year period is equal to or greater than the portion of the applicant's annual estimated water demand to be met with groundwater.

G. Upon application, the following volumes of groundwater used by an applicant are considered consistent with the management goal:

1. If the Director determines that a surface water supply is physically available under R12-15-716 and the volume of the supply actually available during a calendar year is equal to or less than the drought volume for the supply, the volume of groundwater, other than the groundwater that is accounted for under subsection (A), (C), or (E), withdrawn within the AMA that, when combined with the available surface water supply, is equal to or less than the drought volume.
2. Any volume of groundwater withdrawn within a portion of an AMA that is exempt from conservation requirements under A.R.S. Title 45 due to waterlogging. The Director shall review the application of this exclusion on a periodic basis, not to exceed 15 years.
3. Remedial groundwater that is consistent with the management goal according to the requirements of R12-15-729.

H. An applicant for a certificate of assured water supply for a dry lot subdivision of 20 lots or fewer is exempt from the requirements of this Section.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by final rulemaking at 13 A.A.R. 1394, effective October 1, 2007 (Supp. 07-2). Amended by final rulemaking at 24 A.A.R. 3578, effective January 1, 2019 (Supp. 18-4). At the request of the Department R12-15-722(A)(2) through (5) have been removed since they were not part of the amendments made to this Section in Supp. 18-4; subsections R12-15-722(A)(2) through (3) as amended at 13 A.A.R. 1394 have been restored (Supp. 19-2).

R12-15-723. Extinguishment Credits

A. Except as provided in subsection (D), the owner of a grandfathered right may extinguish the right in exchange for extinguishment credits by submitting the following:
1. A notarized statement of extinguishment of a grandfathered right on a form provided by the Director;
2. The grandfathered right number;
3. If the right being extinguished is a Type 1 non-irrigation grandfathered right or an irrigation grandfathered right, evidence of ownership of the land to which the grandfathered right is appurtenant;
4. If the grandfathered right is located in the Prescott AMA, evidence that all of the following conditions are met:
   a. The land to which the right is appurtenant has not been and will not be subdivided pursuant to a preliminary plat or a final plat that was approved by a city, town, or county before August 21, 1998; and
   b. The land to which the right is appurtenant is not and will not be the location of a subdivision for which a complete and correct application for a certificate of assured water supply was submitted to the Director before August 21, 1998;
5. If the right being extinguished is an irrigation grandfathered right, evidence that the development of the land to which the right is appurtenant is not completed; and
6. Any additional information the Director may reasonably require to process the extinguishment.

B. The Director shall calculate the amount of extinguishment credits pursuant to R12-15-724(B), R12-15-725(B), R12-15-726(B) or R12-15-727(B). The Director shall notify the owner of the amount of extinguishment credits in writing. If the owner is extinguishing only a portion of the right, the Director shall issue a new certificate of grandfathered right for the remainder of the right.

C. A Type 1 non-irrigation grandfathered right or an irrigation grandfathered right may be extinguished in whole or in part. A Type 2 non-irrigation grandfathered right may be extinguished only in whole.

D. The following rights may not be extinguished in exchange for extinguishment credits:
1. An irrigation grandfathered right that is appurtenant to land that has been physically developed for a non-irrigation use. The Director shall not consider the land to be physically developed until the development is completed.
2. A Type 1 non-irrigation grandfathered right, if the Director determines that the holder is likely to continue to receive groundwater from an undesignated municipal provider for the same use pursuant to the provider's service area right or pursuant to a groundwater withdrawal permit.
3. A Type 2 non-irrigation grandfathered right that was issued based on the withdrawal of groundwater for mineral extraction or processing or for the generation of electrical energy.
4. On or after January 1, 2025, any grandfathered right that is in the Phoenix, Prescott, or Tucson AMAs.
5. A Type 1 non-irrigation grandfathered right that was requested to be included by a city or town in the Tucson AMA in the determination made under A.R.S. § 45-463(F).

E. The owner of extinguishment credits may pledge the credits to a certificate or to a designation before the certificate or designation is issued by submitting with the application for the certificate or designation a notice of intent to pledge extinguishment credits on a form provided by the Director. The extinguishment credits shall be pledged to the certificate or designation upon issuance of the certificate or designation.

F. The owner of extinguishment credits may pledge the credits to a certificate or to a designation after the certificate or designation is issued by submitting a notice of intent to pledge extinguishment credits on a form provided by the Director. The Director shall notify the owner of the extinguishment credits and the certificate holder or designated provider that the credits have been pledged to the certificate or designation.

G. Extinguishment credits that have not been pledged to a certificate or designation may be conveyed within the same AMA. Extinguishment credits pledged to a certificate or designation shall not be conveyed to another person, except that:
1. If extinguishment credits are pledged to a certificate that is later assigned or reissued, any unused credits are transferred, by operation of this subsection, to the assigned or reissued certificate. If the certificate is partially assigned or reissued, a pro rata share of the unused extinguishment credits is transferred to each assigned or reissued certificate according to the estimated water demand.
2. If extinguishment credits are pledged to a certificate for a subdivision that is later served by a designated provider or a municipal provider that is applying for a designation, any unused extinguishment credits may be used to support the municipal provider's designation as long as the municipal provider serves the subdivision and remains designated. If the municipal provider is no longer serving the subdivision or if the municipal provider loses its designated status, any unused extinguishment credits shall revert, by operation of this subsection, to the certificate to which they were originally pledged.

H. The Director shall review a statement of extinguishment of a grandfathered right and a notice of intent to pledge extinguishment credits pursuant to the licensing time-frame provisions in R12-15-401.

I. A person may apply to the Director on or before December 31, 2015 for the restoration of all or a portion of an irrigation grandfathered right extinguished under this Section during calendar year 2005, 2006 or 2007 if all of the following conditions are met:
1. The person owns the land to which the right or portion of the right was appurtenant;
2. The land to which the right or portion of the right was appurtenant is physically capable of being irrigated and the infrastructure for delivering water to the land for irrigation purposes remains intact and is operable;

3. The person holds extinguishment credits that were issued for the extinguishment of a grandfathered right in the AMA in which the land is located and that have not been pledged to a certificate or designation under subsection (E) or (F) in the following amount, as applicable:
   a. If the person seeks to restore the entire irrigation grandfathered right, an amount of extinguishment credits equal to the amount of extinguishment credits issued by the Director in exchange for extinguishment of the irrigation grandfathered right; or
   b. If the person seeks to restore a portion of the irrigation grandfathered right, an amount of extinguishment credits equal to the result obtained by multiplying the percentage of the right sought to be restored by the amount of extinguishment credits issued by the Director in exchange for the extinguishment of the right.

J. An application to restore all or a portion of an irrigation grandfathered right under subsection (I) shall be on a form provided by the Director and include all of the following:
1. A fee of $250.00;
2. The irrigation grandfathered right number of the right sought to be restored;
3. If a certificate of extinguishment credits was issued by the Director for the extinguishment credits described in subsection (I)(3), the original certificate or an affidavit stating that the certificate is lost;
4. A copy of a deed showing that the applicant owns the land to which the right or portion of the right sought to be restored was appurtenant and, if the application seeks to restore only a portion of the right, the legal description of the land to which that portion of the right was appurtenant;
5. A certification by the applicant that the conditions described in subsection (I) are met; and
6. An agreement in writing that if the right or portion of the right is restored, the flexibility account for the land to which the right or portion of the right is appurtenant shall have an account balance of zero at the beginning of the calendar year in which the right or portion of the right is restored and that any credits registered to the flexibility account after the right is restored may not be conveyed or sold to any person, including the applicant.

K. The Director shall approve an application to restore all or a portion of an irrigation grandfathered right submitted under subsection (I) if the application includes the fee and the information required under subsection (J) and the Director determines that the information is correct. If the Director approves an application to restore all or a portion of an irrigation grandfathered right, all of the following apply:
1. The irrigation water duty for the land to which the right or portion of the right is restored shall be the same as it was when the right was extinguished, unless the irrigation water duty is changed in a management plan adopted after the right was extinguished or is modified pursuant to A.R.S. § 45-575;
2. The flexibility account for the land to which the right or portion of the right is appurtenant shall have an account balance of zero at the beginning of the calendar year in which the right or portion of the right is restored and any credits registered to the flexibility account after the right is restored may not be conveyed or sold to any person, including the applicant.
3. The applicant shall forfeit the extinguishment credits described in subsection (I)(3); and
4. The restored irrigation grandfathered right may be extinguished in exchange for extinguishment credits under this Section. For purposes of calculating the amount of extinguishment credits under R12-15-724(B), R12-15-725(B), R12-15-726(B) or R12-15-727(B), the calendar year of extinguishment is the calendar year in which the restored irrigation grandfathered right is extinguished.

L. The Director shall review an application to restore an irrigation grandfathered right under subsection (I) pursuant to the licensing time-frame provisions in R12-15-401. The application shall have an administrative completeness review time-frame of 30 days, a substantive review time-frame of 90 days, and an overall time-frame of 120 days.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Amended by final rulemaking at 13 A.A.R. 1394, effective October 1, 2007 (Supp. 07-2). Amended by final rulemaking at 17 A.A.R. 1989, effective September 13, 2011 (Supp. 11-3). Amended by final rulemaking at 24 A.A.R. 3578, effective January 1, 2019 (Supp. 18-4).

R12-15-724. Phoenix AMA Calculation of Groundwater Allowance and Extinguishment Credits

A. The Director shall calculate the groundwater allowance for a certificate or designation in the Phoenix AMA as follows:
1. If the application is for a certificate, multiply the applicable allocation factor in the table below by the annual estimated water demand for the proposed subdivision.

MANAGEMENT PERIOD	ALLOCATION FACTOR
Third	4
Fourth	2
Fifth	1

After Fifth	0

2. If the application is for a designation and the applicant provided water to its customers prior to February 7, 1995, multiply 7.5 by the total volume of water provided by the applicant to its customers from any source during calendar year 1994, consistent with the municipal conservation requirements established for the applicant pursuant to Section 5-103(A)(1) of the Second Management Plan for the Phoenix AMA.
3. If the application is for a designation and the applicant commenced providing water to its customers on or after February 7, 1995, the applicant's groundwater allowance is zero acre-feet.
4. For each calendar year of a designation, the Director shall calculate the volume of incidental recharge for a designated provider within the Phoenix AMA and add that volume to the designated provider's groundwater allowance. The Director shall calculate the volume of incidental recharge by multiplying the provider's total water use from any source in the previous calendar year by the standard incidental recharge factor of 4%. A designated provider may apply for a variance from the standard incidental recharge factor as provided in A.R.S. § 45-566.01(E)(1). The Director may establish a different incidental recharge factor for the designated provider if the provider demonstrates to the satisfaction of the Director that the ratio of the average annual amount of incidental recharge expected to be attributable to the provider during the management period, to the average amount of water expected to be withdrawn, diverted, or received for delivery by the provider for use within its service area during the management period, is different than 4%.

B. The Director shall calculate the extinguishment credits for the extinguishment of a grandfathered right in the Phoenix AMA as follows:
1. For the extinguishment of a type 2 non-irrigation grandfathered right, multiply the number of acre-feet indicated on the certificate by the difference between 2025 and the calendar year of extinguishment.
2. For the extinguishment of all or part of an irrigation grandfathered right, or all or part of a type 1 non-irrigation grandfathered right, multiply 1.5 acre-feet per acre by the number of irrigation acres associated with the extinguished irrigation grandfathered right or the number of acres to which the extinguished type 1 non-irrigation grandfathered right is appurtenant, and then multiply the product by the difference between 2025 and the calendar year of extinguishment, except that:
   a. If only a portion of an irrigation grandfathered right or a type 1 non-irrigation grandfathered right is extinguished, the Director shall include in the calculation only those acres associated with the portion of the right that is extinguished; and
   b. If an extinguished irrigation grandfathered right has a debit balance in the corresponding flexibility account established under A.R.S. § 45-467, the Director shall subtract the amount of the debit from the amount of the extinguishment.

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3).

R12-15-725. Pinal AMA Calculation of Groundwater Allowance and Extinguishment Credits

A. The Director shall calculate the groundwater allowance for a certificate or designation in the Pinal AMA as follows:
1. If the application is for a certificate:
   a. If the certificate application is filed before January 1, 2019, multiply the annual estimated water demand for the proposed subdivision by 10.
   b. If the certificate application is filed on or after January 1, 2019, the groundwater allowance shall be zero.
2. If the application is for a designation:
   a. If the applicant was designated as having an assured water supply as of October 1, 2007:
      i. Multiply the applicant's service area population as of October 1, 2007 by 125 gallons per capita per day and multiply the product by 365 days. The service area population shall be determined using the methodology set forth in Section 5-103(D) of the Third Management Plan for the Pinal AMA.
      ii. Convert the number of gallons determined in subsection (A)(2)(a)(i) into acre-feet by dividing the number by 325,851 gallons.
      iii. Determine the number of residential lots within plats that were recorded as of October 1, 2007 but not served water as of that date, and to which the applicant commenced water service by January 1, 2010.
      iv. Multiply the number of lots determined in subsection (A)(2)(a)(iii) by 0.35 acre-foot per lot.
      v. Add the volume from subsection (A)(2)(a)(ii) and the volume from subsection (A)(2)(a)(iv) of this Section.
   b. If the applicant provided water to its customers before October 1, 2007 but was not designated as having an assured water supply as of that date, and a complete and correct application for designation was filed before January 1, 2012, multiply the applicant's service area population as of October 1, 2007 by 125 gallons per capita per day and multiply the product by 365

days. The service area population shall be determined using the methodology in Section 5-103(D) of the Third Management Plan for the Pinal AMA.

c. If the applicant provided water to its customers before October 1, 2007 but was not designated as having an assured water supply as of that date, and a complete and correct application for designation was filed on or after January 1, 2012, the applicant's groundwater allowance is zero acre-feet.

d. If the applicant commenced providing water to its customers on or after October 1, 2007, the applicant's groundwater allowance is zero acre-feet.

3. For each calendar year of a designation, the Director shall calculate the volume of incidental recharge for a designated provider within the Pinal AMA and add that volume to the designated provider's groundwater allowance. The Director shall calculate the volume of incidental recharge by multiplying the provider's total water use from any source in the previous calendar year by the standard incidental recharge factor of 4%. A designated provider may apply for a variance from the standard incidental recharge factor by submitting a hydrologic study demonstrating, to the satisfaction of the Director, that the ratio of the average annual amount of incidental recharge expected to be attributable to the designated provider during the management period to the average annual amount of water expected to be withdrawn, diverted or received for delivery by the designated provider for use within its service area during the management period is different than 4%. The hydrologic study shall include the amount of water withdrawn, diverted or received for delivery by the designated provider for use within its service area during each of the preceding five years and the amount of incidental recharge that was attributable to the designated provider during each of those years. The Director may establish a different incidental recharge factor for the designated provider upon such demonstration.

B. The Director shall calculate the extinguishment credits for extinguishing a grandfathered right in the Pinal AMA as follows.

1. The Director shall calculate the initial volume of extinguishment credits for the extinguishment of a grandfathered right in the Pinal AMA as follows:

a. For the extinguishment of a type 2 non-irrigation grandfathered right, multiply the number of acre-feet indicated on the certificate of grandfathered right by 100.

b. For the extinguishment of all or part of an irrigation grandfathered right, or all or part of a type 1 non-irrigation grandfathered right, multiply 1.5 acre-feet by the number of irrigation acres associated with the extinguished irrigation grandfathered right or the number of acres to which the extinguished type 1 non-irrigation grandfathered right is appurtenant, and then multiply that product by 100, except that:

i. If only a portion of an irrigation grandfathered right or a type 1 non-irrigation grandfathered right is extinguished, only those acres associated with the portion of the right that is extinguished shall be included in the calculation; and

ii. If an extinguished irrigation grandfathered right has a debit balance in the corresponding flexibility account established under A.R.S. § 45-467, the amount of the debit shall be subtracted from the amount of the extinguishment credits.

2. For grandfathered rights extinguished in the Pinal active management area on or after January 1, 2019, if the amount of the extinguishment credits remaining unused in the fifth, tenth, fifteenth, and twentieth year after the year of extinguishment is greater than an amount calculated by multiplying the initial volume of extinguishment credits by the applicable percentage shown in the table below, the amount of unused credits shall be reduced to an amount calculated by multiplying the initial volume of extinguishment credits by the applicable percentage:

Year After Extinguishment	Percentage
Fifth	75%
Tenth	50%
Fifteenth	25%
Twentieth	0%

3. For purposes of subsection (B)(2), the amount of extinguishment credits remaining unused shall be the initial volume of extinguishment credits issued for the extinguishment of the right, less:

a. The amount of any of the extinguishment credits previously pledged to a certificate of assured water supply or designation of assured water supply pursuant to R12-15-723, subsections (E) or (F) and reported to the Department as having been used; and

b. The amount of any previous reductions made to the extinguishment credits pursuant to subsection (B)(2).

Historical Note

Adopted effective February 7, 1995 (Supp. 95-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 3475, effective September 12, 2006 (Supp. 06-3). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1394, effective October 1, 2007 (Supp. 07-2). Amended by final rulemaking at 15 A.A.R. 1979, effective January 2, 2010 (Supp. 09-4). Amended by final rulemaking at 19 A.A.R. 4174, effective December 3, 2013 (Supp. 13-4). Amended by final rulemaking at 24 A.A.R. 3578, effective January 1, 2019 (Supp. 18-4).

R12-15-725.01. Repealed

Historical Note

New Section made by final rulemaking at 19 A.A.R. 4174, effective December 3, 2013; with automatic repeal date of September 15, 2014 (Supp. 13-4). Section amended with automatic repeal, removed by final rulemaking at 20 A.A.R. 2673; effective September 12, 2014 (Supp. 14-3). Repealed by final rulemaking at 24 A.A.R. 3578, effective January 1, 2019 (Supp. 18-4).

R12-15-725.02. Repealed

Historical Note

New Section made by final rulemaking at 19 A.A.R. 4174, effective September 15, 2014 (Supp. 13-4). Repealed by final rulemaking at 20 A.A.R. 2673, effective September 12, 2014 (Supp. 14-3).

R12-15-726. Prescott AMA Calculation of Groundwater Allowance and Extinguishment Credits

A. The Director shall calculate the groundwater allowance for a certificate or designation in the Prescott AMA as follows:
1. If the application is for a certificate of assured water supply, the Director shall:
   a. Subtract the year of application from 2025,
   b. Multiply the number determined in subsection (A)(1)(a) by the applicant's annual estimated water demand, and
   c. Divide that product by two. The minimum volume that may be calculated in this subsection is zero acre-feet.
2. If the application is for a designation of assured water supply:
   a. Except as provided in subsections (A)(3) and (A)(5), if the applicant was in existence as of January 12, 1999, and the application is filed before calendar year 2026, the Director shall:
      i. Multiply by 100 the largest volume of groundwater determined by the Director to have been withdrawn by the applicant from within the Prescott AMA for use within the applicant's service area in any calendar year from 1995 through 1998, consistent with the municipal conservation requirements applicable under the second management plan for the Prescott active management area;
      ii. Determine the volume of the applicant's total water demand, from any source, for 1999, consistent with the municipal conservation requirements established for the applicant in the management plan in effect on the date of application;
      iii. Determine the volume of the applicant's total water demand, from any source, for 2014, consistent with the municipal conservation requirements established for the applicant in the management plan in effect on the date of application;
      iv. Subtract the volume calculated in subsection (A)(2)(a)(ii) from the volume calculated in subsection (A)(2)(a)(iii) and then multiply the difference by 26;
      v. Divide the product obtained in subsection (A)(2)(a)(iv) by two;
      vi. If any residential groundwater uses, including residential groundwater uses served by an exempt well, in existence on August 21, 1998, have been replaced by permanent water service from the applicant after August 21, 1998, multiply one-half acre-foot of groundwater by the number of housing units receiving the service and then multiply that product by 100;
      vii. Determine the volume of groundwater withdrawn by the applicant from within the Prescott active management area during the period beginning January 1, 1999, and ending December 31 of the calendar year before the date of the application;
      viii. Multiply the volume of groundwater withdrawn by the applicant from within the Prescott active management area in 1999 by the number of calendar years in the period beginning with 1999 and ending with the calendar year before the date of application;
      ix. Subtract from the volume calculated in subsection (A)(2)(a)(vii) the volume calculated in subsection (A)(2)(a)(viii). The volume calculated in this subsection shall not be less than zero; and
      x. Add the volumes calculated in subsections (A)(2)(a)(i), (A)(2)(a)(v), and (A)(2)(a)(vi), and then subtract from the sum the volume calculated in subsection (A)(2)(a)(ix).
   b. If the applicant did not exist as of January 12, 1999, or the date of application occurs after calendar year 2025, the groundwater allowance is zero acre-feet, except that if any residential groundwater uses, including residential groundwater uses served by an exempt well, in existence on August 21, 1998, have been replaced by permanent water service from the applicant after August 21, 1998, the groundwater allowance is a volume of groundwater computed by multiplying one-half acre-foot of groundwater by the number of housing units receiving the service and multiplying that product by 100.
3. For the purpose of determining the groundwater allowance under subsection (A)(2)(a), at the request of the applicant, the Director shall replace the volume of groundwater calculated in subsection (A)(2)(a)(ii) through (v) with the amount of groundwater necessary for the applicant to serve the residential lots described in subsection (A)(4):
   a. To compute this amount of groundwater, the Director shall:
      i. Determine the average dwelling occupancy within the applicant's service area and multiply that average occupancy by an amount of groundwater, calculated by multiplying 150 gallons per capita per day by 365 days; and

45-105. Powers and duties of director

A. The director may:

1. Formulate plans and develop programs for the practical and economical development, management, conservation and use of surface water, groundwater and the watersheds in this state, including the management of water quantity and quality.

2. Investigate works, plans or proposals pertaining to surface water and groundwater, including management of watersheds, and acquire, preserve, publish and disseminate related information the director deems advisable.

3. Collect and investigate information on and prepare and devise means and plans for the development, conservation and use of all waterways, watersheds, surface water, groundwater and groundwater basins in this state and of all related matters and subjects, including irrigation, drainage, water quality maintenance, regulation of flow, diversion of running streams adapted for development in cooperating with the United States or by this state independently, flood control, use of water power, prevention of soil waste and storage, conservation and development of water for every useful purpose.

4. Measure, survey and investigate the water resources of this state and their potential development and cooperate and contract with agencies of the United States for such purposes.

5. Acquire, hold and dispose of property, including land, rights-of-way, water and water rights, as necessary or convenient for the performance of the groundwater and water quality management functions of the department.

6. Acquire, other than by condemnation, construct, improve, maintain and operate early warning systems for flood control purposes and works for the recovery, storage, treatment and delivery of water.

7. Accept grants, gifts or donations of money or other property from any source, which may be used for any purpose consistent with this title. All property acquired by the director is public property and is subject to the same tax exemptions, rights and privileges granted to municipalities, public agencies and other public entities.

8. Enter into an interagency contract or agreement with any public agency pursuant to title 11, chapter 7, article 3 and contract, act jointly or cooperate with any person to carry out the purposes of this title.

9. Prosecute and defend all rights, claims and privileges of this state respecting interstate streams.

10. Initiate and participate in conferences, conventions or hearings, including congressional hearings, court hearings or hearings of other competent judicial or quasi-judicial departments, agencies or organizations, and negotiate and cooperate with agencies of the United States or of any state or government and represent this state concerning matters within the department's jurisdiction.

11. Apply for and hold permits and licenses from the United States or any agency of the United States for reservoirs, dam sites and rights-of-way.

12. Receive and review all reports, proposed contracts and agreements from and with the United States or any agencies, other states or governments or their representatives and recommend to the governor and the legislature action to be taken on such reports, proposed contracts and agreements. The director shall take action on such reports, if authorized by law, and review and coordinate the preparation of formal comments of this state on both the preliminary and final reports relating to water resource development of the United States army corps of engineers, the United States secretary of the interior and the United States secretary of agriculture, as provided for in the flood control act of 1944 (58 Stat. 887; 33 United States Code section 701-1).

13. Contract with any person for imported water or for the acquisition of water rights or rights to withdraw, divert or use surface water or groundwater as necessary for the performance of the groundwater management functions of the director prescribed by chapter 2 of this title. If water becomes available under any contract

executed under this paragraph, the director may contract with any person for its delivery or exchange for any other water available.

14. Recommend to the administrative heads of agencies, boards and commissions of this state, and political subdivisions of this state, rules to promote and protect the rights and interests of this state and its inhabitants in any matter relating to the surface water and groundwater in this state.

15. Conduct feasibility studies and remedial investigations relating to groundwater quality and enter into contracts and cooperative agreements under section 104 of the comprehensive environmental response, compensation, and liability act of 1980 (P.L. 96-510) to conduct such studies and investigations.

16. Dispose informally by stipulation, agreed settlement, consent order or alternative means of dispute resolution, including arbitration, if the parties and director agree, or by default of any case in which a hearing before the director is required or allowed by law.

17. Cooperate and coordinate with the appropriate governmental entities in Mexico regarding water planning in areas near the border between Mexico and Arizona and for the exchange of relevant hydrological information.

B. The director shall:

1. Exercise and perform all powers and duties vested in or imposed on the department and adopt and issue rules necessary to carry out the purposes of this title.

2. Administer all laws relating to groundwater, as provided in this title.

3. Be responsible for the supervision and control of reservoirs and dams of this state and, when deemed necessary, conduct investigations to determine whether the existing or anticipated condition of any dam or reservoir in this state is or may become a menace to life and property.

4. Coordinate and confer with and may contract with:

(a) The Arizona power authority, the game and fish commission, the state land department, the Arizona outdoor recreation coordinating commission, the Arizona commerce authority, the department of health services, active management area water authorities or districts and political subdivisions of this state with respect to matters within their jurisdiction relating to surface water and groundwater and the development of state water plans.

(b) The department of environmental quality with respect to title 49, chapter 2 for its assistance in the development of state water plans.

(c) The department of environmental quality regarding water plans, water resource planning, water management, wells, water rights and permits, and other appropriate provisions of this title pertaining to remedial investigations, feasibility studies, site prioritization, selection of remedies and implementation of the water quality assurance revolving fund program pursuant to title 49, chapter 2, article 5.

(d) The department of environmental quality regarding coordination of databases that are necessary for activities conducted pursuant to title 49, chapter 2, article 5.

5. Cooperate with the Arizona power authority in the performance of the duties and functions of the authority.

6. Maintain a permanent public depository for existing and future records of stream flow, groundwater levels and water quality and other data relating to surface water and groundwater.

7. Maintain a public docket of all matters before the department that may be subject to judicial review pursuant to this title.

8. Investigate and take appropriate action on any complaints alleging withdrawals, diversions, impoundments or uses of surface water or groundwater that may violate this title or the rules adopted pursuant to this title.

9. Adopt an official seal for the authentication of records, orders, rules and other official documents and actions.

10. Provide staff support to the Arizona water protection fund commission established by chapter 12 of this title.

11. Exercise and perform all powers and duties invested in the chairperson of the Arizona water banking authority commission as prescribed by chapter 14 of this title.

12. Provide staff support to the Arizona water banking authority established by chapter 14 of this title.

13. In the year following each regular general election, present information to the committees with jurisdiction over water issues in the house of representatives and the senate. A written report is not required but the presentation shall include information concerning the following:

(a) The current status of the water supply in this state and any likely changes in that status.

(b) Issues of regional and local drought effects, short-term and long-term drought management efforts and the adequacy of drought preparation throughout the state.

(c) The status of current water conservation programs in this state.

(d) The current state of each active management area and the level of progress toward management goals in each active management area.

(e) Issues affecting management of the Colorado river and the reliability of this state's two million eight hundred thousand acre-foot allocation of Colorado river water, including the status of water supplies in and issues related to the Colorado river basin states and Mexico.

(f) The status of any pending or likely litigation regarding surface water adjudications or other water-related litigation and the potential impacts on this state's water supplies.

(g) The status of Indian water rights settlements and related negotiations that affect this state.

(h) Other matters related to the reliability of this state's water supplies, the responsibilities of the department and the adequacy of the department's and other entities' resources to meet this state's water management needs.

14. Not later than December 1, 2023 and on or before December 1 of each year thereafter, prepare and issue a water supply and demand assessment for at least six of the fifty-one groundwater basins established pursuant to section 45-403. The director shall ensure that a water supply and demand assessment is completed for all groundwater basins and initial active management areas at least once every five years. The director may contract with outside entities to perform some or all of the assessments and those outside entities shall be identified in the assessment.

45-576. Certificate of assured water supply; designated cities, towns and private water companies; exemptions; definition

A. Except as provided in subsections G and J of this section, a person who proposes to offer subdivided lands, as defined in section 32-2101, for sale or lease in an active management area shall apply for and obtain a certificate of assured water supply from the director before presenting the plat for approval to the city, town or county in which the land is located, where such is required, and before filing with the state real estate commissioner a notice of intention to offer such lands for sale or lease, pursuant to section 32-2181, unless the subdivider has obtained a written commitment of water service for the subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section.

B. Except as provided in subsections G and J of this section, a city, town or county may approve a subdivision plat only if the subdivider has obtained a certificate of assured water supply from the director or the subdivider has obtained a written commitment of water service for the subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section. The city, town or county shall note on the face of the approved plat that a certificate of assured water supply has been submitted with the plat or that the subdivider has obtained a written commitment of water service for the proposed subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section.

C. Except as provided in subsections G and J of this section, the state real estate commissioner may issue a public report authorizing the sale or lease of subdivided lands only on compliance with either of the following:

1. The subdivider, owner or agent has paid any activation fee required under section 48-3772, subsection A, paragraph 7 and any replenishment reserve fee required under section 48-3774.01, subsection A, paragraph 2 and has obtained a certificate of assured water supply from the director.

2. The subdivider has obtained a written commitment of water service for the lands from a city, town or private water company designated as having an assured water supply pursuant to this section and the subdivider, owner or agent has paid any activation fee required under section 48-3772, subsection A, paragraph 7.

D. The director shall designate private water companies in active management areas that have an assured water supply. If a city or town acquires a private water company that has contracted for central Arizona project water, the city or town shall assume the private water company's contract for central Arizona project water.

E. The director shall designate cities and towns in active management areas where an assured water supply exists. If a city or town has entered into a contract for central Arizona project water, the city or town is deemed to continue to have an assured water supply until December 31, 1997. Commencing on January 1, 1998, the determination that the city or town has an assured water supply is subject to review by the director and the director may determine that a city or town does not have an assured water supply.

F. The director shall notify the mayors of all cities and towns in active management areas and the chairmen of the boards of supervisors of counties in which active management areas are located of the cities, towns and private water companies designated as having an assured water supply and any modification of that designation within thirty days of the designation or modification. If the service area of the city, town or private water company has qualified as a member service area pursuant to title 48, chapter 22, article 4, the director shall also notify the conservation district of the designation or modification and shall report the projected average annual replenishment obligation for the member service area based on the projected and committed average annual demand for water within the service area during the effective term of the designation or modification subject to any limitation in an agreement between the conservation district and the city, town or private water company. For each city, town or private water company that qualified as a member service area under title 48, chapter 22 and was designated as having an assured water supply before January 1, 2004, the director shall report to the conservation district on or before January 1, 2005 the projected average annual replenishment obligation based on the projected and committed average annual demand for water within the service area during the effective term of the designation subject to any limitation in an agreement between the conservation district and the city,

town or private water company. Persons proposing to offer subdivided lands served by those designated cities, towns and private water companies for sale or lease are exempt from applying for and obtaining a certificate of assured water supply.

G. This section does not apply in the case of the sale of lands for developments that are subject to a mineral extraction and processing permit or an industrial use permit pursuant to sections 45-514 and 45-515.

H. The director shall adopt rules to carry out the purposes of this section. On or before January 1, 2008, the rules shall provide for a reduction in water demand for an application for a designation of assured water supply or a certificate of assured water supply if a gray water reuse system will be installed that meets the requirements of the rules adopted by the department of environmental quality for gray water systems and if the application is for a certificate of assured water supply, the land for which the certificate is sought must qualify as a member land in a conservation district pursuant to title 48, chapter 22, article 4. For the purposes of this subsection, "gray water" has the same meaning prescribed in section 49-201.

I. If the director designates a municipal provider as having an assured water supply under this section and the designation lapses or otherwise terminates while the municipal provider's service area is a member service area of a conservation district, the municipal provider or its successor shall continue to comply with the consistency with management goal requirements in the rules adopted by the director under subsection H of this section as if the designation was still in effect with respect to the municipal provider's designation uses. When determining compliance by the municipal provider or its successor with the consistency with management goal requirements in the rules, the director shall consider only water delivered by the municipal provider or its successor to the municipal provider's designation uses. A person is the successor of a municipal provider if the person commences water service to uses that were previously designation uses of the municipal provider. Any groundwater delivered by the municipal provider or its successor to the municipal provider's designation uses in excess of the amount allowed under the consistency with management goal requirements in the rules shall be considered excess groundwater for purposes of title 48, chapter 22. For the purposes of this subsection, "designation uses" means all water uses served by a municipal provider on the date the municipal provider's designation of assured water supply lapses or otherwise terminates and all recorded lots within the municipal provider's service area that were not being served by the municipal provider on that date but that received final plat approval from a city, town or county on or before that date. Designation uses do not include industrial uses served by an irrigation district under section 45-497.

J. Subsections A, B and C of this section do not apply to a person who proposes to offer subdivided land for sale or lease in an active management area if all the following apply:

1. The director issued a certificate of assured water supply for the land to a previous owner of the land and the certificate was classified as a type A certificate under rules adopted by the director pursuant to subsection H of this section.

2. The director has not revoked the certificate of assured water supply described in paragraph 1 of this subsection, and proceedings to revoke the certificate are not pending before the department or a court. The department shall post on its website a list of all certificates of assured water supply that have been revoked or for which proceedings are pending before the department or a court.

3. The plat submitted to the department in the application for the certificate of assured water supply described in paragraph 1 of this subsection has not changed.

4. Water service is currently available to each lot within the subdivided land and the water provider listed on the certificate of assured water supply described in paragraph 1 of this subsection has not changed.

5. The subdivided land qualifies as a member land under title 48, chapter 22 and the subdivider has paid any activation fee required under section 48-3772, subsection A, paragraph 7 and any replenishment reserve fee required under section 48-3774.01, subsection A, paragraph 2.

6. The plat is submitted for approval to a city, town or county that is listed on the department's website as a qualified platting authority.

K. Subsection J of this section does not affect the assignment of a certificate of assured water supply as prescribed by section 45-579.

L. On or before December 31, 2023, the director shall study and submit to the governor, president of the senate and speaker of the house of representatives a report on whether and how a person that seeks a building permit for six or more residences within an active management area, without regard to any proposed lease term for those residences, should apply for and obtain a certificate of assured water supply from the director before presenting the permit application for approval to the county in which the land is located, unless the applicant has obtained a written commitment of water service for the residences from a city, town or private water company designated as having an assured water supply pursuant to this section.

M. For the purposes of this section, "assured water supply" means all of the following:

1. Sufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years. Beginning January 1 of the calendar year following the year in which a groundwater replenishment district is required to submit its preliminary plan pursuant to section 45-576.02, subsection A, paragraph 1, with respect to an applicant that is a member of the district, "sufficient groundwater" for the purposes of this paragraph means that the proposed groundwater withdrawals that the applicant will cause over a period of one hundred years will be of adequate quality and will not exceed, in combination with other withdrawals from land in the replenishment district, a depth to water of one thousand feet or the depth of the bottom of the aquifer, whichever is less. In determining depth to water for the purposes of this paragraph, the director shall consider the combination of:

(a) The existing rate of decline.

(b) The proposed withdrawals.

(c) The expected water requirements of all recorded lots that are not yet served water and that are located in the service area of a municipal provider.

2. The projected groundwater use is consistent with the management plan and achievement of the management goal for the active management area.

3. The financial capability has been demonstrated to construct the water facilities necessary to make the supply of water available for the proposed use, including a delivery system and any storage facilities or treatment works. The director may accept evidence of the construction assurances required by section 9-463.01, 11-823 or 32-2181 to satisfy this requirement.

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

DAVID Hovey Jr.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Dear Chair and Council Members:

RE: RMG HEARTLAND 81, L.L.C. Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Dear Chair and Council Members:

RE: RMG RESIDENTIAL 2010, LP Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

RE: Comments pertaining to ADAWS and Commingling Rules (File Number R24-156) submitted to the Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council:

We continue to extend our sincere thanks to the Governor's Council for its review and working with the interested parties to develop the Alternative Designation of Assured Water Supply ("ADAWS"). ADAWS will assist to create a sustainable water supply in the Pinal AMA benefiting all parts our economy within Pinal County.

We support the ADAWS and Commingling rules package submitted by ADWR on October 7, 2024.

Again, thank you to the Governor's Office for all its efforts in achieving this long-term resolution for sustainable water management and economic growth. We look forward to your support in approving these essential new rules.

Sincerely,

Tom Tait,
Landowner

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Council Members,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS rules package submitted by ADWR on October 7th, 2024 and provide a "real world" example of a community that will be helped by the implementation of these proposed rules.

I'm writing this letter in my capacity as the President of Communities Southwest, an Arizona based Master Planned Community Developer with over 40 years of experience, during which time, we have acquired, entitled, developed, and/or sold more than 40,000 single-family residential homesites in over 45 land and community development projects, 5 retail development projects, and 2 golf courses.

An essential component of our work to prepare a piece of land for community development is to work with ADWR to comply with the important rules established through the Assured Water Supply Program ("AWS") to ensure that our future community residents have a clean, reliable and long-lasting water source. A prime example of this type of work is demonstrated through our 1,800-acre Villago Master Planned Community in the City of Casa Grande; one of our most beautiful and successful communities. This community began its life in 2006, with the development of 999 single family residential lots and a vibrant grocery anchored retail shopping center, along with tens of millions of dollars in backbone utility, street, park and common area infrastructure, meant not only to serve that initial phase of the project but also future phases. At that time, a groundwater source

for the community was studied and established through the AWS, in consultation with ADWR, and the project was granted an "Analysis of Assured Water Supply" by ADWR. This "Analysis" is still active and in place today. After a long delay in project development caused by the Great Financial Crisis, we attempted to restart development of the project but were halted by ADWR's creation and release of a revised groundwater model that indicated that there were "unmet" municipal and AWS groundwater demands with the broader Pinal AMA. This new model effectively halted the development of new subdivisions within the Pinal AMA area, except within concentrated areas where existing Designated Water Providers already existed.

Unfortunately, Villago, like the vast majority of other property within the Pinal AMA, fell within an area without a designated provider service area. Existing ADWR rules make it all but impossible for existing, non-designated water providers, like Arizona Water Company in our case, to become designated. Realizing that the designation process creates the best and most reliable scenario for ensuring that communities have the promised 100-year water supply and that the existing rules were preventing service providers like Arizona Water Company from becoming designated, ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. I fully support these new rules and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County and will allow us to restart the development of Villago. Providing much needed housing within a beautiful, active and existing Master Planned Community in close proximity to the significant job and business growth that is occurring in Casa Grande.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

COMMUNITIES SOUTHWEST Inc.

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 21st, 2024

Dear Members of the Governor's Regulatory Review Council,

As the Mayor of the City of Casa Grande, I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

CITY OF CASA GRANDE | STRONGER UNITED
510 E. Florence Blvd., Casa Grande, Arizona 85122
(520) 421-8600 | www.CasaGrandeAZ.gov

As for the City of Casa Grande, the assured water supply rules are paramount in creating and maintaining a sustainable economy. The new rules directly address the projected shortfall in groundwater. If adopted, we will once again be able to approve new workforce housing, hopefully in time to prevent the further escalation of housing costs. Additionally, the importance of effluent in providing water security to all residents of Casa Grande, we prepared to use our effluent to recharge the aquifer beneath our City to replace groundwater used by existing residences and businesses and provide an additional renewable water resource within the aquifer for future growth.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed affordable housing, as I noted above. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Craig H. McFarland

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7, 2024.

Dear Chair and Council Members,

The City of Casa Grande appreciates the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

As the City Manager of the City of Casa Grande, I am writing to express my support for the ADWAS and Commingling rules package submitted by ADWR on October 7, 2024.

The Arizona Department of Water Resources (ADWR) team have worked tirelessly with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. The City of Casa Grande, along with other municipal and private water providers, have been working collectively to find realistic solutions that manage water sustainability and growth within the Pinal AMA for close

to a decade. Through this letter I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

I believe you will find that governmental entities, private developers, and residents within Pinal County agree that this proposed solution is a feasible resolve to our current and future management and oversight of this precious resource. It also provides a path for growth and development for our community, Pinal County, and the State of Arizona. The ADAWS allows water providers who are currently not designated as having an Assured Water Supply a path to secure the appropriate water supplies to ensure sustainability of the aquifer concurrently with managing the economic development and growth of a community. Existing residents and businesses will benefit from this because the ADAWS requires water providers to offset existing groundwater pumping with a new non-groundwater supply as new developments come online.

We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. These new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conductive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Larry D. Rains
City Manager

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

AREÁD has been involved in real estate acquisition and development in Arizona for over 30 years.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The

proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land

without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

RE: Comments pertaining to Arizona Department of Water Resources Assured Water Supply Rule Changes Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the latest changes to the assured water supply rules known as the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state and in particular, Pinal County.

We believe the ADAWS will help to allow economic growth to occur while simultaneously making water supply portfolios more sustainable. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the rule changes and encourage their adoption as soon as possible.

For many years now ADWR has not approved a new final determination of an assured water supply in the Pinal Active Management Area based on groundwater due to concerns of groundwater availability. The ADAWS will allow ADWR to issue new Designations of Assured Water Supply and subdivisions can move forward. The process also requires the use of new non-local groundwater which will increase sustainability in Pinal County.

RE: Comments pertaining to ADAWS and Commingling Rules Notice of Proposed Rulemaking Submitted to Secretary of State's Office on August 7, 2024 and Published in the Arizona Administrative Record

Dear Ms. Scantlebury:

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to develop these new Assured Water Supply rules, specifically the ADAWS, which we believe will create a sustainable water supply in the Pinal AMA. A sustainable water supply is very important to all aspects of our economy in Pinal County. Through this letter, I am expressing my direct support for the new rules and encourage their adoption as soon as possible.

As a landowner without a Certificate of Assured Water Supply, these rules are important to me because I have taken the necessary step towards developing my property but did not get the application in in time for the CAWS. I own just short of 200 acres between Coolidge and Casa Grande in the vicinity of Central Arizona College. I have an Arizona Water Company main line running on two sides of the property.

As a part of the agricultural economy, these rules are important to me because we have practiced water efficiency in farming operations for many years under the guidelines of the Grandfathered Water Rights efforts. Literally stewards of the land in knowing that development may be a possibility someday.

Once again, I appreciate the efforts of the Governor's Office and ADWR staff. This is an important step forward for all of Pinal County,

Sincerely,

W. Brian Hanger

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

Thank you for all the efforts of the Governor's Office and the staff at the Arizona Department of Water Resources (ADWR) for working with stakeholders to find water solutions in the Pinal AMA.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

We have been intricately involved as a stakeholder in the effort to find reasonable water solutions in the Pinal County region since the initial efforts of ADWR to reassess water in Pinal AMA nearly a decade ago. We very much appreciate the current effort to develop these new Assured Water Supply rules in the form of ADAWS. We believe that will introduce a crucial path forward to create a sustainable water supply in the Pinal AMA. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

A sustainable water supply is very important to all aspects of our economy and quality of life in Pinal County. It is vital to find a balanced solution that protects our most precious natural resource, water, while also supporting reasonable affordability and thoughtful economic and housing development growth.

The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County.

We are multi-generational Arizonans going back to 1878 with a deep heritage in farming, ranching, land development, home building, job creation, technology development, and overall economic development. We even have family who labored a century ago on the dam and reservoir infrastructure that is so foundational to our water and economy today. Smart and innovate water strategy and policy is something that runs deep and multi-generationally for us. The ADAWS program is one of many initiatives our generation is taking on to secure innovative and sustainable life in Arizona for the future.

Again, thank you for the efforts of the Governor's Office and ADWR staff and the great work to find a way forward.

Sincerely,

J. Jason Barney

RE: Alternative Pathway to Designation of 100-Year Assured Water Supply (ADAWS)

Dear Members of the Governor's Regulatory Review Council:

Chandler appreciates the opportunity to comment on the proposed rulemaking to provide an alternative pathway for a Designation of Assured Water Supply (DAWS). Chandler is the fourth largest city in Arizona and has a long history of commitment to meeting the requirements for a 100-Yr Designation of Assured Water Supply. Chandler has invested billions of dollars in our water and wastewater treatment and distribution systems. These investments demonstrate our commitment to growing our community on renewable surface water supplies, rather than relying on the inexpensive groundwater supplies that are limited and once depleted will be gone forever.

When the 1980 Groundwater Management Act and the Assured Water Supply Program were developed, Chandler was one of the first communities to adopt the principles of sustainable water management and began to transition away from groundwater reliance. After acquiring significant renewable water resources, constructing two surface water treatment plants, three wastewater reclamation facilities, and six aquifer recharge facilities, Chandler is proud to prioritize sustainable aquifer management. It is imperative that the new proposed ADAWS rules continue to protect the investments that have already been made by the dozens of municipal water providers who have invested in sustainable water management and prioritizing healthy aquifers.

All municipal water providers in the Phoenix and Pinal AMAs will be impacted by the outcome of the proposed changes to the Assured Water Supply Program because we all depend on the long-term health of our aquifers. As we face an era of uncertainty on the Colorado River, protecting our aquifers has never been more important to Arizona's future

water security. The Arizona Department of Water Resources has already warned our communities that we can not continue unsustainable growth on groundwater and that they will no longer issue new assured water supply certificates that rely on groundwater. All new growth must secure a reliable and renewable water supply. The Assured Water Supply Program is a critically important regulatory tool to protect our aquifers and protect the water supplies that have already been set aside for our existing communities.

The ADAWS rules as currently proposed represent a delicate balance of hard fought compromises that were negotiated in good faith by all stakeholders. Efforts by some parties to make last minute changes to specific components of these rules could risk unraveling the good work done by all interested parties. The proposed ADAWS rules provide water providers with a very generous groundwater allowance and allow water providers the flexibility to pump groundwater while they develop the required infrastructure to transition to renewable water supplies. The 25% reduction in pumping is the foundation of striking a balance between the immediate needs of water providers who currently rely on groundwater and the long-term need to reduce groundwater mining over time. The “25% rule” ensures that as they acquire new non-groundwater supplies, 25% of those supplies will be used to reduce groundwater pumping in the future. This 25% rule is the primary mechanism to ensure this program continues to meet the objectives of the Assured Water Supply Program and the ADAWS will not be successful without this requirement. The original recommendation of the Governors’ Water Policy Council required that 30% of all new non-groundwater supplies should be used to offset existing groundwater pumping. This volume has already been reduced to 25% and reducing it any further puts the entire program in jeopardy.

The City of Chandler respectfully requests that the GRRC approve the ADAWS rules as currently proposed by the Arizona Department of Water Resources.

Sincerely,

Simone Kjolsrud
Water Resources Manager, City of Chandler

RE: Proposed Rules for Alternative Designation of Assured Water Supply (ADAWS)

To whom it may concern:

The City of Phoenix ("Phoenix') appreciates the opportunity to comment on the proposed referenced rulemaking from the Arizona Department of Water Resources (ADWR). Phoenix supports the adoption of the ADAWS rule in its current form. This rule provides a reasonable way to reduce reliance on unsustainable groundwater withdrawal while supporting sustainable growth.

Phoenix recognizes that the Assured Water Supply Program ("AWS Program") has played a critical role in the economic vitality currently enjoyed in the Phoenix metro area. When the AWS Program was adopted in the 1990s as a result of the passage of the 1980 Groundwater Management Act, Phoenix was one of the first major Valley cities to receive a 100-year Designation of Assured Water Supply from the State of Arizona. This guarantees the future for the residents of Phoenix and supports the investors in business and industry who rely upon the certainty of that designation. However, the program requires accountability and sustainability. While declining groundwater availability threatens additional residential development in undesignated areas of the Phoenix metro area, it is important that Arizona carefully consider the implications of retreating from these important consumer protection and economic vitality principles. There is no affordable housing or economic future without the sustainable water use restrictions of the Groundwater Management Act and the AWS Program.

The ADAWS rule is the next natural progression of the AWS Program. It acknowledges the need for additional housing while recognizing there is no sustainable development that continues to rely solely on groundwater pumping. It allows communities to move forward in their efforts to achieve a Designation using temporary groundwater pumping, but only with the requirement that the pumping must be reduced as the community acquires renewable water supplies. **This is why 25% of all new renewable water supplies must be dedicated to replacing current unsustainable groundwater pumping, putting the community on a path of certainty for its residents and businesses.** Further reducing that commitment to reducing unsustainable groundwater pumping below 25% of new renewable water supplies threatens not only the sustainability of the community participating in the ADAWS program, but also the

existing designated cities in Maricopa County who also rely upon the same aquifers and must restrict their groundwater pumping to conform with the AWS Program. More importantly, it erodes the protections for homeowners, business owners and economic investors in Arizona that the State values and protects its valuable but limited water resources.

Phoenix supports the balance of consumer protection and continued sustainable growth that is represented by the current ADAWS rule proposal, especially the requirement that 25% of new renewable water supplies be used to replace unsustainable groundwater pumping.

Sincerely,

Cynthia S. Campbell

determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Justin Carlson

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I want to express my gratitude for the Council's ongoing dedication to balancing the needs of Arizona's residents and stakeholders while maintaining effective regulations. Your role in reviewing agency regulations, especially the Alternative Designation of Assured Water Supply (ADAWS) rules proposed by the Arizona Department of Water Resources (ADWR), is crucial for promoting sustainable water management and economic development in our state.

I am writing to express my support for the ADAWS and Commingling rules package that ADWR submitted on October 7, 2024.

ADWR has diligently collaborated with stakeholders to create the ADAWS option, which aims to strike a balance between the two current methods for securing an assured water supply determination. These new rules introduce a third method for establishing an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from various business sectors in Pinal County are also submitting letters in favor of the ADAWS. I fully endorse these new rules and the statements from my colleagues, and I urge you to adopt the ADAWS as it represents a significant advancement for Pinal County.

Given the current conditions on the Colorado River and the record heat, Arizona's Assured Water Supply program is more essential than ever in demonstrating that our state is a safe place to invest. The proposed rules package is a crucial step toward addressing recent groundwater modeling challenges that have halted new assured water supply determinations. These new rules offer an additional avenue for water providers to obtain a new assured water supply determination and provide land without existing determinations the chance to develop

needed and affordable housing in Pinal County. We can no longer depend solely on a groundwater-only based solution. With each passing day, housing becomes less affordable as we delay investing in sustainable water supplies. The new rules present a sensible way forward for building our communities.

Thank you for your attention to this important issue. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and responsive to our communities' needs. I look forward to your support in approving these vital new rules.

Sincerely,

Todd Cooley

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of ANDERSON RD 80, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of ANDERSON RD 80, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Attaway Crossings 147, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Attaway Crossings 147, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen
Manager, Attaway Crossings 147, LLC

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Florence PG 53, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Florence PG 53, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Hanna Rd 120, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Hanna Rd 120, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Landmark 65, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Landmark 65, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Petersen Vekol Group, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Petersen Vekol Group, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Trey Smith

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members,

I would like to express my gratitude to the Governor's Office and the Arizona Department of Water Resources (ADWR) for their diligent efforts in working with stakeholders to develop the new Assured Water Supply (AWS) rules, particularly the Alternative Designation of Assured Water Supply (ADAWS). As a Partner of Petersen Properties & Management Inc., which manages properties in Pinal County, and on behalf of Vickie L Hayes 56, LLC, I believe these rules will foster a sustainable water supply that is crucial to our community's long-term growth and economic stability.

A sustainable water supply is fundamental not only to residents but also to the businesses and industries that rely on a vibrant and thriving economy in Pinal County. The implementation of ADAWS will ensure that our properties, both current and future, are supported by a reliable water portfolio, allowing for continued development while preserving the region's groundwater resources.

These rules also protect landowners who currently hold Certificates of Assured Water Supply (CAWS) by maintaining the value of these entitlements while facilitating a pathway for those without CAWS to pursue development more affordably and sustainably. The flexibility ADAWS provides in blending new non-groundwater sources into existing systems is a significant step forward in ensuring that future demands can be met without overburdening the region's groundwater supply.

On behalf of Vickie L Hayes 56, LLC, I wholeheartedly support the adoption of these rules and encourage their swift implementation to benefit all stakeholders in Pinal County.Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tanner Petersen

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7, 2024

Dear Chair and Council Members:

I am writing this letter to urge the Council to pass the new assured water supply rules package. These rules provide an additional method for securing an assured water supply. There are several specific issues I wish to address head on. First, I want to address why the ADAWS is a new method for securing an assured water supply. Second, I will explain how the ADAWS provides for the use of groundwater. Third, I will address the issue of modeling relative to the Assured Water Supply Program. Fourth, I will address the groundwater offset requirements described as a tax by others. Finally, I will address the issue of the cost of securing an assured water supply.

Third Method for Securing Assured Water Supply: ADAWS

To date, only two methods have been available to secure an assured water supply. The first method, which is the default method, is through Certificates of Assured Water Supply where supplies are secured by developers and/or builders. The second method is through a Designation of Assured Water Supply, where water supplies are secured by the water provider for its entire water system instead of developers and/or builders securing an assured water supply for future individual subdivisions. As I will describe below under my second point, groundwater modeling performed by the Arizona Department of Water Resources (ADWR) projects that continued reliance on groundwater is not sustainable effectively making any new assured water supply determination dependent on groundwater impossible. The ADAWS, is a hybrid of these two methods, providing a third path for securing an assured water supply while continuing to rely on

some groundwater for a reasonable period of time. It is not perfect, just like the other methods are imperfect, but for some water providers, the ADAWS can be a beneficial solution for a community. While the ADAWS may not be a solution for every water provider, it should be made available as an option to water providers that can find a path forward under the requirements of the ADAWS.

Groundwater Provided Under ADAWS

One of the main reasons the ADAWS is a viable alternative for some water providers is that the ADAWS provides for the use of groundwater. Unlike the existing Designation method, the ADAWS provides for ongoing use of groundwater allowances and extinguishment credits associated with existing Certificates of Assured Water Supply. The existing Designation method only provides for the use of extinguishment credits. Without this specific concession, the ADAWS would not be a viable path forward just as the existing Designation method is not a viable path forward as it provides a groundwater allowance of zero.

Assured Water Supply Modeling

Since the release of groundwater models by the ADWR projecting unmet demands in the Pinal and Phoenix Active Management Areas (AMAs), new applications for assured water supply dependent on groundwater have not been viable. Several modeling efforts have demonstrated that these unmet demands associated with municipal and assured water supply demands can in fact be met. Although this is true, these modeling efforts do not resolve unmet demands associated with agricultural and industrial groundwater use. These modeling efforts also do not resolve depth-to-water limits prescribed in the assured water supply rules. Finally, even with all these modeling efforts, it is clear that continuing a system largely dependent on groundwater is not a satisfactory solution for sustaining communities indefinitely. Even if we all agreed to the continued reliance largely on groundwater for new growth, we would just hit the wall a little bit later. Moreover, delaying the development of a sustainable water supply will not make the cost of providing such a supply less expensive or make housing any more affordable. In fact, it will only make affordable housing even less attainable.

Groundwater Offset of Tax

The Homebuilders Association of Central Arizona has expressed concern that the burden of paying for groundwater offset should be placed on the those using the groundwater and not future homeowners. Arizona Water Company agrees with the HBACA. Arizona Water Company is developing a process that will ensure that the water supply acquired to offset existing groundwater demand will not be placed on the backs of the homebuilders. Moreover, Arizona Water Company is working with its communities to ensure the wastewater produced by new homes will be stored in the ground and recovered for delivery back to those new subdivisions further reducing the cost of the new water supply even for homebuilders. Finally, Arizona Water Company believes the rules already accommodate HBACA's concern about the groundwater offset having a life span. Our Vice-President of Water Resources, Terri Sue C. Rossi, has provided a letter specifically describing how Arizona Water Company strategy under the new ADAWS specifically resolves these concerns.

Cost of Securing an Assured Water Supply

While providing a 100-year assured water supply is not inexpensive, the other alternatives are much more expensive. The Certificate method has historically relied almost entirely on groundwater. This method relieved developers and builders from paying the costs of securing an assured water supply, but it did not relieve homeowners of that expense. The result of that method has been to put homeowners in the position of paying for a sustainable water supply on an annual basis through something called replenishment which is a function of the Central Arizona Groundwater Replenishment District. The CAGRD's rates for excess groundwater, used in 2023, were $875 per acre-foot in the Pinal Active Management Area and $856 per acre-foot in the Phoenix Active Management Area. By 2028, the CAGRD projects the price per acre-foot for replenishment will be $1,046 per acre-foot. Since 2018, this represents a nearly 5% increase in costs annually. The cost to secure even the most expensive water supply on the market today is roughly $50,000 per acre-foot for a 100-year supply which is $500 per acre-foot on an annual basis. If the water supply is acquired by the developer/builder, the cost of the supply will be incorporated into the purchase of the house or mortgage and the homeowner will not be burdened with costly annual replenishment costs.

In the Pinal AMA, the average residential single-family homeowner uses around a quarter of an acre-foot of water per year. Assuming the highest cost for a water supply today, $50,000 per acre-foot, that would equate to $12,500. Incorporated into a 30-year mortgage at 7.125% interest, that's less than $85 per month for 30 years. In Starbucks dollars, that's about 10 pumpkin spice lattes a month. If we continue using the replenishment model, at the end of 100 years, the people who buy that home will have paid around $650,000 for replenishment instead of $12,500 over a 30-year mortgage.

The question is not what the economic impact is of paying for an assured water supply. The real question is what the economic impact will be when we have exhausted all the vacant lots currently under an assured water supply determination and no new subdivisions can be built.

I appreciate all the efforts of the Governor's Office, ADWR staff and all the people and businesses who have docketed comments with ADWR and have submitted comments to the GRRC. I also appreciate the work the members of the GRRC are putting into considering these rules.

Very truly yours,

Fredrick K Schneider
President

October 21, 2024

Governor's Regulatory Review Council
100 N. 15th Avenue Suite 302
Phoenix, AZ 85007

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

As the Vice-Chairman of the Pinal County Board of Supervisors, I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Respectfully,

Jeffrey McClure
Pinal County Board of Supervisors

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 21, 2024

Dear Chair and Council Members:

Thank you for this opportunity to provide information to support your decision to approve, at the upcoming November 5th Council Meeting, rules being promulgated by the Arizona Department of Water Resources (ADWR) to create a new method for securing an Assured Water Supply called the Alternative Designation of Assured Water Supply or ADAWS. Arizona Water Company believes this is the best opportunity for it to secure an assured water supply for existing and future customers. We are preparing an application for a designation at this time and hope to be the first water provider to secure an assured water supply through the ADAWS.

There are currently two methods for securing an assured water supply: Certificate of Assured Water Supply (i.e. developer/builder dependent process to secure an assured water supply for individual subdivisions) and a Designation of Assured Water Supply (i.e. water provider dependent process to secure an assured water supply for all customers within a service area). Both methods meet the Assured Water Supply rules criteria, but a Certificate-based method is a piece meal method driven by decisions of individual landholders. The Designation-based method puts the water provider in the position of managing all water supplies available to

meet demands inside its service area. From that perspective, the designation provides a more cost-effective approach to providing water security to customers.

I have worked in water resources in Arizona since 1986. When I worked at ADWR, I personally worked on the Assured Water Supply rules promulgated in 1995 and on an earlier failed version of the rules in 1988. At the time, I don't think the water resources community really understood the significance of these rules and how they would become the center piece of the Arizona Groundwater Management Act of 1980, lauded as being one of the most progressive state laws of its kind.

Since 1995, there have been many changes to the Assured Water Supply Program, most of which focused around reducing the tolerance for using unreplenished groundwater. I don't recall any efforts to assist water providers dependent on the certificate-based method to shift to the designation-based system. Except under very specific circumstances, a Designation of Assured Water Supply is virtually impossible for a private water company, like Arizona Water Company, to secure...until now. I believe the rules before the Council are the most practical opportunity for Arizona Water Company, its customers and the community it serves, to secure a Designation of Assured Water Supply.

There are several reasons we believe these rules strike a good balance. First, because the rules are a hybrid of the two existing methods, ADWR has acknowledged the importance of groundwater allowances and extinguishment credits associated with existing certificates. As a result of this decision, water providers will be able to use groundwater, with reasonable sideboards, to transition from the certificates to a designation. Second, the new rules provide for changing how Arizona Water Company currently uses its CAP water to make this existing water supply eligible for offsetting existing groundwater pumping. Without these important concessions on the part of ADWR, Arizona Water Company would not be able to consider shifting to a Designation of Assured Water Supply.

Under the ADAWS, Arizona Water Company will employ a three-part strategy to implement the ADAWS. Arizona Water Company will use its current Central Arizona Project (CAP) water to offset existing unreplenished groundwater by recharging its CAP water in nearby groundwater savings facilities. In addition, Arizona Water Company will partner with local wastewater providers, particularly the Cities of Casa Grande and Coolidge to recharge wastewater, that will be produced by new subdivisions, in local recharge projects. These supplies along with sustainable supplies provided for new subdivisions by developers and homebuilders and also recharged in local aquifers, will then be pumped from wells benefited by this recharge and used to replenish groundwater and meet the water demands of new subdivisions. Through this method, Arizona Water Company will achieve the critical balance between replacing groundwater that has been historically unreplenished and providing sustainable water supplies for new development.

Pinal County, like other parts of Arizona, is experiencing a housing shortage. At the same time, we are experiencing an unprecedented industrial boom, the epicenter of which is Lucid motors. If these rules are not adopted, the Casa Grande and Coolidge area will run out of vacant

lots located in subdivisions with existing Certificates of Assured Water Supply. This will increase the price of homes in these areas and potentially quell what is expected to be a sustained economic pathway for these communities. Arizona Water Company plays an important role in making sure water is not a barrier to these communities and their future plans and ambitions.

Arizona Water Company implores the Council to approve these rules. The rules are not an "or", they are an "and". Please approve the adoption of these critical rules. Thank you in advance for your consideration.

Very truly yours,

Terri Sue C. Rossi

Vice President Water Resources

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Having personally worked with Pinal County stakeholders to update the groundwater modeling supporting the Assured Water Supply Program, I have seen directly the issues we face in

Supervisor Stephen Q. Miller - District 3
820 E. Cottonwood Lane, Building A | Casa Grande, AZ 85122 | Office: 520-866-7401 | Cell: 520-858-4437
www.pinal.gov

providing water security in Arizona. I support the State's Assured Water Supply Program and the importance of its role in providing water security in Arizona. It has been an example for others to follow. But the existing methods are no longer viable for many communities, water providers, developers, builders and ultimately the homeowners they serve. The ADAWS creates a new method, that while not perfect, is a viable pathway for the two largest private water companies in the state of Arizona: EPCOR and Arizona Water Company. Of the over 1,200 groundwater-based subdivisions approved since the initial Assured Water Supply rules were adopted in 1995, nearly 50% are located inside these two water providers. The water demands of these two water providers likely exceed the water demand of all the other water providers combined. To create a method for these two water providers to become designated as having an assured water supply is truly an accomplishment. If adopted, these new rules will move the Assured Water Supply needle more than any other attempt since the initial adoption of the rules in 1995.

Also being a Board member of the Central Arizona Project, I have also seen first-hand the impact of current conditions on the Colorado River and record heat in the Colorado River Basin. As a result of my experiences, I believe Arizona's Assured Water Supply Program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is a critical step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to become designated as having an Assured Water Supply and allow land without existing determinations the opportunity to build desperately needed, affordable housing in particular in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities with a foundation of water security.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Stephen Q. Miller
Pinal County Board of Supervisors, District 3

sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024. With all the industrial development that we have and are achieving in the Casa Grande area, along with the shear number of jobs that are being created, housing development for those employees is essential to our continued success. The single biggest issue is water.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their

positions. I fully support these new rules and the letters of my peers, and I encourage the adoption
of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.
Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure
that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Phoenix, AZ 85007

RE: Comments pertaining to ADAWS (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

The Arizona Municipal Water Users Association (AMWUA) supports the proposed Alternative Designation of Assured Water Supply (ADAWS) rules as submitted by the Arizona Department of Water Resources (ADWR) on October 7, 2024. These rules are projected to reduce groundwater pumping in the Phoenix and Pinal Active Management Areas (AMAs) while allowing residential and industrial growth to occur, which would be beneficial for long-term water management and the economy.

For over 40 years in Arizona's most urban areas, the Assured Water Supply Program has prohibited the sale of subdivision lots that lack a 100-year assured water supply. ADWR administers this program by issuing Certificates of Assured Water Supply (Certificates) to individual subdivisions[1] and Designations of Assured Water Supply (Designations) to municipal water providers that demonstrate an assured water supply for all uses of water they serve. All ten of AMWUA's member municipalities – Avondale, Chandler, Gilbert, Glendale, Goodyear, Mesa, Peoria, Phoenix, Scottsdale, and Tempe – which together serve over half of Arizona's population, have Designations making AMWUA uniquely qualified to propound on the benefits of the ADAWS rule.

Arizona's economic success and our way of life are a direct result of the billions of dollars the ten AMWUA cities and other municipal water providers have invested in water resources and infrastructure to obtain and maintain their Designations. These Designations enable businesses and industries that are crucial to our economy to locate and thrive here and provide consumer protection for the majority of the state's population so they can call central Arizona their home. Our state has benefited from the basic tenant of the Assured Water Supply Program - water first, then development - a tenant embodied in a Designation of Assured Water Supply.

Groundwater management benefits our economy

Central Arizona has struggled for nearly a century to keep groundwater pumping in balance with what its groundwater supplies can reasonably support. Historically, groundwater was readily available for farmers, miners, developers and water providers; the only barriers to its use were the costs of drilling, operating, and maintaining wells deep enough to pull water from underground. Overdrafting—pumping more groundwater than is replenished—has been a known problem since

[1] "Subdivision" is land that has been divided into six or more lots or parcels for sale or lease. A.R.S. § 32-2101.

the 1930s. Arizona's 1980 Groundwater Management Act put us on a trajectory to achieve long-term stability between use and supply by regulating groundwater pumping in the most populous and economically productive parts of the state known as AMAs.

The Assured Water Supply Program put parameters on some growth and development within AMAs. Water providers could obtain a Designation if they could prove they had sufficient water supplies on hand for current and projected demands within their service areas for the next 100 years. Developers could build subdivisions outside of a Designated provider's service area if they could obtain a Certificate, which similarly required proof of a 100-year water supply.

Consistent with the purpose of the Groundwater Management Act, ADWR proposed Assured Water Supply rules in 1988 to restrict the decline of groundwater levels in undeveloped areas of the AMAs. The Arizona Legislature responded to these draft rules in 1993 by passing legislation allowing groundwater to be used to demonstrate an assured water supply if ADWR determined the groundwater was "physically available" and its use was later replenished by the Central Arizona Groundwater Replenishment District (CAGRD). Over the next three decades, ADWR issued Certificates for subdivisions on the periphery of the Phoenix metropolitan area and in Pinal County based on groundwater because ADWR's older models showed that enough groundwater was physically available for those proposed developments and current users. However, ADWR's Pinal AMA model (2019) and Phoenix AMA model (2023) now project there is not enough groundwater to meet all demands in these areas for 100 years. Consequently, ADWR may no longer issue Assured Water Supply determinations in these AMAs based primarily on groundwater.

The ADAWS rules provide an innovative way to allow development to move forward in the Phoenix and Pinal AMAs consistent with the principles of the Assured Water Supply Program. By providing a framework for currently undesignated water providers to obtain a Designation, the ADAWS rules will allow subdivisions, industries and other development to continue while ensuring sufficient water supplies are available to meet the long-term needs of all users supplied by these water providers. No other alternative has been offered or developed that could match a Designation's all-encompassing approach to water security.

The Phoenix AMA groundwater model's projection of shortages was expected

Contrary to the opinions of some, the projections of unmet demand in ADWR's Phoenix AMA groundwater model had been anticipated for several years. Following the 2019 release of the Pinal AMA groundwater model and the subsequent discussions about the pause of subdivision development due to the model's projection of unmet demand, ADWR emphasized that the Phoenix AMA would face a similar situation.[2]

[2] Tory, Sarah (2021, June 1). Rapid growth in Arizona's suburbs bets against an uncertain water supply. *High Country News.* https://www.hcn.org/issues/53-6/south-water-rapid-growth-in-arizonas-suburbs-bets-against-an-uncertain-water-supply/. Ayesha Vohra and Jeff Inwood, Arizona Department of Water Resources. (2021, June 22). "Assured Water Supply Program: Background and Pinal 'Case Study.'" Post-2025 AMAs Committee, June 22, 2021, Slide 45.

Moreover, before the Phoenix AMA model was released, the Bureau of Reclamation published a model of the West Salt River Valley Basin, which is part of the Phoenix AMA. This model, which was developed by the Bureau of Reclamation in consultation with a variety of stakeholders over several years and used a different set of assumptions than the Phoenix AMA groundwater model, projected considerable declines in groundwater levels by 2060 and that this area will need anywhere between 47,000 acre-feet to 260,000 acre-feet of renewable water supplies each year to make up for this unmet demand.

The findings of ADWR's state-of-the-art groundwater models must be assumed for purposes of the ADAWS rules proceedings because they confirm the fundamental reality—groundwater supplies are finite, and we cannot continue to rely on them as if they are not.

The 25% reduction to a provider's groundwater supplies is necessary for ADAWS to work

Under the proposed ADAWS rules, ADWR will determine a volume of groundwater that is physically available to an ADAWS applicant over 100 years. For the New Alternative Water Supply included in a municipal provider's initial application and for each subsequent New Alternative Water Supply the provider acquires, ADWR will reduce the volume of groundwater physically available to the municipal provider by 25% of the volume of the new supply over 100 years. We strongly support this 25% reduction. Consider the following:

- This offset does not, as some have alleged, require an applicant to "relinquish" any part of its New Alternative Water Supply. Nor is it a "tax" or "fee" on any New Alternative Water Supply. In fact, the offset effectively encourages the water provider to use New Alternative Water Supplies in place of groundwater.

- Under the ADAWS rules, a generous volume of groundwater will be "physically available" to the water provider to enable it to grow incrementally on New Alternative Water Supplies. However, in order to ensure that future growth is not reliant on mined groundwater and to protect the integrity of the Assured Water Supply Program, it is vital that new water supplies are secured and utilized in part to offset groundwater pumping.

- The onus of this 25% reduction is on the water provider. It is misleading to suggest that it is on any developer. The water provider and its community leaders would decide how best to finance the acquisition of New Alternative Water Supplies through rates it charges to all customers or through impact fees charged for new developments.

- The initial ADAWS draft rules proposed requiring a 30% reduction in groundwater pumping. However, based on feedback from stakeholders and additional calculations, ADWR concluded ADAWS could work with the lower value of 25%. ADWR has stressed, however,

---

https://www.azwater.gov/sites/default/files/adwr_meetings_docs/Post2025Presentation_FinalComplied_06222021.pdf.

that this value cannot be decreased further if ADAWS is to work as intended to reduce groundwater pumping.

- It is nonsensical to suggest that the 25% should be reduced to 4% or some lesser value because it would be the least burdensome alternative. This suggestion ignores the reality of the limitations of our aquifers and the fact that there would be less groundwater available for new homes and businesses absent this 25% reduction. State law empowers and requires ADWR to manage the Assured Water Supply Program and to develop hydrologic models to evaluate the state of our groundwater supplies. ADWR's Phoenix AMA groundwater model and the Pinal AMA groundwater model project a declining trajectory of groundwater levels in each AMA that must be addressed.

- Consumer protection for homeowners is not a burden but the foundation of our economy. The State's 100-year Assured Water Supply Program provides the water security we need to thrive. If the program is weakened or allowed to unravel, it will send a detrimental message to our residents and businesses as well as to potential future investors that would undermine and threaten Arizona's economic security.

Decreasing the 25% reduction would put at serious risk the investments the AMWUA cities and other Designated water providers have made in their water systems to provide water security for their residents. These investments are all the more critical given the uncertainty surrounding how the Colorado River's waters will be managed in the future. Due to prolonged drought and a hotter and drier climate, the federal government is in the process of developing new operating guidelines for managing the river's waters. These guidelines must be implemented by the end of 2026. Based on the proposals that have been discussed so far, water providers that receive Colorado River water through the Central Arizona Project (CAP) are facing a future in which this water will be reduced—potentially significantly. The severity of these cuts may vary with each year, including the real possibility of no water in the CAP canal.

The AMWUA cities will need to offset reductions to their Colorado River water, which could include utilizing stored water. This process involves pumping (or "recovering") water that they have stored underground for several decades as an insurance or emergency backup for times of shortage. One factor that will jeopardize their recovery efforts is if the groundwater level near some recovery wells drops by more than four feet annually. When that occurs, per state requirements, recovery at that well must be halted. Groundwater does not recognize the boundaries of water providers; drawdowns caused by one provider's pumping can threaten another provider's recovery efforts.

The 25% groundwater offset in ADAWS protects an already stressed aquifer and helps our members recover stored water, ensuring that they can continue delivering water to over half the state's population and the countless businesses that power the Phoenix-metropolitan area's economy.

Any comments related to ADWR's economic analysis must consider how unsustainable groundwater pumping will harm Arizona's long-term economic prospects

When reviewing comments submitted related to the Economic, Small Business, and Consumer Impact Statement, we urge you to keep two facts front and center:

- First, water is fundamental to Arizona's communities and economy. Without the guarantee that water will be readily available for current and future generations, Arizona will have no future.

- Second, although the Groundwater Management Act and Assured Water Supply Program have improved our management of groundwater, we are still pumping more than what is replenished. Any comments regarding the financial burden of becoming Designated under ADAWS or the harm caused by halting new groundwater-dependent growth due to the Pinal and Phoenix AMA groundwater models must be evaluated against the impact that further groundwater declines will have on Arizona's long-term economic prospects. Failing to do that would be tantamount to missing the forest for the trees.

In Conclusion

Ensuring long-term water security is how we make certain that Arizona will thrive, protect the health and safety of its citizens, and have a resilient economy. ADWR, the state agency tasked with protecting our groundwater supplies, has determined that we have reached the limitations of growth on groundwater in the Phoenix AMA and Pinal AMAs. The ADAWS rules must be a solid regulatory tool to ensure the long-term sustainability of our aquifers and, in turn, our water security. Otherwise, they put the needs of existing residents at risk and jeopardize the long-term viability of our economy.

We believe the ADAWS rules provide a rigorous but achievable path for undesignated providers to obtain a Designation through dedicated commitment and investment. We acknowledge that the success of the ADAWS program depends in part on how many undesignated providers will rise to the challenge and pursue an ADAWS. But AMWUA's members also know that Designations provide invaluable benefits to our desert communities. We believe future Designations will help ensure that Arizona remains thriving and prosperous for current and future generations.

Respectfully,

Warren Tenney
Executive Director

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members:

Dear Chair, Council Member and Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water

providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

If you have any questions, please feel free to call or email me. I can be reached at 480-804-1076 x 102 or at gabe@eires.com.

Sincerely,

Re: Alternative Pathway to Designation of 100-Year Assured Water Supply (ADAWS)

To Whom it May Concern,

Scottsdale Water appreciates the council collecting input and comments from community members and water providers as this rule effects Arizona as a collective on how we adapt to the future water environment and how we grow as a state. The Assured Water Supply Program is a cornerstone to aquifer protection and strong long-range planning in our desert communities. It is our hope and objective that our comment will provide consideration to the new proposed ADAWS rules to ensure that there is continued protection to sustainable water management while prioritizing healthy aquifers.

Scottsdale Water has already invested hundreds of millions of dollars to safeguard our water supply and infrastructure. Included in Scottsdale's plans are future investments to counteract the continued drought and the consequences of shortage, which strains our surface water supplies and plays a role in the costly infrastructure required for resiliency. Provider designations enable businesses and industries that are crucial to our economy to locate and thrive here. Our state has benefited from the basic tenant of the Assured Water Supply Program - water first, then development - a tenant embodied in a Designation of Assured Water Supply.

The 25% reduction in pumping is the basis of striking a balance between the immediate needs of water providers who currently rely on groundwater and the long-term need to reduce groundwater mining over time. The "25% rule" ensures that providers acquire new non-groundwater supplies, 25% of those supplies will be used to reduce groundwater pumping in the future. This 25% rule is the primary mechanism to ensure this program continues to meet the objectives of the Assured Water Supply Program.

We urge the council to keep this line as decreasing the 25% would put at serious risk the investments cities and other Designated water providers have made in their water systems to provide water security for a large portion of existing Arizona residents. As

9379 E San Salvador Drive
Scottsdale, AZ 85258

Phone: 480-312-5685
ScottsdaleAZ.gov/Water

the future unfolds and further and drastic reductions on the Colorado River are seen by Arizona water providers, there is little doubt that groundwater pumping will dramatically increase. Balancing this with economic growth and this alternative pathway, Scottsdale believes that the 25% line is a reasonable path forward to all these factors.

Scottsdale Water respectfully asks the GRRC to consider this in the process and when adopting the rule.

Sincerely,

____

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,
Jon Via

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 19th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the

adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona’s Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council’s efforts to ensure that Arizona’s regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely, Bethany B.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the

adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona’s Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council’s efforts to ensure that Arizona’s regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Erik Lilliebjerg

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly

the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,
Ravi Tomerlin

Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed,

affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes
less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Tom Marek

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured

water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Henry Hill

Governor's Regulatory Review Council

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156)

Submitted to Governor’s Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor’s Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without

existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules. As a member of Podium Club at Attessa and a frequent visitor to Casa Grande, this approval will have a positive impact on my life.

Sincerely,

Andrea Wellington

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024. As you know, these proposed rules reflect the practical policy recommendation made by the Governor's Water Policy Council on November 29, 2023.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new

rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County in particular.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7 th , 2024
Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,
I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7 th , 2024.
I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.
ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.
I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.
Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.
Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

--

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,
Jens Plougmann

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156)

Dear Members of the Governor's Regulatory Review Council,

I am writing on behalf of Walton Global, one of Pinal County's largest landowners, with over 10,000 acres of holdings. Walton Global is deeply committed to fostering the sustainable and prosperous future development of Pinal County.

The current state of the Arizona Department of Water Resources (ADWR) regulations hampers Pinal County's ability to maintain the momentum of development that has begun, and to continue building thriving communities through investment in employment opportunities. Therefore, Walton Global fully supports the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

Water policy holds the keys to the future of Pinal County, shaping the region's potential for growth and prosperity. We view this proposal as a pivotal and collaborative step forward, creating a balanced approach that supports economic development while safeguarding vital water resources. By ensuring long-term water sustainability, this initiative opens the door for continued investment from outside entities, benefiting our communities for decades to come. This policy not only secures the future of our region but also reinforces Pinal County's position as a destination for innovation and growth.

The goal of these new rules is to provide a third method for water providers and communities to reduce their reliance on groundwater and diversify their water portfolios, ensuring that existing, committed, and future demands benefit from a secure water supply. This method, known as the Alternative Designation of Assured Water Supply (ADAWS), offers a path for water providers without a current Assured Water Supply designation to secure one. The benefits extend to existing residents and businesses, as ADAWS requires providers to offset current groundwater pumping with a new, non-groundwater supply as new developments come online. This will diversify the water supply portfolio, creating a more sustainable resource for all, which is critical for maintaining strong property values, a healthy business climate, and an excellent quality of life. In essence, these new rules provide a path forward for new subdivision development on lands not already covered by a Certificate of Assured Water Supply (CAWS).

Under the current regulations, no viable path exists, which threatens Pinal County's future economic prosperity and negatively impacts the outlook for current residents and businesses. As a community, we can no longer depend solely on groundwater. Each day we delay investing in sustainable water supplies further jeopardizes the affordability of housing and the region's future

growth. The new rules present a reasonable, forward-looking solution to keep building strong communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure Arizona's regulatory processes are clear, effective, and aligned with the needs of our communities. I look forward to your support in approving these vital new rules.

Sincerely,

Jordan R. Rose

RE: Public Comment Period for Proposed ADWR ADAWS Rules

Dear Chairperson Klein,

I am writing to request that the Governor's Regulatory Review Council ("Council") delay voting on the Arizona Department of Water Resources ("ADWR" or the "Department") Notice of Final Rulemaking ("Notice") for the Alternative Path to Designation of Assured Water Supply ("Proposed Rules"). ADWR submitted the Proposed Rules on October 7, 2024, and has requested placement on the Council's November 5, 2024, agenda. From the date of submission to the Council, that scheduling would only provide 22 days until the Council's study session and 29 days until the Council's regular meeting.

The Proposed Rules represent a seismic shift in water policy that should be carefully considered instead of rushed. The Council must table the Proposed Rules until a subsequent meeting because it would be illegal and improper to consider them without providing adequate time for public comment. Additionally, we request that the Council direct ADWR to resubmit its Notice with a corrected cover page clarifying whether ADWR is conducting a regular or expedited rulemaking and, if ADWR is proposing to conduct expedited rulemaking, to comply with the additional notice and comment requirements prescribed by A.R.S. § 41-1027(B) and (C).

(1) The Council Must Allow for a Separate 30-day Comment Period

A.R.S. § 41-1052(I) provides that "[a]t any time during the thirty days immediately following receipt of the rule, a person may submit written comments to the" Council. This thirty-day public comment period runs from the date that the Council receives a Notice of Final Rulemaking. The Council's own rulemaking flowchart acknowledges that there is "a separate required 30-day public comment period" after an agency submits a notice to the Council.[1] The Council's regulations account for considering public comments.[2] Considering the Proposed Rules before the public comment period has ended defeats the point of allowing comments in the first place.

(2) The Council Has Authority to Table the Rule

A.R.S. § 41-1052(I) requires the Council to either return or approve a proposed rule within 120 days of receipt of a Notice of Final Rulemaking. Here, ADWR submitted its Notice on October 7, 2024. That means that the Council could wait to address the Proposed Rules until as late as its February 4, 2025, regular meeting, which is exactly 120 days from the date of submission.

(3) Substantive and Procedural Concerns Justify Delaying the Vote

During ADWR's consideration of public comments under A.R.S. § 41-1023, several interested parties raised substantive concerns about the Proposed Rules that merit serious consideration. These include concerns: that the Proposed Rules rely on the Department's groundwater modeling despite not disclosing it as a "study," as A.R.S. § 41-1052(D)(8) requires; that the Department's economic analysis is not adequate or accurate, as A.R.S. § 41-1052(D)(1) and (2) require; that the Proposed Rules are not the least burden and cost alternative for municipal providers, as A.R.S. § 41-1052(D)(3) requires; and that the Proposed Rules are illegal, inconsistent with legislative intent, and impose licensing conditions that are beyond the scope of the Department's authority, as A.R.S. § 41-1052(D)(5) prohibits. It is critical that the Council take the time to consider each of these concerns before voting on the Proposed Rules.

There are also procedural issues that should concern the Council. ADWR's cover letter appears to mistakenly state that the Department is conducting or requesting an expedited rulemaking, despite the Department not filing a Notice of Proposed Expedited Rulemaking with the Arizona Secretary of State, filing a Notice of Final Expedited Rulemaking with the Council, or receiving approval from the Governor to conduct an expedited rulemaking. The cover letter also does not properly identify ADWR's Deputy Counsel. To correct this, the Council should direct ADWR to resubmit its Notice with a corrected cover letter, clarifying which path the Department is seeking to pursue.

In addition, if ADWR is proposing expedited rulemaking, the Council must ensure the Department complies with the additional notice and comment requirements of A.R.S. § 41-

[1] Available at: https://grrc.az.gov/sites/default/files/2023-01/2022%20Regular%20Rulemaking%20Flowchart.pdf
[2] *E.g.* A.A.C. R1-6-201(D) (providing that the Council shall notify an agency of comments received by the Council).

1027(B) and (C), which require the Department to explain why the Proposed Rules meet the requirements of expedited rulemaking under A.R.S. § 41-1027(A), submit the Department's explanation to the Arizona Secretary of State for publication in the Arizona Register, and allow members of the public to submit written comments on the Department's explanation for thirty days.

Regarding notice, it is perhaps most troubling that ADWR submitted its Notice without notifying members of the public. Although ADWR submitted its Notice to the Council on Monday, October 7, we only found out about it on Friday, October 11, when ADWR quietly uploaded a copy buried in the middle of its webpage for the Proposed Rules. ADWR did not notify members of the public who commented on the Proposed Rules. Because the Council does not post agendas for its meetings until a week before, many interested members of the public likely do not know that the Council could be considering the Proposed Rules at its November 5, 2024, meeting. This undermines the public's ability to submit written comments to the Council during the mandatory additional 30-day comment period under A.R.S. § 41-1052(I).

(4) Conclusion

At a minimum, the Council cannot hear the Proposed Rules at its November 5, 2024, meeting and must allow a full thirty days to ensure that members of the public have an adequate opportunity to comment. The Council should also direct ADWR to resubmit its Notice with a corrected cover letter to clarify whether the Proposed Rules are expedited.

Water management is the most important issue for the continued vitality of Arizona. The Proposed Rules arguably represent the most significant changes to Arizona's water policy since the 1980 Groundwater Management Act. This shift must be carefully studied instead of rushed.

Respectfully,

Warren Petersen
President of the Arizona State Senate

Re: Home Builders Association of Central Arizona Comments on Proposed Alternative Designation of Assured Water Supply Rules

Dear Ms. Scantlebury:

On behalf of the Home Builders Association of Central Arizona ("HBACA" or "Association") please accept the following comments on the Department's proposed rules related to the Alternative Designation of Assured Water Supply ("ADAWS") process. Notice of Proposed Rulemaking published in the Arizona Administrative Register on August 23, 2024, Volume 30, Issue 34. The HBACA is a trade association representing the residential construction and development industry. The Association acts as a source of timely and reliable information concerning the state of the local building industry and works to eliminate overly restrictive and costly building laws and regulations which drive up the cost of housing. Since 1951, the HBACA has served as the voice of the home building industry.

The release of the Pinal Active Management Area Groundwater Model in 2019 and the Phoenix Active Management Area Groundwater Model in June, 2023, and the moratorium imposed by Governor Hobbs on new determinations of assured water supply in the Phoenix metropolitan region, have adversely affected the residential for-sale housing industry disproportionately and unfairly. For the last nearly 30 years, for-sale residential housing, being developed on "subdivided land" as referenced in A.R.S. § 45-576, has been the most sustainable user of groundwater within the Active Management Areas. All homes built for sale have either been constructed in and served by a provider holding a designation of assured supply, or they have been issued Certificates of Assured Supply. In either case, for these three decades, for-sale residential housing's use of groundwater has been officially determined to be consistent with the achievement of the Phoenix and Pinal Active Management Area goals. In the Phoenix Active

Management Area, this has been primarily through 100% replenishment through the Central Arizona Groundwater Replenishment District ("CAGRD").

This is in sharp contrast to other groundwater uses in the Active Management Areas, most notably agricultural users, and those industrial (including multi-family for-rent housing) users in areas outside of the existing designated providers. These uses require no assured water supply, have no replenishment obligations, and are some of the largest consumers of groundwater. Yet the Phoenix groundwater model and the moratorium have had no effect or negative impact on these users. Instead, we have seen a boom in industrial development, build-for-rent housing, and commercial development based on minor land divisions.

All of this occurred during Arizona's nationally recognized housing supply and affordability crisis. Queen Creek, Buckeye, the west Phoenix areas served by EPCOR, and Pinal County are some of the fastest growing communities in the United States. However, subdivisions in these areas have been literally on hold since 2019 in Pinal County and as early as the summer of 2022 in most of the Phoenix Active Management Area, with no realistic end in sight. Investment in Arizona housing is delayed, infrastructure is stalled due to lack of a clear path to development, and housing prices are escalating rapidly due to the lack of supply. Homeownership is now a distant longing for many Arizonans. This is a matter that should be of deep concern to the administrative governance of the State of Arizona.

The solution to these water issues, thus far, has been to attempt to create a formula upon which the fastest growing, but undesignated water providers in the Phoenix and Pinal Active Management Areas might pursue an "alternative path" toward a designation of assured supply. To this end, the Arizona Department of Water Resources ("ADWR" or "Department") has drafted, circulated, and now formally submitted a proposed set of rules to create this alternative designation concept, commonly referred to as "ADAWS."

The HBACA supports the ADAWS concept for Queen Creek, Buckeye, and private utilities such as EPCOR and Arizona Water Company to become designated water providers. However, as the industry most impacted by these rules, we believe it is vital that the Department's rules are workable and fair. Additionally, the rules should be the least economically burdensome process for those providers and their constituent customers, particularly home builders and homeowners. Moreover, our home building industry must be allowed to continue to build and grow new planned communities to create a revenue base for those providers' acquisition of new water resources and the infrastructure necessary to produce, treat, and deliver those resources. The infrastructure costs funded by development impact fees to deliver water are already creating an impediment to new home construction, and a financially burdensome ADAWS will only compound this existing problem. This is not a home builder only problem. Without the infrastructure investment made by home builders, other land uses (i.e., commercial and industrial) will have nothing to tie into. Finally, we want to ensure that our members' projects that are currently on hold can immediately resume and begin to generate a return on the billions of dollars of stranded investment in those areas.

In these areas, we find the proposed rules fall short. The financial burdens of the ADAWS concept will once again fall unfairly and disproportionately on the home building industry, which is always at the front end of the water development requirements of any municipal water provider. There is no immediate or temporary relief for stalled subdivisions to resume large scale infrastructure projects necessary to achieve ultimate water service and, as importantly, sewer and wastewater treatment and storage facilities. The state imposed tax (variously called an "offset" or "premium") on new water supplies brought in by development cannot realistically be borne by the water provider, and will ultimately fall on the land developer and, in turn, on the eventual homeowner. There is no assurance that the program will be implemented quickly, and all indications are that the complexities of resolving an application for an ADAWS will take months if not years to complete.

Nor do we believe that the true economic impacts of the proposed ADAWS rules have been accurately considered, The Department has prepared, and posted on its website, an Economic, Small Business, and Consumer Impact Statement ("Impact Statement") that we have also reviewed. We asked Elliot D. Pollack & Company to review it as well and provide their experienced insight into the economic impact of these rules. They have prepared a memorandum summary of their findings, which we have attached to these comments for your consideration.

One area where the HBACA could see significant improvement in the proposed ADAWS concept is for the proposed tax on new alternative water supplies be directed to, and limited to, those sectors of the municipal service area that are responsible for the groundwater "mining" that the Department is trying to prevent. If the definition of "Alternative New Supply" were modified to require the provider to quantify the volume of water dedicated to non-subdivided land (which has heretofore not been contributing to mined groundwater) and reduce the provider's reduction of available groundwater only equivalent to that amount, much of the disproportionate hardship on developers of subdivided land would be removed. We have further discussed this improvement at the end of our analysis here.

With this background, we turn our attention to the specific issues we perceive in the proposed ADAWS rules.

<u>The Proposed Rule is Not an Option; It is a Licensing Requirement</u>

The preamble to the proposed rule strenuously attempts to depict the ADAWS as a mere option available to those municipal providers that may choose to pursue it. In fact, subdivided land development has been stalled in the fastest growing communities for the last two years in Maricopa County and five years in Pinal County. and every indication from the Department is that no new determination of assured water supply will be issued in the Phoenix or Pinal Active Management Areas unless the (currently undesignated) municipal provider complies with the ADAWS. While we recognize that the Department is contemplating another rule (the "commingling rule") that might allow some temporary relief, there are problems with that rule as well, which we address in a separate set of comments.

The reality is that the Department has done all in its power to make the ADAWS the only option to restart large scale residential development. As such, it is difficult to view the ADAWS as anything less than a mandatory requirement for residential growth in the currently undesignated provider municipal service areas.

The Proposed Rules are Grounded on a Faulty Groundwater Model Premise

A.R.S. § 41-1052(D)(8) requires that the preamble to the proposed rule disclose a reference to any study relied upon in the agency's justification for the rule. In the ADWR preamble, under Item 7, the Department lists "none" as the answer to this requirement. Nevertheless, the Department does reference both the "2019 Pinal model" and the "2023 Phoenix model" to establish the premise that there is currently no physically available groundwater to support a determination of an assured water supply in the Pinal or Phoenix Active Management Areas. These "models" are computer numeric studies that attempt to predict future water levels in the aquifers underlying these Active Management Areas. As noted in the preamble, the conclusion of these models, according to the Department, is that there are "unmet demands" within the model study area, and isolated areas where depth to water may exceed 1,000 feet (1,100 in Pinal) below land surface. Based on this premise, the Department concludes that the proposed alternative path to designation is justified because "Any costs associated with ADAWS are outweighed by the benefits when compared to the available alternatives." If one assumes that groundwater is not an alternative, then the "available alternatives" are few if any.

There are several problems with the reliance on these models to create the premise. First, the Department justifies lack of groundwater based on a notion of "unmet demand." These words do not appear in any statute or rule relating to the assured water supply program. It is a standard created wholly by the Department's interpretation and implementation of its rules, rather than the text of the rules, or the statutes. Furthermore, the calculation of an "unmet demand" is determined largely by placement of hypothetical wells by the Department in the future projections of the model domain. Landowners within the Hassayampa Sub-Basin of the Phoenix Active Management Area have engaged Matrix New World Engineering to do an in-depth analysis of the 2023 Phoenix Model. The results of that study have been submitted to the Department for review, and through that process, several adjustments have been made. But the final result of the Matrix model is that reasonable placement of wells within the model wholly eliminates the unmet demand cited by the Department across the entire municipal, assured water supply, and long-term storage credit recovery wells associated with the model domain.

Secondly, isolated depths to water across the entire Active Management Area may exist in some areas where rising terrain, impermeable underground deposits, and thin saturated aquifer zones contribute to lack of available groundwater at those specific locations. A.R.S. § 45-576, the statute which governs the foundation of the assured water supply program, does not require available groundwater in all areas. Rather, it focuses on "sufficient" groundwater that is "continuously available to satisfy the water needs of the proposed use." This is a site-specific determination that does not justify a conclusion that a depth to water issue in Apache Junction means that there is no physically available groundwater in central Buckeye. In fact, central

Buckeye is generally regarded as a "waterlogged" area where depth to water is exceedingly shallow—20-30 feet below land surface.

Thus, use of the 2019 Pinal model and the 2023 Phoenix model to justify the cost to benefit analysis of the rules creates an unrealistic, and statutorily unjustified restraint on the physical availability of groundwater that would support alternatives to the proposed rule. These alternatives would cost dramatically less to home builders and affected citizens than the proposed ADAWS alternative.

- The rule proposal is deficient on its face because it does not adequately disclose the nature of, and the extent of the impact of, the 2019 Pinal model and the 2023 Phoenix model as required by A.R.S. § 41-1052(D)(8).
- The Council should consider whether these models have been tested or subjected to peer review publications, such as the Matrix study. A.R.S. § 41-1052(G)(4). Particularly, inquiry should be made as to whether the assumptions underlying the Department's projection period of the model have been reviewed by anyone outside of the Department.
- The Council should consider whether the methodology and approach of these models are generally accepted in the scientific community, and particularly whether they are consistent with legislative intent or beyond the agency's statutory authority. A.R.S.§§ 41-1052(G)(6); 41-1052(D)(5); 45-576(M).

<u>The 25% Tax on New Alternative Supplies is Arbitrary</u>

The 2023 Phoenix model relied upon by ADWR to justify this rule, despite its faults as noted above, only projects a 4% deficit in available groundwater across the entire Phoenix Active Management Area model domain during the 100 year projection period. Only 2% of this projected shortfall is in the municipal/assured water supply/long-term storage credit recovery sector. Thus, for assured water supply purposes, this 2% shortfall is the "problem" sought to be reconciled by the proposed ADAWS concept.

Yet, under this proposed rule, the ADAWS applicant is first required to acquire or deploy a New Alternative Supply in order to qualify as an ADAWS applicant and, once acquired, the applicant is required to devote 25% of that new supply to a reduction in currently lawful groundwater use. This reduction is not tailored to any provider's actual use of groundwater or any relative contribution that provider or its customers may have made to any groundwater overdraft. Rather, it is an across the board requirement that seeks to force the ADAWS applicant to reduce its groundwater use by a factor of more than six times the projected shortfall in the entire Active Management Area.

No rationale, study, calculation, or empirical data is provided by the Department to support or justify the 25% tax on the New Alternative Supply. It is barely even mentioned in the preamble to the rule and is treated as if it were a benefit to the provider to "facilitate a transition away from groundwater."

As a simple proposition, requiring a few municipal water providers to bear a 25% groundwater tax on newly acquired or deployed non-groundwater resources to cure a 2% (or at most 4%) deficit largely created by others cannot be an "alternative that imposes the least burden and cost to persons regulated by the rule." A.R.S. § 41-1052(D)(3).

- No empirical evidence is offered by the Department to justify the 25% tax on a New Alternative Supply, making it an arbitrary percentage without rational basis on a cost/benefit analysis.

The 25% Tax on New Alternative Supplies is an Unreasonable Extraction

Similar to the arbitrary nature under which the 25% groundwater tax is imposed, the 25% tax on new supplies is a quasi-legislative exaction that exceeds the need to prove physically available groundwater under the assured water supply statute (A.R.S. § 45-576) and under a straightforward and reasonable interpretation of the assured water supply rules. If the modeling results show a 2% shortfall in the municipal/assured water supply groundwater (a determination that may still be subject to challenge), the exaction of a 25% reduction in groundwater available to the A-DAWS provider does not have a sufficient nexus to home building, exceeds home builders' proportionate impact on groundwater, and is contrary to the ruling in *Sheetz v. El Dorado County, California*, No. 22-1074, 601 U.S. ____ (April 12, 2024).

In both the preamble to the rules and in the Impact Statement, the Department characterizes the ADAWS concept as an "additional voluntary option[s]" to the existing rules that "create no new requirements." The Impact Statement goes on to state that "specific costs, benefits and impacts of this rulemaking were assess[ed] against these two alternatives—pursuing a determination of AWS [assured water supply] under the existing rules or not pursuing a determination." This analysis overlooks the fact that it is essentially impossible, at least in the most affected communities, to "pursue a determination of AWS under the existing rules." The ADAWS is not a voluntary option—it is the only option available to obtain new determinations of assured water supply in non-designated service areas or not to obtain a determination at all. When viewed realistically, the components of the ADAWS, particularly the 25% tax, is a mandated extraction to be able to continue development of subdivided land.

- The 25% tax on a New Alternative Supply is a government extraction on new development of subdivided land that is disproportionate to the need and not reasonably related to the problem, making it illegal under existing law and therefore not in compliance with A.R.S. § 41-1052(D)(3).

The 25% Tax on New Alternative Supplies will Directly Affect Home Builders

The preamble to the proposed rule and the Impact Statement build on the Department's characterization that any cost associated with compliance with the new rules will be borne by the water provider. For example, the Impact Statement (page 8) suggests that all costs will be borne by municipal provider ratepayers but "How these costs are distributed among the ratepayers is determined by the utility through ratemaking processes, which are specific to the provider and the community." As far as the cost impact to developers, the Impact Statement goes on (page

14) to state that the "water provider will decide how water supply costs are passed through to a developer. Compared to the traditional rules or no designation, these alternatives could allow for additional development."

- This is a rather naïve or intentionally misdirected view of the how the costs will actually be borne. It is common knowledge, certainly among experts in the water field, that utility service start-up costs for new development (water resource acquisition, infrastructure, regulatory compliance) are borne by the developer. In the case of ADAWS, a 25% tax on new supplies sufficient to allow development will be a cost to be passed on to developers, with the "understanding" that these costs are mandated by state law, not municipal provider regulation, and are therefore simply a cost of doing business. To assert that the economic cost of ADAWS will have no effect on small businesses, such as small home building concerns, is not justifiable (Impact Statement at page 13—Costs to Small Businesses—"None Identified"). From the HBACA perspective, as vetted with our constituent members over the course of many discussions, the cost of a New Alternative Supply, including the 25% tax, will be borne by the landowner/developer/homebuilder. The Department designed this tax to force water providers to reduce groundwater use. Yet, it is being imposed on the one industry that does not mine groundwater, does not contribute materially to any groundwater deficit, and does not receive any benefit over the traditional assured water supply program in place until the groundwater moratoriums became effective. The Impact Statement thus does not accurately reflect the true costs of the proposed rule and does not accurately reflect who will bear those costs, making it not generally accurate as required by A.R.S. § 41-1052(D)(2).
- The cost/benefit analysis does not address the inequity of imposing financial burdens on the homebuilding industry and makes no effort to select alternatives that impose the least burden on this particular industry that will be highly regulated by the rule.

The 25% Tax Is Compounded by the Need to "Gross Up" the Alternative Supply

Because the Department's characterization of the economic burden of the 25% tax falling solely on the water provider, it also overlooks the side of the equation that is concerned with meeting a specific quantity of water demand. For example, if a development needs 100 acre feet of water per year to satisfy the projected demand, and the developer is required to cover that demand, the developer must bring 100 acre feet net to the provider. If the developer attempts to bring 125 acre feet to meet the demand plus the 25% tax, the developer will still come up short. This is because the tax is imposed on the total quantity of the new supply. Proposed Rule A.A.C. R12-15-710 (H)(2) and (I)(2). If the New Alternative Supply Volume is 125 acre feet, the rule instructs that the 25% of the new volume shall be multiplied by 100 then subtracted from the provider's existing groundwater supply. Thus, the 25% of the 125 acre feet (31.25 acre feet) is the basis of the deduction. Translated back to the projected annual demand, this leaves only 93.75 acre feet to service the new development.

This calculation is familiar to anyone attempting to contemplate what gross amount is required to yield a desired net benefit, It is often referred to as a "gross up" calculation derived from the standard formula:

$$\text{Gross amount needed to offset new subdivision demand} = \frac{\text{Net amount homebuilder would have to convey to provider}}{1 - \text{25 percent "tax" on New Alternative Water Supply}}$$

$$\text{Gross amount needed to offset new subdivision demand} = \frac{100 \text{ AF/yr}}{1 - .25}$$

$$\text{Gross amount needed to offset new subdivision demand} = 133.33 \text{ AF/yr}$$

To the extent that any developer is required to cover the projected demand of a new development, it will be based on the net amount required to service that development. The acquired supply will have to be "grossed up" to yield the desired net. The tax to the developer is thus 33.33%, not 25%.

- The Rule package does not accurately calculate the true cost of the 25% tax because it fails to recognize the need to achieve a specific net increase in available water in order to provide sufficient resources for planned development.

The 25% Tax on is Further Compounded on Effluent

The definition of New Alternative Supply does, and is apparently intended to, cover the recycled and reclaimed water of effluent. As development occurs, new sewer collection and treatment systems are built. The reclaimed water (effluent) is generally recharged into the aquifer and later recovered, either on an annual or long-term basis. To be included within a designation, including ADAWS, the provider collecting, treating and eventually using the effluent must show that it is reliable under the terms of the assured water supply program. In years past, this effluent was considered a resource for new growth and, in many cases, the effluent created by large master planned communities was dedicated to the continued and ongoing development of those communities.

Under the ADAWS program, new growth will be required to bring 133.33% of its projected demand to the municipal provider to obtain a commitment of water service. The effluent generated by the development, if used for an addition to the ADAWS, will again be subject to a 25% tax to further reduce groundwater use within the provider's service area. This means that the water resource brought to the service area as a new supply will be taxed twice, and beyond, as each new iteration of effluent becomes subject to the tax.

Furthermore, the significant infrastructure required to collect, treat, and utilize effluent will also be subject to the 25% tax, as it will be producing a water supply that will be used to replace an existing supply that requires much less infrastructure. The Impact Statement, and the proposed rule package as a whole, does not consider or address this lost cost, most of which will be passed on to the homebuilding industry as the homebuilding industry is generally required to design, engineer, and construct this infrastructure as part of the cost of obtaining municipal water service.

Again, if the quantity of effluent is being used for new growth, and a specific quantity is needed to meet a proposed new growth demand, the "gross-up" calculation again applies, meaning that the provider must in fact dedicate 133.33% of the effluent to offsetting groundwater if it is to meet a net 100% volume for new growth.

- The Impact Statement does not accurately reflect the true costs of the proposed rule as it relates to infrastructure required to collect, treat, and utilize effluent and does not accurately reflect who will bear those costs, making it not generally accurate as required by A.R.S. § 41-1052(D)(2).

The Proposed Rule Exceeds the Statutory Authority of the Assured Water Supply Program

As frequently stated in the rule preamble and the Impact Statement, the principal goal of the assured water supply program is to provide consumer protection to those who choose to purchase homes in Arizona. Its fundamental purpose is to review whether or not a water supply for a development based on subdivided land will be secure for the next 100 years. The statutory guidance of A.R.S. § 45-576(M) is clear: "For the purposes of this section, "assured water supply" means ... Sufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years." This is a directive to ensure that the needs of the proposed use will be available, not a legislative directive to require, incentivize, or prohibit the use of any one particular water resource.

The HBACA understands that the protection of Arizona's aquifers is a legitimate state concern and that unbridled use of groundwater will lead to depletion of the groundwater resource. But the proposed rule attempts to use the assured water supply program to correct some shortcomings of the 1980 Groundwater Management Act on the back of certain uniquely identified water users, namely developers of subdivided land—which is basically synonymous with the development of for-sale residential housing. The homebuilding industry has been subject to the most stringent requirements of protecting the aquifers of the Phoenix and Pinal Active

Management Areas since the adoption of the assured water supply rules in 1995. Each subdivided development has been required to show, and do its part, to eliminate the use of mined groundwater within these Active Management Areas, either through the use of credits accrued from retirement of agricultural land or through active, and costly, groundwater replenishment.

The proposed rule seeks to impose yet an additional burden on the development of subdivided land by requiring the reduction in heretofore legal use of groundwater by only those municipal providers that do not currently have a designation of assured water supply. Furthermore, no distinction is drawn between water use sectors that are contributing to the use of "mined" groundwater and those, like for-sale residential housing, that are not. Rather, the clear impact of the rule package as a whole is to place the financial burden of reducing the unreplenished use of groundwater on the very sector of the economy that is not the source of the problem. The justification of the entire rule hinges on the benefits that the state as a whole might realize from enhanced groundwater restrictions, while ignoring the fact that the cost burden will fall largely on the homebuilding industry.

The assured water supply program is a vital part of the State's water management and a program that is vigorously supported by the homebuilding industry, but this program has its limits. By first creating an absolute prohibition on the legitimate use of groundwater, then proposing an "alternative option" to a moratorium on new subdivided land development, the cost of which will be borne largely by the homebuilding industry, the Department seeks to balance the groundwater budget by taxing those who are least responsible for the imbalance.

- The proposed ADAWS Rule is inconsistent with the intent of A.R.S. § 45-576 and beyond the agency's statutory authority, and thus not subject to approval under A.R.S. § 41-1052(D)(5).
- The proposed ADAWS Rule is made under a specific grant of authority but exceeds the subject matter areas listed in A.R.S. § 45-576, thus not complying with A.R.S § 41-1030(D)(1).

Suggested Modifications to the Proposed Rule to Place the Burden Where it Belongs

The HBACA recognizes that designations of assured water supply can be an excellent water management program for the Active Management Areas. To that end, we support a program that would provide an opportunity to overcome the current moratoriums in the Pinal and Phoenix Active Management Areas. We believe, however, that the proposed ADAWS rule takes an unsophisticated broadside approach to a complex problem of assigning the relative burden of the problem sought to be solved. We believe this could be largely mitigated if the rules were refined to accomplish the following:

- The mandatory reduction of the provider's current groundwater portfolio should be in direct proportion to the provider's current unreplenished groundwater use, rather than a one size fits all 25% tax on every provider.

- The cost of the reduction in current groundwater use should be targeted at those users within the provider's service area that have (heretofore and before the ADAWS is issued) been using groundwater without a replenishment obligation. This can be accomplished by creating a mechanism in the rule to determine the annual (translated to 100 year as appropriate) volume of this unreplenished use, then requiring the provider to offset that use by a percentage each year. This would tie the tax on new alternative supplies directly to offset groundwater mining and allow the provider justification for imposing that tax on industries other than the homebuilding industry.
- The mandatory reduction should have a limit. Once a provider becomes designated, and has reduced its groundwater consumption by the volume represented by heretofore unreplenished groundwater use, the tax should terminate.
- The tax should not be applied to effluent, which is an efficiency use of the water in the new alternative supply. Once taxed, that new supply should not be taxed again. A refinement may be to assign the tax to the relative percentage of heretofore unreplenished groundwater use within the provider's service area to again tie the tax to the mining problem sought to be solved.

These refinements do not address some of the underlying problems with the ADAWS approach, as discussed above, but they would make the program more palatable to the homebuilding industry, which is the major sector affected by the proposed ADAWS rule.

While the HBACA cannot support the ADAWS rules as proposed, we can work with the Department to make changes that would resolve the unfairness of the impact to our industry.

Very truly yours,

Jackson Moll
Chief Executive Officer
Home Builders Association of Central Arizona

Phoenix, Arizona 85007

Re: ADWR A.R.S. § 41-1055(B) ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT Review

Dear Ms. Scantlebury:

Elliott D. Pollack & Company was asked to conduct an initial review of the Economic, Small Business, and Consumer Impact Statement (EIS) produced by the Arizona Department of Water Resources (ADWR) for rule modifications titled, *"ASSURED WATER SUPPLY RULE MODIFICATIONS TO PROVIDE AN ALTERNATIVE PATH TO DESIGNATION OF A 100-YEAR ASSURED WATER SUPPLY (ADAWS) IN THE PHOENIX AND PINAL AMAS AND TO ALLOW CERTIFICATE OF ASSURED WATER SUPPLY APPLICANTS IN THE PHOENIX AND PINAL AMAS TO COMMINGLE WATER SUPPLIES FOR A LIMITED TERM"*. Our review does not opine on water policy. Rather, it focused on the merits of the Economic Impact Statement to determine if the probable economic costs and benefits to affected persons were properly identified.

Overall, the EIS only provided a narrative. It is lacking in critical analyses that support its assumptions or financial metrics that could inform affected persons of the costs or benefits of the proposed rulemaking. We also found several instances where persons directly affected by the proposed rulemaking were not identified. We found no evaluation within the EIS of any alternative policies that could achieve the stated goals. Lastly, there is no information explaining how current or proposed policies are impacting affected regions or Arizona's competitive position. This results in an incomplete Economic Impact Statement and does not properly inform the regulated public.

Assumptions

The EIS notes an important assumption related to the physical availability of water in the Phoenix and Pinal AMAs, citing ADWR's recent groundwater model results which lead to their decision to halt the issuance of designations and certificates that rely on groundwater. As the EIS states "For new growth to occur under current conditions and the traditional AWS rules, developers in these areas will need to find renewable supplies (such as surface water or reclaimed water), the municipality or water provider must secure enough renewable supplies to become designated without the inclusion of groundwater in the portfolio." The results obtained from the models were the basis to form the policy decision to halt the issuance of

Elliott D. Pollack & company

designations and certificates. This moratorium created the immediate need for the proposed rulemaking due to the economic costs from the initial policy decision that could follow.

It is our understanding that the methodology used in those models has been seriously questioned and ADWR's resulting policy decisions were issued without public input. Stakeholders have identified the main reason for there being any "unmet demand" was the placement of wells in the model, a process that stakeholders found to be extremely arbitrary and included many well locations that a municipal provider would not use in placing its own wells. The "Updated Model" prepared by water resource engineering experts Matrix Solutions Inc, indicates that all of the volume currently reserved in Analyses of Assured Water Supply are in fact physically available.

Apart from that those concerns, the modeling conclusions themselves did not appear to represent an immediate emergency, yet drastic policy decisions were initiated, necessitating solutions to mitigate the economic costs that would follow. We question whether such urgency in enacting the initial policy to halt economic growth was warranted without an analysis of the regulatory assumptions. Affording additional time for further analysis on such a crucial topic would be enormously beneficial to the state, its political subdivisions, businesses, and Arizona residents. The further absence in the EIS of potential alternatives, outlining cost and benefit comparisons, or any resulting conclusions as to how this rulemaking was determined to be in the highest and best interest of the state is alarming.

Another underlying assumption of EIS for the rule modifications made by the Department is that they expect this rulemaking "to have long-term economic benefits" by providing an alternative path to obtaining a Designation of 100-year Assured Water Supply (DAWS). The Department points out that the rulemaking will reduce costs and add flexibility which will enable new development that could not occur under current AWS rules. We see no analysis supporting the claim for long-term economic benefits, which should include an analysis of the policies on economic competitive positioning (both locally for ADAWS regions and nationally as a state). The barriers of obtaining limited renewable supplies, purchasing all projected water demand before placing development in service, and replacing groundwater appear to remain a substantial financial burden to ADAWS applicants.

There are several economic benefits claimed within the EIS for some affected persons, which include increased housing supply, mitigating population growth disruptions, increasing land values, lowering property tax burdens, increasing state revenues, and supporting the homebuilding industry. There appears to be consensus that the existing AWS rules created economic harm by halting new investment and growth within the affected areas. The EIS only demonstrates that the proposed rulemaking *reduces* current barriers and costs compared to current AWS rules but does not demonstrate whether the new rulemaking reduces those barriers sufficiently enough to enable lost growth and investment to resume as it could under the previous system.

Affected Persons Not Identified/Costs not Explained

We find the approach taken to analyzing the economic benefits and costs in the EIS to be flawed. The approach only compares the rule modification to the existing AWS rules. Thus, the EIS fails to identify or calculate many costs of the proposal to affected persons, including the cost of new water supply, the cost of new infrastructure, and their ripple effects. This should be rectified. The following are several examples:

- **Non-Designated Providers.** The EIS fails to adequately explain the costs to a non-designated provider in order to achieve designated status with additional replenishment obligations applicable to existing development and the requirements for new development.

- **Homeowners.** The EIS claims that homeowners who purchase new homes in subdivisions with AWS determinations based on renewable supplies and replenished groundwater would receive lower property tax assessments if the water provider were a CAGRD member service area because the homeowner is not directly responsible for paying a CAGRD replenishment assessment. This fails to identify the additional costs associated with higher water rates that would be inevitable. The water provider or municipality would recover the costs of replenishment through water rates. Any conversion from CAGRD replenishment obligation would fall to the water provider and, ultimately, the customer. No analysis is provided comparing reduced property taxes to increased water rates.

  Another gap in the economic analysis is the cost of shifting existing member lands from a replenishment obligation paid through the CAGRD to acquiring new non-groundwater water supplies to eliminate the replenishment obligation altogether. That cost analysis should include an assessment of the fact that as Member Lands, these subdivisions have already paid significant fees to CAGRD to acquire supplies to meet replenishment obligations. By rolling these subdivisions into ADAWS, such lands would in essence be starting over in acquiring new supplies. This cost impact merits in depth analysis, which is lacking.

  The EIS also does not identify higher costs to new homeowners in the form of higher home prices that would be necessary to develop homes in ADAWS regions. Reduced housing affordability also impacts local economic conditions and the state.

- **Existing Non-Subdivision Development.** The EIS does not identify new costs to existing businesses or residents in affected areas that currently have no replenishment obligation. Increased water rates to existing customers are highly likely to recover the cost of procuring and delivering renewable water supplies.

- **Future Commercial/Industrial Development.** The EIS does not identify the increased costs to developers or potential users of commercial or industrial (non-subdivision) development in the affected areas. Increases in cost of development and operating costs also impacts local economic conditions and the state.

Alternatives

The EIS provides no substantive assessment of alternative courses of action to ADAWS that could have less adverse economic impact, such as changes in rules, policy or practices that would result in greater physical availability of groundwater. There is no mention of potentially less costly solutions or comparing the cost to develop and procure renewable water supplies to systems currently in place like the CAGRD. As mentioned previously, ADWR stifles any analysis in the EIS with the assumption that there is no physical availability of groundwater to support new growth and as such, the only path forward for such growth is ADAWS as proposed by ADWR. Yet, there is no indication in the EIS that ADWR has assessed any regulatory ways to identify greater supplies of groundwater to be physically available.

An example of an alternative, mentioned previously in our review, is well movement. At a minimum, ADWR should have assessed the cost of well movement or other infrastructure improvements to improve access to groundwater supplies to achieve greater physical availability compared to the anticipated costs of acquiring the New Alternative Water Supplies.

A financial analysis and comparison are warranted to support the proposed rulemaking to other alternatives and the EIS is lacking any such analyses. There appears to be sufficient resources and available expertise to indicate whether the new rule amendments are the best solution to sufficiently reduce costs, induce economic activity, and achieve sustainability goals.

Competitive Positioning

There is no mention of how current or proposed policies affect the competitive positioning of either the ADAWS regions to neighboring municipalities or the State of Arizona to other states and countries. While the proposed rulemaking provides an alternative path to development compared to current AWS rules, the costs associated for the anticipated new development are not outlined or compared to the cost to develop elsewhere. The cost of development within the affected areas under the proposed rulemaking will be substantially higher and will vary widely from location to location within each service area. This will affect home affordability and the viability of commercial and industrial projects. Additionally, local water rates will rise from their current levels across the water providers service area.

An analysis of short-term and long-term competitive positioning is warranted for inclusion in the EIS. This would provide clarity on the potential magnitude of any expected benefits that the EIS claims. It would also identify challenges to mitigate in order to improve the competitiveness of affected regions and the state.

Sincerely,

Danny Court

Re: Home Builders Association of Central Arizona Comments on Proposed Changes to R12-15-704 (Commingling)

Dear Ms. Scantlebury:

On behalf of the Home Builders Association of Central Arizona ("HBACA" or "Association") please accept the following comments on the Department's proposed rules related to the changes to rule R12-15-704 as noticed in the Notice of Proposed Rulemaking published in the Arizona Administrative Register on August 23, 2024, Volume 30, Issue 34, starting on page 2634. Our comments are enumerated below.

1. **The Department's Explanation of the Proposed Rulemaking in the Preamble, Section 6, Demonstrates that the Proposed Rule is Inconsistent with the Authorizing Statute and Exceeds the Department's Legal Authority:** Section 6 states the Department's reasons for this rulemaking. The Department begins by discussing in some detail the difficulties faced by subdivision applicants in obtaining new non-groundwater supplies to support new assured water supply determinations. We certainly agree with the Department's descriptions of the difficulties generally – it's tough and it's expensive and it's time consuming, even potentially impossible in cases. However, the Department's proposed commingling rule requirements does not actually address these difficulties and is based on a flawed summary of the current requirements. The Department's proposed rulemaking proposes to make it harder than under current law for subdividers to use a new, non-groundwater water supply to obtain a Certificate of Assured Water Supply for a subdivision.

   a. **Current Law Authorizes a Subdivider to Demonstrate the Availability of 100% of a Non-Groundwater Supply to Obtain a Certificate of Assured Water Supply for a Proposed Subdivision.** We agree with the Department that the applicable statute for the existing Certificate of Assured Water Supply rule,

R12-15-704, is A.R.S. § 45-576. Section 45-576 provides, in relevant part, "a person who proposes to offer subdivided lands, as defined in § 32-2101, for sale or lease in an active management area shall apply for and obtain a certificate of assured water supply..." for the subdivision. Subsection 45-576.M, as relevant here, provides that an "assured water supply" means that "[s]ufficient groundwater, surface water or effluent of adequate quality will be continuously available **to satisfy the water needs of the proposed use** for at least one hundred years..." (emphasis added). Rule R12-15-704, the only rule to be changed in this proposed rulemaking, lists the items a subdivider is required to provide in an application for a Certificate. These include in 704.B **"[a]n estimate of the 100-year water demand for the subdivision"**, "[a] list of all proposed sources of water that will be used by the subdivision," and "[e]vidence that the criteria in subsections F and G of that rule are met. (emphasis added) Subsection 704.F (new applications) requires submission of evidence meeting a list of other rule requirements in R12-15-716 through R12-15-722.

R12-15-716 requires demonstration the new supply is physically available; R12-15-717 requires demonstration the new supply is continuously available; and R12-15-718 requires demonstration the new supply is legally available. R12-15-716, the physical availability rule, requires a subdivider to provide information about the proposed water supply for the subdivision that varies depending on the type of water offered. R12-15-717, the continuous availability requirement, requires evidence that there will be "adequate delivery, storage, and treatment works" in place in a timely manner to make the water available to the subdivision, with more specific requirements that vary depending on the type of water supply. For Certificate applicants, R12-15-718 requires a signed "Notice of Intent to Serve" agreement between the landowner and a water provider the meets the rule requirement. **If a subdivider demonstrates that 100% of the proposed use, in this case a non-groundwater supply will be supplied with available water as defined in A.R.S. § 45-576, the Department must issue the Certificate.**

b. **Current Law Does Not Prohibit a Water Provider from Commingling Water Supplies (There are No "Commingling Constraints")**. In section 6 of the Preamble, the Department explains its position regarding the proposed Certificate rule change as follows:

> *Additionally, ADWR must consider all water supplies in the system that are used to serve all water demands. If a municipal provider is relying on groundwater withdrawn within the AMA to serve its customers in combination with other supplies (often referred to as "commingling"), the groundwater must satisfy the Assured Water Supply criteria, including physical availability. Alternatively, sufficient alternative supplies must be obtained to replace all groundwater use.* ***Therefore, an application for a certificate or a designation under the current rules would require the replacement of all AMA groundwater supplies in the municipal***

> ***provider's system in order to satisfy the physical availability criteria in the Phoenix and Pinal AMAs.***

(emphasis added). The Department later in the Preamble refers to this argument as a "commingling constraint" and a "legal barrier" for subdividers. The Department's assertions above in this quoted text are inconsistent with the plain language in A.R.S. § 45-576 as to Certificate requirements and are inconsistent with the Department's own current rules. The authorizing statute does not require a subdivider/landowner to solve any quantity of perceived insufficiency in a water providers' overall planned water supplies for a water provider's **other customers**, and there is certainly no prohibition in this context on mixing water supplies in pipes. A.R.S. § 45-576 requires only that a subdivider/landowner demonstrate that adequate water is being committed to satisfy the needs of the **proposed use**, the new subdivision. There is further no statutory authorization for the Department to require a subdivider to acquire and commit 130% of a proposed subdivision's water use.

The Department anticipates and responds to this comment in the Preamble as follows:

> *Some stakeholders have suggested that ADWR could consider only the availability of the new supplies relative to the new demands, particularly for certificate applicants. However, such an approach ignores the reality that when the groundwater supply is no longer available to that provider, the municipal provider will be forced to reduce deliveries to all customers. Absent some legal constraint that requires the delivery of the alternative supply to the new subdivision (such as a surface water right that is appurtenant only to the subdivision lands), the new subdivision would be subject to the shortage associated with the groundwater supply just like all other customers in the service area. Therefore, even a developer that is willing to work with a municipal provider to bring in new, non-groundwater supplies* ***cannot proceed with subdivision development if the municipal provider will continue to serve some volume of groundwater to the subdivision****.*

(emphasis added). The Department in this quoted explanation is essentially asserting that the Department must deny a Certificate to a subdivider for a proposed subdivision adding a new water supply to a mixed (commingled) piped water system within the Phoenix AMA (or Pinal AMA) unless the subdivider contributes an arbitrary quantity of water exceeding the proposed subdivision's demand to first resolve all of the "unmet demands" in the 100-year regional assured water supply projections for <u>other water users throughout the basin</u>.[1]

---

[1] Groundwater supplies are not at issue when a subdivider brings 100% of a non-groundwater supply to support a Certificate, but the Department appears to be relying for its policy arguments in the Preamble on projections from early runs of the two cited regional groundwater models. These projections are outdated and should not be used to

Certificates of assured water supply are permits that a subdivider/landowner must obtain from the Department as a condition of subdividing the landowner's real property within an Active Management Area outside designation areas. *See* A.R.S. 9-463.01.I (cities and towns shall not approve a subdivision final plat unless the plat is accompanied by a Certificate); A.R.S. § 11-822.A (county cannot approve a subdivision plat unless it is accompanied by a Certificate).

If under the current statute and rules the Department were to deny a Certificate to a subdivider that has demonstrated an available non-groundwater supply for 100% of the proposed subdivision's demands solely based upon the fact that the new water supply will be "commingled" with a provider's other groundwater supplies in a region about which the Department is concerned, such a permit denial would be an unconstitutional taking under the Fifth Amendment of the United States Constitution. Requiring a single subdivider/landowner to secure and donate to other water users a new volume of water sufficient fill a modeled regional "hole" in an Active Management Area groundwater basin is clearly an unconstitutional permit condition. The United States Supreme Court earlier this year in *Sheetz v. County of El Dorado, California*[2] recognized that the question of whether a permit condition imposed on a landowner's use of its property is a taking can be complicated, but re-affirmed that permit conditions that require a landowner to give up more than is necessary to mitigate harms resulting from the new development have the same potential for abuse as conditions unrelated to the agency's purpose.[3] The Supreme Court held this constitutional limitation applies to the Department's Certificate requirements because it applies to all state and agency permits.[4] Under the Department's current rules, the Department must issue a Certificate when the subdivider has made the demonstration required under A.R.S. § 45-576.[5]

2. **<u>The Proposed Rule is an Unauthorized New and Disproportionate Tax on Subdividers</u>**. As explained above, the Department's proposal to require a subdivider/landowner in proposed subsection R12-12-15-704.N to donate 30% in excess of the water supply need of the new subdivision uses is effectively a new and substantial tax on subdividers. In practical terms, the value of this excess tax can be estimated in millions of dollars depending on the size

---

support this proposed rulemaking. The Department's groundwater models for conservative planning purposes artificially constrain "usable" groundwater to 1000 feet or 1100 feet below land surface even if more water is physically available at greater depths, and the model assumptions ignore legally-required replenishment that significantly supplements groundwater supplies over time. Relying on such model runs to broadly conclude that all water providers in the basins will cease providing mixed water service to newly proposed subdivisions in the 100-year period beyond a Certificate application date is not credible.

[2] 601 U.S. 267 (2024).

[3] 601 U.S. at 276, *citing Dolan v. City of Tigard,* 512 U.S. 374, 393 (1994).

[4] 601 U.S. at 276-279 (applies to states and agencies).

[5] *See also* A.R.S. § 41-1001.01(8) (a person is entitled to have an agency not base a licensing decision in whole or in part on licensing conditions or requirements that are not specifically authorized by statute or rule; *see also* A.R.S. § 41-1030 (providing for private enforcement action).

of the subdivision. The Preamble explains that, through the wording in subsection 704.N.4 of the proposed rule, the water provider would be responsible for securing the extra 30% supply, but this wording belies the fact that this rule is **a licensing requirement for individual subdividers** (not a rule applicable to water providers). This explanation ignores the obvious reality that subdividers in Arizona are routinely required to bear the cost of all new burdens placed on water providers and local jurisdictions by new development, and that burden will include this 30% donation. If the Governor's Water Policy Council feels strongly that Certificate water providers should be required to obtain 30% additional water supplies to support their existing customers as a matter of good water planning policy, then this new policy direction appropriately needs to be addressed outside the agency's licensing process for individual landowners, and outside this agency rulemaking process.

3. **The Proposed Rule will be Invalid under A.R.S. § 41-1030.A.** The proposed rule, requiring a licensee to donate 30% more water than is required to support the proposed development within the subdivision is invalid because, as is explained above, the rule is unconstitutional, inconsistent with the authorizing statute, and is not reasonably necessary to carry out the purpose of A.R.S. § 45-576, which is to require a subdivider to demonstrate 100% of the projected demand.

4. **There is No Reasonable Basis for the Date Restriction in the Rule**. We are confused why the rule contains a date limitation. Subdividers will still be able to obtain Certificates under A.R.S. § 45-576 without using the new rule without a date limitation. The end date for the proposed new rule language seems to have no rational relationship to the topic addressed in the rule. Does the Department intend with this date limitation to effectively end the issuance of Certificates not complete and correct on or before June 30, 2027? If so, this date limit is inconsistent with the authorizing language in A.R.S. § 45-576.

5. **Enrollment of Subdivisions as Member Lands in CAGRD is Not Required under Any Existing Law for Subdividers Demonstrating 100% Non-Groundwater Supplies for a Subdivision, even If the Water will be Mixed with Other Water in the Pipes. The Proposed Addition of a CAGRD Enrollment Licensing Requirement for Subdividers Who Also Choose to Donate 30% More Non-Groundwater Supplies to the Water Provider's Other Customers, Makes No Sense.** The Department has not provided a reasonable explanation for the requirement that a subdivision must be enrolled in the Central Arizona Groundwater Replenishment District (CAGRD) if the subdivision water supply availability is demonstrated using 100% non-groundwater supplies, even if that water is physically mixed with other water supplies. There is no existing law requiring water users to replenish groundwater when there is no groundwater use. Enrollment of a property as a member land in the CAGRD is a substantial added cost for a subdivider to obtain a Certificate (the license), another unauthorized tax, without a need for the enrollment for the subdivision in the application. For scope, the current cost to enroll one residential lot in the Phoenix AMA in CAGRD (that will not be using its services) is $391 for enrollment, with a required payment for a portion of advance replenishment, and an activation fee of $1,596. For enrollment of a 100-lot subdivision, this current cost would be approximately $200,000.

6. **The Preliminary Summary of the Economic, Small Business, and Consumer Impact Statement is Insufficient.** As described in the comments above, the proposed rule language would impose effectively new and substantial costs in the nature of a water tax and unnecessary CAGRD fees on individual subdivider/landowners seeking a license from an agency. The Department's description of this impact as a non-substantive change is inaccurate and vastly understates the costs. Further, although the Department describes the rule as a new "voluntary" path to secure a Certificate, the Department's indication in the Preamble explanation that the Department will deny Certificates to subdividers under existing rules even if they commit 100% of subdivision water demand through the application makes clear the Department believes it has closed the existing pathway to secure a Certificate (without a legislative change or rulemaking). Almost all Certificate water provider water systems in Arizona will be commingled, so the Department's position stated in the Preamble has broad applicability. This impact section needs to be revised to more accurately reflect the new burdens to be imposed on most subdividers seeking a new Certificate.

We appreciate the Department's consideration of our comments and request the Department abandon this proposed rulemaking in favor of a more appropriate future planning process.

Very truly yours,

Jackson Moll

Hello,

Casa Grande has been built out with the existing infrastructure that was installed before the 2008 housing collapse. Now the only new housing being built here are apartments because they aren't subject to getting a water certificate for each apartment like it has to be done with every house.

If the new method of ensuring a 100 year water supply doesn't apply to apartment complexes, condos and townhouses what's the point?

No new apartment complexes should be approved anywhere unless they can secure the same water rights as houses.

The new method must include houses and apartments, condos and townhouses.

Thank you,

Jameson Dedon

If they cannot provide 100 yrs of guaranteed water.... no go. Housing costs are already wicked high. You can't have a neighborhood w/o water. They had it right in the 80's. Don't sell out our natural resources. The future gets bleaker and bleaker with each passing year. Slipping and sliding values....just a slight adjustment here or there....and no one considers anything other than money. We skirt the laws of man and run over the laws of nature/God. This is a sell out by elected government. I am appalled at how easily we "give it up". Backbones are missing here. Stand up for reality.

RE: Keeping the American Dream Alive

Dear Chair and Council Members:

People have been moving to Arizona for decades to improve their station in life. Many started new businesses, employing workers and creating a society that makes us all proud.

Pinal County has been able to attract more than its fair share of vigorous, modern and sustainable businesses. One of the major reasons for the stampede to Pinal, is that business owners knew that their employees could easily achieve the American Dream of home ownership. Additionally, many Phoenix and Tucson residents have been priced out of their local market but were able to find value in Pinal.

New development of single-family housing has practically come to a standstill because the water supply has been turned off. In the short run, reducing the supply of homes will raise prices. In the long run it makes us look like poor civic

managers and will discourage businesses from locating to Arizona.

Arizona has a long history of collaboration on water issues for the public benefit. It would be a shame if this legacy ended today.

Sincerely yours,

Rebecca Roberts

Dear Chair and Council Members:
RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to

520.858.0600 | 950 West Elliot Road, Suite 122, Tempe, Arizona 85284 | arizonasonoran.com

invest in. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

George Ogilvie, P.Eng.

RE: Comments pertaining to ADAWS (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Ms. Klein and Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital to promoting sustainable water management and economic growth in our state.

I have been active in community development in the Phoenix area since 1999, and companies with which I have been a principal have entitled, developed, financed, or sold more than 10,000 single-family residential homesites in over 20 communities (we are currently developing a 550-lot community in Maricopa). About 10 years ago, we attempted to acquire a 3,500+ acre parcel of land in Casa Grande for a mixed-use master-planned community of over 13,000 residential units. Although we were ultimately unable to make that acquisition, I followed the project's entitlement progression, which included being granted an "Analysis of Assured Water Supply" by ADWR and the expansion of Arizona Water Company's CC&N to include the project. However, in the wake of updated ADWR water models, the rigidity of the Assured Water Supply Program crippled Arizona Water Company's ability to become a Designated Water Provider for the project, indefinitely stalling the project's development.

With countless other examples of similar circumstances throughout Pinal County (particularly in Casa Grande and Coolidge), the ADAWS represents a thoughtful step forward for water policy in Arizona, and ADWR should be commended for its efforts. For this reason, I am writing to express my support for the ADAWS rules package submitted by ADWR on October 7th, 2024.

I look forward to your approval of these new rules and the economic and community development that is sure to follow.

Cordially,

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

As a local property owner, I am writing to express my strong support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option, which provides a balance between the two existing methods for securing an assured water supply determination. This new rules package introduces a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Many Representatives from business sectors in Pinal County are submitting letters outlining their support for ADAWS and I fully support and align with their perspectives. I encourage you to consider the adoption of the ADAWS, as it represents a significant advancement for Pinal County.

Given the current conditions on the Colorado River and increasing concerns regarding record heat, it is more important than ever that Arizona's Assured Water Supply program reflects our commitment to sustainable practices and demonstrates that Arizona remains a safe and attractive place for investment. The proposed rules package addresses recent groundwater modeling challenges that have hindered the issuance of new assured water supply determinations. Crucially, these new rules provide additional avenues for water providers to secure the necessary determinations while allowing land without existing ones to facilitate the construction of affordable housing in Pinal County.

11142 GARVEY AVENUE • P.O. BOX 6010 • EL MONTE, CALIFORNIA 91734-2010 • (626) 448.6183 • Fax (626) 448-5530

We, as a community, can no longer rely on a groundwater-only solution. As time progresses, housing becomes less affordable, and each delay in investing in sustainable water supplies further exacerbates the issue. The new rules present a reasonable and forward-thinking path to continue our community's development.

Thank you for your attention to this critical matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and responsive to our communities' needs. I look forward to your support in approving these crucial new rules.

Very truly yours,

Robert W. Nicholson

I am pleased to read that new action is being taken with regard to our water supply here in Pinal County. I am of the understanding that new housing construction in Pinal County labeled "Build to Rent" is exempt from the 100 year water supply rule. You have to wonder if there will be enough ground water to support all this new Build to Rent construction, especially under our current drought conditions.
I would hope and strongly suggest the ADWR will eliminate this free-pass to developments labeled Build to Rent.

Dear Members,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Thank You,
-Jack Roman

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156)

Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair Jessica Klein and Members of the Governor's Regulatory Review Council,

I am writing to express my strong support for the ADAWS and Commingling rules package submitted by the Arizona Department of Water Resources (ADWR) on October 7th, 2024. I appreciate the Council's dedication to creating balanced regulations that serve Arizona's citizens and businesses while ensuring sustainable water management practices.

The ADAWS option provides a critical alternative method for securing an assured water supply determination, which will be essential for economic growth in areas like Pinal County. These new rules represent a meaningful step forward, offering a much-needed solution to the current limitations on groundwater supplies. In particular, this alternative will enable land without existing water supply determinations to be developed, allowing for the construction of affordable housing and other key infrastructure.

Given the urgent need for new housing in our region, and the environmental challenges we face, it is imperative that we adopt this new approach to water management. The proposed rules package addresses these needs, promoting responsible development while safeguarding Arizona's water resources.

Thank you for your attention to this matter, and I urge the Council to approve the ADAWS and Commingling rules package.

Sincerely,
Scot Dietz

These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Steve Zurga

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair, Council Members, and Members of the Governor's Regulatory Review Council,

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions.

I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Phoenix, Arizona 85007

RE: Alternative Designation of Assured Water Supply

Dear Chair Klein and Members of the Governor's Regulatory Review Council:

The City of Buckeye spans a planning area of 640 square miles, making it the largest city by land area in Arizona. Over the past five years, Buckeye has been one of the fastest-growing cities in the United States. With a current population of approximately 115,000 residents, our city is projected to reach nearly 300,000 residents by 2040 and over 1.1 million residents at full buildout. Buckeye leads the nation with the highest percentage of homeowners, highlighting our critical role in meeting regional demands for affordable housing. Moreover, Buckeye is essential to the state's economic development and job creation efforts, with more than 50 million square feet of commercial projects currently in the development pipeline.

Buckeye's size and economic potential underscore the urgent need for collaboration between city and state leaders to develop practical solutions that address our future water needs while safeguarding the sustainability and health of the aquifer. While we are committed to working collaboratively towards a regulatory or legislative solution, the City of Buckeye has significant concerns with the proposed Alternative Designation of Assured Water Supply (ADAWS) which are outlined below.

2023 Phoenix Active Management Area Groundwater Model
The ADAWS rules are predicated solely on findings from the 2023 Phoenix Active Management Area (AMA) Groundwater Model (2023 Phoenix Model), which projects a four percent "unmet demand" within the Phoenix AMA. However, it is crucial there be a shared consensus regarding the model's efficacy before creating a regulatory framework based exclusively on its findings.

The 2023 Phoenix Model was released without any input from community stakeholders and fails to incorporate several fundamental and accepted water management practices, including: (1) demand calculations based on current water efficiency standards and conservation measures; (2) replenishment requirements for residential uses; and (3) the beneficial use of effluent by service providers. These omissions are significant.

Additionally, the "unmet demand" is determined by the exceedance of a 1,000-foot depth limit at projected groundwater well locations. Simply redistributing these well locations to accurately reflect pumping could

530 EAST MONROE AVENUE | BUCKEYE, ARIZONA | 85326
623.349.6991 | DCOTTERMAN@BUCKEYEAZ.GOV | BUCKEYEAZ.GOV

resolve much of the projected "unmet demand." Reputable modeling conducted by Matrix New World has been presented to the Arizona Department of Water Resources (Department), demonstrating these well location adjustments would eliminate the projected shortfall. However, the Department has declined to make any modifications to the 2023 Phoenix Model.

Even if the Department remains confident some level of "unmet demand" exists, it is reasonable to assume the deficit would be significantly reduced, warranting alternative regulatory solutions that impose a lesser burden and cost.

25 Percent Groundwater Offset Requirement

The City of Buckeye strongly opposes the 25 percent groundwater offset requirement for each new alternative water supply included in R12-15-710. This requirement places a substantial financial burden on the city and its residents. For instance, our pending purchase of Harquahala water would cost taxpayers more than $20 million to offset existing groundwater pumping. The groundwater volume included in the ADAWS is primarily from Certificates of Assured Water Supply (CAWS), which are already required to be replenished. Therefore, the offset is effectively a double fee on ratepayers who are already paying for groundwater replenishment through property taxes to the Central Arizona Groundwater District.

Moreover, the 25 percent offset also applies to effluent generated from new alternative water supplies. As a result, this water could be subject to multiple layers of the offset rule each time it is treated, compounding the actual offset and cost far beyond 25 percent. Such an impact would place a significantly greater financial burden on Buckeye residents than on those of other cities. Additionally, by the Department's own admission, the complexity of the rule makes it challenging to evaluate the quantitative impacts on water users. It is unreasonable to ask the city to participate in ADAWS if we cannot clearly and concisely explain its impacts to the public.

The Department has not provided a study or justification for selecting the 25 percent offset. Its response in the GRRC rulemaking package notes that the 25 percent offset is less burdensome than the initially proposed 30 percent. However, without a foundation for the original percentage, it is reasonable to believe the intended benefits could similarly be achieved with an even lower offset percentage of 20, 15, or even 10 percent. The proposed offset represents a considerable cost to ratepayers, and without detailed justification, the proposed 25 percent offset is arbitrary and capricious.

If it is determined that an offset requirement is necessary, it should be exercised equitably across the entire Phoenix AMA to all designations that contain groundwater allowances. It is not fair or reasonable to ask Buckeye or other ADAWS cities to solely bear the responsibility for reducing "unmet demand" while other traditionally designated providers, also using groundwater, are offered expedited review using the previous groundwater model.

Agriculture-to-Urban Conversion Program

While the agriculture-to-urban conversion program (ag-to-urban) is not explicitly included in the proposed rules, Buckeye has made it clear the ADAWS framework, as proposed, cannot succeed without this program. Converting water-intensive agricultural land to residential use is critical for Buckeye's future growth. This conversion would provide the necessary resources and certainty for ADAWS while also offering significant long-term benefits for the aquifer, saving over 100,000 acre-feet of water annually in Buckeye and 1.57 million acre-feet across the Phoenix AMA over 100-years.

Despite the inextricable link between ADAWS and ag-to-urban, the ADAWS rules fail to create a mechanism for incorporating groundwater volumes from these conversions into the designation. In fact, rule R12-15-710 (H) states the "Director shall not include any additional sources of groundwater withdrawn from the AMA…" in the ADAWS designation. Given the enormous significance of this program, the Council should ask the Department to pursue a cohesive regulatory or legislative solution for ag-to-urban.

Conclusion

A common refrain among city leaders is that "we are in the forever business." This is especially true when it comes to water. Buckeye is dedicated to meticulous planning, aquifer protection, and ensuring our residents are guaranteed the consumer protection provided by a 100-year water supply. The city is continuously engaged in efforts to secure additional alternative water supplies, and we are committed to building some of the most water-efficient homes in the United States in collaboration with our development partners.

Implementing innovative water resource solutions is essential—not just for Buckeye, but for the economic health and growth of the entire region and state. This decision is too important to get wrong and should be weighed carefully. We can and must develop water policies that address the unique challenges facing Arizona, the Phoenix AMA, and the Buckeye community. The ADAWS program, as currently proposed, does not meet this standard.

Buckeye remains committed to working with the Department to ensure ADAWS is successful, not just for private water companies, but for the city as well. We have consistently shared our feedback and concerns regarding the proposed rules, and we hope to continue collaborating toward a balanced solution. As a key driver of Arizona's economy, Buckeye plays a vital role in creating new high-tech jobs and providing affordable housing that benefits the entire state.

Thank you for your consideration, and please let us know if we can provide any additional information.

Sincerely,

Dan Cotterman
Buckeye City Manager

Re: Proposed DWR Water Rules

Dear Chairperson Klein,

I represent the Home Builders Association of Central Arizona ("HBACA" or "Association") and write concerning the Department of Water Resource's ("DWR's" or "Department's") August 23, 2024 proposed rules ("Proposed Rules") regarding designations of assured water supply. I am writing to request that the Governor's Regulatory Review Council ("Council") reject the Department's Proposed Rules

As explained below, the Association believes that the Proposed Rules suffer from significant substantive and procedural flaws. It therefore respectfully requests that the Council reject the Proposed Rules if they remain in their present from. The Association wishes to highlight six key deficiencies in the Proposed Rules by this letter.

First, the Proposed Rules do not comply with the statute they purport to implement. In particular, the Rules' proposed modifications to the requirements for obtaining designations of adequate water supplies for new construction projects is unlawful.

The proposed rules provide that "[e]xisting groundwater pumping is grandfathered into the" existing system. 30 A.A.R. 2,620, 2,625 (Aug. 23, 2024). But for obtaining new designations of adequate water supplies, a "portion of the new supplies (25%)" is excluded. *Id.*

As a practical matter, the Proposed Rules would impose a de facto water tax on new construction that obtains designations under the Rules. Existing groundwater users, who are explicitly grandfathered into the prior system, need only demonstrate adequate water for *their* uses. But for *new* users, such as new housing developments, the new supplies of water that they bring to the table would be reduced by 25%. Because of the 25% reduction, new users will have to obtain an additional 33.3% of water supplies, such that when the 25% haircut is applied, they can satisfy the Proposed Rules' standard. The Proposed Rules thus

would effectively impose a 33.3% water tax on affected builders.

This water tax is unlawful because it violates A.R.S. § 45-576, which the Proposed Rules purport to implement. That section provides in relevant part that "[f]or the purposes of this section, 'assured water supply' means … [s]ufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years." A.R.S. § 45-576(M).

The critical language here is that a developer seeking a designation of adequate water supplies is only required "to satisfy water needs of the proposed use"—*i.e.*, their own use, *not* the water uses of *others*. By forcing new users to obtain sufficient water to satisfy their needs *plus* another 33.3%, the Proposed Rules would compel new applicants not only to satisfy their *own water needs*, but a substantial portion of the water needs *of other users*. That squarely violates § 45-576(M), which only requires applicants to obtain water to satisfy their own uses for 100 years.

Nor can the Proposed Rules' water tax be justified as requiring new applicants to account for their share of the projected deficits in future water supplies. The Proposed Rules rely on a 2023 Phoenix model that estimated a future 4% deficit/shortfall in water supplies. The proposed 33.3% water tax wildly exceeds this 4% projection and is thus arbitrary and excessive.

The upshot is that the Proposed Rules impose a de facto 33.3% water tax on new uses, which would effectively function as an intentionally redistributive water tax. Existing users are explicitly grandfathered into the existing system, and thus need not come up with new supplies themselves. Their contribution to addressing the projected water deficit is thus *zero*. The Proposed Rules thus essentially balance the projected water deficit purely on the backs of *new* users.

A.R.S. § 45-576(M) does not permit this sort of redistributionist scheme. It only permits the Department to require that applicants obtain sufficient water for *their* "proposed use"—not the uses of *others*. To the extent that the Department wishes to transfer the burden of water uses by existing uses to new users, it would require new authorization from the Legislature. A.R.S. § 45-576 not only fails to provide authorization for such redistribution, it *affirmatively prohibits* it.

Second, and relatedly, the Proposed Rules fail to account for the requirements applicable for licensing decisions under A.R.S. § 41-1030. The Proposed Rules admit that their new standard "is a license." 30 A.A.R. at 2,628, 26,38. Under § 41-1030, agencies cannot impose licensing requirements "that [are] not *specifically authorized* by statute." (emphasis added). But here § 45-576(M) specifically *precludes* redistributionist water mandates, rather than specifically *authorizing* it.

Third, the Proposed Rules' estimates that the resulting costs are "expected to be minimal" 30 A.A.R. at 2,627; 2,637, is gravely flawed—indeed, indefensible. So too is the Department's refusal to attempt to quantify those costs.

As the Department is undoubtedly aware, obtaining new supplies of water in Arizona is hardly costless. Arizona is not Florida, which in many regions is teeming with virtually unlimited water sources. It is rather a desert state, in which water is scarce. That is, after all, the reason for Arizona's quite-stringent 100-year requirement of § 45-576. The suggestion that coming up with an additional 33.3% in water supplies beyond what the proposed applicants will actually use themselves would have only "minimal" cost is, on its face, absurd.

The Department's "minimal" cost estimate appears to rest on the premise that the Proposed Rules offer a new "option" to developers that did not previously exist. That premise fails on multiple levels. As a practical matter, the Proposed Rules represent the *only* manner in which the 100-year, adequate-water supply mandate of A.R.S. § 45-576 could be satisfied for new home construction in many areas of Maricopa and Pinal Counties.

In any event, the simple and inescapable fact is this: if applicants elect to obtain designations of adequate water supplies under the Proposed Rules' standards—*i.e.*, by paying the 33.3% water tax—they will incur *significant costs*. But the Proposed Rules make no effort to quantify or analyze those costs, instead merely hand-waiving them off as "minimal." So if applicants use the Proposed Rules, there will be significant costs that the Rules did not analyze. That renders the Proposed Rules unlawful.

Ultimately, the Department's pretense that it may (1) impose a 33.3% water tax in the Proposed Rules and then (2) refuse to analyze what the costs imposed by that water tax will be, is indefensible. The Department is *required* to analyze what the costs of the Proposed Rules will be. *See*, *e.g.*, A.R.S. § 41-1055. A water tax that imposes a new regulatory burden on the regulated parties is one such cost that *must* be analyzed. The Proposed Rules' failure to do so renders them unlawful.

Fourth, as the Association has explained previously, the Department's reliance on the 2023 Phoenix Model is flawed. Adjusting that model with reasonable placement of wells eliminates the anticipated 4% water deficit.

Fifth, the Proposed Rules' promulgation is procedurally deficient under the Department's proposed schedule. Here, the Department submitted the Proposed Rules to the Council on October 7, and has requested consideration at its November 5 meeting—*i.e.*, only 29 days later. But A.R.S. § 41-1052(I) requires a minimum of 30 days for public commenting before the Council may consider a

proposed rule. The Department's proposed schedule is thus unlawful.

Sixth, the Proposed Rules violate A.R.S. § 41-1052. Notably, § 41-1052 (D)(8) requires that a preamble to a rule shall "disclose[] a reference to any study relevant to the rule that the agency reviewed" and whether the agency "did or did not rely" on it. But although the Proposed Rules plainly rely on the 2019 Pinal Model and 2023 Phoenix Model—which are *studies* analyzing projected water uses—both Rules' preambles stated "None" for relevant studies. *See* 30 A.A.R. at 2,627, 2,637. That non-disclosure violates A.R.S. § 41-1052(D).

In addition, because the Proposed Rules rely on those 2019 and 2023 studies, and "a person [has] submit[ted] an analysis to the council questioning whether the rule is based on valid scientific or reliable principles or methods"—including the Association's comments on the Proposed Rules, this Council "*shall not approve the rule* unless the council determines that the rule is based on valid scientific or reliable principles or methods that are specific and not of a general nature." A.R.S. § 41-1052(G) (emphasis added). The Department has not yet provided the Council with *any* basis for making such a determination.

Please feel free to contact me if you have any questions or would like to discuss any of this further. I can be reached at (480) 773-1411 and agould@holtzmanvogel.com.

Respectfully,

/s/ Andrew Gould

Subject: ADAWS and Comingling Rule Concerns
To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Hello ,

Even though the current freeze on groundwater usage is significantly reducing desperately needed land supply, which is currently driving up land prices, and further reducing future affordability, we are very concerned about the current ADAWS and Comingling rules as part of the solution. Homebuilding and homeowners already replenish all of their groundwater use and protect our future supplies. Requiring landowners, home builders, and therefore future homeowners to bear the significant burden of water usage for all other land uses is not a good solution. Adding the 33% ADAWS and 30% Comingling water tax to the homeowners real water use is further deteriorating affordability and the dream of homeownership. Letting all the other industries not be responsible for their water use and not having them participate in the water solution to just force it on future homeowners is not good state leadership or rulings. We respectfully ask that this water tax not be approved.

Thank you for your time and consideration. Have a good day.

To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Dear Governor's Regulatory Review Council (GRRC),

I am writing today to express my opposition to the proposed rule changes related to designations of assured water supply. I (as a representative of Camelot Homes) feel these proposed rule changes impose unnecessary conditions and financial burdens on the homebuilding industry and requests that the Council summarily reject these changes.

The homebuilding industry has replenished and protected its groundwater use since 1995. We do not intend to change this in the future and respectively just want to continue building homes without all of the unnecessary burdens proposed by these changes. As you are all aware, Arizona has a severe housing shortage (as large as any State in the County) and adding a "water tax" to future homeowners will only hurt this shortage in the near and the long term. Asking future homeowners to pay more than their fair share will just continue to put new home ownership out of reach for more and more hard-working families. Assigning a 33% "water tax" to specifically the homebuilding industry (and no other landowner / users) is frankly unfair and will just continue the same water problems for years to come. Why not impose this same tax to the multi-family / industrial / office / or retail sectors of the development industry? Or better yet, what about future semi-conductor plant(s)?

I have seen no data or information that shows that these new rules will do any good in fixing our water problems. This 33% water tax on future homeowners literally makes no sense and has no justification. To put it bluntly, these rules are illegal and state statute clearly outlines that our housing projects should pay 100% and no more than 100% of our share.

I appreciate your taking the time to read this email and hopefully will applaud your actions when you reject these water rule changes.

Thank you for the consideration.

GRRC Members,

I'm writing today to express my strong opposition to the proposed ADAWS and Commingling rules. Requiring us to obtain 133% of the water needed in the ADAWS proposal, and 130% of the water needed in the other, is an undue burden, and amounts to a thinly cloaked tax. Out of all industries and different types of water uses granted certificates, homebuilding uses the least amount of water. Industrial, retail, office, multi-family, agricultural all use more water than homebuilding, and yet are sailing through with approvals and not being asked to carry any additional burden. As an industry, we have been replenishing the groundwater aquifers in our developments since 1995. We are the only industry to do so across the entirety of the industry. Further, we have a severe affordability crisis in housing in Arizona, and this will significantly exacerbate that problem.

What is the justification for this punitive policy proposal? Will it fix the state's water problems? Are these proposed new rules legal? State statute currently requires us to bring 100% of the water needed only, which makes sense.

To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Dear Governor's, Regulatory Review Council,

I am writing to express my opposition to the proposed rules by the Arizona Department of Water Resources regarding the Alternative Designation of Assured Water Supply and the comingling rule. Since 1995, the home building industry has effectively replenished groundwater while addressing housing needs. With Arizona facing a housing affordability crisis, adding costs for future homeowners will only push housing out of reach for many, worsening accessibility for families.

Homebuilding uses less water than many other sectors, like agriculture and industrial, which face no similar restrictions. It's unfair to expect homeowners to subsidize water for other land uses, and the proposed 33% and 30% water taxes are unjustified and burdensome. ADWR has not shown that these rules will resolve water issues, nor have they consulted with the HBACA, raising transparency concerns.

Additionally, these rules may violate state laws requiring new projects to secure their own water supply. I urge the Council to reconsider the potential negative impacts on housing affordability and our communities.

Thank you for your attention,

Tisha Ferguson

To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

GRRC Members,

I'm writing today to express my strong opposition to the proposed Alternative Designation of Assured Water Supply rule and commingling rule.

A requirement to obtain 133% of the water needed in the ADAWS proposal, and 130% of the water needed in the commingling rule proposal, is an undue burden, and elevates the cost of housing in Arizona when home affordability is already at crisis levels. Effectively, this is an unnecessary tax, and would only worsen home affordability for hard working families.

Housing/homebuilding uses far less water than many other industries and different types of land uses, including industrial, retail, office, multi-family, and agricultural, yet those heavier uses seem to sail through with approvals and are not being asked to carry any additional burden. As an industry, homebuilding has been the only industry replenishing the groundwater aquifers in our developments for roughly 30 years. Homeowners should not be singled out to subsidize the water supplies for other users. If other land users are not responsible for their water use, Arizona's water issues may never be solved.

Growth should rightly pay its fair share, but only that. State statue fairly requires that new housing projects bring 100%, not more, which calls into question the legality of the proposals.

Subject: OPPOSE DWR'S ADAWS AND COMMINGLING RULES
To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

GRRC Members,

I am writing today to state my opposition to the proposed commingling rules within ADAWS. The new language is adding an undue burden with extra steps and hidden taxes due to the increased requirement for water, requiring 133% in ADAWS areas and 130% in other areas. Arizona has a severe housing affordability crisis and water is already expensive, adding the extra requirements will add to the struggles of our hard-working families. Homeowners already carry the burden, unlike industrial, retain, office, multi-family and agricultural. These new rules are adding on top of the current burden while housing using the least amount of water.

Homebuilding has been doing its part in replenishing ground water since 1995 and pay for 100% of water, what justification is there to saddle them with more? Is it legal? We want to keep building homes, protecting our groundwater, and not overburden our homeowners with extra costs and regulation.

Thank you,

I am submitting a comment re: AZWA 100 year certificate via "alternate" sources.
1) we have not been provided any studies that prove this works
2) Water, and the lack thereof is a HUGE issue for current residents of AZ. Isn't putting our aquifers at risk for more population against Pinal County development rules, AND I would think, State and WHO rules
3) Ruling by NOVEMBER 5TH???? Really? As the above questions do not seem to have been addressed, why the RUSH? Unless science and all common sense AND "water is a right" rules will prove this to be a DANGEROUS proposition.

Thank You

Phoenix, Arizona 85007

Re: Comments on the Proposed Alternative Designation of Assured Water Supply Rules

Dear Chairperson Klein and members of the Governor's Regulatory Review Council,

Please accept these comments relating to the proposed Alternative Designation of Assured Water Supply Rules. While we commend the Arizona Department of Water Resources' (ADWR) efforts to address the moratorium put into place by Governor Hobbs on new determinations of assured water supply in the Phoenix area, we have serous concerns about this proposal.

Firstly, the underlying reasons behind the need for an *Alternative* Designation of Assured Water Supply warrant serious scientific study and scrutiny. The 2023 Pheonix AMA groundwater model the estimates a 4% deficit in groundwater supplies in 100 years makes broad assumptions about points of groundwater withdrawal, existing and future water supplies, and future demand, which are proving to be far too simplistic and serve to overstate groundwater withdrawal.

Secondly, the ADAWS program places a 33% tax on homeowners in areas served by the ADAWS program. This tax is a subsidy, paid for by homeowners, to ensure water is in place for other industries unaffected by ADAWS rules, such as commercial and industrial users. This 33% tax does not pass the "rough proportionality" test pertaining to the 'tax' and the impact of the development on the community. Put simply, Arizona homeowners cannot and should not bear the burden of funding water supplies for corporate apartment interests, large scale industrial users, corporate commercial conglomerates, and the like. Besides being politically radioactive, this fee structure is likely to be found illegal if enacted.

Finally, as you all know, Arizona has a well-documented and severe housing affordability crisis. The single largest reason for this crisis is a significant shortage of available housing within our state. The fastest way to solve this crisis is to increase supply through the responsible construction of new homes.

This water moratorium is becoming a key contributor to the affordability crises in the Phoenix metropolitan area. A crisis that is only growing and putting homeownership out of reach for increasing segments of our population. I encourage the Council to send this ADAWS rulemaking package back to ADWR and ask them to focus on finding ways to fund this program in a manner that asks hardworking Arizona homeowners to pay only for their fair share of water resources and no more.

Warm Regards,

Jeremy Ramsdell
VP Land Acquisition and Development

Concerns on ADWR’s Proposed ADAWS and Comingling Rules

'Jaron Engel' via GRRC Comments - ADOA <grrccomments@azdoa.gov> Fri, Oct 25, 2024 at 4:09 PM
Reply-To: Jaron Engel <jaron.engel@ashtonwoods.com>
To: "grrccomments@azdoa.gov" <grrccomments@azdoa.gov>

Members of the Governor’s Regulatory Review Council,

I am writing to share my apprehension about the Arizona Department of Water Resources’ (ADWR) proposed ADAWS and comingling rules. While water conservation and management are critical for Arizona’s future, these specific regulations seem to place excessive burdens on new homeowners, making housing less affordable while not directly addressing the root causes of our water challenges.

The ADAWS rule aims to streamline water supply assurances, which is vital for areas like Buckeye and Queen Creek. However, its 133% water purchase requirement is an added “tax” on homeowners, making them responsible for shouldering additional costs that should be equitably shared across all water users. The comingling rule has a similar approach, requiring 130% of the water needed for housing developments outside designated areas. This is an unfair expense for future homeowners, who will essentially be subsidizing other water uses rather than just supporting their communities.

Arizona’s housing affordability is already stretched, and placing these extra requirements on new homeowners only intensifies the problem. These rules also raise questions about whether they comply with state laws, which specify that new developments need only secure 100% of their water requirements. Placing the burden for water supply beyond this on individual homeowners does not seem like a fair solution, and there’s little evidence that these rules will meaningfully solve our water issues.

I urge you to reconsider supporting these rules and to seek solutions that fairly distribute water responsibilities without creating further barriers to homeownership. We all want a sustainable water future for Arizona, but not at the cost of forcing hard-working families out of the housing market.

Thank you for considering these concerns.

Sincerely,

Jaron Engel
VP of Purchasing & Product Development

ADAWS AND COMMINGLING RULES - OPPOSED!

'Michelle Gregorec' via GRRC Comments - ADOA <grrccomments@azdoa.gov> Mon, Oct 28, 2024 at 3:32 PM
Reply-To: Michelle Gregorec <Michelle.Gregorec@pultegroup.com>
To: "GRRCCOMMENTS@AZDOA.GOV" <GRRCCOMMENTS@azdoa.gov>
Cc: Michelle Gregorec <Michelle.Gregorec@pultegroup.com>

Good afternoon,

I am the AZ Division President at PulteGroup and am writing to share my concerns regarding the ADAWS and commingling rules you will be reviewing tomorrow, 10/29/2024.

The new rules as drafted will require an incremental water tax of 30 – 33% that will be passed on to our homebuyers, thereby exacerbating the housing shortage and severe affordability crisis we continue to face here in the state of AZ. A tax of this magnitude will continue to put housing out of reach for even more hard-working families sending us backwards from the minimal progress we have made to date. We strongly believe that burdening homebuilders and requiring homeowners to subsidize the water supplies for other users will be detrimental to the state economy and if these rules are approved and adopted, AZ will never fix its water problems.

Current state statute requires that new housing projects bring 100% of the water needed, which we have been doing since 1995. As an industry, we have built over 10's of thousands of homes over the last 30 years while protecting our groundwater aquifers and are respectfully requesting the ability to keep doing so. Further, while ADWR is aware of the concerns of the homebuilding industry, they have been unwilling to meet with the Home Builders Association of Central Arizona to discuss them and work towards resolution.

The rules as currently proposed are illegal. Growth should pay for its share of growth, but not pay for others.

Thank you for your consideration.

Sincerely,

Michelle Gregorec

Comments on new rules governing 100 year water supply

Rebecca Heisler <rebheisler@gmail.com> Sun, Oct 27, 2024 at 2:15 PM
To: grrccomments@azdoa.gov

I think this is a really BAD idea. Arizona fails to address the water supply issue reasponsibly. The major problem is that the state, SRP, water suppliers, whoever is in charge refuses to place restrictions on water usage. There is a culture in AZ that people should be able to do what they want with water, when they want, regardless of the supply. I am appalled everytime I see a fountain or water flowing over rocks or what have you at the entrance of a subdivision. This is giving people who move here and people who live here a false idea about water in the desert. The key word here is that we live in a desert! Before any new rules are applied that will allow people to continue their wasteful behavior with water, AZ needs to start a program of CONSERVATION. Water restrictions need to be implemented and applied. Lush vegetation is NOT part of a water conservation plan or responsible use of water.

In addition, with climate change, Central and Southern Arizona will be uninhabitable in the near future. Instead of vying for more industry, development, and commercial enterprise, AZ really needs to think about it's future based on what the climate will be doing. Promoting AZ as a great place to visit, but not necessarily to live should be the beckoning mantra.

The desert is a beautiful thing and AZ is destroying the Sonoran desert at an alarming rate. In addition to conserving water, we need to conserve the land too. Protecting the Sonoran desert should be a priority with the State. It does not appear that this is the case.

I would like to see Arizona adopt water conservation measures as a first step before applying any new rules.

Thank You,

Rebecca Heisler

GRRC proposal

Frank Metzger <frankm85242@gmail.com> Sat, Oct 26, 2024 at 7:42 AM
To: grrccomments@azdoa.gov

I
We have lived in Pinal county for nearly 40 years. We are surprised that you aren't using effluent already to recharge ground water. We fully support recharging with effluent, but more relatively unchecked growth has been a common practice in Arizona for many years, and there has to be a limit to how many people we should facilitate moving to this state. Once the water crisis is really fixed with desalination or redistribution of water from other parts of the country or other methods, maybe we can change the long standing policy of requiring 100 years of water. Enough is enough. We are opposed to the proposal that eliminates the rule that modifies the prior accepted policy of requiring 100 years of "guaranteed" water for new housing. Recharging ground water is a great idea, but this shouldn't be used to allow more unfettered growth in this already over populated part of the state.

OPPOSE: ADAWS & Commingling Rules

'Greg Abrams' via GRRC Comments - ADOA <grrccomments@azdoa.gov> Mon, Oct 28, 2024 at 10:50 AM
Reply-To: Greg Abrams <Greg.Abrams@pultegroup.com>
To: "grrccomments@azdoa.gov" <grrccomments@azdoa.gov>

Good morning, I am writing to express my concern with the ADAWS rules as they are currently drafted. Homebuilders have replenished its groundwater use since 1995. We have supported the protection that the CAGRD program provides to the aquifer for nearly 30 years - we just want to continue building homes and supporting this program like we have been. Arizona has a severe housing affordability crisis and placing a 30% -33% water tax on homeowners will only exacerbate this issue. Arizona homeowners should not be required to subsidize the water supply for others. The Arizona Department of Water Resources has not been able to confirm that these proposed rules will fix the groundwater problem and has been unwilling to meet with Home Builders Association of Central Arizona. The proposed rules are illegal - growth should pay for growth, but it should not pay for others.

RE: ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Chair and Council Members - Members of the Governor's Regulatory Review Council:

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in

sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Respectfully,

Ted Northrop Jr, PE

Dear Chair and Council Members:

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7th, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing to express my support for the ADAWS and Commingling rules package submitted by ADWR on October 7th, 2024.

ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide a third method for determining an assured water supply in the Phoenix and Pinal Active Management Areas. Representatives from the various business sectors also supporting the ADAWS in Pinal County are submitting letters outlining their positions. I fully support these new rules and the letters of my peers, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Based on current conditions on the Colorado River and record heat, Arizona's Assured Water Supply program is more important than ever in demonstrating that Arizona is a safe place to invest. The proposed rules package is an important step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules provide an additional method for water providers to secure a new assured water supply determination and allow land without existing determinations the opportunity to build desperately needed, affordable housing in Pinal County. We, as a community, can no longer rely on a groundwater-only solution. Housing becomes less affordable with each day we wait to invest in sustainable water supplies. The new rules are a reasonable path forward to continue to build our communities.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Allan Dahle

RE: Alternative Pathway to Designation of 100-Year Assured Water Supply (ADAWS)

Dear Members of the Governor's Regulatory Review Council:

Chandler appreciates the opportunity to comment on the proposed rulemaking to provide an alternative pathway for a Designation of Assured Water Supply (DAWS). Chandler is the fourth largest city in Arizona and has a long history of commitment to meeting the requirements for a 100-Yr Designation of Assured Water Supply. Chandler has invested billions of dollars in our water and wastewater treatment and distribution systems. These investments demonstrate our commitment to growing our community on renewable surface water supplies, rather than relying on the inexpensive groundwater supplies that are limited and once depleted will be gone forever.

When the 1980 Groundwater Management Act and the Assured Water Supply Program were developed, Chandler was one of the first communities to adopt the principles of sustainable water management and began to transition away from groundwater reliance. After acquiring significant renewable water resources, constructing two surface water treatment plants, three wastewater reclamation facilities, and six aquifer recharge facilities, Chandler is proud to prioritize sustainable aquifer management. It is imperative that the new proposed ADAWS rules continue to protect the investments that have already been made by the dozens of municipal water providers who have invested in sustainable water management and prioritizing healthy aquifers.

All municipal water providers in the Phoenix and Pinal AMAs will be impacted by the outcome of the proposed changes to the Assured Water Supply Program because we all depend on the long-term health of our aquifers. As we face an era of uncertainty on the Colorado River, protecting our aquifers has never been more important to Arizona's future

water security. The Arizona Department of Water Resources has already warned our communities that we can not continue unsustainable growth on groundwater and that they will no longer issue new assured water supply certificates that rely on groundwater. All new growth must secure a reliable and renewable water supply. The Assured Water Supply Program is a critically important regulatory tool to protect our aquifers and protect the water supplies that have already been set aside for our existing communities.

The ADAWS rules as currently proposed represent a delicate balance of hard fought compromises that were negotiated in good faith by all stakeholders. Efforts by some parties to make last minute changes to specific components of these rules could risk unraveling the good work done by all interested parties. The proposed ADAWS rules provide water providers with a very generous groundwater allowance and allow water providers the flexibility to pump groundwater while they develop the required infrastructure to transition to renewable water supplies. The 25% reduction in pumping is the foundation of striking a balance between the immediate needs of water providers who currently rely on groundwater and the long-term need to reduce groundwater mining over time. The "25% rule" ensures that as they acquire new non-groundwater supplies, 25% of those supplies will be used to reduce groundwater pumping in the future. This 25% rule is the primary mechanism to ensure this program continues to meet the objectives of the Assured Water Supply Program and the ADAWS will not be successful without this requirement. The original recommendation of the Governors' Water Policy Council required that 30% of all new non-groundwater supplies should be used to offset existing groundwater pumping. This volume has already been reduced to 25% and reducing it any further puts the entire program in jeopardy.

The City of Chandler respectfully requests that the GRRC approve the ADAWS rules as currently proposed by the Arizona Department of Water Resources.

Sincerely,

Simone Kjolsrud

Arizona Governor's Regulatory Review Council
100 North 15th Avenue, Suite 302
Phoenix, Arizona 85007

Re: Comments on the Proposed Alternative Designation of Assured Water Supply Rules

Dear Chairperson Klein and members of the Governor's Regulatory Review Council,

Please accept these comments relating to the proposed Alternative Designation of Assured Water Supply Rules. While we commend the Arizona Department of Water Resources' (ADWR) efforts to address the moratorium put into place by Governor Hobbs on new determinations of assured water supply in the Phoenix area, we have serous concerns about this proposal.

Firstly, the underlying reasons behind the need for an *Alternative* Designation of Assured Water Supply warrant serious scientific study and scrutiny. The 2023 Pheonix AMA groundwater model the estimates a 4% deficit in groundwater supplies in 100 years makes broad assumptions about points of groundwater withdrawal, existing and future water supplies, and future demand, which are proving to be far too simplistic and serve to overstate groundwater withdrawal.

Secondly, the ADAWS program places a 33% tax on homeowners in areas served by the ADAWS program. This tax is a subsidy, paid for by homeowners, to ensure water is in place for other industries unaffected by ADAWS rules, such as commercial and industrial users. This 33% tax does not pass the "rough proportionality" test pertaining to the 'tax' and the impact of the development on the community. Put simply, Arizona homeowners cannot and should not bear the burden of funding water supplies for corporate apartment interests, large scale industrial users, corporate commercial conglomerates, and the like. Besides being politically radioactive, this fee structure is likely to be found illegal if enacted.

Finally, as you all know, Arizona has a well-documented and severe housing affordability crisis. The single largest reason for this crisis is a significant shortage of available housing within our state. The fastest way to solve this crisis is to increase supply through the responsible construction of new homes.

A clear line is forming to connect this water moratorium to our affordability crises in the Phoenix metropolitan area. A crisis that is only growing and putting homeownership out of reach for increasing segments of our population. I encourage the Council to send this ADAWS rulemaking package back to ADWR and ask them to focus on finding ways to fund this program in a manner that asks hardworking Arizona homeowners to pay only for their fair share of water resources and no more.

Sincerely,

Robert Nunes

Subject: Opposition of DWR's ADAWS and Commingling Rules
To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Dear Chairperson Klein and members of the Governor’s Regulatory Review Council,

Please consider these comments regarding the proposed Alternative Designation of Assured Water Supply (ADAWS) Rules. We appreciate the Arizona Department of Water Resources’ (ADWR) efforts to address the moratorium initiated by Governor Hobbs on new assured water supply determinations in the Phoenix area. However, I have significant concerns about this proposal. Homebuilding has replenished its groundwater use since 1995 and we want to continue building homes and protecting groundwater aquifers as we have done for over 30 years.

First, the rationale behind the need for an Alternative Designation of Assured Water Supply requires thorough scientific investigation and analysis. The 2023 Phoenix AMA groundwater model, which estimates a 4% groundwater deficit over the next 100 years, relies on broad assumptions about groundwater withdrawal locations, current and future water supplies, and anticipated demand. These assumptions risk oversimplifying and potentially overstating groundwater withdrawal rates.

Second, the ADAWS program imposes a 33% surcharge on homeowners in areas it serves. This surcharge effectively subsidizes water resources for industries not subject to ADAWS rules, such as commercial and industrial users. This 33% fee does not meet the “rough proportionality” standard between the imposed tax and the development's community impact. Arizona homeowners should not bear the financial responsibility for securing water resources that primarily benefit corporate apartment developments, large-scale industries, and commercial enterprises. Beyond being politically contentious, this fee structure could face legal challenges if enacted. State statute requires that new housing projects bring 100% but nothing more. Requiring future homeowners to pay for more than their fair share will put housing out of reach for even more hard-working families. Homeowners should not subsidize the water supplies for other users. If other land uses don’t take responsibility for their water consumption, Arizona’s water problems will remain unsolved..

Finally, Arizona is grappling with a severe housing affordability crisis, primarily driven by a critical housing shortage. The most effective way to address this crisis is by increasing housing availability through the responsible construction of new homes.

Sincerely,

Jessica Cool

Viewpoint

MY VIEW

Let's keep development flowing

JIM POULIN | PBJ

An aerial view of one of the Central Arizona Project water canals north of the Phoenix metro.

Vote on assured water supply key to future economic growth

On Nov. 5, the Governor's Regulatory Review Council will decide whether to approve an amendment to Arizona's assured water supply program. If you are not familiar with the state's assured water supply designation, no new subdivisions can be approved without first proving that water can be provided to those homes for 100 years.

This program, established by the landmark Arizona Groundwater Management Act in 1980, was further clarified in rules in 1995. Since then, more than 1,200 new subdivisions dependent on groundwater have been approved and 20 water providers have been designated as having an assured water supply in both the Phoenix and Pinal Active Management Areas, or AMAs. These AMAs are vast groundwater basins located in the Phoenix metropolitan area and in central Pinal County.

Fast forward to 2019, when the Arizona Department of Water Resources (ADWR) published a groundwater model that projects groundwater demands in the Pinal AMA would result in 10% of those demands being unmet during the 100-year period. Similarly, in 2023, ADWR published another groundwater model that projects demands in the Phoenix AMA could also not be met.

This resulted in ADWR declaring that no new assured water supply determinations could be issued in those groundwater basins until a solution is developed.

Subsequently, the Governor's Water Policy Council and stakeholders from water sectors worked with ADWR to prepare a third method for securing an assured water supply called the alternative designation of assured water supply, or ADAWS. This method, a hybrid of the two existing methods, will allow water providers to secure an assured water supply designation through the ADAWS. This means developers and builders will bring a sustainable water supply to meet the demands of the subdivisions, and water providers will bring an additional amount of sustainable water supplies to meet the groundwater demands of existing customers who have been using unreplenished groundwater for decades.

STEPHEN MILLER

CRAIG MCFARLAND

Without this solution, exist customers who have been usir unreplenished groundwater w continue to deplete local aquif While this solution might not l right for every water provider, this mechanism allows the tw largest private water companie in Arizona to secure a designat of assured water supply, it's a major accomplishment. It may even be the single most signifi advancement to the assured w supply rules since their incepti

Once new assured water supply designations are issued new subdivisions will have an opportunity to develop, and th will create the additional hous supply we need in the Phoenix metro and Pinal County to sup all of the jobs being created th the industrial boom we curren enjoy.

These rules will ensure that homeowners never have to wo about having water. If these ru are not adopted, the price of housing may continue to climl until employers can no longer afford to pay employees enoug money to live in Arizona. Thes companies could begin to dive themselves of operations in Ar and relocate to states where w security is less of a concern. In turn, this could lead to negativ economic impacts to Arizona t the assured water supply rules designed to prevent.

A lot is at stake Nov. 5 and r just in the presidential electior We urge you to help us strengt the assured water supply program by sending an email t grrccomments@azdoa.gov to s your support to the Governor's Regulatory Review Council be the Nov. 5 meeting, and let the know an assured water supply important to you.

Stephen Miller represents Dist 3 on the Pinal County Board o Supervisors; Craig McFarland mayor of Casa Grande.

My View: Vote on assured water supply key to Arizona's future economic growth

On Nov. 5, the Governor's Regulatory Review Council will decide whether to approve an amendment to Arizona's assured water supply program. If you are not familiar with the state's assured water supply designation, no new subdivisions can be approved without first proving that water can be provided to those homes for 100 years.

This program, established by the landmark Arizona Groundwater Management Act in 1980, was further clarified in rules in 1995. Since then, more than 1,200 new subdivisions dependent on groundwater have been approved and 20 water providers have been designated as having an assured water supply in both the Phoenix and Pinal Active Management Areas, or AMAs. These AMAs are vast groundwater basins located in the Phoenix metropolitan area and in central Pinal County.

Fast forward to 2019, when the Arizona Department of Water Resources (ADWR) published a groundwater model that projects groundwater demands in the Pinal AMA would result in 10% of those demands being unmet during the 100-year period. Similarly, in 2023, ADWR published another groundwater model that projects demands in the Phoenix AMA could also not be met.

This resulted in ADWR declaring that no new assured water supply determinations could be issued in those groundwater basins until a solution is developed.

Subsequently, the Governor's Water Policy Council and stakeholders from water sectors worked with ADWR to prepare a third method for securing an assured water supply called the alternative designation of assured water supply, or ADAWS. This method, a hybrid of the two existing methods, will allow water providers to secure an assured water supply designation through the ADAWS. This means developers and builders will bring a sustainable water supply to meet the demands of the subdivisions, and water providers will bring an additional amount of sustainable water supplies to meet the groundwater demands of existing customers who have been using unreplenished groundwater for decades.

Development will help support jobs, population growth

Without this solution, existing customers who have been using unreplenished groundwater will continue to deplete local aquifers. While this solution might not be right for every water provider, if this mechanism allows the two largest private water companies in Arizona to secure a designation of assured water supply, it's a major accomplishment. It may even be the single most significant advancement to the assured water supply rules since their inception.

Once new assured water supply designations are issued, new subdivisions will have an opportunity to develop, and this will create the additional housing supply we need in the Phoenix metro and Pinal County to support all of the jobs being created through the industrial boom we currently enjoy.

These rules will ensure that homeowners never have to worry about having water. If these rules are not adopted, the price of housing may continue to climb until employers can no longer afford to pay employees enough money to live in Arizona. These companies could begin to divest themselves of operations in Arizona and relocate to states where water security is less of a

concern. In turn, this could lead to negative economic impacts to Arizona that the assured water supply rules were designed to prevent.

A lot is at stake Nov. 5 and not just in the presidential election. We urge you to help us strengthen the assured water supply program by sending an email to **grrccomments@azdoa.gov to show your support to the Governor's Regulatory** Review Council before the Nov. 5 meeting, and let them know an assured water supply is important to you.

Stephen Miller represents District 3 on the Pinal County Board of Supervisors; Craig McFarland is mayor of Casa Grande.

JIM POULIN | PHOENIX BUSINESS JOURNAL

Opinion: This could help metro Phoenix save a lot of water. But some want to kill it

Two Arizona water providers say new rules could help them use a lot less groundwater over time. But others are trying to scuttle the plan.

Joanna Allhands

Arizona Republic

Arizona is considering the most significant change in decades to its Assured Water Supply program, which helps ensure that new growth has acquired enough water for the long haul.

It's not perfect.

But it also has the potential to do a great amount of good.

And yet, some folks are trying to kill it.

ADAWS was supposed to help Buckeye, Queen Creek

The idea behind the Alternative path to Designation of Assured Water Supply, or ADAWS for short, was initially to help Buckeye and Queen Creek become designated water providers.

Such a designation signifies that they have secured enough renewable water supplies to handle all users within their service territories for at least 100 years.

Both cities are heavily reliant on groundwater, and ADAWS was supposed to offer them a bridge, allowing them to continue pumping finite groundwater for a time while they acquired the renewable supplies necessary to earn a designation.

This short-term groundwater allowance also would help some homebuilders resume projects that were paused after models found unmet demand for water over time.

Now, some key players want to kill the proposal

But after months of negotiation, Buckeye and Queen Creek say the new pathway to designation won't work for them. They still can't pencil out the amount of water and infrastructure that it would require.

Meanwhile, homebuilders don't like the package because, in their estimation, it places an unfair burden on developers to replenish groundwater.

And the two gatekeepers for water legislation in the Arizona House and Senate — Rep. Gail Griffin and Sen. Sine Kerr — are pressing a rulemaking review panel to scuttle it, arguing, among other things, that the state Department of Water Resources lacks the authority to do what it has proposed.

Even still, there is wide support for the changes among the 235 comments received on the proposal.

And, perhaps most importantly, two other key players — Arizona Water Co. and EPCOR — are planning to apply for the designation as soon as it passes.

2 major water providers say the rules work

These private water providers differ from Buckeye and Queen Creek, in that they already have renewable supplies that they are hoping to repurpose under the new rules to receive a designation.

There would be a lot to gain if they did.

Arizona Water serves Casa Grande and Coolidge, and EPCOR serves parts of the West Valley, areas where a hefty amount of industrial growth has occurred.

There are factories making electric vehicles, businesses supporting the state's growing semiconductor industry and water-intensive beverage manufacturers — none of which are currently required to replenish the groundwater they pump.

That changes under a designation.

Providers must put back water in the ground for every kind of user they serve, including homes that were built before state law required subdivisions to replenish their groundwater pumping.

This could positively impact metro Phoenix

This is particularly important for EPCOR, where 60% of its West Valley customers are now not required to replenish what they pump. For Arizona Water, about half of its demand in Casa Grande and Coolidge goes unreplenished.

Even better for the aquifer, these two providers would be replenishing groundwater closer to where it is pumped, instead of storing their renewable supplies underground, miles away from where water is being withdrawn.

These areas could begin to refill a dwindling pipeline of new homes, which are needed to keep pace with the additional jobs that factories have created.

Opinion: Forced water regulations? They could be coming

Designating Arizona Water and EPCOR also could have an outsized impact on the Central Arizona Groundwater Replenishment District, which must find renewable water sources to replenish pumping from its members, because Arizona Water and EPCOR have more member lands than Buckeye and Queen Creek.

Early estimates suggest that while the replenishment district's obligations could increase in the short term, they should decrease over the long haul as Arizona Water and EPCOR take over that task.

Keep working on the warts, but don't kill it

ADAWS is a big change in policy, and as with any big change, there will be kinks to work out.

Homebuilders have suggested, for example, that replenishment requirements should be proportional to how much water each user is pumping, instead of requiring a blanket 25%.

It's a reasonable suggestion that should be considered, or at least modeled to see how it might impact the health of the aquifer.

ADAWS also could be more of a possibility for Queen Creek and Buckeye if legislation passes to help convert some ag lands to urban uses and they are able to apply those water savings to their designations.

But why let perfect be the enemy of good?

Even if Buckeye and Queen Creek are out for now, two other major water providers are ready to use the new rules immediately.

Their designations could have positive impacts on housing and water management that reverberate all over metro Phoenix and Pinal County.

This is real progress that, over time, should decrease the amount of groundwater we use.

Don't scuttle that now.

Town of Queen Creek Support for the ADAWS Rules

1 message

Osborn, Marcus B. <Marcus.Osborn@kutakrock.com> Mon, Nov 4, 2024 at 3:01 PM
To: "grrc@azdoa.gov" <grrc@azdoa.gov>
Cc: Heather Wilkey <heather.wilkey@queencreekaz.gov>, Patrick Adams <padams@az.gov>

On behalf of the Town of Queen Creek, I want to continue to express our support for the ADAWS rulemaking package as presented by the Arizona Department of Water Resources. Assuring our water future is a significant priority for the Town of Queen Creek. We believe that the combination of the ADAWS rules, regulatory/statutory changes and an incentive program allowing agricultural land to be transitioned to urban use, will create a pathway for the Town to ultimately become designated. While we've suggested some improvements to the rule package in order to take advantage of it sooner, the ADAWS program is essential for the Town's water resource efforts. Thank you for the consideration and again we would urge your approval of the ADAWS rulemaking package at the earliest opportunity. Please feel free to contact me should you have any questions about the Town's position on the proposed rulemaking. I would appreciated if you would forward this email to the Council members. Thank you, Marc Osborn

MEMORANDUM

To:	Governor's Regulatory Review Council
From:	Nicole Klobas, Chief Counsel, ADWR
Date:	10/31/2024
Re:	**ADWR Notice of Final Rulemaking regarding an Alternative Path to Obtain a Designation of Assured Water Supply (ADAWS)**

During the discussion of the Arizona Department of Water Resources' (ADWR) Notice of Final Rulemaking regarding an alternative path to obtaining a designation of assured water supply (ADAWS rules), the chair and members of the Governor's Regulatory Review Council (Council) raised questions regarding the ADAWS rules and asked that ADWR provide supplemental information in response. This memorandum addresses whether the ADAWS rules create a new license or licensing requirement without the requisite authority, pursuant to A.R.S. § 41-1030(B), which provides:

> An agency shall not base a licensing decision in whole or in part on a licensing requirement or condition that is not specifically authorized by statute, rule or state tribal gaming compact. A general grant of authority in statute does not constitute a basis for imposing a licensing requirement or condition unless a rule is made pursuant to that general grant of authority that specifically authorizes the requirement or condition.

The ADAWS rules do not exceed ADWR's authority and are consistent with A.R.S. § 41-1030(B). The ADAWS rules do not create a new license. Instead, the ADAWS rules create a new, optional condition for a license that applicants may pursue as an alternative to an existing license condition, both of which are authorized by A.R.S. § 45-576.

Background:

In order to develop a subdivision within an active management area (AMA), including both the Phoenix AMA and the Pinal AMA, state statute requires an assurance that the new development will have a 100-year supply of water for the new growth, without unfairly or adversely affecting the water supply for current residents and consistent with achieving the management goal of the AMA. Specifically, A.R.S. § 45-576 provides, in relevant part:[1]

---

[1] Section 45-576, A.R.S., is also provided in its entirety as Attachment A to this memorandum.

A. Except as provided in subsections G and J of this section, a person who proposes to offer subdivided lands, as defined in section 32-2101, for sale or lease in an active management area shall apply for and obtain a certificate of assured water supply from the director before presenting the plat for approval to the city, town or county in which the land is located, where such is required, and before filing with the state real estate commissioner a notice of intention to offer such lands for sale or lease, pursuant to section 32-2181, *unless the subdivider has obtained a written commitment of water service for the subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section*.

…

D. The director shall designate private water companies in active management areas that have an assured water supply….

…

E. The director shall designate cities and towns in active management areas where an assured water supply exists....

…

H. The director shall adopt rules to carry out the purposes of this section….

…

M. For the purposes of this section, "assured water supply" means all of the following:
   1. Sufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years….[2]
   2. The projected groundwater use is consistent with the management plan and achievement of the management goal for the active management area.
   3. The financial capability has been demonstrated to construct the water facilities necessary to make the supply of water available for the proposed use, including a delivery system and any storage

[2] The remainder of subparagraph (M)(1) of A.R.S. § 45-576 includes a definition that pertains only to a member of a "groundwater replenishment district," established pursuant to title 48, chapter 27, which has never been established. *See* A.R.S. § 45-402(14). The entity referred to in the assured water supply rules as the Central Arizona Groundwater Replenishment District, or CAGRD, is a multi-county water conservation district acting in its capacity pursuant to A.R.S. Title 48, Chapter 22. *See* A.R.S. § 45-401(5); A.A.C. R12-701(17).

facilities or treatment works. The director may accept evidence of the construction assurances required by section 9-463.01, 11-823 or 32-2181 to satisfy this requirement.

Emphasis added. The current rules adopted pursuant to A.R.S. § 45-576(H) require that a new applicant for a designation of assured water supply demonstrate physical availability of its water supplies. A.A.C. R12-15-710(E). The rule for demonstrating physical availability of a groundwater supply requires that "the applicant shall submit a hydrologic study, using a method of analysis approved by the Director" to demonstrate that groundwater will be withdrawn from depths that do not exceed 1,000 feet below land surface in the Phoenix AMA or 1,100 feet below land surface in the Pinal AMA, taking into account the groundwater pumping in the area associated with existing uses and other assured water supply determinations. A.A.C. R12-15-716(B)(2)-(3).

The ADAWS rules seek to modify the requirements of A.A.C. R12-15-710(E) to allow an additional and alternative method to demonstrate physical availability. Rather than submitting a hydrologic study pursuant to 716(B), the applicant may choose to satisfy the provisions of a new subsection (H), which provides:

> For a new application for a designation of assured water supply in the Phoenix and Pinal Active Management Areas, a volume of groundwater and stored water recovered outside the area of impact, as calculated in subsection (H)(1), (2) and (3) of this Section, shall be deemed physically available if the Director determines that a New Alternative Water Supply included in the application meets the requirements in R12-15-716 through R12-15-720. The volume of groundwater and stored water recovered outside the area of impact shall be calculated as follows:
>
> 1. Add the total volume of groundwater withdrawn and stored water recovered outside the area of impact within the service area of applicant during the calendar year 2023 to the estimated groundwater and stored water recovered outside the area of impact demand for unbuilt portions of issued certificates of assured water supply as of 2023 that are or will be within the service area of the applicant, and multiply the sum by 100;
>
> 2. Multiply 25 percent of each New Alternative Water Supply included in the designation by 100; and
>
> 3. Subtract the total volume calculated in subsection (H)(2) of this Section from the total volume calculated in subsection (H)(1).

> 4. The Director shall use the annual report submitted by the municipal provider for calendar year 2023, as verified by the Director, for purposes of this calculation.

Notice of Final Rulemaking at pp. 20-21.

Analysis:

Subsections (D), (E), and (H) of A.R.S. § 45-576 clearly and explicitly authorize ADWR to adopt rules providing for a license in the form of a designation of assured water supply for cities, towns and private water companies. Additionally, the definition of "assured water supply" in A.R.S. § 45-576(M) undoubtedly authorizes ADWR to require evidence that groundwater included in the application will be physically available for 100 years, as required by the existing provisions of A.A.C. R12-15-710(E) and R12-15-716(B).

This new subsection (H) in the ADAWS rules allows the applicant to include a volume of groundwater that is "deemed" to be physically available, based on existing uses and issued certificates. However, if the applicant elects to use this path to demonstrate physical availability, the applicant must still satisfy other requirements. One of those requirements is that the existing and approved uses of groundwater will, over time, be reduced in part as they are replaced by "new alternative water supplies," as defined in the ADAWS rules.

Notably, the ADAWS rules *do not reduce* the volume of new alternative supplies that are available to the applicant water provider. Instead, the ADAWS rules *reduce the volume of groundwater that is deemed to be physically available without a hydrologic study*, as alternative supplies are added to the designation. Therefore, if an applicant seeks to utilize the proposed ADAWS rules to "bypass" the existing requirement set forth in A.A.C. R12-15-716(B) for demonstrating that groundwater is physically available using a hydrologic study, the applicant may only include a prescribed volume of groundwater. That limited volume of groundwater will also be reduced as the water provider adds new supplies to the designation. Therefore, in the long term, the water provider will be using less groundwater than the water provider would have used if the water provider had not opted to become designated.

The ADAWS rules provide a second, optional method to demonstrate physical availability of groundwater. It logically follows that the same statute that authorizes ADWR to adopt a rule requiring an applicant for a designation to demonstrate physical availability of groundwater allows ADWR to adopt a rule providing two methods from which to choose for making that demonstration.

A plain reading of the ADAWS rules makes clear that a water provider seeking a designation of assured water supply is never required to satisfy the requirements of the new subsection (H) of A.A.C. R12-15-710. In fact, A.A.C. R12-15-710(E) will still allow a designation applicant to demonstrate physical availability of groundwater through a hydrologic study, pursuant to the existing requirements in A.A.C. R12-15-716(B). Additionally, a designation applicant may seek to obtain a designation without including any volume of groundwater. Moreover, no water provider is ever required to obtain a designation of assured water supply, as it is completely optional.

One or more of the public comments during the study session and in the written comments submitted to the Council suggest that the ADAWS rules impose a requirement on *developers* to provide more water than is required for their individual subdivision to demonstrate an assured water supply. This is a simple misunderstanding of the ADAWS rules. The ADAWS rules do not apply to developers. Developers are not eligible for a designation of assured water supply (which, pursuant to A.R.S. § 45-576(D)-(E), is only available to a city, town, or private water company). Instead, a *developer* would apply for a *certificate* of assured water supply, as provided in A.R.S. § 45-576(A) and A.A.C. R12-15-704. Therefore, the ADAWS rules impose no requirements on any developer for any project.

Conclusion: The provision in the ADAWS rules adding an alternative option for demonstrating physical availability of groundwater in an application for a designation of assured water supply is consistent with ADWR's authority pursuant to A.R.S. § 45-576 and is therefore consistent with A.R.S. § 41-1030(B).

ATTACHMENT A

45-576. Certificate of assured water supply; designated cities, towns and private water companies; exemptions; definition

A. Except as provided in subsections G and J of this section, a person who proposes to offer subdivided lands, as defined in section 32-2101, for sale or lease in an active management area shall apply for and obtain a certificate of assured water supply from the director before presenting the plat for approval to the city, town or county in which the land is located, where such is required, and before filing with the state real estate commissioner a notice of intention to offer such lands for sale or lease, pursuant to section 32-2181, unless the subdivider has obtained a written commitment of water service for the subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section.

B. Except as provided in subsections G and J of this section, a city, town or county may approve a subdivision plat only if the subdivider has obtained a certificate of assured water supply from the director or the subdivider has obtained a written commitment of water service for the subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section. The city, town or county shall note on the face of the approved plat that a certificate of assured water supply has been submitted with the plat or that the subdivider has obtained a written commitment of water service for the proposed subdivision from a city, town or private water company designated as having an assured water supply pursuant to this section.

C. Except as provided in subsections G and J of this section, the state real estate commissioner may issue a public report authorizing the sale or lease of subdivided lands only on compliance with either of the following:

1. The subdivider, owner or agent has paid any activation fee required under section 48-3772, subsection A, paragraph 7 and any replenishment reserve fee required under section 48-3774.01, subsection A, paragraph 2 and has obtained a certificate of assured water supply from the director.

2. The subdivider has obtained a written commitment of water service for the lands from a city, town or private water company designated as having an assured water supply pursuant to this section and the subdivider, owner or agent has paid any activation fee required under section 48-3772, subsection A, paragraph 7.

D. The director shall designate private water companies in active management areas that have an assured water supply. If a city or town acquires a private water company that has contracted for central Arizona project water, the city or town shall assume the private water company's contract for central Arizona project water.

E. The director shall designate cities and towns in active management areas where an assured water supply exists. If a city or town has entered into a contract for central Arizona project water, the city or town is deemed to continue to have an assured water supply until December 31, 1997. Commencing on January 1, 1998, the determination that the city or town has an assured water supply is subject to review by the director and the director may determine that a city or town does not have an assured water supply.

F. The director shall notify the mayors of all cities and towns in active management areas and the chairmen of the boards of supervisors of counties in which active management areas are located of the cities, towns and private water companies designated as having an assured water supply and any modification of that designation within thirty days of the designation or modification. If the service area of the city, town or private water company has qualified as a member service area pursuant to title 48, chapter 22, article 4, the director shall also notify the conservation district of the designation or modification and shall report the projected average annual replenishment obligation for the member service area based on the projected and committed average annual demand for water within the service area during the effective term of the designation or modification subject to any limitation in an agreement between the conservation district and the city, town or private water company. For each city, town or private water company that qualified as a member service area under title 48, chapter 22 and was designated as having an assured water supply before January 1, 2004, the director shall report to the conservation district on or before January 1, 2005 the projected average annual replenishment obligation based on the projected and committed average annual demand for water within the service area during the effective term of the designation subject to any limitation in an agreement between the conservation district and the city,

town or private water company. Persons proposing to offer subdivided lands served by those designated cities, towns and private water companies for sale or lease are exempt from applying for and obtaining a certificate of assured water supply.

G. This section does not apply in the case of the sale of lands for developments that are subject to a mineral extraction and processing permit or an industrial use permit pursuant to sections 45-514 and 45-515.

H. The director shall adopt rules to carry out the purposes of this section. On or before January 1, 2008, the rules shall provide for a reduction in water demand for an application for a designation of assured water supply or a certificate of assured water supply if a gray water reuse system will be installed that meets the requirements of the rules adopted by the department of environmental quality for gray water systems and if the application is for a certificate of assured water supply, the land for which the certificate is sought must qualify as a member land in a conservation district pursuant to title 48, chapter 22, article 4. For the purposes of this subsection, "gray water" has the same meaning prescribed in section 49-201.

I. If the director designates a municipal provider as having an assured water supply under this section and the designation lapses or otherwise terminates while the municipal provider's service area is a member service area of a conservation district, the municipal provider or its successor shall continue to comply with the consistency with management goal requirements in the rules adopted by the director under subsection H of this section as if the designation was still in effect with respect to the municipal provider's designation uses. When determining compliance by the municipal provider or its successor with the consistency with management goal requirements in the rules, the director shall consider only water delivered by the municipal provider or its successor to the municipal provider's designation uses. A person is the successor of a municipal provider if the person commences water service to uses that were previously designation uses of the municipal provider. Any groundwater delivered by the municipal provider or its successor to the municipal provider's designation uses in excess of the amount allowed under the consistency with management goal requirements in the rules shall be considered excess groundwater for purposes of title 48, chapter 22. For the purposes of this subsection, "designation uses" means all water uses served by a municipal provider on the date the municipal provider's designation of assured water supply lapses or otherwise terminates and all recorded lots within the municipal provider's service area that were not being served by the municipal provider on that date but that received final plat approval from a city, town or county on or before that date. Designation uses do not include industrial uses served by an irrigation district under section 45-497.

J. Subsections A, B and C of this section do not apply to a person who proposes to offer subdivided land for sale or lease in an active management area if all the following apply:

1. The director issued a certificate of assured water supply for the land to a previous owner of the land and the certificate was classified as a type A certificate under rules adopted by the director pursuant to subsection H of this section.

2. The director has not revoked the certificate of assured water supply described in paragraph 1 of this subsection, and proceedings to revoke the certificate are not pending before the department or a court. The department shall post on its website a list of all certificates of assured water supply that have been revoked or for which proceedings are pending before the department or a court.

3. The plat submitted to the department in the application for the certificate of assured water supply described in paragraph 1 of this subsection has not changed.

4. Water service is currently available to each lot within the subdivided land and the water provider listed on the certificate of assured water supply described in paragraph 1 of this subsection has not changed.

5. The subdivided land qualifies as a member land under title 48, chapter 22 and the subdivider has paid any activation fee required under section 48-3772, subsection A, paragraph 7 and any replenishment reserve fee required under section 48-3774.01, subsection A, paragraph 2.

6. The plat is submitted for approval to a city, town or county that is listed on the department's website as a qualified platting authority.

K. Subsection J of this section does not affect the assignment of a certificate of assured water supply as prescribed by section 45-579.

L. On or before December 31, 2023, the director shall study and submit to the governor, president of the senate and speaker of the house of representatives a report on whether and how a person that seeks a building permit for six or more residences within an active management area, without regard to any proposed lease term for those residences, should apply for and obtain a certificate of assured water supply from the director before presenting the permit application for approval to the county in which the land is located, unless the applicant has obtained a written commitment of water service for the residences from a city, town or private water company designated as having an assured water supply pursuant to this section.

M. For the purposes of this section, "assured water supply" means all of the following:

1. Sufficient groundwater, surface water or effluent of adequate quality will be continuously available to satisfy the water needs of the proposed use for at least one hundred years. Beginning January 1 of the calendar year following the year in which a groundwater replenishment district is required to submit its preliminary plan pursuant to section 45-576.02, subsection A, paragraph 1, with respect to an applicant that is a member of the district, "sufficient groundwater" for the purposes of this paragraph means that the proposed groundwater withdrawals that the applicant will cause over a period of one hundred years will be of adequate quality and will not exceed, in combination with other withdrawals from land in the replenishment district, a depth to water of one thousand feet or the depth of the bottom of the aquifer, whichever is less. In determining depth to water for the purposes of this paragraph, the director shall consider the combination of:

(a) The existing rate of decline.

(b) The proposed withdrawals.

(c) The expected water requirements of all recorded lots that are not yet served water and that are located in the service area of a municipal provider.

2. The projected groundwater use is consistent with the management plan and achievement of the management goal for the active management area.

3. The financial capability has been demonstrated to construct the water facilities necessary to make the supply of water available for the proposed use, including a delivery system and any storage facilities or treatment works. The director may accept evidence of the construction assurances required by section 9-463.01, 11-823 or 32-2181 to satisfy this requirement.

Phoenix, AZ 85007

Re: Proposed DWR Water Rules

Dear Chairperson Klein,

I represent the Home Builders Association of Central Arizona ("HBACA" or "Association") and submit this second letter concerning the Department of Water Resource's ("DWR's" or "Department's") August 23, 2024 proposed rules ("Proposed Rules") regarding designations of assured water supply, one of which will be considered at the Council's November 5, 2024 meeting. I urge the Council to reject the Proposed Rules for the reasons stated in my October 23 letter and for four additional or related reasons arising out of the Council's October 29 meeting.

First, the Department's presentation at the October 29 meeting made painfully apparent that the Department *has no justification for the proposed 25% offset* (which amounts to a 33.3% water tax on new users). The Proposed Rules offer no explanation for why that number—as opposed to some other, like Department's projected 4% unmet demand model, was adopted.

The 25% offset/33.3% water tax is thus arbitrary and indefensible. To the extent that a defensible rationale exists that could justify that 25% number, the Department simply has yet to offer it. Instead, the Department suggested at the October 29 meeting that the number "came from discussions," none of which are disclosed or explained in the Proposed Rules.

Second, the Department's claim that the 33.3% water tax does not impose a "license" requirement and thus comports with A.R.S. § 41-1030(B) is incorrect. The Department's own Proposed Rules explicitly say that "a designation of Assured Water Supply ... *is a license.*" 30 A.A.R. 2,620, 2,628 (Aug. 23, 2024) (emphasis added); *see also id.* at 2638 ("[A] certificate of Assured Water Supply... *is a license.*" (emphasis added))

The Department's October 31 Memorandum contends that the Proposed Rules "are consistent with A.R.S. § 41-1030(B)," because they "do not create a new license" and instead "create a new, optional condition for a license." DWR Oct. 31 Memo. at 1.

That contention fails on two levels. As an initial matter, the Proposed Rules *are effectively not optional at all.* As Nicole Klobas, the Department's Chief Counsel, *admitted* in the Council's October 29 meeting, the Proposed Rules represent "the only feasible path" for many home builders. Where the Proposed Rules are the "only feasible path," they are hardly an "optional condition," but rather an inescapable mandate for obtaining a license—*i.e.,* a licensing condition. Where the

Department has effectively *admitted* that its Proposed Rules create an unavoidable condition for many builders to obtain a license, its "optional condition" argument is not legally sustainable.

But even if the Department's purely "optional condition" premise was correct, the Proposed Rules *would still violate A.R.S. § 41-1030(B).* That provision provides that an "agency shall not base a licensing decision *in whole or in part* on a licensing requirement or condition that is not *specifically authorized* by statute, rule or state tribal gaming compact." (emphasis added). As HBACA explained in its October 23 letter, the 33.3% water tax is affirmatively precluded by A.R.S. § 45-576(M)—and certainly not "specifically authorized." And because § 41-1030(B) explicitly prohibits the Department from relying on a requirement even "*in part*" if it is not "*specifically authorized by statute*," the Proposed Rule's reliance on the 33.3% water tax is unlawful under that provision even if it were truly optional (and it is not). To the extent that the Department intends to "base a licensing decision [even] ... in part" on compliance with the 33.3% water tax, the Proposed Rules are unlawful.

Third, the Proposed Rules' estimate of costs as being only "minimal" cannot withstand scrutiny. Water is not free—particularly in Arizona. And the Department's premise that it can ignore the costs of the Proposed Rules because they are purportedly "optional" is wholly incompatible with the Department's admission that the Proposed Rules represent "the only feasible path" for many builders. Indeed, the Proposed Rules *could add thousands or tens of thousands of dollars* to the cost of every new home built under its auspices—none of which are analyzed *at all* to date.

To estimate the Proposed Rules' true costs—which are assuredly not "minimal" at all—the HBACA has commissioned Elliott D. Pollack and Company to prepare an estimate to the actual costs of the 33.3% water tax. It expects that this analysis will be available within the next 60 days and urges the Council not to approve any rule until that cost is available.

Fourth, the October 29 hearing further clarified that the Proposed Rules impose "new fees" in the form of the 33.3% water tax. It could thus only be approved by this Council by a 2/3 vote. *See* A.R.S. § 41-1052(E).

For all of these reasons and those previously expressed in my October 23 letter, the Council should either delay consideration of the Proposed Rules at its November 5 hearing or reject them outright.

Please feel free to contact me if you have any questions or would like to discuss any of this further. I can be reached at (480) 773-1411 and agould@holtzmanvogel.com.

Respectfully,

/s/ Andrew Gould
Andrew Gould

Re: Meritage Homes Opposition to Proposed ADWR Water Rules

Dear Members of the Governor's Regulatory Review Council,

Meritage Homes is one of the largest home builders in the U.S. with corporate headquarters located in Scottsdale and operations in the Phoenix and Tucson markets. Meritage strongly supports environmental stewardship and responsible use of our natural resources in every home, every community, and in every market that we build. I am writing to express our serious concerns regarding the proposed rules by the Arizona Department of Water Resources (ADWR), specifically the Alternative Designation of Assured Water Supply (ADAWS) rule and the comingling rule. While we understand the intent behind these rules is to address water challenges, the conditions imposed will have significant negative impacts on the home building industry and future homeowners.

The requirement for new projects to secure 133% of the water needed under **ADAWS** and 130% under the **comingling rule** effectively imposes a "water tax" on homeowners. This additional burden will drastically increase the cost of housing, exacerbating Arizona's already severe housing affordability crisis. It is unfair to expect future homeowners to subsidize water use for other land users, which these rules would mandate. This approach not only undermines housing affordability but also places an undue financial strain on families striving to achieve homeownership.

Moreover, these rules do not provide sufficient groundwater certainty for areas like Buckeye and Queen Creek, making it difficult for landowners to proceed with housing projects. The lack of guaranteed groundwater supply during the transition to designated status creates significant uncertainty. This uncertainty hinders the ability of developers to plan and execute housing projects, potentially stalling growth and development in these areas. Additionally, the requirement for excess water procurement does not address the root causes of groundwater depletion and instead places an undue financial burden on new homeowners.

The home building industry has a long history of replenishing its groundwater use since 1995, demonstrating a commitment to sustainable water management. However, the proposed rules shift the responsibility of securing future water supplies disproportionately onto homeowners, rather than addressing the broader systemic issues. This shift could lead to a scenario where other land users continue to deplete groundwater resources without adequate accountability, further exacerbating the state's water challenges.

ADWR has not provided adequate evidence that these rules will effectively address our water problems, nor have they engaged in meaningful consultation with stakeholders like the HBACA to discuss these concerns. The lack of stakeholder engagement and transparency in the

rule-making process is troubling and undermines the credibility of the proposed regulations. Without a comprehensive and collaborative approach, these rules risk exacerbating current issues rather than providing sustainable solutions.

We urge the GRRC to reconsider these rules and ensure that any new regulations are fair, legal, and do not place an undue burden on homeowners. It is crucial that any measures taken to address water challenges are balanced, equitable, and based on thorough consultation with all affected parties/industry leaders. Thank you for your attention to this critical issue.

Sincerely,

Ian Hughes

Subject: Oppose ADAWS
To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Please oppose DWR's ADAWs new rules. This is not a fix for the industry as it is written. Home building has replenished its groundwater use since 1995. We just want to keep building homes and protecting our groundwater aquifers as we have done for over 30 years. Arizona has a severe housing affordability crisis, and water is incredibly expensive. As currently written, one is required to bring 130% of the necessary water to meet the standards not 100%. If you were charged 130% for your goods you would not want to accept that either or chose not to purchase those goods. The same will happen to homebuilders. Consumers will choose other locations such as projects already in designated areas. This will also affect economic development as companies choose between Arizona and places like Texas to relocate to. If their employees can't afford homes, then that is a disadvantage for our State. This will continue to add pressure to the designated municipalities for growth versus an ag to urban approach. ADWR has no intention on working with HBACA even as we have requested several meetings. This is not a solution. Thanks,

Patrick Brown

Date: Monday, November 4, 2024 at 4:36:27 PM UTC-7
Subject: Proposed DWR Water Rules
To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

To whom it may concern,

My name is James Attwood, and I am the Division President for Tri Pointe Homes Arizona, a homebuilder with a rich 30+ year history across Arizona. I am writing to express my concern and opposition to DWR's proposed ADAWS rules.

I have worked for Tri Pointe Homes (previously Maracay Homes) for over 18 years. I take great pride in the homes and communities we have built across Arizona. I also take pride in the fact that we are a sustainable industry, both with the energy efficient and water conserving products that we use, but also because we are the only industry that has fully replenished its groundwater use since 1995.

Currently, Arizona is in the midst of a housing and housing affordability crisis, and I am deeply concerned that the actions being taken and rules being proposed by DWR will have a severe, detrimental impact on housing affordability. As proposed, homebuilders, and subsequently future homeowners, will be subsidizing the water supplies and costs involved for all other water users. Any water challenge we are looking to address will not be solved unless other users are responsible for their water use as well.

I appreciate your consideration, and hope that you agree, that as homebuilders we are working to address a critical need for Arizona and its residents. We should be working toward water solutions that address our housing affordability challenges as well.

Thank you,

James Attwood DIVISION PRESIDENT E James.Attwood@TriPointeHomes.com O 480.346.5201 M 602.319.3039 W TriPointeHomes.com

RE: Comments pertaining to ADAWS and Commingling Rules (file number R24-156) Submitted to Governor's Regulatory Review Council on October 7, 2024

Dear Members of the Governor's Regulatory Review Council,

I appreciate the Council's ongoing commitment to balance the needs of Arizona's citizens and stakeholders while ensuring effective regulations. Your role in reviewing agency regulations, particularly the Alternative Designation of Assured Water Supply (ADAWS) rules developed by the Arizona Department of Water Resources (ADWR), is vital for promoting sustainable water management and economic growth in our state.

I am writing this letter in my capacity as the new Mayor of Casa Grande to express my support for the ADAWS rules package submitted by ADWR on October 7th, 2024 and heard by the Council on October 22nd and November 5th.

I am aware, ADWR has worked tirelessly with stakeholders to develop the ADAWS option. This alternative has been reached to provide a balance between the two existing methods for securing an assured water supply determination. These new rules provide an alternative path for securing a Designation of Assured Water Supply in the Phoenix and Pinal Active Management Areas. Casa Grande sees this as a valuable and sustainable opportunity for economic growth throughout the city and across the entire county. I am proud to stand alongside representatives from various business sectors in Pinal County who are submitting letters of endorsement for the ADAWS. I fully support these new rules and the letters of my colleagues, and I encourage the adoption of the ADAWS as it represents a significant advancement for Pinal County.

Having been raised and educated in Casa Grande and having personally worked in many of the business sectors within Pinal County, I have a unique perspective on the direct impact these proposed rules will have for Pinal County. I support the State's Assured Water Supply Program and the importance of its role in providing water security in Arizona. However, the existing methods are no longer viable for many communities, water providers, developers, builders and ultimately the homeowners they serve. The

ADAWS introduces a new approach that offers a practical solution for Arizona Water Company that serves the vast majority of Cas Grande to secure an Assured Water Supply. Arizona Water Company serves or will serve nearly 23% of the more than 1,200 groundwater-based subdivisions approved since the Assured Water Supply rules were first implemented 30 years ago. If these new rules are adopted, they will advance the Assured Water Supply framework more than any previous effort since the original rules were enacted in 1995, and as a result will establish the appropriate foundation for sustainable economic growth in Pinal County.

The proposed rules package is a critical next step in resolving the recent groundwater modeling issues that have resulted in no new assured water supply determinations being issued. These new rules create opportunities for land without existing determinations to contribute to the development of desperately needed affordable housing in Casa Grande and in Pinal County as a whole. We can no longer depend solely on groundwater solutions; every day we delay in investing in sustainable water supplies makes housing less affordable for our residents. The proposed rules present a reasonable and necessary path forward, enabling us to build a resilient community anchored in water security and economic vitality.

Thank you for your attention to this important matter. I appreciate the Council's efforts to ensure that Arizona's regulatory processes are clear, effective, and conducive to the needs of our communities. I look forward to your support in approving these crucial new rules.

Sincerely,

Lisa Navarro Fitzgibbons
Mayor-Elect

Re: Meritage Homes Opposition to Proposed ADWR Water Rules

Dear Members of the Governor's Regulatory Review Council,

Meritage Homes is one of the largest home builders in the U.S. with corporate headquarters located in Scottsdale and operations in the Phoenix and Tucson markets. Meritage strongly supports environmental stewardship and responsible use of our natural resources in every home, every community, and in every market that we build. I am writing to express our serious concerns regarding the proposed rules by the Arizona Department of Water Resources (ADWR), specifically the Alternative Designation of Assured Water Supply (ADAWS) rule and the comingling rule. While we understand the intent behind these rules is to address water challenges, the conditions imposed will have significant negative impacts on the home building industry and future homeowners.

The requirement for new projects to secure 133% of the water needed under **ADAWS** and 130% under the **comingling rule** effectively imposes a "water tax" on homeowners. This additional burden will drastically increase the cost of housing, exacerbating Arizona's already severe housing affordability crisis. It is unfair to expect future homeowners to subsidize water use for other land users, which these rules would mandate. This approach not only undermines housing affordability but also places an undue financial strain on families striving to achieve homeownership.

Moreover, these rules do not provide sufficient groundwater certainty for areas like Buckeye and Queen Creek, making it difficult for landowners to proceed with housing projects. The lack of guaranteed groundwater supply during the transition to designated status creates significant uncertainty. This uncertainty hinders the ability of developers to plan and execute housing projects, potentially stalling growth and development in these areas. Additionally, the requirement for excess water procurement does not address the root causes of groundwater depletion and instead places an undue financial burden on new homeowners.

The home building industry has a long history of replenishing its groundwater use since 1995, demonstrating a commitment to sustainable water management. However, the proposed rules shift the responsibility of securing future water supplies disproportionately onto homeowners, rather than addressing the broader systemic issues. This shift could lead to a scenario where other land users continue to deplete groundwater resources without adequate accountability, further exacerbating the state's water challenges.

ADWR has not provided adequate evidence that these rules will effectively address our water problems, nor have they engaged in meaningful consultation with stakeholders like the HBACA to discuss these concerns. The lack of stakeholder engagement and transparency in the

rule-making process is troubling and undermines the credibility of the proposed regulations. Without a comprehensive and collaborative approach, these rules risk exacerbating current issues rather than providing sustainable solutions.

We urge the GRRC to reconsider these rules and ensure that any new regulations are fair, legal, and do not place an undue burden on homeowners. It is crucial that any measures taken to address water challenges are balanced, equitable, and based on thorough consultation with all affected parties/industry leaders. Thank you for your attention to this critical issue.

Sincerely,

Ian Hughes
Vice President of Environmental and Government Affairs

To: grrccomments@azdoa.gov <grrccomments@azdoa.gov>

Please oppose DWR's ADAWs new rules. This is not a fix for the industry as it is written. Home building has replenished its groundwater use since 1995. We just want to keep building homes and protecting our groundwater aquifers as we have done for over 30 years. Arizona has a severe housing affordability crisis, and water is incredibly expensive. As currently written, one is required to bring 130% of the necessary water to meet the standards not 100%. If you were charged 130% for your goods you would not want to accept that either or chose not to purchase those goods. The same will happen to homebuilders. Consumers will choose other locations such as projects already in designated areas. This will also affect economic development as companies choose between Arizona and places like Texas to relocate to. If their employees can't afford homes, then that is a disadvantage for our State. This will continue to add pressure to the designated municipalities for growth versus an ag to urban approach. ADWR has no intention on working with HBACA even as we have requested several meetings. This is not a solution. Thanks,

Patrick Brown

Members of the Governor's Regulatory Review Committee,

I am writing today to provide clarification on my comments that were given during the recent GRRC hearing on October 29th related to the ADAWS package.

First, I stand by my comments that the HBACA was not thoroughly consulted on the development of the rules package. The Department did not engage in a true consultation process with the HBACA, and our concerns were never discussed, debated, or negotiated. After engaging with state agencies for several decades in the rule making process on behalf of the home building industry, we have never had so little engagement with a state agency over a rule that creates such a significant financial impact on one industry.

I was afforded the opportunity to meet with the Director of the Department on October 21st for a holistic discussion regarding Arizona's water future. The meeting was not focused on ADAWS but most importantly, the meeting took place after the rule package was sent to GRRC on October 7th. We did not discuss the rule package at this meeting, but rather we discussed the housing projects that have been halted for over a year and a half since the release of the Phoenix AMA Groundwater Model. Specifically, the HBACA wanted to get an understanding of the Director's plan moving forward to resolve the over five billion dollars the home building industry has invested in infrastructure for projects in Northern Buckeye. This issue was of critical importance since it looks like the City of Buckeye cannot pursue a Designation of Assured Water Supply under the ADAWS rule package because of the unfavorable terms set forth in the rule. Due to this, numerous master-plan communities have no solution on how to proceed with the construction of much needed housing—construction that could address our critical housing shortage in Arizona. Unfortunately, it does not look like ADWR has any proposal to solve these zombie communities.

When the concepts of the ADAWS rule was discussed at the Governor's Water Council meeting in 2023, of which I am a member, I raised concerns that the future homeowners should not bear any financial responsibility for subsidizing the water use of non-replenishing groundwater users. The reason for this is because every homeowner since 1995 has paid for their water and the cost of replenishing their groundwater use. Therefore, if the groundwater aquifers are suffering, this was not caused by homeowners' water use. These costs should be borne by development that uses mined groundwater such as commercial, industrial and rentals. Due to my comments at the Governor's Water Council, ADWR was fully aware of the concerns of the HBACA but did not engage in any serious discussions with our industry to resolve these concerns before or after the draft rule was released in August of 2024.

The Association has submitted oral comments and written comments about the deficiencies of the rule-making package. We have not received any feedback from the Department regarding our direct and real concerns.

I believe that if the Department conducted an open, transparent, and thorough consultation process, we may have developed a solution to ensure that the real and significant costs associated with this rule package would not be passed onto homeowners.

While we were not consulted on this rule package, I am under the impression that other stakeholders did undertake a private consultation process and had more access to the Department though the development of this rule package. As an example, a few private utilities have been afforded the opportunity to begin the application process for an Alternative Designation of Assured Water Supply even before the rule package has been adopted by GRRC.

I would encourage GRRC to rescind these rules and require the Department to conduct a thorough and public consultation and stakeholder process with all impacted entities to ensure that we find a solution that will guarantee housing affordability and that future homeowners are not required to carry the cost of historic non-replenishing water users in the Phoenix and Pinal AMA's.

This rule-making package is of utmost importance for the state. Every stakeholder, including the HBACA, has a vested interest to ensure that we continue to provide affordable housing solutions for all of Arizona's citizens.

Sincerely,

Spencer Kamps | Vice President Legislative Affairs

Phoenix AMA Groundwater Model

Calibration and 100-year AWS Projection

Arizona Department of Water Resources

June 2, 2023

Agenda

- AWS Program Overview
- Development of the Phoenix AMA Groundwater Model
- Description & Results of the 100-year AWS Projection
- Key Takeaways

Assured Water Supply (AWS) Program Overview

- Adequacy program created statewide in 1973 to provide consumer protection
- Evaluates the availability of a 100-year water supply considering existing, approved and project demands
- AWS program developed in 1980 to add groundwater management components to adequacy program
- Operates in Arizona's Active Management Areas (AMAs)

AWS Program Implementation

- Within AMAs, a developer of a proposed subdivision must have a 100-year Assured Water Supply to obtain plat approval and offer lots for sale
- Two ways for a developer to demonstrate an AWS:
  - Obtain a commitment of water service from a water provider that has been designated by ADWR as having an AWS
  - Obtain a Certificate of AWS from ADWR by demonstrating that the subdivision will have a 100-year AWS

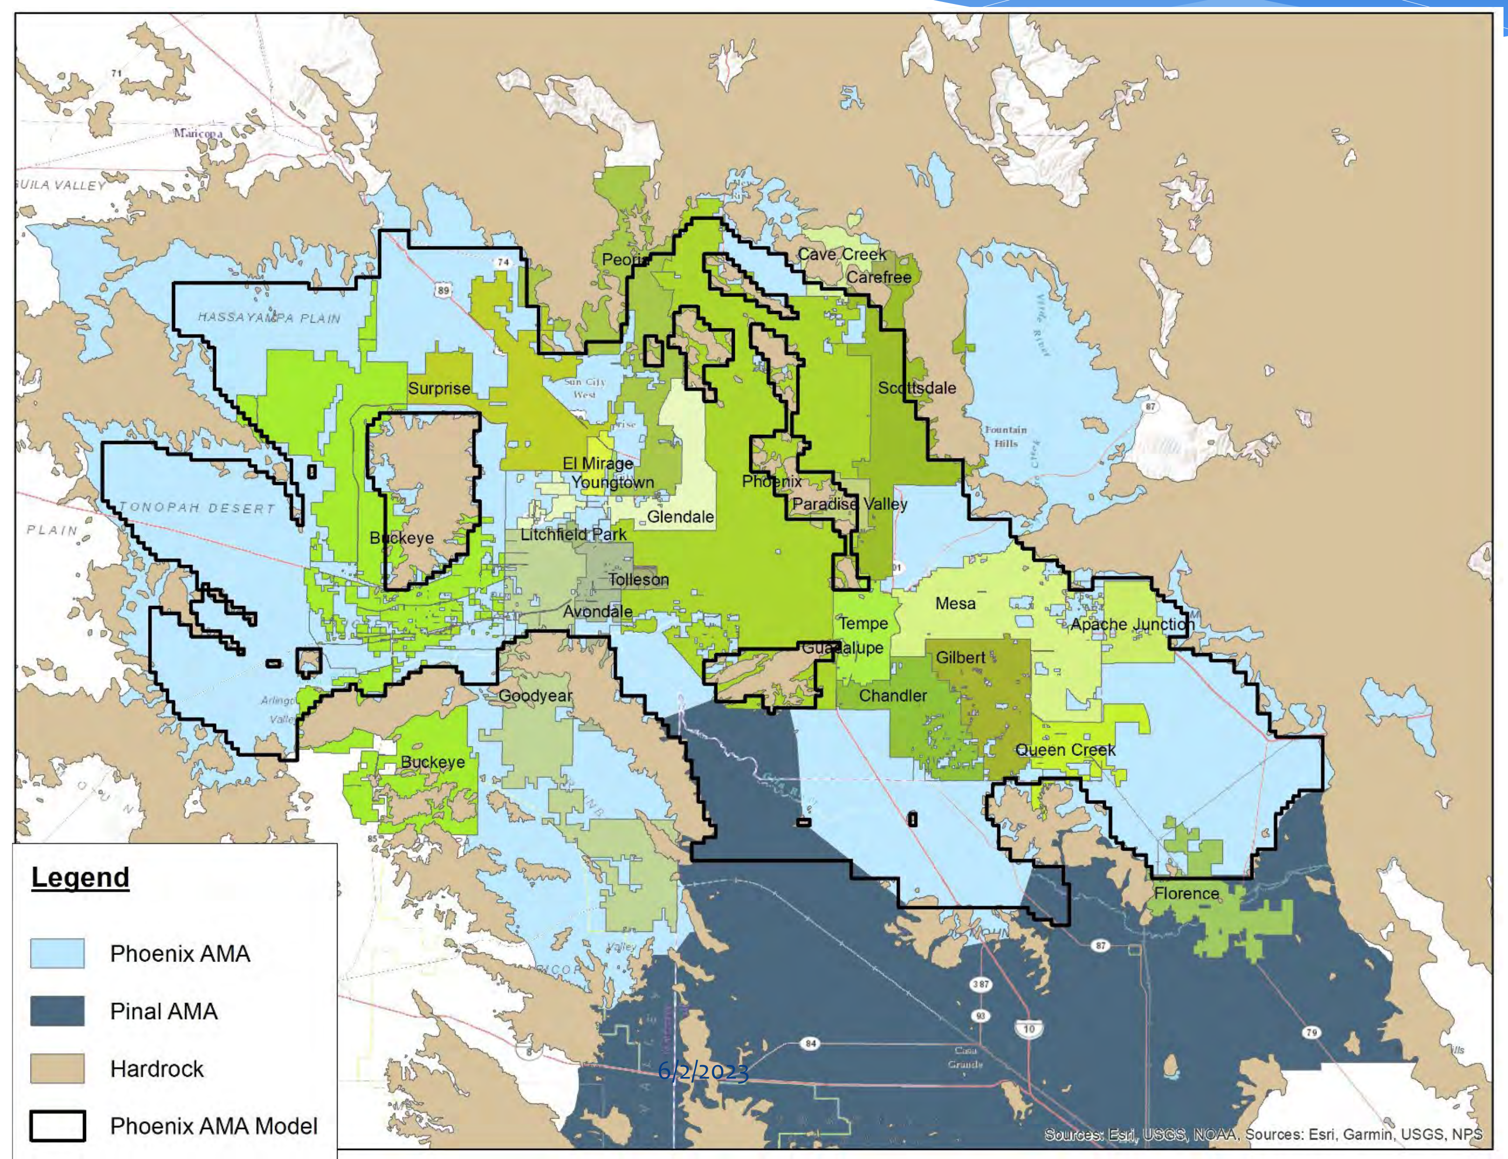
AWS Criteria

- Physical, continuous, and legal availability for 100 years
- Other requirements related to financial capability, water quality, and consistency with Management Plan/Goal
- Physical availability of groundwater is demonstrated with a model

History of Model Development

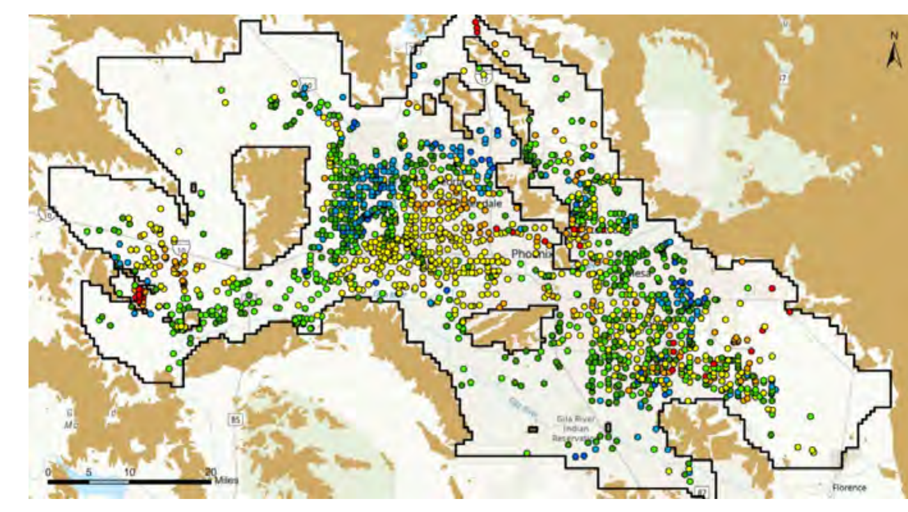
- 1990s ADWR created a MODFLOW model of the Salt River Valley (ESRV and WSRV)
- Most recently updated in 2009
- Brown and Caldwell 2006 Lower Hassayampa model
- ADWR updated/recalibrated the 2023 Lower Hassayampa model and 100-year AWS projection
- 2023 release of Phoenix AMA model, which combines the SRV with the Lower Hassayampa

Phoenix AMA Model Development



Phoenix AMA Model Calibration

- Calibration period of pre-1900 to 2021 (122 years)
- Multiple types of calibration targets
  - 40,577 WLEs from wells
  - 325 aquifer tests
  - Streamflow from 5 gaging stations
  - Baseflow from historical observations
- Peer-reviewed
- Industry standard robust calibration
- Consistent with conceptual model
- Best-available science for use with the AWS program



Distribution of Head Residuals in Layer 2

Average Head Residual (Layer 2) (feet)

- -148 to -100
- -100 to -50
- -50 to -10
- -10 to 10
- 10 to 50
- 50 to 100
- 100 to 230
- Active Model Domain
- Bedrock

Using the Model for Projection Purposes

- Distinction between the calibrated model and the 100-year projection
- "Build the tool; use the tool"
- Run the model with the AWS program requirements for supply and demand based on:
  - Historical recharge rates (calibrated model)
  - Existing demands (reported pumping)
  - Issued demand (AWS program)

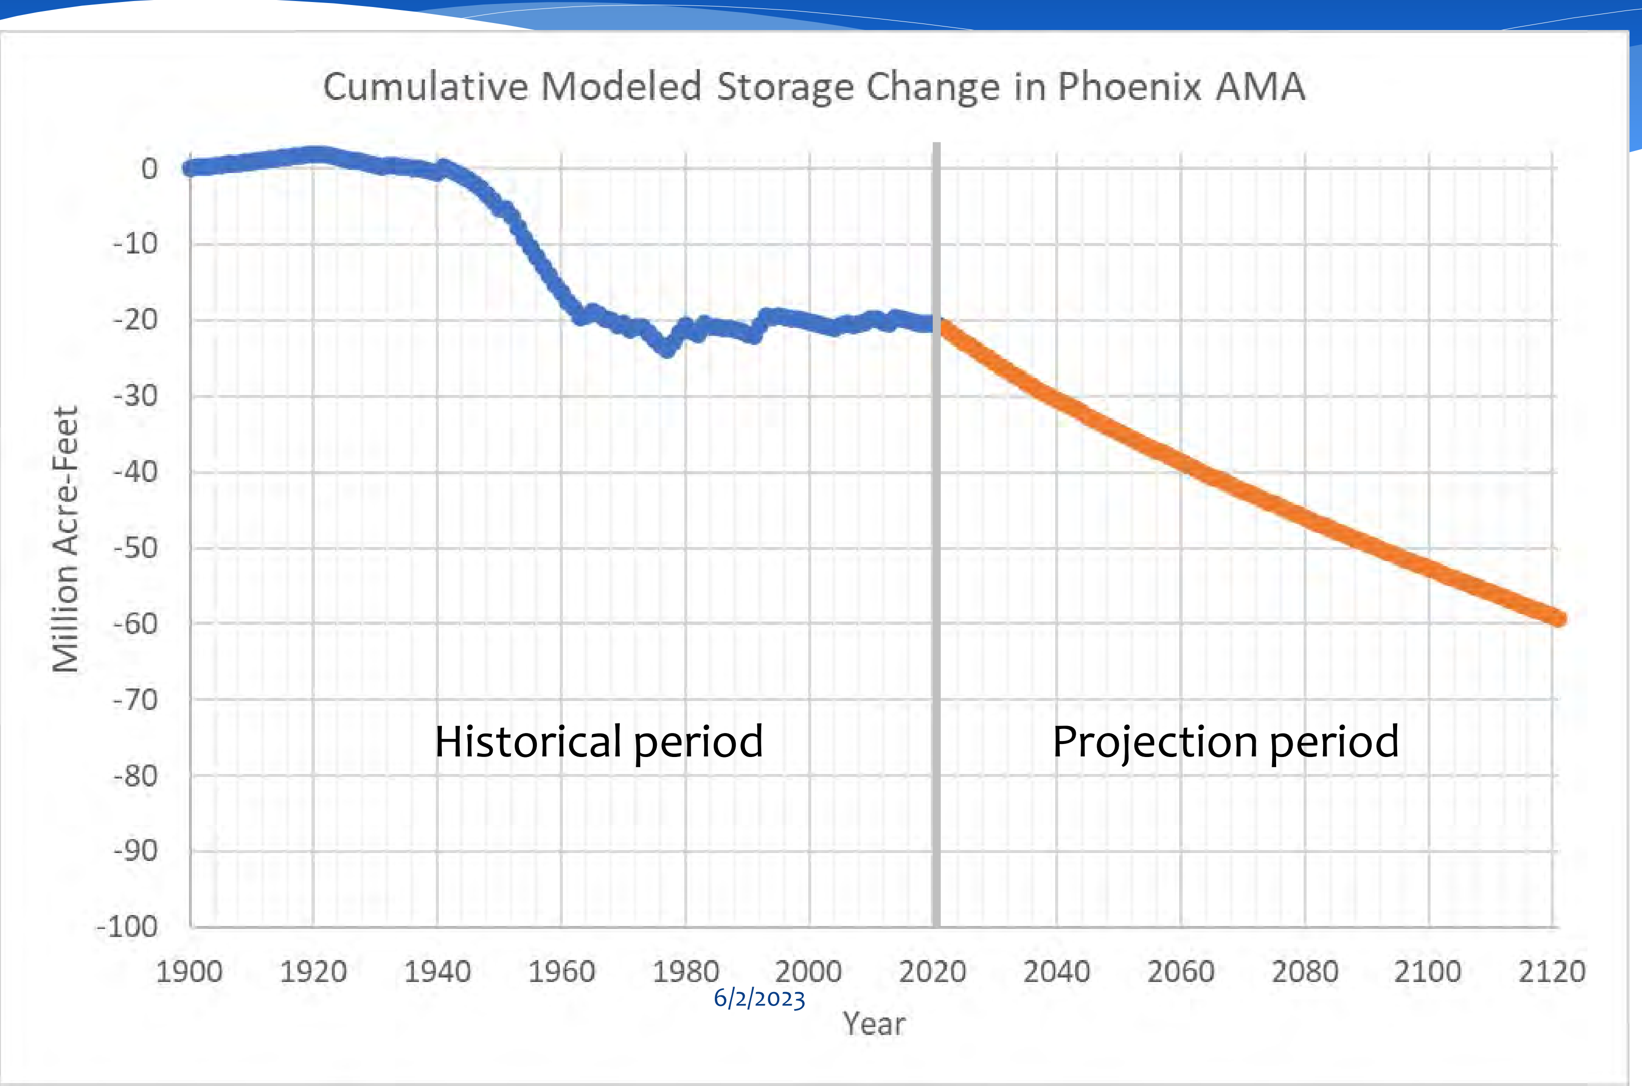
Year

Unmet Demand After 100 Years

- Total future demand ≈ 140 MAF over 100 years
- Unmet demand from:
  - Existing ag = 2.7 MAF
  - Analyses = 1.3 MAF
  - Certificates = 0.7 MAF
  - Designations = 0.1 MAF

All unmet demand = 4.9 MAF
(4% of total)

Cumulative Modeled Storage Change



Key Takeaways (1)

- AWS Program is working as intended
  - We have time to make water management decisions
  - This is an inflection point
- Projected future outflows exceed projected future inflows by a factor of 1.4
- At the end of 100 years, depth to water in areas near the edges of the groundwater basin is projected to exceed 1,000 ft or hit bedrock
- Unmet demand in existing and AWS wells is projected to be 4.9 MAF over the 100-year period (4% of total demand)

Key Takeaways (2)

- Existing homes built pursuant to the AWS program have secure water supplies
- Significant volumes of groundwater and other water supplies are available for continued growth
- Water providers in the Phoenix AMA have diverse water supplies and are not solely reliant on groundwater
- People are not running out of water

MEMORANDUM

To:	Governor's Regulatory Review Council
From:	Nicole D. Klobas, Chief Counsel, ADWR
Date:	11/8/2024
Re:	**Response to Council Questions and Public Comments related to the ADWR Notice of Final Rulemaking regarding an Alternative Path to Obtain a Designation of Assured Water Supply (ADAWS)**

The Arizona Department of Water Resources (ADWR) respectfully seeks to respond to certain misunderstandings that became apparent during discussion of the ADWR's Notice of Final Rulemaking regarding an alternative path to obtaining a designation of assured water supply (ADAWS rules) at the October 29, 2024 Study Session of the Governor's Regulatory Review Council (Council). While representatives of ADWR will continue to be available at any subsequent meeting or study session to respond to any further questions from the Council or public comments, ADWR provides the following information and the attached documents in response to the discussion on October 29.

For a general description of the ADAWS rules and their purpose, please refer to the memo ADWR submitted to the Council on October 31, 2024[1], and the Preamble to the Notice of Final Rulemaking, pages 2-8.

1. **ADWR did not rely on groundwater models to develop the ADAWS rules.**

During the discussion and public comments on the ADAWS rules at the October 29 Study Session, at least one commenter asserted that the ADAWS rules fail to "disclose[ ] a reference to any study relevant to the rules that the agency reviewed and either did or did not rely on in the agency's justification for the rule," as required by A.R.S. § 41-1052(D)(8). While the preamble to the ADAWS rules mentions ADWR's groundwater models for the Phoenix Active Management Area (AMA) and the Pinal AMA, these models are included in a description of past events and conditions that existed *long before* the discussions that led to the development of the ADAWS rules.

In fact, the water providers that have expressed interest in the ADAWS pathway have been unable to obtain a designation of assured water supply (designation) in part because of the same legacy groundwater pumping that ADAWS would address over time via the 25% "offset" requirement discussed below. These providers were not able to obtain a designation before the release of the current groundwater models in the Phoenix and Pinal

[1] https://www.azwater.gov/sites/default/files/2024-11/2024_10-31_ADWR_Memo_to_GRRC_re_ADAWS.pdf

AMAs and, without ADAWS, would probably not be able to obtain a designation even if the unmet demand shown in such groundwater models were to be resolved. The challenges with achieving a designation are well documented in policy work and discussions from the Governor's Water Augmentation, Innovation, and Conservation Council convened under former Governor Doug Ducey.[2]

As ADWR has acknowledged in its responses to public comments within the preamble, the groundwater models in question remain subject to change and applicants may continue to propose changes to groundwater models in support of their applications pursuant to A.A.C. R12-15-716(B). *See* Preamble at p. 12.

The models themselves are not relevant to any of the criteria set forth in the ADAWS rules. While some commenters have attempted to link the 25% offset requirement in proposed subsection (H) to results from the Phoenix AMA groundwater model, as discussed in Part 2 of this memo, the requirement to reduce existing groundwater use is not linked to any groundwater model finding. Rather, the 25% offset requirement is effectively a tradeoff for not directly demonstrating that a volume of water is physically available. Because the water provider is committing to use less groundwater in the long term by replacing some groundwater with alternative supplies, the water provider can include a prescribed volume of groundwater in its designation application without relying on any groundwater model.

Moreover, groundwater is a finite resource in Arizona. Even if the assumptions in a groundwater model are modified and the results show physical availability of groundwater for one or more assured water supply applications, eventually (likely soon) the model would show that no additional groundwater would be physically available. Therefore, there would still be a need for a path to obtain a designation without relying on a groundwater model to demonstrate physical availability.

Finally, and most importantly, we have heard from developers, business leaders, cities and towns, and water providers alike that there is an immediate need for additional housing in both the Phoenix and Pinal AMAs. As mentioned above, ADWR has had meetings and conversations with water providers who are actively interested in a path to designation *without* reliance on a groundwater model to demonstrate physical availability of groundwater to serve their existing customers. Whether that is because the providers do not want to bear the expense of hiring a consultant to modify a groundwater model, because they do not want to risk the time required for model modification and review by ADWR,

[2] Issue Brief #4, *Groundwater in the Assured Water Supply Program*, Governor's Water Augmentation, Innovation, and Conservation Council Post-2025 AMAs Committee, **Attachment A**.

or because they agree with the current groundwater model results, those water providers seek this alternative path to designation – without relying on a groundwater model to show physical availability for existing groundwater uses.

For all of the reasons above, ADWR accurately stated in item 8 of the Preamble that there is no study relevant to the ADAWS rules.

2. **ADWR based the requirement to reduce existing groundwater use by 25% of each new alternative supply on discussions in the Governor's Water Policy Council and its Assured Water Supply Committee.**

In May 2023, Governor Hobbs charged the Governor's Water Policy Council to provide recommendations regarding substantial water policy issues in the State. Regarding the Assured Water Supply program, Governor Hobbs directed the Council to:

> Review and make recommendations for changes to Assured Water Supply policies - legislatively, administratively, or by executive action - to address the challenges revealed by Assured Water Supply modeling projections, while continuing to:
>
> - strengthen the integrity of the Assured Water Supply program,
> - protect consumers and aquifers, and
> - ensure future growth is not reliant on mined groundwater.[3]

Members of the Council served on two committees, one of which was the Assured Water Supply Committee (AWS Committee). In addition to the objective described above, the AWS Committee was directed to recommend policies subject to the following principles:

> - Proposals must protect the strength and integrity of the Assured Water Supply program.
> - Proposals should enable future growth without reliance on mined groundwater.
> - Proposals may not reduce the 100-year requirement or increase the depth to which groundwater may be pumped.
> - Proposals must ensure there is water before growth.
> - Proposals must protect consumers.[4]

[3] Governor's Water Policy Council Meeting Presentation, May 17, 2023, slide 13 (**Attachment B** at PDF page 27).
[4] AWS Committee Meeting Presentation, June 27, 2023, slide 16 (**Attachment B** at PDF page 58).

The AWS Committee considered various proposals relating to designations and certificates of assured water supply, and based on those discussions, as well as informal discussions with stakeholders, ADWR presented a proposal for an "Alternative Pathway to Designation," which sought to address certain challenges previously discussed by the AWS Committee:

- The commingling issue associated with certificates and alternative water supplies
- Unmet demand and/or exceedances of depth-to-water limit in AMA model
- Incorporating new, non-groundwater supplies into a provider's water portfolio
- Facilitating near-term growth while future infrastructure is under development
- Creating a long-term benefit for the aquifer.[5]

This concept is largely consistent with the ADAWS Rules, except that the September 2023 proposal assumed an offset to the grandfathered groundwater volume equivalent to 30% of any new alternative supply, which ADWR has since reduced to 25%. ADWR staff also presented a slide showing that the ADAWS concept was intended to result in a substantial reduction in groundwater use over time, relative to the status quo.[6] ADWR also noted that the offset of groundwater with a portion of any new alternative supplies would "facilitate an incremental transition away from groundwater over time."[7]

The AWS Committee members had a robust discussion of the proposal at the meeting on September 27, 2023, including a discussion of the 30% offset value. While some members argued that it was too high, others pointed out that the offset was a key component because ultimately, groundwater use would be reduced.[8]

At the following AWS Committee meeting, ADWR reviewed the proposal and presented answers to questions from Committee members and stakeholders. Several of the questions pertained to the volume of groundwater that a water provider would continue to use, and

[8] AWS Committee Member Comment Notes, September 27, 2023 (**Attachment B** at PDF pages 122).

whether that volume would be reduced, how the 30% offset would operate, and ensuring that new supplies are acquired to replace groundwater use as well as serve new growth.[9]

The proposal was then moved forward to the Governor's Water Policy Council for discussion.[10] The Council discussed the proposal and supported it, though members had differing viewpoints on the 30% offset value, with some arguing that it was too high and at least one member arguing it should be as high as 50%.[11] Ultimately, the Council recommended the proposal to Governor Hobbs, including a 30% offset value.[12]

In recognition of the comments from some members of the Governor's Water Policy Council regarding the 30% offset value, suggesting either an increase or a substantial decrease in the value, ADWR drafted the proposed rule language to include an offset to the grandfathered groundwater volume equivalent to 25% of each new alternative supply. ADWR recognized that the likely applicants will have substantial volumes of existing groundwater use (and approved certificate volumes) that will be grandfathered in via the ADAWS rules, on the order of 30,000 acre-feet per year or more. For context on the significance of these groundwater volumes, Arizona's largest municipal water provider, the City of Phoenix, has 36,995 acre-feet per year of groundwater included in its designation.

Meanwhile, the volumes of each new alternative supply are likely to be in the range of 2,000 to 5,000 acre-feet per year. Therefore, the 25% "offset" volume will amount to 500 to 1,250 acre-feet per year, or a reduction in groundwater use of approximately 1.7% to 4.1% per year for a provider with a 30,000 acre-foot grandfathered groundwater volume.

For comparison, the Management Plans for both the Phoenix and Pinal AMAs require that large providers have no more than a 10% rate (relative to their entire water supply) of lost and unaccounted for water – meaning losses due to leakage, seepage, metering our accounting errors, etc.[13] For a provider serving 33,750 acre-feet per year (28,750 acre-feet

[12] Letter from Tom Buschatzke, Director of ADWR, to Katie Hobbs, Governor of the State of Arizona, November 29, 2023, regarding the Governor's Water Policy Council Recommendations, p. 4 (**Attachment C** at PDF page 173).
[13] *See* Fourth Management Plan for the Pinal Active Management Area, p. 5-15 (**Attachment D** at PDF page 185); Fourth Management Plan for the Phoenix Active Management Area, p. 5-16 (**Attachment D** at PDF page 188); Fifth Management Plan for the Pinal Active Management Area, pp. 5-10 through 5-11 (**Attachment D** at PDF pages 191-192); Fifth Management Plan for the Phoenix Active Management Area, p. 5-11 (**Attachment D** at PDF page 195).

of groundwater and 5,000 acre-feet of an alternative water supply) that would amount to 3,375 acre-feet of water that may be "lost" to the system each year – nearly triple the 1,250 acre-foot reduction in groundwater use applied to the grandfathered groundwater volume under the ADAWS rules. The 25% offset will likely impact a volume of groundwater that is a fraction of what is permissible to lose through leakage losses and is not an undue burden.

Another key consideration related to the 25% offset component is that, upon meeting the relevant assured water supply criteria, effluent projections associated with future demands can be incorporated into a water provider's portfolio, potentially at volumes that will match the 25% offset requirement.

For example, if a new alternative supply of 1,000 acre-feet is acquired by the water provider and added to the designation, the required 25% offset will amount to a reduction of 250 acre-feet from the provider's grandfathered groundwater volume. Additionally, the water provider applicant may include an additional effluent supply associated with the effluent produced from the additional water use. While effluent production rates are evaluated on a case-by-case basis, effluent production generally ranges between 20 - 40% of overall water use; in this example, 200 – 400 acre-feet per year. As such, the 25% offset requirement is aligned with current best practices for water recycling and does not impose any undue burden upon water providers to bring or acquire "extra" water supplies.

ADWR has crafted the ADAWS rules to provide an alternative path to obtaining a designation for those water providers who elect to do so, without demonstrating physical availability of groundwater through a groundwater model and without replacing 100% of their groundwater supplies with new alternative supplies. This alternative path "imposes the least burden and cost … necessary to achieve the underlying regulatory objective[s]" (A.R.S. § 41-1052(D)(3)) of "protecting consumers and aquifers" as required by Governor Hobbs in her objective for the Governor's Water Policy Council, and "creating a long-term benefit for the aquifer," as discussed by members of the AWS Committee prior to the development of the proposal. ADWR has reduced the offset of groundwater use from 30% to 25% of each new alternative supply, to ensure a minimal reduction in long-term groundwater use as a substitute for demonstrating that the groundwater will be physically available through a groundwater model.

3. The Home Builders Association of Central Arizona actively participated in the development of the ADAWS rules and met with the Director of ADWR as recently as October 21, 2024.

During the October 29 study session, Spencer Kamps spoke on behalf of the Home Builders Association of Central Arizona (HBACA) and asserted that ADWR would not meet with him to discuss his concerns. This claim was also included in several comment letters submitted to GRRC. In fact, Mr. Kamps and his representatives participated in each of the meetings of the Governor's Water Policy Council and its AWS Committee described above, including the discussions of the alternative path to designation that was incorporated into the ADAWS rules. HBACA also submitted comments during the informal stakeholder process regarding draft rule language, as well as during the public notice period provided for in ADWR's Notice of Proposed Rulemaking. Additionally, Director Buschatzke met with Mr. Kamps as recently as October 21, 2024, regarding the ADAWS rules and other issues related to the Assured Water Supply program.[14] ADWR has consistently considered and responded to HBACA's comments and incorporated changes where possible while achieving the regulatory objective. Assertions that ADWR has refused to meet with any stakeholder to discuss the ADAWS program are false.

ISSUE BRIEF #4

GROUNDWATER IN THE ASSURED WATER SUPPLY PROGRAM

ISSUE STATEMENT

Large parts of the Active Management Areas (AMAs) remain groundwater-dependent due to a lack of renewable water supplies and infrastructure, which creates uncertainties as groundwater supplies become more limited.

- What are the role and consequences of the use of groundwater to support new growth after 2025?
- What are the risks to homeowners whose physical groundwater supplies may be depleted after the regulatory Assured Water Supply 100-year timeframe?
- What roadblocks prevent access to renewable supplies and infrastructure in these groundwater-dependent areas?

BACKGROUND

The Assured and Adequate Water Supply Program was designed as a consumer protection law and has evolved into a significant tool for sustaining the state's economic health by preserving groundwater resources and promoting long-term water supply planning.[1] The Assured Water Supply (AWS) Rules for the State's AMAs were developed with stakeholder input over many years, ultimately adopted by the Arizona Department of Water Resources (ADWR) in 1995[2], and subsequently modified over time. The AWS Program provides consumer and economic protection by requiring a demonstration of a 100-year water supply to serve a new development before lots can be sold in the AMAs.

An AWS can be demonstrated through either a Designation of AWS (Designation) or Certificate of AWS (Certificate). To secure either a Certificate or Designation, a 100-year supply of water must be demonstrated to satisfy the needs of the proposed use, either for an applicant subdivision in the case of a Certificate, or for all of the demands within the service area of a water provider who seeks a Designation. The Director of ADWR must review a Designation at least every 15 years to determine whether the Designation should be modified or revoked.[3] The Director does not typically reevaluate a Certificate. Landowners also have the ability to apply for an Analysis of AWS to partially satisfy the regulatory criteria, prior to obtaining a Certificate. Analyses are typically used to prove that water will be physically available for master planned communities.[4] If an Analysis is issued for groundwater, it reserves a specific volume of water for 10 years (for purposes of other AWS reviews) only for the specific development plan or plat that is the subject of the Analysis.[5]

---

[1] https://new.azwater.gov/aaws.

[2] The 1995 rules did not include provisions specific to consistency with the management goal of the Santa Cruz Active Management Area (SCAMA), which was created by the Legislature in 1994 (A.R.S. § 45-411.04). AWS rules have not yet been modified to address consistency with the management goal of the SCAMA, and it is not addressed in this Issue Brief.

[3] A.A.C. R12-15-711.

[4] See *Application for an Analysis of Assured Water Supply*, https://new.azwater.gov/sites/default/files/media/AnalysisofAssured_REV%202-20-2020.pdf.

[5] A.A.C. R12-15-703. Analyses may be renewed in 5-year increments if certain criteria are met. *Id.*

An AWS for either a Certificate or Designation can be demonstrated based entirely or partially on groundwater. Two of the requirements for demonstrating an AWS are that the water for the proposed Certificate or Designation is physically available for 100 years and that the use of the water is consistent with the management goal of the AMA. Physical availability of groundwater is the regulatory measure of an applicant's ability to demonstrate sufficient groundwater for 100 years. To satisfy the physical availability requirement for groundwater, an applicant must show that its groundwater withdrawals would not cause the depth to groundwater to exceed a regulatory limit (1,000 feet below the land surface in the Phoenix, Tucson, Prescott, and Santa Cruz AMAs; 1,100 feet in the Pinal AMA) and would not negatively affect previously issued AWS Determinations[6] and existing municipal uses.[7]

The requirement that projected groundwater use be consistent with the management goal may be met if withdrawals are made pursuant to the groundwater allowance or through the use of pledged extinguishment credits (which are added to the groundwater allowance balance).[8] More detail on these types of groundwater withdrawals is provided in the *Unreplenished Groundwater Withdrawals Issue Brief*.

In the Phoenix, Pinal and Tucson AMAs, the requirement that projected groundwater use be consistent with the management goal may also be satisfied if the subdivision or water provider becomes a member of the Central Arizona Groundwater Replenishment District (CAGRD). The Arizona Legislature authorized the CAGRD as a responsibility of the Central Arizona Water Conservation District (CAWCD), which operates the Central Arizona Project (CAP). Since CAWCD encompasses only Maricopa, Pinal and Pima Counties, the CAGRD does not serve the Prescott or Santa Cruz AMAs. The CAGRD replenishes *excess* groundwater[9] pumped by or delivered to its members, after that volume is annually calculated and reported to the CAGRD. The CAGRD must submit a Plan of Operation every ten years to ADWR for review and approval. The Director of ADWR must determine whether the Plan is consistent with achieving the management goals of the AMAs in CAGRD's service area.[10]

ISSUE DESCRIPTION

Even with the benefits that followed the 1980 Groundwater Management Act, there are numerous pressures placed on groundwater in the AMAs, many of which have been identified in the *Unreplenished Groundwater Withdrawals, Hydrologic Disconnect,* and *Exempt Wells* Issue Briefs. The AWS Program has been a significant factor in encouraging municipal water providers to reduce groundwater use in the AMAs over the last 25 years. In the context of all the challenges identified by the Post-2025 AMAs Committee, the State should evaluate the AWS Program and consider how it can be improved well beyond 2025. Three main questions related to groundwater use under the AWS Program provide a starting point for evaluating whether the AWS Program could better provide consumer and economic protection and better aid in achieving the AMA management goals.

---

[6] A.A.C. R12-15-701(31): "Determination of assured water supply" means a certificate, a designation of assured water supply, or an analysis of assured water supply.

[7] A.A.C. R12-15-716 and ADWR Substantive Policy Statement: *Hydrologic Studies Demonstrating Physical Availability of Groundwater for Assured and Adequate Water Supply Applications* (AWS 7).

[8] A.A.C. R12-15-722. The Groundwater Allowance is a volume of groundwater which may be calculated for each AWS Certificate or Designation according to rules specific to each AMA. *See Unreplenished Groundwater Withdrawals Issue Brief.*

[9] "Excess groundwater" is any amount of pumped groundwater beyond what is permitted by the AWS rules. With a few exceptions, this generally means the volume of groundwater pumped that exceeds the groundwater allowance and/or extinguishment credits of a CAWS or DAWS. More detail on CAGRD operations is provided in the *CAGRD Replenishment and Water Supplies Issue Brief*.

[10] A.R.S. § 45-576.03.

What are the role and consequences of the use of groundwater to support new growth after 2025?

Under the current regulatory structure, groundwater will continue to be utilized to serve subdivisions that fall under the jurisdiction of the AWS Program. New Certificates or Designations of AWS may utilize groundwater that is consistent with the management goal through the use of Extinguishment Credits, the Groundwater Allowance, or membership in the CAGRD. As groundwater uses expand to serve new development, there is a corresponding reduction to the volume of groundwater that exists in the aquifer, some of which is replenished. In the Phoenix, Pinal, and Tucson AMAs, localized groundwater depletion can be mitigated when replenishment occurs in close proximity to withdrawals.[11]

Groundwater withdrawals by all sectors will impact the ability of new AWS applicants to demonstrate physical availability of groundwater. In the Pinal AMA, ADWR modeling shows insufficient groundwater is physically available to meet the demands of previously issued Analyses, Certificates and Designations over the 100-year modeling period. If left unresolved, additional AWS applications using groundwater or stored water recovered outside the area of impact will not be approved.[12] The Prescott AMA faces similar challenges, with an increasingly reduced volume of groundwater physically available for new AWS Determinations.[13] Other AMAs are also likely to face reduced physical availability of groundwater after 2025.

In addition to curtailing the ability to subdivide lands for new development, continued groundwater reliance may lead to other adverse impacts. Unless steps are taken to reduce or ameliorate impacts of groundwater drawdown, depths to water in the AMAs would decline, resulting in increased land subsidence, decreased aquifer storage, and the potential deterioration of water quality.[14] The degree to which these adverse impacts may occur when groundwater levels fall to depths of 1,000' below land surface is also unknown.[15] ADWR is in the process of updating its groundwater models for the Phoenix and Tucson AMAs, which should provide better projections of the groundwater supplies in these two AMAs.

What are the risks to homeowners whose physical groundwater supplies may be depleted after the regulatory Assured Water Supply 100-year time frame?

While the water demands of all previously issued Certificates or Designations must be incorporated in future AWS applications, groundwater pumping reduces the amount of groundwater available for all existing municipal water providers serving certificated lands or designated service areas through time. These impacts may be more likely to occur where pumping and replenishment or storage and recovery are hydrologically disconnected. Even with an AWS Determination, other factors, including withdrawals

[11] The CAGRD has the flexibility to replenish in various locations to fulfill its replenishment responsibilities but is not required to replenish within the area of impact of its members' groundwater pumping. The CAGRD is not responsible for ensuring groundwater physical availability for its members, but rather to maintain its members' consistency with the AMA management goal.

[12] 2019 Pinal Model and 100-year Assured Water Supply Projection Technical Memorandum, October 11, 2019, http://infoshare.azwater.gov/docushare/dsweb/Get/Document-11793/2019_Pinal_Model_and_100-Year_AWS_Projection-Technical_Memorandum.pdf; Pinal Model 2019 Update Presentation, November 1, 2019, Slide 53, https://new.azwater.gov/sites/default/files/20191101_Pinal_Model_2019_Presentation.pdf.

[13] Prescott AMA 4MP, Section 1.5, page 1-4.

[14] "Ground-Water Depletion Across the Nation." USGS, 2003. https://pubs.usgs.gov/fs/fs-103-03/JBartolinoFS(2.13.04).pdf.

[15] Phoenix 3MP – Section 8.9; Previous scholarship has demonstrated that the 1,000 foot depth limit was not based upon hydrological or technical considerations (see, Rita Pearson Maguire, *Patching the Holes in the Bucket: Safe Yield and the Future of Water Management in Arizona,* 49 Ariz. L. Rev. 361 (2007)).

from groundwater users not subject to the AWS requirements, may also affect the availability of groundwater supplies during the 100-year regulatory timeframe of an AWS Certificate or Designation. Ultimately, homeowners rely on the water provider for service, with an expectation of consumer protection by local or state government, no matter the status of the AWS.

What roadblocks prevent access to renewable supplies and infrastructure in these groundwater-dependent areas?

Groundwater-dependent municipal water providers face obstacles in their ability to acquire renewable water supplies, to become Designated, to extend their existing Designations, or to reduce or eliminate their reliance on the groundwater. There are 276 undesignated municipal water providers in the five AMAs. Since 2000, no undesignated municipal water providers have successfully been newly Designated in the Phoenix AMA, which illustrates the difficulty of building a renewable water supply portfolio and reducing dependence on groundwater.

One of the primary challenges to reducing groundwater reliance is the lack of available renewable supplies. With fewer renewable supplies available for acquisition, competition for those supplies will increase in the future. The 2019 *Long-Term Water Augmentation Options for Arizona* report concluded that, for the most part, Arizona's water augmentation options have already been identified and additional water supplies coming from outside of Arizona are not expected except for the potential opportunity of a desalination project with Mexico.[16] The report also emphasized the importance of working with the water resources we have to meet our future needs.[17]

Additional obstacles faced by groundwater-dependent municipal water providers include the lack of institutional structures to facilitate the acquisition of renewable supplies, constraints on the marketability of surface water rights, costs of such supplies, certain restrictions imposed on private utilities by the Arizona Corporation Commission, resistance to and/or limitations on water transfers, obstacles to accessing infrastructure to move renewable supplies, and the need to acquire permanent renewable water supplies well in advance of actual water use as emphasized by the AWS Rules. These obstacles compound an overarching challenge for water providers to finance renewable water supplies, particularly those with smaller customer bases or greater geographical distance from augmentation opportunities. These challenges are even more acute in the Pinal, Prescott and Santa Cruz AMAs.

The recent effort by the Town of Queen Creek to acquire renewable supplies to obtain a Designation and eliminate the replenishment obligation of the CAGRD member lands it serves, demonstrates the difficult financial and logistical hurdles municipal water providers face. Understanding the Town's challenges and motivations, as well as those of the City of Buckeye, which has also pursued for years a Designation, could deepen the understanding of these issues and present opportunities for improvement moving forward.

Governor’s Water Policy Council Meeting Presentation,
May 17, 2023

Governor's Water Policy Council

May 17, 2023

Meeting Logistics

- Please note that this meeting is being broadcast via webinar and is being recorded.
- The meeting recording and materials will be posted to the Council's webpage (https://new.azwater.gov/gwpc).
- Only members of the Council will be able to unmute themselves to participate in the meeting.
- *Technical issues? Please call the ADWR Help Desk at* ***602-771-8444*** *or email tickets@azwater.gov.*

I. Welcome & Opening Remarks

Governor Katie Hobbs

GREAT SEAL OF THE STATE OF ARIZONA
DITAT DEUS
1912

I. Welcome & Opening Remarks

Director Tom Buschatzke, Chair

II. Introductions

III. Focus Areas & Objectives

Focus: Assured Water Supply

The 1980 Groundwater Management Act, and the Assured Water Supply Program in particular, have enabled and guided responsible growth in an arid environment. The Program:

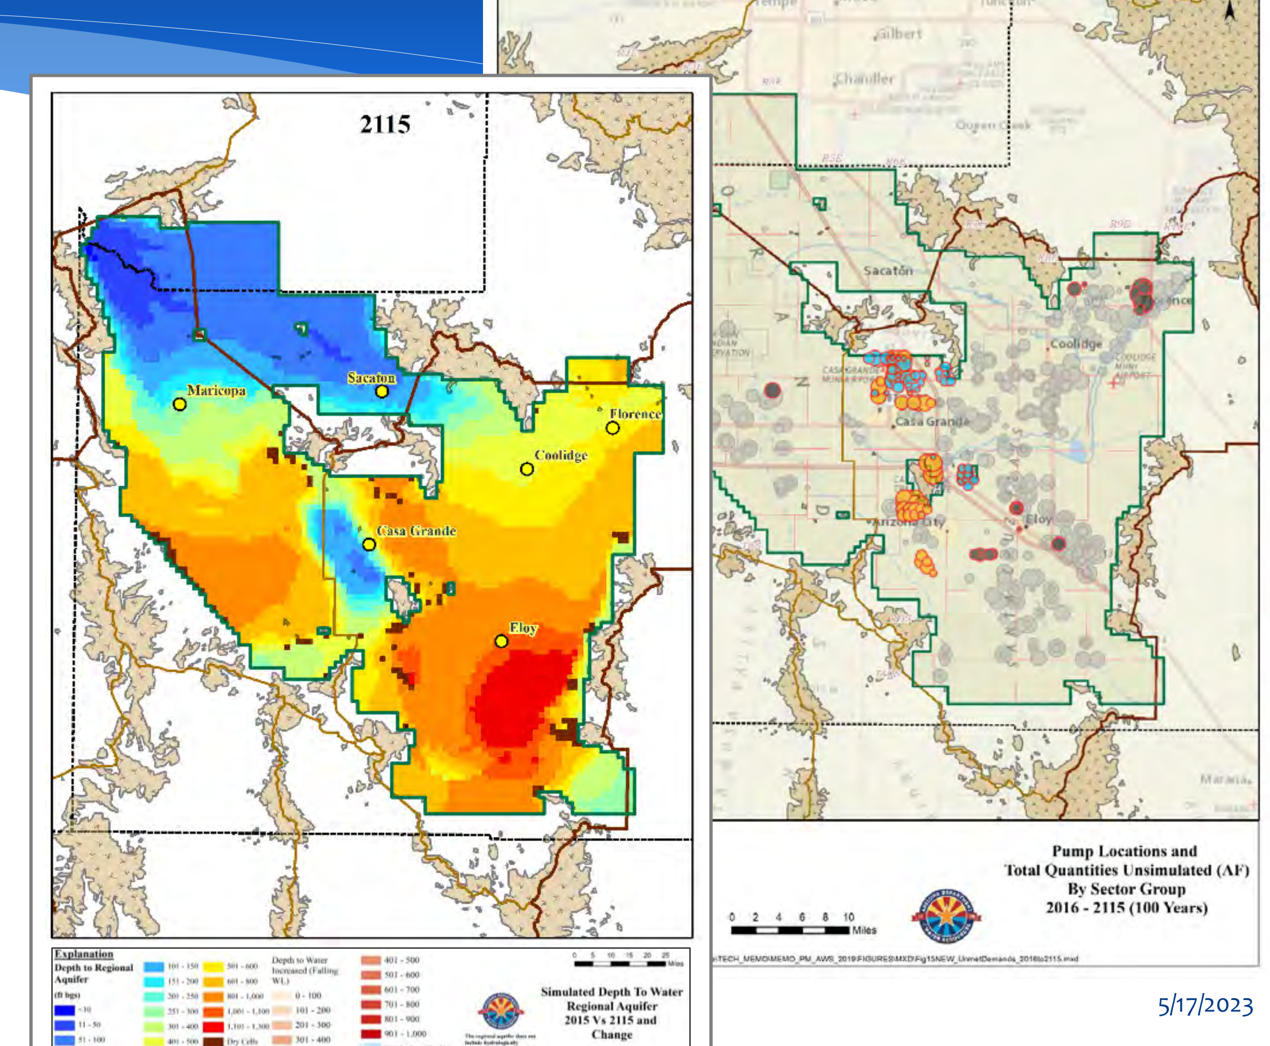
- Provides consumer protection, ensures sustainable water supplies for new homes
- Drives innovation, collaboration, and creativity
  - recharge
  - replenishment
  - banking
  - exchanges
  - reuse
  - demand reductions
  - investment in renewable supplies & infrastructure

Assured Water Supply Modeling

- The Assured Water Supply Program requires the Department to evaluate available supply for 100 years before permitting additional future growth.
- Models are updated to utilize the best available science and are constructed to meet the rules, policies, and requirements of the Assured Water Supply Program.
- The latest modeling projections are making it clear there are challenges ahead that must be addressed.
- The program is doing what it was intended to do, requiring us to plan for water supplies ahead of growth.

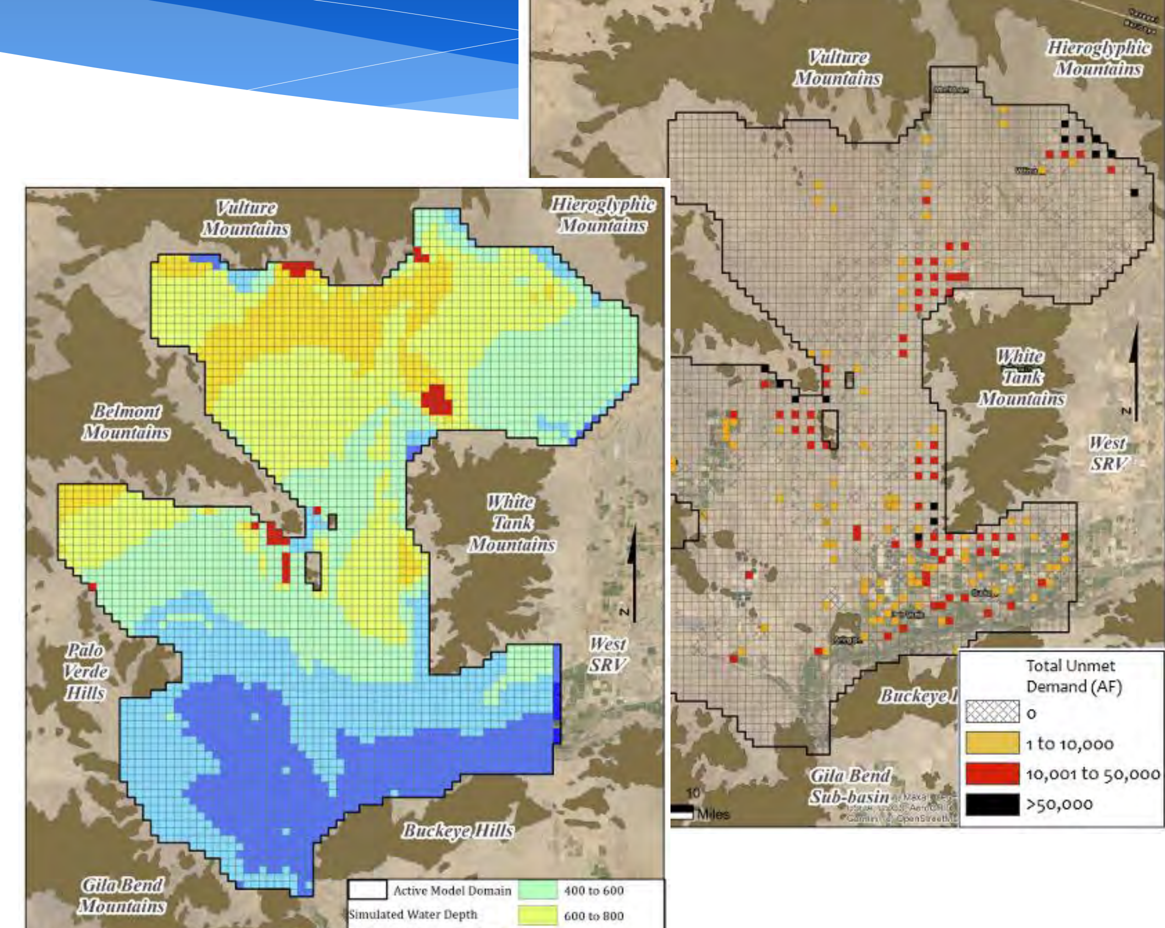
Pinal Model (2019)

- **Unmet demand after 100 years:**
  - Existing wells = 5.8 MAF
  - Analyses = 1.1 MAF
  - Certificates = 0.3 MAF
  - Designations = 0.6 MAF
  - LTSC = 0.3 MAF
- **Total unmet demand after 100 years exceeds 8 MAF**



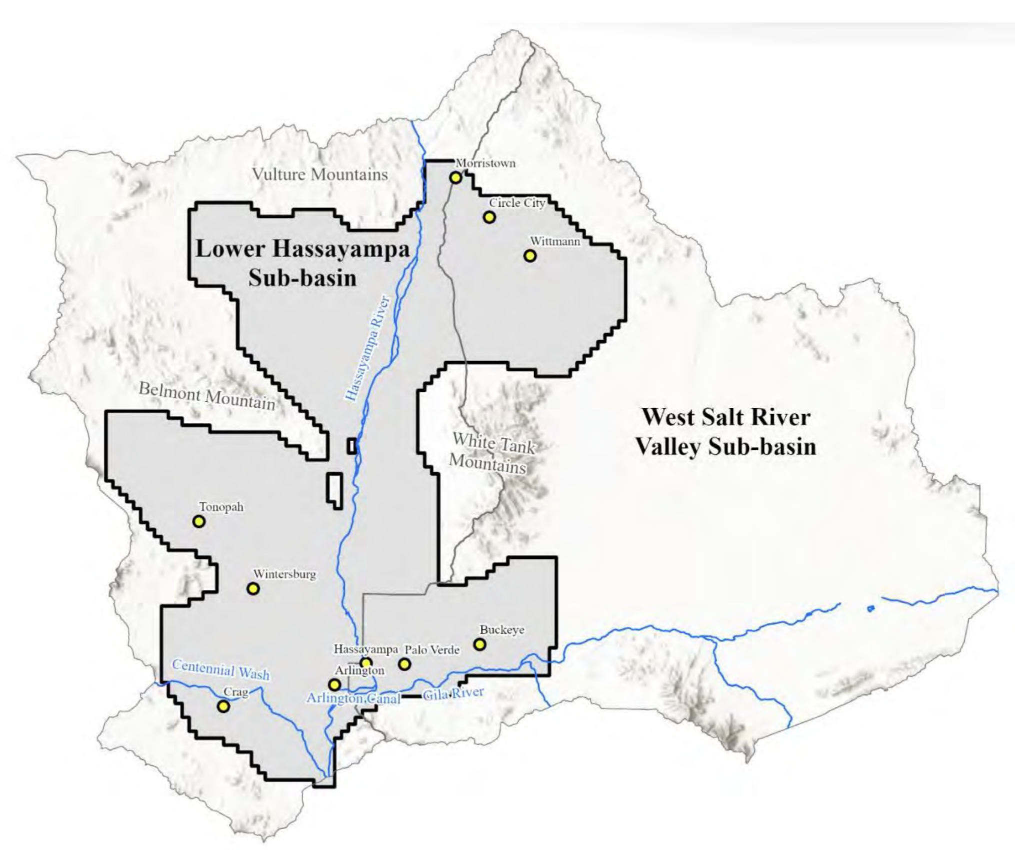
Hassayampa Sub-basin Model (2023)

- **Unmet demand after 100 years**
  - Existing wells = 0.9 MAF
  - Analyses = 2.2 MAF
  - Certificates = 1.3 MAF
  - LTSC = 0.1 MAF
- **Total unmet demand after 100 years**
  - **4.4 MAF**
- Depth to water exceeds 1,000 ft bls and/or hits bedrock in the central and northern parts of the sub-basin



"The days of utilizing native groundwater for development in Pinal are over, it's done."

- Director Buschatzke, June 2021



"ADWR previously worked with stakeholders in the West Valley that are subject to the Assured Water Supply program to seek solutions to the shortfall projected in the Hassayampa model."

"As Governor Hobbs signaled in her State of the State speech, it is time to include legislators, the business community and all constituencies to address the challenges attendant to the Assured Water Supply program in the Hassayampa Basin and for all the water management challenges facing Arizona."

- Director Buschatzke, January 2023

Objective: AWS Review & Recommendations

Objective:

Review and make recommendations for changes to Assured Water Supply policies–legislatively, administratively, or by executive action–to address the challenges revealed by Assured Water Supply modeling projections, while continuing to:

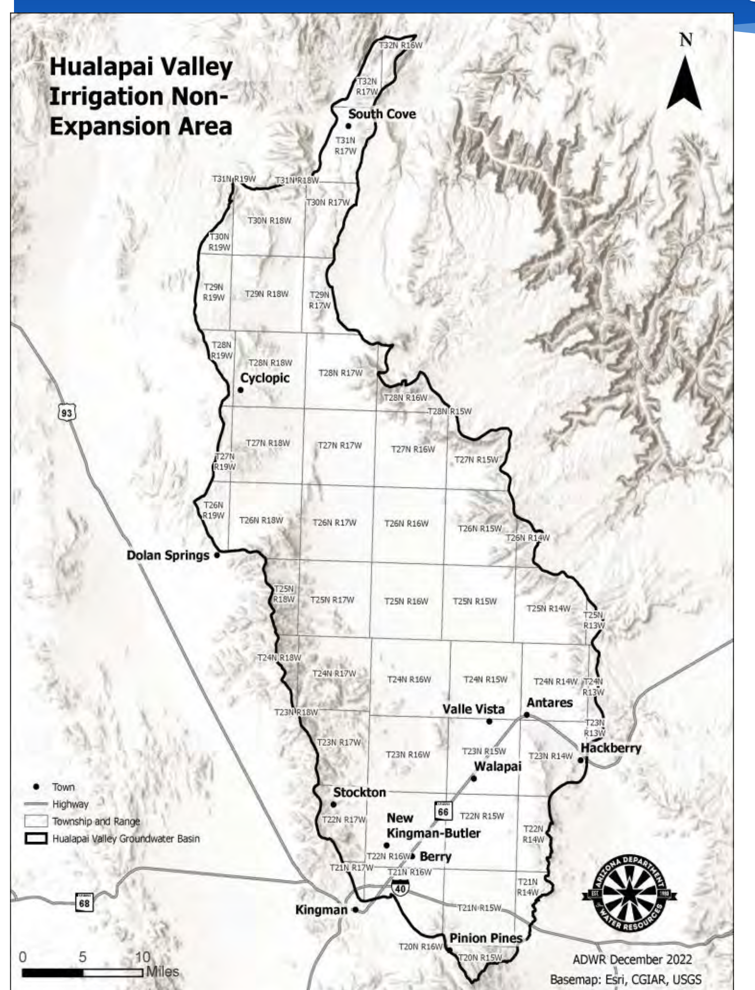
- strengthen the integrity of the Assured Water Supply program,
- protect consumers and aquifers, and
- ensure future growth is not reliant on mined groundwater.

Focus: Rural Groundwater

- Outside the Active Management Areas and Irrigation Non-Expansion areas there is limited regulatory framework for managing groundwater.
  - There is no requirement for metering and reporting non-exempt wells, with the exception of community water systems.
- Certain areas are growing in population at a rate similar to the AMAs. Some are experiencing significant growth in agriculture.
- Many communities are facing aquifer depletion with limited access to renewable supplies and no tools to manage the groundwater declines.
- There are increasing calls for a framework that will assist rural communities to manage their groundwater resources.

Hualapai Valley INA

Designated by decision of the Director, December 19, 2022



- On June 23, 2022, citing to updated USGS modeling and "ongoing and extreme drought conditions," the Mohave County Board of Supervisors requested that the ADWR Director take "whatever actions available and necessary to designate the Hualapai Valley Groundwater Basin as a subsequent [irrigation non-expansion area (INA)]."
- After an informal public meeting and comment period, on October 12, the Director initiated proceedings to designate the Hualapai Valley Groundwater Basin as an INA.
- On November 12, ADWR held a hearing in Mohave County to present information on INA requirements and factual data regarding the Hualapai Valley Basin, as well as to take oral and written comments.

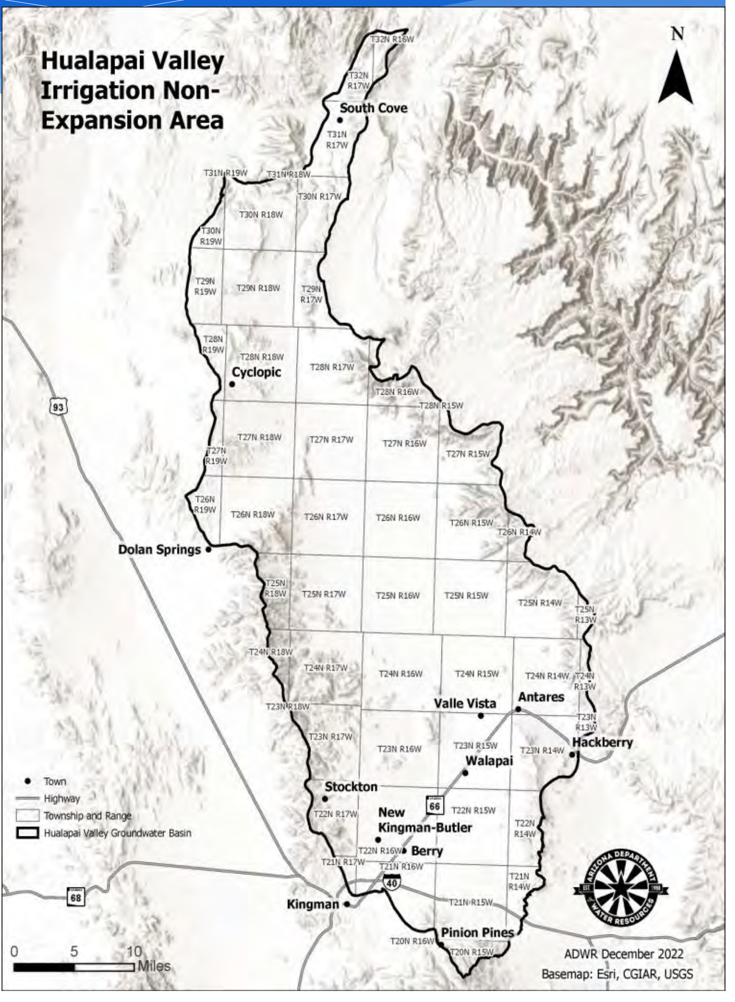
Hualapai Valley INA

Designated by decision of the Director, December 19, 2022

Upon review of updated modeling and other relevant information, including current drought conditions, the Director found:

- At current rates of withdrawal, depth to groundwater will increase
- After 100 years of pumping at current levels, ~1 in 20 existing wells are estimated to be no longer pumpable
- For the basin as a whole, outflows are currently exceeding inflows by a factor of 4
  - ~10,000 AFY of inflow to the aquifer
  - ~44,000 AFY of outflow from the aquifer

Based on these findings, the Director designated the Hualapai Valley Groundwater Basin as an INA on December 19, 2022.

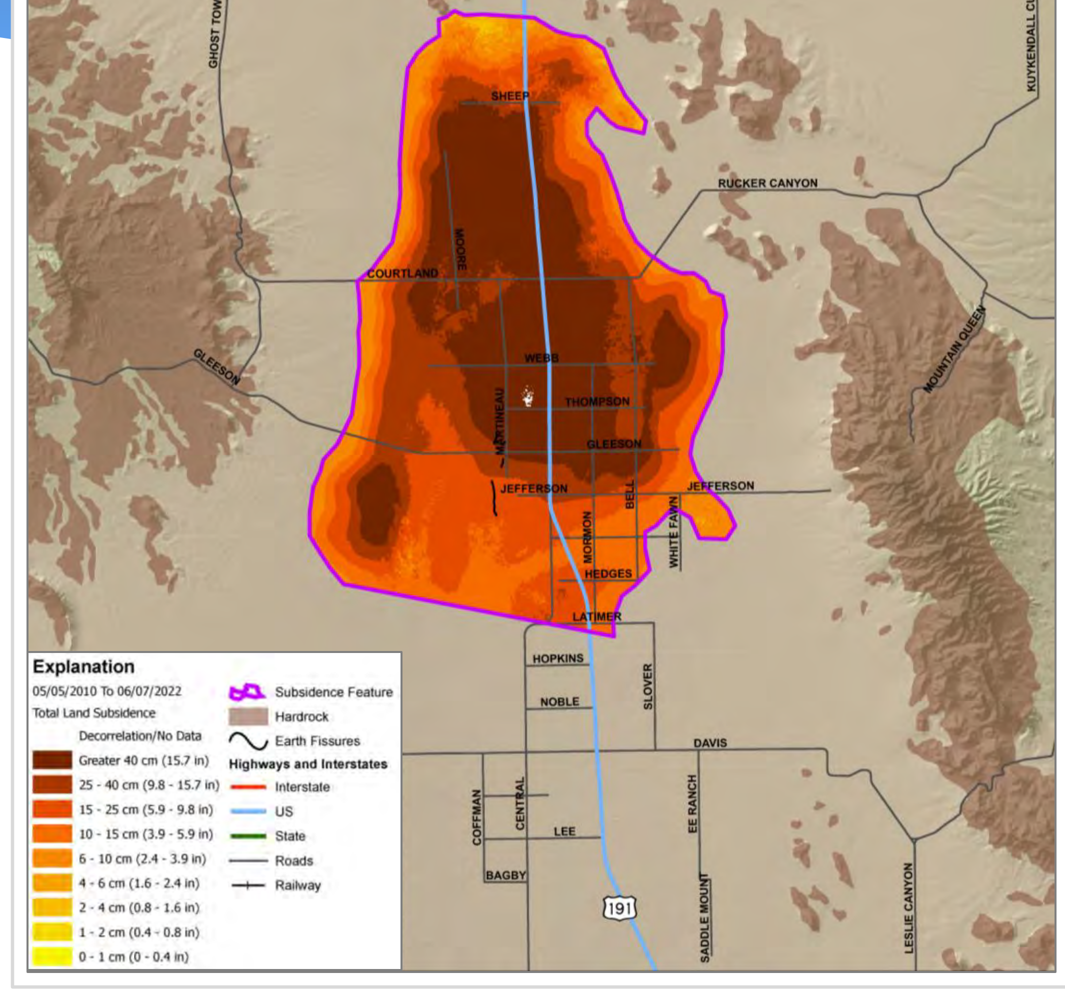


Douglas AMA

Designated by ballot initiative, December 1, 2022

- For the basin as a whole, outflows are currently exceeding inflows by a factor of 2.6
  - ~22,000 AFY of inflow to the aquifer (USGS estimates)
  - ~ 57,000 AFY of outflow from the aquifer (USGS estimates)*
- Groundwater declines of over 200 feet have been observed since 1965
- Land subsidence and earth fissures have been observed

*2007-2021 average



Douglas AMA Establishment Process

Management Goal

- Public meetings for background and public input
- Next: Public hearing with a formal comment period (estimated June 2023)

Management Plan

- Plan development will be guided by the goal and public input.
- Target: Adopt plan by the end of 2024, with conservation requirements becoming effective January 1, 2027.

DRAFT GOAL:

The management goal of the Douglas AMA is to support the general economy and welfare of communities in the basin by attempting to reduce the rate of aquifer depletion by 2035 and by further attempting to reduce the rate of aquifer depletion every 10 years thereafter.

Objective: Recommendations for a Water Management Framework

Objective:

Develop recommendations for a water management framework to assist rural Arizona communities to manage their groundwater resources.

*"The Governor's Water Policy Council is created to analyze and recommend updates, revisions and additions to the GMA and related water legislation, **which shall include, without limitation, analysis and recommendations for groundwater management outside current Active Management Areas.**"*

Summary

Objective: Review and make recommendations for changes to Assured Water Supply policies–legislatively, administratively, or by executive action–to address the challenges revealed by Assured Water Supply modeling projections, while continuing to:

- strengthen the integrity of the Assured Water Supply program,
- protect consumers and aquifers, and
- ensure future growth is not reliant on mined groundwater.

Objective: Develop recommendations for a water management framework to assist rural Arizona communities to manage their groundwater resources.

Deadline: December 2023

IV. Structure & Process

Council

- The Director of ADWR serves as the Chair of the Council.
- ADWR will provide staffing and technical support to the Council, which may include support from the Department's legal counsel.
- The Council will meet at such frequency as the Governor, or the Chair may direct.
  - Meetings will be called to solicit substantive input discussion and to make recommendations.
- The Council shall prepare legislative and policy recommendations at a frequency to be determined by the Chair in consultation with the Governor or her designee.
- Council members may designate one alternate from their organization; alternates are responsible for briefing their respective Council member.

Committees

"The Chair shall create committees, as necessary, to facilitate the Council's work, and the Chair shall appoint the chair and vice chair for any committee so created."

- Two initial committees: AWS and Rural Groundwater
- Committee leads: ADWR staff
- The Chair may additionally form and appoint members or their representatives to technical working groups

- Committee membership
  - Council members are asked to provide their choice of committee to the Director in writing
  - The Chair and Governor's Office will make final decision of committee rosters
- Committee members will be council members or their designated representative
  - Designees are empowered to make decisions and are responsible for briefing their respective council members

V. Upcoming Meetings

Initial Committee Meetings

- Committees will meet at least once a month from June through December 2023.
- Dates for the first two committee meetings follow. Additional dates will be forthcoming.
- Tentative Council dates will also be planned.

Assured Water Supply Committee

Tuesday, June 27, 2023, 1:00 pm – 3:00 pm
Conference Room 3175
1110 West Washington Street, Phoenix

Rural Groundwater Management Committee

Thursday, June 29, 2023, 1:00 pm – 3:00 pm
Conference Room 3175
1110 West Washington Street, Phoenix

VI. Closing Remarks

VI. Closing Remarks

II. Issue, Task, Objective & Principles

GMA & Assured Water Supply Program

Arizona’s Groundwater Management Act was passed to address unsustainable groundwater mining.

The law, coupled with access to Colorado River water through the CAP, enabled growth in the Active Management Areas (AMAs) where groundwater availability was most threatened.

The Assured Water Supply (AWS) program has enabled responsible development in an arid environment.

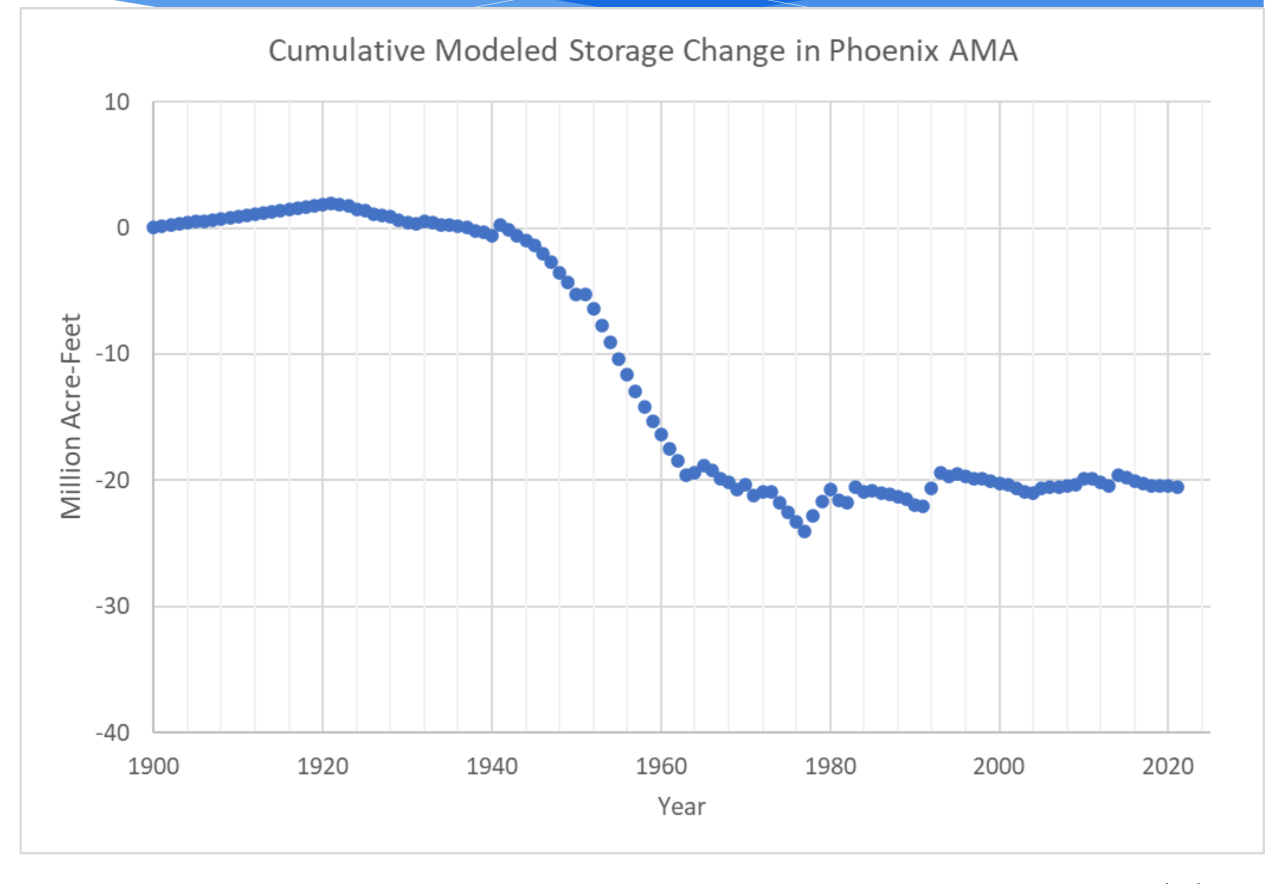
- Provides consumer protection for homebuyers
- Ensures sustainable water supplies
- Positions Arizona as a leader in water resource management

Commitment from cities, water providers, and developers has made the program what it is today.

Assured Water Supply Program

The program has driven innovation, collaboration, creativity and success in water resource management, including:

- recharge
- replenishment
- banking
- exchanges
- demand reduction
- investment in renewable supplies & infrastructure



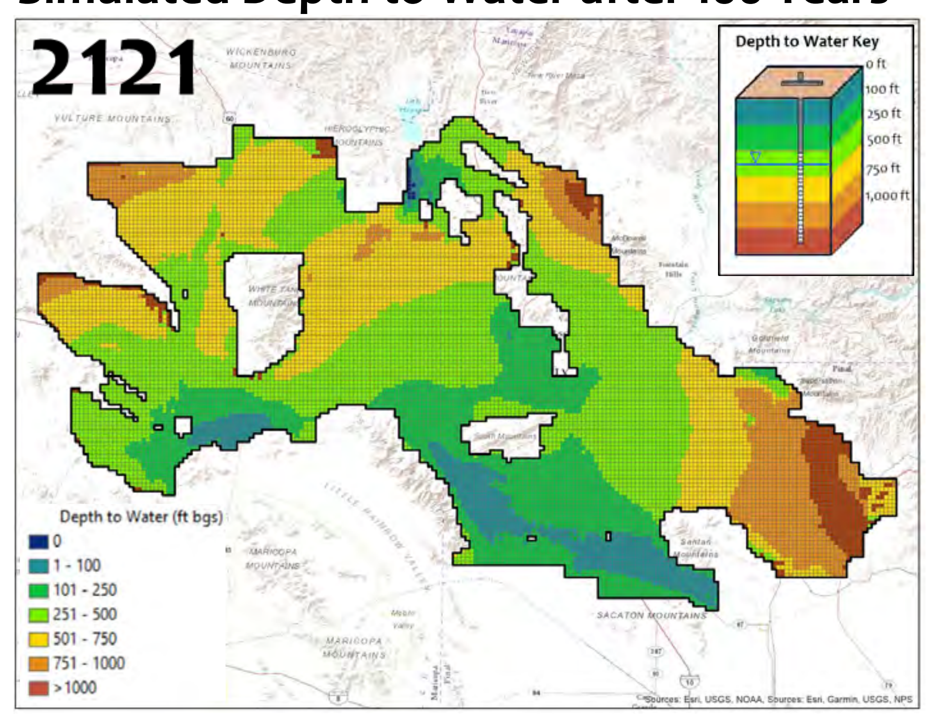
AWS Groundwater Modeling

The AWS program requires ADWR to carefully evaluate the availability of groundwater supplies in the AMAs for 100 years before permitting additional future municipal growth on groundwater.

AWS models are regularly updated by the Department to utilize the best available science and data and are constructed to meet the rules, policies, and requirements of the AWS program.

AWS Groundwater Modeling - Phoenix AMA

Simulated Depth to Water after 100 Years



- Designated providers have little to no unmet demand in their service areas and groundwater levels are not dire in the heart of the Valley.
- This means that over half of Arizona's population resides where there are SECURE water supplies for today and into the future, as well as the planned growth associated with existing determinations.

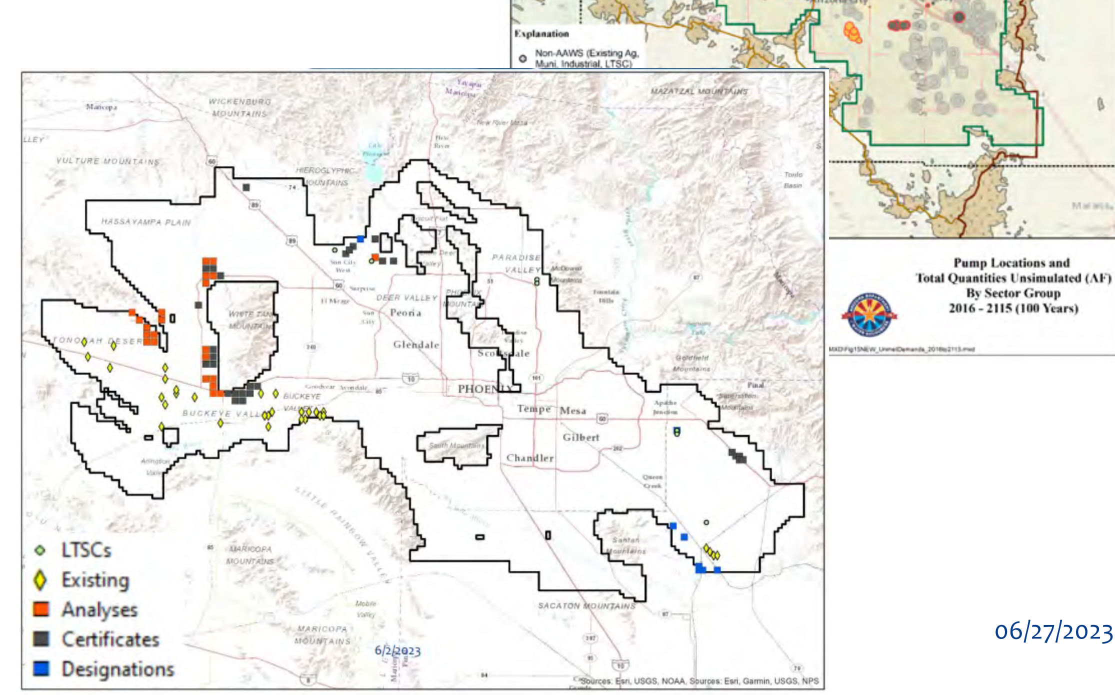
AWS Groundwater Modeling – Unmet Demand

Pinal Model (2019)

- Over the next 100 years, unmet demand for groundwater in the AMA was projected to exceed 8 million acre-feet (maf).

Phoenix Model (2023)

- Over the next 100 years, the Phoenix AMA is projected to experience 4.86 maf of unmet demand for groundwater based on current, committed, and projected demands for groundwater.



What the “Unmet Demand” Means

“Unmet demand” refers to the amount of groundwater use that is projected in the model based on current, committed, and projected **demands for groundwater that cannot be met over the next 100 years** based on the model’s forecasted availability.

Before a plat can be approved and recorded by the local governing authority, the subdivision developer must demonstrate to ADWR that all five requirements of the AWS program are met.

> There must be sufficient high-quality water physically, continuously, and legally available for the proposed subdivision.

All existing and committed water demands must be fully met.

Water Before Growth

The updated groundwater modeling in the Phoenix and Pinal AMAs demonstrate that, over the next 100 years, these two AMAs have reached the anticipated limits of growth on groundwater supplies. Without action, this limitation will eventually be reached in the other AMAs, as well.

In keeping with the findings of unmet demand, the State will not approve new determinations of AWS for proposed residential and commercial subdivisions within these areas based solely on the available groundwater supplies.

Water providers or developers seeking new assured water supply determinations must demonstrate additional renewable supplies or reductions in demand before development is permitted and may not rely on AMA groundwater.

The program is doing what it was intended to do, **requiring water supplies to be secured *ahead of growth*.**

The Issue

Constraints on the physical availability of groundwater are attributable to the cumulative results of decades of unreplenished groundwater pumping and continued reliance on groundwater resources for future development.

Reductions in Colorado River supplies will increase reliance on groundwater within the CAP service area—the Phoenix, Pinal, and Tucson AMAs.

Without additional renewable water supplies and reductions in demand, progress made toward reaching the management goals of the safe-yield AMAs is expected to erode, and unmet demand will continue to grow.

When the issued-but-unbuilt pumping demands are included in the Phoenix AMA's water budget, the projected future annual decline averages 387,000 AF, compared to an average annual decline of 23,500 AF from 2000-2021.

The pause in permitting of additional groundwater-dependent development allows time to address the challenge *before it becomes a crisis*, not only for future growth but for existing demands.

Task

The Council is tasked to look forward, like those who drafted the Groundwater Management Act, and identify bipartisan, collaborative opportunities to update the Assured Water Supply program, driving the next iteration of forward-looking policy, planning, management, and innovation that will help close the gap in unmet water demand, meet the objectives of the AMAs, uphold the strength and integrity of the Assured Water Supply Program, and protect consumers and groundwater supplies.

Objective

Review and make recommendations for updates to Assured Water Supply policies—legislatively, administratively, or by executive action—to address the challenges revealed by the modeling projections.

Deliverables: Policy recommendations that meet the objective and principles.

Focus: Development of high-priority, well-constructed proposals, keeping the timeline in mind.

Principles

- Proposals must protect the strength and integrity of the Assured Water Supply program.
- Proposals should enable future growth without reliance on mined groundwater.
- Proposals may not reduce the 100-year requirement or increase the depth to which groundwater may be pumped.
- Proposals must ensure there is water before growth.
- Proposals must protect consumers.

III. Structure, Process & Timeline

Committee & Subcommittees

Committee members will be Council members or their designated representatives. Designees are empowered to make decisions and are responsible for briefing their respective Council members.

Committees may form technical subcommittees as necessary to accomplish tasks. Subcommittees will serve as informal work groups that may include proxies with technical expertise and perspectives.

Subcommittees may invite stakeholders to participate and share their insight and perspective.

Subcommittees will report back to the committee.

To keep the process nimble, ensure continuity of discussion, and enable progress and outcomes, committees and subcommittees will be small.

Process

Committee meetings will be open to the public, but participation will be limited to committee members. Council members will represent their respective communities.

Committee meetings will be recorded and posted along with meeting materials to the Council webpages.

Meetings will be working meetings to enable discussion and arrive at decisions.

Agendas and materials will be provided as much in advance as possible.

A subcommittee or committee does not require unanimity to move a proposal forward. If there are concerns with proposals, they will be noted and documented.

Process

The Committee is tasked to provide proposals to the Council for consideration in **December 2023**. The process will move quickly.

The committee will meet at least once a month for two hours from June through December.

- Tentative dates and times have been set to reserve meeting space and enable the process. Adjustments may be made, as necessary.
- Additional committee and subcommittee meetings will be scheduled as needed.

Committee members are encouraged to attend meetings in person. A virtual option may be available.

Tentative Timeline

June

- Committee meeting: Begin identifying proposal concepts

July

IV. Initial Concepts & Discussion

ADWR Initial Concepts

AWS Modeling

ADWR staff have received critiques/concerns regarding the validity of the model. Many of the critiques are directed at programmatic requirements and assumptions that are tied to statute, rule, and policy, including:

- Assumptions regarding the use of effluent to replace groundwater pumping
- Ramping up of demands over time
- Assumptions regarding Colorado River shortages

These and other policy concerns can be discussed.

Concerns and proposals that are technical in nature, such as pumping relocation, can be addressed by ADWR staff outside of the Council and committee process. Please contact AWS Manager David McKay.

Wildcat & Build to Rent Development: Challenge

Additional residential development dependent on groundwater is paused in the Pinal and Phoenix AMAs until there are additional renewable water supplies or demands are reduced.

However, residential development that does not meet the definition of a subdivision—six or more parcels for sale or lease, excluding rentals of one year or less (ARS §32-2101)—circumvents the AWS requirements and the pause on additional development.

Wildcat and build to rent developments do not have the consumer protection of an assured water supply.

Continued development without an assured water supply exacerbates groundwater mining, puts homeowners at risk, and feeds negative perceptions of Arizona's ability to manage water supply.

Wildcat & Build to Rent Development: Concept

- Define residential lease community (six or more units, etc.)
- A city or County shall not approve a building permit for one or more detached residential dwelling units that are located in a residential lease community within an initial AMA unless the units have obtained a certificate of assured water supply or a written commitment of water service from a municipality or private water company.
- Ensure all applicable fees are paid (CAGRD).
- Strengthen "acting in concert" provisions.

Commingling: Challenge

Currently, an applicant for a certificate or analysis relying on water delivered through a provider's commingled system must demonstrate the physical availability of any groundwater delivered through the system, even if the applicant or water provider brings a new non-groundwater supply into the system.

So even with sufficient renewable supplies for the proposed new subdivision, in some instances, development cannot move forward, because the water delivered to the proposed new subdivision will also include groundwater.

This requirement is intentional, however, as homeowners in the new subdivision would not have an assured supply because they would bear the risks of groundwater shortage, designed to be avoided by the AWS program.

Commingling: Concept

Applicable to proposed subdivisions within a service area/water system that:

- Is not designated as having an AWS (i.e., applications for analyses or certificates)
- Includes groundwater as a water supply
- Includes unmet demand within the service area

A developer bringing in an alternative supply to support a new subdivision must secure an equivalent volume available to the water provider to help reduce unmet demand within that provider's service area.

Allowing new growth to proceed this way will incentivize and enable the use of alternative supplies and protect the integrity of the AWS program for all consumers.

Future Infrastructure: Challenge

Alternative water supplies may require substantial infrastructure development in order to make the supplies physically, continuously and legally available.

Ex: Transportation of groundwater from outside an initial AMA – may require transportation infrastructure

Infrastructure construction can take many years to complete. However, financing that infrastructure may be linked to the new customers the water is intended to serve.

Certificates have not traditionally allowed for construction of future infrastructure because a certificate of assured water supply analysis is a "snapshot" of existing water supplies.

Under current rules, once a single home is sold, the certificate cannot be revoked even if the water supply is no longer available.

Future Infrastructure: Concept

To enable the construction of infrastructure to support future growth, modify AWS rules to allow issuance of certificates based on future infrastructure.

- Identify requirements that must be met before and after issuance of certificates (e.g., five-year construction plan, issuance or completion of necessary permits and approvals, financial assurances, etc.)
- Include milestones for infrastructure completion
- Provide for expiration of certificate if milestones are not met
- Broaden financial capability requirements for certificates to include posting a performance bond for the benefit of the platting authority (and/or water provider)

Committee Concepts & Discussion

V. Next Steps

Action Items & Upcoming Meetings

Action item -- July 7:

DWR will post proposals that are consistent with the principles to www.azwater.gov/gwpc

Next AWS Committee Meeting:

Thursday, July 13, 1:00 pm, ADWR, Conference Room 3175

- Focus: Discussion and prioritization of proposal concepts

Next Governor's Water Policy Council meeting:

Wednesday, August 30, 2023, 1:00 pm (tentative)

VI. Closing Remarks

II. Committee Objective

AWS Committee Objective

Review and make recommendations for updates to Assured Water Supply policies—legislatively, administratively, or by executive action—to address the challenges revealed by the modeling projections.

Deliverables: Policy recommendations that meet the objective and principles.

Focus: Development of high-priority, well-constructed proposals, keeping the timeline in mind.

Principles

- Proposals must protect the strength and integrity of the Assured Water Supply program.
- Proposals should enable future growth without reliance on mined groundwater.
- Proposals may not reduce the 100-year requirement or increase the depth to which groundwater may be pumped.
- Proposals must ensure there is water before growth.
- Proposals must protect consumers.

III. Proposals Discussion

III. Proposals Discussion

Alternative Path to Designation

Background

Many private utilities and smaller municipalities that would like to pursue designation face hurdles to doing so, including:

- Legacy groundwater use from subdivisions that predate the Assured Water Supply rules or uses that fall outside of the subdivision definition
- Limited renewable supplies
- Historic barriers to cost recovery for the expense and effort of securing renewable supplies and applying for designation.

When the original AWS rules were promulgated, existing providers at the time were allowed to transition from reliance on groundwater to the renewable supplies under a DAWS, including certain exemptions and groundwater allowances.

Purposes of Concept

The *Alternative Pathway to Designation* concept seeks to address the following challenges:

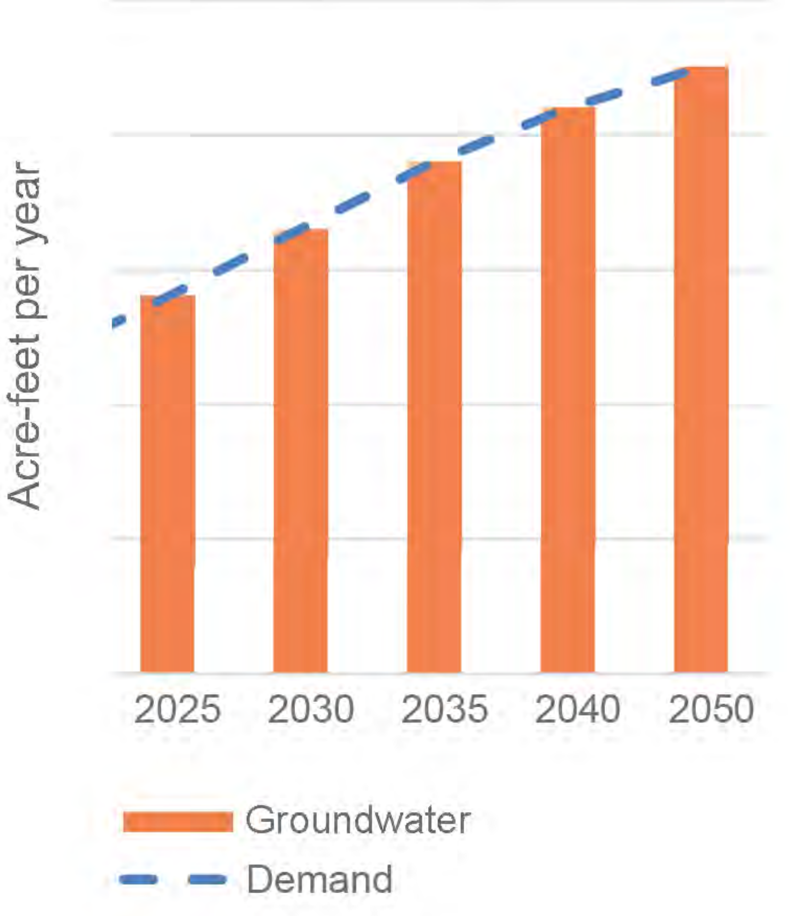
- The commingling issue associated with certificates and alternative water supplies
- Unmet demand and/or exceedances of depth-to-water limit in AMA model
- Incorporating new, non-groundwater supplies into a provider's water portfolio
- Facilitating near-term growth while future infrastructure is under development
- Creating a long-term benefit for the aquifer.

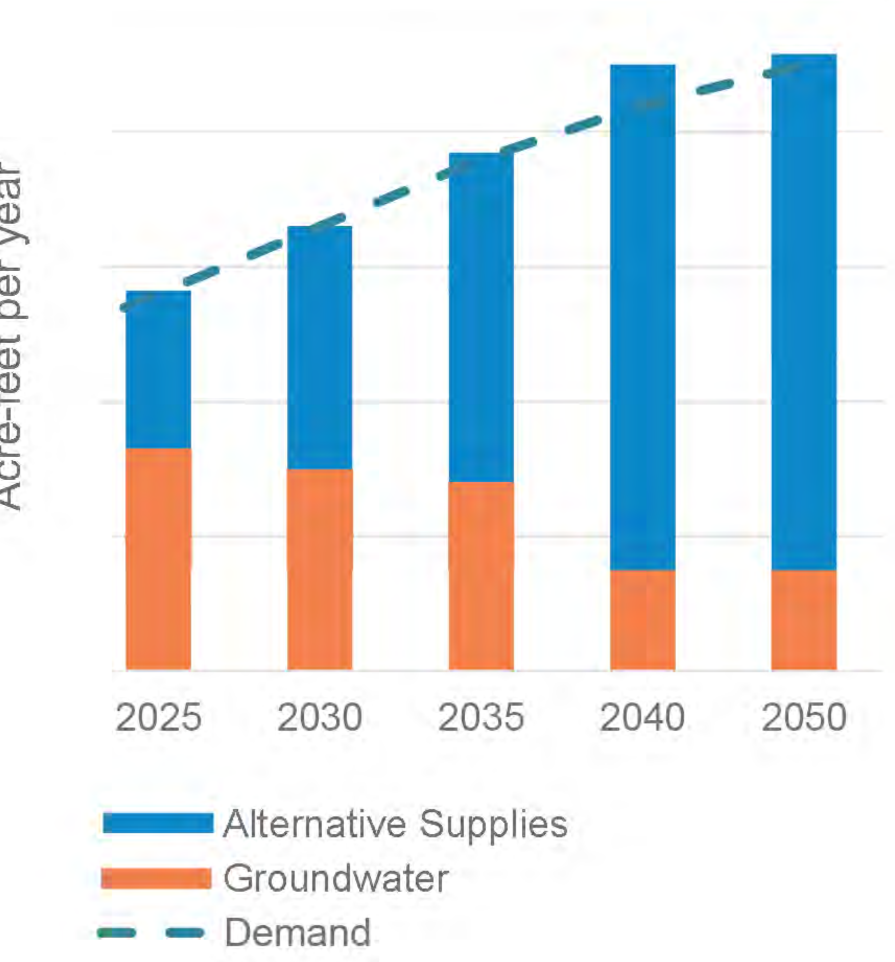
We have generated this concept based on stakeholder feedback and suggestions related to "Hybrid" and "Transitional" Designation concepts.

Overview of the Concept

1. **Existing groundwater pumping is grandfathered into the Designation.**
   a. Physical availability is grandfathered.
   b. A groundwater allowance is granted to provide Consistency with the Goal.
2. **New Alternative water supplies can be added to the Designation portfolio.**
   a. Grandfathered groundwater can be used in the interim period before supplies are delivered.
   b. A portion of the new supplies [30%] will be used to substitute for existing groundwater pumping to facilitate a transition away from groundwater.

Hypothetical Visualization: Change In Water Provider's Portfolio Over Time





Existing Groundwater Demands:
Physical Availability

- The following demands would be "grandfathered in" for purposes of physical availability:
  - Demand for issued Certificates of Assured Water Supply; and
  - Existing groundwater pumping and non-groundwater recovered outside the area of impact (AOI) based on annual reporting for 2021.
- Demands from Analyses of Assured Water Supply are **not** included.
- Subject to provisions related to alternative supplies.
- No additional groundwater may be added to the designation without a demonstration of physical availability.

Existing Groundwater Demands:
Consistency with the Management Goal

Consistency with the management goal would be met as follows:

- The provider would enroll as a member service area with CAGRD.
- The water provider would receive a lump sum groundwater allowance, based on deliveries in 2021.
- The water provider will decide how to manage groundwater allowance usage, water supply deliveries, CAGRD reporting, and billing individual customers for CAGRD assessments.

New Alternative Supplies

- "New Alternative Supplies" refers to water supplies other than groundwater withdrawn in the AMA that were **not served in 2021**.
    - Includes effluent, surface water, Colorado River water, CAP water, transported groundwater.
    - May be stored and recovered within the area of impact.
- New Alternative Supplies may be added to the Designation to serve new growth. The grandfathered groundwater volumes will be reduced by [30%] of the new supplies to facilitate an incremental transition away from groundwater over time.
- New alternative supplies must meet AWS requirements for designations including physical, continuous and legal availability and financial capability.

New Alternative Supplies

Adding New Alternative Supplies to the Designation that will require future infrastructure construction would be evaluated under ADWR's existing rules for designations:

- Provider must include a construction plan and schedule demonstrating that construction will be completed in a timely manner.
- All major permits and approvals and environmental compliance necessary for the unbuilt water infrastructure must be completed before the designation is issued.

New Alternative Supplies

- ADWR's current financial capability rule for designations allows for flexibility on financing for cities and towns.
- Under the rule, a city or town may submit evidence demonstrating that "financing mechanisms are in place to construct adequate delivery, storage and treatment works in a timely manner."
- This flexibility may be extended to private water providers.

Expedited Modification For Incremental Growth

- During the designation term, the Department will allow for an expedited modification to include an additional non-groundwater supply.
- For an expedited modification, the Department would review only:
  - AWS requirements for that additional supply.
  - The demand schedule.
- ADWR rules could be amended to allow expedited modifications to all designated providers.

Designation Term / Modification

- Initial term of no greater than 15 years.
- May be renewed or modified for additional terms of up to 15 years, subject to demonstrating that the Designation requirements are met.
- Grandfathered groundwater volume will be reduced by volume of reported pumping since the most recent designation was issued.
- May continue under alternative designation framework indefinitely.

Alternative Path to Designation: Example

Undesignated provider starting scenario

2,000 AF/yr	Unbuilt certificate demand *(replenished once built)*
8,000 AF/yr	Groundwater delivered – certificates *(replenished)*
10,000 AF/yr	Groundwater delivered – non-AWS/pre-1995 *(no replenishment or limit)*
20,000 AF/yr	**Total 2021 groundwater volume**

Provider applies for alternative designation and adds new alternative supplies

6,000 AF/yr	Effluent – will be stored & recovered within AOI
2,000 AF/yr	Surface water – will be delivered directly
8,000 AF/yr	**Total new alternative supplies**

New alternative supplies enable new growth & reduce 2021 groundwater volume

5,600 AF/yr	(70% of total)	New alternative supplies – future demands
2,400 AF/yr	(30% of total)	New alternative supplies – substitute for 2021 groundwater

Provider receives a grandfathered groundwater volume based on 2021 demands

17,600 AF/yr	= 20,000 af/yr (2021 GW volume) - 2,400 af/yr (substituted 2021 GW supply)
1,760,000 AF	**Total groundwater volume over the 100 period** (previously 2 MAF)

Benefit to the Aquifer: Example

Total 2021 groundwater pumping (no designation):

20,000 af/yr*

(2 MAF over 100 years)

- Without designation, unreplenished (non-AWS) groundwater uses could continue to grow, unconstrained, beyond the total 2021 pumping.

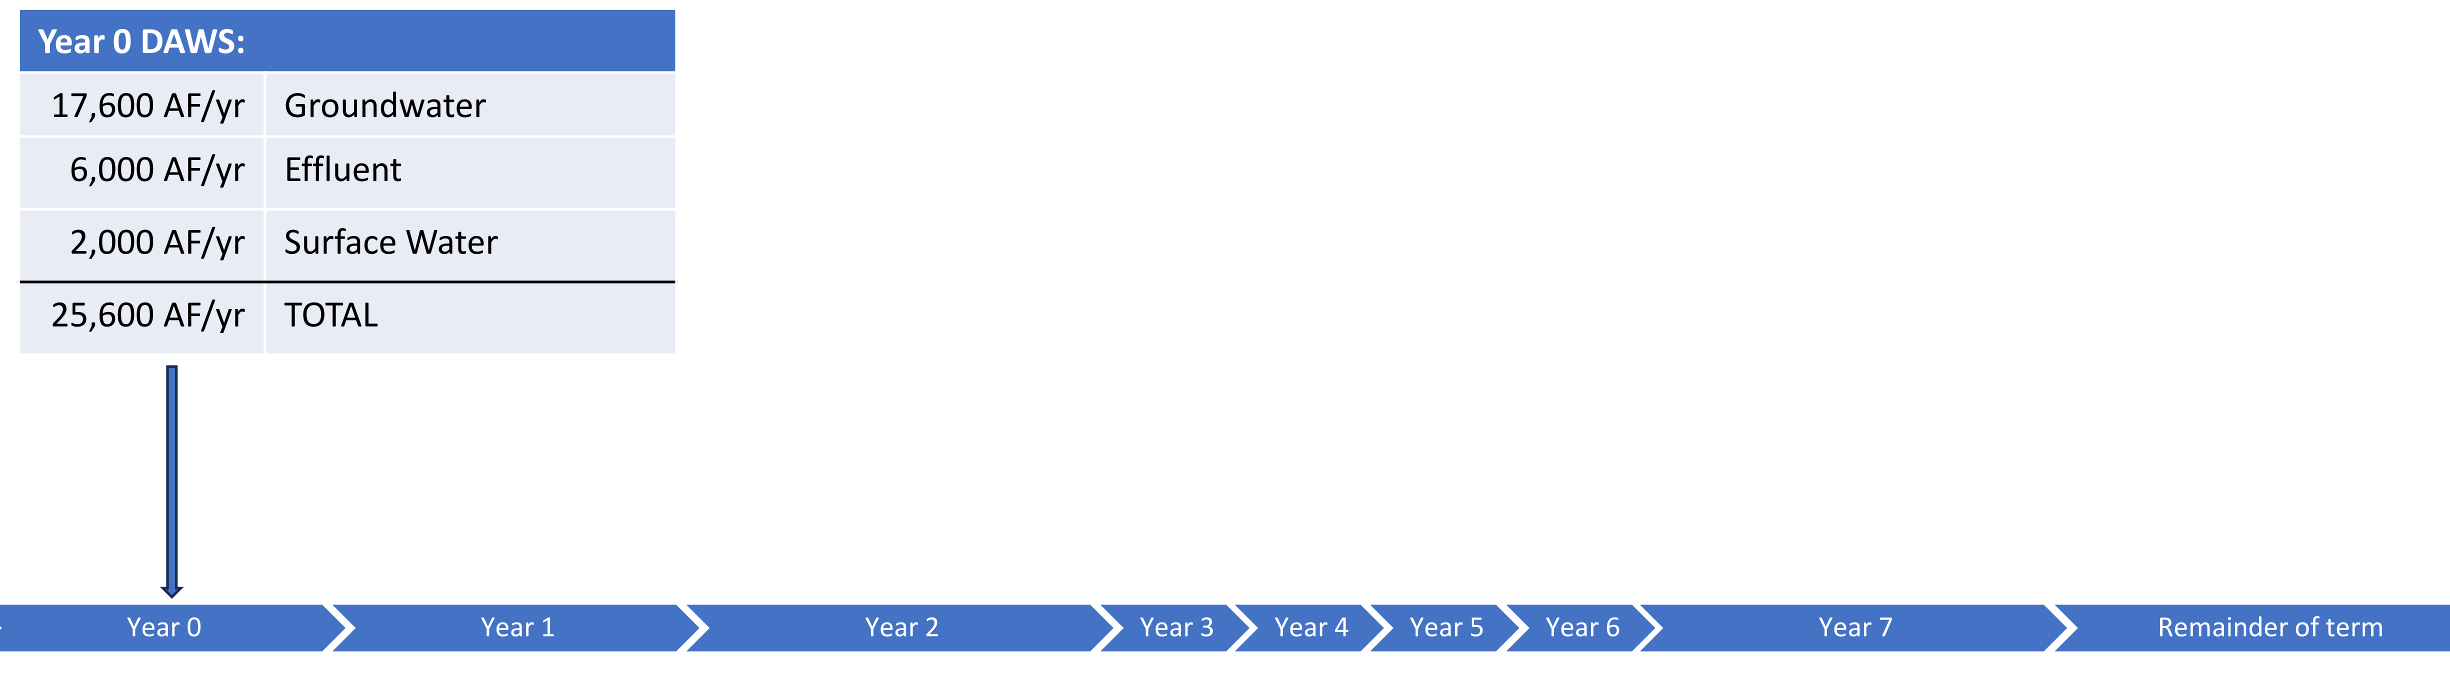
Total groundwater pumping after designation:

17,600 af/yr

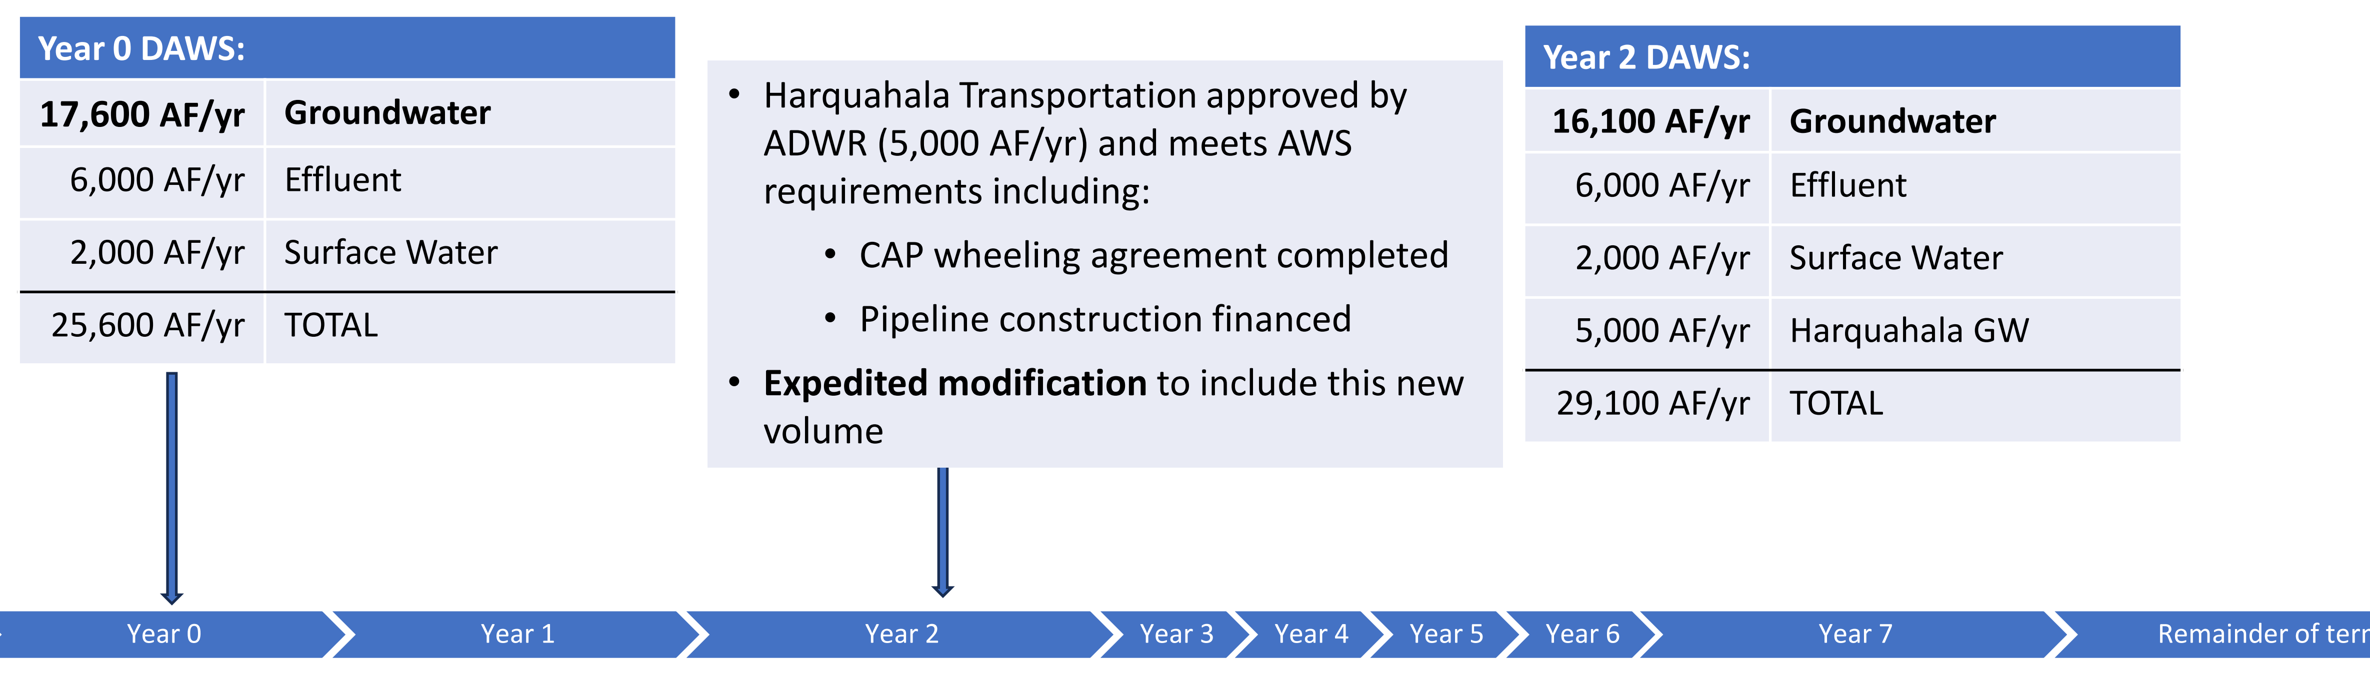
(1.76 MAF over 100 years)

- Groundwater pumping would **not** increase.
- ***Initial benefit* to aquifer of 240,000 af** over 100 years through reduced GW pumping.
- ***Total benefit* to aquifer will be greater:**
  - Part of the 17,600 af/yr GW volume that was previously unreplenished will be replenished.
  - New alternative supplies may be added on an expedited basis, further reducing the 17,600 af/yr GW volume.

**Total GW use includes both unreplenished and replenished GW withdrawals.*



- As a Designated Provider, commingling is resolved. Provider can now grow on effluent and surface water
- Up to 5,600 AF of new growth.



Year 0 DAWS:	
17,600 AF/yr	**Groundwater**
6,000 AF/yr	Effluent
2,000 AF/yr	Surface Water
25,600 AF/yr	TOTAL

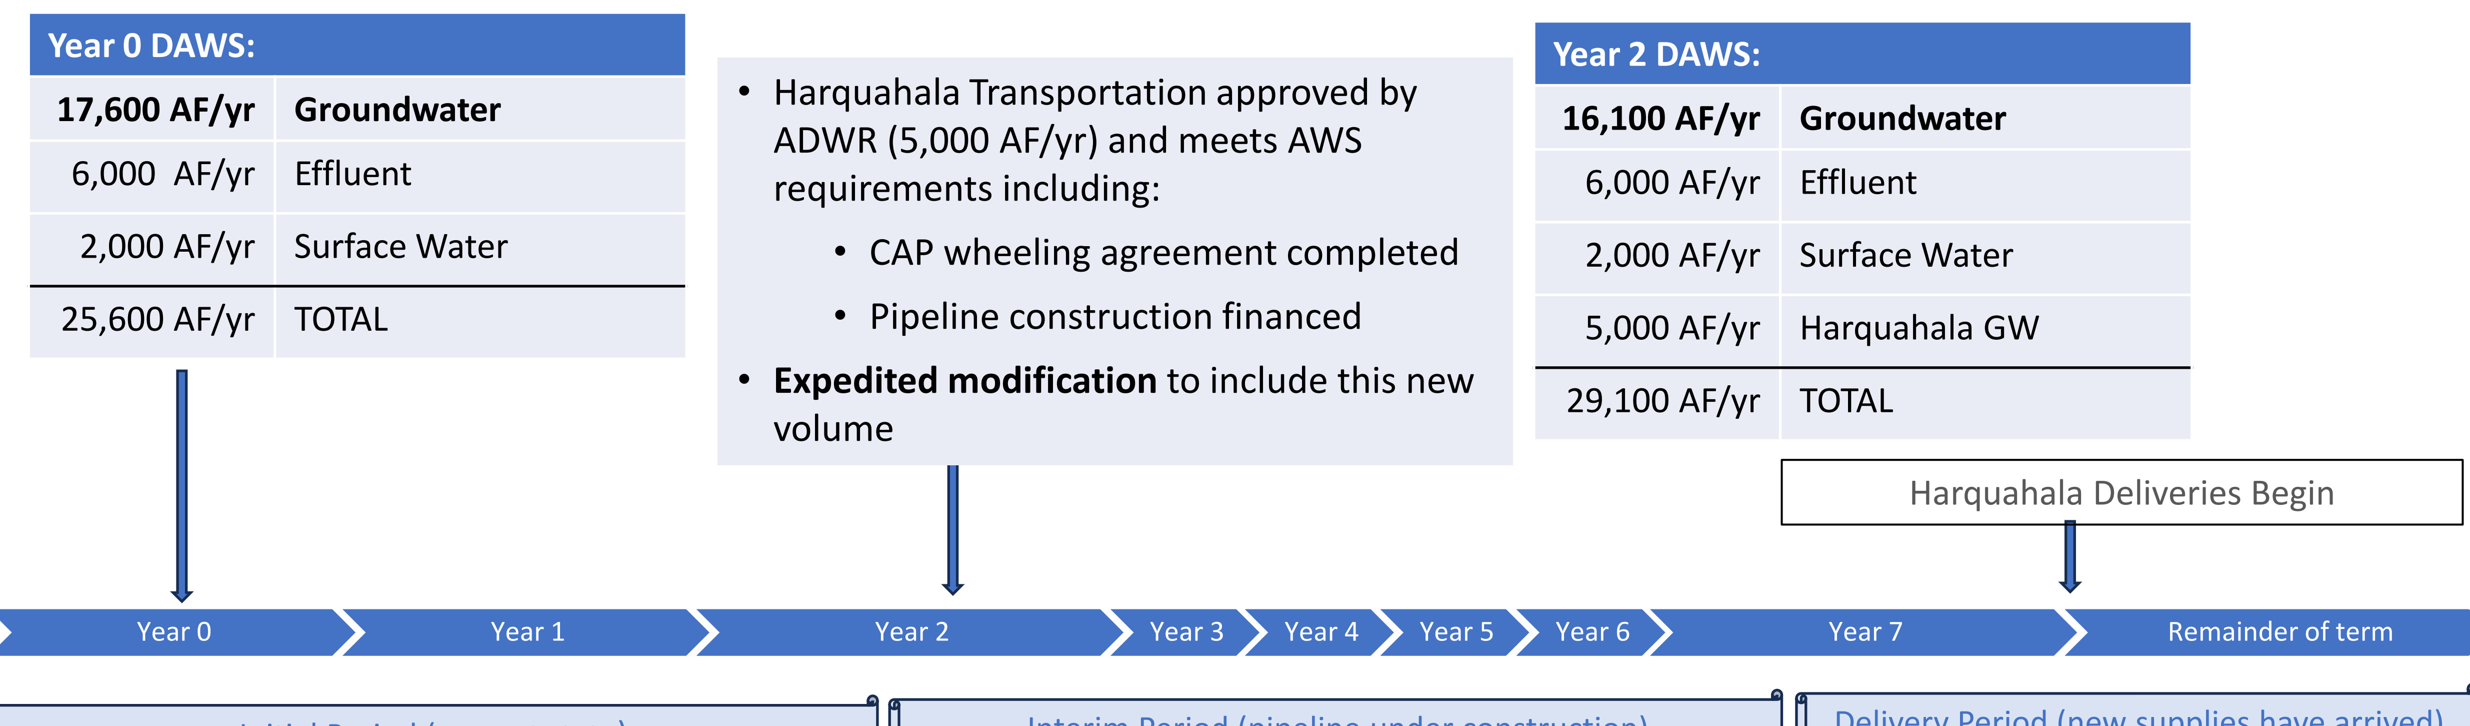
Year 2 DAWS:	
16,100 AF/yr	**Groundwater**
6,000 AF/yr	Effluent
2,000 AF/yr	Surface Water
5,000 AF/yr	Harquahala GW
29,100 AF/yr	TOTAL

Initial Period (current state)

Interim Period (pipeline under construction)

- As a Designated Provider, commingling is resolved. Provider can now grow on effluent and surface water
- Up to 5,600 AF of new growth.

- Provider has now added 5,000 AF/yr to its D&O. It can now serve additional new growth up to 3,500 AF/yr. The other 1,500 AF/yr must be used as a substitute for existing groundwater pumping.
- Provider may use any combination of supplies during interim period.



- As a Designated Provider, commingling is resolved. Provider can now grow on effluent and surface water
- Up to 5,600 AF of new growth.

- Provider has now added 5,000 AF/yr to its D&O. It can now serve additional new growth up to 3,500 AF/yr. The other 1,500 AF/yr must be used as a substitute for existing groundwater pumping.
- Provider may use any combination of supplies during interim period.

- Designation continues until end of term unless modified

Overview & Recap

The *Alternative Pathway to Designation* concept addresses the challenges that non-designated water providers have had in obtaining a designation.

- Addresses previously unconstrained groundwater pumping that is not subject to the Assured Water Supply Program.
- Reduces unmet demand by ultimately reducing groundwater pumping over the 100-year period.
- Facilitating incremental growth and a steady transition from groundwater to alternative supplies such as surface water, effluent, or transported supplies.

Questions & Discussion

Next Steps

III. Proposals Discussion

Wildcat Development

Wildcat Development Defined

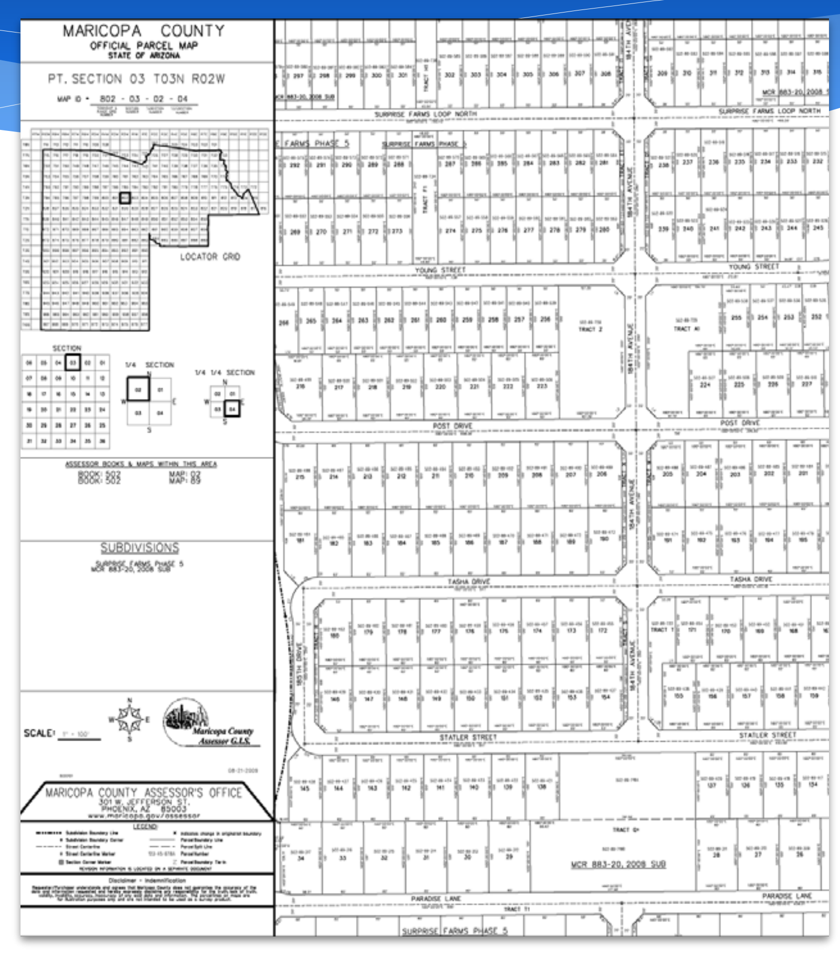
"Proliferation of development by splitting residential parcels of 6 or more lots with the intent to circumvent laws relating to the creation of a subdivision"

"Wildcat" development is an informal term to characterize illegal lot splitting. The purpose of the following proposals is to stop those who are intentionally circumventing laws that relate to assured water supply and other improvements in subdivisions.

Wildcat Development Challenges

Main Challenges Identified:

- **Acting in Concert** - Vague and subjective; intent
- **Contiguous** - Limits the scope of acting in concert; a road/street
- **Timing of Violation** - "Before offering for sale or lease..."
- **Current Threshold** - 6 or more lots is the threshold



Proposed Concepts

1. Strengthen the definition of "acting in concert"
2. Clarify the definition of "contiguous"
3. Apply unauthorized subdivision penalties to each property instead of the unauthorized subdivision as a whole
4. Improve information gathering and enforcement at county/municipal level
5. Reduce legal lot splitting of parcels to 4 or fewer

Strengthen “Acting in Concert”

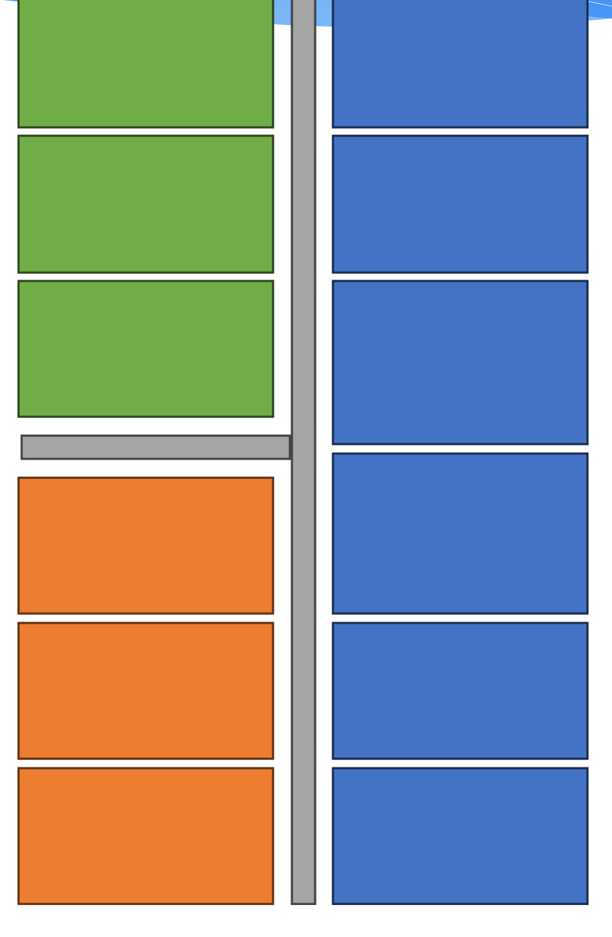
Clarify that the following are evidence of “acting in concert” (evidence of collaborating to pursue a concerted plan)

- **25% or more shared ownership interests/substantial control**
  - *Example:* individual exercises substantial control over multiple shell companies to hide ownership
- **50% or more shared development resources**
  - *Examples:* substantial use of shared GCs, surveyors, engineering or architectural firms, and subcontractors

Clarify “Contiguous”

Clarify the current definition of “contiguous” (share a common boundary or point) by:

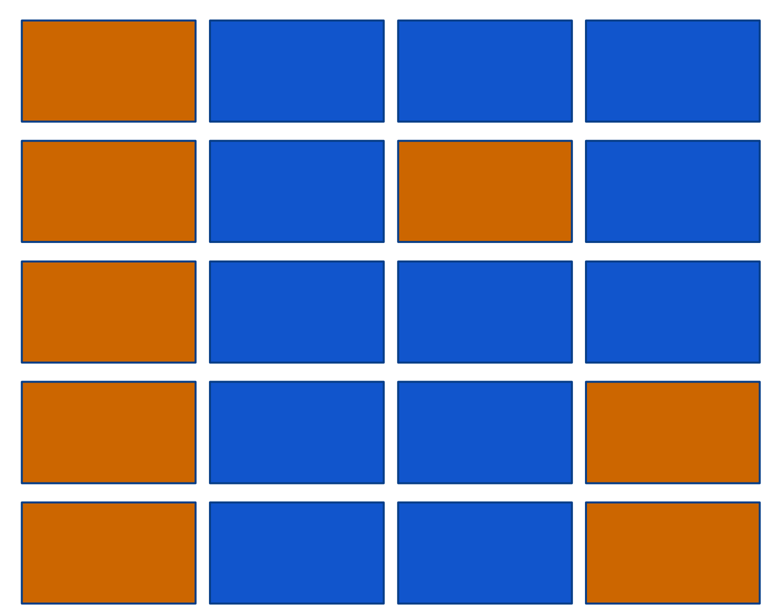
- Using a tax parcel as the defined area for considering whether or not parcels are considered contiguous
- Remove “street, road” from definition
- Keep county, state, and federal highways and other “natural or man-made” barriers that divide parcels as non-contiguous



Penalties

Increased Penalty

ADRE's ability to levy a civil penalty should be applied to ***each property*** within a subdivision, not the subdivision as a whole

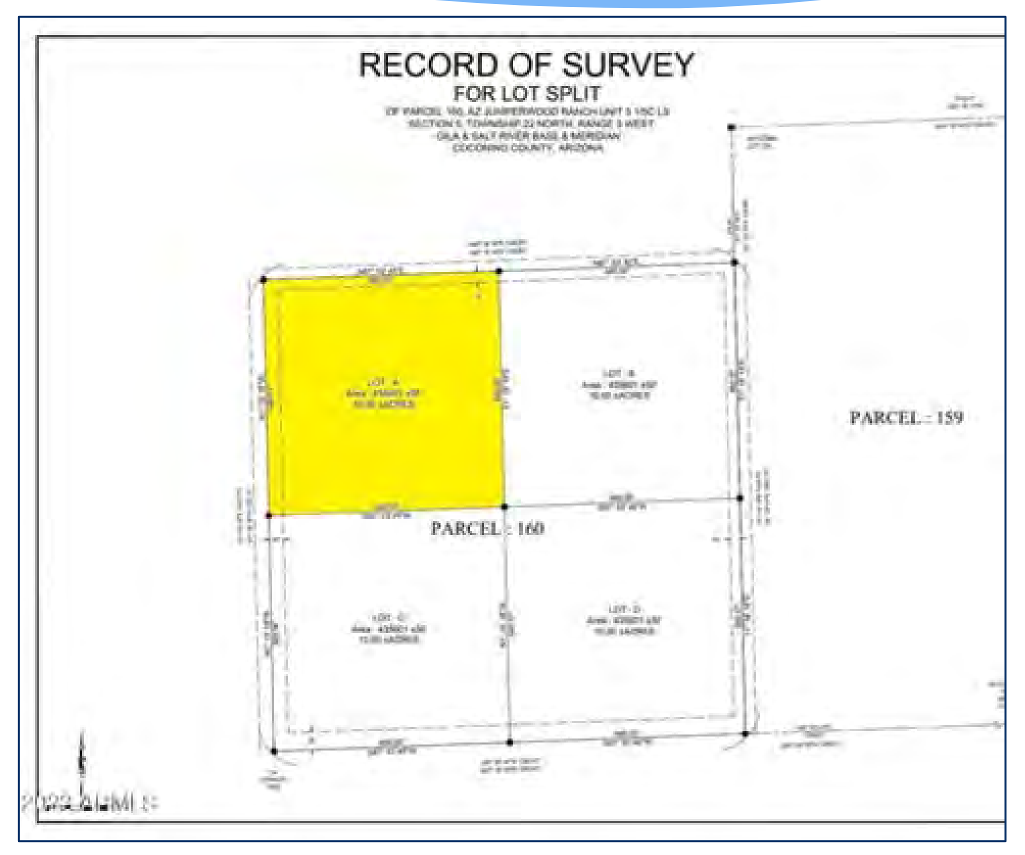


Timing of Enforcement

- In current statute, neither ADRE, counties or municipalities have jurisdiction to investigate subdivision violations until the properties are offered for sale or lease.
- Provide limited authority to counties/municipalities to collect ownership information and shared development cost information at the time of subdivision and building permit application.
- At the time of building permit application, require a subdivider to obtain a subdivision public report based on the ownership or shared development cost.

Number of Parcels

- Reduce legal lot splitting to 4 or fewer parcels
- 6 or more lots is the threshold today
  - 1937 - 5 lots or more
  - 1973 - 4 lots or more
  - 1994 - 6 lots or more
  - 1994 - 4 lots or more
  - 1995 - 6 lots or more



Proposed Concepts

1. Strengthen the definition of "acting in concert"
2. Clarify the definition of "contiguous"
3. Apply unauthorized subdivision penalties to each property instead of the unauthorized subdivision as a whole
4. Improve information gathering and enforcement at county/municipal level
5. Reduce legal lot splitting of parcels to 4 or fewer

AWS Committee Member Comment Notes,

September 27, 2023

Governor's Water Policy Council – AWS Committee
Wednesday, September 27, 2023, 1:00 - 3:00 pm

Meeting Notes (key takeaways and questions)

Alternative Path to Designation

- Rep. Griffin – How will this concept apply to the Douglas AMA? Could there be unmet demand in the Douglas AMA even if they've adopted an adequate water supply requirement? What do we do about communities across the border that are pumping the aquifer?
- Olsen – What was the reason to choose 30% for the groundwater allowance?
- Rep. Griffin – Under this concept, will new development be required to pay for existing development? Will existing effluent be credited?
- Osmon – Sen. Sundareshan would like the percentage to be as robust as possible.
- Pearce – Can the provider use any combination of supplies during construction, even the new supplies?
- Pearce – This concept would be a seismic shift in Arizona water management. A year ago, developers were making sizeable investments under the pretense of a water supply, but then that was completely shut off. 30% isn't unreasonable but it is a large number and cut to the aquifer. On behalf of the developers, we need a transitional period and policy. The new supplies are expensive and take time. However, credit to Warren's group and ADWR on a major path forward, and Queen Creek and Buckeye are very interested.
- Dunham – This is creative thinking that works well in the AWS program, following all standards and procedures. It shows promise, and we should continue to pursue it. However, fixing some of its issues will open the door for private utilities. For EPCOR, using the 2021 volumes penalizes us. We voluntarily created new alternative supplies prior to 2021. Please use the total delivery volumes for the calculation. We also need to work with CAGRD to transition the new member service areas. The ACC won't allow for rate increases to cover the instant new fees. Finally, 30% is way too high. Providers need to make full use of new supplies, not 70%, to move away from CAGRD replenishment obligations.
- Patrick Adams – Would EPCOR benefit from the fact that their existing alternative supplies wouldn't be subject to the 30% requirement?
- Dunham – That doesn't help us. We can't use those new supplies anymore because they're already dedicated. There are no other new supplies for private utilities, and this wouldn't allow us to grow on groundwater.
- Tenney – Am I correct that the grandfathered groundwater is already being pumped and would continue otherwise? Under this framework, a designation would lead to less groundwater being used. We should pursue this concept and figure out the details. I do have questions about the impact on CAGRD. But the concept protects and reduces groundwater from the beginning.
- Ferris – This is a very thoughtful concept. It doesn't increase groundwater pumping, allows for unreplenished groundwater pumping to be reduced, and assists with new designations, which provide protection for water users. We will get to the details. Also, there is an impression that ADWR has wiped out investments, but they didn't. ADWR followed the law and its science, following evidence from the last 15 years that groundwater was limited in the Hassayampa basin. ADWR issued conditional designations and asked them to prove up their water sources, which never happened. Don't give the impression that ADWR did something evil; they just did their job.

- Dunham – I agree, if we keep the status quo then unreplenished groundwater pumping will continue to grow indefinitely. This concept stops that, which is a huge advantage for the aquifer.
- Meyers – Thank you for all your time and effort. Moving away from certificates toward designation is good for water management in the region. We're on the right path.
- Dent – I would like to discuss the impact on CAGRD replenishment with ADWR and stakeholders.
- Princell – I look forward to working with providers to understand the impact of this concept. Let's continue forward.

Wildcat Development

- Rep. Griffin – If you have 6 or more lots, you're a subdivider and must comply with the laws. 5 or fewer lots, you are not a subdivider. 25% for shared ownership is too high; it should be 1%. Any shared ownership should be a violation under statute. 50% for shared resources is ridiculous. In rural Arizona, we use the same resources. There may be only one contractor in the area. We should be going after the bad guys, not the good guys. I support the contiguous concept. My changes to the statute last year were meant to be $2,000 per lot, so that's an easy change to support. I can't agree to changing the limit to 4 – should be kept at 6. We strengthened the disclosure form, which lets buyers know of the status of the property and their responsibility. You may need to haul water, and some owners are fine with that. The government shouldn't stop them from buying that property.
- Singleton – I agree that we should be going after the bad actors. I have no strong opinion on the number of parcels, but why did it change so often?
- Dent – In the model, how is wildcat water accounted for? (exempt wells not included)
- Ferris – I thought the reason for this topic was to avoid another Rio Verde, where people buy lots, have expectations that aren't meant, and then ask for help. Rep. Griffin, how do we prevent that? Will people go to the legislature for a fix every time this happens? I agree that people can live where they want, but then they shouldn't put providers and utilities on the hook to fix a problem they didn't cause.
- Rep. Griffin – Originally in Rio Verde, a standpipe was offered for 30 years. People didn't think their water would be cut off, but maybe the water company went under. In those cases, the government would need to step in and take over. 99% of properties have disclosures that are signed, and the buyers are aware.
- Dunham – In the past, we've looked at wildcat and exempt wells in the AMAs and found that demands were so small that they didn't show up in the model – except in the Prescott AMA, where it is a major problem.
- Rep. Griffin – Meet with the relators so they can provide their feedback. Talk to the agents, not just their lobbyists.

AWS Committee Meeting Presentation,
October 17, 2023

Governor’s Water Policy Council

Assured Water Supply Committee

October 17, 2023

Meeting Logistics

- Please note that this meeting is being broadcast via webinar and is being recorded.
- The meeting recording and materials will be posted to the Council's webpage (https://www.azwater.gov/gwpc).
- Only members of the Committee will be able to unmute themselves to participate in the meeting.
- Please identify yourself before speaking.
- *Technical issues? Please call the ADWR Help Desk at 602-771-8444 or email tickets@azwater.gov.*

I. Welcome

Agenda

I. Welcome

II. Committee Objective

III. Proposals Discussion

 a. Alternative Path to Designation

 b. Build to Rent

IV. Next Steps

V. Closing Remarks

II. Committee Objective

AWS Committee Objective

Review and make recommendations for updates to Assured Water Supply policies—legislatively, administratively, or by executive action—to address the challenges revealed by the modeling projections.

Deliverables: Policy recommendations that meet the objective and principles.

Focus: Development of high-priority, well-constructed proposals, keeping the timeline in mind.

Principles

- Proposals must protect the strength and integrity of the Assured Water Supply program.
- Proposals should enable future growth without reliance on mined groundwater.
- Proposals may not reduce the 100-year requirement or increase the depth to which groundwater may be pumped.
- Proposals must ensure there is water before growth.
- Proposals must protect consumers.

Current AWS Committee Proposals

- **Alternative path to designation**
- **Build to rent**
- Wildcat development

Other concepts raised for consideration by the committee remain options for discussion and development, including unreplenished industrial water use, ag-to-urban conversion, retiring grandfathered rights, and commingling.

III. Proposals Discussion

III. Proposals Discussion

Alternative Path to Designation

ADAWS: Progress to Date

- Significant support was expressed for the *Alternative Path to Designation of Assured Water Supply* (ADAWS) concept at the 09/27 meeting.
- Since the meeting, ADWR has answered questions and has continued to solicit and receive feedback.
- ADWR is working internally and with CAGRD and other stakeholders to explore and analyze considerations from a technical and legal standpoint.
- Concept can be considered a high-level proposal at this point, one that accomplishes the objective of reviewing and developing recommendations for updates to the AWS policies to address the challenges revealed by the modeling projections.

ADAWS: Today's Objective

- Briefly review highlights of the proposal
- Share responses to questions received in follow up to the last meeting, answer any additional questions, and have additional discussion
- Discuss next steps

ADAWS Purpose

ADAWS proposal addresses challenges identified as priorities by the committee:

- The commingling issue associated with certificates and alternative water supplies
- Unmet demand and/or exceedances of depth-to-water limit in the AMA model
- Incorporating new, non-groundwater supplies into a provider's water portfolio to reduce unmet demand and support new growth
- Facilitating near-term growth while future infrastructure is under development
- Creating a long-term benefit for the aquifer.

Barriers to Designation

The ADAWS proposal overcomes significant barriers that have impeded providers from becoming designated:

- Legacy groundwater use from subdivisions that predate the Assured Water Supply (AWS) rules or uses that fall outside of the subdivision definition
- Limited renewable supplies
- Historic barriers to cost recovery for the expense and effort of securing renewable supplies and applying for designation.

Allows providers to transition from reliance on groundwater to renewable supplies under a designation, including certain exemptions and groundwater allowances (similar to original DAWS).

Outcomes

- By enabling designation, the proposal gives providers more control and tools for managing water resources and demands.
- Addresses unconstrained pumping that is not subject to the Assured Water Supply Program.
- Reduces the unmet demand by reducing groundwater pumping over the 100-year period.
- Facilitates incremental growth and transitions the provider to using less groundwater and more alternative supplies, such as transported supplies, effluent, and surface water.

Overview of the Concept

1. **Existing groundwater pumping is grandfathered into the Designation**

   a. Physical availability is grandfathered based on 2021 groundwater use and issued certificates, subject to the [30%] substitution requirement in No. 2.

   b. A groundwater allowance is granted to help meet Consistency with Goal requirement.

2. **New Alternative water supplies that meet AWS requirements can be added to the Designation portfolio**

   a. A portion of the new supplies [30%] will be used to substitute for existing groundwater pumping to facilitate a transition away from groundwater.

3. **Expedited modification to add a supply during the term of the DAWS (For ADAWS and DAWS)**

Alternative Path to Designation: Example

Undesignated provider starting scenario

2,000 AF/yr	Unbuilt certificate demand *(replenished once built)*
8,000 AF/yr	Groundwater delivered – certificates *(replenished)*
10,000 AF/yr	Groundwater delivered – non-AWS/pre-1995 *(no replenishment or limit)*
20,000 AF/yr	**Total 2021 groundwater volume**

Provider applies for alternative designation and adds new alternative supplies

6,000 AF/yr	Effluent – will be stored & recovered within AOI
2,000 AF/yr	Surface water – will be delivered directly
8,000 AF/yr	**Total new alternative supplies**

New alternative supplies enable new growth & reduce 2021 groundwater volume

5,600 AF/yr	(70% of total)	New alternative supplies – future demands
2,400 AF/yr	(30% of total)	New alternative supplies – substitute for 2021 groundwater

Provider receives a grandfathered groundwater volume based on 2021 demands

17,600 AF/yr	= 20,000 af/yr (2021 GW volume) - 2,400 af/yr (substituted 2021 GW supply)
1,760,000 AF	**Total groundwater volume over the 100 period** (previously 2 MAF)

Benefit to the Aquifer: Example

Total 2021 groundwater pumping (no designation):

20,000 af/yr*

(2 MAF over 100 years)

- Without designation, unreplenished (non-AWS) groundwater uses could continue to grow, unconstrained, beyond the total 2021 pumping.

**Total GW use includes both unreplenished and replenished GW withdrawals.*

Total groundwater pumping after designation:

17,600 af/yr

(1.76 MAF over 100 years)

- Groundwater pumping would **not** increase.
- ***Initial benefit* to aquifer of 240,000 af** over 100 years through reduced GW pumping.
- ***Total benefit* to aquifer will be <u>greater</u>:**
    - Part of the 17,600 af/yr GW volume that was previously unreplenished will be replenished.
    - New alternative supplies may be added on an expedited basis, further reducing the 17,600 af/yr GW volume.

Example: Timeline with Expedited Modification

Year 0 | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 | Year 7 | Remainder of term

Initial Period (current state)

- As a Designated Provider, commingling is resolved
- Provider can now grow on new alternative supplies (including effluent)
  - 30% of alt supply offsets existing groundwater use
  - 70% of new supply supports new approved growth

Interim Period (pipeline under construction)

- Provider adds another alternative supply to its D&O through an expedited modification
  - infrastructure agreements and financing is in place
  - construction to be completed in 5 yrs
- Provider can now grow again on this additional alternative supply
  - 30% offsets existing groundwater use
  - 70% serves the new growth
- Provider may use any combination of supplies during interim period

Delivery Period (new supplies have arrived)

- Designation continues until end of term unless modified

ADAWS: Q&A

Existing Groundwater Demands

Q: When ADWR grandfathers in groundwater for purposes of physical availability, is that reflected as an annual rate of pumping or as an absolute quantity of groundwater?

A: Both.

ADWR's typical designation orders identify the volume of groundwater associated with a designation as both a 100-year volume and an annual average. Eg: "100,000 AF of groundwater, or an average of 1,000 AF per year over 100 years." This does not limit the volume of groundwater (or any other water supply) that the designated provider would be permitted to use in any single year.

The intent of the proposal is that the grandfathered groundwater volume included in the designation would be treated in the same manner as the groundwater volume in any other designation, except that it is subject to further reduction when new alternative supplies are added to the designation.

Additionally, like other designations, any groundwater used in any one year must be made consistent with management goal.

ADAWS: Q&A

Existing Groundwater Demands

Q: ***Are there ever instances when a provider could use its lump sum groundwater allowance to pump more groundwater in one year than it pumped in 2021?***

A: Yes. As with all designations, the provider has the flexibility to manage the water portfolio. In early years, while infrastructure is constructed, the provider may choose to rely more on groundwater.

Even so, a provider will not be able to use a disproportionate amount of its groundwater allowance because it must also enroll as a member service area with CAGRD and will be subject to minimum reporting requirements through that agreement.

Additionally, when the designation is renewed, the grandfathered groundwater volume will be reduced by the volume of groundwater pumped during the term of the designation.

ADAWS: Q&A

Existing Groundwater Demands

Q: If physical availability is expressed as an annual rate of pumping, does that mean that a provider would be limited in how much groundwater it could pump each year, regardless of its lump sum groundwater allowance?

A: No. A designated provider may decide what combination of supplies it will serve in any one year.

ADWR expects that the groundwater allowance will not cover all unreplenished pumping and that groundwater replenishment costs will provide a disincentive to using additional groundwater, particularly when the new alternative supplies included in the designation already meet AWS requirements.

If a provider used more of its 100-year groundwater volume in any one year, that volume would be subject to consistency with management goal requirements/ replenishment.

ADAWS: Q&A

Existing Groundwater Demands

Q: Is the grandfathered groundwater already being pumped and would continue otherwise?

A: Yes, it was being pumped as of 2021, and presumably, it would continue if the alternative path to designation were not offered.

Q: Does the physical availability that was grandfathered in diminish as the new alternative supplies come online?

A: Yes, 30% of each new alternative supply volume must be substituted for the grandfathered groundwater use. The grandfathered groundwater volume would be reduced by the 30% volume. The alternative supplies can then be used however the provider chooses. This will facilitate the transition to a reduced reliance on groundwater.

ADAWS: Q&A

New Alternative Supplies

Q: Does the 30/70 split mean that 70% of new water supplies must be used to serve new growth? If so, that could raise challenges or questions about how the water provider manages their water systems.

Or is the intent that 30% of the new supply would be used to reduce groundwater pumping and the provider could utilize the remaining 70% of the new supply however it chose to within its system?

A: Yes, a provider could choose to use more of its new alternative supplies for existing uses.

Additionally, even if 70% of the alternative supply is intended to serve new growth, the provider may serve the alternative supply to existing uses in lieu of groundwater until the new growth is in place.

ADAWS: Q&A

New Alternative Supplies

Q: Would the 30% substitution factor be applied to surface water supplies if they were already being served in 2021?

A: No. The 30% applies only to new alternative supplies, including surface water, that were not served in 2021.

Q: A portion of the new supply - proposed at 30% - is to be used to substitute for the existing groundwater in the designation. Please clarify that the 30% of the new supply is accounted towards the grandfathered groundwater pumping and not the groundwater allowance. Is that correct?

A: Yes, the 30% of the new supply would be deducted from the total grandfathered groundwater volume.

ADAWS: Q&A

New Alternative Supplies

Q: What was the reason to choose 30% for the groundwater allowance?

A: The intent is to strike a balance between the desire to support new growth and the need to reduce existing and approved groundwater uses in the long-term to protect AMA residents from unmet groundwater demands, as otherwise projected in the model. This is still being evaluated.

Q: Is there a point when 30% of the alternative supply is no longer directed to offset groundwater pumping?

A: The 30% requirement would no longer apply once a provider could qualify for a designation under the traditional designation rules, which would mean the provider is no longer using groundwater or the model no longer shows unmet groundwater demand.

Q: As a water provider brings on new supplies, would it be appropriate to consider the 30% amount decreasing overall or at least use a smaller percentage for the next supply of water?

A: ADWR has not considered decreasing the 30% amount because the goal is to reduce reliance on groundwater.

ADAWS: Q&A

CAGRD

Q: What is the mechanism to ensure that the provider does obtain a new supply? What will prevent the provider from just developing on groundwater and relying on the CAGRD?

Is it assumed that increasing CAGRD costs and other motivations will be enough of an incentive for the provider to seek their own supplies?

A: The volume of alternative supplies (including effluent), combined with the schedule of committed and projected demands, will determine the length of the designation. A provider must maintain sufficient water for current, committed, and at least two years of projected demands.

In order to maintain the designation going forward or to extend the term of the initial designation, the provider must bring in additional alternative supplies.

That being said, the increasing costs of CAGRD replenishment and limitations on groundwater availability are already incentivizing providers to seek alternative supplies.

Recap: ADAWS Proposal Overview

1. **Existing groundwater pumping is grandfathered into the Designation**
   a. Physical availability is grandfathered based on 2021 groundwater use and issued certificates, subject to the [30%] substitution requirement in No. 2.
   b. A groundwater allowance is granted to help meet Consistency with Goal requirement.
2. **New Alternative water supplies that meet AWS requirements can be added to the Designation portfolio**
   a. A portion of the new supplies [30%] will be used to substitute for existing groundwater pumping to facilitate a transition away from groundwater.
3. **Expedited modification to add a supply during the term of the DAWS (For ADAWS and DAWS)**

ADAWS Recommendation

Move the *Alternative Path to Designation of Assured Water Supply* proposal forward to the Governor's Water Policy Council for consideration as a recommendation to the Governor.

Including a recommendation that the proposal should be further developed through a stakeholder process led by ADWR.

III. Proposals Discussion

Build to Rent Development

Ben Alteneder
Chief Legislative Liaison

Build to Rent Development: Defined

- Commonly referred to as "single-family rentals".
  - Market for a different type of community and homes available to renters.

- Residential development that does not meet the definition of a subdivision.
  - Lease term of 1 year or less.

Build to Rent Development: Challenge

- BTR communities with lease terms of 1 year or less are not under the consumer protections of the AWS program.
  - In all other aspects they are similar to a residential subdivision, including having common areas and other exterior water demands.

Goal: ensure that BTR communities are under the consumer protections of the AWS program and, for the purposes of water, treated equally with subdivisions.

Build to Rent Proposal

1. Define residential lease community (RLC)
   - 6 or more detached residential dwelling units on one or more lots, parcels or fractional interests.
   - Offered for the purpose of lease without regard to lease term; including lease terms of one year or less.
   - For purposes of the AWS program, an RLC is the same as a subdivision.

Build to Rent Proposal

2. Ensure all applicable fees are paid (CAGRD).
3. A City or County may approve a building permit for a RLC within an AMA if the units have obtained a certificate of assured water supply or a written commitment of water service from a designated municipality or private water company.

Build to Rent Proposal

1. Define residential lease community (RLC)
   - 6 or more detached residential dwelling units on one or more lots, parcels or fractional interests.
   - Offered for the purpose of lease without regard to lease term; including lease terms of one year or less.
   - For purposes of the AWS program, an RLC is the same as a subdivision.
2. Ensure all applicable fees are paid (CAGRD).
3. A City or County may approve a building permit for a RLC within an AMA if the units have obtained a certificate of assured water supply or a written commitment of water service from a designated municipality or private water company.

Build to Rent Recommendation

Forward the proposal for statutory changes to address Build to Rent challenges to the full Governor's Water Policy Council for consideration as a recommendation to the Governor.

The proposed changes would ensure that BTR communities are:

- Under the protections of the AWS program
- At parity with subdivisions when it comes to assured water supplies.

IV. Next Steps

Upcoming Meetings

Upcoming Governor's Water Policy Council meetings:

Friday, October 27, 2023, 1:00 pm, ADWR

Wednesday, November 29, 2023, 1:00 pm, ADWR *(tentative)*

Next AWS Committee meeting:

Tuesday, November 14, 10:00 am, ADWR *(tentative)*

VI. Closing Remarks

Governor’s Water Policy Council Member Comment Notes, October 27, 2023

Governor's Water Policy Council
Friday, October 27, 2023, 1:00 - 3:00 pm

Meeting Notes

Alternative Path to Designation (ADAWS)

- Doba – Kudos to the committee for this proposal. There will be time for more dialogue throughout the process. Is this only available in AMAs with CAGRD? We could have another discussion for a backstop in areas like Prescott.
- Anderson – I disagree with "strong consensus" on this proposal. We support moving this forward to the Governor's Office, despite significant concerns. The Home Builders Association would like to be included in the stakeholder process, along with providers and analysis holders.
- Rep. Griffin – I have concerns with the 130% requirement for providers to bring in water. How long would an expedited modification take? Who does this apply to? Will the Douglas AMA lose adequate water supply determinations?
- Megdal – I appreciate Rob's statement that there wasn't a full consensus. If this moves forward with an expanded stakeholder process, would it come back to the AWS Committee or does it stay beyond the Council?
- Olsen – This is a long-term pathway for more sustainable growth. It addresses many of the AWS Committee issues in a strategic manner. There is more to be fleshed out by broadening the discussions and getting other voices involved. I fully support moving this forward.
- Tenney – There are many challenges with groundwater management in the state. The AWS program requires water before growth, and this proposal builds on that. There are other questions remaining about the size of the groundwater allowance and risks to CAGRD, but this is positive enough to move forward. I'm supportive of discussion with additional stakeholders. The proposal must continue to show that we're protecting groundwater, developing on renewable supplies, and being proactive. There are many generations to come after us that will rely on these resources.
- Singleton – This proposal isn't perfect, but now is the time to involve the potentially impacted parties. I recommend proceeding with the stakeholder process.
- Kmiec – I support moving this forward to the larger stakeholder process with ADWR. This is an interesting proposal, and I'd like to see how it develops.
- Sahid – I want to voice support to move this forward. The proposal is beneficial to the Trust, and I look forward to engaging with stakeholders.
- Ferris – I want to thank ADWR for its leadership on a tough issue and for taking the lead to develop this proposal. We can't do more in the committee, and I support developing the proposal in a stakeholder process and rulemaking process.
- Rep. Travers – This proposal makes me very hopeful. I'm looking forward to stakeholder comments. We can't lose the message or lower any of the thresholds or parameters during the process. We have something good to work with here, and I look forward to hearing more.
- Princell – I support moving this forward to work with providers and landowners. We should ensure a smooth transition and focus on protecting the aquifer. We want a speedy process because the faster we get approval, the faster providers can secure new supplies.
- Sen. Sundareshan – Thank you to the contributors for a promising proposal that represents a path to designation and growth. This is a way to allow providers to get designated and manage their portfolio. I support a stakeholder process to get input from those not in the room. I'll follow

the process closely to make sure that the proposal doesn't get weakened. I would prefer a percentage as high as 50% but understand that this is a compromise process.

- Burns – I support moving this forward. It addresses commingling and provides a pathway for new supplies.
- Paul – This proposal encourages new designations, which come with a host of benefits. We support moving this forward.
- Kelley – I commend the committee on their work. The proposal is worthy of further discussion. I have concerns regarding the pressure this will put on other water supplies and would like to see the CAGRD impact analysis, but I'm willing for those to play out.
- Anderson – We have concerns with the 30% burden on new development, the lack of a transition period, the long implementation period, analyses being wiped out, and CAGRD risks. But we are appreciative of ADWR working with us and support moving it to the stakeholder process.
- Burman – We support moving this forward to a thoughtful stakeholder process. We will continue to work with the Governor's Office, ADWR, the CAP board, and other stakeholders to answer questions.
- Kuzdas – There is a lot of work and creativity that went into this. It meets multiple needs and seems promising. I'm supportive of this process.
- Dunham – I want to thank ADWR and the committee for their hours of work on this proposal. I have a few comments to make. The 30% cut to the aquifer is way too high. Private utilities can't cover that cost. We need to phase in CAGRD replenishment of ML converted to MSA because private utilities can't justify those rate increases (based on voluntary actions) to the ACC. We need a transition period for those moving from ADAWS to a typical DAWS. Using 2021 pumping volumes for the groundwater allowance penalizes providers who were already using alternative supplies. We need flexible, reasonable requirements because the costs go through to residents. If the requirements are too onerous, no one will take advantage of this voluntary program. However, this is a workable proposal, and it should go through the stakeholder process to hear from all entities.

Build to Rent (BTR)

- Rep. Griffin – Single-family residential homes are the only ones currently being penalized. There is a critical housing shortage in the state. My bill from last year contains all the proposed language except certifications, which we can discuss. I've got a new bill file open. We should grandfather in current investments so to avoid financial issues.
- Doba – This is a good proposal for closing loopholes and addressing parity. Other AMAs don't have CAGRD and so I want to make sure this applies in areas like Prescott.
- Megdal – What happens to a BTR property without an assured water supply that is later sold?

Rural GW Management Framework

- Rep. Griffin – I have heard from many people in the state and I ask to submit this letter from county supervisors across the state. I've had an enormous amount of calls on this topic. I will be holding statewide meetings to gather input on the framework. I'm also submitting an updated copy of the basin management plan proposed by Sen. Kerr.

- Sen. Sundareshan – I'm glad to see mandatory measuring and reporting included in this, but we might want to include exempt wells under that because their pumping can add up.
- Megdal – I'm an advocate for more robust listening sessions. Will Rep. Griffin be letting the Council know when and where those are?
- Udall – Thank you for the time and willingness of those to discuss and find consensus on these difficult topics. I appreciate the extra meeting time, as well. I look forward to our next meeting and to hearing from more stakeholders.

KATIE M. HOBBS
GOVERNOR

THOMAS BUSCHATZKE
DIRECTOR

ARIZONA DEPARTMENT OF WATER RESOURCES
1110 WEST WASHINGTON STREET, SUITE 310
PHOENIX, ARIZONA 85007
602.771.8500
AZWATER.GOV

November 29, 2023

The Honorable Katie M. Hobbs
Governor
State of Arizona
1700 W. Washington St.
Phoenix, AZ 85007

Dear Governor Hobbs,

It is my pleasure to transmit to you recommendations from your Water Policy Council that address the Assured Water Supply program and the management of rural groundwater. The recommendations are impactful policy prescriptions that add to the sustainability of Arizona's water supplies now and in the future.

On May 17, 2023, you convened a diverse group of stakeholders with representation from agriculture, water providers, Tribes, executive agency cabinet officers, cities, the business community, industry, conservation organizations, university experts, the Arizona legislature, and more. At this inaugural meeting, the Council was charged with two objectives: developing proposals and recommendations for better management of rural groundwater and producing a package of policy recommendations which strengthen our Assured Water Supply Program and ensure that we protect our groundwater resources while enabling continued, sustainable growth. With these charges laid out before us and a deadline to submit proposals to you by the end of the year, the Governor's Water Policy Council embarked on a process to develop consensus policy recommendations in a robust, inclusive, and transparent manner.

Two committees were established to focus on each issue: an Assured Water Supply Committee and a Rural Groundwater Management Committee, and Council members were given the option to choose which Committee they wanted to participate in. The Council and its committees met twenty times over the past six months, and members were asked to attend each meeting in person whenever possible, with virtual attendance options made available. Members were asked to reach out to their constituents throughout the process to receive additional perspectives on the Assured Water Supply Program and the rural groundwater management challenges and potential solutions, and to bring those perspectives to each meeting. Committee and Council meetings were livestreamed and open to the public for viewing.

ADWR chaired each Committee and Council meeting, developing agendas, providing technical presentations, and drafting documents for Council member review, revision, and discussion. ADWR staff, in parallel with the Committee and Council meetings, met with members individually to receive input, discuss perspectives, and revise documents to reflect the input. Revisions were shared with Committee members. All verbal and written communications by Committee members associated with the recommendations have been recorded and acknowledged by ADWR. All Committee meeting communications have been considered in the final drafting of these recommendations.

Consensus-based approval of the recommendations was first achieved by each Committee, and then the recommendations were brought to the Council for their discussion, consideration, and final approval. Support from the Council for the final five recommendations contained in this letter was achieved at the October 27, 2023, and the November 29, 2023, Council meetings.

The Council's Assured Water Supply Program recommendations provide a launch point and guidance for drafting new rules for an Alternative Designation of Assured Water Supply (ADAWS) program. This ADAWS concept creates a pathway for water providers historically reliant on groundwater to grow incrementally on alternative supplies while reducing groundwater mining. The Assured Water Supply recommendations also provide a path for closing statutory loopholes associated with "wildcat" subdivisions and "Build-to-Rent" developments.

The Council's Rural Groundwater recommendations provide a foundational framework to craft legislation for creating a new groundwater management program for rural Arizona, filling a water management gap that has gone unaddressed for decades and providing an opportunity for rural communities and water users to benefit from improved water management and protection. Finally, the Council has developed recommendations to bolster the measuring and reporting of water use and monitoring of groundwater conditions throughout the state.

The full text of the Council's recommendations is included in this letter for your review, and the Department is preparing a full report of the Council's activities. Thank you for your leadership and commitment to protecting Arizona's water supplies. I look forward to continuing to build upon the work we have achieved thus far.

Sincerely,

Tom Buschatzke
Director, Arizona Department of Water Resources
Chair, Governor's Water Policy Council

Alternative Path to Designation Proposal

Background

Many private utilities and smaller municipalities that would like to pursue a Designation of 100-year Assured Water Supply (DAWS) face hurdles to doing so, including:

- Legacy groundwater use from subdivisions that predate the Assured Water Supply (AWS) rules or uses that fall outside of the subdivision definition.
- Limited renewable supplies.
- Historic barriers to cost recovery for the expense and effort of securing renewable supplies and applying for designation.

When the original AWS rules were promulgated, existing providers at the time were allowed to transition from reliance on groundwater to renewable supplies under a DAWS, including certain exemptions and groundwater allowances.

Purposes of Proposal

The Alternative Pathway to Designation proposal seeks to address the following challenges:

- The commingling issue associated with Certificates and alternative water supplies.
- Unmet demand and/or exceedances of depth-to-water limit in AMA model.
- Incorporating new, non-groundwater supplies into a provider's water portfolio to reduce unmet demand and support new growth.
- Facilitating near-term growth while future infrastructure is under development.
- Creating a long-term benefit for the aquifer.

ADWR generated this proposal based on stakeholder feedback and suggestions from the AWS Committee related to "Hybrid" and "Transitional" Designation concepts.

Overview of the Proposal

Existing groundwater pumping is grandfathered into the Designation. Physical availability is grandfathered, and a groundwater allowance is granted to provide Consistency with the Goal.

New Alternative Water Supplies can be added to the Designation portfolio. Groundwater can be used in the interim period before supplies are delivered. A portion of the new supplies [30%] will be used to substitute for existing groundwater pumping to facilitate a transition away from groundwater.

Existing Groundwater Demands: Physical Availability

The following groundwater volumes would be "grandfathered in" for purposes of physical availability:

- Issued Certificates of Assured Water Supply; and
- Existing groundwater pumping and non-groundwater recovered outside the area of impact (AOI) based on annual reporting for 2021.

Analyses of Assured Water Supply are not included. The grandfathered volume is subject to reduction under the provisions related to alternative supplies. New growth will be supported by alternative supplies.

Existing Groundwater Demands: Consistency with the Management Goal

For the existing groundwater demands that would be grandfathered into the new Designation, Consistency with the Management Goal will be met by:

- The water provider would enroll as a member service area with CAGRD.
- The water provider would receive a lump sum groundwater allowance, based on deliveries in 2021[1].

The water provider will then decide how to manage groundwater allowance usage, water supply deliveries, CAGRD reporting, and billing individual customers for CAGRD assessments.

New Alternative Supplies

"New Alternative Supplies" refers to water supplies other than groundwater withdrawn in the AMA that were not served in 2021, including effluent, surface water, CAP water, transported groundwater. They may be delivered directly or stored and recovered within the area of impact.

New Alternative Supplies may be added to the Designation to serve new growth. The grandfathered groundwater volume will be reduced by [30%] of the new supplies to facilitate an incremental transition away from groundwater over time.

New Alternative Supplies must meet AWS requirements for designations including physical, continuous, and legal availability and financial capability. Adding New Alternative Supplies to the Designation that will require future infrastructure construction would be evaluated under ADWR's existing rules for designations. The provider must include a construction plan and schedule demonstrating that construction will be completed in a timely manner. All major permits and approvals and environmental compliance necessary for the unbuilt water infrastructure must be completed before the designation is issued.

ADWR's current financial capability rule for designations allows for flexibility on financing for cities and towns. Under the rule, a city or town may submit evidence demonstrating that "financing mechanisms are in place to construct adequate delivery, storage and treatment works in a timely manner." This flexibility may be extended to private water providers.

Expedited Modification for Incremental Growth

During the designation term, the Department will allow for an expedited modification to include an additional non-groundwater supply. For an expedited modification, the Department would review only AWS requirements for that additional supply and the demand schedule. ADWR rules could be amended to allow expedited modifications to all designated providers.

[1] 2021 was used because the Phoenix AMA model is based on 2021 reporting data.

Designation Term / Modification

The designation has an initial term of no greater than 15 years, which may be renewed or modified for additional terms of up to 15 years, subject to demonstrating that the Designation requirements are met. If modified or extended, the grandfathered groundwater volume will be reduced by volume of reported pumping since the most recent designation was issued, consistent with the existing AWS rules. A provider may continue under alternative designation framework indefinitely.

Overview

The Alternative Pathway to Designation proposal addresses the challenges that non-designated water providers have had in obtaining a designation. It addresses previously unconstrained groundwater pumping that is not subject to the Assured Water Supply Program, reduces unmet demand by ultimately reducing groundwater pumping over the 100-year period, and facilitating incremental growth and a steady transition from groundwater to alternative supplies such as surface water, effluent, or transported supplies.

Build to Rent Proposal

1. Define residential lease community (RLC)
   a. 6 or more detached residential dwelling units on one or more lots, parcels, or fractional interests.
   b. Offered for the purpose of lease without regard to lease term; including lease terms of one year or less.
   c. For purposes of the AWS program, an RLC is the same as a subdivision.
2. Ensure all applicable fees are paid (CAGRD).
3. A City or County may approve a building permit for an RLC within an AMA if the units have obtained a certificate of assured water supply or a written commitment of water service from a designated municipality or private water company.

“Wildcat” Development Proposal

Governor’s Water Policy Council

The Governor’s Water Policy Council recommends the following statutory changes to address “wildcat” developments:

1. Strengthen subdivision law by clarifying that any entity, individual or combination thereof with any ownership in six or more lots offered for sale or lease in one or more adjoining sections of land is evidence of “acting in concert”.
2. Clarify the definition of “contiguous” when evaluating if nearby lots constitute a subdivision by:
    a. Using one or more adjoining Sections of Land as the defined geographic area for considering whether lots are considered contiguous.
    b. Clarifying that lots separated by a "street" or "road" are contiguous.
    c. Retaining county, state, federal highways and “natural or man-made barriers” that divide lots as non-contiguous.
3. Apply civil penalties to each lot instead of the unauthorized subdivision as a whole.
4. Provide counties and municipalities authority to:
    a. Collect ownership information at the time of application for subdivision and building permits, and;
    b. Require a subdivider to obtain a subdivision public report based on ownership findings.

"Rural Groundwater Management Area" Framework Proposal

The Governor's Water Policy Council recommends that the "Rural Groundwater Management Area" Framework be submitted to the Governor as a foundation for a new groundwater management program in rural Arizona.

DESIGNATION OF "RURAL GROUNDWATER MANAGEMENT AREA"

1. **ADWR Initiation Criteria**
    a. Director has the option to initiate a "Rural Groundwater Management Area" designation process.
    b. The criteria to initiate should not be more onerous than an AMA.
        i. Should be created when there has been a significant decrease in groundwater indicators over time and access to groundwater supplies is being threatened.
2. **Local Initiation Process**
    a. Process can be initiated by county board of supervisors resolution(s) or petition by percentage of area registered voters.
3. **Hearing and Designation**
    a. ADWR to conduct a hearing process, similar to an AMA or INA, prior to a decision on designation.
    b. Director has final designation authority.
4. **Interim Pause**
    a. There is a need for a pause on groundwater use expansion that begins when a "Rural Groundwater Management Area" is designated and continues until the area Management Plan is approved by ADWR.
        i. No new non-exempt wells within area boundaries, with exceptions for supplies necessary for the protection of human health and safety.

ACKNOWLEDGEMENT OF EXISTING USES

1. There is a need to document current and historical groundwater uses and users if a "Rural Groundwater Management Area" is designated.
    a. Applies to all sectors and water use types served by non-exempt wells.
    b. Need sufficient information to make an "acknowledgement" determination.
2. The process to establish an "acknowledgement" should be more streamlined than the AMA application process.
3. Is subject to conservation or efficiency measures or other actions identified in the area Management Plan needed to achieve the area Goal(s).

4. Should provide flexibility for water users and the local economy while achieving the area Goal(s).

COUNCIL DUTIES

1. **Required Duties**
    a. Make a complete record of its proceedings that are open to public review.
    b. Respectfully cooperate with federally recognized Tribes, cities, towns, counties, water providers[2], and other local, state, or federal agencies or organizations within the area to engage in coordinated regional planning.
    c. Coordinate with ADWR in creating area Goal(s) and Management Plan that address the needs of the local basin.
        i. Request technical assistance from ADWR.
    d. Recommend and send to the Director the area Goal(s) and Management Plan.
        i. ADWR issues final approval of Goal(s) and portions of Management Plan to be implemented by ADWR, striking illegal and unconstitutional provisions and recommending against impractical provisions.
2. **Optional Duties**
    a. Gather additional information and data.
    b. Establish a steering committee, advisory committee, or other structure to solicit and receive participation, comment, and advice from residents and other interested parties regarding the development and operation of the area Management Plan.
    c. The Council may have other duties, responsibilities, and capabilities, to be finalized in legislation.

AREA GOALS

1. Each "Rural Groundwater Management Area" must have at least one Goal, with all Goals tied to the needs and conditions of the local area.
    a. The Goal(s) must address the groundwater conditions and criteria identified when ADWR designated the "Rural Groundwater Management Area".
    b. The Goal(s) will remain the same throughout the duration of the "Rural Groundwater Management Area".
2. The Council must draft and recommend Goal(s) in consultation with ADWR.
    a. The Council should respectfully cooperate with federally recognized Tribes, cities, towns, counties, water providers, and other local, state, or federal agencies or organizations within the area when drafting Goals.

---

[2] Throughout this document, "water providers" refers to all entities that provide water to end users, such as private water companies, irrigation districts, and ditch companies.

b. Director issues final approval of Goal(s).

AREA MANAGEMENT PLAN

1. **The Area Management Plan Shall Include:**
   a. One or more management Goals for the area, approved by the Director.

   b. A description of the appropriate physical and socioeconomic conditions in the area and how the Goal(s) relate to those conditions.

   c. Summary and consideration of other relevant government management plans currently in place in the area, including tribal, federal, state, and local governments.

   d. Methods to monitor and report on progress toward the Goal(s).

   e. Measuring and annual reporting for non-exempt wells in the area.

   f. Rules governing well location.

   g. Mandatory water conservation programs for all sectors.

2. **The Area Management Plan May Include:**

   a. Other water management practices or programs within ADWR's statutory authority deemed appropriate by the Council for achieving the Goal(s), with approval by and coordination with ADWR or other entities as necessary.

   b. Recommended (not mandated) supplemental water conservation and management actions for implementation by cities, towns, counties, water providers, and other public agencies within the area.

COUNCIL MEMBERSHIP

1. **Council Members**

   a. The Council shall consist of no fewer than five and no more than nine members.

   b. No more than one member may reside outside the area boundaries.

   c. Membership should represent all major water use sectors within the area, such as agricultural, industrial, and municipal users.

   d. The Council must include some number of at-large members to meet the specific needs of the local economy, population, and water users of relevant sectors.

2. **Appointment Process**

   a. Members must be appointed.

   b. Members shall be appointed from lists of recommended individuals submitted by federally recognized Tribes, cities, towns, counties, water providers, and state legislators within the area boundaries.

   c. Appointed based on knowledge of, interest in, and experience related to the condition, development, or use of water within the area.

   d. Members serve five-year terms, with member terms staggered.

SUNSET AND REVIEW

1. Every ten years after the designation, the Director shall review whether the conditions for designating the "Rural Groundwater Management Area" still exist.
2. If the Director determines that the area Goal(s) have been achieved, the Director may rescind the "Rural Groundwater Management Area" designation after following the same notice and hearing procedures that were used for the initial designation process.
3. Unless the "Rural Groundwater Management Area" is rescinded by the Director, the Council shall review and either recommend to readopt the existing area Management Plan for an additional term of ten years or draft and recommend a new Management Plan.

Rural Groundwater Measuring and Reporting Proposal

The Governor's Water Policy Council recommends the following actions to enhance the non-regulatory assessment of groundwater conditions and use across the rural areas of the state:

1. ADWR should pursue additional measuring, monitoring, and collection of groundwater data to more fully assess basin aquifer conditions.
2. ADWR should investigate the utilization of emerging technologies, such as remote sensing, to analyze conditions and to supplement water use data.
3. ADWR should provide financial assistance for non-exempt well measuring devices in unregulated areas of the state in exchange for voluntary annual reporting from well users.
4. ADWR should provide financial assistance for non-exempt well measuring devices in newly regulated areas of the state.

PINAL ACTIVE MANAGEMENT AREA

FOURTH MANAGEMENT PLAN

December 14, 2020

CHAPTER FIVE: MUNICIPAL

5.3.8 Regulatory Requirements for All Municipal Providers

The following requirements have been established for all municipal providers: individual user requirements, distribution system requirements and monitoring and reporting requirements. Each is described in this section.

5.3.8.1 Individual User Requirements

An individual user is a person who receives water from a municipal provider for non-irrigation use. For the 4MP, the director is required to establish "additional conservation requirements for non-irrigation uses..." (A.R.S. § 45-567 (A)(2)). ADWR has instituted a prohibition on certain turf-related facilities larger than 90 acres for the 4MP, and changes were made to the conservation requirements for the turf and large-scale power plant subsectors as well. Details can be found in Chapter 6 of this plan. In the 3MP, individual user requirements were established for turf-related facilities, publicly owned rights-of-way and large cooling towers. These requirements have been retained for the 4MP.

Either the individual user or the municipal provider serving the individual user is responsible for complying with the individual user requirement. See section 5-610 for determining responsibility for compliance with the individual user requirements.

5.3.8.2 Distribution System Requirements

Lost and unaccounted for water is defined as the total water from any source, except direct use treated effluent, withdrawn, diverted or received in a year minus the total amount of authorized deliveries made by the municipal provider in that year. Lost and unaccounted for water includes line leakage, meter under-registration, evaporation or leakage from storage ponds or tanks, system and hydrant leaks or breaks and illegal connections.

All municipal providers are required to meet an efficient lost and unaccounted for water standard in their service areas. Lost and unaccounted for water will be determined for each municipal provider based on the total quantity of metered and unmetered water deliveries and the total water pumped, received or diverted by the municipal provider for each calendar year, excluding direct use treated effluent. Small municipal providers must maintain lost and unaccounted for water at or below 15 percent. Large municipal providers are required to maintain their system not to exceed 10 percent lost and unaccounted for water. Large untreated water providers are required to either line all canals used to deliver untreated water to the provider's delivery points with a material that allows no more lost water than a well-maintained concrete lining, or operate and maintain its distribution system to limit lost and unaccounted for water at or below 10 percent.

For the fourth management period, ADWR will allow providers to exclude water from the lost and unaccounted for water calculation that is metered or estimated using approved estimating procedures and used pursuant to other regulatory requirements such as well purging and line flushing. Providers may also exclude estimated water uses such as construction (truck loads for dust control) or fire services, but all other uses of water within a distribution system must be metered. Appendix 5B provides a complete list of uses that are considered in the lost and unaccounted for water calculation and those uses which can be estimated to determine the volume.

FOURTH MANAGEMENT PLAN

PHOENIX ACTIVE MANAGEMENT AREA

2010-2020

1110 W. Washington Street, **Suite 310**, Phoenix, AZ 85007

CHAPTER FIVE: MUNICIPAL

Either the individual user or the municipal provider serving the individual user is responsible for complying with the individual user requirement. See section 5-610 for determining responsibility for compliance with the individual user requirements.

5.3.8.2 Distribution System Requirements

Lost and unaccounted-for water is defined as the total water from any source, except direct use treated effluent, withdrawn, diverted or received in a year minus the total amount of authorized deliveries made by the municipal provider in that year. Lost and unaccounted-for water includes line leakage, meter under-registration, evaporation or leakage from storage ponds or tanks, system and hydrant leaks or breaks, and illegal connections.

All municipal providers are required to meet an efficient lost and unaccounted-for water standard in their service areas. Lost and unaccounted-for water will be determined for each municipal provider based on the total quantity of metered and unmetered water deliveries and the total water pumped, received, or diverted by the municipal provider for each calendar year, excluding direct-use treated effluent. Small municipal providers must maintain lost and unaccounted-for water at or below 15 percent. Large municipal providers are required to maintain their system not to exceed 10 percent lost and unaccounted-for water. Large untreated water providers are required to either line all canals used to deliver untreated water to the provider's delivery points with a material that allows no more lost water than a well-maintained concrete lining or operate and maintain its distribution system to limit lost and unaccounted-for water at or below 10 percent.

For the 4MP, ADWR will allow providers to exclude water from the lost and unaccounted-for water calculation that is metered or estimated using approved estimating procedures and used pursuant to other regulatory requirements such as well purging and line flushing. Providers also may exclude estimated water uses such as construction (truck loads for dust control) or fire services, but all other uses of water within a distribution system must be metered. Appendix 5C provides a complete list of uses that are considered in the lost and unaccounted-for water calculation and those uses which can be estimated to determine the volume.

5.3.8.3 Monitoring and Reporting Requirements

All municipal providers, including providers regulated under the NPCCP, are required to annually report to ADWR:

1. information on the total quantity of water withdrawn, diverted or received that enters the groundwater distribution system during the year;
2. total quantity of water used within the service area and the total volume of water delivered for various municipal purposes;
3. total number of housing units by unit type added to the service area from December 31 of the previous calendar year to December 31 of the reporting year;
4. all movements of water made by the provider during the year, including water accepted from another entity (received) that was subsequently sent (delivered) to be stored at a GSF or underground storage facility and stored water that was recovered during the year, whether annual or long-term credit recovery, regardless of the water type;
5. volume of water ordered from an irrigation district that was released by the irrigation district from a storage or distribution facility but not accepted by the municipal provider or delivered to any other person;
6. an updated water-service area and distribution-system map delineating all distribution lines greater than four inches, all treatment works and all well sites;

CHAPTER FIVE: MUNICIPAL

5.1 INTRODUCTION

Municipal water providers are cities, towns, private water companies, and irrigation districts that deliver groundwater for non-irrigation uses (such as residential, commercial, governmental, industrial and construction uses). Municipal water providers also can include well co-operatives, mobile-home parks, or improvement districts. ADWR regulates those water providers serving more than 250 acre-feet (AF) of water for non-irrigation use annually as large municipal providers. Those providers serving 250 AF or less annually are regulated as small municipal providers. Some municipal water providers deliver water that is untreated for landscape/flood irrigation purposes only. ADWR regulates a municipal provider who delivers 100 AF or more of untreated water annually for landscape/flood irrigation as a large untreated provider. Municipal providers who deliver less than 100 AF of untreated water per year and only deliver water for landscape/flood irrigation are considered small untreated providers and are included in the small municipal water provider category. There are 10 large municipal providers and 32 small municipal providers in the Pinal Active Management Area (PAMA). A summary of municipal water supply and demand in the PAMA can be found in Chapter 2, and more detailed data can be found on the AMA Data webpage (https://new.azwater.gov/ama/ama-data). The online data will be updated annually.

The Municipal Conservation Programs for the PAMA have been updated for the Fifth Management Plan (5MP). The Total Gallons Per Capita per Day (GPCD) Program and the Non-Per Capita Conservation Program (NPCCP) have been substantially modified as compared to the Fourth Management Plan (4MP) and are designed to reduce withdrawals of groundwater. The Alternative Conservation Program (ACP) and the Institutional Provider Program (IPP) are not included in this plan. The programs for small providers and large untreated providers are unchanged from the 4MP. The conservation requirements contained in this chapter will become effective on January 1, 2025. Each program is described in this chapter, and the legal language pertaining to each program can be found in section 5.11.

5.2 MUNICIPAL CONSERVATION PROGRAM: HISTORY AND BACKGROUND

The Municipal Conservation Program for the PAMA 5MP is designed to assist municipal providers with increasing water conservation and efficiency in order to move toward the goal of preserving water supplies for future non-irrigation uses by reducing withdrawals of groundwater. Efficient use of groundwater, reduction in total water use, and offsetting

the entire acre, including associated structures, but not including any acres regulated as a turf-related facility. A large untreated water provider also must meet the individual user requirements, distribution system requirements, and the monitoring and reporting requirements.

5.8 CONSERVATION REQUIREMENTS FOR SMALL MUNICIPAL PROVIDERS

During the fifth management period, small providers will continue to be required to minimize waste of all water supplies, maximize efficiency in outdoor watering, encourage reuse of water supplies, and improve water-use efficiency as feasible. Small providers must also comply with lost and unaccounted for standards not to exceed 15 percent, as well as certain other reporting requirements described below.

5.9 REGULATORY REQUIREMENTS FOR ALL MUNICIPAL PROVIDERS

The following requirements have been established for all municipal providers: individual user requirements, distribution system requirements, and monitoring and reporting requirements.

5.9.1 INDIVIDUAL USER REQUIREMENTS

An individual user is a person who receives water from a municipal provider for non-irrigation use. For the 5MP, the director is required to establish “additional conservation requirements for non-irrigation uses…” (A.R.S. § 45-568(A)). Additionally, there is a prohibition on certain turf-related facilities larger than 90 acres. Either the individual user or the municipal provider serving the individual user is responsible for complying with the individual user requirements outlined in the appropriate subsector program in Chapter 6. See section 5-1110 for determining responsibility for compliance with the individual user requirements.

5.9.2 DISTRIBUTION SYSTEM REQUIREMENTS

Lost and unaccounted for water is defined as the total water from any source, except direct use effluent, withdrawn, diverted or received in a year, minus the total amount of authorized deliveries made by the municipal provider in that year. Lost and unaccounted for water includes line leakage, meter under-registration, evaporation or leakage from storage ponds or tanks, system and hydrant leaks or breaks, and illegal connections.

All municipal providers are required to meet an efficient lost and unaccounted for water standard in their service areas. Lost and unaccounted for water will be determined for each municipal provider based on the total quantity of metered and unmetered water

deliveries and the total water pumped, received, or diverted by the municipal provider for each calendar year, excluding direct use effluent. Small municipal providers must maintain lost and unaccounted for water at or below 15 percent. Large municipal providers are required to maintain their system not to exceed 10 percent lost and unaccounted for water. Large untreated water providers are required to either line all canals used to deliver untreated water to the provider's delivery points with a material that allows no more lost water than a well-maintained concrete lining or operate and maintain its distribution system to limit lost and unaccounted for water at or below 10 percent.

For the 5MP, ADWR will allow providers to exclude water from the lost and unaccounted for water calculation that is metered or estimated using approved estimating procedures and used pursuant to other regulatory requirements such as well purging and line flushing. Providers also may exclude estimated water uses such as construction (truck loads for dust control) or fire services, but all other uses of water within a distribution system must be metered. Appendix 5A provides a complete list of uses that are considered in the lost and unaccounted for water calculation and those uses which can be estimated to determine the volume.

5.9.3 MONITORING AND REPORTING REQUIREMENTS

All municipal providers, including providers regulated under the NPCCP, are required to annually report to ADWR:

1. Information on the total quantity of water withdrawn, diverted or received that enters the groundwater distribution system during the year.

2. Total quantity of water used within the service area and the total volume of water delivered for various municipal purposes.

3. Total number of housing units by unit type added to the service area from December 31 of the previous calendar year to December 31 of the reporting year.

4. All movements of water made by the provider during the year, including water accepted from another entity (received) that was subsequently sent (delivered) to be stored at a GSF or underground storage facility and stored water that was recovered during the year, whether annual or long-term credit recovery, regardless of the water type.

5. Volume of water ordered from an irrigation district that was released by the irrigation district from a storage or distribution facility but not accepted by the municipal provider or delivered to any other person.

CHAPTER 5: MUNICIPAL

5.1 INTRODUCTION

Municipal water providers are cities, towns, private water companies, and irrigation districts that deliver groundwater for non-irrigation uses (such as residential, commercial, governmental, industrial and construction uses). Municipal water providers also can include well co-operatives, mobile-home parks, or improvement districts. ADWR regulates those water providers serving more than 250 acre-feet (AF) of water for non-irrigation use annually as large municipal providers. Those providers serving 250 AF or less annually are regulated as small municipal providers. Some municipal water providers deliver water that is untreated for landscape/flood irrigation purposes only. ADWR regulates a municipal provider who delivers 100 AF or more of untreated water annually for landscape/flood irrigation as a large untreated provider. Municipal providers who deliver less than 100 AF of untreated water per year and only deliver water for landscape/flood irrigation are considered small untreated providers and are included in the small municipal water provider category. There are 43 large municipal providers and 52 small municipal providers in the Phoenix Active Management Area (PhxAMA). Two of the 43 large municipal providers are regulated as large untreated providers. A summary of municipal water supply and demand in the PhxAMA can be found in Chapter 2 and more detailed data can be found on the AMA Data webpage (https://new.azwater.gov/ama/ama-data). The online data will be updated annually.

The Municipal Conservation Programs for the PhxAMA have been updated for the Fifth Management Plan (5MP). The Total Gallons Per Capita per Day (GPCD) Program and the Non-Per Capita Conservation Program (NPCCP) have been substantially modified as compared to the Fourth Management Plan (4MP) and are designed to reduce withdrawals of groundwater. The Alternative Conservation Program (ACP) and the Institutional Provider Program (IPP) are not included in this plan. The programs for small providers and large untreated providers are unchanged from the 4MP. The conservation requirements contained in this chapter will become effective on January 1, 2025. Each program is described in this chapter, and the legal language pertaining to each program can be found in section 5.11.

5.9.2 DISTRIBUTION SYSTEM REQUIREMENTS

Lost and unaccounted for water is defined as the total water from any source, except direct use effluent, withdrawn, diverted or received in a year, minus the total amount of authorized deliveries made by the municipal provider in that year. Lost and unaccounted for water includes line leakage, meter under-registration, evaporation or leakage from storage ponds or tanks, system and hydrant leaks or breaks, and illegal connections.

All municipal providers are required to meet an efficient lost and unaccounted for water standard in their service areas. Lost and unaccounted for water will be determined for each municipal provider based on the total quantity of metered and unmetered water deliveries and the total water pumped, received, or diverted by the municipal provider for each calendar year, excluding direct use effluent. Small municipal providers must maintain lost and unaccounted for water at or below 15 percent. Large municipal providers are required to maintain their system not to exceed 10 percent lost and unaccounted for water. Large untreated water providers are required to either line all canals used to deliver untreated water to the provider’s delivery points with a material that allows no more lost water than a well-maintained concrete lining or operate and maintain its distribution system to limit lost and unaccounted for water at or below 10 percent.

For the 5MP, ADWR will allow providers to exclude water from the lost and unaccounted for water calculation that is metered or estimated using approved estimating procedures and used pursuant to other regulatory requirements such as well purging and line flushing. Providers also may exclude estimated water uses such as construction (truck loads for dust control) or fire services, but all other uses of water within a distribution system must be metered. Appendix 5A provides a complete list of uses that are considered in the lost and unaccounted for water calculation and those uses which can be estimated to determine the volume.

5.9.3 MONITORING AND REPORTING REQUIREMENTS

All municipal providers, including providers regulated under the NPCCP, are required to annually report to ADWR:

1. Information on the total quantity of water withdrawn, diverted, or received that enters the groundwater distribution system during the year.

2. Total quantity of water used within the service area and the total volume of water delivered for various municipal purposes.

3. Total number of housing units by unit type added to the service area from December 31 of the previous calendar year to December 31 of the reporting year.

Spencer,

Not a problem. I will get the meeting scheduled. Please let me know if Rob can join us and I will add him to the invite.

Thanks!

DEPARTMENT OF AGRICULTURE
Title 3, Chapter 5, Article 1

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **September 10, 2024**

SUBJECT: **DEPARTMENT OF AGRICULTURE**
Title 3, Chapter 5, Article 1

Summary

This Five Year Review Report (5YRR) from the Department of Agriculture (Department) covers ten (10) rules and one (1) table in Title 3, Chapter 5, Article 1 related to Sampling and Laboratory Certification. Specifically, R3-5-101 defines the terms used in the Article, R3-5-102 describes the procedures to apply for and renew a laboratory certification, R3-5-103 lists the services for which a person must obtain certification, R3-5-104 sets the fee for initial certification, renewal, and replacement of a lost certificate, R3-5-105 lists the requirements certified laboratories must maintain, R3-5-106 requires laboratories to use certified testing procedures, R3-5-107 requires applicants to participate in proficiency testing, R3-5-110 defines the process for use of a referee laboratory if the results from two certified labs are different or if an individual or state agency contests the results from a certified lab, R3-5-111 requires that a laboratory certification is dependent on the physical location where the service is performed, R3-5-112 establishes overall time-frames that a Department shall issue or deny a license, and Table 1 establishes overall time-frames that a Department shall issue or deny a license.

The Department did not complete its prior proposed course of action as the Department determined the prior amendment was no longer necessary.

Proposed Action

The Department does not have a proposed course of action at this time.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Department indicates the economic impact of the rules has not differed significantly from that projected in the last economic impact statements prepared in 2004. The State bore minimal costs in developing the necessary guidance documents and educating the regulated community. The certified labs bore slight costs developing the necessary documentation changes. The Department anticipates no economic impacts by continuing these rules.

Stakeholders include the Department and entities certified by the Department to perform agricultural laboratory services.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department has determined that the benefits of Title 3, Chapter 5, Article 1, are deemed to be the minimum required for the safety of the agriculture industry while being supportive of commerce in Arizona without undue hardships, costs or barriers to business. The benefits of the rules outweigh the minimal cost of the rules and impose the least burden and cost to any regulated persons.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department has not received written criticism of the rules in the past five years.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Department states the rules are clear, concise, and understandable.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

The Department states the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Department states the rules are effective in achieving their objectives.

8. **Has the agency analyzed the current enforcement status of the rules?**

The Department states the rules are enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department states that there is no corresponding federal law related to these rules.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

The Department states that all the rules were adopted prior to July 29, 2010, however if they had not been, that the rules would qualify for an exception under ARS § 41-1037 (A)(3), as the issuance of a general permit is not technically feasible or would not meet the applicable statutory requirements.

11. **Conclusion**

This Five Year Review Report from the Department of Agriculture covers ten rules and one table in Title 3, Chapter 5, Article 1 related to Sampling and Laboratory Certification. As indicated above, the rules are clear, concise, and understandable; effective in meeting their objectives; and consistent with other rules and statutes. The Department does not intend on submitting a Notice of Final Rulemaking to the Council.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Council staff recommends approval.

KATIE HOBBS

RE: Five-Year Rule Review Report for A.A.C. 4, Title 3, Chapter 5, Article 1

Dear Ms. Klein:

Please find enclosed the Five-Year Review Report of the Arizona Department of Agriculture's ("Department") for A.A.C. Title 3, Chapter 5, Articles 1 which was due July 21, 2024. The Department reviewed all the rules in Article 1. The Department does not intend for any rules to expire under A.R.S. § 41-1056(J). The Department certifies it is in compliance with A.R.S. § 41-1091.

Please contact Doug Marsh at (602) 744-4924 or dmarsh@azsal.gov with any questions about this report.

Sincerely,

Paul E. Brierley
Executive Deputy Director

cc: Doug Marsh, Assistant Director

ARIZONA DEPARTMENT OF AGRICULTURE

FIVE-YEAR REVIEW REPORT

Title 3. Agriculture

Chapter 5. Department of Agriculture - State Agriculture Laboratory

Article 1. Sampling and Laboratory Certification

July 21, 2023
[Revised] November 19, 2024

1. Authorization of the rules by existing statutes:

Authorizing statutes:	General:	A.R.S. §§ 3-107(A) (l); 3-147
	Specific:	A.R.S. §§ 3-143(C); 3-145; 3-146; 3-147

2. The objective of each rule:

Rule	Objective
ARTICLE 1. GENERAL PROVISIONS	
R3-5-101	This rule sets out the definitions used for specific terms in this Article.
R3-5-102	This rule prescribes the procedures to apply for and renew certification to perform agricultural laboratory services, as well as the procedures for a certification holder to terminate the certification.
R3-5-103	This rule lists categories of agricultural laboratory services for which a person may obtain certification.
R3-5-104	This rule sets the fee for initial certification, renewal, and replacement of a lost certificate.
R3-5-105	This rule requires certified laboratories to maintain certain documentation for a specific period of time, maintain a quality assurance manual, maintain accurate calibration of testing equipment, follow OSHA standards, and dispose of hazardous waste as provided by law.
R3-5-106	This rule requires that certified laboratories use standardized testing procedures either developed by or approved by the Department.
R3-5-107	This rule requires all applicants for certification to participate in a proficiency testing program to demonstrate the ability to provide credible test results for a specific agricultural service and to submit a corrective action plan to correct deficiencies.

R3-5-110	This rule defines the process for use of a referee laboratory if the results from two certified labs are different or if an individual or state agency contests the results from a certified lab that is contracted to provide a service.
R3-5-111	This rule defines that a laboratory certification is dependent on the physical location where the service is performed. If a certified facility moves, a new certification is required.
R3-5-112	This rule, along with Table 1, establishes overall time-frames within which the Department shall issue or deny a license under this article.
Table 1	See above entry.

3. Are the rules effective in achieving their objectives? Yes X No ___

The rules in the Article are effective in achieving their objective.

4. Are the rules consistent with other rules and statutes? Yes X No ___

The rules in the Article are consistent with other rules and statutes.

5. Are the rules enforced as written? Yes X No ___

The rules in the Article are enforced as written.

6. Are the rules clear, concise, and understandable? Yes X No ___

The rules in the Article are clear, concise, and understandable.

7. Has the agency received written criticisms of the rules within the last five years? Yes ___ No X

The agency has not received any written criticisms of the rules within the last five years.

8. Economic, small business, and consumer impact comparison:

The economic impact of the rules has not differed significantly from that projected in the last economic impact statements prepared in 2004. The State bore minimal costs in developing the necessary guidance documents and educating the regulated community. The certified labs bore slight costs developing the necessary documentation changes. The Department anticipates no economic impacts by continuing these rules.

Summary EIS from 2004 Rulemaking:

A. The Arizona Department of Agriculture

The Department will incur modest expenses related to training staff and educating the regulated community on the amendments. The Department will benefit from the corrected time-frame for certification of a service not previously certified by the SAL. The time-frame table now matches the content of the time-frame rule.

There has been no modification to these rules since 2004. The Department has been operating the laboratory certification program under these rules for the past 20 years. This is no current impact to the Department for continuing these rules.

B. Political Subdivisions

Other than the Department, no other political subdivision is impacted by the rulemaking.

C. State Revenue

This rulemaking will have no impact on state revenue.

D. Businesses Directly Affected By the Rulemaking

There has been no modification to these rules since 2004. All the labs currently certified under these rules have been so certified for several years. This is no expected impact to the certified community.

Certified laboratories and those seeking initial certification will benefit from the clarity of the amended rules and the added definitions. Laboratories will have the option to seek certification in two new categories, noxious weed identification and noxious weed seed identification. The required content of the Master File and of the Quality Assurance Manual is revised and is more comprehensive than was previously required. Duplicative content is removed. The recordkeeping provisions are more directly stated than in the past to assist the laboratories to meet their obligations. There are no fee increases associated with this rule package. The Department currently certifies five laboratories, each of which provides one agricultural laboratory service. The Department believes the certified laboratory community will bear only minor costs connected to the implementation of this rulemaking. Any costs will be limited to organizing and modifying documentation. The Department believes the benefit to the state to regulate laboratories performing the above-described certified laboratory services outweighs any related cost to the certified laboratory community.

9. Has the agency received any business competitiveness analyses of the rules? Yes ___ No X

The agency has not received any business competitive analysis of the rules.

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

There was no course of action indicated in the previous five-year-review report.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to the regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

The Division has determined that the benefits of Title 3, Chapter 5, Article 1, are deemed to be the minimum required for the safety of the agriculture and related laboratory industries while being supportive of commerce in Arizona without undue hardships, costs or barriers to business. The benefits of the rules outweigh the minimal cost of the rules and impose the least burden and cost to any regulated persons. Without the rules in

Article 1, there would be no available option to certify agricultural laboratories for the testing of agricultural products for health, safety and compliance purposes as required by statute and there is no comparative alternative available for these services. The fees prescribed in rule for new and renewal certification only partially cover the costs associated to administer an agricultural laboratory certification program as mandated in statute.

The prescribed fees are also minimal compared to similar laboratory certification programs in other Arizona agency's and other state's. The Department charges $200 for a new certification and $100 for a renewal. These fees have not changed since being established in 1985. The Department offers the following examples of charges for similar laboratory certification services in this State and other Western states for comparison purposes. The Department currently certifies a laboratory for testing cannabis for levels of THC, charging the aforementioned fees. The Arizona Department of Health Services charges $25,000 for initial and $5,000 for renewal certifications of laboratories testing cannabis and cannabis products. Further, the Arizona Department of Health Services charges between $1,677 and $2,348 for environmental laboratory certification similar to what our Department provides (R9-14-607). Other states, like Oregon charge laboratories (located in Oregon), one of three levels of certification fees, $450, $900 and $1,600; Plus, additional fees for areas of accreditation. California's "Animal Health Lab" certification is $1,000/year and Colorado has an annual fee of $350 per specialty. Other compliance costs and paperwork is kept to a minimum so that requirements are not overly burdensome.

12. Are the rules more stringent than corresponding federal laws? Yes ___No __X

None of the rules in Title 3, Chapter 5, Article 1, are more stringent than corresponding federal laws.

13. For rules adopted after July 29, 2010, that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

These rules were adopted prior to July 29, 2010. In addition, a general permit for laboratory certification would not suffice to ensure that the public is protected. One general certification cannot authorize multiple processes. For example, testing for aflatoxin in cottonseed is one service requiring specific certification and expertise. Testing for aflatoxin in raw milk is a separate service that requires a separate certification and different expertise. The issuance of a general permit is not technically feasible or would not meet the applicable statutory requirements.

14. Proposed course of action:

The Division does not propose any further action at this time.

TITLE 3. AGRICULTURE

CHAPTER 5. DEPARTMENT OF AGRICULTURE STATE AGRICULTURAL LABORATORY

Authority: A.R.S. § 3-141 et seq.

Former Title 3, Chapter 5, Article 1, Sections R3-5-01 through R3-5-08, renumbered to Title 3, Chapter 2, Article 8, Sections R3-2-801 through R3-2-808; new Title 3, Chapter 5, Article 1, Sections R3-5-101 through R3-5-110 renumbered from Title 3, Chapter 1, Article 7, Sections R3-1-701 through R3-1-710 (Supp. 91-4).

ARTICLE 1. SAMPLING AND LABORATORY CERTIFICATION

Article 1, consisting of Sections R3-5-101 through R3-5-110 renumbered from R3-1-701 through R3-1-710 (Supp. 91-4).

Title 3, Chapter 1, Article 7 consisting of Sections R3-1-201 through R3-1-210 renumbered without change as Article 7, Sections R3-1-701 through R3-1-710 (Supp. 89-1).

Title 3, Chapter 1, Article 7 consisting of Sections R3-1-201 through R3-1-210 adopted effective July 25, 1985.

ARTICLE 1. SAMPLING AND LABORATORY CERTIFICATION

R3-5-101. Definitions

In addition to the definitions in A.R.S. §§ 3-101 and 3-141, the following terms apply to this Chapter:

"Accuracy" means the closeness of an observation to the true value.

"Embossing Seal" means a seal approved by the SAL.

"Person" means an individual, partnership, corporation, or other legal entity that establishes, conducts, or maintains a laboratory as prescribed in A.R.S. § 3-145(A).

"Precision" means the agreement of repeated observations made under the same conditions.

"Proficiency Testing Program" or "PTP" means a check sample testing program.

"Quality assurance" means an integrated system of management activities involving planning, implementation, assessment, reporting, and quality improvement to ensure that a process, item, or service is of definable quality.

"SAL" means Arizona Department of Agriculture State Agricultural Laboratory.

"Testing" means a process employed to achieve a result for an agricultural service performed by a certified laboratory.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-201 renumbered without change as Section R3-5-101 (Supp. 89-1). Section R3-5-101 renumbered from R3-1-701 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-102. Certification; Renewal; Termination

A. Initial laboratory certification. A person who is seeking initial laboratory certification to provide an agricultural laboratory service, as prescribed in A.R.S. § 3-145, shall:
   1. Provide the following information on an application form obtained from the Department:
      a. Name, business and mailing address, telephone and fax numbers, and e-mail address of the laboratory;
      b. Name, address, telephone number, e-mail address, and signature of the owner; and
      c. Name, address, telephone number, e-mail address, and signature of the laboratory manager;
   2. Provide a description of all programs, services, and functions performed at the laboratory;
   3. On the application form, list the service that the certified laboratory will perform by commodity or sample-type, detailing the test procedure used, including specific references to any publication where the test procedure is described;
   4. Provide a current employee organization chart that includes employee name, title, and laboratory responsibility; and
   5. Include the fee prescribed in R3-5-104 with the application.

B. A person shall provide written notification to the Assistant Director of any change to the information provided under subsection (A)(1) within 30 days after the change.

C. New service. If a person is seeking laboratory certification for a service not currently performed by the SAL, the application will be considered as a new service laboratory certification. If the necessary expertise for review does not exist within the SAL, the Director shall establish a committee as prescribed in A.R.S. § 3-106 to advise the Department of the proper procedures for laboratory certification in that area.

D. Certification renewal.
   1. A person shall file a renewal application obtained from the Department at least 30 days before the expiration date of the current certification and provide the information required in subsection (A)(1).
   2. An application received less than 30 days before the expiration date is untimely and the person shall reapply for an initial laboratory certification.
   3. If an application is received more than 60 days before the expiration date of the current certification, the Department shall return the application to the person for resubmission.
   4. The current certification remains valid until a determination is made on the renewal application.
   5. A person shall pay the fee prescribed in R3-5-104 with the renewal application.

E. Certification termination. A person may terminate a laboratory certification by notifying the Assistant Director in writing within 30 days before the effective date of the termination.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-202 renumbered without change as Section R3-5-102 (Supp. 89-1). Section R3-5-102 renumbered from R3-1-702 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-103. Agricultural Laboratory Services

A. A person may apply for a laboratory certification to perform any of the services listed in A.R.S. § 3-141(1) or any of the following agricultural laboratory services:
1. Determination of specific element and ion content of water for irrigation or livestock purposes;
2. Determination of specific element and ion content of plant tissue for the evaluation of plant nutrients;
3. Determination of specific element and ion content of soil for the evaluation of soil fertility and for element and ion content that may cause plant growth limitations;
4. Determination of the content of processed meat or a meat food product including the percentage of a meat or non-meat ingredient;
5. Verification of an analysis for the accuracy of the label guarantee of a feed, fertilizer, animal manure, plant growth stimulant, soil amendment, soil conditioner, or pesticide;
6. Verification of planting seed germination percentages, purity analysis, or another named seed or plant propagative material testing procedure;
7. Identification of insects, plant pathogens, animal pathogens, nematodes, noxious weeds, noxious weed seeds, or animal parasites;
8. Testing of milk or milk product for quality and market standards;
9. Determination of mycotoxin, antibiotic, or drug residue in plant or animal tissue;
10. Determination of mycotoxin, antibiotic, or drug residue in a plant or animal product, animal feed, or feed ingredient;
11. Determination of a specific pesticide, or hazardous or toxic element in plant or animal tissue;
12. Determination of a specific pesticide or hazardous or toxic element in water used in livestock production, irrigation water, air, soil, agricultural product, or animal feed; or
13. Collection of samples.

B. A person may seek laboratory certification for an agricultural laboratory service not listed in subsection (A) by complying with R3-5-102(A).

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-203 renumbered without change as Section R3-5-103 (Supp. 89-1). Section R3-5-103 renumbered from R3-1-703 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-104. Fees

A. A person shall pay the following fee to the Department before the SAL will review the application for laboratory certification to perform an agricultural laboratory service:
1. Initial fee, $200 per certification; or
2. Renewal fee, $100 per certification.

B. Except as provided in A.R.S. § 41-1077, the applicable fee is nonrefundable.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-204 renumbered without change as Section R3-5-104 (Supp. 89-1). Section R3-5-104 renumbered from R3-1-704 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-105. Laboratory Requirements

A. A person who has obtained laboratory certification under this Article shall maintain a master file for each certification. The person shall update the master file within 30 days of any change. The master file shall contain:
1. The most current letter of certification, stating the period of validity;
2. A quality assurance manual as described in subsection (B);
3. An organizational chart that indicates:
   a. Each personnel position with responsibility for the agricultural laboratory service; and
   b. The reporting relationship of each position identified in subsection (A)(3)(a), including every administrative, operational, and quality control relationship;
4. The name and resume of the individual assigned to each position identified in subsection (A)(3)(a);
5. Documentation of training for each staff member who performs all or part of the agricultural laboratory service;
6. Documentation of the laboratory's competence and experience in the applicable test procedure for the agricultural laboratory service;
7. Reports of each sample result for the last three years and all data generated during the testing. After three years, these records shall be maintained as prescribed in subsection (D). With the approval of the Assistant Director, a person may maintain records in electronic format;
8. Laboratory equipment lists, including:
   a. Type and manufacturer;
   b. Serial and model number;
   c. Date of the last calibration, if applicable; and
   d. Maintenance records;
9. Receiving and shipping records of all samples and supplies relating to the certification;
10. Quality control documentation;
11. Documentation of reference material, standards, and biological specimens as prescribed in subsection (B)(5); and
12. All correspondence relating to the certification and operation of the program.

B. A person who has obtained laboratory certification shall maintain a quality assurance manual. The person shall update the manual within 30 days of any change, except that any change to a testing procedure requires pre-approval from the Assistant Director based on a request made at least 30 days before the proposed implementation date. The manual shall contain:
1. A description of laboratory management and the responsibilities of personnel related to the certification that includes:
   a. The legal name, address, and telephone number of the main office or parent company;
   b. The name, location of the laboratory, and telephone number, if different from subsection (B)(1)(a);
   c. The education, skill, and experience required of an individual in a position included in the organizational chart prescribed in subsection (A)(3); and
   d. A description of the method used to train each person in a position included in the organizational chart prescribed in subsection (A)(3);

2. Procedures for receiving and handling samples, including:
   a. Transporting samples to the laboratory in a manner that protects the integrity of the sample;
   b. Performing a visual examination upon receipt for evidence of shipping damage;
   c. Recording date and time of sample receipt, carrier name, and method of shipment;
   d. Recording sample weight, temperature, or other physical parameters, as applicable;
   e. Completing chain of custody documentation for receipt, as applicable;
   f. Identifying a sample with a unique identification number;
   g. Storing a sample before and after testing; and
   h. Disposing of samples after completion of testing, including holding time;
3. Procedures for purchasing, receiving and storing reagents and laboratory consumable materials that affect the quality of tests;
4. A written standard operating procedure for each test as prescribed in R3-5-106. A standard operating procedure for a test shall contain, as applicable:
   a. An identification of the standard operating procedure, including the title, revision number, effective date, and authorizing signature;
   b. The purpose of the procedure, including a description of the expected outcome;
   c. The scope of the procedure, including a description of the type of samples and test parameters for which the procedure is applicable;
   d. A list of reagents, apparatus, and equipment used, including technical performance requirements;
   e. A list of necessary reference standards or reference materials;
   f. A description of acceptable environmental conditions;
   g. A sequential listing, in detail, of the steps and operations of the procedure;
   h. An identification of any hazardous situation or operation;
   i. A list of safety measures specific to the test procedure;
   j. A list of precautions designed to prevent damage or contamination to a sample or testing equipment;
   k. Any quality control measures that will be used to determine acceptability of a test result, including acceptance criteria;
   l. A list of data to be recorded and the method for reporting the test result; and
   m. The procedure's uncertainty or the method to be used for reporting uncertainty;
5. Procedures for documenting applicable reference material, standards, and biological specimens that provide:
   a. Traceability of each chemical standard of measurement to a primary standard;
   b. Verified and traceable biological specimens; and
   c. Origin and traceability of reference material;
6. A description of an equipment maintenance program that includes:
   a. Each manufacturer's recommendations for the setup and normal operation of each piece of equipment;
   b. A separate maintenance schedule for each piece of equipment, and a procedure for recording the date maintenance is performed and the date of any damage, malfunction, modification, or repair of the equipment; and
   c. Quality control procedures for determining equipment performance; and
7. Procedures for quality control activity, including:
   a. Monitoring temperature-controlled spaces;
   b. Certifying that each thermometer, analytical balance, and biological hood meets federal or nationally-recognized standards, as applicable;
   c. Calibrating glassware and volumetric equipment, as applicable; and
   d. Validating the quality of reagents and laboratory consumable material, as applicable.

C. A person who has obtained laboratory certification shall ensure the accurate calibration of testing equipment.

D. A person who has obtained laboratory certification shall maintain records required under this Article for five years, except pesticide residue sample results and data, which shall be maintained for seven years;

E. A person who has obtained laboratory certification shall maintain a facility and conduct operations in compliance with the standards established by the Occupational Safety and Health Administration and any other applicable federal, state, or local building, sanitary, safety, electrical, and fire code for the area in which the laboratory is located.

F. A person who has obtained laboratory certification shall dispose of hazardous waste cataloged in the Identification and Listing of Hazardous Waste, 40 CFR 261, July 1, 2003 edition, as prescribed in the Standards Applicable to Generators of Hazardous Waste, 40 CFR 262, July 1, 2003 edition. This material is incorporated by reference, does not include any later amendments or editions, and is on file with the Department.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-205 renumbered without change as Section R3-5-105 (Supp. 89-1). Section R3-5-105 renumbered from R3-1-705 (Supp. 91-4). Section repealed, new Section adopted by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-106. Testing Procedures

A person complying with this Article shall:

1. Use testing procedures that are referenced in professional journals or manuals and obtain the Assistant Director's approval of the procedures, or
2. Use testing procedures established by the SAL.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-206 renumbered without change as Section R3-5-106 (Supp. 89-1). Section R3-5-106 renumbered from R3-1-706 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-107. Proficiency Testing Program

A. A person applying for laboratory certification shall participate in a PTP to demonstrate the ability of the laboratory to provide the agricultural laboratory service.

B. A person participating in an outside PTP shall provide the Assistant Director with its identification number and a copy of the results. The person shall pay the cost of the PTP.

C. The Department shall evaluate each laboratory based on comparative results obtained for each PTP sample. If the Department discovers a deficiency, the person applying for laboratory certification shall submit a corrective action plan to the Assistant Director.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-207 renumbered without change as Section R3-5-107 (Supp. 89-1). Section R3-5-107 renumbered from R3-1-707 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-108. Repealed

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-208 renumbered without change as Section R3-5-108 (Supp. 89-1). Section R3-5-108 renumbered from R3-1-708 (Supp. 91-4). Section repealed by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1).

R3-5-109. Repealed

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-209 renumbered without change as Section R3-5-109 (Supp. 89-1). Section R3-5-109 renumbered from R3-1-709 (Supp. 91-4). Section repealed by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1).

R3-5-110. Referee Laboratory

If the testing results from two certified laboratories differ or certified laboratory results are challenged by a person or state agency that is contracting for agricultural laboratory services, the Director may designate a laboratory to serve as a referee and assist in making a final determination. If the test results are challenged, the party who loses the dispute shall pay all costs incurred by the referee laboratory.

Historical Note

Adopted effective July 25, 1985 (Supp. 85-4). Former Section R3-1-210 renumbered without change as Section R3-5-110 (Supp. 89-1). Section R3-5-110 renumbered from R3-1-710 (Supp. 91-4). Amended by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-111. Certification Expiration; Laboratory Relocation

A laboratory certification is valid for the physical location approved by the SAL in response to the initial or renewal application. If a laboratory relocates after initial certification or renewal of certification, the existing 12-month certification expires on the date of the move. A person seeking laboratory certification for the new location shall file an initial certification application to become certified at the new physical location and the Department shall perform an on-site review.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

R3-5-112. Licensing Time-frames

A. Overall time-frame. The Department shall issue or deny a laboratory certification within the overall time-frames listed in Table 1 after receipt of an application. The overall time-frame is the total of the number of days provided for the administrative completeness review and the substantive review.

B. Administrative completeness review.
1. The applicable administrative completeness review time-frame established in Table 1 begins on the date the Department receives an application. The Department shall notify the applicant in writing within the administrative completeness review time-frame whether the application is incomplete. The notice shall specify the information that is missing. If the Department does not provide notice to the applicant within the administrative completeness review time-frame, the application is complete.
2. An applicant with an incomplete certification application shall supply the missing information within the completion request period established in Table 1. The administrative completeness review time-frame is suspended from the date that the Department mails the notice of missing information to the applicant until the date that the Department receives the information.
3. If the applicant fails to submit the missing information before expiration of the completion request period, the Department shall close the file, unless the applicant requests an extension. An applicant whose file has been closed may obtain laboratory certification by submitting a new application.
4. If an applicant requests laboratory certification of a new service, the Department shall add 90 days to the administrative completeness review time-frame to provide time for establishing a protocol for granting certification.

C. Substantive review. The substantive review time-frame established in Table 1 begins on the date that the application is administratively complete.
1. On-site survey.
   a. Within 30 days after receipt of a complete application, the SAL shall schedule an on-site survey of an applicant's laboratory facilities.
   b. The Assistant Director may waive the on-site survey for a renewal applicant if the renewal applicant is in compliance with the other provisions of this Article.
2. If the Department makes a comprehensive written request for additional information, the applicant shall submit the additional information identified by the request within the additional information period provided in Table 1. The substantive review time-frame is suspended from the date that the Department mails the request until the information is received by the Department. If the applicant fails to provide the information identified in the written request within the additional information period, the Department shall deny the certification.
3. If laboratory certification is denied, the Department shall send the applicant written notice explaining:
   a. The reason for the denial with citations to supporting statutes or rules;
   b. The applicant's right to appeal the denial;
   c. The period for appealing the denial; and
   d. The name and telephone number of a Department contact person who can answer questions regarding the appeals process.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

Table 1. Time-frames (Calendar Days)

Certification	Authority	Administrative Completeness Review	Completion Request Period	Substantive Completeness Review	Additional Information Period	Overall Time-frame
Laboratory Certification	A.R.S. § 3-145					
• Initial	R3-5-102	14	30	60	90	74
• Renewal		14	14	30	14	44
New service		104	90	60	30	164

Historical Note

Table 1 adopted by final rulemaking at 5 A.A.R. 573, effective February 4, 1999 (Supp. 99-1). Amended by final rulemaking at 10 A.A.R. 3959, effective November 13, 2004 (Supp. 04-3).

3-107. Organizational and administrative powers and duties of the director

A. The director shall:

1. Formulate the program and policies of the department and adopt administrative rules to effect its program and policies.

2. Ensure coordination and cooperation in the department in order to achieve a unified policy of administering and executing its responsibilities.

3. Subject to section 35-149, accept, expend and account for gifts, grants, devises and other contributions of money or property from any public or private source, including the federal government. All contributions shall be included in the annual report under paragraph 6 of this subsection. Monies received under this paragraph shall be deposited, pursuant to sections 35-146 and 35-147, in special funds for the purpose specified, which are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

4. Contract and enter into interagency and intergovernmental agreements pursuant to title 11, chapter 7, article 3 with any private party or public agency.

5. Administer oaths to witnesses and issue and direct the service of subpoenas requiring witnesses to attend and testify at or requiring the production of evidence in hearings, investigations and other proceedings.

6. Not later than September 30 each year, issue a report to the governor and the legislature of the department's activities during the preceding fiscal year. The report may recommend statutory changes to improve the department's ability to achieve the purposes and policies established by law. The director shall provide a copy of the report to the Arizona state library, archives and public records.

7. Establish, equip and maintain a central office in Phoenix and field offices as the director deems necessary.

8. Sign all vouchers to expend money under this title, which shall be paid as other claims against this state out of the appropriations to the department.

9. Coordinate agricultural education efforts to foster an understanding of Arizona agriculture and to promote a more efficient cooperation and understanding among agricultural educators, producers, dealers, buyers, mass media and the consuming public to stimulate the production, consumption and marketing of Arizona agricultural products.

10. Employ staff subject to title 41, chapter 4, article 4 and terminate employment for cause as provided by title 41, chapter 4, article 5.

11. Conduct hearings on appeals by producers regarding the assessed actual costs of the plow up and the penalty of one hundred fifty per cent for unpaid costs pursuant to section 3-204.01. The director may adopt rules to implement this paragraph.

12. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

B. The director may:

1. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

2. Construct and operate border inspection stations or other necessary facilities in this state and cooperate by joint

agreement with an adjoining state in constructing and operating border inspection stations or other facilities within the boundaries of this state or of the adjoining state.

3. Cooperate with agencies of the United States and other states and other agencies of this state and enter into agreements in developing and administering state and federal agricultural programs regarding the use of department officers, inspectors or other resources in this state, in other states or in other countries.

4. Cooperate with the office of tourism in distributing Arizona tourist information.

5. Enter into compliance agreements with any person, state or regulatory agency. For the purposes of this paragraph, "compliance agreement" means any written agreement or permit between a person and the department for the purpose of enforcing the department's requirements.

6. Abate, suppress, control, regulate, seize, quarantine or destroy any agricultural product or foodstuff that is adulterated or contaminated as the result of an accident at a commercial nuclear generating station as defined in section 26-301, paragraph 1. A person owning an agricultural product or foodstuff that has been subject to this paragraph may request a hearing pursuant to title 41, chapter 6, article 10.

7. Engage in joint venture activities with businesses and commodity groups that are specifically designed to further the mission of the department, that comply with the constitution and laws of the United States and that do not compete with private enterprise.

8. Sell, exchange or otherwise dispose of personal property labeled with the "Arizona grown" trademark. Revenues received pursuant to this paragraph shall be credited to the commodity promotion fund established by section 3-109.02.

3-147. Rules; advisory committee

A. The director shall adopt reasonable rules for certification of laboratories that perform agricultural laboratory testing. Rules shall be prescribed only insofar as they affect the precision and accuracy of laboratory results. The rules shall include:

1. Acceptable methods of sampling, analyzing and testing including the routine examination of certified laboratories for accuracy of analysis.

2. Acceptable standards of sanitary and safety conditions within the laboratory and its surroundings.

3. Equipment essential to the proper operation of a laboratory.

4. The construction and operation of the laboratory, including plumbing, heating, lighting, ventilation, electrical services and similar conditions.

B. If before adopting rules pursuant to this section the director determines that it is necessary or desirable, the director may appoint an advisory committee pursuant to section 3-106.

3-143. Assistant director; powers and duties

A. The assistant director for the state agricultural laboratory is responsible for the administration, operation and control of the state agricultural laboratory.

B. The assistant director shall have all the following qualifications:

1. A master's degree in chemistry or its equivalent in practical experience as determined by the director.

2. Experience in agricultural laboratory testing or experience in a control laboratory of an agency that regulates feeds, fertilizers or pesticides.

3. Supervisory experience.

C. The assistant director shall enforce rules established pursuant to section 3-147:

1. For the voluntary certification of laboratories providing agricultural laboratory services to persons of this state.

2. For the mandatory certification of laboratories providing agricultural laboratory services to agencies and departments of this state or its political subdivisions, including those laboratories that are a part of a state agency or department or a political subdivision of this state.

3. Prescribing testing, documentation and quality assurance procedures and requirements.

D. The assistant director may contract with and assist other divisions and offices in the department and other departments and agencies of the state, local and federal governments in the furtherance of the purposes of this article, including contracting to provide laboratory services.

3-145. Mandatory and voluntary certification; sampling procedures; application; expiration; renewal

A. A person who establishes, conducts or maintains a laboratory that provides agricultural laboratory services to agencies or departments of this state or its political subdivisions shall apply for a certificate from the state agricultural laboratory as proof that the laboratory so certified is in compliance with rules adopted by the director for the certification of such laboratories. Any other person providing agricultural laboratory services may apply for such a certificate.

B. A person providing guaranteed laboratory analysis information to distributors of commercial feed and whole seeds for consumption by livestock shall be certified under this section.

C. An individual who collects samples for the state agricultural laboratory or for any certified agricultural laboratory shall follow the sampling procedures established by the director.

D. A certified laboratory shall report test results only to the party who provided the original sample and, on request, to the state agricultural laboratory or as required by section 3-2611.01.

E. A person who desires a certificate pursuant to this section shall file with the state agricultural laboratory an application for a certificate accompanied by the application fee.

F. The application shall be on a form prescribed by the assistant director and furnished by the state agricultural laboratory and shall contain:

1. The name and location of the laboratory.

2. The name of the person owning the laboratory and the name of the person supervising the laboratory.

3. A description of the programs, services and functions provided by the laboratory.

4. Such other information as the assistant director deems necessary to carry out the purposes of this section.

G. The assistant director shall issue a certificate to an applicant if the assistant director is satisfied that the applicant has complied with the rules prescribing standards for certified laboratories.

H. A certificate expires one year after the date of issuance and shall be renewed upon payment of the renewal application fee as prescribed in section 3-146 and continued compliance with this article and the applicable rules.

3-146. Certificate fees

The director may establish by rule and the assistant director shall collect in advance the following nonrefundable fees:

1. For an initial laboratory certificate, not more than nine hundred dollars.

2. For a renewal of a laboratory certificate, not more than nine hundred dollars.

3. For a duplicate of a certificate, two dollars.

E-2.

ARIZONA DEPARTMENT OF ADMINISTRATION
Title 2 Chapter 15 Article 3

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **November 19, 2024**

SUBJECT: **Arizona Department of Administration**
Title 2, Chapter 15, Article 3

Summary

This Five-Year Review Report (5YRR) from the Arizona Department of Administration (Department) covers nine (9) rules in Title 2, Chapter 15, Article 3 related to policies and procedures for the State Surplus Administrator to act on behalf of the state in disposing of excess and surplus materials.

The Department indicated in the previous 5YRR approved by the Council in November 2019 that no course of action was necessary for the rules. However, the Department did state they may undertake an action to strike the moot language contained in R2-15-303B to eliminate the repealed exemption by January 30, 2020. This action did not take place and the Department will include these changes in the proposed course of action in this review.

Proposed Action

The Department intends to take the following course of action by amending the following rules:

- **R2-15-303(B)** - Amend to strike the moot language to eliminate the repealed exemption (A.R.S. § 27-105(6)).
- **R2-15-303(E)** - Amend to include electronic payments

- **R2-15-307(A)(2)** - Amend to include other federal income tax exempt non-profit entities that may not qualify under federal eligibility. (Currently limited to health and educational organizations. Expand to include animal welfare organizations).
- **R2-15-310.(C)(2)** - Amend to increase the $50.00 threshold on item sale proceeds amount to $100 in sales proceeds or nothing is reimbursed.

The Department will submit the proposed rule making by December 31, 2025.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Arizona Department of Administration adopted rules to provide policies and procedures for the State Surplus Administrator to act on behalf of the state in all matters pertaining to the disposition of excess and surplus materials. The rules were originally adopted as an emergency in January 1985 and were permanently adopted a few months later in April 1985. The rules were later amended by final rulemaking in September 2004. The information provided with the previous five-year-review report approved in November 2019 indicated that the economic impact of the rules had not differed and that there has been no impact on small business or consumers in the state. The effects on state agencies have not changed and remain unchanged from the previous EIS report submitted with the 2009 amendment of the rules.

Stakeholders include the Department, state government units, the State Surplus Property Administrator, the State Treasury, and the public who wish to purchase surplus inventory.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department believes that the rules impose the least burden and costs to individuals, public and private entities regulated by these rules. The Department has made every effort to ensure the procedures outlined for individuals regulated by the rules are efficient, cost effective and necessary to achieving the regulatory objectives.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department has not received written criticism of the rules in the past five years.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Department states the rules are clear, concise, and understandable. However, the Department identifies that R2-15-303B, with respect to the citation regarding the Mines and Minerals Museum (ARS 27-105(6)), has been rendered moot by statute. The specific statute granting the exemption has been repealed. The Department may undertake a rule revision to remove this exemption however since there is no longer a Department of Mines and Minerals, the rule change would strictly be a technical correction to strike the language.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

The Department states the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Department states the rules are effective in achieving their objectives.

8. **Has the agency analyzed the current enforcement status of the rules?**

The Department states the rules are enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department states that the federal government is not involved in the disposal of state property, as disposal of state property is governed by state law. The Federal Surplus Property Program is authorized under ARS 41-2603. The Program complies with federal regulations and there are no corresponding State rules governing the Federal Surplus Property Donation program. There is no similar requirement in federal law as the federal government does not get involved with the disposal of state property.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Under ARS § 41-1001 "General permit" means a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates that the rules are not applicable to the requirements imposed by A.R.S. § 41-1037 as the rules were adopted prior to July 29, 2010.

11. **Conclusion**

This Five-Year Review Report (5YRR) from the Department covers nine (9) rules in Title 2, Chapter 15, Article 3 related to policies and procedures for the State Surplus Administrator to act on behalf of the state in disposing of excess and surplus materials.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Council staff recommends approval.

Jessica Klein, Chair
Governor's Regulatory Review Council
100 North 15th Avenue, Suite 305
Phoenix, Arizona 85007

To the Council:

In response to the request from the GRRC under A.R.S. § 41-1056(A) for the Arizona Department of Administration to prepare a five year review report, the Department has reviewed its rules contained in Title 2, Chapter 15, Article 3 of the Arizona Administrative Code, consisting of R2-15-301 and R2-15-303 through R2-15-310 to determine whether any of its rules should be amended or repealed. This five year report is meant to summarize the Department's findings and propose a course of action if applicable.

If you have any questions regarding this five year review report or you need additional information prior to the Council meeting at which the Department's report will be considered, please contact Jobalena Yates, Business Manager, at (602) 721-9640.

Sincerely,

Nola B

Nola Barnes, ADOA, GSD, Assistant Director

Five Year Review Report
Title 2, Chapter 15, Article 3
Materials Management
Management Services Division

Introduction

The Arizona Department of Administration (ADOA) adopted rules as authorized by statute to provide policies and procedures for the State Surplus Administrator to act on behalf of the state in all matters pertaining to the disposition of excess and surplus materials. The rules were originally adopted as an emergency, effective January 1, 1985. The rules were permanently adopted, effective April 3, 1985. The rules were later amended by final rulemaking, effective September 24, 2004. The rules include Chapter 15 consisting of Article 3, R2-15-301 and R2-15-303 through R2-15-310 inclusive.

ADOA conducted a five-year-review of these rules that was approved by the Governor's Regulatory Review Council (GRRC) in November, 2019. The five-year-review report approved by GRRC confirmed that Article 3 was clear, concise, effective, and conformed to authorizing statute. In addition, the ADOA or GRRC noted that no course of action was needed for the rules.

Except as otherwise noted, the information is identical, consistent, and effective for all of the rules in the Article.

1. General and specific statutes authorizing the rules:

A.R.S. §§ 41-703(3), 41-2511(A) – Provides specific authority for the rules.

2. Objective of the rules including the purpose for the existence of the rules:

ADOA believes the rules are effective in achieving their objectives.

Article 3 Materials Management
R2-15-301 and R2-15-303 through R2-15-310
Article 3 rules establish ADOA's policies and procedures for the Surplus Property Administrator to act on behalf of the state in all matters pertaining to the disposition of its excess and surplus materials.

The objective of R2-15-301 is to help state employees and the public understand the terminology that is used throughout this Article. The reason the rule is necessary is to ensure state employees and the public understand the words used in the rest of the rule.

The objective of R2-15-303 is to outline the responsibilities, the disposal methods, and how to trade-in surplus or excess material for state government units. In addition, the objective of this rule explains the sealed bidding process and online sales advertising for surplus and excess material. The reason this rule is necessary is because there should be clear guidance as to the disposition methods allowed and because ARS 41-2602 directs the Department to enact rules covering this topic.

The objective of R2-15-304 is to have each state government unit conduct an inventory and outline how to do an annual inventory report. The reason this rule is necessary is because conducting an annual inventory is part of good governance and because ARS 41-2602 directs the Department to enact rules covering this topic.

The objective of R2-15-305 shows state government units how to remove capital inventory material that has been lost, stolen or destroyed. The reason this rule is necessary is because good governance would suggest there be a mechanism and process in place to remove items from inventory which have been lost, stolen or missing and because ARS 41-2602 directs the Department to enact rules covering this topic.

The objective of R2-15-306 is to direct the State Surplus Property Administrator to file a state plan of operations with the General Services Administration, provides authority for the State Surplus Property Administrator to act on behalf of the state regarding federal surplus material and requires the State Surplus Property Administrator to distribute federal surplus material to eligible entities. The reason for this rule is good governance would suggest that the methods by which the State acquires or disposes of excess and surplus materials should be formalized and available to the agencies or the public and because ARS 41-2602 directs the Department to enact rules covering this topic.

The objective of R2-15-307 is to explain the eligibility for the acquisition of federal or state surplus material for state agencies and disallows state government units from obtaining excess or surplus materials without the approval of the State Surplus Property Administrator. The reason for this rule is because good governance would suggest there should be guidance regarding eligibility for the surplus program and a control element in place to track the acquisition of property from the Federal Government and because ARS 41-2604 directs the Department to enact rules covering this topic.

The objective of R2-15-308 is to allow the State Surplus Property Administrator to assess fees and charges to state government units for the transfer or sale of surplus state material. The reason for this rule is to clearly outline the mechanism by which the program is funded and because ARS 41-2607 directs the Department to enact rules covering this topic.

The objective of R2-15-309 is to outline the circumstances where the State Surplus Property Administrator may authorize the State Treasury to place monies into a government-insured depository institution. This reason for this rule is to provide guidance as to where monies received by the program are deposited.

R2-15-310 prescribes the authority to reimburse agencies on the sale or disposal of state surplus or excess materials and provides thresholds for that reimbursement to state government units. The reason for this rule is to provide guidance to the program on how and to whom proceeds are reimbursed and because ARS 41-2607 directs the Department to enact rules covering this topic.

3. Effectiveness of the rules in achieving the objective, including a summary of any available data supporting the conclusion reached:

All of the rules effectively achieve their objectives.

4. Consistency of the rules with state and federal statutes and rules, and a listing of the statutes or rules used in determining the consistency:

The Department's analysis of these rules shows that the rules do not exceed the authority provided by statute. The rules are consistent with A.R.S. §§ 41-703(3) and 41-2511.

5. Agency enforcement policy, including whether the rules are currently being enforced and, if so, whether there are any problems with enforcement:

The Department enforces 2 A.A.C. 15, Article 3.

6. Clarity, conciseness, and understandability of the rules:

All of the rules are generally clear, concise, and understandable. However, R2-15-303B with respect to the citation regarding the Mines and Minerals Museum (ARS 27-105(6)) has been rendered moot by statute. The specific statute granting the exemption has been repealed. The Department may undertake a rule revision to remove this exemption however since there is no longer a Department of Mines and Minerals, the rule change would strictly be a technical correction to strike the language.

7. Summary of the written criticisms of the rules received by the agency within the five years immediately preceding the five-year review report, including letters, memoranda, reports, written analysis submitted to agency questioning whether the rules are based on valid scientific

or reliable principles or methods, and written allegations made in litigation or administrative proceedings in which the agency was a party that the rules are discriminatory, unfair, unclear, inconsistent with statute, or beyond the authority of the agency to enact, and the result of the litigation or administrative proceedings:

The Department has not received written criticisms regarding any of the rules during the last five years.

8. A comparison of the current economic, small business, and consumer impact of the rules with economic, small business, and consumer impact statement prepared on the last rulemaking of the rule or, if no economic, small business, and consumer impact statement was prepared on the last rulemaking of the rule, an assessment of the actual economic, small business, and consumer impact of the rules:

The information provided with the previous five-year-review report approved by Council in November 2019 indicated that the economic impact of the rules had not differed and that there has been no impact on small business or consumers in the state. The effects on state agencies have not changed and remain unchanged from the previous EIS report submitted with the 2009 amendment of the rules.

9. Any analysis submitted to the agency by another person regarding the rule's impact on this state's business competitiveness as compared to the competitiveness of businesses in other states:

None

10. If applicable, how the agency completed the course of action indicated in the agency's previous five-year review report:

The Department indicated in the previous five-year review report that no course of action was necessary for the rules. However, the Department did state they may undertake an action to strike the moot language contained in R2-15-303B to eliminate the repealed exemption by 1/30/20. This action did not take place and the Department will include these changes in the proposed course of action in this review.

11. A determination that the probable benefits of the rules outweigh within this state the probable costs of the rules, and the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective:

The Department believes that the rules impose the least burden and costs to individuals, public and private entities regulated by these rules. The Department has made every effort to

ensure the procedures outlined for individuals regulated by the rules are efficient, cost effective and necessary to achieving the regulatory objectives.

12. A determination that the rules are not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law, indicating whether:

a. There is a similar regulatory framework governing the same subject matter under federal law,

The federal government does not get involved in the disposal of state property, as disposal of state property is governed by state law. The Federal Surplus Property Program is authorized under ARS 41-2603. The Program complies with federal regulations and there are no corresponding State rules governing the Federal Surplus Property Donation program.
.

b. The rules are more restrictive than a similar requirement in federal law, and

There is no similar requirement in federal law as the federal government does not get involved with the disposal of state property.

c. There is statutory authority for more restrictive requirements than those in federal law.

Federal law does not apply to the disposal of state property.

13. For a rule adopted after July 29, 2010, that requires issuance of a regulatory permit, license or agency authorization, whether the rule complies with A.R.S. § 41-1037, indicating whether:

a. The rule requires issuance of a regulatory permit, license, or agency authorization;

The Department indicates that the rules are not applicable to the requirements imposed by A.R.S. § 41-1037 as the rules were adopted prior to July 29, 2010.

b. The permit, license, or agency authorization falls within the definition of "general permit" in A.R.S. § 41-1001, if a permit, license or agency authorization is issued; or

Not applicable as the answer was provided in 13(a).

c. An exception applies under A.R.S. § 41-1037, if a general permit is not issued.

Not applicable as the answer was provided in 13(a).

14. Course of action the agency proposes to take regarding each rule, including the month and year in which the agency anticipates submitting the rules to the Council if the agency determines it is necessary to amend or repeal an existing rule, or to make a new rule. If no issues are identified for a rule in the report, an agency may indicate that no action is necessary for the rule.

The Department intends to take the following course of action:

R2-15-303(B) - strike the moot language to eliminate the repealed exemption (A.R.S. § 27-105(6)).
R2-15-303(E) - to include electronic payments
R2-15-307(A)(2) - To include other federal income tax exempt non-profit entities that may not qualify under federal eligibility. (Currently limited to health and educational organizations. Expand to include animal welfare organizations).
R2-15-310.(C)(2). - Increase the $50.00 threshold on item sale proceeds amount to $100 in sales proceeds or nothing is reimbursed.

The Department will submit the proposed rule making by 12/31/25.

Electronic Record and Signature Disclosure

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, State of Arizona Department of Administration - General Services Division (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to this Electronic Record and Signature Disclosure (ERSD), please confirm your agreement by selecting the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a $0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

How to contact State of Arizona Department of Administration - General Services Division:

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:
To contact us by email send messages to: marjorie.mckenna@azdoa.gov

To advise State of Arizona Department of Administration - General Services Division of your new email address

To let us know of a change in your email address where we should send notices and disclosures electronically to you, you must send an email message to us at marjorie.mckenna@azdoa.gov and in the body of such request you must state: your previous email address, your new email address. We do not require any other information from you to change your email address.

If you created a DocuSign account, you may update it with your new email address through your account preferences.

To request paper copies from State of Arizona Department of Administration - General Services Division

To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an email to marjorie.mckenna@azdoa.gov and in the body of such request you must state your email address, full name, mailing address, and telephone number. We will bill you for any fees at that time, if any.

To withdraw your consent with State of Arizona Department of Administration - General Services Division

To inform us that you no longer wish to receive future notices and disclosures in electronic format you may:

i. decline to sign a document from within your signing session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;

ii. send us an email to marjorie.mckenna@azdoa.gov and in the body of such request you must state your email, full name, mailing address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

Required hardware and software

The minimum system requirements for using the DocuSign system may change over time. The current system requirements are found here: https://support.docusign.com/guides/signer-guide-signing-system-requirements.

Acknowledging your access and consent to receive and sign documents electronically

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please confirm that you have read this ERSD, and (i) that you are able to print on paper or electronically save this ERSD for your future reference and access; or (ii) that you are able to email this ERSD to an email address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format as described herein, then select the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

By selecting the check-box next to 'I agree to use electronic records and signatures', you confirm that:

- You can access and read this Electronic Record and Signature Disclosure; and
- You can print on paper this Electronic Record and Signature Disclosure, or save or send this Electronic Record and Disclosure to a location where you can print it, for future reference and access; and
- Until or unless you notify State of Arizona Department of Administration - General Services Division as described above, you consent to receive exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you by State of Arizona Department of Administration - General Services Division during the course of your relationship with State of Arizona Department of Administration - General Services Division.

E-3.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 19

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **November 19, 2024**

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 19

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) covers thirty-four (34) rules in Title 9, Chapter 19 related to Vital Records and Statistics.

In the 2019 five-year review report the Department stated a plan to revise the rules to address identified issues. The Department completed this course of action through expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020.

Proposed Action

The Department plans to amend the rules in 9 A.A.C. 19 to address issues identified in this 5YRR by December 2025. The Department believes this would be sufficient time to gather stakeholder input during the rulemaking process.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Department states that the expedited 2019 rulemaking was intended to improve the rules related to vital records and statistics to reduce a regulatory burden while achieving the same regulatory objective, comply with statutory requirements, and help eliminate confusion on the part of those affected by the rules. The Department believes that the rulemaking achieved these objectives. In addition, the Department estimates that the changes made in 2020 did not increase a cost or burden on those affected by the rules. Rather, the Department believes that those affected by the rules have received a significant benefit for having updated rules.

Stakeholders include the Department, health care providers, funeral establishments, state offices, county partners, Arizona residents and their families, and the general public.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

According to the Department, the purpose of these rules is to establish clear requirements and processes regarding vital records including birth and death certificates. These rules are important to public health because birth and death certificates are essential to each person for identification purposes. In addition, they provide critical data for population statistics, guide resource allocation, enable disease tracking, and help identify health disparities. Thus, the probable benefits of the rules outweigh the probable costs of the rules. Since the requirements are consistent with national standards, the requirements are also the least burdensome method to achieve this purpose.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department received written criticism regarding the rules addressed by this 5YRR during an unrelated rulemaking. The comment concerns R9-19-101 and R9-19-207, and the Department indicated that the comment fell outside the scope of the current rulemaking for which the comment was made.

The comment is included as a separate item in the attached materials, and it can be found on the attached 5YRR Preamble under Section 7 on Page 5.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Department states the rules are clear, concise, and understandable with the following exceptions:

- **R9-19-101**
  - The rule would be clearer if the definition of "WIC" included what the acronym stands for.
- **R9-19-101**

- The rule is clear, concise, and understandable but could be improved in the definition of "tribal community" by removing the apostrophe in "affair's" in the name of the Federal Bureau of Indian Affairs Office of Federal Acknowledgement.

- **R9-19-206**
  - Subsection (B)(2) would be clearer if the rule was amended to say adoptive or birth mother. When the rule was originally written, it was the assumption that children would have an adoptive mother, however, it is now common for the birth or natural mother to still be the mother on record. If an adoptive father in AZ moved the child to the US, the way the current rule is written, the Department cannot require anything of the birth/natural mother for the registration since they are not the adoptive mother. A change as such would provide clarification of what is needed in the registration of a record.
- **R9-19-206**
  - The rule would be clearer if there was a new subsection created for establishing a registered record of a foreign birth for an adopted individual who is a foreign-born refugee child in custody of the Department of Child Safety.
- **R9-19-207**
  - Subsection (B)(3)(a) would be clearer if the rule was amended to say "documentation" rather than "document" since there is more than one document required. In addition, subsections (B)(3)(b) and (C)(3)(b) can be simplified by removing the language regarding the specific information in R9-19-201(A)(3) or (4) to be corrected because R9-19-207(B)(3)(a) does not allow the hospitals to submit for a correction or amendment in R9-19-208(C) and (D) for any items on the birth record other than what is covered in R9-19-201(A)(3) or (4).
- **R9-19-317**
  - The rule would be clearer if the typographical error in subsection (B)(2) were corrected by removing the word "of" where it is not necessary.

6. **<u>Has the agency analyzed the rules' consistency with other rules and statutes?</u>**

The Department states the rules are consistent with other rules and statutes with the following exceptions:

- **R9-19-201**
  - The rule would be more consistent with A.R.S. § 36-302(B)(1) if the rules were amended to align with the recommendations of the federal agency responsible for national vital statistics as guidelines subject to modification by the state registrar.
- **R9-19-211**
  - The rule would be more consistent with A.R.S. § 41-1610.03 if the rule allowed for a nonoperating identification license issued according to A.R.S. § 41-1610.03 to be accepted for an incarcerated person.
- **R9-19-303**
  - The rule is not consistent with other rules because the cross-reference in subsection (A)(2) should be updated to R9-19-301.
- **Multiple Rules**

- The Department is revising the rules in 9 A.A.C. 19 to comply with new statutory requirements including;
  - **Laws 2021, Ch. 42**, which amends A.R.S § 41-5001 and mandates the acceptance of consular identification cards with biometric verification by the State and its subdivisions;
  - **Laws 2021, Ch. 195**, which amends A.R.S. § 8-528 related to safe havens for newborns and extends the safe haven protocol age to 30 days;
  - **Laws 2021, Ch. 374**, related to certificates of birth registration, amends A.R.S. § 36-324 and allows for eligible minors aged 16 and above, without a residence address or in the custody of the Department of Child Safety to obtain a non-operating identification license or a certified copy of their birth certificate without parental signatures; and
  - **Laws 2021, Ch. 384**, which amends A.R.S. § 36-340 for sealed birth certificates due to adoption.
- Also, in the rulemaking, the Department is making amendments to fees and additional corrections or corresponding changes throughout the Chapter.
- The Department has filed the Notice of Propose Rulemaking for this current rulemaking and expects the new changes to be in effect by the end of 2024.

7. **<u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>**

The Department states the rules are effective in achieving their objectives with the following exceptions:

- **R9-19-208**
  - The department states that the rule would be more effective if the marital status was referenced as a category. According to A.R.S. § 36-302, if the mother is married, the husband is determined to be the father. However, the Department has had many situations in which the mother marked 'no' on the birth worksheet for being married. In order to correct/change the record, the Department requires a court order to amend a birth record. However, courts will not issue an order regarding this as the statute has determined that the father should be added. This change in the rule would allow for additional data to be collected. Also, the rule would be more effective if the mother's, father's, or registrant's suffix was an option to amend on the individual's registered birth record. In addition, subsection (M) would be more effective if the rule allowed for a guardian to submit the amendment for an adoption.
- **R9-19-212 and 316**
  - The department states that the rule would be more effective in subsection (B), of both Sections, if the rule was amended to require a valid, government-issued form of photo identification or notarized signature.
- **R9-19-310**
  - The rule would be more effective if it was clarified in subsection (C)(2) that the 10-day notification to the informant regarding an amendment is 10 calendar days. Also, the rule would be more effective if the rule required that the informant respond to the notification within 10 days of receipt or date of notification. A change in the

rule as such would provide clear guidance for the public and employees of vital records.

- **R9-19-315**
  - The department states that the rule would be more effective if it was clarified in subsection (A)(1)(e)(ii) was amended for the date of birth to be included if it is known because sometimes applicants requesting a certified copy of a certificate of death registration do not always know the date of birth of the deceased individual.

8. **<u>Has the agency analyzed the current enforcement status of the rules?</u>**

The Department states the rules are enforced as written.

9. **<u>Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?</u>**

The Department states that, while it shares certain information collected under these rules with the National Center for Health Statistics, federal laws are not applicable to the rules in 9 A.A.C. 19.

10. **<u>For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?</u>**

Under A.R.S. § 41-1001 "General permit" means a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The rules do not require the issuance of a regulatory permit, license, or agency authorization.

11. **<u>Conclusion</u>**

This 5YRR from the Department covers thirty-four (34) rules in Title 9, Chapter 19 related to Vital Records and Statistics.

The Department plans to amend the rules in 9 A.A.C. 19 to address issues identified in this five-year-review report by December 2025. The Department believes this would be sufficient time to gather stakeholder input during the rulemaking process.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Council staff recommends approval.

Jessica Klein, Esq., Chair
Governor's Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 19, Five-Year-Review Report for Vital Records and Statistics

Dear Ms. Klein:

Please find enclosed the Five-Year Review Report (Report) from the Arizona Department of Health Services (Department) for 9 A.A.C. 19, Vital Records and Statistics, which is due on August 30, 2024.

The Department reviewed the rules in 9 A.A.C. 19, with the intention that the rules do not expire pursuant to A.R.S. § 41-1056(J).

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this report, please contact me at (602) 542-1020.

Sincerely,

Stacie Gravito
Director's Designee

Enclosures

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 19. Department of Health Services -

Vital Records and Statistics

Due Date: August 30, 2024

Submitted Date: August 20, 2024

1. Authorization of the rule by existing statutes

General Statutory Authority: A.R.S. §§ 36-104(3) and 36-136(G)

Specific Statutory Authority: A.R.S. Title 36, Chapter 3, Articles 1 through 3, and A.R.S. §§ 36-132(A)(3) and 36-136(I)(3)

In addition, the following rules have additional specific statutory authority:

Rule	Statutory Authority
R9-19-105	A.R.S. § 36-341
R9-19-202 through R9-19-205 and R9-19-303 through R9-19-306	A.R.S. § 36-343
R9-19-210, R9-19-211, R9-19-212, R9-19-314, R9-19-315, R9-19-316	A.R.S. § 36-342

2. The objective of each rule:

The purpose of the rules is to define and prescribe reasonably necessary procedures for the registration of vital events and the issuance, use, and accessibility of the different types of birth and death certificates.

Rule	Objective
R9-19-101	To define terms used in the Chapter so that a reader can consistently interpret requirements.
R9-19-102	To specify requirements related to evidentiary documents submitted to support the creation, correction, or amendment of a vital record for an individual or to request a copy of a certificate issued under this Chapter.
R9-19-103	To establish the process by which information, documents, and, if applicable, fees are reviewed.
R9-19-104	To specify the duties of a local registrar.
R9-19-105	To specify the fees for a noncertified copy of a certificate, certified copy of a certificate, search to verify birth or death data, request to establish a delayed record, or request to amend or correct information. To specify when fees are not charged. To specify surcharges to be paid to the Department.
R9-19-201	To specify the information submitted for an individual's birth record.
R9-19-202	To describe the process by which a hospital requests the registration of the birth of an individual born in a hospital.
R9-19-203	To describe the process by which a physician, registered nurse practitioner, nurse midwife, or midwife who attended an individual's birth may request the registration of the birth of the individual.

R9-19-204	To describe the process by which a person other than a hospital or health care provider may request the registration of the birth of an individual not born in the hospital whose birth was either not attended by a physician, registered nurse practitioner, nurse midwife, or midwife, or was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is not willing or not able to comply with requirements in R9-19-203.
R9-19-205	To describe the process by which a registered birth record for a foundling is established.
R9-19-206	To describe the process by which a registered record of foreign birth is established for an adopted individual.
R9-19-207	To establish the process by which a person may request the correction of an individual's registered birth record.
R9-19-208	To establish the process by which a person may request an amendment to an individual's registered birth record.
R9-19-209	To specify the circumstances in which the State Registrar may cancel an individual's birth record, the requirement for providing written notice of the intent to cancel, and the right to appeal.
R9-19-210	To specify the content of a certified copy of a certificate of birth registration and the persons eligible to receive a certified copy of an individual's certificate of birth registration.
R9-19-211	To describe the process by which an eligible person may request a certified copy of an individual's certificate of birth registration.
R9-19-212	To specify the content of a noncertified copy of a certificate of birth registration. To describe the process by which specific persons may request a noncertified copy of an individual's certificate of birth registration.
R9-19-301	To specify the content of a form required by A.R.S. § 36-326(B) to accompany a deceased individual's human remains or the human remains from a fetal death moved from a hospital, nursing care institution, or hospice inpatient facility. To require that an individual who removes human remains from a hospital, nursing care institution, or hospice inpatient facility sign and date the applicable human remains release form and submit a copy to the local registrar or deputy local registrar of the registration district where the death or fetal death occurred within 24 hours after removing the human remains from a hospital, nursing care institution, or hospice inpatient facility.
R9-19-302	To specify the information submitted for a deceased individual's death record.
R9-19-303	To describe the process by which a responsible person or funeral director who is responsible for the final disposition of a deceased individual's human remains may request the registration of the deceased individual's death. To describe the process for medical certification of death. To specify factors considered by the State Registrar or the local registrar of the county where a death occurred before registering the death. To describe the processes for requesting the registration of a delayed death record for a deceased individual and for requesting registration of the individual's presumptive death.
R9-19-304	To describe the process by which a deceased individual's registration of death is requested when a medical examiner is notified according to A.R.S. § 11-593(B).
R9-19-305	To describe the process by which a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife may request the registration of a fetal death. To specify the roles in the process of a responsible person or funeral director who is responsible for the final disposition of the human remains and the State Registrar or a local registrar or deputy local registrar of the registration district where a fetal death occurred.
R9-19-306	To describe the process by which the registration of a fetal death is requested when a medical examiner is notified according to A.R.S. § 11-593(B).
R9-19-307	To specify when the State Registrar provides the parent or parents with a certificate of birth resulting in stillbirth.
R9-19-308	To describe the process and specify requirements for obtaining a disposition-transit permit.
R9-19-309	To establish the process by which a person may request the correction of information in a registered death record or registered fetal death record.

R9-19-310	To establish the process by which a person may request the amendment of information in a registered death record or registered fetal death record.
R9-19-311	To specify requirements related to transporting a deceased individual's human remains into Arizona for final disposition.
R9-19-312	To specify requirements related to obtaining a disinterment-reinterment permit.
R9-19-313	To specify the duties of a person in charge of a place of final disposition.
R9-19-314	To specify the content of a certified copy of a certificate of death registration and the persons eligible to receive a certified copy of a deceased individual's certificate of death registration.
R9-19-315	To describe the process by which an eligible person may request a certified copy of a deceased individual's certificate of death registration.
R9-19-316	To specify the content of a noncertified copy of a certificate of death registration. To describe the process by which specific persons may request a noncertified copy of a deceased individual's certificate of death registration.
R9-19-317	To specify the content of and describe the process for obtaining a certificate of fetal death registration or a certificate of birth resulting in stillbirth.

3. **Are the rules effective in achieving their objectives?** **Yes ___No _X_**

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

Rule	Explanation
R9-19-208	The rule would be more effective if the marital status was referenced as a category. According to A.R.S. § 36-302, if the mother is married, the husband is determined to be the father. However, the Department has had many situations in which the mother marked 'no' on the birth worksheet for being married. In order to correct/change the record, the Department requires a court order to amend a birth record. However, courts will not issue an order regarding this as the statute has determined that the father should be added. This change in the rule would allow for additional data to be collected. Also, the rule would be more effective if the mother's, father's, or registrant's suffix was an option to amend on the individual's registered birth record. In addition, subsection (M) would be more effective if the rule allowed for a guardian to submit the amendment for an adoption.
R9-19-212 and R9-19-316	The rule would be more effective in subsection (B), of both Sections, if the rule was amended to require a valid, government-issued form of photo identification or notarized signature.
R9-19-310	The rule would be more effective if it was clarified in subsection (C)(2) that the 10-day notification to the informant regarding an amendment is 10 calendar days. Also, the rule would be more effective if the rule required that the informant respond to the notification within 10 days of receipt or date of notification. A change in the rule as such would provide clear guidance for the public and employees of vital records.
R9-19-315	The rule would be more effective if it was clarified in subsection (A)(1)(e)(ii) was amended for the date of birth to be included if it is known because sometimes applicants requesting a certified copy of a certificate of death registration do not always know the date of birth of the deceased individual.

4. **Are the rules consistent with other rules and statutes?** **Yes ___ No X __**

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

Rule	Explanation
R9-19-201	The rule would be more consistent with A.R.S. § 36-302(B)(1) if the rules were amended to align with the recommendations of the federal agency responsible for national vital statistics as guidelines subject to modification by the state registrar.

R9-19-211	The rule would be more consistent with A.R.S. § 41-1610.03 if the rule allowed for a nonoperating identification license issued according to A.R.S. § 41-1610.03 to be accepted for an incarcerated person.
R9-19-303	The rule is not consistent with other rules because the cross-reference in subsection (A)(2) should be updated to R9-19-301.
Multiple	The Department is revising the rules in 9 A.A.C. 19 to comply with new statutory requirements including; • Laws 2021, Ch. 42, which amends A.R.S § 41-5001 and mandates the acceptance of consular identification cards with biometric verification by the State and its subdivisions; • Laws 2021, Ch. 195, which amends A.R.S. § 8-528 related to safe havens for newborns and extends the safe haven protocol age to 30 days; • Laws 2021, Ch. 374, related to certificates of birth registration, amends A.R.S. § 36-324 and allows for eligible minors aged 16 and above, without a residence address or in the custody of the Department of Child Safety to obtain a non-operating identification license or a certified copy of their birth certificate without parental signatures; and • Laws 2021, Ch. 384, which amends A.R.S. § 36-340 for sealed birth certificates due to adoption. Also, in the rulemaking, the Department is making amendments to fees and additional corrections or corresponding changes throughout the Chapter. The Department has filed the Notice of Propose Rulemaking for this current rulemaking and expects the new changes to be in effect by the end of 2024.

5. Are the rules enforced as written? **Yes _X__ No __**

If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency's proposal for resolving the issue.

Rule	Explanation

6. Are the rules clear, concise, and understandable? **Yes ___ No _X_**

If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.

Rule	Explanation
R9-19-101	The rule would be clearer if the definition of "WIC" included what the acronym stands for.
R9-19-101	The rule is clear, concise, and understandable but could be improved in the definition of "tribal community" by removing the apostrophe in "affair's" in the name of the Federal Bureau of Indian Affairs Office of Federal Acknowledgement.
R9-19-206	Subsection (B)(2) would be clearer if the rule was amended to say adoptive or birth mother. When the rule was originally written, it was the assumption that children would have an adoptive mother, however, it is now common for the birth or natural mother to still be the mother on record. If an adoptive father in AZ moved the child to the US, the way the current rule is written, the Department cannot require anything of the birth/natural mother for the registration since they are not the adoptive mother. A change as such would provide clarification of what is needed in the registration of a record.
R9-19-206	The rule would be clearer if there was a new subsection created for establishing a registered record of a foreign birth for an adopted individual who is a foreign-born refugee child in custody of the Department of Child Safety.

R9-19-207	Subsection (B)(3)(a) would be clearer if the rule was amended to say "documentation" rather than "document" since there is more than one document required. In addition, subsections (B)(3)(b) and (C)(3)(b) can be simplified by removing the language regarding the specific information in R9-19-201(A)(3) or (4) to be corrected because R9-19-207(B)(3)(a) does not allow the hospitals to submit for a correction or amendment in R9-19-208(C) and (D) for any items on the birth record other than what is covered in R9-19-201(A)(3) or (4).
R9-19-317	The rule would be clearer if the typographical error in subsection (B)(2) were corrected by removing the word "of" where it is not necessary.

7. Has the agency received written criticisms of the rules within the last five years? **Yes _X_ No __**

If yes, please fill out the table below:

Rule	Explanation	Department Response
R9-19-101 & R9-19-207	The Department is currently undertaking a rulemaking to implement new legislation and increase program fees. During this rulemaking, the Department received a few comments from Maricopa County related to other rule amendments that would be outside of the scope of that rulemaking. Below are the comments received. 1. R9-19-101 (14) definitions. 14. "Government-issued form of photo identification" means: ii. U.S. Passport Card, v. U.S. Military Identification Card; These two identification cards do not contain a signature on the ID card thus conflicting with R9-19-211, R9-19-212, R9-19-315, R9-19-316. R9-19-317, where it states, "Accompanied by a copy of a valid, government-issued form of photo identification for the person contains the name and signature of the person." While Maricopa County does believe that these two forms ID should be acceptable, they do not currently meet the ADHS requirements in other areas of this chapter. Staff are frequently challenged by holders of these two forms of ID. Might additional consideration be given to these two ID's? Modifications to R9-19-101 definitions. R9-19-207 B(3)(b) Allows for correcting a birth record with either the worksheet or a part of the individual's or mother's individual medical record while R9-19-208 C allows for amending the birth with only a part of the individual's or mother's individual medical record. Both referred to R9-19-201 A (3) or (4). Need further clarification to determine hospital correction vs hospital amendment. Greater distinction and clarification regarding the determination of a hospital correction v. a hospital amendment. Maricopa County proposes that a Certificate of Live Birth Worksheet be considered a correction, and that hospital amendments are instances when the hospital must supplement the worksheet with hospital medical records. (currently, hospitals may submit part of the individual's or mother's individual medical record containing specific information on R9-	The Department thanked Maricopa County for their comments and let them know that these issues would be addressed in the five-year review report and considered in the next rulemaking. After reviewing the comments from Maricopa County, the Department has clarified in policy that a U.S. passport card and a U.S. military ID may be accepted in-person, but a copy sent in the mail would not be acceptable. Furthermore, the Department does not plan to make further amendments related to providing additional clarification to determine hospital correction vs hospital amendment, since these are defined terms pursuant to A.R.S. § 36-301. In regards to a government-issued form of photo identification, the date of birth is not listed on that form of ID. Lastly, the Department plans to amend some of the language in R9-19-207(C)(3)(b) to be clearer.

	19-201 A(3) or (4). Maricopa County appreciates the need to do this but believes that Vital Records rules regarding this matter need greater clarification). There is an opportunity to clean up/clarify the following areas: R9-19-212 C (1)(f)(ii) requiring the date of birth on the government -issued form of photo identification which is not consistent with R9-19-211A(1)(h)(ii), B(3)(ii), and other sections on R9-19-212, R9-19-315, R9-19-316. R9-19-317 where it states "Accompanied by a copy of a valid, government-issued form of photo identification for the person contains the name and signature of the person." Suggest removing R9-19-207 B(3)(b) and allow for correcting hospital errors with birth worksheets only (previously explained above).	

8. **Economic, small business, and consumer impact comparison:**

Arizona Revised Statutes (A.R.S.) § 36-136(I)(3) requires the Arizona Department of Health Services (Department) to define and prescribe reasonably necessary procedures for the use and accessibility of the different types of birth and death certificates and the completion, change, and amendment of vital records. A.R.S. Title 9, Chapter 3, specifies requirements for vital records and public health statistics, including birth and death registration and certificates. The Department has adopted rules for vital records and statistics in Arizona Administrative Code (A.A.C.) Title 9, Chapter 19. In general, stakeholders for the rulemaking included the Department, health care providers, funeral establishments, state offices, county partners, Arizona residents and their families, and the general public. In this economic, small business, and consumer impact comparison, the annual cost and revenue changes are designated as minimal when $1,000 or less, moderate when between $1,000 and $10,000, and substantial when $10,000 or greater in additional costs or revenues. Costs are listed as significant when meaningful or important, but not readily subject to quantification.

In 2023, there were 77,776 births registered and 68,635 deaths registered. In 2022, there were 78,335 births registered and 73,861 deaths registered. In 2021, there were 77,857 births registered and 81,482 deaths registered. In 2020, there were 76,781 births registered and 75,700 deaths registered. A summary of certificates issues and corrections/amendment made in 2023 is shown below:

Description of Services Provided in FY 2024	Counties	State
Certificates of Birth Registration – Non-certified	196,216	51,014
Certificates of Death Registration – Non-certified	438,767	12,821
Certificates of Fetal Death Registration – Non-certified	348	13
Certificates of Birth Registration - Certified	198,993	51804
Certificates of Death Registration - Certified	445,846	13,081
Certificates of Fetal Death Registration - Certified	357	15
Certificates of Birth Resulting in Stillbirth - Certified	357	15
Certificates of No Record	N/A	379
Amendment/Correction of a Birth Record	10,025	2,513
Amendment/Correction of a Death Record	741	103
Amendment/Correction of a Fetal Death Record	6	0

From funds collected through surcharges from the counties and from certificates issued by the Department in FY 2023, the Department, in compliance with A.R.S. § 341, deposited approximately $2,661,450 into the vital records electronic systems fund, established by A.R.S. § 36-341.01, and approximately $445,660 into the general fund. The Department was appropriated $3,637,400 from the vital records electronic systems fund in FY 2023 and $3,630,200 in FY 2024. Expenses for the Bureau of Vital Records from the vital records electronic systems fund were $3,500,157.86 in FY 2023 and, as of July 8, 2019, $2,541,529.44 in FY 2024.

The rules were last amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020. In the 2020 expedited rulemaking, the Department amended 14 Sections, including R9-19-101, R9-19-104, R9-19-201, R9-19-202, R9-19-204, R9-19-208, R9-19-210, R9-19-301, R9-19-304, R9-19-305, R9-19-306, R9-19-309, R9-19-314, and R9-19-315. The rulemaking amended the rules to be consistent with A.R.S. § 36-324(A), as amended by Laws 2019, Ch. 172, which requires the rules to include the designee of a funeral director as being eligible to request or receive a certified copy of a deceased individual's certificate of death registration. Other changes to the rules were revisions made to add clarity and address issues identified in the 2019 five-year review report approved by the Governor's Regulatory Review Council. These amendments included correcting cross-references and grammatical errors, amending the rules to align with new statutory requirements, and updating language to be more clear, concise, and understandable. In R9-19-208, the rule was amended to allow the last name of an individual's father to be changed without requiring the father to obtain a court order. In R9-19-301, the rule was amended to require the e-mail address of the health care provider expected to sign the medical certification of death on the human remains release form to facilitate communication between a funeral establishment and the medical certifier. R9-19-311 was amended to be consistent with A.R.S. § 36-326(J) which requires the issuance of an Arizona disposition-transit permit upon receipt of a disposition-transit permit from another state. A.R.S. § 36-326(G) allows a disposition-transit permit to be issued if a funeral establishment or other responsible person provides information "pursuant to this [C]hapter and rules adopted pursuant to this [C]hapter," which would be included in a registered death certificate from another state. Furthermore, in R9-19-314(B)(5) was amended to include powers of attorney for a person eligible according to subsection (B)(2), (3), or (4).

The changes in the 2019 expedited rulemaking were intended to improve the rules related to vital records and statistics to reduce a regulatory burden while achieving the same regulatory objective, comply with statutory requirements, and help eliminate confusion on the part of those affected by the rules. The Department believes that the rulemaking achieved these objectives. In addition, the Department estimates that the changes made in 2020 did not increase a cost or burden on those affected by the rules. Rather the Department believes that those affected by the rules have received a significant benefit for having updated rules.

9. Has the agency received any business competitiveness analyses of the rules? **Yes ___ No _X_**

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

Please state what the previous course of action was and if the agency did not complete the action, please explain why not.

In the 2019 five-year review report the Department stated a plan to revise the rules to address identified issues. The Department completed this course of action through expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

The purpose of these rules is to establish clear requirements and processes regarding vital records including birth and death certificates. These rules are important to public health because birth and death certificates are essential to each person for identification purposes. In addition, they provide critical data for population statistics, guide resource allocation, enable disease tracking, and help identify health disparities. Thus, the probable benefits of the rules outweigh the probable costs of the rules. Since the requirements are consistent with national standards, the requirements are also the least burdensome method to achieve this purpose.

12. Are the rules more stringent than corresponding federal laws? **Yes ___ No _X_**

Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?

Although the Department shares certain information collected under these rules with the National Center for Health Statistics, federal laws are not applicable to the rules in 9 A.A.C. 19.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The rules do not require the issuance of a regulatory permit, license, or agency authorization.

14. Proposed course of action

If possible, please identify a month and year by which the agency plans to complete the course of action.

The Department plans to amend the rules in 9 A.A.C. 19 to address issues identified in this five-year-review report by December 2025. The Department believes this would be sufficient time to gather stakeholder input during the rulemaking process.

36-104. Powers and duties

This section is not to be construed as a statement of the department's organization. This section is intended to be a statement of powers and duties in addition to the powers and duties granted by section 36-103. The director shall:

1. Administer the following services:

(a) Administrative services, which shall include at a minimum the functions of accounting, personnel, standards certification, electronic data processing, vital statistics and the development, operation and maintenance of buildings and grounds used by the department.

(b) Public health support services, which shall include at a minimum:

(i) Consumer health protection programs, consistent with paragraph 25 of this section, that include at least the functions of community water supplies, general sanitation, vector control and food and drugs.

(ii) Epidemiology and disease control programs that include at least the functions of chronic disease, accident and injury control, communicable diseases, tuberculosis, venereal disease and others.

(iii) Laboratory services programs.

(iv) Health education and training programs.

(v) Disposition of human bodies programs.

(c) Community health services, which shall include at a minimum:

(i) Medical services programs that include at least the functions of maternal and child health, preschool health screening, family planning, public health nursing, premature and newborn program, immunizations, nutrition, dental care prevention and migrant health.

(ii) Dependency health care services programs that include at least the functions of need determination, availability of health resources to medically dependent individuals, quality control, utilization control and industry monitoring.

(iii) Children with physical disabilities services programs.

(iv) Programs for the prevention and early detection of an intellectual disability.

(d) Program planning, which shall include at least the following:

(i) An organizational unit for comprehensive health planning programs.

(ii) Program coordination, evaluation and development.

(iii) Need determination programs.

(iv) Health information programs.

2. Include and administer, within the office of the director, staff services, which shall include at a minimum budget preparation, public information, appeals, hearings, legislative and federal government liaison, grant development and management and departmental and interagency coordination.

3. Make rules for the organization and proper and efficient operation of the department.

4. Determine when a health care emergency or medical emergency situation exists or occurs within this state that cannot be satisfactorily controlled, corrected or treated by the health care delivery systems and facilities available. When such a situation is determined to exist, the director shall immediately report that situation to the legislature and the governor. The report shall include information on the scope of the emergency, recommendations for solution of the emergency and estimates of costs involved.

5. Provide a system of unified and coordinated health services and programs between this state and county governmental health units at all levels of government.

6. Formulate policies, plans and programs to effectuate the missions and purposes of the department.

7. Make contracts and incur obligations within the general scope of the department's activities and operations subject to the availability of monies.

8. Be designated as the single state agency for the purposes of administering and in furtherance of each federally supported state plan.

9. Provide information and advice on request by local, state and federal agencies and by private citizens, business enterprises and community organizations on matters within the scope of the department's duties subject to the departmental rules and regulations on the confidentiality of information.

10. Establish and maintain separate financial accounts as required by federal law or regulations.

11. Advise with and make recommendations to the governor and the legislature on all matters concerning the department's objectives.

12. Take appropriate steps to reduce or contain costs in the field of health services.

13. Encourage and assist in the adoption of practical methods of improving systems of comprehensive planning, of program planning, of priority setting and of allocating resources.

14. Encourage an effective use of available federal resources in this state.

15. Research, recommend, advise and assist in the establishment of community or area health facilities, both public and private, and encourage the integration of planning, services and programs for the development of the state's health delivery capability.

16. Promote the effective use of health manpower and health facilities that provide health care for the citizens of this state.

17. Take appropriate steps to provide health care services to the medically dependent citizens of this state.

18. Certify training on the nature of sudden infant death syndrome, which shall include information on the investigation and handling of cases involving sudden and unexplained infant death for use by law enforcement officers as part of their basic training requirement.

19. Adopt protocols on the manner in which an autopsy shall be conducted under section 11-597, subsection D in cases of sudden and unexplained infant death.

20. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

21. Administer the federal family violence prevention and services act grants, and the department is designated as this state's recipient of federal family violence prevention and services act grants.

22. Accept and spend private grants of monies, gifts and devises for the purposes of methamphetamine education. The department shall disburse these monies to local prosecutorial or law enforcement agencies with existing programs, faith-based organizations and nonprofit entities that are qualified under section 501(c)(3) of the United States internal revenue code, including nonprofit entities providing services to women with a history of dual diagnosis disorders, and that provide educational programs on the repercussions of methamphetamine use. State general fund monies shall not be spent for the purposes of this paragraph. If the director does not receive sufficient monies from private sources to carry out the purposes of this paragraph, the director shall not provide the educational programs prescribed in this paragraph. Grant monies received pursuant to this paragraph are not lapsing and do not revert to the state general fund at the close of the fiscal year.

23. Identify successful methamphetamine prevention programs in other states that may be implemented in this state.

24. Pursuant to chapter 13, article 8 of this title, coordinate all public health and risk assessment issues associated with a chemical or other toxic fire event if a request for the event is received from the incident commander, the emergency response commission or the department of public safety and if funding is available. Coordination of public health issues shall include general environmental health consultation and risk assessment services consistent with chapter 13, article 8 of this title and, in consultation with the Arizona poison control system, informing the public as to potential public health risks from the environmental exposure. Pursuant to chapter 13, article 8 of this title, the department of health services shall also prepare a report, in consultation with appropriate state, federal and local governmental agencies, that evaluates the public health risks from the environmental exposure. The department of health services' report shall include any department of environmental quality report and map of smoke dispersion from the fire, the results of any environmental samples taken by the department of environmental quality and the toxicological implications and public health risks of the environmental exposure. The department of health services shall consult with the Arizona poison control system regarding toxicology issues and shall

prepare and produce its report for the public as soon as practicable after the event. The department of health services shall not use any monies pursuant to section 49-282, subsection E to implement this paragraph.

25. Consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture concerning its administration, pursuant to title 3, chapter 3, article 4.1, of this state's authority under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252).

26. Adopt rules pursuant to title 32, chapter 32, article 5 prescribing the designated database information to be collected by health profession regulatory boards for the health professionals workforce database.

36-132. Department of health services; functions; contracts

A. The department, in addition to other powers and duties vested in it by law, shall:

1. Protect the health of the people of the state.

2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.

3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.

4. Operate sanitariums, hospitals or other facilities assigned to the department by law or by the governor.

5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information to promote good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of educating children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.

6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.

7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.

8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.

9. Encourage and aid in coordinating local programs concerning nutrition of the people of this state.

10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.

11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.

12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.

13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local health agencies involved with water quality shall provide to the department any assistance requested by the director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter 8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in enforcing the federal food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Recruit and train personnel for state, local and district health departments.

16. Conduct continuing evaluations of state, local and district public health programs, study and appraise state health problems and develop broad plans for use by the department and for recommendation to other agencies, professions and local health departments for the best solution of these problems.

17. License and regulate health care institutions according to chapter 4 of this title.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:

(a) Screening in early pregnancy for detecting high-risk conditions.

(b) Comprehensive prenatal health care.

(c) Maternity, delivery and postpartum care.

(d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when medically indicated.

(e) Perinatal education oriented toward professionals and consumers, focusing on early detection and adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes and behavioral-supported group homes for persons with developmental disabilities. The department shall issue a license to an accredited facility for a period of the accreditation, except that a licensing period shall not be longer than three years. The department is authorized to conduct an inspection of an accredited facility to ensure that the facility meets health and safety licensure standards. The results of the accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the department of health services. For the purposes of this paragraph, "accredited" means accredited by a nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government, and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this title, and enter into contracts with the federal government, or an agency of the federal government, and with private donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies made available under this section are special project grants. The department may also expend these monies to further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as payors of last resort, prescription medications necessary to supplement treatment and transportation to and from treatment facilities. The contracts may provide for department payment of administrative costs it specifically authorizes.

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary

measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the

Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe

minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-301. Definitions

In this chapter, unless the context otherwise requires:

1. "Administrative order" means a written decision issued by an administrative law judge or quasi-judicial entity.

2. "Amend" means to make a change, other than a correction, to a registered certificate by adding, deleting or substituting information on that certificate.

3. "Birth" or "live birth" means the complete expulsion or extraction of an unborn child from the child's mother, irrespective of the duration of the pregnancy, that shows evidence of life, with or without a cut umbilical cord or an attached placenta, such as breathing, heartbeat, umbilical cord pulsation or definite voluntary muscle movement after expulsion or extraction of the unborn child.

4. "Certificate" means a record that documents a birth or death.

5. "Certified copy" means a written reproduction of a registered certificate that a local registrar, a deputy local registrar or the state registrar has authenticated as a true and exact written reproduction of a registered certificate.

6. "Correction" means a change made to a registered certificate because of a typographical error, including misspelling and missing or transposed letters or numbers.

7. "Court order" means a written decision issued by:

(a) The superior court, an appellate court or the supreme court or an equivalent court in another state.

(b) A commissioner or judicial hearing officer of the superior court.

(c) A judge of a tribal court in this state.

8. "Current care" means that a health care provider has examined, treated or provided care for a person for a chronic or acute condition within eighteen months preceding that person's death. Current care does not include services provided in connection with a single event of emergency or urgent care. For the purposes of this paragraph, "treated" includes prescribing medication.

9. "Custody" means legal authority to act on behalf of a child.

10. "Department" means the department of health services.

11. "Electronic" means technology that has electrical, digital, magnetic, wireless, optical or electromagnetic capabilities or technology with similar capabilities.

12. "Evidentiary document" means written information used to prove the fact for which the document is presented.

13. "Family member" means:

(a) A person's spouse, natural or adopted offspring, father, mother, grandparent, grandchild to any degree, brother, sister, aunt, uncle or first or second cousin.

(b) The natural or adopted offspring, father, mother, grandparent, grandchild to any degree, brother, sister, aunt, uncle or first or second cousin of the person's spouse.

14. "Fetal death" means the cessation of life before the complete expulsion or extraction of an unborn child from the child's mother that is evidenced by the absence of breathing, heartbeat, umbilical cord pulsation or definite voluntary muscle movement after expulsion or extraction.

15. "Final disposition" means the interment, cremation, removal from this state or other disposition of human remains.

16. "Foundling" means:

(a) A newborn infant left with a safe haven provider pursuant to section 13-3623.01.

(b) A child whose father and mother cannot be determined.

17. "Funeral establishment" has the same meaning prescribed in section 32-1301.

18. "Health care institution" has the same meaning prescribed in section 36-401.

19. "Health care provider" means:

(a) A physician licensed pursuant to title 32, chapter 13 or 17.

(b) A doctor of naturopathic medicine licensed pursuant to title 32, chapter 14.

(c) A midwife licensed pursuant to chapter 6, article 7 of this title.

(d) A nurse midwife certified pursuant to title 32, chapter 15.

(e) A nurse practitioner licensed and certified pursuant to title 32, chapter 15.

(f) A physician assistant licensed pursuant to title 32, chapter 25.

(g) A health care provider who is licensed or certified by another state or jurisdiction of the United States and who works in a federal health care facility.

20. "Human remains" means a lifeless human body or parts of a human body that permit a reasonable inference that death occurred.

21. "Issue" means:

(a) To provide a copy of a registered certificate.

(b) An action taken by a court of competent jurisdiction, administrative law judge or quasi-judicial entity.

22. "Legal age" means a person who is at least eighteen years of age or who is emancipated by a court order.

23. "Medical certification of death" means the opinion of the health care provider who signs the certificate of probable or presumed cause of death that complies with rules adopted by the state registrar of vital records and that is based on any of the following that is reasonably available:

(a) Personal examination.

(b) Medical history.

(c) Medical records.

(d) Other reasonable forms of evidence.

24. "Medical examiner" means a medical examiner or alternate medical examiner as defined in section 11-591.

25. "Name" means a designation that identifies a person, including a first name, middle name, last name or suffix.

26. "Natural causes" means those causes that are due solely or nearly entirely to disease or the aging process.

27. "Presumptive death" means a determination by a court that a death has occurred or is presumed to have occurred but the human remains have not been located or recovered.

28. "Register" means to assign an official state number and to incorporate into the state registrar's official records.

29. "Responsible person" means a person listed in section 36-831.

30. "Seal" means to bar from access.

31. "Submit" means to present, physically or electronically, a certificate, evidentiary document or form provided for in this chapter to a local registrar, a deputy local registrar or the state registrar.

32. "System of public health statistics" means the processes and procedures for:

(a) Tabulating, analyzing and publishing public health information derived from vital records data and other sources authorized pursuant to section 36-125.05 or section 36-132, subsection A, paragraph 3.

(b) Performing other activities related to public health information.

33. "System of vital records" means the statewide processes and procedures for:

(a) Electronically or physically collecting, creating, registering, maintaining, copying and preserving vital records.

(b) Preparing and issuing certified and noncertified copies of vital records.

(c) Performing other activities related to vital records.

34. "Unborn child" has the same meaning prescribed in section 36-2151.

35. "Vital record" means a registered birth certificate or a registered death certificate.

36-302. System of vital records; powers and duties of the state registrar

A. The director of the department is the state registrar of vital records.

B. The state registrar of vital records shall:

1. Adopt rules to implement a statewide system of vital records pursuant to this chapter using the recommendations of the federal agency responsible for national vital statistics as guidelines subject to modification by the state registrar.

2. Administer and enforce this chapter and the rules adopted pursuant to this chapter and provide for the efficient administration of a statewide system of vital records.

3. Organize, operate and maintain the only system of vital records in this state.

4. Direct and supervise the creation and registration of vital records, electronically and physically, and be the custodian of vital records.

5. Establish registration districts throughout this state.

6. Appoint, direct and remove local registrars.

7. Prescribe and distribute forms required pursuant to this chapter and rules adopted pursuant to this chapter.

8. Prepare and issue copies of vital records.

9. Provide a means for the public to request a copy of a vital record and grant or deny the request according to criteria prescribed by rules adopted pursuant to this chapter. These rules shall include eligibility criteria, proof of identity requirements and payment requirements to obtain the requested vital record.

10. Pursuant to section 16-165, transmit each month to the county recorder a record of the death of each resident of the county recorder's county who is at least sixteen years of age.

11. Determine acceptability and completeness of a certificate, evidentiary document or form submitted to the state registrar.

12. Investigate violations of this chapter and rules adopted pursuant to this chapter.

13. Report violations of this chapter and rules adopted pursuant to this chapter to the county attorney in the registration district in which the violation occurs or to the attorney general.

C. The state registrar may:

1. Appoint, in writing, one or more persons to serve as assistant state registrars with any or all powers and duties vested in the state registrar.

2. Appoint, direct and remove a deputy local registrar.

3. Inspect a registration district's certificates, evidentiary documents, forms or other information related to the system of vital records.

4. Establish quality control procedures that include on-site inspections and review of evidentiary documents, forms and other information used in the creation of vital records.

5. Consolidate or subdivide registration districts.

36-303. System of public health statistics; powers and duties of the department

A. The department shall:

1. Administer and enforce this chapter and rules adopted pursuant to this chapter.

2. Provide for the efficient administration of a system of public health statistics.

B. The department may adopt rules to implement a system of public health statistics pursuant to this chapter.

36-311. Appointment and removal of local registrars and deputy local registrars

A. The state registrar shall appoint the county health officer of the county health department as the local registrar for a registration district. If a county health department does not have a county health officer, the state registrar shall appoint an employee of the county health department as the local registrar for a registration district.

B. With notice to the state registrar, the local registrar may appoint one or more persons to serve as deputy local registrars with any of the duties vested in the local registrar.

C. The state registrar may remove a local registrar or a deputy local registrar who does not comply with this chapter or rules adopted pursuant to this chapter or for any other reasonable cause.

D. After notice to the state registrar, the local registrar may remove a deputy local registrar who does not comply with this chapter or rules adopted pursuant to this chapter or for any other reasonable cause.

E. The state registrar may abolish the office of a local registrar if the registration district for which the local registrar is appointed is combined with another registration district.

36-312. Local registrars and deputy local registrars; powers and duties

A local registrar and deputy local registrar of a registration district shall:

1. Administer and enforce this chapter and rules adopted pursuant to this chapter.

2. Assist the state registrar in investigating violations of this chapter and rules adopted pursuant to this chapter.

3. Electronically or physically submit certificates, evidentiary documents and forms to the state registrar as directed by the state registrar.

4. Register certificates only as directed by the state registrar.

5. Preserve and maintain records and perform other duties required by the state registrar.

6. At the request of the state registrar, make certificates, evidentiary documents or forms related to the system of vital records available to the state registrar for inspection.

7. At the request of the state registrar, provide birth certificates and death certificates to the state registrar.

8. Prepare and issue copies of certificates according to rules adopted pursuant to this chapter.

36-321. Information required for a certificate

A. The state registrar shall prescribe by rule the information required to be submitted to create or amend a vital record.

B. A person who submits a certificate for registration must make a reasonable effort to ensure that the information on the certificate is correct and accurate.

C. A certificate registered pursuant to this chapter must include an official state number and the date of registration.

36-322. Sealing a certificate

A. The state registrar shall seal a certificate and evidentiary documents when the state registrar amends the registered certificate.

B. Unless required by a court order and except as provided in section 36-340, the state registrar shall not issue a copy of a certificate or other record sealed pursuant to this section.

36-323. Amending registered certificates: corrections

A. The state registrar shall amend a registered certificate pursuant to this chapter and rules adopted pursuant to this chapter.

B. The state registrar shall amend a registered birth certificate to show the new name of a person born in this state if:

1. The person, the person's parent or the person's legal guardian requests the new name and the state registrar receives a court order to change the person's name on the registered birth certificate.

2. A voluntary acknowledgement of paternity submitted pursuant to section 25-812 includes a request to change the person's name on the registered birth certificate.

C. The state registrar shall adopt rules for making corrections to vital records.

36-324. Vital records; copies; access

A. On written request, a local registrar, a deputy local registrar or the state registrar shall issue a certified copy of a registered certificate, except the portion of the certificate that contains medical information, to any person determined to be eligible to receive the certified copy pursuant to criteria prescribed by rules. A local registrar, a deputy local registrar or the state registrar shall issue certified copies of a registered certificate to a licensed funeral director or the funeral director's designee on the funeral director's or designee's written or in-person request. The local registrar, deputy local registrar or state registrar shall provide the certified copies by mail or in person to the funeral director or the funeral director's designee on request.

B. A certified copy of a registered certificate has the same status as the registered certificate.

C. The United States public health service may receive copies, microfilm and other information from the state registrar to prepare national vital statistics subject to the following limitations:

1. The United States public health service bears the cost of preparing and transmitting the copies, microfilm and other information.

2. The copies, microfilm and other information are used for statistical purposes and the United States public health service assures a person's anonymity.

D. In child support cases under 42 United States Code sections 651 through 669 or in public benefit matters under chapter 29 of this title or title 46, the state registrar shall provide copies of or access to vital records without charge to the department of economic security or its attorneys. In child welfare cases under title 8, the state registrar shall provide copies of or access to vital records without charge to the department of child safety or its attorneys. A vital record obtained as authorized in this section must be used only for official purposes and, if used in a public proceeding, must be sealed by the court or hearing officer.

E. The state registrar shall provide a copy of or access to a vital record to a government agency for its official purposes.

F. Notwithstanding any other law, a child who is at least sixteen years of age and who either does not have a residence address or is in the department of child safety's custody may receive a certified copy of the child's certificate of birth registration without the signature of the child's parent, guardian or foster parent.

36-325. Death certificate registration; moving human remains; immunity

A. Within seven calendar days after receiving possession of human remains, a funeral establishment or responsible person who takes possession of the human remains shall:

1. Obtain and complete the information, including the social security number of the decedent, on the death certificate required pursuant to this chapter and rules adopted pursuant to this chapter.

2. Provide on the death certificate the name and address of the person completing the death certificate.

3. Submit the death certificate for registration to a local registrar, a deputy local registrar or the state registrar. The funeral establishment or responsible person may submit the death certificate by electronic means in the format prescribed by the state registrar.

B. Within seventy-two hours after receiving a death certificate pursuant to this section, a local registrar, a deputy local registrar or the state registrar shall register a death certificate if it is accurate and complete and submitted pursuant to this chapter and rules adopted pursuant to this chapter.

C. If a county medical examiner or alternate medical examiner determines that the circumstances of a death provide jurisdiction pursuant to section 11-593, subsection B, the medical examiner or alternate medical examiner shall complete and sign the medical certification of death on a death certificate within seventy-two hours after the examination, excluding weekends and holidays. If the medical examiner or alternate medical examiner cannot determine the cause of death within that time, the medical examiner or alternate medical examiner shall enter "pending" for the cause of death and sign the medical certification of death within seventy-two hours after the examination, excluding weekends and holidays.

D. A local registrar, a deputy local registrar or the state registrar shall register a death certificate if there is a medical certification of death signed by the medical examiner or alternate medical examiner with a pending cause of death.

E. Final disposition of human remains with a pending cause of death shall not occur until the medical examiner or alternate medical examiner releases the human remains for final disposition.

F. When the medical examiner or alternate medical examiner determines the cause of death, the medical examiner or alternate medical examiner shall submit the information to the local registrar, deputy local registrar or state registrar.

G. If a person under the current care of a health care provider for an acute or chronic medical condition dies of that condition, or complications associated with that condition, the health care provider or a health care provider designated by that provider shall complete and sign the medical certification of death on a death certificate within seventy-two hours. If current care has not been provided, the medical examiner or alternate medical examiner shall complete and sign the medical certification of death on a death certificate within seventy-two hours after the examination, excluding weekends and holidays.

H. If a person dies in a hospital, nursing care institution or hospice inpatient facility of natural causes, the hospital, nursing care institution or facility shall designate a health care provider to complete and sign the medical certification of death within seventy-two hours.

I. If a person dies on an Indian reservation in this state and a county medical examiner or alternate medical examiner is not available, the tribal law enforcement authority, acting in an official investigative capacity, may complete and sign the medical certification of death.

J. If the place of death is unknown, the death is considered to have occurred in the place where the human remains were found.

K. If a person dies in a moving conveyance, the death is considered to have occurred in the place where the human remains were initially removed from the conveyance. In all other cases, the place where death is pronounced is considered the place where the death occurred.

L. The state registrar shall create and register a death certificate when the state registrar receives a court order of a presumptive death. The court order shall contain the following information, if known:

1. The decedent's name, social security number, date of birth, date of death, cause of death and location of death.

2. Any other information necessary to complete a death certificate for a presumptive death.

M. If a murder victim's body is not recovered, a conviction for the murder is proof of death. The court shall forward a record of the conviction to the state registrar. The state registrar shall obtain the personal data regarding the murder victim from information provided by the court, a family member of the murder victim or another reliable source and create and register the death certificate.

N. A health care provider who completes and signs a medical certification of death in good faith pursuant to this section is not subject to civil liability or professional disciplinary action.

36-325.01. Delayed death certificate registration

If a death occurs in this state and is not registered within one year after the date of the death, the local registrar, deputy local registrar or state registrar shall register the death certificate as a delayed death certificate.

36-326. Disposition-transit permits

A. A funeral establishment or responsible person who takes possession of human remains shall obtain a disposition-transit permit from a local registrar, a deputy local registrar or the state registrar before doing either of the following:

1. Providing final disposition of the human remains.

2. Moving the human remains out of this state.

B. Human remains that are moved from a hospital, nursing care institution or hospice inpatient facility must be accompanied by a form provided by the hospital, nursing care institution or hospice

inpatient facility authorizing the release of the human remains. The form shall contain the information required in rules adopted pursuant to this chapter.

C. A funeral establishment or responsible person may move human remains from a hospital, nursing care institution or hospice inpatient facility where death occurred without obtaining a disposition-transit permit if the funeral establishment or responsible person does not remove the human remains from this state and provides notice to the local registrar or deputy local registrar in the registration district where the death occurred within twenty-four hours after moving the human remains.

D. A funeral establishment or responsible person may move human remains from a place other than a hospital, nursing care institution or hospice inpatient facility where death occurred without obtaining a disposition-transit permit if the funeral establishment or responsible person does not remove the human remains from this state and provides notice to the local registrar or deputy local registrar in the registration district where death occurred within seventy-two hours after moving the human remains.

E. Embalmed human remains, disinterred human remains and human remains that are not embalmed that are shipped by common carrier inside or outside of this state for the purposes of burial, cremation or funeral services shall be placed in a suitable shipping container that is designed for transporting human remains. Human remains that are not embalmed and that are shipped inside or outside of this state are not required to be transported within twenty-four hours after death.

F. A hospital or abortion clinic is not required to obtain a disposition-transit permit if an unborn child is expelled or extracted at the hospital or abortion clinic and all the following apply:

1. The gestation period of the unborn child is less than twenty weeks or, if the gestation period is unknown, the weight of the unborn child is less than three hundred fifty grams.

2. A county medical examiner's investigation is not required.

3. The woman on whom the abortion was performed has authorized the hospital or abortion clinic to dispose of the unborn child.

G. To obtain a disposition-transit permit, a funeral establishment or responsible person must submit the information required pursuant to this chapter and rules adopted pursuant to this chapter to the state registrar or to the local registrar or deputy local registrar of the registration district where the death occurred.

H. A local registrar, a deputy local registrar or the state registrar shall provide a disposition-transit permit to a funeral establishment or other responsible person if the information provided pursuant to subsection B of this section complies with this chapter and rules adopted pursuant to this chapter.

I. A local registrar, a deputy local registrar or the state registrar shall provide a disposition-transit permit for interment of human remains in a cemetery only if the location of the cemetery has been recorded in the office of the county recorder in the county where the cemetery is located or the cemetery is located on federal or tribal land.

J. A local registrar, a deputy local registrar or the state registrar shall provide a disposition-transit permit issued by this state for the final disposition of human remains in this state on receipt of a disposition-transit permit from another state that accompanies the human remains from the other state.

36-327. Disinterment-reinterment permit

A. Except as otherwise provided by law, a disinterment-reinterment permit is required before a person disinters human remains. The state registrar shall provide a permit to disinter human remains either by a court order issued in this state or by the written consent of the decedent's family member who has the highest priority. The order of priority is the same as provided in section 36-831.

B. A disinterment-reinterment permit is not required if disinterment and reinterment occur in the same cemetery for ordinary relocation or for reasons of internal management of the cemetery.

36-328. Registration of a death certificate for a foreign presumptive death

A. The state registrar shall create and register a death certificate for a foreign presumptive death if the state registrar receives a court order issued in this state of a presumptive death of a resident of this state in a foreign country. The court order shall contain the following information, if known:

1. The decedent's name, social security number, date of birth, date of death, cause of death and location of death.

2. Any other information necessary to complete a death certificate for a foreign presumptive death.

B. A death certificate for a foreign presumptive death shall state on the death certificate the name of the foreign country where death is presumed to have occurred.

36-329. Fetal death certificate registration

A. A hospital, abortion clinic, physician or midwife shall submit a completed fetal death certificate to the state registrar for registration within seven days after the fetal death for each fetal death occurring in this state after a gestational period of twenty completed weeks or if the unborn child weighs more than three hundred fifty grams.

B. The requirements for registering a fetal death certificate are the same as the requirements for registering a death certificate prescribed in section 36-325.

36-329.01. Delayed fetal death certificate registration

A. If a fetal death occurs in this state and is not registered within one year after the date of the fetal death, the local registrar, deputy local registrar or state registrar shall register the fetal death certificate as a delayed fetal death certificate.

B. The requirements for registering a delayed fetal death certificate are the same as the requirements for registering a delayed death certificate prescribed in section 36-325.01.

36-330. Certificate of birth resulting in stillbirth; requirements

A. In addition to the requirements of section 36-329, the state registrar shall establish a certificate of birth resulting in stillbirth on a form approved by the state registrar for each fetal death occurring in this state after a gestational period of at least twenty completed weeks. This certificate shall be offered to the parent or parents of a stillborn child.

B. A certificate of birth resulting in stillbirth shall meet all of the format and filing requirements for birth certificates prescribed in section 36-333.

C. The person who prepares a certificate pursuant to this section shall leave blank any references to the stillborn child's name if the stillborn child's parent or parents do not wish to provide a name for the stillborn child.

D. Notwithstanding subsections A and B of this section, the certificate of birth resulting in stillbirth shall be submitted to the designated registrar within seven days following the delivery and before the cremation or removal of the fetus from the registration district.

36-330.01. Delayed registration of certificate of birth resulting in stillbirth

If a birth resulting in stillbirth occurring in this state has not been registered within one year after the date of delivery, a certificate of birth resulting in stillbirth marked "delayed" may be submitted and registered pursuant to this chapter and rules adopted pursuant to this chapter and other requirements sufficient to substantiate the alleged facts of a birth resulting in stillbirth.

36-331. Duties of persons in charge of place of disposition

A. Except as otherwise provided by law, a person in charge of a place of disposition shall not inter, cremate or allow other disposition of human remains without receiving a disposition-transit permit with the human remains.

B. A person in charge of a place of disposition shall maintain a record of a disposition pursuant to rules adopted pursuant to this chapter.

C. A person in charge of a place of disposition shall permit the state registrar to inspect the disposition records.

36-332. Notification of death to responsible person and release of human remains

A health care institution shall not release human remains or allow the removal of human remains from the health care institution until the health care institution makes a diligent effort to notify the responsible person and obtain the name of the entity to whom the human remains are to be released.

36-333. Birth certificate registration

A. Within seven days after a child's birth in this state, a person shall submit to a local registrar, a deputy local registrar or the state registrar, a birth certificate for registration according to rules adopted pursuant to this chapter. The birth certificate shall be submitted physically or electronically through the state designated electronic registration system. A local registrar, a deputy local registrar or the state registrar may accept a certificate submitted electronically without the signatures required by rule.

B. If a birth occurs at a hospital, the chief administrative officer of the hospital or that person's designee shall:

1. Obtain the information for a birth certificate, including signatures and social security numbers required by rule.

2. Fill out the birth certificate.

3. Submit the birth certificate for registration to a local registrar, a deputy local registrar or the state registrar.

4. Maintain a copy of the evidentiary documents used to fill out the birth certificate for ten years after the date of submission.

C. If a birth does not occur at a hospital one of the following persons shall obtain the information, evidentiary documents, social security numbers and signatures required by rule for a birth certificate, fill out the birth certificate and submit the birth certificate for registration to a local registrar, a deputy local registrar or the state registrar:

1. A physician, nurse or midwife who is present at the birth and who is willing and able to do so during or immediately after the birth.

2. If a physician, nurse or midwife is not present at the birth or is not willing or able to do so, the child's mother or father or a family member of legal age who is present, willing and able to do so during or immediately after the birth.

3. If the child's father or other family member of legal age is not present or is not willing or able and the child's mother is not willing or able to supply the required information, any other person who is present during or immediately after the child's birth and who can supply the required information.

D. If a birth occurs in a moving conveyance, the birth is considered to have occurred in the place where the child is initially removed from the conveyance. If the child is initially removed from the conveyance at a hospital, the person named in subsection B shall submit the birth certificate to the state registrar or the local registrar or deputy local registrar of the registration district where the child is first removed. If the child is initially removed from the conveyance at any location other than at a hospital, the person identified in subsection C shall submit the birth certificate to the state registrar or to the local registrar or deputy local registrar of the registration district where the child is first removed.

E. A local registrar, a deputy local registrar or the state registrar shall register a birth certificate if the birth certificate is accurate and complete and submitted according to this chapter and rules adopted pursuant to this chapter.

36-333.01. Late birth certificate registration

If a completed birth certificate and evidentiary documents are submitted to a local registrar, a deputy local registrar or the state registrar for registration more than seven days but less than one year after the date of birth, the local registrar, deputy local registrar or state registrar shall register the birth certificate as a late birth certificate if the information on the birth certificate and evidentiary documents are accurate and complete, support the registration of the late birth certificate and are submitted pursuant to this chapter and rules adopted pursuant to this chapter.

36-333.02. Delayed birth certificate registration

A. If a birth certificate of a person who is born in this state is not registered within one year after the date of birth, a person authorized by this chapter may submit to the state registrar information and evidentiary documents that support the creation and registration of a delayed birth certificate.

B. The state registrar may waive the information and evidentiary document requirements in subsection A of this section for a birth that occurred before 1970.

C. The state registrar shall create a delayed birth certificate that includes a listing of the information and evidentiary documents submitted pursuant to subsection A of this section.

D. The state registrar shall register a delayed birth certificate if the information and evidentiary documents are accurate and complete, support the creation and registration of the delayed birth certificate and are submitted pursuant to this chapter and rules adopted pursuant to this chapter.

E. If the state registrar determines that the information and evidentiary documents are not accurate and complete or do not support the creation and registration of the delayed birth certificate, the state registrar shall not create and register the delayed birth certificate, shall notify the person requesting a delayed birth certificate of the reasons for not creating and registering the delayed birth certificate and shall advise the person requesting a delayed birth certificate of that person's right to petition for a court order pursuant to section 36-333.03.

F. The state registrar shall establish documentation requirements for Native Americans who were born before 1970 and who are requesting delayed birth certificates. If a requesting party presents documents that do not meet the documentation requirements established by the state registrar, the director shall review the documents submitted and determine whether to create and register a delayed birth certificate.

36-333.03. Record of birth; petition; requirements; notice; court order; definition

A. If a delayed birth certificate for a person who is born in this state is not created and registered pursuant to section 36-333.02, that person or, if the person is under eighteen years of age, the person's parent or legal guardian may petition the court for an order to establish a record of the person's date of birth, place of birth and parentage.

B. The petition must allege:

1. That the person for whom a delayed birth certificate is requested was born in this state.

2. That the person's birth is not registered in another state or country.

3. That a record of birth for the person cannot be found in this state's vital records.

4. That despite diligent efforts the petitioner was unable to obtain the information and evidentiary documents required for the creation and registration of a delayed birth certificate.

5. That the state registrar has refused to create and register a delayed birth certificate.

6. Any other allegations the petitioner believes would be useful to the court.

B. The petitioner shall submit to the court a copy of the notification provided pursuant to section 36-333.02, subsection E and all information and evidentiary documents that were submitted to the state registrar to support the request for the registration of a delayed birth certificate.

C. The court shall set a date, time and place for a hearing on the petition and shall provide notice of the date, time and place to the state registrar and the petitioner at least twenty days before the hearing. The state registrar may appear and testify at the hearing.

D. If the court finds that the evidence presented for the petitioner supports the creation and registration of a delayed birth certificate, the court shall establish the facts of birth, including parentage and any other findings that may be required, and shall issue an order to create and register a delayed birth certificate on a form that is provided by the state registrar and that includes the facts of birth, a description of the information and evidentiary documents submitted to the court and the date of the court's action.

E. The clerk of the court shall forward an order issued pursuant to subsection D of this section to the state registrar not later than the tenth day of the calendar month following the month in which the court issued its order. Based on the information contained in the order, the state registrar shall create and register a delayed birth certificate that includes a list of the information and evidentiary documents as stated in the order.

F. For the purposes of this section, "court" means the superior court or tribal court.

36-334. Determining maternity and paternity for birth certificates

A. A person completing a birth certificate shall state the name of the woman who gave birth to the child on the birth certificate as the child's mother unless otherwise provided by law or court order.

B. The state registrar shall not refuse to register a birth certificate because the birth certificate does not include the name of the father.

C. If a father's name is stated on a birth certificate, the father's name shall be stated on a birth certificate as follows:

1. Except as provided in section 25-814, if the mother is married at the time of birth or was married at any time in the ten months before the birth, the name of the mother's husband.

2. If a mother and father who are not married to each other at the time of birth and were not married to each other in the ten months before the birth voluntarily acknowledge paternity pursuant to section 25-812, the name of the father acknowledging paternity.

3. If the state registrar receives an administrative order or a court order establishing paternity, the father's name in the order.

D. If the acknowledgement of paternity is rescinded pursuant to section 25-812, the state registrar shall remove the father's name from the registered birth certificate.

36-335. Birth registration for foundlings

A. A person who has custody of a foundling shall submit to the state registrar or to the local registrar or a deputy local registrar of the registration district where the foundling was found the following information:

1. The date the foundling was found.

2. The location where the foundling was found.

3. The sex, approximate race and approximate age of the foundling.

4. The name and address of the person who has custody of the foundling.

5. The name given to the foundling by the person who has custody of the foundling.

6. Any other data required by rules adopted pursuant to this chapter.

B. The state registrar shall create and register a birth certificate for a foundling and enter on the birth certificate the following information:

1. The location where the foundling was found as the place of birth.

2. The date of birth based on the approximate age of the foundling.

C. A person who has custody of a foundling and determines the foundling's identity shall notify the state registrar in writing of the determination.

D. If the identity of a foundling is determined, the state registrar shall seal the foundling's registered birth certificate and provide access to the foundling's registered birth certificate only pursuant to a court order issued in this state.

36-336. Adoption certificate

A. For an adoption of a person born in this state, a state court shall submit to the state registrar an adoption certificate on a form approved by the state registrar or pursuant to a court order that includes:

1. Information required by rule about the adoptive father and adoptive mother.

2. Information required by rule about the child being adopted.

3. A statement by the court that the information on the adoption certificate is accurate.

4. The contact preference form prescribed in section 36-340.

B. For an adoption of a person born in this state and ordered by a court in another state, the state registrar shall accept an order for an adoption or an adoption certificate that contains the information in subsection A.

C. If a court modifies a court order for adoption, the state registrar shall follow the procedures in this chapter for amending a registered certificate.

D. By the tenth day of each month, a court in this state shall submit to the state registrar all adoption certificates, court orders for adoption and court orders for modification of adoption for the preceding month.

E. When the state registrar receives an adoption certificate, a court order for adoption, a change to a court order for adoption or an annulment of an adoption for a person born in another state, the state registrar shall send the document to the appropriate registration authority in the state where the person was born.

36-337. Amending birth certificates

A. The state registrar shall amend the birth certificate for a person born in this state when the state registrar receives any of the following:

1. Except as provided in subsection D of this section, an adoption certificate or a court order for adoption required pursuant to section 36-336.

2. A voluntary acknowledgment of paternity pursuant to section 25-812.

3. For a person who has undergone a sex change operation or has a chromosomal count that establishes the sex of the person as different than in the registered birth certificate, both of the following:

(a) A written request for an amended birth certificate from the person or, if the person is a child, from the child's parent or legal guardian.

(b) A written statement by a physician that verifies the sex change operation or chromosomal count.

4. A court order ordering an amendment to a birth certificate.

B. The state registrar shall change the name of the father on a registered birth certificate if:

1. The state registrar receives an administrative order or a court order ordering the state registrar to change the father's name on the registered birth certificate.

2. Paternity is established through a voluntary acknowledgement of paternity pursuant to section 25-812.

C. If a registered birth certificate does not exist for a person born in this state who is requesting to amend a birth certificate the person making that request shall comply with the requirements established by rule.

D. The state registrar shall retain the information on a person's registered birth certificate after the person's adoption if all of the following documents are submitted to the state registrar:

1. A written request to retain the information signed by the adoptive parent or a court order containing a request to retain the information on the registered birth certificate.

2. A written statement agreeing to retain the mother's name on the person's registered birth certificate, signed by the mother, or if the mother is deceased, a certified copy of a registered death certificate for the mother.

3. If there is a father's name stated on the registered birth certificate, a written statement agreeing to retain the father's name on the person's registered birth certificate, signed by the father, or if the father is deceased, a certified copy of a registered death certificate for the father.

E. If the state registrar amends a registered birth certificate following adoption, the birth certificate shall state the city or county of birth stated on the existing registered birth certificate and the date of birth stated on the existing registered birth certificate. The state registrar may omit the exact location of birth on the registered birth certificate.

F. If a local registrar or deputy local registrar amends a registered birth certificate, the local registrar or deputy local registrar shall forward all evidentiary documents provided to create the new birth certificate to the state registrar.

G. If the state registrar amends a registered birth certificate, the state registrar shall seal the previously registered birth certificate and the evidentiary documents provided to amend the registered birth certificate. The state registrar shall provide access to a sealed certificate or evidentiary documents only pursuant to section 36-322 or 36-340 or a court order issued in this state or as prescribed by rule.

H. If the state registrar receives a court order annulling an adoption, the state registrar shall unseal the sealed registered birth certificate and shall seal the new birth certificate and evidentiary documents.

36-338. Certificates of foreign birth for adoptees

A. The state registrar shall create and register a state of Arizona certificate of foreign birth for an adopted person who satisfies all of the following:

1. Was born in a foreign country.

2. Is not a United States citizen.

3. Has gone through a completed adoption process in a foreign country before coming to the United States.

4. Has an IR-3 stamped passport.

B. Before the state registrar creates and registers a certificate of foreign birth, either a state court, an adoptive parent or an adult adopted person must submit the following:

1. An adoption decree or other official document finalizing the adoption from the country of the adopted person's birth that has been translated into English.

2. A copy of the passport page showing the IR-3 stamp.

C. Before the state registrar creates and registers a certificate of foreign birth for a parent of an adopted child who has been issued an IR-3 visa and who has completed a readoption process in a court in this state, the parent must provide either of the following:

1. An original state of Arizona certificate of adoption issued by a court in this state.

2. A certified court order of adoption issued by a court in this state and either a birth certificate from the country of the adopted person's birth that has been translated into English or any other written documentation that establishes the date and place of the adopted person's birth and that has been translated into English.

D. If the adopted person does not have an IR-3 stamped passport, before the state registrar creates and registers a certificate pursuant to this section an adoptive parent or an adult adopted person must submit either:

1. An original state of Arizona certificate of adoption issued by a court in this state.

2. A certified court order of adoption issued by a court in this state and either a birth certificate from the country of the adopted person's birth that has been translated into English or any other written documentation that establishes the date and place of the adopted person's birth and that has been translated into English.

3. If the person was not adopted in this state, a court order issued in this state that recognizes the adoption pursuant to section 36-336.

E. The state registrar shall not create and register a state of Arizona certificate of foreign birth for an adopted person who was born in a foreign country and who was a United States citizen at the time of birth. The state registrar shall inform the adoptive parents or the adult adopted person that a birth certificate may be obtained through the United States department of state.

F. A state of Arizona certificate of foreign birth for an adopted person must show the country of birth and state that the certificate is not evidence of United States citizenship for the person for whom it is issued.

36-339. Missing children; notification; flagging birth certificate records; definitions

A. If a child is reported missing to a law enforcement agency in this state, that agency shall notify the state registrar in the state of the child's birth. The notification shall include the missing child's name, date of birth and county of birth.

B. If the state registrar is notified pursuant to subsection A that a child born in this state is missing, the state registrar shall flag the child's registered birth certificate. If the missing child is found, the law enforcement agency that reported the child missing shall notify the state registrar and the state registrar shall remove the flag from the child's registered birth certificate.

C. If the state registrar receives a request for a registered certificate that is flagged, the state registrar shall:

1. Make a photocopy of the photo identification of the person making the request.

2. Document the physical description of the person making the request.

3. Immediately notify a law enforcement agency in this state of the request.

D. For the purposes of this section:

1. "Flag" means to indicate on a child's registered birth certificate that the child is a missing child.

2. "Missing child" means a child whose location cannot be determined and who is reported to a law enforcement agency as abducted, lost or a runaway.

36-340. Adopted individual; sealed original birth certificate; contact preference and medical history forms; confidentiality

A. From and after December 31, 2021 and except as provided in subsection I of this section, the state registrar shall provide to an individual a copy of the individual's original birth certificate that has been sealed due to an adoption and any evidence of the adoption that is held with the original birth certificate, if all of the following are true:

1. The individual is at least eighteen years of age.

2. The individual was born in this state.

3. The individual submits to the state registrar a written request to receive a copy of the original birth certificate.

B. The copy of the original birth certificate shall clearly indicate that it is not a certified copy and that it may not be used for legal purposes.

C. The fees and procedures that apply to obtaining a copy of a registered certificate apply to obtaining a copy of an original birth certificate pursuant to this section.

D. The state registrar shall develop a contact preference form to be filled out by a birth parent, at the birth parent's option, and kept with the original birth certificate as provided in this section. The preference form shall do all of the following:

1. Indicate if the birth parent wants to do any of the following:

(a) Be contacted by the individual who receives the copy of the original birth certificate. If the birth parent wants to be contacted, the birth parent shall include the birth parent's current name, address and telephone number in addition to any other contact information the birth parent wishes to include.

(b) Be contacted only through an intermediary. If the birth parent wants to be contacted through an intermediary, the birth parent shall include the intermediary's name and telephone number.

(c) Not be contacted. The form shall indicate that the birth parent may change the contact preference to allow direct contact or contact through an intermediary by filing an amended contact preference form.

2. Indicate if the birth parent has completed and filed with the state registrar a medical history form.

3. Include the following information:

(a) The name of the child on the original birth certificate.

(b) The date of birth and sex of the child.

(c) The city or town, county and name of the hospital in which the child was born.

(d) The mother's name as shown on the original birth certificate.

(e) The name of the attorney or agency that placed the child for adoption or that the department placed the child for adoption.

(f) Whether the person filling out the form is the birth mother or birth father of the child.

E. The state registrar shall develop a medical history form to be completed by a birth parent at the birth parent's option.

F. The contact preference form and the medical history form are confidential. If the birth parent files the forms, the state registrar shall seal the forms together and retain them with the original birth certificate. The forms shall be given to the individual who receives the original birth certificate. The state registrar may not keep a copy of the contact preference form or the medical history form.

G. A birth parent may file an amended contact preference form or medical history form with the state registrar.

H. The department shall publicize the requirements of this section.

I. The birth parent may file an amended contact preference form pursuant to subsection D, paragraph 1, subdivision (c) of this section or update the information on the contact preference form by providing the state registrar the amended contact preference form or the new information electronically, in writing or in person.

J. The state registrar may not provide to an individual a copy of the individual's original birth certificate that has been sealed due to an adoption, if the individual was born from and after June 20, 1968 and before September 29, 2021.

36-341. Fees received by state and local registrars

A. The director of the department shall establish the fees to be charged for searches, copies of registered certificates, certified copies of registered certificates, amending registered certificates and correcting certificates that are processed by the department. The director may establish a surcharge to be assessed on any local registrar who obtains access to the department's vital records

automation system. A local registrar may establish the local registrar's own fees to be charged for searches, copies of registered certificates, certified copies of registered certificates, amending registered certificates and correcting certificates as determined necessary by the local entity.

B. In addition to fees collected pursuant to subsection A of this section, the state registrar shall assess an additional one dollar surcharge on fees for all certified copies of registered birth certificates. The state registrar shall deposit, pursuant to sections 35-146 and 35-147, all monies received from the surcharge in the confidential intermediary and fiduciary fund established by section 8-135.

C. The state registrar shall keep a true and accurate account of all fees collected by the state registrar under this chapter and shall deposit, pursuant to sections 35-146 and 35-147:

1. Eighty-five per cent of the first four million dollars collected each fiscal year in the vital records electronic systems fund established by section 36-341.01 and the remaining fifteen per cent of the first four million dollars collected each fiscal year in the state general fund.

2. Forty per cent of the amount collected in excess of four million dollars each fiscal year in the vital records electronic systems fund established by section 36-341.01 and the remaining sixty per cent in the state general fund.

D. A local registrar shall keep a true and accurate account of all fees collected by the local registrar under this chapter and shall deposit them with the county treasurer to be credited to a special registration and statistical revenue account of the health department fund.

E. In addition to fees collected pursuant to subsection A of this section, the department shall assess an additional one dollar surcharge on fees for all certified copies of registered death certificates. The department shall deposit, pursuant to sections 35-146 and 35-147, monies received from the surcharge in the child fatality review fund established by section 36-3504.

F. The state and local registrars may exempt an agency as defined in section 41-1001 from any fee required by this section, section 8-135 or section 36-3504.

36-342. Disclosure of information; prohibition

A. The state registrar may provide information contained in vital records to persons, including federal, state, local and other agencies, as required by law and for statistical or research purposes.

B. Except as authorized by law, a local registrar, a deputy local registrar or the state registrar or their employees shall not:

1. Permit inspection of a vital record or evidentiary document supporting the vital record.

2. Disclose information contained in a vital record.

3. Transcribe or issue a copy of all or part of a vital record.

36-343. Duty to provide information to the state registrar

A person who has knowledge of information relating to a birth, death or fetal death must provide this information to the state registrar on request.

CHAPTER 19. DEPARTMENT OF HEALTH SERVICES - VITAL RECORDS AND STATISTICS

ARTICLE 1. ADMINISTRATION

R9-19-101. Definitions

In addition to the definitions in A.R.S. § 36-301, the following definitions apply in this Chapter unless otherwise stated:

1. "Administrator" means an individual designated by the governing authority of a health care institution to have the authority and responsibility for managing the health care institution.
2. "Affidavit" means a document that is signed by an individual:
   a. Who attests to the validity of the facts on the document, and
   b. Whose signature is notarized.
3. "Anatomical gift" has the same meaning as in A.R.S. § 36-841.
4. "Birth record" means the information specified in R9-19-201 that is maintained by the Department:
   a. As a written registered certificate, or
   b. In a database.
5. "Congenital anomaly" means an abnormality of body structure, function, or chemistry, or of chromosomal structure or composition that is present at or before birth.
6. "Custody" has the same meaning as "legal decision-making" in A.R.S. § 25-401.
7. "Death record" means the information specified in R9-19-302 that is maintained by the Department:
   a. As a written registered certificate, or
   b. In a database.
8. "Delivery" means the complete expulsion or extraction of a product of human conception from its mother.
9. "Document" or "documented" means in written, photographic, electronic, or other permanent form.
10. "Electronic signature" has the same meaning as in A.R.S. § 44-7002.
11. "Facility" has the same meaning as "facilities" in A.R.S. § 36-401.
12. "Fetal death record" means the information specified in R9-19-305(B) that is maintained by the Department:
    a. As a written registered certificate, or
    b. In a database.
13. "Funeral director" has the same meaning as in A.R.S. § 32-1301.
14. "Guardian" has the same meaning as in A.R.S. § 14-10103.
15. "Health professional license number" means a standard unique identifier for a health care provider assigned by the state governmental agency that regulates the health care provider.
16. "Hospice inpatient facility" has the same meaning as in A.A.C. R9-10-101.
17. "Hospital" has the same meaning as in A.A.C. R9-10-101.
18. "Independent source" means a person who is not:
    a. The individual submitting an evidentiary document; or
    b. Related by consanguinity, adoption, or marriage to the individual submitting an evidentiary document.
19. "Injury" means damage to a human body caused by an external source as determined by a medical examiner or tribal law enforcement authority.
20. "Inpatient" means an individual who is receiving services in a facility as an inpatient, as determined by the facility.
21. "Medical certifier" means a health care provider, medical examiner, or tribal law enforcement authority authorized to sign a medical certification of death as prescribed in A.R.S. § 36-325.
22. "Medical record" has the same meaning as "medical records" in A.R.S. § 12-2291.
23. "Medical record number" means a standard unique identifier, assigned by a licensed health care institution or a health care provider, for documentation concerning the diagnosis or treatment of a patient.
24. "National Provider Identifier" means a standard unique number for a health care provider assigned by the Centers for Medicare and Medicaid Services.
25. "Nursing care institution" has the same meaning as in A.R.S. § 36-401.
26. "Organ procurement organization" has the same meaning as in A.R.S. § 36-841.
27. "Outpatient" means an individual who is receiving services from a facility but is not an inpatient as determined by the facility.
28. "Part" has the same meaning as in A.R.S. § 36-841.
29. "Passport" means an official document issued by the government of a specific country that confirms the identity and citizenship of an individual and allows the individual to travel to and from the specific country.
30. "Person" has the same meaning as in A.R.S. § 1-215 and includes a governmental agency.
31. "Personal knowledge" means having observed an individual's mother:
    a. In an apparent pregnant state within two months before the individual's date of birth and in a non-pregnant state after the individual's date of birth, or
    b. Giving birth to the individual.
32. "Plurality" means the number of fetuses carried in a mother's womb during a pregnancy.
33. "Registered nurse practitioner" has the same meaning as "nurse practitioner" in A.R.S. § 32-1601.
34. "Residence" means an address or location at which an individual lives.
35. "Signature" means:
    a. The first and last name of an individual written with his or her own hand as a form of identification or authorization;
    b. An electronic signature; or

c. A mark or symbol made by an individual, representing the individual's identification or authorization, and, if not notarized, the first and last name of another individual, written with his or her own hand, who witnessed the individual make the mark or symbol.

36. "State file number" means the official state number that is assigned to a vital record by the State Registrar or a local registrar or deputy local registrar when registering a birth, death, or fetal death.
37. "Transfer" has the same meaning as in A.A.C. R9-10-101.
38. "Transportation" means the use of an animal or vehicle for conveyance or travel from one place to another.
39. "Tribal community" means a tract of land held by an Indian tribe recognized by the Federal Bureau of Indian Affair's Office of Federal Acknowledgement under 25 CFR Part 83.
40. "WIC" means a federally funded program established by the Child Nutrition Act of 1966 that provides eligible women, infants, and children with food, nutrition education, breastfeeding support, and referrals.

Historical Note

Former Section R9-19-101 repealed, new Section R9-19-101 renumbered from R9-19-102 and amended effective July 31, 1989 (Supp. 89-3). Amended effective February 12, 1996 (Supp. 96-1). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Typographical error of transposed A.R.S. citation numbers corrected at subsection 20 at the request of the Department of Health Services on September 27, 2016; Office file number R16-223 (Supp. 16-3). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-102. Evidentiary Documents

A person submitting an evidentiary document to support the creation, correction, or amendment of a vital record for an individual or to request a copy of a certificate issued under this Chapter shall ensure that:

1. The evidentiary document:
   a. Is documentation of a transaction, occurrence, billing, or legal relationship;
   b. Contains the date the evidentiary document was created;
   c. Is one of the following:
      i. An original document;
      ii. A copy of a document, certified by the issuing entity;
      iii. A copy of the individual's medical record;
      iv. If applicable, a copy of the individual's mother's medical record;
      v. A record or document, accompanied by a written statement signed by the custodian of the record or document, attesting to the validity of the record or document;
      vi. A document submitted by an independent source directly to the State Registrar or, if applicable, a local registrar;
      vii. A document in a sealed envelope provided by an independent source;
      viii. A copy of a published document, such as a newspaper, a magazine, or a book; or
      ix. A copy of a governmental agency document; and
   d. Is from a different independent source than any other evidentiary document submitted to support the creation, correction, or amendment of the vital record or the request for the copy of a certificate issued under this Chapter; and
2. If the evidentiary document is in a language other than English, the evidentiary document is accompanied by:
   a. An English translation of the evidentiary document; and
   b. A written statement signed by the translator, attesting that the translator is competent to translate the evidentiary document and that the English translation is an accurate and complete translation of the evidentiary document.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-102 renumbered to R9-19-101, new Section R9-19-102 renumbered from R9-19-106 and amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section R9-19-102 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-103. Review Process

A. The State Registrar or a local registrar or deputy local registrar shall review for compliance with requirements in A.R.S. Title 36, Chapter 3 and this Chapter the information, evidentiary documents, and, if applicable, fee submitted for:
   1. Registering a birth, death, or fetal death;
   2. Correcting or amending a registered birth record, death record, or fetal death record;
   3. Obtaining a disposition-transit permit;
   4. Obtaining a disinterment-reinterment permit; or
   5. Obtaining a copy of a certificate issued under this Chapter.

B. If the State Registrar or a local registrar or deputy local registrar determines that the information, evidentiary documents, and, if applicable, fee submitted for a purpose specified in subsections (A)(1) through (5) are in compliance with requirements in A.R.S. Title 36, Chapter 3 and this Chapter, the State Registrar, local registrar, or deputy local registrar shall, as applicable:
   1. Register the birth, death, or fetal death;

2. Correct or amend the registered birth record, death record, or fetal death record;
3. Issue the disposition-transit permit;
4. Issue the disinterment-reinterment permit; or
5. Issue the copy of a certificate.

C. If the State Registrar or a local registrar or deputy local registrar determines that information, an evidentiary document, or, if applicable, a fee submitted for a purpose specified in subsections (A)(1) through (5):
1. Is incomplete, illegible, or inconsistent with other information or evidentiary documents submitted, the State Registrar, local registrar, or deputy local registrar may request in writing the missing information or clarification of the required information;
2. Is not in compliance with requirements in A.R.S. Title 36, Chapter 3 and this Chapter, the State Registrar, local registrar, or deputy local registrar may, in writing, state how the submitted information, evidentiary document, or, if applicable, fee is not in compliance and:
   a. Request additional information, evidentiary documents, or fee required in A.R.S. Title 36, Chapter 3 or this Chapter; or
   b. Provide information to a person submitting the information on what is necessary for compliance; or
3. May not be valid or accurate, the State Registrar, local registrar, or deputy local registrar may request in writing an evidentiary document, as determined by the State Registrar, local registrar, or deputy local registrar, to validate the information.

D. If the requested information, clarification, evidentiary document, or fee specified in subsection (C) is not submitted within the applicable time period specified in this Chapter, the State Registrar, local registrar, or deputy local registrar shall determine whether the information, evidentiary documents, and, if applicable, fee that had been submitted support the purpose specified in subsections (A)(1) through (5).

E. If the State Registrar or a local registrar or deputy local registrar determines that information, evidentiary documents, and, if applicable, fee submitted for a purpose specified in subsections (A)(1) through (5):
1. Supports the requested action, the State Registrar or a local registrar or deputy local registrar shall, as applicable:
   a. Register the birth, death, or fetal death;
   b. Correct or amend the registered birth record, death record, or fetal death record; or
   c. Issue the disposition-transit permit, disinterment-reinterment permit, or copy of the certificate; or
2. Does not support the requested action, the State Registrar or a local registrar or deputy local registrar:
   a. Shall not register the birth, death, or fetal death or correct or amend the registered birth record, death record, or fetal death record;
   b. Shall not issue the disposition-transit permit, disinterment-reinterment permit, or copy of the certificate; and
   c. If not registering the birth, death, or fetal death; correcting or amending the registered birth record, death record, or fetal death record; or issuing the disposition-transit permit, disinterment-reinterment permit, or copy of the certificate, shall provide written notice to the person who submitted the request that includes:
      i. The reasons for not registering the birth, death, or fetal death; correcting or amending the registered birth record, death record, or fetal death record; or issuing the disposition-transit permit, disinterment-reinterment permit, or copy of the certificate; and
      ii. Except as provided in R9-19-308(D) or R9-19-312(C), as applicable, the right to appeal the State Registrar's determination as prescribed in A.R.S. Title 41, Chapter 6, Article 6.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-103 repealed, new Section R9-19-103 renumbered from R9-19-107 and amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section R9-19-103 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-104. Duties of Local Registrars

A. A local registrar shall:
1. Only use paper approved by the Department when issuing:
   a. A certified copy of an individual's certificate of birth registration according to R9-19-211,
   b. A certified copy of a deceased individual's certificate of death registration according to R9-19-315,
   c. A certified copy of a certificate of fetal death registration according to R9-19-317, or
   d. A certified copy of a certificate of birth resulting in stillbirth according to R9-19-317; and
2. Ensure that, before a document in subsection (A)(1)(a) through (d) is issued, the document contains:
   a. The state seal,
   b. The signature of the State Registrar or an individual designated by the State Registrar, and
   c. The raised seal of local registrar's registration district.

B. Except as directed by the State Registrar, a local registrar shall use the electronic data systems provided by the Department for all functions designated by the State Registrar or this Chapter to be performed by the local registrar.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-104 repealed, new Section R9-19-104 renumbered from R9-19-109 and amended effective July 31, 1989 (Supp. 89-3). Amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-105. Fee Schedule

A. When a fee is specified in this Chapter, the following fees apply:
1. For a noncertified copy of a certificate, $5.00;
2. For a certified copy of a:
   a. Certificate of birth registration, $19.00;
   b. Certificate of delayed birth registration, $19.00;
   c. Certificate of death registration, $19.00;
   d. Certificate of delayed death registration, $19.00;
   e. Certificate of fetal death registration, $19.00;
   f. Certificate of birth resulting in stillbirth, $19.00;
   g. Certificate of delayed fetal death registration, $19.00; or
   h. Certificate of no record, $19.00;
3. For a search to verify birth or death data for statistical or research purposes according to A.R.S. § 36-342(A), $5.00;
4. For a request to establish a:
   a. Delayed birth record for an individual and register the individual's birth, $19.00;
   b. Registered record of foreign birth for an adopted individual, $19.00;
   c. Delayed death record for a deceased individual and register the deceased individual's death, $19.00;
   d. Delayed fetal death record for a fetal death and register the fetal death, $19.00; or
   e. Death record or delayed death record for a presumptive death under A.R.S. § 36-325 or 36-328, $19.00; and
5. For a request to amend or correct information in a:
   a. Registered birth record, $29.00;
   b. Registered death record, $29.00; or
   c. Registered fetal death record, $29.00.

B. If a request submitted and fee paid, as prescribed in subsection (A)(4) or (5), results in the registration of a birth, death, or fetal death or a correction or amendment to a registered birth record, registered death record, or registered fetal death record, the Department shall provide to the person submitting the request and paying the fee a certified copy of the applicable certificate for the registered, corrected, or amended record.

C. Except as provided in subsection (E), the Department shall not charge an agency, as defined in A.R.S. § 41-1001, any fee in this Section.

D. In addition to the fees charged in subsection (A), the Department shall assess the following surcharges:
1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00; and
2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;

E. A local registrar shall pay the following surcharges to the Department for copies issued by the local registrar:
1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00;
2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;
3. For system access for each certified copy of a certificate; $4.00; and
4. For system access for each noncertified copy of a certificate, $1.00.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-105 repealed, new Section R9-19-105 renumbered from R9-19-111 and amended effective July 31, 1989 (Supp. 89-3). Section R9-19-105 repealed; new Section R9-19-105 renumbered from R9-19-413 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

ARTICLE 2. VITAL RECORDS FOR BIRTH

R9-19-201. Information for a Birth Record

A. Except as provided in subsection (B) or R9-19-204(F) or (I), the information submitted for an individual's birth record includes the following:
1. Information for the individual's certificate of birth registration provided by the individual's mother or, if applicable, the individual's father or another family member who is of legal age:
   a. The individual's name;
   b. The following information about the individual's mother:
      i. Name before first marriage;
      ii. Date of birth;
      iii. State, territory, or foreign country where the individual's mother was born; and
      iv. Street address, apartment number if applicable, city or town, state, zip code, and county of the individual's mother's residence; and
   c. If applicable according to A.R.S. § 36-334, the following information about the individual's father:

i. Name;
ii. Date of birth; and
iii. State, territory, or foreign country where the father was born;

2. Other information for the individual's birth record provided by the individual's mother or, if applicable, the individual's father or another family member who is of legal age:
   a. The individual's mother's:
      i. Current last name,
      ii. Social Security Number,
      iii. Race,
      iv. Height, and
      v. Pre-pregnancy weight;
   b. Whether the individual's mother:
      i. Is of Hispanic origin and, if so, the type of Hispanic origin;
      ii. Received food from WIC for herself during the pregnancy;
      iii. Was ever married; or
      iv. Was married at any time in the ten months immediately preceding the individual's birth;
   c. Whether the individual's mother's residence is:
      i. Inside a city's limits, or
      ii. In a tribal community;
   d. The following information about the individual's mother:
      i. The highest degree or level of education completed by the individual's mother at the time of the individual's birth;
      ii. If the individual's mother's mailing address is different from the address in subsection (A)(1)(b)(iv), the individual's mother's mailing address; and
      iii. Date the last normal menses began;
   e. The individual's mother's history of:
      i. Smoking before or during the pregnancy,
      ii. Prenatal care for this pregnancy, and
      iii. Previous pregnancies and pregnancy outcomes;
   f. If applicable according to A.R.S. § 36-334, the following information about the individual's father:
      i. Social Security Number;
      ii. Race;
      iii. Whether the father is of Hispanic origin and, if so, the type of Hispanic origin; and
      iv. Highest degree or level of education completed by the father at the time of the individual's birth;
   g. If the birth occurred at a residence and was not attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is willing and able to request the registration of the individual's birth, the name of the person who assisted the birth and the person's relationship to the individual's mother; and
   h. Whether a Social Security number has been requested for the individual;
3. Information for the individual's certificate of birth registration provided by the hospital where the individual was born or, if the individual was not born in a hospital, by the physician, registered nurse practitioner, nurse midwife, or midwife who attended the birth and is willing and able to provide the information:
   a. The individual's sex;
   b. The individual's date and time of birth;
   c. The individual's plurality of delivery;
   d. If the plurality of delivery involves more than one, the individual's order of birth;
   e. If the individual was born in a hospital:
      i. The name, type, and, if applicable, National Provider Identifier of the hospital where the birth occurred; and
      ii. The city or town and county where the hospital is located;
   f. If the birth occurred at a residence and was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is willing and able to provide the information:
      i. The street address, city or town, and county where the residence is located; and
      ii. Whether the birth was planned to occur at the residence; and
   g. If the birth occurred at a facility other than a hospital or residence and was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is willing and able to provide the information:
      i. The name, type, and, if applicable, National Provider Identifier of the facility where the birth occurred; and
      ii. The city or town and county where the facility is located; and
4. Other information for the individual's birth record provided by the hospital where the individual was born or, if the individual was not born in a hospital, by the physician, registered nurse practitioner, nurse midwife, or midwife who attended the birth and is willing and able to provide the information:
   a. The principal source of payment for the individual's birth;
   b. The name of the person who assisted the individual's birth and the person's health care provider license type;
   c. If the person specified according to subsection (A)(4)(b):
      i. Has a National Provider Identifier, the person's National Provider Identifier; or

ii. Does not have a National Provider Identifier, the person's health professional license number;

d. The individual's mother's medical record number, assigned by the hospital, physician, registered nurse practitioner, nurse midwife, or midwife to document the diagnosis or treatment of the individual's mother;

e. If the individual's mother was not married at the time of the birth or at any time during the ten months preceding the birth, whether a voluntary acknowledgement of paternity was completed by the individual's father;

f. The individual's mother's:

i. Weight at the time of delivery, and

ii. History of cesarean deliveries;

g. The following information about the individual's mother:

i. Medical risk factors during this pregnancy,

ii. Characteristics of the labor and delivery, and

iii. Medical complications during labor or delivery;

h. Whether the individual's mother was transferred from a residence or other facility to another facility for a maternal medical condition or fetal medical condition before the birth;

i. If the individual's mother was transferred from one facility to another facility before the birth, the name or location of the facility from which the individual's mother was transferred;

j. The following information about the individual:

i. The fetal presentation at delivery;

ii. The individual's birth weight and length;

iii. An estimate of gestation by the person who performed the delivery;

iv. Characteristics of the individual's medical condition after delivery;

v. Whether the individual has any congenital anomalies and, if so, the type of congenital anomalies; and

vi. Information about immunizations received by the individual after delivery;

k. Whether the individual was transferred within 24 hours after the individual's delivery;

l. If the individual was transferred within 24 hours after the individual's delivery, the name of the facility to which the individual was transferred;

m. Whether the individual was alive at the time the information in this subsection was submitted; and

n. Whether the individual was being breastfed at the time the information in this subsection was submitted.

B. If the birth of an individual did not occur in a hospital and was either not attended by a physician, registered nurse practitioner, nurse midwife, or midwife, or was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is not willing or not able to provide the information specified in subsections (A)(3) and (4), the information submitted for an individual's birth record includes the following:

1. Information for the individual's certificate of birth registration that includes:

a. The information in subsection (A)(1);

b. The information in subsections (A)(3)(a) through (d);

c. Whether the birth occurred at a residence and, if so, whether the birth was planned to occur at the residence;

d. If the birth did not occur at a residence, a description of where the birth occurred; and

e. The street address, city or town, and county where the birth occurred; and

2. Other information for the individual's birth record that includes:

a. The information in subsection (A)(2);

b. The information in subsections (A)(4)(e) through (g), (j)(i) and (ii), and (k) through (n);

c. The name of the person who assisted the individual's birth and the person's relationship to the individual's mother; and

d. Whether the individual's mother's temperature was 38° C or higher during labor.

Historical Note

Amended effective July 31, 1989 (Supp. 89-3). Section R9-19-201 repealed; new Section R9-19-201 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-202. Requests from Hospitals for Birth Registration

A. Before requesting the registration of the birth of an individual born in a hospital, the administrator or person in charge of the medical records for the hospital where the individual was born shall obtain, in a written format:

1. The information in R9-19-201(A); and

2. A statement attesting to the validity of the information in:

a. R9-19-201(A)(1) and (2), signed and dated by the person providing the information; and

b. R9-19-201(A)(3) and (4), signed and dated by the person providing the information.

B. To request the registration of the birth of an individual born in a hospital, within seven days after the date of the individual's birth, the administrator or person in charge of the medical records for the hospital where the individual was born shall:

1. Enter into the state electronic birth registration system the information in R9-19-201(A); and

2. If applicable, submit to the State Registrar or a local registrar or deputy local registrar the documentation in subsection (E) or (F).

C. To request the registration of the birth of an individual born in a hospital, more than seven days but less than one year after the individual's birth, the administrator or person in charge of the medical records for the hospital where the individual was born shall submit, in a Department-provided format, to the State Registrar or a local registrar or deputy local registrar:
1. The information required in R9-19-201(A);
2. If the information required in R9-19-201(A) is not submitted electronically, a written statement attesting to the validity of the submitted information, signed and dated by the administrator or person in charge of the medical records; and
3. If applicable, the documentation in subsection (E) or (F).

D. If an individual was born in a hospital and the individual's birth has not been registered more than one year after the individual's birth, the administrator or person in charge of the medical records for the hospital where the individual was born may submit to the State Registrar to request the registration of the individual's birth:
1. The information required in R9-19-201(A);
2. If applicable, the documentation in subsection (E) or (F);
3. A copy of supportive medical records; and
4. A written statement attesting to the validity of the submitted information, signed and dated by the administrator or person in charge of the hospital's medical records.

E. If the name of an individual's mother in R9-19-201(A)(1)(b)(i) is based on a court order establishing maternity, the person submitting the information for a birth record shall submit a copy of the court order establishing maternity, certified by the issuing entity.

F. If the name of an individual's father in R9-19-201(A)(1)(c)(i) is based on:
1. A voluntary acknowledgement of paternity, the person submitting the information for a birth record shall submit a copy of the voluntary acknowledgement of paternity that meets the requirements in A.R.S. § 25-812; or
2. An administrative order or a court order establishing paternity, the person submitting the information for a birth record shall submit a copy of the administrative order or court order establishing paternity, certified by the issuing entity.

Historical Note

Amended effective July 31, 1989 (Supp. 89-3). Section R9-19-202 repealed; new Section R9-19-202 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-203. Requests for Birth Registration from Physicians, Registered Nurse Practitioners, Nurse Midwives, or Midwives

A. Before requesting the registration of the birth of an individual not born in a hospital whose birth was attended by a physician, registered nurse practitioner, nurse midwife, or midwife, the physician, registered nurse practitioner, nurse midwife, or midwife who attended the birth and is willing and able to request the registration of the individual's birth shall:
1. Obtain, in a written format:
   a. The information in R9-19-201(A)(1) and (2); and
   b. A statement attesting to the validity of the information in R9-19-201(A)(1) and (2), signed and dated by the person providing the information;
2. Provide, in a Department-provided format, the information in R9-19-201(A)(3) and (4); and
3. Sign and date a written statement attesting to the validity of the information in R9-19-201(A)(3) and (4).

B. A physician, registered nurse practitioner, nurse midwife, or midwife who attended an individual's birth and is willing and able to request the registration of the individual's birth shall:
1. Maintain a copy of the document in subsection (A) for at least 10 years after the date of the individual's birth; and
2. Provide a copy of the document in subsection (A) to the State Registrar for review within two business days after the time of the State Registrar's request, where a business day is a Monday, Tuesday, Wednesday, Thursday, or Friday that is not a state holiday or a statewide furlough day.

C. To request the registration of the birth of an individual not born in a hospital whose birth was attended by a physician, registered nurse practitioner, nurse midwife, or midwife, within seven days after the date of the individual's birth, if the physician, registered nurse practitioner, nurse midwife, or midwife is willing and able to, the physician, registered nurse practitioner, nurse midwife, or midwife shall:
1. Either:
   a. Enter into the state electronic birth registration system the information required in R9-19-201(A), or
   b. Submit a copy of the document in subsection (A) to the State Registrar or a local registrar or deputy local registrar; and
2. If applicable, submit to the State Registrar or a local registrar or deputy local registrar the document required in subsection (E) or (F).

D. To request the registration of the birth of an individual not born in a hospital whose birth was attended by a physician, registered nurse practitioner, nurse midwife, or midwife, more than seven days but less than one year after the individual's birth, if the physician, registered nurse practitioner, nurse midwife, or midwife is willing and able to, the physician, registered nurse practitioner, nurse midwife, or midwife shall submit, in a Department-provided format, to the State Registrar or a local registrar or deputy local registrar:
1. The information required in R9-19-201(A);
2. A copy of the medical records related to the individual's birth;
3. If applicable, the document required in subsection (E) or (F); and

4. A written statement, signed and dated by the physician, registered nurse practitioner, nurse midwife, or midwife, attesting, to the best of the knowledge of the physician, registered nurse practitioner, nurse midwife, or midwife, that the submitted information and documents are valid.

E. If the name of an individual's mother in R9-19-201(A)(1)(b)(i) is based on a court order establishing maternity, the person submitting the information for a birth record shall submit a copy of the court order establishing maternity, certified by the issuing entity.

F. If the name of an individual's father in R9-19-201(A)(1)(c)(i) is based on:
1. A voluntary acknowledgement of paternity, the person submitting the information for a birth record shall submit a copy of the voluntary acknowledgement of paternity that meets the requirements in A.R.S. § 25-812; or
2. An administrative order or a court order establishing paternity, the person submitting the information for a birth record shall submit a copy of the administrative order or court order establishing paternity, certified by the issuing entity.

G. If the State Registrar or a local registrar or deputy local registrar determines that a request for registration of an individual's birth submitted according to subsection (C) or (D):
1. Contains the required information and, if applicable, evidentiary documents, the State Registrar, local registrar, or deputy local registrar shall establish a birth record for the individual and register the individual's birth; or
2. Does not contain the required information or applicable evidentiary documents, the State Registrar, a local registrar, or deputy local registrar shall:
   a. Not establish a birth record for the individual or register the individual's birth; and
   b. Provide written notification to the person who submitted the request, according to R9-19-103(C):
      i. Specifying the missing, incomplete, false, or invalid information or evidentiary documents; and
      ii. Informing the person that the person has:
         (1) For a request submitted according to subsection (C), until 30 days after the individual's birth to provide the required information; or
         (2) For a request submitted according to subsection (D), until one year after the individual's birth or 30 days after the date of the written notification in subsection (G)(2)(b), whichever is later, to provide the required information or evidentiary documents.

Historical Note

Former Section R9-19-203 repealed, new Section R9-19-203 renumbered from R9-19-204 and amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section R9-19-203 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-204. Requests for Birth Registration from Persons Other than Hospitals or Health Care Providers

A. To request the registration of the birth of an individual not born in a hospital whose birth was either not attended by a physician, registered nurse practitioner, nurse midwife, or midwife, or was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is not willing or not able to comply with requirements in R9-19-203, within seven days after the date of the individual's birth, the individual's parent, guardian, or person who has custody of the individual shall submit the following to the State Registrar or a local registrar or deputy local registrar:
1. The information required in R9-19-201(B);
2. If the name of the individual's mother in R9-19-201(A)(1)(b)(i) is based on a court order establishing maternity, a copy of the court order establishing maternity, certified by the issuing entity;
3. If the name of the individual's father in R9-19-201(A)(1)(c)(i) is based on:
   a. A voluntary acknowledgement of paternity, a copy of the voluntary acknowledgement of paternity that meets the requirements in A.R.S. § 25-812; or
   b. An administrative order or a court order establishing paternity, a copy of the administrative order or court order establishing paternity, certified by the issuing entity;
4. A written statement attesting to the validity of the submitted information, signed and dated by the person submitting the request;
5. One evidentiary document establishing the individual's mother's presence in Arizona at the time of the individual's birth that:
   a. Contains the individual's mother's first and last name, the individual's mother's street address or the location where the individual's mother was present in Arizona, and the date the evidentiary document was created; and
   b. Was created no more than 30 days before the date of the individual's birth or seven days after the date of the individual's birth;
6. One evidentiary document supporting the facts of the individual's birth, such as:
   a. A copy of the part of the individual's mother's medical record showing services received by the individual's mother during:
      i. The three months before the individual's birth, or
      ii. After the individual's birth and before the submission of the request to register the individual's birth;
   b. A copy of the individual's medical record, if seen by a physician, registered nurse practitioner, nurse midwife, or midwife before the submission of the request to register the individual's birth;
   c. The laboratory results of a newborn screening test, conducted under A.R.S. § 36-694;
   d. An affidavit from an independent source, attesting to personal knowledge of the individual's birth;
   e. A certified blessing or baptismal certificate for the individual with either a raised seal of the church or accompanied by a written statement signed by the church minister or other church official; or

f. Another document from an independent source containing information that supports the facts of the individual's birth; and
7. If the request for registration of the individual's birth is submitted by:
a. The individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; or
b. A person who has custody of the individual, a copy of the court order establishing custody, certified by the issuing court.

B. To request the registration of the birth of an individual not born in a hospital whose birth was either not attended by a physician, registered nurse practitioner, nurse midwife, or midwife, or was attended by a physician, registered nurse practitioner, nurse midwife, or midwife who is not willing or not able to comply with requirements in R9-19-203, more than seven days but less than one year after the individual's birth, the individual's parent, guardian, or person who has custody of the individual shall submit the following to the State Registrar or a local registrar or deputy local registrar:
1. The information required in R9-19-201(B);
2. If the name of the individual's mother in R9-19-201(A)(1)(b)(i) is based on a court order establishing maternity, a copy of the court order establishing maternity, certified by the issuing entity;
3. If the name of the individual's father in R9-19-201(A)(1)(c)(i) is based on:
a. A voluntary acknowledgement of paternity, a copy of the voluntary acknowledgement of paternity that meets the requirements in A.R.S. § 25-812; or
b. An administrative order or a court order establishing paternity, a copy of the administrative order or court order establishing paternity, certified by the issuing entity.
4. A written statement attesting to the validity of the submitted information, signed and dated by the person submitting the request;
5. One evidentiary document establishing the individual's mother's presence in Arizona at the time of the individual's birth that:
a. Contains the individual's mother's first and last name, the individual's mother's street address or the location where the individual's mother was present in Arizona, and the date the evidentiary document was created; and
b. Was created no more than 30 days before the date of the individual's birth or no more than 30 days after the date of the individual's birth;
6. One evidentiary document supporting the facts of the individual's birth, such as:
a. A copy of the part of the individual's mother's medical record showing services received by the individual's mother during the three months before or six weeks after the individual's birth;
b. A copy of the individual's medical record, if seen by a physician, registered nurse practitioner, nurse midwife, or midwife less than six weeks after the individual's birth;
c. The laboratory results of a newborn screening test, conducted under A.R.S. § 36-694;
d. An affidavit from an independent source, attesting to personal knowledge of the individual's birth;
e. A certified blessing or baptismal certificate for the individual with either a raised seal of the church or accompanied by a written statement signed by the church minister or other church official; or
f. Another document from an independent source containing information that supports the facts of the individual's birth; and
7. If the request for registration of the individual's birth is submitted by:
a. The individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; or
b. A person who has custody of the individual, a copy of the court order establishing custody, certified by the issuing court.

C. If the State Registrar or a local registrar or deputy local registrar determines that a request for registration of an individual's birth submitted according to subsection (A) or (B) and the evidentiary documents submitted as part of the request:
1. Contain the required information, meet the requirements in subsection (A) or (B), as applicable, and are true and valid, the State Registrar, local registrar, or deputy local registrar shall establish a birth record for the individual and register the individual's birth; or
2. Do not contain the required information, do not meet the requirements in subsection (A) or (B), as applicable, or may not be true or valid, the State Registrar, local registrar, or deputy registrar shall:
a. Not establish a birth record for the individual or register the individual's birth; and
b. Provide written notification to the person who submitted the request according to R9-19-103(C):
i. Specifying the missing, incomplete, false, or invalid information or evidentiary documents; and
ii. Informing the person that the person has until one year after the individual's birth or 30 days after the date of the written notification in subsection (C)(2)(b), whichever is later, to provide the required information or evidentiary documents.

D. Except as provided in R9-19-202(D), a request for registration of an individual's birth, which occurred in Arizona, more than one year after the individual's birth, may be submitted by:
1. The individual, if the individual is of legal age or is married;
2. The individual's parent, if the individual is not of legal age and is not married;
3. The individual's guardian; or
4. A person who has custody of the individual.

E. Before a person in subsection (D) may request the registration of an individual's birth more than one year after the individual's birth, the person shall request a certified copy of the individual's certificate of birth registration, according to the requirements in R9-19-211, and receive a "Certificate of No Record."

F. Except as provided in subsection (I), to request the registration of an individual's birth, which occurred in Arizona, more than one year after the individual's birth, a person in subsection (D) shall submit to the State Registrar:
1. A "Certificate of No Record" for the individual issued by the State Registrar, dated not more than five years before the date the request in this subsection is submitted;

2. The following information, in a Department-provided format:
   a. Whether the individual has a registered birth record in another state or country;
   b. If the individual has a registered birth record in another state or country, the state or country that registered the individual's birth;
   c. The following information about the individual:
      i. Current name;
      ii. Name before first marriage;
      iii. Sex;
      iv. Date of birth;
      v. Town, city, or county where the individual's birth occurred; and
      vi. Race;
   d. The following information about the individual's mother:
      i. Name at the time of the individual's birth;
      ii. Name before first marriage;
      iii. Date of birth;
      iv. City or town, county, and state of the individual's mother's usual residence at the time of the individual's birth;
      v. State, territory, or foreign country where the individual's mother was born;
      vi. Social Security Number;
      vii. Race;
      viii. Whether the individual's mother is of Hispanic origin and, if so, the type of Hispanic origin;
      ix. Whether the individual's mother's usual residence at the time of the individual's birth was in a tribal community; and
      x. If the individual's mother's usual residence at the time of the individual's birth was in a tribal community, the name of the tribal community;
   e. If applicable according to A.R.S. § 36-334, the following information about the individual's father:
      i. Name;
      ii. Date of birth;
      iii. State, territory, or foreign country where the individual's father was born;
      iv. Social Security Number;
      v. Race; and
      vi. Whether the individual's father is of Hispanic origin and, if so, the type of Hispanic origin;
   f. If the individual is not of legal age and is not married, a written statement attesting to the validity of the information required in subsections (F)(2)(a) through (e), signed by:
      i. The individual's parent; or
      ii. If applicable, the individual's guardian or the person who has custody of the individual; and
   g. If the individual is of legal age or married, a written statement attesting to the validity of the information required in subsections (F)(2)(a) through (e), signed by:
      i. The individual; or
      ii. If applicable, the individual's guardian or the person who has custody of the individual;
3. If the information is submitted by:
   a. The individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; or
   b. A person who has custody of the individual, a copy of the court order establishing custody, certified by the issuing court;
4. The following documents:
   a. If the individual is 14 years of age or younger:
      i. Except as provided in subsection (F)(5)(a), an affidavit attesting to the facts of birth signed by the individual's father, the individual's mother, or other adult family member of the individual who has personal knowledge of the individual's birth;
      ii. At least one evidentiary document containing the facts of the individual's birth, established before the individual was five years of age; and
      iii. At least one evidentiary document establishing the individual's mother's presence in Arizona at the time of the individual's birth; or
   b. If the individual is over 14 years of age:
      i. Except as provided in subsection (F)(5)(b), an affidavit attesting to the facts of birth signed by the individual's father, the individual's mother, or other adult family member of the individual, who is at least ten years older than the individual and who has personal knowledge of the individual's birth;
      ii. At least one evidentiary document containing the facts of the individual's birth, established in the first ten years of the individual's life;
      iii. At least one evidentiary document containing the facts of the individual's birth, established at least five years before the date of submission; and
      iv. At least one evidentiary document establishing the individual's mother's presence in Arizona at the time of the individual's birth;

5. If an affidavit attesting to the facts of birth from the individual's father, the individual's mother, or other adult family member of the individual at least ten years older than the individual, who has personal knowledge of the individual's birth, is not available and:
   a. The individual is 14 years of age or younger, an additional evidentiary document containing the facts of the individual's birth, established before the individual was five years of age; or
   b. The individual is over 14 years of age, an additional evidentiary document containing the facts of the individual's birth, established at least five years before the date of submission; and
6. The fee in R9-19-105 for a request to establish a delayed birth record and register the individual's birth.

G. A person submitting a request for the registration of an individual's birth according to subsection (F) shall ensure that an evidentiary document required in:
1. Subsection (F)(4)(a)(ii) or subsections (F)(4)(b)(ii) and (F)(4)(b)(iii), as applicable, contains, in addition to the individual's first and last name:
   a. The individual's date of birth;
   b. The town, city, or county where the individual's birth occurred;
   c. The first and last name of the individual's mother, submitted as required in subsection (F)(2)(d)(i); or
   d. If applicable, the first and last name of the individual's father, submitted as required in subsection (F)(2)(e)(i); and
2. Subsection (F)(4)(a)(iii) or (F)(4)(b)(iv), as applicable:
   a. Contains the individual's mother's first and last name and street address, and
   b. Was created no more than six months before the date of the individual's birth or six months after the date of the individual's birth.

H. If a request for the registration of an individual's birth is submitted according to subsection (F) and the individual's birth occurred in Arizona before 1970, the State Registrar may:
1. Waive one of the evidentiary documents required in subsection (F)(4)(b) as long as at least two other evidentiary documents verify each of the pieces of the individual's birth information required in subsection (G)(1);
2. Accept as an evidentiary document an affidavit from an independent source, attesting to personal knowledge of the individual's birth; or
3. Consider all evidentiary documents submitted to determine whether the information contained in the evidentiary documents supports the registration of the individual's birth.

I. If an individual's birth occurred in Arizona before 1970, the individual is a member of a tribe recognized by the Federal Bureau of Indian Affair's Office of Federal Acknowledgement under 25 CFR Part 83, and the individual's birth is not registered, the individual or the individual's guardian may request the registration of the individual's birth by submitting to the State Registrar:
1. A "Certificate of No Record" for the individual issued by the State Registrar, dated not more than five years before the date the request in this subsection is submitted;
2. The following information, in a Department-provided format:
   a. Whether the individual has a registered birth record from another state or country;
   b. If the individual has a registered birth record from another state or country, the state or country that issued the individual's registered birth certificate;
   c. The individual's:
      i. Current name;
      ii. Name before first marriage;
      iii. Sex;
      iv. Date of birth; and
      v. Town, city, or county where the individual's birth occurred;
   d. The individual's mother's:
      i. Name before first marriage;
      ii. Current last name; and
      iii. Date of birth, if known;
   e. If applicable according to A.R.S. § 36-334, the name and, if known, date of birth of the individual's father; and
   f. A written statement attesting to the validity of the information required in subsections (I)(2)(a) through (e), signed by:
      i. The individual; or
      ii. If applicable, the individual's guardian or the person who has custody of the individual;
3. If the information is submitted by the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court;
4. An evidentiary document verifying the individual's official tribal enrollment, issued by the Tribal Authority of the federally recognized tribe and certified by the Tribal Authority, containing:
   a. The individual's:
      i. Name before first marriage;
      ii. Date of birth; and
      iii. Town, city, or county where the individual's birth occurred;
   b. The individual's mother's name; and
   c. If applicable according to A.R.S. § 36-334, the individual's father's name;
5. One or more other evidentiary documents that:

a. Support the information provided according to subsection (I)(2)(c) through (e); and
b. May include an affidavit from an independent source, attesting to personal knowledge of the individual's birth; and
6. The fee in R9-19-105 for a request to establish a delayed birth record and register the individual's birth.

J. If the State Registrar determines that a request for registration of an individual's birth submitted according to subsection (F) or (I) and the evidentiary documents submitted as part of the request:
1. Contain the required information, meet the requirements in this Section, and are true and valid, the State Registrar shall:
   a. Establish a delayed birth record for the individual that includes a summary statement that lists the evidentiary documents the State Registrar accepted as support for the registration of the individual's birth and register the individual's birth; and
   b. Issue a certified copy of a certificate of delayed birth registration to the person who submitted the request to register the individual's birth; or
2. Do not contain the required information, do not meet the requirements in this Section, or may not be true or valid, the State Registrar shall:
   a. Not establish a delayed birth record for the individual or register the individual's birth; and
   b. Provide written notification to the person who submitted the request according to R9-19-103(C):
      i. Specifying the missing, incomplete, false, or invalid information or evidentiary documents; and
      ii. Informing the person that the person has 180 days after the date of the written notification in subsection (J)(2)(b) to provide the required information or evidentiary documents.

K. If a person who received the notification in subsection (J)(2)(b):
1. Submits all the required information or evidentiary documents to the State Registrar within the 180-day time period, the State Registrar shall establish a delayed birth record for the individual and issue a certified copy of a certificate of delayed birth registration to the person who submitted the request to register the individual's birth; or
2. Does not submit all the required information or evidentiary documents to the State Registrar within the 180-day time period, the State Registrar shall:
   a. Comply with the requirements in R9-19-103(D) and (E); and
   b. If denying the delayed registration of the individual's birth, in addition to the written notice required in R9-19-103(E)(2)(c), advise the person of the person's right to:
      i. Appeal the State Registrar's determination, as prescribed in A.R.S. Title 41, Chapter 6, Article 6;
      ii. If the individual has obtained the required information or evidentiary documents, apply to register the individual's birth as prescribed in subsection (F) or (I), as applicable; or
      iii. Petition for a court order to register the individual's birth, as prescribed in A.R.S. § 36-333.03.

L. If the Department receives a court order, issued under A.R.S. § 36-333.03, for the registration of a delayed birth record for an individual, the Department shall establish a delayed birth record for the individual that includes a summary statement that lists the evidentiary documents the court accepted as support for the registration of the individual's birth and register the individual's birth.

M. After reviewing for completeness and compliance with R9-19-102, R9-19-201, and this Section, the State Registrar or a local registrar or deputy local registrar shall return an evidentiary document submitted to support a request to register an individual's birth to the person who submitted the request to register the individual's birth.

Historical Note

Former Section R9-19-204 renumbered to R9-19-203, new Section R9-19-204 renumbered from R9-19-205 effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section R9-19-204 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-205. Establishing a Registered Birth Record for a Foundling

A. To establish a registered birth record for a foundling, a person who has custody of the foundling shall submit to the State Registrar or the local registrar or deputy local registrar of the registration district where the foundling was found:
1. The following information, in a Department-provided format:
   a. The location where the foundling was found, including:
      i. If the foundling is a newborn left with a safe haven provider according to A.R.S. § 13-3623.01, the facility where the foundling was found;
      ii. If the foundling is not a newborn left with a safe haven provider according to A.R.S. § 13-3623.01, the name or a description of the place where the foundling was found;
      iii. If applicable, the street address and the city or town; and
      iv. The county;
   b. The following information about the foundling:
      i. Name given to the foundling;
      ii. Approximate date of birth of the foundling, based on the foundling's approximate age;
      iii. Sex;
      iv. Approximate race of the foundling; and
      v. If applicable, the identification number assigned to the foundling by the Department of Child Safety or a person designated by the Department of Child Safety to take custody of the foundling;

c. The date the foundling was found; and
d. The name and address of the person who has custody of the foundling;
2. A written statement attesting to the validity of the information submitted, signed and dated by the person who has custody of the foundling; and
3. A copy of the court order establishing custody, certified by the issuing court.

B. Upon receipt of the information and documents in subsection (A), the State Registrar shall establish a registered birth record for a foundling using the submitted information and include the street address, city or town, and county where the foundling was found as the place of the foundling's birth.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-205 renumbered to R9-19-204, new Section R9-19-205 renumbered from R9-19-206 and amended effective July 31, 1989 (Supp. 89-3). Section R9-19-205 repealed; new Section R9-19-205 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-206. Establishing a Registered Record of Foreign Birth for an Adopted Individual

A. To establish a registered record of foreign birth for an adopted individual:
1. A state court, the adopted individual's adoptive parent, the married adopted individual, or the adopted individual of legal age shall submit to the State Registrar:
   a. An adoption decree or other official document, finalizing the adoption from the country of the adopted individual's birth, that meets the requirements in R9-19-102, and
   b. A copy of an IR-3 stamp in the individual's passport;
2. If the individual's adoptive parent has completed a re-adoption process in an Arizona court, the individual's adoptive parent or state court shall submit to the State Registrar a copy of an IR-3 stamp in the individual's passport and:
   a. An original state of Arizona certificate of adoption, issued by a court in this state; or
   b. A court order of adoption issued and certified by a court in this state and:
      i. A birth certificate from the country of the adopted individual's birth, translated into English; or
      ii. An evidentiary document stating the date and place of the adopted individual's birth; or
3. If the adopted individual does not have an IR-3 stamp in the individual's passport, the individual's adoptive parent, the married adopted individual, the adopted individual who is of legal age, or a state court shall submit to the State Registrar:
   a. An original state of Arizona certificate of adoption, issued by a court in this state;
   b. A court order of adoption issued and certified by a court in this state and:
      i. A birth certificate from the country of the adopted individual's birth that meets the requirements in R9-19-102, or
      ii. An evidentiary document stating the date and place of the adopted individual's birth; or
   c. If the individual was not adopted in this state, a court order, issued by a court in this state, that recognizes the adoption.

B. If the evidentiary documents submitted according to subsection (A) to establish a registered record of foreign birth for an adopted individual do not contain the following information, the person who submitted the evidentiary documents shall submit to the State Registrar:
1. The following information about the individual:
   a. Name;
   b. Date of birth;
   c. Town, city, or county where the individual's birth occurred;
   d. Sex; and
   e. Race;
2. The following information about the individual's adoptive mother:
   a. Name;
   b. Last name before first marriage;
   c. Date of birth;
   d. State, territory, or foreign country where the individual's adoptive mother was born;
   e. Street address, city or town, county, and state of the individual's adoptive mother's usual residence at the time of the individual's birth;
   f. Whether the individual's adoptive mother's usual residence at the time of the individual's birth is within city limits; and
   g. Social Security Number; and
3. If applicable according to A.R.S. § 36-334, the following information about the individual's adoptive father:
   a. Name;
   b. Date of birth;
   c. State, territory, or foreign country where the individual's adoptive father was born; and
   d. Social Security Number.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-206 renumbered to R9-19-205, new Section R9-19-206 renumbered from R9-19-207 and amended effective July 31, 1989 (Supp.

89-3). Section R9-19-206 repealed; new Section R9-19-206 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-207. Correcting Information in a Registered Birth Record

A. A person requesting a correction to an individual's registered birth record shall submit to the State Registrar or a local registrar, a written request to correct, in a Department-provided format, that includes:
1. The individual's name currently in the individual's registered birth record;
2. The individual's date of birth;
3. The name before first marriage of the individual's mother;
4. If known, the:
   a. Individual's sex;
   b. State file number;
   c. Town or city of the individual's birth;
   d. County of the individual's birth;
   e. Hospital where the individual was born, if applicable;
   f. Name of the individual's father; and
   g. Dates of birth of the individual's parents; and
5. The specific information in the individual's registered birth record to be corrected.

B. In addition to the information in subsection (A), an administrator of a hospital or the person in charge of the medical records for the hospital where an individual was born, who is requesting a correction to the individual's registered birth record because of a hospital error, shall submit to the State Registrar or a local registrar:
1. The name of the hospital administrator or the person in charge of the hospital's medical records who is requesting the correction;
2. A written statement attesting to the validity of the submitted correction, signed and dated by the hospital administrator or the person in charge of the hospital's medical records; and
3. A copy of the:
   a. Document required in R9-19-202(A), or
   b. Part of the individual's or the individual's mother's medical record containing the specific information in R9-19-201(A)(3) or (4) to be corrected.

C. In addition to the information in subsection (A), a physician, registered nurse practitioner, nurse midwife, or midwife who attended an individual's birth, submitted a request for the individual's birth registration according to R9-19-203, and requests a correction to the individual's registered birth record because of the physician's, registered nurse practitioner's, nurse midwife's, or midwife's error shall submit to the State Registrar or a local registrar:
1. The name of the physician, registered nurse practitioner, nurse midwife, or midwife who attended the individual's birth and who is requesting the correction;
2. A written statement attesting to the validity of the submitted correction, signed and dated by the physician, registered nurse practitioner, nurse midwife, or midwife who attended the individual's birth; and
3. A copy of the:
   a. Document required in R9-19-203(A), or
   b. Part of the individual's or the individual's mother's medical record containing the specific information in R9-19-201(A)(3) or (4) to be corrected.

D. In addition to requests for correction of an individual's registered birth record made according to subsections (B) or (C), a written request for a correction to an individual's registered birth record may be submitted by:
1. The individual, if the individual is of legal age or married;
2. A parent of the individual whose name is listed in the individual's registered birth record;
3. The individual's guardian; or
4. A person who has custody of the individual.

E. In addition to the information in subsection (A), a person in subsection (D) requesting a correction to an individual's registered birth record shall submit to the State Registrar or a local registrar:
1. The name and mailing address of the person requesting the correction;
2. An affidavit attesting to the validity of the submitted correction, signed by the person requesting the correction;
3. If the request for correction of the individual's registered birth record is submitted by:
   a. The individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; or
   b. A person who has custody of the individual, a copy of the court order establishing custody, certified by the issuing court;
4. If the request for correction of the individual's registered birth record is submitted more than 90 days after the individual's birth, an evidentiary document that includes the specific information to be corrected; and
5. The fee in R9-19-105 for a request to correct information in a registered birth record.

Historical Note

Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-19-207 renumbered to R9-19-206, new Section R9-19-207 renumbered from R9-19-208 and amended effective July 31, 1989 (Supp. 89-3). Section R9-19-207 repealed; new Section R9-19-207 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-208. Amending Information in a Registered Birth Record

A. A person requesting an amendment to an individual's registered birth record shall include in a written request to amend:
1. The individual's name currently in the individual's registered birth record;
2. The individual's date of birth;
3. The name before first marriage of the individual's mother;
4. If known, the:
   a. Individual's sex;
   b. State file number;
   c. Town or city of the individual's birth;
   d. County of the individual's birth;
   e. Hospital where the individual was born, if applicable;
   f. Name of the individual's father; and
   g. Dates of birth of the individual's parents; and
5. The specific information in the individual's registered birth record to be amended, including, as applicable or as further specified in subsections of this Section, the specific information to be deleted and the specific information to be added.

B. Except for an amendment specified in another subsection of this Section, to request an amendment to an individual's registered birth record, a person requesting the amendment shall submit to the State Registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A);
   b. The name and mailing address of the person requesting the amendment;
   c. The relationship between the individual and the person requesting the amendment; and
   d. An affidavit attesting to the validity of the submitted amendment, signed by the person requesting the amendment;
2. A copy of a court order to amend the individual's registered birth record, certified by the issuing court and including the information to be amended, as specified according to subsection (A)(5);
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

C. An administrator of a hospital or the person in charge of the medical records for the hospital where an individual was born, who is requesting an amendment of information specified in R9-19-201(A)(3) or (4) in the individual's registered birth record because of a hospital error, shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A);
   b. The name of the hospital administrator or the person in charge of the hospital's medical records who is requesting the amendment; and
   c. A written statement attesting to the validity of the submitted amendment, signed and dated by the hospital administrator or the person in charge of the hospital's medical records; and
2. A copy of the part of the individual's or the individual's mother's medical record containing the specific information to be amended.

D. A physician, registered nurse practitioner, nurse midwife, or midwife who attended an individual's birth, submitted a request for the individual's birth registration according to R9-19-203, and requests an amendment of information specified in R9-19-201(A)(3) or (4) in the individual's registered birth record because of the physician's, registered nurse practitioner's, nurse midwife's, or midwife's error shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A);
   b. The name of the physician, registered nurse practitioner, nurse midwife, or midwife who attended an individual's birth; and
   c. A written statement attesting to the validity of the submitted amendment, signed and dated by the physician, registered nurse practitioner, nurse midwife, or midwife who attended the individual's birth; and
2. A copy of the part of the individual's or the individual's mother's medical record containing the specific information to be amended.

E. To add an individual's first name, middle name, or suffix to the individual's registered birth record 90 days or less after the individual's birth, the individual's parent or guardian shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the first name, middle name, or suffix to be added;
   b. The name and mailing address of the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. Each parent whose name is included in the individual's birth record, or
      ii. The individual's guardian;
2. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
3. The fee in R9-19-105 for a request to amend information in a registered birth record.

F. To add an individual's first name, middle name, or suffix to the individual's registered birth record more than 90 days but less than seven years after the individual's birth, the individual's parent or guardian shall submit to the State Registrar or a local registrar:

1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the first name, middle name, or suffix to be added;
   b. The name and mailing address of the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. Each parent whose name is included in the individual's birth record, or
      ii. The individual's guardian;
2. An evidentiary document that:
   a. Includes the first name, middle name, or suffix to be added; and
   b. Was created within one year after the date of the individual's birth;
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

G. To request the amendment of an individual's name in the individual's registered birth record 90 days or less after the individual's birth, the individual's parent or guardian shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the specific name to be deleted and the specific name to be added;
   b. The name and mailing address of the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. Each parent whose name is included in the individual's birth record, or
      ii. The individual's guardian;
2. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
3. The fee in R9-19-105 for a request to amend information in a registered birth record.

H. To request the amendment of an individual's name in the individual's registered birth record more than 90 days but less than one year after the individual's birth, the individual's parent or guardian shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the specific name to be deleted and the specific name to be added;
   b. The name and mailing address of the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. Each parent whose name is included in the individual's birth record, or
      ii. The individual's guardian;
2. An evidentiary document that:
   a. Includes the name to be added, and
   b. Was created within one year after the date of the individual's birth;
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

I. To amend the month or day of an individual's birth in the individual's registered birth record, the individual, if the individual is of legal age or is married, or the individual's parent or guardian shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the month or day to be deleted and the month or day to be added;
   b. The name and mailing address of the individual or the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. The individual;
      ii. The individual's parent requesting the amendment, whose name is included in the individual's birth record; or
      iii. The individual's guardian;
2. An evidentiary document that includes the requested month or day;
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

J. To amend the date of birth or place of birth of an individual's parent in the individual's registered birth record, to change the individual's mother's last name in the individual's registered birth record to the individual's mother's last name before the individual's mother's first marriage, or to change the last name of the individual's father in the individual's registered birth record, the individual, if the individual is of legal age or is married, or the individual's parent or guardian shall submit to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including the specific information in the individual's registered birth record to be amended, including the date of birth, place of birth, or name to be deleted and the date of birth, place of birth, or name to be added;
   b. The name and mailing address of the individual or the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. The individual;
      ii. The individual's parent requesting the amendment, whose name is included in the individual's birth record; or

iii. The individual's guardian;

2. One of the following evidentiary documents containing the specific information for the individual's parent to be amended in the individual's registered birth record:
   a. A certified copy of the individual's parent's registered birth certificate;
   b. A copy of the individual's parent's passport; or
   c. A copy of an administrative order or court order establishing paternity, certified by the issuing entity;
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

K. To request the amendment of an individual's registered birth record based on the individual's biological father's voluntary acknowledgement of paternity, the individual's mother and biological father shall submit to the State Registrar:
1. A voluntary acknowledgement of paternity form that complies with A.R.S. § 25-812;
2. The following information, which may be submitted as part of the voluntary acknowledgement of paternity or in a Department-provided format:
   a. The information in subsection (A);
   b. The names and mailing address of the individual's mother and biological father requesting the amendment;
   c. The following information about the individual's biological father:
      i. Name;
      ii. Date of birth;
      iii. State, territory, or foreign country where the individual's biological father was born;
      iv. Social Security Number;
      v. Race;
      vi. Whether the individual's father is of Hispanic origin and, if so, the type of Hispanic origin; and
      vii. Highest degree or level of education completed by the individual's father at the time of the individual's birth;
   d. If the request is submitted 90 days or less after the date of the individual's birth, the name requested for the individual; and
   e. If the request is submitted more than 90 days after the date of the individual's birth, the last name requested for the individual;
3. If an individual has a presumed father as described in A.R.S. § 25-814(A)(1), a written document that contains:
   a. The individual's name;
   b. The individual's presumed father's name;
   c. The individual's mother's name; and
   d. A jurat, as defined in A.R.S. § 41-311, signed by the individual's presumed father:
      i. Attesting to the fact that, although the individual's presumed father was married to the individual's mother, the individual's presumed father is not the biological father of the individual; and
      ii. Relinquishing and waiving all legal rights to the individual; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

L. To request the amendment of an individual's registered birth record based on an administrative order or court order establishing paternity, a person shall submit to the State Registrar:
1. A copy of the administrative order or a court order establishing paternity, certified by the issuing entity;
2. The following information, which may be submitted as part of the administrative order or a court order establishing paternity or in a Department-provided format:
   a. The information in subsection (A);
   b. The name and mailing address of the person requesting the amendment; and
   c. The following information about the father to be added to the individual's registered birth record:
      i. Name;
      ii. Date of birth;
      iii. State, territory, or foreign country where the father was born; and
      iv. If the person requesting the amendment is not the issuing entity:
         (1) Social Security Number;
         (2) Race;
         (3) Whether the father is of Hispanic origin and, if so, the type of Hispanic origin; and
         (4) Highest degree or level of education completed by the father at the time of the individual's birth; and
3. The fee in R9-19-105 for a request to amend information in a registered birth record.

M. To request the amendment of the registered birth record of an individual born in Arizona based on the individual's adoption, a state court, the adopted individual's adoptive parent, the married adopted individual, or the adopted individual of legal age shall submit to the State Registrar:
1. A copy of the court order of adoption, certified by the issuing court, or a certificate of adoption with a court seal, after the individual's adoption is final;
2. If the document required in subsection (M)(1) does not contain the following, the person who submitted the request to amend the adopted individual's registered birth record shall submit to the State Registrar:
   a. The information in subsection (A);

b. The name and mailing address of the adopted individual's adoptive parent or the adopted individual requesting the amendment;
c. The individual's name established by the court order;
d. Whether the individual's adoptive parents want the information about the individual's parents currently in the individual's registered birth record to be retained;
e. If the individual's adoptive parents do not want the information about the individual's parents in the individual's registered birth record before the adoption to be retained in the individual's registered birth record after the adoption, the following information:
   i. The name and date of birth of the individual's adoptive father;
   ii. The state, territory, or foreign country where the individual's adoptive father was born;
   iii. The individual's adoptive father's Social Security Number;
   iv. The name and date of birth of the individual's adoptive mother;
   v. The individual's adoptive mother's last name before first marriage;
   vi. The state, territory, or foreign country where the individual's adoptive mother was born;
   vii. The individual's adoptive mother's Social Security Number;
   viii. Street address, city or town, county, and state of the individual's adoptive mother's residence at the time of the individual's birth; and
   ix. Street address, city or town, county, and state of the individual's adoptive mother's current residence;
f. If the individual's adoptive parents want the information about the individual's parents in the individual's registered birth record before the adoption to be retained in the individual's registered birth record after the adoption, the name and date of birth of each of the individual's adoptive parents;
g. Whether the individual's adoptive parents want the name of the hospital, facility, or street address where the individual's birth occurred to be omitted in the amended birth record;
h. The signature of each of the individual's adoptive parents and the date signed;
i. The name of the court issuing the document required in subsection (M)(1); and
j. The date the final order of adoption was granted;

3. If the individual's adoptive parents want the information about the individual's parents in the individual's registered birth record before the adoption to be retained in the individual's registered birth record after the adoption:
   a. A written request signed and dated by the adoptive parent or a copy of a court order, certified by the issuing court, containing a request to retain the information in the individual's registered birth record;
   b. Either:
      i. A written statement with the notarized signature of the individual's mother, agreeing to retain the mother's name in the individual's registered birth record; or
      ii. If the individual's mother is deceased, a certified copy of a registered death certificate for the individual's mother; and
   c. If a father's name is included in the individual's registered birth record, either:
      i. A written statement with the notarized signature of the individual's father, agreeing to retain the father's name in the individual's registered birth record; or
      ii. If the individual's father is deceased, a certified copy of a registered death certificate for the individual's father; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

N. If the State Registrar receives a court order or a certificate of adoption with a court seal for an individual, submitted as required in subsection (M), that names two persons of the same sex as the individual's parents or the individual's mother and father, the State Registrar shall enter the name of each person as the individual's parent in the individual's birth record.

O. To request an amendment to an individual's registered birth record when the individual has undergone a sex change operation or has had a chromosomal count that establishes the sex of the individual as different than in the individual's registered birth record, an individual, if the individual is of legal age or is married, or the individual's parent or guardian shall submit to the State Registrar or a local registrar:

1. A written request, in a Department-provided format, that includes:
   a. The information in subsection (A), including:
      i. The individual's sex currently in the individual's registered birth record, and
      ii. The requested change for the individual's sex to be included in the individual's registered birth record;
   b. The name and mailing address of the individual or the individual's parent or guardian requesting the amendment; and
   c. An affidavit attesting to the validity of the submitted amendment, signed, as applicable, by:
      i. The individual;
      ii. The individual's parent requesting the amendment, whose name is included in the individual's birth record; or
      iii. The individual's guardian;
2. A written statement on a physician's letterhead paper, signed and dated by the physician, that the individual has:
   a. Undergone a sex change operation, or
   b. Had a chromosomal count that establishes the sex of the individual as different from that in the individual's registered birth record;
3. If the person submitting the request for the amendment to the individual's registered birth record is the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
4. The fee in R9-19-105 for a request to amend information in a registered birth record.

P. The State Registrar or a local registrar shall amend an individual's registered birth record based on:
1. A request for an amendment, if the State Registrar or local registrar determines, according to R9-19-103, that the information and evidentiary documents in the request for amendment supports the amendment of the individual's registered birth record; or
2. Except as provided in subsection (Q), a court order.

Q. The State Registrar or a local registrar shall not amend the date of birth in an individual's registered birth record to a year later than the year in the date currently stated in the individual's registered birth record if any of the information in R9-19-201, required for registering the individual's birth, was received by the State Registrar or local registrar before the later date.

R. When the State Registrar or a local registrar amends a registered birth record, the State Registrar or local registrar shall seal the:
1. Registered birth record that existed before the amendment, and
2. Evidentiary documents submitted to support the amendment.

Historical Note

Adopted effective February 20, 1980 (Supp. 80-1). Former Section R9-19-208 renumbered to R9-19-207, new Section R9-19-208 renumbered from R9-19-209 and amended effective July 31, 1989 (Supp. 89-3). Section R9-19-208 repealed; new Section R9-19-208 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-209. Cancellation of a Registered Birth Record

A. The State Registrar shall cancel an individual's registered birth record if the State Registrar determines that:
1. Another registered birth record for the individual exists and was registered before the individual's birth was registered under this Article; or
2. The information submitted for registration of the birth and creation of the registered birth record was fraudulent, a misrepresentation of facts, or based on false documents.

B. If the State Registrar intends to cancel an individual's registered birth record as prescribed in subsection (A), the State Registrar shall provide written notice of the intent to cancel and the right to appeal the intent to cancel, as prescribed in A.R.S. Title 41, Chapter 6, Article 6, to:
1. The individual, if the individual is of legal age or is married; or
2. The individual's parent, if the individual is not of legal age and is not married, or, if applicable, the individual's guardian.

Historical Note

Former Section R9-19-209 renumbered to R9-19-208 effective July 31, 1989 (Supp. 89-3). New Section R9-19-209 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-210. Eligibility for a Certified Copy of a Certificate of Birth Registration

A. A certified copy of a certificate of birth registration contains, as available, the information specified in:
1. R9-19-201(A)(1) and (3) for a birth registered according to R9-19-202 or R9-19-203;
2. R9-19-201(B)(1) for a birth registered according to R9-19-204(A) or (B);
3. R9-19-204(F)(2)(c)(ii) through (v), (d)(ii) through (v), and (e)(i) through (iii) for a birth registered according to R9-19-204(F);
4. R9-19-204(I)(2)(c)(ii) through (v), (d), and (e) for a birth registered according to R9-19-204(I);
5. R9-19-205(A)(1)(a) and (b)(i) through (iii) for a foundling's birth record registration according to R9-19-205; and
6. R9-19-206(B)(1)(a) through (d), (2)(a) through (d), and (3)(a) through (c) for registering a foreign birth according to R9-19-206.

B. The following are eligible to receive a certified copy of an individual's certificate of birth registration:
1. The individual, if the individual is of legal age or married;
2. A parent of the individual;
3. The individual's spouse;
4. The individual's grandparent, adult child, adult grandchild, or adult brother or sister;
5. The individual's guardian;
6. A person designated in a power of attorney, established by the individual's parent or guardian according to A.R.S. § 14-5104 or 14-5107;
7. A person appointed as the individual's conservator according to A.R.S. Title 14, Chapter 5, Article 4;
8. A person designated in a court order to receive a certified copy of the individual's certificate of birth registration;
9. An attorney representing:
   a. The individual, if the individual is of legal age or married;
   b. The individual's parent; or
   c. The individual's guardian while acting on the individual's behalf;
10. An adoption agency, licensed according to A.R.S. § 8-126, or a private attorney if:
    a. An adoption of the individual is pending, and
    b. The adoption agency or private attorney represents the individual's biological parents or prospective adoptive parents; and
11. A governmental agency processing an adoption, a financial claim, a governmental benefit application, or another form of compensation on behalf of an individual, or having another official purpose for the certified copy of the individual's certificate of birth registration.

Historical Note

New Section R9-19-210 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-211. Requesting a Certified Copy of a Certificate of Birth Registration

A. A person eligible to receive a certified copy of an individual's certificate of birth registration according to R9-19-210(B)(1) through (8) may request a certified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
   1. A written request, in a Department-provided format, that includes:
      a. The name and mailing address of the person submitting the request;
      b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
      c. The relationship between the individual and the person submitting the request that makes the person eligible to receive a certified copy of the individual's certificate of birth registration;
      d. The individual's:
         i. Name in the individual's registered birth record,
         ii. Sex, and
         iii. Date of birth;
      e. The name before first marriage of the individual's mother;
      f. If known, the:
         i. State file number;
         ii. Town or city of the individual's birth;
         iii. County of the individual's birth;
         iv. Hospital where the individual was born, if applicable;
         v. Name of the individual's father; and
         vi. Dates of birth of the individual's parents;
      g. The number of certified copies of the individual's certificate of birth registration being requested; and
      h. The dated signature of the person submitting the request, either:
         i. With the person's signature notarized; or
         ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person that contains the name and signature of the person;
   2. Except for an individual who is 18 years of age or older or a parent whose name is included in the individual's registered birth record, one or more evidentiary documents demonstrating that the person is eligible to receive a certified copy of the individual's certificate of birth registration; and
   3. The fee in R9-19-105 for each certified copy of the individual's certificate of birth registration being requested.

B. The following provides examples of documentation that meets the requirement in subsection (A)(2):
   1. For the individual, if the individual is less than 18 years of age, documentation that the individual is emancipated, according to A.R.S. Title 12, Chapter 15, or married;
   2. For a parent whose name is not included in the individual's registered birth record, either:
      a. A copy of a court order of adoption for the individual, certified by the issuing court, or a certificate of adoption for the individual with a court seal, including the parent's name as an adoptive parent of the individual; or
      b. A copy of a court order, certified by the issuing court, including the parent's name as a parent of the individual;
   3. For the individual's spouse:
      a. A copy of the marriage certificate for the individual and the spouse; and
      b. A written document signed and dated by the individual authorizing the spouse to receive a copy of the individual's certificate of birth registration with either:
         i. The signature notarized, or
         ii. Accompanied by a copy of a valid, government-issued form of photo identification that contains the individual's name and signature;
   4. For a person who is the individual's grandparent or the individual's adult child, grandchild, brother, or sister, either:
      a. A copy of one or more certificates of birth registration or certificates of death registration that show the person's relationship to the individual or, if a parent's name is included in the individual's registered birth record, the individual's parent; or
      b. For births or deaths registered in Arizona, information about the person or a related person whose birth or death was registered in Arizona, such as the person's name, date of birth, or parent's name and date of birth or date of death, that would enable the Department to locate the registered birth record or registered death record of the person or the related person;
   5. For the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court;
   6. For a person designated in a power of attorney, established by the individual's parent or guardian according to A.R.S. § 14-5104 or 14-5107, a copy of the power of attorney;
   7. For a person appointed as the individual's conservator according to A.R.S. Title 14, Chapter 5, Article 4, a copy of the court order establishing conservatorship, certified by the issuing court; and
   8. For a person named in a court order to receive a certified copy of the individual's certificate of birth registration, a copy of the court order, certified by the issuing court.

C. An attorney representing an individual, the individual's parent, or the individual's guardian, according to R9-19-210(B)(9), may request a certified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
1. A written request, on the attorney's letterhead paper or in a Department-provided format, that includes:
   a. The attorney's name and state bar number;
   b. Contact information for the attorney, which includes a telephone number or an e-mail address;
   c. The name of the person the attorney is representing;
   d. The relationship of the person in subsection (C)(1)(c) to the individual;
   e. The information in subsections (A)(1)(d) through (f);
   f. The number of certified copies of the individual's certificate of birth registration being requested; and
   g. The dated signature of the attorney:
      i. With the attorney's signature notarized; or
      ii. Accompanied by a copy of a valid, government-issued form of photo identification for the attorney that contains the attorney's name and signature;
2. A copy of the attorney's retainer agreement with, as applicable, the individual, the individual's parent, or the individual's guardian;
3. If the retainer agreement is with a parent whose name is not included in the individual's registered birth record, documentation that complies with a requirement in subsection (B)(2);
4. If the retainer agreement is with the individual's guardian, a copy of the court order establishing guardianship, certified by the issuing court; and
5. The fee in R9-19-105 for each certified copy of the individual's certificate of birth registration being requested.

D. An adoption agency representing an individual's biological parents or prospective adoptive parents may request a certified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
1. A written request, on the adoption agency's letterhead paper or in a Department-provided format, that includes:
   a. The name, license number, and address of the adoption agency;
   b. The name of and contact information for the adoption agency's designee for the adoption, which includes a telephone number or an e-mail address;
   c. The name of the individual's biological parents or prospective adoptive parents;
   d. The information in subsections (A)(1)(d) through (f);
   e. The number of certified copies of the individual's certificate of birth registration being requested; and
   f. The dated signature of the adoption agency's designee:
      i. With the designee's signature notarized; or
      ii. Accompanied by a copy of a valid, government-issued form of photo identification for the designee that contains the designee's name and signature;
2. A copy of a petition to adopt that:
   i. Complies with A.R.S. § 8-109;
   ii. Includes the names of the individual and, as applicable, the individual's biological parents or prospective adoptive parents; and
   iii. Has been filed with a court of competent jurisdiction; and
3. If not included in the copy of a petition to adopt required in subsection (D)(2), a copy of a document demonstrating that the adoption agency is representing the individual's biological parents or prospective adoptive parents; and
4. The fee in R9-19-105 for each certified copy of the individual's certificate of birth registration being requested.

E. A private attorney representing an individual's prospective adoptive parents may request a certified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
1. A written request, on the attorney's letterhead paper or in a Department-provided format, that includes:
   a. The attorney's name and state bar number;
   b. Contact information for the attorney, which includes a telephone number or an e-mail address;
   c. The name of the individual's prospective adoptive parents;
   d. The information in subsections (A)(1)(d) through (f);
   e. The number of certified copies of the individual's certificate of birth registration being requested; and
   f. The dated signature of the attorney:
      i. With the attorney's signature notarized; or
      ii. Accompanied by a copy of a valid, government-issued form of photo identification for the attorney that contains the attorney's name and signature;
2. A copy of the attorney's retainer agreement with the individual's prospective adoptive parents;
3. A copy of a petition to adopt that:
   a. Complies with A.R.S. § 8-109,
   b. Includes the names of the individual and the individual's prospective adoptive parents, and
   c. Has been filed with a court of competent jurisdiction; and
4. The fee in R9-19-105 for each certified copy of the individual's certificate of birth registration being requested.

F. A governmental agency processing an adoption, a financial claim, a governmental benefit application, or another form of compensation on behalf of an individual, or having another official purpose for a certified copy of the individual's certificate of birth registration may request a certified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:

1. A written request, on the governmental agency's letterhead paper or in a Department-provided format, that includes:
   a. The name and address of the governmental agency;
   b. The name of and contact information for the governmental agency's designee for the request, which includes a telephone number or an e-mail address;
   c. The information required in subsection (A)(1)(d) through (f);
   d. A description of the:
      i. Action the governmental agency is taking on behalf of the individual, or
      ii. Official purpose for which the governmental agency needs a certificate of the individual's birth registration;
   e. The reason the governmental agency is requesting a certified copy of the individual's certificate of birth registration; and
   f. The dated signature of the governmental agency's designee, accompanied by a copy of the designee's identification badge from the governmental agency verifying that the designee is an employee of the governmental agency; and
2. Unless the governmental agency is an agency as defined in A.R.S. § 41-1001, the fee in R9-19-105 for the certified copy of the individual's certificate of birth registration.

Historical Note

New Section R9-19-211 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-212. Requesting a Noncertified Copy of a Certificate of Birth Registration

A. A noncertified copy of a certificate of birth registration contains, as available, the information specified in R9-19-210(A).

B. Except as provided in subsection (C), a person who is conducting research may request a noncertified copy of an individual's certificate of birth registration by submitting to the State Registrar:
1. A written request, in a Department-provided format, that includes:
   a. The name and mailing address of the person submitting the request;
   b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
   c. The reason the person is requesting a noncertified copy of the individual's certificate of birth registration;
   d. The information required in R9-19-211(A)(1)(d) through (f); and
   e. The dated signature of the person submitting the request;
2. Documentation from the Department's Human Subjects Review Board that the person is eligible to receive a noncertified copy of the individual's certificate of birth registration; and
3. The fee in R9-19-105 for the noncertified copy of the individual's certificate of birth registration.

C. A person who is a family member, including a niece or nephew, of an individual, who is conducting research for genealogical purposes, and who is of legal age may request a noncertified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
   a. The name and mailing address of the person submitting the request;
   b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
   c. The relationship between the individual and the person submitting the request that makes the person eligible to receive a noncertified copy of the individual's certificate of birth registration;
   d. The information required in R9-19-211(A)(1)(d) through (f);
   e. A statement that the person is conducting research for genealogical purposes; and
   f. The dated signature of the person submitting the request, either:
      i. With the person's signature notarized; or
      ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person that contains the name, date of birth, and signature of the person;
2. Documentation demonstrating that the person is eligible to receive a noncertified copy of the deceased individual's certificate of birth registration that may include:
   a. A copy of one or more certificates of birth registration or certificates of death registration that show the person's relationship to the individual or, if a parent's name is included in the individual's registered birth record, the individual's parent; or
   b. For births or deaths registered in Arizona, information about the person or a related person whose birth or death was registered in Arizona, such as the person's name, date of birth, or parent's name and date of birth or date of death, that would enable the Department to locate the registered birth record or registered death record of the person or the related person; and
3. The fee in R9-19-105 for the noncertified copy of the individual's certificate of birth registration.

D. A governmental agency processing an adoption, a financial claim, a governmental benefit application, or another form of compensation on behalf of an individual, or having another official purpose for the noncertified copy of the individual's certificate of birth registration may request a noncertified copy of the individual's certificate of birth registration by submitting to the State Registrar or a local registrar:
1. A written request, on the governmental agency's letterhead paper or in a Department-provided format, that includes:
   a. The name and address of the governmental agency;
   b. The name of and contact information for the governmental agency's designee for the request, which includes a telephone number or an e-mail address;
   c. The information required in R9-19-211(A)(1)(d) through (f);

d. A description of the:
   i. Action the governmental agency is taking on behalf of the individual, or
   ii. Official purpose for which the governmental agency needs a certificate of the individual's birth registration;
e. The reason the governmental agency is requesting a noncertified copy of the individual's certificate of birth registration; and
f. The dated signature of the governmental agency's designee, accompanied by a copy of the designee's identification badge from the governmental agency verifying that the designee is an employee of the governmental agency; and

2. Unless the governmental agency is an agency as defined in A.R.S. § 41-1001, the fee in R9-19-105 for the noncertified copy of the individual's certificate of birth registration.

Historical Note

New Section R9-19-212 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

ARTICLE 3. VITAL RECORDS FOR DEATH

R9-19-301. Human Remains Release Form

A. Except as provided in subsection (B), the form required by A.R.S. § 36-326(B) to accompany a deceased individual's human remains removed from a hospital, nursing care institution, or hospice inpatient facility is in a Department-provided format and shall include:
1. The name and street address of the hospital, nursing care institution, or hospice inpatient facility;
2. The deceased individual's:
   a. Name;
   b. Date of birth;
   c. Sex; and
   d. Social Security number or, if the deceased individual's Social Security number is not available, the deceased individual's medical record number;
3. The date and time of the death;
4. The name, telephone number, and e-mail address of the health care provider expected to sign the medical certification of death;
5. The name, telephone number, and relationship to the deceased individual of the individual authorizing the hospital, nursing care institution, or hospice inpatient facility to release the human remains;
6. The most recent diagnosis in the deceased individual's medical record;
7. A list of the circumstances in A.R.S. § 11-593(A);
8. Whether a notification required in A.R.S. § 11-593 was made;
9. If the deceased individual's human remains are being released to a funeral establishment or a person authorized to receive the deceased individual's communicable disease related information under A.R.S. § 36-664, whether the deceased individual had been diagnosed with or was suspected of having, as stated in the deceased individual's medical record at the time of death:
   a. Infectious tuberculosis,
   b. Human immunodeficiency virus,
   c. Creutzfeldt-Jakob disease,
   d. Hepatitis B,
   e. Hepatitis C, or
   f. Rabies;
10. For a death that occurred in a hospital, if the deceased individual's human remains have been accepted for donation by an organ procurement organization under A.R.S. Title 36, Chapter 7, Article 3, and the person authorized in A.R.S. § 36-843 has not made or refused to make an anatomical gift, whether the organ procurement organization has been notified that the deceased individual's human remains are being removed from the hospital; and
11. The name and signature of the individual representing the hospital, nursing care institution, or hospice inpatient facility who is releasing the human remains.

B. The form required by A.R.S. § 36-326(B) to accompany human remains from a fetal death removed from a hospital, nursing care institution, or hospice inpatient facility is in a Department-provided format and shall include:
1. The name and street address of the hospital, nursing care institution, or hospice inpatient facility;
2. The name of the mother;
3. The date of delivery;
4. The estimated gestational age or, if the gestational age is unknown, the weight of the human remains;
5. The name and telephone number of the parent authorizing the hospital, nursing care institution, or hospice inpatient facility to release the human remains;
6. A list of the circumstances in A.R.S. § 11-593(A);
7. Whether a notification required in A.R.S. § 11-593 was made;
8. For a fetal death that occurred in a hospital, if the human remains have been accepted for donation by an organ procurement organization under A.R.S. Title 36, Chapter 7, Article 3, and the person authorized in A.R.S. § 36-843 has not made or refused to make an anatomical gift, whether the organ procurement organization has been notified that the human remains are being removed from the hospital; and
9. The name and signature of the individual representing the hospital, nursing care institution, or hospice inpatient facility who is releasing the human remains.

C. An individual who removes human remains from a hospital, nursing care institution, or hospice inpatient facility shall sign and date the applicable human remains release form required in subsection (A) or (B), and note the time of removal when the individual removes the human remains from the hospital, nursing care institution, or hospice inpatient facility.

D. The individual in subsection (C) who removes human remains shall submit a copy of the applicable human remains release form required in subsection (A) or (B) to the local registrar or deputy local registrar of the registration district where the death or fetal death occurred within 24 hours after removing the human remains from a hospital, nursing care institution, or hospice inpatient facility.

Historical Note

Amended effective March 30, 1976 (Supp. 76-2). Amended effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-302. Information for a Death Record

A. The information for a deceased individual's death record includes the following:

1. Demographic and final disposition information for the deceased individual's certificate of death registration:
   a. The name, date of birth, and sex of the deceased individual;
   b. Any other names by which the deceased individual was known, including, if applicable, the deceased individual's last name before first marriage;
   c. The place of death including:
      i. The county,
      ii. Town or city, and
      iii. Zip code;
   d. If death was pronounced in a hospital, whether the deceased individual was:
      i. An inpatient,
      ii. An outpatient, or
      iii. Dead on arrival at the hospital;
   e. If death was pronounced somewhere other than a hospital, whether death was pronounced at:
      i. The deceased individual's residence,
      ii. A hospice inpatient facility,
      iii. A nursing care institution, or
      iv. Another location;
   f. If death was pronounced at another location, a description of the location;
   g. If death was pronounced:
      i. In a health care institution, the facility name; or
      ii. In a location other than a health care institution, the street address of the location;
   h. The deceased individual's race;
   i. Whether the deceased individual was of Hispanic origin and, if so, the type of Hispanic origin;
   j. If the deceased individual was a member of a tribe recognized by the Federal Bureau of Indian Affair's Office of Federal Acknowledgement under 25 CFR Part 83, the name of the tribe;
   k. Whether the deceased individual was ever in the U.S. Armed Forces;
   l. The deceased individual's age:
      i. If the deceased individual was one or more years old, in years since the deceased individual's birthday;
      ii. If the deceased individual was one or more days old but less than one year old, in months and days; or
      iii. If the deceased individual was less than one day old, in hours and minutes;
   m. The deceased individual's marital status at the time of death;
   n. The name of the deceased individual's surviving spouse, if applicable, and, if different, the spouse's last name before first marriage;
   o. The state, county, and city of the deceased individual's birth or, if the birth did not happen in the United States, the name of the country where the birth occurred;
   p. The deceased individual's Social Security Number;
   q. The deceased individual's usual occupation;
   r. The address, including the street address, town or city, state, zip code, and county, of the deceased individual's usual residence;
   s. If the deceased individual's usual residence is not in the United States, the name of the country of the deceased individual's usual residence;
   t. The name of the deceased individual's father;
   u. The name before first marriage of the deceased individual's mother;
   v. The following information about the individual providing the demographic and final disposition information about the deceased individual:
      i. The individual's name;
      ii. Relationship to the deceased individual; and

iii. The individual's mailing address, including street address, city or town, state, zip code, and, if outside the U.S., country;

w. The anticipated final disposition of the human remains, including one or more of the following:
i. Burial;
ii. Entombment;
iii. Cremation;
iv. Anatomical gift, except for an anatomical gift of a part;
v. Removal from the state; and
vi. Other final disposition of the human remains;

x. If an anticipated final disposition is anatomical gift, except for an anatomical gift of a part, another anticipated final disposition other than removal from the state;

y. If an anticipated final disposition is removal from the state:
i. Whether removal from the state includes removal from the United States; and
ii. Another anticipated final disposition specified in subsection (A)(1)(w)(i), (ii), (iii), or (vi);

z. If an anticipated final disposition of the human remains is another means of final disposition, a description of the anticipated final disposition;

aa. The name and location where each final disposition of the human remains took place, and the date of each final disposition;

bb. If applicable, the name and address of the funeral establishment; and

cc. As applicable:
i. The name and license number of the funeral director in charge of the final disposition of the human remains; or
ii. If a funeral director is not in charge of the final disposition of the human remains, the name of the responsible person and, if the responsible person is not the individual identified in subsection (A)(1)(v), the responsible person's:
(1) Relationship to the deceased individual; and
(2) Mailing address, including street address, city or town, state, zip code, and, if outside the U.S., country;

2. Other demographic and final disposition information for the deceased individual's death record:
a. Whether the deceased individual's usual residence was within city limits;
b. Whether the deceased individual's usual residence was in a tribal community at the time of death;
c. If the deceased individual's usual residence was in a tribal community at the time of death, the name of the tribal community;
d. How long the deceased individual resided in Arizona before the deceased individual's death;
e. The type of business or industry in which the deceased individual usually worked;
f. The name of the country of which the deceased individual was a citizen;
g. The highest educational grade completed by the deceased individual; and
h. If the anticipated final disposition of the deceased individual's human remains is cremation, documentation of the approval of the medical examiner of the county where the death occurred for the cremation of the human remains;

3. Medical certification information for the deceased individual's certificate of death registration:
a. The date of death and whether the date is the actual date of death or a date determined through a death investigation conducted under A.R.S. § 11-597;
b. The time death was pronounced;
c. The conditions leading to the immediate cause of death, including the underlying causes of death;
d. For each cause or condition listed according to subsection (A)(3)(c), the length of time from the onset of the cause or condition to the time of death;
e. Any other conditions contributing to the death;
f. Whether an autopsy was performed on the deceased individual;
g. Whether autopsy results were available to complete the cause of death;
h. The manner of death;
i. The name, title, and address of the medical certifier; and
j. The date the medical certifier signed the medical certification of death; and

4. Other medical certification information for the deceased individual's death record:
a. If the medical certifier is a health care provider, the health professional license number of the medical certifier;
b. If the medical certifier is a tribal law enforcement authority, the badge number of the medical certifier;
c. Whether tobacco use contributed to the cause of death;
d. If the deceased individual was female, whether:
i. The deceased individual was pregnant within the last year;
ii. The deceased individual was pregnant at the time of death;
iii. The deceased individual was not pregnant at the time of death, but pregnant within 42 days before death;
iv. The deceased individual was not pregnant at the time of death, but pregnant 43 days to one year before death; or
v. It is unknown whether the deceased individual was pregnant within the last year; and
e. Whether a notification required in A.R.S. § 11-593 was made.

B. If a medical examiner determined the manner of death in subsection (A)(3)(h) for a deceased individual, in addition to the information in subsections (A)(3) and (4), the medical certification information for the deceased individual's death record includes:

1. For the deceased individual's certificate of death registration, whether the:

a. Manner of death was due to:
   i. Natural causes,
   ii. An accident,
   iii. Suicide,
   iv. Homicide, or
   v. An undetermined cause; and
b. Whether the death was as a result of an injury and, if so, whether the injury occurred while the deceased individual was working or at the deceased individual's workplace; and
2. The following other medical certification information for the deceased individual's death record:
   a. If the death was as a result of an injury:
      i. The date and time of the injury,
      ii. The type of location where the injury occurred,
      iii. The address of the location where the injury occurred, and
      iv. A description of how the injury occurred; and
   b. If the death was caused by a transportation accident, whether the deceased individual at the time of the transportation accident was:
      i. The driver or operator of the transportation vehicle,
      ii. A passenger in the transportation vehicle,
      iii. A pedestrian, or
      iv. Involved in another activity affected by the transportation accident.

Historical Note

Amended effective March 30, 1976 (Supp. 76-2). Amended effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-302 renumbered to R9-19-308; new Section made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-303. Registration of a Deceased Individual's Death

A. Before requesting the registration of a deceased individual's death, a responsible person or funeral director who is responsible for the final disposition of the deceased individual's human remains shall:
1. Obtain, in a written format:
   a. The information in R9-19-302(A)(1)(a) through (v) and (2)(a) through (g); and
   b. A statement attesting to the validity of the information in R9-19-302(A)(1)(a) through (v) and (2)(a) through (g), signed and dated by the person providing the information;
2. Provide, in a Department-provided format, the information in R9-19-3-302(A)(1)(w) through (cc); and
3. If applicable, obtain the documentation required in R9-19-302(A)(2)(h).

B. Except as provided in subsection (G) or (I) or R9-19-304, within seven days after a deceased individual's death, a responsible person or funeral director who is responsible for the final disposition of the deceased individual's human remains shall:
1. Submit to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred, in a Department-provided format:
   a. The information specified in R9-19-302(A)(1) and (2), and
   b. An attestation of the validity of the submitted information and documentation in R9-19-302(A)(1)(w) through (cc) and (2)(h);
2. If the information required in R9-19-302(A)(1) and (2) is not submitted electronically, include:
   a. The written statement in subsection (A)(1)(b), and
   b. A written statement attesting to the validity of the submitted information and documentation in R9-19-302(A)(1)(w) through (cc) and (2)(h), signed and dated by the responsible person or funeral director who is responsible for the final disposition of the deceased individual's human remains; and
3. Contact the health care provider expected to sign the deceased individual's medical certification of death to:
   a. Provide information about the deceased individual, in a Department-provided format, to enable the health care provider to identify the deceased individual; and
   b. Inform the health care provider that the deceased individual's death record has been established and is available for medical certification information to be entered.

C. Except as provided in R9-19-304, a medical certifier shall:
1. Review the information provided according to subsection (B)(3)(a) for a deceased individual and either verify the information is correct or make corrections to the provided information; and
2. Complete and submit, in a Department-provided format, to the State Registrar or the local registrar of the county where the death occurred, as soon as possible and no more than 72 hours after the death, a medical certification of death for the deceased individual that includes:
   a. The information specified in R9-19-302(A)(3) and (4) and corrections made to the information provided according to subsection (B)(3)(a); and
   b. An attestation:

i. Stating that, to the best of the medical certifier's knowledge:
(1) The information provided according to subsection (B)(3)(a) is correct or was corrected, and
(2) Death occurred due to the cause and manner stated; and
ii. If not submitted electronically, signed and dated by the medical certifier; and
3. When specifying the conditions leading to the immediate cause of death, including the underlying cause of death, use the applicable standards from the Physicians' Handbook on Medical Certification, DHHS Publication No. (PHS) 2003-1108, published by the Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Health Statistics, incorporated by reference, on file with the Department, and including no future editions or amendments, available through http://www.cdc.gov/nchs/data/misc/hb_cod.pdf or from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250-7954.

D. Upon receiving information submitted according to subsections (B) or (C), the State Registrar or the local registrar of the county where a death occurred shall:
1. If the information submitted to register the deceased individual's death indicates that the human remains are to be cremated and the medical certification of death was not signed by the medical examiner, as required in A.R.S. § 11-599, request that the medical examiner review the medical certification of the deceased individual's death;
2. If the information submitted to register the deceased individual's death indicates that the deceased individual's death may have occurred under circumstances set forth in A.R.S. § 11-593 and the medical certification of death was not signed by the medical examiner, as required in A.R.S. § 11-594, or a tribal law enforcement authority, as allowed by A.R.S. § 36-325(I):
a. Not register the deceased individual's death; and
b. Request that the medical examiner or, if applicable, tribal law enforcement authority:
i. Review the circumstances of the individual's death to determine whether:
(1) The medical examiner has jurisdiction according to A.R.S. § 11-593, or
(2) The tribal law enforcement authority has jurisdiction according to A.R.S. § 36-325(I);
ii. Notify the State Registrar or the local registrar of the county where a death occurred of the determination; and
iii. If applicable, complete and sign the medical certification of the deceased individual's death according to R9-19-304(B); and
3. Within 72 hours, either:
a. Register the deceased individual's death; or
b. Notify the person submitting the information according to subsections (B) or (C), as specified in R9-19-103(C).

E. A responsible person or representative of a funeral establishment responsible for submitting the information in subsection (B) to the State Registrar or a local registrar or deputy local registrar of the registration district where a deceased individual's death occurred shall:
1. Maintain a copy of the document in subsection (A) for at least 10 years after the date on the document, and
2. Provide a copy of the document in subsection (A) to the State Registrar for review within 48 hours after the time of the State Registrar's request.

F. If a deceased individual's death occurs in this state and is not registered within one year after the date of the deceased individual's death, the State Registrar or a local registrar or deputy local registrar shall establish a delayed death record for the deceased individual and register the deceased individual's death.

G. To request the registration of a delayed death record for a deceased individual:
1. Except as provided in subsections (G)(2) and (3) or R9-19-304(G), a person shall submit to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred:
a. A court order requiring registration of the deceased individual's death, certified by the issuing court, and containing the deceased individual's:
i. Name,
ii. Social Security Number,
iii. Date of birth,
iv. Date of death,
v. Cause of death, and
vi. Location of death;
b. If not included in the court order in subsection (G)(1)(a), the information in R9-19-302(A)(1) and (2), as available;
c. An affidavit attesting to the validity of the information required in subsection (G)(1)(b), signed by the person making the request; and
d. The fee in R9-19-105 for requesting to establish a delayed death record and register the deceased individual's death;
2. A medical certifier shall submit, in a Department-provided format, to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred:
a. The information specified in R9-19-302(A)(1) and (2);
b. A medical certification of the deceased individual's death, completed as required in subsection (C); and
c. A description of the circumstances causing the delay; and
3. A responsible person shall submit, in a Department-provided format, to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred:
a. The information specified in R9-19-302(A)(1) and (2);
b. A medical certification of the deceased individual's death, completed as required in subsection (C);

c. A description of the circumstances causing the delay;
d. An affidavit attesting to the validity of the information required in subsections (G)(1)(a) through (c), signed by the person making the request; and
e. The fee in R9-19-105 for requesting to establish a delayed death record and register the deceased individual's death;

H. When the State Registrar or a local registrar or deputy local registrar of the registration district where a death occurred receives a request to register the death of a deceased individual according to subsection (G), the State Registrar, local registrar, or deputy local registrar shall review the request according to R9-19-103.

I. To request the registration of an individual's presumptive death under A.R.S. § 36-325(L) or 36-328, a person requesting registration shall submit to the State Registrar:

1. A court order requiring registration of the individual's presumptive death, certified by the issuing court, and containing the deceased individual's:
   a. Name,
   b. Social Security Number,
   c. Date of birth,
   d. Date of death,
   e. Cause of death, and
   f. Location of death;
2. If not included in the court order in subsection (I)(1), the information in R9-19-302(A)(1) and (2), as available;
3. An affidavit attesting to the validity of the information required in subsection (I)(2), signed by the person making the request; and
4. The fee in R9-19-105 for requesting to establish a death record or delayed death record for a presumptive death.

Historical Note

Amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section repealed; new Section made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-304. Registration of a Death When a Medical Examiner is Notified According to A.R.S. § 11-593(B)

A. If a medical examiner of the registration district where a deceased individual's death occurred is notified according to A.R.S. § 11-593(B), the medical examiner shall determine whether the deceased individual died under any of the circumstances described in A.R.S. § 11-593(A) and:

1. If the medical examiner determines that the deceased individual did not die under any of the circumstances described in A.R.S. § 11-593(A):
   a. Document:
      i. The medical examiner's determination that the medical examiner does not have jurisdiction according to A.R.S. § 11-593, and
      ii. The name of a health care provider who had been providing current care to the deceased individual;
   b. Provide, upon request, a copy of the documentation in subsection (A)(1)(a) to the State Registrar or a local registrar or deputy local registrar of the registration district where the deceased individual's death occurred; and
   c. Notify the State Registrar or the local registrar or deputy local registrar of the registration district where the deceased individual's death occurred of the determination; and
2. If the medical examiner determines that the deceased individual died under any of the circumstances described in A.R.S. § 11-593(A), take charge of the deceased individual's human remains under A.R.S. § 11-594.

B. If the medical examiner of the registration district where a deceased individual's death occurred takes charge of the deceased individual's human remains under A.R.S. § 11-594, the medical examiner shall submit the medical certification of death in a Department-provided format:

1. To the State Registrar or a local registrar or deputy local registrar of the registration district where the deceased individual's death occurred according to A.R.S. § 36-325(C);
2. That includes:
   a. The deceased individual's name, date of birth, and sex;
   b. Any other names by which the deceased individual was known, including, if applicable, the deceased individual's last name before first marriage;
   c. The date of the individual's death;
   d. The place of death including:
      i. Either:
         (1) The name of the facility where the death occurred; or
         (2) If the death did not occur in a facility, the street address at which the death occurred or, if the location at which the death occurred does not have a street address, another indicator of the location at which the death occurred;
      ii. The county;
      iii. The town or city; and
      iv. Zip code;
   e. The deceased individual's age;

f. Whether the cause or manner of death is pending investigation at the time the information is submitted;
g. If the cause and manner of death are not pending investigation, the information in R9-19-302(A)(3) and (4) and (B); and
h. If the cause or manner of death is pending investigation:
i. The word "pending" for the:
(1) Cause of death required in R9-19-302(A)(3)(c), or
(2) Manner of death required in R9-19-302(A)(3)(h);
ii. The remaining information in R9-19-302(A)(3) and (4); and
iii. The information required in R9-19-302(B); and
3. That is signed and dated by the medical examiner, attesting that, on the basis of examination or investigation, as applicable, death occurred at the time, date, and place, and due to the cause and manner stated.

C. When specifying the conditions leading to the immediate cause of death, including the underlying cause of death, a medical examiner shall use the applicable standards from the Medical Examiners' and Coroners' Handbook on Death Registration and Fetal Death Reporting, DHHS Publication No. (PHS) 2003-1110 published by the Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Health Statistics, incorporated by reference, on file with the Department, and including no future editions or amendments, available through http://www.cdc.gov/nchs/data/misc/hb_me.pdf or from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250-7954.

D. Upon determination of the cause or manner of death, a medical examiner who had indicated, according to subsection (B)(2)(h), that the cause or manner of death was pending investigation shall submit an amendment according to R9-19-310 that includes the cause or manner of death, using the standards in subsection (C).

E. Within seven days after receiving a deceased individual's human remains from a medical examiner, a responsible person or funeral director who is responsible for the final disposition of the deceased individual's human remains shall:
1. Comply with the requirements in R9-19-303(A); and
2. Submit to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred, and in a Department-provided format, the information specified in R9-19-302(A)(1) and (2).

F. Upon receiving information submitted according to subsections (B), (E), and, if applicable (D), the State Registrar or the local registrar of the county where a death occurred shall:
1. Review the information received;
2. Enter into a deceased individual's death record any missing information provided according to subsection (B), (E), or, if applicable (D); and
3. Within 72 hours, either:
a. Register the deceased individual's death, or
b. Notify the person submitting the information according to subsection (B) or (E), as specified in R9-19-103(C).

G. To request the registration of a delayed death record for a deceased individual, a medical examiner or a tribal law enforcement authority shall submit, in a Department-provided format, to the State Registrar or a local registrar or deputy local registrar of the registration district where the death occurred the information required in R9-19-302.

Historical Note

Amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section repealed; new Section made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-305. Fetal Death Registration

A. Before requesting the registration of a fetal death, a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife shall:
1. Obtain, in a written format:
a. The information in subsections (B)(1)(a) through (f), (v), and (w) and (2)(a) through (f) from a parent of the deceased or another family member who is of legal age; and
b. A statement attesting to the validity of the information in subsections (B)(1)(a) through (f), (v), and (w) and (2)(a) through (f), signed and dated by the individual providing the information; and
2. Provide, in a Department-provided format, the information in:
a. Subsections (B)(1)(g) through (o) and (2)(g) through (u); and
b. Unless a funeral director is responsible for the final disposition of the human remains, subsections (B)(1)(p) through (u).

B. Except as provided in subsection (D) and R9-19-306, a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife shall submit to the State Registrar or a local registrar, according to A.R.S. § 36-329 and in a Department-provided format:
1. Information for the deceased's certificate of fetal death registration:
a. The name of the deceased, if applicable;
b. Location where delivery occurred, including:
i. The city or town, zip code, and county where the delivery occurred; and
ii. Whether delivery occurred in a residence or another facility;
c. If delivery occurred at a residence, the street address of the residence or, if the residence where the delivery occurred does not have a street address, another indicator of the location at which the delivery occurred;

d. If delivery occurred in a facility, the:
   i. Name of the facility where delivery occurred, and
   ii. Type of facility where delivery occurred;
e. The following information about the deceased's father:
   i. Name;
   ii. Date of birth; and
   iii. State, territory, or foreign country where the father was born;
f. The following information about the deceased's mother:
   i. Current name;
   ii. Street address, apartment number if applicable, city or town, state, zip code, and county of the mother's usual residence;
   iii. If the mother's usual residence is not in the United States, the country of the mother's usual residence;
   iv. Date of birth;
   v. Name before first marriage; and
   vi. State, territory, or foreign country where the mother was born;
g. The deceased's sex;
h. Plurality of delivery;
i. If plurality involves more than one, the deceased's order of birth;
j. Date of delivery;
k. Hour of delivery;
l. Any cause or condition that contributed to the fetal death, specified according to the applicable standards incorporated by reference in R9-19-303(C)(3) or R9-19-304(C), as applicable;
m. Any other significant causes or conditions related to the fetal death;
n. If a medical examiner of the registration district where the fetal death occurred took charge of the human remains under A.R.S. § 11-594, the name and health professional license number of the medical examiner;
o. The name and, if applicable, professional credential of the individual attending the delivery; and
p. The anticipated final disposition of the human remains, including one or more of the following:
   i. Hospital or abortion clinic disposition;
   ii. Burial;
   iii. Entombment;
   iv. Cremation;
   v. Anatomical gift, except for an anatomical gift of a part;
   vi. Removal from the state; and
   vii. Other final disposition of the human remains;
q. If an anticipated final disposition is anatomical gift, except for an anatomical gift of a part, another anticipated final disposition other than removal from the state;
r. If an anticipated final disposition is removal from the state:
   i. Whether removal from the state includes removal from the United States; and
   ii. Another anticipated final disposition specified in subsection (B)(1)(p)(ii), (iii), (iv), or (vii);
s. If an anticipated final disposition of the human remains is another means of final disposition, a description of the anticipated final disposition;
t. The name and location where each final disposition of the human remains took place, and the date of each final disposition;
u. If a funeral establishment is responsible for the final disposition of the human remains:
   i. The name and address of the funeral establishment, and
   ii. The name and license number of the funeral director;
v. If a person is responsible for the final disposition of the human remains, the name and address of the responsible person; and
w. The name and title of the individual providing the information;

2. Other information for the deceased's fetal death record:
   a. If delivery occurred at a residence, whether the delivery was planned to occur at the residence;
   b. The following information about the deceased's father:
      i. Race;
      ii. Whether the father is of Hispanic origin and, if so, the type of Hispanic origin; and
      iii. Highest degree or level of education completed by the father at the time of the deceased's delivery;
   c. The following information about the deceased's mother:
      i. Race;
      ii. Highest degree or level of education completed by the mother at the time of the deceased's delivery;
      iii. Whether the mother's usual residence is inside city limits;
      iv. Whether the mother's usual residence is in a tribal community and, if so, the name of the tribal community; and
      v. Height;
   d. Whether the deceased's mother:
      i. Is of Hispanic origin and, if so, the type of Hispanic origin;
      ii. Received food from WIC for herself during the pregnancy; or

iii. Was married at the time of delivery;
e. The deceased's mother's history of:
i. Smoking before or during the pregnancy,
ii. Prenatal care for this pregnancy, and
iii. Previous pregnancies and pregnancy outcomes;
f. The deceased's mother's:
i. Pre-pregnancy weight;
ii. Weight at delivery; and
iii. Date the last normal menses began;
g. The principal source of payment for the delivery;
h. If applicable, the National Provider Identifier of the facility where delivery occurred;
i. Estimation of the deceased's gestational age;
j. Weight in grams of the deceased at delivery;
k. Whether:
i. The deceased was dead at first assessment with no ongoing labor,
ii. The deceased was dead at first assessment with ongoing labor,
iii. The deceased died during labor after first assessment, or
iv. It is unknown when the deceased died;
l. The following medical information about the deceased's mother:
i. Medical risk factors during this pregnancy;
ii. Characteristics of the labor and delivery; and
iii. Medical complications during labor or delivery;
m. Whether the deceased's mother was transferred from one facility to another facility for a maternal medical condition or fetal medical condition before the delivery;
n. If the deceased's mother was transferred from one facility to another facility before the delivery, the name of the facility from which the deceased's mother was transferred;
o. Whether the prenatal record was available for completion of the fetal death report;
p. Any congenital anomalies of the deceased;
q. Whether an autopsy was planned or performed;
r. Whether a histological placental examination was performed;
s. Whether autopsy or histological placental examination results were used in determining the cause of the fetal death;
t. Whether the placenta appearance was normal or abnormal; and
u. A description of the fetal appearance at delivery; and
3. A written statement attesting to the validity of the submitted information, signed and dated by the designee of the person submitting the information.

C. To request the registration of a fetal death more than seven days after the fetal death, a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife shall submit, in a Department-provided format, to the State Registrar:
1. The information required in subsections (A)(1) and (2);
2. A description of the circumstances causing the delay; and
3. A written statement attesting to the validity of the information required in subsections (B)(1) and (2), signed and dated by the person making the request.

D. Within seven days after receiving the human remains from a fetal death from a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife, a responsible person or funeral director who is responsible for the final disposition of the human remains shall submit to the State Registrar or the local registrar of the registration district in which the fetal death occurred, in a Department-provided format, any information specified in subsections (B)(1)(a) through (f) and (p) through (w) and (2)(a) through (e) that had not been submitted by the hospital, abortion clinic, physician, nurse midwife, or midwife, according to subsection (B).

E. If a fetal death occurs in this state and is not registered within one year after the date of the fetal death, the State Registrar or a local registrar shall establish and register a delayed fetal death record.

F. When the State Registrar or a local registrar or deputy local registrar of the registration district where a fetal death occurred receives a request to register the fetal death, the State Registrar, local registrar, or deputy local registrar shall review the request according to R9-19-103.

G. A hospital, an abortion clinic, a physician, a nurse midwife, or a midwife responsible for submitting the information in subsection (B) to the State Registrar or a local registrar or deputy local registrar shall:
1. Maintain a copy of the evidentiary document in subsection (A) for at least 10 years after the date on the evidentiary document, and
2. Provide a copy of the evidentiary document in subsection (A) to the State Registrar for review within 48 hours after the State Registrar's request.

Historical Note

Former Section R9-19-305 repealed, new Section R9-19-305 adopted effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-305 re-

pealed; new Section R9-19-305 renumbered from R9-19-306 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-306. Registration of a Fetal Death When a Medical Examiner is Notified According to A.R.S. § 11-593(B)

A. If a medical examiner of the registration district where a fetal death occurred is notified according to A.R.S. § 11-593(B), the medical examiner shall determine whether the fetal death occurred under any of the circumstances described in A.R.S. § 11-593(A) and:
1. If the medical examiner determines that the fetal death did not occur under any of the circumstances described in A.R.S. § 11-593(A):
   a. Document:
      i. The medical examiner's determination that the medical examiner does not have jurisdiction according to A.R.S. § 11-593, and
      ii. The name of a health care provider who had been providing current care to the deceased's mother;
   b. Provide, upon request, a copy of the documentation in subsection (A)(1)(a) to the State Registrar or a local registrar or deputy local registrar of the registration district where the fetal death occurred; and
   c. Notify the State Registrar or the local registrar or deputy local registrar of the registration district where the fetal death occurred of the determination; and
2. If the medical examiner determines that the fetal death occurred under any of the circumstances described in A.R.S. § 11-593(A), take charge of the human remains under A.R.S. § 11-594.

B. If the medical examiner of the registration district where a fetal death, which requires registration under A.R.S. § 36-329, occurred takes charge of the human remains under A.R.S. § 11-594, the medical examiner shall submit to the State Registrar or the local registrar of the registration district where the fetal death occurred, according to A.R.S. § 36-325(C) and in a Department-provided format:
1. Whether the cause of fetal death is pending investigation at the time the information is submitted;
2. If the cause of fetal death is not pending investigation:
   a. The information in R9-19-305(B)(1)(a) through (o), (1)(w), and (2)(i) through (u); and
   b. If known, the information in R9-19-305(B)(1)(p) through (v) and (2)(a) through (h); and
3. If the cause of fetal death is pending investigation:
   a. The word "pending" for the cause of fetal death required in R9-19-305(B)(1)(l);
   b. The remaining information in subsection (B)(2)(a); and
   c. If known, the information in subsection (B)(2)(b).

C. Upon determination of the cause of fetal death, a medical examiner who had indicated, according to subsection (B)(3), that the cause of fetal death was pending investigation shall submit an amendment according to R9-19-310 that includes the cause of fetal death, using the applicable standards incorporated by reference in R9-19-304(C).

D. Within seven days after receiving the human remains from a fetal death from a medical examiner, a responsible person or funeral director who is responsible for the final disposition of the human remains shall submit to the State Registrar or the local registrar of the registration district in which the fetal death occurred, in a Department-provided format, any information specified in R9-19-305(B)(1)(a) through (f) and (p) through (w) and (2)(a) through (e) that had not been submitted by the medical examiner, according to subsection (B).

E. Upon receiving information submitted according to subsections (B) and, if applicable, (C) and (D), the State Registrar or a local registrar shall:
1. Review the information received;
2. Enter into a fetal death record any missing information received according to subsection (B) or, if applicable (C) or (D); and
3. Within 72 hours, either:
   a. Register the fetal death, or
   b. Notify the applicable person submitting the information according to subsection (B), (C), or (D), as specified in R9-19-103(C).

F. To request the registration of a delayed fetal death record, a medical examiner or tribal law enforcement authority shall submit to the State Registrar, in a Department-provided format, the information required in R9-19-305(B).

Historical Note

Former Section R9-19-306 renumbered as Section R9-19-308, new Section R9-19-306 adopted effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-306 renumbered to R9-19-305; new Section R9-19-306 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2). Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-307. Certificate of Birth Resulting in Stillbirth

Upon request by the parent or parents of a stillborn child according to R9-19-317, the State Registrar shall provide the parent or parents with a certificate of birth resulting in stillbirth if the fetal death occurred after a gestational period of at least 20 completed weeks.

Historical Note

Former Section R9-19-307 renumbered as Section R9-19-309, new Section R9-19-307 adopted effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-307 repealed; new Section R9-19-307 renumbered from R9-19-308 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-308. Disposition-transit Permits

A. A local registrar or deputy local registrar shall collaborate with the State Registrar to ensure that a funeral establishment or responsible person is able to obtain a disposition-transit permit during hours when the office of the local registrar or deputy local registrar is not open for business.

B. A funeral establishment or responsible person shall obtain a disposition-transit permit for human remains from a deceased individual or a fetal death before a final disposition of the human remains is initiated.
1. A disposition-transit permit may list more than one final disposition.
2. A disposition-transit permit issued by the State Registrar or any local registrar or deputy local registrar is valid for each final disposition listed on the disposition-transit permit of the human remains in any registration district in the state or, if listed on the disposition-transit permit, for removal from the state.
3. A crematory shall not accept human remains for cremation unless the accompanying disposition-transit permit specifies cremation as a final disposition.

C. The State Registrar or the local registrar or deputy local registrar of the county where a death or fetal death occurred shall not issue a disposition-transit permit to a funeral establishment or responsible person for the human remains from the deceased individual or the fetal death unless:
1. For the human remains from the deceased individual:
   a. A medical certification of death for the deceased individual, required in R9-19-303(C)(2) or R9-19-304(B), has been submitted to the local registrar of the county where the death occurred; and
   b. The following information is contained in the deceased individual's death record:
      i. The deceased individual's name, sex, and date of birth;
      ii. The date of death;
      iii. The town or city, county, and state where the death occurred;
      iv. The cause of death as listed on the deceased individual's medical certification of death;
      v. The anticipated final disposition of the human remains as specified in R9-19-302(A)(1)(w) through (z);
      vi. If applicable, the name of the funeral establishment; and
      vii. The name of the funeral director or responsible person in charge of the final disposition of the human remains;
2. For the human remains from the fetal death, the following information is contained in the deceased's fetal death record:
   a. The name of the mother;
   b. The date of delivery;
   c. The estimated gestational age of the human remains or, if the gestational age is unknown, the weight of the human remains;
   d. The anticipated final disposition of the human remains, as required in R9-19-305(B)(1)(p) through (s);
   e. If applicable, the name of the funeral establishment; and
   f. The name of the funeral director or responsible person in charge of the final disposition of the human remains;
3. If the information in the death record or fetal death record, as applicable, indicates that the death or fetal death may have occurred under a circumstance in A.R.S. § 11-593(A), the medical examiner has, as applicable:
   a. Signed the medical certification of death;
   b. Submitted the information in R9-19-306(B); or
   c. Notified the State Registrar, local registrar, or deputy local registrar according to R9-19-304(A)(1)(c) or R9-19-306(A)(1)(c); and
4. If cremation is listed as an anticipated final disposition for the human remains, the State Registrar or a local registrar or deputy local registrar has obtained an approval for cremation from the medical examiner of the county where the death or fetal death occurred.

D. A person who submitted the information to request a disposition-transit permit shall not have the right to appeal, as prescribed in A.R.S. Title 41, Chapter 6, Article 6, the State Registrar's determination to deny a request for a disposition-transit permit if the human remains of a deceased individual or from a fetal death have been transported for final disposition before the person who submitted the information receives the written notice specified in R9-19-103(E)(2)(c).

Historical Note

Adopted effective March 30, 1976 (Supp. 76-2). Former Section R9-19-308 renumbered and amended as Section R9-19-310, former Section R9-19-306 renumbered as Section R9-19-308 effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-308 renumbered to R9-19-307; new Section R9-19-308 renumbered from R9-19-302 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-309. Correcting Information in a Registered Death Record or a Registered Fetal Death Record

A. To request the correction of information submitted by the funeral director or the funeral director's funeral establishment for registration of a deceased individual's death, according to R9-19-303(B) or R9-19-304(E), a funeral director shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A written request to correct the submitted information, on the letterhead paper of the funeral director's funeral establishment or in a Department-provided format, that includes:
   a. The name and license number of the funeral director submitting the request;
   b. Contact information for the funeral director submitting the request, which includes a telephone number or an e-mail address;
   c. The deceased individual's:
      i. Name in the deceased individual's registered death record;
      ii. Sex;
      iii. Date of birth;
      iv. Date of death; and
      v. If known, the state file number;
   d. The specific information in the registered death record to be corrected; and
   e. A written statement attesting to the validity of the submitted correction signed and dated by the funeral director submitting the request for correction; and
2. A copy of the document required in R9-19-303(A).

B. To request the correction of information specified in R9-19-302(A)(3) or (4) in a deceased individual's registered death record, a medical certifier, including a medical examiner or, if applicable, tribal law enforcement authority, who completed the medical certification of death for the deceased individual, according to R9-19-303(C)(2) or R9-19-304(B), shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A written request to correct the submitted information, on the letterhead paper of the medical certifier or in a Department-provided format, that includes:
   a. The name and, as applicable, the health professional license number or the badge number of the medical certifier submitting the request;
   b. Contact information for the medical certifier submitting the request, which includes a telephone number or an e-mail address;
   c. The information in subsection (A)(1)(c);
   d. The specific information in the registered death record to be corrected; and
   e. A written statement attesting to the validity of the submitted correction signed and dated by the medical certifier submitting the request for correction; and
2. An evidentiary document, dated before the date the deceased individual's death was registered, that demonstrates the validity of the submitted correction.

C. In addition to a correction of information in a deceased individual's registered death record allowed under subsection (B), a medical examiner may request the correction of any other information that had been submitted by the medical examiner according to R9-19-304(B) for the deceased individual's death record by submitting to the State Registrar or the local registrar of the registration district where the death occurred:
1. The written request to correct the submitted information in subsection (B)(1), and
2. An evidentiary document required in subsection (B)(2).

D. To request the correction of information in a deceased individual's registered death record, a person who was responsible for the final disposition of the deceased individual's human remains, according to A.R.S. § 36-831, or who provided the information in R9-19-302(A)(1) and (2) to a funeral director, according to R9-19-303(A), shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A written request to correct, in a Department-provided format, that includes:
   a. The following information:
      i. The name of the person submitting the request;
      ii. The person's relationship to the deceased individual;
      iii. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
      iv. The information required in subsection (A)(1)(c); and
      v. The specific information in the registered death record to be corrected; and
   b. An affidavit attesting to the validity of the submitted correction, signed by the person requesting the correction;
2. An evidentiary document that demonstrates the person's relationship to the deceased individual;
3. An evidentiary document, dated before the date the deceased individual's death was registered, that demonstrates the validity of the submitted correction; and
4. The fee in R9-19-105 for a request to correct the information in a registered death record.

E. To request the correction of information submitted by a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife, according to R9-19-305(B); by a funeral director, according to R9-19-305(D) or R9-19-306(D); by a medical examiner, according to R9-19-306(B); or by a tribal law enforcement authority, as allowed by A.R.S. § 36-325(I), in a registered fetal death record, a designee of the hospital, abortion clinic, physician, nurse midwife, midwife, medical examiner, or tribal law enforcement authority, as applicable, or a funeral director shall submit to the State Registrar or the local registrar of the registration district where the fetal death occurred:

1. A written request to correct the submitted information, on the submitter's letterhead paper or in a Department-provided format, that includes:
   a. The name and, as applicable:
      i. The health care institution license number of the hospital or abortion clinic submitting the request;
      ii. The health professional license number of the physician, nurse midwife, midwife, or medical examiner submitting the request;
      iii. The funeral director's license number; or
      iv. Badge number for the medical certifier for the tribal law enforcement authority submitting the request;
   b. Contact information, which includes a telephone number or an e-mail address for the:
      i. Designee of the hospital, abortion clinic, physician, nurse midwife, midwife, medical examiner, or tribal law enforcement authority submitting the request; or
      ii. Funeral director submitting the request;
   c. Name of the mother of the fetus;
   d. Date of delivery; and
   e. If known, the state file number;
   f. The specific information in the registered fetal death record to be corrected; and
   g. A written statement attesting to the validity of the submitted correction signed and dated by the designee of the hospital, abortion clinic, physician, nurse midwife, midwife, medical examiner, or tribal law enforcement authority, as applicable, or a funeral director submitting the request for correction; and
2. An evidentiary document that demonstrates the validity of the submitted correction.

F. To request the correction of information in a registered fetal death record, a parent of the fetus shall submit, to the State Registrar or the local registrar of the registration district where the fetal death occurred:
1. A written request to correct, in a Department-provided format, that includes:
   a. The following information:
      i. The name of the parent submitting the request;
      ii. Contact information for the parent submitting the request, which includes a telephone number or an e-mail address;
      iii. The information required in subsection (E)(1)(c) through (e); and
      iv. The specific information in the registered fetal death record to be corrected; and
   b. An affidavit attesting to the validity of the submitted correction, signed by the parent requesting the correction;
2. An evidentiary document, dated before the registration of the fetal death, that demonstrates the validity of the submitted correction; and
3. The fee in R9-19-105 for a request to correct the information in a registered fetal death record.

Historical Note

Former Section R9-19-309 renumbered and amended as Section R9-19-311, former Section R9-19-307 renumbered as Section R9-19-309 effective February 20, 1980 (Supp. 80-1). Amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-309 repealed; new Section R9-19-309 renumbered from R9-19-310 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-310. Amending Information in a Registered Death Record or a Registered Fetal Death Record

A. To request the amendment of information specified in R9-19-302(A)(3) or (4) in a deceased individual's registered death record, a medical certifier, including a medical examiner or, if applicable, tribal law enforcement authority, who completed the medical certification of death for the deceased individual, according to R9-19-303(C)(2) or R9-19-304(B), shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A written request to amend the submitted information, in a Department-provided format, that includes:
   a. The name and, as applicable, the health professional license number or the badge number of the medical certifier submitting the request;
   b. Contact information for the medical certifier submitting the request, which includes a telephone number or an e-mail address;
   c. The following information about the deceased individual:
      i. Name in the deceased individual's registered death record;
      ii. Sex;
      iii. Date of birth;
      iv. Date of death; and
      v. If known, the state file number;
   d. The specific information in the registered death record to be amended; and
   e. A written statement attesting to the validity of the submitted amendment signed by the medical certifier submitting the request for amendment; and
2. An evidentiary document that demonstrates the validity of the submitted amendment.

B. Except as provided in subsections (D) and (F), to request the amendment of any of the information in R9-19-302(A)(1) or (2) in a deceased individual's registered death record, a person shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A request to amend, in a Department-provided format, that includes:
   a. The following information:
      i. The name of the person submitting the request;
      ii. The person's relationship to the deceased individual;
      iii. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
      iv. The information required in subsection (A)(1)(c); and
      v. The specific information in the registered death record to be amended; and
   b. An affidavit attesting to the validity of the submitted amendment, signed by the person requesting the amendment;
2. An evidentiary document that demonstrates the person's relationship to the deceased individual;
3. An evidentiary document that demonstrates the validity of the submitted amendment; and
4. The fee in R9-19-105 for a request to amend the information in a registered death record.

C. If a person submitting a request to amend the information in a deceased individual's registered death record according to subsection (B) is not the individual listed in the deceased individual's death record as the individual who provided the information about the deceased individual, as specified in R9-19-302(A)(1)(v), the State Registrar or a local registrar or deputy local registrar:
1. Shall notify the individual who provided the information about the deceased individual of the request for an amendment of information in the deceased individual's registered death record, and
2. May request evidentiary documents from the person submitting the request and the individual who provided information about the deceased individual within 10 days after the request to determine the validity of the requested amendment and the information in the deceased individual's registered death record.

D. In addition to an amendment of information in a deceased individual's registered death record allowed under subsection (A), a medical examiner may request the amendment of any other information that had been submitted by the medical examiner according to R9-19-304(B) for the deceased individual's death record by submitting to the State Registrar or the local registrar of the registration district where the death occurred:
1. The written request to amend the submitted information in subsection (A)(1), and
2. An evidentiary document that demonstrates the validity of the submitted amendment.

E. The consulate of a foreign government may request the amendment of any of the information in R9-19-302(A)(1) or (2) in a deceased individual's registered death record on behalf of a family member of the deceased individual if:
1. The family member:
   a. Is a citizen of the foreign country, and
   b. Resides in the foreign country;
2. The deceased individual's medical certification of death was submitted by a medical examiner according to R9-19-304(B); and
3. The consulate provided the medical examiner who submitted the deceased individual's medical certification of death with evidentiary documents that enabled the medical examiner to establish the identity of the deceased individual.

F. To request the amendment of any of the information in R9-19-302(A)(1) or (2) in a deceased individual's registered death record under subsection (E), the consulate of a foreign government shall submit to the State Registrar or the local registrar of the registration district where the death occurred:
1. A written request to amend on the letterhead of the consulate, that includes:
   a. The name and address of the consulate;
   b. The name of and contact information for the consulate's designee for the request, which includes a telephone number or an e-mail address;
   c. The name of the person the consulate is representing;
   d. The relationship of the person in subsection (F)(1)(c) to the deceased individual;
   e. The information required in subsection (A)(1)(c);
   f. The specific information in the registered death record to be amended; and
   g. The dated signature of the consulate's designee;
2. Documentation verifying that the consulate's designee is representing the consulate;
3. A written statement, signed by the consulate's designee, attesting that the consulate has verified the relationship of the person identified according to subsection (F)(1)(c) to the deceased individual;
4. One or more evidentiary documents that demonstrate the validity of the submitted amendment; and
5. The fee in R9-19-105 for a request to amend the information in a registered death record.

G. To request the amendment of information submitted by a hospital, an abortion clinic, a physician, a nurse midwife, or a midwife, according to R9-19-305(B); by a medical examiner, according to R9-19-306(B); or a tribal law enforcement authority, as allowed by A.R.S. § 36-325(I), in a registered fetal death record, a designee of the hospital, abortion clinic, physician, nurse midwife, medical examiner, or tribal law enforcement authority, as applicable, shall submit to the State Registrar or the local registrar of the registration district where the fetal death occurred:
1. A written request to amend, in a Department-provided format, that includes:
   a. The name and, as applicable:
      i. The health care institution license number of the hospital or abortion clinic submitting the request;
      ii. The health professional license number of the physician, nurse midwife, midwife, or medical examiner submitting the

request; or

iii. Badge number for the medical certifier for the tribal law enforcement authority submitting the request;

b. Contact information for the designee of the hospital, abortion clinic, physician, nurse midwife, medical examiner, or tribal law enforcement authority submitting the request, which includes a telephone number or an e-mail address;

c. The following information:

i. Name of the mother of the fetus;

ii. Date of delivery; and

iii. If known, the state file number;

d. The specific information in the registered fetal death record to be amended; and

e. A written statement attesting to the validity of the submitted amendment signed and dated by the designee of the hospital, abortion clinic, physician, nurse midwife, medical examiner, or tribal law enforcement authority submitting the request for amendment; and

2. An evidentiary document that demonstrates the validity of the submitted amendment.

H. To request the amendment of information in a registered fetal death record, a parent of the fetus shall submit, to the State Registrar or the local registrar of the registration district where the fetal death occurred:

1. A request to amend, in a Department-provided format, that includes:

a. The following information:

i. The name of the parent submitting the request;

ii. Contact information for the parent submitting the request, which includes a telephone number or an e-mail address;

iii. The information required in subsection (G)(1)(c); and

iv. The specific information in the registered fetal death record to be amended; and

b. An affidavit attesting to the validity of the submitted amendment, signed by the parent requesting the amendment;

2. Except for an amendment to add the name of the fetus to the registered fetal death record, an evidentiary document that demonstrates the validity of the submitted amendment; and

3. The fee in R9-19-105 for a request to amend the information in a registered fetal death record.

I. The State Registrar or a local registrar shall amend the information in a registered death record or registered fetal death record based on a:

1. Request for amendment, if the State Registrar or local registrar determines, according to R9-19-103, that the information and evidentiary documents in the request for amendment supports the amendment of the deceased individual's registered death record; or

2. Court order.

Historical Note

Adopted effective March 30, 1976 (Supp. 76-2). Former Section R9-19-310 renumbered and amended as Section R9-19-312, former Section R9-19-308 renumbered and amended as Section R9-19-310 effective February 20, 1980 (Supp. 80-1). Editorial correction, Paragraph (2) (Supp. 80-2). Former Section R9-19-310 renumbered to R9-19-312, new R9-19-310 renumbered from R9-19-134, R9-19-135 and R9-19-136 and amended effective July 31, 1989 (Supp. 89-3). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-310 renumbered to R9-19-309; new Section R9-19-310 renumbered from R9-19-311 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

Clerical error correction made to first subsection reference in subsection (C) at the request of the Department of Health Services, February 8, 2018 (Supp. 17-4).

R9-19-311. Transporting Human Remains into the State for Final Disposition

A. A person transporting a deceased individual's human remains into Arizona from outside of the state shall submit a disposition-transit permit issued by or death certificate registered in the state where the deceased individual's death occurred or the human remains were previously interred that contains the information required in R9-19-302, including the cause of death, to the local registrar or deputy local registrar of the registration district where final disposition of the human remains in Arizona are anticipated or the State Registrar.

B. Upon receipt of a disposition-transit permit issued by or death certificate registered in another state that contains the information required in R9-19-302, including the cause of death, a local registrar, a deputy local registrar, or the State Registrar shall issue a disposition-transit permit using the information on the other state's disposition-transit permit or death certificate. If the human remains were previously disinterred, the local registrar, deputy local registrar, or State Registrar shall document "disinterred" on the disposition-transit permit.

Historical Note

Former Section R9-19-311 renumbered as Section R9-19-313, former Section R9-19-309 renumbered and amended as Section R9-19-311 effective February 20, 1980 (Supp. 80-1). Former Section R9-19-311 renumbered to R9-19-313, new Section R9-19-311 renumbered from Section R9-19-137 and amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-311 renumbered to R9-19-310; new Section R9-19-311 renumbered from R9-19-312 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-312. Disinterment-reinterment Permits

A. Except as provided in A.R.S. § 36-327, before a person disinters the human remains of a deceased individual or a fetal death, the person shall:
1. Obtain:
   a. Written authorization for the disinterment from the:
      i. Deceased individual's family member or members who have the highest priority according to A.R.S. § 36-327(A), or
      ii. Parent of the fetus; or
   b. A court order authorizing the disinterment;
2. If the disinterred human remains are to be cremated, obtain approval for the cremation from the medical examiner of the registration district where the human remains are interred; and
3. Submit to a local registrar, a deputy local registrar, or the State Registrar to obtain a disinterment-reinterment permit:
   a. The following information in a Department-provided format:
      i. For the human remains of a deceased individual:
         (1) The name, age, sex, and race of the deceased individual; and
         (2) The date and place of death;
      ii. For the human remains of a fetal death, the name of the mother and date of delivery;
      iii. The name of the cemetery or the location where the human remains are buried;
      iv. The name of the funeral director in charge of the disinterment;
      v. If applicable, the name or names of the family member or members who authorized the disinterment, as required in subsection (A)(1)(a);
      vi. The name of the cemetery or the location where it is anticipated that the human remains will be reinterred or the crematory where the human remains will be cremated; and
      vii. The anticipated date of the reinterment or cremation; and
   b. If applicable, a copy of the court order required in subsection (A)(1)(b) or the medical examiner's approval of cremation required in subsection (A)(2).

B. The funeral director who is in charge of the disinterment shall:
1. Maintain a copy of the written authorization in subsection (A)(1)(a) or court order for at least 10 years after the date on the evidentiary document, and
2. Provide a copy of the written authorization or court order to the State Registrar for review within 48 hours after the State Registrar's request.

C. A person who submitted the information to request a disinterment-reinterment permit shall not have the right to appeal, as prescribed in A.R.S. Title 41, Chapter 6, Article 6, the State Registrar's determination to deny a request for a disinterment-reinterment permit if the human remains of a deceased individual or from a fetal death have been disinterred before the person who submitted the information receives the written notice specified in R9-19-103(E)(2)(c).

Historical Note

Amended effective March 30, 1976 (Supp. 76-2). Former Section R9-19-312 renumbered as Section R9-19-316, former Section R9-19-310 renumbered and amended as Section R9-19-312 effective February 20, 1980 (Supp. 80-1). Former Section R9-19-312 renumbered to R9-19-314, new Section R9-19-312 renumbered from Section R9-19-310 and amended effective July 31, 1989 (Supp. 89-3). Section recodified to R9-8-1102 at 11 A.A.R. 3578, effective September 2, 2005 (Supp. 05-4). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-312 renumbered to R9-19-311; new Section R9-19-312 renumbered from R9-19-313 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-313. Duties of Persons in Charge of Place of Final Disposition

A person in charge of a place of final disposition in this state shall:
1. Maintain a copy of the following documents at the place of final disposition for at least five years after the issue date on the document:
   a. The disposition-transit permit for each final disposition of human remains, and
   b. The disinterment-reinterment permit for each disinterment or reinterment of human remains; and
2. Provide a copy of the document to the State Registrar for review within 48 hours after the State Registrar's request.

Historical Note

Amended effective March 30, 1976 (Supp. 76-2). Former Section R9-19-313 renumbered as Section R9-19-317, former Section R9-19-311 renumbered as Section R9-19-313 effective February 20, 1980 (Supp. 80-1). Former Section R9-19-313 renumbered to R9-19-315, new Section R9-19-313 renumbered from Section R9-19-311 and amended effective July 31, 1989 (Supp. 89-3). Section recodified to R9-6-389 at 11 A.A.R. 3578, effective September 2, 2005 (Supp. 05-4). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-313 renumbered to R9-19-312; new Section R9-19-313 renumbered from R9-19-314 and amended by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-314. Eligibility for a Certified Copy of a Certificate of Death Registration

A. A certified copy of a certificate of death registration contains, as available, the information specified in R9-19-302(A)(1) and (3).

B. The following are eligible to receive a certified copy of a deceased individual's certificate of death registration:
1. A funeral director representing one of the following in a final disposition of the deceased individual's human remains, within 12 months after the registration of the deceased individual's death:
   a. The deceased individual through a prearranged funeral agreement, as defined in A.R.S. § 32-1301;
   b. The deceased individual's spouse;
   c. The deceased individual's parent, grandparent, or adult child, grandchild, brother, or sister; or
   d. Another person who is responsible for the final disposition of the deceased individual's human remains according to A.R.S. § 36-831;
2. A designee of a funeral director in subsection (B)(1);
3. The surviving spouse of the deceased individual;
4. A parent or grandparent of the deceased individual;
5. An adult child, grandchild, brother, or sister of the deceased individual;
6. A person designated in a power of attorney, established by a person eligible according to subsection (B)(3), (4), or (5);
7. Another person who is responsible for the final disposition of the deceased individual's human remains according to A.R.S. § 36-831;
8. A person named in the deceased individual's last will and testament as the executor of the deceased individual's estate;
9. A person named in the deceased individual's last will and testament as a beneficiary of the deceased individual's estate;
10. A person named as a beneficiary of a life insurance policy on the deceased individual;
11. A person designated in a court order to receive a certified copy of the deceased individual's certificate of death registration;
12. A person authorized in writing to receive a certified copy of the deceased individual's certificate of death registration by a person who is eligible to receive a certified copy of the deceased individual's certificate of death registration according to subsection (B)(3), (4), (5), or (6);
13. An insurance company with which the deceased individual had a policy;
14. A bank, a credit union, a mortgage lender, or another financial institution with which the deceased individual had an account or other business relationship;
15. A hospital or other health care institution processing a claim against the deceased individual's estate;
16. Another person having a claim against the deceased individual's estate;
17. An attorney representing a person who is eligible to receive a certified copy of the deceased individual's certificate of death registration;
18. The consulate of a foreign government representing a person who:
    a. Is eligible to receive a certified copy of the deceased individual's certificate of death registration, according to subsection (B)(3), (4), (5), or (6);
    b. Is a citizen of the foreign country; and
    c. Resides in the foreign country; and
19. A governmental agency processing a financial claim, a governmental benefit application, or another form of compensation on behalf of the deceased individual or the deceased individual's estate or having another official purpose for a certified copy of the deceased individual's certificate of death registration.

Historical Note

Former Section R9-19-314 renumbered and amended as Section R9-19-318, new Section R9-19-314 adopted effective February 20, 1980 (Supp. 80-1). Former Section R9-19-314 renumbered to R9-19-316, new Section R9-19-314 renumbered from Section R9-19-312 and amended effective July 31, 1989 (Supp. 89-3). Section recodified to R9-8-1103 at 11 A.A.R. 3578, effective September 2, 2005 (Supp. 05-4). New Section made by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). Section R9-19-314 renumbered to R9-19-313; new Section R9-19-314 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-315. Requesting a Certified Copy of a Certificate of Death Registration

A. A funeral director eligible to receive a certified copy of a deceased individual's certificate of death registration according to R9-19-314(B)(1) or the funeral director's designee according to R9-19-314(B)(2) may request a certified copy of the deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request, on the letterhead of the funeral establishment or in a Department-provided format, that includes:
   a. The name and license number of the funeral director;
   b. Contact information for the funeral director, which includes a telephone number or an e-mail address;
   c. If applicable, the name and contact information for the funeral director's designee, which includes a telephone number or an e-mail address;
   d. The name and address of the funeral director's funeral establishment;
   e. The deceased individual's:
      i. Name in the deceased individual's registered death record,
      ii. Date of birth, and
      iii. Date of death;
   f. If known, the:

i. Sex of the deceased individual,
ii. State file number,
iii. Town or city of the deceased individual's death,
iv. County of the deceased individual's death,
v. Place of the deceased individual's death, and
vi. Deceased individual's Social Security Number;

g. The number of certified copies of the individual's certificate of death registration being requested; and
h. The dated signature of the funeral director submitting the request and, except as provided in subsection (B), either:
i. With the funeral director's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the funeral director that contains the funeral director's name and signature;

2. Except when the name of the funeral establishment specified according to subsection (A)(1)(d) is included in the deceased individual's registered death record, a copy of documentation demonstrating that the funeral director or the funeral director's funeral establishment has a valid contract to furnish funeral goods or services, as defined in A.R.S. § 32-1301, related to a final disposition of the deceased individual's human remains; and
3. The fee in R9-19-105 for each certified copy of the deceased individual's certificate of death registration being requested.

B. A funeral director or the funeral director's designee requesting a certified copy of a deceased individual's certificate of death registration according to subsection (A) may submit the written request in subsection (A)(1) with the funeral director's or the funeral director's designee's signature, if the funeral director or the funeral director's designee has submitted to the State Registrar or a local registrar:
1. A copy of a valid, government-issued form of photo identification of the funeral director or the funeral director's designee, as applicable; and
2. Documentation verifying current employment by the funeral establishment specified according to subsection (A)(1)(d), dated within the 12 months before the deceased individual's death was registered.

C. A person eligible to receive a certified copy of a deceased individual's certificate of death registration according to R9-19-314(B)(3) through (12) may request a certified copy of the deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request, in a Department-provided format, that includes:
a. The name and mailing address of the person submitting the request;
b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
c. The person's relationship with the deceased individual that makes the person eligible to receive a certified copy of the deceased individual's certificate of death registration;
d. The deceased individual's:
i. Name in the deceased individual's registered death record,
ii. Date of birth, and
iii. Date of death;
e. If known, the:
i. Sex of the deceased individual,
ii. State file number,
iii. Town or city of the deceased individual's death,
iv. County of the deceased individual's death,
v. Place of the deceased individual's death,
vi. Funeral establishment or person responsible for the final disposition of the deceased individual's human remains, and
vii. Deceased individual's Social Security Number;
f. Whether the certified copy of the deceased individual's certificate of death registration is to be used in a claim against the U.S. government for one of the following and, if so, which of the following:
i. Social Security or similar retirement benefits;
ii. Allotments to dependents of military personnel on active service;
iii. Pensions to veterans of the armed forces or their survivors;
iv. Payments of U.S. government or NSLI life insurance proceeds; or
v. Any other claim that, as determined by the State Registrar, meets the general requirements of A.R.S. § 39-122(A);
g. The number of certified copies of the deceased individual's certificate of death registration being requested; and
h. The dated signature of the person submitting the request, either:
i. With the person's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person that contains the person's name and signature;
2. One or more evidentiary documents demonstrating that the person is eligible to receive a certified copy of the deceased individual's certificate of death registration; and
3. Except as provided in A.R.S. § 39-122(A), the fee in R9-19-105 for each certified copy of the deceased individual's certificate of death registration being requested.

D. The following provides examples of documentation that meets the requirement in subsection (C)(2):

1. For the surviving spouse of the deceased individual whose name is included in the deceased individual's registered death record, a copy of the marriage certificate for the deceased individual and the spouse;
2. For a person who is the deceased individual's parent, grandparent, or adult child, grandchild, brother, or sister:
   a. Either:
      i. A copy of one or more certificates of birth registration or certificates of death registration that show the person's relationship to the deceased individual or, if a parent's name is included in the deceased individual's registered birth record or registered death record, the deceased individual's parent; or
      ii. For births or deaths registered in Arizona, information about the person or a related person whose birth or death was registered in Arizona, such as the person's name, date of birth, or parent's name and date of birth or date of death, that would enable the Department to locate the person's or related person's registered birth record or registered death record; and
   b. If applicable, a copy of a court order of adoption, certified by the issuing court, or a certificate of adoption with a court seal, for the deceased individual or the deceased individual's parent or adult child, grandchild, brother, or sister that shows the person's relationship to the deceased individual;
3. For a person designated in a power of attorney, established by a person eligible according to R9-19-314(B)(3), (4), or (5):
   a. A copy of the power of attorney; and
   b. Documentation, as specified in subsection (D)(1) or (2), demonstrating that the person is eligible, according to R9-19-314(B)(3), (4), or (5), to receive a certified copy of the deceased individual's certificate of death registration;
4. For another responsible person, a copy of documentation demonstrating that the responsible person meets the definition of "responsible person" in A.R.S. § 36-301;
5. For a person named in the deceased individual's last will and testament as the executor of the deceased individual's estate or as a beneficiary of the deceased individual's estate, a copy of the deceased individual's last will and testament;
6. For a person named as a beneficiary of a life insurance policy on the deceased individual, a copy of the life insurance policy for the deceased individual or other documentation from the company that issued the life insurance policy specifying the person as a beneficiary;
7. For a person named in a court order to receive a certified copy of the deceased individual's certificate of death registration, a copy of the court order, certified by the issuing court; and
8. For a person authorized in writing to receive a certified copy of the deceased individual's certificate of death registration by a person who is eligible to receive a certified copy of the deceased individual's certificate of death registration according to R9-19-314(B)(3), (4), (5), or (6):
   a. A written statement from the person authorized in writing to receive a certified copy of the deceased individual's certificate of death registration, that includes:
      i. The deceased individual's name;
      ii. The name of and contact information for the person authorized to receive a certified copy of the deceased individual's certificate of death registration;
      iii. The name of and contact information for the person who is eligible to receive a certified copy of the deceased individual's certificate of death registration according to R9-19-314(B)(3), (4), (5), or (6) and who authorized the person in subsection (D)(8)(a)(ii) to receive a certified copy of the deceased individual's certificate of death registration; and
      iv. The signature of the person authorized to receive a certified copy of the deceased individual's certificate of death registration;
   b. The notarized signature of the person authorized to receive a certified copy of the deceased individual's certificate of death registration or the copy of a valid, government-issued form of photo identification that contains the name and signature of the person authorized to receive a certified copy of the deceased individual's certificate of death registration, as required in subsection (C)(1)(h);
   c. A copy of documentation demonstrating that the person specified according to subsection (D)(8)(a)(iii) is eligible to receive a certified copy of the deceased individual's certificate of death registration; and
   d. A copy of documentation demonstrating that the person specified according to subsection (D)(8)(a)(ii) is authorized by the person specified according to subsection (D)(8)(a)(iii) to receive a certified copy of the deceased individual's certificate of death registration.

E. An insurance company with which the deceased individual had a policy, or a bank, a credit union, a mortgage lender, or another financial institution with which the deceased individual had an account or other business relationship may request a certified copy of a deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request, on the letterhead paper of the insurance company, bank, credit union, mortgage lender, or other financial institution or in a Department-provided format, that includes:
   a. The name and address of the insurance company, bank, credit union, mortgage lender, or other financial institution;
   b. The name of and contact information for the insurance company's, bank's, credit union's, mortgage lender's, or other financial institution's designee for the request, which includes a telephone number or an e-mail address;
   c. The information in subsections (C)(1)(d) and (e);
   d. If applicable, a description of the policy the deceased individual had with the insurance company;
   e. If applicable, a description of the account or other business relationship the deceased individual had with the bank, credit union, mortgage lender, or other financial institution;

f. The reason the insurance company, bank, credit union, mortgage lender, or other financial institution is requesting a certified copy of the deceased individual's certificate of death registration; and
g. The dated signature of the insurance company's, bank's, credit union's, mortgage lender's, or other financial institution's designee, either:
i. With the designee's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the designee that contains the designee's name and signature;
2. A copy of documentation verifying that the designee is representing the insurance company, bank, credit union, mortgage lender, or other financial institution;
3. As applicable, a copy of documentation demonstrating that the deceased individual had a policy with the insurance company or an account or other business relationship with the bank, credit union, mortgage lender, or other financial institution; and
4. The fee in R9-19-105 for the certified copy of the deceased individual's certificate of death registration.

F. A hospital or other health care institution processing a claim against the deceased individual's estate may request a certified copy of a deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request, on the letterhead paper of the hospital or other health care institution or in a Department-provided format, that includes:
a. The name and address of the hospital or other health care institution;
b. The name of and contact information for the hospital's or other health care institution's designee for the request, which includes a telephone number or an e-mail address;
c. The information in subsections (C)(1)(d) and (e);
d. A description of the claim against the deceased individual's estate;
e. The reason the hospital or other health care institution is requesting a certified copy of the deceased individual's certificate of death registration; and
f. The dated signature of the hospital's or other health care institution's designee, either:
i. With the designee's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the designee that contains the designee's name and signature;
2. A copy of documentation verifying that the designee is representing the hospital or other health care institution;
3. A copy of documentation demonstrating that the hospital or other health care institution has a claim against the deceased individual's estate; and
4. The fee in R9-19-105 for the certified copy of the deceased individual's certificate of death registration.

G. Another person having a court order demonstrating a claim against the deceased individual's estate may request a certified copy of a deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request from the person having a court order demonstrating a claim against the deceased individual's estate, on the person's letterhead paper or in a Department-provided format, that includes:
a. The name of and contact information for the person having a court order demonstrating a claim against the deceased individual's estate, which includes a telephone number or an e-mail address;
b. If the person is not an individual, the name of and contact information for the person's designee for the request, which includes a telephone number or an e-mail address;
c. The information in subsections (C)(1)(d) and (e);
d. A description of the claim against the deceased individual's estate;
e. The reason the person is requesting a certified copy of the deceased individual's certificate of death registration; and
f. The dated signature of the person submitting the request or, if applicable, the person's designee, either:
i. With the person's or designee's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person or designee, as applicable, that contains the person's or designee's name and signature;
2. If applicable, a copy of documentation verifying that the designee is representing the person;
3. A copy of the court order demonstrating that the person has a claim against the deceased individual's estate; and
4. The fee in R9-19-105 for the certified copy of the deceased individual's certificate of death registration.

H. An attorney representing a person who is eligible to receive a certified copy of the deceased individual's certificate of death registration may request a certified copy of a deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:
1. A written request, on the attorney's letterhead paper or in a Department-provided format, that includes:
a. The attorney's name and state bar number;
b. Contact information for the attorney, which includes a telephone number or an e-mail address;
c. The name of the person the attorney is representing;
d. The relationship of the person in subsection (H)(1)(c) to the deceased individual;
e. The information in subsections (C)(1)(d) and (e);
f. If the attorney is representing a person in R9-19-314(B)(3) through (12), the number of certified copies of the individual's certificate of death registration being requested; and
g. The dated signature of the attorney, either:
i. With the attorney's signature notarized; or

ii. Accompanied by a copy of a valid, government-issued form of photo identification for the attorney that contains the attorney name and signature;

2. A copy of the attorney's retainer agreement with the person who is eligible to receive a certified copy of the deceased individual's certificate of death registration;
3. The applicable documentation demonstrating the eligibility of the person specified according to subsection (H)(1)(c) to receive a certified copy of the deceased individual's certificate of death registration; and
4. The fee in R9-19-105 for each certified copy of the deceased individual's certificate of death registration being requested.

I. The consulate of a foreign government eligible to receive a certified copy of a deceased individual's certificate of death registration according to R9-19-314(B)(18) may request a certified copy of a deceased individual's certificate of death registration on behalf of one of the persons identified in R9-19-314(B)(3), (4), (5) or (6) by submitting to the State Registrar or a local registrar:

1. A written request, on the letterhead of the consulate, that includes:
   a. The name and address of the consulate;
   b. The name of and contact information for the consulate's designee for the request, which includes a telephone number or an e-mail address;
   c. The name of the person the consulate is representing;
   d. The relationship of the person in subsection (I)(1)(c) to the deceased individual;
   e. The information required in subsection (C)(1)(d) and (e);
   f. The reason the consulate is requesting a certified copy of the individual's certificate of death registration;
   g. The number of certified copies of the deceased individual's certificate of death registration being requested; and
   h. The dated signature of the consulate's designee;
2. Documentation verifying that the consulate's designee is representing the consulate;
3. A written statement, signed by the consulate's designee, attesting that the consulate has verified that the person identified according to subsection (I)(1)(c) is eligible under R9-19-314(B)(3), (4), (5) or (6) to receive a certified copy of the deceased individual's certificate of death registration; and
4. The fee in R9-19-105 for each certified copy of the deceased individual's certificate of death registration being requested.

J. A governmental agency processing a financial claim, a governmental benefit application, or another form of compensation on behalf of a deceased individual or the deceased individual's estate or having another official purpose for a certified copy of the deceased individual's certificate of death registration may request a certified copy of the deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:

1. A written request, on the governmental agency's letterhead paper or in a Department-provided format, that includes:
   a. The name and address of the governmental agency;
   b. The information required in subsection (C)(1)(d) and (e);
   c. The name of and contact information for the governmental agency's designee for the request, which includes a telephone number or an e-mail address;
   d. A description of the:
      i. Action the governmental agency is taking on behalf of the deceased individual or the deceased individual's estate, or
      ii. Official purpose for which the governmental agency needs a certificate of the individual's death registration;
   e. The reason the governmental agency is requesting a certified copy of the individual's certificate of death registration; and
   f. The dated signature of the governmental agency's designee, accompanied by a copy of the designee's identification badge from the governmental agency verifying that the designee is an employee of the governmental agency; and
2. Unless the governmental agency is an agency as defined in A.R.S. § 41-1001, the fee in R9-19-105 for the certified copy of the deceased individual's certificate of death registration.

Historical Note

Former Section R9-19-315 renumbered as Section R9-19-319, new Section R9-19-315 adopted effective February 20, 1980 (Supp. 80-1). Former Section R9-19-315 renumbered to R9-19-317, new Section R9-19-315 renumbered from Section R9-19-313 and amended effective July 31, 1989 (Supp. 89-3). Section expired under A.R.S. 41-1056(E) at 11 A.A.R. 867, effective December 31, 2004 (Supp. 05-1). New Section R9-19-315 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

Amended by final expedited rulemaking at 26 A.A.R. 1534, with an immediate effective date of July 7, 2020 (Supp. 20-3).

R9-19-316. Requesting a Noncertified Copy of a Certificate of Death Registration

A. A noncertified copy of a certificate of death registration contains, as available, the information specified in R9-19-302(A)(1) and (3).

B. Except as provided in subsection (C) or (D), a person who is conducting research may request a noncertified copy of a deceased individual's certificate of death registration by submitting to the State Registrar:

1. A written request, in a Department-provided format, that includes:
   a. The name and mailing address of the person submitting the request;
   b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
   c. The reason the person is requesting a noncertified copy of the deceased individual's certificate of death registration;
   d. The information required in R9-19-315(C)(1)(d) and (e); and
   e. The dated signature of the person submitting the request;

2. Documentation from the Department's Human Subjects Review Board that the person is eligible to receive a noncertified copy of the deceased individual's certificate of death registration; and
3. The fee in R9-19-105 for the noncertified copy of the deceased individual's certificate of death registration.

C. A person who is a family member, including a niece or nephew, of a deceased individual, who is conducting research for genealogical purposes and who is of legal age, may request a noncertified copy of the deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:

1. A written request, in a Department-provided format, that includes:
   a. The name and mailing address of the person submitting the request;
   b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
   c. The person's relationship with the deceased individual that makes the person eligible to receive a noncertified copy of the deceased individual's certificate of death registration;
   d. The information required in R9-19-315(C)(1)(d) and (e);
   e. A statement that the person is conducting research for genealogical purposes; and
   f. The dated signature of the person submitting the request, either:
      i. With the person's signature notarized; or
      ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person that contains the person's name and signature;
2. Documentation demonstrating that the person is eligible to receive a noncertified copy of the deceased individual's certificate of death registration that may include either:
   a. A copy of one or more certificates of birth registration or certificates of death registration that show the person's relationship to the deceased individual or, if a parent's name is included in the deceased individual's registered birth record or registered death record, the deceased individual's parent; or
   b. For births or deaths registered in Arizona, information about the person or a related person whose birth or death was registered in Arizona, such as the person's name, date of birth, or parent's name and date of birth or date of death, that would enable the Department to locate the person's or related person's registered birth record or registered death record; and
3. The fee in R9-19-105 for the noncertified copy of the deceased individual's certificate of death registration.

D. A governmental agency processing a financial claim, a governmental benefit application, or another form of compensation on behalf of a deceased individual or the deceased individual's estate or having another official purpose for a noncertified copy of the deceased individual's certificate of death registration may request a noncertified copy of the deceased individual's certificate of death registration by submitting to the State Registrar or a local registrar:

1. A written request, on the governmental agency's letterhead paper or in a Department-provided format, that includes:
   a. The name and address of the governmental agency;
   b. The information required in R9-19-315(C)(1)(d) and (e);
   c. The name of and contact information for the governmental agency's designee for the request, which includes a telephone number or an e-mail address;
   d. A description of the:
      i. Action the governmental agency is taking on behalf of the deceased individual or the deceased individual's estate, or
      ii. Official purpose for which the governmental agency needs a certificate of the individual's death registration;
   e. The reason the governmental agency is requesting a noncertified copy of the individual's certificate of death registration; and
   f. The dated signature of the governmental agency's designee, accompanied by a copy of the designee's identification badge from the governmental agency verifying that the designee is an employee of the governmental agency; and
2. Unless the governmental agency is an agency as defined in A.R.S. § 41-1001, the fee in R9-19-105 for the noncertified copy of the deceased individual's certificate of death registration.

Historical Note

Former Section R9-19-316 renumbered as Section R9-19-320, former Section R9-19-312 renumbered as Section R9-19-316 effective February 20, 1980 (Supp. 80-1). Former Section R9-19-316 renumbered to R9-19-318, new Section R9-19-316 renumbered from Section R9-19-314 and amended effective July 31, 1989 (Supp. 89-3). Section repealed by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). New Section R9-19-316 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

R9-19-317. Obtaining a Certificate of Fetal Death Registration or a Certificate of Birth Resulting in Stillbirth

A. A certificate of fetal death registration contains, as available, the information specified in R9-19-305(B)(1).

B. A certificate of birth resulting in stillbirth contains, as available, the information specified in R9-19-305(B)(1)(a) through (k) and (n).

C. A parent of a fetus or a person who is of legal age and who is authorized by a parent of the fetus may request a certified or noncertified copy of a certificate of fetal death registration for the fetus by submitting to the State Registrar or a local registrar:

1. A written request, in a Department-provided format, that includes:
   a. The name and mailing address of the person submitting the request;
   b. Contact information for the person submitting the request, which includes a telephone number or an e-mail address;
   c. Whether the person submitting the request is a parent of a fetus or a person authorized by a parent of the fetus;
   d. The following information:

i. The name of the mother in the registered fetal death record, and
ii. The date of delivery;
e. If known, the:
i. State file number,
ii. Town or city of the fetal death, and
iii. County of the fetal death;
f. If the person submitting the request is a parent of the fetus, whether the person would like to receive a certified copy of a certificate of birth resulting in stillbirth for the fetus;
g. The number being requested of:
i. Certified copies of a certificate of fetal death registration,
ii. Noncertified copies of a certificate of fetal death registration, and
iii. Certified copies of a certificate of birth resulting in stillbirth; and
h. The dated signature of the person submitting the request, either:
i. With the person's signature notarized; or
ii. Accompanied by a copy of a valid, government-issued form of photo identification for the person that contains the name and signature of the person;
2. For a parent whose name is not included in the registered fetal death record, documentation demonstrating that the person submitting the request is a parent of the fetus;
3. For a person authorized by a parent of the fetus to receive a certified or noncertified copy of the certificate of fetal death registration for the fetus:
a. Documentation demonstrating that the person submitting the request is authorized to receive a certified or noncertified copy of a certificate of fetal death registration for the fetus; and
b. Documentation demonstrating that the individual authorizing the person submitting the request to receive a certified or noncertified copy of a certificate of fetal death registration for the fetus is a parent of the fetus; and
4. The applicable fee in R9-19-105 for each certificate of being requested.

Historical Note

Former Section R9-19-317 renumbered as Section R9-19-321, former Section R9-19-313 renumbered as Section R9-19-317 effective February 20, 1980 (Supp. 80-1). Former Section R9-19-317 renumbered to R9-19-319, new Section R9-19-317 renumbered from Section R9-19-315 and amended effective July 31, 1989 (Supp. 89-3). Section repealed by final rulemaking at 12 A.A.R. 4387, effective January 6, 2007 (Supp. 06-4). New Section R9-19-317 made by final exempt rulemaking under Laws 2015, Ch. 197, § 2, at 22 A.A.R. 1782, effective October 1, 2016 (Supp. 16-2).

What parts of the rules in Chapter 19 Vital Records, do you believe are effective?

R9-19-208 C – Amending Information in a Registered Birth Record

How can the rules in Chapter 19, vital records be improved?

1**. R9-19-101 (14) definitions**.

14. "Government-issued form of photo identification" means:
    ii. U.S. Passport Card,
    v. U.S. Military Identification Card;
These two identification cards do not contain a signature on the ID card thus conflicting with R9-19-211, R9-19-212, R9-19-315, R9-19-316. R9-19-317, where it states, "Accompanied by a copy of a valid, government-issued form of photo identification for the person contains the name and signature of the person."

While Maricopa County does believe that these two forms ID should be acceptable, they do not currently meet the ADHS requirements in other areas of this chapter. Staff are frequently challenged by holders of these two forms of ID. Might additional consideration be given to these two ID's?

Modifications to R9-19-101 definitions.

R9-19-207 B(3)(b) Allows for correcting a birth record with either the worksheet or a part of the individual's or mother's individual medical record while R9-19-208 C allows for amending the birth with only a part of the individual's or mother's individual medical record. Both referred to R9-19-201 A (3) or (4). Need further clarification to determine hospital correction vs hospital amendment.

R9-19-212 (E)(2), R9-19-316 D (2) Unless the governmental agency as defined in ARS 41-1001, the fee in R9-19-105 for the noncertified copy of the individual's certificate of the birth or death registration. (Seeking modification to these two rules)

Maricopa County is seeking consideration for a rule revision that prevents local registration districts from charging themselves modeling the current practice amongst the Bureau of Vital Records, ADHS and all other state agencies. The effort to pay itself is not an effective use of Maricopa County's resources.

If rule can be modified to prevent local registration districts from charging themselves, Maricopa County would be supportive of the ADHS proposed non-certified copy fee. Otherwise, Maricopa County proposes no increase to this service fee.

R9-19-105 Fee Schedule

Maricopa County is proposing administering the fee increases in two phases to achieve the current proposed service fees to the consumer in obtaining an Arizona vital record. The first fee schedule changes are those being proposed by ADHS. Included are two proposals with the transitional fee schedule incorporated in phased tier (Phase I and Phase II).

In addition to the new fee schedule, Maricopa County requests the fee increases be divided equally amongst the ADHS, and county colleagues mandated to perform vital records tasks from issuing certified copies to amending and correcting a vital record as well as all the various functions that must occur locally in support of these mandated services for which there is no direct funding source. Additionally, multiple fee services are solely under the ADHS authority.

Maricopa County is also seeking consideration for a rule revision that prevents local registration districts from charging themselves modeling the current practice amongst the Bureau of Vital Records, ADHS and all other state agencies. The effort to pay itself is not an effective use of Maricopa County's resources.

R9-19-105. Phase 1 Fee Schedule (Proposed by Maricopa County)

A. When a fee is specified in this Chapter, the following fees apply:

1. For a noncertified copy of a certificate, ~~$5.00~~ $4.00;
2. For a certified copy of a:
    a. Certificate of birth registration, ~~$19.00~~ $28.00;
    b. Certificate of delayed birth registration, ~~$19.00~~ $28.00;
    c. Certificate of death registration, ~~$19.00~~ $28.00;
    d. Certificate of delayed death registration, ~~$19.00~~ $28.00;
    e. Certificate of fetal death registration, ~~$19.00~~ $28.00;
    f. Certificate of birth resulting in stillbirth, ~~$19.00~~ $28.00;
    g. Certificate of delayed fetal death registration, ~~$19.00~~ $28.00; or
    h. Certificate of no record, ~~$19.00 $28.00~~;
3. For a search to verify birth or death data for statistical or research purposes according to A.R.S. § 36-342(A), ~~$5.00~~ $4.00;
4. For a request to establish a:

a. Delayed birth record for an individual and register the individual's birth, ~~$19.00~~ $28.00;

b. Registered record of foreign birth for an adopted individual, ~~$19.00~~ $28.00;

c. Delayed death record for a deceased individual and register the deceased individual's death, ~~$19.00~~ $28.00;

d. Delayed fetal death record for a fetal death and register the fetal death, ~~$19.00~~ $28.00; or

e. Death record or delayed death record for a presumptive death under A.R.S. § 36-325 or 36-328, ~~$19.00~~ $28.00; and

5. For a request to amend or correct information in a:

a. Registered birth record, ~~$29.00~~ $38.00;

b. Registered death record, ~~$29.00~~ $38.00; or

c. Registered fetal death record, ~~$29.00~~ $38.00.

B. If a request submitted and fee paid, as prescribed in subsection (A)(4) or (5), results in the registration of a birth, death, or fetal death or a correction or amendment to a registered birth record, registered death record, or registered fetal death record, the Department shall provide to the person submitting the request and paying the fee a certified copy of the applicable certificate for the registered, corrected, or amended record.

C. Except as provided in subsection (E), the Department shall not charge an agency, as defined in A.R.S. § 41-1001, any fee in this Section.

D. In addition to the fees charged in subsection (A), the Department shall assess the following surcharges:

1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00; and

2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;

E. A local registrar shall pay the following surcharges to the Department for copies issued by the local registrar:

1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00;

2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;

3. For system access for each certified copy of a certificate; ~~$4.00~~ $8.50 amend or correct ~~$4.00~~ $8.50 (increase difference split 50/50 with county); and

4. For system access for each noncertified copy of a certificate, $1.00

Phase I Fee Schedule includes a breakdown of the first increase consideration. The fees outlined would incorporate an increase in the $4 system access fee along with the $1.00 surcharge assessment (total $5) to increase to $8.50 + $1.00 (total $9.50) for certified copies and $8.50 + $1.00 (total $9.50) to amend or correct, to be shared with the local registration offices.

PHASE I FEE SCHEDULE					
Service*	Service Fee	System Access Fee	Surcharge	State Fee	Total Service Fee
Current Certified Copy Fee	$15.00	$4.00	$1.00	$5.00	$20.00
Phase I Certified Copy Fee	$19.50	$8.50	$1.00	$9.50	$29.00
Current Amend/Correct Fee	$25.00	$4.00	$1.00	$5.00	$30.00
Phase I Amend/Correct Fee	$29.50	$8.50	$1.00	$9.50	$39.00

*If rule can be modified to prevent local registration districts from charging themselves, Maricopa County would be supportive of the ADHS proposed non-certified copy fee. Otherwise, Maricopa County proposes no increase to this service fee

R9-19-105. Phase II Fee Schedule (Proposed by Maricopa County)

A. When a fee is specified in this Chapter, the following fees apply:

1. For a noncertified copy of a certificate, ~~$5.00~~ $4.00;

2. For a certified copy of a:

a. Certificate of birth registration, ~~$28.00~~ $34.00;

b. Certificate of delayed birth registration, ~~$28.00~~ $34.00;

c. Certificate of death registration, ~~$28.00~~ $34.00;

d. Certificate of delayed death registration, ~~$28.00~~ $34.00;

e. Certificate of fetal death registration, ~~$28.00~~ $34.00;

f. Certificate of birth resulting in stillbirth, ~~$28.00~~ $34.00;

g. Certificate of delayed fetal death registration, ~~$28.00~~ $34.00; or

h. Certificate of no record, ~~$28.00~~ $34.00;

3. For a search to verify birth or death data for statistical or research purposes according to A.R.S. § 36-342(A), ~~$5.00~~ $4.00;

4. For a request to establish a:

   a. Delayed birth record for an individual and register the individual's birth, ~~$28.00~~ $34.00;

   b. Registered record of foreign birth for an adopted individual, ~~$28.00~~ $34.00;

   c. Delayed death record for a deceased individual and register the deceased individual's death, ~~$28.00~~ $34.00;

   d. Delayed fetal death record for a fetal death and register the fetal death, ~~$28.00~~ $34.00; or

   e. Death record or delayed death record for a presumptive death under A.R.S. § 36-325 or 36-328, ~~$28.00~~ $34.00; and

5. For a request to amend or correct information in a:

   a. Registered birth record, ~~$38.00~~ $49.00;

   b. Registered death record, ~~$38.00~~ $49.00; or

   c. Registered fetal death record, ~~$38.00~~ $49.00.

B. If a request submitted and fee paid, as prescribed in subsection (A)(4) or (5), results in the registration of a birth, death, or fetal death or a correction or amendment to a registered birth record, registered death record, or registered fetal death record, the Department shall provide to the person submitting the request and paying the fee a certified copy of the applicable certificate for the registered, corrected, or amended record.

C. Except as provided in subsection (E), the Department shall not charge an agency, as defined in A.R.S. § 41-1001, any fee in this Section.

D. In addition to the fees charged in subsection (A), the Department shall assess the following surcharges:

   1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00; and

   2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;

E. A local registrar shall pay the following surcharges to the Department for copies issued by the local registrar:

   1. As required in A.R.S. § 36-341(B), for a certified copy of a certificate of birth registration or certificate of delayed birth registration, $1.00;

2. As required in A.R.S. § 36-341(E), for a certified copy of a certificate of death registration, certificate of delayed death registration, certificate of fetal death registration, or certificate of delayed fetal death registration, $1.00;

3. For system access for each certified copy of a certificate; ~~$8.50~~ $11.50; amend or correct ~~$8.50~~ $14.00 (increase difference split 50/50 with county); and

4. For system access for each noncertified copy of a certificate, $1.00

Phase II Fee Schedule includes a breakdown of the first increase consideration. The fees outlined would incorporate an increase in the $4 system access fee along with the $1.00 surcharge assessment (total $5) to increase to $8.50 + $1.00 (total $9.50) for certified copies and $14.00 + $1.00 (total $15.00) for amend or correct, to be shared with the local registration offices.

PHASE II FEE SCHEDULE					
Service*	Service Fee	System Access Fee	Surcharge	State Fee	Total Service Fee
Current Certified Copy Fee	$15.00	$4.00	$1.00	$5.00	$20.00
Phase I Certified Copy Fee	$19.50	$8.50	$1.00	$9.50	$29.00
Phase II Certified Copy Fee	$22.50	$11.50	$1.00	$12.50	$35.00
Current Amend/Correct Fee	$25.00	$4.00	$1.00	$5.00	$30.00
Phase I Amend/Correct Fee	$29.50	$8.50	$1.00	$9.50	$39.00
Phase II Amend/Correct Fee	$35.00	$14.00	$1.00	$15.00	$50.00

*If rule can be modified to prevent local registration districts from charging themselves, Maricopa County would be supportive of the ADHS proposed non-certified copy fee. Otherwise, Maricopa County proposes no increase to this service fee

Has anything been left out that should be in Chapter 19, Vital Records rules?

Greater distinction and clarification regarding the determination of a hospital correction v. a hospital amendment. Maricopa County proposes that a Certificate of Live Birth Worksheet be considered a correction, and that hospital amendments are instances when the hospital must supplement the worksheet with hospital medical records. (currently, hospitals may submit part of the individual's or mother's individual medical record containing specific information on R9-19-201 A(3) or (4). Maricopa County appreciates the need to do this but believes that Vital Records rules regarding this matter need greater clarification)

What questions/comments do you have that were not addressed above?

There is an opportunity to clean up/clarify the following areas: R9-19-212 C (1)(f)(ii) requiring the date of birth on the government -issued form of photo identification which is not consistent with R9-19-211A(1)(h)(ii), B(3)(ii), and other sections on R9-19-212, R9-19-315, R9-19-316. R9-

19-317 where it states “Accompanied by a copy of a valid, government-issued form of photo identification for the person contains the name and signature of the person.”

Suggest removing R9-19-207 B(3)(b) and allow for correcting hospital errors with birth worksheets only (previously explained above).

E-4.

DEPARTMENT OF HEALTH SERVICES
Title 9 Chapter 6 Article 13

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **November 19, 2024**

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 6, Article 13

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) covers one (1) rule in Title 9, Chapter 6, Article 13 related to Immunizations or Vaccines Requiring Prescriptions for Pharmacist Technicians. The Department is required to develop rules that "establish and maintain a list of immunizations or vaccines that may be administered to adults by a pharmacist only pursuant to a prescription order." This rule identifies the immunizations or vaccines that require a prescription order before being administered under A.A.C. R4-23-411.

The Department completed its prior course of action via exempt rulemaking effective November 14, 2017.

Proposed Action

The Department does not propose a course of action to amend the rules at this time. The Department believes the rule is sufficient to protect public health and does not plan to amend the rule in 9 A.A.C. 6, Article 13 unless a threat to public health or safety arises that would require amending the rule.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Department indicates it was not obliged to produce an economic, small business, and consumer impact statement for R9-6-1301 since the rule was adopted under exempt rulemaking. The rules in 9 A.C.C. 6 Article 13 were last revised through exempt rulemaking at 23 A.A.R. 3360, effective November 14, 2017.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department states the purpose of this rule is to regulate the administration of certain vaccines by certified pharmacists, requiring a prescription order to ensure patient safety and compliance with health standards. The rule is important to public health because it ensures that certain vaccines are administered safely and appropriately by certified pharmacists, preventing the spread of serious diseases and protecting the community. The rules reflect national standards and industry norms and are the minimum necessary to protect the health and safety of the public. They ensure that vaccines requiring specialized knowledge and handling are administered correctly, thereby minimizing risks and maximizing public health benefits.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department has not received written criticism of the rules in the past five years.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Department states the rules are clear, concise, and understandable.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

The Department states the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Department states the rules are effective in achieving their objectives.

8. **Has the agency analyzed the current enforcement status of the rules?**

The Department states the rules are enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department states that there is no corresponding federal law related to these rules.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Department states the rules were adopted prior to July 29, 2010 and therefore this subsection does not apply.

11. Conclusion

This 5YRR from the Department covers one rule in Title 9, Chapter 6, Article 13 related to Immunizations or Vaccines Requiring Prescriptions for Pharmacist Technicians. As indicated above, the rules are consistent with other rules and statutes and clear, concise, and understandable.

The Department does not propose a course of action to amend the rules at this time.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Council staff recommends approval.

Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 6, Article 13, Five-Year-Review Report for Communicable Diseases and Infestations - Immunizations or Vaccines Requiring Prescriptions for Pharmacist Administration

Dear Ms. Klein:

Please find enclosed the Five-Year Review Report (Report) from the Arizona Department of Health Services (Department) for 9 A.A.C. 6, Article 13, Immunizations or Vaccines Requiring Prescriptions for Pharmacist Administration, which is due on October 31, 2024.

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this report, please contact Lucinda Feeley at Lucinda.Feeley@azdhs.gov.

Sincerely,

Stacie Gravito
Director's Designee

Five-Year-Review Report

Title 9. Health Services

Chapter 6. Department of Health Services -

Communicable Diseases and Infestations

Article 13. Immunizations or Vaccines Requiring Prescriptions for Pharmacist Administration

August 2024

1. **Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. §§ 36-132(A)(1) and 36-136(G)

Specific Statutory Authority: A.R.S. § 32-1974(I)

2. **The objective of each rule:**

Rule	Objective
R9-6-1301	The objectives of the rule are to: a. Define terms used in the rule to enable the reader to understand clearly the requirements of the Section and allow for consistent interpretation, and b. Identify the specific immunizations or vaccines that require a prescription order before a certified pharmacist may administer the immunization or vaccine.

3. **Are the rules effective in achieving their objectives?** **Yes _X_ No __**

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

Rule	Explanation

4. **Are the rules consistent with other rules and statutes?** **Yes _X_ No ___**

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

Rule	Explanation

5. **Are the rules enforced as written?** **Yes _X_ No __**

If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency's proposal for resolving the issue.

Rule	Explanation

6. **Are the rules clear, concise, and understandable?** Yes _X_ No __

If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.

Rule	Explanation

7. **Has the agency received written criticisms of the rules within the last five years?** Yes ___ No _X_

If yes, please fill out the table below:

Rule	Explanation

8. **Economic, small business, and consumer impact comparison:**

Arizona Revised Statutes (A.R.S.) § 32-1974(I), created by Laws 2009, Ch. 41, requires the Arizona Department of Health Services (Department) to develop rules that "establish and maintain a list of immunizations or vaccines that may be administered to adults by a pharmacist only pursuant to a prescription order." The Department adopted one rule to implement this statute in Arizona Administrative Code (A.A.C.) Title 9, Chapter 6 through exempt rulemaking effective October 5, 2009. The rule in 9 A.A.C. 6, Article 13 includes definitions applicable to the Section and identifies the immunizations or vaccines that require a prescription order before being administered under A.A.C. R4-23-411. Laws 2011, Ch. 103, § 2 revised A.R.S. § 32-1974(I) to clarify that the immunizations or vaccines required under A.R.S. § 32-1974(I) may only be administered to adults.

The Department was not obliged to produce an economic, small business, and consumer impact statement for R9-6-1301 since the rule was adopted under exempt rulemaking. Subsection (A) is explanatory, not regulatory, and thus has no economic impact. Subsection (B) contains a list of vaccines that require a prescription order before being administered by a pharmacist authorized under A.A.C. R4-23-411. The immunizations and vaccinations on the list may have severe side effects, different forms of the vaccine, or restrictions/considerations that should be discussed with a medical practitioner before administration. As required by statute, the immunizations or vaccines identified in subsection (B) are either listed in the U.S. Centers for Disease Control and Prevention (CDC) recommended adult immunization schedule or the CDC's health information for international travel. From November 2009 through July 2024, Arizona pharmacists have administered 673 doses of the Japanese Encephalitis vaccine; 3,598 doses of the Rabies vaccine; 8,970 doses of the injectable Typhoid vaccine; 7,521 doses of the oral Typhoid vaccine; 5,822 doses of the Yellow Fever vaccine; and 77 doses of the Cholera vaccine. Since it is not possible to determine who will request one of these vaccines or what health risks

they may have, subsection (B) provides a significant benefit to the public, in that the benefit is meaningful and important, but not readily subject to quantification.

The rule in 9 A.A.C. 6, Article 13 were last revised through exempt rulemaking at 23 A.A.R. 3360, effective November 14, 2017. In 2017, a new vaccine for cholera became available and needed to be added to the list of immunizations or vaccines in 9 A.A.C. 6, Article 13 that may be administered to an adult by a pharmacist only pursuant to a prescription order. The cholera vaccine is a live-attenuated vaccine, and the safety of the vaccine has not been widely studied, including in immunocompromised people. People with weakened immune systems are at higher risk of complications from live-attenuated vaccines. A physician or registered nurse practitioner should evaluate an individual before the vaccine is administered to discuss the risks to the individual and those in close contact with the individual before the individual receives this vaccine. It is critical that cholera was added to the list of immunizations or vaccines to protect an individual who may ask to be immunized by a pharmacist without knowing the potential consequences. Additionally, in this rulemaking, the Department added clarification to the rule to conform to changes made to A.R.S. § 32-1974 by Laws 2011, Ch. 103, § 2 and Laws 2016, Ch. 267. § 3. The Department estimates that rule changes and adding cholera to the list of immunizations or vaccines may have imposed minimal-to-no costs on related persons, and have produced a significant benefit for individuals affected by the rule to have an updated rule and adding the new cholera vaccine to the list in 9 A.A.C. 6, Article 13.

9. **Has the agency received any business competitiveness analyses of the rules?** **Yes ___ No _X_**

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

Please state what the previous course of action was and if the agency did not complete the action, please explain why not.

In the 2014 five-year review report, the Department stated that the Department would revise the rule when a substantive matter occurs and would correct an outdated cross-reference when that time occurs. The Department completed this course of action through exempt rulemaking at 23 A.A.R. 3360, effective November 14, 2017.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The purpose of this rule is to regulate the administration of certain vaccines by certified pharmacists, requiring a prescription order to ensure patient safety and compliance with healthcare standards. The rule is important to public health because it ensures that certain vaccines are administered safely and appropriately by certified pharmacists, preventing the spread of serious diseases and protecting the community. The rules reflect national standards and industry norms and are the minimum necessary to protect the health and safety of the public. They ensure that vaccines requiring specialized knowledge and handling are administered correctly, thereby minimizing risks and maximizing public health benefits.

12. **Are the rules more stringent than corresponding federal laws?** Yes ___ No _X_

Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?

Federal laws do not apply to the rule in 9 A.A.C. 6, Article 13.

13. **For rules adopted after July 29, 2010, that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

Not applicable, as the rule was adopted before July 29, 2010.

14. **Proposed course of action**

If possible, please identify a month and year by which the agency plans to complete the course of action.

The Department believes the rule is sufficient to protect public health and does not plan to amend the rule in 9 A.A.C. 6, Article 13 unless a threat to public health or safety arises that would require amending the rule.

36-132. Department of health services; functions; contracts

A. The department, in addition to other powers and duties vested in it by law, shall:

1. Protect the health of the people of the state.

2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.

3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.

4. Operate sanitariums, hospitals or other facilities assigned to the department by law or by the governor.

5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information to promote good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of educating children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.

6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.

7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.

8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.

9. Encourage and aid in coordinating local programs concerning nutrition of the people of this state.

10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.

11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.

12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.

13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local health agencies involved with water quality shall provide to the department any assistance requested by the director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter 8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in enforcing the federal food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Recruit and train personnel for state, local and district health departments.

16. Conduct continuing evaluations of state, local and district public health programs, study and appraise state health problems and develop broad plans for use by the department and for recommendation to other agencies, professions and local health departments for the best solution of these problems.

17. License and regulate health care institutions according to chapter 4 of this title.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:

(a) Screening in early pregnancy for detecting high-risk conditions.

(b) Comprehensive prenatal health care.

(c) Maternity, delivery and postpartum care.

(d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when medically indicated.

(e) Perinatal education oriented toward professionals and consumers, focusing on early detection and adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes and behavioral-supported group homes for persons with developmental disabilities. The department shall issue a license to an

accredited facility for a period of the accreditation, except that a licensing period shall not be longer than three years. The department is authorized to conduct an inspection of an accredited facility to ensure that the facility meets health and safety licensure standards. The results of the accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the department of health services. For the purposes of this paragraph, "accredited" means accredited by a nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government, and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this title, and enter into contracts with the federal government, or an agency of the federal government, and with private donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies made available under this section are special project grants. The department may also expend these monies to further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as payors of last resort, prescription medications necessary to supplement treatment and transportation to and from treatment facilities. The contracts may provide for department payment of administrative costs it specifically authorizes.

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop,

tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of

performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking

receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of

all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This

procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

32-1974. Pharmacists; administration of immunizations, vaccines and emergency medications; authorization; reporting requirements; advisory committee; definition

A. Except as prescribed pursuant to subsection H of this section, a pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may order and administer all of the following:

1. Immunizations or vaccines recommended by the United States centers for disease control and prevention's advisory committee on immunization practices to a person who is at least six years of age.

2. Immunizations or vaccines recommended by the United States centers for disease control and prevention's advisory committee on immunization practices for international travel to a person who is at least eighteen years of age.

3. Immunizations or vaccines for influenza recommended by the United States centers for disease control and prevention's advisory committee on immunization practices to a person who is at least three years of age.

B. Except as prescribed in subsection A of this section, a pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may administer immunizations and vaccines to a person who is at least three years of age only pursuant to a prescription order or under a collaborative practice agreement.

C. A pharmacist who wishes to order and administer immunizations and vaccines pursuant to this section must update the pharmacist's online profile with the board indicating that the pharmacist is an active immunizer who meets requirements as prescribed by the board by rule.

D. A pharmacist who is authorized to order and administer immunizations and vaccines pursuant to this section may order and administer:

1. Emergency medication to manage an acute allergic reaction to an immunization, vaccine or medication in accordance with guidelines from the United States centers for disease control and prevention's advisory committee on immunization practices for adults and the American academy of pediatrics for minors.

2. Immunizations or vaccines to any person regardless of age during a public health emergency response of this state pursuant to section 36-787.

E. A pharmacist who administers an immunization, vaccine or emergency medication pursuant to this section must:

1. Notify the person's identified primary care provider or physician within forty-eight hours after administering the immunization, vaccine or emergency medication and as prescribed by the board by rule. The pharmacist shall make a reasonable effort to identify the person's primary care provider or physician by one or more of the following methods:

(a) Checking the Arizona state immunization information system established by the department of health services.

(b) Checking pharmacy records.

(c) Requesting the information from the person or, in the case of a minor, the person's parent or guardian.

2. Report information to the Arizona state immunization information system established by the department of health services.

3. Maintain a record of the immunization pursuant to title 12, chapter 13, article 7.1 and as prescribed by the board by rule.

4. Notify the person's identified primary care provider or physician, within twenty-four hours after occurrence, any adverse reaction that is reported to or witnessed by the pharmacist and that is listed by the vaccine manufacturer as a contraindication to further doses of the vaccine.

5. Notify the vaccine adverse event reporting system in accordance with the United States centers for disease control and prevention's advisory committee recommendations.

6. Provide vaccine information materials to those requesting immunizations or vaccines and, for persons under eighteen years of age, provide educational materials to the person's parent or guardian about the importance of pediatric preventive health care visits as recommended by the American academy of pediatrics.

7. Follow the standard operating procedures adopted by the pharmacy or other institution where the immunization, vaccine or emergency medication is administered that are based on the vaccine administration protocols and immunization practices published in the United States centers for disease control and prevention's morbidity and mortality weekly report. The standard operating procedures shall include all of the following:

(a) Patient screening requirements for relevant health condition information before administering a vaccine.

(b) A requirement to review the vaccine information, the Arizona state immunization information system and any other patient information on record to determine the person's past immunizations and adverse reactions before administering a vaccine.

(c) Emergency management policies and procedures.

F. This section does not establish a cause of action against a patient's primary care provider or physician for any adverse reaction, complication or negative outcome arising from the administration of any immunization, vaccine or emergency medication by a pharmacist to the patient pursuant to this section if it is administered without a prescription order written by the patient's primary care provider or physician.

G. The board shall adopt rules for ordering and administering vaccines, immunizations and emergency medications pursuant to this section regarding:

1. Recordkeeping and reporting requirements.

2. Requirements and qualifications for pharmacist authorization pursuant to this section.

H. The department of health services, by rule, shall establish and maintain a list of immunizations or vaccines that may be administered by a pharmacist only pursuant to a prescription order. In adopting and maintaining this list, the department is exempt from the rulemaking requirements of title 41, chapter 6. The list shall include those immunizations or vaccines recommended by the United States centers for disease control and prevention's health information for international travel that have adverse reactions that could cause significant harm to a patient's health. A pharmacist may not administer immunizations or vaccines without a prescription order pursuant to this section before the department has established the list pursuant to this subsection. The board may not authorize a pharmacist to administer new immunizations or vaccines without a prescription order pursuant to this section until the department reviews the new immunizations and vaccines to determine if they should be added to the list established pursuant to this subsection.

I. The board may appoint an advisory committee to assist the board in adopting and amending rules and developing protocols relating to ordering and administering immunizations, vaccines and emergency medications and training requirements.

J. A pharmacy intern who is trained to administer immunizations and vaccines pursuant to this section may do so only in the presence and under the supervision of a pharmacist who is authorized as prescribed in this section.

K. This section does not prevent a pharmacist who administers an immunization or vaccine from participating in the federal vaccines for children program.

L. A pharmacist may not administer an immunization or vaccine to a minor without the consent of the minor's parent or guardian.

M. For the purposes of this section, "emergency medication" means emergency epinephrine, corticosteroids, albuterol, oxygen and antihistamines in accordance with guidelines from the United States centers for disease control and prevention's advisory committee on immunization practices for adults and the American academy of pediatrics for minors.

TITLE 9. HEALTH SERVICES

CHAPTER 6. DEPARTMENT OF HEALTH SERVICES - COMMUNICABLE DISEASES AND INFESTATIONS

Authority: A.R.S. §§ 36-132(A)(1) and 36-136(G)

ARTICLE 13. IMMUNIZATIONS OR VACCINES REQUIRING PRESCRIPTIONS FOR PHARMACIST ADMINISTRATION

Article 13, consisting of new Section R9-6-1301 made by exempt rulemaking at 15 A.A.R. 1793, effective October 5, 2009 (Supp. 09-4).

Section
R9-6-1301. Immunizations or Vaccines Requiring a Prescription Order for Pharmacist Administration

ARTICLE 13. IMMUNIZATIONS OR VACCINES REQUIRING PRESCRIPTIONS FOR PHARMACIST ADMINISTRATION

R9-6-1301. Immunizations or Vaccines Requiring a Prescription Order for Pharmacist Administration

A. In this Section, unless otherwise specified, the following definitions apply:
   1. "Certified pharmacist" means an individual licensed under A.R.S. Title 32, Chapter 18, who is authorized under A.A.C. R4-23-411 to administer immunizations or vaccines.
   2. "Immunization" has the same meaning as in A.R.S. § 36-671.
   3. "Prescription order" has the same meaning as in A.R.S. § 32-1901.

B. The following immunizations or vaccines require a prescription order before the immunization or vaccine may be administered under A.A.C. R4-23-411 by a certified pharmacist:
   1. Japanese Encephalitis vaccine,
   2. Rabies vaccine,
   3. Typhoid vaccines,
   4. Yellow fever vaccine, and
   5. Cholera vaccine.

Historical Note

New Section made by exempt rulemaking at 15 A.A.R. 1793, effective October 5, 2009 (Supp. 09-4). Amended by exempt rulemaking at 23 A.A.R. 3360, effective November 14, 2017 (Supp. 17-4).

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 12, Article 1 & 2

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: **October 1, 2024; November 5, 2024; December 3, 2024**

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 19, 2024

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 12, Article 1 & 2

Staff Update

This Five-Year Review Report (5YRR) was previously considered at the September 24, 2024 Study Session and October 1, 2024 Council Meeting. Prior to the October 1, 2024 Council Meeting, the Council received a correspondence on behalf of the Alliance of Recovery Residences raising concerns regarding some of the issues the Department identified in its report. Ultimately, at the October 1, 2024 Council Meeting the Council voted to table consideration of this 5YRR to the October 29, 2024 Study Session and November 5, 2024 Council Meeting. The Department subsequently submitted a correspondence in response to the questions/concerns raised at the prior meetings which is included in the final materials for the Council's reference.

Prior to the November 5, 2024 Council Meeting, the Council received another correspondence on behalf of the Alliance of Recovery Residences. Additionally, at the November 5, 2024 Council Meeting, Council members had follow-up questions regarding the Department's proposed course of action to address issues identified in the report and responses to written criticisms of the rules in the last five years pursuant to A.R.S. § 41-1056(A)(2). Ultimately, the Council again voted to table consideration of this 5YRR to the current meeting cycle. The Department has submitted a revised 5YRR to address the concerns raised regarding its response to written criticisms of the rules in the last five years. A copy of the revised report is included in the final materials for the Council's reference. Council staff believes the revised

report complies with the Department's requirements under A.R.S. § 41-1056(A) and recommends approval of this report.

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) relates to seven (7) rules and one (1) table in Title 9, Chapter 12, Article 1 regarding Licensure Requirements for sober living homes and seven (7) rules in Article 2 regarding Sober Living Home Requirements. Specifically, these rules "establish minimum standards and requirements for the licensure of sober living homes . . . necessary to ensure the public health, safety, and welfare" pursuant to A.R.S. § 36-2062(A).

This is the first 5YRR for these rules since they were established by regular rulemaking which became effective on July 1, 2019.

Proposed Action

In the current report, the Department indicates some of the rules are not clear, concise, understandable, consistent, or effective in achieving their objectives as outlined in more detail below. As such, the Department is proposing to amend the rules to address these issues and anticipates submitting a final rulemaking to the Council by August 2025.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Department indicates the functions and persons affected by the 2019 rulemaking remain the same as anticipated.

Stakeholders include the Department and sober living homes and their occupants.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department believes the current rules pose the minimum cost and burden on businesses, the regulated public and on the general public and still achieve the regulatory objective.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department indicates it received no written criticisms of the rules in the last five years.

5. **<u>Has the agency analyzed the rules' clarity, conciseness, and understandability?</u>**

The Department indicates the rules are clear, concise, and understandable except for the following:

- R9-12-103
  - This Section and its heading could be clearer if it was clarified that this Section pertains to an initial application for licensure. This Section could also be improved by including that a license is valid for one year as per A.R.S. § 36-2662(B).
- R9-12-104
  - Subsection (A) indicates that a renewal application must be submitted at least 60 calendar days before the license expires. The rule needs to be clarified to say that the renewal application should be submitted "no more than" 60 days before the license expires.
- R9-12-106
  - Subsection (B)(1) could be improved by simplifying language to say that the Department will send written notice to the applicant specifying the documentation missing or the information that is not complete and a timeframe within which the applicant/licensee has to provide the missing documentation or information.
  - Subsection (B)(1)(c) could be improved by amending language to be clearer. Possible language that may be clearer: "The Department shall consider the application withdrawn if the applicant fails to supply the missing documents or information included in the notice in subsection (1)(a) within 60 calendar days after the date of the notice described in subsection (1)(a) or within a time period the applicant or licensee and the Department agree upon in writing."
  - Subsection (C) addresses the process during the substantive review of a licensing application. For clarity purposes, the Department proposes to reword this subsection to be clearer about the process, expectations, and if applicable, the process when the Department requests information.
- Table 1.1
  - For clarity purposes the Department proposes to amend the following: The table says "Type of approval" when it is actually the type of "application" is listed under this column; and adding the Section number that applies to "changes affecting a license, including modification," which is under R9-12-105. The Department also proposes to update the time-frames indicated on Table 1.1. Proposed updates are as described under #3 of this report (see R9-12-106). Furthermore, the proposed amendments to the time-frames will be more in line with other Department rules.
- R9-12-201
  - Subsection (B)(1)(b) indicates that a manager of a sober living home must be sober and have maintained sobriety for at least one year. For clarity, the Department is proposing to include that the licensee should obtain documentation verifying that the manager has maintained sobriety. Conforming amendments may also be added to subsection (H).

- Subsection (G) could be improved if it clarified that the items listed in this subsection must be visible to visitors and residents. The Department also proposes to correct a spelling error: "manger" should be corrected to say "manager".
- R9-12-204
    - Subsection (A)(2) could be improved by clarifying that not only should the resident's record include the date of orientation, but the record should also include documentation that verifies that the resident received the facility's orientation. This may include a signed statement by the resident attesting to have received the facility's orientation.
- R9-12-205
    - This Section could be improved by clarifying that the services provided at a sober living home are reserved to individuals who have a residency agreement. This Section could be improved by adding that the licensee should maintain documentation of topics discussed at house meetings.
- R9-12-206
    - Subsection (1) could be improved by clarifying that in addition to a first aid kit being available at the sober living home, the manager shall ensure the first aid kit is accessible by residents.
- R9-12-207
    - This Section may also be improved if the rules included the option of a commercial permitted kitchen for applicants wanting to operate a sober living home that serves a larger population and who intend to use a commercial permitted kitchen in the facility. Conforming amendments to other rules in this Article may also be needed to address this option. Additionally, this Section may be improved if the rules allowed more flexibility on the requirement of the resident to have access to the kitchen or cooking appliances.
    - Subsection (6) should clarify that the temperature specified in this subsection includes all rooms within the sober living home. This subsection should include that if the bedroom has a separate heating or cooling system from the home, the temperature in the bedroom should also meet the temperature settings specified in rule if the resident does not have the option to control the temperature in the bedroom.
    - Subsection (D)(1)(d) could be made clearer by adding that the pest control program the sober living home implements complies with A.A.C. R3-8-201(C)(4).

6. **<u>Has the agency analyzed the rules' consistency with other rules and statutes?</u>**

The Department indicates the rules are generally consistent with other rules and statutes except for rule R9-12-201(D), which addresses the suspicion of abuse or exploitation and reporting responsibilities. The Department proposes to add "neglect" to align the rule with A.R.S. § 46-454.

7. **<u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>**

The Department indicates the rules are generally effective in achieving their objectives except for the following:

- R9-12-103
    - Subsection (A)(1)(j) requests an attestation that the applicant is in compliance with local zoning ordinances, building codes, and fire codes; however, to improve the effectiveness, this subsection needs to be updated to indicate that the applicant must provide verification that the applicant is in compliance with local zoning ordinances, building codes, and fire codes.
    - Subsection (A)(4) could be improved by adding that the applicant must include more details with the floor plan and site plan. For example, the floor plan should include each story of the residence, room layout and usage, window and door, exit, and location of fire protection device. For example, each site plan should include each facility, property line, street and walkway adjacent to the sober living home, parking, fencing, gate, and if applicable swimming pool.
    - Subsection (A) could be improved by including that an applicant must disclose any history of suspensions or revocations of a license or certificate in previous years, including this state or another state.
- R9-12-104
    - Subsection (A) could be improved by including that a licensee must disclose if any license or certificate has been suspended or revoked during the past licensing year.
- R9-12-105
    - To improve effectiveness of this Section, it should include that if applicable, a licensee must report a change if the status of the sober living home's certificate from a certifying organization has changed.
    - Subsection (A)(6)(a)(ii) and (iii) request a floor plan when there is a change to the number of residents allowed at the sober living home, or there is construction or modification to the sober living home. The floor plan should be consistent with the information that is being proposed as an amendment in R9-12-103(A)(4).
    - Subsection (B): To improve effectiveness this subsection needs to be updated and the requirement to notify the Department changed from "no more than 30 calendar days after the effective date of ..." to requiring the licensee to notify the Department "immediately" to report changes listed under this subsection.
    - Subsection (D): To improve effectiveness of this subsection, it should indicate that when reporting a change of ownership, the current licensee is responsible for the daily operations of the sober living home and prevent any interruptions of services required to sustain the life, health and safety of the residents while the licensee's current license is still in effect.
- R9-12-106
    - To improve effectiveness, the Department believes the time-frames in this Section should be updated to allow more time for administrative reviews and substantive reviews where needed and decrease time-frames where historically the current

time-frame stated in rule has not been needed. Confirming changes are being proposed as described in #6 of this report under "Table 1.1."

- R9-12-107
  - To improve effectiveness in subsection (A), the Department proposes to add that the Department may also consider denying or revoking an application or license when the applicant or licensee has had an application or license denied or revoked in another state or jurisdiction.
- R9-12-201
  - Subsection (B)(1)(c): To improve effectiveness, instead of requiring a manager to reside on the premises, the requirement should be amended to indicate that a licensee may have a manager live on the premises and the licensee shall ensure that a manager or staff is always on the premises of the sober living home when a resident is also on the premises.
  - Subsection (B)(3): Effectiveness could be improved by adding that the licensee's policy and procedures should include how the licensee or manager responds to an incident and subsequently documents the incident.
  - Subsection (B)(3)(n)(ii): Effectiveness can be improved by adding that the licensee's policy and procedures include that the licensee or manager will ensure staff's training regarding naloxone is provided upon staff on-boarding, offers refresher training, and/or when the method of administration of the naloxone available at the sober living home changes. The Department also proposes to make conforming changes to subsection (H)(4) to indicate that a personnel record should include the naloxone training received.
  - Subsection (E): Effectiveness of this subsection could be improved by adding that the manager shall not only notify the Department in writing of a resident's death, within one working day, but also notify the Department within two working days of any incidents of the resident's self-injury or other incidents requiring emergency medical services
  - Subsection (F): Effectiveness of this subsection could be improved by including the expectation that the licensee should also keep a vehicle maintenance log that includes all services and repairs of the vehicle used by the sober living home for the transportation of a resident; by adding that the licensee is required to have the vehicle used by the sober living home insured and registered; and that such vehicle should have a working air conditioner and heating system. The Department also proposes to remove "or arranges" as these proposed requirements cannot be imposed when using transportation services such as Uber, a taxi, public transportation, etc.
  - Subsection (H)(4): Effectiveness could be improved by adding that the personnel records should include that the staff are current with their cardiopulmonary resuscitation certification.
- R9-12-203
  - Subsection (A)(1) indicates that a manager must ensure that a resident is not subjected to what is listed in this subsection. This subsection can be improved by adding the following to this list: neglect, seclusion, restraint, misappropriation of personal and private property, denial of food, denial of the opportunity to sleep, and the denial of the opportunity to use the toilet.

- R9-12-207
  - Subsection (A)(5): Effectiveness could be improved by amending this subsection to allow more flexibility on the bathroom requirements and yet accomplishing the objective of the rule and ensure residents still have access to a bathroom.
  - Subsection (A)(9): Effectiveness could be improved by adding that the expectation is that the sober living home have a working telephone that is accessible for resident's use at all times. Conforming amendments will need to be made to R9-12-103(A)(1)(c) and R9-12-104(A)(1)(b).
  - Subsection (C)(7): Effectiveness could be improved by adding the expectation that the licensee also provides a bed frame, in addition to a clean mattress for a resident at the sober living home.

8. <u>Has the agency analyzed the current enforcement status of the rules?</u>

The Department indicates the rules are currently enforced as written.

9. <u>Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?</u>

The Department indicates there are no corresponding federal laws.

10. <u>For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?</u>

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates A.R.S. § 36-2062(E) states that a license is valid only for the premises and is not transferable. As such, the Department states a general permit is not applicable and is not used. The Department believes that under A.R.S. § 41-1037(A)(2) a general permit is not applicable as "[t]he issuance of an alternative type of permit, license or authorization is specifically authorized by state statute."

11. <u>Conclusion</u>

This 5YRR from the Department relates to seven (7) rules and one (1) table in Title 9, Chapter 12, Article 1 regarding Licensure Requirements for sober living homes and seven (7)

rules in Article 2 regarding Sober Living Home Requirements. Specifically, these rules "establish minimum standards and requirements for the licensure of sober living homes . . . necessary to ensure the public health, safety, and welfare" pursuant to A.R.S. § 36-2062(A).

The Department indicates some of the rules are not clear, concise, understandable, consistent, or effective in achieving their objectives. As such, the Department is proposing to amend the rules to address these issues and anticipates submitting a final rulemaking to the Council by August 2025.

Council staff recommends approval of this report.

RE: Department of Health Services, 9 A.A.C. 12, Articles 1 and 2, Five-Year-Review Report

Dear Ms. Klein:

Please find enclosed the Five-Year-Review Report from the Arizona Department of Health Services (Department) for 9 A.A.C. 12, Articles 1 and 2, which is due on or before July 31, 2024.

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this Report, please contact Angie Trevino at angelica.trevino@azdhs.gov or (480) 589-0298.

Sincerely,

Stacie Gravito Digitally signed by Stacie Gravito

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 12. Sober Living Homes

Article 1. Licensure Requirements

Article 2. Sober Living Home Requirements

Due: July 31, 2024

Submitted: July 29, 2024

1. **Authorization of the rule by existing statutes**

   Authorizing statutes: A.R.S. §§ 36-132(A)(1) and A.R.S. 36-136(G)

   Implementing statutes: A.R.S. §§ 36-2062, 36-2063, and 36-2064

2. **The objective of each rule:**

   Article 1

Rule	Objective
R9-12-101. Definitions	The objective of this rule is to define terms used in Article 1 and 2 of this Chapter, allowing for consistent interpretation.
R9-12-102. Individuals to Act for Applicant or Licensee	The objective of this rule is to specify the criteria when an individual is signing an application or a document on behalf of the business organization or if it is an individual applying, then it's the individual applying signing an application.
R9-12-103. Application for a License	The objective of this rule is to detail the application requirements.
R9-12-104. License Renewal	The objective of this rule is to detail the requirements for a license renewal application.
R9-12-105. Changes Affecting a License	The objective of this rule is to detail the changes that affect the license that must be reported to the Department; and the Department's process when changes to the license are reported.
R9-12-106. Time-frames	The objective of this rule is to detail the time-frame requirements according to A.R.S. § 41-1072
R9-12-107. Denial, Revocation, or Suspension of a License	The objective of this rule is to list the actions the Department may take and specify the criteria the Department will consider when determining such action.

Table 1.1. Time-frames (in calendar days)	The objective of this table is to summarize the time-frame durations used by the Department when reviewing applications.

Article 2

Rule	Objective
R9-1-201. Administration	The objective of the rule is to establish minimum requirements of administrative responsibilities and guidelines for licensees overseeing sober living homes.
R9-1-202. Residency Agreements	The objective of the rule is to establish minimum requirements for accepting and retaining an individual to be a resident at the sober living home, the manager's responsibilities, and agreements for residency.
R9-1-203. Resident Rights	The objective of the rule is to establish minimum requirement for resident rights and the managers responsibilities pertaining to a resident's rights.
R9-12-204. Records	The objective of the rule is to establish minimum requirements for resident's records.
R9-12-205. Sober Living Home Services	The objective of the rule is to establish minimum services provided at a sober living home.
R9-12-206. Emergency and Safety Standards	The objective of the rule is to establish minimum emergency and safety standards relevant to the sober living home.
R9-12-207. Environmental and Physical Plan Requirements	The objective of the rule is to establish minimum environmental and physical plant standards.

3. <u>Are the rules effective in achieving their objectives?</u> **Yes __ No _X_**

Rule	Explanation
R9-12-103	Subsection (A)(1)(j) requests an attestation that the applicant is in compliance with local zoning ordinances, building codes, and fire codes. The Department will consider new language to improve the effectiveness of this subsection at the time the Department conducts rulemaking. Subsection (A)(4) could be improved by adding that the applicant must include more details with the floor plan and site plan. For example, the floor plan should include each story of the residence, room layout and usage, window and door, exit, and location of fire protection device. For example, each site plan should include each facility, property line, street and walkway adjacent to the sober living home, parking, fencing, gate, and if applicable swimming pool.

	Subsection (A) could be improved by including that an applicant must disclose any history of suspensions or revocations of a license or certificate in previous years, including this state or another state.
R9-12-104	Subsection (A) could be improved by including that a licensee must disclose if any license or certificate has been suspended or revoked during the past licensing year.
R9-12-105	To improve effectiveness of this Section, it should include that if applicable, a licensee must report a change if the status of the sober living home's certificate from a certifying organization has changed. Subsection (A)(6)(a)(ii) and (iii) request a floor plan when there is a change to the number of residents allowed at the sober living home, or there is construction or modification to the sober living home. The floor plan should be consistent with the information that is being proposed as an amendment in R9-12-103(A)(4). Subsection (B): To improve effectiveness this subsection needs to be updated and the requirement to notify the Department changed from "no more than 30 calendar days after the effective date of ..." to requiring the licensee to notify the Department "immediately" to report changes listed under this subsection. Subsection (D): To improve effectiveness of this subsection, it should indicate that when reporting a change of ownership, the current licensee is responsible for the daily operations of the sober living home and prevent any interruptions of services required to sustain the life, health and safety of the residents while the licensee's current license is still in effect.
R9-12-106	To improve effectiveness, the Department believes the time-frames in this Section should be updated to allow more time for administrative reviews and substantive reviews where needed and decrease time-frames where historically the current time-frame stated in rule has not been needed. Confirming changes are being proposed as described in #6 of this report under "Table 1.1."
R9-12-107	To improve effectiveness in subsection (A), the Department proposes to add that the Department may also consider denying or revoking an application or license when the applicant or licensee has had an application or license denied or revoked in another state or jurisdiction.
R9-12-201	Subsection (B)(1)(c): To improve effectiveness, instead of requiring a manager to reside on the premises, the requirement should be amended to indicate that a licensee may have a manager live on the premises and the licensee shall ensure that a manager or staff is always on the premises of the sober living home when a resident is also on the premises. Subsection (B)(3): Effectiveness could be improved by adding that the licensee's policy and procedures should include how the licensee or manager responds to an incident and subsequently documents the incident. Subsection (B)(3)(n)(ii): Effectiveness can be improved by adding that the licensee's policy and procedures include that the licensee or manager will ensure

	staff's training regarding naloxone is provided upon staff on-boarding, offers refresher training, and/or when the method of administration of the naloxone available at the sober living home changes. The Department also proposes to make conforming changes to subsection (H)(4) to indicate that a personnel record should include the naloxone training received. Subsection (E): Effectiveness of this subsection could be improved by adding that the manager shall not only notify the Department in writing of a resident's death, within one working day, but also notify the Department within two working days of any incidents of the resident's self-injury or other incidents requiring emergency medical services Subsection (F): Effectiveness of this subsection could be improved by including the expectation that the licensee should also keep a vehicle maintenance log that includes all services and repairs of the vehicle used by the sober living home for the transportation of a resident; by adding that the licensee is required to have the vehicle used by the sober living home insured and registered; and that such vehicle should have a working air conditioner and heating system. The Department also proposes to remove "or arranges" as these proposed requirements cannot be imposed when using transportation services such as Uber, a taxi, public transportation, etc. Subsection (H)(4): Effectiveness could be improved by adding that the personnel records should include that the staff are current with their cardiopulmonary resuscitation certification.
R9-12-203	Subsection (A)(1) indicates that a manager must ensure that a resident is not subjected to what is listed in this subsection. This subsection can be improved by adding the following to this list: neglect, seclusion, restraint, misappropriation of personal and private property, denial of food, denial of the opportunity to sleep, and the denial of the opportunity to use the toilet.
R9-12-207	Subsection (A)(5): Effectiveness could be improved by amending this subsection to allow more flexibility on the bathroom requirements and yet accomplishing the objective of the rule and ensure residents still have access to a bathroom. Subsection (A)(9): Effectiveness could be improved by adding that the expectation is that the sober living home have a working telephone that is accessible for resident's use at all times. Conforming amendments will need to be made to R9-12-103(A)(1)(c) and R9-12-104(A)(1)(b). Subsection (C)(7): Effectiveness could be improved by adding the expectation that the licensee also provides a bed frame, in addition to a clean mattress for a resident at the sober living home.

4. Are the rules consistent with other rules and statutes? **Yes __ No _X_**

Rule	Explanation
R9-12-201	Subsection (D) addresses the suspicion of abuse or exploitation and reporting responsibilities. The Department proposes to add "neglect" to align the rule with A.R.S. § 46-454.

5. Are the rules enforced as written? Yes _X_ No __

Rule	Explanation

6. Are the rules clear, concise, and understandable? Yes ___ No _X_

Rule	Explanation
R9-12-103	This Section and its heading could be clearer if it was clarified that this Section pertains to an initial application for licensure. This Section could also be improved by including that a license is valid for one year as per A.R.S. § 36-2662(B).
R9-12-104	Subsection (A) indicates that a renewal application must be submitted at least 60 calendar days before the license expires. The rule needs to be clarified to say that the renewal application should be submitted "no more than" 60 days before the license expires.
R9-12-106	Subsection (B)(1) could be improved by simplifying language to say that the Department will send written notice to the applicant specifying the documentation missing or the information that is not complete and a timeframe within which the applicant/licensee has to provide the missing documentation or information. Subsection (B)(1)(c) could be improved by amending language to be clearer. Possible language that may be clearer: "The Department shall consider the application withdrawn if the applicant fails to supply the missing documents or information included in the notice in subsection (1)(a) within 60 calendar days after the date of the notice described in subsection (1)(a) or within a time period the applicant or licensee and the Department agree upon in writing." Subsection (C) addresses the process during the substantive review of a licensing application. For clarity purposes, the Department proposes to reword this subsection to be clearer about the process, expectations, and if applicable, the process when the Department requests information.
Table 1.1	For clarity purposes the Department proposes to amend the following: The table says "Type of approval" when it is actually the type of "application" is listed under this column; and adding the Section number that applies to "changes affecting a license, including modification," which is under R9-12-105. The Department also proposes to update the time-frames indicated on Table 1.1. Proposed updates are

	as described under #3 of this report (see R9-12-106). Furthermore, the proposed amendments to the time-frames will be more in line with other Department rules.
R9-12-201	Subsection (B)(1)(b) indicates that a manager of a sober living home must be sober and have maintained sobriety for at least one year. This subsection would benefit from clarification. Clarifying language will be considered when the Department conducts rulemaking. Subsection (G) could be improved if it clarified that the items listed in this subsection must be visible to visitors and residents. The Department also proposes to correct a spelling error: "manger" should be corrected to say "manager".
R9-12-204	Subsection (A)(2) could be improved by clarifying that not only should the resident's record include the date of orientation, but the record should also include documentation that verifies that the resident received the facility's orientation. This may include a signed statement by the resident attesting to have received the facility's orientation.
R9-12-205	This Section could be improved by clarifying that the services provided at a sober living home are reserved to individuals who have a residency agreement. This Section could be improved by adding that the licensee should maintain documentation of topics discussed at house meetings.
R9-12-206	Subsection (1) could be improved by clarifying that in addition to a first aid kit being available at the sober living home, the manager shall ensure the first aid kit is accessible by residents.
R9-12-207	This Section may also be improved if the rules included the option of a commercial permitted kitchen for applicants wanting to operate a sober living home that serves a larger population and who intend to use a commercial permitted kitchen in the facility. Conforming amendments to other rules in this Article may also be needed to address this option. Additionally, this Section may be improved if the rules allowed more flexibility on the requirement of the resident to have access to the kitchen or cooking appliances. Subsection (6) should clarify that the temperature specified in this subsection includes all rooms within the sober living home. This subsection should include that if the bedroom has a separate heating or cooling system from the home, the temperature in the bedroom should also meet the temperature settings specified in rule if the resident does not have the option to control the temperature in the bedroom. Subsection (D)(1)(d) could be made clearer by adding that the pest control program the sober living home implements complies with A.A.C. R3-8-201(C)(4).

7. Has the agency received written criticisms of the rules within the last five years? **Yes X No __**

Commenter	Comment	Agency's Response
Arizona Recovery Housing Authority (AzRHA) via U.S. Department of Housing and Urban Development (HUD) *See* US District Court of Arizona Case No. CV-20-00893-PHX-JAT	The original complaint filed by AzRHA challenged several portions of the sober living statutory scheme and the rules that were required by the statutes. Specifically, in May 2020, the Department was sued in federal court alleging that the sober living home ("SLH") statutes and rules violated the Fair Housing Act ("FHA"), the Americans with Disabilities Act ("ADA") and § 794 of the Federal Rehabilitation Act because: (1) the statutes and rules require a good neighbor policy, the fees for licensure were excessive, and the Department had refused to grant SLH applicants (i.e. all AzRHA members) the reasonable accommodation they requested (i.e. fee waiver). AzRHA's temporary restraining order application was denied by the Federal Court on May 27, 2020 wherein the Court found that AzRHA did not make a showing that its members were in imminent or irreparable harm. Further, the Court found AzRHA's reasonable accommodation request was untenable. At all times since the initial complaint was filed, he Department has been cooperating and providing data to HUD representatives. As of the date of this filing, and as a result of the Department's cooperation and data, there remain outstanding questions regarding only the application of the good neighbor policy and procedures in A.A.C. Section R9-12-201(B)(2) (as required in A.R.S. § 36-2062(A)(5)) and the amount of the licensing fee in A.A.C. R9-12-103(A)(6) (as directed by A.R.S. § 36-2063(A)).	At this juncture, the Department is still cooperating with HUD and does not know the outcome of this investigation. However, there may be potential litigation about which the Department cannot comment at this time.

8. Economic, small business, and consumer impact comparison:

A.R.S. § 36-2062(A) requires the Department of Health Services (Department) to "adopt rules to establish minimum standards and requirements for the licensure of sober living homes . . . necessary to

ensure the public health, safety, and welfare." The statute also requires the inclusion of specific standards; the establishment of fees for initial licensure, license renewal, and late payment of licensing fees; and provisions for the Department's enforcement of licensing requirements. The Department has adopted rules for licensing sober living homes in Arizona Administrative Code Title 9, Chapter 12. The rules in this Chapter became effective on July 1, 2019.

An economic, small business, and consumer impact statement was completed in 2019. Persons affected by these rules remains the same as first reported in the 2019 economic, small business, and consumer impact statement.

Almost all requirements in the rules are tied directly to a specific statutory requirement. As such, costs imposed by and benefits derived from them are the result of the statutes, rather than the rules. The Department designated the following costs/revenues at the time of the 2019 rulemaking and remain the same: Annual costs/revenues are designated as minimal when more than $0 and $5,000 or less, moderate when between $5,000 and $20,000, and substantial when $20,000 or greater in additional costs or revenues. A cost is listed as significant when meaningful or important, but not readily subject to quantification.

In the 2019, the Department reported that it anticipated to need 13 to 14 new FTEs to monitor the requirements of these rules costing the Department approximately $1,050,000.00 with an average salary of $55,000. The Department approximated that between 5-11 new surveyors were going to be needed. Currently, the Bureau of Behavioral Health Facilities Licensing is the program/unit responsible for enforcement of the rules in this Chapter. This bureau has one Bureau Chief; one Deputy Bureau Chief; four managers; 15 Licensing Surveyors; two vacant Licensing Surveyor positions that manage the licensing or certification of six licensing or certification types, of which sober living home licensing is included. The functions as detailed in the 2019 economic, small business and consumer impact statement remain the same. Costs for the Department include salary plus overhead costs.

Thus far in calendar year 2024, the Department has received 95 initial applications, licensed 35 sober living homes, renewed 77 sober living home licenses, and processed 12 applications for changes to the license. Of these applications received, the Department denied: seven initial applications, zero renewal applications, and zero applications for changes. The Department also suspended or revoked 11 licenses, thus far in calendar year 2024. In Fiscal Year 2024, the Department also conducted 624 total inspections, which include 63 complaint investigations in response to complaints received.

The Department anticipates that many sober living homes will continue to incur a minimal cost for licensing, which may be offset by fees charged to residents. Similar costs and benefits would apply to a person planning to open a sober living home in Arizona.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes __ No _X_

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

Not applicable. This is the first review of the rules in 9 A.A.C 12, Articles 1 and 2.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The Department of Health Services (Department) believes the current rules pose the minimum cost and burden on businesses, the regulated public and on the general public and still achieve the regulatory objective.

12. **Are the rules more stringent than corresponding federal laws?** Yes ___ No _X_

Federal laws are not applicable to the rules in 9 A.A.C. 12, Articles 1 and 2.

13. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

Because A.R.S. § 36-2062(E) states that a license is valid only for the premises and is not transferable, a general permit is not applicable and is not used. Therefore, Department believes that under A.R.S. § 41-1037(A)(2) that a general permit is not applicable.

14. **Proposed course of action:**

The Department of Health Services has reviewed the current rules and proposes to amend the rules to address the issues identified in this report. The Department proposes to submit final rulemaking to the Council by January 2026.

Revision submitted November 20, 2024

CHAPTER 12. SOBER LIVING HOMES

ARTICLE 1. LICENSURE REQUIREMENTS

R9-12-101. Definitions

In addition to the definitions in A.R.S. § 36-2061, the following definitions apply in this Chapter unless otherwise specified:

1. "Abuse" means:
   a. The same as in A.R.S. § 46-451;
   b. A pattern of ridiculing or demeaning a resident;
   c. Making derogatory remarks or verbally harassing a resident; or
   d. Threatening to inflict physical harm on a resident.
2. "Accept" or "acceptance" means an individual becomes a resident of a sober living home.
3. "Administrative completeness review time-frame" means the same as in A.R.S. § 41-1072.
4. "Applicant" means an individual or business organization requesting a license under R9-12-104 to open a sober living home.
5. "Application packet" means the forms, documents, and additional information the Department requires to be submitted by an applicant.
6. "Business organization" means the same as "entity" in A.R.S. § 10-140.
7. "Calendar day" means each day, not including the day of the act, event, or default from which a designated period of time begins to run, but including the last day of the period unless it is a Saturday, Sunday, statewide furlough day, or legal holiday, in which case the period runs until the end of the next day that is not a Saturday, Sunday, statewide furlough day, or legal holiday.
8. "Controlling person" means a person who, with respect to a business organization:
   a. Has the power to vote at least 10% of the outstanding voting securities of the business organization;
   b. If the business organization is a partnership, is a general partner or is a limited partner who holds at least 10% of the voting rights of the partnership;
   c. If the business organization is a corporation, association, or limited liability company, is the president, the chief executive officer, the incorporator, an agent, or any person who owns or controls at least 10% of the voting securities; or
   d. Holds a beneficial interest in 10% or more of the liabilities of the business organization.
9. "Department" means the Arizona Department of Health Services.
10. "Documentation" means information in written, photographic, electronic, or other permanent form.
11. "Drug" has the same meaning as in A.R.S. § 32-1901.
12. "Exploitation" has the same meaning as in A.R.S. § 46-451.
13. "Facility" means the building or buildings used for operating a sober living home.
14. "Health care provider" means a:
    a. Physician, as defined in A.R.S. § 36-401;
    b. Registered nurse practitioner, as defined in A.R.S. § 32-1601; or
    c. Physician assistant, as defined in A.R.S. § 32-2501.
15. "Illicit drug" means:
    a. A substance listed in A.R.S. § 36-2512 as a schedule I controlled substance;
    b. A dangerous drug, as defined in A.R.S. § 13-3401, that is not an individual's prescription medication; or
    c. A prescription medication that is not an individual's prescription medication.
16. "Licensee" means the individual or business organization to which the Department has issued a license to operate a sober living home.
17. "Manager" means an individual designated by a licensee to:
    a. Act on behalf of the licensee in the onsite management of a sober living home; and
    b. Support and assist residents of the sober living home.
18. "Modification" means the substantial improvement, enlargement, reduction, alteration, or other substantial change in the facility or another structure on the premises at a sober living home.
19. "Over-the-counter drug" means the same as in A.R.S. § 32-1901.
20. "Overall time-frame" means the same as in A.R.S. § 41-1072.
21. "Premises" means:
    a. A facility; and
    b. The grounds surrounding the facility that are owned, leased, or controlled by the licensee, including other structures.
22. "Prescription medication" means the same as in A.R.S. § 32-1901.
23. "Residency agreement" means a document signed by a resident or the resident's representative and a manager, detailing the terms of residency.
24. "Resident" means an individual who is accepted by a licensee under the terms of a residency agreement with the individual to live at the licensee's sober living home.
25. "Resident's representative" means:
    a. An individual acting on behalf of a resident with the written consent of the resident, or
    b. The resident's legal guardian.
26. "Sober" or "sobriety" means that an individual is free of alcohol or drugs, except for a drug that is:
    a. Used as part of medication-assisted treatment,
    b. The individual's prescription medication, or
    c. An over-the-counter drug.
27. "Staff" means the employees or volunteers who provide monitoring or assistance to residents at a sober living home.
28. "Substantive review time-frame" means the same as in A.R.S. § 41-1072.
29. "Swimming pool" means the same as "private residential swimming pool" as defined in A.A.C. R18-5-201.
30. "Termination of residency" or "terminate residency" means an individual is no longer a resident of a sober living home.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-102. Individuals to Act for Applicant or Licensee

When an applicant or licensee is required by this Chapter to provide information on or sign an application form or other document, the following shall satisfy the requirement on behalf of the applicant or licensee:

1. If the applicant or licensee is an individual, the individual; and
2. If the applicant or licensee is a business organization, the individual who the business organization has designated to act on the business organization's behalf for purposes of this Chapter and who:
   a. Is a controlling person of the business organization,
   b. Is a U.S. citizen or legal resident, and

c. Has an Arizona address.

Historical Note
New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-103. Application for a License

A. An applicant shall submit to the Department a completed application packet to operate a sober living home that contains:
1. An application, in a Department-provided format, that includes:
   a. The applicant's name;
   b. The proposed name, if any, of the sober living home;
   c. The address and telephone number of the proposed sober living home;
   d. The applicant's address and telephone number, if different from the address or telephone number of the proposed sober living home;
   e. The applicant's e-mail address;
   f. The name and contact information of an individual acting on behalf of the applicant according to R9-12-102, if applicable;
   g. Whether the applicant agrees to allow the Department to submit supplemental requests for information under R9-12-106(C)(3);
   h. The maximum number of residents of the proposed sober living home;
   i. The name, telephone number, and e-mail address of the manager for the proposed sober living home;
   j. An attestation that the applicant is in compliance with local zoning ordinances, building codes, and fire codes; and
   k. The applicant's signature and the date signed;
2. Documentation for the applicant that complies with A.R.S. § 41-1080;
3. If applicable, a copy of the applicant's current certificate as a sober living home from a certifying organization approved by the Director;
4. A floor plan for the proposed sober living home, including:
   a. The location and size of each resident bedroom, and
   b. The location of each openable window or door from a resident bedroom;
5. If the premises for the proposed sober living home are leased, documentation from the owner of the premises, in a Department-provided format, that the applicant has permission from the owner to operate a sober living home on the premises; and
6. A licensing fee of $500 plus $100 times the maximum number of residents of the proposed sober living home in subsection (A)(1)(h).

B. Upon receipt of the application packet in subsection (A), the Department shall issue or deny a license to an applicant as provided in R9-12-106.

Historical Note
New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-104. License Renewal

A. At least 60 calendar days before the expiration date indicated on a license to operate a sober living home, a licensee shall submit to the Department an application packet for renewal of the license that contains:
1. An application, in a Department-provided format, that includes:
   a. The applicant's name;
   b. The address and telephone number of the sober living home;
   c. The applicant's address and telephone number, if different from the address or telephone number of the sober living home;
   d. The applicant's e-mail address;
   e. The license number of the sober living home; and
   f. Whether the applicant agrees to allow the Department to submit supplemental requests for information under R9-12-106(C)(3);
2. If applicable, a copy of the licensee's current certificate as a sober living home from a certifying organization approved by the Director; and
3. Except as provided in subsection (B), a licensing fee of $500 plus $100 times the maximum number of residents approved for the sober living home during the current licensing period.

B. A licensee may submit to the Department the licensing fee in subsection (A)(3) with an additional late payment fee of $250 within 30 calendar days after the expiration date of the license as a sober living home.

C. The Department shall renew or deny renewal of a license to operate a sober living home as provided in R9-12-106.

Historical Note
New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-105. Changes Affecting a License

A. A licensee shall notify the Department in writing at least 30 calendar days before the effective date of:
1. Termination of operation of the sober living home, including the proposed termination date;
2. A change in the individual or business organization controlling the sober living home, including the name, address, telephone number, and e-mail address of the individual or business organization proposing to assume control of the sober living home;
3. A change in the address of the sober living home, including the new address for the sober living home;
4. A change in the name of the sober living home, including the new name of the sober living home;
5. If the licensee is an individual, a legal change of the licensee's name, including the new name of the licensee; or
6. A proposed change in the maximum number of residents in the sober living home or construction or modification of the facility, including:
   a. A floor plan for the sober living home showing:
      i. If applicable, the areas in which construction or modification of the facility will occur;
      ii. The location and size of each resident bedroom; and
      iii. The location of each openable window or door from a resident bedroom;
   b. For a proposed change in the maximum number of residents in the sober living home:
      i. The proposed new maximum number of residents in the sober living home; and
      ii. If the proposed new maximum number of residents in the sober living home is larger than the current maximum number of residents, a fee of $100 times the difference between the current maximum number of residents and the new maximum number of residents; and
   c. For construction or modification of the facility, an attestation that the construction or modification will

be in compliance with local zoning ordinances, building codes, and fire codes.

B. A licensee shall notify the Department in writing no more than 30 calendar days after the effective date of:
1. A change in the name or contact information of an individual acting on behalf of the licensee according to R9-12-102, including the name and contact information of the new individual acting on behalf of the licensee;
2. A change in the licensee's e-mail address, including the new e-mail address; or
3. A change in the manager of the sober living home, including the name, telephone number, and e-mail address of the new manager.

C. If the Department receives the notification of termination of operation in subsection (A)(1), the Department shall void the licensee's license to operate a sober living home as of the termination date specified by the licensee.

D. If the Department receives the notification in subsection (A)(2) of a change in the individual or business organization controlling the sober living home, the Department shall void the licensee's license to operate a sober living home upon issuance of a new license to operate a sober living home.

E. If the Department receives the notification in subsection (A)(3) of a change in the address of the sober living home, the Department shall review, according to R9-12-106, the licensee's application for a new license, submitted consistent with R9-12-103.

F. If the Department receives the notification of a change in the name of the sober living home in subsection (A)(4) or of the licensee in subsection (A)(5), the Department shall issue to the licensee an amended license that incorporates the change but retains the expiration date of the existing license.

G. If the Department receives the notification in subsection (A)(6) of a proposed change in the maximum number of residents in the sober living home or of construction or modification of the facility, the Department:
1. May conduct an inspection of the premises as allowed by A.R.S. § 36-2063; and
2. Shall issue to the licensee an amended license that incorporates the change but retains the expiration date of the existing license if the sober living home is in compliance with A.R.S. Title 36, Chapter 18, Article 4 and this Chapter.

H. An individual or business organization planning to assume operation of an existing sober living home shall obtain a new license, as required in A.R.S. § 36-2062(E), before beginning operation of the sober living home.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-106. Time-frames

A. The overall time-frame for a license granted by the Department under this Chapter is set forth in Table 1.1. The applicant or licensee and the Department may agree in writing to extend the substantive review time-frame and the overall time-frame. An extension of the substantive review time-frame and the overall time-frame may not exceed 25% of the overall time-frame.

B. The administrative completeness review time-frame for a license granted by the Department under this Chapter is set forth in Table 1.1 and begins on the date that the Department receives an application packet.
1. The Department shall send a notice of administrative completeness or deficiencies to the applicant or licensee within the administrative completeness review time-frame.
   a. A notice of deficiencies shall list each deficiency and the information or items needed to complete the application.
   b. The administrative completeness review time-frame and the overall time-frame are suspended from the date that the notice of deficiencies is sent until the date that the Department receives all of the missing information or items from the applicant or licensee.
   c. If an applicant or licensee fails to submit to the Department all of the information or items listed in the notice of deficiencies within 120 calendar days after the date that the Department sent the notice of deficiencies or within a time period the applicant or licensee and the Department agree upon in writing, the Department shall consider the application withdrawn.
2. If the Department issues a license during the administrative completeness review time-frame, the Department shall not issue a separate written notice of administrative completeness.

C. The substantive review time-frame is set forth in Table 1.1 and begins on the date of the notice of administrative completeness.
1. As part of the substantive review of an application for a license, the Department may conduct an inspection according to A.R.S. § 36-2063 that may require more than one visit to complete.
2. The Department shall send a license or a written notice of denial of a license within the substantive review time-frame.
3. During the substantive review time-frame, the Department may make one comprehensive written request for additional information, unless the applicant or licensee has agreed in writing to allow the Department to submit supplemental requests for information.
   a. The Department shall send a comprehensive written request for additional information that includes a written statement of deficiencies, stating each statute and rule upon which noncompliance is based, if the Department determines that an applicant or licensee, a sober living home, or the premises are not in substantial compliance with A.R.S. Title 36, Chapter 18, Article 4 or this Chapter.
   b. An applicant or licensee shall submit to the Department all of the information requested in a comprehensive written request for additional information or a supplemental request for information, including, if applicable, documentation of the corrections required in a statement of deficiencies, within 30 calendar days after the date of the comprehensive written request for additional information or the supplemental request for information or within a time period the applicant or licensee and the Department agree upon in writing.
   c. The substantive review time-frame and the overall time-frame are suspended from the date that the Department sends a comprehensive written request for additional information or a supplemental request for information until the date that the Department receives all of the information requested, including, if applicable, documentation of corrections required in a statement of deficiencies.
   d. If an applicant or licensee fails to submit to the Department all of the information requested in a

comprehensive written request for additional information or a supplemental request for information, including, if applicable, documentation of corrections required in a statement of deficiencies, within the time prescribed in subsection (C)(3)(b), the Department shall deny the application.

4. The Department shall issue a license if the Department determines that the applicant or licensee and the sober living home, including the premises, are in substantial compliance with A.R.S. Title 36, Chapter 18, Article 4, and this Chapter.
5. If the Department denies a license, the Department shall send to the applicant or licensee a written notice of denial setting forth the reasons for denial and all other information required by A.R.S. § 41-1076.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-107. Denial, Revocation, or Suspension of a License

A. The Department may deny an application or suspend or revoke a license to operate a sober living home if:
1. An applicant or licensee does not meet the application requirements contained in R9-12-103(A) or R9-12-104(A), as applicable;
2. A licensee does not comply with requirements in A.R.S. Title 36, Chapter 18, Article 4, or this Chapter;
3. A licensee does not correct the deficiencies according to the plan of correction specified in R9-12-201(J)(1) by the time stated in the plan of correction;
4. An applicant or licensee provides false or misleading information as part of an application; or
5. The nature or number of violations revealed by any type of inspection or investigation of a sober living home poses a direct risk to the life, health, or safety of a resident or another individual on the premises.

B. In determining which action in subsection (A) is appropriate, the Department shall consider the direct risk to the life, health, or safety of a resident in the sober living home based on:
1. Repeated violations of statutes or rules,
2. Pattern of violations,
3. Types of violation,
4. Severity of violation, and
5. Number of violations.

C. An applicant or licensee may appeal the Department's determination in subsection (A) according to A.R.S. Title 41, Chapter 6, Article 10.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

Table 1.1. Time-frames (in calendar days)

Type of approval	Statutory authority	Overall time-frame	Administrative completeness review time-frame	Substantive review time-frame
Application for a license under R9-12-103	A.R.S. § 36-2062	90	30	60
Renewal of a license under R9-12-104	A.R.S. § 36-2062	30	10	20
Changes affecting a license, including modifications	A.R.S. § 36-2062	60	30	30

Historical Note

ARTICLE 2. SOBER LIVING HOME REQUIREMENTS

R9-12-201. Administration

A. A licensee of a sober living home:
1. Has the authority and responsibility for the management of the sober living home, including when the licensee designates another individual or contracts with a person to accomplish an action or perform a service;
2. Shall establish, in writing, the scope of services to be provided by the sober living home;
3. Shall designate, in writing, an individual, who may be the licensee, as the manager of the sober living home; and
4. Shall ensure that the knowledge, skills, and experience of the manager and any other staff of the sober living home are sufficient to carry out the scope of services established according to subsection (A)(2).

B. A licensee shall ensure that:
1. A manager:
   a. Is at least 21 years of age;
   b. Is sober and has maintained sobriety for at least one year;
   c. Resides on the premises of only the one sober living home;
   d. Has documentation of current training in cardiopulmonary resuscitation; and
   e. Is directly accountable to the licensee for:
      i. The daily operation of the sober living home;
      ii. Enforcing all policies and procedures, house rules, and other requirements of the sober living home; and
      iii. All services provided by or at the sober living home;
2. Policies and procedures are established, documented, and implemented to:
   a. Prevent or address any concerns or complaints from individuals living in the surrounding neighborhood by:
      i. Identifying an individual for individuals living in the surrounding neighborhood to contact to discuss a concern;
      ii. Requiring the identified individual to respond to a concern or complaint, even if the issue cannot be resolved; and

iii. Ensuring that requirements for residents and visitors related to parking, noise emanating from the sober living home, smoking, cleanliness of the public space near the sober living home, and loitering in front of the sober living home or near-by homes are established, known to residents, and enforced; and
b. Promote the safety of the surrounding neighborhood, to comply with A.R.S. § 36-2062(A)(3); and
3. Policies and procedures are established, documented, and implemented to protect the health and safety of a resident that cover:
a. Recordkeeping;
b. Resident acceptance;
c. Resident rights;
d. Orientation of a resident to:
i. The premises of the sober living home,
ii. The resident's rights and responsibilities,
iii. The prohibition of the possession of alcohol or illicit drugs at the sober living home,
iv. Services offered by or coordinated through the sober living home,
v. Drug and alcohol testing practices, and
vi. Expectations about food preparation and chores;
e. Drug and alcohol testing conducted by an independent testing facility certified under 42 C.F.R. 493 for the sober living home and other assessments of sobriety, including:
i. The frequency of testing or assessment, based on the residents accepted; and
ii. The compounds included in the testing panel or, if applicable, an assessment methodology, based on the sober living home's scope of services and residents accepted;
f. Allowing the acceptance and retention as a resident of an individual:
i. Who is receiving and will continue to receive medication-assisted treatment;
ii. Who has a co-occurring behavioral health issue, as defined in A.A.C. R9-10-101; or
iii. If included in the scope of services established according to subsection (A)(2), has a co-occurring medical condition;
g. House meetings, including:
i. Frequency;
ii. Typical duration; and
iii. Participation requirements, if applicable;
h. The provision of services, including:
i. Facilitating peer support activities;
ii. If applicable, providing other services on the premises to support sobriety or improve independent living;
iii. If applicable, coordinating the provision of services to support sobriety provided by other persons; and
iv. Referring a resident to other persons for the provision of services to support sobriety;
i. Residents' records, including electronic records if applicable;
j. The establishment, updating, and enforcement of house rules, including:
i. If applicable, curfews;
ii. Requirements related to chores, smoking, and visitors; and
iii. Requirements for the storage, security, and use of a resident's prescription medications or over-the-counter drugs;
k. Management of all monies received or spent by the sober living home, including:
i. Accounting for monies received by residents;
ii. Prohibiting a requirement for an individual or resident to sign a document relinquishing the resident's public assistance benefits, such as medical assistance, case assistance, or supplemental nutrition assistance program benefits, as a condition of residency; and
iii. Providing copy of the record of the resident's account to the resident or the resident's representative upon request;
l. Specific steps for:
i. A resident to file a complaint,
ii. The sober living home to respond to a resident's complaint, and
iii. The prevention of retaliation against a resident who files a complaint;
m. How the licensee or the manager will respond to:
i. A resident's loss of sobriety; or
ii. A resident's sudden, intense, or out-of-control behavior to prevent harm to the resident or another individual;
n. The provision of naloxone, including requirements for:
i. Informing the residents, the manager, and any other staff of the availability and location of the naloxone on the premises of the sober living home;
ii. Providing training to the manager and any other staff on the correct use of naloxone; and
iii. Ensuring the naloxone provided is available and not beyond the listed expiration date; and
o. Termination of residency, including:
i. Planning for termination of residency when the services provided by the sober living home are no longer needed by a resident, including assisting the resident to find other housing;
ii. Coordinating the relocation of a resident to a health care institution or another sober living home if the resident needs services outside the scope of services provided by the sober living home;
iii. Coordinating the relocation of a resident to another sober living home or other housing option if the resident terminates residency; and
iv. Addressing factors that may negatively impact the surrounding neighborhood.

C. A licensee shall:
1. Not act as a patient's representative; and
2. Ensure that a manager, an employee, or a family member of a manager or employee does not act as a resident's representative.

D. If a manager has a reasonable basis, according to A.R.S. § 46-454, to believe abuse or exploitation of a resident has occurred on the premises, the manager shall:
1. If applicable, take immediate action to stop the suspected abuse or exploitation;
2. Immediately report the suspected abuse or exploitation of the resident according to A.R.S. § 46-454;
3. Document:
a. The suspected abuse or exploitation,

   b. Any action taken according to subsection (D)(1), and
   c. The report in subsection (D)(2); and
4. Maintain the documentation in subsection (D)(3) for at least 12 months after the date of the report in subsection (D)(2).

E. A manager shall notify:
1. A resident's representative, family member, or other emergency contact designated by the resident according to R9-12-202(C)(2):
   a. Within one calendar day after:
      i. The resident's death, or
      ii. The resident has an illness or injury that requires immediate intervention by an emergency medical services provider or treatment by a health care provider; and
   b. Within seven calendar days after the manager determines that a resident is:
      i. Incapable of handling financial affairs, or
      ii. Not complying with the residency agreement; and
2. The Department, in a Department-provided format, of a resident's death, within one working day after the resident's death, if the resident's death is required to be reported according to A.R.S. § 11-593.

F. If a sober living home provides or arranges transportation for residents, a manager shall ensure that the vehicle used for transportation:
1. Is in good working order, and
2. Has a seat belt for each occupant of the vehicle.

G. A manger shall ensure that the following are conspicuously posted in a sober living home:
1. The license of the sober living home;
2. The name and contact information for the individual or business organization controlling the sober living home; and
3. A statement of resident's rights, including:
   a. The right to file a complaint about the manager or the sober living home,
   b. How to file a complaint about the manager or the sober living home, and
   c. The phone number for the unit in the Department responsible for licensing and monitoring the sober living home.

H. A licensee shall ensure that a personnel record is established for a manager and any other staff of a sober living home that includes the individual's:
1. Name;
2. Date of birth;
3. Contact telephone number; and
4. Documentation of:
   a. Verification of skills and knowledge sufficient to carry out the sober living home's scope of services;
   b. Training in the use of naloxone; and
   c. If applicable:
      i. Certification in cardiopulmonary resuscitation, and
      ii. Compliance with subsection (B)(1)(b).

I. A licensee shall ensure that:
1. The manager or other staff of the sober living home is on the premises within 30 minutes after notification by the Department of the Department's presence at the sober living home; and
2. The Department is allowed immediate access to all:
   a. Areas of the premises;
   b. Information in records pertaining to the sober living home or residents, except as prohibited by 42 CFR, Part 2; and
   c. Staff or residents of the sober living home who are on the premises.

J. If the Department notifies the licensee of noncompliance with requirements in A.R.S. Title 36, Chapter 18, Article 4, or this Chapter, the licensee shall:
1. Within 14 calendar days after the date of the Department's notice of noncompliance, establish a plan of correction, if applicable, for correction of a deficiency; and
2. Ensure that a deficiency listed on the plan of correction is corrected within 30 calendar days after the date of the plan of correction or within a time period the Department and the licensee agree upon in writing.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-202. Residency Agreements

A. Within three calendar days before or at the time of acceptance into a sober living home, an individual requesting to be a resident of the sober living home shall provide proof of sobriety to the manager of the sober living home.

B. A manager shall not accept or retain an individual as a resident of a sober living home if the individual:
1. Is not at least 18 years of age,
2. Cannot provide proof of sobriety, or
3. Needs more support to maintain sobriety than is within the scope of services for the sober living home.

C. Before or at the time of an individual's acceptance by a sober living home, a manager shall ensure that there is a documented residency agreement between the individual and the sober living home that includes:
1. The individual's name;
2. The name and phone number of an emergency point of contact, which may be a family member or another individual designated by the individual;
3. Information about the individual's:
   a. Length of sobriety;
   b. History of previous recovery activities; and
   c. Source of referral to the sober living home, if applicable;
4. Terms of occupancy, including:
   a. Date of occupancy or expected date of occupancy,
   b. Resident responsibilities, and
   c. Responsibilities of the sober living home;
5. The consequences of a loss of sobriety;
6. A description of the room for the individual to occupy;
7. A list of the services to be provided by the sober living home to a resident;
8. The fees to be charged to the individual for residency in the sober living home;
9. A list of the services available from the sober living home at an additional fee or charge and the associated fees or charges;
10. The policy for refunding fees, charges, or deposits;
11. The policy and procedure for a resident to terminate residency, including terminating residency because services were not provided to the resident according to the residency agreement;
12. The policy and procedure for a sober living home to terminate residency;
13. A statement that a resident has a right to file a complaint about the sober living home, manager, or licensee and a description of the complaint process;

14. A statement that a resident is expected to:
    a. Comply with the terms of the residency agreement and requirements established for residents according to R9-12-201(B)(2)(a)(iii) or R9-12-201(B)(3)(j);
    b. Maintain sobriety; and
    c. Participate in activities to improve life skills, support independent living, and promote recovery:
        i. Such as a treatment program, a self-help group, or another program to support sobriety and recovery; and
        ii. That may include job training, school, or looking for a job;
15. A statement that a sober living home may not require an individual to relinquish the individual's public assistance benefits, such as medical assistance, case assistance, or supplemental nutrition assistance program benefits, as a condition of residency;
16. A statement that a sober living home must notify a family member or other emergency contact of the individual, according to R9-12-201(E)(1), if the individual:
    a. Dies while a resident of the sober living home,
    b. Has an illness or injury that requires immediate intervention by an emergency medical services provider or treatment by a health care provider,
    c. Appears to be incapable of handling financial affairs, or
    d. Is not complying with the residency agreement;
17. The name and contact information for the individual or business organization controlling the sober living home;
18. The signature of the individual and the date signed; and
19. The manager's signature and date signed.

D. A manager shall:
1. Before or at the time of an individual's acceptance by a sober living home, provide to the resident or resident's representative a copy of:
    a. The residency agreement in subsection (C), and
    b. Resident's rights; and
2. Maintain the original of the residency agreement in subsection (C) in the resident's record.

E. A manager may terminate residency of a resident as follows:
1. Without notice, if the resident exhibits behavior that is an immediate threat to the health and safety of the resident or other individuals in a sober living home;
2. With a seven-calendar-day written notice of termination of residency:
    a. For nonpayment of fees, charges, or deposit; or
    b. Under the conditions in subsection (B)(3); or
3. With a 14-calendar-day written notice of termination of residency, for any other reason.

F. A manager shall ensure that a written notice of termination of residency includes:
1. The date of notice;
2. The reason for termination of residency;
3. If termination of residency is because the resident needs more support to maintain sobriety than is within the scope of services for the sober living home, a description of why the sober living home cannot meet the resident's needs;
4. The policy for refunding fees, charges, or deposits; and
5. The deposition of a resident's fees, charges, and deposits.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-203. Resident Rights

A. A manager shall ensure that:
1. A resident is not subjected to:
    a. Abuse,
    b. Exploitation,
    c. Coercion,
    d. Manipulation,
    e. Sexual abuse,
    f. Sexual assault, or
    g. Retaliation for submitting a complaint to the Department or another entity; and
2. A resident or the resident's representative is informed of and given the opportunity to ask questions about:
    a. The residency agreement,
    b. The costs associated with residency,
    c. The resident's rights and responsibilities,
    d. The prohibition of the possession of alcohol or illicit drugs at the sober living home,
    e. Drug and alcohol testing and other assessments of sobriety,
    f. The consequences of loss of sobriety, and
    g. The complaint process.

B. A resident has the following rights:
1. Not to be discriminated against based on race, national origin, religion, gender, sexual orientation, age, disability, marital status, or diagnosis;
2. To receive services that support the resident's sobriety, including, if applicable, continuing to receive medication-assisted treatment while a resident;
3. To have a secure place to store personal belongings, medications, or other personal items to deter misappropriation by another individual;
4. To be able to gain access to the sober living home at any time while a resident;
5. To have access to all areas of the sober living home's premises, except for:
    a. The bedrooms and secure storage locations of other residents,
    b. The bedroom and secure storage locations of the manager or other staff, and
    c. Areas of the sober living home used as the manager's office or for storage of records or supplies for assessment of sobriety;
6. To have access to meals prepared in the sober living home;
7. To review, upon written request, the resident's own record; and
8. To receive assistance in locating another place to live if the resident's record indicates that the resident:
    a. No longer needs the services of a sober living home, or
    b. Needs more services and support to maintain sobriety than the sober living home is authorized to provide.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-204. Resident Records

A. A manager shall ensure that a resident record is established and maintained for each resident that includes:
1. The original of the residency agreement in R9-12-202(C);
2. The date the resident received orientation to the sober living home, as required by R9-12-205(A);
3. A copy of each drug and alcohol test performed on the resident by an independent testing facility, including the date of the test and the test result;

4. Any other assessments of sobriety performed on the resident, including:
   a. The date of the assessment,
   b. A description of the assessment,
   c. The result of the assessment, and
   d. The name of the individual conducting the assessment;
5. Documentation of the resident's attendance at and participation in treatment, self-help groups, and other supports that promote recovery, including:
   a. The name or a description of the support towards recovery, and
   b. The date of the resident's attendance;
6. A current list of medications taken by the resident and the resident's medical conditions;
7. An account of monies received from the resident and any expenditures made specific to the resident;
8. Documentation of any complaints made by or about the resident and the outcome of each complaint;
9. Documentation of any notification made according to R9-12-201(E) about the resident; and
10. If applicable, documentation related to termination of residency, including:
    a. Whether termination of residency was initiated by the resident or the sober living home,
    b. The reason for termination of residency,
    c. Any assistance the resident received in locating another place to live, and
    d. The date the residency ended.

B. A licensee shall ensure that a resident's record is:
1. Protected from loss, damage, or unauthorized use;
2. Available for review by the resident or the resident's representative, within 24 hours after a request; and
3. Maintained for at least 12 months after the termination of residency.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-205. Sober Living Home Services

A. Within 24 hours after an individual becomes a resident of a sober living home, a licensee shall ensure that the resident receives orientation to the sober living home and premises, according to policies and procedures, that includes:
1. The location of all exits from the sober living home and the route to evacuate the sober living home in case of an emergency;
2. The location of the first-aid kit required in R9-12-206(1);
3. The use of the kitchen of the sober living home, including:
   a. Operation of the appliances,
   b. Use of food storage areas, and
   c. Removal of garbage and refuse;
4. The use of the washing machine and dryer;
5. The dates, time, and location of house meetings;
6. The prohibition of the possession of alcohol or illicit drugs at the sober living home;
7. Review and discussion of specific resident requirements, as applicable, such as curfews, smoking, visitors, signing in or out of the sober living home, meal preparation schedule, chore schedule, or other house rules;
8. Review and discussion of requirements related to R9-12-201(B)(2)(a)(iii); and
9. The information required according to R9-12-201(B)(3)(n).

B. A manager shall:
1. Conduct drug and alcohol testing according to policies and procedures;
2. Assist a resident to identify and participate in programs to support sobriety and recovery;
3. Provide to a resident information about community resources, such as nearby bus routes, grocery stores, department stores, other places to obtain food or other personal items, schools, libraries or other locations providing access to computers, or other locations providing items or services a resident may need.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-206. Emergency and Safety Standards

A manager shall ensure that:
1. A first aid kit is available at a sober living home sufficient to meet the needs of residents;
2. Naloxone is available and accessible to the manager, staff, and residents of the sober living home;
3. A smoke detector and, if there is a gas line in the sober living home, a carbon monoxide detector are installed in:
   a. A bedroom used by a resident,
   b. A hallway in a sober living home, and
   c. A sober living home's kitchen;
4. The smoke detector and, if applicable, carbon monoxide detector in subsection (3) are:
   a. Either battery operated or, if hard-wired into the electrical system of the sober living home, have a back-up battery; and
   b. In working order;
5. A fire extinguisher that is labeled as rated at least 1A-10-BC by the Underwriters Laboratories:
   a. Is maintained in the sober living home's kitchen;
   b. If a disposable fire extinguisher, is replaced when its indicator reaches the red zone; and
   c. If a rechargeable fire extinguisher:
      i. Is serviced at least once every 12 months, and
      ii. Has a tag attached to the fire extinguisher that specifies the date of the last servicing and the identification of the person who serviced the fire extinguisher;
6. An evacuation path is conspicuously posted on each hallway of each floor of the sober living home;
7. A written evacuation plan is maintained and available for use by the manager, any other staff of the sober living home, and any resident in a sober living home;
8. An evacuation drill is conducted at least once every six months; and
9. A record of an evacuation drill required in subsection (8) is maintained for at least 12 months after the date of the evacuation drill.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

R9-12-207. Environmental and Physical Plant Requirements

A. A licensee shall ensure that a sober living home:
1. Is free of any plumbing, electrical, ventilation, mechanical, chemical, or structural hazard that may result in physical injury or illness to an individual or jeopardize the health or safety of a resident;
2. Has a kitchen for use by the manager and residents of the sober living home;
3. Has a living room accessible at all times to a resident;

4. Has a dining area furnished for group meals that is accessible to the manager, residents, and any other individuals present in the sober living home;
5. For each five residents of the sober living home, has at least one bathroom equipped with:
   a. A working toilet that flushes and has a seat;
   b. A sink with running water accessible for use by a resident; and
   c. A working bathtub or shower with a slip-resistant surface;
6. Has heating and cooling systems that maintain the sober living home at a temperature between 70° F and 84° F at all times, unless individually controlled by a resident;
7. Has a supply of hot and cold water that is sufficient to meet the personal hygiene needs of residents and the cleaning requirements in this Article;
8. Has a working washing machine and dryer that is accessible to a resident; and
9. Has a working telephone that is accessible to a resident.

B. If the sober living home has a swimming pool, a licensee shall ensure that:
1. The swimming pool is equipped with the following:
   a. An operational water circulation system that clarifies and disinfects the swimming pool water continuously and that includes at least:
      i. A removable strainer,
      ii. Two swimming pool inlets located on opposite sides of the swimming pool, and
      iii. A drain located at the swimming pool's lowest point and covered by a grating that cannot be removed without using tools; and
   b. An operational cleaning system;
2. The swimming pool is enclosed by a wall or fence that:
   a. Is at least five feet in height as measured on the exterior of the wall or fence;
   b. Has no vertical openings greater that four inches across;
   c. Has no horizontal openings, except as described in subsection (B)(2)(e);
   d. Is not chain-link;
   e. Does not have a space between the ground and the bottom fence rail that exceeds four inches in height; and
   f. Has a self-closing, self-latching gate that:
      i. Opens away from the swimming pool,
      ii. Has a latch located at least 54 inches from the ground, and
      iii. Is locked when the swimming pool is not in use; and
3. A life preserver or shepherd's crook is available and accessible in the swimming pool area.

C. A licensee shall ensure that:
1. A bedroom for use by a resident:
   a. Is separated from a hall, corridors, or other habitable room by floor-to-ceiling walls containing no interior openings except doors and is not used as a passageway to another bedroom or habitable room;
   b. Provides sufficient space for an individual in the bedroom to have unobstructed access to the bedroom door;
   c. Has at least one openable window or door to the outside for use as an emergency exit;
   d. Contains for each resident using the bedroom:
      i. A separate, adult-sized, single bed or larger bed with a clean mattress in good repair; and
      ii. Clean bedding appropriate for the season; and
   e. If used for:
      i. Single occupancy, contains at least 60 square feet of floor space; or
      ii. Two or more residents, has an area of at least 50 square feet per resident;
2. A mirror is available to a resident for grooming; and
3. Each resident has individual storage space available for personal possessions and clothing.

D. A manager shall ensure that:
1. A sober living home:
   a. Is maintained free of a condition or situation that may cause a resident or another individual to suffer physical injury;
   b. Has equipment and supplies to maintain a resident's personal hygiene that are accessible to the resident;
   c. Is clean and free from accumulations of dirt, garbage, and rubbish; and
   d. Implements a pest control program to minimize the presence of insects and vermin at the sober living home;
2. An appliance, light, or other device with a frayed or spliced electrical cord is not used at the sober living home;
3. An electrical cord, including an extension cord, is not run under a rug or carpeting, over a nail, or from one room to another at the sober living home;
4. A resident does not share a bedroom with an individual who is not a resident;
5. A resident's bedroom is not used to store anything other than the furniture and articles used by the resident and the resident's belongings;
6. A resident has a lockable or other secure storage location for medications, valuables, or other personal belongings to deter misappropriation by other individuals that is accessible only by the resident and the manager;
7. If pets or animals are allowed in the sober living home, pets or animals are:
   a. Controlled to prevent endangering the residents and to maintain sanitation;
   b. Licensed consistent with local ordinances; and
   c. For a dog or cat, vaccinated against rabies;
8. If a water source that is not regulated under 18 A.A.C. 4 by the Arizona Department of Environmental Quality is used:
   a. The water source is tested at least once every 12 months for total coliform bacteria and fecal coliform or E. coli bacteria;
   b. If necessary, corrective action is taken to ensure the water is safe to drink; and
   c. Documentation of testing is retained for at least 12 months after the date of the test; and
9. If a non-municipal sewage system is used, the sewage system is in working order and is maintained according to applicable state laws and rules.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1419, effective July 1, 2019 (Supp. 19-2).

36-132. Department of health services; functions; contracts

A. The department, in addition to other powers and duties vested in it by law, shall:

1. Protect the health of the people of the state.

2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.

3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.

4. Operate sanitariums, hospitals or other facilities assigned to the department by law or by the governor.

5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information to promote good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of educating children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.

6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.

7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.

8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.

9. Encourage and aid in coordinating local programs concerning nutrition of the people of this state.

10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.

11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.

12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.

13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local health agencies involved with water quality shall provide to the department any assistance requested by the director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter 8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in enforcing the federal food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Recruit and train personnel for state, local and district health departments.

16. Conduct continuing evaluations of state, local and district public health programs, study and appraise state health problems and develop broad plans for use by the department and for recommendation to other agencies, professions and local health departments for the best solution of these problems.

17. License and regulate health care institutions according to chapter 4 of this title.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:

(a) Screening in early pregnancy for detecting high-risk conditions.

(b) Comprehensive prenatal health care.

(c) Maternity, delivery and postpartum care.

(d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when medically indicated.

(e) Perinatal education oriented toward professionals and consumers, focusing on early detection and adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes and behavioral-supported group homes for persons with developmental disabilities. The department shall issue a license to an accredited facility for a period of the accreditation, except that a licensing period shall not be longer than three years. The department is authorized to conduct an inspection of an accredited facility to ensure that the facility meets health and safety licensure standards. The results of the accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the department of health services. For the purposes of this paragraph, "accredited" means accredited by a nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government, and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this title, and enter into contracts with the federal government, or an agency of the federal government, and with private donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies made available under this section are special project grants.

The department may also expend these monies to further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as payors of last resort, prescription medications necessary to supplement treatment and transportation to and from treatment facilities. The contracts may provide for department payment of administrative costs it specifically authorizes.

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum,

hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for

consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply

for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the

designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-2062. Licensure; standards; civil penalties; inspections; use of title

A. The director shall adopt rules to establish minimum standards and requirements for the licensure of sober living homes in this state necessary to ensure the public health, safety and welfare. The director may use the current standards adopted by any

recognized national organization approved by the department as guidelines in prescribing the minimum standards and requirements under this subsection. The standards shall include:

1. A requirement that each sober living home to develop policies and procedures to allow individuals who are on medication-assisted treatment to continue to receive this treatment while living in the sober living home.

2. Consistent and fair practices for drug and alcohol testing, including frequency, that promote the residents' recovery.

3. Policies and procedures for the residence to maintain an environment that promotes the safety of the surrounding neighborhood and the community at large.

4. Policies and procedures for discharge planning of persons living in the residence that do not negatively impact the surrounding community.

5. A good neighbor policy to address neighborhood concerns and complaints.

6. A requirement that the operator of each sober living home have available for emergency personnel an up-to-date list of current medications and medical conditions of each person living in the home.

7. A policy that ensures residents are informed of all sober living home rules, residency requirements and resident agreements.

8. Policies and procedures for the management of all monies received and spent by the sober living home in accordance with standard accounting practices, including monies received from residents of the sober living home.

9. A requirement that each sober living home post a statement of resident rights that includes the right to file a complaint about the residence or provider and information about how to file a complaint.

10. Policies that promote recovery by requiring residents to participate in treatment, self-help groups or other recovery supports.

11. Policies requiring abstinence from alcohol and illicit drugs.

12. Procedures regarding the appropriate use and security of medication by a resident.

13. Policies regarding the maintenance of sober living homes, including the installation of functioning smoke detectors, carbon monoxide detectors and fire

extinguishers and compliance with local fire codes applicable to comparable dwellings occupied by single families.

14. Policies and procedures that prohibit a sober living home owner, employee or administrator from requiring a resident to sign any document for the purpose of relinquishing the resident's public assistance benefits, including medical assistance benefits, cash assistance and supplemental nutrition assistance program benefits.

15. Policies and procedures for managing complaints about sober living homes.

16. Requirements for the notification of a family member or other emergency contact designated by a resident under certain circumstances, including death due to an overdose.

B. The licensure of a sober living home under this article is for one year. A person operating a sober living home in this state that has failed to attain or maintain licensure of the sober living home shall pay a civil penalty of up to one thousand dollars for each violation.

C. To receive and maintain licensure, a sober living home must comply with all federal, state and local laws, including the Americans with disabilities act of 1990.

D. A treatment facility that is licensed by the department for the treatment of substance use disorders and that has one or more sober living homes on the same campus as the facility's program shall obtain licensure for each sober living home pursuant to this article.

E. Once the director adopts the minimum standards as required in subsection A of this section, a person may not establish, conduct or maintain in this state a sober living home unless that person holds a current and valid license issued by the department or is certified as prescribed in section 36-2064. The license is valid only for the establishment, operation and maintenance of the sober living home. The licensee may not:

1. Imply by advertising, directory listing or otherwise that the licensee is authorized to perform services more specialized or of a higher degree of care than is authorized by this article and the underlying rules for sober living homes.

2. Transfer or assign the license. A license is valid only for the premises occupied by the sober living home at the time of its issuance.

36-2063. Fees; licensure; inspections; complaints; investigation; civil penalty; sanctions

A. The department shall establish fees for initial licensure and license renewal and a fee for the late payment of licensing fees that includes a grace period. The department shall deposit, pursuant to sections 35-146 and 35-147, ninety percent of the fees collected pursuant to this section in the health services licensing fund established by section 36-414 and ten percent of the fees collected pursuant to this section in the state general fund.

B. On a determination by the director that there is reasonable cause to believe a sober living home is not adhering to the licensing requirements of this article, the director and any duly designated employee or agent of the director may enter on and into the premises of any sober living home that is licensed or required to be licensed pursuant to this article at any reasonable time for the purpose of determining the state of compliance with this article, the rules adopted pursuant to this article and local fire ordinances or rules. Any application for licensure under this article constitutes permission for and complete acquiescence in any entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. If an inspection reveals that the sober living home is not adhering to the licensing requirements established pursuant to this article, the director may take action authorized by this article. Any sober living home whose license has been suspended or revoked in accordance with this article is subject to inspection on application for relicensure or reinstatement of license.

C. The director may impose a civil penalty on a person that violates this article or the rules adopted pursuant to this article in an amount of not more than five hundred dollars for each violation. Each day that a violation occurs constitutes a separate violation. The director may issue a notice that includes the proposed amount of the civil penalty assessment. If a person requests a hearing to appeal an assessment, the director may not take further action to enforce and collect the assessment until the hearing process is complete. The director shall impose a civil penalty only for those days for which the violation has been documented by the department.

D. The department may impose sanctions and commence disciplinary actions against a licensed sober living home, including revoking the license. A license may not be suspended or revoked under this article without affording the licensee notice and an opportunity for a hearing as provided in title 41, chapter 6, article 10.

E. The department may contract with a third party to assist the department with licensure and inspections.

36-2064. Certified sober living homes

A. Notwithstanding any other provision of this article, a sober living home in this state that is certified by a certifying organization may operate in this state and receive referrals pursuant to section 36-2065. A sober living home certification is in lieu of licensure until the sober living home is licensed. A certified sober living home shall apply to the department for licensure within ninety days after the department's initial licensure rules are final. The department shall notify the certifying organization when the department's initial licensure rules are final.

B. In lieu of an initial on-site licensure survey and any annual on-site survey, the department shall issue a license to a sober living home that submits an application prescribed by the department and that meets the following requirements:

1. Is currently certified as a sober living home by a certifying organization.

2. Meets all department licensure requirements.

September 30, 2024

RE: October 1, 2024 Public Meeting of Governor's Regulatory Review Council (the "Council") - Consent Agenda Item No. 6, Department of Health Services, Title 9, Chapter 12, Articles 1 & 2, Sober Living Home Rules Five-Year Review Report (the "SLH Report") - Request to Remove from Consent Agenda and Request for Continuance

Dear Director Alvarado-Thorson, Chair Klein, and Members of GRRC:

On behalf of the Alliance of Recovery Residences, an Arizona non-profit corporation, we respectfully request that the Council remove the above-referenced Sober Living Home Rules Five-Year Review Report (the "**SLH Report**") from the October 1, 2024 consent agenda, take public comment at the October 1st hearing, and vote to return the SLH Report to the Arizona Department of Health Services ("**ADHS**") for non-compliance with A.R.S. § 41-1056(A). The SLH Report also demonstrates an attempt by ADHS to circumvent the legislative process by adopting new rules which were recently rejected by the Arizona Legislature during the 2024 session. Finally, the Alliance of Recovery Residences and sober living home stakeholders were not aware of this SLH Report until days before the October 1, 2024 Council hearing. Upon information and belief, no public notice regarding the SLH Report was provided on the ADHS website in advance of the hearing.

I. <u>The Council's Authority to Return the SLH Report to ADHS</u>.

Section R1-6-305 of A.A.C. authorizes the Council to vote to return, in whole or in part, a five-year review report after identifying the manner in which the report does not meet the standards of A.R.S. § 41-1056(A). If a report is returned, the Council must then schedule a deadline by which the agency shall submit a revised report, together with a letter responding to the Council's explanation for return of the five-year report and an explanation as to how the changes ensure that the report meets the standards in A.R.S. § 41-1056(A).

II. <u>SLH Report Should be Returned to ADHS for Non-Compliance with Five-Year Review Report Requirements in A.R.S. § 41-1056(A).</u>

The SLH Report fails to comply with the requirement in A.R.S. § 41-1056(A) as follows:

A. **A.R.S. § 41-1056.A.2 - The SLH Report fails to include written criticisms of the rule received during the previous five years.**

The SLH Report inaccurately states that ADHS has received no written criticisms of the rules in the last five years. For instance, in 2020, the Arizona Recovery Housing Association filed a HUD complaint against ADHS, challenging the good neighbor policies and procedures in A.A.C. § R9-12-201.B.2 and the licensing fee amounts set forth in A.A.C. § R9-12-103.A.6. The HUD complaint has resulted in an on-going Department of Justice investigation. *See* **Exhibit "A"** attached hereto.

We respectfully request that the SLH Report be returned to ADHS with direction to disclose all written criticisms of the rules received during the previous five years, including all written criticisms received in lawsuits and correspondence with ADHS staff.

B. **A.R.S. § 41-1056.A.3 – The SLH Report fails to include an analysis of existing statutes that authorize ADHS's proposal of new rules.**

The SLH Report fails to include an analysis of existing statutes that authorize ADHS's proposal of the new rules. For example, in A.A.C. R9-12-201, ADHS is proposing a new rule requiring the licensee to obtain documentation verifying that the sober living home manager has maintained sobriety for a year. ADHS has no statutory authority to impose this documentation requirement, and it is unclear what documentation or testing is available to provide such verification. Furthermore, requiring a year of sobriety as a condition of employment is discriminatory and violates Federal labor laws. The one-year sobriety requirement for sober living home managers in R9-12-201 should be repealed as unlawful.

We respectfully request that the SLH Report be returned to ADHS with direction to disclose statutes that authorize each of the proposed rules, and to analyze whether the existing or proposed rules violate the Fair Housing Act or Federal labor laws.

C. **A.R.S. § 41-1056.A.12 – The SLH Report fails to identify corresponding federal laws and whether ADHS has statutory authority to exceed the requirements of that federal law.**

The SLH Report inaccurately states that "ADHS indicates there are no corresponding federal laws" with regard to the sober living home rules. The disabled residents living in sober living homes are protected by the Fair Housing Act. We respectfully request that the SLH Report be returned to ADHS with direction to disclose the Fair Housing Act as a corresponding federal law and to analyze whether the existing rules or proposed rules exceed requirements of the Fair Housing Act.

III. <u>SLH Report Attempts to Circumvent the Legislative Process by Recommending New Rules that were Rejected by the Arizona Legislature during the 2024 Session</u>.

The SLH Report attempts to circumvent the legislative process by recommending new rules that were recently rejected by the Arizona Legislature during the 2024 Session. For instance, in A.A.C. R9-12-103(A)(1)(j), the existing rule requires that the applicant provide an attestation as part of its license application that the sober living home is in compliance with local zoning ordinances, building codes, and fire codes. ADHS is now proposing that a new rule be adopted requiring the applicant to <u>provide verification</u> (i.e. documentation) that the home is in compliance with local zoning ordinances and codes. This new verification requirement was recently proposed during the 2024 legislative session in House Bill 2317 and Senate Bill 1361, both of which failed to pass.

We respectfully request that the SLH Report be returned to ADHS with direction to disclose which of the proposed rules are similar to proposed statutory language from the failed HB 2317 and SB 1361, together with an analysis of the existing statutory authority that would allow ADHS to enact such rules.

Very truly yours,

/s/ Heather N. Dukes

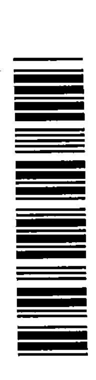
ARIZONA RECOVERY HOUSING ASSOCIATION (AZRHA)
5101 N 17TH AVE
PHOENIX AZ 85015-3316



U.S. Department of Housing and Urban Development
Office of Fair Housing and Equal Opportunity – Region IX
One Sansome Street, Suite 1200
San Francisco, CA 94104-4430
Voice: (800) 347-3739 TTY: (415) 489-6564
TTY: (415) 489-6564

March 20, 2020

Arizona Recovery Housing Association (AzRHA)
5101 N. 17th Ave.
Phoenix, AZ 85015

Dear Complainant:

Subject: Housing Discrimination Complaint
AzRHA v. State of Arizona
HUD File No.: 09-20-0081-8
Section 504 Case No.: 09-20-0081-4
ADA Case No.: 09-20-0081-D

Your complaint, alleging one or more discriminatory housing practices, was officially filed on March 19, 2020 as a complaint under the Federal Fair Housing Law, 42 U.S.C. Sections 3601-3619. For your records, we are enclosing a copy of your complaint, and, as required by law, a copy has been sent to the respondent(s).

The purpose of this letter is to inform you of: 1) the rights you have during the processing of this complaint, 2) the rights each respondent has in responding to this complaint, and 3) the steps the U.S. Department of Housing and Urban Development (the Department) will take to determine whether the complaint has merit.

Since a respondent organization is a recipient of federal financial assistance, the complaint has also been accepted and will be investigated by the Department under Section 504 of the Rehabilitation Act of 1973 as amended.

Section 504 states:

No otherwise qualified individual with handicaps in the United States… shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.

Since a respondent is also a "public entity" as defined by Section 201 of the Americans with Disabilities Act (ADA), the complaint has also been accepted and will be investigated by the Department under Title II of the ADA as amended.

Title II states:

Subject to the provisions of this title, no qualified individual with disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subject to discrimination by any such entity.

In order to ensure that the Department informs you properly of the law's requirements, this notification letter contains language required by the law. A similar letter is used to notify all parties whenever a formal complaint has been filed with the Department under the Federal Fair Housing Law.

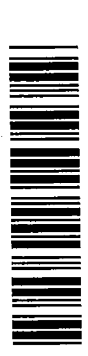
We are governed by federal law, which sets out what steps we must take when a formal complaint is filed. The law also includes steps that each respondent can take to answer or refute the allegations of this complaint.

Under federal law, a respondent can file an answer to this complaint or any amendment made to this complaint within 10 calendar days of receipt of the Department's notification letter to him or her. Each respondent's answer must be signed and affirmed that the response is truthful by including the statement "I declare under penalty of perjury that the foregoing is true and correct." A respondent can, with the agreement of the Department, amend his or her answer at any time during the investigation.

Our responsibility under the law is to undertake an impartial investigation and, at the same time, encourage all sides to reach an agreement, where appropriate, through conciliation. The law requires us to complete our investigation within 100 days of the date of the official filing of the complaint. If we are unable to meet the 100-day requirement for issuing a determination, the law requires that we notify you and the respondent(s) and explain the reasons why the investigation of the complaint is not completed. All evidence gathered during the investigation will become part of the investigative record.

In handling this complaint, we will conduct an impartial investigation of all claims that the Fair Housing Act has been violated. If the investigation indicates that there is no evidence establishing jurisdiction, the case will be dismissed. At any point, you can request that our staff assist you in conciliating (or settling) this complaint with the respondent(s). If the case is not resolved, we will complete our investigation and decide whether the evidence indicates that there has been a fair housing violation. If the parties involved have not reached an agreement to settle the complaint, the Department will issue a determination as to whether there is reasonable cause to believe a discriminatory housing practice has occurred.

If our investigation indicates that there is reasonable cause to believe that an unlawful discriminatory housing practice has occurred, the Department may issue a charge. If the investigation indicates there is no reasonable cause to believe that discrimination has occurred, the complaint will be dismissed. In either event, you will be notified in writing.



If the determination is one of reasonable cause, the notification will advise you and the respondent(s) of your rights to choose, within 20 days, whether you wish to have the case heard

by an Administrative Law Judge, or to have the matter referred for trial in the appropriate U.S. District Court.

Under federal law, even if the Department dismisses the complaint, you still have the right to bring an individual suit under the Federal Fair Housing Law. You may file your lawsuit in an appropriate federal, state or local court within two years of the date of the alleged discriminatory practice or of the date when a conciliation agreement has been violated. The law does not count, as part of the two-year period, any of the time when a proceeding is pending with the Department. You also have the legal right to file a lawsuit in court, even if your complaint formed the basis for a charge, as long as an Administrative Law Judge has not started a hearing on the record with respect to the charge.

There may be other applicable federal, state or local statutes under which you and/or the respondent(s) may initiate court action. You may consult a private attorney in this regard.

The law also requires us to notify you that section 818 of the Fair Housing Act makes it unlawful for a respondent or anyone else to coerce, intimidate, threaten, or interfere with you in your exercise or enjoyment of, any right granted or protected under the Federal Fair Housing Law. The law also makes it illegal for anyone to coerce, threaten or interfere with you for your having aided or encouraged any other person in the exercise or enjoyment of, any right or protection granted to them under the Federal Fair Housing Law.

If you have any questions regarding this case, please contact Gregory Crespo, Los Angeles Enforcement Branch Chief at (213) 534-2554. Please refer to the case number at the top of this letter in those contacts, and keep this office advised of any change of your address or telephone number. We hope this information has been helpful to you.

Sincerely,

Anné Quesada
Regional Director
Office of Fair Housing and
Equal Opportunity

Enclosures

INVITATION TO CONCILIATION

Conciliation is a voluntary, non-binding and confidential process to help Complainant and Respondent achieve a resolution of the fair housing complaint accompanying this invitation. The Office of Fair Housing and Equal Opportunity (FHEO) is committed to working impartially with you to reach a settlement that may benefit everyone. A conciliated settlement is not an admission by a Respondent that the law has been violated, nor is it an admission by a Complainant that the complaint does not have merit. Conciliation is a way to resolve a dispute without the completion of a formal investigation.

The Conciliator is Impartial. The Conciliator is not a judge, or advocate, or there to advise anyone or decide anything. The Conciliator only helps persons create a resolution to the dispute.

A Settlement Agreement will be your agreement. It must meet your needs, the needs of other parties, as well as be in the public interest.

Conciliation requires Good Faith. This means keeping an open mind, being willing to listen, being flexible, and making a sincere effort to resolve the dispute. Good faith is needed from both Complainant and Respondent.

We encourage and invite your participation and commend your willingness to work with us to reach a conciliated settlement to this fair housing complaint.

CONCILIATION UNDER THE FAIR HOUSING ACT

HUD is *required*, from the time a Fair Housing Act complaint is filed, to give the parties a chance to reach a satisfactory settlement through conciliation.

Parties' Rights:

- Confidentiality. Nothing said or done during the course of conciliation can be used in a subsequent hearing or trial regarding the alleged violation.
- Legal Counsel. Attorneys may represent Parties.
- Voluntary Nature of Conciliation. Participation in conciliation is entirely voluntary. There is no penalty for declining to settle through conciliation.

Role of the HUD conciliator:

- is a neutral participant seeking to facilitate a mutually agreeable settlement;

- will inform the parties of their rights during conciliation;
- will inform the parties about the process, and help to structure negotiation arrangements in which the parties can have confidence;
- may provide interpretations of the Act to permit the parties to bargain from informed positions;
- may describe the evidence gathered up to that time, but only to permit the parties to bargain from informed positions;
- conveys offers between the parties;
- prepares the Conciliation Agreement;
- may describe the penalties for violations, but will not comment on the likelihood that they will be imposed; and
- will not discuss the probable outcome of the case.

Effect of Agreement. A formal conciliation agreement, which the Act requires to be in writing and approved by HUD, will terminate the complaint. It ends the Respondent's potential liability and the Complainant's right to pursue allegations that could be filed with HUD.

Nature of Agreement. The essential terms of the agreement will be those negotiated by the parties. The parties may agree to refer compensation matters to an arbitrator. The agreement will also include standard provisions in the public interest (for example, concerning monitoring and reporting).

HUD's Role. By approving the agreement, HUD acknowledges that its terms serve the public interest.

Role of the Department of Justice. The Justice Department will enforce the Conciliation Agreement in the event of a breach.

ORGANIZATIONAL DAMAGES WORKSHEET

NAME: ____________________

HUD INQUIRY NUMBER: __________

USE ADDITIONAL SHEETS IF NECESSARY.

Please provide information below so that we can better assess your damages and your standing to file. Your information will need to establish that you diverted resources in response to the discovery of discrimination, or that the respondent's conduct frustrated your mission in some manner. You do not have to return this worksheet with your signed complaint if the delay would be substantial. We will want this information at your earliest possible convenience.

A diversion cannot include litigation expenses or the filing of any sort of complaint with a court or government administrative agency.

Documentation of injury incurred resulting from frustration of mission includes expenses such as (for a fair housing education and training program) providing additional training to housing providers to counteract a known practice of the respondent's that is illegal under fair housing laws, (for a housing referral program) finding different referrals for housing when referral to the respondent was discovered to be futile, and (for a fair housing enforcement program) how your organization was impaired in its role of facilitating open housing.

In summary, you must be able to show how your organization did something different that it would not have otherwise done as part of your normal operating program as a result of the discovery of the allegedly discriminatory conduct.

If you have not already done so, please provide copies of all documents related to this claim, including any documents related to tests, investigation, or research. Testing documentation would include the testing reports, debriefing notes, tester instructions, and logs. These documents should also include any failed tests, negative tests, phone contacts, or any other contacts with the respondents or any other party related to the claim.

In order to calculate damages as well as assess the intangible nature of your efforts concerning this matter, please provide the following information.

1. What is the total dollar amount of your annual budget?

2. Please list the programs funded under your budget, giving dollar amounts expended in each program. Please state what dollar amounts were diverted from any of these programs to address the discrimination, which is addressed in the subject complaint.

3. What is your organization's mission? Where is any mission statement located (e.g., in articles of incorporation, or by-laws)? Please provide a copy of any mission statement, a citation of its source, and the date it was established.

4. Please list your instances of diversion of resources, stating for each item the names of personnel involved, the time spent, the dates this time was spent, the nature of the transaction, how this was related to addressing the discrimination in question if not already apparent, and the value in dollars of this diversion. Please be sure to address any of the following issues.

   a. Has the organization investigated the subject claim in any way? If so, please itemize dates, names of testers or investigators, their compensation, the time spent, and the nature of activities undertaken in the subject claim. Send all reports, notes, instructions, logs, or any other document related to this claim.

   b. Please state the salary, stipend, or other compensation for the test coordinator, other staff, and testers employed in the subject claim. In the case of salaries, please itemize the date, activities, and time spent by the employee on the subject claim.

   c. Please state whether you rent office space, and the monthly rental amount. Please also state how any of these items were involved in the subject claim.

   d. Please state what other facilities owned or rented by the organization were used in subject claim (e.g., vehicles, computers, office supplies, phones, etc.).

5. Please state whether the use of organizational resources was in response to a complaint filed in your office by an aggrieved person who is not a member of your staff. If so, please provide name, contact information, nature of allegations, and dates of transactions for this complainant. This may be contained in a log maintained for this claim.

6. If this discrimination was discovered through an audit of real estate, please describe how your diversion of resources in this case was outside of your normal operating procedures. What did you do in this case that you were not already planning on doing in your audit program? Please be sure to address the following issues.

   a. To what issue of discrimination presented in your community does this audit respond? How and when did you become aware of this practice? Please identify and give contact information for the persons involved in establishing the need for this audit.

   b. How were the properties selected, and what methodology was employed so that the issue of discrimination presented in your community was addressed?

7. If discrimination was discovered through means other than from an aggrieved person who is not a member of your staff, or through an audit, please describe how this occurred.

8. Has the organization contacted the respondent(s) for any reason (e.g., to attempt resolution, interview, notify that discrimination appears to exist, etc.)? If so, please

itemize dates, names of staff involved, their compensation, the time spent, and the nature of activities undertaken in the subject claim.

9. Itemize any research undertaken to discover the ownership of the property, the identity of the designers or constructors of the property in design and construction cases, or any other research other than through the use of testers or investigators. Please give the dates, the time spent, the personnel involved, the nature of the research, and the results.

10. Please describe, if applicable, how the respondent's actions have frustrated any program you administer. Please provide an itemized list of what efforts you undertook to remedy this frustration. Include any training sessions or advertising campaigns undertaken to advise the community that the actions such as those taken by the respondent are discriminatory. Also describe how any clients (including any clients other than those complaining about the respondent's practices) of yours have been unable to receive benefits in any of your programs due to the frustration of that program by the respondent's actions.

11. If not already addressed above, please list any other items of diversion of resources or frustration of mission related to the subject claim by date, time spent, name of personnel responsible, their position in the organization, the nature of the transaction, and why this may have been necessary to undertake to address the discrimination (if such is not already apparent).

Please be aware that a line of federal cases establishes the issues concerning the standing and nature of damages of organizations filing under the federal Fair Housing Act. This Worksheet is designed to collect information, which may be relevant to the determination of standing and damages in light of these cases. If you would like more information about these cases, they are listed below with citations to official reports and to paragraph numbers in Fair Housing-Fair Lending (Aspen Publishers).

Housing Discrimination Complaint

Case Number: 09-20-0081-8

1. **Complainants:**

Arizona Recovery Housing Association (AzRHA)
5101 N. 17th Ave.
Phoenix, AZ 85015

2. **Complainant Representatives:**

Steve G. Polin
The Law Offices of Steven G. Polin
3034 Tennyson St. N.W.
Washington, DC 20015

3. **Other Aggrieved Parties:**

4. **The following is alleged to have occurred or is about to occur:**

- Otherwise deny or make housing unavailable
- Discriminatory acts under Section 818 (coercion, Etc.)
- Failure to make reasonable accommodation

5. **The alleged violation occurred because of:**

- Handicap

6. **Address and location of the property in question (or if no property is involved, the city and state where the discrimination occurred):**

Properties located in Arizona
Phoenix, et. al., AZ

7. **Respondents:**

State of Arizona
c/o Arizona Attorney General's Office
2005 N. Central Ave.
Phoenix, AZ 85004-2926

8. **The following is a brief and concise statement of the facts regarding the alleged violation:**

The complainant is the Arizona Recovery Housing Association (AzRHA), whose mission includes supporting and advocating for members who run housing programs for disabled persons related to substance abuse that do not provide treatment. The respondent is the State of Arizona.

The respondent has enacted a statute that regulates operators of housing programs for disabled persons related to substance abuse that do not provide treatment by imposing on these operations greater licensing fees and imposing fees and conditions that are disparately greater than the fees and conditions imposed on assisted living facilities or other providers of housing for the disabled that provide treatment, medical and personal care services along with housing.

The licensing purpose is stated to be to protect the welfare of the sober living house residents. However, no complaints have ever been filed for such misconduct, and the sober living houses that only provide a place to live and do not provide medical care, food, personal care, medication assistance, or treatment as assisted living facilities typically provide do not warrant this level of regulation.

The licensing requirements include that there be a house manager, this manager have CPR resuscitation training, the manager resides at only one sober living home, there is a complaint procedure (including those from the neighborhood) that must document the complaints, complaints records must be kept to establish the responses the sober living home operator has made on the complaints, that the house has addressed any problems related to insuring to the requirements for residents and visitors related to parking or noise emanating from the home, cleanliness of the public space near the home, loitering in front of the home or nearby homes, and that these rules have to be known to the residents and enforced. These conduct requirements are based upon stereotypical characteristics of sober living house residents not based on objective data, and are commonly produced as the nature of the objections to the location of sober living homes in neighborhoods opposed to use permits for these facilities.

The respondent imposed a flat licensing fee of $500 per house plus an additional fee of $100 per bed for housing-only facilities for those with substance abuse issues, which are typically 10 beds or less. For a ten-bed recovery housing facility the fee would be

$500 plus ($100 x 10 [beds]) or $1500. Assisted living facilities that provide treatment have a flat licensing fee of $280 plus $70 for each bed. This means for a ten-bed assisted living facility the fees would be $280 + ($70 x 10 [beds]) = ($280 + $700) = $980. This $520 difference in fees is an unreasonable and unnecessary barrier to the operation of housing programs for disabled persons related to substance abuse that do not provide treatment.

AzRHA requested a reasonable accommodation of the waiver of the fees. This request was denied.

On March 9, 2020, an agent of the complainant was approached by Amber Norman, Arizona Department of Health Services staff member and told that they would have to either pay the licensing fee required by the statute by March 18, 2020 or be fined $1000/day and be subject to a cease and desist order.

9. The most recent date on which the alleged discrimination occurred:

March 09, 2020, and is continuing.

10. Types of Federal Funding Identified:

- CDBG

11. The acts alleged in this complaint, if proven, may constitute a violation of the following sections:

804a, 818, and 804f3B of Title VIII of the Civil Rights Act of 1968 as amended by the Fair Housing Act of 1988.

Section 504 of the Rehabilitation Act of 1973
Americans with Disabilities Act of 1990

Please sign and date this form:

I declare under penalty of perjury that I have read this complaint (including any attachments) and that it is ~~true and~~ correct.

DHS 5YRR on 9 A.A.C. 12, Articles 1 & 2

1 message

Angelica Trevino <angelica.trevino@azdhs.gov> Mon, Oct 21, 2024 at 4:08 PM
To: GRRC - ADOA <grrc@azdoa.gov>
Cc: Simon Larscheidt <simon.larscheidt@azdoa.gov>, Stacie Gravito <stacie.gravito@azdhs.gov>

Hello,

RE: Supplemental information for 5YRR on 9 A.A.C. 12, Articles 1 & 2 (in response to comments raised at the 10/1/24 GRRC Meeting)

At the October 1, 2024 GRRC Meeting, the Arizona Department of Health Services (Department or ADHS) was asked to address the following points, mainly in response to the letter the Council received from Dukes Law Firm ("Dukes Letter").

- **<u>Question regarding the Five-Year-Review (5YRR) not including a 2020 complaint made to the U.S. Department of Housing and Urban Development (HUD)</u>**

-

A.R.S. § 41-1056(A)(2) states the following:

2. Written criticisms of the rule received during the previous five years, including any written analyses submitted to the agency questioning whether the rule is based on valid scientific or reliable principles or methods.

It has been the Department's understanding that criticism received and recorded in the 5YRR is in direct relation to the rules and not tied to appeals of enforcement actions, litigation, complaint intakes related to ADHS-licensed facilities, and/or other legal matters. As such, the 2020 HUD complaint referenced in the Dukes Letter is a legal matter pertaining to the entire statutory scheme, not a particular rule. While ADHS does receive complaints and comments during the rulemaking process related to statutory authority, a 5YRR is meant to analyze gaps in the rules themselves, not the statutes underlying them, which is beyond the scope of the agency's authority in a 5YRR.

The HUD complaint mentioned in Dukes Letter is a legal complaint questioning the constitutionality of licensing and regulation of sober living homes pursuant to the statutes passed in 2019. As such, the Department believes that not referencing the 2020 HUD complaint as part of the 5YRR is appropriate. Moreover, and for the Council's awareness, there has not been a resolution to the HUD complaint that requires the Department to make recommendations or changes to the rules (see, for example, A.R.S. § 36-2062(A), which is the current statutory requirement mandating the Department to promulgate rules). Should there be a circumstance that mandates changes to the Department's rules, including any change to existing statutes, the Department will take the appropriate action, as it does with all such matters.

- **<u>Comment indicating that the Five-Year-Review Report does not identify corresponding laws.</u>**

A.R.S. § 41-1056 (A)(10) states the following:

"A determination that the rule is not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law."

The 5YRR is correct because there are no corresponding federal laws applicable to the rules in 9 A.A.C. 12, which are based on state statutes. All entities licensed by the Department should be aware of and comply with any federal laws that apply to the licensee and are beyond requirements imposed by the Department's rules.

- **<u>Comment regarding what documentation will be necessary for the Department to determine that a sober living home manager has maintained sobriety</u>**

The Dukes Letter states that "*the SLH Report fails to include an analysis of existing statutes that authorize ADHS's proposal of new rules*" and references the section of the 5YRR in which the Department analyzes A.A.C. R9-12-201.

A.R.S. § 41-1056(A)(3) states the following:
"Authorization of the rule by existing statutes."

The 5YRR is an analysis of the rules, which among other things, includes if the rule is effective in achieving the objective of the rule; if the rule is consistent with other statutes or rules; and if the rule is clear, concise and understandable. At this time, the Department is not conducting a rulemaking and has not proposed new rules or revisions to rules. If the Department requests and receives approval from the Governor's Office, pursuant to A.R.S. § 41-1039, the Department will work with all stakeholders to make revisions to address those gaps so any rule changes will be mutually agreeable and enforceable.

The provision referenced in the Dukes Letter is part of the Department's 5YRR analysis and identifies a gap in the current rules that pertains to the sober living home manager's sobriety. The rules currently require managers to maintain sobriety for one year. The requirement of sobriety is not new for sober living homes. However, the rules do not currently make clear how a manager would prove that they have been sober for at least one year. The Department has received and investigated complaints where it found certain managers had not been sober, or not maintained sobriety. Those situations created a direct risk to the health and safety of sober living home residents and resulted in enforcement actions by the Department. The Department recognizes the importance of addressing this gap, including not only protecting the health and safety of sober living home residents, but also making sure the requirements are clear for the licensees and their managers. This gap, and how the rules can potentially address it, will be addressed during the rulemaking period, where options and comments received from stakeholders will be fully considered.

- **<u>Comment inquiring why the Department did not conduct outreach to stakeholders for the drafting of this 5YRR</u>**

-

A.R.S. § 41-1056 outlines the process for this 5YRR and it does not require an agency to solicit feedback or comments from the public for purposes of the agency's review of the rules (5YRR).

That being said, the Department strives to be transparent throughout its 5YRR process. The public may view a list of the 5YRR's that the Department will be working on for the year. Though not required, the Department lists on its website the 5YRR in two locations: Under the "Five-Year-Review Reports" tab and under the "Regulatory Agenda" tab. Additionally, the Department website also lists all the reports that have been completed by year.

Members of the public who would like to further engage with the Department (questions, comments, submission of written criticism of rules), may email ACR@azdhs.gov or may sign up for email updates.

- **Comment/inquiry regarding two (2) sober living homes bills that "did not pass" during the 2024 legislative session**

During the last legislative session, the Department was aware of at least two (2) bills related to the regulation of sober living homes (**SB1361** and **HB2317**). Both bills involved several significant statutory changes.

Some notable changes proposed in **SB1361** included the following: if a municipality has a zoning ordinance that restricts the distance of sober living homes, they must be granted reasonable accommodation under the Fair Housing Act; included several provisions regarding patient brokering related to sober living homes and substance use disorder treatment facilities, including that patient brokering would be a class 3, class 4 or class 6 felony; added the definition of close friend; redefined sober living homes to have a broader impact of who would be required to be licensed; required policies and procedures for activities that promote independent living and life skills development; required policies and procedures for activities directed toward recovery from substance use disorders; required documentation from the local jurisdiction verifying compliance with local zoning; required all sober living homes to be inspected in a specific timeframe; increased the civil penalties from $500 to $1,000 for each violation and for each resident/person impacted by the violation; expanded the Department's authority to seek enforcement action if the facility commits a felony and/or refuses to permit the Department to inspect the facility; provided the Department the authority to deny an application if the sober living home sells or changes ownership during an enforcement action, and/or the owner of the sober living home has a serious licensing history; required employees of a sober living home to obtain a fingerprint clearance card; and required the Department to file a report to the Senate Health and Human Services Committee data related to complaints and enforcement actions of licenses and unlicensed sober living homes.

Some of the notable changes proposed in **HB2317** included the following: redefined sober living homes to have a broader impact of who would be required to be licensed; required policies and procedures if a license was suspended or revoked; required documentation from the local jurisdiction verifying compliance with local zoning; expanded the Department's authority to seek enforcement action against an unlicensed sober living home if they are affiliated with a licensed healthcare institution and participating in fraudulent activities; requirement of all sober living homes to be inspected within a specified time frame; required all complaints to be investigated within 30 calendar days; increased civil penalties from $500 to $1,000 for each violation; required the Department to notify local jurisdictions of any applications for licensure of a sober living home; and required the Department to file a report to the Senate Health and Human Services Committee data related to complaints and enforcement actions of licensed and unlicensed sober living homes.

In the 5YRR, there are only two items which have similarities to SB1261 and HB2317 (the Department also correctly *did not* include these bills as written criticism to be addressed by the 5YRR). The Department included an analysis of R9-12-103 and reasoned that it believes the current rule to be ineffective. Currently, the Department requires the applicant to attest they are in compliance with local zoning ordinances, building codes, and fire codes. However, the Department has found that applicants have provided false or misleading attestations, either intentionally or unintentionally, which results in the Department denying the application. A denial of the application utilizes additional resources and cost on both on the applicant and the Department if the applicant appeals the denial. It would significantly benefit the applicant to reach out to the local jurisdiction first and obtain documentation of compliance so the likelihood of their application being denied by the Department for this reason will be reduced or eliminated. The Department also included an analysis of R9-12-107 in that it would benefit from being amended in order to improve its effectiveness. The Department currently does not have the authority to prevent or deny an individual/entity from obtaining a sober living home license even if they have a serious licensing history in Arizona or in another state that involved circumstances that posed a direct risk to the health or safety of residents, including those with a serious negative outcome such as death of an individual.

RE: Follow-Up Documentation and Objections to Department of Health Services ("ADHS"), Title 9, Chapter 12, Articles 1 and 2, Sober Living Home Rules Five-Year Review Report revised October 21, 2024 (the "SLH Report")

Dear Council Members:

On behalf of the Alliance of Recovery Residences, an Arizona non-profit corporation (the "**Alliance**"), we respectfully request that the SLH Report be removed from the consent agenda at the Governor's Regulatory Review Council (the "**Council**") meeting on November 5, 2024. The SLH Report was not updated by ADHS to address the statutory deficiencies raised in the Alliance's correspondence dated September 30, 2024 and continues to be non-compliant with A.R.S. § 41-1056. Furthermore, the SLH Report fails to address the Council's instructions and requests for information at the October 1, 2024 hearing. We respectfully request that the Council vote to return the SLH Report to ADHS with instructions to address the four (4) requests for information raised by Councilmember Lashgari at the October 1, 2024 meeting (as detailed below).

It is unfortunate that ADHS has taken a somewhat adversarial approach to revising the SLH Report or providing a copy of the Report to the Alliance and the Arizona Recovery Housing Association ("AzRHA") before its resubmittal to the Council. The Alliance membership is comprised of several sober living home operators who are recognized stakeholders in these proceedings, and AzRHA is the official certifying agency who works closely with ADHS to inspect and license sober living homes throughout the state. At the October 1st Council hearing, the ADHS representative confirmed that these organizations are some of the Department's "biggest stakeholders" and that they should "be at the table to discuss what would be the most appropriate language for requirements."[1] Despite this acknowledgment, we later received emails from the Arizona Attorney General representing ADHS which stated that the "Department has not agreed to produce to you and the unnamed members of the Alliance of Recovery Residences a copy of the 5 year report before it is re-submitted to GRRC" and that "ADHS has no obligation to submit this Report to any entity other than GRRC."[2]

---

[1] *See* Video of October 1, 2024 GRRC Meeting at 21:26.
[2] *See* Emails dated October 4 and 11, 2024 attached hereto as **Exhibit "1"**.

Neither the revised SLH Report nor the October 21, 2024 email from Angie Trevino of ADHS was sent to the Alliance or AzRHA in advance of the November 5th Council meeting (despite our requests for the information in advance). Once the 5-Year Report was posted for the Council's study session last week, the Alliance realized that no changes were made by ADHS to address the concerns raised.

To be clear, we offer our feedback due our unique role and desire for a collaborative relationship with ADHS for the betterment of our industry and the health, safety and welfare of the sober living home residents that we serve. We are justifiably concerned that the SLH Report:

(i) suggests a zoning and building code verification requirement taken from failed legislation during the 2024 legislative session, when the current zoning and building code attestation to be completed by the applicant on the ADHS license application was created to help prevent discrimination by local jurisdictions (we have been involved in several cases in local Arizona jurisdictions where cities and towns have unlawfully imposed cost-prohibitive fire sprinkler requirements on this ambulatory disabled class, prohibited sober individuals from living as a family in apartments or condominiums in multi-family residential districts, limited the number of disabled residents in a home to less than the number of non-disabled individuals who could live as a family in a home, etc).

(ii) suggests documentation verifying a house manager's sobriety for a minimum of one year when a sober living home operator cannot lawfully inquire into the length of an applicant's sobriety during the application process, and the applicant would have no way of documenting such sobriety due to current drug and alcohol testing limitations (To our knowledge, the only way that a house manager could present verifiable sobriety for one year would be in very rare circumstances where they are: (a) a probationer being tested two times a week for a year or (b) coming from a year-long treatment program where testing was performed on a frequent, weekly basis); and

(iii) fails to identify or address the current HUD complaint against ADHS challenging the good neighbor policies and procedures in A.A.C. Section 9-12-201.B.2 and the licensing fee amounts set forth in A.A.C. Section R9-12-103.A.6.

I. Council's Authority to Return the SLH Report to ADHS Again.

As set forth in our September 30th letter, Section R1-6-305 of the A.A.C. authorizes the Council to vote to return a five-year review report after identifying the manner in which the report does not meet the standards of A.R.S. § 41-1056(A). If a report is returned, the state agency is required to submit a revised report with a letter responding to the Council's explanation for return of the five-year report and an explanation as to how the changes ensure that the report meets the standards of 41-1056(A).

ADHS did not revise the SLH Report to address the questions and instructions issued by the Council at the October 1, 2024 meeting, as evidenced below:

- Councilmember Bentley: "*I was just looking at the letter that was sent to us from . . . the Association, and I also have a little bit of a concern. I know one of the things that they mentioned . . . is that the*

Department is seeking to create a rule saying that sober living house managers need to administratively verify that they maintain sobriety for a year and that gave me a little pause for concern because they are saying there is no rule requirement that allows them that authority and that it might violate some federal labor laws so I don't know if the Department is prepared and can speak to that."

- Note: ADHS did not provide an analysis of whether the one-year manager sobriety requirement or documentation proposal would violate federal labor laws or would be feasible given current drug and alcohol testing technology.

- Madame Chair Klein: "*We received this letter just a day before the voting session. To your knowledge, did this group receive . . . were they engaged as part of the 5-year review report? Did they receive any notice that this process was going on*?"

- Councilmember Thorwald: "*Could you tell me what they knew besides that they knew you were going to be submitting a 5-year rule review? When did they know the content of what you were submitting? . . . And again, my question was when did they receive the final version? . . . Again, I only ask that because you were saying they had been involved the whole time and they were a major party involved. Given that you already had these discussions and were informing them of these things and that they are your major group, that's why I was asking you when they had received the documentation. So, since they did not receive the documentation at an earlier date, I can understand why the document that they sent would have come at the last moment*."

  - Note: The Department again refused to provide a copy of the revised report to the Alliance or AzRHA in advance of the Council's study session and November 5th hearing scheduled in this matter. *See* **Exhibit "1"** attached hereto.

- Councilmember Lashgari: "I have four questions that would be helpful if the Department could provide follow-up on for us . . .

  - "*The first is regarding criticism of the rules or any complaints. I think that, for our consideration, especially from significant stakeholders, if a criticism or complaint is raised regardless of the outcome or determination that may come, I think that feedback is helpful. So if the agency could review, specific to these rules . . . if they have received negative comments, criticisms, or feedback that may be helpful to our understanding of stakeholder insights on the rules, that would be helpful*."

    - Note: The revised 5-Year Report does not provide this information requested by Councilmember Lashgari. Instead, the 5-Year Report continues to incorrectly state that the Department "received no written criticism of the rules in the last 5 years."

      The email from Ms. Trevino of ADHS dated October 21, 2024 inaccurately justifies the Department's decision to not address this information because the "HUD complaint reference in the Dukes letter is a legal matter pertaining to the entire statutory scheme, not a particular rule" and "there has been no resolution to the HUD complaint that requires the Department to make recommendations or changes to the rules." The HUD complaint does not challenge the entire statutory

scheme. It challenges the good neighbor policies and procedures in A.A.C. Section 9-12-201.B.2 and the licensing fee amounts set forth in A.A.C. Section R9-12-103.A.6.

A.R.S. 41-1056.A.2 requires ADHS to provide an analysis of "written criticisms of the rule received during the previous five years . . ." It is unclear how a HUD complaint regarding two specific ADHS rules would fail to meet this disclosure requirement. A lawsuit is, quite possibly, the most formal version of a written criticism. There is no statutory requirement or limitation that the written criticism be "resolved" in order for it to be included in the SLH Report.

- "*My second question is . . . for a legal opinion if A.R.S. Section 41-1056(A)(12), which was related to the sobriety requirement for a manager, is in fact legal and does it violate any of the federal rules or if any of the other rules are compliant with federal rules similar to the Fair Housing Act or anything else that was raised in the letter. A legal opinion on that for review at least by the Administration would be helpful for me*."

    - <u>Note:</u> ADHS did not address this request for information and a legal opinion in the SLH Report. The Department, instead, indicated in the SLH Report that "there are no corresponding federal laws." The SLH Report also continues to suggest that R9-12-201 be revised to require the licensee to obtain documentation verifying that the manager has maintained sobriety for at least one year.

      In the email from Ms. Trevino of ADHS dated October 21, 2024, the Department provides a 2 sentence conclusory statement that the SLH Report is correct because there "are no corresponding federal laws applicable to the rules in 9 A.A.C. 12. . . ." This conclusion is wholly inaccurate. The Fair Housing Act has been deemed to apply to sober living home licensing rules and regulations across this county. Moreover, federal and state labor employment laws apply to the hiring process and documentation related to sober living home employees and managers.

- "*My third question is documentation regarding the compliance item that was brought up in the letter and whether the Department had some indication of what kind of verification or documentation would be satisfactory*."

    - Note: ADHS does not disclose what kind of verification or documentation is being contemplated. Instead, the email from Ms. Trevino of ADHS dated October 21, 2024 indicates that the Department will work with all stakeholders to make revisions" during the "rulemaking period, where options and comments received from stakeholders will be fully considered." This response is concerning given the Department's refusal, thus far, to work with stakeholders during this 5-year review process and the email correspondence from the AG's office attached hereto as Exhibit "1". It also does not answer the question posed by the Councilmember.

- "*And finally, as we talked about stakeholder outreach, if the Department can provide a list of which stakeholders they did discuss the 5-year report, specific to the content of the 5-year report with the new rules of changes . . . that would be helpful*."

- Note: ADHS did not provide a list of the stakeholders with whom they discussed the SLH Report or the specific content discussed. The email from Ms. Trevino of ADHS dated October 21, 2024 states that the Department listed on its "website the 5YRR in two locations. . . ." Yet, the Alliance can attest that the SLH Report was never made available at those two locations on the ADHS website. When AzRHA requested a copy of the SLH Report prior to the October 1, 2024 Council meeting, they were directed to the ADHS website, but there was no link or information available regarding the SLH Report.

For these reasons, we respectfully request that the Council vote to return the SLH Report to ADHS with instructions to address the four (4) requests for information raised by Councilmember Lashgari at the October 1, 2024 meeting.

Very truly yours,

/s/ Heather N. Dukes

RE: October 1, 2024 Letter to ADHS

From LaMagna, Patricia <Patricia.LaMagna@azag.gov>
Date Fri 10/11/2024 6:03 PM
To Heather Dukes <hdukes@dukeslawaz.com>

Ms. Dukes,
The Department will send the 5 year review to GRRC as required for their consideration.
You and any other member of the public can review it one week before the November 5, 2024 when it is posted for public review.
As noted previously, the Department's obligation under A.R.S. 41-1056 regarding the 5 year review is to GRRC.

Ms. Dukes,
I just want to be clear that the Department has not agreed to produce to you and the unnamed members of the Alliance of Recovery Residences a copy of the 5-year report before it is re-submitted to GRRC.
ADHS has no legal obligation to submit this Report to any entity other than GRRC. In fact, A.R.S. 41-1056 contemplates the requirements of an agency to GRRC.
Nonetheless, the Department has not made a decision, but will reach out next week.

Patricia:

Thank you for sending confirmation that the sober living home addresses were removed from the ADHS website this week. I appreciate it.

We look forward to receiving the revised 5-year report next week. Have a good weekend.

Sincerely,

Heather N. Dukes, Esq.

Subject: October 1, 2024 Letter to ADHS

Good afternoon,
I am counsel for the Arizona Department of Health Services and I am in receipt of your October 1, 2024 letter to my client (“Letter”)

Yesterday, just prior to receipt of the Letter, the Department removed the spreadsheet from its website and there is no longer access to the addresses of licensed sober living homes.
The Department's website overall was updated on September 1, 2024. Apparently, the provider databases are automated to gather data from licensed facilities.
The sober living home data was gathered including addresses mistakenly, despite the program having believed that the addresses were not part of the data collection.

Further, Department will be sending you a response to the request regarding the sober living home five-year review report by early next week.

Thank you,
Patricia
