D-1.

DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS
Title 20, Chapter 6

Amend: R20-6-2301, R20-6-2305

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 12, 2024

SUBJECT: **DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS**
Title 20, Chapter 6

Amend: R20-6-2301, R20-6-2305

Summary:

This regular rulemaking from the Department of Insurance and Financial Institutions (Department) seeks to amend two (2) rules in Title 20, Chapter 6, Article 23 regarding Threshold Rate Review - Individual Health Insurance. Specifically, the Department is proposing the following amendments to the rules:

- R20-6-2301 (Applicability; Definitions) will be updated to correct the name of the Department which changed in 2020, to correct statutory references in the definition of "Health Insurance," and to change definitions for "Product" and "Rate Increase" as suggested in the Department's 2016 Five-Year Review Report.
- R20-6-2305 (Threshold Rate Increase Documentation Requirements) will be updated to add language to subsection (B) to include actuarial values, add three more submission requirements to reflect the impacts of geographic factors and variations, include the impact of changes within a single risk pool to all products or plans within the risk pool, and to include the impact of reinsurance and risk adjustment payments and changes as suggested in the Department's 2016 Five-Year Review Report.

The Department indicates the rules in this Article meets the requirements established under the Patient Protection and Affordable Care Act (Pub. L. 111-148) so that Arizona can be designated by the federal Centers for Medicare & Medicaid Services ("CMS") as a state that conducts effective review of individual health insurance rate increases. The Department indicates this designation allows Arizona, rather than the federal government, to have oversight over proposed health insurance rate increases in the individual market. The Department states the primary goal of this rulemaking is not to change any conduct of Health Insurers offering Individual plans in the Arizona market. Instead, it is an effort for the state to retain its authority to regulate these types of rates and not cede that authority to the federal government.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Department cites both general and specific statutory authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

This rulemaking does not establish a new fee or contain a fee increase.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Department indicates it did not review any study relevant to this rulemaking.

4. Summary of the agency's economic impact analysis:

The Department indicates that these regulations apply to insurers offering individual health insurance in the Arizona market. The Department states that the primary goal of this rulemaking is not to change any conduct of Health Insurers offering individual plans in the Arizona market. Instead, it is an effort for the state to retain its authority to regulate these types of rates and not cede authority to the federal government. The Department states that this article meets the requirements established under the Patient Protection and Affordable Care Act (Pub. L. 111-148) so that Arizona can be designated by the Centers for Medicare & Medicaid as a state that conducts effective review of individual health insurance rate increases. This designation allows Arizona, rather than the federal government, to have oversight over proposed health insurance rate increases in the individual market.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes the current rulemaking offers the least intrusive and least costly alternative method to achieve the purpose of the proposed rulemaking, which is to provide the Department with better information for reviewing rates.

6. What are the economic impacts on stakeholders?

The Department is not aware of any additional costs that are anticipated to be imposed on Health Insurers doing business in the individual market although the additional submission requirements may result in some additional costs to licensees.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates there were no changes between the Notice of Proposed Rulemaking published in the Administrative Register on August 2, 2024 and the Notice of Final Rulemaking now before the Council for consideration.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it did not receive any public comments regarding this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates this Article governs rate review not the issuing of a permit. However, the Department also indicates A.R.S. § 20-216 specifically authorizes the Department to issue a certificate of authority to insurers doing business in Arizona if they meet statutorily specified criteria. As such, the Department states no general permit is used as the issuance of an alternative type of permit, license or authorization is specifically authorized by state statute. *See* A.R.S. § 41-1037(A)(2). Council staff believes the Department is in compliance with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates rule R20-6-2301 references federal law in both subsection (A) pertaining to applicability of the Article, and in subsection (B) where the federal definition is adopted for some terms ("Federal medical loss ratio standard," "PHS Act," and "Threshold rate increase"). In addition, the definition for "Unreasonable rate increase" uses the federal medical loss ratio standard in subsection (a). The Department indicates this rule is not more stringent than the federal law.

The Department indicates rule R20-6-2305 makes no reference to federal law. Instead, it outlines the documentation required by the Department in order to assess the reasonableness of the assumptions used by the health insurer to develop the proposed rate increase, the validity of the historical data underlying the assumptions, and the health insurers data related to past projections and actual experience. As such, this rule is not more stringent than the federal law.

11. Conclusion

This regular rulemaking from the Department seeks to amend two (2) rules in Title 20, Chapter 6, Article 23 regarding Threshold Rate Review - Individual Health Insurance. Specifically, the Department is proposing the following amendments to the rules:

- R20-6-2301 (Applicability; Definitions) will be updated to correct the name of the Department which changed in 2020, to correct statutory references in the definition of "Health Insurance," and to change definitions for "Product" and "Rate Increase" as suggested in the Department's 2016 Five-Year Review Report.
- R20-6-2305 (Threshold Rate Increase Documentation Requirements) will be updated to add language to subsection (B) to include actuarial values, add three more submission requirements to reflect the impacts of geographic factors and variations, include the impact of changes within a single risk pool to all products or plans within the risk pool, and to include the impact of reinsurance and risk adjustment payments and changes as suggested in the Department's 2016 Five-Year Review Report.

The Department indicates the rules in this Article meets the requirements established under the Patient Protection and Affordable Care Act (Pub. L. 111-148) so that Arizona can be designated by the federal Centers for Medicare & Medicaid Services ("CMS") as a state that conducts effective review of individual health insurance rate increases. The Department indicates this designation allows Arizona, rather than the federal government, to have oversight over proposed health insurance rate increases in the individual market. The Department states the primary goal of this rulemaking is not to change any conduct of Health Insurers offering Individual plans in the Arizona market. Instead, it is an effort for the state to retain its authority to regulate these types of rates and not cede that authority to the federal government.

The Department is seeking the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A).

Council staff recommends approval of this rulemaking.

RE: Arizona Department of Insurance and Financial Institutions
Threshold Rate Review Rulemaking

Dear Chairperson Klein:

Please find enclosed the Final Rulemaking for the Threshold Rate Review rules being submitted by the Arizona Department of Insurance and Financial Institutions, Insurance Division ("Department").

Pursuant to A.A.C. R1-6-201(A)(1), the Department responds as follows:

a. The close of record date for the Notice of Proposed Rulemaking was September 1, 2024.
b. This rulemaking fulfills a commitment made by the Department in its 2016 Five-Year Review Report, which was the Department's first review of this Article after its adoption in 2012 (18 A.A.R. 2721, October 26, 2012), and restated in the Department's 2021 Five-Year Review Report.
c. The rulemaking does not establish a new fee.
d. The rulemaking does not contain a fee increase.
e. The rulemaking does not request an immediate effective date under A.R.S. § 41-1032.
f. The Department certifies that the preamble discloses a reference to any study relevant to the rule that it reviewed and either did or did not rely on in its evaluation of or justification for the rulemaking. The Department did not review or rely on any study relevant to the rulemaking.
g. No additional full-time employees are necessary to implement and enforce the rules. Consequently, no notification has been made to the Joint Legislative Budget Committee.
h. The following documents are also submitted to the Council with this cover letter:
    i. The Notice of Final Rulemaking;

Docusign Envelope ID: 02C9E0EB-DF53-4ADF-98A4-6A0650D687ED

ii. An economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055;
iii. The general and specific statutes authorizing the rulemaking; and
iv. Permission from the Governor's Office to submit this Notice of Final Rulemaking required by A.R.S. § 41-1039(B).

By this submission, the Department is requesting approval of this rulemaking from the Council.

For questions about this rulemaking, please contact Mary Kosinski at (602) 364-3476 or mary.kosinski@difi.az.gov.

Sincerely,

Barbara D. Richardson

Barbara D. Richardson
Director

NOTICE OF FINAL RULEMAKING

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 6. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS – INSURANCE DIVISION

PREAMBLE

1. Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039 by the Governor on:

September 27, 2024

2. Article, Part, or Section Affected (as applicable) Rulemaking Action

Article, Part, or Section Affected	Rulemaking Action
R20-6-2301	Amend
R20-6-2305	Amend

3. Citations to the agency's statutory rulemaking authority to include both the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. § 20-143(A)

Implementing statute: A.R.S. § 20-238; 45 C.F.R. 154.301(a)(5)

4. The effective date of the rule:

This rule shall become effective 60 days after a certified original and preamble are filed in the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is: TBD.

a. If the agency selected a date earlier than the 60 day effective date as specified

in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60 day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the record of the final rule:

Notice of Rulemaking Docket Opening: 30 A.A.R. 2506, August 2, 2024, Issue 31,
File # R24-144

Notice of Proposed Rulemaking: 30 A.A.R. 2494, August 2, 2024, Issue 31,
File # R24-140

6. The agency's contact person who can answer questions about the rulemaking:

Name: Mary E. Kosinski
Address: Department of Insurance and Financial Institutions
100 N. 15th Ave., Suite 261
Phoenix, Arizona 85007-2630

Telephone: (602)364-3476
E-mail: mary.kosinski@difi.az.gov
Web site: https://difi.az.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

The Arizona Department of Insurance and Financial Institutions – Insurance Division ("Department") is proposing changes to A.A.C. Title 20, Chapter 6, Article 23: Threshold Rate Review – Individual Health Insurance.

The changes being proposed by the Department stem from suggestions made in its 2016 Five-Year Review Report, which was the Department's first review of the Article after its adoption in 2012 (18 A.A.R. 2721, October 26, 2012). These proposals were restated in the Department's 2021 Five-Year Review Report.

This Article meets the requirements established under the Patient Protection and Affordable Care Act (Pub. L. 111-148) so that Arizona can be designated by the federal Centers for Medicare & Medicaid Services ("CMS") as a state that conducts effective review of individual health insurance rate increases. This designation allows Arizona, rather than the federal government, to have oversight over proposed health insurance rate increases in the individual market.

This rulemaking amends the following two rules in Article 23 (Threshold Rate Review – Individual Health Insurance) as follows:

- R20-6-2301 (Applicability; Definitions) will be updated to correct the name of the Department which changed in 2020, to correct statutory references in the definition of "Health Insurance," and to change definitions for "Product" and "Rate Increase" as suggested in the Department's 2016 Five-Year Review Report.
- R20-6-2305 (Threshold Rate Increase Documentation Requirements) will be updated to add language to subsection (B) to include actuarial values, add three more submission requirements to reflect the impacts of geographic factors and

variations, include the impact of changes within a single risk pool to all products or plans within the risk pool, and to include the impact of reinsurance and risk adjustment payments and changes as suggested in the Department's 2016 Five-Year Review Report.

The Department did not pursue two suggestions in the 2016 Five-Year Review Report and reiterated in the Department's 2021 Five-Year Review Report. The first was to add a definition for "Plan" to Section R20-6-2301. The Department determined that updating the definition for "Product" made an additional definition unnecessary. The second suggestion was to add language to subsection (A) of Section R20-6-2302 to include plans within a product. After discussion, the Department decided that the addition of this language is also unnecessary.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. A summary of the economic, small business, and consumer impact:

Pursuant to A.R.S. § 41-1055(A)(1):

- The primary goal of this rulemaking is not to change any conduct of

Health Insurers offering Individual plans in the Arizona market. Instead, it is an effort for the state to retain its authority to regulate these types of rates and not cede that authority to the federal government. The Department articulated these proposed changes in its 2016 and 2021 Five-Year Review Reports for this Article.

Pursuant to A.R.S. § 41-1055(A)(2):

- The Department is not aware of any additional costs that are anticipated to be imposed on Health Insurers doing business in the individual market although the additional submission requirements may result in some additional costs to licensees. During the comment period, licensees were encouraged to submit information to the Department about potential impacts to their costs but no one submitted this information.

Pursuant to A.R.S. § 41-1055(A)(3):

- An economic, small business and consumer impact summary accompanies the submission of the Notice of Final Rulemaking to the Governor's Regulatory Review Council.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Not applicable.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Not applicable.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency

subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

Not applicable.

a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

Not applicable. Article 22 governs rate review not the issuing of a permit. A.R.S. § 20-216 authorizes the Department to issue a certificate of authority to insurers doing business in Arizona if they meet statutorily specified criteria. No general permit is used.

b. **Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

A federal law is applicable to the Article. The rules in the Article are not more stringent than the federal law.
For the rules the Department is amending in this rulemaking:
Section R20-6-2301 references federal law in both subsection (A) pertaining to applicability of the Article, and in subsection (B) where the federal definition is adopted for some terms ("Federal medical loss ratio standard," "PHS Act," and "Threshold rate increase"). In addition, the definition for "Unreasonable rate increase" uses the federal medical loss ratio standard in subsection (a). This rule is not more stringent than the federal law.
Section R20-6-2305 makes no reference to federal law. Instead, it outlines the documentation required by the Department in order to assess the reasonableness of the assumptions used by the health insurer to develop the proposed rate

increase, the validity of the historical data underlying the assumptions, and the health insurers data related to past projections and actual experience. This rule is not more stringent than the federal law.

c. **<u>Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:</u>**

Not applicable.

<u>14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rule:</u>

Not applicable.

<u>15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:</u>

Not applicable.

<u>16. The full text of the rules follows:</u>

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS AND INSURANCE

CHAPTER 6. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS – INSURANCE DIVISION

ARTICLE 23. THRESHOLD RATE REVIEW – INDIVIDUAL HEALTH INSURANCE

Section

R20-6-2301. Applicability; Definitions

R20-6-2305. Threshold Rate Increase Documentation Requirements

ARTICLE 23. THRESHOLD RATE REVIEW – INDIVIDUAL HEALTH INSURANCE

R20-6-2301. Applicability; Definitions

A. This Article applies to rates charged by health insurers for individual health insurance. This Article does not apply to rates charged by health insurers for the following:

1. Health insurance that a health insurer issues to an employer or to any group described in either A.R.S. § 20-1401 or A.R.S. § 20-1404(A), except health insurance issued to an association or its individual members as described in R20-6-2301(B)(7)(b);
2. Grandfathered health plan coverage as defined in 45 CFR 147.140; or
3. Health insurance that covers excepted benefits as described in section 2791(c) of the PHS Act, 42 U.S.C. 300gg-91(c).

B. In this Article, the following definitions apply:

1. "Department" means the Arizona Department of Insurance~~.~~ and Financial Institutions.
2. "Blanket disability insurance" has the meaning prescribed in A.R.S. § 20-1404(A).
3. "CMS" means the Centers for Medicare & Medicaid Services.

4. "Federal medical loss ratio standard" means the applicable medical loss ratio standard determined under 45 CFR 158, Subpart B.
5. "Health insurance" means disability insurance as defined in A.R.S. § 20-253, a health care plan as defined in ~~A.R.S. § 20-1051(5)~~ A.R.S. § 20-1051(4) and disability insurance or a health care plan offered by a hospital service corporation, medical service corporation or hospital, medical, dental and optometric service corporation as defined in ~~A.R.S. § 20-822(3).~~ A.R.S. § 20-822.
6. "Health insurer" means an insurer, as that term is defined in A.R.S. § 20-104, authorized to transact disability insurance in Arizona, a health care services organization as defined in A.R.S. § 20-1051(7) or a hospital service corporation, medical service corporation or hospital, medical, dental and optometric service corporation as defined in A.R.S. § 20-822(3).
7. "Individual health insurance" means health insurance that a health insurer issues to either:
   a. An individual, to cover:
      i. The individual, or
      ii. The individual's dependents, or
      iii. The individual and the individual's dependents.
   b. An association or its individual members to cover the individual members and their dependents, and which the Department would regulate under A.R.S. Title 20, Chapter 6 as individual health insurance if the health insurer did not issue it to an association or individual members of an association.
8. "PHS Act" means Part A of Title XXVII of the Public Health Service Act, 42 U.S.C. Chapter 6A.
9. "Product" means ~~a package of health insurance benefits with a discrete set of rating and pricing methodologies that a health insurer offers as individual insurance in Arizona.~~ a discrete package of individual health insurance coverage benefits that are offered using a particular product network type (such as health maintenance organization, preferred provider organization, exclusive provider organization, point of service, or indemnity) within a service area that has its own

set of rating and pricing methodologies.

10. “Preliminary justification” means a justification that consists of the parts described in R20-6-2302(A).
11. “Rate increase” means an increase of the rates for an individual health insurance ~~product that a health insurer offers in Arizona that:~~ plan or plans within a product that:
    a. Results from a change to the underlying rate structure ~~of the product~~, and
    b. May result in premium changes ~~for the product~~.
12. “Secretary” means the Secretary of the United States Department of Health and Human Services.
13. “Threshold rate increase” means a rate increase that meets or exceeds an Arizona-specific threshold as noticed by the Secretary in 45 CFR 154.200, provided:
    a. The average increase for all enrollees weighted by premium volume meets or exceeds the applicable threshold; and
    b. If a rate increase that does not otherwise meet or exceed the Arizona-specific threshold meets or exceeds the Arizona-specific threshold when combined with a previous increase or increases during the 12-month period preceding the date on which the rate increase would become effective, then the rate increase must be considered to meet or exceed the Arizona-specific threshold and is subject to threshold rate review that shall include a review of the aggregate rate increases during the applicable 12-month period.
14. “Threshold rate review” means the review by the Department under this Article of a threshold rate increase.
15. “Unreasonable rate increase” means a rate increase that results in benefits that are not reasonable in relation to the premium the health insurer charges for the product. The following factors are relevant in determining whether a rate increase results in benefits that are unreasonable in relation to premium:
    a. The rate increase results in a projected medical loss ratio below the federal medical loss ratio standard after accounting for any adjustments allowable under federal law;

b. One or more of the assumptions on which the health insurer based the rate increase is not supported by sound actuarial reasoning, data and analysis;
c. The choice of assumptions or combination of assumptions on which the insurer based the rate increase is unreasonable;
d. The health issuer provides data or documentation that is incomplete, inadequate or otherwise does not provide a basis upon which the Department can determine the reasonableness of a rate increase; or
e. The increase results in premium differences between insureds within similar risk categories that are unfairly discriminatory under A.R.S. Title 20, Chapter 2, Article 6.

R20-6-2305. Threshold Rate Increase Documentation Requirements

A. For a threshold rate increase, a health insurer shall submit to the Department documentation that is sufficient to allow the Department to assess:

1. The reasonableness of the assumptions used by the health insurer to develop the proposed rate increase and the validity of the historical data underlying the assumptions, and
2. The health insurer's data related to past projections and actual experience.

B. To the extent applicable to the submission under review by the Department, the health insurer shall submit documentation that includes all of the following:

1. The impact of medical trend changes by major service categories;
2. The impact of utilization changes by major service categories;
3. The impact of cost-sharing changes by major service categories~~;~~, including actuarial values;
4. ~~The impact of benefit changes;~~ The impact of geographic factors and variations;
5. ~~The impact of changes in enrollee risk profile;~~ The impact of changes to all plans within the single risk pool product;
6. ~~The impact of any overestimate or underestimate of medical trend for prior year periods related to the rate increase;~~ The impact of reinsurance and risk adjustment

payments and changes;

7. ~~The impact of changes in reserve needs;~~ The impact of benefit changes;
8. ~~The impact of changes in administrative costs related to programs that improve health care quality;~~ The impact of changes in enrollee risk profile;
9. ~~The impact of changes in other administrative costs;~~ The impact of any overestimate or underestimate of medical trend for prior year periods related to the rate increase;
10. ~~The impact of changes in applicable taxes, licensing or regulatory fees;~~ The impact of changes in reserve needs;
11. ~~Medical loss ratio;~~ The impact of changes in administrative costs related to programs that improve health care quality;
12. ~~The health insurance insurer's capital and surplus; and~~ The impact of changes in other administrative costs;
13. ~~Other relevant documentation at the discretion of the Director.~~ The impact of changes in applicable taxes, licensing or regulatory fees;
14. Medical loss ratio;
15. The health insurer's capital and surplus; and
16. Other relevant documentation at the discretion of the Director.

C. A health insurer shall submit all documentation required under subsection (A) or (B) at the same time that:

1. The health insurer submits the preliminary justification required under R20-6-2302, or
2. The health insurer submits any new preliminary justification required under R20-6-2304(2)(b) and (c).

A.R.S. § 41-1055(B) Economic, Small Business, And Consumer Impact Statement
Title 20. Commerce, Financial Institutions, and Insurance
Chapter 6. Department of Insurance and Financial Institutions – Insurance Division

A.R.S. § 41-1055(B)(1): An identification of the proposed rulemaking.

The Arizona Department of Insurance and Financial Institutions – Insurance Division ("Department") is proposing changes to A.A.C. Title 20, Chapter 6, Article 23: Threshold Rate Review – Individual Health Insurance.

The changes being proposed by the Department stem from suggestions made in its 2016 Five-Year Review Report, which was the Department's first review of this Article after its adoption in 2012 (18 A.A.R. 2721, October 26, 2012). These proposals were restated in the Department's 2021 Five-Year Review Report.

This Article meets the requirements established under the Patient Protection and Affordable Care Act (Pub. L. 111-148) so that Arizona can be designated by the federal Centers for Medicare & Medicaid Services ("CMS") as a state that conducts effective review of individual health insurance rate increases. This designation allows Arizona, rather than the federal government to have oversight over proposed health insurance rate increases in the individual market.

This rulemaking amends the following two rules in Article 23 (Threshold Rate Review – Individual Health Insurance) as follows:

- R20-6-2301 (Applicability; Definitions) will be updated to correct the name of the Department which changed in 2020, to correct statutory references in the definition of "Health Insurance," and to change definitions for "Product" and "Rate Increase" as suggested in the Department's 2016 Five-Year Review Report.
- R20-6-2305 (Threshold Rate Increase Documentation Requirements) will be updated to add language to subsection (B) to include actuarial values, add three more submission requirements to reflect the impacts of geographic factors and variations, include the impact of changes within a single risk pool to all products or plans within the risk pool, and to include the impact of reinsurance and risk adjustment payments and changes as suggested in the Department's 2016 Five-Year Review Report.

The Department did not pursue two suggestions in the 2016 Five-Year Review Report and reiterated in the Department's 2021 Five-Year Review Report. The first was to add a definition for "Plan" to Section R20-6-2301. The Department determined that updating the definition for "Product" made an additional definition unnecessary. The second suggestion was to add language to subsection (A) of Section R20-6-2302 to include plans within a product. After discussion, the Department decided that the addition of this language is also unnecessary.

A.R.S. § 41-1055(B)(2): An identification of the persons who will be directly affected by, bear the costs of or directly benefit from the proposed rulemaking.
These regulations apply to insurers offering individual health insurance in the Arizona market.

A.R.S. § 41-1055(B)(3): A cost benefit analysis of the following:

(a) The probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking. The probable costs to the implementing agency shall include the number of new full-time employees necessary to implement and enforce the proposed rule. The preparer of the economic, small business and consumer impact statement shall notify the joint legislative budget committee of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council.
The Department does not anticipate any costs or benefits in implementing and enforcing the proposed rulemaking. No new full-time employees will be necessary to implement and enforce the proposed rule changes.

(b) The probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking.
No political subdivision of this state is directly affected by the implementation and enforcement of the proposed rulemaking.

(c) The probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking.

The Department anticipates some additional costs to be imposed upon licensees due to the expanded documentation requirements being imposed by R20-6-205. However, the Department does not anticipate any effect on the revenues or payroll expenditures of employers who are subject to the rulemaking.

A.R.S. § 41-1055(B)(4): A general description of the probable impact on private and public employment in businesses, agencies and political subdivisions of this state directly affected by the proposed rulemaking.

The Department does not anticipate any impact on the private employment of an insurer offering individual health insurance in the Arizona market.

Likewise, the Department does not anticipate any impact on public employment in the Department.

A.R.S. § 41-1055(B)(5): A statement of the probable impact of the proposed rulemaking on small businesses. The statement shall include:

(a) An identification of the small businesses subject to the proposed rulemaking.

Not applicable. A health insurer offering individual plans is not a small business within the meaning of A.R.S. § 41-1001(25).

(b) The administrative and other costs required for compliance with the proposed rulemaking.

The Department did not receive any information from licensees on administrative or other costs required for compliance with the proposed rulemaking. The Department anticipates that any administrative or other costs will be minimal.

(c) A description of the methods prescribed in section 41-1035 that the agency may use to reduce the impact on small businesses, with reasons for the agency's decision to use or not to use each method.

Not applicable.

(d) The probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking.

The Department does not expect any appreciable increase in either costs or benefits to private persons and consumers created by this rulemaking. The costs and benefits to private persons and consumers are expected to be the same as those identified during the original adoption of these rules.

A.R.S. § 41-1055(B)(6): A statement of the probable effect on state revenues.

No impact on state revenues is anticipated.

A.R.S. § 41-1055(B)(7): A description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking, including the monetizing of the costs and benefits for each option and providing the rationale for not using nonselected alternatives.

The Department believes that the current rulemaking offers the least intrusive and least costly alternative method to achieve the purpose of the proposed rulemaking which is to provide the Department with better information for reviewing rates.

A.R.S. § 41-1055(B)(8): A description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data. An agency advocating that any data is acceptable data has the burden of proving that the data is acceptable. For the purposes of this paragraph, "acceptable data" means empirical, replicable and testable data as evidenced in supporting documentation, statistics, reports, studies or research.

The rule is not based on any data.

a. Recommending the purchase of any life insurance product which includes a side fund to a service member in pay grades E-4 and below unless the insurer has reasonable grounds for believing that the life insurance death benefit, standing alone, is suitable.
b. Offering for sale or selling a life insurance product which includes a side fund to a service member in pay grades E-4 and below who is currently enrolled in SGLI, is presumed unsuitable unless, after the completion of a needs assessment, the insurer demonstrates that the applicant's SGLI death benefit, together with any other military survivor benefits, savings and investments, survivor income, and other life insurance are insufficient to meet the applicant's insurable needs for life insurance.
    i. "Insurable needs" are the risks associated with premature death taking into consideration the financial obligations and immediate and future cash needs of the applicant's estate and/or survivors or dependents.
    ii. "Other military survivor benefits" include, but are not limited to: the Death Gratuity, Funeral Reimbursement, Transition Assistance, Survivor and Dependents' Educational Assistance, Dependency and Indemnity Compensation, TRICARE Healthcare benefits, Survivor Housing Benefits and Allowances, Federal Income Tax Forgiveness, and Social Security Survivor Benefits.
c. Offering for sale or selling any life insurance contract which includes a side fund:
    i. Unless interest credited accrues from the date of deposit to the date of withdrawal and permits withdrawals without limit or penalty;
    ii. Unless the applicant has been provided with a schedule of effective rates of return based upon cash flows of the combined product. For this disclosure, the effective rate of return will consider all premiums and cash contributions made by the policyholder and all cash accumulations and cash surrender values available to the policyholder in addition to life insurance coverage. This schedule will be provided for at least each policy year from year one to year ten and for every fifth policy year thereafter ending at age 100, policy maturity or final expiration; and
    iii. Which by default diverts or transfers funds accumulated to the side fund to pay, reduce, or offset any premiums due.
d. Offering for sale or selling any life insurance contract which after considering all policy benefits, including but not limited to endowment, return of premium or persistency, does not comply with standard nonforfeiture law for life insurance.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 4215, effective January 5, 2008 (Supp. 07-4). Amended by final rulemaking at 28 A.A.R. 687 (April 1, 2022), effective May 7, 2022 (Supp. 22-1).

ARTICLE 23. THRESHOLD RATE REVIEW – INDIVIDUAL HEALTH INSURANCE

R20-6-2301. Applicability; Definitions

A. This Article applies to rates charged by health insurers for individual health insurance. This Article does not apply to rates charged by health insurers for the following:
1. Health insurance that a health insurer issues to an employer or to any group described in either A.R.S. § 20-1401 or A.R.S. § 20-1404(A), except health insurance issued to an association or its individual members as described in R20-6-2301(B)(7)(b);
2. Grandfathered health plan coverage as defined in 45 CFR 147.140; or
3. Health insurance that covers excepted benefits as described in section 2791(c) of the PHS Act, 42 U.S.C. 300gg-91(c).

B. In this Article, the following definitions apply:
1. "Department" means the Arizona Department of Insurance.
2. "Blanket disability insurance" has the meaning prescribed in A.R.S. § 20-1404(A).
3. "CMS" means the Centers for Medicare & Medicaid Services.
4. "Federal medical loss ratio standard" means the applicable medical loss ratio standard determined under 45 CFR 158, Subpart B.
5. "Health insurance" means disability insurance as defined in A.R.S. § 20-253, a health care plan as defined in A.R.S. § 20-1051(5) and disability insurance or a health care plan offered by a hospital service corporation, medical service corporation or hospital, medical, dental and optometric service corporation as defined in A.R.S. § 20-822(3).
6. "Health insurer" means an insurer, as that term is defined in A.R.S. § 20-104, authorized to transact disability insurance in Arizona, a health care services organization as defined in A.R.S. § 20-1051(7) or a hospital service corporation, medical service corporation or hospital, medical, dental and optometric service corporation as defined in A.R.S. § 20-822(3).
7. "Individual health insurance" means health insurance that a health insurer issues to either:
    a. An individual, to cover:
        i. The individual, or
        ii. The individual's dependents, or
        iii. The individual and the individual's dependents.
    b. An association or its individual members to cover the individual members and their dependents, and which the Department would regulate under A.R.S. Title 20, Chapter 6 as individual health insurance if the health insurer did not issue it to an association or individual members of an association.
8. "PHS Act" means Part A of Title XXVII of the Public Health Service Act, 42 U.S.C. Chapter 6A.
9. "Product" means a package of health insurance benefits with a discrete set of rating and pricing methodologies that a health insurer offers as individual insurance in Arizona.
10. "Preliminary justification" means a justification that consists of the parts described in R20-6-2302(A).
11. "Rate increase" means an increase of the rates for an individual health insurance product that a health insurer offers in Arizona that:

a. Results from a change to the underlying rate structure of the product, and
b. May result in premium changes for the product.

12. "Secretary" means the Secretary of the United States Department of Health and Human Services.
13. "Threshold rate increase" means a rate increase that meets or exceeds an Arizona-specific threshold as noticed by the Secretary in 45 CFR 154.200, provided:
    a. The average increase for all enrollees weighted by premium volume meets or exceeds the applicable threshold; and
    b. If a rate increase that does not otherwise meet or exceed the Arizona-specific threshold meets or exceeds the Arizona-specific threshold when combined with a previous increase or increases during the 12-month period preceding the date on which the rate increase would become effective, then the rate increase must be considered to meet or exceed the Arizona-specific threshold and is subject to threshold rate review that shall include a review of the aggregate rate increases during the applicable 12-month period.
14. "Threshold rate review" means the review by the Department under this Article of a threshold rate increase.
15. "Unreasonable rate increase" means a rate increase that results in benefits that are not reasonable in relation to the premium the health insurer charges for the product. The following factors are relevant in determining whether a rate increase results in benefits that are unreasonable in relation to premium:
    a. The rate increase results in a projected medical loss ratio below the federal medical loss ratio standard after accounting for any adjustments allowable under federal law;
    b. One or more of the assumptions on which the health insurer based the rate increase is not supported by sound actuarial reasoning, data and analysis;
    c. The choice of assumptions or combination of assumptions on which the insurer based the rate increase is unreasonable;
    d. The health issuer provides data or documentation that is incomplete, inadequate or otherwise does not provide a basis upon which the Department can determine the reasonableness of a rate increase; or
    e. The increase results in premium differences between insureds within similar risk categories that are unfairly discriminatory under A.R.S. Title 20, Chapter 2, Article 6.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 2721, effective October 3, 2012 (Supp. 12-4).

R20-6-2302. Disclosure of Preliminary Justification

A. Preliminary Justification. For each threshold rate increase for each affected product, a health insurer shall submit to the Department and to CMS, on a form and in the manner prescribed by the Secretary in 45 CFR 154.215, a preliminary justification that contains all of the following:
1. Preliminary Justification Part I. A summary of the content of the threshold rate increase that includes:
    a. Historical and projected claims experience;
    b. Trend projections related to utilization, and service or unit cost;
    c. Any claims assumptions related to benefit changes;
    d. Allocation of the overall rate increase to claims and non-claims costs;
    e. Per enrollee per month allocation of current and projected premium; and
    f. Three year history of rate increases for the product associated with the rate increase.
2. Preliminary Justification Part II. A written description that justifies the rate increase and that contains a simple and brief narrative describing the data and assumptions the health insurer used to develop the rate increase, and includes the following:
    a. An explanation of the most significant factors causing the rate increase, including a brief description of the relevant claims and non-claims expense increases reported in subsection (A)(1); and
    b. A brief description of the overall experience of the policy, including historical and projected expenses, and loss ratios.

B. A health insurer may submit a single, combined preliminary justification that contains all the information in subsections (A)(1) and (2) for threshold rate increases that affect more than one product if the health insurer has aggregated the claims experience of all products to calculate the rate increases and the rate increases are the same for all products.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 2721, effective October 3, 2012 (Supp. 12-4).

R20-6-2303. Timing for Submission of Preliminary Justification

A. If R20-6-607 applies to a threshold rate increase, the health insurer shall submit its preliminary justification to the Department and to CMS on the date on which the health insurer files the rate increase request under R20-6-607.

B. If R20-6-607 does not apply to a threshold rate increase, the health insurer shall submit the preliminary justification to the Department and to CMS at least 60 days prior to the date the health insurer intends to implement the threshold rate increase in Arizona.

C. The Department shall provide access from its website to the Parts I and II of the Preliminary Justifications of the proposed rate increases that it reviews and have a mechanism for receiving public comments on those proposed rate increases.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 2721, effective October 3, 2012 (Supp. 12-4).

R20-6-2304. Response to Unreasonableness Determination

If the health insurer receives from CMS a notice that the Department has determined that the health insurer's threshold rate increase is unreasonable, the health insurer shall select one of the following three options:
1. Option to not implement the rate increase determined unreasonable. Within 30 days of receiving from CMS the Department's determination, the health insurer shall notify the Department and CMS that it will not implement the rate increase and request the Department to withdraw the rate increase request;
2. Option to implement a smaller rate increase than the rate determined unreasonable. Within 30 days of receiving from CMS the Department's determination, the health insurer shall notify the Department and CMS, on a form and in the manner prescribed by the Secretary, that it intends to implement a rate increase that is smaller than

the one determined unreasonable. One of the following shall apply to this option:

a. If the health insurer selects this option and the smaller rate increase is not a threshold rate increase, the smaller rate increase is not subject to this Article;
b. If the health insurer selects this option, and R20-6-607 applied to the rate increase the Department determined to be unreasonable, the health insurer shall revise the rate increase filing to reflect the smaller rate increase or file a new rate increase. If the smaller rate increase is a threshold rate increase, the health insurer shall submit a new preliminary justification on the date the health insurer revises the rate increase filing or files a new rate increase; or
c. If the health insurer selects this option, and R20-6-607 did not apply to the rate increase the Department determined to be unreasonable, and the smaller increase is a threshold rate increase, the health insurer shall submit to the Department and to CMS a new preliminary justification at least 60 days prior to the date the health insurer intends to implement the smaller increase in Arizona.

3. Option to implement the rate increase determined unreasonable. Within 10 business days after the health insurer either implements the rate increase that the Department determined unreasonable, or receives from CMS the Department's determination, the health insurer shall:
   a. Submit, to the Department and to CMS, a final justification in response to the Department's determination. The information in the final justification shall be the same as the information submitted by the insurer under R20-6-2302(A)(1) and (2) in the preliminary justification supporting the rate increase; and
   b. Prominently post on its website, on a form and in the manner prescribed by the Secretary under 45 CFR 154.230 the following information:
      i. The Department's determination that the rate increase is unreasonable and Department's explanation of the Department's analysis of the relevant factors set forth in R20-6-2305(A)(1) and (2), and
      ii. The health insurer's final justification for implementing the rate increase.
   c. Continue to make the information in subsection (3)(b) available to the public on its website for at least three years.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 2721, effective October 3, 2012 (Supp. 12-4).

R20-6-2305. Threshold Rate Increase Documentation Requirements

A. For a threshold rate increase, a health insurer shall submit to the Department documentation that is sufficient to allow the Department to assess:
   1. The reasonableness of the assumptions used by the health insurer to develop the proposed rate increase and the validity of the historical data underlying the assumptions, and
   2. The health insurer's data related to past projections and actual experience.

B. To the extent applicable to the submission under review by the Department, the health insurer shall submit documentation that includes all of the following:
   1. The impact of medical trend changes by major service categories;
   2. The impact of utilization changes by major service categories;
   3. The impact of cost-sharing changes by major service categories;
   4. The impact of benefit changes;
   5. The impact of changes in enrollee risk profile;
   6. The impact of any overestimate or underestimate of medical trend for prior year periods related to the rate increase;
   7. The impact of changes in reserve needs;
   8. The impact of changes in administrative costs related to programs that improve health care quality;
   9. The impact of changes in other administrative costs;
   10. The impact of changes in applicable taxes, licensing or regulatory fees;
   11. Medical loss ratio;
   12. The health insurance insurer's capital and surplus; and
   13. Other relevant documentation at the discretion of the Director.

C. A health insurer shall submit all documentation required under subsection (A) or (B) at the same time that:
   1. The health insurer submits the preliminary justification required under R20-6-2302, or
   2. The health insurer submits any new preliminary justification required under R20-6-2304(2)(b) and (c).

Historical Note

New Section made by final rulemaking at 18 A.A.R. 2721, effective October 3, 2012 (Supp. 12-4).

ARTICLE 24. OUT-OF-NETWORK CLAIM DISPUTE RESOLUTION

R20-6-2401. Definitions

The definitions in A.R.S. § 20-3111 and this Section apply to this Article.

1. "Allowed Amount" is the amount reimbursable for a covered service under the terms of the enrollee's benefit plan. The allowed amount includes both the amount payable by the insurer and the amount of the enrollee's cost sharing requirements.
2. "Alternative Arbitrator" is an individual who is mutually agreeable to the health insurer and health care provider to act as the arbitrator of a surprise out-of-network billing dispute. If the person is contracted with the State of Arizona to conduct arbitration proceedings, the provisions of that contract shall apply. Department staff may not serve as an Alternative Arbitrator.
3. "Amount of the enrollee's cost sharing requirements" means the amount determined by the insurer prior to the dispute resolution process to be owed by the enrollee for out-of-network copayment, coinsurance and deductible pursuant to the enrollee's health care policy.
4. "Arbitrator" has the same meaning as A.R.S. § 20-3111(2) and may include a mediator, arbitrator or other alternative dispute resolution professional who is contracted with the Department to arbitrate a surprise out-of-network billing dispute. Department staff may not serve as an Arbitrator.

Threshold Rate Review

Authorizing Statute

20-143. Rule-making power

A. The director may make reasonable rules necessary for effectuating any provision of this title.

B. The director shall make rules concerning proxies, consents or authorizations in respect of securities issued by domestic stock insurance companies having a class of equity securities held of record by one hundred or more persons to conform with the requirements of section 12(g)(2)(G)(ii) of the securities exchange act of 1934, as amended, and as may be amended. Such rule shall not apply to any such company having a class of equity securities which are registered or are required to be registered pursuant to section 12 of the securities exchange act of 1934, as amended, or as may be amended. Whenever such equity securities of any such company are registered or are required to be registered pursuant to section 12 of the securities exchange act of 1934, as amended, or as may be amended, then, no person shall solicit or permit the use of his name to solicit, in any manner whatsoever, any proxy, consent or authorization in respect of any equity security of such company without having first complied with the rules prescribed by the securities and exchange commission pursuant to section 14 of the securities exchange act of 1934, as amended, or as may be amended.

C. All rules made pursuant to this section shall be subject to title 41, chapter 6.

D. In addition to any other penalty provided, wilful violation of any rule made by the director is a violation of this title.

Threshold Rate Review

Implementing Statutes

20-238. Health insurance; state regulation; rating areas; definitions

(Conditionally Rpld.)

A. The director, through the adoption of rules or other regulatory and administrative actions within the director's authority, shall ensure that this state retains its full authority to regulate policies, certificates, evidences of coverage and contracts of insurance that are issued or delivered by health insurers taking into consideration the enactment of the act.

B. Notwithstanding any other provision of this title, a health insurer subject to the act shall not issue a contract, policy, certificate or evidence of coverage or otherwise transact insurance if the coverage and benefits provided in the contract, policy, certificate or evidence of coverage are inconsistent with the applicable provisions of the act.

C. Except for coverage under individual and small group policies, certificates, evidences of coverage and contracts that are grandfathered as prescribed by 42 United States Code section 18011, the following rating areas are established and shall be used by all health insurers issuing individual and small group policies, certificates, evidences of coverage or contracts in this state:

1. Mohave, Coconino, Apache and Navajo counties.

2. Yavapai county.

3. La Paz and Yuma counties.

4. Maricopa county.

5. Pinal and Gila counties.

6. Pima and Santa Cruz counties.

7. Graham, Greenlee and Cochise counties.

D. For the purposes of this section:

1. "Act" means the patient protection and affordable care act (P.L. 111-148) as amended by the health care and education reconciliation act (P.L. 111-152) or any rules adopted pursuant to those acts.

2. "Health insurer" means a disability insurer, group disability insurer, blanket disability insurer, health care services organization, hospital service corporation, medical service corporation, dental service corporation, prepaid dental plan organization or hospital, medical, dental and optometric service corporation.

3. "Rating area" means an area within which a health insurer shall not vary rates based on geography.

Subpart C—Effective Rate Review Programs

§ 154.301 CMS's determinations of Effective Rate Review Programs.

(a) ***Effective Rate Review Program.*** In evaluating whether a State has an Effective Rate Review Program, CMS will apply the following criteria for the review of rates for the small group market and the individual market, and also, as applicable depending on State law, the review of rates for different types of products within those markets:

(1) The State receives from issuers data and documentation in connection with rate increases that are sufficient to conduct the examination described in paragraph (a)(3) of this section.

(2) The State conducts an effective and timely review of the data and documentation submitted by a health insurance issuer in support of a proposed rate increase.

(3) The State's rate review process includes an examination of:

(i) The reasonableness of the assumptions used by the health insurance issuer to develop the proposed rate increase and the validity of the historical data underlying the assumptions.

(ii) The health insurance issuer's data related to past projections and actual experience.

(iii) The reasonableness of assumptions used by the health insurance issuer to estimate the rate impact of the reinsurance and risk adjustment programs under sections 1341 and 1343 of the Affordable Care Act.

(iv) The health insurance issuer's data related to implementation and ongoing utilization of a market-wide single risk pool, essential health benefits, actuarial values and other market reform rules as required by the Affordable Care Act.

(4) The examination must take into consideration the following factors to the extent applicable to the filing under review:

(i) The impact of medical trend changes by major service categories.

(ii) The impact of utilization changes by major service categories.

(iii) The impact of cost-sharing changes by major service categories, including actuarial values.

(iv) The impact of benefit changes, including essential health benefits and non-essential health benefits.

(v) The impact of changes in enrollee risk profile and pricing, including rating limitations for age and tobacco use under section 2701 of the Public Health Service Act.

(vi) The impact of any overestimate or underestimate of medical trend for prior year periods related to the rate increase.

(vii) The impact of changes in reserve needs;

(viii) The impact of changes in administrative costs related to programs that improve health care quality;

(ix) The impact of changes in other administrative costs;

(x) The impact of changes in applicable taxes, licensing or regulatory fees.

(xi) Medical loss ratio.

(xii) The health insurance issuer's capital and surplus.

(xiii) The impacts of geographic factors and variations.

(xiv) The impact of changes within a single risk pool to all products or plans within the risk pool.

(xv) The impact of reinsurance and risk adjustment payments and charges under sections 1341 and 1343 of the Affordable Care Act.

(5) The State's determination of whether a rate increase is unreasonable is made under a standard that is set forth in State statute or regulation.

(b) ***Public disclosure and input.***

(1) In addition to satisfying the provisions in paragraph (a) of this section, a State with an Effective Rate Review Program must provide:

(i) For proposed rate increases subject to review, access from its Web site to at least the information contained in Parts I, II, and III of the Rate Filing Justification that CMS makes available on its Web site (or provide CMS's Web address for such information), and have a mechanism for receiving public comments on those proposed rate increases, no later than the date specified in guidance by the Secretary.

(ii) Beginning with rates filed for coverage effective on or after January 1, 2016, for all final rate increases (including those not subject to review), access from its Web site to at least the information contained in Parts I, II, and III of the Rate Filing Justification (as applicable) that CMS makes available on its Web site (or provide CMS's Web address for such information), no later than the first day of the annual open enrollment period in the individual market for the applicable calendar year.

(2) If a State intends to make the information in paragraph (b)(1)(i) of this section available to the public prior to the date specified by the Secretary, or if it intends to make the information in paragraph (b)(1)(ii) of this section available to the public prior to the first day of the annual open enrollment period in the individual market for the applicable calendar year, the State must notify CMS in writing, no later than five (5) business days prior to the date it intends to make the information public, of its intent to do so and the date it intends to make the information public.

(3) A State with an Effective Rate Review Program must ensure the information in paragraphs (b)(1)(i) and (ii) of this section is made available to the public at a uniform time for all proposed and final rate increases, as applicable, in the relevant market segment and without regard to whether coverage is offered through or outside an Exchange.

(c) CMS will determine whether a State has an Effective Rate Review Program for each market based on information available to CMS that a rate review program meets the criteria described in paragraphs (a) and (b) of this section.

(d) CMS reserves the right to evaluate from time to time whether, and to what extent, a State's circumstances have changed such that it has begun to or has ceased to satisfy the criteria set forth in paragraphs (a) and (b) of this section.

ARIZONA COMMISSION FOR THE DEAF AND HARD OF HEARING
Title 9, Chapter 26, Articles 2 & 5

Amend: R9-26-201, R9-26-202, R9-26-203, R9-26-204, R9-26-205, R9-26-207, R9-26-501, R9-26-503, R9-26-505, R9-26-507, and R9-26-509

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **November 19, 2024**

SUBJECT: **Arizona Commission for the Deaf and Hard of Hearing (ACDHH)**
Title 9, Chapter 26, Articles 2 and 5

Amend: R9-26-201, R9-26-202, R9-26-203, R9-26-204, R9-26-205, R9-26-207, R9-26-501, R9-26-503, R9-26-505, R9-26-507, and R9-26-509

Summary:

This regular rulemaking by the Arizona Commission for the Deaf and Hard of Hearing (Commission) seeks to amend eleven (11) rules in Title 9, Chapter 26, Articles 2 and 5 regarding Legal A and provisional interpreters' time frames for completing their five year performance examinations.

The proposed rule amendments partially arose out of a previous Five-Year Review Report (5YRR) approved by the Council in October 2022 to improve understandability and clarity of the rules. The proposed rule amendments also partially arose to address a set of emergency rules enacted in 2021 during the COVID-19 pandemic to provide extensions for Legal A and provisional interpreters to take their required performance examinations. The Commission amended these Sections twice in 2021. They were amended by an emergency rulemaking (See 27 A.A.R. 549, immediate effect on March 31, 2021).

As emergency rulemaking is only valid for 180 days (A.R.S. 41-1026(D)), the two Sections were amended again by regular rulemaking (See 27 A.A.R.1257, immediate effect on August 4, 2021). When the Sections as amended by regular rulemaking went into effect, the

Sections as amended by emergency rulemaking ceased to exist. The extensions under the previous rules expired in 2023, so the Commission seeks to remove the applicable portions of R9-26-501 and R9-26-507.

The Commission has requested a standard 60 day delayed effective date.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Commission cites both general and specific statutory authority.

2. Do the rules establish a new fee or contain a fee increase?

The amended rules do not increase any existing fees or create a new fee.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Commission stated in the preamble that it did not utilize or rely on any study.

4. Summary of the agency's economic impact analysis:

The rulemaking accomplishes minor changes to improve the clarity and understanding of the rules as a response to a 2022 five-year-review. Additionally, the rulemaking deletes temporary amendments made to the rules in response to the COVID-19 pandemic. The Commission believes the provision making an individual eligible for a voucher to purchase new telecommunications equipment when previously purchased equipment is no longer under warranty is most apt to have economic impact because it will allow individuals to obtain new equipment more frequently. Changes reducing or eliminating unnecessary or burdensome provisions will have important but minimal economic impact.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Commission believes the rulemaking is neither intrusive nor costly. As a result, no alternative methods were considered.

6. What are the economic impacts on stakeholders?

Individuals who participate in the telecommunications equipment program, interpreters, and the Commission are persons who will be directly affected by, bear the costs of, and directly benefit from the rulemaking.

The rulemaking has no effect on other state agencies, political subdivisions, private or public employment, private persons and consumers, and state revenues.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

No, the final rules are not a substantial change from the proposed rules.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Commission stated that it received no comments regarding the rules in Article 2. The Commission received both written and oral comments regarding the rules in Article 5. The comments are detailed, along with the Commission's response, on Pages 3 through 16 of the Notice of Final Rulemaking. In total, the Commission received 18 written comments regarding differing aspects of the proposed rule amendments.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Commission stated that the licenses issued by the Commission to interpreters are not general permits as defined at A.R.S. § 41-1001. Under A.R.S. § 36-1946(3) the Commission is required to establish standards and procedures for the qualification and licensure of each classification of interpreters. The standards must include an assessment of each individual's education, examination, and work history (See A.R.S. § 36-1971(B)).

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Commission states that the Americans with Disabilities Act applies to individuals who are deaf, hard of hearing, or Deafblind. However, no federal law is directly applicable to the subject of any rule in this rulemaking.

11. Conclusion

This regular rulemaking by the Commission seeks to amend eleven (11) rules in Title 9, Chapter 26, Articles 2 and 5 regarding Legal A and provisional interpreters' time frames for completing their five year performance examinations.

The proposed rule amendments partially arose out of a previous Five-Year Review Report (5YRR) approved by the Council in October 2022 to improve understandability and clarity of the rules. The proposed rule amendments also partially arose to address a set of emergency rules enacted in 2021 during the COVID-19 pandemic to provide extensions for Legal A and provisional interpreters to take their required performance examinations.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

Sherri L. Collins
Executive Director

Ms. Jessica Klein, Chair
The Governor's Regulatory Review Council
100 North 15th Avenue, Ste. 305
Phoenix, AZ 85007

September 30, 2024

Re: A.A.C. Title 9. Health Services
Chapter 26. Commission for the Deaf and the Hard of Hearing

Dear Ms. Klein:

The attached final rule package is submitted for review and approval by the Council. The following information is provided for Council's use in reviewing the rule package:

A. Close of record date: The rulemaking record was closed on September 10, 2024, following a period for public comment and an oral proceeding. This rule package is being submitted within the 120 days provided by A.R.S. § 41-1024(B).
B. Relation of the rulemaking to a five-year-review report: The rulemaking relates to a 5YRR approved by the Council on October 4, 2022.

C. New fee: The rulemaking does not establish a new fee.

D. Fee increase: The rulemaking does not increase an existing fee.

E. Immediate effective date: An immediate effective date is not requested.

F. Certification regarding studies: I certify that the preamble accurately discloses the studies the Board reviewed in its evaluation of or justification for the rules in this rulemaking.

G. Certification that the preparer of the EIS notified the JLBC of the number of new full-time employees necessary to implement and enforce the rule: I certify that none of the rules in this rulemaking will require a state agency to employ a new full-time employee. No notification was provided to JLBC.

H. List of documents enclosed:
1. Cover letter signed by the Executive Director;
2. Notice of Final Rulemaking including the preamble, table of contents, and rule text;
3. Economic, Small Business, and Consumer Impact Statement;
4. Public comments

Sincerely,

Sherri Collins
Executive Director

NOTICE OF FINAL RULEMAKING

TITLE 9. HEALTH SERVICES

CHAPTER 26. COMMISSION FOR THE DEAF AND THE HARD OF HEARING

PREAMBLE

1. **Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039(B) by the governor on:**

   September 10, 2024

2. **Articles, Parts, and Sections Affected** **Rulemaking Action**

Articles, Parts, and Sections Affected	Rulemaking Action
R9-26-201	Amend
R9-26-202	Amend
R9-26-203	Amend
R9-26-204	Amend
R9-26-205	Amend
R9-26-207	Amend
R9-26-501	Amend
R9-26-503	Amend
R9-26-505	Amend
R9 26 507	Amend
R9-26-509	Amend

3. **Citations to the agency's statutory rulemaking authority to include both the authorizing statute (general) and the implementing statute (specific):**

   Authorizing statute: A.R.S. §§ 36-1946(1), (2), and (3) and 36-1947(B)

   Implementing statute: A.R.S. §§ 36-1947 and 36-1971(B)

4. **The effective date for the rules:**

   As specified under A.R.S. § 41-1032(A), the rule will be effective 60 days after the rule package is filed with the Office of the Secretary of State. The effective date is

   a. **If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**

      Not applicable

   b. **If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):**

      Not applicable

5. Citation to all related notices published in the *Register* to include the *Register* as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:

Notice of Rulemaking Docket Opening: 29 A.A.R. 3587, Issue Date: November 17, 2023, Issue Number: 46, File Number: R23-227

Notice of Proposed Rulemaking: 29 A.A.R. 3561, Issue Date: November 17, 2023, Issue Number: 46, File Number: R23-224

Notice of Public Information: 29 A.A.R. 3807, Issue Date: December 15, 2023, Issue Number: 50, File Number: M23-65

6. The agency's contact person who can answer questions about the rulemaking:

Name: Carmen Green Smith

Title: Deputy Director

Address: Commission for the Deaf and the Hard of Hearing, 100 N. 15th Ave., Suite 104, Phoenix, AZ 85007

Telephone: (602) 542-3362

Fax: (602) 542-3380

E-mail: C.green@acdhh.az.gov

Website: acdhh.org

7. An agency's justification and reason why a rule should be made, amended, repealed , or renumbered, to include an explanation about the rulemaking:

In a 5YRR approved by the Council on October 4, 2022, the Commission indicated it would make minor changes to improve the clarity and understandability of the rules. This rulemaking accomplishes that goal.

As a result of challenges from the Covid19 pandemic, in a 2021 rulemaking, the Board amended R9-26-501 and R9-26-507, to provide extra time for Legal A and provisional interpreters to take required performance examinations. The extra time provided has expired so the amended provisions are deleted in this rulemaking.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

10. A summary of the economic, small business, and consumer impact:

The Commission believes the provision making an individual eligible for a voucher to purchase new telecommunications equipment when previously purchased equipment is no longer under warranty is most apt to have economic impact because it will allow individuals to obtain new equipment more frequently. Changes reducing or eliminating unnecessary or burdensome provisions will have important but minimal economic impact.

11. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:

No changes were made between the proposed and final rules.

12. **An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to comments:**

The Commission received no comments regarding the rules in Article 2. The Commission received both written and oral comments regarding the rules in Article 5. Comments were received from Torrey Mansager, LaDonna Gabrielson, Deb Stone Haris, Jasmine Marin, Michelle Monahan, Matthew Brown, Ernest Willman, Robert Hann, Raymon Baesler, David Svoboda, Joni Horn, and Maria Tavormina. Each comment is addressed.

Comment	ACDHH analysis	ACDHH response
Even if we're going to allow other state certifications like BEI, we should require interpreters to have a bachelor's degree. Because many state certifications don't require proof of a bachelor's degree, individuals are able to avoid becoming fully competent and qualified. I believe a bachelor's in interpreting is the minimum someone needs to be a proficient entry-level interpreter. There's a reason RID requires a bachelor's. I don't think a bachelor's in anything non-interpreting related should be acceptable but the Commission could allow that, like RID does, to address the dearth of bachelor's level programs. When an individual graduates with an associate's, the individual is barely a competent language technician. It's not until additional course work is completed at the bachelor's level that an individual acquires a deeper understanding of morally defensible ethical decision making and moves toward becoming a practice professional. If we want to be considered	The Commission relies on certifying bodies for professional American Sign Language (ASL) interpreters to set minimum education standards (BEI=Associates degree and RID=Bachelors or Alternative pathway degree). The Commission does not intend to impose a more strict education requirement than the certifying bodies of RID and BEI because doing so could potentially reduce the pool of qualified interpreters in Arizona.	No change

professionals, our standards should reflect that.		
I am addressing the proposed change for a Class B Provisional license. The proposed changes address typographical errors and combine Class A and Class B Provisional license requirements under one heading. I would like to bring two concerns to the Commission's attention. First, based on the competency standards screened by the BEI Basic performance exam, interpreters holding this certificate are incorrectly classified as Generalist Interpreters by current licensure law. Second, there is need for specific guidance on settings where Class B Provisional Interpreters are qualified to work independently, without the support of a generally or legally licensed team interpreter. Currently, Generalist Interpreters holding a BEI Basic certificate have not proven through examination that they have interpreting skills for community assignments. Holders of a BEI Basic certificate meet minimum competency standards through examination to interpret only in K-12 and postsecondary educational settings. The BEI Basic performance test screens for terms and scenarios found in general lecture and teaching situations, and other educational contexts.	The Commission made a decision during the 2017 rule change to allow the BEI certification Basic level to be an acceptable certification that meets the minimum qualifications for a Generalist license in Arizona. This decision was based in part on the moratorium on certification tests delivered by RID, leaving the field without a way to grow because there were no testing options. The current classification and criteria for General licensees is not incorrect according to what the intentions of the Commission were during the 2017 rule changing process. The current rules define where a provisional B licensee can work "Class B provisional interpreter" means a provisional interpreter who is qualified to provide interpreting services without a team interpreter licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) and (b), except in a medical, mental health, platform or performance, or legal setting. A Class B provisional interpreter may provide interpreting services in a medical, mental health, or platform or performance setting only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b). A Class B provisional interpreter shall not	No change

Individuals awarded a BEI Basic certificate are not assessed in other community settings such as: medical, behavioral health, government, employment, finance, performance, public forums, or social service settings. Due to the current misclassification of BEI Basic certificate holders as Generalist Interpreters, they are working in these community settings under the Arizona rules. This is incongruent with the definition of the “Generalist Interpreter” classification found in R9-26-501 which states a “Generalist Interpreter” means an individual who provides interpreting in any community setting, except a legal setting, for which the individual is qualified by education, examination, and work history.” The BEI Basic performance exam does not meet the exam requirement for the Generalist Interpreter license. As such, the BEI Basic certificate should be removed from the list of acceptable examinations qualifying for the Generalist Interpreter license. It is my recommendation that interpreters currently holding a BEI Basic certificate are better classified as a Class B Provisional Interpreter under R9-25-503(2)(a) or R9-26-502(A)(1)(a) and (b) with additional definition and specific guidance on settings where they are qualified to work.	provide interpreting services in a legal setting.	

Currently, a Class B Provisional Interpreter may provide interpreting services in a medical, mental health, or platform/performance setting only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-502(A)(1)(a) and (b), and shall not provide interpreting services in a legal setting. Because the current rule defines only three settings where a Class B Provisional Interpreter must work with a licensed team interpreter, it does not provide adequate guidance to determine where they are qualified to interpret independently. As a result, a Class B Provision Interpreter may assume the interpreter is qualified to interpret independently. This perpetuates the risk for ineffective and unethical interpreting service provision in the settings listed above (medical, behavioral health, government, employment, finance, performance, public forums, or social service settings). The misclassification of BEI Basic certificate holders as Generalist Interpreters, and the limited definition of settings where Class B Provisional Interpreters require the support of a licensed team interpreter in the current rule could		

be harming the lives of Arizona's Deaf, DeafBlind and Hard of Hearing communities. I strongly urge the Board and Commission to evaluate the current proposal with these two concerns in mind and consider revisions based on these facts.		
It would be worthwhile to consider agencies that provide ASL/Eng interpreting services. Because spoken languages are not regulated in most areas, many spoken language agencies that expand to offer ASL/Eng interpreting services are not familiar enough with laws and regulations.	The Commission has no authority over licensing agencies providing spoken or ASL interpreting services. A.R.S. § 36-1946 does not allow the Commission to regulate business entities. This would require a statute change.	No change
I'm reaching out as an independent member of the ASL interpreting community. While I appreciate the current proposed changes to clarify the language in the rules, I believe there are certain issues that are far more impactful to the interpreting and Deaf communities that should be addressed. The first issue is the lack of oversight for referral agencies that coordinate ASL interpreting services. It is imperative that ACDHH continues to be the governing body over the ethics of individual ASL interpreters, however, that's only one part of the issues we see. With the increase of spoken language agencies offering	The Commission has no authority over licensing agencies providing spoken or ASL interpreting services. A.R.S. § 36-1946 does not allow the Commission to regulate business entities. This would require a statute change.	No change

ASL services, and considering the vast differences in industry standards between spoken and signed language interpreting, I feel it necessary for a government organization to be named as the watchdog for companies that hire and coordinate ASL interpreting services.		
I find it problematic that the ACDHH does not have jurisdiction to impose repercussions on unlicensed ASL interpreters. There currently are no penalties for non-licensed interpreters providing inadequate services to Deaf Arizonans, which is the entire point of having a licensure law. With the mass increase of Video Remote Interpreting, the blatantly unethical practices of nationwide VRI companies, and the national pool of VRI interpreters that are now providing services to our residents, it is of upmost important to allow ACDHH jurisdiction over unlicensed interpreters. I should also mention that we are the only state that I know of that doesn't have the ability to deliver repercussions to unlicensed interpreters.	The Commission has no authority over non-Arizona interpreters. A.R.S. § 36-1946 does not allow the Commission to regulate business entities. This would require a statute change.	No change
Please, consider extending ACDHH's jurisdiction when sanctioning interpreters— let them have the power to protect against unlicensed interpreters as well as nefarious agency practices.	The Commission has no authority over licensing agencies spoken or ASL. A.R.S. § 36-1946 does not allow the Commission to regulate business entities. This would require a statute change.	No change

Empower the community further by organizing a union to better protect and establish standards.		
The Commission should be able to deal harsher punishments for interpreters who repeatedly/severely violate the code of ethics There should be punishments given to out-of-state interpreters for interpreting without a license Is there anything to be done/brought against VRI agencies who send unlicensed out-of-state interpreters to interpret virtually in AZ? Is there anything that can be done as far as oversight over agencies?	The Commission has no authority over licensing agencies spoken or ASL. A.R.S. § 36-1946 does not allow the Commission to regulate business entities. This would require a statute change.	No change
The Commission should consider reciprocity for those licensed in other states. Those working full time in VRI (Video Remote Interpreting) are known to have more than 10 licenses at a time. It's a lot to manage.	A.R.S. § 36-1971(A) says an individual shall not practice as an interpreter for the deaf and the hard of hearing without a license issued by the Commission. This applies to those working only by VRI. An individual who works by VRI in Arizona must be licensed by the Commission.	No change
Interpreters who held a Legal License for a long time can't continue with a legal license because they must now have a legal certificate. They should be grandfathered and still keep a legal license because they were trained and worked for a long time. Because RID stopped offering	The 2017 licensure rule change required Legal A licensed interpreters who did not have their SCL certificate from RID and wished to stay in the Legal A category to obtain their CIC certificate from BEI within five years. COVID restrictions were implemented in March 2020. The	No change

SC:L, new interpreters who apply for a legal license will require legal certification from BEI or somewhere else which is fine.	five-year deadline to achieve certification was approaching for most professionals in 2021. The Commission requested permission and was granted authority to do a rulemaking. The 2021 rule change allowed an additional year (2022) to obtain the CIC certificate for Legal interpreters who were required to travel to Texas to take the BEI CIC test. The extended time has expired. The Commission stands behind the decisions made and believes the Legal A category interpreters have had sufficient time to meet the current requirements.	
It would be an ideal to have two separate listing for interpreters--one for Arizona residents and one for out-of-state interpreters. This way consumers can verified whether VRIs are licensed.	The Commission maintains a list of all interpreters who are licensed in Arizona. The list provides their first and last names. The Commission sees no benefit to adding the location of the licensed interpreters. The Commission has an online interpreter directory available to the community that lists the information the licensed interpreter wishes to share with the community. This directory posts interpreter information with their expressed consent and request.	No change
I believe ACDHH should receive the necessary funding to develop and manage a statewide mentorship program for new interpreters entering the field. The path to certification and licensure is arduous and offers little support. We are losing a huge percentage of well-trained interpreters by not	The Commission appreciates the feedback but funding and a mentorship program are outside the scope of the rulemaking.	No change

offering them the meaningful work experience needed to develop the skills necessary for certification. The interpreting field is shrinking at a time when demand is increasing…there are considerably more interpreters retiring or leaving the field than there are new interpreters starting their careers. The current model is unsustainable, yet the need for qualified ASL interpreters is ever-growing. I believe ACDHH should receive the funding necessary to provide a solution to this issue.		
I'd like to address the extreme shortage of Legal licensed interpreters in our state. I believe requiring BEI Advanced certification to receive a General license will incentivize more interpreters to take the BEI Court Interpreter Certification, due to BEI's own rules that require an interpreter to have a BEI Advanced certification to qualify for the CIC. I also think Arizona should examine reciprocity with other states' legal interpreter requirements and provide a path for those interpreters to be granted an Arizona Legal license. This will exponentially increase the number of legal interpreters on a national level that are able to provide services to the Deaf community in the justice system.	The 2017 rule change required Legal A licensed interpreters who did not have a SCL certificate from RID and wished to stay in the Legal A category to obtain a CIC certificate from BEI within five years. Due to the Covid pandemic, in March 2021 a rule change was made to allow extra time for Legal interpreters to obtain the required CIC certificate. The extended time has expired. The Commission stands behind the decisions made and believes the Legal A interpreters have had sufficient time to meet the current requirements. Valid certifications held needed to take the BEI CIC are the following: BEI Level III-IV, Advanced, Master OR RID CSC, CI/CT, RSC, CDI, NIC Advanced/Master. There is no need to take the advanced BEI test before taking the CIC.	No change

Currently, the BEI Basic is considered a qualifying credential for a General License in Arizona. I don't believe this to be adequate, as the BEI Basic was designed to qualify only K12 and post-secondary interpreters. It is a widely held belief that the BEI Advanced is more closely equivalent to the CASLI National Interpreter Certification. I propose offering those with BEI Basic certification a license that requires them to work alongside a General-licensed interpreter in all settings (except legal), with a 5-year opportunity to achieve the BEI Advanced certification and an Arizona General license.	The Commission decided during the 2017 rule change to allow the BEI certification Basic level to be an acceptable certification that meets the minimum qualifications for a Generalist license in Arizona. This decision was based, in part, on the moratorium on certification tests delivered by RID. This caused there to be no way to grow the number of interpreters because there were no testing options. The Commission acknowledges we may need to revisit the requirements to include the various tiers of advancement within the BEI structure to demonstrate progression in skills. The Commission will research this. It is interesting to note, the Commission has received an increased volume of complaints from consumers. These complaints are against interpreters who have RID certification and have been in the field for many years. In the last six years, we have had only one BEI-certified interpreter with a complaint compared with 22 RID-certified interpreters.	No change but the Commission will research including various tiers of advancement within the BEI structure to demonstrate progression in skills.
I see no reason why the proposed changes insofar as they impact Legal-licensed interpreters should not be approved as they merely eliminate the extension of time to earn the Legal-A license that was granted due to COVID. None of the language access personnel in the State courts with whom I shared the information expressed any	The Commission appreciates the comment and agrees.	No change

concerns about the proposed rulemaking for Legal-licensed interpreters to me.		
As both a law- and mental health-trained professional, it concerns me that steps are being taken to limit the number of legal interpreters who would be able to provide services to Deaf residents of Arizona. Acquaintances and clients have expressed concerns regarding the due process issues of not having interpreting services on a timely basis as well as the anxiety and distress of knowing there may be delays in the resolution of legal issues. It is rare that professional organizations and governing bodies choose not to grandfather in professionals who are already competently providing services during rule changes. I personally have seen grandfathering occur in several instances including here in Arizona when the Board of behavioral health changed from certification to licensure. I would strongly urge the Commission to reconsider their direction in this matter.	The 2017 licensure rule change required Legal A licensed interpreters who did not have their SCL certificate from RID and wished to stay in the Legal A category to obtain their CIC certificate from BEI. Due to the Covid pandemic, in March 2021, a rule change was made to allow extra time for those interpreters to obtain their CIC certificate. The extended time has expired. The Commission stands behind the decisions made and believes the Legal A category interpreters have had sufficient time to meet the current requirements.	No change
Before the 2017 rule making, Arizona Freelance Interpreting Services had 19 Legal A interpreters. Many with more than 20 years' experience. During Covid, many of the interpreters began working from home	The 2017 licensure rule change required Legal A licensed interpreters who did not have their SCL certificate from RID and wished to stay in the Legal A category to obtain their CIC certificate from BEI. Due to the	No change

providing VRI. The demand for ASL interpreting services in general increased. These two facts caused many interpreters to conclude they were busy enough and did not need to pursue additional certification or return to the community to provide onsite services. The Commission list of Legal A interpreters is long but many only provide VRI services, which may not be suitable for courtroom hearings. The BEI CIC is the only test currently available for legal testing and the closest testing facility is in TX and it can take up to 12 months from application to test results. With this system, Arizona will never be able to increase its number of Legal A interpreters to meet the demand of an increasing population. I am asking the Commission to grandfather those interpreters who held a Legal A before the rule change to ensure the deaf and hard of hearing communities receive accommodations and access to information.	Covid pandemic, in March 2021, a rule change was made to allow extra time for those interpreters to obtain their CIC certificate. The extended time has expired. The Commission stands behind the decisions made and believes the Legal A category interpreters have had sufficient time to meet the current requirements.	
I am in full support of the proposed changes. We've had plenty of time to know what the requirements are to work in the courts. I appreciate the fact you were flexible with the regulation during Covid. It's correct that a lot of people don't want to go	The Commission appreciates the comment.	No change

back into the community and work. But I don't see how changing the rules or adding grandfathering is going to change that. Maybe we need to look at other reasons interpreters prefer not to work in the courts. Maybe there's less incentive or the pay is not as great.		
I see no reason why the proposed changes insofar as they impact Legal-licensed interpreters should not be approved as they merely eliminate the extension of time to earn the Legal A license that was granted due to Covid, which has since expired. None of the language access personnel in the State courts with whom I shared the information expressed any concerns about the proposed rulemaking for Legal-licensed interpreters.	The Commission appreciates the comment.	No change

13. **All agencies shall list any other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

    None

    a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

       The licenses issued by the Commission to interpreters are not general permits as defined at A.R.S. § 41-1001. Under A.R.S. § 36-1946(3) the Commission is required to establish standards and procedures for the qualification and licensure of each classification of interpreters. The standards must include an assessment of each individual's education, examination, and work history (See A.R.S. § 36-1971(B)).

    b. **Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

       The Americans with Disabilities Act applies to individuals who are deaf, hard of hearing, or Deafblind. However, no federal law is directly applicable to the subject of any rule in this rulemaking.

    c. **Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

Not applicable

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rule:

None

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable

15. The full text of the rules follows:

Rule text begins on the next page.

ARTICLE 2. TELECOMMUNICATIONS EQUIPMENT DISTRIBUTION PROGRAM

R9-26-201. Definitions

In addition to the definitions listed in A.R.S. § 36-1941, the following terms apply to this Article and A.R.S. § 36-1947:

“Applicant” means a person who applies to the Commission for telecommunications equipment.

“Audiologist” means a person who is licensed under A.R.S. § 36-1940 by the Arizona Department of Health Services.

“Deafblind” means a person who is either deaf or hard of hearing and:

Has a central visual acuity of 20/200 or less in the better eye with corrective lenses, or

Has a field defect where the peripheral diameter of the visual field subtends an angular distance no greater than 20 degrees, or

Has a progressive visual loss with a prognosis of one or both of the conditions stated in the two preceding subsections.

“Director” means the Executive Director of the ~~Arizona~~ Commission ~~for the Deaf and Hard of Hearing~~.

“Hearing aid dispenser” has the same meaning as in A.R.S. § 36-1901.

“Hearing or speech-related disability” means a disability that prevents a person from hearing or articulating speech audibly or clearly, including deafness.

“Program” means the Telecommunications Equipment Distribution Program.

“Recipient” means a person who receives telecommunications equipment through the Program.

“Severely hearing or speech impaired” under A.R.S. § 36-1947(A) means a hearing or speech-related disability.

“Supplier” means a person that sells telecommunications equipment.

“Support service provider” means a trained individual who communicates visual, environmental, and social information to a DeafBlind individual to assist the DeafBlind individual to access the community and make decisions.

“Telecommunications equipment” means equipment that allows a person with a hearing or speech-related disability to access the telephone network.

“Vocational rehabilitation counselor” means ~~a Department of Economic Security employee~~ an individual who has a Master’s degree in rehabilitation counseling from a university accredited by the National Council on Rehabilitation Education and who is certified by the Commission on Rehabilitation Counseling.

“Voucher” means the Commission’s authorization of payment for telecommunications equipment.

R9-26-202. Eligibility

To be eligible for telecommunications equipment through the Program, a person shall:

1. Reside in Arizona;

2. Be a citizen of the U.S. or an alien whose presence in the U.S. is authorized under federal law;
3. Have a need for telecommunications equipment available through the Program due to a hearing or speech-related disability, as certified by an authorized person described in R9-26-203;
4. Have access to a telephone line; and
5. Not have used a voucher to purchase telecommunications equipment ~~within five years before the date of application under R9-26-203~~ that is still under warranty unless the individual's disability status ~~has~~ changed during ~~that time~~ the warranty period~~; and,~~
6. ~~Have returned to the Commission all telecommunications equipment that was distributed to the person by the Commission before June 30, 2002~~.

R9-26-203. Application Process

To apply for telecommunications equipment under the Program, an eligible person shall:

1. ~~Request~~ Obtain an application for participation in the Program from the Commission; and
2. Complete and return the application to the Commission with:
   a. Certification from an authorized person described under R9-26-204 that the applicant has a hearing or speech-related disability and needs the telecommunication equipment requested on the application;
   b. The eligible person's authorization for the Commission to use the information provided in the application to administer the Program; and
   ~~b.~~c. As required under A.R.S. § 41-1080(A), the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law.

R9-26-204. Persons Authorized to Certify Need for Telecommunications Equipment

A. The following licensed professionals may certify an applicant's hearing or speech-related disability and need for the requested telecommunications equipment:
1. A dispensing audiologist licensed in accordance with A.R.S. Title 36, Chapter 17;
2. An audiologist licensed in accordance with A.R.S. Title 36, Chapter 17;
3. A physician licensed in accordance with A.R.S. Title 32, Chapter 13 or 17;
4. A physician assistant licensed in accordance with A.R.S. Title 32, Chapter 25;
5. A nurse practitioner licensed in accordance with A.R.S. Title 32, Chapter 15;
6. A speech-language pathologist licensed in accordance with A.R.S. Title 36, Chapter 17;
7. A hearing aid dispenser licensed in accordance with A.R.S. Title 36, Chapter 17; or
8. A vocational rehabilitation counselor as defined at R9-26-201.

B. By certifying a hearing or speech-related disability and need for the requested telecommunications equipment, the certifier attests that the certifier:
1. Is authorized to certify under subsection (A);
2. Has evaluated the applicant's hearing or speech-related disability to determine the applicant's need for the telecommunications equipment requested on the application; and
3. Has determined that the applicant will benefit from the telecommunications equipment requested on the application.

R9-26-205. Vouchers

A. The Commission shall issue to an eligible applicant an individually numbered voucher for a specified dollar amount for the applicant to purchase telecommunications equipment for which the applicant has a certified need. The applicant shall use the voucher only to purchase the telecommunications equipment specified on the voucher.

B. Vouchers are non-transferable and have no cash value.

C. A voucher expires 90 days after its issuance date.

D. If a voucher is lost or stolen, the applicant may ~~apply~~ contact program staff for a replacement voucher ~~by requesting, completing~~ and ~~returning to the Commission a replacement voucher form in which the applicant~~ shall attest under penalty of perjury that:

1. The original voucher was stolen or lost; and
2. If the original voucher is recovered, the applicant shall return the original voucher to the Commission within 30 days after the voucher is recovered.

R9-26-207. Confidentiality

A. ~~The~~ As specified under R9-26-203, the Commission shall use the information provided by ~~the Program's~~ Program applicants or recipients ~~in the course of the administration of the Program~~ solely to administer the Program.

B. ~~The~~ Except as provided under subsection (A), the Commission shall not disclose the name of an applicant for or recipient of telecommunications equipment without a written request for disclosure. Even with a written request for disclosure, the Commission shall not disclose personal identifying or protected health information regarding an applicant or recipient.

ARTICLE 5. INTERPRETER LICENSURE AND REGULATION

R9 26 501. Definitions

In addition to the definitions in A.R.S. §§ 12-242 and 36-1941, in this Article, the following definitions apply unless otherwise specified:

"ACCI" means American Consortium of Certified Interpreters, an organization that certifies interpreters at one of three levels: ACCI Generalist, ACCI Advanced, or ACCI Master.

"Accredited" means approved by a regional or national accrediting agency recognized by the U.S. Department of Education.

"Applicant" means an individual seeking an original or renewal license from the Commission.

"Application" means the documents, forms, and additional information required by the Commission to be submitted by or on behalf of an applicant.

"BEI" means Board for Evaluation of Interpreters.

"CASLI" means the Center for the Assessment of Sign Language Interpretation, which administers the examinations used by RID in national certification programs.

"CDI" means certified deaf interpreter, a certification issued by RID or BEI.

"CI" means certificate of interpretation, a certification issued by RID.

"CIC" means Court Interpreter Certification, a legal specialist certification issued by BEI.

"CLIP-R" means conditional legal interpreting permit--relay, a certification issued by RID to a deaf or hard-of-hearing interpreter or transliterator who works in a legal setting.

"Continuing education" means a workshop, seminar, lecture, conference, class, or other educational activity relevant to the practice of interpreting.

"CSC" means comprehensive skills certificate, a certification issued by RID.

"CT" means certificate of transliteration, a certification issued by RID.

"Deaf interpreter" means an individual who is deaf or hard of hearing and provides interpreting for deaf individuals with special language needs.

"EIPA" means educational interpreter performance assessment, a diagnostic tool that measures proficiency in interpreting for children or young adults in an educational setting.

"Generalist interpreter" means an individual who provides interpreting in any community setting, except a legal setting, for which the individual is qualified by education, examination, and work history. A generalist interpreter provides interpreting in a legal setting only if appointed by a judge under A.R.S. § 12-242.

"IC" means interpretation certificate, a certification issued by RID.

"Intermediary Level III or V" means a certification issued by BEI for interpreters who are deaf or hard of hearing.

"Interpreter" means an individual who provides interpreting between American Sign Language and English.

"Legal interpreter" means an individual who is qualified by education, examination, and work history to provide interpreting in a legal setting.

"Class A legal interpreter" means a legal interpreter who provides interpreting in court proceedings or any other legal setting, as prescribed under A.R.S. § 12-242, and meets the certification requirement under R9-26-504(A)(1)(a). ~~An individual who is licensed by the Commission as a Class A legal interpreter on the date this Section takes effect, shall meet the certification requirement under R9-26-504(A)(1)(a) no later than the individual's renewal date, as specified in R9-26-507(A), in 2023.~~

"Class C legal interpreter" means a legal interpreter who provides interpreting in a legal setting, as prescribed under A.R.S. § 12-242, when teamed with a Class A legal interpreter and meets the certification requirement under R9-26-504(A)(1)(b).

"Class D legal interpreter" means a legal interpreter who meets the certification requirement under R9-26-504(A)(1)(c) and is either a deaf or hard-of-hearing interpreter or an oral transliterator.

"Legal training" means a structured program presented by the Commission, a court, Bar Association, law-enforcement association, RID, accredited institution, or comparable organization, providing information relevant to legal interpreting such as the following:

The requirements of A.R.S. § 12-242,

The structure of the judiciary system of this state,

The judiciary process of this state,

Administrative adjudicatory procedures,

Law enforcement procedures, or

Commonly used legal terms.

"Level III, IV, or V" means a certification issued by BEI.

"Licensee" means an interpreter who holds a current license issued under A.R.S. § 36-1974 and this Article.

"License year" means the days between the date of license issuance and the date of license expiration.

"Mentor" means an individual licensed under R9-26-503 or R9-26-504 who agrees to assist a provisional licensee to develop as an interpreter by occasionally observing the provisional licensee providing interpreting services and providing feedback.

"MCSC" means master comprehensive skills certificate, a certification issued by RID.

"NAD" means the National Association of the Deaf.

"NAD III (generalist)," means a certification issued by NAD.

"NAD IV (advanced)," means a certification issued by NAD.

"NAD V (master)," means a certification issued by NAD.

"NIC" means National Interpreter Certification.

"NIC Advanced" means a certification issued by NAD-RID.

"NIC Certified" means a certification issued by NAD-RID.

"NIC Master" means a certification issued by NAD-RID.

"OC:B" means oral certificate: basic, a certification issued by BEI.

"OC:C" means oral certificate: comprehensive, a certification issued by BEI.

"OIC" means oral interpreting certificate, a certification issued by RID in one of three categories: comprehensive, spoken to visible, or visible to spoken.

"Oral transliteration" means to facilitate communication between an individual who is deaf or hard of hearing and an individual who hears by using inaudible speech and natural gestures to convey a message to the deaf or hard-of-hearing individual and understanding and verbalizing the message and intent of the speech and mouth movements of the individual who is deaf or hard of hearing.

"OTC" means oral transliteration certificate, a certification issued by RID.

“Platform or performance setting” means an environment involving an appearance by a designated speaker or performers, typically on a raised surface.

“Provisional interpreter” means an individual who is qualified by education, examination, and work history to provide interpreting while pursuing RID, NAD, or BEI certification.

“Class A provisional interpreter” means a provisional interpreter who provides oral transliteration and is working towards certification by RID, NAD, or BEI. A Class A provisional interpreter shall not provide interpreting services in a legal setting.

“Class B provisional interpreter” means a provisional interpreter who is qualified to provide interpreting services without a team interpreter licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) and (b), except in a medical, mental health, platform or performance, or legal setting. A Class B provisional interpreter may provide interpreting services in a medical, mental health, or platform or performance setting only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b). A Class B provisional interpreter shall not provide interpreting services in a legal setting.

“Class C provisional interpreter” means a provisional interpreter who is qualified to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b). A Class C provisional interpreter shall not provide interpreting services in a legal setting.

“Class D provisional interpreter” means a provisional interpreter who is deaf or hard of hearing and is qualified to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or (b) or R9-26-504(A)(1)(a) through (c). A Class D provisional interpreter shall not provide interpreting services in a legal setting.

“Qualified interpreter” means an individual licensed under this Chapter who is able to interpret effectively, accurately, and impartially both receptively and expressively, using any necessary specialized vocabulary required by the interpreting situation.

“RID” means Registry of Interpreters for the Deaf.

“RSC” means reverse skills certificate, a certification issued by RID.

“SC:L” means specialist certificate: legal, a certification issued by RID.

“SC:PA” means specialist certificate: performing arts, a certification issued by RID.

“TC” means transliteration certificate, a certification issued by RID.

“State-issued certification” means a certification issued by a state regulatory board to an individual who demonstrates knowledge, skills, and abilities that meet or exceed the minimum needed by an American Sign Language interpreter to perform competently in a specified setting.

“Team” means two or more licensed interpreters, at least one of whom is licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b), providing interpreting for an individual or group of individuals during a single interpreting session.

"Trilingual Advanced or Master" means a specialist certification issued by BEI for interpreters of Spanish, English, and American Sign Language.

"Unprofessional conduct," as used in A.R.S. § 36-1976, means:

Violation of the NAD-RID Code of Professional Conduct, 2005, which is incorporated by reference and available from the Commission and RID, 333 Commerce Street, Alexandria, VA 22314, or www.rid.org. The material incorporated includes no later edition or amendment; or

Failure to comply with a provision of A.R.S. Title 36, Chapter 17.1, Article 2 or this Chapter.

"VRI" means video remote interpreting, a service that uses video telecommunication devices to provide interpreting between or among individuals who are at one or more locations separate from the interpreter.

R9 26 503. Application for Generalist Interpreter License

A. To apply for a generalist interpreter license, an applicant shall:

1. Comply with R9-26-502; and
2. Submit a photocopy of current documentation showing that the applicant holds one or more of the following certifications:
   a. Hearing interpreters: NAD III, IV, or V; RID CI, CSC, CT, IC, MCSC, RSC, SC:L, SC:PA, or TC; NIC Certified, Advanced, or Master; or BEI Levels III, IV, or V, Basic, Advanced, Master, Trilingual Advanced, Trilingual Master, CIC, or other certification deemed appropriate by the Commission;
   b. Deaf interpreters: RID CDI, CLIP-R, or SC:L; BEI Intermediary Level III or V, CDI, or other certification deemed appropriate by the Commission; or
   c. Oral interpreters: RID OIC or OTC, BEI OC:B or OC:C, or other certification deemed appropriate by the Commission.

B. If an applicant's documentation of certification expires during the licensure process, the Commission shall not complete the licensure process until the applicant submits current documentation of certification.

R9 26 505. Application for Provisional Interpreter License

A. To apply for a provisional interpreter license, an applicant shall comply with R9-26-502 and submit documentation of the following:

1. Education. The following hours of participation in an interpreter-preparation training program offered by an accredited college or university or approved by RID, NAD, or BEI:
   a. Class A or D provisional license: 40 hours; and
   b. Class B or C provisional license: 80 hours;
2. Examination. Pass the written portion of the RID, NAD, or BEI examination; and
3. Work experience. The following hours of interpreting for which a license is not required under A.R.S. § 36-1971:
   a. Class A provisional license: 24 hours;
   b. Class B provisional license:
      i. A score of at least 4.0 on the EIPA performance test; or
      ii. ACCI certification; or

iii. A state-issued certification or certificate of competency in good standing;

c. Class C provisional license: 80 hours; and

d. Class D provisional license: 40 hours.

B. In addition to the documentation required under subsection (A), an applicant for a Class B provisional license shall:

1. Have a letter submitted directly to the Commission by an individual licensed under R9-26-503 or R9-26-504 indicating that the individual agrees to:

   a. Act as a mentor to the applicant if the applicant is granted a provisional license;

   b. Observe the provisional licensee providing interpreting services at least once each month;

   c. Provide feedback to the provisional licensee following each observation; and

   d. Provide 30-days' notice to the provisional licensee and the Commission before terminating the mentoring relationship; and

2. Submit a letter to the Commission indicating that if the applicant is issued a provisional license, the applicant agrees to:

   a. Make and maintain a record of each time the mentor observes the applicant and a summary of the feedback provided;

   b. Make the record maintained under subsection (B)(2)(a) available to the Commission annually at license renewal; and

   c. Provide 30 days' notice to the Commission and the mentor before terminating the mentoring relationship; or

3. Submit a letter to the Commission indicating that if the applicant is issued a provisional license, the applicant agrees to:

   a. Team with an individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b) for at least eight hours each month;

   b. Maintain a journal that records the dates on which and the name of the licensee with whom teaming was done and a summary of any feedback provided; and

   c. Make the journal maintained under subsection (B)(3)(b) available to the Commission annually upon license renewal.

C. The Commission shall accept the following documentation of the criteria in subsection (A):

1. Education. A photocopy of documents showing that the applicant completed the hours required under subsection (A)(1);

2. Examination. A photocopy of the letter provided by RID, NAD, or BEI indicating that the applicant passed the written portion of the RID, NAD, or BEI examination;

3. Work experience.

   a. One or more letters, each of which is signed by an individual or a representative of an entity for whom the applicant provided interpreting, indicating:

      i. The name of the applicant,

      ii. The dates on which interpreting was provided, and

      iii. The hours of interpreting provided by the applicant; or

b. One or more paystubs, each of which indicates:
   i. The name of the applicant,
   ii. The job title of the applicant,
   iii. The dates on which interpreting was provided by the applicant, and
   iv. The hours of interpreting provided by the applicant, and
c. For an applicant for a Class B provisional license:
   i. A photocopy of the letter provided by EIPA indicating the applicant's score on the EIPA performance test,
   ii. A photocopy of the applicant's ACCI certificate, or
   iii. A photocopy of the applicant's state-issued certification or certificate of competency in good standing.

R9 26 507. License Renewal

A. Renewal of a generalist or legal interpreter license.

1. A generalist or legal interpreter license expires one year after the license is issued. To continue to practice as a generalist or legal interpreter, the licensee shall, no more than 60 days before the expiration date, submit to the Commission a license renewal application form that provides the following information about the licensee:
   a. Full name;
   b. Social Security number;
   c. Home or business address;
   d. E-mail address;
   e. Home, business, or mobile telephone number;
   f. The start and end dates of the applicant's current certification cycle with RID, NAD, or BEI, as applicable;
   g. Name of any state or country in which the licensee is currently licensed or certified to practice as an interpreter, the license or certificate number, date issued and date of expiration, and a statement whether the license or certificate is or has been the subject of discipline during the previous year and if the answer is yes, a complete explanation of the discipline including date, nature of complaint, and discipline imposed;
   h. A statement of whether the licensee has been denied a license or certificate to practice as an interpreter by a licensing authority during the previous year and if the answer is yes, a complete explanation of the denial including date, name of the interpreter licensing authority, and reason for denial;
   i. A statement of whether the licensee has been convicted of a felony or of an offense involving moral turpitude in this or any other jurisdiction during the previous year and if the answer is yes, a complete explanation of the charge and place and date of conviction;
   j. A statement of whether the licensee has been adjudicated insane or incompetent during the previous year and if the answer is yes, a complete explanation including date and place of adjudication;

k. A statement of whether the applicant's NAD, RID, or BEI certification lapsed during the previous year and if so, a complete explanation including date of and reason for the lapse;

l. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction lapsed during the previous year and if so, a complete explanation including date of and reason for the lapse;

m. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction was subject to a complaint during the previous year and if so, a complete explanation including date, allegation, and discipline imposed, if any;

n. A statement of whether the applicant's NAD, RID, or BEI certification was subject to a complaint during the previous year and if so, a complete explanation including date, allegation, and discipline imposed, if any, and if discipline was imposed, a statement of whether the notice required under R9-26-518 was submitted to the Commission;

o. A statement of whether the applicant completed any continuing education during the previous year and if so, the number of hours completed; and

p. A statement signed by the licensee verifying the truthfulness of the information provided and affirming that the licensee will comply with the NAD-RID Code of Professional Conduct.

2. In addition to the license renewal application form required under subsection (A)(1), the generalist or legal licensee shall submit or have submitted on the licensee’s behalf:

   a. A photocopy of current documentation showing the applicant’s NAD, RID, or BEI certification is in good standing. If the licensee's documentation expires during the renewal process, the Commission shall not complete the license renewal process until the licensee submits a photocopy of current documentation;

   b. If the answer to any item in subsections (A)(1)(g) through (A)(1)(m) is yes, a copy of any relevant order; and

   c. The fee required under R9-26-508.

3. If a generalist or legal licensee fails to comply with subsections (A)(1) and (A)(2) on or before the license expiration date, the license expires. The former licensee may renew the expired license by complying with subsections (A)(1) and (A)(2), and paying the penalty prescribed under R9-26-508 no later than 30 days after the license expired. If a former licensee fails to renew an expired license within the 30 days provided in this subsection, the former licensee shall stop providing interpreting for which a license is required under A.R.S. § 36-1971.

4. If an expired license is not renewed under subsection (A)(3), the former licensee may obtain a license only by applying as a new applicant.

B. Renewal of a provisional interpreter license.

1. A provisional interpreter license expires one year after the date of issuance.

2. To continue to practice as a provisional interpreter, the licensee shall, no more than 60 days before the expiration date, submit to the Commission a license renewal application form that provides the information specified under subsection (A)(1).

3. In addition to the license renewal application form required under subsection (B)(2), the provisional licensee shall submit or have submitted on the licensee’s behalf:

   a. If the answer to any item in subsections (A)(1)(h) through (A)(1)(m) is yes, a copy of any relevant order;

b. Documentation required under R9-26-510(C) that demonstrates compliance with the continuing education requirement in R9-26-510; and

c. The fee required under R9-26-508;

d. If a Class B provisional licensee wishes to renew the Class B provisional license, letters that meet the standards at R9-26-505(B)(1) and (2) or a letter that meets the standards at R9-26-505(B)(3); and

e. If a Class C provisional licensee wishes to renew the Class C provisional license, an affirmation that the licensee has provided and will continue to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b); or

f. If a Class C provisional licensee wishes to move to a Class B provisional license:

i. Letters that meet the standards at R9-26-505(B)(1) and (2) or a letter that meets the standards at R9-26-505(B)(3), and

ii. Evidence required under R9-26-505(C)(3)(a) or (b) showing at least 500 hours of work experience earned while working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b), or

iii. A score of at least 4.0 on the EIPA performance test.

4. If a provisional licensee fails to comply with subsections (B)(2) and (3) on or before the license expiration date, the license expires. Unless the expired provisional license has previously been renewed under subsections (B)(2) and (3), the former licensee may renew the expired license by complying with subsections (B)(2) and (3) and paying the penalty prescribed under R9-26-508 no later than 30 days after the license expired. If a former licensee fails to renew an expired license within the 30 days provided in this subsection, the former licensee shall stop providing interpreting for which a license is required under A.R.S. § 36-1971.

5. The Commission shall not issue a provisional interpreter license to an interpreter for more than five years over the interpreter's lifetime ~~except that if an interpreter is unable to pursue RID, NAD, or BEI certification because the testing necessary for certification is unavailable due to the COVID-19 pandemic, the Commission shall renew the provisional interpreter license of any interpreter who:~~

~~a. Complies fully with this subsection;~~

~~b. Held a valid provisional interpreter license in its final renewal year on December 30, 2020; and~~

~~c. Obtains certification by RID, NAD, or BEI no later than the interpreter's renewal date, as specified in subsection (B)(1), in 2023~~.

C. If the documentation previously submitted under R9-26-502(B)(4) was a limited form of work authorization issued by the federal government, an applicant for license renewal shall submit evidence that the work authorization has not expired.

D. The Commission shall require a licensee to submit the information required under R9-26-502(B)(5) every five years so an updated photograph is used in the identification badge required under R9-26-515.

R9-26-509. Procedures for Processing Applications; Time Frames

A. For the purpose of A.R.S. § 41-1073, the Commission establishes the following licensing time frames:

1. Administrative completeness review time frame: 30 days;
2. Substantive review time frame: 60 days; and
3. Overall time frame: 90 days.

B. The administrative completeness review time frame listed in subsection (A)(1) begins on the date the Commission receives a license application or license renewal application. During the administrative completeness review time frame, the Commission shall notify the applicant that the application is either complete or incomplete. If the application is incomplete, the Commission shall specify in the notice what information is missing.

C. An applicant with an incomplete application shall supply the missing information within 30 days from the date of the notice. Both the administrative completeness review and overall time frames are suspended from the date of the Commission's notice until the date that the Commission's office receives all missing information.

D. Upon receipt of all missing information, the Commission shall notify the applicant that the application is complete. The Commission shall not send a separate notice of completeness if the Commission grants or denies a license within the administrative completeness review time frame in subsection (A)(1).

E. The substantive review time frame listed in subsection (A)(2) begins on the date of the Commission's notice of administrative completeness or on expiration of the time listed in subsection (A)(1).

F. If the Commission determines during the substantive review time frame that additional information is needed, the Commission shall send the applicant a comprehensive written request for the additional information. The applicant shall supply the additional information within 60 days from the date of the request. Both the substantive review and overall time frames are suspended from the date on the Commission's request until the date the Commission office receives the additional information.

G. If an applicant needs additional time in which to respond under subsection (C) or (F), the applicant shall submit a written notice of a 120-day extension to the Commission before expiration of the time to respond ~~that includes the date by which the applicant will submit the information. The applicant shall establish an extension date that is no more than 120 days from the date~~ established under subsection (C) or (F).

H. If an applicant fails to submit information within the time provided under subsection (C) or (F) or as extended under subsection (G), the Commission shall close the applicant's file. An applicant whose file is closed and who later wishes to be licensed, shall apply anew.

I. Within the time listed in subsection (A)(3), the Commission shall:

1. Grant a license to an applicant who meets the requirements in A.R.S. § 36-1973 and this Article, or
2. Deny a license to an applicant who does not meet the requirements in A.R.S. § 36-1973 or this Article.

J. If the Commission denies a license, the Commission shall send the applicant a written notice explaining:

1. The reason for the denial with citations to supporting statutes or rules,
2. The applicant's right to appeal the denial and have a hearing,
3. The time for appealing the denial, and
4. The applicant's right to request an informal settlement conference.

ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT[1]
TITLE 9. HEALTH SERVICES
CHAPTER 26. COMMISSION FOR THE DEAF AND THE HARD OF HEARING

1. Identification of the rulemaking:

   The Commission for the Deaf and the Hard of Hearing is established at A.R.S. § 36-1942. The Commission is to act as a bureau of information to the deaf, hard of hearing, deafblind, and speech-impaired, state agencies and institutions providing services to these communities, and governmental and community agencies and programs. The Commission operates a telecommunications equipment distribution program as authorized under A.R.S. § 36-1947. The rules made under this authority are amended in this rulemaking. The Commission is required by A.R.S. § 36-1946 (1) through (3) to make rules regarding licensure of interpreters for the deaf and the hard of hearing. Some of the rules made under this requirement are also amended in this rulemaking. The Commission is assisted by a staff of 21 FTEs. During the last year, the Commission collected $9,331 in fees and was appropriated $4,644,000.

   Article 2, which addresses the telecommunications equipment distribution program, is amended to make an individual eligible for a telecommunications equipment voucher if a previous voucher was used to purchase equipment that is no longer under warranty. Because most telecommunications equipment has a warranty of fewer than five years, the amended rules mean an individual will be eligible for a voucher for new equipment sooner than under the current rules. The Commission also is simplifying the procedure for replacing a lost or stolen voucher. Under the amended rules, an applicant has only to contact program staff and attest that the original voucher was lost or stolen.

   Article 5, which addresses interpreter licensure and regulation, is amended to delete the expired Covid19-related provision providing extra time for a Legal A or provisional interpreter to take a required performance examination. The Commission is also easing a regulatory burden by allowing an applicant to provide notice of a time extension rather than requesting an extension.

   As required under A.R.S. § 41-1039(A), authorization to proceed with this rulemaking was obtained from Andrew Sugrue in an e-mail dated June 21, 2023. Approval to submit this

[1] If adequate data are not reasonably available, the agency shall explain the limitations of the data, the methods used in an attempt to obtain the data, and characterize the probable impacts in qualitative terms. (A.R.S. § 41-1055(C)).

rulemaking to GRRC, as required under A.R.S. § 41-1039(B), was provided by Mr. Sugrue on September 10, 2024.

a. The conduct and its frequency of occurrence that the rule is designed to change:
Until the rulemaking is completed, an unnecessary provision regarding the time in which some interpreters must take a performance examination and burdensome provisions regarding a time extension, replacing a lost or stolen voucher, and becoming eligible for a new equipment voucher will remain.

b. The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed:
It is not good government to have unnecessary or burdensome provisions in rule.

c. The estimated change in frequency of the targeted conduct expected from the rule change:
When the rulemaking is completed, the unnecessary and burdensome provisions will be deleted or amended. The Commission will have addressed the issues identified in the 5YRR approved by the Council on October 2, 2022.

2. A brief summary of the information included in the economic, small business, and consumer impact statement:
The Commission believes the provision making an individual eligible for a voucher to purchase new telecommunications equipment when previously purchased equipment is no longer under warranty is most apt to have economic impact because it will allow individuals to obtain new equipment more frequently. Changes reducing or eliminating unnecessary or burdensome provisions will have important but minimal economic impact.

3. The person to contact to submit or request additional data on the information included in the economic, small business, and consumer impact statement:
Name: Carmen Green Smith, Deputy Director
Address: Commission for the Deaf and the Hard of Hearing
100 N. 15th Ave., Suite 104
Phoenix, AZ 85007
Telephone: (602) 542-3362
Fax: (602) 542-3380
E-mail: C.green@acdhh.az.gov

4. Persons who will be directly affected by, bear the costs of, or directly benefit from the rulemaking:

Individuals who participate in the telecommunications equipment program, interpreters, and the Commission are persons who will be directly affected by, bear the costs of, and directly benefit from the rulemaking.

Funding for the telecommunications equipment program is provided under A.R.S. § 42-5252(B). During the last year, $120,000 was deposited in the telecommunication fund for the deaf and $117,077was distributed to applicants. During the last year, 141 individuals applied to the Commission to participate in the program. The Commission currently has 9,259 telecommunication devices placed with participating individuals. The Commission estimates that as a result of the rule change making it likely that equipment can be replaced more often, the cost of the program will increase by $15,000 annually. Because the Commission provides program participants with vouchers they use to purchase telecommunications equipment, vendors of telecommunications equipment indirectly benefit from the program and as a result of this rulemaking, may have increased benefit.

During the last year, no applicant applied to the Commission to have a lost or stolen voucher replaced. As a result of the rule change, both applicants and the Commission will have reduced regulatory burden to replace a lost or stolen voucher.

Six individuals benefitted from the extension provided under the Covid19-related provision allowing extra time for a Legal A or provisional interpreter to take a required performance examination. Three of these were Legal A interpreters and three were provisional interpreters. This extra time expired automatically under the terms in the rules. The expired provisions are deleted in this rulemaking.

During the last year, 13 interpreter applicants requested an extension of time in which to submit information to the Commission. Under the rule amendments, a request will not be necessary. Rather, the applicant will simply provide notice of an extension.

The Commission incurred the cost of this rulemaking and will incur the cost of implementing and enforcing the rule changes. The Commission will have the benefit of rules that no longer contain expired provisions and that reduce regulatory burdens.

5. Cost-benefit analysis:

a. Costs and benefits to state agencies directly affected by the rulemaking including the number of new full-time employees at the implementing agency required to implement and enforce the proposed rule:

   The Commission is the only agency directly affected by the rulemaking. The Commission will not need a new full-time employee to implement and enforce the rule provisions.

b. Costs and benefits to political subdivisions directly affected by the rulemaking:

   No political subdivision is directly affected by the rulemaking.

c. Costs and benefits to businesses directly affected by the rulemaking:

   Interpreters are businesses directly affected by the rulemaking. Their costs and benefits are discussed in item 4.

6. Impact on private and public employment:

   The rulemaking will have no impact on private or public employment.

7. Impact on small businesses[2]:

   a. Identification of the small business subject to the rulemaking:

      Interpreters are small businesses subject to the rulemaking.

   b. Administrative and other costs required for compliance with the rulemaking:

      Statute requires that an interpreter be licensed and the license be renewed. As required by statute, the Commission established the education, examination, and work history required for individuals to be licensed as a legal, generalist, or provisional interpreter. An individual must meet the established standards and is required to apply for licensure and pay a fee.

   c. Description of methods that may be used to reduce the impact on small businesses:

      All interpreters are small businesses. As a result, it is not possible to reduce the economic impact of rules on small businesses and still fulfill the Commission's regulatory responsibilities.

8. Cost and benefit to private persons and consumers who are directly affected by the rulemaking:

   Private persons and consumers are not directly affected by the rulemaking. However, deaf and hard of hearing Arizonans will be indirectly affected by the Commission's efforts to ensure all interpreters are qualified.

9. Probable effects on state revenues:

   The rulemaking will have no effect on state revenues.

---

[2] Small business has the meaning specified in A.R.S. § 41-1001(23).

10. Less intrusive or less costly alternative methods considered:

    The Commission believes the rulemaking is neither intrusive nor costly. As a result, no alternative methods were considered.

As of February 1, 2024

36-1941. Definitions

In this chapter, unless the context otherwise requires:

1. "Commission" means the commission for the deaf and the hard of hearing.

2. "Deaf" means a person who cannot generally understand speech sounds with or without a hearing aid when in optimal listening conditions.

3. "Deafblind" means a person who is deaf or hard of hearing, who has a central visual acuity of 20/200 or less in the better eye with corrective lenses, or a field defect such that the peripheral diameter of visual field subtends an angular distance not greater than twenty degrees, or a progressive visual loss having a prognosis leading to one or both of these conditions, and for whom the combination of the hearing and vision loss described affects the person's ability to communicate and receive environmental information both visually and auditorily.

4. "Hard of hearing" means a person who has a degree of hearing loss greater than 40dB PTA-2, but less than 85dB PTA-2, in the better ear.

5. "Interpreting" means translating or transliterating English concepts to any necessary specialized vocabulary used by a consumer or translating a consumer specialized vocabulary to English concepts.

6. "Necessary specialized vocabulary" includes American sign language, English based sign language, cued speech and oral interpreting.

7. "PTA-2" means the average of hearing levels at one thousand, two thousand and four thousand Hz.

36-1942. Commission for the deaf and the hard of hearing

A. The commission for the deaf and the hard of hearing is established consisting of the following members appointed by the governor:

1. One member who is selected from the department of economic security.

2. One member who is selected from the Arizona state schools for the deaf and the blind at Tucson or the Phoenix day school for the deaf.

3. One member who is a dispensing clinical audiologist licensed pursuant to chapter 17 of this title.

4. One member who is a hearing aid dispenser licensed pursuant to chapter 17 of this title.

5. Four members who are deaf persons.

6. One member who is a licensed sign language interpreter.

7. One member who is a parent of a deaf person.

8. Four members who are hard of hearing.

B. Commission members serve three years and may be reappointed once. The governor may remove a commission member for cause.

C. The commission shall meet at least four times a year at the call of the chairman, who shall be selected by the commission from among its membership.

D. Members of the commission are not eligible to receive compensation but are eligible to receive reimbursement of expenses pursuant to title 38, chapter 4, article 2.

36-1943. Executive director; duties

A. Subject to title 41, chapter 4, article 4, the commission shall appoint an executive director who serves at the pleasure of the commission. Subject to title 41, chapter 4, article 4, the commission may employ other employees as necessary, determine their compensation pursuant to section 38-611 and prescribe their powers and duties. With the approval of the commission, the executive director may contract for professional, technical and clerical services necessary to carry out functions of the commission.

B. The executive director shall be a trained professional experienced in problems of the deaf and the hard of hearing and skilled in the use of manual communication, commonly referred to as sign language, and may be either a deaf person, a person who is hard of hearing or a person with normal hearing. The executive director shall assist the commission to implement its programs and activities and to implement this chapter. The executive director shall not be a commission member. The executive director is eligible to receive compensation set by the commission within the range determined pursuant to section 38-611.

36-1944. Duties

The commission shall act as a bureau of information to the deaf, the hard of hearing and the deafblind, state agencies and institutions providing services to the deaf, the hard of hearing and the deafblind, local agencies of government and other public or private community agencies and programs. In this capacity, the commission shall:

1. Inform the deaf, the hard of hearing and the deafblind of the availability of the programs and activities of the commission and other services available for the deaf, the hard of hearing and the deafblind at all levels of government.

2. Develop and foster a framework for consultation and cooperation with the rehabilitation services bureau of the department of economic security and with all institutions represented on the commission.

3. Study issues relating to the deaf, the hard of hearing and the deafblind, review the administration and operation of the various programs for the deaf, the hard of hearing and the deafblind in this state and make recommendations concerning these problems and programs to the several agencies and institutions represented on the commission as it deems necessary.

4. Submit an annual report to the governor and the legislature concerning its findings and recommendations.

5. Review the problems of the deaf, the hard of hearing and the deafblind as they relate to the need for effective and appropriate auxiliary aids in public places.

6. Review and compile information on the development of acoustical technology for the hard of hearing and advocate the use of this technology if it deems appropriate.

7. Make recommendations to state agencies, political subdivisions and institutions on how to meet the needs of the deaf, the hard of hearing and the deafblind.

8. Make recommendations to the legislature regarding statutory changes needed:

(a) To develop and support statewide newborn child hearing loss screening programs.

(b) To develop and update assessment standards that optimize the language acquisition and literacy development of deaf and hard of hearing newborns, infants and children.

36-1945. Commission for the deaf and the hard of hearing fund; gifts and donations; annual report

A. The commission for the deaf and the hard of hearing fund is established consisting of fees, penalties and any legislative appropriations. The commission shall administer the fund. Monies in the fund are subject to legislative appropriation.

B. The commission may accept and spend federal monies and private grants, gifts, contributions and devises to assist in carrying out the purposes of this chapter. These monies do not revert to the state general fund at the end of a fiscal year.

C. The commission shall submit an annual report to the governor on all monies accepted by the commission pursuant to subsection B, the names of the donors and the respective amounts contributed and the amount of all disbursements from the fund.

36-1946. Interpreters for the deaf and the hard of hearing; certification; licensure

The commission shall:

1. Adopt rules necessary to achieve the purposes of section 12-242.

2. By rule, classify interpreters for the deaf and the hard of hearing based on the level of interpreting skills acquired by that person.

3. By rule, establish standards and procedures for the qualification and licensure of each classification of interpreters.

4. Help establish partnerships with colleges and universities in this state to provide interpreter and support service provider training and degree programs.

5. By rule, establish standards and procedures to certify sign language teachers to teach American sign language.

6. Beginning on September 1, 2007, license interpreters for the deaf and the hard of hearing pursuant to article 2 of this chapter.

36-1947. Telecommunication devices for the deaf and the hearing and speech impaired; fund

A. The commission shall establish and administer a statewide program to purchase, repair and distribute telecommunication devices to residents of this state who are deaf or severely hearing or speech impaired and establish a dual party relay system making all phases of public telephone service available to persons who are deaf or severely hearing or speech impaired.

B. The commission may adopt administrative procedures, rules, criteria and forms to establish and administer the telecommunication device program under this section.

C. Telecommunication devices furnished by the commission under this section remain the property of this state. A person who receives a telecommunication device from the commission under this section is liable for the loss of or damage to the device. The commission may impose a civil penalty against the person in an amount equal to the cost of the device or the amount of damage done to the device. If a

person objects to the imposition of a civil penalty, the commission shall conduct a hearing as prescribed in title 41, chapter 6, article 10. Monies collected by the commission under this subsection shall be deposited in the telecommunication fund for the deaf established by subsection D of this section.

D. The telecommunication fund for the deaf is established. The commission shall administer the fund. Monies in the fund shall be derived from the telecommunication services excise tax revenues distributed pursuant to section 42-5252, subsection B. Interest accruing to the fund shall be deposited in the fund. Monies in the fund are exempt from section 35-190 relating to lapsing of appropriations. Subject to legislative appropriation, the commission shall use fund monies to purchase and repair telecommunication devices, to administer the program established by this section and for the operating costs of the commission.

36-1971. Licensure; acts and persons not affected

A. A person shall not practice as an interpreter for the deaf and the hard of hearing without a license issued pursuant to this article. The licensure requirements of this article also apply to interpreters who provide services for legal proceedings as prescribed in section 12-242.

B. The commission by rule shall prescribe education, examination and work history requirements for the following three categories of licenses:

1. Legal.

2. Generalist.

3. Provisional.

C. This article does not apply to:

1. An interpreter who works in this state for less than twenty days if that person registers with the commission to provide interpreting services in nonlegal situations.

2. An interpreter who provides interpreting services at religious activities.

3. An interpreter who provides interpreting services on an emergency basis if the delay necessary to obtain a licensed interpreter is likely to cause injury or loss to the consumer.

4. An interpreter who works without compensation in nonlegal situations.

5. An interpreter who works in a school in this state pursuant to the individual education plan of a deaf or hard of hearing pupil. The qualifications of an interpreter working in a school in this state shall be determined by the individualized education program team. A school district shall inform a parent or guardian of a deaf or hard of hearing pupil of the parent or guardian's right to request a licensed interpreter.

6. Activities and services of an interpreter intern or student in training if both of the following are true:

(a) The interpreter is enrolled in a program of study in interpreting at an accredited institution of higher learning.

(b) The interpreter works under the supervision of a person licensed pursuant to this article as part of a supervised program of study and is identified to all consumers as an interpreter intern or student in training.

36-1972. Use of title; prohibited acts; violation; classification

A. A person who is not licensed pursuant to this article shall not:

1. Use any title, abbreviation, words, letters, signs or figures to indicate that the person is licensed pursuant to this chapter.

2. Practice as an interpreter for the deaf and the hard of hearing.

3. Use another person's license.

B. A person who violates this section is guilty of a class 2 misdemeanor.

36-1973. Qualifications for licensure

A. To receive a license to practice as an interpreter pursuant to this article a person shall submit an application and application fee as prescribed by the commission.

B. The applicant shall document to the commission's satisfaction that the applicant has successfully completed the education, examination and work history requirements for the specific category of license for which the licensee is applying.

36-1974. Issuance and renewal of license; continuing education

A. The executive director shall issue a license if the applicant has satisfied all of the requirements for licensure under this article.

B. A license issued pursuant to this article is subject to renewal one year after the date it was issued and terminates thirty days after the renewal date unless it is renewed.

C. Each licensee shall renew the license not earlier than sixty days before and not later than thirty days after the license expires by submitting the renewal fee and a completed renewal form. A licensee who does not renew a license as required by this article must also pay a penalty fee as prescribed by the commission for late renewal. A person who practices interpreting in this state after that person's license has expired is in violation of this article.

D. A person whose license terminates shall submit an application and application fee as an original applicant for licensure.

E. The commission by rule may prescribe continuing education requirements as a condition of license renewal.

36-1975. Denial of licensure

The commission may refuse to issue or renew a license if the commission finds that any of the following is true:

1. The applicant committed fraud or misrepresentation in applying for a license in this state or another state.

2. The applicant was convicted of a felony offense or any other offense involving moral turpitude.

3. The applicant does not meet minimum qualifications as prescribed by this article.

4. The applicant was adjudicated insane or incompetent.

5. The applicant engaged in fraud, dishonesty or corruption on a certification examination in another state.

36-1976. Revocation or suspension of license

A. The commission may revoke or suspend a license issued under this article, place a licensee on probation, issue a reprimand or impose a civil penalty for any of the following reasons:

1. Unprofessional conduct.

2. A violation of this article.

3. Gross negligence or incompetence in the performance of duties.

4. Fraud, dishonesty or corruption.

5. Inability to perform the duties of an interpreter at a level of skill that is required by the commission.

6. Conviction of a felony offense or any other offense involving moral turpitude.

7. Failing to meet minimum qualifications as prescribed by this article.

8. Adjudication of insanity or incompetency.

B. Before it takes disciplinary action pursuant to this section, the commission shall give a licensee notice and an opportunity for a hearing pursuant to its rules.

C. The commission may issue subpoenas, examine witnesses and administer oaths pursuant to a hearing held under this section.

36-1977. Right to examine and copy evidence

In connection with a commission investigation conducted pursuant to section 36-1976, the commission at all reasonable times has the right to examine and copy any documents, reports, records or other physical evidence of any person being investigated or reports, records and any other documents maintained by and in the possession of any public or private agency if the commission believes this information is related to unprofessional conduct or the mental or physical ability of a licensee to practice pursuant to this article.

36-1978. Injunctive relief; bond; service of process

A. In addition to all other available remedies, if the commission has any reason to believe that a person has violated this article or a commission rule, the commission through the attorney general or the county attorney of the county in which the violation is alleged to have occurred may apply to the superior court in that county for an injunction restraining that person from engaging in the violation.

B. The court shall issue a temporary restraining order, a preliminary injunction or a permanent injunction without requiring the commission to post a bond.

C. Service of process may be on the defendant in any county of this state where the defendant is found.

ARTICLE 1. REPEALED

R9-26-101. Renumbered

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Amended by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-101 renumbered to Section R9-26-201 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

ARTICLE 2. TELECOMMUNICATIONS EQUIPMENT DISTRIBUTION PROGRAM

R9-26-201. Definitions

In addition to the definitions listed in A.R.S. § 36-1941, the following terms apply to this Article and A.R.S. § 36-1947:

"Applicant" means a person who applies to the Commission for telecommunications equipment.

"Audiologist" means a person who is licensed under A.R.S. § 36-1940 by the Arizona Department of Health Services.

"Deafblind" means a person who is either deaf or hard of hearing and:

Has a central visual acuity of 20/200 or less in the better eye with corrective lenses, or

Has a field defect where the peripheral diameter of the visual field subtends an angular distance no greater than 20 degrees, or

Has a progressive visual loss with a prognosis of one or both of the conditions stated in the two preceding subsections.

"Director" means the Executive Director of the Arizona Commission for the Deaf and Hard of Hearing.

"Hearing aid dispenser" has the same meaning as in A.R.S. § 36-1901.

"Hearing or speech-related disability" means a disability that prevents a person from hearing or articulating speech audibly or clearly, including deafness.

"Program" means the Telecommunications Equipment Distribution Program.

"Recipient" means a person who receives telecommunications equipment through the Program.

"Severely hearing or speech impaired" under A.R.S. § 36-1947(A) means a hearing or speech-related disability.

"Supplier" means a person that sells telecommunications equipment.

"Telecommunications equipment" means equipment that allows a person with a hearing or speech-related disability to access the telephone network.

"Vocational rehabilitation counselor" means a Department of Economic Security employee who has a Master's degree in rehabilitation counseling from a university accredited by the National Council on Rehabilitation Education and who is certified by the Commission on Rehabilitation Counseling.

"Voucher" means the Commission's authorization of payment for telecommunications equipment.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-201 renumbered to R9-26-202; new Section R9-26-201 renumbered from R9-26-101 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-202. Eligibility

To be eligible for telecommunications equipment through the Program, a person shall:

1. Reside in Arizona;
2. Be a citizen of the U.S. or an alien whose presence in the U.S. is authorized under federal law;
3. Have a need for telecommunications equipment available through the Program due to a hearing or speech-related disability, as certified by an authorized person described in R9-26-203;
4. Have access to a telephone line;
5. Not have used a voucher to purchase telecommunications equipment within five years before the date of application under R9-26-203 unless the individual's disability status has changed during that time; and,
6. Have returned to the Commission all telecommunications equipment that was distributed to the person by the Commission before June 30, 2002.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section R9-26-202 renumbered from R9-26-301 and amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-202 renumbered to R9-26-203; new Section R9-26-202 renumbered from R9-26-201 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-203. Application Process

To apply for telecommunications equipment under the Program, an eligible person shall:

1. Request an application for participation in the Program from the Commission; and
2. Complete and return the application to the Commission with:
   a. Certification from an authorized person described under R9-26-204 that the applicant has a hearing or speech-related disability and needs the telecommunication equipment requested on the application; and
   b. As required under A.R.S. § 41-1080(A), the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section R9-26-203 renumbered from R9-26-304 and amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-203 renumbered to R9-26-204; new Section R9-26-203 renumbered from R9-26-202 and amended by final rulemaking at 22 A.A.R. 1675, effec-

tive August 15, 2016 (Supp. 16-2).

R9-26-204. Persons Authorized to Certify Need for Telecommunications Equipment

A. The following licensed professionals may certify an applicant's hearing or speech-related disability and need for the requested telecommunications equipment:
1. A dispensing audiologist licensed in accordance with A.R.S. Title 36, Chapter 17;
2. An audiologist licensed in accordance with A.R.S. Title 36, Chapter 17;
3. A physician licensed in accordance with A.R.S. Title 32, Chapter 13 or 17;
4. A physician assistant licensed in accordance with A.R.S. Title 32, Chapter 25;
5. A nurse practitioner licensed in accordance with A.R.S. Title 32, Chapter 15;
6. A speech-language pathologist licensed in accordance with A.R.S. Title 36, Chapter 17;
7. A hearing aid dispenser licensed in accordance with A.R.S. Title 36, Chapter 17; or
8. A vocational rehabilitation counselor.

B. By certifying a hearing or speech-related disability and need for the requested telecommunications equipment, the certifier attests that the certifier:
1. Is authorized to certify under subsection (A);
2. Has evaluated the applicant's hearing or speech-related disability to determine the applicant's need for the telecommunications equipment requested on the application; and
3. Has determined that the applicant will benefit from the telecommunications equipment requested on the application.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section R9-26-204 renumbered from R9-26-305 and amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-204 renumbered to R9-26-205; new Section R9-26-204 renumbered from R9-26-203 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-205. Vouchers

A. The Commission shall issue to an eligible applicant an individually numbered voucher for a specified dollar amount for the applicant to purchase telecommunications equipment for which the applicant has a certified need. The applicant shall use the voucher only to purchase the telecommunications equipment specified on the voucher.

B. Vouchers are non-transferable and have no cash value.

C. A voucher expires 90 days after its issuance date.

D. If a voucher is lost or stolen, the applicant may apply for a replacement voucher by requesting, completing and returning to the Commission a replacement voucher form in which the applicant shall attest under penalty of perjury that:
1. The original voucher was stolen or lost; and
2. If the original voucher is recovered, the applicant shall return the original voucher to the Commission within 30 days after the voucher is recovered.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section renumbered to R9-26-302 by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). New Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-205 renumbered to R9-26-206; new Section R9-26-205 renumbered from R9-26-204 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-206. Redeeming a Voucher

A. To redeem a voucher for telecommunications equipment under the Program, a supplier shall submit to the Commission the voucher with a copy of a receipt, which is signed by the supplier and the recipient of the telecommunications equipment and which specifies the telecommunications equipment sold and its purchase price.

B. The Commission shall verify the accuracy of information submitted on the receipt and the validity of the voucher.

C. The Commission shall reimburse to the supplier the portion of the purchase price of the telecommunications equipment that does not exceed the amount printed on the voucher.

D. The Commission shall not reimburse to the supplier an amount in excess of the amount printed on the voucher.

E. If the amount printed on the voucher exceeds the purchase price of the telecommunications equipment, the supplier shall not refund the difference between the two amounts to the recipient of the telecommunications equipment in any form including money, equipment, or other goods and services.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section renumbered to R9-26-301 by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). New Section made by final rulemaking at 8 A.A.R. 4292, effective November 18, 2002 (Supp. 02-3). Section R9-26-206 renumbered to R9-26-207; new Section R9-26-206 renumbered from R9-26-205 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-207. Confidentiality

A. The Commission shall use the information provided by the Program's applicants or recipients in the course of the administration of the Program solely to administer the Program.

B. The Commission shall not disclose the name of an applicant for or recipient of telecommunications equipment without a written request for disclosure. Even with a written request for disclosure, the Commission shall not disclose personal identifying or protected health information regarding an applicant or recipient.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). New Section R9-26-207 renumbered from R9-26-206 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

ARTICLE 3. ADMINISTRATIVE PROCEDURES

R9-26-301. Making a Complaint

A. A complaint may be filed by:
1. An individual for whom interpreting is provided,
2. A person having a direct or professional interest in the incident specified in the complaint, or
3. A person having reason to believe that interpreting was provided by an individual who is not licensed by the Commission and not exempt from licensure under A.R.S. § 36-1971(C).

B. Complaint requirements. A complainant shall:

1. Submit the complaint to the Commission in writing or by videotape. If a complaint is submitted by videotape, the Commission shall have the complaint interpreted and transcribed into English and forward the transcript to the complainant for review and approval;
2. Submit the complaint to the Commission within 90 days of the alleged offense; and
3. Specify in the complaint the name of the individual complained against, date and location of the alleged offense, and the action complained about.

C. A complainant may withdraw a complaint at any time by providing notice to the Commission.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section renumbered to R9-26-202; new Section R9-26-301 renumbered from R9-26-206 and amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section renumbered from R9-26-512 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-302. Hearing Procedures

The Commission shall conduct all hearings in accordance with A.R.S. Title 41, Chapter 6, Article 10 and the rules established by the Office of Administrative Hearings.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section R9-26-302 renumbered from R9-26-205 and amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section renumbered from R9-26-515 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-303. Rehearing or Review of Commission Decision

A. The Commission shall provide for a rehearing and review of its decisions under A.R.S. Title 41, Chapter 6, Article 10 and the rules established by the Office of Administrative Hearings.

B. A party may amend a motion for rehearing or review at any time before the Commission rules on the motion.

C. The Commission may grant a rehearing or review for any of the following reasons materially affecting a party's rights:
1. Irregularity in the proceedings or an order or abuse of discretion that deprived the moving party of a fair hearing;
2. Misconduct by the Commission, its staff, an administrative law judge, or the prevailing party;
3. Accident or surprise that could not have been prevented by ordinary prudence;
4. Newly discovered material evidence that could not, with reasonable diligence, have been discovered and produced at the hearing;
5. Excessive penalty;
6. Error in the admission or rejection of evidence or other errors of law occurring at the hearing or during the progress of the proceedings;
7. The Commission's decision is the result of passion or prejudice; or
8. The findings of fact or decision is not justified by the evidence or is contrary to law.

D. The Commission may affirm or modify a decision or grant a rehearing to all or any of the parties on all or part of the issues for any of the reasons in subsection (C). The Commission shall specify the particular grounds for any order modifying a decision or granting a rehearing.

E. When a motion for rehearing or review is based on affidavits, the affidavits shall be served with the motion. An opposing party may, within 15 days after service, serve opposing affidavits.

F. No later than 15 days after the date of a decision, after giving parties notice and an opportunity to be heard, the Commission may grant a rehearing or review on its own initiative for any reason for which it might have granted relief on motion of a party. The Commission may grant a motion for rehearing or review, timely served, for a reason not stated in the motion.

G. If a rehearing is granted, the Commission shall hold the rehearing within 60 days after the date on the order granting the rehearing.

H. If the Commission makes a specific finding that a particular decision needs to be effective immediately to preserve the public peace, health, or safety and that a review or rehearing of the decision is impracticable, unnecessary, or contrary to the public interest, the Commission shall issue the decision as a final decision without an opportunity for rehearing or review.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section repealed; new Section renumbered from R9-26-516 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-304. Disciplinary Action

After an opportunity for hearing and a Commission determination that a licensee violated A.R.S. Title 36, Chapter 17.1, or this Chapter, the Commission shall consider the following factors to determine the degree of discipline to impose under A.R.S. § 36-1976(A):
1. Prior conduct resulting in discipline;
2. Dishonest or self-serving motive;
3. Amount of experience as an interpreter;
4. Bad faith obstruction of the disciplinary proceeding by intentionally failing to comply with rules or orders of the Commission;
5. Submission of false evidence, false statements, or other deceptive practices during the investigative or disciplinary process;
6. Refusal to acknowledge wrongful nature of conduct;
7. Degree of harm resulting from the conduct; and
8. Whether harm resulting from the conduct was cured.

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section renumbered to R9-26-203 by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). New Section R9-26-304 renumbered from R9-26-517 and amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-305. Renumbered

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section renumbered to R9-26-204 by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3).

ARTICLE 4. EXPIRED

R9-26-401. Expired

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section expired under A.R.S. § 41-1056(E) at 13 A.A.R. 4411, effective September 30,

2007 (Supp. 07-4).

R9-26-402. Expired

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Amended by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3). Section expired under A.R.S. § 41-1056(E) at 13 A.A.R. 4411, effective September 30, 2007 (Supp. 07-4).

R9-26-403. Repealed

Historical Note

Adopted effective May 12, 1986 (Supp. 86-3). Section repealed by final rulemaking at 6 A.A.R. 3827, effective September 15, 2000 (Supp. 00-3).

ARTICLE 5. INTERPRETER LICENSURE AND REGULATION

R9-26-501. Definitions

In addition to the definitions in A.R.S. §§ 12-242 and 36-1941, in this Article, the following definitions apply unless otherwise specified:

"ACCI" means American Consortium of Certified Interpreters, an organization that certifies interpreters at one of three levels: ACCI Generalist, ACCI Advanced, or ACCI Master.

"Accredited" means approved by a regional or national accrediting agency recognized by the U.S. Department of Education.

"Applicant" means an individual seeking an original or renewal license from the Commission.

"Application" means the documents, forms, and additional information required by the Commission to be submitted by or on behalf of an applicant.

"BEI" means Board for Evaluation of Interpreters.

"CDI" means certified deaf interpreter, a certification issued by RID or BEI.

"CI" means certificate of interpretation, a certification issued by RID.

"CIC" means Court Interpreter Certification, a legal specialist certification issued by BEI.

"CLIP-R" means conditional legal interpreting permit--relay, a certification issued by RID to a deaf or hard-of-hearing interpreter or transliterator who works in a legal setting.

"Continuing education" means a workshop, seminar, lecture, conference, class, or other educational activity relevant to the practice of interpreting.

"CSC" means comprehensive skills certificate, a certification issued by RID.

"CT" means certificate of transliteration, a certification issued by RID.

"Deaf interpreter" means an individual who is deaf or hard of hearing and provides interpreting for deaf individuals with special language needs.

"EIPA" means educational interpreter performance assessment, a diagnostic tool that measures proficiency in interpreting for children or young adults in an educational setting.

"Generalist interpreter" means an individual who provides interpreting in any community setting, except a legal setting, for which the individual is qualified by education, examination, and work history. A generalist interpreter provides interpreting in a legal setting only if appointed by a judge under A.R.S. § 12-242.

"IC" means interpretation certificate, a certification issued by RID.

"Intermediary Level III or V" means a certification issued by BEI for interpreters who are deaf or hard of hearing.

"Interpreter" means an individual who provides interpreting between American Sign Language and English.

"Legal interpreter" means an individual who is qualified by education, examination, and work history to provide interpreting in a legal setting.

"Class A legal interpreter" means a legal interpreter who provides interpreting in court proceedings or any other legal setting, as prescribed under A.R.S. § 12-242, and meets the certification requirement under R9-26-504(A)(1)(a). An individual who is licensed by the Commission as a Class A legal interpreter on the date this Section takes effect, shall meet the certification requirement under R9-26-504(A)(1)(a) no later than the individual's renewal date, as specified in R9-26-507(A), in 2023.

"Class C legal interpreter" means a legal interpreter who provides interpreting in a legal setting, as prescribed under A.R.S. § 12-242, when teamed with a Class A legal interpreter and meets the certification requirement under R9-26-504(A)(1)(b).

"Class D legal interpreter" means a legal interpreter who meets the certification requirement under R9-26-504(A)(1)(c) and is either a deaf or hard-of-hearing interpreter or an oral transliterator.

"Legal training" means a structured program presented by the Commission, a court, Bar Association, law-enforcement association, RID, accredited institution, or comparable organization, providing information relevant to legal interpreting such as the following:

The requirements of A.R.S. § 12-242,
The structure of the judiciary system of this state,
The judiciary process of this state,
Administrative adjudicatory procedures,
Law enforcement procedures, or
Commonly used legal terms.

"Level III, IV, or V" means a certification issued by BEI.

"Licensee" means an interpreter who holds a current license issued under A.R.S. § 36-1974 and this Article.

"License year" means the days between the date of license issuance and the date of license expiration.

"Mentor" means an individual licensed under R9-26-503 or R9-26-504 who agrees to assist a provisional licensee to develop as an interpreter by occasionally observing the provisional licensee providing interpreting services and providing feedback.

"MCSC" means master comprehensive skills certificate, a certification issued by RID.

"NAD" means the National Association of the Deaf.

"NAD III (generalist)," means a certification issued by NAD.

"NAD IV (advanced)," means a certification issued by NAD.

"NAD V (master)," means a certification issued by NAD.

"NIC" means National Interpreter Certification.

"NIC Advanced" means a certification issued by NAD-RID.

"NIC Certified" means a certification issued by NAD-RID.

"NIC Master" means a certification issued by NAD-RID.

"OC:B" means oral certificate: basic, a certification issued by BEI.

"OC:C" means oral certificate: comprehensive, a certification issued by BEI.

"OIC" means oral interpreting certificate, a certification issued by RID in one of three categories: comprehensive, spoken to visible, or visible to spoken.

"Oral transliteration" means to facilitate communication between an individual who is deaf or hard of hearing and an individual who hears by using inaudible speech and natural gestures to convey a message to the deaf or hard-of-hearing individual and understanding and verbalizing the message and intent of the speech and mouth movements of the individual who is deaf or hard of hearing.

"OTC" means oral transliteration certificate, a certification issued by RID.

"Platform or performance setting" means an environment involving an appearance by a designated speaker or performers, typically on a raised surface.

"Provisional interpreter" means an individual who is qualified by education, examination, and work history to provide interpreting while pursuing RID, NAD, or BEI certification.

"Class A provisional interpreter" means a provisional interpreter who provides oral transliteration and is working towards certification by RID, NAD, or BEI. A Class A provisional interpreter shall not provide interpreting services in a legal setting.

"Class B provisional interpreter" means a provisional interpreter who is qualified to provide interpreting services without a team interpreter licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) and (b), except in a medical, mental health, platform or performance, or legal setting. A Class B provisional interpreter may provide interpreting services in a medical, mental health, or platform or performance setting only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b). A Class B provisional interpreter shall not provide interpreting services in a legal setting.

"Class C provisional interpreter" means a provisional interpreter who is qualified to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b). A Class C provisional interpreter shall not provide interpreting services in a legal setting.

"Class D provisional interpreter" means a provisional interpreter who is deaf or hard of hearing and is qualified to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or (b) or R9-26-504(A)(1)(a) through (c). A Class D provisional interpreter shall not provide interpreting services in a legal setting.

"Qualified interpreter" means an individual licensed under this Chapter who is able to interpret effectively, accurately, and impartially both receptively and expressively, using any necessary specialized vocabulary required by the interpreting situation.

"RID" means Registry of Interpreters for the Deaf.

"RSC" means reverse skills certificate, a certification issued by RID.

"SC:L" means specialist certificate: legal, a certification issued by RID.

"SC:PA" means specialist certificate: performing arts, a certification issued by RID.

"TC" means transliteration certificate, a certification issued by RID.

"Team" means two or more licensed interpreters, at least one of whom is licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b), providing interpreting for an individual or group of individuals during a single interpreting session.

"Trilingual Advanced or Master" means a specialist certification issued by BEI for interpreters of Spanish, English, and American Sign Language.

"Unprofessional conduct," as used in A.R.S. § 36-1976, means:

Violation of the NAD-RID Code of Professional Conduct, 2005, which is incorporated by reference and available from the Commission and RID, 333 Commerce Street, Alexandria, VA 22314, or www.rid.org. The material incorporated includes no later edition or amendment; or

Failure to comply with a provision of A.R.S. Title 36, Chapter 17.1, Article 2 or this Chapter.

"VRI" means video remote interpreting, a service that uses video telecommunication devices to provide interpreting between or among individuals who are at one or more locations separate from the interpreter.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Amended by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2). Section R9-26-501 amended by emergency rulemaking at 27 A.A.R. 549, with an immediate effective date of March 31, 2021; valid for 180 days under A.R.S. § 41-1026 (D) (Supp. 21-1). Section amended by final rulemaking at 27 A.A.R. 1257, with an immediate effective date of August 4, 2021 (Supp. 21-3).

R9-26-502. License Application

A. An applicant for an original license shall submit to the Commission the following information, on an application form provided by the Commission:
1. Applicant's full name;
2. Applicant's Social Security number;
3. Applicant's home or business address;
4. Applicant's e-mail address;
5. Applicant's home, business, or mobile telephone number;
6. Applicant's birth date;
7. Any name by which the applicant has ever been known;
8. The start and end dates of the applicant's current certification cycle with RID, NAD, or BEI, as applicable;
9. Category of licensure for which application is made and if applicable, the class of legal or provisional interpreter license for which application is made;
10. Name of any state or foreign country in which the applicant is currently licensed or certified to practice as an interpreter, the license or certificate number, date issued,

date of expiration, and a statement whether the license or certificate is or was the subject of discipline and if the answer is yes, a complete explanation of the discipline including date, nature of complaint, and discipline imposed;

11. A statement of whether the applicant has ever been denied a license or certificate to practice as an interpreter by a government licensing authority and if the answer is yes, a complete explanation of the denial including date, name of the government licensing authority, and reason for denial;
12. A statement of whether the applicant has ever been convicted of a felony or of an offense involving moral turpitude in this or any other jurisdiction and if the answer is yes, a complete explanation of the charge and place and date of conviction;
13. A statement of whether the applicant has been adjudicated insane or incompetent and if the answer is yes, a complete explanation including date and place of adjudication;
13. A statement of whether the applicant's NAD, RID, or BEI certification lapsed and if so, a complete explanation including date of and reason for the lapse;
15. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction lapsed and if so, a complete explanation including date of and reason for the lapse;
16. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction was subject to a complaint and if so, a complete explanation including date, allegation, and discipline imposed, if any;
17. A statement of whether the applicant's NAD, RID, or BEI certification was subject to a complaint and if so, a complete explanation including date, allegation, and discipline imposed, if any; and
18. A statement signed by the applicant verifying the truthfulness of the information provided and affirming that the applicant will comply with the NAD-RID Code of Professional Conduct;

B. In addition to the form required under subsection (A), an applicant shall submit or have submitted on the applicant's behalf the following:
1. Documentation of name change if the applicant is applying under a name different from the name on any of the documents required under this Article;
2. A photocopy of the applicant's:
   a. High school diploma or GED or a transcript, official or unofficial, showing the degree awarded and date; or
   b. Diploma from an accredited college or university or a transcript, official or unofficial, showing the degree awarded and date;
3. If the answer to any item in subsections (A)(9) through (A)(15) is yes, a copy of any relevant order;
4. As required under A.R.S. § 41-1080(A), the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law;
5. Two identical passport-size photographs of the applicant that:
   a. Are in color, and
   b. Are taken no more than six months before the date of application; and
6. The fee required under R9-26-508.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-503. Application for Generalist Interpreter License

To apply for a generalist interpreter license, an applicant shall:
1. Comply with R9-26-502; and
2. Submit a photocopy of current documentation showing that the applicant holds one or more of the following certifications:
   a. Hearing interpreters: NAD III, IV, or V; RID CI, CSC, CT, IC, MCSC, RSC, SC:L, SC:PA, or TC; NIC Certified, Advanced, or Master; or BEI Levels III, IV, or V, Basic, Advanced, Master, Trilingual Advanced, Trilingual Master, CIC, or other certification deemed appropriate by the Commission;
   b. Deaf interpreters: RID CDI, CLIP-R, or SC:L; BEI Intermediary Level III or V, CDI, or other certification deemed appropriate by the Commission; or
   c. Oral interpreters: RID OIC or OTC, BEI OC:B or OC:C, or other certification deemed appropriate by the Commission.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-504. Application for Legal Interpreter License

A. To apply for a legal interpreter license, an applicant shall comply with R9-26-502 and submit documentation of the following:
1. Certification by RID, NAD, or BEI.
   a. For a Class A legal interpreter license, RID SC:L, BEI CIC, or other legal specialist certification deemed appropriate by the Commission is required;
   b. For a Class C legal interpreter license, NIC Certified, Advanced, or Master, NAD III, IV, or V, CI, CT, or CSC, or BEI Levels IV or V, Advanced, Master, Trilingual Advanced or Master, or other certification deemed appropriate by the Commission is required; and
   c. For a Class D legal interpreter license, RID CDI, CLIP-R, OIC, or OTC or BEI OC:B, OC:C, Intermediary Levels III or V, or CDI, or other certification deemed appropriate by the Commission is required;
2. Hours of paid interpreting after initial certification by RID, NAD, or BEI.
   a. For a Class C legal interpreter license, 10,000 hours are required; and
   b. For a Class D legal interpreter license, 500 hours are required;
3. Hours of legal training. For a Class C or Class D legal interpreter, 50 hours obtained during the five years before the date of application are required.

B. The Commission shall accept the following documentation:
1. RID, NAD, or BEI certification.
   a. A photocopy of current documentation provided by RID, NAD, or BEI. If an applicant's documentation expires during the application process, the Commission shall not complete the licensure process until

the applicant submits current documentation of certification; and

b. A photocopy of the certificate provided by RID, NAD, or BEI or a copy of the letter received from RID, NAD, or BEI at the time of initial certification;

2. Hours of paid interpreting.
   a. An applicant shall submit an affidavit affirming that the applicant provided the number of hours of paid interpreting required under subsection (A)(2) after initial certification by RID, NAD, or BEI; and
   b. Within the time provided under R9-26-509(F) and upon receipt of a comprehensive written request for documentation of the hours of paid interpreting provided, an applicant shall submit evidence that demonstrates the truthfulness of the affirmation provided under subsection (B)(2)(a).
3. Hours of legal training. A photocopy of documentation from the organization providing the legal training that includes the information required under R9-26-510 (B).

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-505. Application for Provisional Interpreter License

A. To apply for a provisional interpreter license, an applicant shall comply with R9-26-502 and submit documentation of the following:
1. Education. The following hours of participation in an interpreter-preparation training program offered by an accredited college or university or approved by RID, NAD, or BEI:
   a. Class A or D provisional license: 40 hours; and
   b. Class B or C provisional license: 80 hours;
2. Examination. Pass the written portion of the RID, NAD, or BEI examination; and
3. Work experience. The following hours of interpreting for which a license is not required under A.R.S. § 36-1971:
   a. Class A provisional license: 24 hours;
      i. A score of at least 4.0 on the EIPA performance test;
      ii. ACCI certification; or
      iii. A state-issued certification or certificate of competency in good standing;
   c. Class C provisional license: 80 hours; and
   d. Class D provisional license: 40 hours.

B. In addition to the documentation required under subsection (A), an applicant for a Class B provisional license shall:
1. Have a letter submitted directly to the Commission by an individual licensed under R9-26-503 or R9-26-504 indicating that the individual agrees to:
   a. Act as a mentor to the applicant if the applicant is granted a provisional license;
   b. Observe the provisional licensee providing interpreting services at least once each month;
   c. Provide feedback to the provisional licensee following each observation; and
   d. Provide 30-days' notice to the provisional licensee and the Commission before terminating the mentoring relationship; and
2. Submit a letter to the Commission indicating that if the applicant is issued a provisional license, the applicant agrees to:
   a. Make and maintain a record of each time the mentor observes the applicant and a summary of the feedback provided;
   b. Make the record maintained under subsection (B)(2)(a) available to the Commission annually at license renewal; and
   c. Provide 30 days' notice to the Commission and the mentor before terminating the mentoring relationship; or
3. Submit a letter to the Commission indicating that if the applicant is issued a provisional license, the applicant agrees to:
   a. Team with an individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b) for at least eight hours each month;
   b. Maintain a journal that records the dates on which and the name of the licensee with whom teaming was done and a summary of any feedback provided; and
   c. Make the journal maintained under subsection (B)(3)(b) available to the Commission annually upon license renewal.

C. The Commission shall accept the following documentation of the criteria in subsection (A):
1. Education. A photocopy of documents showing that the applicant completed the hours required under subsection (A)(1);
2. Examination. A photocopy of the letter provided by RID, NAD, or BEI indicating that the applicant passed the written portion of the RID, NAD, or BEI examination;
3. Work experience.
   a. One or more letters, each of which is signed by an individual or a representative of an entity for whom the applicant provided interpreting, indicating:
      i. The name of the applicant,
      ii. The dates on which interpreting was provided, and
      iii. The hours of interpreting provided by the applicant; or
   b. One or more paystubs, each of which indicates:
      i. The name of the applicant,
      ii. The job title of the applicant,
      iii. The dates on which interpreting was provided by the applicant, and
      iv. The hours of interpreting provided by the applicant, and
   c. For an applicant for a Class B provisional license:
      i. A photocopy of the letter provided by EIPA indicating the applicant's score on the EIPA performance test,
      ii. A photocopy of the applicant's ACCI certificate, or
      iii. A photocopy of the applicant's state-issued certification or certificate of competency in good standing.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section expired under A.R.S. § 41-1056(E) at 9 A.A.R. 35, effective September 30, 2002 (Supp. 02-4). New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-506. Short-term Registration of an Interpreter

A. To register with the Commission to provide interpreting in Arizona in a non-legal situation for fewer than 20 days in a

year, an interpreter shall submit the following information in writing to the Commission:

1. Interpreter's name;
2. Interpreter's residential and e-mail addresses;
3. Interpreter's mobile telephone number;
4. Dates on which interpreting will be provided;
5. Name, address, and contact information of the person or event for which interpreting services will be provided; and
6. Date of most recent short-term registration with the Commission, if any.

B. In addition to complying with subsection (A), the interpreter shall submit a copy of current documentation from RID, NAD, or BEI showing the interpreter's certification is in good standing or a copy of the interpreter's license from another state's interpreter licensing authority.

C. An interpreter who makes application under subsections (A) and (B) for a short-term registration shall not provide interpreting services in Arizona until the Commission provides notice the registration has been granted.

D. Within five days after providing interpreting services under a short-term registration, the interpreter shall submit a report to the Commission that provides the dates on and persons or events for which interpreting services were provided.

E. The Commission shall not issue more than two short-term registrations to an interpreter during the interpreter's lifetime.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-507. License Renewal

A. Renewal of a generalist or legal interpreter license.

1. A generalist or legal interpreter license expires one year after the license is issued. To continue to practice as a generalist or legal interpreter, the licensee shall, no more than 60 days before the expiration date, submit to the Commission a license renewal application form that provides the following information about the licensee:
   a. Full name;
   b. Social Security number;
   c. Home or business address;
   d. E-mail address;
   e. Home, business, or mobile telephone number;
   f. The start and end dates of the applicant's current certification cycle with RID, NAD, or BEI, as applicable;
   g. Name of any state or country in which the licensee is currently licensed or certified to practice as an interpreter, the license or certificate number, date issued and date of expiration, and a statement whether the license or certificate is or has been the subject of discipline during the previous year and if the answer is yes, a complete explanation of the discipline including date, nature of complaint, and discipline imposed;
   h. A statement of whether the licensee has been denied a license or certificate to practice as an interpreter by a licensing authority during the previous year and if the answer is yes, a complete explanation of the denial including date, name of the interpreter licensing authority, and reason for denial;
   i. A statement of whether the licensee has been convicted of a felony or of an offense involving moral turpitude in this or any other jurisdiction during the previous year and if the answer is yes, a complete explanation of the charge and place and date of conviction;
   j. A statement of whether the licensee has been adjudicated insane or incompetent during the previous year and if the answer is yes, a complete explanation including date and place of adjudication;
   k. A statement of whether the applicant's NAD, RID, or BEI certification lapsed during the previous year and if so, a complete explanation including date of and reason for the lapse;
   l. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction lapsed during the previous year and if so, a complete explanation including date of and reason for the lapse;
   m. A statement of whether the applicant's interpreter license from Arizona or another jurisdiction was subject to a complaint during the previous year and if so, a complete explanation including date, allegation, and discipline imposed, if any;
   n. A statement of whether the applicant's NAD, RID, or BEI certification was subject to a complaint during the previous year and if so, a complete explanation including date, allegation, and discipline imposed, if any, and if discipline was imposed, a statement of whether the notice required under R9-26-518 was submitted to the Commission;
   o. A statement of whether the applicant completed any continuing education during the previous year and if so, the number of hours completed; and
   p. A statement signed by the licensee verifying the truthfulness of the information provided and affirming that the licensee will comply with the NAD-RID Code of Professional Conduct.
2. In addition to the license renewal application form required under subsection (A)(1), the generalist or legal licensee shall submit or have submitted on the licensee's behalf:
   a. A photocopy of current documentation showing the applicant's NAD, RID, or BEI certification is in good standing. If the licensee's documentation expires during the renewal process, the Commission shall not complete the license renewal process until the licensee submits a photocopy of current documentation;
   b. If the answer to any item in subsections (A)(1)(g) through (A)(1)(m) is yes, a copy of any relevant order; and
   c. The fee required under R9-26-508.
3. If a generalist or legal licensee fails to comply with subsections (A)(1) and (A)(2) on or before the license expiration date, the license expires. The former licensee may renew the expired license by complying with subsections (A)(1) and (A)(2), and paying the penalty prescribed under R9-26-508 no later than 30 days after the license expired. If a former licensee fails to renew an expired license within the 30 days provided in this subsection, the former licensee shall stop providing interpreting for which a license is required under A.R.S. § 36-1971.
4. If an expired license is not renewed under subsection (A)(3), the former licensee may obtain a license only by applying as a new applicant.

B. Renewal of a provisional interpreter license.

1. A provisional interpreter license expires one year after the date of issuance.

2. To continue to practice as a provisional interpreter, the licensee shall, no more than 60 days before the expiration date, submit to the Commission a license renewal application form that provides the information specified under subsection (A)(1).
3. In addition to the license renewal application form required under subsection (B)(2), the provisional licensee shall submit or have submitted on the licensee's behalf:
   a. If the answer to any item in subsections (A)(1)(h) through (A)(1)(m) is yes, a copy of any relevant order;
   b. Documentation required under R9-26-510(C) that demonstrates compliance with the continuing education requirement in R9-26-510; and
   c. The fee required under R9-26-508;
   d. If a Class B provisional licensee wishes to renew the Class B provisional license, letters that meet the standards at R9-26-505(B)(1) and (2) or a letter that meets the standards at R9-26-505(B)(3); and
   e. If a Class C provisional licensee wishes to renew the Class C provisional license, an affirmation that the licensee has provided and will continue to provide interpreting services only when working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b); or
   f. If a Class C provisional licensee wishes to move to a Class B provisional license:
      i. Letters that meet the standards at R9-26-505(B)(1) and (2) or a letter that meets the standards at R9-26-505(B)(3), and
      ii. Evidence required under R9-26-505(C)(3)(a) or (b) showing at least 500 hours of work experience earned while working as part of a team that includes at least one individual licensed under R9-26-503(2)(a) or R9-26-504(A)(1)(a) or (b), or
      iii. A score of at least 4.0 on the EIPA performance test.
4. If a provisional licensee fails to comply with subsections (B)(2) and (3) on or before the license expiration date, the license expires. Unless the expired provisional license has previously been renewed under subsections (B)(2) and (3), the former licensee may renew the expired license by complying with subsections (B)(2) and (3) and paying the penalty prescribed under R9-26-508 no later than 30 days after the license expired. If a former licensee fails to renew an expired license within the 30 days provided in this subsection, the former licensee shall stop providing interpreting for which a license is required under A.R.S. § 36-1971.
5. The Commission shall not issue a provisional interpreter license to an interpreter for more than five years over the interpreter's lifetime except that if an interpreter is unable to pursue RID, NAD, or BEI certification because the testing necessary for certification is unavailable due to the COVID-19 pandemic, the Commission shall renew the provisional interpreter license of any interpreter who:
   a. Complies fully with this subsection;
   b. Held a valid provisional interpreter license in its final renewal year on December 30, 2020; and
   c. Obtains certification by RID, NAD, or BEI no later than the interpreter's renewal date, as specified in subsection (B)(1), in 2023.

C. If the documentation previously submitted under R9-26-502(B)(4) was a limited form of work authorization issued by the federal government, an applicant for license renewal shall submit evidence that the work authorization has not expired.

D. The Commission shall require a licensee to submit the information required under R9-26-502(B)(5) every five years so an updated photograph is used in the identification badge required under R9-26-515.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2). Section R9-26-507 amended by emergency rulemaking at 27 A.A.R. 549, with an immediate effective date of March 31, 2021; valid for 180 days under A.R.S. § 41-1026 (D) (Supp. 21-1). Section amended by final rulemaking at 27 A.A.R. 1257, with an immediate effective date of August 4, 2021 (Supp. 21-3).

R9-26-508. Fees and Charges

A. Under the authority provided by A.R.S. §§ 36-1973(A) and 36-1974(C), the Commission establishes and shall collect the following fees, which are not refundable unless A.R.S. § 41-1077 applies:
1. Generalist or legal license application fee, $125;
2. Generalist or legal license renewal application fee, $50;
3. Provisional license application fee, $25;
4. Provisional license renewal application fee, $25; and
5. Penalty for late license renewal, $100.

B. The Commission shall charge $25 to:
1. Replace an identification badge,
2. Issue a duplicate license.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-509. Procedures for Processing Applications; Time Frames

A. For the purpose of A.R.S. § 41-1073, the Commission establishes the following licensing time frames:
1. Administrative completeness review time frame: 30 days;
2. Substantive review time frame: 60 days; and
3. Overall time frame: 90 days.

B. The administrative completeness review time frame listed in subsection (A)(1) begins on the date the Commission receives a license application or license renewal application. During the administrative completeness review time frame, the Commission shall notify the applicant that the application is either complete or incomplete. If the application is incomplete, the Commission shall specify in the notice what information is missing.

C. An applicant with an incomplete application shall supply the missing information within 30 days from the date of the notice. Both the administrative completeness review and overall time frames are suspended from the date of the Commission's notice until the date that the Commission's office receives all missing information.

D. Upon receipt of all missing information, the Commission shall notify the applicant that the application is complete. The Commission shall not send a separate notice of completeness if the Commission grants or denies a license within the administrative completeness review time frame in subsection (A)(1).

E. The substantive review time frame listed in subsection (A)(2) begins on the date of the Commission's notice of administrative completeness or on expiration of the time listed in subsection (A)(1).

F. If the Commission determines during the substantive review time frame that additional information is needed, the Commission shall send the applicant a comprehensive written request for the additional information. The applicant shall supply the additional information within 60 days from the date of the request. Both the substantive review and overall time frames are suspended from the date on the Commission's request until the date the Commission office receives the additional information.

G. If an applicant needs additional time in which to respond under subsection (C) or (F), the applicant shall submit a written notice of extension to the Commission before expiration of the time to respond that includes the date by which the applicant will submit the information. The applicant shall establish an extension date that is no more than 120 days from the date established under subsection (C) or (F).

H. If an applicant fails to submit information within the time provided under subsection (C) or (F) or as extended under subsection (G), the Commission shall close the applicant's file. An applicant whose file is closed and who later wishes to be licensed, shall apply anew.

I. Within the time listed in subsection (A)(3), the Commission shall:
1. Grant a license to an applicant who meets the requirements in A.R.S. § 36-1973 and this Article, or
2. Deny a license to an applicant who does not meet the requirements in A.R.S. § 36-1973 or this Article.

J. If the Commission denies a license, the Commission shall send the applicant a written notice explaining:
1. The reason for the denial with citations to supporting statutes or rules,
2. The applicant's right to appeal the denial and have a hearing,
3. The time for appealing the denial, and
4. The applicant's right to request an informal settlement conference.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-510. Continuing Education Requirement; Waiver; Extension of Time to Complete

A. Continuing education is required as a condition of licensure renewal.
1. A generalist interpreter shall complete continuing education required by NAD, RID, or BEI to maintain certification by NAD, RID, or BEI. If the certification of a generalist interpreter is suspended or revoked by NAD, RID, or BEI because the generalist interpreter failed to complete the required continuing education, the Commission shall initiate proceedings under Article 3 against the generalist interpreter's license.
2. A Class A legal interpreter shall complete continuing education required by NAD, RID, or BEI to maintain legal certification by NAD, RID, or BEI. If the certification of a Class A legal interpreter is suspended or revoked by NAD, RID, or BEI because the Class A legal interpreter failed to complete the required continuing education, the Commission shall initiate proceedings under Article 3 against the legal interpreter's license.
3. A Class C or D legal interpreter shall complete continuing education required by NAD, RID, or BEI to maintain certification by NAD, RID, or BEI including at least 20 hours of legal training. If the certification of a Class C or D legal interpreter is suspended or revoked by NAD, RID, or BEI because the Class C or D legal interpreter failed to complete the required continuing education or if the Class C or D legal interpreter fails to complete the required hours of legal training, the Commission shall initiate proceedings under Article 3 against the legal interpreter's license.
4. When renewing a license under R9-26-507(B), a provisional interpreter shall submit the evidence required under subsection (B) showing completion of 12 hours of continuing education. The Commission shall accept continuing education:
   a. Designed to enhance the provisional licensee's skill and ability to provide quality interpreting to the deaf and hard-of-hearing community;
   b. Approved by RID, NAD, or BEI, as applicable, for certification maintenance;
   c. Provided by an accredited institution of higher education; or
   d. Provided by an entity involved with the deaf and hard-of-hearing community; and

B. A provisional licensee shall obtain from the provider of a continuing education attended by the licensee documentation that includes:
1. Licensee's name,
2. Name of the continuing education provider,
3. Name of the continuing education,
4. Number of hours of attendance, and
5. Date of the continuing education.

C. Waiver of continuing education requirement.
1. To obtain a waiver of the continuing education requirement, a provisional licensee shall submit to the Commission a written request that includes the following:
   a. The period for which the waiver is requested,
   b. Continuing education completed during the current license year and the documentation required under subsection (B), and
   c. Reason a waiver is needed and supporting documentation:
      i. For military service. A copy of current orders or a letter on official letterhead from the licensee's commanding officer;
      ii. For absence from the United States. A copy of pages from the licensee's passport showing exit and reentry dates;
      iii. For disability. A letter from the licensee's treating physician stating the nature of the disability; and
      iv. For circumstances beyond the licensee's control. A letter from the licensee stating the nature of the circumstances and documentation that provides evidence of the circumstances.
2. The Commission shall grant a request for waiver of the continuing education requirement that:
   a. Is based on a reason listed in subsection (C)(1)(c),
   b. Is supported by the required documentation,
   c. Is submitted no sooner than 60 days before and no later than the license expiration date, and
   d. Will promote the safe and professional practice of interpreting in this state.

D. Extension of time to complete continuing education requirement.
1. To obtain an extension of time to complete the continuing education requirement, a provisional licensee shall submit to the Commission a written request that includes the following:
   a. Ending date of the requested extension,
   b. Continuing education completed during the current license year and the documentation required under subsection (B),
   c. Proof of registration for additional continuing education that is sufficient to enable the provisional licensee to complete all continuing education required for license renewal before the end of the requested extension, and
   d. Licensee's attestation that the continuing education obtained under the extension will be reported only to fulfill the current license renewal requirement and will not be reported on a subsequent license renewal application.
2. The Commission shall grant a request for an extension that:
   a. Specifies an ending date no more than three months from the current license expiration date,
   b. Includes the required documentation and attestation,
   c. Is submitted no sooner than 60 days before and no later than the license expiration date, and
   d. Will promote the safe and professional practice of interpreting in this state.

E. Except as provided in subsection (D), a provisional licensee shall report only hours of continuing education obtained during the license year immediately preceding license renewal. A licensee shall not carry over hours in excess of those required under subsection (A)(4) to a subsequent license year.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-511. Video Remote Interpreting

A. An interpreter who is licensed under A.R.S. Title 36, Chapter 17.1 and this Article is authorized to provide VRI only for individuals who are located in Arizona.

B. An interpreter who is licensed under A.R.S. Title 36, Chapter 17.1 and this Article and provides VRI shall comply fully with the requirements of this Article.

C. An interpreter who is located outside of Arizona shall not provide VRI for an individual located in Arizona before being licensed under A.R.S. Title 36, Chapter 17.1 and this Article.

Historical Note

Adopted effective April 4, 1997 (Supp. 97-2). Section repealed; new Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Section repealed; new Section made by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-512. Renumbered

Historical Note

New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Section R9-26-512 renumbered to R9-26-301 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-513. Reserved

R9-26-514. Reserved

R9-26-515. Identification Badge Required

A. To protect the public, a licensee shall have and present on request, an identification badge issued by the Commission whenever the licensee provides interpreting services.

B. A licensee who loses or damages the identification badge required under subsection (A) may obtain a replacement identification badge by submitting a request to the Commission and paying the charge specified under R9-26-508.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Section R9-26-515 renumbered to R9-26-302; new Section R9-26-515 made by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-516. Renumbered

Historical Note

New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Section renumbered to R9-26-303 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-517. Renumbered

Historical Note

New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Section renumbered to R9-26-304 by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

R9-26-518. Required Notices to the Commission

A. If a licensee's certification by RID, NAD, BEI, or other acceptable certifying entity is suspended, revoked, or subject to other disciplinary action by RID, NAD, BEI, or the other acceptable certifying entity, the licensee shall provide immediate written notice of the disciplinary action to the Commission. Failure to provide the notice required under this subsection is unprofessional conduct.

B. If a licensee's state-issued certification submitted as qualification for a Class B provisional license is suspended, revoked, or subject to other disciplinary action by the state that issued the certification, the licensee shall provide immediate written notice of the disciplinary action to the Commission. Failure to provide the notice required under this subsection is unprofessional conduct.

C. The Commission shall communicate with a licensee or applicant using the name and address provided to the Commission by the licensee or applicant. To ensure timely receipt of communication from the Commission, a licensee or applicant shall notify the Commission of any change in the licensee's or applicant's name or address.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 1720, effective May 1, 2007 (Supp. 07-2). Amended by final rulemaking at 22 A.A.R. 1675, effective August 15, 2016 (Supp. 16-2).

Hello all, so glad the time has come!

Please, consider extending ACDHH's jurisdiction when sanctioning interpreters— let them have the power to protect against unlicensed interpreters as well as nefarious agency practices.

Empower the community further by organizing a union to better protect and establish standards.

Much appreciated.

To the ACDHH Board & Commission,
I am specifically addressing the proposed rulemaking change for Class B Provisional license. The proposed changes address the typographical errors and combine Class A and Class B Provisional license requirements under one heading. While the ACDHH Board and Commission consider the proposed changes for the Class B provisional license, I would like to bring two concerns to their attention. First, based on the competency standards screened by the BEI Basic performance exam, interpreters holding this certificate are incorrectly classified as Generalist Interpreters by current licensure law. Second, a need for further definition and specific guidance on settings where Class B Provisional Interpreters are qualified to work independently, without the support of a generally or legally licensed team interpreter.

Currently, Generalist Interpreters holding a BEI Basic certificate have not proven through examination qualification of interpreting skills for community assignments. Holders of a BEI Basic certificate meet minimum competency standards through examination to interpret only in K-12 and postsecondary educational settings. The BEI Basic performance test screens for terms and scenarios found in general lecture and teaching situations, and other educational contexts. Individuals awarded the BEI Basic certificate are not assessed in other community settings such as: medical, behavioral health, government, employment, finance, performance, public forums, or social service settings. Due to the current misclassification of BEI Basic certificate holders as Generalist Interpreters, they are currently working in these community settings under the Arizona Licensure law. This is incongruent with the definition of the “Generalist Interpreter” classification found in section **R9-26-501** which states a “Generalist Interpreter” means an individual who provides interpreting in *any community setting*, except a legal setting, for which the individual is **qualified by education, examination, and work history**.” The BEI Basic performance exam does not meet the exam requirement for the Generalist Interpreter license. As such, the BEI Basic certificate should be removed from the list of acceptable examinations qualifying for the Generalist Interpreter license. It is my recommendation that interpreters currently holding a BEI Basic certificate are better classified as a Class B Provisional Interpreter under section **R9-25-503(2)(a)** or **R9-26-502(A)(1)(a) and (b)** with additional definition and specific guidance on settings where they are qualified to work.

Currently, a Class B Provisional Interpreter may provide interpreting services in a medical, mental health, or platform/performance setting only when working as part of a team that includes at least one individual licensed under section **R9-26-503(2)(a)** or **R9-26-502(A)(1)(a) and (b)**, and shall not provide interpreting services in a legal setting. Because the current licensure law only defines three settings where a Class B Provisional Interpreter must work with a licensed team interpreter, it does not provide adequate guidance for them to determine where they are qualified to interpret independently. As such, these interpreters, without specific guidance from the law, may assume they are qualified to interpret independently. This further perpetuates the risk for ineffective and unethical interpreting service provision in the settings listed above (medical, behavioral health, government, employment, finance, performance, public forums, or social service settings).

The misclassification of BEI Basic certificate holders as Generalist Interpreters, and the limited definition of settings where Class B Provisional Interpreters require the support of a licensed team interpreter in the current licensure law could be harming the lives of Arizona’s Deaf, DeafBlind and Hard of Hearing communities. I strongly urge the Board and Commission to evaluate the current proposal with these two concerns in mind and consider revisions to the licensure law based on these facts.

Thank you, LaDonna Gabrielson

Hi

1. The interpreters who held Legal License for a long time then they can't continue with a legal license because they must have a legal certificate. They should still keep a legal license under grandfather. Since RID stopped offering SC:L, new interpreters who apply for a legal license will require legal certification from BEI or somewhere else which is fine. Because those interpreters had been trained and work for a long time.

2. It would be an ideal to have two separate interpreters listings. One is for Arizona Residents and one for Out of State. This way consumers can verified if VRIs are licensed or not.

Thank you

Deb Stone, CDI/CLIP-R

I emailed my comments to the address you listed below by clicking on that link and received an undeliverable error message that the area doesn't exist.

Here are my comments: If we're going to allow other state certifications like Bei, we should still require interpreters to have a bachelor's degree. Since many state certifications don't require that proof, it has become a loophole to avoid becoming fully competent and qualified. I believe a bachelor's in interpreting is the minimum someone should need to be a proficient entry level interpreter. There's a reason RID started requiring a bachelor's. While I don't think a bachelor's in anything non interpreting related should be acceptable (because then they're missing out on the necessary interpreting training obtained in a bachelor's program), we could allow that like RID does in order to address the dearth of bachelor's level programs. When you graduate with an associate's, you're barely a complement language technician. It's not until you complete the additional course work at the bachelor's level, you gain a deeper understanding of morally defensible ethical decision making and actually move toward becoming a practice professional like we claim to be. If we want to be considered professionals, our standards should reflect that.

Please forward them to the appropriate place.

Resending this because it did not go through the first time. I would also like to include two additional comments relate to wanting the rules open for broader changes:

1. It would be worthwhile to consider licensing agencies that provide ASL/Eng interpreting services. Since spoken languages are not regulated by law in most areas, many spoken language agencies that expand to offer ASL/Eng interpreting services are not familiar enough with laws and regulations.
2. Consideration of reciprocity for those licensed in other states may also be a worthwhile discussion. Those working full time in VRI are known to have more than 10 licenses at a time. It's a lot to manage.

Thank you for considering.

MM

To Whom it May Concern,

Thank you for opening the rules for the recommended changes that respond to some of the adoptions made during covid and for some necessary edits for mistakes in the previous version.

My comments are to suggest the need to open the rules for broader commentary and edits. There are some areas that are vague and at times, problematic, that the community needs to be able to respond to and clarify.

1. Work experience to apply for a for provisional C interpreters does not state that it needs to be supervised. It merely states that work experience needs to be hours for which a license is not required. Given that paid and supervised have been areas of confusion in the licensure, FAQs and application this would be an area worthy of clearing up and making explicit.
2. The community desires a change that would allow someone to apply for an initial provisional B with work experience rather than only as part of an upgrade. Currently an initial application for a provisional B does not allow submission of work experience which prohibits interpreters moving from other states to apply for a provisional B and also prohibits upgrades prior to cycle renewal thus keeping the available pool smaller than it needs to be.
3. The way the law is written, it does not allow a provisional C interpreter to team with a general or legal Deaf interpreter. I do not believe this is the intent of the law and believe the community needs to discuss this.

Thank you for your consideration.

Michelle Monahan.

Matthew Brown <msbro270@gmail.com> Fri, Mar 8, 2024 at 4:36 PM
To: publiccomments@acdhh.az.gov

I think that the Commission should be able to deal harsher punishments for interpreters who repeatedly/severely violate the code of ethics

I think there should be punishments given to out-of-state interpreters for interpreting without a license

Is there anything to be done/brought against VRI agencies who send unlicensed out-of-state interpreters to interpret virtually in AZ?

Is there anything that can be done as far as oversight over agencies?

Rule-making Comment

1 message

Ernest Willman <ernest.willman@gmail.com> Tue, Jan 23, 2024 at 6:16 PM
To: publiccomments@acdhh.az.gov

Hello -

Please review and confirm that you have received this email.

I am specifically addressing the proposed rule-making change for Class B provisional license. The proposed changes address the typographical errors and combines Class A and Class B provisional license requirements under one heading. While the ACDHH Board and Commission consider the proposed changes for the Class B provisional license, I would like to bring two concerns to their attention: First, based on the competency standards screened by the BEI Basic performance exam, interpreters holding this certificate are incorrectly classified as Generalist Interpreters by current licensure law. Secondly, there is a need for further definition and specific guidance on settings where Class B Provisional Interpreters are qualified to work independently, without the support of a generally or legally licensed team interpreter.

Generalist Interpreters who hold a BEI Basic certification have not proven have not proven through examination qualification of interpreting skills for community assignments. They meet minimum competency standards through examination to interpret only in K-12 and postsecondary educational settings. The BEI Basic performance test screens for terms and scenarios found in general lecture and teaching situations, and other educational contexts. Individuals awarded the BEI Basic certificate are not assessed in other community settings such as: medical, behavioral health, government, employment, finance, performance, public forums, or social service settings. Due to the current misclassification of BEI Basic certificate holders as Generalist Interpreters, they are currently working in these community settings under the Arizona Licensure law. This is incongruent with the definition of the “Generalist Interpreter” classification found in section R9-26-501 which states a “Generalist Interpreter” means an individual who provides interpreting in any community setting, except a legal setting, for which the individual is qualified by education, examination, and work history.” The BEI Basic performance exam does not meet the exam requirement for the Generalist Interpreter license. As such, the BEI Basic certificate should be removed from the list of acceptable examinations qualifying for the Generalist Interpreter license. It is my recommendation that interpreters currently holding a BEI Basic certificate are better classified as a Class B Provisional Interpreter under section R9-25-503(2)(a) or R9-26-502(A)(1)(a) and (b) with additional definition and specific guidance on settings in which they are qualified to work.

Currently, a Class B Provisional Interpreter may provide interpreting services in a medical, mental health, or platform/performance setting only when working as part of a team that includes at least one individual licensed under section R9-26-503(2)(a) or R9-26-502(A)(1)(a) or (b), and shall not provide interpreting services in a legal setting. Because the current licensure law only defines three settings where a Class B Provisional Interpreter may work with a licensed team interpreter, it does not provide adequate guidance for them to determine where they are qualified to interpret independently. As a result, Class B Provisional interpreters are accepting work in these spaces independently. This further perpetuates ineffective and unethical interpreting service provision in medical, behavioral health, government, employment, finance, performance, public forums, or social service settings.

In the spirit of integrity and high-standards for interpreting licensure - let’s look at Michigan’s interpreting licensure: Michigan has placed BEI-I (Basic) in standard Level 1: non-complex, low-risk environments. More information can be found at the following link on Page 7. [Link: https://www.michigan.gov/lara/-/media/Project/Websites/lara/bchs/Folder2/Qualified-Interpreter---General-Rules.pdf?rev=5da767f57319488784dfdbdc3668db15&hash=2D3601C33660B4C7018BA129FA9A94FD]

The impact of the current language and classification is being felt in our local communities. To illustrate, there was a public event in my community that required an interpreter who was qualified to interpret at a high-level and interpret into English for me and several Deaf Community members. Unfortunately, a BEI Basic-level interpreter accepted the job. Their lack of qualification for the assignment resulted in the misrepresentation and embarrassment of the panelists and myself. Upon realizing the ramifications of this interpreter’s decision, I learned that BEI Basic-level interpreters are being granted a Generalist License in Arizona. This license should be reserved for BEI Advanced and Master Certified Interpreters and/or Nationally Certified Interpreters. If this change were to be implemented, interpreters who currently hold a Generalist License, but do not meet the aforementioned requirements, can be given a 2-year grace period to allow them an adequate amount of time to obtain Advanced level certification or national certification.

The misclassification of BEI Basic certificate holders as Generalist Interpreters and the limited definition of settings where Class B Provisional Interpreters require the support of a licensed team interpreter in the current licensure law is harming the lives of Arizona's Deaf, DeafBlind and Hard of Hearing communities. I strongly urge the Board and Commission to evaluate the current proposal with these two concerns in mind and consider revisions to the licensure law based on the preceding arguments.

>> CARMEN GREEN SMITH: Good afternoon, and welcome to the Arizona Commission for the Deaf and Hard of Hearing oral proceedings for the Notice of Proposed Rulemaking associated with our Telecommunications Equipment Distribution Program. Michele Michaels will be representing that program. And the proposed rules also related to the licensure of American Sign Language interpreters. So at this time, I am doing a call to the public to see if there are any oral comments related to the Telecommunications Equipment Distribution Program.

Seeing none, I will also verify that to-date, we have not received any written comments related these proposed rules for the Telecommunications Equipment Distribution Program.

Michele, thank you for being present today.

So we will move forward with any oral comments associated with the licensing of American Sign Language interprets. And I will turn it over to Victoria Vaughn who is our licensing manager for these rules.

>> VICTORIA VAUGHN: Thank you. Good afternoon. So we have some Notice of Proposed Rulemaking for specific rules related to interpreter licensure here in Arizona. These rules are -- bear with me just a moment here. Amendments to -- sorry, some of these are amendments to rules related to interpreter licensure.

So the rules listed here are the comments that we'll read. And we'll read the associated rules with them. That go along with the comment. We have quite a few comments related to the legal license interpreter definition that we modify. Are there any public comments related to that right now? From the public. Before I proceed to read the ones that -- where I will read those. Is there anyone here present that makes want to make a comment about the rule related to the legal licensing definition? Okay, seeing none, we're going to go ahead with the comments that were submitted for this oral comment session that I will read on the submitters' behalf. And again, these are related to the definition change or amendment that we're going do for the legal license interpreter.

The first here is from Robert Hann. Comment says: As both a law-trained and mental health-trained professional, it concerns me that steps are being taken to limit significantly the number of legal interpreters that would be able to provide services to Deaf residents of Arizona.

Acquittances and clients have expressed concerns regarding the due process issues of not having interpreting services on a timely basis as well as the anxiety and distress of knowing that there may be delays in the resolution of legal issues.

It is rare that professional organizations and governing bodies choose not to grandfather in professionals that are already competently providing services during rule changes. I personally have seen grandfathering occur in several instances including here in Arizona when the Board of behavioral health changed from certification to licensure. I would strongly urge the Commission to reconsider their direction in this matter.

The next comment here is from Raymond Baesler.

I am a licensed interpreter in Arizona, and I have held a legal-a license since 2017. I want to raise my concerns, as I have for many years, regarding the proposed change to Legal-A licensing requirements. I earned a Legal-A license under the rules that existed in 2017 that allowed interpreters with certain RID certifications who completed numerous hours of additional legal training to obtain a Legal-A license without an additional legal certification.

The most recent change to the rules for Legal-A licensure added an additional certification requirement for those who were already licensed and successfully doing legal interpreting work in Arizona.

While the current proposed change extends the deadline for obtaining that legal

certification, it does not address what I believe to be larger issues.

The additional requirement of legal certification places an unnecessary burden on interpreters who have already attained Legal-A licensure under previous rules. This includes the cost of additional testing, and because RID no longer offers a legal certificate, the need to maintain continuing education units in an additional certification system.

A more important consideration is the impact this change will have on the Deaf community across Arizona. Many interpreters who hold Legal-A licensure will be reduced to a Legal-C license after the proposed deadline.

For various reasons, many are unable or unwilling to pursue additional certification. As a result, the already small pool of Legal-A interpreters in the State will be further reduced.

I urge the Commission to use this rulemaking opportunity to add a grandfather clause allowing those who already hold a Legal-A license to keep that license without any additional requirements so that they can continue to provide communication access in legal matters for the Deaf community in this state.

Next comment on the same subject is from David Svoboda.

I see no reason why the proposed changes insofar as they impact Legal-licensed interpreters should not be approved as they merely eliminate the extension of time to earn the Legal-A license that was granted due to COVID. Which has since expired already. None of the language access personnel in the State courts with whom I shared the information expressed any concerns about the proposed rulemaking for Legal-licensed interpreters to me.

So our final comment in relation to the Legal-A licensure is from Joni Horn.

My name is Joni Horn. Owner of Arizona Freelance Interpreting Services. My comments will focus on the change made to the Legal-A licensure change during the last review and rules change.

I add mitt I did not make comments during the last Open Comments on the rules change. I knew it would impact the community but did not realize to what extent.

Before the change was made during the prior review, AZ Freelance had a total of 19 Legal-A interpreters it regularly worked with to provide on-site services.

With this number of interpreters, AZFLIS was able to confirm services for many assignments including trials, probation appointments, depositions, last-minute assignments such as going to jail, et cetera.

Many of those interpreters have 20-plus years of experience and have been working in the community including legal assignments. With the experience came many hours of legal training. Originally, when licensure went into effect, the rules stated: R9-26-504. And so -- I'm not going to

read the whole rule there, but Joni cites R9-26-504, part three of that rule that says hours of legal training, 24 hours in the five years before the date of application are required. And this is for a Class D Legal-A license.

And the statement goes on, many interpreters met or exceeding the number of hours working in the community and legal hours of training.

Once COVID spread through the nation, interpreters began working from home, providing video remote interpreting, VRI. The demand for ASL interpreting services in general increased. With the demand increase of ASL service interpreters, interpreters found that they did not need to return to the community to provide on-site services.

ACDHH did extend the deadline for the new requirements of Legal-A testing requirement.

At this point, the feedback we received was many of the Legal-A interpreters found there was plenty of work in the community and did not need to or want to jump additional hurdles.

AZFLIS' number of Legal-A interpreters fell from 19 to 3. One of the three is providing ongoing daytime services to a non-legal customer. Another one of the those three Legal-As provides only VRI.

The ACDHH list of Legal-A interpreters is long but many only provide VRI services and are not here in the State to provide on-site services.

Right now, there's a discussion within the RID Registry of Interpreters for the Deaf, legal special interest group involving VRI not being a suitable accommodation for courtroom hearings. RID no longer offers the FDL, which means the only option for a legal test is the Court interpreter certification CIC. Closest testing facility is Texas. The entire process can take 9 to 12 months from application to test results.

With the current testing system, Arizona will never be able to increase its number of Legal-A interpreters to meet the demand of an increasing population.

Here is a list of assignments we did cover with the Legal-A licensed interpreter which we cannot cover any longer: School emergency, if the resource officer needs to question a student, an assault victim at a forensic emergency facility, a police emergency, CPS emergency, any call that comes in and is requesting asap services.

It is understandable that changes need to be made to further the profession and the protection of the communities we serve. At what point is it harmful to the communities we serve? If services are needed for a Deaf juror, those services have a 95% chance of not getting confirmed due to shortage. A trial which has many moving parts regarding interpreter roles is tough. Within the courtroom, there are different roles of the interpreter, the proceeding interpreter, the table interpreter, and the jury interpreter.

You can see at times, some cases require a minimum of four interpreters. Is at this time recommendation of the Board to utilize those Legal-A interpreters who provide only VRI services to commute to Arizona to provide services?

We currently have local Legal-A interpreters who do not accept legal assignments. That, too, skews the number of available interpreters that is not truly reflected on the list.

I do know that when the rules and regulations review happened the last go around, there were Legal-A interpreters who did plan to pursue the additional testing requirements. But after COVID, interpreters as a whole did not return to the community to work, and Legal-A interpreters found that they had plenty of work and did not need to pursue an additional certification.

In hindsight, to not do any harm to our community, grandfathering those Legal-A interpreters of 2016 to 2020, before they dropped off after COVID, and setting a new requirement of BEI CIC requirements might have better served our communities.

And there's a list of assignment totals from 2020 to 2023. In 2020, 378 assignments were closed. 134 assignments were canceled. Due to lack of interpreters. And 9 assignments were filled.

In 2021, 482 assignments were closed. 135 assignments were canceled. Due to lack of interpreters. And 20 were unfilled.

In 2022, 881 assignments were closed assignments. 122 were canceled due to a lack of interpreters. And 22 assignments were unfilled.

And then in 2023, 690 assignments were closed. 306 were canceled due to lack of interpreters. And 23 were unfilled.

And it says hearings, appointments that were not rescheduled or filled. 23. That's what that unfilled category is for.

You can see, the numbers of legal assignments continue to climb but the canceled unfilled have increased dramatically. This year, the number of closed assignments declined for the first time causing the canceled unfilled to increase.

I am asking to better serve the Deaf and Hard of Hearing community in Arizona. I'm asking the ACDHH board to consider reinstating grandfathering those interpreters who held a Legal-A that dropped to a Legal-C before the rule change to ensure the Deaf and Hard of Hearing communities are better able to receive accommodations and access to information during a very serious time of their life.

With the population of Arizona Deaf and Hard of Hearing community continuing to grow, the Legal-A interpreter on-site number can never catch up to that need.

So that's the end of that comment.

And I believe we have someone on Zoom with us who would like to comment, Marie.

>> MARIE TAVORMINA: I am in full support of the changes that are proposed.

I think the reason I say that is that we've had plenty of time to know what the requirements are to be able to work in the Courts. The first time the regulations were established, we knew that, I think it was -- many of us went and did what we had to do in order to continue to work in the Courts. And then, again, we were given another deadline. And some people met that deadline and got the proper certification and training to be able to work in the Courts.

And I appreciate the fact that you were flexible with the regulations during COVID. Because people weren't able to get the necessary credentials. But, again, we knew this was coming. And there are people I know who have flown to Texas or whatever state is offering the BEI testing so that they can get the proper certification.

Joni Horn is right. A lot of people have not wanted to -- don't want to go back into the community and work. But I don't see how changing the regulations back to grandfathering is going to change that. Maybe we need to look at other reasons why interpreters prefer not to work in the Courts. Maybe there's less incentive, maybe the pay is not as great. Maybe there's not enough training offered. But the regulations were set to protect the Deaf community. Deaf people should have the, you know, well-trained credentialed interpreters working in the Courts. And I would just say, please keep what you got. Don't change the regulations.

And, you know, it's like that movie, if you build it, they will come. There's a regulations. That's what's required. If you're really interested in working in this realm, get what you need to do it. Thank you.

>> VICTORIA VAUGHN: That's all the comments we have for the legal licensure in the proposed rule changes that were approved. For the record too, the other sections of the rules that were in the notice of proposed rule changes are rule R9.

26-501. R R9-26-503. R9-26-505. R9-26.507. And R9-26-509. So the rest of the comments are not directly related to the changes in the proposed rulemaking. But they're related to other issues that they felt a comment needed to be conveyed. So I'm going to read this comment is from Heather Donnel.

I would like the rules and/or laws amended to allow ACDHH jurisdiction over interpreting agencies and or entities providing interpreters. Without such oversight, we have entities making changes to the way they are sending out requests, assigning interpreters, and distributing information that is unethical and violates confidentiality.

At this time, there is no recourse. We know that these practices are harmful to the Deaf and hearing consumers for whom we work and should be disciplined.

It is infuriating and disheartening to see these practices occur, even after having informed the entity of their misconduct.

How can we protect the privacy of our Deaf community members when those receiving the requests, sometimes with very detailed informing, and then sending them out for coverage are not held to the same standards of confidentiality that interpreters are?

So those are all the comments that I have that were requested to be read during this oral comment session.

If you have submitted a written comments to us via email, we appreciate that. Those written comments will be a part of the record as well. And we'll double check just to make sure if there's anyone else that would like to make an oral comment today. Do we have anybody on YouTube that's watching? That wants to make a comment? Anything? No YouTube comments

>> CARMEN GREEN SMITH: None. Okay, seeing none, we want to again thank each of you for participating, whether you submitted written comments with the request for them to be read today or having participated during the written comment session.

We appreciate your feedback. At the adjournment of this meeting, the record will be closed. But we will notify the public when the Commission will be before the Governor's regulatory rule review before their council. So again, thank you for your time and your interest in both the equipment distribution program and the licensing of American Sign Language interpreters. We appreciate it. Thank you very much for participating. And at this time, our meeting is adjourned, and the record is closed. Thank you.

>> CHYLA DALTON-NAVA: The livestream is ended, so you guys are good to go.

>> CARMEN GREEN SMITH: Thank you. Thank you, interpreters.

>> INTERPRETER: Bye.

>> CARMEN GREEN SMITH: Bye-bye.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 25

Amend: R9-25-908

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - EXPEDITED RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 12, 2024

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 25

Amend: R9-25-908

Summary:

This expedited rulemaking from the Department of Health Services (Department) seeks to amend one (1) rule in Title 9, Chapter 25, Article 9 regarding Ground Ambulance Certificate of Necessity. Specifically, as part of completing a recent rulemaking that included the rules in Title 9, Chapter 25, Article 9, the Department identified several areas that might require further discussion and revision and included a delayed implementation date for some requirements to allow for additional discussion with stakeholders. The Department initiated this current rulemaking to allow for further discussion and possible changes to be made to address stakeholder concerns. After meeting with stakeholders, the Department has made changes to reduce the regulatory burden while achieving the same objective.

1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

The Department indicates the new amendments are consistent with the purpose for A.R.S. § 41-1027 in that this rulemaking does not increase the cost of regulatory compliance, does not increase a fee, or reduce a procedural right of regulated persons, and reduces steps, procedures, or processes and amends rules that are outdated and unnecessary, while protecting

the health and safety of patients and the general public. Council staff believes the Department's rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)(5) and (6).

2. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Department cites both general and specific statutory authority for these rules.

3. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it did not receive any public comments regarding this rulemaking.

4. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates there were no changes between the Notice of Proposed Expedited Rulemaking published in the Administrative Register on September 6, 2024 and the Notice of Final Expedited Rulemaking now before the Council for consideration.

5. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates there is no corresponding federal law.

6. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates it issues certificates of necessity. However, the Department indicates a general permit is not applicable under A.R.S. § 41-1037(A)(2) as the issuance of an alternative type of permit, license or authorization is specifically authorized by state statute.

Specifically, the Department indicates it issues certificates of necessity under A.R.S. §§ 36-2202(A), 36-2232, 36-2233, 36-2236, and 36-2240. As such, Council staff believes the Department is in compliance with A.R.S. § 41-1037.

7. <u>Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?</u>

The Department indicates it did not review any study relevant to this rulemaking.

8. <u>Conclusion</u>

This expedited rulemaking from the Department seeks to amend one (1) rule in Title 9, Chapter 25, Article 9 regarding Ground Ambulance Certificate of Necessity. Specifically, as part of completing a recent rulemaking that included the rules in Title 9, Chapter 25, Article 9, the Department identified several areas that might require further discussion and revision and included a delayed implementation date for some requirements to allow for additional discussion with stakeholders. The Department initiated this current rulemaking to allow for further discussion and possible changes to be made to address stakeholder concerns. After meeting with stakeholders, the Department has made changes to reduce the regulatory burden while achieving the same objective.

Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on the filing of the approved Notice of Final Expedited Rulemaking with the Secretary of State.

Council staff recommends approval of this rulemaking.

October 15, 2024

VIA EMAIL: grrc@azdoa.gov
Jessica Klein, Esq., Chair
Governor's Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 25, Expedited Rulemaking

Dear Ms. Klein:

1. The close of record date: September 16, 2024

2. Explanation of how the expedited rule meets the criteria in A.R.S. § 41-1027(A):
The rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of regulated persons. The rulemaking amends requirements to reduce steps and removes requirements that are outdated or need clarification, meeting the requirements in A.R.S. § 41-1027(A)(5) and (6).

3. Whether the rulemaking relates to a five-year-review report and, if applicable, the date the report was approved by the Council:
The rulemaking for 9 A.A.C. 25 does not relate to a five-year-review report.

4. A list of all items enclosed:
   a. Notice of Final Expedited Rulemaking, including the Preamble, Table of Contents, and text of the rule
   b. Statutory authority
   c. Current rule

The Department is requesting that the rules be heard at the Council meeting on December 3, 2024.

The Department certifies that the Preamble of this rulemaking discloses a reference to any study relevant to the rule that the Department reviewed and either did or did not rely on in its evaluation of or justification for the rule.

The Department's point of contact for questions about the rulemaking documents is Ruthann Smejkal at Ruthann.Smejkal@azdhs.gov.

Sincerely,

Stacie Gravito
Director's Designee

NOTICE OF FINAL EXPEDITED RULEMAKING

TITLE 9. HEALTH SERVICES

CHAPTER 25. DEPARTMENT OF HEALTH SERVICES

EMERGENCY MEDICAL SERVICES

PREAMBLE

1. **Permission to proceed with this final expedited rulemaking was granted under A.R.S. § 41-1039(B) by the Governor on:**

   October 15, 2024

2. **Article, Part or Sections Affected (as applicable)** — **Rulemaking Action**

   R9-25-908 — Amend

3. **Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):**

   Authorizing statutes: A.R.S. §§ 36-132(A)(1), 36-136(G)

   Implementing statutes: A.R.S. §§ 36-2201, 36-2202, 36-2204.02, 36-2211, 36-2224, 36-2232, 36-2233, 36-2237, 36-2241

4. **The effective date of the rule:**

   This expedited rulemaking becomes effective immediately on the filing of the Notice of Final Expedited Rulemaking pursuant to A.R.S. § 41-1027(H). The effective date is (to be filled in by Register editor).

5. **Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the record of the proposed rule:**

   Notice of Rulemaking Docket Opening: 30 A.A.R. 436, March 8, 2024

   Notice of Proposed Expedited Rulemaking: 30 A.A.R. 2780, September 6, 2024

6. **The agency's contact person who can answer questions about the rulemaking:**

   Name: Rachel Zenuk Garcia, Bureau Chief

   Address: Arizona Department of Health Services
   Bureau of Emergency Medical Services and Trauma System
   150 N. 18th Ave., Suite 540
   Phoenix, AZ 85007-3248

   Telephone: (602) 364-3150

   Fax: (602) 364-3568

E-mail: Rachel.Garcia@azdhs.gov

or

Name: Stacie Gravito, Office Chief

Address: Arizona Department of Health Services

Office of Administrative Counsel and Rules

150 N. 18th Avenue, Suite 200

Phoenix, AZ 85007-3232

Telephone: (602) 542-1020

Fax: (602) 364-1150

E-mail: Stacie.Gravito@azdhs.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Arizona Revised Statutes (A.R.S.) §§ 36-2202(A)(3) and (4) and 36-2209(A)(2) require the Arizona Department of Health Services (Department) to adopt standards and criteria pertaining to the quality of emergency care, rules necessary for the operation of emergency medical services, and rules for carrying out the purposes of A.R.S. Title 36, Chapter 21.1. A.R.S. Title 36, Chapter 21.1, Article 2, specifies requirements related to the regulation of ground ambulance services. The Department has adopted rules to implement these statutes in 9 A.A.C. 25, with the rules in Article 9 establishing requirements for ground ambulance certificates of necessity. As part of completing a recent rulemaking that included the rules in 9 A.A.C. 25, Article 9, the Department identified several areas that might require further discussion and revision and included a delayed implementation date for some requirements to allow for additional discussion with stakeholders. The Department initiated this rulemaking to allow for further discussion and possible changes to be made to address stakeholder concerns. After meeting with stakeholders, the Department has made changes to reduce the regulatory burden while achieving the same objective. The new amendments are consistent with the purpose for A.R.S. § 41-1027 in that this rulemaking does not increase the cost of regulatory compliance, does not increase a fee, or reduce a procedural right of regulated persons, and reduces steps, procedures, or processes and amends rules that are outdated and unnecessary, while protecting the health and safety of patients and the general public.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule,

where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The Department did not review or rely on any study for this rulemaking.

9. **A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

10. **A statement that the agency is exempt from the requirements under A.R.S. § 41-1055(G) to obtain and file a preliminary summary of the economic, small business, and consumer impact under A.R.S. § 41-1055(D)(2):**

Under A.R.S. § 41-1055(D)(2), the Department is not required to provide an economic, small business, and consumer impact statement.

11. **A description of any change between the proposed expedited rulemaking, to include a supplemental proposed notice, and the final rulemaking:**

No changes were made between the proposed expedited rulemaking and the final expedited rulemaking.

12. **An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:**

No comments were received.

13. **All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:**

a. **Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:**

Permits are not applicable to the content of this rulemaking. However, with reference to 9 A.A.C. 25, Article 9, a general permit is not applicable under A.R.S. § 41-1037(A)(2). The Department issues certificates of necessity under A.R.S. §§ 36-2202(A), 36-2232, 36-2233, 36-2236, and 36-2240.

b. **Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

No federal laws are applicable to this rulemaking.

c. **Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

No business competitiveness analysis was received by the Department.

14. **A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:**

Not applicable

15. **The full text of the rules follows:**

TITLE 9. HEALTH SERVICES

CHAPTER 25. EMERGENCY MEDICAL SERVICES

ARTICLE 9. GROUND AMBULANCE CERTIFICATE OF NECESSITY

Section
R9-25-908. Operations (Authorized by A.R.S. §§ 36-2201(4), 36-2202(A)(5), 36-2204.02, 36-2211, 36-2224, 36-2232, 36-2233, 36-2237, 36-2241)

ARTICLE 9. GROUND AMBULANCE CERTIFICATE OF NECESSITY

R9-25-908. Operations (Authorized by A.R.S. §§ 36-2204.02, 36-2211, 36-2224, 36-2232, 36-2233, 36-2237, 36-2241)

A. Insurance: A certificate holder shall:

1. Either:
   a. Maintain with an insurance company authorized to transact business in this state:
      i. A minimum single occurrence automobile liability insurance coverage of $1,000,000 for ground ambulance vehicles;
      ii. A minimum single occurrence professional liability insurance coverage for the ground ambulance service of $1,000,000; and
      iii. If the certificate holder provides ALS services or critical care services, a minimum single occurrence professional liability insurance coverage for personnel of the ground ambulance service providing ALS services or critical care services of $1,000,000; or
   b. Be self-insured for the amounts in subsection (A)(1)(a); and
2. Submit to the Department within seven days after renewal of the insurance coverage in subsection (A)(1)(a) or a change in how the insurance coverage in subsection (A)(1)(a) or (b) is obtained:
   a. A copy of the certificate of insurance in subsection (A)(1)(a); or
   b. Documentation of self-insurance according to subsection (A)(1)(b).

B. Record Retention: According to A.R.S. § 36-2241, a certificate holder shall maintain the following records for the Department's review and inspection:

1. The certificate holder's financial statements;
2. All federal and state income tax records;
3. All employee-related expense reports and payroll records;
4. All bank statements and documents used to reconcile accounts;
5. All documents establishing the depreciation of assets, such as schedules or accounting records on ground ambulance vehicles, equipment, office furniture, and other plant and equipment assets subject to depreciation;

6. All prehospital history incident reports, as specified in subsection (J)(1);
7. All patient billing and reimbursement records;
8. All dispatch records, as specified in subsection (J)(2);
9. All policies and procedures required by this Article or Article 2, 10, or 11 of this Chapter;
10. All plans required by this Article or Article 2, 10, or 11 of this Chapter;
11. Documentation of the analysis of response time performance according to subsection (G)(2);
12. Documentation of the analysis of performance of interfacility transports of patients with no time-critical condition, including patients with a time-sensitive condition, according to subsection (H)(1);
13. Documentation of notification to the Department of instances of noncompliance according to subsection (K)(1)(c);
14. All back-up agreements, contracts, grants, and financial assistance records related to ground ambulance vehicles, ambulance response, and transport;
15. All written complaints about the ground ambulance service; and
16. Information about destroyed or otherwise irretrievable records in a file including:
    a. A list of each record destroyed or otherwise irretrievable,
    b. A description of the circumstances under which each record became destroyed or otherwise irretrievable, and
    c. The date each record was destroyed or became otherwise irretrievable.

C. Staffing: A certificate holder shall ensure that:

1. If a ground ambulance vehicle is marked with a level of service, the ground ambulance vehicle is staffed to provide the level of service identified;
2. An administrative medical director for the ground ambulance service complies with requirements in R9-25-201(F) and R9-25-502(B);
3. Policies and procedures are established, implemented, and maintained that cover:
    a. Job descriptions, duties, and qualifications, including required skills and knowledge for EMCTs and other employees; and
    b. Orientation and in-service education for EMCTs and other employees;
4. An EMCT employed by the ground ambulance service:
    a. Is assigned patient care duties consistent with the EMCT's scope of practice and the administrative medical director's evaluation of the

EMCT's skills and capabilities;

b. Complies with the protocols required in R9-25-201(E)(2);

c. Receives training on the policies and procedures required in R9-25-201(E)(3)(b); and

d. Receives ongoing education, training, or remediation consistent with the policies and procedures required in R9-25-201(E)(3)(b)(x); and

5. Staffing of ground ambulance vehicles:

a. For the provision of BLS or ALS, is consistent with A.R.S. § 36-2239; and

b. ~~Effective January 1, 2025, for~~ For critical care services, includes at least one:

i. Paramedic with an additional endorsement, indicating additional training and authorization from the Department to provide critical care services; or

ii. Registered nurse.

D. Communications and Advertising: A certificate holder shall ensure that the ground ambulance service:

1. Makes a good faith effort to communicate information:

a. About its hours of operation to the general public through print media, broadcast media, the Internet, or other means; and

b. About resource availability and deployment to other EMS providers in overlapping and surrounding service areas;

2. Does not advertise that the ground ambulance service:

a. Provides a type of service or level of service other than what is granted in the certificate of necessity,

b. Operates in the service area other than what is granted in the certificate of necessity, or

c. In a manner that circumvents the use of 9-1-1 or another similarly designated emergency telephone number;

3. Establishes, implements, and maintains the protocol for providing information to emergency receiving facility staff concurrent with the transfer of care, required in R9-25-201(E)(2)(d)(i), which includes:

a. The date and time the dispatch was received by the ground ambulance

service;

b. The unique number used by the ground ambulance service to identify the run;

c. The name of the ground ambulance service;

d. The number or other identifier of the ground ambulance vehicle used for the run;

e. The following information about the patient:

i. The patient's name;

ii. The patient's date of birth or age, as available;

iii. The principal reason for requesting services for the patient;

iv. The patient's medical history, including any chronic medical illnesses, known allergies to medications, and medications currently being taken by the patient;

v. The patient's level of consciousness at initial contact and when reassessed;

vi. The patient's pulse rate, respiratory rate, oxygen saturation, and systolic blood pressure at initial contact and when reassessed;

vii. The results of an electrocardiograph, if available;

viii. The patient's glucose level at initial contact and when reassessed, if applicable;

ix. The patient's level of responsiveness score, as applicable, at initial contact and when reassessed;

x. The results of the patient's neurological assessment, if applicable; and

xi. The patient's pain level at initial contact and when reassessed; and

f. Any procedures or other treatment provided to the patient at the scene or during transport, including any agents administered to the patient; and

4. Establishes, implements, and maintains a protocol for providing information to another certificate holder, ambulance service, EMS provider, or health care institution concurrent with the transfer of care, which includes the information in subsections (D)(3)(c), (d), (e), and (f).

E. Dispatch and Scheduling: A certificate holder shall ensure that:

1. A contract or other agreement, including internal policies and procedures, to provide dispatch exists and includes:
    a. Information about other certificate holders with which the certificate holder has a back-up agreement;
    b. The process and parameters under which a ground ambulance vehicle of another certificate holder will be dispatched to respond to a call to which a ground ambulance vehicle of the certificate holder cannot respond;
    c. Except as specified in subsection (E)(2), for an area within the certificate holder's service area that overlaps with another certificate holder's service area, that the nearest ground ambulance vehicle to the patient's location, under either certificate holder that can provide the necessary level of service, will be directed to respond to a call made through 9-1-1 or a similar dispatch system; and
    d. If the entity providing dispatch is external to the ground ambulance service, a requirement that the certificate holder receive a copy of each dispatch made under the contract or other agreement;
2. If a certificate holder has a ground ambulance service contract under R9-25-1104 with a political subdivision, the ground ambulance service contract contains requirements that specify a method for dispatch, which may differ from requirements in subsection (E)(1)(c); and
3. For an interfacility transport of a patient with no time-critical condition:
    a. Unless already specified in a written agreement between the certificate holder and the person requesting the interfacility transport, the entity receiving the request for the interfacility transport provides an estimated time of arrival to the person requesting the interfacility transport at the time that the interfacility transport is requested;
    b. If the estimated time of arrival provided according to subsection (E)(3)(a) changes to a later time, the ground ambulance service, either directly or indirectly, does one of the following:
        i. Contacts another ground ambulance service to respond to the dispatch, based on the ground ambulance service's back-up plan and back-up agreements;
        ii. Provides to the contact at the requesting health care institution

the name and telephone number of another ground ambulance service with which the ground ambulance service has a back-up agreement; or

iii. Provides an amended estimated time of arrival to the person requesting transport that takes into consideration:

(1) The patient's condition and needs, and

(2) Health and safety;

c. ~~Effective January 1, 2025, unless~~ Unless otherwise specified on the certificate holder's certificate of necessity, the actual time of arrival of a ground ambulance vehicle at a health care institution for an interfacility transport of a patient who does not have a time-critical condition is within 60 minutes of the estimated time of arrival in subsection (E)(3)(a) or amended estimated time of arrival in subsection (E)(3)(b)(iii) for at least 90% of the interfacility transports; and

d. If the interfacility transport does not meet the standards in subsection (E)(3)(c), factors that may have contributed to not meeting the standards are considered through the quality improvement process in subsection (K)(2)(b).

F. Transport: A certificate holder:

1. Shall only provide ambulance response or transport within the service area identified in the certificate holder's certificate of necessity except:

a. When authorized by a service area's dispatch, before the service area's ground ambulance vehicle arrives at the scene;

b. According to a back-up agreement; or

c. If the area is not included in the service area of another certificate holder;

2. Except as specified in subsection (F)(3), shall transport a patient in the certificate holder's service area who requests transport; and

3. May deny transport to a patient in the certificate holder's service area:

a. As limited by A.R.S. § 36-2224;

b. If the patient is in a health care institution and the patient's medical condition requires a level of care or monitoring during transport that exceeds the scope of practice of the ambulance attendants' certification;

c. If the transport may result in an immediate threat to the ambulance

attendant's safety, as determined by the ambulance attendant, the certificate holder, the administrative medical director, or a physician providing on-line medical direction and does not affect the ground ambulance service's hours of operation;

d. If the patient is 18 years or age or older, or meets the requirements in A.R.S. § 12-2451, 44-131, or 44-132, and refuses to be transported; or

e. If the patient is in a health care institution and does not meet the federal requirements for medically necessary ground vehicle ambulance transport as identified in 42 CFR 410.40.

G. Response Time Performance: A certificate holder shall ensure that:

1. Response times resulting from a 9-1-1 or similar system dispatch or, if applicable, a request for the interfacility transport of a patient with a time-critical condition comply with requirements of the certificate holder's certificate of necessity;

2. Response time performance, based on the information is subsection (J)(2), is assessed at least every six months for compliance with requirements of the certificate holder's certificate of necessity;

3. The following are reported to the Department annually, in a Department-provided format, concurrent with the submission of the information required in R9-25-909:

   a. Response time data that complies with requirements in A.R.S. § 36-2232(A)(3), and

   b. The results of the response time performance assessments in subsection (G)(2); and

4. If response time performance does not comply with requirements of the certificate holder's certificate of necessity, either:

   a. A corrective action plan, developed according to R9-25-910(E)(2)(a) through (d), is submitted to the Department with the information required in subsection (G)(3); or

   b. The certificate holder submits to the Department with the information required in subsection (G)(3) documentation demonstrating that noncompliance was due to:

      i. A situation specified in A.R.S. § 36-2232(G), or

ii. An external factor beyond the control of the certificate holder.

H. Performance of Interfacility Transports of Patients with No Time-Critical Condition: ~~Effective January 1, 2025, a~~ A certificate holder shall ensure that:

1. The performance of interfacility transports of patients with no time-critical condition~~, including patients with a time-sensitive condition~~:
    a. Is based on the information in subsection (J)(2);
    b. Is assessed at least every six months;
    c. Includes the analysis of:
        i. The number of calls received;
        ii. The time a call was received;
        iii. The initial estimated time of arrival, according to subsection (E)(3)(a); and
        iv. The time of arrival at the patient's location; and
    d. May include:
        ~~v.~~i. Any other information about cancelled calls, amended estimated times of arrival, or delays that may have factored into performance; and
        ~~d.~~ii. ~~Includes a~~ A description of any actions taken by the certificate holder to improve performance;
2. The results of the performance assessments in subsection (H)(1) are reported to the Department annually in a Department-provided format, concurrent with the submission of the information required in R9-25-909; and
3. If the performance of interfacility transports of patients with no time-critical condition does not comply with subsection (E)(3)(c) or requirements of the certificate holder's certificate of necessity, as applicable, either:
    a. A corrective action plan, developed according to R9-25-910(E)(2)(a) through (d), is submitted to the Department with the information required in subsection (H)(2); or
    b. The certificate holder submits to the Department with the information required in subsection (H)(2) documentation demonstrating that noncompliance was due to an external factor beyond the control of the certificate holder.

I. The Department may require that a certificate holder contract for third-party monitoring

of response time performance as part of a:

1. Political subdivision contract, unless both parties to the contract waive the requirement; or
2. Corrective action plan.

J. Records: A certificate holder shall ensure that:

1. A prehospital incident history report, in a Department-provided format, is created for each patient that includes the following information, as available:
   a. The name and identification number of the ground ambulance service;
   b. Information about the software for the storage and submission of the prehospital incident history report;
   c. The unique number assigned to the run;
   d. The unique number assigned to the patient;
   e. Information about the response to the dispatch, including:
      i. The level of service requested;
      ii. Information obtained by the person providing dispatch about the request;
      iii. Information about the ground ambulance vehicle assigned to the dispatch;
      iv. Information about the EMCTs responding to the dispatch;
      v. The priority assigned to the dispatch; and
      vi. Response delays, as applicable;
   f. The date and time that:
      i. The call requesting service was received through the 9-1-1 or similar dispatch system,
      ii. The request was received by the person providing dispatch,
      iii. The ground ambulance service received the dispatch,
      iv. The ground ambulance vehicle left for the patient's location,
      v. The ground ambulance vehicle arrived at the patient's location,
      vi. The EMCTs in the ground ambulance vehicle arrived at the patient's side,
      vii. Transfer of care for the patient occurred at a location other than the destination,
      viii. The ground ambulance vehicle departed the patient's location,

ix. The ground ambulance vehicle arrived at the destination,

x. Transfer of care for the patient occurred at the destination, and

xi. The ground ambulance vehicle was available to take another call;

g. Information about the patient, including:

i. The patient's first and last name;

ii. The address of the patient's residence;

iii. The county of the patient's residence;

iv. The country of the patient's residence;

v. The patient's gender, race, ethnicity, and age;

vi. The patient's estimated weight;

vii. The patient's date of birth; and

viii. If the patient has an alternate residence, the address of the alternate residence;

h. The primary method of payment for services and anticipated level of payment;

i. Information about the scene, including:

i. Specific information about the location of the scene;

ii. Whether the ground ambulance vehicle was first on the scene;

iii. The number of patients at the scene;

iv. Whether the scene was the location of a mass casualty incident; and

v. If the scene was the location of a mass casualty incident, triage information;

j. Information about the reason for requesting service for the patient, including:

i. The date and time of onset of symptoms and when the patient was last well;

ii. Information about the principal reason the patient needs services;

iii. The patient's symptoms;

iv. The results of the EMCT's initial assessment of the patient;

v. If the patient was injured, information about the injury and the cause of the injury;

vi. If the patient experienced a cardiac arrest, information about the

etiology of the cardiac arrest and subsequent treatment provided; and

vii. For an interfacility transport, the reason for the transport;

k. Information about any specific barriers to providing care to the patient;

l. Information about the patient's medical history, including;

i. Known allergies to medications,

ii. Surgical history,

iii. Current medications, and

iv. Alcohol or drug use;

m. Information about the patient's current medical condition, including the information in subsections (D)(2)(e)(v) through (xi) and the time and method of assessment;

n. Information about agents administered to the patient, including the dose and route of administration, time of administration, and the patient's response to the agent;

o. If not specifically included under subsection (J)(1)(l), (l)(iv), (m), or (n), the information required in A.A.C. R9-4-602(A);

p. Information about any procedures performed on the patient and the patient's response to the procedure;

q. Whether the patient was transported and, if so, information about the transport;

r. Information about the destination of the transport, including the reason for choosing the destination;

s. Whether transfer of care for the patient to another EMS provider or ambulance service occurred and, if so, identification of the EMS provider or ambulance service;

t. Unless transfer of care for the patient to another EMS provider or ambulance service occurred, information about:

i. Whether the destination facility was notified that the patient being transported has a time-critical condition and the time of notification,

ii. The disposition of the patient at the destination, and

iii. The disposition of the run;

u. Any other narrative information about the patient, care receive by the patient, or transport; and

v. The name and certification level of the EMCT providing the information; and

2. Dispatch records for each call or request for service, including all cancelled runs, contain the following information, in a Department-provided format:

a. The name of the ground ambulance service;

b. The date;

c. Level of service;

d. Type of service;

e. Staffing of the run;

f. Time of receipt of the call;

g. Time of the dispatch;

~~h.~~ ~~The estimated time of arrival, as provided according to subsection (E)(3)(a) if applicable;~~

~~i.~~h. Departure time to the patient's location;

~~j.~~i. Address of the patient's location;

~~k.~~j. Time of arrival at the patient's location;

~~l.~~k. Departure time to the destination health care institution;

~~m.~~l. Name and address of the destination health care institution;

~~n.~~m. Time of arrival at the destination health care institution;

~~o.~~n. Any type of delay, if applicable;

~~p.~~o. The unique reference number used by the ground ambulance service to identify the patient, dispatch, or run;

~~q.~~p. The number assigned to the ground ambulance vehicle by the certificate holder;

~~r.~~q. The priority assigned by a certificate holder to the response;

~~s.~~r. The scene locality; ~~and~~

~~t.~~s. Whether the dispatch is a scheduled transport; and

t. The estimated time of arrival, as provided according to subsection (E)(3)(a), if applicable.

K. Assuring Consistent, Compliant Performance: A certificate holder shall:

1. Adopt, implement, and maintain policies and procedures for:

a. Complaint resolution;

b. Assessing the ground ambulance service's compliance with requirements in this Article, Articles 2, 10, or 11 of this Chapter, or A.R.S. Title 36, Chapter 21.1, including the review of:

i. The information provided to an emergency receiving facility for compliance with the protocol required in R9-25-201(E)(2)(d),

ii. Chain of custody for drugs,

iii. Compliance with minimum equipment requirements for a ground ambulance vehicle,

iv. Compliance with requirements in R9-25-201(E)(3), and

v. The quality improvement parameters in subsection (K)(2)(b) related to the provision of services;

c. Notifying the Department within 30 calendar days after completing an assessment in subsection (K)(1)(b), during which an instance of noncompliance was identified, and submitting a corrective action plan that complies with requirements in R9-25-910(E)(2)(a) through (d); and

d. A quality improvement process according to subsection (K)(2);

2. Establish, document, and implement a quality improvement process, as specified in policies and procedures, through which:

a. Data related to initial patient assessment, patient care, transport services provided, and patient status upon arrival at the destination are:

i. Collected continuously;

ii. For the information required in subsection (J)(1), submitted to the Department, in a format specified by the Department and within 48 hours after the beginning of a run, for quality improvement purposes; and

iii. If notified that the submission of information to the Department according to subsection (K)(2)(a)(ii) was unsuccessful, corrected and resubmitted within seven days after notification;

b. Continuous quality improvement processes are developed and implemented to identify, document, and evaluate issues related to the provision of services to ensure quality patient care, including:

i. Care provided to patients with time-critical conditions, including

deviations from national treatment standards for a patient with a time-critical condition;

ii. Transport, including an interfacility transport of a patient that does not have a time-critical condition;

iii. Documentation; and

iv. Patient status upon arrival at the destination;

c. A committee consisting of the administrative medical director, the individual managing the ground ambulance service or designee, and other employees as appropriate:

i. Review the data in subsection (K)(2)(a) and any issues identified in subsection (K)(2)(b) on at least a quarterly basis; and

ii. Implement activities to improve performance when deviations in patient care, transport, or documentation are identified; and

d. The activities in subsection (K)(2)(c) are documented, consistent with A.R.S. §§ 36-2401, 36-2402, and 36-2403; and

3. Ensure that the information required in ~~subsection (J)(2)~~ subsections (J)(2)(a) through (s) is submitted to the Department, in a Department-provided format, and within 48 hours after the receipt of a call or request for service.

L. If a certificate holder has a reasonable basis to believe that a situation or circumstance specified according to A.R.S. § 36-2211(A) has occurred, the certificate holder shall:

1. If applicable, take immediate action to prevent the recurrence of the situation or circumstance;

2. Report the suspected situation or circumstance to the Department and, if applicable, according to A.R.S. § 13-3620 or 46-454;

3. Document:

a. The suspected situation or circumstance;

b. Any action taken according to subsection (L)(1); and

c. The report in subsection (L)(2);

4. Maintain the documentation in subsection (L)(3) for at least 12 months after the date of the report in subsection (L)(2);

5. Initiate an investigation of the situation or circumstance and document the following information within five working days after the report required in subsection (L)(2):

a. The dates, times, and description of the situation or circumstance;

b. A description of any injury to a patient related to the suspected situation or circumstance and any change to the patient's physical, cognitive, functional, or emotional condition;

c. The names of witnesses to the suspected situation or circumstance; and

d. The actions taken by the certificate holder to prevent the suspected situation or circumstance from occurring in the future; and

6. Maintain a copy of the documented information required in subsection (L)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.

M. A certificate holder shall notify the Department of a change in the number or location of suboperation stations in the certificate holder's service area, according to A.R.S. § 36-2232(C)(4), and include:

1. The certificate of necessity number for the ground ambulance service;
2. The name of the ground ambulance services on the certificate of necessity;
3. The name, title, address, e-mail address, and telephone number of an individual whom the Department may contact about the notification; and
4. Information about the change, including, as applicable:

a. How the number of suboperation stations is changed from the information on the certificate holder's certificate of necessity;

b. The address of each suboperation station that is being removed from service; and

c. The address, hours of operation, and telephone number of each new suboperation station located within the service area.

N. A certificate holder shall submit to the Department, no later than 180 days after the certificate holder's fiscal year end, the information in the Ambulance Revenue and Cost Report specified in R9-25-909(A) or (C), as appropriate to the certificate holder's business organization.

TITLE 9. HEALTH SERVICES

CHAPTER 25. EMERGENCY MEDICAL SERVICES

ARTICLE 9. GROUND AMBULANCE CERTIFICATE OF NECESSITY

R9-25-908. Operations (Authorized by A.R.S. §§ 36-2204.02, 36-2211, 36-2224, 36-2232, 36-2233, 36-2237, 36-2241)

A. Insurance: A certificate holder shall:

1. Either:
   a. Maintain with an insurance company authorized to transact business in this state:
      i. A minimum single occurrence automobile liability insurance coverage of $1,000,000 for ground ambulance vehicles;
      ii. A minimum single occurrence professional liability insurance coverage for the ground ambulance service of $1,000,000; and
      iii. If the certificate holder provides ALS services or critical care services, a minimum single occurrence professional liability insurance coverage for personnel of the ground ambulance service providing ALS services or critical care services of $1,000,000; or
   b. Be self-insured for the amounts in subsection (A)(1)(a); and
2. Submit to the Department within seven days after renewal of the insurance coverage in subsection (A)(1)(a) or a change in how the insurance coverage in subsection (A)(1)(a) or (b) is obtained:
   a. A copy of the certificate of insurance in subsection (A)(1)(a); or
   b. Documentation of self-insurance according to subsection (A)(1)(b).

B. Record Retention: According to A.R.S. § 36-2241, a certificate holder shall maintain the following records for the Department's review and inspection:

1. The certificate holder's financial statements;
2. All federal and state income tax records;
3. All employee-related expense reports and payroll records;
4. All bank statements and documents used to reconcile accounts;
5. All documents establishing the depreciation of assets, such as schedules or accounting records on ground ambulance vehicles, equipment, office furniture,

and other plant and equipment assets subject to depreciation;

6. All prehospital history incident reports, as specified in subsection (J)(1);
7. All patient billing and reimbursement records;
8. All dispatch records, as specified in subsection (J)(2);
9. All policies and procedures required by this Article or Article 2, 10, or 11 of this Chapter;
10. All plans required by this Article or Article 2, 10, or 11 of this Chapter;
11. Documentation of the analysis of response time performance according to subsection (G)(2);
12. Documentation of the analysis of performance of interfacility transports of patients with no time-critical condition, including patients with a time-sensitive condition, according to subsection (H)(1);
13. Documentation of notification to the Department of instances of noncompliance according to subsection (K)(1)(c);
14. All back-up agreements, contracts, grants, and financial assistance records related to ground ambulance vehicles, ambulance response, and transport;
15. All written complaints about the ground ambulance service; and
16. Information about destroyed or otherwise irretrievable records in a file including:
    a. A list of each record destroyed or otherwise irretrievable,
    b. A description of the circumstances under which each record became destroyed or otherwise irretrievable, and
    c. The date each record was destroyed or became otherwise irretrievable.

C. Staffing: A certificate holder shall ensure that:

1. If a ground ambulance vehicle is marked with a level of service, the ground ambulance vehicle is staffed to provide the level of service identified;
2. An administrative medical director for the ground ambulance service complies with requirements in R9-25-201(F) and R9-25-502(B);
3. Policies and procedures are established, implemented, and maintained that cover:
    a. Job descriptions, duties, and qualifications, including required skills and knowledge for EMCTs and other employees; and
    b. Orientation and in-service education for EMCTs and other employees;
4. An EMCT employed by the ground ambulance service:
    a. Is assigned patient care duties consistent with the EMCT's scope of

practice and the administrative medical director's evaluation of the EMCT's skills and capabilities;

b. Complies with the protocols required in R9-25-201(E)(2);

c. Receives training on the policies and procedures required in R9-25-201(E)(3)(b); and

d. Receives ongoing education, training, or remediation consistent with the policies and procedures required in R9-25-201(E)(3)(b)(x); and

5. Staffing of ground ambulance vehicles:

a. For the provision of BLS or ALS, is consistent with A.R.S. § 36-2239; and

b. Effective January 1, 2025, for critical care services, includes at least one:

i. Paramedic with an additional endorsement, indicating additional training and authorization from the Department to provide critical care services; or

ii. Registered nurse.

D. Communications and Advertising: A certificate holder shall ensure that the ground ambulance service:

1. Makes a good faith effort to communicate information:

a. About its hours of operation to the general public through print media, broadcast media, the Internet, or other means; and

b. About resource availability and deployment to other EMS providers in overlapping and surrounding service areas;

2. Does not advertise that the ground ambulance service:

a. Provides a type of service or level of service other than what is granted in the certificate of necessity,

b. Operates in the service area other than what is granted in the certificate of necessity, or

c. In a manner that circumvents the use of 9-1-1 or another similarly designated emergency telephone number;

3. Establishes, implements, and maintains the protocol for providing information to emergency receiving facility staff concurrent with the transfer of care, required in R9-25-201(E)(2)(d)(i), which includes:

a. The date and time the dispatch was received by the ground ambulance

service;

b. The unique number used by the ground ambulance service to identify the run;

c. The name of the ground ambulance service;

d. The number or other identifier of the ground ambulance vehicle used for the run;

e. The following information about the patient:

i. The patient's name;

ii. The patient's date of birth or age, as available;

iii. The principal reason for requesting services for the patient;

iv. The patient's medical history, including any chronic medical illnesses, known allergies to medications, and medications currently being taken by the patient;

v. The patient's level of consciousness at initial contact and when reassessed;

vi. The patient's pulse rate, respiratory rate, oxygen saturation, and systolic blood pressure at initial contact and when reassessed;

vii. The results of an electrocardiograph, if available;

viii. The patient's glucose level at initial contact and when reassessed, if applicable;

ix. The patient's level of responsiveness score, as applicable, at initial contact and when reassessed;

x. The results of the patient's neurological assessment, if applicable; and

xi. The patient's pain level at initial contact and when reassessed; and

f. Any procedures or other treatment provided to the patient at the scene or during transport, including any agents administered to the patient; and

4. Establishes, implements, and maintains a protocol for providing information to another certificate holder, ambulance service, EMS provider, or health care institution concurrent with the transfer of care, which includes the information in subsections (D)(3)(c), (d), (e), and (f).

E. Dispatch and Scheduling: A certificate holder shall ensure that:

1. A contract or other agreement, including internal policies and procedures, to provide dispatch exists and includes:
   a. Information about other certificate holders with which the certificate holder has a back-up agreement;
   b. The process and parameters under which a ground ambulance vehicle of another certificate holder will be dispatched to respond to a call to which a ground ambulance vehicle of the certificate holder cannot respond;
   c. Except as specified in subsection (E)(2), for an area within the certificate holder's service area that overlaps with another certificate holder's service area, that the nearest ground ambulance vehicle to the patient's location, under either certificate holder that can provide the necessary level of service, will be directed to respond to a call made through 9-1-1 or a similar dispatch system; and
   d. If the entity providing dispatch is external to the ground ambulance service, a requirement that the certificate holder receive a copy of each dispatch made under the contract or other agreement;
2. If a certificate holder has a ground ambulance service contract under R9-25-1104 with a political subdivision, the ground ambulance service contract contains requirements that specify a method for dispatch, which may differ from requirements in subsection (E)(1)(c); and
3. For an interfacility transport of a patient with no time-critical condition:
   a. Unless already specified in a written agreement between the certificate holder and the person requesting the interfacility transport, the entity receiving the request for the interfacility transport provides an estimated time of arrival to the person requesting the interfacility transport at the time that the interfacility transport is requested;
   b. If the estimated time of arrival provided according to subsection (E)(3)(a) changes to a later time, the ground ambulance service, either directly or indirectly, does one of the following:
      i. Contacts another ground ambulance service to respond to the dispatch, based on the ground ambulance service's back-up plan and back-up agreements;
      ii. Provides to the contact at the requesting health care institution

the name and telephone number of another ground ambulance service with which the ground ambulance service has a back-up agreement; or

iii. Provides an amended estimated time of arrival to the person requesting transport that takes into consideration:

(1) The patient's condition and needs, and

(2) Health and safety;

c. Effective January 1, 2025, unless otherwise specified on the certificate holder's certificate of necessity, the actual time of arrival of a ground ambulance vehicle at a health care institution for an interfacility transport of a patient who does not have a time-critical condition is within 60 minutes of the estimated time of arrival in subsection (E)(3)(a) or amended estimated time of arrival in subsection (E)(3)(b)(iii) for at least 90% of the interfacility transports; and

d. If the interfacility transport does not meet the standards in subsection (E)(3)(c), factors that may have contributed to not meeting the standards are considered through the quality improvement process in subsection (K)(2)(b).

F. Transport: A certificate holder:

1. Shall only provide ambulance response or transport within the service area identified in the certificate holder's certificate of necessity except:

a. When authorized by a service area's dispatch, before the service area's ground ambulance vehicle arrives at the scene;

b. According to a back-up agreement; or

c. If the area is not included in the service area of another certificate holder;

2. Except as specified in subsection (F)(3), shall transport a patient in the certificate holder's service area who requests transport; and

3. May deny transport to a patient in the certificate holder's service area:

a. As limited by A.R.S. § 36-2224;

b. If the patient is in a health care institution and the patient's medical condition requires a level of care or monitoring during transport that exceeds the scope of practice of the ambulance attendants' certification;

c. If the transport may result in an immediate threat to the ambulance

attendant's safety, as determined by the ambulance attendant, the certificate holder, the administrative medical director, or a physician providing on-line medical direction and does not affect the ground ambulance service's hours of operation;

d. If the patient is 18 years or age or older, or meets the requirements in A.R.S. § 12-2451, 44-131, or 44-132, and refuses to be transported; or

e. If the patient is in a health care institution and does not meet the federal requirements for medically necessary ground vehicle ambulance transport as identified in 42 CFR 410.40.

G. Response Time Performance: A certificate holder shall ensure that:

1. Response times resulting from a 9-1-1 or similar system dispatch or, if applicable, a request for the interfacility transport of a patient with a time-critical condition comply with requirements of the certificate holder's certificate of necessity;

2. Response time performance, based on the information is subsection (J)(2), is assessed at least every six months for compliance with requirements of the certificate holder's certificate of necessity;

3. The following are reported to the Department annually, in a Department-provided format, concurrent with the submission of the information required in R9-25-909:

   a. Response time data that complies with requirements in A.R.S. § 36-2232(A)(3), and

   b. The results of the response time performance assessments in subsection (G)(2); and

4. If response time performance does not comply with requirements of the certificate holder's certificate of necessity, either:

   a. A corrective action plan, developed according to R9-25-910(E)(2)(a) through (d), is submitted to the Department with the information required in subsection (G)(3); or

   b. The certificate holder submits to the Department with the information required in subsection (G)(3) documentation demonstrating that noncompliance was due to:

      i. A situation specified in A.R.S. § 36-2232(G), or

ii. An external factor beyond the control of the certificate holder.

H. Performance of Interfacility Transports of Patients with No Time-Critical Condition: Effective January 1, 2025, a certificate holder shall ensure that:

1. The performance of interfacility transports of patients with no time-critical condition, including patients with a time-sensitive condition:
   a. Is based on the information in subsection (J)(2);
   b. Is assessed at least every six months;
   c. Includes the analysis of:
      i. The number of calls received;
      ii. The time a call was received;
      iii. The estimated time of arrival;
      iv. The time of arrival at the patient's location; and
      v. Any other information about cancelled calls, amended estimated times of arrival, or delays that may have factored into performance; and
   d. Includes a description of any actions taken by the certificate holder to improve performance;
2. The results of the performance assessments in subsection (H)(1) are reported to the Department annually in a Department-provided format, concurrent with the submission of the information required in R9-25-909; and
3. If the performance of interfacility transports of patients with no time-critical condition does not comply with subsection (E)(3)(c) or requirements of the certificate holder's certificate of necessity, as applicable, either:
   a. A corrective action plan, developed according to R9-25-910(E)(2)(a) through (d), is submitted to the Department with the information required in subsection (H)(2); or
   b. The certificate holder submits to the Department with the information required in subsection (H)(2) documentation demonstrating that noncompliance was due to an external factor beyond the control of the certificate holder.

I. The Department may require that a certificate holder contract for third-party monitoring of response time performance as part of a:

1. Political subdivision contract, unless both parties to the contract waive the

requirement; or

2. Corrective action plan.

J. Records: A certificate holder shall ensure that:

1. A prehospital incident history report, in a Department-provided format, is created for each patient that includes the following information, as available:
    a. The name and identification number of the ground ambulance service;
    b. Information about the software for the storage and submission of the prehospital incident history report;
    c. The unique number assigned to the run;
    d. The unique number assigned to the patient;
    e. Information about the response to the dispatch, including:
        i. The level of service requested;
        ii. Information obtained by the person providing dispatch about the request;
        iii. Information about the ground ambulance vehicle assigned to the dispatch;
        iv. Information about the EMCTs responding to the dispatch;
        v. The priority assigned to the dispatch; and
        vi. Response delays, as applicable;
    f. The date and time that:
        i. The call requesting service was received through the 9-1-1 or similar dispatch system,
        ii. The request was received by the person providing dispatch,
        iii. The ground ambulance service received the dispatch,
        iv. The ground ambulance vehicle left for the patient's location,
        v. The ground ambulance vehicle arrived at the patient's location,
        vi. The EMCTs in the ground ambulance vehicle arrived at the patient's side,
        vii. Transfer of care for the patient occurred at a location other than the destination,
        viii. The ground ambulance vehicle departed the patient's location,
        ix. The ground ambulance vehicle arrived at the destination,
        x. Transfer of care for the patient occurred at the destination, and

xi. The ground ambulance vehicle was available to take another call;

g. Information about the patient, including:

i. The patient's first and last name;

ii. The address of the patient's residence;

iii. The county of the patient's residence;

iv. The country of the patient's residence;

v. The patient's gender, race, ethnicity, and age;

vi. The patient's estimated weight;

vii. The patient's date of birth; and

viii. If the patient has an alternate residence, the address of the alternate residence;

h. The primary method of payment for services and anticipated level of payment;

i. Information about the scene, including:

i. Specific information about the location of the scene;

ii. Whether the ground ambulance vehicle was first on the scene;

iii. The number of patients at the scene;

iv. Whether the scene was the location of a mass casualty incident; and

v. If the scene was the location of a mass casualty incident, triage information;

j. Information about the reason for requesting service for the patient, including:

i. The date and time of onset of symptoms and when the patient was last well;

ii. Information about the principal reason the patient needs services;

iii. The patient's symptoms;

iv. The results of the EMCT's initial assessment of the patient;

v. If the patient was injured, information about the injury and the cause of the injury;

vi. If the patient experienced a cardiac arrest, information about the etiology of the cardiac arrest and subsequent treatment provided; and

vii. For an interfacility transport, the reason for the transport;

k. Information about any specific barriers to providing care to the patient;

l. Information about the patient's medical history, including;

i. Known allergies to medications,

ii. Surgical history,

iii. Current medications, and

iv. Alcohol or drug use;

m. Information about the patient's current medical condition, including the information in subsections (D)(2)(e)(v) through (xi) and the time and method of assessment;

n. Information about agents administered to the patient, including the dose and route of administration, time of administration, and the patient's response to the agent;

o. If not specifically included under subsection (J)(1)(l), (l)(iv), (m), or (n), the information required in A.A.C. R9-4-602(A);

p. Information about any procedures performed on the patient and the patient's response to the procedure;

q. Whether the patient was transported and, if so, information about the transport;

r. Information about the destination of the transport, including the reason for choosing the destination;

s. Whether transfer of care for the patient to another EMS provider or ambulance service occurred and, if so, identification of the EMS provider or ambulance service;

t. Unless transfer of care for the patient to another EMS provider or ambulance service occurred, information about:

i. Whether the destination facility was notified that the patient being transported has a time-critical condition and the time of notification,

ii. The disposition of the patient at the destination, and

iii. The disposition of the run;

u. Any other narrative information about the patient, care receive by the patient, or transport; and

v. The name and certification level of the EMCT providing the information; and

2. Dispatch records for each call or request for service, including all cancelled runs, contain the following information, in a Department-provided format:
   a. The name of the ground ambulance service;
   b. The date;
   c. Level of service;
   d. Type of service;
   e. Staffing of the run;
   f. Time of receipt of the call;
   g. Time of the dispatch;
   h. The estimated time of arrival, as provided according to subsection (E)(3)(a) if applicable;
   i. Departure time to the patient's location;
   j. Address of the patient's location;
   k. Time of arrival at the patient's location;
   l. Departure time to the destination health care institution;
   m. Name and address of the destination health care institution;
   n. Time of arrival at the destination health care institution;
   o. Any type of delay, if applicable;
   p. The unique reference number used by the ground ambulance service to identify the patient, dispatch, or run;
   q. The number assigned to the ground ambulance vehicle by the certificate holder;
   r. The priority assigned by a certificate holder to the response;
   s. The scene locality; and
   t. Whether the dispatch is a scheduled transport.

K. Assuring Consistent, Compliant Performance: A certificate holder shall:

1. Adopt, implement, and maintain policies and procedures for:
   a. Complaint resolution;
   b. Assessing the ground ambulance service's compliance with requirements in this Article, Articles 2, 10, or 11 of this Chapter, or A.R.S. Title 36, Chapter 21.1, including the review of:

i. The information provided to an emergency receiving facility for compliance with the protocol required in R9-25-201(E)(2)(d),
ii. Chain of custody for drugs,
iii. Compliance with minimum equipment requirements for a ground ambulance vehicle,
iv. Compliance with requirements in R9-25-201(E)(3), and
v. The quality improvement parameters in subsection (K)(2)(b) related to the provision of services;

c. Notifying the Department within 30 calendar days after completing an assessment in subsection (K)(1)(b), during which an instance of noncompliance was identified, and submitting a corrective action plan that complies with requirements in R9-25-910(E)(2)(a) through (d); and
d. A quality improvement process according to subsection (K)(2);

2. Establish, document, and implement a quality improvement process, as specified in policies and procedures, through which:
a. Data related to initial patient assessment, patient care, transport services provided, and patient status upon arrival at the destination are:
i. Collected continuously;
ii. For the information required in subsection (J)(1), submitted to the Department, in a format specified by the Department and within 48 hours after the beginning of a run, for quality improvement purposes; and
iii. If notified that the submission of information to the Department according to subsection (K)(2)(a)(ii) was unsuccessful, corrected and resubmitted within seven days after notification;

b. Continuous quality improvement processes are developed and implemented to identify, document, and evaluate issues related to the provision of services to ensure quality patient care, including:
i. Care provided to patients with time-critical conditions, including deviations from national treatment standards for a patient with a time-critical condition;
ii. Transport, including an interfacility transport of a patient that does not have a time-critical condition;

iii. Documentation; and

iv. Patient status upon arrival at the destination;

c. A committee consisting of the administrative medical director, the individual managing the ground ambulance service or designee, and other employees as appropriate:

i. Review the data in subsection (K)(2)(a) and any issues identified in subsection (K)(2)(b) on at least a quarterly basis; and

ii. Implement activities to improve performance when deviations in patient care, transport, or documentation are identified; and

d. The activities in subsection (K)(2)(c) are documented, consistent with A.R.S. §§ 36-2401, 36-2402, and 36-2403; and

3. Ensure that the information required in subsection (J)(2) is submitted to the Department, in a Department-provided format, and within 48 hours after the receipt of a call or request for service.

L. If a certificate holder has a reasonable basis to believe that a situation or circumstance specified according to A.R.S. § 36-2211(A) has occurred, the certificate holder shall:

1. If applicable, take immediate action to prevent the recurrence of the situation or circumstance;

2. Report the suspected situation or circumstance to the Department and, if applicable, according to A.R.S. § 13-3620 or 46-454;

3. Document:

a. The suspected situation or circumstance;

b. Any action taken according to subsection (L)(1); and

c. The report in subsection (L)(2);

4. Maintain the documentation in subsection (L)(3) for at least 12 months after the date of the report in subsection (L)(2);

5. Initiate an investigation of the situation or circumstance and document the following information within five working days after the report required in subsection (L)(2):

a. The dates, times, and description of the situation or circumstance;

b. A description of any injury to a patient related to the suspected situation or circumstance and any change to the patient's physical, cognitive, functional, or emotional condition;

c. The names of witnesses to the suspected situation or circumstance; and

d. The actions taken by the certificate holder to prevent the suspected situation or circumstance from occurring in the future; and

6. Maintain a copy of the documented information required in subsection (L)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.

M. A certificate holder shall notify the Department of a change in the number or location of suboperation stations in the certificate holder's service area, according to A.R.S. § 36-2232(C)(4), and include:

1. The certificate of necessity number for the ground ambulance service;
2. The name of the ground ambulance services on the certificate of necessity;
3. The name, title, address, e-mail address, and telephone number of an individual whom the Department may contact about the notification; and
4. Information about the change, including, as applicable:
   a. How the number of suboperation stations is changed from the information on the certificate holder's certificate of necessity;
   b. The address of each suboperation station that is being removed from service; and
   c. The address, hours of operation, and telephone number of each new suboperation station located within the service area.

N. A certificate holder shall submit to the Department, no later than 180 days after the certificate holder's fiscal year end, the information in the Ambulance Revenue and Cost Report specified in R9-25-909(A) or (C), as appropriate to the certificate holder's business organization.

Statutory Authority for Rules in 9 A.A.C. 25, Article 9

36-132. Department of health services; functions; contracts

A. The department, in addition to other powers and duties vested in it by law, shall:

1. Protect the health of the people of the state.

2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.

3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.

4. Operate sanitariums, hospitals or other facilities assigned to the department by law or by the governor.

5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information to promote good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of educating children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.

6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.

7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.

8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.

9. Encourage and aid in coordinating local programs concerning nutrition of the people of this state.

10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with

providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.

11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.

12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.

13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local health agencies involved with water quality shall provide to the department any assistance requested by the director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter 8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in enforcing the federal food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Recruit and train personnel for state, local and district health departments.

16. Conduct continuing evaluations of state, local and district public health programs, study and appraise state health problems and develop broad plans for use by the department and for recommendation to other agencies, professions and local health departments for the best solution of these problems.

17. License and regulate health care institutions according to chapter 4 of this title.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:

(a) Screening in early pregnancy for detecting high-risk conditions.

(b) Comprehensive prenatal health care.

(c) Maternity, delivery and postpartum care.

(d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when medically indicated.

(e) Perinatal education oriented toward professionals and consumers, focusing on early detection and adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes and behavioral-supported group homes for persons with developmental disabilities. The department shall issue a license to an accredited facility for a period of the accreditation, except that a licensing period shall not be longer than three years. The department is authorized to conduct an inspection

of an accredited facility to ensure that the facility meets health and safety licensure standards. The results of the accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the department of health services. For the purposes of this paragraph, "accredited" means accredited by a nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government, and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this title, and enter into contracts with the federal government, or an agency of the federal government, and with private donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies made available under this section are special project grants. The department may also expend these monies to further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as payors of last resort, prescription medications necessary to supplement treatment and transportation to and from treatment facilities. The contracts may provide for department payment of administrative costs it specifically authorizes.

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system,

prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds

that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale

or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between

consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of

these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement

that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-2201. <u>Definitions</u>

In this chapter, unless the context otherwise requires:

1. "Administrative medical direction" means supervision of emergency medical care technicians by a base hospital medical director, administrative medical director or basic life support medical director. For the purposes of this paragraph, "administrative medical director" means a physician who is licensed pursuant to title 32, chapter 13 or 17 and who provides direction within the emergency medical services and trauma system.

2. "Advanced emergency medical technician" means a person who has been trained in an advanced emergency medical technician program certified by the director or in an equivalent training program and who is certified by the director to render services pursuant to section 36-2205.

3. "Advanced life support" means the level of assessment and care identified in the scope of

practice approved by the director for the advanced emergency medical technician, emergency medical technician I-99 and paramedic.

4. "Advanced life support base hospital" means a health care institution that offers general medical and surgical services, that is certified by the director as an advanced life support base hospital and that is affiliated by written agreement with a licensed ambulance service, municipal rescue service, fire department, fire district or health services district for medical direction, evaluation and control of emergency medical care technicians.

5. "Ambulance":

(a) Means any publicly or privately owned surface, water or air vehicle, including a helicopter, that contains a stretcher and necessary medical equipment and supplies pursuant to section 36-2202 and that is especially designed and constructed or modified and equipped to be used, maintained or operated primarily to transport individuals who are sick, injured or wounded or who require medical monitoring or aid.

(b) Does not include a surface vehicle that is owned and operated by a private sole proprietor, partnership, private corporation or municipal corporation for the emergency transportation and in-transit care of its employees or a vehicle that is operated to accommodate an incapacitated person or person with a disability who does not require medical monitoring, care or treatment during transport and that is not advertised as having medical equipment and supplies or ambulance attendants.

6. "Ambulance attendant" means any of the following:

(a) An emergency medical technician, an advanced emergency medical technician, an emergency medical technician I-99 or a paramedic whose primary responsibility is the care of patients in an ambulance and who meets the standards and criteria adopted pursuant to section 36-2204.

(b) An emergency medical responder who is employed by an ambulance service operating under section 36-2202 and whose primary responsibility is driving an ambulance.

(c) A physician who is licensed pursuant to title 32, chapter 13 or 17.

(d) A professional nurse who is licensed pursuant to title 32, chapter 15 and who meets the state board of nursing criteria to care for patients in the prehospital care system.

(e) A professional nurse who is licensed pursuant to title 32, chapter 15 and whose primary responsibility is the care of patients in an ambulance during an interfacility transport.

7. "Ambulance service" means a person who owns and operates one or more ambulances.

8. "Basic life support" means the level of assessment and care identified in the scope of practice approved by the director for the emergency medical responder and emergency medical technician.

9. "Bureau" means the bureau of emergency medical services and trauma system in the department.

10. "Centralized medical direction communications center" means a facility that is housed within a hospital, medical center or trauma center or a freestanding communication center that meets the following criteria:

(a) Has the ability to communicate with ambulance services and emergency medical services

providers rendering patient care outside of the hospital setting via radio and telephone.

(b) Is staffed twenty-four hours a day seven days a week by at least a physician licensed pursuant to title 32, chapter 13 or 17.

11. "Certificate of necessity" means a certificate that is issued to an ambulance service by the department and that describes the following:

(a) The service area.

(b) The level of service.

(c) The type of service.

(d) The hours of operation.

(e) The effective date.

(f) The expiration date.

(g) The legal name and address of the ambulance service.

(h) The any limiting or special provisions the director prescribes.

12. "Council" means the emergency medical services council.

13. "Department" means the department of health services.

14. "Director" means the director of the department of health services.

15. "Emergency medical care technician" means an individual who has been certified by the department as an emergency medical technician, an advanced emergency medical technician, an emergency medical technician I-99 or a paramedic.

16. "Emergency medical responder" as an ambulance attendant, whose primary responsibility is driving an ambulance, means a person who has successfully completed training in an emergency medical responder program that is certified by the director or is approved by the emergency medical services provider's administrative medical director on file with the department or in an equivalent training program.

17. "Emergency medical responder program" means a program that has been submitted for review by the department and includes at least the following:

(a) Emergency vehicle driver training.

(b) Cardiopulmonary resuscitation certification.

(c) Automated external defibrillator training.

(d) Training in the use of noninvasive diagnostic devices, including blood glucose monitors and pulse oximeters.

(e) Training on obtaining a patient's vital signs, including blood pressure, pulse and respiratory rate.

18. "Emergency medical services" means those services required following an accident or an emergency medical situation:

(a) For on-site emergency medical care.

(b) To transport the sick or injured by a licensed ground or air ambulance.

(c) In using emergency communications media.

(d) In using emergency receiving facilities.

(e) In administering initial care and preliminary treatment procedures by emergency medical care technicians.

19. "Emergency medical services provider" means any governmental entity, quasi-governmental entity or corporation whether public or private that renders emergency medical services in this state.

20. "Emergency medical technician" means a person who has been trained in an emergency medical technician program certified by the director or in an equivalent training program and who is certified by the director as qualified to render services pursuant to section 36-2205.

21. "Emergency receiving facility" means a licensed health care institution that offers emergency medical services, is staffed twenty-four hours a day and has a physician on call.

22. "Fit and proper" means that the director determines that an applicant for a certificate of necessity or a certificate holder has the expertise, integrity, fiscal competence and resources to provide ambulance service in the service area.

23. "Medical record" means any patient record, including clinical records, prehospital care records, medical reports, laboratory reports and statements, any file, film, record or report or oral statements relating to diagnostic findings, treatment or outcome of patients, whether written, electronic or recorded, and any information from which a patient or the patient's family might be identified.

24. "National certification organization" means a national organization that tests and certifies the ability of an emergency medical care technician and whose tests are based on national education standards.

25. "National education standards" means the emergency medical services education standards of the United States department of transportation or other similar emergency medical services education standards developed by that department or its successor agency.

26. "Paramedic" means a person who has been trained in a paramedic program certified by the director or in an equivalent training program and who is certified by the director to render services pursuant to section 36-2205.

27. "Physician" means any person licensed pursuant to title 32, chapter 13 or 17.

28. "Police dog":

(a) Means a specially trained dog that is owned or used by a law enforcement department or agency of this state or any political subdivision of this state and that is used in the course of the department's or agency's official work.

(b) Includes a search and rescue dog, service dog, accelerant detection canine or other dog that is in use by the law enforcement department or agency for official duties.

29. "Stretcher van" means a vehicle that contains a stretcher and that is operated to accommodate an incapacitated person or person with a disability who does not require

medical monitoring, aid, care or treatment during transport.

30. "Suboperation station" means a physical facility or location at which an ambulance service conducts operations for the dispatch of ambulances and personnel and that may be staffed twenty-four hours a day or less as determined by system use.

31. "Trauma center" means any acute care hospital that provides in-house twenty-four-hour daily dedicated trauma surgical services that is designated pursuant to section 36-2225.

32. "Trauma registry" means data collected by the department on trauma patients and on the incidence, causes, severity, outcomes and operation of a trauma system and its components.

33. "Trauma system" means an integrated and organized arrangement of health care resources having the specific capability to perform triage, transport and provide care.

34. "Validated testing procedure" means a testing procedure that includes practical skills, or attests practical skills proficiency on a form developed by the department by the educational training program, identified pursuant to section 36-2204, paragraph 2, that is certified as valid by an organization capable of determining testing procedure and testing content validity and that is recommended by the medical direction commission and the emergency medical services council before the director's approval.

35. "Wheelchair van" means a vehicle that contains or that is designed and constructed or modified to contain a wheelchair and that is operated to accommodate an incapacitated person or person with a disability who does not require medical monitoring, aid, care or treatment during transport.

36-2202. Duties of the director; qualifications of medical director

A. The director shall:

1. Appoint a medical director of the emergency medical services and trauma system.

2. Adopt standards and criteria for the denial or granting of certification and recertification of emergency medical care technicians. These standards shall allow the department to certify qualified emergency medical care technicians who have completed statewide standardized training required under section 36-2204, paragraph 1 and a standardized certification test required under section 36-2204, paragraph 2, who hold valid certification with a national certification organization or who have completed training and testing by the United States armed forces at a level comparable to the national standards for emergency medical care technicians. Before the director may consider approving a statewide standardized training or a standardized certification test, or both, each of these must first be recommended by the medical direction commission and the emergency medical services council to ensure that the standardized training content is consistent with national education standards and that the standardized certification test examines comparable material to that examined in the tests of a national certification organization.

3. Adopt standards and criteria that pertain to the quality of emergency care pursuant to section 36-2204.

4. Adopt rules necessary to carry out this chapter. Each rule shall identify all sections and subsections of this chapter under which the rule was formulated.

5. Adopt reasonable medical equipment, supply, staffing and safety standards, criteria and procedures to issue a certificate of registration to operate an ambulance.

6. Maintain a state system for recertifying emergency medical care technicians, except as otherwise provided by section 36-2202.01, that is independent from any national certification organization recertification process. This system shall allow emergency medical care technicians to choose to be recertified under the state or the national certification organization recertification system subject to subsection H of this section.

B. Emergency medical technicians who choose the state recertification process shall recertify in one of the following ways:

1. Successfully completing an emergency medical technician refresher course approved by the department.

2. Successfully completing an emergency medical technician challenge course approved by the department.

3. For emergency medical care technicians who are currently certified at the emergency medical technician level by the department, attesting on a form provided by the department that the applicant holds a valid and current cardiopulmonary resuscitation certification, has and will maintain documented proof of a minimum of twenty-four hours of continuing medical education within the last two years consistent with department rules and has functioned in the capacity of an emergency medical technician for at least two hundred forty hours during the last two years.

C. After consultation with the emergency medical services council, the director may authorize pilot programs designed to improve the safety and efficiency of ambulance inspections for governmental or quasi-governmental entities that provide emergency medical services in this state.

D. The rules, standards and criteria adopted by the director pursuant to subsection A, paragraphs 2, 3, 4 and 5 of this section shall be adopted in accordance with title 41, chapter 6, except that the director may adopt on an emergency basis pursuant to section 41-1026 rules relating to the regulation of ambulance services in this state necessary to protect the public peace, health and safety in advance of adopting rules, standards and criteria as otherwise provided by this subsection.

E. The director may waive the requirement for compliance with a protocol adopted pursuant to section 36-2205 if the director determines that the techniques, drug formularies or training makes the protocol inconsistent with contemporary medical practices.

F. The director may suspend a protocol adopted pursuant to section 36-2205 if the director does all of the following:

1. Determines that the rule is not in the public's best interest.

2. Initiates procedures pursuant to title 41, chapter 6 to repeal the rule.

3. Notifies all interested parties in writing of the director's action and the reasons for that action. Parties interested in receiving notification shall submit a written request to the director.

G. To be eligible for appointment as the medical director of the emergency medical services and trauma system, the person shall be qualified in emergency medicine and shall be

licensed as a physician in one of the states of the United States.

H. Applicants for certification shall apply to the director for certification. Emergency medical care technicians shall apply for recertification to the director every two years. The director may extend the expiration date of an emergency medical care technician's certificate for thirty days. The department shall establish a fee for this extension by rule. Emergency medical care technicians shall pass an examination administered by the department as a condition for recertification only if required to do so by the advanced life support base hospital's medical director or the emergency medical care technician's medical director.

I. The medical director of the emergency medical services and trauma system is exempt from title 41, chapter 4, articles 5 and 6 and is entitled to receive compensation pursuant to section 38-611, subsection A.

J. The standards, criteria and procedures adopted by the director pursuant to subsection A, paragraph 5 of this section shall require that ambulance services:

1. Providing interfacility transportation in any certificate of necessity area of this state have at least one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a), (c), (d) or (e) and one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a) or (b) staffing an ambulance while transporting a patient.

2. Serving a rural or wilderness certificate of necessity area with a population of less than ten thousand persons have at least one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a), (c), (d) or (e) and one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a) or (b) staffing an ambulance while transporting a patient.

3. Serving a population of ten thousand persons or more have at least one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a) and one ambulance attendant as defined in section 36-2201, paragraph 6, subdivision (a), (c), (d) or (e) staffing an ambulance while transporting a patient.

K. If the department determines there is not a qualified administrative medical director, the department shall ensure the provision of administrative medical direction for an emergency medical technician if the emergency medical technician meets all of the following criteria:

1. Is employed by a nonprofit or governmental provider employing less than twelve full-time emergency medical technicians.

2. Stipulates to the inability to secure a physician who is willing to provide administrative medical direction.

3. Stipulates that the provider agency does not provide administrative medical direction for its employees.

36-2204.02. Emergency medical services providers; investigations

A. In lieu of the requirements of section 36-2211, the director may authorize an ambulance service or emergency medical services provider to investigate, discipline or determine the fitness of an employee to continue to provide patient care. This authority does not apply to the conviction of, a plea of guilty or no contest to or admission in a court proceeding to the elements of a felony. The employer listed on the emergency medical care technician's or ambulance attendant's certification or recertification application may limit the practice of the

emergency medical care technician or ambulance attendant during the investigation if the employer meets all of the following requirements:

1. Has separate investigative or supervisory staff to conduct an investigation.

2. Has an employee assistance program for counseling.

3. Has policies and procedures for drug testing through urinalysis or other generally accepted methods.

4. Has policies and procedures for monitoring of personnel who are suspected of or who have been convicted of substance abuse.

B. An ambulance service or emergency medical services provider that conducts its own disciplinary investigations pursuant to subsection A of this section shall report the following to the medical director of the emergency medical services and trauma system:

1. The nature of the allegation.

2. The level of patient care being delivered by the employee and the supervision of the employee during the investigation or rehabilitative period, or both.

3. The final outcome of the investigation and the final recommendation on the employee's certification status.

C. The decisions of the employer are appealable under the employer's personnel policies and procedures. Except as provided in section 41-1092.08, subsection H, the final administrative decisions of the director are subject to judicial review pursuant to title 12, chapter 7, article 6.

36-2211. <u>Grounds for censure, probation, suspension or revocation of emergency medical care technician certificate; proceedings; civil penalty; judicial review</u>

A. The medical director of the emergency medical services and trauma system, on behalf of the director, may censure or place on probation an emergency medical care technician or suspend or revoke the certification issued to any emergency medical care technician pursuant to this article for any of the following causes:

1. Unprofessional conduct.

2. Conviction of, a plea of guilty or no contest to or admission in a court proceeding to the elements of a felony or of a misdemeanor involving moral turpitude during the time that a person is certified as an emergency medical care technician. The record of conviction or a copy of the record certified by the clerk of the court or by the judge by whom the person was sentenced is conclusive evidence of conviction.

3. Physical or mental incompetence to provide emergency medical services as an emergency medical care technician.

4. Gross incompetence or gross negligence in the provision of emergency medical services as an emergency medical care technician.

5. Wilful fraud or misrepresentation in the provision of emergency medical services as an emergency medical care technician or in the admission to that practice.

6. Use of any narcotic or dangerous drug or intoxicating beverage to an extent that the use impairs the ability to safely conduct the provision of emergency medical services as an emergency medical care technician.

7. The wilful violation of this chapter or the rules adopted pursuant to this chapter.

B. The medical director of the emergency medical services and trauma system on the medical director's own motion may investigate any evidence that appears to show the existence of any of the causes set forth in subsection A of this section. The medical director shall investigate the report under oath of any person that appears to show the existence of any of the causes set forth in subsection A of this section. Any person reporting pursuant to this section who provides the information in good faith is not subject to liability for civil damages as a result.

C. If, in the opinion of the medical director of the emergency medical services and trauma system, it appears the information is or may be true, the medical director shall request an informal interview with the emergency medical care technician. The interview shall be requested by the medical director in writing, stating the reasons for the interview and setting a date not less than ten days from the date of the notice for conducting the interview. The written request for an interview shall also state that if the medical director finds that cause exists for censure or probation or the suspension or revocation of the certificate the medical director may impose a civil penalty of not more than three hundred fifty dollars for each occurrence of cause as provided in subsection A of this section. The request for an interview shall also state that each day a cause for discipline exists constitutes a separate offense.

D. Following the investigation, including an informal interview if requested, and together with any mental, physical or professional competence examination as the medical director of the emergency medical services and trauma system deems necessary, the medical director may proceed in the following manner:

1. If the medical director finds that the evidence obtained pursuant to subsections B and C of this section does not warrant censure or probation of the emergency medical care technician or suspension or revocation of a certificate, the medical director shall notify the emergency medical care technician and terminate the investigation.

2. If the medical director finds that the evidence obtained pursuant to subsections B and C of this section does not warrant suspension or revocation of a certificate but does warrant censure or probation, the medical director may do either of the following:

(a) Issue a decree of censure.

(b) Fix a period and terms of probation best adapted to protect the public health and safety and rehabilitate and educate the emergency medical care technician. Failure to comply with any probation is cause for filing a complaint and holding a formal hearing as provided in paragraph 3 of this subsection.

3. If the medical director finds that the evidence obtained pursuant to subsections B and C of this section warrants suspension or revocation of a certificate issued under this article, or if the emergency medical care technician under investigation refuses to attend the informal interview authorized in subsection C of this section, a complaint shall be issued and formal proceedings shall be initiated. All proceedings pursuant to this paragraph shall be conducted

pursuant to title 41, chapter 6, article 10.

E. If after a hearing as provided in this section any cause for censure, probation, suspension or revocation is found to exist, the emergency medical care technician is subject to censure or probation or suspension or revocation of the certificate or any combination of these for a period of time or permanently and under conditions as the medical director of the emergency medical services and trauma system deems appropriate.

F. In addition to other disciplinary action provided pursuant to this section, the medical director of the emergency medical services and trauma system may impose a civil penalty of not more than three hundred fifty dollars for each occurrence of cause as provided in subsection A of this section not to exceed twenty-five hundred dollars. Each day that cause for discipline exists constitutes a separate offense. All monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.

G. Except as provided in section 41-1092.08, subsection H, final decisions of the medical director of the emergency medical services and trauma system are subject to judicial review pursuant to title 12, chapter 7, article 6.

36-2224. Interfacility transportation of patients; requirements

An ambulance service that transports a patient from a hospital within its certificated area to a hospital outside the certificated area is only required to transport that patient under medical direction to the nearest most appropriate facility as defined by federal medicare guidelines for ambulance services. This section shall not apply to any patient transport initiated or undertaken pursuant to the provisions of the federal emergency medical treatment and active labor act.

36-2232. Director; powers and duties; regulation of ambulance services; inspections; response time compliance; mileage rate calculation factors

A. The director shall adopt rules to regulate the operation of ambulances and ambulance services in this state. Each rule shall identify all sections and subsections of this chapter under which the rule was formulated. The rules shall provide for the department to do the following:

1. Consistent with the requirements of subsection H of this section, determine, fix, alter and regulate just, reasonable and sufficient rates and charges for the provision of ambulances, including rates and charges for advanced life support service, basic life support service, patient loaded mileage, standby waiting, subscription service contracts and other contracts for services related to the provision of ambulances. The director shall inform all ambulance services of the procedures and methodology used to determine ambulance rates or charges.

2. Ensure evidence-based quality patient care is the priority for decision-making.

3. Regulate operating and response times of ambulances to meet the needs of the public and to ensure adequate service. The rules adopted by the director for certificated ambulance service response times shall include uniform standards for urban, suburban, rural and wilderness geographic areas within the certificate of necessity based on, at a minimum, population density and geographic and medical considerations. The calculation of response times shall begin when the public safety answering point contacts an ambulance service for

dispatch and conclude when the ambulance service arrives at the dispatched location. On-scene arrival times for response time measurement shall be documented by the ambulance service using dispatch or global positioning system data, or a combination of both, and kept on file. Response time data that is compliant with the health insurance portability and accountability act of 1996 shall be filed annually with the department. When dispatch or global positioning system connectivity is not available, the ambulance service shall manually document on-scene arrival times for response time measurement. The response time data shall be filed in a department-approved format, and the department shall make the response time data publicly available.

4. Review response times established pursuant to paragraph 3 of this subsection with the ambulance service and update the response times based on, at a minimum, population density and geographic and medical considerations, and the financial impact on rates and charges, every six years. One additional review each six-year period may be requested by a city, town, fire district or fire authority whose jurisdictional boundaries in whole or in part are within the service area of a certificate of necessity or an existing certificate of necessity holder within the service area of the certificate of necessity.

5. Determine, fix, alter and regulate bases of operation. The director may issue a certificate of necessity to more than one ambulance service within any base of operation. For the purposes of this paragraph, "base of operation" means a service area granted under a certificate of necessity.

6. Issue, amend, transfer, suspend or revoke certificates of necessity under terms consistent with this article.

7. Prescribe a uniform system of accounts to be used by ambulance services that conforms to standard accounting forms and principles for the ambulance industry and generally accepted accounting principles.

8. Require the filing of an annual financial report and other data. These rules shall require an ambulance service to file the report with the department not later than one hundred eighty days after the completion of its annual accounting period.

9. Regulate ambulance services in all matters affecting services to the public to the end that this article may be fully carried out.

10. Prescribe bonding requirements, if any, for ambulance services granted authority to provide any type of subscription service.

11. Offer technical assistance to ambulance services to ensure compliance with the rules.

12. Offer technical assistance to ambulance services in order to obtain or to amend a certificate of necessity.

13. Inspect, at a maximum of twelve-month intervals, each ambulance registered pursuant to section 36-2212 to ensure that the vehicle is operational and safe and that all required medical equipment is operational. At the request of the provider, the inspection may be performed by a facility approved by the director. If a provider requests that the inspection be performed by a facility approved by the director, the provider shall pay the cost of the inspection.

B. The director may require any ambulance service offering subscription service contracts to obtain a bond in an amount determined by the director that is based on the number of subscription service contract holders and to file the bond with the director to protect all

subscription service contract holders in this state who are covered under that subscription contract.

C. An ambulance service shall:

1. Maintain, establish, add, move or delete suboperation stations within its base of operation to ensure that the ambulance service meets the established response times or those approved by the director in a political subdivision contract.

2. Determine the operating hours of its suboperation stations to provide for coverage of its base of operation.

3. Provide the department with a list of suboperation station locations.

4. Notify the department not later than thirty days after the ambulance service makes a change in the number or location of its suboperation stations.

5. Beginning January 1, 2024, install and maintain an electronic global positioning system monitoring device in each vehicle that is used for transport to record on-scene arrival times for response time measurement. The department shall provide a waiver on a department-approved form to an ambulance service that can reasonably demonstrate it is unable to meet the requirements of this paragraph.

D. At any time, the director or the director's agents may:

1. Inquire into the operation of an ambulance service, including a person operating an ambulance that has not been issued a certificate of registration or a person who does not have or is operating outside of a certificate of necessity.

2. Conduct on-site inspections of facilities, communications equipment, vehicles, procedures, materials and equipment.

3. Review the qualifications of ambulance attendants.

E. If all ambulance services that have been granted authority to operate within the same service area or that have overlapping certificates of necessity apply for uniform rates and charges, the director may establish uniform rates and charges for the service area.

F. In consultation with the medical director of the emergency medical services and trauma system, the emergency medical services council and the medical direction commission, the director of the department of health services shall establish protocols for ambulance services to refer and advise a patient or transport a patient by the most appropriate means to the most appropriate provider of medical services based on the patient's condition. The protocols shall include triage and treatment protocols that allow all classifications of emergency medical care technicians responding to a person who has accessed 911, or a similar public dispatch number, for a condition that does not pose an immediate threat to life or limb to refer and advise a patient or transport a patient to the most appropriate health care institution as defined in section 36-401 based on the patient's condition, taking into consideration factors including patient choice, the patient's health care provider, specialized health care facilities and local protocols.

G. The director, when reviewing an ambulance service's response time compliance with its certificate of necessity, shall consider in addition to other factors the effect of hospital diversion, delayed emergency department admission and the number of ambulances engaged in response or transport in the affected area.

H. The department shall incorporate all of the following factors when calculating the proposed mileage rate:

1. The cost of licensure and registration of each ground ambulance vehicle.

2. The cost of fuel.

3. The cost of ground ambulance vehicle maintenance.

4. The cost of ground ambulance vehicle repair.

5. The cost of tires.

6. The cost of ground ambulance vehicle insurance.

7. The cost of mechanic wages, benefits and payroll taxes.

8. The cost of loan interest related to the ground ambulance vehicles.

9. The cost of the weighted allocation of overhead.

10. The cost of ground ambulance vehicle depreciation.

11. The cost of reserves for replacement of ground ambulance vehicles and equipment.

36-2233. Certificate of necessity to operate an ambulance service; notification of interested parties; exceptions; service areas

A. Any person wishing to operate an ambulance service in this state shall apply to the department on a form prescribed by the director for a certificate of necessity.

B. Within one hundred eighty days after receiving an application for a certificate of necessity as prescribed in this section, the director shall make a determination based on whether necessity for the ambulance service is found to exist and the applicant meets the requirements of subsection F of this section. If the director requests additional information from the applicant after initial review, the applicant shall have thirty business days to respond. On request, the director may give the applicant one additional period of thirty business days to respond. If the applicant fails to respond to the director's request for additional information, the department shall deem the initial or amended application withdrawn. An application deemed withdrawn is not an appealable agency action pursuant to title 41, chapter 6, article 10. The applicant may appeal a denial only pursuant to section 36-2234. The one hundred eighty-day period for the director to make the determination of necessity does not include the time the applicant uses to respond to requests for additional information.

C. On receipt of an initial or amended application for a certificate of necessity, the department shall post a notice of the application on its website. Within thirty days after the department posts a notice pursuant to this subsection, any interested party may provide information to the director on a form in a department-approved format for consideration. If an interested party fails to respond to the notice within sixty days in a department-approved format, the information may not be considered during the review of the application.

D. For the purposes of this section, a city, town, fire district, fire authority or tribal government whose jurisdictional boundaries in whole or in part are within the service area of a certificate of necessity, an existing certificate of necessity holder within the service area of

the certificate of necessity or a hospital that is licensed pursuant to chapter 4 of this title and that is located within the service area of a certificate of necessity is considered to be an interested party as a matter of law.

E. All interested parties shall be notified of any application for an initial or amended certificate of necessity within fifteen days after the application is filed, within fifteen days after the application is complete and within fifteen days after a decision by the director. The director's decision pursuant to subsection F of this section is final unless appealed pursuant to section 36-2234, subsection A.

F. The director shall issue a certificate of necessity if all of the following apply:

1. The director finds that public necessity requires the service or any part of the service proposed by the applicant.

2. The director finds that the applicant is fit and proper to provide the service.

3. The applicant has paid the appropriate fees pursuant to section 36-2240.

4. The applicant has filed a surety bond pursuant to section 36-2237.

G. A certificate of necessity issued pursuant to subsection F of this section shall be for all or part of the service proposed by the applicant as determined necessary by the director for public convenience and necessity.

H. This section does not require a certificate of necessity for:

1. Vehicles and persons that are exempt from a certificate of registration pursuant to section 36-2217.

2. Ambulance services operating under temporary authority pursuant to section 36-2242.

I. The director may grant a service area by one or any combination of the following descriptions:

1. Metes and bounds.

2. A city, town or political subdivision not limited to a specific date. The merger or consolidation of two or more fire districts pursuant to section 48-820 or 48-822 does not expand the service area boundaries of an existing certificate of necessity.

3. A city, town or political subdivision as of a specific date that does not include annexation.

36-2237. Required insurance, financial responsibility or bond; revocation for failure to comply

A. The director shall not issue a certificate of necessity to an ambulance service unless the service has filed with the department a certificate of insurance or other evidence of financial responsibility in an amount the director deems necessary to adequately protect the interests of the public. The liability insurance shall bind the insurer to pay compensation for injuries to persons and for loss or damage to property resulting from the negligent operation of the ambulance service.

B. If an application for a certificate of necessity includes any type of subscription service contract and, in the director's discretion, a surety bond is necessary pursuant to section 36-2232, the director shall not issue a certificate of necessity until the applicant has filed a

surety bond with the director in the form and amount determined by him on which bond the applicant is the principal obligor and this state is the obligee. The director shall approve the bond and the bond must be with a surety company authorized to transact business in this state as surety on the bond. The bond must be conditioned on the payment by the applicant to any subscribers that may be parties to any type of subscription service contract.

C. The director shall fix the total amount of the bond required and the director may increase or decrease the bond amount subject to criteria adopted by rule and regulation.

D. The director shall revoke the certificate of necessity of any ambulance service which fails to comply with this section.

36-2241. Required records; inspection by the department

A. Pursuant to rules adopted by the director, an owner of an ambulance service shall maintain and keep within this state reasonable records, books and other data the director requires to enforce the provisions of this article. These records, books and other data shall not be destroyed for a period of three years after they are recorded. The records, books and other data shall be open to inspection by the department during reasonable office hours if the department is conducting an investigation into the operation of an ambulance service pursuant to section 36-2245.

B. If the director is holding a public rate increase hearing pursuant to section 36-2234, the department may inspect the records, books and other data to verify the truth and accuracy of these documents. The department shall conduct the inspection of these documents for a rate increase hearing only during reasonable office hours and only after giving the service at least one working day's notice.

C. If an audit is required, the department shall accept a certified audit that is performed by an independent auditor at the provider's expense in place of a department audit if the audit:

1. Is conducted in accordance with generally accepted auditing standards.

2. Includes findings regarding the ambulance service's compliance with the schedule of rates and charges approved by the director.

3. Is completed and forwarded to the department in a timely manner.

D-4.

Amend: R3-3-1101, R3-3-1102, R3-3-1103, R3-3-1104, R3-3-1105, R3-3-1106, R3-3-1107, R3-3-1108, R3-3-1110, Appendix A

Repeal R3-3-1109

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 12, 2024

SUBJECT: **DEPARTMENT OF AGRICULTURE**
Title 3, Chapter 3

Amend: R3-3-1101, R3-3-1102, R3-3-1103, R3-3-1104, R3-3-1105, R3-3-1106, R3-3-1107, R3-3-1108, R3-3-1110, Appendix A

Repeal R3-3-1109

Summary:

This regular rulemaking from the Department of Agriculture (Department) seeks to amend nine (9) rules and one (1) appendix and repeal one (1) rule in Title 3, Chapter 3, Article 11 regarding Arizona Native Plants. Specifically, the Department indicates the proposed amendments will align with current practices, update outdated references, and provide additional provisions to coincide with current Arizona native plant issues. The Department indicates other changes are intended to make technical changes, update the current list of protected native plants, update outdated taxonomy where needed, and overall reduce the regulatory burden by making the rules clearer and more concise. The Department anticipates the rulemaking will result in an overall benefit to the protection of Arizona native plants, to the regulated community, and the public.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

The Department indicates this rulemaking does not establish a new fee. However, the Department indicates this rulemaking increases the fees for Arizona native plant law education found in rule R3-3-1106(D) to cover the cost of providing these services. Specifically, the fee for attending a seminar is increased from $10 to $14 and from $25 to $35 for a court ordered native plant law seminar. This fee increase is to assist in covering the administrative costs associated with providing seminar training.

A.R.S. § 41-1008(A)(3) states an agency shall not "[i]ncrease a fee in an amount that exceeds the percentage of change in the average consumer price index as published by the United States department of labor, bureau of labor statistics between that figure for the latest calendar year and the calendar year in which the last fee increase occurred." Rule R3-3-1109, where the fees were previously located, was last amended in 2008. The Department indicates the percentage of change in the average consumer price index from 2008 to 2023 is a 42.4% increase. Likewise, the increase of fee from $10 to $14 and from $25 to $35 represents a 40% increase, which is within the 42.4% increase. As such, the Department is in compliance with A.R.S. § 41-1008

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates it did not review any study relevant to this rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Department anticipates the rulemaking will result in an overall benefit to the protection of Arizona native plants, to the regulated community, and the public. The Department has determined the rulemaking will not require any new full-time employees. The rulemaking could result in additional costs for the regulated community, but those costs are primarily associated with those that commit a violation of the rules and an increase of the cost from $25 to $35 to acquire all "Notices of Intent to Clear" as they are filed. Additionally, the fee for native plant education is increased from $10 to $14 for a native plant law education seminar and $25 to $35 for a court ordered native plant law education seminar. Changes may prove to benefit Arizona native plant salvage operations by providing clearer information for land developers, property owners, and State land managers on when a protected native plant can be salvaged instead of being destroyed. There will also be an additional saving to the regulated community by eliminating the requirement of the use of the $0.15 seal for Arizona protected native plants, since the associated protected native plant tag is purchased, also serves the function of sealing the native plant cord.

5. **<u>Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?</u>**

The Department has determined there is no less intrusive or costly alternative method of achieving the purpose of the rulemaking. The Department will not incur any additional costs associated with the rulemaking since these programs currently exist and the intent is to only clarify and improve those processes. Therefore, the Department has determined that the benefits of the rulemaking outweigh any costs.

6. **<u>What are the economic impacts on stakeholders?</u>**

The persons directly affected by the rulemaking are land developers, native plant salvage companies, State land managers, and other political subdivisions with state and private land. The proposed rulemaking will impose an additional cost by increasing the cost for requested and mandatory naïve plant law education; and reduce a cost by eliminating the requirement for purchasing a native plant seal, based on current Department practices. According to the Department, the benefits of the rulemaking will outweigh the costs of those directly affected since the rulemaking will clarify the requirements for native plant salvage.

7. **<u>Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?</u>**

The Department indicates, based on input provided during the comment period, two minor changes were made that clarified ambiguous language between the Notice of Proposed Rulemaking published in the Administrative Register on August 2, 2024 and the Notice of Final Expedited Rulemaking now before the Council for consideration:

- In R3-3-1102(B), the proposed language: "Notice is given to the Department within the following minimum time periods, <u>starting from the time the notice was given or from when confirmation is received from the department:</u>" has been amended to state "Notice is given to the Department within the following minimum time periods, <u>starting from the time the notice was given to the Department:</u>"

- In R3-3-1103(B)(6), the proposed language: "<u>In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been acknowledged by the Department.</u>" has been amended to state "<u>In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been provided to the Department.</u>"

Additionally, based on feedback provided by the Council staff, in order to comply with A.R.S. § 41-1008(A)(3) the fee increases in rule R3-3-1102(C) and R3-3-1106(D)(1)&(2) (previously R3-3-1109(B)(1)&(2)), were reduced. No supplemental notice was filed since these changes did not substantively change the intent of the rules. In R3-3-1102(C): the proposed

language changes the payment to be included on a list to receive any Notice of Intent to Clear from $50 annually to $25 annually. In R3-3-1106(1) and (2) the proposed language amends the payment to attend an Arizona native plant seminar or training course from $50 to $14; and $65 to $25 for court mandated native plant law education

Council staff does not believe these changes make the rules substantially different pursuant to A.R.S. § 41-1025.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates one set of comments were received during the public comment period from the City of Phoenix, Office of Environmental Programs. Specifically, the Department indicates input was provided that there was some ambiguous language regarding when the timeframe begins when filing a notice of intent with the department in R3-3-1102(B) and R3-3-1103(B)(6). Stating that it would make it difficult for a project proponent to know when their project could proceed, alternative language was provided for consideration. The Department reviewed the comments provided by the City of Phoenix, Office of Environmental Programs and concurred with their assessment. The alternative language provided was used to clarify the ambiguous language. Council staff believes the Department has adequately responded to public comments related to this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines “general permit" to mean “a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing.”

The Department indicates a general permit is used for the issuance of tags for harvest restricted native plants since it requires basic information. However, the Department states the permits, tags, and seals issued under A.R.S. §§ 3-906, 3-907, and Title 3, Chapter 3, Article 11 do not qualify as a general permit under A.R.S. § 41-1037 since qualifying information and documentation, and qualifying conditions, must be satisfied prior to the issuance of the required permits, tags and seals to salvage a highly safeguarded, salvage restricted, and salvage assessed native plant. In this way, the issuance of a general permit is not technically feasible or would not

meet the applicable statutory requirements. *See* A.R.S. § 41-1037(A)(3). Council staff believes the Department is in compliance with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates federal law 16 U.S.C. § 1531 et seq., (i.e. the Endangered Species Act of 1973) applies to the subject of highly safeguarded plants in this Article. The Department indicates these rules are not more stringent than federal law.

11. Conclusion

This regular rulemaking from the Department seeks to amend nine (9) rules and one (1) appendix in Title 3, Chapter 3, Articles 11 regarding Arizona Native Plants. Specifically, the Department indicates the proposed amendments will align with current practices, update outdated references, and provide additional provisions to coincide with current Arizona native plant issues. The Department indicates other changes are intended to make technical changes, update the current list of protected native plants, update outdated taxonomy where needed, and overall reduce the regulatory burden by making the rules clearer and more concise. The Department indicates this rulemaking does not establish a new fee. However, the Department indicates this rulemaking increases the fees for Arizona native plant law education found in rule R3-3-1106(D) to cover the cost of providing these services. Specifically, the fee for attending a seminar is increased from $10 to $14 and from $25 to $35 for a court ordered native plant law seminar. This fee increase is to assist in covering the administrative costs associated with providing seminar training. The Department anticipates the rulemaking will result in an overall benefit to the protection of Arizona native plants, to the regulated community, and the public.

The Department is seeking the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A).

Council staff recommends approval of this rulemaking.

Governor's Regulatory Review Council
100 N. 15th Avenue, Suite 302
Phoenix, Arizona 85007

RE: Department of Agriculture, Title 3, Chapter 3, Article 11, Request for Placement on Agenda

Dear Ms. Klein:

The Arizona Department of Agriculture is requesting to place a final rulemaking on the Governor's Regulatory Review Council agenda for consideration and approval. Enclosed with this letter you will find the Arizona Department of Agriculture's (Department) final rulemaking packet for A.A.C. Title 3, Chapter 3, Article 11.

The close of record for the proposed rulemaking occurred on September 6, 2024 following a public hearing for oral comments. During the comment period, the Department received one comment from the City of Phoenix, Office of Environmental Programs regarding clarifying ambiguous language in rules R3-3-1102(B) and R3-3-1103(B)(6) where it was not clear what the timeframe begins when filing a notice of intent to clear land with the Department. This change was made and determined not to be a substantive change. This rulemaking activity is partially related to a five-year review report that was approved on November 7, 2023. The rulemaking does not establish any new fees. However, the fees prescribed for Arizona native plant law education were increased in R3-3-1106(D) to cover the costs of providing these services. The rulemaking does not contain any other fee increases in any other Sections of the rulemaking. The Department is not requesting an immediate effective date pursuant to A.R.S. § 41-1032. There were no studies conducted related to the rulemaking. No additional employees are necessary to implement and enforce the changes to the rules. The Department received final approval the agency's policy advisor to proceed with final rulemaking on October 17, 2024.

Enclosed with this letter is:

1. A copy of the Notice of Final Rulemaking
2. A copy of the Economic, Small Business, and Consumer Impact Statement
3. A copy of the written comment received and the response provided.
4. A copy of the Authorizing statutes

5. A copy of the initial and final requests and authorizations from the Governor's Office for approval to conduct rulemaking and proceed with final rulemaking pursuant to A.R.S. § 41-1039.

Please contact Brian McGrew at (602) 542-3228 or bmcgrew@azda.gov with any questions about this rulemaking.

Sincerely,

Paul E. Brierley
Director

cc: Sheldon Jones, Deputy Director
Jack Peterson, Associate Director

NOTICE OF FINAL RULEMAKING

TITLE 3. AGRICULTURE

CHAPTER 2. DEPARTMENT OF AGRICULTURE - ENVIRONMENTAL SERVICES DIVISION

PREAMBLE

1. **Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039 by the governor on:**

   October 17, 2024

2. **Article, Part, or Section Affected (as applicable)** — **Rulemaking Action**

Article, Part, or Section Affected (as applicable)	Rulemaking Action
R3-3-1101	Amend
R3-3-1102	Amend
R3-3-1103	Amend
R3-3-1104	Amend
R3-3-1105	Amend
R3-3-1106	Amend
R3-3-1107	Amend
R3-3-1108	Amend
R3-3-1109	Repeal
R3-3-1110	Amend
Appendix A	Amend

3. **Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):**

   Authorizing statute: A.R.S. § 3-107(A)

   Implementing statute: A.R.S. §§ 3-903, 3-905 and 3-912

4. **The effective date of the rule:**

   This rule shall become effective 60 days after a certified original and preamble are filed in the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is (to be filled in by *Register* editor).

   a. **If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**

      n/a

   b. **If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):**

      n/a

5. **Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:**

   Notice of Rulemaking Docket Opening: 29 A.A.R. 2167. September 15, 2023, Iss. 37,

   Notice of Formal Rulemaking Advisory Committee: 29 A.A.R. 3589, November 17, 2023, Iss. 46

   Notice of Public Information: 29 A.A.R. 3908, December 15, 2023, Iss. 50

   Notice of Proposed Rulemaking: 30 A.A.R. 2468, Issue Date: August 2, 2024, Issue Number: 31, File number: #R24-138

6. **The agency's contact person who can answer questions about the rulemaking:**

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

On August 23, 2023 the Department received approval from the Governor's Office Land Use Policy Advisor pursuant to A.R.S. § 41-1039(A)(2) to revise the rules under Title 3, Chapter 3, Article 11, to reduce and ameliorate a regulatory burden, while achieving the same regulatory objective as indicated in the Environmental Services Division's five-year rule review for Title 3, Chapter 3, Article 11. Pursuant to A.R.S. § 3-106 The Chief Executive Officer of the Department established a seven-member formal rulemaking advisory committee of stakeholders, conservationists, and State agencies on November 1, 2023 to provide expert opinion and advice on the proposed changes to the Arizona native plant rules. The Committee met monthly to discuss proposed changes and made formal recommendations to the Chief Executive Officer of the Department on May 16, 2024. The Department also received support from other industry stakeholders, Arizona Nursery Association and the Arizona Farm Bureau. The explanation of changes are as follows:

R3-3-1101: The Department proposes to amend this rule by eliminating the unnecessary definitions for "Agent", "Department", "Landowner", "Noncommercial salvage permit", "Permittee", "Scientific permit" and "Wood receipt"; by adding new useful definitions for "Authorized representative", "Collection", "Highly safeguarded native plant", "Salvage", "Salvage assessed native plant", "Salvage restricted native plant".

An explanation of the jurisdiction of the Arizona native plant statutes and rules is also included here for clarification; and by clarifying the definitions of "Conservation" and "Destroy".

R3-3-1102: The Department proposes to amend the rule to include email address as part of the applicant information; clarifying when the time period begins to proceed with disposal of a native plant; clarify what is needed to obtain a copy of filed Notices of Intent to clear. Includes a change of the fee to be on the notification list from $25 to $35 to cover administrative costs, and clarifies when a notification of intent is not required.

R3-3-1103: The Department proposes several changes to this rule. The Department plans to incorporate language in subsection (A) from A.R.S. § 3-905(A) that refers to more than ¼ acre of land and a 60 day notice rather than just referring to the statute. The Department also plans to clarify the requirements for a state agency to allow the salvage protected native plants through the use of permits, tags and seals and the requirement that a person hold a scientific or non-commercial salvage permit for highly safeguarded native plants. The changes clarify the fee exemption for a state agency and the conditions for notification under an emergency where imminent threat to safety or property damage exists.

R3-3-1104: The Department proposes to amend this rule to prescribe the conditions that apply for each native plant permit. What information is required, when one is required, and conditions when one is not required. The Department proposes to move subsections (C) through (E) into rule R3-3-1106, as they relate to fees. The Department will only maintain the requirement to provide a social security number to the extent otherwise required by law. The rule will specifically state when an individual is obtaining the permit their social security number is required. The conditions for exemption from the rules are included for clarity.

R3-3-1105: The Department proposes to combine and rephrase subsections (A)(l) and (B)(l). The Department proposes to move subsections (A)(2), (A)(4), (B)(2) and (B)(4) into rule R3-3-1104, focusing on permit application requirements and permit terms. The Department also proposes to add language to subsections (A)(3) and (B)(3) from A.R.S.§ 3-906(C) related to permit requirements for highly safeguarded native plants. Finally, the Department proposes to add a subsection to make clear that plants covered by a scientific or noncommercial salvage permit cannot be sold. The Department proposes to use this rule to detail the permit application requirements. The Department also plans to incorporate the requirement in A.R.S. § 3- 909(A) of a certificate of inspection for moving protected native plants out-of-state into this rule. The Department will only maintain the requirement to provide a social security number to the extent otherwise required by law. The rule will specifically state when an individual is obtaining the permit their social security number is required.

R3-3-1106: The Department proposes to rename and utilize the rule to prescribe fees for the permits, tags, and seals issued under the Article, including the fees for native plant law education incorporated from rule R3-3-1109. The fee attending a seminar is increased from $10 to $14 and from $25 to $35 for a court ordered native plant law seminar. This fee increase is to assist in covering the administrative costs associated to providing seminar training. No permit, tag, or seal fee increases.

R3-3-1107: The Department proposes to remove subsections (A) through (C) and incorporate the language into rule R3-3-1104 as it relates to native plant permits. Then utilize the rule to prescribe tag, seal and cord usage. The requirement for the usage of seals for Arizona protected native plants removed and only required for imported protected native plants. The current native plant tags used also serve the purpose of sealing the cord.

R3-3-1108: The Department proposes to change the reference to salvage restricted to salvage assessed. The Department also proposes to add to the recordkeeping requirements that the permittee must note the location where the plant was taken from and where it was replanted.

R3-3-1109: The Department proposes to repeal the rule and move the native plant law education fee requirements to rule R3-3-1106.

R3-3-1110: The Department proposes to make this rule more useful by include criteria for determining conditions that a permit could be denied and the process for an appeal.

Appendix A: The Department proposes to amend Appendix A, by input received from the scientific community and subject matter experts to ensure that the rule contains correct taxonomy and plants are properly categorized based on current native plant status.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

No study was conducted

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

The rulemaking does not diminish any previous authority of a political subdivision of this state.

10. A summary of the economic, small business, and consumer impact:

The Department's intent in proposing the amendments to Articles 11, listed in Section 5 of this notice, is to reduce or ameliorate regulatory burdens on the public, while achieving the same regulatory objective as indicated in the Environmental Services Division's five-year rule review. Proposed amendments throughout the Chapter will align with current practices, update outdated references, and provide additional provisions to coincide with current Arizona native plant issues. Other changes are intended to make technical changes, update the current list of protected native plants, update out dated taxonomy where needed, and overall reduce the regulatory burden by making the rules clearer and more concise. The Department anticipates the rulemaking will result in an overall benefit to the protection of Arizona native plants, to the regulated community, and the public. The Department has determined the rulemaking will not require any new full-time employees. The rulemaking could result in additional costs for the regulated community, but those costs are primarily associated to those that commit a violation of the rules of this Chapter and an increase of the cost from $25 to $35

to acquire all "Notices of Intent to Clear" as they are filed. Additionally, the fee for native plant education is increased from $10 to $14 for a native plant law education seminar and $25 to $35 for a court ordered native plant law education seminar. These increases are based on the increase in administrative costs since 2008 and do not exceed the percentage of change in the average consumer price index as published by the U.S. Department of Labor, Bureau of Labor Statistics, pursuant to A.R.S. § 41-1008(A)(3). Changes may prove to benefit Arizona native plant salvage operations by providing a clearer information for land developers, property owners, and State land managers on when a protected native plant can be salvaged instead of being destroyed. There will also be an additional saving to the regulated community by eliminating the requirement of the use of the $0.15 seal for Arizona protected native plants, since the associated protected native plant tag that is purchased, also serves the function of sealing the native plant cord. The Department has determined there is no less intrusive or costly alternative methods of achieving the purpose of the rulemaking. The Department will not incur any additional costs associated with the rulemaking since these programs currently exist and the intent is to only clarify and improve those processes. Therefore, the Department has determined that the benefits of the rulemaking outweigh any costs.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Based on input provided during the open comment period, two minor changes were made that clarified ambiguous language and will benefit the regulated community. No supplemental notice was filed since these changes did not substantively change the intent of the rule.

1) In R3-3-1102(B), the proposed language: "Notice is given to the Department within the following minimum time periods, starting from the time the notice was given or from when confirmation is received from the department:" has been amended to state "Notice is given to the Department within the following minimum time periods, starting from the time the notice was given to the Department:"

2) In R3-3-1103(B)(6), the proposed language: "In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been acknowledged by the Department." has been amended to state "In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been provided to the Department."

Based on feedback provided by the Governor's Regulatory Review Council, in order to comply with A.R.S. § 41-1008(A)(3) the fee increases in rule R3-3-1102(C) and R3-3-1106(D)(1)&(2) (previously R3-3-1109(B)(1)&(2)), were reduced. No supplemental notice was filed since these changes did not substantively change the intent of the rules.
In R3-3-1102(C): the proposed language chnages the payment to be included on a list to receive any Notice of Intent to Clear from $50 annually to $25 annually.
In R3-3-1106(1) and (2) the proposed language amends the payment to attend an Arizona native plant seminar or training course from $50 to $14; and $65 to $25 for court mandated native plant law education.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

One set comments were received during the public comment period from the City of Phoenix, Office of Environmental Programs. Input was provided that there was some ambiguous language regarding when the timeframe begins when filing a notice of intent with the department in R3-3-1102(B) and R3-3-1103(B)(6). Stating that it would make it difficult for a project proponent to know when their project could proceed. Alternative language was provided for consideration. The Department reviewed the comments provided by the City of Phoenix, Office of Environmental Programs and concurred with their assessment. The alternative language provided, as noted in subsection 11 of the preamble, was used to clarify the ambiguous language.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

A.R.S. § 3-104(F) requires the Arizona Department of Agriculture Advisory Council assist the Director of the Department on all rulemaking activities. The council shall review, advise and make recommendations before they are adopted. During the June 28, 2024

Advisory Council Meeting, council members approved the Department's recommendations to amend the rules in Title 3, Chapter 3, Article 11.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

A general permit is used for the issuance of tags for harvest restricted native plants since it requires basic information. The permits, tags, and seals issued under A.R.S. §§ 3-906, 3-907, and Article 11 of 3 A.A.C. 3 do not qualify as a general permit under A.R.S. § 41-1037 since qualifying information and documentation, and qualifying conditions, must be satisfied prior to the issuance of the required permits, tags and seals to salvage a highly safeguarded, salvage restricted, and salvage assessed native plant.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law 16 U.S.C. § 1531 et seq., (i.e. the Endangered Species Act of 1973) applies to the subject of highly safeguarded plants in the Article. These rules are not more stringent to federal law.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No analysis was conducted

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

The Endangered Species Act of 1973, 16 U.S.C. § 1531 et seq. in appendix A, under the category of highly safeguarded native plant.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

n/a

16. The full text of the rules follows:

Rule text begins on the next page.

Appendix A. Protected Native Plants by Category

ARTICLE 11. ARIZONA NATIVE PLANTS

R3-3-1101. Definitions

In addition to the definitions in A.R.S. § 3-901, the following terms apply to this Article:

~~"Agent" means a person authorized to manage, represent, and act for a landowner.~~

"Authorized representative" means a project manager, project engineer, sub-contractor, or similar that is identified by the landowner on a Notice of Intent to Clear form, or amended form, as a person that has authorization from the landowner to salvage protected native plants on property owned or managed by the landowner.

"Certificate of inspection for interstate shipments" means a certificate to transport protected native plants out of the state.

"Collection" means a collection of one or more highly safeguarded native plants that are preserved, catalogued, and managed for the purpose of preserving that species of an Arizona native plant.

"Conservation" means prevention of exploitation, damage, destruction, or neglect of native plants while helping to ensure continued public use.

"Cord" means a specific type string or small rope issued by the Department for attaching tags and seals to protected native plants.

"Cord of wood" means a measurement of firewood equal to 128 cubic feet.

~~"Department" means the Arizona Department of Agriculture.~~

"Destroy" means to cause the death or irreparable damage of any protected native plant.

"Harvest restricted native plant permit" means a permit required to remove the by-products, fibers, or wood from a native plant listed in Appendix A, subsection (D).

"Highly safeguarded native plant" (A.R.S. § 3-903(B)(1)) means a group of plants that are threatened for survival or are in danger of extinction. Including the native plants listed in Appendix A, subsection (A) and those listed in the Endangered Species Act. The plants in this category may only be salvaged with the use of scientific or non-commercial salvage permits, tags and seals.

~~"Landowner" means a person who holds title to a parcel of land.~~

~~"Noncommercial salvage permit" means a permit required for the noncommercial salvage of a highly safeguarded native plant.~~

"Jurisdiction" means the applicability of the Arizona native plant laws of A.R.S. §§ 3-901 through 3-934 that apply within the boundaries of the state, except on designated Indian lands and federal lands. Federal land managers are to be cognizant of E.O. 13132 (64 FR 43255, August 10, 1999) when considering native plants on federal land. State law governs in areas within local political subdivision boundaries but does not prohibit more stringent native plant regulations or ordinances adopted by the political subdivision. Where the two are in conflict, state laws and rules supersede, or if complimentary, the most stringent of the two laws and rules shall apply.

"Original growing site" means a place where a plant is growing wild and is rooted to the ground or any property owned by the same landowner where a protected native plant is relocated or transplanted without an original transportation permit.

~~"Permittee" means any person who is issued a permit by the Department for removing and transporting protected native plants.~~

"Protected native plant" means any living plant or plant part listed in Appendix A and growing wild in Arizona.

"Protected native plant tag" means a tag issued by the Department to identify the lawful removal of a protected native plant, other than a saguaro cactus, from its original growing site.

"Saguaro tag" means a tag issued by the Department to identify a saguaro cactus being lawfully moved.

"Salvage" means to remove a protected native plant that would otherwise be destroyed in the land development process or other actions that would threaten the survival of the species of plant.

"Salvage assessed native plant" means plants categorized in Appendix A, subsection (C) of this Article, as described by A.R.S. § 3-903(B)(3), that are to be afforded the exclusive protections, involving the use of salvage tags and annual salvage permits, provided in this Article. The category contains native plants that are not subject to theft or vandalism, but nevertheless have salvage value.

"Salvage assessed native plant permit" means a permit required to remove a native plant listed in Appendix A, subsection (C).

"Salvage restricted native plant" means plants categorized in Appendix A, subsection (B) of this Article, as described by A.R.S. § 3-903(B)(2), that are to be afforded the exclusive protections involving the use of salvage permits, tags, and seals provided in this Article.

This category includes native plants that may be salvaged and transplanted but are nevertheless subject to high potential for damage by theft or vandalism.

"Salvage restricted native plant permit" means a permit required to remove a native plant listed in Appendix A, subsection (B).

~~"Scientific permit" means a permit required to remove a native plant for a controlled experimental project by a qualified person.~~

"Securely tie" means to fasten in a tight and secure manner to prevent the removal of tags, seals, or cord for reuse.

"Small Native Plant" means any protected plant eight inches in height or less.

"State agency" has the same meaning as in A.R.S. § 3-901(3) it contains *"any agency or political subdivision of the state."*.

~~"Survey" means the process by which a parcel of land is examined for the presence of protected native plants. A simple survey determines only whether protected native plants are present. A complete survey establishes the kind and number of each species present.~~

~~"Wood receipt" means a receipt issued by the Department to identify the lawful removal of a protected native plant harvested for fuel, being removed from its original growing site.~~

R3-3-1102. Protected Native Plant Destruction by a Private Landowner

A. Notice of intent.

1. Before a protected native plant is destroyed, the private landowner shall provide notification of intended destruction, which shall include the following information to the Department on a form obtained from the Department:
   a. Name, address, email address, and telephone number of the landowner;
   b. Name, address, email address, and telephone number of the landowner's agent, if applicable;
   c. Valid documentation indicating land ownership, including but not limited to a parcel identification number, tax assessment, or deed;
   d. Legal description, map, address, or other description of the area, including the number of acres to be cleared, in which the protected native plants subject to the destruction are located;
   e. Earliest date of plant destruction; and
   f. Landowner's intent for the disposal or salvage of protected native plants on the land.
2. A landowner intending to destroy protected native plants on an area of less than one acre may submit the information required in subsection (A)(1) to the Department verbally.

B. A landowner shall not destroy a protected native plant until:

1. The landowner receives a written confirmation ~~notice~~ from the Department that the notice has been received, and
2. Notice is given to the Department within the following minimum time periods, starting from the time the notice was given to the Department:
   a. Twenty days before the plants are destroyed over an area of less than one acre.
   b. Thirty days before the plants are destroyed over an area of one acre or more but less than 40 acres.
   c. Sixty days before the plants are destroyed over an area of 40 acres or more.

C. The Department shall ~~provide a salvage operator or other interested person with a copy of a notice of intent submitted under this Section upon receipt of the private landowner's name, address, telephone number, and payment of an annual $25 nonrefundable fee~~ compile a list of names and contact information of salvagers or persons interested in native plant salvage. The persons on the list shall receive notifications of potential salvage opportunities. To be placed on the list, the salvager or other interested person shall submit to the Department's licensing section the salvager or interested person's name, email address, mailing address, telephone number, and payment of an annual $35 nonrefundable fee. The Department shall send to all listed salvagers and interested persons an electronic copy of notices of intent ("NOI"), including those that indicate they are not allowing salvage, The electronic copy of the NOIs shall be sent out daily the next business day after the NOIs are received.

D. A notice of intent is not required for the destruction of native plants on individually owned residential property of ten acres or less where initial building construction has already occurred.

R3-3-1103. Disposal and Salvage of Protected Native Plants by a State Agency

~~A. A state agency intending to remove or destroy protected native plants shall notify the Department, under A.R.S. § 3-905, and shall propose a method of disposal from the following list:~~

~~1. The plants may be sold at a public auction;~~

~~2. The plants may be relocated or transported to a different location on the same property or to another property owned by the state, without obtaining a permit;~~

~~3. The plants may be donated to nonprofit organizations as provided in A.R.S. § 3-916;~~

~~4. The plants may be donated to another state agency or political subdivision, without obtaining a permit; or~~

~~5. The plants may be salvaged or harvested by a member of the general public or a commercial dealer, if the person holds a permit as provided under A.R.S. § 3-906 or 3-907.~~

A. A state agency intending to remove or destroy protected native plants, over an area of state land exceeding one-quarter acre, the state agency shall notify the Department in writing at least sixty days before the plants are removed or destroyed with the following information on a form obtained from the Department:

1. Legal description, map, address, or other description of the area, including the number of acres to be cleared, in which the protected native plants subject to the destruction are located;
2. A description of the number and type of plants to be removed or destroyed;
2. Earliest date of plant destruction; and
3. The state agency's intent for the disposal or salvage of protected native plants on the land.

B. A state agency intending to remove or destroy protected native plants shall propose a method of disposal or transfer from the following list:

1. Relocated or transported to a different location on the same property or to another property owned by the state, without obtaining a permit;
2. Donated to another state agency or political subdivision, by obtaining a non-commercial salvage permit; or
3. Donated to nonprofit organizations as provided in A.R.S. § 3-916;
4. Salvaged or harvested by a member of the general public or a commercial dealer, if the person holds a salvage permit issued pursuant to R3-3-1104.
5. Sold at a public auction, with appropriate cord sealing tags purchased and utilized by the buyer pursuant to R3-3-1106(B) and R3-3-1107;
6. In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been provided to the Department.

C. Any action by a state agency must occur within one year of the date disclosed in the notice.

D. A state agency filing a notice, as prescribed in subsection (A), to remove protected native plants are exempt from fees established for salvaged plants.

~~B.~~E. ~~If~~ Notwithstanding subsection (B)(1) through (5), if the plants are highly safeguarded native plants, they shall first be made available to the holder of a valid scientific permit or a noncommercial salvage permit, by obtaining a current list of scientific permit and noncommercial salvage permit holders from the Department.

F. Pre-notification of intent shall not be required in an emergency, where imminent threat to the safety of a person or animal, or damage to personal or state property exists if protected native plants are not removed or destroyed by the state agency, provided the notice of intent is filed in conjunction with the removal or destruction of the native plant.

R3-3-1104. Protected Native Plant ~~Permits; Tags; Seals; Fees~~ Permits

A. A person shall not collect, transport, possess, sell, offer for sale, dispose, or salvage protected native plants unless that person is 18 years of age or older and possesses an appropriate permit.

B. Salvage restricted native plant permits. ~~An applicant shall submit the following information to the Department on a form obtained from the Department, as applicable.~~

1. An applicant for a salvage restricted native plant permit shall submit the following information to the Department on a form obtained from the Department, as applicable, along with any applicable fees outlined in R3-3-1106:

   ~~1.~~a. Name, business name, address, email address, telephone number, ~~Social Security number or tax identification number,~~ and signature of the applicant;

   ~~2.~~b. Name and number of plants to be removed;

   ~~3.~~c. Purpose of the plant removal;

   ~~4.~~d. Whether the applicant has a conviction for a violation of a state or federal statute regarding the protection of native plants within the previous five years;

~~5. Except for salvage assessed native plants;~~

   ~~a.~~e. Name, address, email address, telephone number, and signature of the landowner where the plants will be removed;

   ~~b.~~f. Location of the permitted site and size of acreage;

   ~~c.~~g. Destination address where the plants will be transplanted or temporarily held before being sold, gifted, or otherwise distributed to a permanent location;

   ~~d.~~h. Legal and physical description of the location of the original growing site; and

   e.i. Parcel identification number for the permitted site or other documents proving land ownership.

2. Salvage restricted native plant permits and plant tags are valid for the calendar year in which they are issued. The tags expire at the end of the calendar year unless the permit is renewed.

3. Exemptions. The following are exemptions for the requirements of this subsection.

   a. Plants propagated or cultivated by human beings; or

   b. Native plants collected or salvaged by a homeowners' association or any other community based organization if the plants are relocated in the community.

~~**C.** Permit fees.~~

~~1. A person removing and transporting protected native plants shall submit the following applicable fee to the Department with the permit application:~~

   ~~a. Salvage assessed native plant permit, annual use, $35;~~

   ~~b. Harvest restricted native plant permit, annual use, $35;~~

   ~~c. All other native plant permits, one-time use, $7;~~

   ~~d. Certificate of inspection for interstate shipments, $15.~~

~~2. Exemptions. Protected native plants are exempt from fees if:~~

   ~~a. The protected native plants intended for personal use by a landowner are taken from one piece of land owned by the landowner to another piece of land also owned by the landowner, remain on the property of the landowner, and are not sold or offered for sale;~~

   ~~b. The protected native plants are collected for scientific purposes; or~~

   ~~c. A landowner donates the protected native plant to a scientific, educational, or charitable institution.~~

~~**D.** Tag and harvesting fees.~~

~~1. Any person obtaining a saguaro tag or other protected native plant tag or receipt shall submit the following applicable fee to the Department at the time a tag is obtained:~~

   ~~a. Saguaro, $8 per plant;~~

   ~~b. Trees cut for firewood and listed in the harvest restricted category, $6 per cord of wood;~~

   ~~c. Small native plant, $.50 per plant;~~

~~d. Any other protected native plant referenced in A.R.S. § 3-903(B) and (C) and listed in Appendix A, $6 per plant.~~

~~2. The fee for harvesting *nolina* or *yucca* parts is $6 per ton. Payment shall be made to the Department in the following manner:~~

~~a. Unprocessed nolina or yucca fiber shall be weighed on a state-certified bonded scale; and~~

~~b. The harvester shall submit payment and weight certificates to the Department no later than the tenth day of the month following each harvest.~~

~~E. Seal fees. A person obtaining a seal shall submit a $.15 per plant fee to the Department at the time a seal is obtained.~~

~~F. Salvage assessed native plant permits and plant tags are valid for the calendar year in which they are issued. The tags expire at the end of the calendar year unless the permit is renewed.~~

C. Salvage assessed native plant permits

1. An applicant for a salvage assessed native plant permit shall submit the following information to the Department on a form obtained from the Department, as applicable, along with any applicable fees outlined in R3-3-1106:
   a. Name, business name, address, email address, telephone number, and signature of the applicant;
   b. Names of the salvage assessed plants to be collected.
2. Salvage assessed native plant permits and plant tags are valid for the calendar year in which they are issued. The tags expire at the end of the calendar year unless the permit is renewed.
3. Exemptions. The following are exemptions for the requirements of this subsection.
   a. Plants propagated or cultivated by human beings; or
   b. Native plants collected or salvaged by a homeowners' association or any other community based organization if the plants are relocated in the community.

D. Harvest restricted native plant permit and receipts.

1. Any person harvesting the wood, fiber, or by-product of a plant listed in subsection (D) of Appendix A of more than one-hundred pounds, or more than two cords of wood, shall apply for a harvest restricted permit and receipts by submitting the following information to the Department, on a form obtained from the Department, along with any applicable fees outlined in R3-3-1106(C)(2):
   a. Name, address, email address and telephone number of the applicant applying for the permit;
   b. The legal land description where the harvesting will take place;
   c. For wood products, the number of cords to be collected;
   d. For Nolina or Yucca fiber, the numbers of pounds to be collected;
   e. Name, address, email address, telephone number, and signature of land owner(s)
2. Permits and unused receipts issued under this subsection are non-transferable and must be in the possession of the permit holder during harvesting and transport.
3. Receipts for harvest restricted materials that are sold must be transferred to a purchaser as proof of ownership.
4. Exemptions. The following are exemptions for the requirements of this subsection.
   a. Material harvested from lands managed by the federal government provided a person is in possession of a valid permit issued by the federal land management agency.
   b. Material harvested with written permission from a private land owner or tenant, from other than state-owned land or other public land, and:
      i. Is one-hundred pounds or less for Yucca or Nolina fiber; or
      ii. Is two cords or less of wood.
   c. The use of dead wood for campfires or cooking.
   d. Dead harvest restricted plants, collected by a land owner or tenant.

E. Scientific Permit. In addition to the requirements of A.A.C. R3-3-1105(A), the following application requirements apply:

1. An applicant shall submit the following information to the Department on a form obtained from the Department, along with any applicable fees outlined in R3-3-1106:
   a. Name, address, email address and telephone number of the company or research facility applying for the permit;
   b. Name, title and experience of the person conducting the research project;
   c. Purpose and intent of the research project;
   d. Controls to be used;
   e. Variables to be considered;
   f. Time-frame for the project;
   g. Anticipated results and plans for publication;
   h. Reports and recordkeeping that will be used to monitor the project;
   i. Project funding source;
   j. Funding of the company or research facility;
   k. Written authorization from the landowner for collection of the plants;
   l. Date of the application; and
   m. Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests.
2. A scientific permit is valid for the calendar year in which it is issued.
3. A scientific permit holder may amend their permit anytime by submitting the updated information to the Department.
4. An applicant may also submit proof of a current scientific permit issued by a federal agency or state political subdivision and any additional information to the requirements of R3-3-1104(E)(1) not provided in the existing scientific permit.

F. Non-commercial Salvage Permit. In addition to the requirements of A.A.C. R3-3-1105(B), the following application requirements apply:

1. An applicant shall submit the following information to the Department, on a form obtained from the Department, along with any applicable fees outlined in R3-3-1106:
   a. Name, address, email address and telephone number of the applicant applying for the permit;
   b. Proposed relocation site for the plants;
   c. Written authorization from the landowner for collection of the plants;
   d. The number, species, and description of the plants being salvaged;
   e. Date of the application; and
   f. Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests.
2. A non-commercial salvage permit is valid only for the transportation and the transplantation of the identified native plants indicated on the permit application. A non-commercial salvage permit holder may amend their permit anytime by submitting the updated information to the Department with written authorization from the landowner.
3. A non-commercial salvage permit is valid for the calendar year in which they are issued. The tags expire at the end of the calendar year unless the permit is renewed.
4. Plants propagated or cultivated by human beings are exempt from these requirements.

G. Movement Permit. In addition to the saguaro tag obtained pursuant to R3-3-1106(C)(1)(a), any person moving or salvaging a saguaro cactus over four feet tall from a location other than its original growing location in Arizona and transplanting it to another location shall apply to the Department for a Movement Permit. The landowner from where the saguaro cactus is being moved shall provide the following information on the permit application, unless the applicant maintains a record of the original permit or verifies the Department has a record of a previous legal movement of the cactus by the applicant. Saguaro cactus that are propagated or cultivated by humans are exempt from this requirement.

1. The name, mailing address, email address, telephone number, and signature of the landowner;

2. The address or parcel identification number where the saguaro cactus is located;

3. The name, mailing address, email address, and telephone number of the receiver;

4. The name, mailing address, and telephone number of the carrier;

5. The number, species, and description of the plant being removed;

6. The parcel identification number of the property where the saguaro cactus is being moved; and

7. The date of the application.

H. Movement of protected native plants obtained outside Arizona.

1. Any person moving a protected native plant obtained outside Arizona and transporting and planting it within the state shall declare the protected native plant at the nearest Department office location during normal business hours, office locations can be found by calling 602-542-3578 or by visiting the Department's website at https://agriculture.az.gov/plantsproduce/native-plants.

2. To ensure compliance with A.A.C. R3-4-239, shipments originating from an area under quarantine for imported fire ants, the Department shall place the protected native plant under quarantine and direct the shipment to a certified quarantine holding area for inspection.

3. After the plants have been declared, permit and seal fees have been paid, the permitting office shall issue a Movement Permit and appropriate number of seals.

R3-3-1105. Scientific Permits; Noncommercial Salvage Permits

A. Scientific Permit

1. A person shall not collect, destroy, harm, or remove any highly safeguarded or other protected native plants for a research project unless that person holds a scientific permit issued pursuant to R3-3-1104(E).

   a. The removal and movement of the native plants shall be accomplished by a person experienced in native plant removal and transplantation

      i. Whenever possible, the permittee shall take specimens in such a way as to not reduce the population by retrieving minimal tissue, leaving the roots intact for perennial plants or utilizing other scientifically acceptable methods for the protection of the environment and remaining native plants.

      ii. If not already required by another agency or institution, and whenever possible, if the permittee takes multiple specimens, the permittee shall deposit at least one specimen at an Arizona university plant conservatory. If it is not possible to deposit a specimen at an Arizona university plant conservatory, the permittee shall provide the justification to the Department for noncompliance with this provision.

2. ~~An applicant shall submit the following information to the Department on a form obtained from the Department:~~

   a. ~~Name, address, and telephone number of the company or research facility applying for the permit;~~

   b. ~~Name, title and experience of the person conducting the research project;~~

   c. ~~Purpose and intent of the research project;~~

   d. ~~Controls to be used;~~

   e. ~~Variables to be considered;~~

   f. ~~Time-frame for the project;~~

   g. ~~Anticipated results and plans for publication;~~

   h. ~~Reports and recordkeeping that will be used to monitor the project;~~

   i. ~~Project funding source;~~

   j. ~~Funding of the company or research facility;~~

   k. ~~Written authorization from the landowner for collection of the plants;~~

   l. ~~Date of the application;~~

   m. ~~Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests; and~~

~~n. Tax identification number, or if applicant is an individual, a Social Security number.~~

~~3.~~2. A scientific permit shall be issued if the applicant provides documentation that demonstrates the following:

a. A plan, pre-approved by the landowner, to restore the removal site to a natural appearance;

b. The removal and movement of the native plants shall be accomplished by a person experienced in native plant removal and transplantation;

c. The native plants used in the project shall remain accessible to the Department;

d. The ecology of the project site is beneficial to the growth of the specific plants in the project ~~if practical~~;

e. Arrangements exist for a suitable permanent planting site for the surviving plants after the project's completion; and

f. Description of plant disposition and research hypothesis.

~~4. A scientific permit is valid for the calendar year in which it is issued.~~

3. In addition to the requirements listed in subsection (A)(2), the following requirements apply to highly safeguarded native plants:

a. Permits may be issued only for collection for scientific purposes of highly safeguarded native plants whose existence or location is threatened by intended destruction or a change in land usage, and

b. If the permit may enhance the survival of the affected species.

B. Noncommercial salvage permit:

1. Highly safeguarded native plants may only be collected for conservation by a person holding a noncommercial salvage permit issued pursuant to R3-3-1104(F).

~~2. An applicant shall submit the following information to the Department, on a form obtained from the Department:~~

~~a. Name, address, and telephone number of the applicant applying for the permit;~~

~~b. Proposed relocation site for the plants;~~

~~c. Written authorization from the landowner for collection of the plants;~~

~~d. Date of the application; and~~

~~e. Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests.~~

~~3.~~2. A noncommercial salvage permit shall be issued if all of the following conditions are met through documentation provided to the Department:

a. The native plants used in the project shall be accessible to the Department after transplant, and

b. The relocation site is beneficial to the growth of the specific plants in the project.

~~4. A noncommercial salvage permit is valid only for the transportation and the transplantation of the particular native plant.~~

3. In addition to the requirements listed in subsection (B)(2), the following requirements apply to highly safeguarded native plants:

a. Permits may be issued only for collection for noncommercial salvage purposes of highly safeguarded native plants whose existence or location is threatened by intended destruction or a change in land usage, and

b. If the permit may enhance the survival of the affected species.

R3-3-1106. ~~Protected Native Plant Survey; Fee~~ Protected Native Plant Program Fees

~~**A.** Upon request, the Department may conduct a native plant survey. Upon completion, the Department shall notify the individual who made the request of:~~

~~1. The date the survey was performed;~~

~~2. The amount of the survey fee payable to the Department;~~

~~3. The name of Department personnel performing the survey;~~

~~4. Upon payment, the survey results including the names and numbers of protected native plants.~~

~~**B.** A person who requests a native plant survey shall pay the survey fee to the Department within 30 days from the date of the notification. The survey fee shall be based on time and travel expenses, except that no fee shall be charged for a determination of whether protected species exist on the land.~~

A. Permit fees.

1. In addition to any applicable fees for interstate shipment requiring a single shipment nursery stock inspection certification issued pursuant to R3-4-301(D), a person removing and transporting protected native plants shall submit the following applicable fee to the Department with the permit application:

a. Salvage assessed native plant permit, annual use, $35;

b. Harvest restricted native plant permit, annual use, $35;

d. Certificate of inspection for interstate shipments, $15;

c. All other native plant permits, one-time use, $7.

2. Exemptions. Protected native plants are exempt from fees if:

a. The protected native plants intended for personal use by a landowner are taken from one piece of land owned by the landowner to another piece of land also owned by the landowner, remain on the property of the landowner, and are not sold or offered for sale;

b. The protected native plants are collected for scientific purposes;

c. A landowner donates the protected native plant to a scientific, educational, or charitable institution.

d. Exempted pursuant to A.R.S. § 3-915;

e. Donated to a home-owners association or nonprofit organizations as provided in A.R.S. § 3-916; or

f. Donated to a state agency or political subdivision, under a non-commercial salvage permit.

B. Tag and harvesting fees.

1. Any person obtaining a saguaro tag or other protected native plant tag or receipt shall submit the following applicable fee to the Department at the time a tag is obtained:

a. Saguaro, $8 per plant;

b. Trees cut for wood and listed in the harvest restricted category, $6 per cord of wood;

c. Small native plant, $.50 per plant;

d. Any other protected native plant referenced in A.R.S. § 3-903(B) and (C) and listed in Appendix A, $6 per plant.

2. The fee for harvesting *nolina* or *yucca* parts is $6 per ton. Payment shall be made to the Department in the following manner:

a. Unprocessed *nolina* or *yucca* fiber shall be weighed on a state-certified bonded scale; and

b. The harvester shall submit payment and weight certificates to the Department no later than the tenth day of the month following each harvest.

C. Seal fees. A person obtaining a seal shall submit a $.15 per plant fee to the Department at the time a seal is obtained.

D. Arizona native plant law Education. In addition to the following fees, charges for printed materials or pamphlets shall be assessed based upon printing and mailing costs:

1. A person attending a seminar or training course on Arizona native plant law shall pay a nonrefundable fee of $14 to the Department before attending the class.

2. A person convicted of violating Arizona native plant laws and ordered by a court to attend a native plant educational class shall pay a nonrefundable fee of $35 to the Department before attending the class. The Department shall provide written confirmation of satisfactory completion to a person ordered by a court to attend a class.

R3-3-1107. ~~Movement Permits;~~ Tags, Seals, and Cord Use

~~A. Any person moving a protected native plant, except a saguaro cactus, previously transplanted from its original growing site in Arizona and transplanting it to another location shall apply to the Department for a Movement Permit. The landowner from where the plant is being moved shall provide the following information on the permit application:~~

~~1. The name, telephone number, and signature of the landowner;~~

~~2. The location of the plant;~~

~~3. The name, address, and telephone number of the receiver;~~

~~4. The name, address, and telephone number of the carrier;~~

~~5. The number, species, and description of the plant being removed;~~

~~6. The tax parcel identification number; and~~

~~7. The date of the application.~~

~~**B.** Any person moving a saguaro cactus over four feet tall previously transplanted from its original growing site in Arizona and transplanting it to another location shall apply to the Department for a Movement Permit. The landowner from where the saguaro cactus is being moved shall provide the following information on the permit application, unless the applicant maintains a record of the original permit or verifies the Department has a record of a previous legal movement of the cactus by the applicant.~~

~~1. The name, telephone number, and signature of the landowner;~~

~~2. The address where the saguaro cactus is located;~~

~~3. The name, address, and telephone number of the receiver;~~

~~4. The name, address, and telephone number of the carrier;~~

~~5. The number, species, and description of the plant being removed;~~

~~6. The tax parcel identification number of the property where the saguaro cactus is being moved; and~~

~~7. The date of the application.~~

~~**C.** Movement of protected native plants obtained outside Arizona.~~

~~1. Any person moving a protected native plant obtained outside Arizona and transporting and planting it within the state shall declare the protected native plant at the agricultural inspection station nearest the port of entry. The Department shall place the protected native plant under "Warning Hold" to the nearest permitting office.~~

~~2. If an agricultural station is not in operation at the port of entry, the person shall declare the protected native plant at the nearest permitting office during normal office hours.~~

~~3. After the plants have been declared, the permitting office shall issue a Movement Permit and seal.~~

~~**D.**~~**A.** ~~Any~~ Seals. Any person ~~moving~~ importing protected native plants shall obtain ~~the following~~ import seals from the Department and securely attach the ~~appropriate~~ seal directly to each protected native ~~plant :~~ plant.

~~1. Protected native plant seals identify protected native plants, except saguaro cacti, that will be moved from locations that are not the original growing sites.~~

~~2. Imported seals identify all imported protected native plants.~~

~~**E.**~~**B.** ~~Tag, seal,~~ Tag and cord attachment.

1. A permittee shall attach a cord sealing tag to each protected native plant taken from its original growing site, using cord provided by the Department, before transport. No other type of rope, string, twine, or wire is allowed.

2. The cord shall be securely tied around the plant, and the cord sealing tag ~~attached~~ placed directly over the knot in the cord and the ends pressed firmly together sealing the knot so that it cannot be removed without breaking the ~~seal~~ tag or cutting the cord.

~~3. The tag shall be placed directly over the knot in the cord and the ends pressed firmly together sealing the knot so that it cannot be removed for reuse.~~

~~4. The protected native plant seal shall be placed directly over the knot and snapped firmly closed, sealing the knot.~~

~~5. The imported seal shall be attached directly to the plant.~~

~~6.~~3. Upon loading the plant, every effort shall be made to allow visibility of the tag during transport.

R3-3-1108. Recordkeeping; Salvage Assessed and Harvest Restricted Native Plants

A. Salvage Assessed Native Plants.

1. A permittee shall maintain a record of each protected native plant removed under an annual permit for two years from the date of each transaction and allow Department inspection of the records during normal business hours. The transaction record shall include

the date salvage ~~restricted~~ assessed protected native plants were removed, the location where the plants were taken from, the location where the plants were replanted, and the permit and tag numbers.

2. A permittee shall maintain a record of written permission granted by a landowner for the collection of salvage assessed native plants.

~~2.~~3. Annually, by January 31, a permittee shall submit to the Department a copy of each transaction record for the prior calendar year.

B. Harvest Restricted Native Plants. A permittee shall submit to the Department by the tenth day of each month the transaction records for the previous month, or a written statement that no transactions were conducted for that month.

R3-3-1109. ~~Arizona Native Plant Law Education~~ Repealed

~~**A.** The Department may schedule seminars and training courses on an as-needed basis.~~

~~**B.** In addition to the following fees, charges for printed materials or pamphlets shall be assessed based upon printing and mailing costs:~~

~~1. A person attending a seminar or training course on Arizona native plant law shall pay a nonrefundable fee of $10 to the Department before attending the class.~~

~~2. A person convicted of violating Arizona native plant laws and ordered by a court to attend a native plant educational class shall pay a nonrefundable fee of $25 to the Department before attending the class. The Department shall provide written confirmation of satisfactory completion to a person ordered by a court to attend a class.~~

R3-3-1110. Permit Denial

~~Upon notice of denial of a permit, an applicant may request, in writing, that the Department provide an administrative hearing under A.R.S. Title 41, Chapter 6, Article 10, to appeal the denial.~~

A. A person that is found in violation of A.R.S. § 3-908 or the rules of this Article shall be denied a permit, tag, or seal applied for or issued, pursuant to this Article.

B. Upon notice of denial of a permit, an applicant may request, in writing, that the Department provide an administrative hearing under A.R.S. Title 41, Chapter 6, Article 10, to appeal the denial.

Appendix A. Protected Native Plants by Category

A. Highly safeguarded native plants as prescribed in A.R.S. § 3-903(B)(1), for which removal is not allowed except as provided in R3-3-1105:

~~AGAVACEAE Agave Family~~

— ~~*Agave arizonica* Gentry & Weber–Arizona agave~~

— ~~*Agave delamateri* Hodgson & Slauson~~

— ~~*Agave murpheyi* Gibson–Hohokam agave~~

— ~~*Agave parviflora* Torr.–Santa Cruz striped agave, Small-flowered agave~~

— ~~*Agave phillipsiana* Hodgson~~

— ~~*Agave schottii* Engelm. var. *treleasei* (Toumey) Kearney & Peebles~~

~~APIACEAE Parsley Family. [= Umbelliferae]~~

— ~~*Lilaeopsis schaffneriana* (Schlecht.) Coult. & Rose ssp. *recurva* (A. W. Hill) Affolter–Cienega false rush, Huachuca water umbel.~~
~~Syn.: *Lilaeopsis recurva* A. W. Hill~~

~~APOCYNACEAE Dogbane Family~~

— ~~*Amsonia kearneyana* Woods.–Kearney's bluestar~~

— ~~*Cycladenia humilis* Benth. var. *jonesii* (Eastw.) Welsh & Atwood–Jones' cycladenia~~

~~ASCLEPIADACEAE Milkweed Family~~

- ~~*Asclepias welshii* N. & P. Holmgren–Welsh's milkweed~~

~~ASTERACEAE Sunflower Family [= Compositae]~~

- ~~*Erigeron lemmonii* Gray–Lemmon fleabane~~
- ~~*Erigeron rhizomatus* Cronquist–Zuni fleabane~~
- ~~*Senecio franciscanus* Greene–San Francisco Peaks groundsel~~
- ~~*Senecio huachucanus* Gray–Huachuca groundsel~~

~~BURSERACEAE Torch Wood Family~~

- ~~*Bursera fagaroides* (H.B.K.) Engler–Fragrant bursera~~

~~CACTACEAE Cactus Family~~

- ~~*Carnegiea gigantea* (Engelm.) Britt. & Rose–Saguaro: 'Crested' or 'Fan-top' form~~
  ~~Syn.: *Cereus giganteus* Engelm.~~
- ~~*Coryphantha recurvata* (Engelm.) Britt. & Rose–Golden-chested beehive cactus~~
  ~~Syn.: *Mammillaria recurvata* Engelm.~~
- ~~*Coryphantha robbinsorum* (W. H. Earle) A. Zimmerman–Cochise pincushion cactus, Robbin's cory cactus.~~
  ~~Syn.: *Cochiseia robbinsorum* W.H. Earle~~
- ~~*Coryphantha scheeri* (Kuntze) L. Benson var. *robustispina* (Schott) L. Benson–Scheer's strong-spined cory cactus.~~
  ~~Syn.: *Mammillaria robustispina* Schott~~
- ~~*Echinocactus horizonthalonius* Lemaire var. *nicholii* L. Benson–Nichol's Turk's head cactus~~
- ~~*Echinocereus triglochidiatus* Engelm. var. *arizonicus* (Rose ex Orcutt) L. Benson–Arizona hedgehog cactus~~
- ~~*Echinomastus erectocentrus* (Coult.) Britt. & Rose var. *acunensis* (W.T. Marshall) L.Benson–Acuna cactus~~
  ~~Syn.: *Neolloydia erectocentra* (Coult.) L. Benson var. *acunensis* (W. T. Marshall) L. Benson~~
- ~~*Pediocactus bradyi* L. Benson–Brady's pincushion cactus~~
- ~~*Pediocactus paradinei* B. W. Benson–Paradine plains cactus~~
- ~~*Pediocactus peeblesianus* (Croizat) L. Benson var. *fickeiseniae* L. Benson~~
- ~~*Pediocactus peeblesianus* (Croizat) L. Benson var. *peeblesianus* Peebles' Navajo cactus, Navajo plains cactus~~
  ~~Syn.: *Navajoa peeblesiana* Croizat~~
- ~~*Pediocactus sileri* (Engelm.) L. Benson–Siler pincushion cactus~~
  ~~Syn.: *Utahia sileri* (Engelm.) Britt. & Rose~~

~~COCHLOSPERMACEAE Cochlospermum Family~~

- ~~*Amoreuxia gonzalezii* Sprague & Riley~~

~~CYPERACEAE Sedge Family~~

- ~~*Carex specuicola* J. T. Howell–Navajo sedge~~

~~FABACEAE Pea Family [=Leguminosae]~~

- ~~*Astragalus cremnophylax* Barneby var. *cremnophylax* Sentry milk vetch~~
- ~~*Astragalus holmgreniorum* Barneby–Holmgren milk-vetch~~
- ~~*Dalea tentaculoides* Gentry–Gentry indigo bush~~

~~LENNOACEAE Lennoa Family~~

- ~~*Pholisma arenarium* Nutt.–Sealy-stemmed sand plant~~
- ~~*Pholisma sonorae* (Torr. ex Gray) Yatskievych–Sandfood, sandroot~~
  - ~~Syn.: *Ammobroma sonorae* Torr. ex Gray~~

~~LILIACEAE Lily Family~~

~~*Allium gooddingii* Ownbey–Goodding's onion~~

~~ORCHIDACEAE Orchid Family~~

- ~~*Cypripedium calceolus* L. var. *pubescens* (Willd.) Correll–Yellow lady's slipper~~
- ~~*Hexalectris warnockii* Ames & Correll–Texas purple spike~~
- ~~*Spiranthes delitescens* C. Sheviak~~

~~POACEAE Grass Family [=Gramineae]~~

- ~~*Puccinellia parishii* A.S. Hitchc.–Parish alkali grass~~

~~POLYGONACEAE Buckwheat Family~~

- ~~*Rumex orthoneurus* Rech. f.~~

~~PSILOTACEAE Psilotum Family~~

- ~~*Psilotum nudum* (L.) Beauv. Bush Moss, Whisk Ferm~~

~~RANUNCULACEAE Buttercup Family~~

- ~~*Cimicifuga arizonica* Wats.–Arizona bugbane~~
- ~~*Clematis hirsutissima* Pursh var. *arizonica* (Heller) Erickson–Arizona leatherflower~~

~~ROSACEAE Rose Family~~

- ~~*Purshia subintegra* (Kearney) J. Hendrickson–Arizona cliffrose, Burro Creek cliffrose~~

  ~~Syn.: *Cowania subintegra* Kearney~~

~~SALICACEAE Willow Family~~

- ~~*Salix arizonica* Dorn–Arizona willow~~

~~SCROPHULARIACEAE Figwort Family~~

- ~~*Penstemon discolor* Keck–Variegated beardtongue~~

Amaryllidaceae Allium gooddingii - Goodding's onion

Apiaceae Eryngium sparganophyllum - Arizona eryngo

Apiaceae Lilaeopsis schaffneriana ssp. *recurva* - Cienega false rush, Huachuca water umbel

Apocynaceae Amsonia grandiflora - Arizona bluestar

Apocynaceae Amsonia kearneyana - Kearney's bluestar

Apocynaceae Asclepias welshii -Welsh's milkweed

Apocynaceae Cycladenia humilis var. *jonesii* - Jones' waxy dogbane

Apocynaceae Matelea tristiflora - Talayote

Asparagaceae Agave x arizonica - Arizona agave

Asparagaceae Agave delamateri - Tonto Basin agave

Asparagaceae Agave murpheyi - Hohokam agave

Asparagaceae Agave parviflora - Santa Cruz striped agave

Asparagaceae Agave phillipsiana Grand Canyon agave

Asparagaceae Agave sanpedroensis - San Pedro agave

Asparagaceae Agave schottii var. *treleasei* - Trelease agave

Asparagaceae Agave verdensis - Sacred Mountain agave

Asparagaceae Agave yavapaiensis - Page Springs agave

Asparagaceae Yucca kenabensis - Kanab yucca

Asteraceae Ericameria arizonica - Arizona heath-goldenrod

Asteraceae Erigeron lemmonii - Lemmon fleabane

Asteraceae Erigeron rhizomatus - Zuni fleabane

Asteraceae Packera franciscana - San Francisco Peaks groundsel

Asteraceae Pectis imberbis - Beardless chinchweed

Asteraceae Perityle spp. (except *Perityle emoryi*) - Rockdaisy

Asteraceae Senecio multidentatus var. *huachucanus* - Huachuca groundsel

Boraginaceae Oreocarya semiglabra - Smooth cryptantha

Boraginaceae Phacelia cronquistiana - Cronquist's phacelia

Cactaceae Carnegiea gigantea, crested form - Saguaro, "crested" or "fan-top"

Cactaceae Coryphantha recurvata - Golden-chested beehive cactus

Cactaceae Coryphantha robustispina ssp. *robustispina* - Scheer’s strong-spined cory cactus

Cactaceae Coryphantha robustispina ssp. *uncinata*

Cactaceae Cylindropuntia abyssi - Peach Springs cholla

Cactacieae Cylindropuntia x *campii* - Camp's cholla

Cactaceae Echinocactus horizonthalonius ssp. *nicholii* - Nichol’s Turk’s head cactus

Cactaceae Echinocereus arizonicus ssp. *arizonicus* - Arizona hedgehog cactus

Cactaceae Echinomastus erectocentrus ssp. *acunensis* - Acuna cactus

Cactaceae Escobaria robbinsorum - Cochise pincushion cactus

Cactaceae Pediocactus bradyi - Brady’s pincushion cactus

Cactaceae Pediocactus paradinei - Paradine plains cactus

Cactaceae Pediocactus peeblesianus - Peebles’ Navajo cactus, Navajo plains cactus

Cactaceae Pediocactus sileri - Siler pincushion cactus

Cactaceae Sclerocactus sileri - House Rock Fish-Hook Cactus

Caryophyllaceae Silene rectiramea - Grand Canyon campion

Cyperaceae Carex specuicola - Navajo sedge

Fabaceae Astragalus cremnophylax var. *cremnophylax* - Sentry milkvetch

Fabaceae Astragalus endopterus - Sandbar milkvetch

Fabaceae Astragalus holmgreniorum - Holmgren milkvetch

Fabaceae Dalea tentaculoides - Gentry indigo bush

Fabaceae Acmispon mearnsii var. equisolenus

Lamiaceae Trichostema micranthum - Small flower bluecurls

Lennoaceae Pholisma arenarium - Scaly-stemmed sand plant

Lennoaceae Pholisma sonorae - Sandfood, sandroot

Malvaceae Sphaeralcea gierischii - Gierisch's globemallow

Orchidaceae Cypripedium calceolus var. *pubescens* - Yellow lady's slipper

Orchidaceae Hexalectris parviflora

Orchidaceae Hexalectris warnockii - Texas purple spike

Orchidaceae Spiranthes delitescens - Canelo Hills ladies'-tresses

Orobanchaceae Castilleja mogollonica - Mogollon Indian-paintbrush

Papaveraceae Arctomecon californica - Las Vegas bearclaw-poppy

Plantaginaceae Penstemon discolor - Variegated beardtongue

Poaceae Puccinellia parishii - Parish alkali grass

Polemoniaceae Loeseliastrum franciscanum - Wupatki calico

Polygonaceae Eriogonum mortonianum - Fredonia buckwheat

Polygonaceae Rumex orthoneurus - Chiricahua Mountain wild dock

Psilotaceae Psilotum nudum - Whisk Fern, Skeleton fork fern

Ranunculaceae Cimicifuga arizonica - Arizona bugbane

Ranunculaceae Clematis hirsutissima var. *arizonica* - Arizona leatherflower

Rosaceae Potentilla arizonica - Garland Prairie Cinquefoil

Rosaceae Purshia x *subintegra* - Arizona cliffrose, Burro Creek cliffrose

Rosaceae Purshia pinkavae - Pinkava cliffrose

Salicaceae Salix arizonica - Arizona willow

Scrophulariaceae Buddleja sessiliflora - Rio Grande butterfly bush

B. Salvage restricted native plants as prescribed in A.R.S. § 3-903(B)(2) that require a permit issued pursuant to this Article, for removal. In addition to the plants listed under Agavaceae, Cactaceae, Liliaceae, and Orchidaceae, all other species in these families are salvage restricted protected native plants:

~~AGAVACEAE Agave Family~~

— ~~*Agave chrysantha* Peebles~~

— ~~*Agave deserti* Engelm. ssp. *simplex* Gentry–Desert agave~~

— ~~*Agave mckelveyana* Gentry~~

— ~~*Agave palmeri* Engelm.~~

— ~~*Agave parryi* Engelm. var. *couseii* (Engelm. ex Trel.) Kearney & Peebles~~

- *Agave parryi* Engelm. var. *huachucensis* (Baker) Little ex L. Benson
  Syn.: *Agave huachucensis* Baker
- *Agave parryi* Engelm. var. *parryi*
- *Agave schottii* Engelm. var. *schottii* – Shindigger
- *Agave toumeyana* Trel. ssp. *bella* (Breitung) Gentry
- *Agave toumeyana* Trel. ssp. *toumeyana*
- *Agave utahensis* Engelm. spp. *kaibabensis* (McKelvey) Gentry
  Syn.: *Agave kaibabensis* McKelvey
- *Agave utahensis* Engelm. var. *utahensis*
- *Yucca angustissima* Engelm. var. *angustissima*
- *Yucca angustissima* Engelm. var. *kanabensis* (McKelvey) Reveal
  Syn.: *Yucca kanabensis* McKelvey
- *Yucca arizonica* McKelvey
- *Yucca baccata* Torr. var. *baccata*–Banana yucca
- *Yucca baccata* Torr. var. *vespertina* McKelvey
- *Yucca baileyi* Woot. & Standl. var. *intermedia* (McKelvey) Reveal
  Syn.: *Yucca navajoa* Webber
- *Yucca brevifolia* Engelm. var. *brevifolia*–Joshua tree
- *Yucca brevifolia* Engelm. var. *jaegeriana* McKelvey
- *Yucca elata* Engelm. var. *elata*–Soaptree yucca, palmilla
- *Yucca elata* Engelm var. *utahensis* (McKelvey) Reveal—
  Syn.: *Yucca utahensis* McKelvey
- *Yucca elata* Engelm. var. *verdiensis* (McKelvey) Reveal
  Syn.: *Yucca verdiensis* McKelvey
- *Yucca harrimaniae* Trel.
- *Yucca schidigera* Roezl.–Mohave yucca, Spanish dagger
- *Yucca schottii* Engelm.–Hairy yucca
- *Yucca thornberi* McKelvey
- *Yucca whipplei* Torr. var. *whipplei*–Our Lord's candle
  Syn.: *Yucca newberryi* McKelvey

AMARYLLIDACEAE Amaryllis Family

Zephyranthes longifolia Hemsl.–Plains Rain Lily

ANACARDIACEAE Sumac Family

Rhus kearneyi Barkley–Kearney Sumac

ARECACEAE Palm Family [=Palmae]

- *Washingtonia filifera* (Linden ex Andre) H. Wendl–California fan palm

ASTERACEAE Sunflower Family [=Compositae]

- *Cirsium parryi* (Gray) Petrak ssp. *mogollonicum* Schaak
- *Cirsium virginensis* Welsh–Virgin thistle
- *Erigeron kuschei* Eastw.–Chiricahua fleabane
- *Erigeron piscaticus* Nesom–Fish Creek fleabane
- *Flaveria macdougalii* Theroux, Pinkava & Keil
- *Perityle ajoensis* Todson–Ajo rock daisy
- *Perityle cochisensis* (Niles) Powell–Chiricahua rock daisy
- *Senecio quaerens* Greene–Gila groundsel

BURSERACEAE Torch-Wood Family

- *Bursera microphylla* Gray–Elephant tree, torote

CACTACEAE Cactus Family

- *Carnegiea gigantea* (Engelm.) Britt. & Rose–Saguaro
  Syn.: *Cereus giganteus* Engelm.
- *Coryphantha missouriensis* (Sweet) Britt. & Rose
- *Coryphantha missouriensis* (Sweet) Britt. & Rose var. *marstonii* (Clover) L. Benson
- *Coryphantha scheeri* (Kuntze) L. Benson var. *valida* (Engelm.) L. Benson
- *Coryphantha strobiliformis* (Poselger) var. *orcuttii* (Rose) L. Benson
- *Coryphantha strobiliformis* (Poselger) var. *strobiliformis*
- *Coryphantha vivipara* (Nutt.) Britt. & Rose var. *alversonii* (Coult.) L. Benson
- *Coryphantha vivipara* (Nutt.) Britt. & Rose var. *arizonica* (Engelm.) W. T. Marshall
  Syn.: *Mammillaria arizonica* Engelm.
- *Coryphantha vivipara* (Nutt.) Britt. & Rose var. *bisbeeana* (Orcutt) L. Benson
- *Coryphantha vivipara* (Nutt.) Britt. & Rose var. *deserti* (Engelm.) W. T. Marshall
  Syn.: *Mammillaria chlorantha* Engelm.
- *Coryphantha vivipara* (Nutt.) Britt. & Rose var. *rosea* (Clokey) L. Benson
- *Echinocactus polycephalus* Engelm. & Bigel. var. *polycephalus*
- *Echinocactus polycephalus* Engelm. & Bigel. var. *xeranthemoides* Engelm. ex Coult.
  Syn.: *Echinocactus xeranthemoides* Engelm. ex Coult.
- *Echinocereus engelmannii* (Parry ex Engelm.) Lemaire var. *acicularis* L. Benson
- *Echinocereus engelmannii* (Parry ex Engelm.) Lemaire var. *armatus* L. Benson
- *Echinocereus engelmannii* (Parry ex Engelm.) Lemaire var. *chrysocentrus* L. Benson
- *Echinocereus engelmannii* (Parry ex. Engelm.) Lemaire var. *engelmannii*
- *Echinocereus engelmannii* (Parry) Lemaire var. *variegatus* (Engelm.) Engelm. ex Rümpler
- *Echinocereus fasciculatus* (Engelm. ex B. D. Jackson) L. Benson var. fasciculatus
  Syn.: *Echinocereus fendleri* (Engelm.) Rümpler var. *fasciculatus* (Engelm. ex B. D. Jackson) N. P. Taylor, *Echinocereus fendleri* (Engelm.) Rümpler var. *robusta* L. Benson; *Mammillaria fasciculata* Engelm.

— ~~*Echinocereus fasciculatus* (Engelm. ex B. D. Jackson) L. Benson var. *bonkerae* (Thornber & Bonker) L. Benson.~~

~~Syn.: *Echinocereus boyce-thompsonii* Orcutt var. *bonkerae* Peebles; *Echinocereus fendleri* (Engelm.) Rümpler var. *bonkerae* (Thornber & Bonker) L. Benson~~

— ~~*Echinocereus fasciculatus* (Engelm. ex B. D. Jackson) L. Benson var. *boyce-thompsonii* (Orcutt) L. Benson~~

~~Syn.: *Echinocereus boyce-thompsonii* Orcutt~~

— ~~*Echinocereus fendleri* (Engelm.) Rümpler var. *boyce-thompsonii* (Orcutt) L. Benson~~

— ~~*Echinocereus fendleri* (Engelm.) Rümpler var. *fendleri*~~

— ~~*Echinocereus fendleri* (Engelm.) Rümpler var. *rectispinus* (Peebles) L. Benson~~

— ~~*Echinocereus ledingii* Peebles~~

— ~~*Echinocereus nicholii* (L. Benson) Parfitt.~~

~~Syn.: *Echinocereus engelmannii* (Parry ex Engelm.) Lemaire var. *nicholii* L. Benson~~

— ~~*Echinocereus pectinatus* (Scheidw.) Engelm. var. *dasyacanthus* (Engelm.) N. P. Taylor~~

~~Syn.: *Echinocereus pectinatus* (Scheidw.) Engelm. var. *neomexicanus* (Coult.) L. Benson~~

— ~~*Echinocereus polyacanthus* Engelm. (1848) var. *polyacanthus*~~

— ~~*Echinocereus pseudopectinatus* (N. P. Taylor) N. P. Taylor—~~

~~Syn.: *Echinocereus bristolii* W. T. Marshall var. *pseudopectinatus* N. P. Taylor, *Echinocereus pectinatus* (Scheidw.) Engelm. var. *pectinatus sensu* Kearney and Peebles, Arizona Flora, and L. Benson, The Cacti of Arizona and The Cacti of the United States and Canada.~~

— ~~*Echinocereus rigidissimus* (Engelm.) Hort. F. A. Haage.~~

~~Syn.: *Echinocereus pectinatus* (Scheidw.) Engelm. var. *rigidissimus* (Engelm.) Engelm. ex Rümpler–Rainbow cactus~~

— ~~*Echinocereus triglochidiatus* Engelm. var. *gonacanthus* (Engelm. & Bigel.) Boiss.~~

— ~~*Echinocereus triglochidiatus* Engelm. var. *melanacanthus* (Engelm.) L. Benson~~

~~Syn.: *Mammillaria aggregata* Engelm.~~

— ~~*Echinocereus triglochidiatus* Engelm. var. *mojavensis* (Engelm.) L. Benson~~

— ~~*Echinocereus triglochidiatus* Engelm. var. *neomexicanus* (Standl.) Standl. ex W. T. Marshall.~~

~~Syn.: *Echinocereus triglochidiatus* Engelm. var. *polyacanthus* (Engelm. 1859 non 1848) L. Benson~~

— ~~*Echinocereus triglochidiatus* Engelm. var. *triglochidiatus*~~

— ~~*Echinomastus erectocentrus* (Coult.) Britt. & Rose var. *erectocentrus*~~

~~Syn.: *Neolloydia erectocentra* (Coult.) L. Benson var. *erectocentra*~~

— ~~*Echinomastus intertextus* (Engelm.) Britt. & Rose Syn.: *Neolloydia intertexta* (Engelg.) L. Benson~~

— ~~*Echinomastus johnsonii* (Parry) Baxter–Beehive cactus~~

~~Syn.: *Neolloydia johnsonii* (Parry) L. Benson~~

— ~~*Epithelantha micromeris* (Engelm.) Weber ex Britt. & Rose~~

— ~~*Ferocactus cylindraceus* (Engelm.) Orcutt var. *cylindraceus*–Barrel cactus~~

~~Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *acanthodes*~~

— ~~*Ferocactus cylindraceus* (Engelm.) Orcutt var. *eastwoodiae* (Engelm.) N. P. Taylor~~

~~Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *eastwoodiae* L. Benson; Ferocactus eastwoodiae (L. Benson) L. Benson~~

— ~~*Ferocactus cylindraceus* (Engelm.) Orcutt. var. *lecontei* (Engelm.) H. Bravo~~

~~Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *leconti* (Engelm.) Lindsay; *Ferocactus lecontei* (Engelm.) Britt. & Rose~~

— ~~*Ferocactus emoryi* (Engelm.) Orcutt–Barrel cactus~~

~~Syn.: *Ferocactus covillei* Britt. & Rose~~

— ~~*Ferocactus wislizenii* (Engelm.) Britt. & Rose–Barrel cactus~~

— ~~*Lophocereus schottii* (Engelm.) Britt. & Rose–Senita~~

— ~~*Mammillaria grahamii* Engelm. var. *grahamii*~~

— ~~*Mammillaria grahamii* Engelm. var. *oliviae* (Orcutt) L. Benson~~

~~Syn.: *Mammillaria oliviae* Orcutt~~

— ~~*Mammillaria heyderi* Mühlenpf. var. *heyderi*~~

~~Syn.: *Mammillaria gummifera* Engelm. var. *applanata* (Engelm.) L. Benson~~

— ~~*Mammillaria heyderi* Mühlenpf. var. *macdougalii* (Rose) L. Benson~~

~~Syn.: *Mammillaria gummifera* Engelm. var. *macdougalii* (Rose) L. Benson; *Mammillaria macdougalii* Rose~~

— ~~*Mammillaria heyderi* Mühlenpf. var. *meiacantha* (Engelm.) L. Benson~~

~~Syn.: *Mammillaria gummifera* Engelm. var. *meiacantha* (Engelm.) L. Benson~~

— ~~*Mammillaria lasiacantha* Engelm.~~

— ~~*Mammillaria mainiae* K. Brand.~~

— ~~*Mammillaria microcarpa* Engelm.~~

— ~~*Mammillaria tetrancistra* Engelm.~~

— ~~*Mammillaria thornberi* Orcutt~~

— ~~*Mammillaria viridiflora* (Britt. & Rose) Bödeker. Syn.: *Mammillaria orestra* L. Benson~~

— ~~*Mammillaria wrightii* Engelm. var. *wilcoxii* (Toumey ex K. Schumann) W. T. Marshall~~

~~Syn.: *Mammillaria wilcoxii* Toumey~~

— ~~*Mammillaria wrightii* Engelm. var. *wrightii*~~

— ~~*Opuntia acanthocarpa* Engelm. & Bigel. var. *acanthocarpa*–Buckhorn cholla~~

— ~~*Opuntia acanthocarpa* Engelm. & Bigel. var. *coloradensis* L. Benson~~

— ~~*Opuntia acanthocarpa* Engelm. & Bigel. var. *major* L. Benson~~

~~Syn.: *Opuntia acanthocarpa* Engelm. & Bigel var. *ramosa* Peebles~~

— ~~*Opuntia acanthocarpa* Engelm. & Bigel. var. *thornberi* (Thornber & Bonker) L. Benson~~

~~Syn.: *Opuntia thornberi* Thornber & Bonker~~

— ~~*Opuntia arbuscula* Engelm.–Pencil cholla~~

— ~~*Opuntia basilaris* Engelm. & Bigel. var. *aurea* (Baxter) W. T. Marshall–Yellow beavertail~~

~~Syn.: *Opuntia aurea* Baxter~~

— ~~*Opuntia basilaris* Engelm. & Bigel. var. *basilaris*–Beavertail cactus~~

— ~~*Opuntia basilaris* Engelm. & Bigel. var. *longiareolata* (Clover & Jotter) L. Benson~~

— ~~*Opuntia basilaris* Engelm. & Bigel. var. *treleasei* (Coult.) Toumey~~

— ~~*Opuntia bigelovii* Engelm.–Teddy-bear cholla~~

— ~~*Opuntia campii* ined.~~

— ~~*Opuntia canada* Griffiths (*O. phaeacantha* Engelm. var. *laevis X major* and *O. gilvescens* Griffiths).~~

— ~~*Opuntia chlorotica* Engelm. & Bigel.–Pancake prickly-pear~~

— ~~*Opuntia clavata* Engelm.–Club cholla~~

— ~~*Opuntia curvospina* Griffiths~~

— ~~*Opuntia echinocarpa* Engelm. & Bigel–Silver cholla~~

— ~~*Opuntia emoryi* Engelm.–Devil cholla~~

~~Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *stanlyi*~~

— ~~*Opuntia engelmannii* Salm-Dyck ex Engelm. var. *engelmannii*–Engelmann's prickly-pear~~

~~Syn.: *Opuntia phaeacantha* Engelm. var. *discata* (Griffiths) Benson & Walkington~~

— ~~*Opuntia engelmannii* Salm-Dyck ex Engelm. var. *flavospina* (L.Benson) Parfitt & Pinkava~~

~~Syn.: *Opuntia phaeacantha* Engelm. var. *flavispina* L. Benson~~

— ~~*Opuntia erinacea* Engelm. & Bigel. var. *erinacea*–Mohave prickly-pear~~

— ~~*Opuntia erinacea* Engelm. & Bigel. var. *hystricina* (Engelm. & Bigel.) L. Benson~~

~~Syn.: *Opuntia hystricina* Engelm. & Bigel.~~

— ~~*Opuntia erinacea* Engelm. & Bigel. var. *ursina* (Weber) Parish–Grizzly bear prickly-pear~~

~~Syn.: *Opuntia ursina* Weber~~

— ~~*Opuntia erinacea* Engelm. & Bigel. var. *utahensis* (Engelm.) L. Benson~~

~~Syn.: *Opuntia rhodantha* Schum.~~

— ~~*Opuntia fragilis* Nutt. var. *brachyarthra* (Engelm. & Bigel.) Coult.~~

— ~~*Opuntia fragilis* Nutt. var. *fragilis*–Little prickly-pear~~

— ~~*Opuntia fulgida* Engelm. var. *fulgida*–Jumping chain-fruit cholla~~

— ~~*Opuntia fulgida* Engelm. var. *mammillata* (Schott) Coult.~~

— ~~*Opuntia imbricata* (Haw.) DC.–Tree cholla~~

— ~~*Opuntia X kelvinensis* V. & K. Grant pro sp.~~

~~Syn.:~~— ~~*Opuntia kelvinensis* V. & K. Grant~~

— ~~*Opuntia kleiniae* DC. var. *tetracantha* (Toumey) W. T. Marshall~~

~~Syn.: *Opuntia tetrancistra* Toumey~~

— ~~*Opuntia kunzei* Rose.~~

~~Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *kunzei* (Rose) L. Benson; *Opuntia kunzei* Rose var. *wrightiana* (E. M. Baxter) Peebles; *Opuntia wrightiana* E. M. Baxter~~

— ~~*Opuntia leptocaulis* DC.–Desert Christmas cactus, Pencil cholla~~

— ~~*Opuntia littoralis* (Engelm.) Cockl. var. *vaseyi* (Coult.) Benson & Walkington~~

— ~~*Opuntia macrocentra* Engelm.–Purple prickly-pear~~

~~Syn.: *Opuntia violacea* Engelm. ex B. D. Jackson var. *macrocentra* (Engelm.) L. Benson; *Opuntia violacea* Engelm. ex B. D. Jackson var. *violacea*~~

— ~~*Opuntia macrorhiza* Engelm. var. *macrorhiza*–Plains prickly-pear~~

~~Syn.: *Opuntia plumbea* Rose~~

- ~~*Opuntia macrorhiza* Engelm. var. *pottsii* (Salm-Dyck) L. Benson~~
- ~~*Opuntia martiniana* (L. Benson) Parfitt~~

  ~~Syn.: *Opuntia littoralis* (Engelm.) Cockerell var. *martiniana* (L. Benson) L. Benson; *Opuntia macrocentra* Engelm. var. *martiniana L. Benson*~~
- ~~*Opuntia nicholii* L. Benson–Navajo Bridge prickly-pear~~
- ~~*Opuntia parishii* Orcutt.~~

  ~~Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *parishii* (Orcutt) L. Benson~~
- ~~*Opuntia phaeacantha* Engelm. var. *laevis* (Coult.) L. Benson~~

  ~~Syn.: *Opuntia laevis* Coult.~~
- ~~*Opuntia phaeacantha* Engelm. var. *major* Engelm.~~
- ~~*Opuntia phaeacantha* Engelm. var. *phaeacantha*~~
- ~~*Opuntia phaeacantha* Engelm. var. *superbospina* (Griffiths) L. Benson~~
- ~~*Opuntia polyacantha* Haw. var. *juniperina* (Engelm.) L. Benson~~
- ~~*Opuntia polyacantha* Haw. var. *rufispina* (Engelm.) L. Benson~~
- ~~*Opuntia polyacantha* Haw. var. *trichophora* (Engelm. & Bigel.) L. Benson~~
- ~~*Opuntia pulchella* Engelm.–Sand cholla~~
- ~~*Opuntia ramosissima* Engelm.–Diamond cholla~~
- ~~*Opuntia santa-rita* (Griffiths & Hare) Rose–Santa Rita prickly-pear~~

  ~~Syn.: *Opuntia violacea* Engelm. ex B. D. Jackson var. *santa-rita* (Griffiths & Hare) L. Benson~~
- ~~*Opuntia spinosior* (Engelm.) Toumey–Cane cholla~~
- ~~*Opuntia versicolor* Engelm.–Staghorn cholla~~
- ~~*Opuntia vivipara* Engelm~~
- ~~*Opuntia whipplei* Engelm. & Bigel. var. *multigeniculata* (Clokey) L. Benson~~
- ~~*Opuntia whipplei* Engelm. & Bigel. var. *whipplei*–Whipple cholla~~
- ~~*Opuntia wigginsii* L. Benson~~
- ~~*Pediocactus papyracanthus* (Engelm.) L. Benson Grama grass cactus~~

  ~~Syn.: *Toumeya papyracanthus* (Engelm.) Britt. & Rose~~
- ~~*Pediocactus simpsonii* (Engelm.) Britt & Rose var. *simpsonii*~~
- ~~*Peniocereus greggii* (Engelm.) Britt. & Rose var. *greggii*–Night-blooming cereus~~

  ~~Syn.: *Cereus greggii* Engelm.~~
- ~~*Peniocereus greggii* (Engelm.) Britt & Rose var. *transmontanus*–Queen-of-the-Night~~
- ~~*Peniocereus striatus* (Brandegee) Buxbaum.~~

  ~~Syn.: *Neoevansia striata* (Brandegee) Sanchez-Mejorada; *Cereus striatus* Brandegee; *Wilcoxia diguetii* (Webber) Peebles~~
- ~~*Sclerocactus parviflorus* Clover & Jotter var. *intermedius* (Peebles) Woodruff & L. Benson~~

  ~~Syn.: *Sclerocactus intermedius* Peebles~~
- ~~*Sclerocactus parviflorus* Clover & Jotter var. *parviflorus*~~

  ~~Syn.: *Sclerocactus whipplei* (Engelm. & Bigel.) Britt. & Rose var. *roseus* (Clover) L. Benson~~
- ~~*Sclerocactus pubispinus* (Engelm.) L. Peebles~~

- ~~*Sclerocactus spinosior* (Engelm.) Woodruff & L. Benson~~

  ~~Syn.: *Sclerocactus pubispinus* (Engelm.) L. Benson var. *sileri* L. Benson~~

- ~~*Sclerocactus whipplei* (Engelm. & Bigel.) Britt. & Rose~~

- ~~*Stenocereus thurberi* (Engelm.) F. Buxbaum–Organ pipe cactus~~

  ~~Syn.: *Cereus thurberi* Engelm.; *Lemaireocereus thurberi* (Engelm.) Britt. & Rose~~

~~CAMPANULACEAE Bellflower Family~~

- ~~*Lobelia cardinalis* L. ssp. *graminea* (Lam.) McVaugh–Cardinal flower~~

- ~~*Lobelia fenestralis* Cav.–Leafy lobelia~~

- ~~*Lobelia laxiflora* H. B. K. var. *angustifolia* A. DC.~~

~~CAPPARACEAE Cappar Family [=Capparidaceae]~~

- ~~*Cleome multicaulis* DC.–Playa spiderflower~~

~~CHENOPODIACEAE Goosefoot Family~~

- ~~*Atriplex hymenelytra* (Torr.) Wats.~~

~~CRASSULACEAE Stonecrop Family~~

- ~~*Dudleya arizonica* (Nutt.) Britt. & Rose~~

  ~~Syn.: *Echeveria pulverulenta* Nutt. ssp. *arizonica* (Rose) Clokey~~

- ~~*Dudleya saxosa* (M.E. Jones) Britt. & Rose ssp. *collomiae* (Rose) Moran~~

  ~~Syn.: *Echeveria collomiae* (Rose) Kearney & Peebles~~

- ~~*Graptopetalum bartramii* Rose~~

  ~~Syn.:– *Echevaria bartramii* (Rose) K. & P.~~

- ~~*Graptopetalum bartramii* Rose–Bartram's stonecrop, Bartram's live-forever~~

  ~~Syn.: *Echeveria bartramii* (Rose) Kearney & Peebles~~

- ~~*Graptopetalum rusbyi* (Greene) Rose~~

  ~~Syn.: *Echeveria rusbyi* (Greene) Nels. & Macbr.~~

- ~~*Sedum cockerellii* Britt.~~

- ~~*Sedum griffithsii* Rose~~

- ~~*Sedum lanceolatum* Torr.~~

  ~~Syn.: *Sedum stenopetalum* Pursh~~

- ~~*Sedum rhodanthum* Gray~~

- ~~*Sedum stelliforme* Wats.~~

~~CROSSOSOMATACEAE Crossosoma Family~~

- ~~*Apacheria chiricahuensis* C. T. Mason–Chiricahua rock flower~~

~~CUCURBITACEAE Gourd Family~~

- ~~*Tumamoca macdougalii* Rose–Tumamoc globeberry~~

~~EUPHORBIACEAE Spurge Family~~

- ~~*Euphorbia plummerae* Wats.–Woodland spurge~~

- ~~*Sapium biloculare* (Wats.) Pax–Mexican jumping-bean~~

FABACEAE Pea Family [=Leguminosae]

- *Astragalus corbrensis* Gray var. *maguirei* Kearney
- *Astragalus cremnophylax* Barneby var. *myriorraphis* Barneby–Cliff milk-vetch
- *Astragalus hypoxylus* Wats.–Huachuca milk-vetch
- *Astragalus nutriosensis* Sanderson–Nutrioso milk-vetch
- *Astragalus xiphoides* (Barneby) Barneby–Gladiator milk-vetch
- *Cercis occidentalis* Torr.–California redbud
- *Errazurizia rotundata* (Woot.) Barneby
  Syn.: *Parryella rotundata* Woot.
- *Lysiloma microphylla* Benth. var. *thornberi* (Britt. & Rose) Isely–Feather bush
  Syn.: *Lysiloma thornberi* Britt. & Rose
- *Phaseolus supinus* Wiggins & Rollins

FOUQUIERIACEAE Ocotillo Family

- *Fouquieria splendens* Engelm.–Ocotillo, coach-whip, monkey-tail

GENTIANACEAE Gentian Family

- *Gentianella wislizenii* (Engelm.) J. Gillett
  Syn.: *Gentiana wislizenii* Engelm.

LAMIACEAE Mint Family

- *Hedeoma diffusum* Green–Flagstaff pennyroyal
- *Salvia dorrii* ssp. *mearnsii*
- *Trichostema micranthum* Gray

LILIACEAE Lily Family

- *Allium acuminatum* Hook.
- *Allium bigelovii* Wats.
- *Allium biseptrum* Wats. var. *palmeri* (Wats.) Cronq.
  Syn.: *Allium palmeri* Wats.
- *Allium cernuum* Roth. var. *neomexicanum* (Rydb.) Macbr.–Nodding onion
- *Allium cernuum* Roth. var. *obtusum* Ckll.
- *Allium geyeri* Wats. var. *geyeri*
- *Allium geyeri* Wats. var. *tenerum* Jones
- *Allium kunthii* Don
- *Allium macropetalum* Rydb.
- *Allium nevadense* Wats. var. *cristatum* (Wats.) Ownbey
- *Allium nevadense* Wats. var. *nevadense*
- *Allium parishii* Wats.
- *Allium plummerae* Wats.

- ~~*Allium rhizomatum* Woot. & Standl. Incl.: *Allium glandulosum* Link & Otto *sensu* Kearney & Peebles~~
- ~~*Androstephium breviflorum* Wats.–Funnel-lily~~
- ~~*Calochortus ambiguus* (Jones) Ownbey~~
- ~~*Calochortus aureus* Wats.~~

  ~~Syn.: *Calochortus nuttallii* Torr. & Gray var. *aureus* (Wats.) Ownbey~~
- ~~*Calochortus flexuosus* Wats.–Straggling mariposa~~
- ~~*Calochortus gunnisonii* Wats.~~
- ~~*Calochortus kennedyi* Porter var. *kennedyi*–Desert mariposa~~
- ~~*Calochortus kennedyi* Porter var. *munzii* Jeps.~~
- ~~*Dichelostemma pulchellum* (Salisb) Heller var. *pauciflorum* (Torr.) Hoover~~
- ~~*Disporum trachycarpum* (Wats.) Benth. & Hook. var. *subglabrum* Kelso~~
- ~~*Disporum trachycarpum* (Wats.) Benth. & Hook. var. *trachycarpum*~~
- ~~*Echeandia flavescens* (Schultes & Schultes) Cruden~~

  ~~Syn.: *Anthericum torreyi* Baker~~
- ~~*Eremocrinum albomarginatum* Jones~~
- ~~*Fritillaria atropurpurea* Nutt.~~
- ~~*Hesperocallis undulata* Gray–Ajo lily~~
- ~~*Lilium parryi* Wats.–Lemon lily~~
- ~~*Lilium umbellatum* Pursh~~
- ~~*Maianthemum racemosum* (L.) Link. ssp. *amplexicaule* (Nutt.) LaFrankie~~

  ~~Syn.: *Smilacina racemosa* (L.) Desf. var. *amplexicaulis* (Nutt.) Wats.~~
- ~~*Maianthemum racemosum* (L.) Link ssp. *racemosum*–False Solomon's seal~~

  ~~Syn.: *Smilacina racemosa* (L.) Desf. var. *racemosa*; *Smilacina racemosa* (L.) Desf. var. *cylindrata* Fern.~~
- ~~*Maianthemum stellatum* (L.) Link~~

  ~~Syn.: *Smilacina stellata* (L.) Desf.–Starflower~~
- ~~*Milla biflora* Cav.–Mexican star~~
- ~~*Nothoscordum texanum* Jones~~
- ~~*Polygonatum cobrense* (Woot. & Standl.) Gates~~
- ~~*Streptopus amplexifolius* (L.) DC.–Twisted stalk~~
- ~~*Triteleia lemmonae* (Wats.) Greene~~
- ~~*Triteleiopsis palmeri* (Wats.) Hoover~~
- ~~*Veratrum californicum* Durand.–False hellebore~~
- ~~*Zephyranthes longifolia* Hemsl.–Plains rain lily~~
- ~~*Zigadenus elegans* Pursh–White camas, alkali-grass~~
- ~~*Zigadenus paniculatus* (Nutt.) Wats.–Sand-corn~~
- ~~*Zigadenus virescens* (H. B. K.) Macbr.~~

~~MALVACEAE Mallow Family~~

- ~~*Abutilon parishii* Wats.–Tucson Indian mallow~~
- ~~*Abutilon thurberi* Gray–Baboquivari Indian mallow~~

- ~~NOLINACEAE Nolina~~
  - ~~*Dasylirion wheeleri* Wats.–Sotol, desert spoon~~
  - ~~*Nolina bigelovii* (Torr.)Wats.–Bigelow's nolina~~
  - ~~*Nolina microcarpa* Wats.–Beargrass, sacahuista~~
  - ~~*Nolina parryi* Wats.–Parry's nolina~~
  - ~~*Nolina texana* Wats. var. *compacta* (Trel.) Johnst.– Bunchgrass~~

~~ONAGRACEAE Evening Primrose Family~~

- ~~*Camissonia exilis* (Raven) Raven~~

~~ORCHIDACEAE Orchid Family~~

- ~~*Calypso bulbosa* (L.) Oakes var. *americana* (R. Br.) Luer~~
- ~~*Coeloglossum viride* (L.) Hartmann var. *virescens* (Muhl.) Luer~~
  ~~Syn.: *Habenaria viridis* (L.) R. Br. var. *bracteata* (Muhl.) Gray~~
- ~~*Corallorhiza maculata* Raf.–Spotted coral root~~
- ~~*Corallorhiza striata* Lindl.–Striped coral root~~
- ~~*Corallorhiza wisteriana* Conrad–Spring coral root~~
- ~~*Epipactis gigantea* Douglas ex Hook.–Giant helleborine~~
- ~~*Goodyera oblongifolia* Raf.~~
- ~~*Goodyera repens* (L.) R. Br.~~
- ~~*Hexalectris spicata* (Walt.) Barnhart–Crested coral root~~
- ~~*Listera convallarioides* (Swartz) Nutt.–Broad-leaved twayblade~~
- ~~*Malaxis corymbosa* (S. Wats.) Kuntze~~
- ~~*Malaxis ehrenbergii* (Reichb. f.) Kuntze~~
- ~~*Malaxis macrostachya* (Lexarza) Kuntze–Mountain malaxia~~
  ~~Syn.: *Malaxis soulei* L. O. Williams~~
- ~~*Malaxis tenuis* (S. Wats.) Ames~~
- ~~*Platanthera hyperborea* (L.) Lindley var. *gracilis* (Lindley) Luer~~
  - ~~Syn.: *Habenaria sparsiflora* Wats. var. *laxiflora* (Rydb.) Correll~~
- ~~*Platanthera hyperborea* (L.) Lindley var. *hyperborea*–Northern green orchid~~
  ~~Syn.: *Habenaria hyperborea* (L.) R. Br.~~
- ~~*Platanthera limosa* Lindl.–Thurber's bog orchid~~
  ~~Syn.: *Habenaria limosa* (Lindley) Hemsley~~
- ~~*Platanthera sparsiflora* (Wats.) Schlechter var. *ensifolia* (Rydb.) Luer~~
- ~~*Platanthera sparsiflora* (Wats.) var. *laxiflora* (Rydb.) Correll~~
- ~~*Platanthera sparsiflora* (Wats.) Schlechter var. *sparsiflora*–Sparsely-flowered bog orchid~~
  ~~Syn.: *Habenaria sparsiflora* Wats.~~

  - ~~*Platanthera stricta* Lindl.–Slender bog orchid~~

    ~~Syn.: *Habenaria saccata* Greene; *Platanthera saccata* (Greene) Hulten~~

  - ~~*Platanthera viridis* (L.) R. Br. var. *bracteata* (Muhl.) Gray–Long-bracted habenaria~~
  - ~~*Spiranthes michaucana* (La Llave & Lex.) Hemsl.~~
  - ~~*Spiranthes parasitica* A. Rich. & Gal.~~
  - ~~*Spiranthes romanzoffiana* Cham.–Hooded ladies tresses~~
- ~~PAPAVERACEAE Poppy Family~~
  - ~~*Arctomecon californica* Torr. & Frém.–Golden-bear poppy, Yellow-flowered desert poppy~~

~~PINACEAE Pine Family~~

  - ~~*Pinus aristata* Engelm.–Bristlecone pine~~

~~POLYGONACEAE Buckwheat Family~~

  - ~~*Eriogonum apachense* Reveal~~
  - ~~*Eriogonum capillare* Small~~
  - ~~*Eriogonum mortonianum* Reveal–Morton's buckwheat~~
  - ~~*Eriogonum ripleyi* J. T. Howell–Ripley's wild buckwheat, Frazier's Well buckwheat~~
  - ~~*Eriogonum thompsonae* Wats. var. *atwoodii* Reveal–Atwood's buckwheat~~

~~PORTULACEAE Purslane Family~~

  - ~~*Talinum humile* Greene–Pinos Altos flame flower~~
  - ~~*Talinum marginatum* Greene~~
  - ~~*Talinum validulum* Greene–Tusayan flame flower~~

~~PRIMULACEAE Primrose Family~~

  - ~~*Dodecatheon alpinum* (Gray) Greene ssp. *majus* H. J. Thompson~~
  - ~~*Dodecatheon dentatum* Hook. ssp. *ellisiae* (Standl.) H. J. Thompson~~
  - ~~*Dodecatheon pulchellum* (Raf.) Merrill~~
  - ~~*Primula hunnewellii* Fern.~~
  - ~~*Primula rusbyi* Greene~~
  - ~~*Primula specuicola* Rydb.~~

~~RANUNCULACEAE Buttercup Family~~

  - ~~*Aquilegia caerulea* James ssp. *pinetorum* (Tidest.) Payson–Rocky Mountain Columbine~~
  - ~~*Aquilegia chrysantha* Gray~~
  - ~~*Aquilegia desertorum* (Jones) Ckll.–Desert columbine, Mogollon columbine~~
  - ~~*Aquilegia elegantula* Greene~~
  - ~~*Aquilegia longissima* Gray–Long Spur Columbine~~
  - ~~*Aquilegia micrantha* Eastw.~~
  - ~~*Aquilegia triternata* Payson~~

~~ROSACEAE Rose Family~~

- ~~*Rosa stellata* Woot. ssp. *abyssa* A. Phillips Grand Canyon rose~~
- ~~*Vauquelinia californica* (Torr.) Sarg. ssp. *pauciflora* (Standl.) Hess & Henrickson-Few-flowered Arizona rosewood~~

~~SCROPHULARIACEAE Figwort Family~~

- ~~*Castilleja mogollonica* Pennell~~
- ~~*Penstemon albomarginatus* Jones~~
- ~~*Penstemon bicolor* (Brandeg.) Clokey & Keck ssp. *roseus* Clokey & Keck~~
- ~~*Penstemon clutei* A. Nels.~~
- ~~*Penstemon distans* N. Holmgren-Mt. Trumbull beardtongue~~
- ~~*Penstemon linarioides* spp. maguirei~~

~~SIMAROUBACEAE Simarouba Family~~

- ~~*Castela emoryi* (Gray) Moran & Felger-Crucifixion thorn~~
- ~~Syn.: *Holacantha emoryi* Gray~~

~~STERCULIACEAE Cacao Family~~

- ~~*Fremontodendron californicum* (Torr.) Coville-Flannel bush~~

Amaranthaceae Atriplex hymenelytra -Desert-holly

Amaryllidaceae Allium spp. that are not listed in Appendix A.(A)- Wild onion

Amaryllidaceae Habranthus longifolius - Plains Rain Lily

Amaryllidaceae Nothoscordum bivalve - Crowpoison

Anacardiaceae Rhus kearneyi ssp. *kearneyi* - Kearney Sumac

Apocynaceae Amsonia peeblesii - Peeble's Bluestar

Arecaceae Washingtonia filifera - California fan palm

Asparagaceae Agave spp. that are not listed in Appendix A.(A) - Agave, century plant

Asparagaceae Androstephium breviflorum - Funnel-lily

Asparagaceae Dasylirion wheeleri - Sotol, desert spoon

Asparagaceae Echeandia flavescens - Amberlily

Asparagaceae Eremocrinum albomarginatum - Lonely-lily

Asparagaceae Hesperocallis undulata - Ajo-lily

Asparagaceae Hesperoyucca newberryi - Newberry's-yucca

Asparagaceae Milla biflora - Mexican star

Asparagaceae Nolina spp. - Beargrass

Asparagaceae Polygonatum cobrense

Asparagaceae Triteleia lemmoniae - Oak Creek Triplet-lily

Asparagaceae Triteleiopsis palmeri - Palmer's Blue sand lily

Asparagaceae Yucca spp. that are not listed in Appendix A.(A) - Narrow-leaf yucca

Asteracea Cirsium virginensis - Virgin thistle

Asteraceae Erigeron anchana - Sierra Ancha fleabane

Asteraceae Erigeron heliographis - Heliograph Peak fleabane

Asteraceae Erigeron hodgsoniae - Hodgson's fleabane

Asteraceae Erigeron piscaticus - Fish Creek fleabane

Asteraceae Erigeron pringlei - Pringle's fleabane

Asteraceae Hymenoxys ambigens - Pinaleno Mountain Rubberweed

Asteraceae Perityle spp. except *emoryii* - Ajo rock daisy

Asteraceae Senecio quaerens - Gila groundsel

Asteraceae Tetraneuris verdiensis - Verde Valley four-nerved daisy

Boraginaceae Mertansia macdougalii - Macdougal's bluebells

Boraginaceae Phacelia sonoitensis - Sonoita Creek scorpionweed

Brassicaceae Draba asprella - Rough Whitlow-grass

Burseraceae Bursera microphylla - Elephant tree, torote

Cactaceae Carnegiea gigantea - Saguaro

Cactaceae Cochiemia spp. Biznaguita

Cactaceae Cylindropuntia spp. except listed in A - Cholla

Cactaceae Echinocereus spp. emoryii - Hedgehogs, claret-cup hedgehogs

Cactaceae Echinomastus spp. that are not listed in Appendix A.(A) - Fishhook cactus

Cactaceae Epithelantha micromeris - Pingpong ball cactus

Cactaceae Escobaria spp. that are not listed in Appendix A.(A) - Foxtail cactus

Cactaceae Ferocactus spp. - Barrel cactus, biznaga

Cactaceae Grusonia spp. - Devil-cholla

Cactaceae Homalocephala polycephala - Many-headed barrel cactus

Cactaceae Lophocereus schottii - Senita

Cactaceae Mammillaria heyderi - Heyder's pincushion cactus

Cactaceae Opuntia spp. - Prickly-pear

Cactaceae Pediocactus spp. except listed in A - Pincushion cactus, pediocactus

Cactaceae Peniocereus spp. - Queen-of-the-night cactus

Cactaceae Sclerocactus spp. except listed in A - Fishhook cactus

Cactaceae Stenocereus thurberi - Organpipe cactus

Campanulaceae Lobelia fenestralis - Fringeleaf lobelia

Campanulaceae Lobelia laxiflora - Sierra Madre lobelia

Caryophyllaceae Eremogone aberrans - Mt. Dellenbaugh Matted Sandwort

Cochlospermaceae Cochlospermum spp. - Saiya

Crassulaceae Dudleya spp. - Live-forever, echeveria

Crassulaceae Graptopetalum spp. - Leather-petals

Crassulaceae Sedum spp. - Stonecrop

Crossosomataceae Apacheria chiricauhensis - Apache-bush

Cucurbitaceae Tumamoca mcdougalii - Tumamoc globeberry

Euphorbiaceae Euphorbia aaron-rossii - Marble Canyon spurge

Euphorbiaceae Euphorbia plummerae - Huachuca Mountain spurge

Euphorbiaceae Pleradenophora bilocularis - Jumping Bean (es: hierba de la flecha)

Fabaceae Astragalus cobrensis var. *maguirei* - Maguire's milkvetch

Fabaceae Astragalus cremnophylax - Sentry milkvetch

Fabaceae Astragalus hypoxylus - Huachuca Mountain milkvetch

Fabaceae Astragalus lentiginosus var. *maricopae* - Maricopa milkvetch

Fabaceae Astragalus nutriosensis - Apache milkvetch

Fabaceae Astragalus xiphoides - Gladiator milkvetch

Fabaceae Cercis orbiculata - California redbud

Fabaceae Dermatophyllum arizonicum - Arizona Western mountain-laurel

Fabaceae Errazurizia rotundata - Roundleaf dunebroom

Fabaceae Olneya tesota - Ironwood, palo fierro

Fabaceae Pediomelum pauperitense

Fabaceae Phaseolus supinus - Supine bean

Fouqueriiaceae Fouquieria splendens - Ocotillo

Gentianaceae Gentianella wislizenii - Chiricahua Mountain dwarf gentian

Lamiaceae Hedeoma diffusa - Flagstaff mock pennyroyal

Lamiaceae Monardella arizonica - Arizona monardella

Lamiaceae Salvia dorrii ssp. *mearnsii* - Purple sage

Lamiaceae Scutellaria potosina var. *occidentalis* - Kaibab skullcap

Liliaceae Calochortus spp. - Mariposa-lily

Liliaceae Fritillaria atropurpurea - Spotted fritillary

Liliaceae Lilium spp. - Lemon lily

Liliaceae Prosartes trachycarpa - Roughfruit fairy-bells

Liliaceae Streptopus amplexifolius - Twisted stalk

Loasaceae Mentzelia longiloba - Blazing-star

Malvaceae Abutilon parishii - Tucson Indian-mallow

Malvaceae Fremontodendron californicum - Flannel bush

Malvaceae Pseudabutilon thurberi - Baboquivari Indian-mallow

Malvaceae Sphaeralcea rusbyi ssp. *gilensis* - Gila globe-mallow

Malvaceae Sphaeralcea gierischii - Gierisch's globe-mallow

Nyctaginaceae Boerhavia megaptera - Tucson Mountain spiderling

Onagraceae Camissonia confertiflora - Grand Canyon suncup

Onagraceae Chylismia exilis - Cottonwood Springs beeblossum

Orchidaceae all orchidaceae with exception of those that are listed in Appendix A.(A)

Papaveraceae Argemone arizonica - Grand Canyon prickle-poppy

Pinaceae Pinus aristata - Bristlecone pine

Plantaginaceae Mabrya acerifolia - Brittle-stem

Plantaginaceae Penstemon albomarginatus - Whitemargin beardtongue

Plantaginaceae Penstemon bicolor spp. roseus - Pinto beardtongue

Plantaginaceae Penstemon clutei - Sunset Crater beardtongue

Plantaginaceae Penstemon distans - Mt. Trumbull beardtongue

Plantaginaceae Penstemon linarioides ssp. *maguirei* - Maguire's beardtongue

Plantaginaceae Penstemon nudiflorus - Flagstaff beardtongue

Plantaginaceae Penstemon subulatus - Hackberry beardtongue

Poaceae Sporobolus interruptus - Black dropseed

Polemoniaceae Linanthus maricopensis - Maricopa linanthus

Polygalaceae Rhinotropis rusbyi - Rusby's desert milkwort

Polygonaceae Eriogonum heermannii var. *apachense* - Apache buckwheat

Polygonaceae Eriogonum capillare - San Carlos buckwheat

Polygonaceae Eriogonum ericifolium - Yavapai County buckwheat

Polygonaceae Eriogonum jonesii - Jones' buckwheat

Polygonaceae Eriogonum mortonianum - Fredonia buckwheat

Polygonaceae Eriogonum pulchrum - Yavapai County buckwheat

Polygonaceae Eriogonum ripleyi - Frazier's Well buckwheat

Polygonaceae Eriogonum terrenatum - San Pedro River buckwheat

Polygonaceae Eriogonum thompsonae var. *atwoodii* - Atwood's buckwheat

Portulaceae Lewisia spp. - Bitter-root

Portulaceae Phemeranthus spp. - Flameflower

Primulaceae Dodecatheon spp. - Shooting-star

Primulaceae Primula rusbyi - Rusby's primrose

Primulaceae Primula specuicola - Cave-dwelling primrose

Pteridaceae Astrolepis cochisensis subsp. *arizonica* - Arizona scaly cloakfern

Ranunculaceae Aquilegia spp. - Columbines

Rosaceae Potentilla albiflora - Pinaleno cinquefoil

Rosaceae Potentilla demotica - Hualapai cinquefoil

Rosaceae Potentilla rhyolitica - Santa Rita cinquefoil

Rosaceae Rosa stellata ssp. *abyssa* - Desert rose

Rosaceae Vauquelinia californica - Arizona rosewood

Rubiaceae Galium collomiae - Fossil Hill Creek bedstraw

Saxifragaceae Heuchera eastwoodiae - Senator Mine allum-root

Saxifragaceae Heuchera glomerulata - Chiricahua Mountain allum-root

Simaoubaceae Castela emoryi - Crucifixion-thorn, corona de cristo

Solanaceae Lycium spp. - Wolfberry, tomatillo

Solanaceae Capsicum annuum var. glabriusculum - Chiltepin

C. Salvage assessed native plants as prescribed in A.R.S. § 3-903(B)(3) that require a permit issued pursuant to this Article for removal:

~~BIGNONIACEAE Bignonia Family~~

- ~~*Chilopsis linearis* (Cav.) Sweet var. *arcuata* Fosberg–Desert-willow~~
- ~~*Chilopsis linearis* (Cav.) Sweet var. *glutinosa* (Engelm.) Fosberg~~

~~FABACEAE Pea Family [=Leguminosae]~~

- ~~*Cercidium floridum* Benth.–Blue palo verde~~
- ~~*Cercidium microphyllum* (Torr.) Rose & Johnst.–Foothill palo verde~~
- ~~*Olneya tesota* Gray–Desert ironwood~~
- ~~*Prosopis glandulosa* Torr. var. *glandulosa*–Honey mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *glandulosa* (Torr.) Ckll.~~
- ~~*Prosopis glandulosa* Torr. var. *torreyana* (Benson) M. C. Johnst.–Western honey mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *torreyana* Benson~~
- ~~*Prosopis pubescens* Benth.–Screwbean mesquite~~
- ~~*Prosopis velutina* Woot.–Velvet mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *velutina* (Woot.) Sarg.~~
- ~~*Psorothamnus spinosus* (Gray) Barneby–Smoke tree.~~

  ~~Syn.: *Dalea spinosa* Gray~~

Bignoniaceae Chilopsis linearis - Desert willow

Fabaceae Parkinsonia florida - Blue palo verde

Fabaceae Parkinsonia microphylla - Foothill palo verde

Fabaceae Neltuma odorata - Texas Honey Mesquite

Fabaceae Strombocarpa pubescens - Screwbean mesquite

Fabaceae Neltuma velutina - Velvet mesquite

Fabaceae Psorothamnus spinosus - Smoke tree

D. Harvest restricted native plants as prescribed at A.R.S. § 3-903(B)(4) that require a permit issued pursuant to this Article, to cut or remove the plants for their by-products, fibers, or wood:

~~AGAVACEAE Agave Family (including Nolinaceae)~~

- ~~*Nolina bigelovii* (Torr.) Wats.–Bigelow's nolina~~
- ~~*Nolina microcarpa* Wats.–Beargrass, sacahuista~~
- ~~*Nolina parryi* Wats.–Parry's nolina~~

- ~~*Nolina texana* Wats. var. *compacta* (Trel.) Johnst.–~~
  - ~~Bunchgrass~~
- ~~*Yucca baccata* Torr. var. *baccata*–Banana yucca~~
- ~~*Yucca schidigera* Roezl.–Mohave yucca, Spanish dagger~~

~~FABACEAE Pea Family [=Leguminosae]~~

- ~~*Olneya tesota* Gray–Desert ironwood~~
- ~~*Prosopis glandulosa* Torr. var. *glandulosa*–Honey mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *glandulosa* (Torr.) Ckll.~~
- ~~*Prosopis glandulosa* Torr. var. *torreyana* (Benson) M. C. Johnst.–Western honey mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *torreyana* Benson~~
- ~~*Prosopis pubescens* Benth.–Screwbean mesquite~~
- ~~*Prosopis velutina* Woot.–Velvet mesquite~~

  ~~Syn.: *Prosopis juliflora* (Swartz) DC. var. *velutina* (Woot.) Sarg.~~

Asparagaceae Nolina spp. - Bear-grass

Fabaceae Neltuma odorata - Texas Honey Mesquite

Fabaceae Neltuma velutina - Velvet Mesquite

Fabaceae Psorothamnus spinosus - Smoketree

ECONOMIC, SMALL BUSINESS AND CONSUMER IMPACT STATEMENT

TITLE 3. AGRICULTURE

CHAPTER 3. DEPARTMENT OF AGRICULTURE - ENVIRONMENTAL SERVICES DIVISION

ARTICLE 11

Summary

As indicated in the Arizona Native Plant Act of 1989, the purpose of the rules codified in Article 11 are to: 1) Promote awareness and the uniqueness of the Arizona native plants and the potential for their preservation and salvage; 2) Encourage the salvage of Arizona native plants to the greatest extent feasible by preserving their existence through and after the process of real estate development; 3) Protect Arizona native plants from vandalism, theft, over depletion and unnecessary destruction; and 4) Promote the conservation of Arizona native plants. As authorized, pursuant to A.R.S. §§ 3-903, 3-905, and 3-912, this rulemaking is intended to identify Arizona native plants that are at risk of theft, vandalism, or depletion at varying degrees of severity. Then, provide a framework for salvaging those native plants that are growing wild on state land, state public land, or undeveloped private land that might otherwise be destroyed in development projects; are at risk or theft or vandalism; or have high intrinsic value.

This rulemaking is intended to modernize the rules with current industry practices; provide clarity on the native plant salvage process; update the list of protected native plants with the most current taxonomy and selection of plants to include on the list based on known information on risk and distribution of native plants; and make technical corrections throughout. It is also intended to reduce or ameliorate regulatory burdens on the public, while achieving the same regulatory objective as indicated in the Environmental Services Division's five-year rule review. Changes to these rules were proposed with the guidance of a formal rulemaking advisory committee that was officially formed on November 1, 2023. The seven-member committee was comprised of native plant salvage operators, native plant botanists, and land use managers. Additional input was also received from other subject matter experts. Public meetings were held regularly between November 15, 2023 and May 16, 2024 when formal recommendations were made, as summarized below.

The Department of Agriculture ("Department") anticipates the rulemaking will result in an overall benefit to the protection of Arizona native plants, to the regulated community, and the public. The Department bears minimal costs in implementing the proposed rule changes since the purpose of the amendments are intended to modernize existing rules, and not increase the regulatory burden. The Department has determined the rulemaking will not require any new full-time employees. The rulemaking could result in additional costs for the regulated community, but those costs are primarily associated to those that commit a violation of the rules of this Chapter and an increase of the cost from $25 to $50 to acquire all "Notices of Intent to Clear" as they are filed. Additionally, the fee for native plant education is increased from $10 to $50 for a native plant law education seminar and $25 to $65 for a court ordered native plant law education seminar. These increases are based on the increase in administrative costs since 2008. Changes may prove to benefit Arizona native plant salvage operations by providing a clearer information for land developers, property owners, State land managers, and other political subdivisions with state and private land when a protected native plant can be salvaged, instead of being destroyed. There will also be an additional saving to the regulated community by eliminating the requirement of the use of the $0.15 seal for Arizona protected native plants, since the associated protected native plant tag that is purchased, also serves the function of sealing the native plant cord. State land managers, will be effected by the rulemaking, in order to align with the changes to R3-3-1103. The State land managers and other political subdivisions, including HOAs, with state and private land will also incur minimal costs to educate staff and state land tenants of the changes to the rules. Counties, municipalities and HOA's that have similar native plant ordinances or codes will be directly affected by the rulemaking, but only to update those to align with the proposed changes and provide education and training for those affected, including staff and area residences and businesses. Beneficiaries of the rulemaking are land developers that allow salvage, salvage operators, and conservation groups as the rules clarify a good portion of what was already in the Native Plant Law to allow the salvage of protected native plants for sale, that would otherwise be destroyed in land development projects.

While there are minimal upfront costs associated with implementing and enforcing the new regulations, primarily the process of out-reach and education, the benefits of improved environmental protection, better resource management, and potential long-term savings can outweigh the initial costs.

1. **Identification of the proposed rulemaking.**

The explanation of changes are as follows:

R3-3-1101: The Department proposes to amend this rule by eliminating the unnecessary definitions for "Agent", "Department", "Landowner", "Noncommercial salvage permit", "Permittee", "Scientific permit" and "Wood receipt"; by adding new useful definitions for "Authorized representative", "Collection", "Highly safeguarded native plant", "Salvage", "Salvage assessed native plant", "Salvage restricted native plant".

An explanation of the jurisdiction of the Arizona native plant statutes and rules is also included here for clarification; and by clarifying the definitions of "Conservation" and "Destroy".

R3-3-1102: The Department proposes to amend the rule to include email address as part of the applicant information; clarifying when the time period begins to proceed with disposal of a native plant; clarify what is needed to obtain a copy of filed Notices of Intent to clear. Includes a change of the fee to be on the notification list from $25 to $50 to cover administrative costs, and clarifies when a notification of intent is not required.

R3-3-1103: The Department proposes several changes to this rule. The Department plans to incorporate language in subsection (A) from A.R.S. § 3-905(A) that refers to more than ¼ acre of land and a 60 day notice rather than just referring to the statute. The Department also plans to clarify the requirements for a state agency to allow the salvage protected native plants through the use of permits, tags and seals and the requirement that a person hold a scientific or non-commercial salvage permit for highly safeguarded native plants. The changes clarify the fee exemption for a state agency and the conditions for notification under an emergency where imminent threat to safety or property damage exists.

R3-3-1104: The Department proposes to amend this rule to prescribe the conditions that apply for each native plant permit. What information is required, when one is required, and conditions when one is not required. The Department proposes to move subsections (C) through (E) into rule R3-3-1106, as they relate to fees. The Department will only maintain the requirement to provide a social security number to the extent otherwise required by law. The rule will specifically state when an individual is obtaining the permit their social security number is required. The conditions for exemption from the rules are included for clarity.

R3-3-1105: The Department proposes to combine and rephrase subsections (A)(l) and (B)

(l). The Department proposes to move subsections (A)(2), (A)(4), (B)(2) and (B)(4) into rule R3-3-1104, focusing on permit application requirements and permit terms. The Department also proposes to add language to subsections (A)(3) and (B)(3) from A.R.S.§ 3-906(C) related to permit requirements for highly safeguarded native plants. Finally, the Department proposes to add a subsection to make clear that plants covered by a scientific or noncommercial salvage permit cannot be sold. The Department proposes to use this rule to detail the permit application requirements. The Department also plans to incorporate the requirement in A.R.S. § 3- 909(A) of a certificate of inspection for moving protected native plants out-of-state into this rule. The Department will only maintain the requirement to provide a social security number to the extent otherwise required by law. The rule will specifically state when an individual is obtaining the permit their social security number is required.

R3-3-1106: The Department proposes to rename and utilize the rule to prescribe fees for the permits, tags, and seals issued under the Article, including the fees for native plant law education incorporated from rule R3-3-1109. The fee attending a seminar is increased from $10 to $50 and from $25 to $65 for a court ordered native plant law seminar. This fee increase is to assist in covering the administrative costs associated to providing seminar training. No permit, tag, or seal fee increases.

R3-3-1107: The Department proposes to remove subsections (A) through (C) and incorporate the language into rule R3-3-1104 as it relates to native plant permits. Then utilize the rule to prescribe tag, seal and cord usage. The requirement for the usage of seals for Arizona protected native plants removed and only required for imported protected native plants. The current native plant tags used also serve the purpose of sealing the cord.

R3-3-1108: The Department proposes to change the reference to salvage restricted to salvage assessed. The Department also proposes to add to the recordkeeping requirements that the permittee must note the location where the plant was taken from and where it was replanted.

R3-3-1109: The Department proposes to repeal the rule and move the native plant law education fee requirements to rule R3-3-1106.

R3-3-1110: The Department proposes to make this rule more useful by include criteria for determining conditions that a permit could be denied and the process for an appeal.

Appendix A: The Department proposes to amend Appendix A, by input received from the scientific community and subject matter experts to ensure that the rule contains correct

taxonomy and plants are properly categorized based on current native plant status.

2. **Identification of the persons who will be directly affected by, bear the costs of or directly benefit from the proposed rulemaking.**

   The persons directly affected by the rulemaking in Article 11 are land developers, native plant salvage companies, State land managers, and other political subdivisions with state and private land. The proposed rulemaking will impose an additional cost by increasing the cost for requested and mandatory naive plant law education; and reduce a cost by eliminating the requirement for purchasing a native plant seal, based on current Department practices. The benefits of the rulemaking will outweigh the costs of those directly affected since the rulemaking will clarify the requirements for native plant salvage,

3. **A cost benefit analysis of the following:**

   (a) **The probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rule making. The probable costs to the implementing agency shall include the number of new full-time employees necessary to implement and enforce the proposed rule. The preparer of the economic, small business and consumer impact statement shall notify the joint legislative budget committee of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council.**

   The effect of the rulemaking will not require any additional full-time employees to the Department and there will be no additional costs for the implementation of the rulemaking since the Department has already established a framework for the programs affected by the rulemaking.

   (b) **The probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rule making.**

Other than the minimal costs associated to educating the public on changes made in the rulemaking, there are no additional identified costs or benefits to any political subdivision of the state.

(c) The probable costs and benefits to businesses directly affected by the proposed rule making, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rule making.

The rulemaking is not expected to effect revenues or payrolls for the regulated community. Businesses will benefit from the proposed changes throughout the rulemaking that align with current industry practices, and the rulemaking is intended to remove inconsistencies and reduce the overall regulatory burden. Businesses may benefit from the rulemaking in Article 11 with the clarification of the notice of intent to harvest process for native plant salvage operations and land developers. There will also be an additional saving to the regulated community by eliminating the requirement of the use of the $0.15 seal for Arizona protected native plants, since the associated protected native plant tag that is purchased, also serves the function of sealing the native plant cord.

4. A general description of the probable impact on private and public employment in businesses, agencies and political subdivisions of this state directly affected by the proposed rule making.

It is not expected that employment in businesses, agencies, or political subdivisions will be directly affected by the rulemaking.

5. A statement of the probable impact of the proposed rule making on small businesses. The statement shall include:

(a) An identification of the small businesses subject to the proposed rule making.

Small businesses could include native plant salvage companies, native plant dealers, and land developers with fewer than 100 full-time employees.

(b) The administrative and other costs required for compliance with the proposed rule making.

Other than the minimal costs associated to educating employees on changes made in the rulemaking, it is expected that there will not be any additional administrative or other costs required for compliance associated with the proposed rulemaking since there is not a significant change in compliance requirements.

(c) A description of the methods prescribed in section 41-1035 that the agency may use to reduce the impact on small businesses, with reasons for the agency's decision to use or not to use each method.

The Department finds that the use of any method in section 41-1035 is not feasible since establishing less stringent compliance or reporting requirements; establishing less stringent schedules or deadlines; consolidating compliance or reporting requirements; or exempting a small business would not comply with Arizona Native Plant laws (A.R.S. §§ 3-901 *et seq.* and 3-931 *et seq.*). Additionally, the rules in these Articles are intended to provide guidelines for the legal salvage of protected native plants, diminishing those requirements could result in the endangerment to Arizona protected native plants that could be vandalized. The use of performance standards is not applicable to this rulemaking.

(d) The probable cost and benefit to private persons and consumers who are directly affected by the proposed rule making.

Private persons and consumers may benefit from the proposed rulemaking, as the changes clarify the native plant salvage process and will encourage land developers to salvage protected native plants and increasing consumer access to those plants that are salvaged. The proposed rulemaking does not infer any additional costs to private persons or consumers.

6. A statement of the probable effect on state revenues.

The proposed rulemaking will have minimal effect on state revenues since the increase to the native plant education fees are to cover the expense to provide education, and these programs are seldomly utilized. The $0.15 seal fee will be eliminated, but will not have a significant impact on state revenues. There is no other change to the native plant permit or tag fees; and there is no increase to the penalties for program violations.

7. **A description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rule making, including the monetizing of the costs and benefits for each option and providing the rationale for not using nonselected alternatives.**

The Department finds there are no less intrusive or less costly alternatives to the proposed rulemaking while achieving the same regulatory purpose of the rules.

8. **A description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data. An agency advocating that any data is acceptable data has the burden of proving that the data is acceptable. For the purposes of this paragraph, "acceptable data" means empirical, replicable and testable data as evidenced in supporting documentation, statistics, reports, studies or research.**

No data was produced from any studies or research for the rulemaking.

City of Phoenix
OFFICE OF ENVIRONMENTAL PROGRAMS

September 4, 2024

Mr. Brian McGrew
Program Manager
Arizona Department of Agriculture
1110 W Washington St., Suite 450
Phoenix, AZ 85007

Re: Notice of Proposed Rulemaking, Title 3, Chapter 3 Article 11 Arizona Native Plants

Dear Mr. McGrew:

Thank you for the opportunity to provide comment on the proposed rulemaking for Title 3, Chapter 3, Article 11 Arizona Native Plants. The City of Phoenix (Phoenix) has reviewed the changes and respectfully submits the following comments and recommendations.

1) The proposed rule includes ambiguous language related to timeframes that would make it difficult for a project proponent to know when their project can proceed after notification to the Arizona Department of Agriculture (Department). Phoenix recommends clarifying to reduce confusion and provide regulatory compliance certainty, as follows:

   - **R3-3-1102(B)(2) –** Recommend changing, "Notice is given to the Department within the following minimum time periods, <u>starting from the time the notice was given or from when confirmation is received from the department</u>". As currently phrased, if the Department confirmation is not received on the same day as the notice, the landowner would not know when the activity impacting native plants would be allowed to proceed. Which would be the governing timeframe when they are different, as would be expected to happen regularly? The current language does not provide clarity on this. ***Phoenix recommends changing the language to: "… starting from the time the notice was given to the department."***

   - **R3-3-1103(B)(6) –** Recommend changing, "<u>In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been acknowledged by the Department</u>". This language ties the state agency (including political subdivisions such as Phoenix) to an uncertain timeline based on when Department staff acknowledges receipt of the notice, rather than when the notice is submitted. The Department should be accountable for reviewing notices in a timely manner. As written, the rule language ignores that responsibility, thereby creating ambiguity for state agencies. This ambiguity can cause project delays and associated increased costs, resulting in an unnecessary waste of taxpayer and/or grant dollars. ***Phoenix urges the Department to revise the language to, "… the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been provided to the Department".*** This change in language

reflects both the Department's timely review responsibility and the responsibility of the state agency to submit the notice in the timeline required.

2) The timeframe of notification for the disposal and salvage of protected native plants by a state agency, including political subdivisions such as cities, is significantly more stringent than that required for private landowners, from a 30-day notification period for up to 40 acres for private landowners to a 60-day notification period for anything over 1/4-acre for state agencies. Phoenix recommends the Department work with the state legislature to reduce the notification timeframe required for state agencies to 30 days for up to 40 acres, congruent with private landowner requirements.

Thank you for the opportunity to provide comments. If you have any questions or would like to discuss these comments in more detail, please feel free to contact me at tricia.balluff@phoenix.gov or by phone at 602-534-1775.

Sincerely,

Tricia Balluff
Environmental Programs Manager

KATIE HOBBS

RE: Notice of Proposed Rulemaking Public Comment Response, Arizona Native Plants

Dear Ms. Balluff:

Thank you for providing valuable comments on September 4, 2024 during the Department's public hearing for the notice of proposed rulemaking to amend the regulations under Arizona Administrative Code, Title 3, Chapter 3, Article 11 - Arizona Native Plants.

The Department has reviewed your two comments regarding ambiguous language related to timeframes in rules R3-4-1102(B)(2) and R3-3-1103(B)(6), on when a person, agency or political subdivision can proceed with a project after submitting proper notification. The Department concurs with the assessment and has made the changes as recommended. The Department believes this is not a substantive change, but clarifies ambiguous language and will benefit the regulated community overall. The change provided here will be updated in the rulemaking documents submitted to the Governor's Regulatory Review Council for review and decision.

R3-3-1102(B)(2) Notice is given to the Department within the following minimum time periods, starting from the time the notice was given to the Department:

R3-3-1103(B)(6) In situations where 1 through 5 above are not possible, the destruction or clearing of the land may begin 60 days after the notice, as prescribed in subsection (A), has been provided to the Department.

The Department has reviewed your comment regarding the sixty-day notification for the removal or destruction of native plants over one-quarter acre and the burden that it poses for state agencies and political subdivisions in comparison to what is required for a private landowner. Although this is consistent with what was adopted by the legislature in 1989, pursuant to Arizona Native Plant Law A.R.S. § 3-905(A),

thirty-five years have passed since and the pace in which development projects move is likely much quicker. We agree this could be overly burdensome, especially for smaller land clearing projects. Since we are the regulatory agency with oversight of the native plant laws, we cannot lobby for a change in this context. However, we are open to providing technical help with any legislation that is proposed.

If you have any questions or would like to discuss further, please let me know. I can be reached by phone at (602) 542-3228 or by emailing bmcgrew@azda.gov.

Sincerely,

Brian McGrew
Program Manager

cc: Jack Peterson, Assistant Director

1. The Director shall use R3-3-1007 and R3-3-1008 to calculate an additional daily penalty for each unabated violation.
2. The additional daily penalty shall neither be less than the original penalty for the cited violation or exceed $1,000 per day per violation.
3. The additional daily penalty shall be multiplied by the number of calendar days the violation has continued unabated beyond the abatement period.

B. Notwithstanding subsection (A), the Director may reduce or eliminate the additional penalty based on:
1. The extent that the violation has been abated,
2. The cited person's good faith effort in correcting the violation, and
3. Whether the abatement has not been completed because of factors beyond the cited person's reasonable control.

Historical Note

Adopted effective October 8, 1998 (Supp. 98-4). Amended by final rulemaking at 30 A.A.R. 89 (January 19, 2024), effective March 4, 2024 (Supp. 24-1).

R3-3-1011. Repeated or Willful Violations

A. The penalty for a repeated violation shall be calculated as follows:
1. The penalty for a repeated nonserious violation shall be doubled for the first repeated violation and tripled if the violation has been cited twice before.
2. The penalty for a repeated serious violation shall be multiplied five times for the first repeated violation and seven times if the violation has been cited twice before.
3. The penalty for a repeated serious violation in which someone is disabled or killed shall be multiplied 10 times for each repeated violation.
4. A repeated violation having no initial penalty shall be assessed for the first repeated violation as determined by this Article.
5. The penalty may be multiplied by 10, not to exceed the maximum penalty, if it is justified through appropriate documentation.

B. The Assistant Director may adjust the base penalty found under R3-3-1007(D) by a multiplier up to 10 for any willful violation.

C. The Assistant Director shall not use base adjustment factors in R3-3-1008 to reduce the penalty for any serious or nonserious willfully repeated violation.

D. Repeated violations are based on prior violations occurring within the previous three years.

E. The penalty for a repeated or willful violation shall not exceed $10,000.

Historical Note

Adopted effective October 8, 1998 (Supp. 98-4). Amended by final rulemaking at 30 A.A.R. 89 (January 19, 2024), effective March 4, 2024 (Supp. 24-1).

R3-3-1012. Citation; Posting

An employer shall post a citation prescribed at A.R.S. § 3-3110(C) for three days or until the violation is abated, whichever time period is longer.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 276, effective March 6, 2004 (Supp. 04-1).

ARTICLE 11. ARIZONA NATIVE PLANTS

R3-3-1101. Definitions

In addition to the definitions in A.R.S. § 3-901, the following terms apply to this Article:

"Agent" means a person authorized to manage, represent, and act for a landowner.

"Certificate of inspection for interstate shipments" means a certificate to transport protected native plants out of the state.

"Conservation" means prevention of exploitation, destruction, or neglect of native plants while helping to ensure continued public use.

"Cord" means a specific type string or small rope issued by the Department for attaching tags and seals to protected native plants.

"Cord of wood" means a measurement of firewood equal to 128 cubic feet.

"Department" means the Arizona Department of Agriculture.

"Destroy" means to cause the death of any protected native plant.

"Harvest restricted native plant permit" means a permit required to remove the by-products, fibers, or wood from a native plant listed in Appendix A, subsection (D).

"Landowner" means a person who holds title to a parcel of land.

"Noncommercial salvage permit" means a permit required for the noncommercial salvage of a highly safeguarded native plant.

"Original growing site" means a place where a plant is growing wild and is rooted to the ground or any property owned by the same landowner where a protected native plant is relocated or transplanted without an original transportation permit.

"Permittee" means any person who is issued a permit by the Department for removing and transporting protected native plants.

"Protected native plant" means any living plant or plant part listed in Appendix A and growing wild in Arizona.

"Protected native plant tag" means a tag issued by the Department to identify the lawful removal of a protected native plant, other than a saguaro cactus, from its original growing site.

"Saguaro tag" means a tag issued by the Department to identify a saguaro cactus being lawfully moved.

"Salvage assessed native plant permit" means a permit required to remove a native plant listed in Appendix A, subsection (C).

"Salvage restricted native plant permit" means a permit required to remove a native plant listed in Appendix A, subsection (B).

"Scientific permit" means a permit required to remove a native plant for a controlled experimental project by a qualified person.

"Securely tie" means to fasten in a tight and secure manner to prevent the removal of tags, seals, or cord for reuse.

"Small Native Plant" means any protected plant eight inches in height or less.

"Survey" means the process by which a parcel of land is examined for the presence of protected native plants. A simple survey determines only whether protected native plants are present. A complete survey establishes the kind and number of each species present.

"Wood receipt" means a receipt issued by the Department to identify the lawful removal of a protected native plant harvested for fuel, being removed from its original growing site.

Historical Note

New Section recodified from R3-4-601 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1102. Protected Native Plant Destruction by a Private Landowner

A. Notice of intent.
1. Before a protected native plant is destroyed, the private landowner shall provide the following information to the Department on a form obtained from the Department:
    a. Name, address, and telephone number of the landowner;
    b. Name, address, and telephone number of the landowner's agent, if applicable;
    c. Valid documentation indicating land ownership, including but not limited to a parcel identification number, tax assessment, or deed;
    d. Legal description, map, address, or other description of the area, including the number of acres to be cleared, in which the protected native plants subject to the destruction are located;
    e. Earliest date of plant destruction; and
    f. Landowner's intent for the disposal or salvage of protected native plants on the land.
2. A landowner intending to destroy protected native plants on an area of less than one acre may submit the information required in subsection (A)(1) to the Department verbally.

B. A landowner shall not destroy a protected native plant until:
1. The landowner receives a written confirmation notice from the Department, and
2. Notice is given to the Department within the following minimum time periods:
    a. Twenty days before the plants are destroyed over an area of less than one acre.
    b. Thirty days before the plants are destroyed over an area of one acre or more but less than 40 acres.
    c. Sixty days before the plants are destroyed over an area of 40 acres or more.

C. The Department shall provide a salvage operator or other interested person with a copy of a notice of intent submitted under this Section upon receipt of the private landowner's name, address, telephone number, and payment of an annual $25 nonrefundable fee.

Historical Note

New Section recodified from R3-4-602 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1103. Disposal and Salvage of Protected Native Plants by a State Agency

A. A state agency intending to remove or destroy protected native plants shall notify the Department, under A.R.S. § 3-905, and shall propose a method of disposal from the following list:
1. The plants may be sold at a public auction;
2. The plants may be relocated or transported to a different location on the same property or to another property owned by the state, without obtaining a permit;
3. The plants may be donated to nonprofit organizations as provided in A.R.S. § 3-916;
4. The plants may be donated to another state agency or political subdivision, without obtaining a permit; or
5. The plants may be salvaged or harvested by a member of the general public or a commercial dealer, if the person holds a permit as provided under A.R.S. § 3-906 or 3-907.

B. If the plants are highly safeguarded native plants, they shall first be made available to the holder of a scientific permit or a noncommercial salvage permit.

Historical Note

New Section recodified from R3-4-603 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1104. Protected Native Plant Permits; Tags; Seals; Fees

A. A person shall not collect, transport, possess, sell, offer for sale, dispose, or salvage protected native plants unless that person is 18 years of age or older and possesses an appropriate permit.

B. An applicant shall submit the following information to the Department on a form obtained from the Department, as applicable:
1. Name, business name, address, telephone number, Social Security number or tax identification number, and signature of the applicant;
2. Name and number of plants to be removed;
3. Purpose of the plant removal;
4. Whether the applicant has a conviction for a violation of a state or federal statute regarding the protection of native plants within the previous five years;
5. Except for salvage assessed native plants;
    a. Name, address, telephone number, and signature of the landowner;
    b. Location of the permitted site and size of acreage;
    c. Destination address where the plants will be transplanted;
    d. Legal and physical description of the location of the original growing site; and
    e. Parcel identification number for the permitted site or other documents proving land ownership.

C. Permit fees.
1. A person removing and transporting protected native plants shall submit the following applicable fee to the Department with the permit application:
    a. Salvage assessed native plant permit, annual use, $35;
    b. Harvest restricted native plant permit, annual use, $35;
    c. All other native plant permits, one-time use, $7;
    d. Certificate of inspection for interstate shipments, $15.
2. Exemptions. Protected native plants are exempt from fees if:

a. The protected native plants intended for personal use by a landowner are taken from one piece of land owned by the landowner to another piece of land also owned by the landowner, remain on the property of the landowner, and are not sold or offered for sale;
b. The protected native plants are collected for scientific purposes; or
c. A landowner donates the protected native plant to a scientific, educational, or charitable institution.

D. Tag and harvesting fees.
1. Any person obtaining a saguaro tag or other protected native plant tag or receipt shall submit the following applicable fee to the Department at the time a tag is obtained:
a. Saguaro, $8 per plant;
b. Trees cut for firewood and listed in the harvest restricted category, $6 per cord of wood;
c. Small native plant, $.50 per plant;
d. Any other protected native plant referenced in A.R.S. § 3-903(B) and (C) and listed in Appendix A, $6 per plant.
2. The fee for harvesting *nolina* or *yucca* parts is $6 per ton. Payment shall be made to the Department in the following manner:
a. Unprocessed nolina or yucca fiber shall be weighed on a state-certified bonded scale; and
b. The harvester shall submit payment and weight certificates to the Department no later than the tenth day of the month following each harvest.

E. Seal fees. A person obtaining a seal shall submit a $.15 per plant fee to the Department at the time a seal is obtained.

F. Salvage assessed native plant permits and plant tags are valid for the calendar year in which they are issued. The tags expire at the end of the calendar year unless the permit is renewed.

Historical Note

New Section recodified from R3-4-604 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1105. Scientific Permits; Noncommercial Salvage Permits

A. Scientific Permit
1. A person shall not collect any highly safeguarded or other protected native plants for a research project unless that person holds a scientific permit.
2. An applicant shall submit the following information to the Department on a form obtained from the Department:
a. Name, address, and telephone number of the company or research facility applying for the permit;
b. Name, title and experience of the person conducting the research project;
c. Purpose and intent of the research project;
d. Controls to be used;
e. Variables to be considered;
f. Time-frame for the project;
g. Anticipated results and plans for publication;
h. Reports and recordkeeping that will be used to monitor the project;
i. Project funding source;
j. Funding of the company or research facility;
k. Written authorization from the landowner for collection of the plants;
l. Date of the application;
m. Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests; and
n. Tax identification number, or if applicant is an individual, a Social Security number.
3. A scientific permit shall be issued if the applicant provides documentation that demonstrates the following:
a. A plan, pre-approved by the landowner, to restore the removal site to a natural appearance;
b. The removal and movement of the native plants shall be accomplished by a person experienced in native plant removal and transplantation;
c. The native plants used in the project shall remain accessible to the Department;
d. The ecology of the project site is beneficial to the growth of the specific plants in the project if practical;
e. Arrangements exist for a suitable permanent planting site for the surviving plants after the project's completion; and
f. Description of plant disposition and research hypothesis.
4. A scientific permit is valid for the calendar year in which it is issued.

B. Noncommercial salvage permit:
1. Highly safeguarded native plants may only be collected for conservation by a person holding a noncommercial salvage permit.
2. An applicant shall submit the following information to the Department, on a form obtained from the Department:
a. Name, address, and telephone number of the applicant applying for the permit;
b. Proposed relocation site for the plants;
c. Written authorization from the landowner for collection of the plants;
d. Date of the application; and
e. Signed affirmation by the applicant that the plants collected will not be sold or used for personal interests.
3. A noncommercial salvage permit shall be issued if all of the following conditions are met through documentation provided to the Department:
a. The native plants used in the project shall be accessible to the Department after transplant, and
b. The relocation site is beneficial to the growth of the specific plants in the project.
4. A noncommercial salvage permit is valid only for the transportation and the transplantation of the particular native plant.

Historical Note

New Section recodified from R3-4-605 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1106. Protected Native Plant Survey; Fee

A. Upon request, the Department may conduct a native plant survey. Upon completion, the Department shall notify the individual who made the request of:
1. The date the survey was performed;
2. The amount of the survey fee payable to the Department;
3. The name of Department personnel performing the survey;

4. Upon payment, the survey results including the names and numbers of protected native plants.

B. A person who requests a native plant survey shall pay the survey fee to the Department within 30 days from the date of the notification. The survey fee shall be based on time and travel expenses, except that no fee shall be charged for a determination of whether protected species exist on the land.

Historical Note

New Section recodified from R3-4-606 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1107. Movement Permits; Tags, Seals, and Cord Use

A. Any person moving a protected native plant, except a saguaro cactus, previously transplanted from its original growing site in Arizona and transplanting it to another location shall apply to the Department for a Movement Permit. The landowner from where the plant is being moved shall provide the following information on the permit application:
1. The name, telephone number, and signature of the landowner;
2. The location of the plant;
3. The name, address, and telephone number of the receiver;
4. The name, address, and telephone number of the carrier;
5. The number, species, and description of the plant being removed;
6. The tax parcel identification number; and
7. The date of the application.

B. Any person moving a saguaro cactus over four feet tall previously transplanted from its original growing site in Arizona and transplanting it to another location shall apply to the Department for a Movement Permit. The landowner from where the saguaro cactus is being moved shall provide the following information on the permit application, unless the applicant maintains a record of the original permit or verifies the Department has a record of a previous legal movement of the cactus by the applicant.
1. The name, telephone number, and signature of the landowner;
2. The address where the saguaro cactus is located;
3. The name, address, and telephone number of the receiver;
4. The name, address, and telephone number of the carrier;
5. The number, species, and description of the plant being removed;
6. The tax parcel identification number of the property where the saguaro cactus is being moved; and
7. The date of the application.

C. Movement of protected native plants obtained outside Arizona.
1. Any person moving a protected native plant obtained outside Arizona and transporting and planting it within the state shall declare the protected native plant at the agricultural inspection station nearest the port of entry. The Department shall place the protected native plant under "Warning Hold" to the nearest permitting office.
2. If an agricultural station is not in operation at the port of entry, the person shall declare the protected native plant at the nearest permitting office during normal office hours.
3. After the plants have been declared, the permitting office shall issue a Movement Permit and seal.

D. Any person moving protected native plants shall obtain the following seals from the Department and securely attach the appropriate seal to each protected native plant:
1. Protected native plant seals identify protected native plants, except saguaro cacti, that will be moved from locations that are not the original growing sites.
2. Imported seals identify all imported protected native plants.

E. Tag, seal, and cord attachment.
1. A permittee shall attach a tag to each protected native plant taken from its original growing site, using cord provided by the Department, before transport. No other type of rope, string, twine, or wire is allowed.
2. The cord shall be securely tied around the plant, and the tag attached so that it cannot be removed without breaking the seal or cutting the cord.
3. The tag shall be placed directly over the knot in the cord and the ends pressed firmly together sealing the knot so that it cannot be removed for reuse.
4. The protected native plant seal shall be placed directly over the knot and snapped firmly closed, sealing the knot.
5. The imported seal shall be attached directly to the plant.
6. Upon loading the plant, every effort shall be made to allow visibility of the tag during transport.

Historical Note

New Section recodified from R3-4-607 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1108. Recordkeeping; Salvage Assessed and Harvest Restricted Native Plants

A. Salvage Assessed Native Plants.
1. A permittee shall maintain a record of each protected native plant removed under an annual permit for two years from the date of each transaction and allow Department inspection of the records during normal business hours. The transaction record shall include the date salvage restricted protected native plants were removed and the permit and tag numbers.
2. Annually, by January 31, a permittee shall submit to the Department a copy of each transaction record for the prior calendar year.

B. Harvest Restricted Native Plants. A permittee shall submit to the Department by the tenth day of each month the transaction records for the previous month, or a written statement that no transactions were conducted for that month.

Historical Note

New Section recodified from R3-4-608 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1109. Arizona Native Plant Law Education

A. The Department may schedule seminars and training courses on an as-needed basis.

B. In addition to the following fees, charges for printed materials or pamphlets shall be assessed based upon printing and mailing costs:
1. A person attending a seminar or training course on Arizona native plant law shall pay a nonrefundable fee of $10 to the Department before attending the class.
2. A person convicted of violating Arizona native plant laws and ordered by a court to attend a native plant educational

class shall pay a nonrefundable fee of $25 to the Department before attending the class. The Department shall provide written confirmation of satisfactory completion to a person ordered by a court to attend a class.

Historical Note

New Section recodified from R3-4-609 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1110. Permit Denial

Upon notice of denial of a permit, an applicant may request, in writing, that the Department provide an administrative hearing under A.R.S. Title 41, Chapter 6, Article 10, to appeal the denial.

Historical Note

New Section recodified from R3-4-610 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

R3-3-1111. Repealed

Historical Note

New Section recodified from R3-4-611 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Repealed by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

Appendix A. Protected Native Plants by Category

A. Highly safeguarded native plants as prescribed in A.R.S. § 3-903(B)(1), for which removal is not allowed except as provided in R3-3-1105:

AGAVACEAE Agave Family

Agave arizonica Gentry & Weber–Arizona agave

Agave delamateri Hodgson & Slauson

Agave murpheyi Gibson–Hohokam agave

Agave parviflora Torr.–Santa Cruz striped agave, Small-flowered agave

Agave phillipsiana Hodgson

Agave schottii Engelm. var. *treleasei* (Toumey) Kearney & Peebles

APIACEAE Parsley Family. [= Umbelliferae]

Lilaeopsis schaffneriana (Schlecht.) Coult. & Rose ssp. *recurva* (A. W. Hill) Affolter–Cienega false rush, Huachuca water umbel.
Syn.: *Lilaeopsis recurva* A. W. Hill

APOCYNACEAE Dogbane Family

Amsonia kearneyana Woods.–Kearney's bluestar

Cycladenia humilis Benth. var. *jonesii* (Eastw.) Welsh & Atwood–Jones' cycladenia

ASCLEPIADACEAE Milkweed Family

Asclepias welshii N. & P. Holmgren–Welsh's milkweed

ASTERACEAE Sunflower Family [= Compositae]

Erigeron lemmonii Gray–Lemmon fleabane

Erigeron rhizomatus Cronquist–Zuni fleabane

Senecio franciscanus Greene–San Francisco Peaks groundsel

Senecio huachucanus Gray–Huachuca groundsel

BURSERACEAE Torch Wood Family

Bursera fagaroides (H.B.K.) Engler–Fragrant bursera

CACTACEAE Cactus Family

Carnegiea gigantea (Engelm.) Britt. & Rose–Saguaro: 'Crested' or 'Fan-top' form
Syn.: *Cereus giganteus* Engelm.

Coryphantha recurvata (Engelm.) Britt. & Rose–Golden-chested beehive cactus
Syn.: *Mammillaria recurvata* Engelm.

Coryphantha robbinsorum (W. H. Earle) A. Zimmerman–Cochise pincushion cactus, Robbin's cory cactus.
Syn.: *Cochiseia robbinsorum* W.H. Earle

Coryphantha scheeri (Kuntze) L. Benson var. *robustispina* (Schott) L. Benson–Scheer's strong-spined cory cactus.
Syn.: *Mammillaria robustispina* Schott

Echinocactus horizonthalonius Lemaire var. *nicholii* L. Benson–Nichol's Turk's head cactus

Echinocereus triglochidiatus Engelm. var. *arizonicus* (Rose ex Orcutt) L. Benson–Arizona hedgehog cactus

Echinomastus erectocentrus (Coult.) Britt. & Rose var. *acunensis* (W.T. Marshall) L.Benson–Acuna cactus
Syn.: *Neolloydia erectocentra* (Coult.) L. Benson var. *acunensis* (W. T. Marshall) L. Benson

Pediocactus bradyi L. Benson–Brady's pincushion cactus

Pediocactus paradinei B. W. Benson–Paradine plains cactus

Pediocactus peeblesianus (Croizat) L. Benson var. *fickeiseniae* L. Benson

Pediocactus peeblesianus (Croizat) L. Benson var. *peeblesianus* Peebles' Navajo cactus, Navajo plains cactus
Syn.: *Navajoa peeblesiana* Croizat

Pediocactus sileri (Engelm.) L. Benson–Siler pincushion cactus
Syn.: *Utahia sileri* (Engelm.) Britt. & Rose

COCHLOSPERMACEAE Cochlospermum Family

Amoreuxia gonzalezii Sprague & Riley

CYPERACEAE Sedge Family

Carex specuicola J. T. Howell–Navajo sedge

FABACEAE Pea Family [=Leguminosae]

Astragalus cremnophylax Barneby var. *cremnophylax* Sentry milk vetch

Astragalus holmgreniorum Barneby–Holmgren milk-vetch

Dalea tentaculoides Gentry–Gentry indigo bush

LENNOACEAE Lennoa Family

Pholisma arenarium Nutt.–Scaly-stemmed sand plant

Pholisma sonorae (Torr. ex Gray) Yatskievych–Sandfood, sandroot
Syn.: *Ammobroma sonorae* Torr. ex Gray

LILIACEAE Lily Family
Allium gooddingii Ownbey–Goodding's onion

ORCHIDACEAE Orchid Family

Cypripedium calceolus L. var. *pubescens* (Willd.) Correll–Yellow lady's slipper

Hexalectris warnockii Ames & Correll–Texas purple spike

Spiranthes delitescens C. Sheviak

POACEAE Grass Family [=Gramineae]

Puccinellia parishii A.S. Hitchc.–Parish alkali grass

POLYGONACEAE Buckwheat Family

Rumex orthoneurus Rech. f.

PSILOTACEAE Psilotum Family

Psilotum nudum (L.) Beauv. Bush Moss, Whisk Ferm

RANUNCULACEAE Buttercup Family

Cimicifuga arizonica Wats.–Arizona bugbane

Clematis hirsutissima Pursh var. *arizonica* (Heller) Erickson–Arizona leatherflower

ROSACEAE Rose Family

Purshia subintegra (Kearney) J. Hendrickson–Arizona cliffrose, Burro Creek cliffrose
Syn.: *Cowania subintegra* Kearney

SALICACEAE Willow Family

Salix arizonica Dorn–Arizona willow

SCROPHULARIACEAE Figwort Family

Penstemon discolor Keck–Variegated beardtongue

B. Salvage restricted native plants as prescribed in A.R.S. § 3-903(B)(2) that require a permit for removal. In addition to the plants listed under Agavaceae, Cactaceae, Liliaceae, and Orchidaceae, all other species in these families are salvage restricted protected native plants:

AGAVACEAE Agave Family
Agave chrysantha Peebles

Agave deserti Engelm. ssp. *simplex* Gentry–Desert agave

Agave mckelveyana Gentry

Agave palmeri Engelm.

Agave parryi Engelm. var. *couseii* (Engelm. ex Trel.) Kearney & Peebles

Agave parryi Engelm. var. *huachucensis* (Baker) Little ex L. Benson
Syn.: *Agave huachucensis* Baker

Agave parryi Engelm. var. *parryi*

Agave schottii Engelm. var. *schottii* – Shindigger

Agave toumeyana Trel. ssp. *bella* (Breitung) Gentry

Agave toumeyana Trel. ssp. *toumeyana*

Agave utahensis Engelm. spp. *kaibabensis* (McKelvey) Gentry
Syn.: *Agave kaibabensis* McKelvey

Agave utahensis Engelm. var. *utahensis*

Yucca angustissima Engelm. var. *angustissima*

Yucca angustissima Engelm. var. *kanabensis* (McKelvey) Reveal
Syn.: *Yucca kanabensis* McKelvey

Yucca arizonica McKelvey

Yucca baccata Torr. var. *baccata*–Banana yucca

Yucca baccata Torr. var. *vespertina* McKelvey

Yucca baileyi Woot. & Standl. var. *intermedia* (McKelvey) Reveal
Syn.: *Yucca navajoa* Webber

Yucca brevifolia Engelm. var. *brevifolia*–Joshua tree

Yucca brevifolia Engelm. var. *jaegeriana* McKelvey

Yucca elata Engelm. var. *elata*–Soaptree yucca, palmilla

Yucca elata Engelm var. *utahensis* (McKelvey) Reveal
Syn.: *Yucca utahensis* McKelvey

Yucca elata Engelm. var. *verdiensis* (McKelvey) Reveal
Syn.: *Yucca verdiensis* McKelvey

Yucca harrimaniae Trel.

Yucca schidigera Roezl.–Mohave yucca, Spanish dagger

Yucca schottii Engelm.–Hairy yucca

Yucca thornberi McKelvey
Yucca whipplei Torr. var. *whipplei*–Our Lord's candle
Syn.: *Yucca newberryi* McKelvey

AMARYLLIDACEAE Amaryllis Family
Zephyranthes longifolia Hemsl.–Plains Rain Lily

ANACARDIACEAE Sumac Family
Rhus kearneyi Barkley–Kearney Sumac

ARECACEAE Palm Family [=Palmae]
Washingtonia filifera (Linden ex Andre) H. Wendl–California fan palm

ASTERACEAE Sunflower Family [=Compositae]

Cirsium parryi (Gray) Petrak ssp. *mogollonicum* Schaak

Cirsium virginensis Welsh–Virgin thistle

Erigeron kuschei Eastw.–Chiricahua fleabane

Erigeron piscaticus Nesom–Fish Creek fleabane

Flaveria macdougalii Theroux, Pinkava & Keil

Perityle ajoensis Todson–Ajo rock daisy

Perityle cochisensis (Niles) Powell–Chiricahua rock daisy

Senecio quaerens Greene–Gila groundsel

BURSERACEAE Torch-Wood Family

Bursera microphylla Gray–Elephant tree, torote

CACTACEAE Cactus Family

Carnegiea gigantea (Engelm.) Britt. & Rose–Saguaro
Syn.: *Cereus giganteus* Engelm.

Coryphantha missouriensis (Sweet) Britt. & Rose

Coryphantha missouriensis (Sweet) Britt. & Rose var. *marstonii* (Clover) L. Benson

Coryphantha scheeri (Kuntze) L. Benson var. *valida* (Engelm.) L. Benson

Coryphantha strobiliformis (Poselger) var. *orcuttii* (Rose) L. Benson

Coryphantha strobiliformis (Poselger) var. *strobiliformis*

Coryphantha vivipara (Nutt.) Britt. & Rose var. *alversonii* (Coult.) L. Benson

Coryphantha vivipara (Nutt.) Britt. & Rose var. *arizonica* (Engelm.) W. T. Marshall
Syn.: *Mammillaria arizonica* Engelm.

Coryphantha vivipara (Nutt.) Britt. & Rose var. *bisbeeana* (Orcutt) L. Benson

Coryphantha vivipara (Nutt.) Britt. & Rose var. *deserti* (Engelm.) W. T. Marshall
Syn.: *Mammillaria chlorantha* Engelm.

Coryphantha vivipara (Nutt.) Britt. & Rose var. *rosea* (Clokey) L. Benson

Echinocactus polycephalus Engelm. & Bigel. var. *polycephalus*

Echinocactus polycephalus Engelm. & Bigel. var. *xeranthemoides* Engelm. ex Coult.
Syn.: *Echinocactus xeranthemoides* Engelm. ex Coult.

Echinocereus engelmannii (Parry ex Engelm.) Lemaire var. *acicularis* L. Benson

Echinocereus engelmannii (Parry ex Engelm.) Lemaire var. *armatus* L. Benson

Echinocereus engelmannii (Parry ex Engelm.) Lemaire var. *chrysocentrus* L. Benson

Echinocereus engelmannii (Parry ex. Engelm.) Lemaire var. *engelmannii*

Echinocereus engelmannii (Parry) Lemaire var. *variegatus* (Engelm.) Engelm. ex Rümpler

Echinocereus fasciculatus (Engelm. ex B. D. Jackson) L. Benson var. fasciculatus
Syn.: *Echinocereus fendleri* (Engelm.) Rümpler var. *fasciculatus* (Engelm. ex B. D. Jackson) N. P. Taylor, *Echinocereus fendleri* (Engelm.) Rümpler var. *robusta* L. Benson; *Mammillaria fasciculata* Engelm.

Echinocereus fasciculatus (Engelm. ex B. D. Jackson) L. Benson var. *bonkerae* (Thornber & Bonker) L. Benson.
Syn.: *Echinocereus boyce-thompsonii* Orcutt var. *bonkerae* Peebles; *Echinocereus fendleri* (Engelm.) Rümpler var. *bonkerae* (Thornber & Bonker) L. Benson

Echinocereus fasciculatus (Engelm. ex B. D. Jackson) L. Benson var. *boyce-thompsonii* (Orcutt) L. Benson
Syn.: *Echinocereus boyce-thompsonii* Orcutt

Echinocereus fendleri (Engelm.) Rümpler var. *boyce-thompsonii* (Orcutt) L. Benson

Echinocereus fendleri (Engelm.) Rümpler var. *fendleri*

Echinocereus fendleri (Engelm.) Rümpler var. *rectispinus* (Peebles) L. Benson

Echinocereus ledingii Peebles

Echinocereus nicholii (L. Benson) Parfitt.
Syn.: *Echinocereus engelmannii* (Parry ex Engelm.) Lemaire var. *nicholii* L. Benson

Echinocereus pectinatus (Scheidw.) Engelm. var. *dasyacanthus* (Engelm.) N. P. Taylor
Syn.: *Echinocereus pectinatus* (Scheidw.) Engelm. var. *neomexicanus* (Coult.) L. Benson

Echinocereus polyacanthus Engelm. (1848) var. *polyacanthus*

Echinocereus pseudopectinatus (N. P. Taylor) N. P. Taylor
Syn.: *Echinocereus bristolii* W. T. Marshall var. *pseudopectinatus* N. P. Taylor, *Echinocereus pectinatus* (Scheidw.) Engelm. var. *pectinatus sensu* Kearney and Peebles, Arizona Flora, and L. Benson, The Cacti of Arizona and The Cacti of the United States and Canada.

Echinocereus rigidissimus (Engelm.) Hort. F. A. Haage.
Syn.: *Echinocereus pectinatus* (Scheidw.) Engelm. var. *rigidissimus* (Engelm.) Engelm. ex Rümpler–Rainbow cactus

Echinocereus triglochidiatus Engelm. var. *gonacanthus* (Engelm. & Bigel.) Boiss.

Echinocereus triglochidiatus Engelm. var. *melanacanthus* (Engelm.) L. Benson
Syn.: *Mammillaria aggregata* Engelm.

Echinocereus triglochidiatus Engelm. var. *mojavensis* (Engelm.) L. Benson

Echinocereus triglochidiatus Engelm. var. *neomexicanus* (Standl.) Standl. ex W. T. Marshall.
Syn.: *Echinocereus triglochidiatus* Engelm. var. *polyacanthus* (Engelm. 1859 non 1848) L. Benson

Echinocereus triglochidiatus Engelm. var. *triglochidiatus*

Echinomastus erectocentrus (Coult.) Britt. & Rose var. *erectocentrus*
Syn.: *Neolloydia erectocentra* (Coult.) L. Benson var. *erectocentra*

Echinomastus intertextus (Engelm.) Britt. & Rose
Syn.: *Neolloydia intertexta* (Engelg.) L. Benson

Echinomastus johnsonii (Parry) Baxter–Beehive cactus
Syn.: *Neolloydia johnsonii* (Parry) L. Benson

Epithelantha micromeris (Engelm.) Weber ex Britt. & Rose

Ferocactus cylindraceus (Engelm.) Orcutt var. *cylindraceus*–Barrel cactus
Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *acanthodes*

Ferocactus cylindraceus (Engelm.) Orcutt var. *eastwoodiae* (Engelm.) N. P. Taylor

Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *eastwoodiae* L. Benson; Ferocactus eastwoodiae (L. Benson) L. Benson

Ferocactus cylindraceus (Engelm.) Orcutt. var. *lecontei* (Engelm.) H. Bravo
Syn.: *Ferocactus acanthodes* (Lemaire) Britt. & Rose var. *leconti* (Engelm.) Lindsay; *Ferocactus lecontei* (Engelm.) Britt. & Rose

Ferocactus emoryi (Engelm.) Orcutt–Barrel cactus
Syn.: *Ferocactus covillei* Britt. & Rose

Ferocactus wislizenii (Engelm.) Britt. & Rose–Barrel cactus

Lophocereus schottii (Engelm.) Britt. & Rose–Senita

Mammillaria grahamii Engelm. var. *grahamii*

Mammillaria grahamii Engelm. var. *oliviae* (Orcutt) L. Benson
Syn.: *Mammillaria oliviae* Orcutt

Mammillaria heyderi Mühlenpf. var. *heyderi*
Syn.: *Mammillaria gummifera* Engelm. var. *applanata* (Engelm.) L. Benson

Mammillaria heyderi Mühlenpf. var. *macdougalii* (Rose) L. Benson
Syn.: *Mammillaria gummifera* Engelm. var. *macdougalii* (Rose) L. Benson; *Mammillaria macdougalii* Rose

Mammillaria heyderi Mühlenpf. var. *meiacantha* (Engelm.) L. Benson
Syn.: *Mammillaria gummifera* Engelm. var. *meiacantha* (Engelm.) L. Benson

Mammillaria lasiacantha Engelm.

Mammillaria mainiae K. Brand.

Mammillaria microcarpa Engelm.

Mammillaria tetrancistra Engelm.

Mammillaria thornberi Orcutt

Mammillaria viridiflora (Britt. & Rose) Bödeker.
Syn.: *Mammillaria orestra* L. Benson

Mammillaria wrightii Engelm. var. *wilcoxii* (Toumey ex K. Schumann) W. T. Marshall
Syn.: *Mammillaria wilcoxii* Toumey

Mammillaria wrightii Engelm. var. *wrightii*

Opuntia acanthocarpa Engelm. & Bigel. var. *acanthocarpa*–Buckhorn cholla

Opuntia acanthocarpa Engelm. & Bigel. var. *coloradensis* L. Benson

Opuntia acanthocarpa Engelm. & Bigel. var. *major* L. Benson
Syn.: *Opuntia acanthocarpa* Engelm. & Bigel var. *ramosa* Peebles

Opuntia acanthocarpa Engelm. & Bigel. var. *thornberi* (Thornber & Bonker) L. Benson
Syn.: *Opuntia thornberi* Thornber & Bonker

Opuntia arbuscula Engelm.–Pencil cholla

Opuntia basilaris Engelm. & Bigel. var. *aurea* (Baxter) W. T. Marshall–Yellow beavertail
Syn.: *Opuntia aurea* Baxter

Opuntia basilaris Engelm. & Bigel. var. *basilaris–B*eavertail cactus

Opuntia basilaris Engelm. & Bigel. var. *longiareolata* (Clover & Jotter) L. Benson

Opuntia basilaris Engelm. & Bigel. var. *treleasei* (Coult.) Toumey

Opuntia bigelovii Engelm.–Teddy-bear cholla

Opuntia campii ined.

Opuntia canada Griffiths (*O. phaeacantha* Engelm. var. *laevis X major* and *O. gilvescens* Griffiths).

Opuntia chlorotica Engelm. & Bigel.–Pancake prickly-pear

Opuntia clavata Engelm.–Club cholla

Opuntia curvospina Griffiths

Opuntia echinocarpa Engelm. & Bigel–Silver cholla

Opuntia emoryi Engelm.–Devil cholla
Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *stanlyi*

Opuntia engelmannii Salm-Dyck ex Engelm. var. *engelmannii*–Engelmann's prickly-pear
Syn.: *Opuntia phaeacantha* Engelm. var. *discata* (Griffiths) Benson & Walkington

Opuntia engelmannii Salm-Dyck ex Engelm. var. *flavospina* (L.Benson) Parfitt & Pinkava
Syn.: *Opuntia phaeacantha* Engelm. var. *flavispina* L. Benson

Opuntia erinacea Engelm. & Bigel. var. *erinacea–M*ohave prickly-pear

Opuntia erinacea Engelm. & Bigel. var. *hystricina* (Engelm. & Bigel.) L. Benson
Syn.: *Opuntia hystricina* Engelm. & Bigel.

Opuntia erinacea Engelm. & Bigel. var. *ursina* (Weber) Parish–Grizzly bear prickly-pear
Syn.: *Opuntia ursina* Weber

Opuntia erinacea Engelm. & Bigel. var. *utahensis* (Engelm.) L. Benson
Syn.: *Opuntia rhodantha* Schum.

Opuntia fragilis Nutt. var. *brachyarthra* (Engelm. & Bigel.) Coult.

Opuntia fragilis Nutt. var. *fragilis*–Little prickly-pear

Opuntia fulgida Engelm. var. *fulgida*–Jumping chain-fruit cholla

Opuntia fulgida Engelm. var. *mammillata* (Schott) Coult.

Opuntia imbricata (Haw.) DC.–Tree cholla

Opuntia X kelvinensis V. & K. Grant pro sp.
Syn.:*Opuntia kelvinensis* V. & K. Grant

Opuntia kleiniae DC. var. *tetracantha* (Toumey) W. T. Marshall
Syn.: *Opuntia tetrancistra* Toumey

Opuntia kunzei Rose.
Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *kunzei* (Rose) L. Benson; *Opuntia kunzei* Rose var. *wrightiana* (E. M. Baxter) Peebles; *Opuntia wrightiana* E. M. Baxter

Opuntia leptocaulis DC.–Desert Christmas cactus, Pencil cholla

Opuntia littoralis (Engelm.) Cockl. var. *vaseyi* (Coult.) Benson & Walkington

Opuntia macrocentra Engelm.–Purple prickly-pear
Syn.: *Opuntia violacea* Engelm. ex B. D. Jackson var. *macrocentra* (Engelm.) L. Benson; *Opuntia violacea* Engelm. ex B. D. Jackson var. *violacea*

Opuntia macrorhiza Engelm. var. *macrorhiza–P*lains prickly-pear
Syn.: *Opuntia plumbea* Rose

Opuntia macrorhiza Engelm. var. *pottsii* (Salm-Dyck) L. Benson

Opuntia martiniana (L. Benson) Parfitt
Syn.: *Opuntia littoralis* (Engelm.) Cockerell var. *martiniana* (L. Benson) L. Benson; *Opuntia macrocentra* Engelm. var. *martiniana L. Benson*

Opuntia nicholii L. Benson–Navajo Bridge prickly-pear

Opuntia parishii Orcutt.
Syn.: *Opuntia stanlyi* Engelm. ex B. D. Jackson var. *parishii* (Orcutt) L. Benson

Opuntia phaeacantha Engelm. var. *laevis* (Coult.) L. Benson
Syn.: *Opuntia laevis* Cult.

Opuntia phaeacantha Engelm. var. *major* Engelm.

Opuntia phaeacantha Engelm. var. *phaeacantha*

Opuntia phaeacantha Engelm. var. *superbospina* (Griffiths) L. Benson

Opuntia polyacantha Haw. var. *juniperina* (Engelm.) L. Benson

Opuntia polyacantha Haw. var. *rufispina* (Engelm.) L. Benson

Opuntia polyacantha Haw. var. *trichophora* (Engelm. & Bigel.) L. Benson

Opuntia pulchella Engelm.–Sand cholla

Opuntia ramosissima Engelm.–Diamond cholla

Opuntia santa-rita (Griffiths & Hare) Rose–Santa Rita prickly-pear
Syn.: *Opuntia violacea* Engelm. ex B. D. Jackson var. *santa-rita* (Griffiths & Hare) L. Benson

Opuntia spinosior (Engelm.) Toumey–Cane cholla

Opuntia versicolor Engelm.–Staghorn cholla

Opuntia vivipara Engelm

Opuntia whipplei Engelm. & Bigel. var. *multigeniculata* (Clokey) L. Benson

Opuntia whipplei Engelm. & Bigel. var. *whipplei–W*hipple cholla

Opuntia wigginsii L. Benson

Pediocactus papyracanthus (Engelm.) L. Benson Grama grass cactus
Syn.: *Toumeya papyracanthus* (Engelm.) Britt. & Rose

Pediocactus simpsonii (Engelm.) Britt & Rose var. *simpsonii*

Peniocereus greggii (Engelm.) Britt. & Rose var. *greggii*–Night-blooming cereus
Syn.: *Cereus greggii* Engelm.

Peniocereus greggii (Engelm.) Britt & Rose var. *transmontanus*–Queen-of-the-Night

Peniocereus striatus (Brandegee) Buxbaum.
Syn.: *Neoevansia striata* (Brandegee) Sanchez-Mejorada; *Cereus striatus* Brandegee; *Wilcoxia diguetii* (Webber) Peebles

Sclerocactus parviflorus Clover & Jotter var. *intermedius* (Peebles) Woodruff & L. Benson
Syn.: *Sclerocactus intermedius* Peebles

Sclerocactus parviflorus Clover & Jotter var. *parviflorus*
Syn.: *Sclerocactus whipplei* (Engelm. & Bigel.) Britt. & Rose var. *roseus* (Clover) L. Benson

Sclerocactus pubispinus (Engelm.) L. Peebles

Sclerocactus spinosior (Engelm.) Woodruff & L. Benson
Syn.: *Sclerocactus pubispinus* (Engelm.) L. Benson var. *sileri* L. Benson

Sclerocactus whipplei (Engelm. & Bigel.) Britt. & Rose

Stenocereus thurberi (Engelm.) F. Buxbaum–Organ pipe cactus
Syn.: *Cereus thurberi* Engelm.; *Lemairocereus thurberi* (Engelm.) Britt. & Rose

CAMPANULACEAE Bellflower Family

Lobelia cardinalis L. ssp. *graminea* (Lam.) McVaugh–Cardinal flower

Lobelia fenestralis Cav.–Leafy lobelia

Lobelia laxiflora H. B. K. var. *angustifolia* A. DC.

CAPPARACEAE Cappar Family [=Capparidaceae]

Cleome multicaulis DC.–Playa spiderflower

CHENOPODIACEAE Goosefoot Family

Atriplex hymenelytra (Torr.) Wats.

CRASSULACEAE Stonecrop Family

Dudleya arizonica (Nutt.) Britt. & Rose
Syn.: *Echeveria pulverulenta* Nutt. ssp. *arizonica* (Rose) Clokey

Dudleya saxosa (M.E. Jones) Britt. & Rose ssp. *collomiae* (Rose) Moran
Syn.: *Echeveria collomiae* (Rose) Kearney & Peebles

Graptopetalum bartramii Rose
Syn.:*Echevaria bartramii* (Rose) K. & P.

Graptopetalum bartramii Rose–Bartram’s stonecrop, Bartram’s live-forever
Syn.: *Echeveria bartramii* (Rose) Kearney & Peebles

Graptopetalum rusbyi (Greene) Rose
Syn.: *Echeveria rusbyi* (Greene) Nels. & Macbr.

Sedum cockerellii Britt.

Sedum griffithsii Rose

Sedum lanceolatum Torr.
Syn.: *Sedum stenopetalum* Pursh

Sedum rhodanthum Gray

Sedum stelliforme Wats.

CROSSOSOMATACEAE Crossosoma Family

Apacheria chiricahuensis C. T. Mason–Chiricahua rock flower

CUCURBITACEAE Gourd Family

Tumamoca macdougalii Rose–Tumamoc globeberry

EUPHORBIACEAE Spurge Family

Euphorbia plummerae Wats.–Woodland spurge

Sapium biloculare (Wats.) Pax–Mexican jumping-bean

FABACEAE Pea Family [=Leguminosae]

Astragalus corbrensis Gray var. *maguirei* Kearney

Astragalus cremnophylax Barneby var. *myriorraphis* Barneby–Cliff milk-vetch

Astragalus hypoxylus Wats.–Huachuca milk-vetch

Astragalus nutriosensis Sanderson–Nutrioso milk-vetch

Astragalus xiphoides (Barneby) Barneby–Gladiator milk-vetch

Cercis occidentalis Torr.–California redbud

Errazurizia rotundata (Woot.) Barneby
Syn.: *Parryella rotundata* Woot.

Lysiloma microphylla Benth. var. *thornberi* (Britt. & Rose) Isely–Feather bush
Syn.: *Lysiloma thornberi* Britt. & Rose

Phaseolus supinus Wiggins & Rollins

FOUQUIERIACEAE Ocotillo Family

Fouquieria splendens Engelm.–Ocotillo, coach-whip, monkey-tail

GENTIANACEAE Gentian Family

Gentianella wislizenii (Engelm.) J. Gillett
Syn.: *Gentiana wislizenii* Engelm.

LAMIACEAE Mint Family

Hedeoma diffusum Green–Flagstaff pennyroyal

Salvia dorrii ssp. *mearnsii*

Trichostema micranthum Gray

LILIACEAE Lily Family

Allium acuminatum Hook.

Allium bigelovii Wats.

Allium biseptrum Wats. var. *palmeri* (Wats.) Cronq.
Syn.: *Allium palmeri* Wats.

Allium cernuum Roth. var. *neomexicanum* (Rydb.) Macbr.–Nodding onion

Allium cernuum Roth. var. *obtusum* Ckll.

Allium geyeri Wats. var. *geyeri*

Allium geyeri Wats. var. *tenerum* Jones

Allium kunthii Don

Allium macropetalum Rydb.

Allium nevadense Wats. var. *cristatum* (Wats.) Ownbey

Allium nevadense Wats. var. *nevadense*

Allium parishii Wats.

Allium plummerae Wats.

Allium rhizomatum Woot. & Standl. Incl.: *Allium glandulosum* Link & Otto *sensu* Kearney & Peebles

Androstephium breviflorum Wats.–Funnel-lily

Calochortus ambiguus (Jones) Ownbey

Calochortus aureus Wats.
Syn.: *Calochortus nuttallii* Torr. & Gray var. *aureus* (Wats.) Ownbey

Calochortus flexuosus Wats.–Straggling mariposa

Calochortus gunnisonii Wats.

Calochortus kennedyi Porter var. *kennedyi*–Desert mariposa

Calochortus kennedyi Porter var. *munzii* Jeps.

Dichelostemma pulchellum (Salisbi) Heller var. *pauciflorum* (Torr.) Hoover

Disporum trachycarpum (Wats.) Benth. & Hook. var. *subglabrum* Kelso

Disporum trachycarpum (Wats.) Benth. & Hook. var. *trachycarpum*

Echeandia flavescens (Schultes & Schultes) Cruden
Syn.: *Anthericum torreyi* Baker

Eremocrinum albomarginatum Jones

Fritillaria atropurpurea Nutt.

Hesperocallis undulata Gray–Ajo lily

Lilium parryi Wats.–Lemon lily

Lilium umbellatum Pursh

Maianthemum racemosum (L.) Link. ssp. *amplexicaule* (Nutt.) LaFrankie
Syn.: *Smilacina racemosa* (L.) Desf. var. *amplexicaulis* (Nutt.) Wats.

Maianthemum racemosum (L.) Link ssp. *racemosum*–False Solomon's seal
Syn.: *Smilacina racemosa* (L.) Desf. var. *racemosa*; *Smilacina racemosa* (L.) Desf. var. *cylindrata* Fern.

Maianthemum stellatum (L.) Link
Syn.: *Smilacina stellata* (L.) Desf.–Starflower

Milla biflora Cav.–Mexican star

Nothoscordum texanum Jones

Polygonatum cobrense (Woot. & Standl.) Gates

Streptopus amplexifolius (L.) DC.–Twisted stalk

Triteleia lemmonae (Wats.) Greene

Triteleiopsis palmeri (Wats.) Hoover

Veratrum californicum Durand.–False hellebore

Zephyranthes longifolia Hemsl.–Plains rain lily

Zigadenus elegans Pursh–White camas, alkali-grass

Zigadenus paniculatus (Nutt.) Wats.–Sand-corn

Zigadenus virescens (H. B. K.) Macbr.

MALVACEAE Mallow Family

Abutilon parishii Wats.–Tucson Indian mallow

Abutilon thurberi Gray–Baboquivari Indian mallow

NOLINACEAE Nolina

Dasylirion wheeleri Wats.–Sotol, desert spoon
Nolina bigelovii (Torr.)Wats.–Bigelow's nolina
Nolina microcarpa Wats.–Beargrass, sacahuista
Nolina parryi Wats.–Parry's nolina
Nolina texana Wats. var. *compacta* (Trel.) Johnst.–Bunchgrass

ONAGRACEAE Evening Primrose Family

Camissonia exilis (Raven) Raven

ORCHIDACEAE Orchid Family

Calypso bulbosa (L.) Oakes var. *americana* (R. Br.) Luer

Coeloglossum viride (L.) Hartmann var. *virescens* (Muhl.) Luer
Syn.: *Habenaria viridis* (L.) R. Br. var. *bracteata* (Muhl.) Gray

Corallorhiza maculata Raf.–Spotted coral root

Corallorhiza striata Lindl.–Striped coral root

Corallorhiza wisteriana Conrad–Spring coral root

Epipactis gigantea Douglas ex Hook.–Giant helleborine

Goodyera oblongifolia Raf.

Goodyera repens (L.) R. Br.

Hexalectris spicata (Walt.) Barnhart–Crested coral root

Listera convallarioides (Swartz) Nutt.–Broad-leaved twayblade

Malaxis corymbosa (S. Wats.) Kuntze

Malaxis ehrenbergii (Reichb. f.) Kuntze

Malaxis macrostachya (Lexarza) Kuntze–Mountain malaxia
Syn.: *Malaxis soulei* L. O. Williams

Malaxis tenuis (S. Wats.) Ames

Platanthera hyperborea (L.) Lindley var. *gracilis* (Lindley) Luer
Syn.: *Habenaria sparsiflora* Wats. var. *laxiflora* (Rydb.) Correll

Platanthera hyperborea (L.) Lindley var. *hyperborea*–Northern green orchid
Syn.: *Habenaria hyperborea* (L.) R. Br.

Platanthera limosa Lindl.–Thurber's bog orchid
Syn.: *Habenaria limosa* (Lindley) Hemsley

Platanthera sparsiflora (Wats.) Schlechter var. *ensifolia* (Rydb.) Luer

Platanthera sparsiflora (Wats.) var. *laxiflora* (Rydb.) Correll

Platanthera sparsiflora (Wats.) Schlechter var. *sparsiflora*–Sparsely-flowered bog orchid
Syn.: *Habenaria sparsiflora* Wats.

Platanthera stricta Lindl.–Slender bog orchid
Syn.: *Habenaria saccata* Greene; *Platanthera saccata* (Greene) Hulten

Platanthera viridis (L.) R. Br. var. *bracteata* (Muhl.) Gray–Long-bracted habenaria

Spiranthes michaucana (La Llave & Lex.) Hemsl.

Spiranthes parasitica A. Rich. & Gal.

Spiranthes romanzoffiana Cham.–Hooded ladies tresses

PAPAVERACEAE Poppy Family

Arctomecon californica Torr. & Frém.–Golden-bear poppy, Yellow-flowered desert poppy

PINACEAE Pine Family

Pinus aristata Engelm.–Bristlecone pine

POLYGONACEAE Buckwheat Family

Eriogonum apachense Reveal

Eriogonum capillare Small

Eriogonum mortonianum Reveal–Morton's buckwheat

Eriogonum ripleyi J. T. Howell–Ripley's wild buckwheat, Frazier's Well buckwheat

Eriogonum thompsonae Wats. var. *atwoodii* Reveal–Atwood's buckwheat

PORTULACEAE Purslane Family

Talinum humile Greene–Pinos Altos flame flower

Talinum marginatum Greene

Talinum validulum Greene–Tusayan flame flower

PRIMULACEAE Primrose Family

Dodecatheon alpinum (Gray) Greene ssp. *majus* H. J. Thompson

Dodecatheon dentatum Hook. ssp. *ellisiae* (Standl.) H. J. Thompson

Dodecatheon pulchellum (Raf.) Merrill

Primula hunnewellii Fern.

Primula rusbyi Greene

Primula specuicola Rydb.

RANUNCULACEAE Buttercup Family

Aquilegia caerulea James ssp. *pinetorum* (Tidest.) Payson–Rocky Mountain Columbine

Aquilegia chrysantha Gray

Aquilegia desertorum (Jones) Ckll.–Desert columbine, Mogollon columbine

Aquilegia elegantula Greene

Aquilegia longissima Gray–Long Spur Columbine

Aquilegia micrantha Eastw.

Aquilegia triternata Payson

ROSACEAE Rose Family

Rosa stellata Woot.–ssp. *abyssa* A. Phillips Grand Canyon rose
Vauquelinia californica (Torr.) Sarg. ssp. *pauciflora* (Standl.) Hess & Henrickson–Few-flowered Arizona rosewood

SCROPHULARIACEAE Figwort Family

Castilleja mogollonica Pennell

Penstemon albomarginatus Jones

Penstemon bicolor (Brandeg.) Clokey & Keck ssp. *roseus* Clokey & Keck

Penstemon clutei A. Nels.

Penstemon distans N. Holmgren–Mt. Trumbull beardtongue

Penstemon linarioides spp. maguirei

SIMAROUBACEAE Simarouba Family

Castela emoryi (Gray) Moran & Felger–Crucifixion thorn
Syn.: *Holacantha emoryi* Gray

STERCULIACEAE Cacao Family

Fremontodendron californicum (Torr.) Coville–Flannel bush

C. Salvage assessed native plants as prescribed in A.R.S. § 3-903(B)(3) that require a permit for removal:

BIGNONIACEAE Bignonia Family

Chilopsis linearis (Cav.) Sweet var. *arcuata* Fosberg–Desert-willow

Chilopsis linearis (Cav.) Sweet var. *glutinosa* (Engelm.) Fosberg

FABACEAE Pea Family [=Leguminosae]

Cercidium floridum Benth.–Blue palo verde

Cercidium microphyllum (Torr.) Rose & Johnst.–Foothill palo verde

Olneya tesota Gray–Desert ironwood

Prosopis glandulosa Torr. var. *glandulosa*–Honey mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *glandulosa* (Torr.) Ckll.

Prosopis glandulosa Torr. var. *torreyana* (Benson) M. C. Johnst.–Western honey mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *torreyana* Benson

Prosopis pubescens Benth.–Screwbean mesquite

Prosopis velutina Woot.–Velvet mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *velutina* (Woot.) Sarg.

Psorothamnus spinosus (Gray) Barneby–Smoke tree.
Syn.: *Dalea spinosa* Gray

D. Harvest restricted native plants as prescribed at A.R.S. § 3-903(B)(4) that require a permit to cut or remove the plants for their by-products, fibers, or wood:

AGAVACEAE Agave Family (including Nolinaceae)

Nolina bigelovii (Torr.) Wats.–Bigelow's nolina

Nolina microcarpa Wats.–Beargrass, sacahuista

Nolina parryi Wats.–Parry's nolina

Nolina texana Wats. var. *compacta* (Trel.) Johnst.–Bunchgrass

Yucca baccata Torr. var. *baccata*–Banana yucca

Yucca schidigera Roezl.–Mohave yucca, Spanish dagger

FABACEAE Pea Family [=Leguminosae]

Olneya tesota Gray–Desert ironwood

Prosopis glandulosa Torr. var. *glandulosa*–Honey mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *glandulosa* (Torr.) Ckll.

Prosopis glandulosa Torr. var. *torreyana* (Benson) M. C. Johnst.–Western honey mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *torreyana* Benson

Prosopis pubescens Benth.–Screwbean mesquite

Prosopis velutina Woot.–Velvet mesquite
Syn.: *Prosopis juliflora* (Swartz) DC. var. *velutina* (Woot.) Sarg.

Historical Note

New Section recodified from 3 A.A.C. 4, Article 6 at 10 A.A.R. 726, effective February 6, 2004 (Supp. 04-1). Amended by final rulemaking at 14 A.A.R. 811, effective May 3, 2008 (Supp. 08-1).

3-107. Organizational and administrative powers and duties of the director

A. The director shall:

1. Formulate the program and policies of the department and adopt administrative rules to effect its program and policies.

2. Ensure coordination and cooperation in the department in order to achieve a unified policy of administering and executing its responsibilities.

3. Subject to section 35-149, accept, expend and account for gifts, grants, devises and other contributions of money or property from any public or private source, including the federal government. All contributions shall be included in the annual report under paragraph 6 of this subsection. Monies received under this paragraph shall be deposited, pursuant to sections 35-146 and 35-147, in special funds for the purpose specified, which are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

4. Contract and enter into interagency and intergovernmental agreements pursuant to title 11, chapter 7, article 3 with any private party or public agency.

5. Administer oaths to witnesses and issue and direct the service of subpoenas requiring witnesses to attend and testify at or requiring the production of evidence in hearings, investigations and other proceedings.

6. Not later than September 30 each year, issue a report to the governor and the legislature of the department's activities during the preceding fiscal year. The report may recommend statutory changes to improve the department's ability to achieve the purposes and policies established by law. The director shall provide a copy of the report to the Arizona state library, archives and public records.

7. Establish, equip and maintain a central office in Phoenix and field offices as the director deems necessary.

8. Sign all vouchers to expend money under this title, which shall be paid as other claims against this state out of the appropriations to the department.

9. Coordinate agricultural education efforts to foster an understanding of Arizona agriculture and to promote a more efficient cooperation and understanding among agricultural educators, producers, dealers, buyers, mass media and the consuming public to stimulate the production, consumption and marketing of Arizona agricultural products.

10. Employ staff subject to title 41, chapter 4, article 4 and terminate employment for cause as provided by title 41, chapter 4, article 5.

11. Conduct hearings on appeals by producers regarding the assessed actual costs of the plow up and the penalty of one hundred fifty per cent for unpaid costs pursuant to section 3-204.01. The director may adopt rules to implement this paragraph.

12. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

B. The director may:

1. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

2. Construct and operate border inspection stations or other necessary facilities in this state and cooperate by joint agreement with an adjoining state in constructing and operating border inspection stations or other facilities within the boundaries of this state or of the adjoining state.

3. Cooperate with agencies of the United States and other states and other agencies of this state and enter into agreements in developing and administering state and federal agricultural programs regarding the use of department officers, inspectors or other resources in this state, in other states or in other countries.

4. Cooperate with the office of tourism in distributing Arizona tourist information.

5. Enter into compliance agreements with any person, state or regulatory agency. For the purposes of this paragraph, "compliance agreement" means any written agreement or permit between a person and the department for the purpose of enforcing the department's requirements.

6. Abate, suppress, control, regulate, seize, quarantine or destroy any agricultural product or foodstuff that is adulterated or contaminated as the result of an accident at a commercial nuclear generating station as defined in section 26-301, paragraph 1. A person owning an agricultural product or foodstuff that has been subject to this paragraph may request a hearing pursuant to title 41, chapter 6, article 10.

7. Engage in joint venture activities with businesses and commodity groups that are specifically designed to further the mission of the department, that comply with the constitution and laws of the United States and that do not compete with private enterprise.

8. Sell, exchange or otherwise dispose of personal property labeled with the "Arizona grown" trademark. Revenues received pursuant to this paragraph shall be credited to the commodity promotion fund established by section 3-109.02.

3-903. Protected group of plants; botanical names govern; categories of protected plants; power to add or remove plants; annual hearing

A. The protected group of native plants shall include, and protected native plants shall be, any plant or part of a plant, except, unless otherwise specifically included, its seeds or fruit, which is growing wild on state land or public land or on privately owned land without being propagated or cultivated by human beings and which is included by the director on any of the definitive lists of protected categories of protected native plants described in this section. The director by definitive lists may divide any protected category into subcategories which are to receive different treatment under the rules adopted under this article to conserve or protect such plants. In the preparation of each list of plants within a protected category or subcategory the director shall list by botanical names all of those protected plants which are to fall within the protection of that category or subcategory. The botanical names of the listed plants govern in all cases in the interpretation of this article and any rules adopted under this article.

B. The director shall establish by rule the lists of plants in the following categories of protected native plants:

1. Highly safeguarded native plants to be afforded the exclusive protections, including the use of scientific or threatened collection and salvage permits, provided this category in this chapter. This category includes those species of native plants and parts of plants, including the seeds and fruit, whose prospects for survival in this state are in jeopardy or which are in danger of extinction throughout all or a significant portion of their ranges, and those native plants which are likely within the foreseeable future to become jeopardized or in danger of extinction throughout all or a significant portion of their ranges. This category also includes those plants resident to this state and listed as endangered, threatened, or category 1 in the federal endangered species act of 1973 (P.L. 93-205; 87 Stat. 884; 16 United States Code sections 1531 et seq.), as amended, and any regulations adopted under that act.

2. Salvage restricted native plants to be afforded the exclusive protections involving the use of salvage permits, tags and seals provided in this chapter. This category includes those native plants which are not included in the highly safeguarded category but are nevertheless subject to a high potential for damage by theft or vandalism.

3. Salvage assessed native plants to be afforded the exclusive protections, involving the use of salvage tags and seals and annual salvage permits, provided in this chapter. This category includes those native plants which are not included in either the highly safeguarded or salvage restricted categories but nevertheless have a sufficient value if salvaged to support the cost of salvage tags and seals.

4. Harvest restricted native plants to be afforded the exclusive protections involving the use of harvest permits and wood receipts provided in this chapter. This category includes those native plants which are not included in the highly safeguarded category but are subject to excessive harvesting or overcutting because of the intrinsic value of their by-products, fiber or woody parts.

C. The director by rule may add or remove a native plant to or from the protected group or any of the categories of protected native plants.

D. The director shall hold a public hearing on native plants at least every twelve months after giving notice as required by section 3-912, subsection B.

3-905. Destruction of protected plants by state

A. Except in an emergency, if a state agency proposes to remove or destroy protected native plants over an area of state land exceeding one-fourth acre, the agency shall notify the department in writing as provided in section 3-904 at least sixty days before the plants are destroyed, and any such destruction must occur within one year of the date of destruction disclosed in the notice. The department shall post and disseminate copies of the notice as provided in section 3-904, subsection E. This state and its agencies and political subdivisions are exempt from any fees established for salvaged plants.

B. If the director determines that the proposed action by the state agency may affect a highly safeguarded plant, he shall consult with the state agency and other appropriate parties and use the best scientific data available to issue a written finding as to whether the proposed action would appreciably reduce the likelihood of survival or recovery of the plant taxon in this state. If the determination is affirmative, the director shall also specify reasonable, prudent and distinct alternatives to the proposed project that can be implemented and are consistent with conserving the plant taxon.

C. The director shall adopt rules for the disposal and salvage of native plants subject to removal or destruction by a state agency either under permit to other government agencies or nonprofit organizations or sale to the general public or commercial dealers. The department may issue permits to donate, sell, salvage or harvest the plants after the it ascertains the validity of the request and determines the kinds and approximate number of the plants involved. The permit shall specify the number and species of protected native plants and the area from which they may be taken.

3-912. Rules; additional notice requirements

A. The director shall adopt rules to enforce this chapter pursuant to title 41, chapter 6.

B. In addition to the notice requirements prescribed in title 41, chapter 6, at least thirty days before any hearing at which a new rule or a change in a rule will be considered the department shall send a copy of the notice by first class mail to persons or entities requesting notice pursuant to section 3-904, subsection E.

RE: Department of Agriculture, Title 3, Chapter 3, Article 11, Fee Comparison Response

Dear Ms. Klein:

In response to Council Member Thorwald's question regarding the comparison of fees for native plant law education in other states, the Arizona Department of Agriculture is providing the response below.

Upon review of other state's native plant laws, no other state agency is required to provide native plant law education either by request or as mandated by court order for the violation of a native plant law. Arizona has a diverse and unique native plant population and in 1983 the Legislature saw that it was imperative to protect the biodiversity of the native landscape. As stated in A.R.S. § 3-911(C), the Department may collect reasonable fees for, seminars, courses, pamphlets and other educational programs and publications concerning the effect, intent and interpretation of this chapter, the identification, nature or condition of protected native plants and the feasibility and techniques for their conservation and salvage for presentation and dissemination to State agencies and political subdivisions; commercial businesses engaged in land development; landowners and the public at large. Additionally, persons or entities that are convicted of violating the native plant law, or adopted native plant rules and ordinances, and that are ordered by the court to attend educational classes or programs as part of their sentences.

The fees for the native plant law education was initially set in after the passing of the Arizona Native Plant Act of 1983 to partially cover the direct costs associated to providing training or seminars. Since that time the Department's general fund was greatly reduced and in 2008, all remaining general fund allocations to the native plant program were removed from the agencies budget. Currently, the program is completely fee funded and the fees associated to the native plant program are insufficient to cover a single FTE for issuing tags and permits, or for enforcement of native plant laws. The current fees of $10 for requested education and $25 for court ordered native plant law education does not sufficiently cover the direct costs for salary and education materials. While training can be made available virtually and there is not a direct cost associated to travel. There are cases where the Department may be requested to attend a native plant seminar or training in-

person by another agency, organization, or academic facility. In those cases the Department would incur travel costs and costs associated for education materials.

With the exponential growth seen in the state, the Department is also seeing a rise in land clearing operations where no efforts are being made to salvage protected native plants. During the rulemaking process this past year we found that a lot of land developers were just unaware that allowing salvage would not only benefit the native plant biodiversity but there was an opportunity to gain income by allowing a salvage operator to remove the protected native plants for a fee. The proposed increase to $14 for requested education and $35 for court ordered native plant law education is still below actual costs for these services, but this is in compliance with A.R.S. § 41-1008(A)(3) by not exceeding the percentage of change in the average consumer price index as published by the United States department of labor, bureau of labor statistics between what is proposed for the latest calendar year and the calendar year in which the last fee increase occurred.

Please contact Brian McGrew at (602) 542-3228 or bmcgrew@azda.gov with any questions about this fee comparison.

Sincerely,

Jack Peterson
Associate Director

ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM
Title 9, Chapter 22

Amend: R9-22-1413, R9-22-1421, R9-22-1432

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 12, 2024

SUBJECT: **ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM**
Title 9, Chapter 22

Amend: R9-22-1413, R9-22-1421, R9-22-1432

Summary:

This regular rulemaking from the Arizona Health Care Cost Containment System (AHCCCS) seeks to amend three (3) rules in Title 9, Chapter 22, Article 12 regarding AHCCCS Medical Coverage for Households. Specifically, AHCCCS indicates these rules provide guidelines for eligibility criteria under AHCCCS for medical coverage to qualifying households and intend to ensure that eligible families have access to essential medical services, facilitating healthcare affordability and accessibility statewide.

AHCCCS indicates certain current rules do not align with federal regulations or current practice, or provide true clarity to members as well as individuals utilizing them in determining eligibility. AHCCCS states it plans to amend these rules to ensure they align with the federal regulations in order to make them clearer and more understandable as identified in the recent Five-Year Review Report for these rules, which was approved by the Council on May 7, 2024. AHCCCS states failure to conduct this rulemaking will continue the misalignment of these regulations with federal standards and current practice.

1. **<u>Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?</u>**

AHCCCS cites both general and specific statutory authority for these rules.

2. **<u>Do the rules establish a new fee or contain a fee increase?</u>**

This rulemaking does not establish a fee or contain a fee increase.

3. **<u>Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?</u>**

AHCCCS indicates it did not review any study relevant to this rulemaking.

4. **<u>Summary of the agency's economic impact analysis:</u>**

AHCCCS anticipates no economic impact on small businesses or consumers. These changes are required to bring the rules into compliance with federal regulations so that AHCCCS may still draw down federal matching funds for services provided to members. These rules do not impose compliance or reporting requirements on small businesses beyond those already necessary to comply with federal law and state statute. Therefore, AHCCCS states, these changes are the most cost-effective way to continue to fund the care for members with no anticipated increase in costs to AHCCCS.

5. **<u>Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?</u>**

AHCCCS did not consider other alternatives because the revisions to the rule are the most cost effective and efficient method of complying with federal law and state law as well as flexibility identified by the Center for Medicare and Medicaid Services.

6. **<u>What are the economic impacts on stakeholders?</u>**

The rule is designed to provide a longer eligibility period for postpartum individuals. The agency states that newly eligible members will be directly benefitted by this rulemaking.

7. **<u>Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?</u>**

AHCCCS indicates there were no changes between the Notice of Proposed Rulemaking published in the Administrative Register on July 19, 2024 and the Notice of Final Rulemaking now before the Council for consideration.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

AHCCCS indicates it did not receive any public comments regarding this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

AHCCCS indicates the rules do not require the issuance of a permit, license, or agency authorization.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

AHCCCS indicates federal law 42 CFR Part 435 is applicable to these rules. AHCCCS indicates the rules are not more stringent than federal law.

11. Conclusion

This regular rulemaking from AHCCCS seeks to amend three (3) rules in Title 9, Chapter 22, Article 12 regarding AHCCCS Medical Coverage for Households. Specifically, AHCCCS indicates these rules provide guidelines for eligibility criteria under AHCCCS for medical coverage to qualifying households and intend to ensure that eligible families have access to essential medical services, facilitating healthcare affordability and accessibility statewide.

AHCCCS indicates certain current rules do not align with federal regulations or current practice, or provide true clarity to members as well as individuals utilizing them in determining eligibility. AHCCCS states it plans to amend these rules to ensure they align with the federal regulations in order to make them clearer and more understandable as identified in the recent Five-Year Review Report for these rules, which was approved by the Council on May 7, 2024. AHCCCS states failure to conduct this rulemaking will continue the misalignment of these regulations with federal standards and current practice.

AHCCCS is seeking the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A).

Council staff recommends approval of this rulemaking.

Jessica Klein, Chair
Governor's Regulatory Review Council
100 North 15th Avenue, Suite 305
Phoenix, Arizona 85007

RE: R9-22-14 Rulemaking

Dear Ms. Klein:

1.	The close of record date:	8/19/2024
2.	Does the rulemaking activity relate to a Five Year Review Report:	Yes
a.	If yes, the date the Council approved the Five Year Review Report:	5/7/2024
3.	Does the rule establish a new fee:	No
a.	If yes, what statute authorizes the fee:	N/A
4.	Does the rule contain a fee increase:	No
5.	Is an immediate effective date requested pursuant to A.R.S. 41-1032:	No

AHCCCS certifies that the preamble discloses a reference to any study relevant to the rule that the agency reviewed. AHCCCS certifies that the preamble states that it did not rely on any such study in the agency's evaluation of or justification for the rule.

AHCCCS certifies that the preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee of the number of new full-time employees necessary to implement and enforce the rule.

The following documents are enclosed:

1. Notice of Final Rulemaking, including the preamble, table of contents, and text of each rule;
2. If applicable: An economic, small business, and consumer impact statement that contains the information required by A.R.S. 41-1055;
3. If applicable: The written comments received by the agency concerning the proposed rule and a written record, transcript, or minutes of any testimony received if the agency maintains a written record, transcript or minutes;
4. If applicable: Any analysis submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of business in other states;
5. If applicable: Material incorporated by reference;
6. General and specific statutes authorizing the rules, including relevant statutory definitions; and

7. If applicable: If a term is defined in the rule by referring to another rule or a statute other than the general and specific statutes authorizing the rule, the statute or other rule referred to in the definition.

Sincerely,

Nicole Fries
Chief Deputy General Counsel

NOTICE OF FINAL RULEMAKING

TITLE 9. HEALTH SERVICES

CHAPTER 22. ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM - ADMINISTRATION

PREAMBLE

1. Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039 by the governor on:

April 18, 2024

2. Article, Part, or Section Affected (as applicable)	**Rulemaking Action**
R9-22-1413	Amend
R9-22-1421	Amend
R9-22-1432	Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. § 36-2903.01

Implementing statute: A.R.S. § 36-2901

4. The effective date of the rule:

This rule shall become effective 60 days after a certified original and preamble are filed in the Office of the Secretary of State. The effective date is (to be filled in by *Register* editor).

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Rulemaking Docket Opening: 30 A.A.R. 2380, Issue Date: July 19, 2024, Issue Number: 29, File number: R24-130

Notice of Proposed Rulemaking: 30 A.A.R. 2357, Issue Date: July 19, 2024, Issue Number: 29, File number: R24-128

6. The agency's contact person who can answer questions about the rulemaking:

Name: Sladjana Kuzmanovic

Title: Sr. Rules Analyst

Division: AHCCCS Office of the General Counsel
Address: 801 E. Jefferson Street, MD 6200
Phoenix, AZ 85034
Telephone: (602) 417-4232
Fax: (602) 253-9115
Email: AHCCCSRules@azahcccs.gov
Website: www.azahcccs.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Pursuant to A.R.S. § 36-2903.01, AHCCCS is mandated to adopt rules that establish a streamlined eligibility process, to be followed when determining eligibility for healthcare services provided. These rules provide guidelines for eligibility criteria under AHCCCS for medical coverage to qualifying households and intend to ensure that eligible families have access to essential medical services, facilitating healthcare affordability and accessibility statewide. However, certain current rules do not align with some of the federal regulations or current practice, or provide true clarity to members as well as individuals utilizing them in determining eligibility. AHCCCS plans to amend these rules to ensure they align with the federal regulations in order to make them clearer and more understandable as identified in recent five-year report approved by the Governor's Regulatory Review Council on May 7, 2024. Failure to conduct this rulemaking will continue the misalignment of these regulations with federal standards and current practice.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The Administration did not review or rely on any study for this rulemaking.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

10. A summary of the economic, small business, and consumer impact:

The Administration anticipates no impact on economic, small business and consumers as compared to last making of these rules. These changes are required to bring the rules into compliance with federal regulations, so that AHCCCS may still draw down federal matching funds for services provided to these members. These rules do not impose compliance or reporting requirements on small businesses beyond those already necessary to comply with federal law and state statute. Therefore, these changes are the most cost-effective way to continue to fund the care for these members, with no anticipated increase in costs to AHCCCS.

The last rulemaking in August 2023 focused on eligibility for postpartum pregnant women and there was no anticipated cost to the state because the federal government approved a waiver that allowed for 100% federal funds to cover the additional period of eligibility. This anticipated impact was carried out in the actual impact of the rule. Therefore, the cost to the state for these rules remains the same as during the last rulemaking, and

these changes are compliance-related in nature, with not anticipated additional cost.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

There are no changes between the proposed rulemaking and the final rulemaking.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

There were no public or stakeholder comments made about the rulemaking.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to the Administration or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The rule does not require the issuance of a regulatory permit. Therefore, a general permit is not applicable.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

The rules are not more stringent than 42 CFR Part 435.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No business competitiveness analysis was submitted to the Administration.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable

16. The full text of the rules follows:

TITLE 9. HELTH SERVICES

CHAPTER 22. ARIZONA HEALTH CARE COST CONTAINEMNT SYSTEM - ADMINISTRATION

ARTICLE 14. AHCCCS MEDICAL COVERAGE FOR HOUSEHOLDS

Section

R9-22-1413. Timeframes, Reinstatement of an Application

R9-22-1421. MAGI Based Income Eligibility

R9-22-1432. Young Adult Transitional Insurance

ARTICLE 14. AHCCCS MEDICAL COVERAGE FOR HOUSEHOLDS

R9-22-1413. TIMEFRAMES, REINSTATEMENT OF AN APPLICATION

A. The Administration or its designee shall complete an eligibility determination under R9-22-306(A)(1) unless:

1. The applicant is pregnant. The Administration or its designee shall complete an eligibility determination for a pregnant woman within 20 days after the application date unless additional information is required to determine eligibility; or
2. The applicant is in a hospital as an inpatient at the time of application. Within seven days of the Administration or its designee's receipt of a signed application the Administration or its designee shall complete an eligibility determination if the Administration or its designee does not need additional information or verification to determine eligibility.

B. The Administration or its designee shall ~~reopen or reinstate~~ <u>redetermine</u> eligibility of an individual who is discontinued for failure to submit the renewal form or necessary information, without requiring a new application, if the individual submits the renewal form or necessary information within 90 days after the date of discontinuance.

R9-22-1421. MAGI BASED INCOME ELIGIBILITY

A. In determining eligibility, if an individual would otherwise be ineligible under this Article due to excess income, the Administration or its designee shall subtract an amount equivalent to five percentage points of the Federal Poverty Level (FPL) from the household income.

B. A person is eligible under this Article when:

1. Subject to subsection (A), the monthly household income does not exceed the appropriate <u>percentage of the</u> FPL <u>under R9-22-1427</u>;
2. If ineligible under (B)(1), the household income determined in accordance with 26 CFR 1.36B–1(e) is below 100 percent FPL; or
3. For eligibility under R9-22-1437, the person's income during the period defined in R9-22-1437(C) does not exceed the <u>percentage of the</u> FPL under R9-22-1437(B).

C. The Administration or its designee shall consider the following factors when determining the income period to use to determine monthly income:

1. Type of income,
2. Frequency of income,
3. If source of income is new or terminated, or
4. Income fluctuation.

R9-22-1432. YOUNG ADULT TRANSITIONAL INSURANCE

An individual is eligible for AHCCCS medical coverage when the individual meets all of the following eligibility requirements:

1. Is 18 through 25 years of age;
2. Was in ~~the custody of the Department of Economic Security under A.R.S. Title 8, Chapter 5 or Chapter 10~~ <u>foster care under the responsibility of the State or Tribe within the State</u> on the individual's 18th birthday;
3. Was eligible for and receiving AHCCCS Medical Coverage on the individual's 18th birthday; and
4. Is not eligible for AHCCCS Medical Coverage under 42 U.S.C. 1396a(a)(10)(A)(i)(I) - (VII).

ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT

TITLE 9. HEALTH SERVICES

CHAPTER 22. ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM - ADMINISTRATION

ARTICLE 7. STANDARDS FOR PAYMENTS (R9-22-711)

ARTICLE 14. AHCCCS MEDICAL COVERAGE FOR HOUSEHOLDS (R9-22-1428)

- **Identification of rulemaking.**

The Arizona Health Care Cost Containment System Administration is the single State agency responsible for administration of the Medicaid program in Arizona. The program is jointly funded by the State, counties, and the federal government. Federal law imposes a substantial number of conditions on the receipt of federal financial assistance reflected in federal statutes (42 U.S.C. § 1396 et seq.) and regulation (generally, 42 C.F.R. Parts 430 through 455). Certain AHCCCS members receiving postpartum care are currently eligible for 60-days postpartum coverage through AHCCCS. As a result of Arizona's decision to opt-in to a 12-months postpartum coverage option through Laws 2022, Chapter 314, AHCCCS submitted a State Plan Amendment for CMS's approval. If the State Plan Amendment is approved, individuals who meet the requirements specified in rule, will be eligible for the 12 months of postpartum coverage while some individuals will still qualify only for the 60 days of postpartum coverage. Proposed AHCCCS rule R9-22-1428 specifies the different eligibility requirements for the two different postpartum coverage categories.

In addition, modifications to A.A.C. R9-22-711 as well as language added to R9-22-1428 clarify that individuals who are more than 60 days postpartum are subject to

copays. The previous language regarding copays specified that postpartum individuals (in general) were not subject to copays, because the only postpartum eligibility available was for the 60 days. In the 12 month postpartum coverage option, individuals who are more than 60-days postpartum are subject to copays.

- **The conduct and its frequency of occurrence that the rule is designed to change:**

The rule is designed to provide a longer eligibility period for postpartum individuals.

- **The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed:**

If the rule is not changed then the rules will not be aligned with AHCCCS's contract with the Center for Medicare and Medicaid Services (CMS), the State Plan.

- **The estimated change in frequency of the targeted conduct expected from the rule change:**

There is no estimated change in frequency of the targeted conduct.

2. Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the rule making.

The costs to the general fund were considered when the legislature approved this extended eligibility period in House Bill 2863, however newly eligible members will be directly benefitted by this rulemaking.

3. **Cost benefit analysis.**

a. **Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking including the number of new full-time employees necessary to implement and enforce the proposed rule:**

i. Cost:

The federal government, through the Medicaid program, will fund a substantial percentage of the services members are likely to receive when in this new eligibility category. The Administration does not anticipate that the rule will have an effect on State revenues or materially impact other agencies.

ii. Benefit:

The Administration anticipates that the rulemaking will ensure better health outcomes for postpartum individuals.

iii. Need for additional Full-time Employees:

The Agency does not anticipate the need to hire full-time employees as a result of this rulemaking.

- **Probable costs and benefits to political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking.**

  This rulemaking does not directly affect political subdivisions.

4. **General description of the probable impact on private and public employment in**

businesses, agencies, and political subdivisions of this state directly affected by the rulemaking.

The Agency anticipates that public and private employment will not be impacted by the changes.

5. **Statement of probable impact of the proposed rule on small businesses. The statement shall include:**

   a. **Identification of the small businesses subject to the proposed rulemaking.**

      The rulemaking will not impact small businesses.

   b. **Administrative and other costs required for compliance with the proposed rulemaking.**

      The Agency anticipates no impact on the administrative expenses of small businesses.

   c. **Description of methods prescribed in section A.R.S. § 41-1035 that the agency may use to reduce the impact on small businesses, with reasons for the agency's decision to use or not use each method:**

      i. **Establishing less stringent compliance or reporting requirements in the rule for small businesses;**

         This rule does not impose compliance or reporting requirements on small businesses.

      ii. **Establishing less stringent schedules deadlines in the rule for compliance or reporting requirements for small businesses;**

          This rule does not impose compliance or reporting requirements on small businesses.

iii. **Consolidate or simplify the rule's compliance or reporting requirements for small businesses;**

This rule does not impose compliance or reporting requirements on small businesses.

iv. **Establish performance standards for small businesses to replace design or operational standards in the rule; and**

This rule does not establish performance standards for small businesses.

v. **Exempting small businesses from any or all requirements of the rule.**

Exempting small businesses is not applicable to this rule.

d. **The probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking.**

The rule will not affect private persons and consumers unless they will be part of this new eligibility category.

6. **Statement of the probable effect on state revenues.**

It is anticipated that the rule will not affect state revenues.

7. **Description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking, including the monetizing of the costs and benefits for each option and providing the rationale for not using nonselected alternatives.**

The Agency did not consider other alternatives because the revisions to the rule are the most cost effective and efficient method of complying with federal law and state law as well as flexibility identified by CMS.

8. A description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data.

No additional data was obtained and used as the basis of this rule.

C. Upon reaching his or her 21st birthday, the member's CRS Designation will be ended.

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 6 A.A.R. 3317, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 808, effective April 3, 2004 (Supp. 04-1). Section made by exempt rulemaking at 18 A.A.R. 2074, effective August 1, 2012 (Supp. 12-3). Rulemaking exemption repealed by Laws, 2012, Ch. 299, Section 7; therefore a new Section was made by final rulemaking at 19 A.A.R. 2954, effective November 10, 2013 (Supp. 13-3). Amended by final rulemaking at 24 A.A.R. 2855, effective November 16, 2018 (Supp. 18-3).

R9-22-1306. Repealed

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Section repealed by final rulemaking at 10 A.A.R. 808, effective April 3, 2004 (Supp. 04-1). Section made by exempt rulemaking at 18 A.A.R. 2074, effective August 1, 2012 (Supp. 12-3). Rulemaking exemption repealed by Laws, 2012, Ch. 299, Section 7; therefore a new Section was made by final rulemaking at 19 A.A.R. 2954, effective November 10, 2013 (Supp. 13-3). Repealed by final rulemaking at 24 A.A.R. 2855, effective November 16, 2018 (Supp. 18-3).

R9-22-1307. Covered Services

The Administration will cover medically necessary services as described within Article 2 unless otherwise specified in contract.

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 6 A.A.R. 3317, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 808, effective April 3, 2004 (Supp. 04-1). Section made by exempt rulemaking at 18 A.A.R. 2074, effective August 1, 2012 (Supp. 12-3). Rulemaking exemption repealed by Laws, 2012, Ch. 299, Section 7; therefore a new Section was made by final rulemaking at 19 A.A.R. 2954, effective November 10, 2013 (Supp. 13-3).

R9-22-1308. Repealed

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 6 A.A.R. 3317, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 808, effective April 3, 2004 (Supp. 04-1).

R9-22-1309. Repealed

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 6 A.A.R. 3317, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 808, effective April 3, 2004 (Supp. 04-1).

ARTICLE 14. AHCCCS MEDICAL COVERAGE FOR HOUSEHOLDS

R9-22-1401. General Information

A. Scope. This Article contains eligibility criteria to determine whether a household or individual is eligible for AHCCCS medical coverage. Eligibility criteria described under Article 3 applies to this Article.

B. Definitions. In addition to definitions contained in R9-22-101 and A.R.S. § 36-2901, the words and phrases in this Article, Article 3 and Article 15 have the following meanings unless the context explicitly requires another meaning:

"Burial plot" means a space reserved in a cemetery, crypt, vault, or mausoleum for the remains of a deceased person.

"Caretaker relative" means:

A parent of a dependent child with whom the child is living;

When the dependent child does not live with a parent or the parent in the home is incapacitated, another relative of the child by blood, adoption, or marriage in the home who assumes primary responsibility for the child's care; or

A woman in her third trimester of pregnancy with no other dependent children.

"Cash assistance" means a program administered by the Department that provides assistance to needy families with dependent children under 42 U.S.C. 601 et seq.

"Dependent child" means a child under the age of 18, or if age 18 is a full-time student in secondary school or equivalent vocational or technical training, if reasonably expected to complete such school or training before turning age 19.

"MAGI – based income" means Modified Adjusted Gross Income as defined under 42 CFR 435.603(e).

"Medical expense deduction" or "MED" means the cost of the following expenses if incurred in the United States:

A medical service or supply that would be covered if provided to an AHCCCS member of any age under Articles 2 and 12 of this Chapter;

A medical service or supply that would be covered if provided to an Arizona Long-term Care System member under 9 A.A.C. 28, Articles 2 and 11;

Other necessary medical services provided by a licensed practitioner or physician;

Assistance with daily living if the assistance is documented in an individual plan of care by a nurse, social service worker, registered therapist, or dietitian under the supervision of a physician except when provided by the spouse of an applicant or the parent of a minor child;

Medical services provided in a licensed nursing home or in an alternative HCBS setting under R9-28-101;

Purchasing and maintaining an animal guide or service animal for the assistance of a member of the MED family unit under R9-22-1436; and

Health insurance premiums, deductibles, and coinsurance, if the insured is a member of the MED family unit.

"Monthly income" means the gross countable income received or projected to be received during the month or the monthly equivalent.

"Monthly equivalent" means a monthly countable income amount established by averaging, prorating, or converting a person's income.

"Spendthrift restriction" means a legal restriction on the use of a resource that prevents a payee or beneficiary from alienating the resource.

"Tax dependent" is described under 42 CFR 435.4.

"Taxpayer" means a person who expects to file a tax return, and does not expect to be claimed as a tax dependent by another person.

"Title IV-D" means Title IV-D of the Social Security Act, 42 U.S.C. 651-669, the statutes establishing the child support enforcement and paternity program.

"Title IV-E" means Title IV-E of the Social Security Act 42 U.S.C. 670-679, the statutes establishing the foster care and adoption assistance programs.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1). Punctuation error corrected with a parenthesis added at the beginning of the definition "Caretaker" (Supp. 20-4).

R9-22-1402. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1403. Agency Responsible for Determining Eligibility

The Administration or its designee shall determine eligibility under the provisions of this Article. The Administration or its designee shall not discriminate against an applicant or member because of race, color, creed, religion, ancestry, national origin, age, sex, or physical or mental disability.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1404. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1405. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1406. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1407. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 19 A.A.R. 3309, November 30, 2013 (Supp. 13-4). Section repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014; this Section was slated to be codified as repealed in Supp. 14-1. Due to a clerical error the Section wasn't repealed in this Chapter until Supp. 20-4.

R9-22-1408. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1409. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1410. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Section repealed; new Section made by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1411. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1412. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by exempt rulemaking at 10 A.A.R. 23, effective December 9, 2003 (Supp. 03-4). Amended by exempt rulemaking at 10 A.A.R. 4588, effective October 12, 2004 (Supp. 04-4). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1413. Time-frames, Reinstatement of an Application

A. The Administration or its designee shall complete an eligibility determination under R9-22-306(A)(1) unless:
1. The applicant is pregnant. The Administration or its designee shall complete an eligibility determination for a pregnant woman within 20 days after the application date unless additional information is required to determine eligibility; or
2. The applicant is in a hospital as an inpatient at the time of application. Within seven days of the Administration or its designee's receipt of a signed application the Administration or its designee shall complete an eligibility determination if the Administration or its designee does not need additional information or verification to determine eligibility.

B. The Administration or its designee shall reopen or reinstate eligibility of an individual who is discontinued for failure to submit the renewal form or necessary information, without requiring a new application, if the individual submits the renewal form or necessary information within 90 days after the date of discontinuance.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1414. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1415. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1416. Effective Date of Eligibility

A. Except as provided in R9-22-303 and subsections (B), (C) and (D), the effective date of eligibility is the first day of the month that the applicant files an application if the applicant is eligible that month, or the first day of the first eligible month following the application month except for:
1. The MED program under R9-22-1439, and
2. Eligibility for a newborn under R9-22-1429.

B. The effective date of eligibility for an applicant who moves into Arizona is no sooner than the date Arizona residency is established.

C. The effective date of eligibility for an inmate applying for medical coverage is the date the applicant no longer meets the definition of an inmate of a public institution.

D. The effective date of eligibility for a newborn is no sooner than the date of birth.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1417. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1418. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1419. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1419.01. Repealed

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1419.02. Repealed

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1419.03. Repealed

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1419.04. Repealed

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Section repealed by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1420. Income Eligibility Criteria

A. Evaluation of income. In determining eligibility, the Administration or its designee shall evaluate the following types of income received by a person identified in subsection (B):
  1. Earned income, including in-kind income, before any deductions. For purposes of this Section, in-kind income means room, board, or provision for other needs in exchange for work performed. The person identified in subsection (B) shall ensure that the provider of the in-kind income establishes and verifies the monetary value of the item provided. The provider may be, but is not limited to:
     a. A landlord who provides all or a portion of rent or utilities in exchange for services;
     b. A store owner who gives goods such as groceries, clothes, or furniture in exchange for services; or
     c. An individual who trades goods such as a car, tools, trailer, building material, or gasoline in exchange for services;
  2. Self-employment income under R9-22-1424, including gross business receipts minus business expenses; and
  3. Unearned income, including deemed income under R9-22-317 from the sponsor of a non-citizen applicant.

B. MAGI income group. The Administration or its designee shall include the following persons in the MAGI income group:
  1. When the applicant is a taxpayer include:
     a. The applicant,
     b. Everyone the applicant expects to claim as a tax dependent for the current year, and
     c. The applicant's spouse, when living with the applicant.
  2. Except as provided in subsection (B)(3), when the applicant expects to be claimed as a tax dependent for the current year include:
     a. The taxpayer claiming the applicant,
     b. Everyone else the taxpayer expects to claim as a tax dependent,
     c. The taxpayer's spouse when living with the taxpayer, and
     d. The applicant's spouse, when living with the applicant.
  3. When any of the following apply, determine the persons whose income is included as described in subsection (4)(a) or (4)(b) based on the applicant's age:
     a. The applicant expects to be claimed as a tax dependent by someone other than a spouse or natural, adopted or step-parent;
     b. The applicant is under age 19, expects to be claimed as a tax dependent by a natural, adopted or step-parent, lives with more than one such parent and the parents do not expect to file a joint tax return; or

c. The applicant is under age 19 and expects to be claimed as a tax dependent by a non-custodial parent.
4. When the applicant is not a taxpayer, does not expect to be claimed as a tax dependent and is:
   a. Under age 19. Include the income of the applicant and when living with the applicant, the applicant's:
      i. Spouse;
      ii. Natural, adopted and step-children;
      iii. Natural, adopted and step-parents;
      iv. Natural, adopted and step-siblings; and
   b. Age 19 or older. Include the income of the applicant and when living with the applicant, the applicant's:
      i. Spouse;
      ii. Natural, adopted and step-children under age 19.
5. When the applicant is a pregnant woman, the Administration or its designee shall also include the number of expected babies only for the pregnant woman's income group.
6. When the taxpayer cannot reasonably establish that a person is the taxpayer's tax dependent, inclusion of the person in the taxpayer's MAGI income group is determined as provided in subsection (B)(4).

C. A person whose income is counted. The Administration or its designee shall count the MAGI-based income of all members of an applicant's MAGI income group with the following exceptions:
1. The income of an individual who is included in the MAGI income group of his or her natural, adoptive or step parent and is not expected to be required to file a tax return for the year in which eligibility for Medicaid is being determined, is not counted whether or not the individual files a tax return.
2. The income of a tax dependent other than the taxpayer's spouse or biological, adopted or stepchild who is not expected to be required to file a tax return for the year in which eligibility for Medicaid is being determined is not counted when the tax dependent is included in the taxpayer's MAGI income group, whether or not the tax dependent files a tax return.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1421. MAGI based Income Eligibility

A. In determining eligibility, if an individual would otherwise be ineligible under this Article due to excess income, the Administration or its designee shall subtract an amount equivalent to five percentage points of the Federal Poverty Level (FPL) from the household income.

B. A person is eligible under this Article when:
1. Subject to subsection (A), the monthly household income does not exceed the appropriate FPL;
2. If ineligible under (B)(1), the household income determined in accordance with 26 CFR 1.36B–1(e) is below 100 percent FPL; or
3. For eligibility under R9-22-1437, the person's income during the period defined in R9-22-1437(C) does not exceed the FPL under R9-22-1437(B).

C. The Administration or its designee shall consider the following factors when determining the income period to use to determine monthly income:
1. Type of income,
2. Frequency of income,
3. If source of income is new or terminated, or
4. Income fluctuation.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1422. Methods for Calculating Monthly Income

A. Projecting income.
1. Description. Projecting income is a method of determining the amount of income that a person will receive.
2. Calculation. The Administration or its designee shall project income by:
   a. Converting income to a monthly equivalent,
   b. Using unconverted income, or
   c. Prorating income to determine a monthly equivalent.
3. Exclusion. When calculating projected monthly income, the Administration or its designee shall exclude an unusual variation in income under R9-22-1424(E), except for a month in which the variation is anticipated to occur.

B. Averaged income.
1. Description. Averaging income proportionally distributes the person's income received on a regular basis.
2. Calculation. To average income, the Administration or its designee shall add the amount of the income and divide by the total number of pay periods. If the amount of income received per pay period fluctuates, and the fluctuation is expected to continue, the Administration or its designee shall:
   a. Use the averaged weekly or bi-weekly amounts to convert weekly or bi-weekly income to a monthly equivalent;
   b. Use the averaged monthly or semi-monthly amounts to project monthly income; and
   c. Use the averaged hours worked and multiply the average by the current rate of pay. If there is a change in the rate of pay, use the new rate of pay when calculating projected income under subsection (A).

C. Prorated income.
1. Description. Prorated income evenly distributes a person's income over the period the income is intended to cover to calculate a monthly equivalent.
2. Calculation. To prorate income, the Administration or its designee shall divide the total amount of the person's income received during the period by the number of months that the income is intended to cover.

D. Converted income.

1. Description. Converted income is income received weekly or biweekly that is changed to a monthly equivalent.
2. Calculation.
   a. The Administration or its designee shall average the weekly or bi-weekly income amounts before converting to the monthly equivalent if the person's past income fluctuates and the fluctuation is expected to recur.
   b. To convert income paid weekly to a monthly equivalent, the Administration or its designee shall multiply the weekly average by 4.3 weeks.
   c. To convert income paid bi-weekly to a monthly equivalent, the Administration or its designee shall multiply the bi-weekly average by 2.15 weeks.

E. Unconverted income.
1. Description. Unconverted income is the actual amount of income received or projected to be received during a month.
2. Calculation. The Administration or its designee shall sum the actual amount of income received or projected to be received during a month.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1423. Calculations and Use of Methods Listed in R9-22-1422 Based on Frequency of Income

A. Monthly income. If otherwise countable income is received monthly or in a lump sum, the Administration or its designee shall use the unconverted method for calculating monthly income.
1. Lump sum means a nonrecurring payment that serves as a complete payment.
2. Lump sum payments include but are not limited to: rebates or credits; inheritances; insurance settlements; and payments for prior months from such sources as Social Security, Railroad Retirement, or other benefits.
3. A lump sum payment may include a portion intended for the current month.

B. Weekly income. If income is received weekly, the Administration or its designee shall convert the income to a monthly equivalent under R9-22-1422(D).

C. Bi-weekly income. If income is received bi-weekly, the Administration or its designee shall convert the income to a monthly equivalent under R9-22-1422(D).

D. Semi-monthly or daily income. If income is received semi-monthly or daily, the Administration or its designee shall use the unconverted method for calculating monthly income under R9-22-1422(E).

E. Bimonthly, quarterly, semi-annual, or annual income. If income is received bimonthly, quarterly, semi-annually, or annually, the Administration or its designee shall prorate the income received or projected to be received under R9-22-1422(C).

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1424. Use of Methods Listed in R9-22-1423 Based on Type of Income

A. New income.
1. Description. New income is income received from a new source during the first calendar month that the income is received from the source.
2. Calculating monthly income.
   a. If a full month's income is received, the Administration or its designee shall use the appropriate method described in R9-22-1423 to calculate the monthly income.
   b. If less than a full month's income is received, the Administration or its designee shall use the unconverted method to calculate the monthly income.

B. Terminated income.
1. Terminated income is income received during the last calendar month when no more income is expected to be received from that source.
2. Calculating monthly income.
   a. If a full month's income is received, the Administration or its designee shall use the appropriate method described in R9-22-1423 to calculate the monthly income.
   b. If less than a full month's income is received, the Administration or its designee shall use the unconverted method to calculate the monthly income.

C. Break in income.
1. Description. A break in income is a break in established frequency of income of one calendar month or more.
2. Calculating monthly income.
   a. If a full month's income is received, the Administration or its designee shall use the appropriate method described in R9-22-1423 to calculate the monthly income.
   b. If less than a full month's income is received, the Administration or its designee shall use the unconverted method to calculate the monthly income.

D. Contract or regular seasonal income.
1. Descriptions.
   a. Contract income is income a person earns under a contract that specifies a length of time the contract covers, the amount of income to be paid, and the frequency of payment.
   b. Regular seasonal income is income that fluctuates based on season or is only received during a certain season, and can reasonably be anticipated based on history or other verification.
2. Calculating monthly income.
   a. When the contract or regular seasonal income will not fluctuate over the 12-month period beginning with the month the application or renewal is submitted, the Administration or its designee shall use the appropriate income calculation method in R9-22-1423 for the frequency of receipt.

b. When the contract or regular seasonal income is anticipated to fluctuate over the 12-month period beginning with the month the application or renewal is submitted, the Administration or its designee shall calculate the monthly income as follows:
   i. For a one-time contract that ends between the month the application or renewal is submitted and the end of the calendar year, divide the income that will be received from the application or renewal month through the end of the calendar year by the number of months in that period to get a monthly equivalent;
   ii. For contracts that extend into the next calendar year, contracts that are anticipated to be renewed and regular seasonal income, the Administration or its designee shall divide the income that will be received in the 12-month period beginning with the application or renewal month by 12 to get the monthly equivalent.

E. Unusual variation in the amount of income.
1. Description. Unusual variation is an amount of income that is different from the established amount received and is not projected to continue or recur.
2. Calculating monthly income.
   a. When calculating income for the month in which an unusual variation in income occurs, the Administration or its designee shall include the unusual variation in the income calculation.
   b. When an unusual variation in income occurs during the month, the Administration or its designee shall use the converted method for calculating monthly income if income is received weekly or bi-weekly.
   c. When projecting income for the months following the month in which the unusual variation occurs, the Administration or its designee shall exclude the unusual variation in income from the income calculation.

F. Self-employment income.
1. Description. Self-employment income is income a person earns from the person's own trade or business less allowable expenses.
2. Calculating monthly income. The Administration or its designee shall prorate the income under R9-22-1422.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1425. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1426. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1427. Eligibility Under MAGI

A. Caretaker Relatives. An individual is eligible for AHCCCS medical coverage as a Caretaker Relative when the individual meets the following requirements:
1. Is a caretaker relative as defined in R9-22-1401.
2. The total countable income under R9-22-1420(B) does not exceed 106 percent of the FPL for the number of people in the MAGI income group.

B. Continued medical coverage.
1. A caretaker relative eligible under subsection (A) and all dependent children eligible under subsection (D) in the caretaker relative's MAGI income group are entitled to continued AHCCCS coverage for up to 12 months if eligible under subsection (B)(1)(c)(i) and up to four months if eligible under subsection (B)(1)(c)(ii) if the MAGI income group's income exceeds the limit for the income group's size and the following conditions are met:
   a. The caretaker relative still lives with a dependent child;
   b. A caretaker relative in the income group received AHCCCS medical coverage under this Section for three calendar months out of the most recent six months; and
   c. The loss of AHCCCS coverage under this Section is due to:
      i. Increased earned income of a caretaker relative, or
      ii. Increased spousal support.
2. An applicant may be added to the continued medical coverage under subsection (B)(1), if the applicant did not reside in the household at the time continued medical coverage under this Section was determined and the applicant is:
   a. The spouse or dependent child of a caretaker relative receiving continued medical coverage, or
   b. The parent of a dependent child who is receiving continued medical coverage.

C. Pregnant Women. A pregnant woman is eligible for AHCCCS medical coverage when the total countable income under R9-22-1420(B) does not exceed 156 percent of the FPL for the number of people in the MAGI income group. A pregnant woman who applies for AHCCCS medical coverage during the pregnancy or postpartum period and is determined eligible, remains eligible throughout the postpartum period. The postpartum period begins the day the pregnancy terminates and ends the last day of the month in which the 60th day following pregnancy termination occurs.

D. Children. A child less than 19 years of age is eligible for AHCCCS medical coverage when the total countable income under

R9-22-1420(B) does not exceed the following percentage of the FPL for the number of people in the MAGI income group:
1. 147 percent for a child under one year of age,
2. 141 percent for a child age one through five years of age, or
3. 133 percent for all other persons.

E. Adults. An individual is eligible for AHCCCS medical coverage when the individual meets the following eligibility requirements:
1. Is 19 years of age or older but less than 65 years of age;
2. Is not pregnant;
3. Is not eligible for AHCCCS Medical Coverage under any other coverage group listed in 42 U.S.C. 1396a(a)(10)(A)(i);
4. Is not entitled to or enrolled for Medicare benefits under Part A or Part B;
5. The total countable income under R9-22-1420(B) does not exceed 133 percent of the FPL for the number of people in the MAGI income group; and
6. When the individual is a caretaker relative, but has income exceeding the limit in subsection (A)(2), each child under age 19 living with the individual is receiving AHCCCS medical coverage or KidsCare, or is enrolled in minimum essential coverage as defined in 42 CFR 435.4.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Section R9-22-1427 repealed; new Section R9-22-1427 made by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1428. Postpartum Extended Eligibility

A. Eligibility for 12-months postpartum coverage. Individuals who applied and were determined eligible while pregnant, including prior quarter months under R9-22-303(A), remain eligible through the last day of the month in which a 12-month postpartum period, beginning on the last day of the pregnancy, ends.

B. Copayments during the Postpartum Extended Eligibility period. Individuals eligible under this section are subject to copayments after the end of the 60-day postpartum period described in R9-22-1427.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1). New Section made by final rulemaking at 29 A.A.R. 1866 (August 25, 2023), with an immediate effective date of August 1, 2023 (Supp. 23-3).

R9-22-1429. Eligibility for a Newborn

A child born to a mother eligible for and receiving medical coverage under this Article, Article 15 of the Chapter, or 9 A.A.C. 28, is automatically eligible for AHCCCS medical coverage for a period not to exceed 12 months. Automatic eligibility begins on the child's date of birth and ends with the last day of the month in which the child turns age one.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192, effective January 7, 2014 (Supp. 14-1). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1430. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1431. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 2633, effective July 10, 2007 (Supp. 07-3). Amended by final rulemaking at 14 A.A.R. 1598, effective May 31, 2008 (Supp. 08-2). Amended by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1). Repealed by final rulemaking at 21 A.A.R. 1241, effective September 5, 2015 (Supp. 15-3).

R9-22-1432. Young Adult Transitional Insurance

An individual is eligible for AHCCCS medical coverage when the individual meets all of the following eligibility requirements:
1. Is 18 through 25 years of age;
2. Was in the custody of the Department of Economic Security under A.R.S. Title 8, Chapter 5 or Chapter 10 on the individual's 18th birthday;
3. Was eligible for and receiving AHCCCS Medical Coverage on the individual's 18th birthday; and
4. Is not eligible for AHCCCS Medical Coverage under 42 U.S.C. 1396a(a)(10)(A)(i)(I) - (VII).

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Amended by final rulemaking at 20 A.A.R. 192,

with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1433. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

R9-22-1434. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). New Section made by exempt rulemaking at 7 A.A.R. 5701, effective December 1, 2001 (Supp. 01-4). Section repealed by exempt rulemaking at 10 A.A.R. 4588, effective October 12, 2004 (Supp. 04-4).

R9-22-1435. Eligibility for a Person With Medical Expenses Whose Income is Over 100 Percent FPL

An applicant who is not eligible for AHCCCS medical coverage due to excess income may become AHCCCS eligible by deducting medical expenses from the applicant's income. This coverage is called Medical Expense Deduction (MED).

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1436. MED Family Unit

A. For the purpose of this Section, a child is an unmarried person under age 18.

B. The Department shall consider each of the following to be a family when living together:
1. A parent and the parent's children;
2. A married couple without children;
3. A married couple and the children of either or both spouses;
4. Unmarried parents who live with at least one child in common, and the parents' other children, whether in common or not; and
5. A person without children.

C. If an applicant is pregnant, the family unit includes the number of unborn children.

D. A child of the children included in subsections (B)(1), (B)(3), or (B)(4) is considered part of the family unit when living together.

E. The Department shall not include a SSI-cash recipient in the MED family unit even if the SSI-cash recipient is a parent, spouse, or child.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1437. MED Income Eligibility Requirements

A. Income exclusions. The exclusions in R9-22-1420(C) apply to the MED family unit.

B. Income standard.
1. The Department shall divide the annual FPL for the MED family unit that is in effect during each month of the income period by 12 to determine the monthly FPL.
2. The Department shall add the monthly FPLs for the income period and multiply the resulting amount by 40 percent.
3. Changes to the annual FPL are implemented in April of each year.

C. Income period. The income period is the month of application and the next two months. The Department shall add together the three months' income to establish the MED family unit's income amount.

D. Medical expense deduction period. The medical expense deduction period is a three-month period consisting of:
1. For a new application, the month before the application month, the month of application, and month following the application month; or
2. For a MED eligibility review, the last month of the prior MED eligibility period and the following two months.

E. The Department shall calculate the amount of countable monthly income as follows:
1. Subtract a $90 cost of employment allowance from the gross amount of earned income for each person whose earned income is counted;
2. Disregard from the remaining earned income an amount billed by the provider for the care of each dependent child under age 18 or incapacitated adult member of the MED family unit if the care is for the purpose of allowing the person to work. If more than one person in the household is responsible for and billed for the care of a dependent child, the disregard may be split between the wage earners if splitting the disregard is to the benefit of the family, but shall not exceed the maximum disregards as follows:
   a. A maximum of $200 for a child under age two and $175 for other dependents for a wage-earner employed full-time (86 or more hours per month); and
   b. A maximum of $100 for a child under age two, and $88 for other dependents for a wage earner employed part-time (less than 86 hours a month);
3. Add the remaining earned income for each MED family member to the unearned income of all MED family members;
4. Compare the MED family's unit countable income amount to the income standard in subsection (B). The difference is the amount of medical expenses the family shall incur during the medical expense deduction period to become eligible;
5. Subtract allowable medical expense deductions that were incurred by:
   a. A member of the MED family unit;
   b. A deceased spouse or minor child of a MED family unit if this person would have been a member of the MED unit during the MED expense deduction period;

c. A person who was a minor child of a MED family unit member when the expense was incurred but who is no longer a minor child; or
d. A minor child, including a child who is a runaway, who left home before the date of application to live with someone other than a parent; and
6. Compare the net MED family income to the income standard listed in subsection (B).

F. The family is eligible if the net income in subsection (E)(6) does not exceed the income standard in subsection (B).

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1438. MED Resource Eligibility Requirements

A. Including countable resources. The Department shall include the resources not excluded that belong to and are available to members of the family of a qualified alien under A.R.S. § 36-2903.03 and the sponsor and sponsor's spouse of a person who is a qualified alien.

B. Ownership and availability. The Department shall evaluate the ownership of resources to determine the availability of resources to a person listed in subsection (A).
1. Jointly owned resources with ownership records containing the words "and" or "and/or" between the owners' names are available to each owner except if one of the owners refuses to sell. A consent to sale is not required if all owners are members of the MED family unit.
2. Jointly owned resources with ownership records containing the word "or" between the owners' names are presumed to be available in full to each owner. The applicant or member may rebut the presumption by providing clear and convincing evidence of intent to establish a different type of ownership. If the presumption is rebutted, the resource is available to the owners:
   a. Consistent with the intent of the owners, or
   b. Based on each owner's proportionate net contribution if there is not clear and convincing evidence of a different allocation.
3. The Department shall establish availability of a trust under 42 U.S.C. 1396p(d)(4)(A) or (C).

C. Unavailability. The Department shall consider the following resources unavailable:
1. Property subject to spendthrift restriction, such as:
   a. Accounts established by the SSA, Veteran's Administration, or similar sources that mandate that the funds in the account be used for the benefit of a person not residing with the MED family unit; or
   b. Trusts established by a will or funded solely by the income and resources of someone other than a member of the MED family unit.
2. A resource being disputed in a divorce proceeding or probate matter;
3. Real property located on a Native American reservation;
4. A resource held by a conservator to the extent court-imposed restrictions make the resource unavailable to the applicant, member, or member of the family unit for:
   a. Medical care,
   b. Food,
   c. Clothing, or
   d. Shelter.

D. Resource exclusion. The Department shall exclude the following resources from the calculation of resources under subsection (E):
1. One burial plot for each person listed in R9-22-1436;
2. Household furnishings and personal items that are necessary for day-to-day living;
3. Up to $1500 of the value of one prepaid funeral plan for each person listed in R9-22-1436 that specifically covers only funeral-related expenses as evidenced by a written contract;
4. The value of one motor vehicle regularly used for transportation. If the MED family unit owns more than one vehicle, the exclusion is applied to the vehicle with the highest equity value;
5. The value of a vehicle used to earn income and not used simply for transportation to and from employment;
6. The value of a vehicle in which a SSI-cash recipient has an ownership interest; and
7. The value of any vehicle used for medical treatment, employment, or transportation of a SSI-cash disabled child, and that is excluded by SSI for that reason.
8. Funds set aside in an Individual Development Account under 6 A.A.C. 12, Article 4; and
9. Any other resource specifically excluded by federal law.

E. Calculation of resources. The Department shall determine the value of all household resources as follows:
1. Calculate the total amount of countable liquid resources;
2. Calculate the equity value of each countable non-liquid resource. The Department shall determine the equity value of a countable non-liquid resource by subtracting the amount of valid encumbrances on that resource from:
   a. The market value of real property if there is no assessor's evaluation of the property,
   b. The market value of real property if the assessor's value of the real property does not include the value of permanent structures on that property,
   c. The assessor's full cash value if subsections (E)(2)(a) and (E)(2)(b) do not apply, and
   d. The market value of a non-liquid resource that is not real property;
3. Not assign an equity value to a resource that is less than zero; and
4. Determine the MED family unit's resources by adding the totals determined in subsections (1) and (2).

F. Resource standard to be eligible for MED. A person is not eligible for MED if the resources determined in subsection (E) exceed $100,000 or if more than $5,000 are liquid resources.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1439. MED Effective Date of Eligibility

A. A MED family unit is eligible on the day the income and resource eligibility requirements are met but no earlier than the first day of the month of application. If the family unit meets the income requirements in the application month but does not meet the resource limit until the following month, the family unit's effective date of eligibility is the first day of the month following the month of application.

B. The Department shall adjust the effective date of eligibility under subsection (A) to an earlier date if:
1. A member presents verification of additional allowable medical expenses incurred on an earlier date during the medical expense deduction period that allow the member to meet the income requirements, and
2. The member presents the verification within 60 days of approval of eligibility under this Section.

C. The Department shall not adjust an effective date of eligibility more than one time per application.
D. The Department shall adjust the effective date no later than 30 days after the end of the 60-day period under subsection (B)(2).
E. The Department shall deny an application and provide the applicant a denial notice when the applicant does not meet the MED requirements under this Article during the month of application or the month following the month of application.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1440. MED Eligibility Period

The Department shall approve eligibility for six months. Changes in circumstances do not affect eligibility for the first three months.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1441. Eligibility Appeals

A. Adverse actions. An applicant or member may appeal by requesting a hearing from the Department concerning any of the following adverse actions:
1. Complete or partial denial of eligibility under R9-22-1413;
2. Suspension, termination, or reduction of AHCCCS medical coverage under R9-22-1415;
3. Delay in the eligibility determination beyond the timeframes under this Article;
4. The imposition of or increase in a premium or copayment; or
5. The effective date of eligibility.

B. Notice of Adverse Action. The Department shall personally deliver or send, by regular mail, a Notice of Adverse Action to the person affected by the action. For the purpose of this Section, the date of the Notice of Adverse Action shall be the date of personal delivery to the applicant or the postmark date, if mailed.
C. Automatic change and hearing rights.
1. An applicant or a member is not entitled to a hearing if the sole issue is a federal or state law requiring an automatic change adversely affecting some or all recipients.
2. An applicant or a member is entitled to a hearing if a federal or state law requires an automatic change and the applicant or member timely files an appeal that alleges a misapplication of the facts to the law.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4942, effective December 31, 2005 (Supp. 05-4).

R9-22-1442. Cessation of MED Coverage

The Department shall not approve any individual or family who has applied on or after May 1, 2011 as eligible for MED coverage. With respect to any applications that are pending as of May 1, 2011, the Department shall not approve any individual or family as eligible for MED coverage who has not met all eligibility requirements prior to May 1, 2011.

Historical Note

New Section made by exempt rulemaking at 17 A.A.R. 1028, effective May 1, 2011 (Supp. 11-2).

R9-22-1443. Repealed

Historical Note

New Section made by exempt rulemaking at 17 A.A.R. 1345, effective July 8, 2011 (Supp. 11-3). Amended by exempt rulemaking at 17 A.A.R. 2624, effective July 8, 2011 (Supp. 11-4). Repealed by final rulemaking at 20 A.A.R. 192, with an immediate effective date of January 7, 2014 (Supp. 14-1).

ARTICLE 15. AHCCCS MEDICAL COVERAGE FOR PEOPLE WHO ARE AGED, BLIND, OR DISABLED

R9-22-1501. General Information

A. General. The Administration shall determine eligibility for AHCCCS medical coverage for the following applicants or members using the eligibility criteria and requirements in this Article and Article 3:
1. A person who is aged, blind, or disabled and does not receive SSI cash; and
2. A person terminated from the SSI cash program under R9-22-1505.

B. Definitions. In addition to definitions contained in A.R.S. § 36-2901, the words and phrases in this Chapter have the following meanings unless the context explicitly requires another meaning:

"Aged" means a person who is 65 years of age or older as specified in 42 U.S.C. 1382c(a)(1)(A).

"Blind" means a person who has been determined blind by the Department of Economic Security, Disability Determination Services Administration, under 42 U.S.C. 1382c(a)(2) and 42 CFR 435.530 as of October 1, 2012, which are incorporated by reference and on file with the Administration, and available from the U.S. Government Printing Office, Mail Stop: IDCC, 732 N. Capitol Street, NW Washington, DC, 20401. This incorporated by reference contains no future editions or amendments.

"Disabled" means a person who has been determined disabled by the Department of Economic Security, Disability Determination Services Administration, under 42 U.S.C. 1382c(a)(3)(A) through (E) and 42 CFR 435.540 as of October 1, 2012, which are incorporated by reference and on file with the Administration, and available from the U.S. Government Printing Office, Mail Stop: IDCC, 732 N. Capitol Street, NW, Washington, DC, 20401. This incorporation by reference contains no future editions or amendments.

C. Eligibility effective date.
1. Eligibility is effective on the first day of the month that all eligibility requirements are met, including the period described under R9-22-303.
2. The effective date of eligibility for an applicant who moves into Arizona is no sooner than the date Arizona residency is established.
3. The effective date of eligibility for an inmate applying for medical coverage is the date the applicant no longer meets the definition of an inmate of a public institution.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 294, effective January 8, 1999 (Supp. 99-1). Section repealed; new Section made by exempt rulemaking at 7 A.A.R. 4593, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 5123, effective January 3, 2004 (Supp. 03-4). Amended by exempt rulemaking at 10 A.A.R. 23, effective December 9, 2003 (Supp. 03-4). Amended by exempt rulemaking at 10

36-2903.01. Additional powers and duties; report; definition

A. The director of the Arizona health care cost containment system administration may adopt rules that provide that the system may withhold or forfeit payments to be made to a noncontracting provider by the system if the noncontracting provider fails to comply with this article, the provider agreement or rules that are adopted pursuant to this article and that relate to the specific services rendered for which a claim for payment is made.

B. The director shall:

1. Prescribe uniform forms to be used by all contractors. The rules shall require a written and signed application by the applicant or an applicant's authorized representative, or, if the person is incompetent or incapacitated, a family member or a person acting responsibly for the applicant may obtain a signature or a reasonable facsimile and file the application as prescribed by the administration.

2. Enter into an interagency agreement with the department to establish a streamlined eligibility process to determine the eligibility of all persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). At the administration's option, the interagency agreement may allow the administration to determine the eligibility of certain persons, including those defined pursuant to section 36-2901, paragraph 6, subdivision (a).

3. Enter into an intergovernmental agreement with the department to:

(a) Establish an expedited eligibility and enrollment process for all persons who are hospitalized at the time of application.

(b) Establish performance measures and incentives for the department.

(c) Establish the process for management evaluation reviews that the administration shall perform to evaluate the eligibility determination functions performed by the department.

(d) Establish eligibility quality control reviews by the administration.

(e) Require the department to adopt rules, consistent with the rules adopted by the administration for a hearing process, that applicants or members may use for appeals of eligibility determinations or redeterminations.

(f) Establish the department's responsibility to place sufficient eligibility workers at federally qualified health centers to screen for eligibility and at hospital sites and level one trauma centers to ensure that persons seeking hospital services are screened on a timely basis for eligibility for the system, including a process to ensure that applications for the system can be accepted on a twenty-four hour basis, seven days a week.

(g) Withhold payments based on the allowable sanctions for errors in eligibility determinations or redeterminations or failure to meet performance measures required by the intergovernmental agreement.

(h) Recoup from the department all federal fiscal sanctions that result from the department's inaccurate eligibility determinations. The director may offset all or part of a sanction if the department submits a corrective action plan and a strategy to remedy the error.

4. By rule establish a procedure and time frames for the intake of grievances and requests for hearings, for the continuation of benefits and services during the appeal process and for a grievance process at the contractor level. Notwithstanding sections 41-1092.02, 41-1092.03 and 41-1092.05, the administration shall develop rules to establish the procedure and time frame for the informal resolution of grievances and appeals. A grievance that is not related to a claim for payment of system covered services shall be filed in writing with and received by the administration or the prepaid capitated provider or program contractor not later than sixty days after the date of the adverse action, decision or policy implementation being grieved. A grievance that is related to a claim for payment of system covered services must be filed in writing and received by the administration or the prepaid capitated provider or program contractor within twelve months after the date of service, within twelve months

after the date that eligibility is posted or within sixty days after the date of the denial of a timely claim submission, whichever is later. A grievance for the denial of a claim for reimbursement of services may contest the validity of any adverse action, decision, policy implementation or rule that related to or resulted in the full or partial denial of the claim. A policy implementation may be subject to a grievance procedure, but it may not be appealed for a hearing. The administration is not required to participate in a mandatory settlement conference if it is not a real party in interest. In any proceeding before the administration, including a grievance or hearing, persons may represent themselves or be represented by a duly authorized agent who is not charging a fee. A legal entity may be represented by an officer, partner or employee who is specifically authorized by the legal entity to represent it in the particular proceeding.

5. Apply for and accept federal funds available under title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)) in support of the system. The application made by the director pursuant to this paragraph shall be designed to qualify for federal funding primarily on a prepaid capitated basis. Such funds may be used only for the support of persons defined as eligible pursuant to title XIX of the social security act or the approved section 1115 waiver.

6. At least thirty days before the implementation of a policy or a change to an existing policy relating to reimbursement, provide notice to interested parties. Parties interested in receiving notification of policy changes shall submit a written request for notification to the administration.

7. In addition to the cost sharing requirements specified in subsection D, paragraph 4 of this section:

(a) Charge monthly premiums up to the maximum amount allowed by federal law to all populations of eligible persons who may be charged.

(b) Implement this paragraph to the extent permitted under the federal deficit reduction act of 2005 and other federal laws, subject to the approval of federal waiver authority and to the extent that any changes in the cost sharing requirements under this paragraph would permit this state to receive any enhanced federal matching rate.

C. The director is authorized to apply for any federal funds available for the support of programs to investigate and prosecute violations arising from the administration and operation of the system. Available state funds appropriated for the administration and operation of the system may be used as matching funds to secure federal funds pursuant to this subsection.

D. The director may adopt rules or procedures to do the following:

1. Authorize advance payments based on estimated liability to a contractor or a noncontracting provider after the contractor or noncontracting provider has submitted a claim for services and before the claim is ultimately resolved. The rules shall specify that any advance payment shall be conditioned on the execution before payment of a contract with the contractor or noncontracting provider that requires the administration to retain a specified percentage, which shall be at least twenty percent, of the claimed amount as security and that requires repayment to the administration if the administration makes any overpayment.

2. Defer liability, in whole or in part, of contractors for care provided to members who are hospitalized on the date of enrollment or under other circumstances. Payment shall be on a capped fee-for-service basis for services other than hospital services and at the rate established pursuant to subsection G of this section for hospital services or at the rate paid by the health plan, whichever is less.

3. Deputize, in writing, any qualified officer or employee in the administration to perform any act that the director by law is empowered to do or charged with the responsibility of doing, including the authority to issue final administrative decisions pursuant to section 41-1092.08.

4. Notwithstanding any other law, require persons eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 to be financially responsible for any cost sharing requirements established in a state plan or a section 1115 waiver and approved by the centers for medicare and

medicaid services. Cost sharing requirements may include copayments, coinsurance, deductibles, enrollment fees and monthly premiums for enrolled members, including households with children enrolled in the Arizona long-term care system.

E. The director shall adopt rules that further specify the medical care and hospital services that are covered by the system pursuant to section 36-2907.

F. In addition to the rules otherwise specified in this article, the director may adopt necessary rules pursuant to title 41, chapter 6 to carry out this article. Rules adopted by the director pursuant to this subsection shall consider the differences between rural and urban conditions on the delivery of hospitalization and medical care.

G. For inpatient hospital admissions and outpatient hospital services on and after March 1, 1993, the administration shall adopt rules for the reimbursement of hospitals according to the following procedures:

1. For inpatient hospital stays from March 1, 1993 through September 30, 2014, the administration shall use a prospective tiered per diem methodology, using hospital peer groups if analysis shows that cost differences can be attributed to independently definable features that hospitals within a peer group share. In peer grouping the administration may consider such factors as length of stay differences and labor market variations. If there are no cost differences, the administration shall implement a stop loss-stop gain or similar mechanism. Any stop loss-stop gain or similar mechanism shall ensure that the tiered per diem rates assigned to a hospital do not represent less than ninety percent of its 1990 base year costs or more than one hundred ten percent of its 1990 base year costs, adjusted by an audit factor, during the period of March 1, 1993 through September 30, 1994. The tiered per diem rates set for hospitals shall represent no less than eighty-seven and one-half percent or more than one hundred twelve and one-half percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1994 through September 30, 1995 and no less than eighty-five percent or more than one hundred fifteen percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1995 through September 30, 1996. For the periods after September 30, 1996 no stop loss-stop gain or similar mechanisms shall be in effect. An adjustment in the stop loss-stop gain percentage may be made to ensure that total payments do not increase as a result of this provision. If peer groups are used, the administration shall establish initial peer group designations for each hospital before implementation of the per diem system. The administration may also use a negotiated rate methodology. The tiered per diem methodology may include separate consideration for specialty hospitals that limit their provision of services to specific patient populations, such as rehabilitative patients or children. The initial per diem rates shall be based on hospital claims and encounter data for dates of service November 1, 1990 through October 31, 1991 and processed through May of 1992. The administration may also establish a separate reimbursement methodology for claims with extraordinarily high costs per day that exceed thresholds established by the administration.

2. For rates effective on October 1, 1994, and annually through September 30, 2011, the administration shall adjust tiered per diem payments for inpatient hospital care by the data resources incorporated market basket index for prospective payment system hospitals. For rates effective beginning on October 1, 1999, the administration shall adjust payments to reflect changes in length of stay for the maternity and nursery tiers.

3. Through June 30, 2004, for outpatient hospital services, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to the covered charges. Beginning on July 1, 2004 through June 30, 2005, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to covered charges. If the hospital increases its charges for outpatient services filed with the Arizona department of health services pursuant to chapter 4, article 3 of this title, by more than 4.7 percent for dates of service effective on or after July 1, 2004, the hospital specific cost-to-charge ratio will be reduced by the amount that it exceeds 4.7 percent. If charges exceed 4.7 percent, the effective date of the increased charges will be the effective date of the adjusted Arizona health care cost containment system cost-to-charge ratio. The administration shall develop the methodology for a capped fee-for-service schedule and a statewide cost-to-charge ratio. Any covered outpatient service not included in the capped fee-for-service schedule shall be reimbursed by applying the statewide cost-to-charge ratio that is based on the services not included in the capped fee-for-service schedule. Beginning on July 1, 2005, the administration shall reimburse clean claims with dates of service on or after July 1, 2005, based on the capped fee-for-service schedule or the statewide cost-to-charge

ratio established pursuant to this paragraph. The administration may make additional adjustments to the outpatient hospital rates established pursuant to this section based on other factors, including the number of beds in the hospital, specialty services available to patients and the geographic location of the hospital.

4. Except if submitted under an electronic claims submission system, a hospital bill is considered received for purposes of this paragraph on initial receipt of the legible, error-free claim form by the administration if the claim includes the following error-free documentation in legible form:

(a) An admission face sheet.

(b) An itemized statement.

(c) An admission history and physical.

(d) A discharge summary or an interim summary if the claim is split.

(e) An emergency record, if admission was through the emergency room.

(f) Operative reports, if applicable.

(g) A labor and delivery room report, if applicable.

Payment received by a hospital from the administration pursuant to this subsection or from a contractor either by contract or pursuant to section 36-2904, subsection I is considered payment by the administration or the contractor of the administration's or contractor's liability for the hospital bill. A hospital may collect any unpaid portion of its bill from other third-party payors or in situations covered by title 33, chapter 7, article 3.

5. For services rendered on and after October 1, 1997, the administration shall pay a hospital's rate established according to this section subject to the following:

(a) If the hospital's bill is paid within thirty days of the date the bill was received, the administration shall pay ninety-nine percent of the rate.

(b) If the hospital's bill is paid after thirty days but within sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate.

(c) If the hospital's bill is paid any time after sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate plus a fee of one percent per month for each month or portion of a month following the sixtieth day of receipt of the bill until the date of payment.

6. In developing the reimbursement methodology, if a review of the reports filed by a hospital pursuant to section 36-125.04 indicates that further investigation is considered necessary to verify the accuracy of the information in the reports, the administration may examine the hospital's records and accounts related to the reporting requirements of section 36-125.04. The administration shall bear the cost incurred in connection with this examination unless the administration finds that the records examined are significantly deficient or incorrect, in which case the administration may charge the cost of the investigation to the hospital examined.

7. Except for privileged medical information, the administration shall make available for public inspection the cost and charge data and the calculations used by the administration to determine payments under the tiered per diem system, provided that individual hospitals are not identified by name. The administration shall make the data and calculations available for public inspection during regular business hours and shall provide copies of the data and calculations to individuals requesting such copies within thirty days of receipt of a written request. The administration may charge a reasonable fee for the provision of the data or information.

8. The prospective tiered per diem payment methodology for inpatient hospital services shall include a mechanism for the prospective payment of inpatient hospital capital related costs. The capital payment shall

include hospital specific and statewide average amounts. For tiered per diem rates beginning on October 1, 1999, the capital related cost component is frozen at the blended rate of forty percent of the hospital specific capital cost and sixty percent of the statewide average capital cost in effect as of January 1, 1999 and as further adjusted by the calculation of tier rates for maternity and nursery as prescribed by law. Through September 30, 2011, the administration shall adjust the capital related cost component by the data resources incorporated market basket index for prospective payment system hospitals.

9. For graduate medical education programs:

(a) Beginning September 30, 1997, the administration shall establish a separate graduate medical education program to reimburse hospitals that had graduate medical education programs that were approved by the administration as of October 1, 1999. The administration shall separately account for monies for the graduate medical education program based on the total reimbursement for graduate medical education reimbursed to hospitals by the system in federal fiscal year 1995-1996 pursuant to the tiered per diem methodology specified in this section. The graduate medical education program reimbursement shall be adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Subject to legislative appropriation, on an annual basis, each qualified hospital shall receive a single payment from the graduate medical education program that is equal to the same percentage of graduate medical education reimbursement that was paid by the system in federal fiscal year 1995-1996. Any reimbursement for graduate medical education made by the administration shall not be subject to future settlements or appeals by the hospitals to the administration. The monies available under this subdivision shall not exceed the fiscal year 2005-2006 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement, except for monies distributed for expansions pursuant to subdivision (b) of this paragraph.

(b) The monies available for graduate medical education programs pursuant to this subdivision shall not exceed the fiscal year 2006-2007 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Graduate medical education programs eligible for such reimbursement are not precluded from receiving reimbursement for funding under subdivision (c) of this paragraph. Beginning July 1, 2006, the administration shall distribute any monies appropriated for graduate medical education above the amount prescribed in subdivision (a) of this paragraph in the following order or priority:

(i) For the direct costs to support the expansion of graduate medical education programs established before July 1, 2006 at hospitals that do not receive payments pursuant to subdivision (a) of this paragraph. These programs must be approved by the administration.

(ii) For the direct costs to support the expansion of graduate medical education programs established on or before October 1, 1999. These programs must be approved by the administration.

(c) The administration shall distribute to hospitals any monies appropriated for graduate medical education above the amount prescribed in subdivisions (a) and (b) of this paragraph for the following purposes:

(i) For the direct costs of graduate medical education programs established or expanded on or after July 1, 2006. These programs must be approved by the administration.

(ii) For a portion of additional indirect graduate medical education costs for programs that are located in a county with a population of less than five hundred thousand persons at the time the residency position was created or for a residency position that includes a rotation in a county with a population of less than five hundred thousand persons at the time the residency position was established. These programs must be approved by the administration.

(d) The administration shall develop, by rule, the formula by which the monies are distributed.

(e) Each graduate medical education program that receives funding pursuant to subdivision (b) or (c) of this paragraph shall identify and report to the administration the number of new residency positions created by the funding provided in this paragraph, including positions in rural areas. The program shall also report information related to the number of funded residency positions that resulted in physicians locating their practices in this state. The administration shall report to the joint legislative budget committee by February 1 of each year on the number of new residency positions as reported by the graduate medical education programs.

(f) Local, county and tribal governments and any university under the jurisdiction of the Arizona board of regents may provide monies in addition to any state general fund monies appropriated for graduate medical education in order to qualify for additional matching federal monies for providers, programs or positions in a specific locality and costs incurred pursuant to a specific contract between the administration and providers or other entities to provide graduate medical education services as an administrative activity. Payments by the administration pursuant to this subdivision may be limited to those providers designated by the funding entity and may be based on any methodology deemed appropriate by the administration, including replacing any payments that might otherwise have been paid pursuant to subdivision (a), (b) or (c) of this paragraph had sufficient state general fund monies or other monies been appropriated to fully fund those payments. These programs, positions, payment methodologies and administrative graduate medical education services must be approved by the administration and the centers for medicare and medicaid services. The administration shall report to the president of the senate, the speaker of the house of representatives and the director of the joint legislative budget committee on or before July 1 of each year on the amount of money contributed and number of residency positions funded by local, county and tribal governments, including the amount of federal matching monies used.

(g) Any funds appropriated but not allocated by the administration for subdivision (b) or (c) of this paragraph may be reallocated if funding for either subdivision is insufficient to cover appropriate graduate medical education costs.

10. Notwithstanding section 41-1005, subsection A, paragraph 9, the administration shall adopt rules pursuant to title 41, chapter 6 establishing the methodology for determining the prospective tiered per diem payments that are in effect through September 30, 2014.

11. For inpatient hospital services rendered on or after October 1, 2011, the prospective tiered per diem payment rates are permanently reset to the amounts payable for those services as of October 1, 2011 pursuant to this subsection.

12. The administration shall adopt a diagnosis-related group based hospital reimbursement methodology consistent with title XIX of the social security act for inpatient dates of service on and after October 1, 2014. The administration may make additional adjustments to the inpatient hospital rates established pursuant to this section for hospitals that are publicly operated or based on other factors, including the number of beds in the hospital, the specialty services available to patients, the geographic location and diagnosis-related group codes that are made publicly available by the hospital pursuant to section 36-437. The administration may also provide additional reimbursement for extraordinarily high cost cases that exceed a threshold above the standard payment. The administration may also establish a separate payment methodology for specific services or hospitals serving unique populations.

H. The director may adopt rules that specify enrollment procedures, including notice to contractors of enrollment. The rules may provide for varying time limits for enrollment in different situations. The administration shall specify in contract when a person who has been determined eligible will be enrolled with that contractor and the date on which the contractor will be financially responsible for health and medical services to the person.

I. The administration may make direct payments to hospitals for hospitalization and medical care provided to a member in accordance with this article and rules. The director may adopt rules to establish the procedures by which the administration shall pay hospitals pursuant to this subsection if a contractor fails to make timely payment to a hospital. Such payment shall be at a level determined pursuant to section 36-2904, subsection H

or I. The director may withhold payment due to a contractor in the amount of any payment made directly to a hospital by the administration on behalf of a contractor pursuant to this subsection.

J. The director shall establish a special unit within the administration for the purpose of monitoring the third-party payment collections required by contractors and noncontracting providers pursuant to section 36-2903, subsection B, paragraph 10 and subsection F and section 36-2915, subsection E. The director shall determine by rule:

1. The type of third-party payments to be monitored pursuant to this subsection.

2. The percentage of third-party payments that is collected by a contractor or noncontracting provider and that the contractor or noncontracting provider may keep and the percentage of such payments that the contractor or noncontracting provider may be required to pay to the administration. Contractors and noncontracting providers must pay to the administration one hundred percent of all third-party payments that are collected and that duplicate administration fee-for-service payments. A contractor that contracts with the administration pursuant to section 36-2904, subsection A may be entitled to retain a percentage of third-party payments if the payments collected and retained by a contractor are reflected in reduced capitation rates. A contractor may be required to pay the administration a percentage of third-party payments that are collected by a contractor and that are not reflected in reduced capitation rates.

K. The administration shall establish procedures to apply to the following if a provider that has a contract with a contractor or noncontracting provider seeks to collect from an individual or financially responsible relative or representative a claim that exceeds the amount that is reimbursed or should be reimbursed by the system:

1. On written notice from the administration or oral or written notice from a member that a claim for covered services may be in violation of this section, the provider that has a contract with a contractor or noncontracting provider shall investigate the inquiry and verify whether the person was eligible for services at the time that covered services were provided. If the claim was paid or should have been paid by the system, the provider that has a contract with a contractor or noncontracting provider shall not continue billing the member.

2. If the claim was paid or should have been paid by the system and the disputed claim has been referred for collection to a collection agency or referred to a credit reporting bureau, the provider that has a contract with a contractor or noncontracting provider shall:

(a) Notify the collection agency and request that all attempts to collect this specific charge be terminated immediately.

(b) Advise all credit reporting bureaus that the reported delinquency was in error and request that the affected credit report be corrected to remove any notation about this specific delinquency.

(c) Notify the administration and the member that the request for payment was in error and that the collection agency and credit reporting bureaus have been notified.

3. If the administration determines that a provider that has a contract with a contractor or noncontracting provider has billed a member for charges that were paid or should have been paid by the administration, the administration shall send written notification by certified mail or other service with proof of delivery to the provider that has a contract with a contractor or noncontracting provider stating that this billing is in violation of federal and state law. If, twenty-one days or more after receiving the notification, a provider that has a contract with a contractor or noncontracting provider knowingly continues billing a member for charges that were paid or should have been paid by the system, the administration may assess a civil penalty in an amount equal to three times the amount of the billing and reduce payment to the provider that has a contract with a contractor or noncontracting provider accordingly. Receipt of delivery signed by the addressee or the addressee's employee is prima facie evidence of knowledge. Civil penalties collected pursuant to this subsection shall be deposited in the state general fund. Section 36-2918, subsections C, D and F, relating to the imposition, collection and enforcement of civil penalties, apply to civil penalties imposed pursuant to this paragraph.

L. The administration may conduct postpayment review of all claims paid by the administration and may recoup any monies erroneously paid. The director may adopt rules that specify procedures for conducting postpayment review. A contractor may conduct a postpayment review of all claims paid by the contractor and may recoup monies that are erroneously paid.

M. Subject to title 41, chapter 4, article 4, the director or the director's designee may employ and supervise personnel necessary to assist the director in performing the functions of the administration.

N. The administration may contract with contractors for obstetrical care who are eligible to provide services under title XIX of the social security act.

O. Notwithstanding any other law, on federal approval the administration may make disproportionate share payments to private hospitals, county operated hospitals, including hospitals owned or leased by a special health care district, and state operated institutions for mental disease beginning October 1, 1991 in accordance with federal law and subject to legislative appropriation. If at any time the administration receives written notification from federal authorities of any change or difference in the actual or estimated amount of federal funds available for disproportionate share payments from the amount reflected in the legislative appropriation for such purposes, the administration shall provide written notification of such change or difference to the president and the minority leader of the senate, the speaker and the minority leader of the house of representatives, the director of the joint legislative budget committee, the legislative committee of reference and any hospital trade association within this state, within three working days not including weekends after receipt of the notice of the change or difference. In calculating disproportionate share payments as prescribed in this section, the administration may use either a methodology based on claims and encounter data that is submitted to the administration from contractors or a methodology based on data that is reported to the administration by private hospitals and state operated institutions for mental disease. The selected methodology applies to all private hospitals and state operated institutions for mental disease qualifying for disproportionate share payments.

P. Disproportionate share payments made pursuant to subsection O of this section include amounts for disproportionate share hospitals designated by political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents. Subject to the approval of the centers for medicare and medicaid services, any amount of federal funding allotted to this state pursuant to section 1923(f) of the social security act and not otherwise spent under subsection O of this section shall be made available for distribution pursuant to this subsection. Political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents may designate hospitals eligible to receive disproportionate share payments in an amount up to the limit prescribed in section 1923(g) of the social security act if those political subdivisions, tribal governments or universities provide sufficient monies to qualify for the matching federal monies for the disproportionate share payments.

Q. Notwithstanding any law to the contrary, the administration may receive confidential adoption information to determine whether an adopted child should be terminated from the system.

R. The adoption agency or the adoption attorney shall notify the administration within thirty days after an eligible person receiving services has placed that person's child for adoption.

S. If the administration implements an electronic claims submission system, it may adopt procedures pursuant to subsection G of this section requiring documentation different than prescribed under subsection G, paragraph 4 of this section.

T. In addition to any requirements adopted pursuant to subsection D, paragraph 4 of this section, notwithstanding any other law, subject to approval by the centers for medicare and medicaid services, beginning July 1, 2011, members eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 shall pay the following:

1. A monthly premium of fifteen dollars, except that the total monthly premium for an entire household shall not exceed sixty dollars.

2. A copayment of five dollars for each physician office visit.

3. A copayment of ten dollars for each urgent care visit.

4. A copayment of thirty dollars for each emergency department visit.

U. Subject to the approval of the centers for medicare and medicaid services, political subdivisions of this state, tribal governments and any university under the jurisdiction of the Arizona board of regents may provide to the Arizona health care cost containment system administration monies in addition to any state general fund monies appropriated for critical access hospitals in order to qualify for additional federal monies. Any amount of federal monies received by this state pursuant to this subsection shall be distributed as supplemental payments to critical access hospitals.

V. For the purposes of this section, "disproportionate share payment" means a payment to a hospital that serves a disproportionate share of low-income patients as described by 42 United States Code section 1396r-4.

36-2901. Definitions

In this article, unless the context otherwise requires:

1. "Administration" means the Arizona health care cost containment system administration.

2. "Administrator" means the administrator of the Arizona health care cost containment system.

3. "Contractor" means a person or entity that has a prepaid capitated contract with the administration pursuant to section 36-2904 or chapter 34 of this title to provide health care to members under this article or persons under chapter 34 of this title either directly or through subcontracts with providers.

4. "Department" means the department of economic security.

5. "Director" means the director of the Arizona health care cost containment system administration.

6. "Eligible person" means any person who is:

(a) Any of the following:

(i) Defined as mandatorily or optionally eligible pursuant to title XIX of the social security act as authorized by the state plan.

(ii) Defined in title XIX of the social security act as an eligible pregnant woman or a woman who is less than one year postpartum with a family income that does not exceed one hundred fifty percent of the federal poverty guidelines, as a child under the age of six years and whose family income does not exceed one hundred thirty-three percent of the federal poverty guidelines or as children who have not attained nineteen years of age and whose family income does not exceed one hundred thirty-three percent of the federal poverty guidelines.

(iii) Under twenty-six years of age and who was in the custody of the department of child safety pursuant to title 8, chapter 4 when the person became eighteen years of age.

(iv) Defined as eligible pursuant to section 36-2901.01.

(v) Defined as eligible pursuant to section 36-2901.04.

(vi) Defined as eligible pursuant to section 36-2901.07.

(b) A full-time officer or employee of this state or of a city, town or school district of this state or other person who is eligible for hospitalization and medical care under title 38, chapter 4, article 4.

(c) A full-time officer or employee of any county in this state or other persons authorized by the county to participate in county medical care and hospitalization programs if the county in which such officer or employee is employed has authorized participation in the system by resolution of the county board of supervisors.

(d) An employee of a business within this state.

(e) A dependent of an officer or employee who is participating in the system.

(f) Not enrolled in the Arizona long-term care system pursuant to article 2 of this chapter.

(g) Defined as eligible pursuant to section 1902(a)(10)(A)(ii)(XV) and (XVI) of title XIX of the social security act and who meets the income requirements of section 36-2929.

7. "Graduate medical education" means a program, including an approved fellowship, that prepares a physician for the independent practice of medicine by providing didactic and clinical education in a medical discipline to a

medical student who has completed a recognized undergraduate medical education program.

8. "Malice" means evil intent and outrageous, oppressive or intolerable conduct that creates a substantial risk of tremendous harm to others.

9. "Member" means an eligible person who enrolls in the system.

10. "Modified adjusted gross income" has the same meaning prescribed in 42 United States Code section 1396a(e)(14).

11. "Noncontracting provider" means a person who provides health care to members pursuant to this article but not pursuant to a subcontract with a contractor.

12. "Physician" means a person who is licensed pursuant to title 32, chapter 13 or 17.

13. "Prepaid capitated" means a mode of payment by which a health care contractor directly delivers health care services for the duration of a contract to a maximum specified number of members based on a fixed rate per member notwithstanding:

(a) The actual number of members who receive care from the contractor.

(b) The amount of health care services provided to any member.

14. "Primary care physician" means a physician who is a family practitioner, general practitioner, pediatrician, general internist, or obstetrician or gynecologist.

15. "Primary care practitioner" means a nurse practitioner or certified nurse midwife who is certified pursuant to title 32, chapter 15 or a physician assistant who is licensed pursuant to title 32, chapter 25. This paragraph does not expand the scope of practice for nurse practitioners or certified nurse midwives as defined pursuant to title 32, chapter 15 or for physician assistants as defined pursuant to title 32, chapter 25.

16. "Regional behavioral health authority" has the same meaning prescribed in section 36-3401.

17. "Section 1115 waiver" means the research and demonstration waiver granted by the United States department of health and human services.

18. "Special health care district" means a special health care district organized pursuant to title 48, chapter 31.

19. "State plan" has the same meaning prescribed in section 36-2931.

20. "System" means the Arizona health care cost containment system established by this article.

D-6.

ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18 Chapter 13 Article 3

Amend: R18-13-308

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: **October 21, 2024**

SUBJECT: **Arizona Department of Environmental Quality (ADEQ)**
Title 18, Chapter 13, Article 3

Amend: R18-13-308

Summary:

This regular rulemaking by the Arizona Department of Environmental Quality (Department) seeks to amend one (1) rule in Title 18, Chapter 13, Article 3 regarding Solid Waste Management, specifically, Refuse and other Objectionable Wastes. This rulemaking seeks to add a definition for collection agency, simplify the process by allowing counties to grant a variance without state involvement, allow a county to request the Department to assume variance functions, and allow counties to designate the relevant county department to assume variance functions.

The proposed rule amendment did not arise from a previous Five-Year Review Report (5YRR), and the proposed rule appears to be the culmination of years-long discussions with stakeholders.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Department cites both general and specific statutory authority.

2. **Do the rules establish a new fee or contain a fee increase?**

The amended rule does not increase any existing fees or create a new fee.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department stated in the preamble that it reviewed a 2017 Maricopa Association of Governments (MAG) Solid Waste regional study. This study involved a survey of 27 MAG member agencies to identify and assess solid waste best practices being implemented. The Department found that there is nothing to indicate the state reducing the minimum collection frequency requirement from twice weekly to once weekly would have an adverse impact on solid waste best practices of local communities.

The MAG study can be found here:
https://azmag.gov/Portals/0/Documents/MagContent/Solid-Waste-Best-Practices-Report-2017-update-FINAL.pdf.

4. **Summary of the agency's economic impact analysis:**

This rule reduces the current statewide frequency of collection requirement for garbage from twice a week to once a week and removes ADEQ from the variance procedure to allow for collection less than once a week. This rule is intended to eliminate unnecessary duplicative effort between the state and local governments and establish a more appropriate minimum frequency for collection.

Stakeholders for this rulemaking include all 15 counties within the state, local municipalities, including cities and towns, local regulatory agencies or health departments, entities operating as collection agencies offering collection or transportation of garbage, and the general public. The stakeholders most directly affected by these rule changes are most likely to be those counties with existing frequency of collection variances approved with ADEQ and collection agencies operating in jurisdictions adhering to the current twice weekly frequency of collection minimum that would change to the new once weekly minimum following this rule. In general, ADEQ does not anticipate any appreciable costs to stakeholders as a result of this rulemaking.

5. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

ADEQ determined that this rulemaking is the least intrusive and costly means possible to achieve the same objectives.

6. **What are the economic impacts on stakeholders?**

ADEQ does not anticipate any appreciable costs to itself or political subdivisions, and ADEQ anticipates no appreciable impact on public employment, private employment, and state revenues. If a county currently follows the minimum collection frequency of twice weekly under the current rule and elects to then follow the new minimum collection frequency of once weekly under the rule, this may impact operations of a business that is employed as a collection agency for the county. However, ADEQ has received no indication that the described change to collection frequency and corresponding business impact will result from this rule change. As such, ADEQ does not anticipate appreciable costs to businesses directly affected by the implementation and enforcement of this rule.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

No, the final rule is not a substantial change from the proposed rules.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department stated that one supportive verbal comment was received during a hearing, but no written comments were received during the comment period. The Department provided a transcript of the virtual meeting at which the supportive comment was made (*See* Public Hearing Transcript, Pg. 8 at 17:46).

Council staff received a written comment on November 19, 2024 regarding the proposed rule, and the comment is attached in the following packet for the Council's review.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Department stated that the rule does not require a permit or license that must comply with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicated that the rule is not more stringent than federal law, as there is no applicable federal law governing garbage collection.

11. Conclusion

This regular rulemaking by the Department seeks to amend one (1) rule in Title 18, Chapter 13, Article 3 regarding statewide requirements for garbage collection. The proposed rule amendment did not arise from a previous 5YRR, and the proposed rule appears to be the culmination of years-long discussions with stakeholders. The

amendment seeks to add a definition for collection agency, simplify the collection process by allowing counties to grant a variance without state involvement, allow a county to request the Department to assume variance functions, and allow counties to designate the relevant county department to assume variance functions.

The Department seeks a standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A).

Council staff recommends approval of this rulemaking.

Arizona Department of Environmental Quality

Katie Hobbs
Governor

Karen Peters
Deputy Director

August 30, 2024

Jessica Klein, Chairperson
Governor's Regulatory Review Council
100 N. 15th Ave., suite 302
Phoenix, AZ 85007

Re: Rulemaking for Title 18. Environmental Quality, Chapter 13. Department of Environmental Quality – Solid Waste Management, Article 3.

Dear Chairperson Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits a regular rulemaking proposing changes to Arizona Administrative Code (A.A.C) R18-13-308 to the Governor's Regulatory Review Council (GRRC) for its consideration and approval. R18-13-308 establishes the state minimum frequency of collection for garbage and refuse, as well as a variance process to deviate from this minimum.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information Required by A.A.C. R1-6-201(A)(1)

- The public record closed for the rule on June 21, 2024 at 5:00 p.m.
- This regular rulemaking does not relate to a five-year review report.
- This regular rulemaking does not establish a new fee and does not contain a fee increase.
- An immediate effective date is not requested for the rule under A.R.S. § 41-1032.
- The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- No new full-time employees are necessary to implement or enforce the rule.
- A list of documents enclosed under A.A.C. R1-6-201(A)(2)-(8), which are attached as electronic copies:
    - The Notice of Final Rulemaking (NFRM), including the preamble, table of contents, and text of the rule.
    - The economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055.

- ADEQ did not receive any written comments on the Notice of Proposed Rulemaking (NPRM). A public comment was received at the June 20, 2024 public hearing on the NPRM; therefore, the transcript of June 20, 2024 public hearing is included in this submittal.
- ADEQ received no analysis regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states; therefore, no such analysis is included in this submittal.
- The rule amended by this rulemaking does not incorporate materials by reference; therefore, no such materials are included.
- One electronic copy of each of the following is enclosed: the general and specific statutes authorizing the rule, including relevant statutory definitions: A.R.S. §§ 49-104, 49-761(A) and (I).
- Defined terms in A.A.C. R18-13-302, which are referred to in this rule.

Thank you for your timely review and approval. Please contact myself or Matt Rippentrop, Rule Writer, Waste Programs Division, 602-771-4329 or rippentrop.matt@azdeq.gov, if you have any questions.

Sincerely,

Karen Peters
Deputy Director
Arizona Department of Environmental Quality

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY

SOLID WASTE MANAGEMENT

PREAMBLE

1. Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039(B) by the governor on:

August 20, 2024

2. Article, Part, or Section Affected (as applicable)	**Rulemaking Action**
R18-13-308	Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. § 49-104

Implementing statute: A.R.S. § 49-761(A) and A.R.S. § 49-761(I)

4. The effective date of the rule:

This rule shall become effective 60 days after a certified original and preamble are filed in the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is (to be filled in by *Register* editor).

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Rulemaking Docket Opening: 29 A.A.R. 3537, Issue Date: November 10, 2023, Issue Number: 45, File number: R23-222

Notice of Proposed Rulemaking: 30 A.A.R. 1006, Issue Date: May 17, 2024, Issue Number: 20, File number: R24-82

6. The agency's contact person who can answer questions about the rulemaking:

Name: Matt Rippentrop

Title: Rule Writer

Email: rippentrop.matt@azdeq.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Summary: This rule reduces the current statewide frequency of collection requirement for garbage from twice a week to once a week. This rule retains the variance procedure to allow for collection less than once a week and simplifies the process by allowing counties to grant a variance without state involvement. Other changes include providing a definition of collection agency, allowing a county to request ADEQ to assume variance functions, and allowing counties to designate the relevant county department to assume variance functions.

Background: Since 1962, Arizona has had a statewide rule that garbage (or refuse) has to be collected twice a week. This rule was one of several Department of Health Services (DHS) rules adopted by the State Board of Health to control potential health and nuisance issues that had arisen in the absence of any rules. In 1976, a variance from the twice weekly requirement was added to allow some flexibility and to avoid unnecessary expense. In 1987, ADEQ inherited these DHS rules. Under the current variance program, collection agencies may be authorized to deviate from the twice-weekly collection requirement to a once-weekly collection upon approval and subsequent submittal of a collection entity plan by the local health department to ADEQ. To receive and maintain a variance, the plan must demonstrate the variance would not create a public health nuisance or other vector related issues.

Rule scope and explanation. ADEQ has spent significant time considering the appropriate scope of this rule, including potential recycling or diversion targets. This includes several stakeholder meetings. Questions from and discussion with the public have included impacts of a change to current collection rates, implications for current local waste management plans, and the effect on recycling within the state.

Collection of residential and commercial garbage is such a commonplace activity throughout Arizona as well as the United States that it is often taken for granted and its significance ignored. In Arizona, much of what is thrown away ends up in landfills. Over the past several decades, recycling options have become more popular. Separate recycling collections were employed taking advantage of the ease with which a second garbage collection could be avoided. Initially, this rulemaking was undertaken with the intent to strengthen diversion

programs and recycling within the state. There was concern expressed that the current variance process was overly cumbersome and subject to revocation without condition, resulting in a stifling of recycling and diversion efforts within the state. ADEQ began considering and soliciting public feedback on two options. The first option was to change the minimum frequency of collection required by the state from twice weekly to once weekly. The second option was to develop a secondary variance process based on diversion metrics which would be more secure against revocation with the intent of encouraging recycling and diversion.

In rounds of discussions with stakeholders, counties and municipalities expressed being in favor of a minimum frequency of collection of once weekly. However, while diversion and recycling efforts are important components to many local waste management programs, a secondary diversion variance like the one initially proposed was determined to be overly complex. There were concerns raised on implementation and proper tracking. In rounds of discussion and further consideration, it became clear any successful recycling and diversion initiatives would require rule changes; agency and political subdivision investment; and public participation that was beyond the scope of any change to the frequency of collection. Further, recycling's success is dependent on market rates for recycled commodities and consumer participation in sorting recyclables. To ensure a successful recycling or diversion program, all of these components must be addressed, which cannot be accomplished by amending R18-13-308. As ADEQ explored various ideas related to this rule, it became clear that whatever transformations to the frequency of collection rule could be implemented, R18-13-308 was not the appropriate tool to improve recycling in Arizona. Ultimately, ADEQ determined it appropriate to keep the scope of this rule narrowed to streamlining the state minimum for the frequency of collection, which includes minimizing unnecessary duplicate state involvement in the variance process.

This rule reduces the state collection requirement to once a week, lessening the need to obtain a variance. Based on the information at hand, there is no indication that twice weekly collection is necessary to prevent vectors, hazards, or other public health nuisances. Several of Arizona's neighboring states, including New Mexico, Nevada, and California, require collection once weekly by state rule, with local municipalities maintaining the ability to require a higher collection rate. No reported problems with vectors or excessive waste accumulation has occurred. The rule also retains, but simplifies, the variance process by allowing counties to grant a variance without state involvement. ADEQ has no record of ever denying or revoking a variance.

Further, this rule does not change the authority of political subdivisions to set collection rates or implement local waste management plans tailored to their unique needs and circumstances. Counties and local jurisdictions continue to have the discretion to set their frequency schedule to more than once weekly without the need for a variance or receiving approval from ADEQ. A.R.S. § 49-765 empowers counties, cities, and towns to establish regulation for collection of solid waste equal to or more stringent than those regulations promulgated by ADEQ. This rule does not impact whatever current authority exists for counties to establish

fees related to collection frequency or variances

Informal Comment: From discussions and feedback, stakeholders raised concerns with the change from a twice weekly to once weekly minimum frequency of collection requirement; namely, the potential impact on current diversion or recycling efforts within political subdivisions. Maricopa County expressed that current requirements under their collection variance include certain waste diversion and recycling elements. By changing to a once weekly minimum frequency, this variance to once weekly from twice weekly would now be redundant and diversion and recycling requirements under the variance would be lost. A related concern raised by the public as well is that currently some local collection jurisdictions substitute one of the two weekly pickups with recycling, and that a once weekly minimum frequency of collection would result in the secondary recycling pickup being canceled. ADEQ appreciates these concerns. However, recycling and waste diversion are not currently components of R18-13-308, and whatever source of authority that led to the inclusion of these components in any variance is in no way altered or diminished. As R18-13-308 sets standards only for the collection of garbage and refuse, any separate scheduled recycling collection requirements at the county or local level would not be nullified by this rule change as the source of authority for these recycling collections does not originate from R18-13-308. Further, ADEQ does not envision the terms or requirements of variance agreements, such as diversion requirements or recycling pick-up, to become invalidated or inoperable as an operation of this rule. It continues to be within the power and discretion of political subdivisions to provide for more stringent collection, including recycling collection, requirements to address the particular needs of their jurisdictions. Counties and local municipalities retain the same authority and power to establish and maintain regulations for collection of solid waste more stringent than those regulations promulgated by ADEQ, including both collection frequency and other requirements such as diversion and sanitation standards.

Another concern raised was the potential for overfill or unsanitary conditions if the minimum frequency of collection was lowered to once weekly. ADEQ does not foresee these problems resulting from the change to the minimum frequency of collection. Many cities currently with a variance only collect garbage once weekly with no reported problems. As stated above, this change to the frequency of collection does not impact or diminish the powers of counties and municipalities to enact solid waste collection regulations. Further, other existing minimums and requirements throughout Article 3, Refuse and Other Objectionable Waste, remain unchanged and in force. This includes responsibility of relevant parties to maintain sanitary conditions, requirements and standards for storage of waste to ensure sanitary conditions, vehicle use and maintenance requirements, and standards for methods of disposal. Finally, ADEQ has approved all 43 variance applications received since the implementation of the frequency of collection and variance rule. Under the variance program, once weekly collection has become the typical collection frequency throughout the state.

8. **A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review**

each study, all data underlying each study, and any analysis of each study and other supporting material:

ADEQ reviewed a 2017 Maricopa Association of Governments (MAG) Solid Waste Best Practices regional study. This study involved a survey of 27 MAG member agencies to identify and assess solid waste best practices being implemented. ADEQ found that there is nothing to indicate the state reducing the minimum collection frequency requirement from twice weekly to once weekly would have an adverse impact on solid waste best practices of local communities.

The MAG study may be found here: https://azmag.gov/Portals/0/Documents/MagContent/Solid-Waste-Best-Practices-Report-2017-update-FINAL.pdf.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. A summary of the economic, small business, and consumer impact:

The following discussion addresses each of the elements required for an economic, small business and consumer impact statement under A.R.S. § 41-1055.

Identification of the rulemaking: This rule amends R18-13-308 to reduce the current statewide frequency of collection requirement for garbage from twice a week to once a week. This rule retains the variance procedure to allow for collection less than once a week, but removes ADEQ from the variance process by allowing counties to grant a variance to a collection agency without state involvement. A county may request that ADEQ assume the functions of granting and revoking variances.

The development and implementation of waste management plans, including collection frequency and other requirements, primarily falls under the purview of the counties and political subdivisions. This rule does not change the authority of political subdivisions to set collection rates or implement local waste management plans tailored to their unique needs and circumstances. Instead, this rule is intended to eliminate unnecessary duplicative effort between the state and local governments and establish a more appropriate minimum frequency for collection. Counties continue to have the discretion to set their frequency schedule to more than once weekly without the need for a variance or receiving approval from ADEQ. A.R.S. § 49-765 empowers counties, cities, and towns to establish regulation for collection of solid waste equal to or more stringent than those regulations promulgated by ADEQ. This rule does not impact whatever current authority exists for counties to establish

regulations and standards related to collection frequency or variances.

This rule also establishes a definition of "collection agency" for purposes of R18-13-308 and allows a county to assign variance functions to whatever county department the county believes would be the most appropriate.

Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the proposed rulemaking: Stakeholders for this rulemaking include all 15 counties within the state, local municipalities, including cities and towns, local regulatory agencies or health departments, entities operating as collection agencies offering collection or transportation of garbage, which may include local governments or commercial services, and the general public.

The stakeholders most directly affected by these rule changes are most likely to be those counties with existing frequency of collection variances approved with ADEQ and collection agencies operating in jurisdictions adhering to the current twice weekly frequency of collection minimum that would change to the new once weekly minimum following this rule.

Cost/Benefit Analysis: This cost/benefit analysis includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(3):

- Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to ADEQ by the implementation and enforcement of this rule include a reduction to waste program costs from removal of ADEQ from the variance approval process. To date, ADEQ has approved 100% of all frequency of collection variance requests it has received under the current rule, approximately 43. Removing ADEQ from variance approval allows ADEQ to reallocate the time and personnel previously conducting variance review, approval, and record maintenance for variances to other waste program operations.

  ADEQ does not anticipate appreciable costs to itself associated with the implementation or enforcement of this rule. ADEQ does not anticipate any significant costs or benefits to other state agencies associated with the implementation or enforcement of this rule.

- Probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to political subdivisions by the implementation and enforcement of this rule include a more

expeditious approval of frequency of collection variances for those counties that would continue to seek a variance. Under the rule, the new standardized minimum frequency of collection is once weekly. If collection of once weekly is not necessary for a particular jurisdiction to ensure no public health hazards or nuisances will exist and that fly breeding will be controlled, each additional week in delay of the approval of a variance to a more appropriate frequency of collection rate results in accumulating costs to operate collection services at that frequency. By increasing the speed at which a variance is approved, these costs can be mitigated.

Waste collection costs for political subdivisions and local jurisdictions are significant. Capital equipment maintenance and replacement represent a large portion of these costs. While cities have different policies for replacing their equipment, within the industry side-load trucks are generally replaced every seven years. Factors that drive replacement other than age are mileage, hours, and cost of repairs and maintenance. Vehicle mileage, hours of operations, and frequency of repairs will be higher the more frequently the collection vehicles must be operated. The longevity and useful life of capital equipment, such as collection vehicles, can be extended and thus associated maintenance and replacement costs reduced by counties implementing a variance for an appropriate frequency of collection rate that is reflective of local needs and circumstances. Thus, overall waste collection costs may be reduced.

ADEQ does not anticipate appreciable costs to political subdivisions by the implementation and enforcement of this rule.

- Probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking: businesses directly affected by the proposed rule include any business operating as a collection agency offering garbage collection as a commercial service within a county or municipality. Counties and political subdivisions have broad discretion in establishing requirements of waste management and collection programs to fit their individualized needs. This rule is intended to eliminate duplicative effort in oversight by streamlining the variance process and establish a more reasonable minimum standard for collection frequency. This rule does not change the primary role counties and political subdivisions have in setting standards and requirements for waste management within their jurisdictions.

  If a county currently follows the minimum collection frequency of twice weekly under the current rule and elects to then follow the new minimum collection frequency of once weekly under the rule, this may impact operations of a business that is employed as a collection agency for the county. However, ADEQ has received no indication that this change to collection frequency as described and corresponding impact to a business

employed as a collection agency will result from this rule change. As such, ADEQ does not anticipate appreciable costs to businesses directly affected by the implementation and enforcement of this rule.

ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

General description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the proposed rulemaking: This rule will lower the minimum frequency of collection from twice weekly to once weekly. Further, this rule will provide that a variance may be granted to allow for frequency of collection of less than once weekly, instead of the current variance of once weekly. These changes to collection frequency could potentially impact the employment, personnel, or equipment needs of collection agencies. However, this rule does not change or diminish other regulatory requirements concerning waste collection. Further, this rule does not change or diminish the authority of counties and local municipalities to enact more stringent regulations than those promulgated by ADEQ. As such, ADEQ estimates this rulemaking will not have an appreciable impact on public or private employment.

Probable impact of the proposed rulemaking on small businesses: Arizona law defines “small business” for the purpose of this analysis as a “concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.” *See* A.R.S. § 41-1001(23). The probable impact on small businesses includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(5):

- Identification of the small businesses subject to the rulemaking: Small businesses that may be subject to this rulemaking are those small businesses operating as collection agencies within a county or local jurisdiction that currently adheres to the twice weekly minimum collection frequency and that would change to the once weekly minimum collection frequency following this rule.

- Administrative and other costs required for compliance with the proposed rulemaking: Political subdivisions and collection agencies currently collecting twice weekly that would change to once weekly with this change to the minimum collection frequency may need to make modifications to collection scheduling and related processes, but costs to do so should be minimal.

- Description of the methods prescribed in A.R.S. § 41-1035 that the agency may use to reduce the impact on small businesses, with reasons for the agency's decision to use or not to use each method:

  - Establish less stringent compliance or reporting requirements in the rule for small

businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking.

  - Establish less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking. There are no associated schedules or deadlines regulated parties, including small businesses, are subject to under this rulemaking.
  - Consolidate or simplify the rule's compliance or reporting requirements for small businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking; as such, there are no requirements to consolidate or simplify.
  - Establish performance standards for small businesses to replace design or operational standards in the rule. There are no design and operation standards established by this rule.
  - Exempt small businesses from any or all requirements of the rule. Maintaining a minimum collection frequency is necessary to ensure the prevention of vectors, hazards, or public health nuisances. As such, it is necessary that any collection agency that may be classified as a small business be subject to the same minimum standard as any other collection agency.

- Probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking: The probable costs and benefits to private persons and consumers is described above. Probable benefits include the elimination of unnecessary duplicative effort between ADEQ and counties, allowing for the faster and more efficient implementation of variances a county may elect to pursue. Nevertheless, implementation of waste management plans primarily falls under the jurisdiction of counties and local municipalities. This rule does not change the primary role that counties and local municipalities play in the development and implementation of waste management within their jurisdictions. As such, ADEQ does not anticipate any appreciable costs to private persons and consumers.

Probable effect on state revenues: ADEQ does not anticipate this rulemaking to result in a significant impact on state revenues.

Description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking: This rulemaking is the least intrusive and costly means possible to achieve the same objectives.

Description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data: Any data or reasoning which this

rulemaking is based on is identified in the "Rule Scope and Explanation" portion of the Notice of Final Rulemaking located in Part 7. Generally, no new data was introduced or reviewed to make these rule changes.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

No changes were made to the rule between the proposed rulemaking and final rulemaking.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

During the formal comment period ADEQ received one comment expressing support for the change of the minimum frequency of collection. Refer to the "Informal Comment" portion located in Part 7 above for a discussion on comments and feedback received from stakeholders prior to the formal comment period.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

Not applicable.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Not applicable.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No such analysis was submitted.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

13. The full text of the rules follows:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY
SOLID WASTE MANAGEMENT
ARTICLE 3. REFUSE AND OTHER OBJECTIONABLE WASTES

Section
R18-13-308 Frequency of Collection; Variance

ARTICLE 3. REFUSE AND OTHER OBJECTIONABLE WASTES

R18-13-308. Frequency of Collection; Variance

A. The ~~frequency of~~ collection of garbage, refuse, rubbish, and ashes shall be in accordance with rules of the collection agency ~~but~~ except that the frequency of collection shall not be less than once per week. ~~that shown in the following schedules:~~

~~1. Garbage only -- twice weekly.~~

~~2. Refuse with garbage -- twice weekly.~~

~~3. Rubbish and ashes -- as often as necessary to prevent nuisances and fly breeding.~~

B. A variance from the required frequency of collection in subsection (A) ~~rate~~ may be granted by the county department designated by the county to approve variances to allow for ~~the~~ collection ~~of garbage~~ less than once weekly. The variance may be granted ~~by the Department of Environmental Quality~~ upon submission of an acceptable plan by the collection agency ~~approved by~~ to the designated county ~~local health~~ department demonstrating that no public health hazards or nuisances will exist and that fly breeding will be controlled by either biological, chemical, or mechanical means. The variance may be revoked whenever the ~~Department of Environmental Quality~~ designated county department determines that the circumstances warranting the variance no longer exist.

C. A county may request the Department of Environmental Quality to assume the functions of granting and revoking variances under this Section.

D. For the purposes of this Section, "collection agency" means a city, town, person, or commercial service that offers collection or transportation of garbage, refuse, rubbish, and ashes as a service.

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY

SOLID WASTE MANAGEMENT

Economic, Small Business, and Consumer Impact Statement

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

Identification of the rulemaking: This rule amends R18-13-308 to reduce the current statewide frequency of collection requirement for garbage from twice a week to once a week. This rule retains the variance procedure to allow for collection less than once a week, but removes ADEQ from the variance process by allowing counties to grant a variance to a collection agency without state involvement. A county may request that ADEQ assume the functions of granting and revoking variances.

The development and implementation of waste management plans, including collection frequency and other requirements, primarily falls under the purview of the counties and political subdivisions. This rule does not change the authority of political subdivisions to set collection rates or implement local waste management plans tailored to their unique needs and circumstances. Instead, this rule is intended to eliminate unnecessary duplicative effort between the state and local governments and establish a more appropriate minimum frequency for collection. Counties continue to have the discretion to set their frequency schedule to more than once weekly without the need for a variance or receiving approval from ADEQ. A.R.S. § 49-765 empowers counties, cities, and towns to establish regulation for collection of solid waste equal to or more stringent than those regulations promulgated by ADEQ. This rule does not impact whatever current authority exists for counties to establish regulations and standards related to collection frequency or variances.

This rule also establishes a definition of "collection agency" for purposes of R18-13-308 and allows a county to assign variance functions to whatever county department the county believes would be the most appropriate.

Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the proposed rulemaking: Stakeholders for this rulemaking include all 15 counties within the state, local municipalities, including cities and towns, local regulatory agencies or health departments, entities operating as collection agencies offering collection or transportation of garbage, which may include local governments or commercial services, and the general public.

The stakeholders most directly affected by these rule changes are most likely to be those counties with existing frequency of collection variances approved with ADEQ and collection agencies operating in jurisdictions adhering to the current twice weekly frequency of collection minimum that would change to the new once weekly minimum following this rule.

Cost/Benefit Analysis: This cost/benefit analysis includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(3):

- Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to ADEQ by the implementation and enforcement of this rule include a reduction to waste program costs from removal of ADEQ from the variance approval process. To date, ADEQ has approved 100% of all frequency of collection variance requests it has received under the current rule, approximately 43. Removing ADEQ from variance approval allows ADEQ to reallocate the time and personnel previously conducting variance review, approval, and record maintenance for variances to other waste program operations.

  ADEQ does not anticipate appreciable costs to itself associated with the implementation or enforcement of this rule. ADEQ does not anticipate any significant costs or benefits to other state agencies associated with the implementation or enforcement of this rule.

- Probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to political subdivisions by the implementation and enforcement of this rule include a more expeditious approval of frequency of collection variances for those counties that would continue to seek a variance. Under the rule, the new standardized minimum frequency of collection is once weekly. If collection of once weekly is not necessary for a particular jurisdiction to ensure no public health hazards or nuisances will exist and that fly breeding will be controlled, each additional week in delay of the approval of a variance to a more appropriate frequency of collection rate results in accumulating costs to operate collection services at that frequency. By increasing the speed at which a variance is approved, these costs can be mitigated.

  Waste collection costs for political subdivisions and local jurisdictions are significant. Capital equipment maintenance and replacement represent a large portion of these costs. While cities have different policies for replacing their equipment, within the industry side-load trucks are generally replaced every seven years. Factors that drive replacement other than age are mileage, hours, and cost of repairs and maintenance. Vehicle mileage, hours of operations, and frequency of repairs will be higher the more frequently the collection vehicles must be operated. The longevity and useful life of capital equipment, such as collection vehicles, can be extended and thus associated maintenance and replacement costs reduced by counties implementing a variance for an appropriate frequency of collection rate that is reflective of local needs and circumstances. Thus, overall waste collection costs may be reduced.

  ADEQ does not anticipate appreciable costs to political subdivisions by the implementation and enforcement of this rule.

- Probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking: businesses directly affected by the proposed rule include any business operating as a collection agency offering garbage collection as

a commercial service within a county or municipality. Counties and political subdivisions have broad discretion in establishing requirements of waste management and collection programs to fit their individualized needs. This rule is intended to eliminate duplicative effort in oversight by streamlining the variance process and establish a more reasonable minimum standard for collection frequency. This rule does not change the primary role counties and political subdivisions have in setting standards and requirements for waste management within their jurisdictions.

If a county currently follows the minimum collection frequency of twice weekly under the current rule and elects to then follow the new minimum collection frequency of once weekly under the rule, this may impact operations of a business that is employed as a collection agency for the county. However, ADEQ has received no indication that this change to collection frequency as described and corresponding impact to a business employed as a collection agency will result from this rule change. As such, ADEQ does not anticipate appreciable costs to businesses directly affected by the implementation and enforcement of this rule.

ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

General description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the proposed rulemaking: This rule will lower the minimum frequency of collection from twice weekly to once weekly. Further, this rule will provide that a variance may be granted to allow for frequency of collection of less than once weekly, instead of the current variance of once weekly. These changes to collection frequency could potentially impact the employment, personnel, or equipment needs of collection agencies. However, this rule does not change or diminish other regulatory requirements concerning waste collection. Further, this rule does not change or diminish the authority of counties and local municipalities to enact more stringent regulations than those promulgated by ADEQ. As such, ADEQ estimates this rulemaking will not have an appreciable impact on public or private employment.

Probable impact of the proposed rulemaking on small businesses: Arizona law defines "small business" for the purpose of this analysis as a "concern, including its affiliates, which is

independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.” *See* A.R.S. § 41-1001(23). The probable impact on small businesses includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(5):

- Identification of the small businesses subject to the rulemaking: Small businesses that may be subject to this rulemaking are those small businesses operating as collection agencies within a county or local jurisdiction that currently adheres to the twice weekly minimum collection frequency and that would change to the once weekly minimum collection frequency following this rule.

- Administrative and other costs required for compliance with the proposed rulemaking: Political subdivisions and collection agencies currently collecting twice weekly that would change to once weekly with this change to the minimum collection frequency may need to make modifications to collection scheduling and related processes, but costs to do so should be minimal.

- Description of the methods prescribed in A.R.S. § 41-1035 that the agency may use to reduce the impact on small businesses, with reasons for the agency's decision to use or not to use each method:

    - Establish less stringent compliance or reporting requirements in the rule for small businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking.

    - Establish less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking. There are no associated schedules or deadlines regulated parties, including small businesses, are subject to under this rulemaking.

    - Consolidate or simplify the rule's compliance or reporting requirements for small businesses. Compliance and reporting requirements are not a component of or impacted by this rulemaking; as such, there are no requirements to consolidate or simplify.

  - Establish performance standards for small businesses to replace design or operational standards in the rule. There are no design and operation standards established by this rule.

  - Exempt small businesses from any or all requirements of the rule. Maintaining a minimum collection frequency is necessary to ensure the prevention of vectors, hazards, or public health nuisances. As such, it is necessary that any collection agency that may be classified as a small business be subject to the same minimum standard as any other collection agency.

- Probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking: The probable costs and benefits to private persons and consumers is described above. Probable benefits include the elimination of unnecessary duplicative effort between ADEQ and counties, allowing for the faster and more efficient implementation of variances a county may elect to pursue. Nevertheless, implementation of waste management plans primarily falls under the jurisdiction of counties and local municipalities. This rule does not change the primary role that counties and local municipalities play in the development and implementation of waste management within their jurisdictions. As such, ADEQ does not anticipate any appreciable costs to private persons and consumers.

Probable effect on state revenues: ADEQ does not anticipate this rulemaking to result in a significant impact on state revenues.

Description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking: This rulemaking is the least intrusive and costly means possible to achieve the same objectives.

Description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data: Any data or reasoning which this rulemaking is based on is identified in the "Rule Scope and Explanation" portion of the Notice of Final Rulemaking located in Part 7. Generally, no new data was introduced or reviewed to make these rule changes.

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through the regulation of the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and no more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Utilize any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title, but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes shall be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department may establish by rule a fee as a condition of licensure, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. The department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, article 8 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on:

(a) The direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly

related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

(b) The availability of other funds for the duties performed.

(c) The impact of the fees on the parties subject to the fees.

(d) The fees charged for similar duties performed by the department, other agencies and the private sector.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203, except that state agencies are exempt from paying those fees that are not associated with the dredge and fill permit program established pursuant to chapter 2, article 3.2 of this title. For services provided under the dredge and fill permit program, a state agency shall pay either:

(a) The fees established by the department under the dredge and fill permit program.

(b) The reasonable cost of services provided by the department pursuant to an interagency service agreement.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-761. Rulemaking authority for solid waste facilities; exemption; financial assurance; recycling facilities

A. The department shall adopt rules regarding the storage, processing, treatment and disposal of solid waste as prescribed by subsections B through M of this section. In adopting rules, the department shall consider the nature of the waste streams at the facilities to be regulated. The department shall also consider other applicable federal and state laws and rules in an effort to avoid practices or requirements that duplicate, are inconsistent with or will result in dual regulation with other applicable rules and laws. Facilities that obtain and maintain coverage under a general permit established by the department pursuant to section 49-706 are exempt from rules adopted pursuant to this section. In adopting rules for solid waste facilities, the director may include requirements for corrective actions in response to a release, as defined in section 49-281, from a solid waste facility that violates or results in a violation of any provision of this chapter, rule adopted pursuant to this chapter or solid waste facility plan approved pursuant to this chapter. These rules shall be consistent with section 49-762.08, subsection B, subsection C, paragraphs 1 and 2 and subsections D and E.

B. For purposes of administering 42 United States Code section 6945, as amended November 8, 1984, 40 C.F.R. part 258 is adopted by reference except as prescribed by paragraph 2 of this subsection. This subsection, as it applies to municipal solid waste landfills, governs if there is any conflict between this subsection and any other statute relating to solid waste. Municipal solid waste landfill facility plans submitted pursuant to section 49-762 shall comply with this subsection. In administering this subsection or in adopting or administering any rules adopted pursuant to this subsection, the department shall ensure that any discretion allowed to a director of an approved state pursuant to the federal regulations is maintained. The following apply to the department's administration of 42 United States Code section 6945 and to the department's adoption of rules for municipal solid waste landfills:

1. The department may adopt rules for municipal solid waste landfills. Rules adopted pursuant to this paragraph shall not be more stringent than or conflict with 40 C.F.R. part 258 for nonprocedural standards, except that the department may adopt aquifer protection standards that are more stringent than 40 C.F.R. part 258 if those standards are consistent with and not more stringent than standards developed pursuant to chapter 2, article 3 of this title, or if the standards are adopted pursuant to article 9 of this chapter. Rules adopted pursuant to this paragraph are effective on the concurrence of the administrator with this state's municipal solid waste landfill program.

2. 40 C.F.R. part 258, table I is not adopted in its entirety. The department shall use aquifer water quality standards that have been adopted by the department pursuant to section 49-223 and shall use those portions of table I that are more restrictive than the standards adopted pursuant to section 49-223.

C. The department shall adopt rules for those solid waste land disposal facilities that are not municipal solid waste landfills and that are not regulated by the coal combustion residuals program established pursuant to article 11 of this chapter. Rules adopted pursuant to this subsection shall not be more stringent than or conflict with 40 C.F.R. part 257, subparts A and B for nonprocedural standards, except that the department may adopt aquifer protection standards that are more stringent than 40 C.F.R. part 257, subparts A and B if these standards are consistent with and not more stringent than standards developed pursuant to chapter 2, article 3 of this title, or if the standards are adopted pursuant to article 9 of this chapter. In administering this subsection, the department shall ensure that any discretion allowed to a director of an approved state pursuant to the federal regulations is maintained in the department's rules. Aquifer protection provisions adopted pursuant to this subsection do not apply to an owner or operator of a solid waste facility if the owner or operator submits an administratively complete application for an aquifer protection permit pursuant to chapter 2, article 3 of this title before the date that the owner or operator is required to submit a solid waste facility plan.

D. The department shall adopt rules to define biohazardous medical waste and to regulate biohazardous medical waste and medical sharps to include all of the following:

1. A definition for biohazardous medical waste that includes wastes that contain material that is likely to transmit etiologic agents that have been shown to cause or contribute to increased human morbidity or mortality of

epidemiologic significance. The department shall consult with the department of health services in making this determination.

2. Reasonably necessary rules regarding the storage, collection, transportation, treatment and disposal of biohazardous medical waste and medical sharps, beginning with the placement by the generator of the waste in containers for the purpose of waste collection. The department may require payment of a fee for the licensure of a transporter of biohazardous medical waste. After July 20, 2011, the department shall establish by rule a fee for the licensure of a transporter of biohazardous medical waste, including a maximum fee. As part of the rulemaking process, there must be public notice and comment and a review of the rule by the joint legislative budget committee. After September 30, 2013, the department shall not increase that fee by rule without specific statutory authority for the increase. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881. In the case of self-hauling of waste by the generator, all storage facilities under the generator's control and all waste handling practices including storage, treatment and transportation shall be in accordance with these rules. The department shall also adopt reasonably necessary rules regarding the tracking of biohazardous medical waste and medical sharps.

E. The department may adopt reasonably necessary rules regarding the storage, collection, transportation, treatment and disposal of nonbiohazardous medical waste beginning with the placement by the generator of the waste in containers for the purpose of waste collection. In the case of self-hauling of the waste by the generator, all storage facilities under the generator's control and all waste handling practices including storage, treatment and transportation shall be in accordance with these rules.

F. The department shall adopt rules for the application of sludge from a wastewater treatment facility to land for use as fertilizer or beneficial soil amendment. For the purposes of this subsection, "sludge" has the same meaning as sewage sludge as defined in 40 Code of Federal Regulations section 122.2 in effect on January 1, 1998.

G. The department shall adopt rules regarding the storage, processing, treatment or disposal of solid waste at solid waste facilities that are identified in section 49-762.01. The rules shall allow the owner or operator to certify compliance with the department's statutes and rules instead of obtaining a solid waste facility plan approval. The rules shall provide that the applicant at its option may request approval of a solid waste facility plan rather than certifying compliance.

H. The department shall issue by rule best management practices for the classes of solid waste facilities set forth in section 49-762.02.

I. The department shall adopt reasonably necessary rules establishing minimum standards for storing, collecting, transporting, disposing and reclaiming solid waste, including garbage, trash, rubbish, manure and other objectionable wastes. These rules shall provide for inspecting premises, containers, processes, equipment and vehicles, and for abating as environmental nuisances any premises, containers, processes, equipment or vehicles that do not comply with the minimum standards of these rules. The rules adopted pursuant to this subsection do not apply to sites that are either regulated by section 49-762, 49-762.01 or 49-762.02 or exempted from the definition of solid waste facility in section 49-701 or from the definition of solid waste in section 49-701.01. Notwithstanding any other provision of this subsection, rules adopted pursuant to this subsection shall apply to defining environmental nuisances pursuant to section 49-141.

J. The department shall adopt rules relating to financial assurance requirements. The rules shall indicate the types of financial assurance mechanisms to be required and the content, terms and conditions of each financial mechanism, including circumstances under which the department may take action on the financial assurance mechanism for facility closure, postclosure care if necessary and corrective action for known releases. The financial assurance mechanisms shall include all of the following:

1. Surety bond.

2. Certificate of deposit.

3. Trust fund with pay-in period.

4. Letter of credit.

5. Insurance policy.

6. Certificate of self-insurance.

7. Deposit with the state treasurer.

8. Evidence of ability to meet any of the following:

(a) Corporate financial test.

(b) Local government financial test.

(c) Corporate guarantee test.

(d) Local government guarantee test.

(e) Political subdivision financial test that shall require the department to consider the entity's bond rating, income stream, assets, liabilities and assessed valuation of taxable property.

9. Multiple financial assurance mechanisms.

10. Additional financial assurance mechanisms that may be acceptable to the director.

K. The department shall adopt rules that prescribe standards to be used in determining if a site is a recycling facility.

L. The director may adopt rules that prescribe standards to be used in determining if a solid waste facility includes significant solid waste transfer activities that warrant the facility's regulation as a transfer facility.

M. The department shall adopt facility design, construction, operation, closure and postclosure maintenance rules for biosolids processing facilities and household waste composting facilities that must obtain plan approval pursuant to section 49-762.

ARTICLE 1. RESERVED

Editor's Note: Article 2, consisting of Section R18-13-201, was adopted under an exemption from the provisions of A.R.S. Title 41, Chapter 6, pursuant to A.R.S. § 49-701.01(C)(1) and (2). Exemption from A.R.S. Title 41, Chapter 6 means the Department did not submit notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; the Department did not submit the rules to the Governor's Regulatory Review Council for review; and the Department was not required to hold public hearings on this Section (Supp. 98-3).

ARTICLE 2. SOLID WASTE DEFINITIONS; EXEMPTIONS

Editor's Note: The following Section was adopted under an exemption from the provisions of the Administrative Procedure Act which means that these rules were not reviewed by the Governor's Regulatory Review Council; the agency did not submit notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; and the agency was not required to hold public hearings on these rules (Supp. 98-3).

R18-13-201. Land Application of Biosolids Exemption

A. This Section applies only to biosolids as defined in R18-9-1001. The land application of biosolids, when placed on or applied to the land in full conformity with 18 A.A.C. 9, Article 10 and A.R.S. § 49-761(F), and if the site of land application has ceased to receive application of biosolids and all applicable site restrictions set by A.A.C. Title 18 Environmental Quality have been satisfied, is exempt statewide from the definition of solid waste found at A.R.S. § 49-701.01(A). This exemption applies only when the biosolids and the soil to which it has been applied remain at the site of the application.

B. This exemption does not alter or set any new standard for the soil remediation standards found at 18 A.A.C. 7, Article 2.

Historical Note

Adopted under and exemption from A.R.S. Title 41, Chapter 6, pursuant to A.R.S. § 49-701.01(C)(1) and (2), effective July 27, 1998 (Supp. 98-3). Amended by exempt rulemaking at 5 A.A.R. 4004, effective September 17, 1999 (Supp. 99-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-202. Coal Slurry Discharges from Pipeline Leaks Exemption

This Section applies only to coal slurry discharges onto the ground from pipeline leaks. Coal slurry discharges onto the ground from pipeline leaks are exempt statewide from the definition of solid waste prescribed in A.R.S. § 49-701.01(A) if both of the following conditions are met:

1. The discharge was the result of an accidental pipeline leak.
2. The thickness of the layer of coal slurry on the ground that resulted from the discharge is 3 inches or less.

Historical Note

New Section adopted by exempt rulemaking at 5 A.A.R. 4004, effective September 17, 1999 (Supp. 99-3).

ARTICLE 3. REFUSE AND OTHER OBJECTIONABLE WASTES

R18-13-301. Reserved

R18-13-302. Definitions

A. "Approved" means acceptable to the Department.

B. "Ashes" means residue from the burning of any combustible material.

C. "Department" means the Department of Environmental Quality or a local health department designated by the Department of Environmental Quality.

D. "Garbage" means all animal and vegetable wastes resulting from the processing, handling, preparation, cooking, and serving of food or food materials.

E. "Manure" means animal excreta, including cleanings from barns, stables, corrals, pens, or conveyances used for stabling, transporting, or penning of animals or fowls.

F. "Person" means the state, a municipality, district or other political subdivision, a cooperative, institution, corporation, company, firm, partnership or individual.

G. "Refuse" means all putrescible and nonputrescible solid and semisolid wastes, except human excreta, but including garbage, rubbish, ashes, manure, street cleanings, dead animals, abandoned automobiles, and industrial wastes.

H. "Rubbish" means nonputrescible solid wastes, excluding ashes, consisting of both combustible and noncombustible wastes, such as paper, cardboard, waste metal, tin cans, yard clippings, wood, glass, bedding, crockery and similar materials.

Historical Note

Section recodified from A.A.C. R18-8-502, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-303. Responsibility

A. The owner, agent, or the occupant of any premises, business establishment, or industry shall be responsible for the sanitary condition of said premises, business establishment, or industry. No person shall place, deposit, or allow to be placed or deposited on his premises or on any public street, road, or alley any refuse or other objectionable waste, except in a manner described in these rules.

B. The owner, agent, or the occupant of any premises, business establishment, or industry shall be responsible for the storage and disposal of all refuse accumulated, by a method or methods described in these rules.

C. The collection and disposal of all refuse not acceptable for collection by a collection agency is the responsibility of each occupant, business establishment, or industry where such refuse accumulates, and all such refuse shall be stored, collected, and disposed of in a manner approved by the Department.

D. All dangerous materials and substances shall, where necessary, be rendered harmless prior to collection and disposal.

Historical Note

Section recodified from A.A.C. R18-8-503, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-304. Inspection

Representatives of the Department shall make such inspections of any premises, container, process, equipment, or vehicle used for collection, storage, transportation, disposal, or reclamation or refuse as are necessary to ensure compliance with these rules.

Historical Note

Section recodified from A.A.C. R18-8-504, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-305. Collection Required

A. Where refuse collection service is available, the following refuse shall be required to be collected: Garbage, ashes, rubbish, and small dead animals which do not exceed 75 pounds in weight.

Transcript – 308 Frequency of Collection Close of Public Comment
June 20, 2024, 1:00 – 1:19 PM

0:16
Good afternoon, everyone. We're going to give it just another minute or so for folks to trickle in but we'll get started here shortly in just a few minutes.

1:27
All right, we'll go ahead and get started with this public hearing.

1:30
Okay, good afternoon everyone.

1:32
Today is Thursday, June 20 2024. The time is 101pm and I will now open this public hearing.

1:39
This is a public hearing using the web-based application GoToWebinar.

1:44
My name is Matt Rippentrop, and I have been appointed by the Director of the Arizona Department of Environmental Quality to preside as the public hearing officer at this public hearing.

1:52
This public hearing is to provide you with an opportunity to make oral comments regarding ADEQ's notice of proposed rulemaking for the frequency of collection proposed rule change.

2:03
Also representing the agency today is Terry Bair, Senior Science Specialist.

2:07
By law, this public hearing must be conducted on the record.

2:11
Therefore, the proceedings are being recorded via electronic media.

2:15
Today's public hearing will allow for discussion, questions, and comment on the proposed rules in accordance with ARS 41-1023.

2:23
The notice of proposed rule making was filed with the Arizona Secretary of State's office and was published in the Arizona Administrative Register on Friday, May 17th this year, which began the formal comment period on the proposed rule.

2:39
So before we get started, we have some housekeeping to do.

2:42

First, please stay muted while in this meeting while you're not speaking.

2:46
Feel free to put questions in the question tool as they come to you.

2:49
And to note again, this hearing is being recorded.

2:56
So for our agenda today, our agenda will comprise of a brief discussion of the proposed rule, a time for questions regarding the proposed rule, and finally, an opportunity to comment on the record regarding the rule.

3:09
Please note, only those comments made during the final opportunity to comment portion are official comments for the record, so please ensure those comments you want on the record are saved for and set at this time.

3:20
Official comments made during the opportunity to comment will be limited to five minutes.

3:28
So our projected path forward for this rule, following the close of this public comment period at close of business time tomorrow, 5 p.m., ADEQ will begin carefully considering and incorporating public comments received.

3:39
Once all comments have been considered and incorporated, ADEQ tentatively anticipates preparing and submitting the notice of final rulemaking to the Governor's Regulatory Review Council, or GERC, at the end of July.

3:53
Following the GERC study and council meetings at the end of August and beginning of September, the rule will be submitted to the Secretary of State with an anticipated effective date of November.

4:06
I will now turn the presentation over to Terry Baer for a brief presentation on the proposed rule.

4:17
Thank you, Matt. Can you hear me? Yes, we can hear you. Wonderful, sir. Next slide.

4:27
So again, taking the frequency of collection rule, you can see here that any strikeouts is a removal of language, any bold is the inclusion of new language.

4:39
And so with the proposed rule, we're looking to establish for the collection of garbage, refuse, rubbish, and ashes shall be in accordance with the of the collection agency except

that the frequency of collection shall not be less than once per week.

4:55
So this removes the twice a week component as well as the different categories that were established as you can see stricken out below. Next slide.

5:09
Additionally it established that the variance from collection may be granted by the county department that's designated to approve the variances.

5:18
Previously all variances had to go the county authority and then come to ADQ for subsequent approval.

5:25
This is removing that dual approval and is relying strictly on the approval authority of the county designated for oversight.

5:35
Additionally, the county may revoke the variance that determine if the circumstances warranted variances no longer exist. Again, this is a variance from the once-a-week collection.

5:47
Next slide.

5:53
Finally, we added in these two new paragraphs, C and D, that if a county would prefer the department to oversee functions of granting invariants, they could ask the department to do that.

6:07
And then the last one is just more of a definition clarifying that for the purpose of the section, collection agency means a city, town, person, or commercial service that offers collection of transportation of garbage, refuse, rubbish, and ashes.

6:23
Next slide.

6:27
All right.

6:27
Thank you, Terry, for that explanation of the rule.

6:30
This section of the meeting is for questions regarding the proposed rule.

6:33
If you would like to make a comment on the record regarding the proposed rule, please wait until that portion of the hearing.

6:38

We will get to you.

6:40
If you have a question, please raise your hand by clicking on the hand symbol on the webinar control panel.

6:45
Individuals will be called on in the order they join the hearing and raise their hand.

6:48
You may also submit a question using the questions tool.

6:52
Now, are there any questions regarding the proposed rule at this time?

7:06
I'm not seeing any immediate questions, but I'll give it just another moment in case people are getting their thoughts together or typing out any questions.

7:40
They can either be typed out into the question box or you can raise your hand.

7:48
We'll give it just another moment.

8:00
Looks like we have a raised hand.

8:07
Yeah, Matt. Yeah, Dave Bennett with the City of Scottsdale.

8:12
Just real quick, how many people are on today's call? Just curious. It looks like our attendee list is 26.

8:23
That are currently on the call? That is correct. Thank you, Matt. Looks like we have another question.

8:39
Ramona Hi, yes, Ramona Simpson, town of Queen Creek.

8:44
Sorry, jumped in just a couple of minutes late.

8:46
You guys went through that really fast, but I wanted to just double-check, really make sure.

8:54
So, this still allows us to submit a variance, but a variance is still going to be required by and determined by the county that you're in.

9:03

So Mayor Coppa or Purnell could decide what they want to do and we'd need to submit variances just like we're currently doing.

9:14
So we still have the ability to do that, but it's still going to require doing a variance and then how we currently do it, that we have to send information about what we're doing regarding that variance.

9:30
So that is still all kind of in place.

9:32
that really doesn't change this activity.

9:35
Is that correct?

9:40
Do we have a panelist that can speak to that question?

9:43
Yeah, happy to, Matt.

9:46
So Ramona, so yes, in short, to answer your question.

9:51
So the rule allows being revised for the department to establish the minimum frequencies to be once a week.

9:59
Now, counties may decide that based on their county needs that, once a week, may not be sufficient for preventing, you know, nuisances for that area.

10:12
And so this allowed the change in the rule for the county to establish something much more frequent.

10:17
So, for example, if Maricopa County decided that they wanted it to stay twice a week, that they could do that, and then you would submit for a variance from whatever the requirements are to them.

10:30
It really kind of takes the department out of the review part of the process, unless the county has sought for us to step in and serve in that function.

10:42
But those are the two things that have changed.

10:45
It establishes the frequency to be minimum to be once a week instead of twice a week as it was previously, but it allows the county to be more stringent, which has always been

there, but may not have been as prevalently known before.

10:59
And then it obviously removes the approval to go through the department for that variance approval.

11:06
Okay, so now we'll still have to see if Maricopa or Pinal or whatever county you're in decides to change their roles and take a look at that.

11:17
Otherwise, if they're still at twice a week, we'd still do the variance just like we're doing.

11:23
But if they at some point change their role to say once a week, if you're doing trash recycling, then we wouldn't have to do a variance because that would be the rule.

11:33
That is correct. That's why we're kind of trying to give the counties more leeway to do that.

11:39
Okay.

11:39
Yes, we really want to make sure that as a minimum state for the state, we weren't imposing, you know, a burden on, say, Mojave County, you know, based on, you know, what Mayor Copa County needs are.

11:51
So that's why we really wanted to make sure that it's kind of tailored, that it could be establish a minimum standard, But allow each county to adjust if needed.

12:02
Okay, so We just still need to check what the counties are doing.

12:07
Keep that the same until Yes, I would quote I would recommend coordinating with Yeah coordinating with the county that you reside in And find out if if they're going to base theirs based off of the state minimum or if they're going to have something different Okay Queen Creek is fun because we get to be in two counties. So thank you.

12:32
No, thank you Thank you, and I would ask you if you no longer have a question to lower your hand Dave Bennett, did you have a follow-up question?

12:48
seeing that hand down Tina Moline, I believe Hi, thank you, Matt.

12:55
I just I am with the city of Kingman and I wanted to just ask if the state has been in touch with any of the counties as part of this whole making process yet.

13:13
If we have a panelist.

13:15
Yep.

13:19
Can you hear me.

13:20
I'm sending you back.

13:22
Well, but Tina, I believe I'm going to meet you. I think we might be getting some feedback.

13:27
Is that better? Okay, I'm not hearing that go.

13:32
Yes, so we did engage with the counties during the middle of the rulemaking process to find out, you know, what they saw as kind of their role in the variance program, whether they felt it was duplicative, and so we kind of tabulated all that.

13:50
Now, as far as, like, a rollout for these changes, no, there hasn't been discussion as to what each county is going to do.

14:03
And so, with the proposed rulemaking moving forward, then, you know, we do hope to have further discussions with the county.

14:11
There currently are, I believe, 40, 44 approved variances.

14:16
So, we do expect that there's going to be some questions from those that are gonna be impacted in developing a path and kind of a message plan for going forward.

14:30
Thank you very much.

14:31
You're welcome.

14:35
Were there any other questions at this time?

14:40
Okay, seeing none.

14:47
Seeing no more questions, we will now begin the formal oral comment period.

14:51
Reminder, restate questions you may have had if you want them as part of the public comment record.

14:55
I'm going to call speakers one by one.

14:58
If your hand is raised, I will call on you in the hearing webinar as your turn arrives.

15:01
I apologize in advance for any mispronounced names.

15:04
A reminder that you will need to unmute yourself before you can speak.

15:08
When called, please first state your name for the record and then begin your public comment.

15:11
Everyone will have five minutes to speak.

15:14
I will remind you when you have one minute remaining.

15:16
I would also ask that you speak clearly into your microphone so that we can ensure every word is captured.

15:21
Thank you.

15:22
Now, is there anyone who would like to make a formal comment?

15:42
I'm not seeing any raised hands yet, but we'll give it some more time in case people are getting their thoughts together.

16:19
I'm still not seeing any raised hands, but we'll give it just a few more minutes to ensure anyone has the opportunity to make the public comment they want.

17:08
Still not seeing any hands raised, but we'll give it another minute or so.

17:20
Yes, Michael Racy.

17:28
I apologize if I missed you.

17:30

I think your hand is now down.

17:46
Michael Rossi for Pima County.

17:47
I was trying to unmute, it wasn't unmuting.

17:51
We can hear you now.

17:53
We support the rule change.

17:54
We think it streamlines the process, will aid in efficiency.

17:59
Most jurisdictions and most variances are to go to once a week pickup with once a week recycling.

18:07
So my guess is the agency would know better is it will reduce the number of variances and we think it's a good change.

18:14
Thank you.

18:18
Thank you.

18:18
Are there any other comments?

18:45
Okay.

18:47
Well, seeing no more comments, we will now end the formal oral comment period.

18:55
Thank you.

18:56
As a reminder, written or email comments related to this proposed rulemaking may still be submitted to ADEQ by 5 p.m. on Friday, tomorrow, June 21st.

19:05
Comments may be submitted as shown on the screen via email to ripandtrop.mat at azdeq.gov or wasterulemaking at azdeq.gov or via U.S.

19:16
mail postmarked by June 21st to Matt Rippentrop, ADEQ 1110, West Washington Street,

Phoenix, Arizona 85007. The time is now 1 19 p.m.

19:29
and I close this public hearing on ADEQ's notice of proposed rulemaking for frequency of collections.

19:35
Thank you all for participating. The recording is now being ended.

Public Comment to Arizona R-18-13-308

11-19-24

Submitted to:

Governor's Regulatory Review Council

100 N. 15th Avenue Suite 302

Phoenix, AZ 85007

Submitted by:

Steven M. Viny, CEO

Envision Holdings

23250 Chagrin Blvd,

Beachwood, Ohio 44022

Dear Arizona GRRC Members:

With this letter, I hereby request that the GRRC refrain from further consideration of the proposed revision to R-18-13-308 in its present form as presented in the GRRC November 5th Agenda, listed as Item C-3. From a historical perspective, what started out as a purposeful and well-intended rule change has been rewritten in such a way that the current version contravenes the DHS Sustainability and Environmental Programs and poses a threat to the environment and the well-being of Arizonans. We ask that this board remove this item in its present form from the GRRC agenda. Further, we ask that the GRRC recommend to ADEQ that the agency re-submit a revised modification to R18-13-308 for consideration to this Board, designed to meet the DHS Sustainability and Environmental Programs and accomplish its originally intended purpose as signed by former Governor Doug Ducey which was "***designed to increase market-based recycling and a circular economy***"*.*

1. **The Revision to R18-13-308 Contravenes the DHS Sustainability and Environmental Programs**

The DHS has set exemplary standards designed to reduce waste, increase recycling, and reduce the effects of climate change. As but a few examples listed in the DHS Sustainability and Environmental Programs are as follows:

Section 1 states *"DHS's responsibilities toward sustainability are twofold: (1) enhance resilience and adaptation to climate-related disruptions; and (2) increase environmental stewardship to mitigate and reduce the impact of climate change. DHS is an environmental leader in the Federal Government and established ambitious goals to decrease greenhouse gas (GHG) emissions…"*

Section 2. D states as follows:

*"D. Reducing Waste and Pollution DHS's goal is to **achieve a waste diversion rate of at least 50 percent** and maintain cost effective waste prevention and recycling programs. The Department is updating its policy to match new goals and objectives. Accounting for Recycling Funds, which formalizes the tracking and reporting of recycling funds received and the accounting of those expenditures, is done in a manner consistent with DHS policy and applicable federal statutes. **In addition to these actions,** DHS continues to actively reduce waste and pollution through several measures. • Incorporation and application of construction and demolition (C&D) waste diversion clauses. • Waste and recycling outreach efforts increase awareness through events throughout the year. • Compliance with Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986 (42 U.S.C 11001-11023)."*

Ironically, the original purpose of the revision to R18-13-308 signed by former Governor Doug Ducey was consistent with DHS Sustainability and Environmental Programs as it was ***"designed to increase market-based recycling and a circular economy."*** ADEQ staff developed 2 scenarios as part of the rulemaking process, which can be seen in the ADEQ slide below:

< RETURN TO ACTIVE RULEMAKINGS

Solid Waste Frequency of Collection Rulemaking

Revised on: May 12, 2023 - 1:21pm

Summary:

ADEQ has received approval from the Governor to amend R18-13-308, Frequency of Collection, in a rulemaking that is deregulatory and designed to increase market-based recycling and a circular economy.

This rulemaking will contemplate at least two scenarios for frequency of collection waivers:

1. Replace the minimum frequency of collection from twice per week to once per week.
2. Require a frequency of twice per week unless the waste management organization obtains an approved variance or is able to demonstrate a diversion variance by managing to divert a minimum of 60 percent or greater of trash for beneficial use, i.e., recycling/circular economy.

Documents:

- Notice of Docket Opening (published Nov. 10, 2022) | View >

Additional Information:

BACK TO TOP

https://www.azdeq.gov/sw-collection-rulemaking 1/2

Scenario 1 simply reduces the state mandated collection frequency from twice per week to once per week absent any requirement for recycling/waste diversion, let alone the DHS goal of 50%. Scenario 1 therefore appears inconsistent with the DHS Sustainability and Environmental Programs as it offers no pathway "*to achieve a waste diversion rate of at least 50 percent and maintain cost effective waste prevention and recycling programs."* And in fact, Scenario 1 works in the converse by streamlining a direct pathway for any given local government to simply abandon its recycling program altogether, and landfill all its waste.

Scenario 2 is consistent with the DHS Sustainability and Environmental Programs as it establishes a minimum of 60% recycling/waste diversion demonstration to trigger the “diversion variance” allowing a given local government the ability to reduce collection frequency from twice per week to once per week. By far, “collection” is the most expensive component of solid waste management. Scenario 2 was designed to create an economic incentive (i.e the potential cost savings to reduce collection costs in half) to entice local governments in Arizona to increase their waste diversion rate. As an example, if a given local government chose to send their waste to a mixed waste processing facility instead of a landfill, and a 60% recycling rate was achieved, the local government would be able to offset the additional cost of waste processing vs landfilling by the cost savings afforded by the reduction in collection frequency. Such a program would allow local governments to meet or exceed the DHS goals without any additional cost to local government and the public it represents. Scenario 2 utilizes creative rulemaking as a means to improve Arizona’s anemic recycling rate without adding cost. A recent national study by Lawnstarter ranks Arizona near dead last at 47th out of 50 states in recycling, and 50th out of 50 in managing food waste and solid waste policy.

Overall Rank (1=Best)	State	Overall Score	Policies Rank
37	Hawaii	38.99	18
38	New Mexico	38.69	31
39	Florida	38.27	43
40	North Dakota	38.20	34
41	Kansas	37.77	46
42	West Virginia	37.12	31
43	Oklahoma	36.41	37
44	Wyoming	35.48	31
45	Kentucky	35.06	46
46	Tennessee	32.73	49
47	Arizona	28.29	50
48	Montana	27.78	40
49	Nevada	24.59	44

While Scenario 2 is consistent with the DHS Sustainability and Environmental Programs, it is the language for ADEQ Scenario 1 for which ADEQ currently seeks GRRC approval. Therefore, we ask that GRRC not approve the November 5 agenda item C-3 as presented, and further, that GRRC recommend to ADEQ that they resubmit revised language for approval amending R18-13-308 based on ADEQ’s Scenario 2.

2. GRRC Agenda Item C-3 Poses a Threat to the Environment and the Well-Being of Arizonans

Reliance on the practice of landfilling waste in Arizona poses a threat to the environment. Groundwater contamination, air pollution, and heat gain from global warming produced by methane and CO2 released from landfills are just a few of the examples of environmental problems created by landfills.

a. Groundwater contamination.

Nearly half of the potable water supply in Arizona comes from Groundwater. Landfills are a source of groundwater pollution. Landfills are essentially a tomb designed to receive and contain solid waste on a long-term basis. However, landfills can leak. Liquids within the landfill (called Leachate) pick up contaminants from the waste as the leachate percolates to the bottom of the landfill. New “best available technology, or BAT” landfills are required to have leachate collection systems, however older landfills in many cases did not have leachate collection. Even in BAT landfills, liner can leak, which can allow harmful toxins to be released into the groundwater supply. At least 3 landfills that are known to have contaminated Arizona aquifers are listed on WQARF (Water Quality Assurance Revolving Fund) :

a. *City of Tucson – Los Reales*
b. *Estes Landfill*
c. *Silverbell landfill*

Landfills do not go away. They remain as a permanent tomb for waste forever. It therefore remains quite possible that other landfills in the State of Arizona, both operating sites and closed sites, may release pollution into the groundwater in the future. Recycling and waste diversion programs play a vital environmental role as they reduce Arizona’s reliance on landfills and serve as a viable option to reduce the impact of groundwater pollution both now and into the future.

b. Air pollution

Landfills create methane and CO2, both of which are harmful greenhouse gases (GHG’s). Organic materials such as food waste, green waste, woody biomass, paper, cardboard, and other organic materials naturally decompose in the landfill, releasing harmful GHG’s into the atmosphere. GHG’s emanating from landfills are a significant contributor to global warming. A July 2021 article entitled “**Your Trash Is Emitting Methane In The Landfill. Here's Why It Matters For The Climate”,** as published by NPR claims that *“Landfills are among the nation's largest sources of methane, a greenhouse gas far more potent than carbon dioxide and a major contributor to global warming. A seminal U.N. report published in May found that immediate reductions in methane emissions are the best, swiftest chance the planet has at slowing climate change.*

An article published on Tucson.com on April 24, 2019 shows that Tucson and Phoenix are the #3 and #4 highest heat gain cities in America. Heat gain mitigation strategies such as the identification of heat gain sources and the remediation of point sources of methane and CO2 are of great importance to Arizona.

Enter Carbon Mapper. Carbon Mapper (https://carbonmapper.org/) “is a 501c3 nonprofit focused on filling data gaps and improving global monitoring of methane and CO_2 to enable science-based decision-making. Carbon Mapper’s history builds on over a decade of research and collaboration, including a series of NASA-funded projects that laid the technical and scientific foundation for the importance of frequent monitoring and mitigation of methane and CO_2 point sources. Since 2016, our experts and collaborators at NASA’s Jet Propulsion Lab and Arizona State University have used aircraft equipped with prototype versions of the Carbon Mapper Coalition satellite instruments, along with other observing systems and data sets, to assess methane emissions in representative regions and sectors across the U.S. We use remote sensing technology to detect, pinpoint, and quantify methane and CO_2 at the scale of individual facilities.”

Carbon Mapper states "using an imaging spectrometer onboard a satellite or aircraft, we detect and pinpoint methane emissions at the infrastructure or facility level. Emissions are quantified using a rigorous, science-based process that is both vetted by peers and published. Our data empowers decision-makers with the granularity needed to pinpoint where emissions are coming from and the speed to enable rapid action."

Carbon Mapper used its remote sensing technology to measure several (but not all) Arizona landfills. Based on the data published on their website, the Arizona landfills measured emit a total of about 2158 kg/hr of methane. Using the US EPA Greenhouse Gas Equivalencies Calculator, (https://www.epa.gov/energy/greenhouse-gas-equivalencies-calculator) 2158 kg/hr of methane is the equivalent to about 528,333 metric tonnes of CO2 per year. Per US EPA calculator – this is the equivalent to combusting 582 million pounds of coal each year. Again, per the US EPA calculator, the amount of methane generated by the Arizona landfills measured by Carbon Mapper would require planting 616,844 acres of forest per year in order to offset this GHG generation.

Of note, the overall release of landfill methane emanating from landfills in Arizona, is far greater than previously mentioned, since Carbon Mapper measured only some but not all landfills in Arizona.

It is a proven fact that landfill methane can be mitigated by diverting the organic fraction of waste to recycling infrastructure such as composting facilities, gasification facilities (in Arizona – called "Advanced Recycling Facilities), or other such facilities instead of burying waste in landfills. These types of facilities are the backbone of any robust recycling effort designed to meet the 60% recycling/diversion standard. ADEQ scenario 1 is therefore not supportive of a solution to address GHG emissions nor the DHS Sustainability and Environmental Programs as it contains no provision to stimulate recycling. While the ADEQ Scenario 2 language does include a 60% recycling achievement threshold, ADEQ's Secenario 1 language remains silent on recycling. For this reason, we implore the GRRC to request ADEQ to submit revised lanagague to R18-13-301 in accordance with ADEQ's Scenario 2, which includes a requirement to achieve 60% recycling/landfill diversion as a provision to be granted a change in solid waste collection frequency from twice per week to once per week.

3. *Creation of a Circular Economy/Economic Development*

Landfills do not create economic development. Conversely, increasing market-based recycling and creating a circular economy can and will create thousands of new permanent jobs statewide and drive billions of dollars of new capital investment. The advanced technology available today to sort waste requires significant private investment designed to capture elevated volumes of material from the waste stream and divert those captured materials into commerce to create a circular economy. R18-13-308 currently provides a discretionary waiver process to reduce to once per week collection vs the required twice per week requirement, however the waiver can be cancelled at any time. Change is needed to R18-13-308 to establish a permanent collection frequency variance so that lenders and/or private institutions can justify the significant capital investment required to fund the infrastructure necessary to realize 60% recycling/diversion rate or higher.

The original purpose of the revision to R18-13-308 was to “increase market-based recycling and create a circular economy” in Arizona. While ADEQ Scenario 2 accomplishes this mission, ADEQ Scenario 1, which is represented by the language presented in the GRRC agenda item C-3, does not. In fact, rather than fostering economic development and a circular economy, the language as currently proposed to GRRC streamlines a process that can lead to the increased use/dependency on area landfills, thus becoming an impediment to establishing market-based recycling and a circular economy.

Conclusion

While recycling/diversion programs can and will reduce negative environmental impacts of landfills, our fear is that ADEQ’s proposed language, as currently presented for approval by this Board, creates a direct pathway which can undermine recycling programs in Arizona. The proposed revision submitted by ADEQ to the GRRC for approval streamlines the possibility for Arizona local governments to abandon recycling efforts altogether and simply landfill all their waste. While this may be an unintended consequence, the amendment as currently proposed to R18-13-308 essentially codifies a clear pathway by which local governments can choose to switch to once per week rubbish-only collection as a method to eliminate the cost of recycling.

I implore GRRC to avoid consideration of agenda item C-3 (proposed revision to R18-13-308). Further, I ask the Board to recommend that ADEQ develop and resubmit revised language based on ADEQ Scenario 2 and ensure that its’ purpose fosters the DHS’s goals, and is designed to increase recycling, sustainability, and reduce the effects of climate change in the State of Arizona.

I firmly believe that given properly crafted language, a revision to R18-13-308 can have a profound net positive effect on Arizona residents, businesses, and the environment, while simultaneously meeting or exceeding the DHS Sustainability and Environmental Programs.

Good afternoon Eddie,

ADEQ has approval to proceed with the rulemaking process for the following:

- A.A.C. Title 18, Chapter 13 – Solid Waste Transfer Facilities
- A.A.C. Title 18, Chapter 2, Article 6, Emissions From Existing and New Nonpoint Sources & Article 13, State Implementation Plan Rules for Specific Locations
- A.A.C. Title 18, Chapter 13 - Arizona Coal Combustion Residuals Program
- 18 A.A.C. Chapter 13, Article 3: Solid Waste Collection Frequency

Thank you,
Blaise

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2024

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 12, 2024

SUBJECT: **DEPARTMENT OF ENVIRONMENTAL QUALITY**
Title 18, Chapter 13

New Article: Article 10, Article 17

New Section: R18-13-1001, R18-13-1002, R18-13-1003, R18-13-1003.01, Table 1, R18-13-1003.02, R18-13-1004, R18-13-1005, R18-13-1006, R18-13-1007, R18-13-1008, R18-13-1010, R18-13-1010.01, R18-13-1011, R18-13-1012, R18-13-1013, R18-13-1014, R18-13-1015, R18-13-1016, R18-13-1017, R18-13-1018, R18-13-1019, R18-13-1020, R18-13-1021, Table 2, Table 3, R18-13-1701, R18-13-1703, R18-13-1704

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to add two new Articles containing twenty-nine (29) new sections in Title 18, Chapter 13, Articles 10 and 17 related to Coal Combustion Residuals and corresponding Financial Assurance, respectively. Specifically, the Department indicates these rules establish an Arizona coal combustion residuals (CCR) permit program to be approved by the United States Environmental Protection Agency (EPA) to operate in lieu of the federal CCR program. In addition, after EPA approval and permit issuance, the Arizona CCR permit program would operate in place of Arizona Department of Water Resources (ADWR) dam safety rules for CCR surface impoundments.

The Department indicates in 2022, the Arizona legislature enacted Chapter 178 authorizing the Department to develop a state permit program for CCR. Pursuant to that legislation, A.R.S. § 49-891 requires the Arizona program to be neither more or less stringent than federal nonprocedural requirements in 40 CFR 257, subpart D, with two exceptions related to standards already developed in Arizona. First, as provided in A.R.S. § 49-891(B), the Department's CCR rules are required to be more stringent than 40 CFR 257, subpart D where existing ADWR dam safety standards are more stringent. A CCR surface impoundment typically includes a dike or embankment that holds the CCR and liquids in the impoundment. In Arizona, a surface impoundment with an aboveground embankment under EPA regulations is a dam under ADWR rules. These stricter dam safety standards based on ADWR rules are contained in proposed R18-13-1002, R18-13-1003.01, R18-13-1003.02 and R18-13-1010.01.

Second, the Department may opt to be more stringent than EPA to match aquifer protection standards already developed in Arizona. In this category, this final rule is broader than EPA's CCR regulations, with requirements for non-CCR wastestreams that may be placed in a CCR unit at R18-13-1005(B). These requirements are explained in more detail in the section-by-section explanations later in the Department's Notice of Final Rulemaking Preamble.

1. **<u>Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?</u>**

The Department cites both general and specific statutory authority for these rules.

2. **<u>Do the rules establish a new fee or contain a fee increase?</u>**

Pursuant to A.R.S. § 41-1008(A)(1), "an agency shall not…[c]harge or receive a fee or make a rule establishing a fee unless the fee for the specific activity is expressly authorized by statute or tribal state gaming compact.

The Department indicates this rulemaking does establish new fees. Specifically, rule R18-13-1021 sets forth the fees and billing procedures for CCR facilities and permitting actions. In Subsection A, Table 2 specifies annual registration fees. In subsection (B), Table 3 presents initial and maximum fees for a CCR facility permit and CCR permit modification. Subsections (C), (D), and (E) state the billing procedure that the Department must follow during permitting actions. Subsection (E) also includes the hourly billing rate of $244 per hour for permitting activities and the procedure for annual adjustment of annual fees and the billing rate pursuant to United States Bureau of Labor Statistics Consumer Price Index tables.

The Department indicates these fees are specifically authorized by A.R.S. § 49-891(D). A.R.S. § 49-891(D) states, "[t]he rules for CCR permits shall include: 1. Permit processing fees from the applicant to cover the cost of administrative services and other expenses associated with evaluating the application and issuing or denying the permit, beginning when an application is submitted. 2. Annual fees for the program approved by the United States environmental protection agency beginning after CCR program approval."

As such, Council staff believes the the Department is in compliance with A.R.S. § 41-1008.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Department indicates it did not review any study relevant to this rulemaking.

4. Summary of the agency's economic impact analysis:

These rules enact already existing standards from the EPA and ADWR into the Department's rules. The rules also enact additional requirements that would apply for the first time at some point after these rules are effective. The Department believes that where these CCR rules match existing standards, they do not have any direct negative impact on the four facilities in Arizona that will require a CCR facility permit.

The Department estimated the additional annual cost to implement the CCR permit program at $158,760, separate from the cost of processing permits. The overall cost to the Department is expected to be balanced by the fees it collects. In spite of the fees necessary to cover the cost of the program, Arizona's CCR facilities have supported the Department's development of a state permit program as early as 2018. The Department believes the overall benefits for all parties involved exceed the overall costs.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes its estimate of the annual cost of the program not covered by permit processing fees is the lowest possible and therefore imposes the least burden and cost. Further, the annual registration fees in R18-13-1021(A) are based on the number and complexity of CCR units at each facility. This formula was arrived at after discussion with the affected stakeholders, and it is roughly proportional to the amount of time the Department will likely spend relative to each facility. In the Department's judgment, it is the best way to fairly assess the annual registration fees.

6. What are the economic impacts on stakeholders?

The Department believes that because the Department will be replacing other agencies as the enforcing agency for standards that will remain the same, the rule will have a positive impact on the CCR facilities as well as the local community by enabling communication with a single, local agency.

CCR facilities will be subject to the Department's permitting requirements that may exceed, or at least be additional to, what will be required under future EPA permitting requirements for non-participating states. CCR facilities will also be required to provide financial

assurance and pay annual registration fees and permit processing fees. The annual fees are designed to cover the Department's non-permit related costs in administering the state CCR program.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates between the Notice of Proposed Rulemaking published in the Administrative Register on July 12, 2024 and the Notice of Final Rulemaking now before the Council for consideration, the Department made the following changes to the rules:

- In R18-13-1002(E), R18-13-1003(G) and R18-13-1010(G), ADEQ changed "{proposed rule date}" or "{insert proposed rule date}" to "July 12, 2024".
- In R18-13-1010(B)(2), ADEQ clarified that ADWR's approval to construct is independently required when seeking ADEQ approval for certain actions before a facility permit has been issued. ADEQ clarified this in R18-13-1010(B)(2)(a) as follows:
    - "a. For a CCR surface impoundment before a CCR facility permit has been issued for that facility, the owner or operator has obtained approval to construct from ADWR and demonstrates to the satisfaction of the Director that commencing construction before approval is necessary to comply with 40 CFR 257, as incorporated in this Article;"
- Modified R18-13-1010(C) to add an alternate time for the public meeting:
    - Proposed:
        - C. Prior to submitting an initial or renewal CCR facility permit application, the owner or operator shall hold a public meeting in order to solicit questions from the community and inform the community about the permit to be applied for. The owner or operator shall notify ADEQ at least 30 days before the meeting, provide adequate public notice for the meeting, and submit a summary of the meeting to ADEQ.
    - Final:
        - C. The owner or operator shall hold a public meeting in order to solicit questions from the community and inform the community about its intended permit at one of the times listed below. The owner or operator shall notify ADEQ at least 30 days before the meeting, provide adequate public notice for the meeting, and submit a summary of the meeting to ADEQ:

          1. Within 90 days after receiving notice from the Director that its application is administratively complete, or

          2. Prior to submitting an initial or renewal CCR facility permit application.
- In R18-13-1017(F)(7), ADEQ added the last clause as follows:
    - 7. Replace monitoring equipment, including a well, if the replacement results in equal or greater monitoring effectiveness, but not including routine maintenance or replacement of well components and related equipment;

Council staff does not believe these changes make the current rules in the Notice of Final Expedited Rulemaking substantially different from the proposed rules in the Notice of Proposed Expedited Rulemaking pursuant to A.R.S. § 41-1025.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it received six written comments, four from the Arizona utilities that would be seeking CCR facility permits, one from an environmental organization, and one from a school district near a CCR facility. The Department indicates the four utilities expressed strong support for the Department seeking authorization for the federal program with this rule. The Department indicates the environmental organization and school district expressed concern and generally opposed ADEQ seeking authorization. The comments received by the Department and the Department's responses are summarized in Section 12 of the Preamble to the Notice of Final Rulemaking. Additionally, copies of the public comments received have been included in the final materials for the Council's reference. Council staff believes the Department has adequately responded to public comments related to this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates the rules require a CCR permit. However, the Department indicates, pursuant to A.R.S. § 41-1037(A)(3), "[t]he issuance of a general permit is not technically feasible…" as there are only four facilities in Arizona to be permitted and each facility is unique and will be subject to different permit conditions. As such, Council staff believes the Department is in compliance with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

Pursuant to A.R.S. § 41-1052(D)(9), "[t]he council shall not approve the rule unless…[t]he rule is not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law."

The Department indicates two federal laws are applicable to the subject of this rule: the WIIN Act (Water Infrastructure Improvements for the Nation Act) enacted by Congress in December 2016, and 40 CFR 257, subpart D, first promulgated in 2015, but amended since. The WIIN Act provided authority for EPA to review and approve permit programs submitted by states for CCR facilities. The approved state programs would then operate in lieu of the federal requirements in 40 CFR 257, subpart D.

The Department indicates in five areas, the rules are statutorily authorized to be more stringent than federal law:

- Aquifer protection standards already developed under ADEQ statutes and rules for non-CCR wastestreams. *See* R18-13-1005(B). Authorized in A.R.S. § 49-891(A);
- CCR surface impoundment safety standards already existing under Arizona Department of Water Resources rules at 15 A.A.C. 12, Article 15. Authorized in A.R.S. § 49-891(B);
- New ADEQ permitting requirements. These new permitting requirements are contained in R18-13-1010 through R18-13-1021. Authorized in A.R.S. §§ 49-891(C) and (F);
- Financial assurance requirements contained in R18-13-1020 and Article 17. Authorized in A.R.S. § 49-770(A); and
- Annual registration fees and permit processing fees contained in R18-13-1021. Authorized in A.R.S. § 49-891(D).

11. <u>Conclusion</u>

This regular rulemaking from the Department seeks to add two new Articles containing twenty-nine (29) new sections in Title 18, Chapter 13, Articles 10 and 17 related to Coal Combustion Residuals and corresponding Financial Assurance, respectively. Specifically, the Department indicates these rules establish an Arizona CCR permit program to be approved by the United States EPA to operate in lieu of the federal CCR program. In addition, after EPA approval and permit issuance, the Arizona CCR permit program would operate in place of ADWR dam safety rules for CCR surface impoundments.

The Department is seeking the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A).

Council staff recommends approval of this rulemaking.

October 15, 2024

<u>VIA EMAIL</u>: grrc@azdoa.gov
Jessica Klein, Esq., Chair
Governor's Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 25, Expedited Rulemaking

Dear Ms. Klein:

1. <u>The close of record date</u>: September 16, 2024

2. <u>Explanation of how the expedited rule meets the criteria in A.R.S. § 41-1027(A):</u>
   The rulemaking does not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of regulated persons. The rulemaking amends requirements to reduce steps and removes requirements that are outdated or need clarification, meeting the requirements in A.R.S. § 41-1027(A)(5) and (6).

3. <u>Whether the rulemaking relates to a five-year-review report and, if applicable, the date the report was approved by the Council:</u>
   The rulemaking for 9 A.A.C. 25 does not relate to a five-year-review report.

4. <u>A list of all items enclosed:</u>
   a. Notice of Final Expedited Rulemaking, including the Preamble, Table of Contents, and text of the rule
   b. Statutory authority
   c. Current rule

The Department is requesting that the rules be heard at the Council meeting on December 3, 2024.

The Department certifies that the Preamble of this rulemaking discloses a reference to any study relevant to the rule that the Department reviewed and either did or did not rely on in its evaluation of or justification for the rule.

The Department's point of contact for questions about the rulemaking documents is Ruthann Smejkal at Ruthann.Smejkal@azdhs.gov.

Sincerely,

Stacie Gravito
Director's Designee

   Name: Mark Lewandowski

   Address: Arizona Department of Environmental Quality, Waste Programs Division

   1110 W. Washington Street Phoenix, AZ 85007

   Telephone: (602) 771-2230

   Email: lewandowski.mark@azdeq.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Summary. The Arizona Department of Environmental Quality (ADEQ) has finalized rules to establish an Arizona coal combustion residuals (CCR) permit program to be approved by the United States Environmental Protection Agency (EPA) to operate in lieu of the federal CCR program. In addition, after EPA approval and permit issuance, the Arizona CCR permit program would operate in place of Arizona Department of Water Resources (ADWR) dam safety rules for CCR surface impoundments.

The contents of this part of the preamble are:

I. Background.

II. The Arizona CCR permit program.

II.a. Effective date of this rulemaking and early permit applications.

II.b. Language from EPA's proposed permit rule.

II.c. Signatory requirements for owners and operators.

II.d. Pre-application public meeting.

III. Financial assurance.

IV. Transition from Governor's Regulatory Review Council (GRRC) approval to CCR program approval.

V. Transition from CCR program approval until permit issuance.

VI. EPA's CCR "Legacy Rule"

VII. Section-by-Section explanations.

I. Background. In 2015, EPA adopted self-implementing rules for CCR in 40 CFR 257, subpart D, under Subtitle D of the Resource Conservation and Recovery Act (RCRA), that require electric utilities and independent power producers generating coal combustion residuals to follow detailed requirements for the management and disposal of CCR as solid waste. EPA's rules established national minimum criteria for existing and new CCR landfills

and existing and new CCR surface impoundments ("CCR units") and all lateral expansions of CCR units. The criteria consist of location restrictions, design and operating criteria, groundwater monitoring and corrective action requirements, closure and post-closure care requirements, and recordkeeping, notification and internet posting requirements. Subpart D also required that CCR units failing to meet certain criteria in the rule stop receiving waste and retrofit or close, in some circumstances.

Congress enacted the Water Infrastructure Improvement for the Nation (WIIN) Act in 2016, amending section 4005 of RCRA. It provided authority for EPA to review and approve programs submitted by states to permit CCR units, which would then operate in lieu of the federal requirements. The WIIN Act also required EPA to implement a federal permit program in Indian country and nonparticipating states that would require each CCR unit to achieve compliance with applicable criteria established in subpart D. Once the state program is approved, permits or other prior approvals issued pursuant to the approved state permit program operate in lieu of the federal requirements. To be approved, a state program must require each CCR unit to achieve compliance with subpart D or alternative state criteria that EPA determines are "at least as protective as" subpart D. A state permitting program may be approved in whole or in part.

In 2022, the Arizona legislature enacted Chapter 178 authorizing ADEQ to develop a state permit program for CCR. Pursuant to that legislation, A.R.S. § 49-891 requires the Arizona program to be neither more or less stringent than federal nonprocedural requirements in 40 CFR 257, subpart D, with two exceptions related to standards already developed in Arizona. First, as provided in A.R.S. § 49-891(B), ADEQ's CCR rules are required to be more stringent than 40 CFR 257, subpart D where existing ADWR dam safety standards are more stringent. A CCR surface impoundment typically includes a dike or embankment that holds the CCR and liquids in the impoundment. In Arizona, a surface impoundment with an aboveground embankment under EPA regulations is a dam under ADWR rules. These stricter dam safety standards based on ADWR rules are contained in proposed R18-13-1002, R18-13-1003.01, R18-13-1003.02 and R18-13-1010.01.

Second, ADEQ may opt to be more stringent than EPA to match aquifer protection standards already developed in Arizona. In this category, this final rule is broader than EPA's

regulations, with requirements for non-CCR wastestreams that may be placed in a CCR unit at R18-13-1005(B). These requirements are explained in more detail in the section-by-section explanations later in this preamble.

This rule incorporates EPA's 40 CFR 257, subpart D, revised by EPA as of December 14, 2020. As a starting point, before ADEQ modifications and exclusions, this was the most convenient incorporation date that takes into account important federal court decisions and EPA CCR rulemakings that occurred after EPA's original 2015 rule. A summary of this background can be found in the November 12, 2020 Federal Register at 85 FR 72506.

ADEQ opened dockets for this rulemaking in the June 10, 2022, June 9, 2023 and June 7, 2024 *Arizona Administrative Register*. ADEQ held a series of working group and stakeholder meetings in 2022, 2023, and 2024. Draft rule language was also shared with EPA during this time and EPA's feedback has been valuable. ADEQ published the proposed rule on June 21, 2024 and held a virtual hearing, with close of comment on August 14, 2024. Some of the major features of this rulemaking are explained below followed by a short section-by-section explanation.

II. The Arizona CCR permit program. EPA's 40 CFR 257, subpart D was designed to be self-implementing, without permits or any other form of formal regulatory approval. The permit program established in this rule has been designed just for the CCR program and is not used elsewhere by ADEQ. It supplements the certifications from "qualified professional engineers" that are used extensively in the federal rule with review and approval of those certifications by ADEQ as part of its permitting program.

II.a. Effective date of this rulemaking and early permit applications. This rule provides that most of the requirements in this rule become effective upon EPA's approval of Arizona's program. Congress drafted the WIIN Act so that an individual CCR unit at a CCR facility remains subject to 40 CFR 257, subpart D, until EPA both approves the state program and the state issues a permit covering the CCR unit under the approved program. For simplicity, under state statute, a CCR surface impoundment remains subject to ADWR dam safety rules until EPA approves the CCR permit program and a permit is issued covering the impoundment under the Arizona program.

Arizona's CCR authorizing legislation requires CCR facilities to submit facility permit applications within 180 days after EPA CCR program approval, but also allows them to submit a permit application before program approval. This final rule provides that no permits will be issued until after CCR program approval to prevent Arizona utilities from holding a document that can't be enforced, and is not yet required by law. See A.R.S. §§ 49-781 and 49-783.

ADEQ recognizes that the initial facility permit process will be lengthy and that there is an indefinite period of time between ADEQ's submittal of its program to EPA and EPA's decision on the program. ADEQ expects that any early applications will be processed for completeness only. Under this rule, the permit processing fees in Article 10 begin upon the effective date of this rule. ADEQ expects a rule for CCR licensing time frames in 18 A.A.C. 1 to be effective by CCR program approval.

II.b. Language from EPA's proposed permit rule. EPA proposed a federal CCR permitting rule in February 2020 for Indian country and states not participating with their own program. In R18-13-1010, ADEQ used some of EPA's proposed language for its own application requirements. Using EPA's proposed permit application language as a foundation for ADEQ's language will reduce complexity should CCR facilities be required to submit applications to both EPA and Arizona at the same time. It also allows Arizona's program to be evaluated by EPA as a similar program with familiar features. At the time this rule was finalized, EPA estimated that it would finalize its proposed permitting rule in late 2024. It is possible that ADEQ's CCR permits rule will be effective around the same time as EPA's. If EPA program approval occurs quickly, CCR facilities in Arizona may be required to submit applications to both EPA and ADEQ, as well as ADWR for new or modified surface impoundments. By using EPA language and elements, it is likely that a certain amount of work done for one permitting authority will work for the other.

II.c. Signatory requirements for owners and operators. Throughout EPA's 40 CFR 257, subpart D, requirements are phrased in terms of "owner or operator". ADEQ followed this approach in this CCR rule. If the owner and operator of a CCR unit are separate persons, only one person is required to discharge any specific responsibility, but both are liable in the event of noncompliance. An exception to this is signing and certifying the permit application,

where, like EPA's proposed permitting rule at 40 CFR 257.130(a), this proposed rule would require both to sign, unless an agreement is provided to ADEQ that one will sign and certify for the other.

II.d. Pre-application public meeting. Although Arizona's four established CCR facilities are presumably well known in the surrounding community, a state permit program for CCR units focusing on groundwater and safety is potentially unfamiliar. This rule requires that the owner or operator hold a pre-application public meeting with the purpose of informing the local community about the permit they are seeking and addressing any questions and concerns. ADEQ believes this public meeting, once every 10 years, will minimize public misunderstandings during possible phase out of units, addition of new units, closure strategies, and any corrective action.

EPA has successfully employed the requirement for a pre-application public meeting since adding it to the RCRA Expanded Public Participation Rules in 1995. The most important goal ADEQ hopes to achieve from the pre-application meeting requirement is the opening or continuation of a dialogue between the permit applicant and the community. We believe that the applicant should open or restart this dialogue at the beginning of the permitting process. The meeting will give the public direct input to facility owners or operators; at the same time, facility owners or operators can gain an understanding of public expectations and attempt to address public concerns in their permit applications. The pre-application meeting should provide an open, flexible, and informal occasion for the applicant and the public to discuss various aspects of CCR management and the facility's operations.

III. Financial assurance. A.R.S. § 49-770, as amended in 2022 by Ch. 178, requires financial assurance for CCR facilities. ADEQ modeled the CCR financial assurance rules in Article 17 after those in Arizona's existing Aquifer Protection Permit (APP) program. All of Arizona's active CCR facilities already have financial assurance for their non-CCR units under their current APP. After Ch. 178 removed the requirement for CCR units to have an APP, some facilities removed the CCR units from their APP but all of them had financial assurance for their CCR units while they were under an APP. Ch. 178 modified the financial assurance requirement for CCR units to recognize that these CCR units were still, or had just

been, covered by financial assurance under an APP. R18-13-1020 allows temporary compliance with financial assurance requirements at existing CCR facilities until a CCR permit is issued, through submittal of the demonstrations that were made pursuant to the APP. See the explanation of R18-13-1020 for more detail.

IV. Transition from Governor's Regulatory Review Council (GRRC) approval to CCR program approval. Although this rule was officially effective about 60 days after GRRC approval, by its terms, most of this rule, including the requirement to submit a facility permit application, would not be effective until CCR program approval by EPA. After GRRC approval, ADEQ would prepare its program submittal to EPA, and any early permit applications would be accepted and processed for completeness. ADEQ expects a licensing time frame rule for CCR permits to be effective by CCR program approval. New construction or modifications of CCR units would continue to be processed under EPA and, for most surface impoundments, ADWR rules.

V. Transition from CCR program approval until permit issuance. After CCR program approval, CCR facility permit applications that have not already been submitted are required within 180 days, and ADEQ rules and oversight related to groundwater monitoring and CCR surface impoundment safety become effective. After CCR program approval, new surface impoundments and any changes to existing CCR surface impoundments will continue to be processed by ADWR until the impoundment is covered by an ADEQ permit. (See A.R.S. § 45-1201(1)(f)). However, before permit issuance, construction can begin on new surface impoundments without a permit modification as provided in R18-13-1010(B)(2), if it is consistent with any Arizona Department of Water Resources authorization needed.

VI. EPA's CCR "Legacy Rule". The proposed, and this final, Arizona CCR rule do not include changes made by EPA's 2024 Legacy Coal Combustion Residuals Surface Impoundments and CCR Management Units Rule that will be effective November 4, 2024. Any "legacy units" and "coal combustion residuals management units" (CCRMUs) in Arizona will be regulated by EPA under the newly revised Subpart D, once it is effective.

VII. Section-by-Section explanations

R18-13-1001. Applicability; Incorporation by Reference; General Provisions. R18-13-1001 contains four basic parts. Subsection (A) provides that the majority of the Article is not effective until EPA approves the CCR permit program. The earlier effective date for the list in (A)(1) allows processing of any early permit applications ADEQ receives as permitted under A.R.S. § 49-891(F). Subsection (B) provides information on the incorporation by reference model used in the rule. It is very similar to how incorporation by reference is used in ADEQ's hazardous waste rules at R18-8-260(A) and (B). Subsection (C) incorporates by reference a group of EPA CCR regulations under the basic heading of General Provisions and notes two minor exceptions. Subsections (D) through (F) contain ADEQ's modifications and additions to the EPA definitions in § 257.53. A separate section is used in subsection (F) to group together the definitions that originated in ADWR rules related to dam safety.

R18-13-1002. Location Restrictions. R18-13-1002 incorporates EPA's location restrictions as provided in §§ 257.60 through 257.64 and adds, in subsections (B), (C), and (D), additional items related to §§ 257.62, 257.63, and 257.64 from ADWR rules. Subsections (B), (C), and (D) apply only to new surface impoundments and lateral expansions of those existing surface impoundments that are larger than the size limits in subsection (E).

R18-13-1003. Design Criteria. R18-13-1003(A) through (E) incorporates EPA's detailed design standards for CCR units almost without change, only removing a height restriction for vegetation on surface impoundments as recommended by EPA after a federal court decision. Subsection (F) modifies EPA's spillway capacity requirements by requiring owners or operators to evaluate both ADWR's existing criteria for spillway capacity and EPA's, and use whichever capacity requirement is greater.

R18-13-1003.01. Additional Design Criteria for New CCR Surface Impoundments and Lateral Expansions of CCR Surface Impoundments. R18-13-1003.01 provides additional design requirements to R18-13-1003 that need to be met by new or lateral expansions of CCR surface impoundments. These design requirements cover embankment stability as it relates to how seepage flows through the embankment, how earthquake impacts are managed, how seepage and drains need to be designed, and minimum overall factors of safety. The requirements in this Section originate from ADWR rules and apply only to new

surface impoundments and lateral expansions of those existing surface impoundments that are larger than the size limits in subsection (D).

R18-13-1003.02. Additional Emergency Action Plan Requirements for CCR Surface Impoundments. R18-13-1003.02 adds to the emergency action plan (EAP) content and implementation requirement that EPA promulgated in §§ 257.73(a)(3) and 257.74(a)(3) by listing additional criteria from ADWR rules. The additional EAP content requirements under subsection (A) clarify notification and review requirements, triggering events, and the requirement for the EAP to be certified by a qualified professional engineer. Subsection (B) presents additional specific requirements pertaining to the implementation of the EAP and what actions need to be taken by the owner or operator of a CCR surface impoundment following specific triggering events. As in previous Sections adding ADWR requirements, the last subsection lists small structures that would be exempt from the Section.

R18-13-1004. Operating Criteria. R18-13-1004 incorporates by reference all of EPA's regulations that apply to operation of CCR landfills, CCR surface impoundments, and lateral expansions of CCR landfills. The additions in subsections (B) through (I) apply to CCR surface impoundments and their lateral expansions and originate in ADWR rules. ADEQ has only added requirements from ADWR rules where they may be more stringent than EPA's requirements in 40 CFR 257, subpart D.

R18-13-1005. Groundwater Monitoring and Corrective Action. R18-13-1005 incorporates by reference the groundwater monitoring and corrective action requirements of 40 CFR 257.90 through 257.98, subject to some amendments and clarification. These EPA regulations address groundwater contamination that could be caused by coal ash and the steps to be taken at that point.

Subsection (A) incorporates by reference 40 CFR 257.90 through 257.98 which require groundwater monitoring system(s), program(s), and related criteria for all CCR units. The initial system of monitoring, required for all CCR units, is called detection monitoring. The one section not incorporated is 257.90 (g) regarding suspension of groundwater monitoring. However, amendments are made to the other EPA sections.

Subsection (B) amends 40 CFR 257.94(a) such that ADEQ can require detection monitoring to include additional monitoring requirements for non-CCR related contaminants not otherwise listed in Appendix III of EPA's rule. In such instances, subsection (B) further clarifies that potential additional contaminant monitoring for non-CCR related constituents would be administered consistent with the requirements of the previously applicable aquifer protection permit program under A.R.S. Title 49, Chapter 2, Article 3, and Articles 1 and 2 of 18 A.A.C. 9.

Subsection (C) amends 40 CFR 257.94(e)(2) in the instance a statistically significant increase (SSI) over background or an exceedance of a water quality standard is observed and the owner or operator elects to proceed with an alternate source demonstration (ASD). The owner or operator is then required to notify ADEQ within 7 days of that decision. Subsection (C) further provides for the Director's approval or disapproval of the forthcoming ASD. Early notification of a pending ASD, within this and subsequent subsections, is intended to afford timely consideration of ASDs and address the constraints of EPA's established time frames. ASDs certified as such by the facility's qualified professional engineer and completed within the 90 days pursuant to 40 CFR 257.94(e)(2), allow for detection monitoring to continue. Any subsequent disapproval by the Director would trigger assessment monitoring within 90 days after the date of disapproval, consistent with 40 CFR 257.95(b). This allows the facility to continue with detection monitoring during ADEQ's evaluation of the ASD, as it would have before program approval. Subsequent ASDs, determined by the certifying engineer to be directly related to a previously demonstrated alternate source, may reference previous related ASDs for other constituent(s), however each ASD should stand on its own. ADEQ notes that approval or disapproval of an ASD under this subsection or subsection (D) would be an appealable agency action under A.R.S. § 41-1092 *et seq*.

Subsection (D) amends 40 CFR 257.95(g)(3)(ii) similarly for an ASD conducted during assessment monitoring. If subsequently disapproved by the Director, an assessment of corrective measures must be initiated within 90 days from the date of the Director's disapproval, as provided under 257.96(a). Subsection (D) also modifies 40 CFR

257.95(g)(3)(ii) such that if a facility is planning to conduct an ASD under this section, ADEQ should be notified within 7 days of this decision.

Subsection (E) modifies 40 CFR 257.95(g)(4) to provide for Director disapproval of ASDs where, if an ASD is not approved, the operator is to then evaluate corrective measures as outlined in 40 CFR 257.96.

Subsection (F) amends 40 CFR 257.95(h) to provide for groundwater protection standards consistent with aquifer water quality standards under 18 A.A.C. 11, Article 4 or EPA's maximum contaminant levels (MCLs), whichever is more stringent. For those contaminants without either aquifer water quality standards or MCLs, the established background concentration would be the limitation. Where background concentrations exceed aquifer water quality standards or MCLs the background concentration would be the limitation.

Subsection (G) amends 40 CFR 257.97 regarding remedy selection to provide for Director approval and incorporation of a remedy into the facility permit as a major modification.

Subsection (H) amends 40 CFR 257.98 regarding implementation of a correction action program to accommodate Director approval of a notification of remedy completion.

R18-13-1006. Closure and Post-Closure Care. This Section incorporates by reference the closure, post-closure care and inactive surface impoundment requirements of 40 CFR 257.100 through 104. The only addition is that the inspection and monitoring requirements from 40 CFR 257.83(b) are specified to continue throughout the post-closure care period.

R18-13-1007. Recordkeeping, Notification, and Posting of Information to the Internet. R18-13-1007 incorporates by reference the recordkeeping, notification, and posting of information to the internet requirements of 40 CFR 257.105 through 107. Subsection (A) incorporates by reference 40 CFR 257.105 through 257.107, subject to the modifications in the following subsections. These federal regulations require each CCR facility to maintain an operating record, post specific documents to the facility's CCR website, and notify ADEQ when certain documents are available. Subsection (B) amends 40 CFR 257.105(f) to recognize an Arizona-only source of Emergency Action Plan requirements. Subsection (C) amends 40 CFR 257.105(h)(1) to clarify that all records of groundwater monitoring and corrective action reports must be maintained in the operating record. Subsection (D) adds 40

CFR 257.105(k) requiring a CCR facility to determine and maintain in the operating record the amount of CCR beneficially used in the previous calendar year, based on when the product leaves the site. Subsection (E) adds 40 CFR 257.105(l) requiring a CCR facility to place financial assurance related information in the operating record. Subsection (F) adds 40 CFR 257.106(k) requiring a CCR facility to notify the Director when beneficial use information has been placed in the operating record. Subsection (G) adds 40 CFR 257.107(k) requiring the CCR facility owner or operator to place the entire CCR facility permit on the facility's CCR website and to update the permit with any approved modifications within 30 days of approval.

R18-13-1008. 40 CFR 257, Appendices III and IV. R18-13-1008 incorporates by reference the groundwater monitoring constituents required for detection monitoring and assessment monitoring that are listed in Appendices III and IV of 40 CFR 257.

R18-13-1010. Permit Application Requirements for CCR Facilities. R18-13-1010 presents the requirements for a CCR facility permit application.

Subsections (A) and (B) state the requirement for an application and the timing for its submittal. After ADEQ receives program approval from EPA, initial permit applications are due to ADEQ within 180 days. After program approval, construction of a new CCR unit or a lateral expansion of a CCR unit may not begin without authorization in facility permit, except as provided in subsection (B)(2). If the application includes constructing or modifying a CCR surface impoundment, additional requirements apply from R18-13-1010.01.

Subsection (C) requires an applicant for a CCR facility permit to hold a public meeting to inform the local community about the permit application and the facility. After public comment, ADEQ added that the meeting may be held after the applicant receives notice from ADEQ that the application is administratively complete. The permit applicant must provide public notice of the meeting to the community and must notify ADEQ of the meeting at least 30 days in advance.

Subsection (D) specifies the components of a CCR facility permit application to include design and operating information, groundwater and location information, related maps and

drawings, plans demonstrating compliance with all sections of 40 CFR Subpart D, financial assurance, and the applicable fee.

Subsections (E) and (F) address completeness of the application and refer to ADEQ's existing rules for licensing timeframes for completeness determinations and to R18-13-1018 for posting of a notice to ADEQ's website.

Subsection (G) addresses the transition of permitting from ADWR to ADEQ for dam modifications and puts ADEQ on early notice, perhaps before an application for a CCR permit, of a CCR surface impoundment modification in progress with ADWR that began after this proposed rule was published.

R18-13-1010.01. Additional Application Requirements for Constructing or Modifying CCR Surface Impoundments for Applications Submitted After CCR Program Approval. This Section adds application requirements for special situations covered by ADWR rules to the application requirements already provided in R18-13-1010. R18-13-1010.01 applies to applications specific to new or modified CCR surface impoundments permitted by ADEQ after CCR program approval. ADEQ recognizes that in some cases an application would have been also submitted to ADWR. The notice required under R18-13-1010(G) will allow ADEQ to coordinate this.

The requirements in this Section all originate in ADWR rules. R18-13-1010.01 does not negate any requirement in R18-13-1010, where closure and post-closure documents for all CCR units are required to be submitted in subsection (D)(6)(e). It does not negate any requirement in R18-13-1006, which incorporates closure and post-closure requirements from 40 CFR 257 in their entirety without change. This Section does not apply to demonstrations under R18-13-1010(B)(2).

R18-13-1011. Permit Contents. R18-13-1011 addresses the contents and standard conditions of CCR facility permits. Subsection (A) lists conditions that will be incorporated into all CCR facility permits. Subsections (B) through (E) allow the Director to establish permit terms and conditions as needed and in accordance with A.R.S. Title 49, Chapter 4 and 18 A.A.C. 13, Article 10, to ensure no reasonable probability of adverse effects on safety, health or the environment from CCR facility operations. Subsection (F) requires each permit to

specify the safe storage level for each surface impoundment. This requirement is as stringent as ADWR's rules for dams. Subsection (G) states the fixed 10-year permit term required by statute. A CCR facility permit may not be extended beyond a 10-year term through permit modification. Instead, a CCR facility must submit a complete application to renew the permit as described in R18-13-1016.

R18-13-1012. Compliance Schedules. R18-13-1012 allows ADEQ to establish a schedule of compliance in a CCR facility permit under two general scenarios. Subsection (B) addresses future compliance activities that may be used, for example, to specify schedule requirements for corrective action activities or submittal of as-built drawings or final engineering reports. This subsection is similar to the schedule of compliance concept used in ADEQ's Aquifer Protection Permit program. Subsection C will be used when a facility will not be in compliance with one or more requirements of A.R.S. Title 49, Ch 4, or rules thereunder at the time the permit is issued. This schedule of compliance will be an enforceable sequence of steps that will allow the facility to return to compliance. Subsection (C) also allows for interim compliance dates that will not be longer than one year, posting of progress information on the facility's public website, and progress reporting to the Director.

R18-13-1013. CCR Facility Permit Issuance or Denial. R18-13-1013(A) states that the procedures in Article 10 related to permit conditions are applicable before EPA program approval except for any licensing timeframes adopted in 18 A.A.C. 1 which apply after program approval. Subsection (B) requires the ADEQ Director to provide the owner or operator with written notification of a final decision to grant or deny a permit and to include the applicable appeal rights. Subsections (C) and (D) state the reasons why the Director may deny a permit and requires the Director to issue an order requiring closure of the CCR units at the facility.

R18-13-1014. CCR Permit Transfer. R18-13-1014 specifies the requirements to transfer a CCR facility permit if there is a change of ownership or operational control for a CCR unit or facility. Subsection (A) requires a 30-day advance notice to ADEQ or notice as soon as practicable. The new owner or operator is required to submit a permit modification request to allow for ADEQ to review all of the items specified in subsection (B). Subsection (C)

clarifies that the original owner or operator is required to comply with the CCR facility permit until it is modified even if ownership or operational control has been transferred.

R18-13-1015. CCR Permit Termination. R18-13-1015 lists five reasons for which the Director may terminate a CCR permit after providing a notice and opportunity for hearing.

R18-13-1016. Permit Renewals. R18-13-1016 presents three requirements for renewing a CCR facility permit. In Subsection (A), an application must be submitted at least 180 days prior to expiration of the current permit. For a timely and complete application submittal, Subsection (B) allows for the existing CCR facility permit to be administratively extended until a new permit is issued. Subsection (C) requires the owner or operator to renew the permit throughout operation, closure, post-closure, or corrective action for a CCR unit.

R18-13-1017. Modifications of a CCR Facility Permit. R18-13-1017 specifies the three types of permit modifications (major, minor, and administrative) and the requirements for permit modifications. Subsections (A) through (D) are general standards for permit modifications initiated by the owner or operator or the ADEQ Director. Subsection (E) describes major permit modifications, intended to be used only for substantial changes to the facility permit including new CCR units, lateral expansions of existing CCR units, and selection of a remedy if the CCR unit is in corrective action. Subsection (F) lists several examples of minor modifications intended to be more routine changes to the CCR permit. Subsection (G) allows for administrative modifications to the permit. Subsection (H) states that the ADEQ Director may change the categorization of a CCR facility permit modification. Subsection (I) allows multiple modifications to be combined into one to streamline processing.

R18-13-1018. Public Notice Requirements for Permit Actions. R18-13-1018 states the requirements for ADEQ to notify the public of CCR facility permitting actions for initial or renewal permits as well as permit modifications. Initial or renewal permits and major modifications require ADEQ to provide a public notice of a proposed issuance or denial and to provide at least 30 days for comments on the proposed decision. A public hearing may be held if requested and if the ADEQ Director determines there is sufficient public interest. ADEQ must prepare a written response to comments received on the proposed CCR permit or major modification.

R18-13-1019. Compliance, ADEQ Inspections, Violations and Enforcement. This rule specifies ADEQ rights to enter the facilities and do inspections, and the purposes of inspections, including as noted in subsection (C) during work on surface impoundments. Subsection (G) comes from ADWR rules.

R18-13-1020. Financial Assurance Requirements. This rule allows temporary compliance with Financial Assurance (also called financial responsibility) at existing CCR facilities until a permit is issued through submittal of demonstrations that were made pursuant to an ADEQ Aquifer Protection Permit (APP). A.R.S. § 49-770(A) states that Article 11 solid waste facilities may not operate unless financial responsibility "has been demonstrated" within 180 days of "CCR program approval." A.R.S. § 49-770(C) allows 2 possible times for submittal of financial responsibility, with the latest required time being 180 days after CCR program approval. Without more, if a CCR facility waits 180 days after CCR program approval to submit financial responsibility, it could be stated that financial responsibility has not yet been "demonstrated", since there is not yet approval by the Department. However, A.R.S. § 49-770(C) adds that if the facility was already in operation before CCR program approval, it may continue to operate while the department reviews the submission of financial responsibility pursuant to its APP. In addition, A.R.S. § 49-770(D) adds that a demonstration already made for an APP purposes shall suffice, in whole or in part, for any demonstration required by A.R.S. § 49-770. Therefore, proposed R18-13-1020 requires CCR facilities to submit the most recent financial assurance demonstrations made for APP, and allows those previous demonstrations to be sufficient (suffice "in part") to satisfy A.R.S. § 49-770(C) so that the facilities may continue to operate during the department's review of the submission using 40 CFR 257, subpart D closure, post closure and corrective action standards. ADEQ anticipates that the financial responsibility demonstrations that were made for APP will have to be supplemented to satisfy the different and more detailed closure, post-closure, and if applicable, corrective action requirements from 40 CFR 257, and that discussions about these details will take place in the facility permit application process.

R18-13-1021. Fees. R18-13-1021 sets forth the fees and billing procedures for CCR facilities and permitting actions. In Subsection A, Table 2 specifies annual registration fees. In subsection (B), Table 3 presents initial and maximum fees for a CCR facility permit and

permit modification. Subsections (C), (D), and (E) state the billing procedure that ADEQ must follow during permitting actions. Subsection (E) also includes the hourly billing rate of $244 per hour for permitting activities and the procedure for annual adjustment of annual fees and the billing rate pursuant to United States Bureau of Labor Statistics Consumer Price Index tables.

R18-13-1701. Definitions. The intent for Article 17 is to include what is necessary to evaluate the financial assurance demonstrations for CCR facilities. R18-13-1701 includes the definitions that are used for APP financial assurance, unchanged, from R18-9-A203.

R18-13-1703. Financial Demonstrations for CCR Facilities. R18-13-1703 lays out what needs to be demonstrated for CCR facilities. This Article may be amended in separate rulemakings to apply to other types of solid waste facilities for which financial assurance may be required in the future. The three categories of cost are consistent with A.R.S.§§ 49-761(J) and 770(A).

R18-13-1704. Financial Assurance Mechanisms. Included in this Section are the content, terms and conditions for the mechanisms similar to APP rules but clarifying that costs are for closure, post-closure and corrective action. A catch-all provision in subsection (A)(9) allows other mechanisms to be used if approved by the Director, to provide flexibility should circumstances change.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

No studies were reviewed by ADEQ. ADEQ notes that it examined materials posted by the four Arizona facilities it expects to require CCR facility permits that are posted on the facilities' CCR websites. These websites are required under 40 CFR 257, subpart D. ADEQ is proposing neither to rely or not rely on those materials for the evaluation or justification of these rules. For reader convenience, these websites are listed here.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

10. A summary of the economic, small business, and consumer impact:

ADEQ separated the economic, small business, and consumer impacts of these rules into two major categories: 1) Those parts of the rules that would enact into Arizona rules nonprocedural standards that already apply; and 2) Additional requirements that would apply for the first time at some point after these rules are effective.

Existing requirements. These rules enact already existing standards from the United States Environmental Protection Agency (EPA) and the Arizona Dept. of Water Resources (ADWR) into ADEQ rules. ADEQ believes that where these CCR rules match existing standards, they do not have any direct negative impact on the four facilities in Arizona that will require a CCR facility permit. There are two groups of already existing standards:

1) 40 CFR 257, subpart D, for all CCR units. There will be no impact here because this rule is neither more or less stringent than this federal subpart for nonprocedural standards, and the Arizona CCR facilities are already subject to those federal standards.

2) Arizona Dept. of Water Resources (ADWR) rules at 12 A.A.C. 15, Article 12, that apply to CCR surface impoundments. Although these standards are stricter than 40 CFR 257, subpart D, there will be no impact here because surface impoundments at CCR facilities have already been subject to those ADWR rules, including the requirements in R18-13-1010.01 related to getting a license from ADWR.

ADEQ believes that because ADEQ will be replacing other agencies as the enforcing agency for standards that will remain the same, the rules will have a positive impact on the CCR facilities as well as the local community by enabling communication with a single, local agency. As an example, when cycling down and closing CCR units, a month delay can cost hundreds of thousands of dollars. A phone call to a state employee, who is not responsible for facilities in multiple states, and that may have already visited the site, is virtually certain to result in less delay. This advantage for CCR facilities will be offset in part by the permit processing and annual registration fees in this rule.

Additional requirements. Pursuant to statute, these rules create requirements for CCR facilities additional to those already existing in the following areas:

1) Aquifer protection standards developed under ADEQ statutes and rules for non-CCR wastestreams. (see R18-13-1005(B) and (F)). Although these standards are additional to 40 CFR 257, subpart D, there will be little to no impact here because CCR facilities were already subject to these standards under their ADEQ Aquifer Protection Permit (APP) and the final rule limits the stringency of any requirements in this area to what was previously required.

2) New ADEQ permitting requirements. There are currently no permitting requirements for CCR units in Arizona. The requirement that CCR units be covered under an APP was removed in 2022 by Ch. 178 as a consequence of their being regulated under 40 CFR 257, subpart D. ADWR currently requires licenses for CCR surface impoundments because they are classified as dams. The new permitting requirements are contained in R18-13-1010 through R18-13-1021.The ADWR licensing requirement for CCR surface impoundments ends when an impoundment is covered by an ADEQ permit under an EPA approved program. See A.R.S. § 45-1201(1)(f).

Federal law requires that CCR units be eventually covered under either a federally approved state program or the federal permit program. In February, 2020, EPA proposed its permitting program in a new 40 CFR 257, subpart E, but it is currently on an uncertain timetable. There is no federal or state requirement that ADEQ match the federal permitting rules that will be adopted in subpart E. However, ADEQ has made its permitting rules match EPA's proposed rules where possible to avoid unintended extra impact should both apply at the same time

when final. This strategy also increases confidence in EPA's evaluation of the Arizona program. In some areas however, ADEQ's own permitting requirements may exceed, or at least be additional to, what will be required under future EPA permitting requirements for non-participating states. These extra requirements may impact Arizona's CCR facilities.

3) Financial assurance. There is no federal requirement that CCR facilities provide financial assurance. However, state authorizing legislation for this rule has required it for Arizona CCR facilities, and it is included in R18-13-1020. ADEQ notes that these facilities were already meeting financial assurance requirements for their CCR units under previous APPs, and that the legislature has indicated its intent that ADEQ recognize this financial assurance, "in whole or in part." (See A.R.S. § 49-770(D)) Thus, any impacts of the financial assurance requirement will be lessened to some degree. However, ADEQ expects that the impact of financial assurance on CCR facilities may be greater for CCR units than what was required for their APP because of the more detailed closure, post-closure and corrective action requirements that exist in 40 CFR 257, subpart D.

4) Annual registration fees and permit processing fees. These fees are set out in R18-13-1021. Permit processing fees could begin after this rule is effective if any facility opts to apply early, although ADEQ expects most of these impacts to begin after CCR program approval. The annual registration fees for CCR facilities begin after CCR program approval. The annual fees are designed to cover ADEQ's non-permit related costs in administering the state CCR program. EPA proposed no fees in its CCR permit program.

Cost benefit analysis. ADEQ estimated the additional annual cost to implement the CCR permit program at $158,760, separate from the cost of processing permits. ADEQ based the annual registration fees on this estimate. Three additional full-time equivalent employees (FTEs) were estimated to be necessary to implement the CCR program: an inspector, a permit writer, and a geotechnical engineer. All but the permit writer have already been hired. All of the FTE permit writer's time on CCR will be billed processing permits.

Under A.R.S. § 49-104(B)(17), ADEQ fees must "be fairly assessed and impose the least burden and cost to the parties subject to the fees." ADEQ believes its estimate of the annual cost of the program not covered by permit processing fees is the lowest possible and therefore imposes the least burden and cost. Further, the annual registration fees in

R18-13-1021(A) are based on the number and complexity of CCR units at each facility. This formula was arrived at after discussion with the affected stakeholders, and it is roughly proportional to the amount of time ADEQ will likely spend relative to each facility. In ADEQ's judgment, it is the best way to fairly assess the annual registration fees.

The hourly rate in R18-13-1021(E)(1) covers "the cost of administrative services and other expenses associated with evaluating" permits. It is based not only on the state's total cost for the employees billing the hours, but also a portion of the operational overhead of the Solid Waste section's employees not directly assigned to CCR facilities full time, such as supervisors, other engineers, and administrative staff. ADEQ estimated the total number of hours the permit writer would be able to bill annually after comparing its experience processing hazardous waste permits which are similar in length and complexity and factoring in annual leave, sick leave, required training and other types of nonbillable time.

As a consequence of ADEQ setting its annual registration and permit processing fees at a level imposing the least burden on stakeholders, ADEQ had to plan for possible increases in its costs due to inflation. An annual adjustment to these fees based on a regional consumer price index was added at R18-13-1021(E)(4) in order for ADEQ to maintain its obligations under the program while keeping the cost at the least burdensome level.

The overall cost to ADEQ is expected to be balanced by the fees it collects. As explained earlier, there are significant potential benefits to both the local community and CCR facilities to having a single local agency handle all aspects of the federal CCR program. In spite of the fees necessary to cover the cost of the program, Arizona's CCR facilities have supported ADEQ's development of a state permit program as early as 2018, when CCR permitting was planned to be added to the Aquifer Protection Permit in ADEQ's Water Quality Division. ADEQ believes the overall benefits for all parties involved exceed the overall costs.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

1. In R18-13-1002(E), R18-13-1003(G) and R18-13-1010(G), ADEQ changed "{proposed rule date}" or "{insert proposed rule date}" to "July 12, 2024".

2. In R18-13-1010(B)(2), ADEQ clarified that ADWR's approval to construct is independently required when seeking ADEQ approval for certain actions before a facility permit has been issued. ADEQ clarified this in R18-13-1010(B)(2)(a) as follows:

"a. For a CCR surface impoundment before a CCR facility permit has been issued for that facility, the owner or operator has obtained approval to construct from ADWR and demonstrates to the satisfaction of the Director that commencing construction before approval is necessary to comply with 40 CFR 257, as incorporated in this Article;"

Based on comments, ADEQ made the following changes to the rule text:

1. Modified R18-13-1010(C) to add an alternate time for the public meeting:

Proposed:

> **C.** Prior to submitting an initial or renewal CCR facility permit application, the owner or operator shall hold a public meeting in order to solicit questions from the community and inform the community about the permit to be applied for. The owner or operator shall notify ADEQ at least 30 days before the meeting, provide adequate public notice for the meeting, and submit a summary of the meeting to ADEQ.

Final:

> **C.** The owner or operator shall hold a public meeting in order to solicit questions from the community and inform the community about its intended permit at one of the times listed below. The owner or operator shall notify ADEQ at least 30 days before the meeting, provide adequate public notice for the meeting, and submit a summary of the meeting to ADEQ:
>
> 1. Within 90 days after receiving notice from the Director that its application is administratively complete, or
> 2. Prior to submitting an initial or renewal CCR facility permit application.

2. In R18-13-1017(F)(7), ADEQ added the last clause as follows: 7. Replace monitoring equipment, including a well, if the replacement results in equal or greater monitoring

effectiveness, but not including routine maintenance or replacement of well components and related equipment;

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

ADEQ received six written comments, four from the Arizona utilities that would be seeking CCR facility permits, one from an environmental organization, and one from a school district near a CCR facility. The four utilities expressed strong support for ADEQ seeking authorization for the federal program with this rule. The environmental organization and school district expressed concern and generally opposed ADEQ seeking authorization. The comments are summarized and responded to individually below.

Arizona Electric Power Cooperative (AEPCO)

Comment: General support for the AZ CCR program, especially as related to past APP regulation and local understanding of groundwater systems in the desert southwest.

Comment: **State Approvals of Certain CCR Activities May Unsettle CCR Rule Compliance.** AEPCO continues to have concerns regarding the implementation of ADEQ approvals of Alternate Source Demonstrations (ASDs)." R18-13-1005(C) AEPCO presents concern for ADEQ approval / disapproval of groundwater ASDs within the timelines required by EPA rule. Disapproval falling outside of the timelines required by EPA could "cause disorder" in the transitions between groundwater monitoring phases. A preference for continued self-implementation and certification, as existing under the EPA umbrella, is implied. AEPCO acknowledges the 7-day advance notice of pending ASDs will help but they do not believe ADEQ's fully informed considerations for ASD approvals will be possible within the timelines defined by EPA rule.

RESPONSE: As drafted, R18-13-1005(C) accommodates transitions between detection and assessment monitoring where disapprovals occur. This allows for

EPA required timelines to be met regardless of ADEQ processing time. ADEQ's intent is to conduct ASD reviews as timely as possible. The move to a more stringent level of groundwater monitoring is not required until ADEQ disapproves of an ASD as explained in the preamble discussion of R18-13-1005.

Comment: "**A Straightforward Appeal Process for ASDs Is Needed" "The Proposed Rule provides no clear path for appeals of ASDs. R18-13-1013 provides for appeals of a permitting decision.**" (Emphasis added) Consider adding clarifying text with a time frame for appeal and "stay" accommodation while appeals are considered.

RESPONSE: ADEQ agrees that the Director's decision to approve or disapprove an ASD under R18-13-1005(C) would be an appealable agency action under A.R.S. Title 41, Article 10, which controls stays and time frames. The preamble summary of R18-13-1005 now contains this statement.

Comment: "Permit Modifications are Unnecessary and Disruptive for Site Maintenance Activities" R18-13-1017(F). AEPCO suggests the routine maintenance items be specifically excluded from consideration as a permit modification. It is suggested the language of R18-13-1017 (F) is too wide in scope. Additional language is suggested for R18-13-1017(F)(7): "Replace monitoring equipment, including a well, if the replacement results in equal or greater monitoring effectiveness, but not including routine maintenance or replacement of well components and related equipment."

RESPONSE: This concern was considered by ADEQ in previous engagements and ADEQ has stated that routine maintenance is not a subject for minor permit modifications. A previous item was dropped from the draft rule to satisfy this ongoing concern. ADEQ agrees and has placed the requested clarification in the rule.

Comment: "Pre-State Permit Program Certifications Should be Preserved" It is suggested that previously qualified professional engineer (QPE) certifications should be adopted into the ADEQ program without retroactive review and approval. AEPCO requests clarification that ADEQ does not intend to reopen

previous QPE certifications and that the program be prospective only regarding QPE certifications.

RESPONSE: ADEQ must consider all permit related certifications and documentation during the CCR permit application process. EPA has expressed concern that, nationally, some QPE certifications may potentially be inadequate. As such, ADEQ cannot accept previously prepared certifications at face value. Any shortcomings identified during the permit application process must be addressed for permit approval to occur.

Comment: "Public Meeting Requirements Should be Revised" R18-13-1010(C) AEPCO asks that the timing and style of the pre-application public meeting described in R18-13-1010(C) be reconsidered. They argue that holding a public meeting prior to application submission is too early and that the timing of this public meeting would be best realigned to coincide with permit application receipt by ADEQ. It is further argued that holding a public meeting prior to application submission could risk confusing the public as the permit application evolves. AEPCO recommends a meeting style consistent with past practices where both ADEQ and the regulated entity engage the public jointly.

RESPONSE: ADEQ disagrees with the arguments of the electric utility commenters that any public meeting on a utility's CCR permit has to be led by ADEQ, or more generally, that all public engagement related to the CCR activities on site should be managed by ADEQ. EPA has successfully employed the requirement for a pre-application public meeting since adding it to the RCRA Expanded Public Participation Rules in 1995. The most important goal ADEQ hopes to achieve from the pre-application meeting requirement is the opening or continuation of a dialogue between the permit applicant and the community. We believe that the applicant should open or resume this dialogue at the beginning of the permitting process. The meeting will give the public direct input to facility owners or operators; at the same time, facility owners or operators can gain an understanding of public expectations and attempt to address public concerns in their permit applications. The pre-application meeting should provide an open, flexible, and informal occasion for the

applicant and the public to discuss various aspects of CCR management and the facility's operations. The pre-application public meeting allows the public to engage directly with the facility and learn about the elements of the application and to express any concerns they have about design, monitoring, corrective action, notifications, etc. Both the Department and the current administration have highlighted public engagement and this is one component that will be beneficial for the new program.

In light of commenters' suggestions that the required public meeting be moved to a different time period, ADEQ has added to the rule an alternate time when the meeting may be held - within 90 days of the owner or operator receiving notice from ADEQ that its application is administratively complete.

Salt River Project

Comment: SRP appreciates the work conducted by the agency to support this rulemaking.

Comment: SRP requests that ADEQ revise R18-13-1010(B)(2) to allow construction of proposed facilities to proceed "at risk" while a facility goes through a new facility permitting process. SRP states that this aligns with the agency's APP program regulations.

RESPONSE: This was addressed in the NPRM Part V (Transition from Program Approval to Permit Issuance) and in the rule at R18-13-1010(B)(2). The intent was to allow SRP to move forward with construction at-risk if construction had to begin on a new unit(s) before program approval or before the first CCR permit can be issued by ADEQ. ADWR's authority for surface impoundments that are dams would still be in effect. Note that ADWR allows no "at-risk" construction. SRP is considering incised impoundments that would not require ADWR approval. ADEQ understands that SRP's construction schedule may depend on the timing of EPA's final decision to take an action related to SRP's unlined impoundment.

Comment: SRP requests that R18-13-1010(C) be removed. SRP supports public

participation in the permitting process, however, ADEQ has not provided the legal basis for R18-13-1010(C), which requires the owner or operator to hold a public meeting to solicit questions from the community and inform the community of a proposed permit application prior to submitting an application for an initial or renewed CCR facility permit. This imposes a new regulatory burden on permittees. Further, SRP states that these proposed and novel requirements in R18-13-1010(C) for public involvement before formal agency engagement go beyond the federal regulations applicable to CCR units and are a marked departure from the public involvement requirements under other programs administered by ADEQ. SRP also believes that engaging the public before a project is fully defined may cause confusion and extend permitting timelines. SRP notes that the rule includes ample opportunities for participation for the public after a project has been defined by ADEQ under R18-13-1018 in which ADEQ is to provide public notice.

Response: ADEQ disagrees with the arguments of the electric utility commenters that any public meeting on a utility's CCR permit has to be led by ADEQ, or more generally, that all public engagement related to the CCR activities on site should be managed by ADEQ. EPA has successfully employed the requirement for a pre-application public meeting since adding it to the RCRA Expanded Public Participation Rules in 1995. The most important goal ADEQ hopes to achieve from the pre-application meeting requirement is the opening or continuation of a dialogue between the permit applicant and the community. We believe that the applicant should open or resume this dialogue at the beginning of the permitting process. The meeting will give the public direct input to facility owners or operators; at the same time, facility owners or operators can gain an understanding of public expectations and attempt to address public concerns in their permit applications. The pre-application meeting should provide an open, flexible, and informal occasion for the applicant and the public to discuss various aspects of CCR management and the facility's operations. Both the Department and the current administration have highlighted public engagement and this is one component that will be beneficial

for the new program.

In light of commenters' suggestions that the required public meeting be moved to a different time period, ADEQ has added to the rule an alternate time when the meeting may be held - within 90 days of the owner or operator receiving notice from ADEQ that its application is administratively complete.

Comment: SRP requests that R18-13-1017(F)(3)(c), under minor permit modifications, be removed. Alternate source demonstrations (ASDs) for statistically significant increases (SSIs) pertaining to naturally occurring conditions should not require a minor permit modification, as this type of ASD does not lead to a change in a facility's groundwater sampling and analysis program (i.e., the facility remains in detection monitoring, rather than commencing assessment monitoring).
Response: R18-13-1017(F)(3)(c) requires a facility's assessment of corrective measures to be submitted for approval as a minor permit modification, not the ASD. Subsection (F)(3)(a) requires a change in the method for statistical analysis to be approved by ADEQ as a minor permit modification. ASDs, although requiring approval by ADEQ, are not required to be submitted as permit modifications. The technical analysis required for an ASD and the method of calculating an SSI are critical to determining whether or not groundwater had been impacted by CCR units. EPA has commented extensively on many facilities' ASDs and uses of SSI calculation methods nationwide.

Tucson Electric Power
Comment: General appreciation that ADEQ has developed the program and for the stakeholder process. Acknowledgment that ADEQ is the appropriate agency to implement CCR permitting in Arizona.
Comment: Move the pre-application public meeting hosted by the applicant from R18-13-1010(C) to R18-13-1018(A). This would allow the public meeting to coincide with the public notice that an application has been received by

ADEQ. This improves the timeliness of the meeting - an actual permit application has been submitted and the permitting process is underway. ADEQ should participate in the meeting.
Response: ADEQ disagrees with the arguments of the electric utility commenters that any public meeting on a utility's CCR permit has to be led by ADEQ, or more generally, that all public engagement related to the CCR activities on site should be managed by ADEQ. EPA has successfully employed the requirement for a pre-application public meeting since adding it to the RCRA Expanded Public Participation Rules in 1995. The most important goal ADEQ hopes to achieve from the pre-application meeting requirement is the opening or continuation of a dialogue between the permit applicant and the community. We believe that the applicant should open or resume this dialogue at the beginning of the permitting process. The meeting will give the public direct input to facility owners or operators; at the same time, facility owners or operators can gain an understanding of public expectations and attempt to address public concerns in their permit applications. The pre-application meeting should provide an open, flexible, and informal occasion for the applicant and the public to discuss various aspects of CCR management and the facility's operations. Both the Department and the current administration have highlighted public engagement and this is one component that will be beneficial for the new program.

In light of commenters' suggestions that the required public meeting be moved to a different time period, ADEQ has added to the rule an alternate time when the meeting may be held - within 90 days of the owner or operator receiving notice from ADEQ that its application is administratively complete.

Arizona Public Service

Comment: Supportive of ADEQ's work towards getting an EPA-authorized CCR program.
Comment: Reiterates their concerns over the pre-application public meeting

required by R18-13-1010(C). APS recommends that ADEQ lead all public engagement associated with the program in accordance with its own requirements. This also allows the public to correspond directly with the responsible regulatory agency, and not APS. APS recommends that ADEQ hold this public meeting after preparation of the draft permit.
Response: ADEQ disagrees with the arguments of the electric utility commenters that any public meeting on a utility's CCR permit has to be led by ADEQ, or more generally, that all public engagement related to the CCR activities on site should be managed by ADEQ. EPA has successfully employed the requirement for a pre-application public meeting since adding it to the RCRA Expanded Public Participation Rules in 1995. The most important goal ADEQ hopes to achieve from the pre-application meeting requirement is the opening or continuation of a dialogue between the permit applicant and the community. We believe that the applicant should open this dialogue at the beginning of the permitting process. The meeting will give the public direct input to facility owners or operators; at the same time, facility owners or operators can gain an understanding of public expectations and attempt to address public concerns in their permit applications. The pre-application meeting should provide an open, flexible, and informal occasion for the applicant and the public to discuss various aspects of CCR management and the facility's operations. Both the Department and the current administration have highlighted public engagement and this is one component that will be beneficial for the new program.

In light of commenters' suggestions that the required public meeting be moved to a different time period, ADEQ has added to the rule an alternate time when the meeting may be held - within 90 days of the owner or operator receiving notice from ADEQ that its application is administratively complete.

Joseph City Unified School District
COMMENT: The Superintendent of this school district, which is near a coal ash

pond, asked that ADEQ not take over the CCR program unless it can assure citizens that Arizona regulations will not be weaker in any respect than current federal regulation, also stating his concern that the state may not have the staffing and expertise comparable to the experience and resources of the federal EPA, especially in light of recent state budget cuts. Finally, he cited a news story from several years ago that commented on the possibility that citizen suits would not be available if ADEQ is approved to run the program.

RESPONSE: Under federal law, EPA may not approve a state to implement the federal CCR program unless the state program requires each ash pond or landfill to achieve compliance with the federal regulations or such other state criteria EPA determines to be at least as protective. EPA has already refused to approve one state program and has only approved three.

ADEQ has already hired staff to evaluate dam safety and water quality issues related to this CCR rule to assure that it will be at least as protective as EPA regulations. In addition, ADEQ aquifer protection staff have been monitoring all four coal fired power plants subject to this rule for years, making ADEQ more familiar with the actual sites than EPA. A system of fees charged to the power plants is included in the ADEQ rule to ensure that the program is insulated from current or future state budget issues.

In spite of the news story questioning whether citizen suits would still be available with Arizona implementing the federal CCR program, citizen suits are permanently in place even with state authorization, not only in the CCR program ,but in every other program under the Resource Recovery and Conservation Act (RCRA). It would not be legally possible to eliminate these suits, and in fact a number of citizen lawsuits have been, and will likely continue to be filed, with regard to the CCR regulation and state CCR programs.

ADEQ recognizes the land, water, and labor that local communities have contributed to provide electricity to the state for decades and will be in the best position to protect those interests.

<u>Sierra Club</u>

Comment: ADEQ should not assert primacy over coal ash regulation and enforcement as the Agency is understaffed and EPA has already made significant efforts in enforcing relevant federal requirements.
Response: ADEQ believes the fees contained in the proposed rule are sufficient to support the program indefinitely in spite of periodic state budget tightening. In addition, the proposed rule contains financial assurance requirements missing from the federal program. The proposed rule maintains the requirements of the self-implementing federal CCR rule while additionally incorporating components of the Aquifer Protection Program (APP) and ADWR dam safety rules that currently apply to CCR units in Arizona. The final CCR rule will allow for a single, streamlined permit program for CCR units that meets applicable federal and state requirements for CCR management, aquifer protection, and dam safety. The support for ADEQ's authorization over the last two administrations recognizes ADEQ's extensive knowledge of the unique geologic and hydro geologic site conditions across Arizona. ADEQ is the most appropriate regulatory agency to implement the CCR Program.

Comment: Legacy Rule. This rule incorporates 40 CFR 257, Subpart D, as of December, 2020, however in May 2024 EPA amended Subpart D by adopting the CCR "Legacy Rule", providing for regulation of non-operating coal ash units originally outside of 2015 Subpart D regulation. ADEQ's rule does not address and is silent on the 2024 Legacy Rule. Sierra Club finds that the rules do not specifically state "does not include any later amendments or editions of the incorporated matter", although the rule does refer to Subpart D "as revised December 14, 2020 (and no future editions)." Sierra Club requests specifying language that this rule does not include matters covered by EPA's 2024 CCR Legacy Rule amendments to Subpart D. Sierra Club notes two coal ash units that may be subject to the Legacy Rule (Coronado power plant site). Sierra Club interprets this silence to the Legacy Rule to mean "legacy units" would remain under EPA regulation per 2024 Legacy Rule amendments.
Response: Once EPA's new legacy rule becomes effective (November 5, 2024)

Legacy Units and Coal Combustion Residuals Management Units (CCRMUs) will be under the authority of EPA. Since September 2022, (see Guiding Principles and Features on ADEQ's website) ADEQ indicated its intent to use December 14, 2020 as the cutoff date for EPA rule changes. All draft rules and this proposed rule have also indicated that with the statutorily required phrase "(and no further editions)". ADEQ has placed a small section clarifying its intent with EPA's Legacy rule in the preamble to this final rule.

Comment: In several areas, the proposed regulations are less stringent than Subpart D and thus cannot be approved by EPA. Example: R18-13-1003 amendment of 40 CFR 257.73 & 257.74 by deleting "not to exceed a height of 6 inches above the slope of the dike." Requests revision regulations to fully incorporate all requirements of 40 C.F.R. 257.73 and 257.74.

Response: ADEQ has deleted these height restrictions on the recommendation of EPA based on the U.S. District Court's decision in USWAG et al v. EPA (2015) vacating the restrictions. See EPA's discussion at 83 FR 11589, March 15, 2018.

Comment: The definition of "minor modifications" in R18-13-1017(F) is overly broad and includes modifications that are "material," "major," and/or "serve as the underlying basis for a permit condition", denying the public the opportunity to comment on or appeal important CCR permit changes.

Response: ADEQ provided several specific examples in R18-13-1017(F) which will require a minor permit modification. Minor permit modifications are also subject to public scrutiny per R18-13-1018.

Comment: Citizen suits. While ADEQ "backed off" (clarified) earlier statements of avoiding RCRA citizen suits by assuming control of the program, concern remains that A.R.S. citizen enforcement provisions remain very weak. As such, the rule should clarify RCRA citizen enforcement provisions apply to the CCR program.

Response: The citizen suit provisions for RCRA programs come from an act of Congress and are not subject to state removal. Section 7002(a)(1)(B) of RCRA allows any person to sue another person, including a federal, state or local

government agency, whose handling of solid or hazardous waste "may present an imminent or substantial endangerment to health or the environment." ADEQ has neither the ability or intent to change this.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking outside of the authority provided in A.R.S. § 49-891.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rule requires a permit but it is not technically feasible to issue a general permit because there are only four facilities in Arizona to be permitted. Each facility is unique and will be subject to different permit conditions.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Two federal laws are applicable to the subject of this rule: the WIIN Act (Water Infrastructure Improvements for the Nation Act) enacted by Congress in December 2016, and 40 CFR 257, subpart D, first promulgated in 2015 but amended since. The WIIN Act provided authority for EPA to review and approve permit programs submitted by states for CCR facilities. The approved state programs would then operate in lieu of the federal requirements in 40 CFR 257, subpart D.

In five areas, this rule is more stringent than federal law:

1) Aquifer protection standards already developed under ADEQ statutes and rules for non-CCR wastestreams. See R18-13-1005(B). Authorized in A.R.S. §

49-891(A);

2) CCR surface impoundment safety standards already existing under Arizona Department of Water Resources rules at 15 A.A.C. 12, Article 15. Authorized in A.R.S. § 49-891(B);

3) New ADEQ permitting requirements. These new permitting requirements are contained in R18-13-1010 through R18-13-1021. Authorized in A.R.S. §§ 49-891(C) and (F);

4) Financial assurance requirements contained in R18-13-1020 and Article 17. Authorized in A.R.S. § 49-770(A); and

5) Annual registration fees and permit processing fees contained in R18-13-1021. Authorized in A.R.S. § 49-891(D).

c. Whether a person submitted an analysis to the agency that compares the rule's impact on the competitive ness of businesses in this state as compared to the competitiveness of businesses in other states:

No such analysis was submitted.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Incorporated federal citation	Location
40 CFR 257.50, 40 CFR 257.52, 40 CFR 257.53	R18-13-1001
40 CFR 257.60 through 40 CFR 257.64	R18-13-1002
40 CFR 257.70 through 40 CFR 257.74	R18-13-1003
40 CFR 257.80 through 40 CFR 257.84	R18-13-1004
40 CFR 257.90 through 40 CFR 257.98	R18-13-1005
40 CFR 257.100 through 40 CFR 257.104	R18-13-1006
40 CFR 257.105 through 40 CFR 257.107	R18-13-1007
40 CFR 257, Appendices III and IV	R18-13-1008

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency

shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable

16. The full text of the rules follows:

R18-13-1001. Applicability; Incorporation by Reference; General Provisions

A. This Article becomes effective as follows:

1. Provisions related to the submission of initial CCR permit applications, including R18-13-1010(A), R18-13-1010(B)(1), R18-13-1010(C), R18-13-1010(D), R18-13-1010(E), R18-13-1010(G), R18-13-1021(B), (D), and (E), and applicable definitions, are effective 60 days after the filing of this rule with the Secretary of State.
2. All other provisions of this Article are effective upon the date of CCR program approval.

B. Any reference or citation to 40 CFR 257, or a section thereof, appearing in the body of this Article includes any modification to the CFR or section made by this Article. When federal regulatory language that has been incorporated by reference into Arizona rule has also been amended, brackets [ ] indicate where the amended language would be placed if it was part of the federal regulation. The subsection labeling for incorporated material in this Article may not conform to the Arizona Secretary of State's formatting requirements, because the formatting reflects the structure of the incorporated federal regulation.

C. 40 CFR 257.50 through 257.53, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with the Arizona Department of Environmental Quality (ADEQ) with the exception of the following:

1. 40 CFR 257.50(e) is not incorporated by reference;
2. 40 CFR 257.51 is not incorporated by reference. 40 CFR 257, subpart D was effective as federal law as provided therein, but is effective as state law, as incorporated in this Article, on the effective date of CCR program approval.

D. 40 CFR 257.53, titled "Definitions", is amended as follows:

1. "New CCR surface impoundment" means:

   [a. In the places listed below, a CCR surface impoundment that begins construction or operation after the effective date of these rules:

   i. R18-13-1002(B), (C), and (D);

   ii. R18-13-1003.01;

   iii. R18-13-1004(B), (C), and (D);

iv. R18-13-1010(D)(11);

v. R18-13-1010.01; and

vi. R18-13-1017(E).

b. Other than as listed in paragraph (a),] a CCR surface impoundment or lateral expansion of an existing or new CCR surface impoundment that first receives CCR or commences construction after October 19, 2015. A new CCR surface impoundment has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun after October 19, 2015.

2. "Participating State" means [Arizona, after CCR program approval.]

3. "Participating State Director" means the [Director of ADEQ, after CCR program approval.]

4. "Qualified professional engineer" means an individual who is licensed by [the state of Arizona] as a Professional Engineer to practice one or more disciplines of engineering and who is qualified by education, technical knowledge and experience to make the specific technical certifications required under this [Article. An engineer is considered qualified to provide information to the Director regarding the safe storage level of a reservoir if the engineer:

a. Is licensed in accordance with A.R.S. Title 32, Chapter 1, with proficiency in engineering and knowledge of dam technology,

b. Has three years of experience in the field of dam safety, and

c. Has actual experience in conducting dam safety inspections.]

5. "State" means [Arizona.]

E. In addition to the definitions in 40 CFR 257.53:

1. "ADEQ" or "Department" means the Arizona Department of Environmental Quality.

2. "Applicable requirement" means a requirement in A.R.S. Title 49, Chapter 4, this Article, or Article 17, to which an owner or operator is subject based on the applicability criteria in these laws.

3. "CCR multi-unit" means a group of CCR units operating with a multiunit

groundwater monitoring system complying with 40 CFR 257.91(d).

4. "CCR program approval" means United States Environmental Protection Agency approval of the Arizona coal combustion residuals program in accordance with 42 United States Code section 6945(d)(1).

5. "Certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority" means "certification from a qualified professional engineer, approved by the Director or EPA where EPA is the permitting authority", unless specifically provided otherwise.

6. "Director" or "State Director" means [the director of ADEQ.]

7. "Discharge" has the same meaning prescribed in A.R.S. § 49-201.

8. "EPA" means the United States Environmental Protection Agency.

F. The following definitions are also applicable in this Article:

1. "Appurtenant structure" means any structure that is contiguous and essential to the safe operation of the CCR surface impoundment including embankments, saddle dikes, outlet works and controls, diversion ditches, spillway and controls, access structures, bridges, and related housing at a surface impoundment.

2. "Emergency spillway" means a spillway designed to safely pass the inflow design flood routed through the reservoir. If the flow is controlled by gates, it is a controlled spillway. If the flow is not controlled by gates, it is an uncontrolled spillway.

3. "Incremental adverse consequences" means under the same loading conditions, the additional adverse consequences such as economic, intangible, lifeline, or human losses, that would occur due to the failure or improper operation of the CCR surface impoundment over those that would have occurred without failure or improper operation of the CCR surface impoundment.

4. "Intangible losses" means incremental adverse consequences to property that are not economic in nature, including property related to social, cultural, unique, or resource-based values, including the loss of irreplaceable and unique historic and cultural features; long-lasting pollution of land or water; or long-lasting or permanent changes to the ecology, including fish and endangered species habitat

identified and evaluated by a public natural resource management or protection agency.

5. “Maximum credible earthquake” means the most severe earthquake that is believed to be possible at a point on the basis of geologic and seismological evidence.

6. “Maximum water surface” means the maximum elevation of the reservoir water level attained during routing of the inflow design flood.

7. “Outlet works” means a closed conduit under or through a CCR surface impoundment or through an abutment for the controlled discharge of the contents normally impounded by a CCR surface impoundment and reservoir. The outlet works include the inlet and outlet structures appurtenant to the conduit. Outlet works may be controlled or uncontrolled.

8. “Probable maximum flood” or “PMF” means the flood runoff expected from the most severe combination of critical meteorologic and hydrologic conditions that are reasonably possible in the [region, including rain and snow where applicable. 0.5 PMF is that flood represented by the flood hydrograph with ordinates equal to 0.5 the corresponding ordinates of the PMF hydrograph.]

9. “Probable maximum precipitation” means the greatest depth of precipitation for a given duration that is theoretically physically possible over a particular size storm area at a particular geographical location at a particular time of year.

10. “Reservoir” means a CCR surface impoundment.

11. “Residual freeboard” or “freeboard” means the vertical distance between the highest water surface elevation during the inflow design flood and the lowest point at the top of the CCR surface impoundment.

12. “Safe storage level” means the maximum reservoir surface elevation at which the Director determines it is safe to impound water, other liquids, or CCR in the reservoir.

13. “Safety deficiency” means a condition at a CCR surface impoundment that impairs or adversely affects the safe operation of the CCR surface impoundment.

14. “Spillway crest” means the highest elevation of the floor of the spillway along a centerline profile through the spillway.

15. “Storage capacity” means the maximum volume of CCR, liquid, sediment, or debris that can be impounded in the reservoir with no discharge, including the situation where an uncontrolled outlet becomes plugged. When spillways are present, the storage capacity is reached when the reservoir level is at the crest of the emergency spillway, or at the top of permanently mounted emergency spillway gates in the closed position. Storage capacity excludes dead storage below the natural ground surface.
16. “Total freeboard” means the vertical distance between the emergency spillway crest or the safe storage level and the top of the CCR surface impoundment.
17. “Unsafe” means that safety deficiencies in a CCR surface impoundment or spillway could result in failure of the CCR surface impoundment with subsequent loss of human life or significant property damage.

R18-13-1002. Location Restrictions

A. 40 CFR 257.60 through 40 CFR 257.64, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ.

B. In addition to the location requirements in 40 CFR 257.62(a), new CCR surface impoundments and all lateral expansions of CCR surface impoundments shall not be located within 60 meters (200 feet) of the outermost damage zone of a fault that has had displacement in either Holocene or Late Pleistocene time unless the owner or operator demonstrates by the date specified in § 257.62(c)(2) that an alternative setback distance of less than 60 meters (200 feet) will prevent damage to the structural integrity of the CCR impoundment.

C. In addition to the requirements in 40 CFR 257.63(a), the following requirements are added:

1. For a new or lateral expansion of a CCR surface impoundment, the owner or operator shall submit a review of the seismic or earthquake history of the area around the surface impoundment within a radius of 100 miles to establish the relationship of the site to known faults and epicenters. The review shall include any known earthquakes and the epicenter locations and magnitudes of the

earthquakes.

2. For a new or lateral expansion of a CCR surface impoundment, the owner or operator shall identify the location of active or potentially active faults that have experienced Holocene or Late Pleistocene displacement within a radius of 100 miles of the site.

3. For a new or lateral expansion of a high or significant hazard potential CCR surface impoundment, the owner or operator shall design the impoundment to withstand the maximum credible earthquake or the maximum horizontal acceleration, whichever is greater.

D. In addition to the requirements in 40 CFR 257.64, the owner or operator shall not construct a new CCR surface impoundment or a CCR surface impoundment lateral expansion on active faults, as defined by § 257.62(a), collapsible soils, dispersive soils, sinkholes, fissures, or soils with the potential for subsidence, unless the owner or operator demonstrates that the CCR surface impoundment can safely withstand the anticipated offset or other unsafe effects on the CCR surface impoundment.

E. Subsections (B), (C), and (D) of this Section are based on Arizona dam safety standards in existence on July 12, 2024, are additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;

2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or

3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1003. Design Criteria

A. 40 CFR 257.70 through 40 CFR 257.74, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ.

B. 40 CFR 257.73(a)(4) is amended by deleting “not to exceed a height of 6 inches above the slope of the dike,”.

C. 40 CFR 257.73(d)(1)(iv) is amended by deleting "not to exceed a height of 6 inches above the slope of the dike,".

D. 40 CFR 257.74(a)(4) is amended by deleting "not to exceed a height of 6 inches above the slope of the dike,".

E. 40 CFR 257.74(d)(1)(iv) is amended by deleting "not to exceed a height of 6 inches above the slope of the dike,".

F. 40 CFR 257.74(d)(1)(v)(B) is amended as follows: "(B) The combined capacity of all spillways must adequately manage flow during and following the peak discharge from a:

(1) Probable maximum flood (PMF) for a high hazard potential CCR surface impoundment; or

(2) 1000-year flood [or 0.5 PMF, whichever is greater] for a significant hazard potential CCR surface impoundment; or

(3) 100-year flood [or 0.25 PMF, whichever is greater] for a low hazard potential CCR surface impoundment."

G. Subsection (F) of this Section is based on Arizona dam safety standards in existence on July 12, 2024, is additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and does not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1003.01. Additional Arizona Design Criteria for New CCR Surface Impoundments and Lateral Expansions of CCR Surface Impoundments

A. The requirements in this Section are additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not replace any requirement of 40 CFR 257, subpart D, as incorporated herein.

B. Geotechnical Requirements. The owner or operator shall provide an evaluation of the static stability of the foundation, CCR surface impoundment, and slopes of the reservoir

rim.

C. CCR surface impoundment Embankment Requirements.

1. Geotechnical Requirements. Table 1 states additional minimum factors of safety for embankment stability under various loading conditions not covered by 40 CFR 257.74(e).

a. The analysis of minimum factors of safety shall include the effects of anisotropy on the phreatic surface position by using a ratio of horizontal permeability to vertical permeability of at least 10. The Director may require ratios of up to 100 if the material types and construction techniques will cause excessive stratification.

b. The owner or operator shall use tests modeling the conditions being analyzed to determine the strengths used in the stability analysis. The stability analysis shall include total and effective stress strengths appropriate for the different material zones and conditions analyzed. The stability analysis shall use undrained strengths or strength parameters for all saturated materials.

c. If applicable, the owner or operator shall perform an analysis of the upstream slope stability for a partial pool with steady seepage considering the reservoir level that provides the lowest factor of safety.

2. Seismic Requirements

a. The owner or operator shall determine the seismic characteristics of the site as prescribed in R18-13-1002(B) and(C) and R18-13-1010.01(G)(3)(m).

b. The owner or operator shall determine the liquefaction susceptibility of the embankment, foundation, and abutments and may use standard penetration testing, cone penetration testing, shear wave velocity measurements, or a combination of these methods to make this determination. The owner or operator shall compute the minimum factor of safety against liquefaction at specific points and make a determination of whether the overall site is subject to liquefaction.

c. The owner or operator shall compute a minimum factor of safety against

overtopping due to deformation and settlement in each of the following cases. The minimum factor of safety against overtopping can be no less than 2.5, determined by dividing the total pre-earthquake freeboard by the estimated vertical settlement in feet. The owner or operator shall determine the total vertical settlement by adding the settlement values of the upstream and downstream slopes.

i. An embankment, foundation, or abutment is not subject to liquefaction, has a maximum peak acceleration of more than 0.2g or a maximum peak acceleration of more than 0.35g and consists of clay on a clay or bedrock foundation; or

ii. The embankment, foundation or abutment is subject to liquefaction.

d. The owner or operator shall perform a liquefaction analysis to establish approximate boundaries of liquefiable zones and physical characteristics of the soil following liquefaction for an embankment, foundation, or abutment subject to liquefaction. The owner or operator shall perform an analysis of the potential for flow liquefaction.

e. Other analytical procedures may be required by the Director for sites with high seismicity or low strength embankment or foundation soils.

3. Miscellaneous Design Requirements

a. The design of any significant or high hazard potential CCR surface impoundment shall provide seepage collection and prevent internal erosion or piping due to embankment cracking or other causes.

b. The Director shall review the filter and permeability design for a chimney drain, drain blanket, toe drain, or outlet conduit filter diaphragms on the basis of unique site characteristics.

i. The minimum thickness of an internal drain is 3 feet.

ii. The minimum width of a chimney drain is 6 feet.

iii. The owner or operator shall filter match an internal drain to its adjacent material.

iv. The owner or operator shall design internal drains with sufficient

capacity for the expected drainage without the use of drainpipes using only natural granular materials.

c. The use of a geosynthetic is not permitted in a design if it serves as the sole defense against CCR surface impoundment embankment failure. The use of geotextiles and geonets as a filter or drain material or a geomembrane liner is permitted only in a location that is easily accessible for repair or if its excavation cannot create an unsafe condition at the CCR surface impoundment. The Director may impose permit conditions, including monitoring appropriate to the hazard classification, inspection, and necessary repairs.

d. The owner or operator shall use armoring on any upstream slope of a CCR surface impoundment embankment. If the owner or operator uses rock riprap for armoring, it shall be well-graded, durable, sized to withstand wave action, and placed on a well-graded pervious sand and gravel bedding or geotextile with filtering capacity appropriate for the site.

e. The minimum width of the top of a CCR surface impoundment embankment is equal to the structural height of the CCR surface impoundment divided by 5 plus an additional 5 feet. The required minimum width for any CCR surface impoundment embankment is 12 feet. The maximum width for any CCR surface impoundment embankment is 25 feet.

Table 1. Minimum Factors of Safety for Stability

(Not applicable to an embankment on a clay shale foundation)

Embankment Loading Condition	**Minimum Factor of Safety**
End of construction case for embankments greater than 50 feet in height on weak foundations	1.4
Steady state seepage - upstream (critical partial pool)	1.5

Instantaneous drawdown - upstream slope	1.2

D. The requirements in this Section are based on Arizona dam safety standards additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1003.02. Additional Emergency Action Plan Requirements for CCR Surface Impoundments

A. In addition to the emergency action plan (EAP) requirements in 40 CFR 257.73(a)(3) and 257.74(a)(3), the EAP shall:

1. Contain a notification chart showing the priority for notification in an emergency situation. The owner shall notify local emergency response agencies, affected downstream populations, county emergency management agencies, and affected flood control districts;
2. Contain a delineation of potentially unsafe conditions, evaluation procedures, and triggering events that require the initiation of partial or full emergency notification procedures, based on the urgency of the situation; including the following:
    a. Sliding of upstream or downstream slopes or abutments contiguous to the CCR surface impoundment;
    b. Sudden subsidence of the top of the CCR surface impoundment;
    c. Longitudinal or transverse cracking of the top of the CCR surface impoundment;
    d. Unusual release of water from the downstream slope or face of the CCR surface impoundment;
    e. Other unusual conditions at the downstream slope of the CCR surface impoundment;

f. Significant landslides in the reservoir area;

g. Increasing volume of seepage;

h. Cloudy seepage or recent deposits of soil at seepage exit points;

i. Sudden cracking or displacement of concrete in a concrete or masonry CCR surface impoundment spillway or outlet works;

j. Loss of freeboard or CCR surface impoundment cross section due to storm wave erosion;

k. Flood waters overtopping an embankment CCR surface impoundment; or

l. Spillway backcutting that threatens evacuation of the reservoir.

3. Contain a specific notification procedure for each emergency situation anticipated;

4. Contain a description of emergency supplies and resources, equipment access to the site, and alternative means of communication.

5. Require the owner to submit a copy of the proposed emergency action plan for review by the Arizona Division of Emergency Management and all local emergency coordinators involved in the plan. The owner shall incorporate appropriate recommendations generated by the reviews and submit the revised emergency action plan to the Department.

6. Be reviewed and updated, at a minimum, every year to ensure the information is accurate and to incorporate changes such as new personnel, changing roles of emergency agencies, emergency response resources, conditions of the surface impoundment and information learned from mock exercises. The owner shall send updated portions of the plan to persons and agencies holding copies of the plan within 15 days after preparation of an update. The updated plan shall be placed in the facility's operating record as required by § 257.105(f)(6).

7. Notwithstanding paragraph (6) above, the owner or operator of a CCR surface impoundment may amend the written EAP at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(f)(6). The owner or operator must amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.

8. Be certified by a qualified professional engineer stating that the written EAP, and

any subsequent amendment of the EAP, meets the requirements of this Article.

B. In addition to the emergency action plan requirements in §§ 257.73(a)(3) and 257.74(a)(3), as incorporated:

1. The owner or operator shall increase the frequency of observation when the reservoir is full, during heavy rains or flooding, and following an earthquake.
2. The owner or operator is responsible for the safety of the CCR surface impoundment and shall take action to lower any liquid portion of the reservoir if it appears that the impoundment has weakened or is in danger of failing.
3. The owner or operator of a CCR surface impoundment shall immediately notify the Department and responsible authorities in adjacent and downstream communities, including emergency management authorities, of a condition that may threaten the safety of the impoundment. The owner shall take necessary actions to protect human life and property, including action required under an emergency action plan or order issued under this Article. The owner shall report these actions to the Director as soon as possible, but not later than 12 hours after discovery of the conditions.
4. If CCR surface impoundment failure appears imminent, the owner or operator shall notify the county sheriff, and the Arizona Department of Public Safety or other emergency official immediately.
5. The owner or operator shall notify the Director immediately of any emergency condition that exists and any emergency action taken.
6. Emergency actions not impairing the safety of the CCR surface impoundment may be taken before guidance can be provided by an engineer and do not require prior approval of the Director. Emergency actions do not excuse an owner's responsibility to promptly undertake a permanent solution. Emergency actions include:
   a. Stockpiling materials such as riprap, earth fill, sand, sandbags, and plastic sheeting.
   b. Lowering the reservoir level by making releases through the outlet or a gated spillway, by pumping, or by siphoning.
   c. Armoring eroded areas by placing sandbags, riprap, plastic sheeting, or

other available material.

d. Plugging leakage entrances on the upstream slope.

e. Increasing freeboard by placing sandbags or temporary earth fill on the CCR surface impoundment.

f. Diverting flood waters to prevent them from entering the reservoir basin.

g. Constructing training berms to control flood waters.

h. Placing sandbag ring dikes or reverse filter materials around boils at the downstream toe to provide back pressure.

i. Removing obstructions from outlet or spillway flow areas.

7. Emergency actions impairing the safety of the CCR surface impoundment require prior approval of the Director. An owner shall not lower the water level by excavating the spillway or embankment unless failure is imminent.

8. The Director shall issue an emergency approval to repair, alter, or remove an existing CCR surface impoundment if the Director finds that immediate remedial action is necessary to alleviate an imminent threat to human life or property.

a. The emergency approval shall be provided in writing.

b. The emergency approval may contain conditions the Director determines are appropriate to protect human life or property.

c. The emergency approval is effective immediately for 30 days after notice is issued unless extended in writing by the Director. The Director shall also send notice to the county flood control district of the county in which the CCR surface impoundment is located, all municipalities within five miles downstream of the CCR surface impoundment, and any additional persons identified in the emergency action plan.

d. The Director may institute legal or administrative proceedings that the Director deems appropriate for violations of the emergency approval or conditions of the emergency approval.

e. After the Director issues an emergency approval, the Department shall post information related to the approval on the Department's CCR website as soon as practicable.

C. The requirements in this Section are based on Arizona dam safety standards additional to

those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1004. Operating Criteria

A. 40 CFR 257.80 through 40 CFR 257.84, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ:

B. 40 CFR 257.82(a)(3) is amended as follows: "(3) The inflow design flood is:

(i) For a high hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the probable maximum flood;

(ii) For a significant hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 1,000-year flood [or, for new impoundments and lateral expansions, 0.5 PMF, whichever is greater];

(iii) For a low hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 100-year flood [or, for new impoundments and lateral expansions, 0.25 PMF, whichever is greater]; or

(iv) For an incised CCR surface impoundment, the 25-year flood."

C. In addition to the requirements in 40 CFR 257.82(a), the following requirements are added:

1. Inflow Design Flood Requirements. For new impoundments and lateral expansions, an owner or operator shall ensure that the total freeboard is the largest of the following:

   a. The sum of the inflow design flood maximum water depth above the spillway crest plus wave run up.

   b. The sum of the inflow design flood maximum water depth above the

spillway crest plus 3 feet.

c. A minimum of 5 feet.

2. Surface Impoundment Site and Reservoir Area Requirements

a. An owner or operator shall demonstrate that reservoir storage during the inflow design flood will not result in incremental adverse consequences during the inflow design flood. In determining whether a discharge will result in incremental adverse consequences, the Director shall evaluate whether the owner or operator has taken any or all of the following actions: issuing public notice to upstream affected property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flood easements or other acquisitions of real property, or other actions appropriate to safeguard the CCR surface impoundment site and reservoir.

b. The owner or operator shall clear the reservoir storage area of debris.

c. The owner or operator shall place borrow areas a safe distance from the upstream toe and the downstream toe of the CCR surface impoundment to prevent a piping failure of the CCR surface impoundment.

d. The owner or operator shall keep the top of the CCR surface impoundment and appurtenant structures accessible by equipment and vehicles for emergency operations and maintenance.

D. In addition to the requirements in 40 CFR 257.82(b), the following requirement are added:

1. Emergency Spillway Requirements. An owner or operator of a new CCR surface impoundment with emergency spillways or a lateral expansion of a CCR surface impoundment with emergency spillways shall:

a. Construct each spillway in a manner that avoids flooding in excess of the flooding that would have occurred in the same location under the same conditions before construction. The owner or operator of a CCR surface impoundment shall demonstrate that a spillway discharge would not result in incremental adverse consequences. In determining whether a spillway discharge of a CCR surface impoundment would result in incremental

adverse consequences, the Director shall evaluate whether the owner or operator has taken any or all of the following actions: issuing public notice to downstream property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flow easements or other acquisitions of real property, or other actions appropriate to safeguard the CCR surface impoundment site and flood channel.

b. Include a control structure to avoid head cutting and lowering of the spillway crest for spillways excavated in soils or soft rock. In the alternative, the design may provide evidence acceptable to the Director that erosion during the inflow design flood will not result in a sudden release of the reservoir.

c. Provide each spillway and channel with a minimum width of 10 feet and suitable armor to prevent erosion during the discharge resulting from the inflow design flood.

d. Ensure that downstream spillway channel flows do not encroach on the CCR surface impoundment unless suitable erosion protection is constructed.

e. Not construct bridges or fences across a spillway unless the construction is approved as part of the CCR facility permit. The CCR facility permit may include conditions regarding the design and operation of the spillway and fencing, based on safety concerns.

f. Not use a pipe or culvert as an emergency spillway unless specifically approved in the CCR facility permit following review of the CCR surface impoundment design and site characteristics.

2. Outlet Works Requirements. An owner or operator shall ensure that a CCR surface impoundment that has outlet works has a low-level outlet works that:

a. Is capable of draining the reservoir to the sediment pool level or CCR surface. A low-level outlet works for a high or significant hazard potential CCR surface impoundment shall be a minimum of 36 inches in diameter. A low-level outlet works for a low hazard potential CCR surface

impoundment shall be a minimum of 18 inches in diameter.

b. Has a filter diaphragm or other current practice measures to reduce the potential for piping along the conduit.

c. Has accessible outlet controls when the spillway is in use.

d. Has an emergency manual override system or can be operated manually.

e. Is constructed of materials appropriate for loading condition, seismic forces, thermal expansion, cavitation, corrosion, and potential abrasion. The owner or operator shall not use corrugated metal pipes or other thin-walled pipes except as a form for a cast-in-place concrete conduit. The owner or operator shall construct outlet conduits of cast-in-place reinforced concrete. The owner or operator shall design each outlet to maintain water tightness. The owner or operator shall construct each outlet to prevent the occurrence of piping adjacent to the outlet.

f. Has an operating or guard gate on the upstream end of any gated outlet.

g. Has an outlet conduit near the base of one of the abutments on native bedrock or other competent material. The entire length of the conduit shall be supported on foundation materials of uniform density and consistency to prevent adverse differential settlement.

h. Has an upstream valve or gate capable of controlling the discharge through all ranges of flow on any gated outlet conduit.

i. Has a trashrack designed for a minimum of 25% of the reservoir head to which it would be subjected if completely clogged at the upstream end of the outlet.

j. Has an outlet conduit designed for internal pressure equal to the full reservoir head and for superimposed embankment loads, acting separately.

E. 40 CFR 257.83(a)(1)(i) is amended to read: "At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit. [The owner or operator shall increase the frequency of observation when the reservoir is full, during heavy rains or flooding, and following an earthquake.]"

F. 40 CFR 257.83, titled "Inspection requirements for CCR surface impoundments",

subsection (b)(1) is amended to read: "If the existing or new CCR surface impoundment or any lateral expansion of the CCR surface impoundment is subject to the periodic structural stability assessment requirements under § 257.73(d) or § 257.74(d), the CCR unit must additionally be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. [The owner or operator shall notify the Director and submit a written summary of the engineer's qualifications at least 14 days before the scheduled inspection.] The inspection must, at a minimum, include:"

G. In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83(b)(1), the following requirements are added:

1. Inspection of any permanent monument or monitoring installations;
2. Assessment of all parts of the CCR surface impoundment that are related to the CCR surface impoundment's safety; and
3. A recommendation regarding the safe storage level of the impoundment.

H. In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83(b)(5), the owner or operator shall notify the Department within 24 hours and in writing within five days if a deficiency or release could result in harm to human health or the environment or has resulted in a release. The owner or operator shall notify the Department in writing within 14 days of all other deficiencies under 40 CFR 257.83(b)(5).

I. In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83, the following requirements are added:

1. Notwithstanding 40 CFR 257.73(a)(2)(i) and (ii) and 40 CFR 257.74(a)(2)(i) and (ii), a qualified professional engineer shall review the hazard potential classification of each CCR surface impoundment during each subsequent inspection under § 257.83(b)(4)(i) and revise the classification in accordance with current conditions.]
2. Maintenance and Repair
   a. An owner shall perform general maintenance and ordinary repairs that do not impair the safety of the CCR surface impoundment. General

maintenance and ordinary repair activities listed under this subsection do not require prior approval of the Director. These repair activities include:

i. Removing brush or tall weeds.

ii. Cutting trees and removing slash from the embankment or spillway. Small stumps may be removed provided no excavation into the embankment occurs.

iii. Exterminating rodents by trapping or other methods. Rodent damage may be repaired provided it does not involve excavation that extends more than 2 feet into the embankment and replacement materials are compacted as they are placed.

iv. Repairing erosion gullies less than 2 feet deep on the embankment or in the spillway.

v. Grading the surface on the top of the CCR surface impoundment embankment or spillway to eliminate potholes and provide proper drainage, provided the freeboard is not reduced.

vi. Placing additional riprap and bedding on the upstream slope, or in the spillway in areas that have sustained minor damage and restoring the original riprap protection where the damage has not yet resulted in erosion and weakening of the CCR surface impoundment.

vii. Painting, caulking, or lubricating metal structures.

viii. Patching or caulking spalled or cracked concrete to prevent deterioration.

ix. Removing debris, rock, or earth from outlet conduits or spillway channels and basins.

x. Patching to prevent deterioration within outlet works.

xi. Replacing worn or damaged parts on outlet valves or controls to restore them to original condition or its equivalent.

xii. Repairing or replacing fences intended to keep traffic or livestock off the CCR surface impoundment or spillway.

b. General maintenance and ordinary repair that may impair or adversely

affect safety, such as excavation into or near the toe of the CCR surface impoundment, construction of new appurtenant structures for the CCR surface impoundment, and repair of damage that has already significantly weakened the CCR surface impoundment shall be performed in accordance with this Article. The Director shall determine pursuant to R18-13-1017 whether general maintenance and ordinary repair activities not listed in paragraph (a) will impair safety.]

J. Subsections (B) through (I) of this Section are based on Arizona dam safety standards additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1005. Groundwater Monitoring and Corrective Action

A. 40 CFR 257.90 through 40 CFR 257.98, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ, with the exception of 40 CFR 257.90(g), "Suspension of groundwater monitoring requirements".

B. 40 CFR 257.94(a) is amended as follows: "(a) The owner or operator of a CCR unit must conduct detection monitoring at all groundwater monitoring wells consistent with this section. At a minimum, a detection monitoring program must include groundwater monitoring for all constituents listed in appendix III to this part. [The Director may require monitoring for constituents or pollutants not listed in appendix III based on information that non-CCR waste has been placed in a CCR unit. The owner or operator may propose to the Director that monitoring for non-CCR constituents be based on the facility's most recent aquifer protection permit. Requirements for non-CCR constituents at existing and new CCR units, including alert levels, discharge limitations, compliance

schedules, corrective actions and temporary cessation or plans shall be no more stringent than required to satisfy the requirements of A.R.S. Title 49, Chapter 2, Article 3, and 18 A.A.C. 9, Articles 1 and 2.]"

C. 40 CFR 257.94(e)(2) is amended as follows: "(2) The owner or operator may demonstrate that a source other than the CCR unit caused the statistically significant increase over background levels for a constituent or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. [An owner or operator that is investigating whether to submit an alternative source demonstration under this section, shall notify the Director in writing within seven days of that decision.] The owner or operator shall complete the written demonstration within 90 days of [determining that there is] a statistically significant increase over background levels to include obtaining a certification from a qualified professional engineer verifying the accuracy of the information in the report, [and submit the demonstration and certification to the Director for approval.] If the owner or operator completes a successful demonstration, as supported by a certification from a qualified professional engineer, within the 90-day period, the owner or operator may continue with a detection monitoring program, [unless such demonstration is subsequently disapproved by the Director.] If a successful demonstration was not completed within the 90-day period [or if the Director disapproves the demonstration,] the owner or operator shall initiate an assessment monitoring program as required under § 257.95. The owner or operator also shall include the demonstration in the annual groundwater monitoring and corrective action report required by § 257.90(e), in addition to the certification by a qualified professional engineer [and Director approval.]"

D. 40 CFR 257.95(g)(3)(ii) is modified as follows: "(ii) Demonstrate that a source other than the CCR unit caused the contamination, or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. [An owner or operator that is investigating whether to submit an alternative source demonstration under this section, shall notify the Director in writing within seven days of that decision.] Any such demonstration shall be supported by a report that includes the factual or evidentiary basis for any conclusions, and shall be certified to be accurate by a qualified professional engineer. [The demonstration, report

and certification shall be submitted to the Director for approval.] If a successful demonstration is made, the owner or operator shall continue monitoring in accordance with the assessment monitoring program pursuant to this section, and may return to detection monitoring if the constituents in Appendix III and Appendix IV of this part are at or below background as specified in paragraph (e) of this section, [unless such demonstration is subsequently disapproved by the Director.] The owner or operator must also include the demonstration in the annual groundwater monitoring and corrective action report required by § 257.90(e), in addition to the certification by a qualified professional engineer [and Director approval.]

E. 40 CFR 257.95(g)(4) is modified as follows: "(4) If a successful demonstration has not been made at the end of the 90-day period provided by paragraph (g)(3)(ii) of this section, [or if the Director disapproves the demonstration,] the owner or operator of the CCR unit shall initiate the assessment of corrective measures requirements under § 257.96."

F. 40 CFR 257.95(h) is amended as follows:

"(h) The owner or operator of the CCR unit shall establish a groundwater protection standard for each constituent in appendix IV to this part [and each pollutant identified pursuant to subsection (B)] detected in the groundwater. The groundwater protection standard shall be:

(1) For constituents [for which an Aquifer Water Quality Standard has been established under 18 A.A.C. 11, Article 4, either the Aquifer Water Quality Standard for that constituent, or the maximum contaminant level (MCL) that has been established under §§ 141.62 and 141.66 of this title, whichever is more stringent. For constituents for which no Aquifer Water Quality Standard exists, and] for which a maximum contaminant level (MCL) has been established under §§ 141.62 and 141.66 of this title, the MCL for that constituent.

(2) [For constituents for which no Aquifer Water Quality Standard exists, and for which a maximum contaminant level (MCL) has not been established under 40 CFR 141.62 and 141.66, the background concentration established from wells in accordance with § 257.91.]

(3) For constituents for which the background level is higher than the levels

identified under [paragraph (h)(1)] of this section, the background concentration."

G. 40 CFR 257.97, titled "Selection of remedy", paragraph (a) is amended as follows: "(a) Based on the results of the corrective measures assessment conducted under § 257.96, the owner or operator must, as soon as feasible, select a remedy that, at a minimum, meets the standards listed in paragraph (b) of this section. This requirement applies in addition to, not in place of, any applicable standards under the Occupational Safety and Health Act. The owner or operator must prepare a semiannual report describing the progress in selecting and designing the remedy. Upon selection of a remedy, the owner or operator must prepare a final report describing the selected remedy and how it meets the standards specified in paragraph (b) of this section. The owner or operator shall obtain a certification, from a qualified professional engineer, [which shall be submitted to the Director for approval,] that the remedy selected meets the requirements of this section. The report has been completed when it is placed in the operating record as required by § 257.105(h)(12). [The remedy selected shall be incorporated into the initial CCR facility permit, or added to it as a major permit modification.]"

H. 40 CFR 257.98, titled "Implementation of the corrective action program" paragraph (e) is amended as follows: "(e) Upon completion of the remedy, the owner or operator must prepare a notification stating that the remedy has been completed. The owner or operator must obtain a certification, from a qualified professional engineer, [which shall be submitted to the Director for approval,] attesting that the remedy has been completed in compliance with the requirements of paragraph (c) of this section. The [notification] has been completed when it is placed in the operating record as required by § 257.105(h)(13)."

R18-13-1006. Closure and Post-Closure Care

40 CFR 257.100 through 40 CFR 257.104, revised as of December 14, 2020 (and no future editions) are incorporated by reference, on file with ADEQ, and modified by adding paragraph (4) to 40 CFR 257.104(b) as follows: "Inspection and monitoring, as required by § 257.83(b), as amended, shall continue throughout the post-closure care period."

R18-13-1007. Recordkeeping, Notification, and Posting of Information to the Internet

A. 40 CFR 257.105 through 40 CFR 257.107, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ.

B. 40 CFR 257.105(f)(6) is amended as follows: "(6) The emergency action plan (EAP), and any amendment of the EAP, as required by §§ 257.73(a)(3), 257.74(a)(3), [and R18-13-1003.02,] except that only the most recent EAP must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section."

C. 40 CFR 257.105(h)(1) is amended as follows: "(1) [All] annual groundwater monitoring and corrective action [reports,] as required by § 257.90(e) [, throughout the active life of the unit and post-closure care period.]"

D. 40 CFR 257.105 is amended by adding paragraph (k) as follows: "By March 15 of each calendar year, the owner or operator of a CCR facility shall determine and place in the operating record the amount of CCR beneficially used in the previous calendar year. The amount shall be measured based on when the product leaves the facility site."

E. 40 CFR 257.105 is amended by adding paragraph (l) as follows: "The financial assurance cost estimate and financial assurance mechanisms used to satisfy R18-13-1020."

F. 40 CFR 257.106 is amended by adding paragraph (k) as follows: "The owner or operator of a CCR unit subject to this subpart shall notify the Director when information has been placed in the operating record under § 257.105(k)."

G. 40 CFR 257.107 is amended by adding paragraph (k): "(k) CCR Facility Permit. The owner or operator of a CCR unit subject to this subpart must place the entire CCR facility permit on the facility's CCR website. The placement of the initial permit shall be updated with each modification within 30 days of the Director's approval of the modification."

R18-13-1008. 40 CFR 257, Appendices III and IV

40 CFR 257, Appendices III and IV, revised as of December 14, 2020 (and no future editions) are incorporated by reference and on file with ADEQ.

R18-13-1010. Permit Application Requirements for CCR Facilities

A. The owner or operator of a CCR unit that meets the applicability requirements in 40 CFR

257.50 shall submit to the Director a complete application for an initial or a renewal CCR facility permit, any new CCR unit, or any lateral expansion to a CCR unit, on an application form, as described in this Section.

B. The time for application submittal shall be as follows:

1. An application for an initial CCR facility permit shall be submitted within 180 days after the effective date of CCR program approval. An application for an initial CCR facility permit may be submitted prior to CCR program approval as allowed under A.R.S. § 49-891(F).
2. An application for a new CCR unit or lateral expansion of a CCR unit shall be submitted before beginning construction. Construction may not begin until the Director issues approval through a permit or modification authorizing construction, unless:
    a. For a CCR surface impoundment before a CCR facility permit has been issued for that facility, the owner or operator has obtained approval to construct from ADWR and demonstrates to the satisfaction of the Director that commencing construction before approval is necessary to comply with 40 CFR 257, as incorporated in this Article;
    b. For a CCR unit other than a CCR surface impoundment before a CCR facility permit has been issued for that facility, the owner or operator demonstrates to the satisfaction of the Director that commencing construction before approval is necessary to comply with 40 CFR 257, as incorporated in this Article.
3. For a renewal permit as required under R18-13-1016(A).

C. The owner or operator shall hold a public meeting in order to solicit questions from the community and inform the community about its intended permit at one of the times listed below. The owner or operator shall notify ADEQ at least 30 days before the meeting and provide adequate public notice for the meeting:

1. Within 90 days after receiving notice from the Director that its application is administratively complete, or
2. Prior to submitting an initial or renewal CCR facility permit application.

D. An owner or operator applying for a CCR facility permit shall provide the Department

with the following information in the application and shall clearly identify any confidential business information that if made public, would divulge the trade secrets of the person as defined in A.R.S. § 49-201, or other information likely to cause substantial harm to the person's competitive position:

1. Sufficient information about the facility for the Director to establish permit conditions to ensure compliance with, including to assess the applicability of, applicable provisions in A.R.S Title 49, Chapter 4, and this Article. Such information includes but is not limited to physical location; description; operations; operating history; the address of the facility's CCR website; a list of other federal or state environmental permits issued to the owner or operator for the facility where the CCR unit is located; and for surface impoundments, the current Arizona Department of Water Resources license pursuant to A.A.C. R12-15-1214.
2. Sufficient information about the owners and operators of each CCR unit at the facility for the Director to identify, contact, communicate with them and determine compliance with A.R.S. Title 49, Chapter 4 and this Article. Such information includes, but is not limited to contact information, ownership status (e.g., private, governmental) of each CCR unit and CCR-related solid waste management operation at the facility; and a description of allocated responsibilities among owners and operators of CCR units at the facility. Each owner and operator of a CCR unit shall sign and certify the accuracy of the application, unless an agreement is provided to the Director that one owner or operator is signing and certifying for the rest.
3. Sufficient technical information about each CCR unit at the facility necessary for the Director to establish permit conditions to require compliance with, including to assess the applicability of, applicable provisions in A.R.S. Title 49, Chapter 4 and this Article. Such information includes, but is not limited to the location, design, construction, operation, maintenance, closure and retrofit of each CCR unit, descriptions of all CCR and non-CCR wastestreams placed into a CCR unit, as well as liners, controls, monitoring approaches, the groundwater monitoring system, and corrective action or remedial measures.

4. Sufficient technical and other information about the geologic and hydrogeologic characteristics and features of the area surrounding each CCR unit, including subsurface characteristics, to support decisions by the Director to establish permit conditions to require compliance with, including to assess the applicability of, applicable provisions of this Article, and to evaluate the compliance approaches proposed in the permit application. The owner and operator shall provide, at a minimum, information about the following in proximity to the CCR unit(s): floodplains and wetlands, fault lines or unstable areas, groundwater and surface water, soil and subsoil characteristics, groundwater well locations and uses, adjacent land uses, and other similar information.
5. Sufficient technical and other information characterizing conditions surrounding each CCR unit for the Director to establish permit conditions to require compliance with, including to assess the applicability of, applicable provisions in this Article. This includes but is not limited to groundwater, aquifers, soil, or other sampling data; date and procedures used to characterize background concentrations; well construction diagrams and drill logs; hydrogeologic cross-sections; information about the activities that yielded the sampling data, including quality assurance data; delineation of contaminant plumes; and other relevant information required to make technical assessments to characterize the presence or absence of leakage or releases from the CCR unit.
6. Plans, maps, drawings, diagrams, and other visual information, in addition to narrative information, including, at a minimum:
    a. A site map, depicting the location of the CCR unit(s) and surrounding features representing site conditions, monitoring wells, and other pertinent information, including all known property lines, structures, water wells, injection wells, drywells and their uses, topography, the location of points of discharge, and all known borings.
    b. A topographic map, depicting each CCR unit, surrounding geologic and hydrogeologic features, surface water features, access and haul roads, and other pertinent information. Information in these maps must be provided to allow the Director to understand site conditions and evaluate

compliance strategies proposed by the owner and operator, to draft terms and conditions that will achieve compliance with the requirements of this Article.

c. Potentiometric maps depicting groundwater flow direction, all CCR units at the facility, any delineated plumes of contamination from releases from CCR units, all groundwater monitoring wells or other monitoring points where water level data were gathered, potable wells on the facility property or nearby property, and other pertinent information. A sufficient number and quality of maps are required to represent seasonal or temporal changes in groundwater flow direction.

d. Other documents, including: hydrogeologic cross-sections depicting subsurface conditions, drill logs, CCR unit construction diagram(s), and groundwater monitoring well construction diagrams.

e. All site-specific compliance plans and assessments required by this Article (e.g., fugitive emissions/dust control plan required by § 257.80, emergency action plan required by § 257.73, run-on and run-off control system plan required by § 257.81(c), inflow design flood control system plan required by § 257.82(c), closure plan or retrofit plan required by § 257.102, and post-closure care plan required by § 257.104).

f. All certifications and other documentation of decisions made or actions taken such as:

   i. Certifications concerning the initial and periodic structural stability assessments required by §§ 257.73(d) and 257.74(d).

   ii. Certifications concerning the initial and periodic safety factor assessments required by §§ 257.73(e) and 257.74(e).

   iii. The inflow design flood certification under § 257.82(c)(5), the most recent inspection report required by § 257.83(b)(2), and the most recent hazard class certification required by § 257.73(a)(2)(ii).

   iv. Documentation supporting a groundwater monitoring program meeting all requirements of 257.91 and 257.93 including

certifications that the design and construction of the system meets the requirements of 257.91 and that the statistical method for evaluating groundwater monitoring data is appropriate pursuant to § 257.93(f)(6). The groundwater monitoring program shall also demonstrate compliance with 257.94, 257.95, or 257.98, as applicable;

v. The most recent annual groundwater monitoring and corrective action report prepared pursuant to 257.90(e);

vi. Any notice of return to detection monitoring from assessment monitoring pursuant to § 257.95(e);

vii. Any alternative source demonstration pursuant to § 257.94(e)(2) or § 257.95(g)(3)(ii);

viii. Any assessment of corrective measures pursuant to § 257.96, along with the certification for any extension of time to complete the assessment and documentation of the public meeting required by § 257.96(e);

ix. Any selection of remedy required by § 257.97;

x. Documentation supporting implementation of the corrective action programs as required by § 257.98;

xi. A report describing any CCR units that the facility has closed since October 19, 2015. The report shall demonstrate that closure complied with the requirements of 40 CFR 257, subpart D at the time of closure, be certified by a qualified professional engineer, and shall include the post-closure plan, if applicable; and

xii. Technical data, such as design drawings and specifications, cost estimates, and engineering studies shall be certified by a qualified professional engineer.

7. The expected operational life of each CCR unit.

8. If submitting financial assurance as provided by A.R.S. § 49-770(C), the information required by R18-13-1020.

9. The applicable fee established in R18-13-1021.

10. Certification in writing that the information submitted in the application is true and accurate to the best of the knowledge of each owner and operator or as provided in subsection (D)(2) of this Section.

11. For any new CCR surface impoundment, and any lateral expansion, reconstruction, repair, or enlargement of a CCR surface impoundment, the information required by this Section, R18-13-1003.01, and R18-13-1010.01, prepared by or under the supervision of a qualified professional engineer.

    a. A construction quality assurance plan describing all aspects of construction supervision.

    b. The following may be submitted with the application or during construction.

        i. An emergency action plan as prescribed in 40 CFR 257.73 and 257.74 and R18-13-1003.02.

        ii. An operation and maintenance plan to accomplish the annual maintenance.

        iii. An instrumentation plan regarding instruments that evaluate the performance of the CCR surface impoundment.

12. For a CCR surface impoundment, a statement by a qualified professional engineer that determines the CCR surface impoundment's hazard class in accordance with this Article. The qualified professional engineer shall submit a map of the area that would be inundated by failure or improper operation of the CCR surface impoundment. The qualified professional engineer shall demonstrate whether failure or improper operation of the CCR surface impoundment would result in:

    a. Loss of human life. The demonstration may be based on an emergency action plan for persons who may be in the area of inundation;

    b. Significant incremental adverse consequences; or

    c. Significant intangible losses, as defined in R18-13-1001 and identified and evaluated by a public natural resource management or protection agency.

13. The Department may require additional information as necessary for the protection of human life, property, human health and the environment.

E. Completeness. When the Director receives an application containing the information

required by this Section for all applicable CCR units and CCR-related solid waste management operations at the facility and that meets the administrative completeness requirements of R18-1-503(A), the Director shall notify the owner or operator that the application is complete. The Department shall post a notice on the Department's website pursuant to R18-13-1018.

F. After a permit application is determined by the Director to be complete, and before permit issuance, the owner or operator shall notify the Director if any application components have changed or need to be added.

G. The owner or operator of a CCR unit that has submitted an application for dam modification to the Arizona Department of Water Resources related to a CCR surface impoundment after July 12, 2024 shall notify the Department within 30 days of submittal or the effective date of this rule, whichever is later. For the purposes of this subsection, an "application for dam modification" means an application submitted to the Arizona Department of Water Resources under A.A.C. R12-15-1208 through R12-15-1211.

R18-13-1010.01. Additional Application Requirements for Constructing or Modifying CCR Surface Impoundments for Applications Submitted After CCR Program Approval

A. The requirements in this Section are additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not replace or negate any requirement of 40 CFR 257, subpart D, as incorporated herein.

B. Applications to Construct, Reconstruct, Repair, Enlarge, or Alter a High or Significant Hazard Potential CCR Surface Impoundment. An application to construct, reconstruct, repair, enlarge, alter or laterally expand a high or significant hazard potential CCR surface impoundment shall include the following prepared by or under the supervision of a qualified professional engineer:

1. All construction drawings as prescribed in subsection (G)(1) of this Section.
2. All construction specifications as prescribed in subsection (G)(2) of this Section.
3. An engineering design report that includes information needed to evaluate all aspects of the design of the CCR surface impoundment and appurtenances, including references with page numbers to support any assumptions used in the

design, as prescribed in subsection (G)(3) of this Section. The engineering design report shall recommend a safe storage level for existing CCR surface impoundments being reconstructed, repaired, enlarged, or altered.

4. A construction quality assurance plan describing all aspects of construction supervision.

C. Applications to Breach or Remove a High or Significant Hazard Potential CCR Surface Impoundment Embankment.

1. An application shall include plans for the excavation of the embankment down to the level of the natural ground at the maximum section. Upon approval of the Director, additional breaches may be made. This provision shall not be construed to require more than total removal of the embankment regardless of the flood magnitude. The breach or breaches shall be of sufficient width to pass the greater of:

   a. The 100-year flood at a depth of less than 5 feet, or

   b. The 100-year flood at a normal flood depth of not more than 2 feet at a distance of 2,000 feet downstream of the CCR surface impoundment.

2. The sides of each breach shall be excavated to a slope ratio that is stable and not steeper than 1 horizontal to 1 vertical.

3. Each breach shall be designed to prevent silt or CCR that has previously been deposited on the reservoir bottom and the excavated material from the breach from washing downstream.

4. Before breaching the CCR surface impoundment embankment, the reservoir shall be emptied in a controlled manner that will not endanger lives or damage downstream property. The applicant shall obtain approval from the Director for the method of breaching or removal.

5. An application to breach or remove a high or significant hazard potential CCR surface impoundment embankment shall include the following prepared by or under the supervision of a qualified professional engineer:

   a. The construction drawing or drawings for the breach or removal of a CCR surface impoundment, including the location, dimensions, and lowest elevation of each breach.

b. A construction quality assurance plan describing all aspects of construction supervision.

6. Reduction of a high or significant hazard potential CCR surface impoundment to a size less than subsection (H)(1), (H)(2) or (H)(3) of this Section shall be approved pursuant to R18-13-1017 under the following circumstances:

a. The owner or operator shall submit a completed application and construction drawings for the reduction and the appropriate specifications, prepared by or under the supervision of a qualified professional engineer.

b. The construction drawings and specifications shall contain sufficient detail to enable a contractor to bid on and complete the project.

c. The plans shall comply with all requirements of this subsection (C) except that the breach is not required to be to natural ground.

d. Upon completion of the reduction to a size less than subsection (H)(1), (H)(2) or (H)(3) of this Section, the qualified professional engineer shall file as constructed drawings and specifications with the Department.

D. Applications to Construct, Reconstruct, Repair, Enlarge, Alter, Breach, or Remove a Low Hazard Potential CCR Surface Impoundment

1. An application package to construct, reconstruct, repair, enlarge, or alter a low hazard potential CCR surface impoundment shall include the following prepared by or under the supervision of a qualified professional engineer:

a. Files of all construction drawings as prescribed by subsection (G)(1) of this Section.

b. Files of all construction specifications as prescribed by subsection (G)(2) of this Section.

c. An engineering design report that includes information needed to evaluate all aspects of the design of the CCR surface impoundment and appurtenances, including references with page numbers to support any assumptions used in the design, as prescribed in subsection (G)(3) of this Section.

2. An application package for the breach or removal of a low hazard potential CCR surface impoundment embankment shall include the following:

a. A completed application shall contain the following information:

i. The name and address of the owners and operators of the CCR surface impoundment.

ii. A description of the proposed removal.

iii. The proposed time for beginning and completing the removal.

b. A statement by a qualified professional engineer demonstrating both of the following:

i. That the CCR surface impoundment embankment will be excavated to the level of natural ground at the maximum section; and

ii. That the breach or breaches will be of sufficient width to pass the greater of:

(1) The 100-year flood at a depth of less than 5 feet, or

(2) The 100-year flood at a normal flood depth of not more than 2 feet at a distance of 2,000 feet downstream of the CCR surface impoundment embankment,

(3) This paragraph (ii) shall not be construed to require more than a total removal of the CCR surface impoundment embankment regardless of flood magnitude.

iii. That the sides of the breach will be excavated to a slope ratio that is stable and not steeper than 1 horizontal to 1 vertical.

3. Within 90 days after completing removal of a low hazard potential CCR surface impoundment embankment, the owner or operator shall file the following:

a. A brief completion report, including a description of the causes for any changes or deviations from the approved application package prepared by the qualified professional engineer who supervised the construction, in accordance with A.R.S. Title 32, Chapter 1. The qualified professional engineer shall certify that the as removed drawings and the report accurately represent the actual removal of the CCR surface impoundment embankment.

b. As-removed drawings prepared and sealed by the qualified professional

engineer who supervised the removal. The owner or operator and the qualified professional engineer shall maintain a record of the drawings.

E. Construction of a High, Significant, or Low Hazard Potential CCR surface impoundment.

1. Before commencement of construction activities, the owner or operator shall invite to a pre-construction conference all involved regulatory agencies, the prime contractor, and all subcontractors. At this meeting the Department shall identify, to the extent possible, the key construction stages at which an inspection will be made. At least 48 hours before each key construction stage identified for inspection, the owner or operator or the owner's qualified professional engineer shall provide notice to the Department.
2. The owner or operator's qualified professional engineer shall oversee construction of a new CCR surface impoundment or the lateral expansion reconstruction, repair, enlargement, alteration, breach, or removal of an existing CCR surface impoundment.
3. A qualified professional engineer shall supervise or direct the supervision of construction in accordance with the construction quality assurance plan.
4. The owner or operator's qualified professional engineer shall submit summary reports of construction activities and test results according to a schedule approved by the Department.
5. The owner or operator shall immediately report to the Department any condition encountered during construction that requires a deviation from the approved plans and specifications.
6. The owner or operator shall promptly submit a written request for approval of any necessary change with sufficient information to justify the proposed change. The owner or operator shall not commence construction without the written approval of the Director unless the change is a minor change. A minor change is a change that complies with the requirements of this Article and provides equal or better safety performance.
7. Upon completion of construction, the owner or operator shall notify the Department in writing. The Department shall make a final inspection. The owner or operator shall correct any deficiencies noted during the inspection. The owner

shall not use the CCR surface impoundment before issuance of a permit or permit modification unless the Director issues written approval.

F. Completion Documents for a Significant or High Hazard Potential CCR Surface Impoundment. Within 90 days after completion of the construction or removal work for a significant or high hazard potential CCR surface impoundment and final inspection by the Department, the owner or operator shall file the following:

1. One set of full sized as constructed drawings prepared and sealed by the qualified professional engineer who supervised the construction. If changes were made during construction, the owner or operator shall file supplemental drawings showing the CCR surface impoundment and appurtenances as actually constructed.
2. Construction records, including grouting, materials testing, and locations and baseline readings for permanent bench marks and instrumentation, initial surveys, and readings.
3. Photographs of construction from exposure of the foundation to completion of construction.
4. A brief completion report summarizing the salient features of the project, including a description of the causes for any changes or deviations from the approved drawings and specifications that were made during the construction phase.
5. A schedule for filling the impoundment, specifying fill rates, CCR surface or liquid level elevations to be held for observation, and a schedule for inspecting and monitoring the CCR surface impoundment.
6. An operating manual for the CCR surface impoundment and its appurtenant structures. The operating manual shall include a process for safety inspections prescribed in R18-13-1004. The operating manual shall include schedules for surveillance activities and baseline information for any installed instrumentation as follows:
   a. The frequency of monitoring,
   b. The data recording format,
   c. A graphical presentation of data, and

d. The person who will perform the work.

G. Construction Drawings, Construction Specifications, and Engineering Design Report for a High, Significant, or Low Hazard Potential CCR Surface Impoundment. The owner or operator and qualified professional engineer are responsible for complete and adequate design of a CCR surface impoundment and for including in the application all aspects of the design pertaining to the safety of the CCR surface impoundment.

1. Construction Drawing Requirements. The construction drawings required by subsections (B), (C), and (D) of this Section shall include the following:

a. The seal and signature of a qualified professional engineer.

b. One or more topographic maps of the CCR surface impoundment, spillway, outlet works, and reservoir on a scale large enough to accurately locate the CCR surface impoundment and appurtenances, indicate cut and fill lines, and show the property lines and ownership status of the land. Contour intervals shall be compatible with the height and size of the CCR surface impoundment and its appurtenances and shall show design and construction details.

c. A reservoir area and capacity curve that reflect area in acres and capacity in acre-feet in relation to depth of CCR and liquids and elevation in the reservoir. The construction drawings shall show the spillway invert and top of CCR surface impoundment elevations. The construction drawings shall also show the reservoir volume and space functional allocations. The construction drawings may include alternate scales as required for the owner or operator's use.

d. Spillway and outlet works rating curves and tables at a scale or scales that allow determination of discharge rate in cubic feet per second at both low and high flows as measured by depth of water passing over the spillway control section.

e. A location map showing the CCR surface impoundment footprint and all exploration drill holes, test pits, trenches, adits, borrow areas, and bench marks with elevations, reference points, and permanent ties. This map shall use the same vertical and horizontal control as the topographic map.

f. Geologic information including 1 or more geologic maps, profile along the centerline, and other pertinent cross sections of the CCR surface impoundment site, spillway or spillways, and appurtenant structures, aggregate and material sources, and reservoir area at 1 or more scales compatible with the site and geologic complexity, showing logs of exploration drill holes, test pits, trenches, and adits.

g. One or more plans of the CCR surface impoundment to delineate design and construction details.

h. Foundation profile along the CCR surface impoundment embankment centerline at a true scale where the vertical scale is equal to the horizontal scale, showing the existing ground and proposed finished grade at cut and fill elevations, including anticipated geologic formations. The foundation profile shall include any proposed grout and drain holes.

i. Profile and a sufficient number of cross sections of the CCR surface impoundment embankment to delineate design and construction details. The drawings shall illustrate and show dimensions of camber, details of the top, core zone, interior filters and drains, and other zone details. The profile of the CCR surface impoundment may be drawn to different horizontal and vertical scales if required for detail. A maximum section of the CCR surface impoundment shall be drawn to a true scale, where the vertical scale is equal to the horizontal scale. The outlet conduit may be shown on the maximum section if this is typical of the proposed construction.

j. One or more CCR surface impoundment embankment foundation plans showing excavation grades and cut slopes with any proposed foundation preparation, grout and drain holes, and foundation dewatering requirements.

k. Plan, profile, and details of the outlet works, including the intake structure, the gate system, conduit, trashrack, conduit filter diaphragm, conduit concrete encasement, and the downstream outlet structure. The drawings shall include all connection and structural design details.

l. Plan, profile, control section, and cross sections of the spillway, including details of any foundation preparation, grouting, or concrete work that is planned. A complex control structure, a concrete chute, or an energy dissipating device for a terminal structure shall include both hydraulic and structural design details.

m. Hydrologic data, drainage area and flood routing, and diversion criteria.

2. Construction Specification Requirements. The construction specifications required by subsections (B), (C) and (D) of this Section shall include the following:

a. The seal and signature of a qualified professional engineer.

b. The statement that the construction drawings and specifications shall not be materially changed without the prior written approval of the Director.

c. A detailed description of the work to be performed and a statement of the requirements for the various types of materials and installation techniques that will enter into the permanent construction.

d. The statement that construction shall not be considered complete until the Director has approved the construction in writing.

e. The statement that the owner or operator's qualified professional engineer shall control the quality of construction.

f. The following construction information:

i. All earth and rock material descriptions, placement criteria, and construction requirements for all elements of the CCR surface impoundment and related structures.

ii. All concrete, grout, and shotcrete material and mix descriptions, placement and consolidation criteria, temperature controls, and construction requirements for all elements of the CCR surface impoundment and related structures.

iii. Material criteria and material testing, cleaning, and treatment. If foundation or curtain grouting is required, the specifications shall describe the type of grout, grouting method, special equipment necessary, recording during grouting, and foundation monitoring to

avoid disturbance from grouting.

iv. All materials testing that will be performed by the contractor for pre-qualification of materials, including special performance testing, such as water pressure tests in conduits. The Director shall accept materials that are pre-tested successfully and constructed in-place in accordance with specifications.

v. A plan for control or diversion of surface water during construction. The design qualified professional engineer may determine frequency of storm runoff to be controlled during construction, commensurate with the risk of economic loss during construction.

vi. Criteria for blast monitoring and acceptable blast vibration levels, including particle velocities for the CCR surface impoundment and other critical appurtenances. Monitoring equipment and monitoring locations shall be specified.

vii. Instrumentation material descriptions, placement criteria, and construction requirements and a statement that instrumentation shall be installed by experienced specialty subcontractors.

3. Engineering Design Report Requirements. The engineering design report required by subsections (B), (C), and (D) of this Section shall include the following:

a. The seal and signature of a qualified professional engineer.

b. The classification under 40 CFR 257.74(a)(2) of the proposed CCR surface impoundment, or for the proposed lateral expansion of an existing CCR surface impoundment.

c. Hydrologic considerations, including calculations and a summary table of data used in determining the required emergency spillway capacity and freeboard, and design of any diversion or detention structures. The design report shall include input and output listings.

d. Hydraulic characteristics, engineering data, and calculations used in determining the capacities of the outlet works and emergency spillway. The design report shall include input and output listings.

e. Geotechnical investigation and testing of the CCR surface impoundment site and reservoir basin. Results and analysis of subsurface investigations, including logs of test borings and geologic cross sections.

f. Guidelines and criteria for blasting to be used by the contractor in preparing the blasting plan.

g. Details of the plan for control or diversion of surface water during construction.

h. Details of the dewatering plan for subsurface water during construction.

i. Testing results of earth and rock materials, including the location of test pits and the logs of these pits.

j. Discussion and design of the foundation blanket grouting, grout curtain, and grout cap based on foundation stability and seepage considerations.

k. Calculations and basic assumptions on loads and limiting stresses for reinforced concrete design. The design report shall include input and output listings.

l. A discussion and stability analysis of the CCR surface impoundment embankment including appropriate seismic loading, safety factors, and embankment zone strength characteristics. Analyses shall include both short-term and long-term loading on upstream and downstream slopes. The design report shall include input and output listings.

m. A discussion of seismicity of the project area and activity of faults in the vicinity. The design report shall use both deterministic and statistical methods and identify the appropriate seismic coefficient for use in analyses.

n. Discussion and design of the cutoff trench based on seepage and other considerations.

o. Permeability characteristics of foundation and CCR surface impoundment embankment materials, including calculations for seepage quantities through the CCR surface impoundment, the foundation, and anticipated in the internal drain system. The design report shall include input and output listings. The design report shall include copies of any flow nets used.

p. Discussion and design of internal drainage based on seepage quantity calculations. The design report shall include instrumentation necessary to monitor the drainage system and filter design calculations for protection against piping of foundation and embankment.

q. Erosion protection against waves and rainfall runoff for both the upstream and downstream slopes, as appropriate.

r. Discussion and design of foundation treatment to compensate for geological weakness in the CCR surface impoundment foundation and abutment areas and in the spillway foundation area.

s. Post-construction vertical and horizontal movement systems.

t. Discussion of foundation conditions including the potential for subsidence, fissures, dispersive soils, collapsible soils, and sink holes.

H. This Section consists of enhancements to 40 CFR 257, subpart D based on Arizona dam safety standards and apply in addition to 40 CFR 257, subpart D but do not apply to:

1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

R18-13-1011. Permit Contents

A. Standard permit conditions for CCR facility permits. The following conditions shall be incorporated into all CCR facility permits either expressly or by reference. If incorporated by reference, a specific citation to these regulations shall be provided in the permit.

1. Duty to comply. The owner or operator shall comply with all conditions of this CCR facility permit, except to the extent and for the duration any noncompliance is authorized by the Director. Any unauthorized permit noncompliance constitutes a violation of this Article and is subject to enforcement action, permit termination, or denial of a permit application.

2. Duty to reapply. If the owner or operator wishes to continue an activity regulated by this permit after the expiration date of the permit, the owner or operator shall apply for and obtain a new permit.

3. Need to halt or reduce activity not a defense. It shall not be a defense for an owner or operator in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

4. Requirement to mitigate impacts of noncompliance. In the event of noncompliance with this permit, the owner or operator shall take all reasonable steps to minimize releases to the environment and shall carry out such measures as necessary to reduce reasonable probability of adverse impacts on health and the environment.

5. New statutory requirements or regulations. If the standards or regulations on which this permit is based change through changes to statute, promulgation of new or amended regulations, or by judicial decision, and this results in failure of the permit terms and conditions to ensure compliance with the revised standard or regulation, the owner or operator shall apply for a permit modification. The owner or operator shall submit an application to modify this permit to include the revised requirements within 180 days after the change becomes effective.

6. Proper operation and maintenance. The owner or operator shall ensure the proper operation and maintenance of all units, appurtenant structures, ancillary equipment and systems of treatment and control, which are installed or used to achieve compliance with the conditions of this permit. Failure to properly operate and maintain such equipment or structures does not excuse failure to comply with requirements in this permit. The term "Proper operation and maintenance" includes effective performance, adequate funding, adequate staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. Operation of back-up or auxiliary equipment or similar systems is required only when necessary to achieve compliance with the conditions of this permit.

7. Permit actions. This permit may be modified, or terminated for cause. The

application by the owner or operator for a permit modification, or termination, or anticipated noncompliance, does not stay any permit condition.

8. Property rights. The permit does not convey any property rights of any sort, nor any exclusive privilege.

9. Duty to provide information. The owner or operator shall furnish to the Director, within a reasonable time, any relevant information which the Director may request to determine whether cause exists for modifying, or terminating this permit, or to determine compliance with this permit. The owner or operator shall also furnish to the Director, upon request, copies of records required to be kept by this permit.

10. Inspection and entry. The owner or operator shall allow the Director or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

    a. Enter at reasonable times upon the permitted premises where a regulated unit or activity is located or conducted, or where records that must be kept under the conditions of this permit are located;

    b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;

    c. Inspect at reasonable times any units, appurtenant structures, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and

    d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by this Article, any substances or parameters at any location.

11. Monitoring and records.

    a. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.

    b. The owner or operator shall retain records of all monitoring information, including all calibration, maintenance, and quality assurance records; all original monitoring data; copies of all reports and certifications required by this permit; and records of all data for a period of at least ten years

from the date of the sample, measurement, report, certification, or application. This period may be extended by request of the Director at any time. The owner or operator shall maintain records and data used to support a permit application for the lifetime of the permit. The owner or operator shall maintain records of all groundwater monitoring, including records of groundwater well construction and groundwater elevation measurements, throughout the active life of the unit, the post-closure care period and until completion of all corrective action.

12. Signatory requirements. All applications, reports, or information required to be submitted to the Director by this permit shall be signed and certified by each owner and operator of a CCR unit unless an agreement is provided to the Director that one owner or operator is certifying for the rest.

13. Reporting requirements.

    a. Anticipated noncompliance. The owner or operator shall provide written or electronic notice to the Director as soon as possible, but no later than 60 days in advance of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

    b. The owner or operator shall report to the Department by phone or electronically any noncompliance or release which has a reasonable probability of adverse effects on health or the environment as soon as possible, and no later than 24 hours after the time the owner or operator first becomes aware of the circumstances. The notification shall include the following:

        i. Information concerning release of any CCR that may endanger public drinking water supplies.

        ii. Any information about a release of CCR that could have a reasonable probability of adverse effects on health or the environment outside the facility.

        iii. The description of the release and its cause shall include:

            (A) Name, business address, business email address, and business telephone number of the owner and operator;

(B) Name, address, email address, and telephone number of the facility;

(C) Date, time, and type of release;

(D) Name and quantity of material(s) involved;

(E) The extent of injuries, if any;

(F) An assessment of actual or potential hazards to the environment and human health outside the facility, where applicable;

(G) Estimated quantity and disposition of recovered material that resulted from the release; and

(H) Action taken to mitigate the risk, including any preparation in advance of a severe weather event

iv. A narrative shall also be posted on the facility CCR website no later than five days after the time the owner or operator becomes aware of the circumstances. The narrative shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance. The Director may waive the five-day notice requirement in favor of posting a written report within fifteen days.

c. Where the owner or operator becomes aware that they failed to submit any relevant facts in a permit application or submitted incorrect information in a permit application or in any report to the Director, the owner or operator shall promptly submit such facts or corrected information to the Director.

14. Severability. Invalidation of a portion of this permit does not necessarily render the whole permit invalid. ADEQ intends that this permit remains in effect to the extent possible. In the event that any part of this permit is invalidated, the Director will advise the owner or operator as to the effect of such invalidation.

B. In addition to the standard conditions in subsection (A), the Director shall establish

permit terms and conditions in a CCR facility permit, on a case-by-case basis, in accordance with the requirements and procedures of A.R.S. Title 49, Chapter 4 and this Article. At a minimum, each CCR facility permit shall include all permit terms and conditions necessary to ensure compliance with A.R.S. Title 49, Chapter 4 and this Article.

C. Each CCR facility permit shall contain, either expressly or by reference, all requirements of this Article that are applicable to the permitted CCR units and CCR-associated solid waste management activities at the facility. In satisfying this provision, the Director may incorporate the applicable requirements directly into terms and conditions in the permit or incorporate them by reference. If incorporated by reference, a specific citation to the applicable regulations or requirements shall be provided in the permit.

D. Protectiveness. Each CCR facility permit shall contain such terms and conditions as the Director determines are necessary to ensure there is no reasonable probability of adverse effects on safety, health or the environment from the solid waste management of CCR at the facility.

E. The owner or operator of a CCR surface impoundment shall install, maintain, and monitor instrumentation to evaluate the performance of the CCR surface impoundment. The Director shall require site-specific instrumentation that the Director deems necessary for monitoring the safety of the CCR surface impoundment when failure may endanger human life and property. Conditions that may require monitoring include land subsidence, earth fissures, embankment cracking, phreatic surface, seepage, and embankment movements.

F. The permit shall contain a safe storage level for each CCR surface impoundment.

G. A CCR facility permit is issued for a fixed term of ten years. The term of a permit shall not be extended by modification of the permit beyond the maximum duration specified in this subsection.

R18-13-1012. Compliance Schedules

A. The Director may include compliance schedules in the CCR facility permit according to subsection (B) or (C) below, or both.

B. The owner or operator shall follow a timeline for future compliance, if established in the

CCR facility permit, that provides for action from the owner or operator that is not required until after the date of permit issuance. The timeline shall establish dates for their achievement.

1. If the time necessary for completion of an interim requirement is more than one year and is not readily divisible into stages for completion, the permit shall contain interim dates for submission of reports on progress toward completion of the interim requirement and shall indicate a projected completion date.
2. Unless otherwise specified in the permit, within 30 days after the applicable date specified in a compliance schedule, the owner or operator shall submit to the Department a report documenting that the required action was taken within the time specified.

C. When an owner or operator that has applied for a CCR facility permit will not be in compliance with one or more applicable requirements in A.R.S. Title 49, Chapter 4, or this Article at the time of permit issuance, the Director may include in the CCR facility permit a schedule of compliance. The schedule of compliance shall include an enforceable sequence of actions leading to compliance. This schedule of compliance shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the owner or operator is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements in A.R.S. Title 49, Chapter 4 or this Article on which it is based.

1. Time for compliance. Any schedule of compliance established in a CCR facility permit under subsection (C) shall require compliance as soon as feasible.
2. Interim dates. If a permit establishes a schedule of compliance which exceeds one year from the date of permit issuance, the schedule shall set forth interim requirements and the dates for their achievement.
   a. The time between interim dates shall not exceed one year.
   b. The permit shall require posting on the facility's CCR website of reports of progress toward completion of the interim requirements and indicate a projected completion date. The time between progress reports shall not exceed six months.
3. Reporting. The permit shall require that, no later than 30 days following each

interim milestone deadline and the final deadline of the schedule of compliance, the owner or operator shall submit a report to the Director documenting that the required action was taken within the time specified and shall post a notification on the facility's CCR website of its compliance or noncompliance with the interim or final requirement.

D. After reviewing the activity pursuant to any schedule established under this Section, the Director may modify the CCR facility permit, based on changed circumstances relating to the required action.

R18-13-1013. CCR Facility Permit Issuance or Denial

A. The Director shall issue CCR facility permits after CCR program approval, based upon the information obtained by or made available to the Department, if the Director determines that the permit requires the owner or operator to comply with A.R.S. Title 49, Chapter 4, this Article and Article 17. The procedures in this Article related to permit applications are applicable before CCR program approval, except that the licensing time frames requirements of 18 A.A.C. 1 do not apply until CCR program approval.

B. The Director shall provide the owner or operator with written notification of the final decision to grant or deny the permit within the applicable licensing time frames requirements and include the following:

1. The owner or operator's right to appeal the final permit determination, including the number of days the owner or operator has to file an appeal and the name and telephone number of the Department contact person who can answer questions regarding the appeals process;
2. If the permit is denied, the reason for the denial with reference to the statute or rule on which the denial is based; and
3. The owner or operator's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

C. The Director may deny a CCR facility permit if the Director determines upon completion of the application process that the owner or operator has:

1. Failed or refused to correct a deficiency in the CCR facility permit application;
2. Failed to demonstrate that the CCR units and their operation will comply with the

requirements of A.R.S. Title 49, Chapter 4 and this Article. The Director shall base this determination on:

a. The information submitted in the CCR facility permit application,

b. Any information submitted to the Department following a public hearing, or

c. Any relevant information that is developed or acquired by the Department; or

3. Provided false or misleading information.

D. Upon denying a CCR facility permit, the Director shall issue an order directing the owner or operator to begin closure of all CCR units at the facility according to § 257.101.

R18-13-1014. CCR Permit Transfer

A. The owner or operator of a CCR unit shall notify the Department 30 days prior to the planned transfer of any portion of ownership or operational control of a CCR unit or facility. If prior notice is impractical, the owner or operator shall notify the Department as soon as practical. The new owner and operator shall submit a permit modification request prior to the transfer of ownership or operational control or as soon as practicable thereafter.

B. The new owner or operator:

1. Shall include a written agreement between the previous and new owner or operator indicating a specific date for transfer of all permit responsibility, coverage, and liability;
2. Submit the applicable initial fee for a minor permit modification established in R18-13-1021;
3. Demonstrate technical capability necessary to fully carry out the terms of the permit and financial capability according to R18-13-1020; and
4. Submit a signed statement that it has reviewed the permit and agrees to the terms of the permit including any compliance schedules or new terms needed as a result of the transfer.

C. An owner or operator shall continue to comply with all permit conditions until the Director modifies/transfers the permit, regardless of whether ownership or operational

control has already been transferred.

R18-13-1015. CCR Permit Termination

The Director may, after notice and opportunity for a hearing, terminate a CCR facility permit for any of the following causes:

1. Significant noncompliance by the owner or operator with the permit;
2. Failure by the owner or operator in the permit application or during the permit issuance process to fully disclose all relevant facts,
3. Misrepresentation by the owner or operator of any relevant facts at any time;
4. A determination by the Director that the permit fails to ensure there is no reasonable probability of adverse effects to health or the environment and the permitted activity can only be regulated to acceptable levels by permit termination.
5. The Director has determined that all permitted activities have ceased and the owner or operator has completed closure, the required post-closure care and any required corrective action.

R18-13-1016. Permit Renewals

A. To renew a CCR facility permit, the owner or operator shall submit an application under R18-13-1010 at least 180 days before the expiration date of the effective permit.

B. If the owner or operator has submitted a timely and complete application for renewal under R18-13-1010, the terms and conditions of the existing CCR facility permit continue in force beyond the expiration date of the permit, but only until the effective date of the issuance or denial of a revised CCR facility permit.

C. The owner or operator shall renew the CCR facility permit as long as any CCR unit remains operational or is closing, in corrective action or post-closure care.

R18-13-1017. Modification of a CCR Facility Permit

A. The Director may modify a CCR facility permit upon the request of the facility owner or operator or upon the Director's initiative.

1. The owner or operator may submit a request for CCR facility permit modification

in writing on a form provided by the Department with the applicable fee established in R18-13-1021, explaining the facts and reasons justifying the request.

2. The Department may modify a permit, classify the modification, and collect the appropriate fee if:

   a. There are alterations, additions, or changes in the operation or condition of the permitted facility which occurred after permit issuance and require permit conditions or terms that are different or absent from those in the existing permit;

   b. The Director has received new information after the permit has been issued that:

      i. Was not available to the Director at the time of permit issuance (other than revised regulations, guidance, or test methods) and would have justified the inclusion of different permit conditions at the time of issuance to ensure compliance with A.R.S. Title 49, Chapter 4 and this Article, or

      ii. Otherwise shows that modification is necessary to ensure that there is no reasonable probability of adverse effects on safety, health or the environment.

   c. There is a change in an underlying regulatory or statutory requirement

   d. An error or omission is discovered that makes the permit inconsistent with regulatory or statutory requirements.

B. Upon receiving a request from an owner or operator, the Department shall determine whether the application is complete and whether the modification would be major, minor, or administrative.

C. The Department shall process modification requests following the applicable licensing time-frames.

D. A modified CCR facility permit supersedes the previous CCR facility permit upon the effective date of the modification, except as provided in R18-13-1011(F).

E. Major permit modifications. A major modification is one that substantially alters the CCR unit or its operation requiring a material change to a substantive term, provision,

requirement, or a limiting parameter of a permit, or one that could substantially impact human health or the environment. The owner or operator shall not make any change that requires a major permit modification without approval from the Director. The list below contains examples of major modifications:

1. Add a new CCR unit including a new landfill unit, a lateral expansion, or a new surface impoundment unit not already authorized by a CCR facility permit, including replacing a CCR unit.
2. Increase the maximum permissible operating storage level of CCR and liquids at a CCR surface impoundment or raising the embankment.
3. Selection of a remedy under 40 CFR 257.97.

F. Minor permit modifications. A minor modification is a modification that makes a routine change to a substantive term, provision, requirement, or a limiting parameter of a permit. The Director shall follow procedures for a minor modification to a CCR facility permit for those nonmajor alterations, additions, or changes in the operation or condition of the permitted facility which occurred after permit issuance and which require permit conditions that are different or absent from those in the existing permit. The owner or operator shall not make any change that requires a minor permit modification without approval from the Director. Minor permit modifications include, but are not limited to, the following:

1. Incorporate a change to an Aquifer Water Quality Standard in 18 A.A.C. 9, or a Maximum Contaminant Level under 40 CFR §§ 141.62 and 141.66, which serves as the underlying basis for a permit condition;
2. Change a construction requirement, treatment method, or operational practice, if the alteration complies with the requirements of A.R.S. Title 49, Chapter 4 and this Article and provides equal or better performance;
3. Change to a groundwater sampling and analysis program including the following:
    a. A change in the statistical method for evaluating groundwater monitoring data required by 40 CFR 257.93(f)(6);
    b. A change to an alternative groundwater sampling and analysis frequency pursuant to 40 CFR 257.94(d) or 257.95(c);
    c. Assessment of corrective measures pursuant to 40 CFR 257.96;

d. Changes to an approved groundwater monitoring system, including reducing the number of groundwater monitoring wells, or making changes in location, depth, or design of groundwater monitoring wells required by the permit.

4. Change an interim or final compliance date in a compliance schedule, if the Director determines just cause exists for changing the date;
5. Change the owner or operator's financial assurance mechanism or estimates under R18-13-1020;
6. Transfer a permit under R18-13-1014;
7. Replace monitoring equipment, including a well, if the replacement results in equal or greater monitoring effectiveness, but not including routine maintenance or replacement of well components and related equipment;
8. Breaching or removing a surface impoundment embankment. These activities shall be performed according to R18-13-1010.01(C) and (D).
9. Add interim measures to the corrective action program or make material changes to the corrective action requirements in the permit.
10. Change a permit condition that is based on a change in an underlying regulatory or statutory requirement, unless it requires substantial changes to the design, operation, or compliance strategies established in the permit and requires the application of significant technical judgment or discretion.
11. Increases to estimates of the maximum extent of operations or the maximum inventory of waste in the closure plan.
12. Completion of closure activities of a CCR unit.
13. Modify a CCR unit, including physical changes or changes in management practices which are not administrative modifications under subsection (G) or major modifications under subsection (E).

G. Administrative permit modifications. The Director shall follow procedures for an administrative modification to a CCR facility permit to:

1. Correct a typographical error;
2. Change nontechnical administrative information, excluding a permit transfer;
3. Correct minor technical errors, such as errors in calculation not impacting any

design aspects, locational information, citation of laws and citations of construction specifications;

4. Increase the frequency, duration, or stringency of the requirements for inspections, maintenance activities, monitoring, reporting, recordkeeping, or web posting or to revise a laboratory method;

H. The Director may change the categorization of a CCR facility permit modification.

I. An owner or operator may request a permit modification based on actions from more than one category of permit modification. Where possible, the Director may combine several requested permit modifications into one modification from the highest category.

R18-13-1018. Public Notice Requirements for Permit Actions

A. The Director shall provide notice as described after determining an application complete for the following permit actions. The notice shall contain information about the licensing timeframes for the permit action and describe how a person can inspect all permit application materials, either in person or online.

1. An initial or renewed CCR facility permit;
   a. On the ADEQ website;
   b. To anyone requesting such notice;
   c. To the entities listed in A.R.S. § 49-111.
2. A major modification to a CCR facility permit;
   a. On the ADEQ website;
   b. To anyone requesting such notice;
   c. To the entities listed in A.R.S. § 49-111.
3. A minor modification to a CCR facility permit;
   a. On the ADEQ website;
   b. To anyone requesting such notice.

B. The Director shall provide notice as described when proposing to issue or deny the items listed below. The notice shall describe how a person can inspect all permit application materials, either in person or online.

1. An initial or renewed CCR facility permit;
   a. Once, in a daily or weekly newspaper of general circulation where the

facility is located;

b. On the ADEQ website;

c. To anyone requesting such notice;

d. By requiring the owner or operator to place paper copies of a notice and supplemental information in a local library or community center.

2. A major modification to a CCR facility permit;

a. Once, in a daily or weekly newspaper of general circulation where the facility is located;

b. On the ADEQ website;

c. To anyone requesting such notice;

d. By requiring the owner or operator to place paper copies of a notice and supplemental information in a local library or community center.

C. The Director shall provide notice as described when issuing or denying the following:

1. An initial or renewed CCR facility permit;

a. To anyone who commented on the proposed initial or renewed CCR facility permit;

b. On the ADEQ website;

c. To anyone requesting such notice.

2. A major modification to a CCR facility permit;

a. To anyone who commented on the proposed major modification;

b. On the ADEQ website;

c. To anyone requesting such notice.

3. A minor modification to a CCR facility permit;

a. On the ADEQ website;

b. To anyone requesting such notice.

4. An administrative permit modification;

a. To anyone requesting such notice.

D. The Director shall provide notice as described when terminating a CCR facility permit:

1. On the ADEQ website;

2. To anyone requesting such notice.

E. The notice for a permit action under subsection (B)(1) or (B)(2) shall:

1. Include a brief summary of the draft document,
2. Contain information about the licensing timeframes for the permit action and explain where further information on the permit action can be obtained,
3. Describe when and how comments may be made,
4. Provide at least 30 days for comments from publication of the notice, and
5. Explain how a public hearing may be requested.

F. After a notice is issued under subsection (B)(1) or (B)(2), the Department shall schedule a public hearing if requested and if the Director determines there is sufficient public interest. The Director shall provide notice of the hearing as provided in subsection (B)(1)(a) or (B)(2)(a) at least 30 days before the hearing. The Department may conduct a public hearing for a CCR facility permit or major modification virtually.

G. The Department shall respond to comments received on the proposed CCR facility permit or major modification when the final decision is made under subsection (C). The Department shall send a copy of the comment responses to all commenters and notify commenters of their potential rights under A.R.S § 41-1092.03(B). The Department shall send the comment responses to commenters and anyone requesting a copy and post the comment responses on the Department's website.

R18-13-1019. Compliance; ADEQ Inspections; Violations and Enforcement

A. ADEQ Inspection and Entry. For purposes of ensuring compliance with the provisions of Title 49 and this Article, the owner or operator of a CCR facility, shall, upon request of any representative of ADEQ designated by the Director, furnish information pertaining to such CCR facility.

B. ADEQ Inspection and Entry for CCR units. The Director or a designated representative may enter at reasonable times upon private or public property and the owner or operator shall permit such entry, where a CCR surface impoundment is located, including a CCR surface impoundment under construction, reconstruction, repair, enlargement, alteration, breach, or removal, for any of the following purposes:

1. To enforce the conditions of approval of the construction drawings and specifications related to an application for construction, reconstruction, repair, enlargement, alteration, breach, or removal.

2. To inspect a CCR surface impoundment that is subject to this Article.

3. To investigate or assemble data to aid review and study of the design and construction of CCR surface impoundments, reservoirs, and appurtenances or make watershed investigations to facilitate decisions on public safety to fulfill the duties of this Article and A.R.S. Title 49, Chapter 4.

4. To ascertain compliance with this Article and A.R.S. Title 49, Chapter 4.

C. ADEQ Inspection and Entry for CCR surface impoundments. The Director or a designated representative may enter at reasonable times upon private or public property and the owner or operator shall permit such entry, where a CCR surface impoundment is located, including a CCR surface impoundment under construction, reconstruction, repair, enlargement, alteration, breach, or removal, for any of the following purposes:

1. To enter any establishment or other place maintained by such person where such CCR units are or have been operated;

2. To have access to, and to copy all records relating to CCR units;

3. To inspect any facilities, equipment (including monitoring and control equipment), practices, and operations, relating to CCR units;

4. To inspect, monitor, and obtain samples from such person of any CCR units and monitoring and control equipment; and

5. To record any inspection by use of written, electronic, magnetic and photographic media.

D. Upon receipt of a complaint that a CCR surface impoundment is endangering people or property:

1. The Director shall inspect the CCR surface impoundment unless there is substantial cause to believe the complaint is without merit.

2. The Director shall provide a written report of the inspection to the complainant and the CCR surface impoundment owner.

E. Penalties. A person who violates any CCR facility permit, provision of this Article, or order issued pursuant to a CCR facility permit is subject to civil and/or criminal penalties pursuant to A.R.S. §§ 49-783 and 791, as amended. Nothing in this Article shall be construed to limit the Director's or Attorney General's enforcement powers authorized by law including but not limited to the seeking or recovery of any civil or criminal penalties.

F. A certification statement may be required on written submittals to ADEQ in response to Compliance Orders or in response to information requested pursuant to subsection (B) of this Section. In addition, ADEQ may request in writing that a certification statement appear in any written submittal to ADEQ. The certification statement shall be signed by a person authorized to act on behalf of the company or empowered to make decisions on behalf of the company on the matter contained in the document.

G. The Director shall conduct a CCR surface impoundment safety inspection annually or more frequently for each high hazard potential CCR surface impoundment, triennially for each significant hazard potential CCR surface impoundment, and once every five years for each low hazard potential CCR surface impoundment.

R18-13-1020. Financial Assurance Requirements

A. The owner or operator of a CCR unit shall submit both of the following for each CCR unit within 180 days of CCR program approval:

1. The latest demonstration of financial responsibility made for the CCR facility under 18 A.A.C. 9, Article 2.
2. If not already submitted with a permit application before CCR program approval, the following third-party cost estimates that are representative of regional fair market costs for each CCR unit at the facility within 180 days after CCR program approval:
   a. The estimate for the Cost of Facility Closure that meets the requirements in 40 CFR §§ 257.102 and 257.103, consistent with the closure plans submitted thereunder;
   b. The estimate for the Cost to Ensure Proper Post-Closure Care according to 40 CFR § 257.104, consistent with the post-closure plan submitted thereunder;
   c. The estimate for the Cost to Perform Corrective Action as a result of any known releases from the facility as provided under 40 CFR §§ 257.97 and 257.98 and any compliance schedules in the facility permit.

B. A CCR facility that submits a demonstration under subsection (A)(1) shall update that demonstration to comply with subsection (A)(2) before a CCR facility permit is issued. The owner or operator shall demonstrate financial assurance for the total amounts in

subsection (A)(2) using one or more mechanisms in Article 17 of this Chapter.

C. The cost estimates shall be dated and updated every 3 years and as necessary whenever closure plans or post-closure plans are amended pursuant to §§ 257.102(b)(3) or 257.104(d)(3), or corrective action costs are changed under § 257.98.

R18-13-1021. Fees

A. After CCR program approval, the Department shall send an invoice to each CCR facility and the owner or operator of a CCR facility shall pay to ADEQ an annual registration fee as shown in Table 2. The invoice shall have a due date of the first of a month that is at least 30 days after CCR program approval and the fee shall be due on that date and annually thereafter on the first of that month.

Table 2. Facility Annual Registration Fees

CCR Unit	Annual Fee
CCR Surface Impoundment	$17,450 each
Approved CCR Multi-unit	$21,860
CCR Landfill	$13,150 each
Closed CCR Unit subject to post-closure	$10,200 each

B. When submitting an application for any of the license types in Table 3 below, an owner or operator shall remit to ADEQ an initial application fee as shown in the Table.

Table 3. CCR Facility Permitting Fees

License Type	Initial Fee	Maximum Fee
CCR Facility Permit (new or renewal)	$20,000	$200,000
Major Modification	$10,000	$100,000
Minor Modification	$5,000	$50,000
Administrative Modification	$1,500 flat fee	NA

C. If the total cost of processing the application identified in the Table 3 is less than the

initial fee listed in the Table, the Department shall refund the difference between the total cost and the amount listed in the Table to the owner or operator.

1. Permits and permit modifications. If the total cost of processing the application is greater than the initial fee received plus other amounts paid, the Department shall bill the owner or operator for the difference upon permit approval. The owner or operator shall pay the difference in full before ADEQ issues the permit or modification.
2. Withdrawals. In the event of a withdrawal of the permit application by the owner or operator, if the total costs of processing the application are less than the amount paid, the Department shall refund the difference. If the total costs are greater than the amount paid, the Department shall bill the owner or operator for the difference, and the owner or operator shall pay the difference within 45 days of the date of the bill.

D. For the permitting actions in Table 3, the Department shall provide the owner or operator itemized bills at least quarterly for the expenses associated with evaluating the application and approving or denying the permit or permit modification. The invoice shall be paid within 30 days of receipt. The following information shall be included in each bill:

1. The dates of the billing period;
2. The date and number of review hours itemized by employee name, position type and specifically describing:
    a. Each review task performed,
    b. Each CCR unit involved, and
    c. The hourly rate;
3. A description and amount of review-related costs as described in subsection (E)(2); and
4. The total fees paid to date, the total fees due for the billing period, the date when the fees are due, and the maximum fee for the project.

E. For the permitting actions in Table 3, fees shall consist of processing charges and review-related costs as follows:

1. Processing charges. The Department shall calculate the processing charges using a

rate of $244 per hour, multiplied by the number of review hours, including pre-application meetings with the Department, used to evaluate and approve or deny the permit or permit modification.

2. Review-related costs means any of the following costs applicable to a specific application:
   a. Per diem expenses,
   b. Transportation costs,
   c. Reproduction costs,
   d. Laboratory analysis charges performed during the review of the permit or permit modification,
   e. Public notice advertising and mailing costs,
   f. Presiding officer expenses for public hearings on a permitting decision,
   g. Court reporter expenses for public hearings on a permitting decision,
   h. Facility rentals for public hearings on a permitting decision
   i. Costs related to the public notice required by R18-13-1018.
   j Other reasonable and necessary review-related expenses documented in writing by the Department.
3. Total itemized billings for an application shall not exceed the maximum amounts listed in Table 3 in this Section.
4. Beginning January 1, 2026, the Director shall adjust the amounts in Table 2, Table 3, and subsection (E)(1) above annually by the following method:
   a. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
   b. Round the result from subsection (E)(4)(a) of this Section to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

ARTICLE 17. FINANCIAL ASSURANCE

R18-13-1701. Definitions
R18-13-1703. Financial Demonstrations for CCR Facilities
R18-13-1704. Financial Assurance Mechanisms

ARTICLE 17. FINANCIAL ASSURANCE

R18-13-1701. Definitions

1. "Book net worth" means the net difference between total assets and total liabilities.
2. "Face amount" means the total amount the insurer is obligated to pay under the policy.
3. "Net working capital" means current assets minus current liabilities.
4. "Substantial business relationship" means a pattern of recent or ongoing business transactions to the extent that a guaranty contract issued incident to that relationship is valid and enforceable.
5. "Tangible net worth" means an owner or operator's book net worth, plus subordinated debts, less goodwill, patent rights, royalties, and assets and receivables due from affiliates or shareholders.

R18-13-1703. Financial Demonstrations for CCR Facilities

A. Financial demonstration. The owner or operator of a of a CCR facility for which a financial demonstration is required under this Chapter shall demonstrate financial capability to meet all of the following based on third-party cost estimates that are representative of regional fair market costs:

1. Cost of Facility Closure for all applicable units at the facility,
2. Cost to Ensure Proper Post-Closure Care for all applicable units at the Facility, and
3. Cost to perform any corrective action as a result of known releases at all applicable units at the facility

B. The owner or operator shall:

1. Submit a letter signed by the chief financial officer stating that the owner or operator is financially capable of meeting the costs described in subsection (A);
2. For a state or federal agency, county, city, town, or other local governmental

entity, submit a statement specifying the details of the financial arrangements used to meet the estimated costs described in subsection (A), including any other details that demonstrate how the owner or operator is financially capable of meeting those costs;

3. For other than a state or federal agency, county, city, town, or other local governmental entity, submit the information required for at least one of the financial assurance mechanisms listed in R18-13-1704 that covers the closure, post-closure, and corrective action costs submitted under subsection (A), including:

   a. The selected financial mechanism or mechanisms;

   b. The amount covered by each financial mechanism;

   c. The institution or company that is responsible for each financial mechanism used in the demonstration;

   e. Any other details that demonstrate how the owner or operator is financially capable of meeting the costs described in R18-13-1020(A)(2) or other applicable rules in this Chapter.

R18-13-1704. Financial Assurance Mechanisms

The owner or operator of a CCR facility for which a financial demonstration under R18-13-1703 is required by this Chapter may use any one or a combination of the following mechanisms to cover the financial assurance obligations under R18-13-1703(A):

1. Financial test for self-assurance. If an owner or operator uses a financial test for self-assurance, the owner or operator shall not consolidate the financial statement with a parent or sibling company. The owner or operator shall make the demonstration in either subsection (1)(a) or (b) and submit the information required in subsection (1)(c):

   a. The owner or operator may demonstrate:

      i. One of the following:

         (1) A ratio of total liabilities to net worth less than 2.0 and a ratio of current assets to current liabilities greater than 1.5;

         (2) A ratio of total liabilities to net worth less than 2.0 and a

ratio of the sum of net annual income plus depreciation, depletion, and amortization to total liabilities greater than 0.1; or

(3) A ratio of the sum of net annual income plus depreciation, depletion, and amortization to total liabilities greater than 0.1 and a ratio of current assets to current liabilities greater than 1.5;

ii. The net working capital and tangible net worth of the owner or operator each are at least six times the closure, post-closure and corrective action cost estimates; and

iii. The owner or operator has assets in the U.S. of at least 90 percent of total assets or six times the closure, post-closure and corrective action cost estimates; or

b. The owner or operator may demonstrate:

i. The owner or operator's senior unsecured debt has a current investment-grade rating as issued by Moody's Investor Service, Inc.; Standard and Poor's Corporation; or Fitch Ratings;

ii. The tangible net worth of the owner or operator is at least six times the closure, post-closure and corrective action cost estimates; and

iii. The owner or operator has assets in the U.S. of at least 90 percent of total assets or six times the closure, post-closure and corrective action cost estimates; and

c. The owner or operator shall submit:

i. A letter signed by the owner or operator's chief financial officer that identifies the criterion specified in subsection (1)(a) or (b) and used by the owner or operator to satisfy the financial assurance requirements of this Section, an explanation of how the owner or operator meets the criterion, and certification of the letter's accuracy, and

ii. A statement from an independent certified public accountant verifying that the demonstration submitted under subsection (1)(c)(i) is accurate based on a review of the owner or operator's financial statements for the latest completed fiscal year or more

recent financial data and no adjustment to the financial statement is necessary.

2. Performance surety bond. The owner or operator may use a performance surety bond if all the following conditions are met:

   a. The company providing the performance bond is listed as an acceptable surety on federal bonds in Circular 570 of the U.S. Department of the Treasury;

   b. The bond provides for performance of all the covered items listed in R18-13-1703(A) by the surety, or by payment into a standby trust fund of an amount equal to the penal amount if the owner or operator fails to perform the required activities;

   c. The penal amount of the bond is at least equal to the amount of the cost estimate developed in R18-13-1703(A) if the bond is the only method used to satisfy the requirements of this Section or a pro-rata amount if used with another financial assurance mechanism;

   d. The surety bond names the Arizona Department of Environmental Quality as beneficiary;

   e. The original surety bond is submitted to the Director;

   f. Under the terms of the bond, the surety is liable on the bond obligation when the owner or operator fails to perform as guaranteed by the bond; and

   g. The surety payments under the terms of the bond are deposited directly into the Standby Trust Fund.

3. Certificate of deposit. The owner or operator may use a certificate of deposit if the following conditions are met:

   a. The owner or operator submits to the Director one or more certificates of deposit made payable to or assigned to the Department to cover the owner or operator's financial assurance obligation or a pro-rata amount if used with another financial assurance mechanism;

   b. The certificate of deposit is insured by the Federal Deposit Insurance Corporation and is automatically renewable;

c. The bank assigns the certificate of deposit to the Arizona Department of Environmental Quality;

d. Only the Department has access to the certificate of deposit; and

e. Interest accrues to the owner or operator during the period the owner or operator gives the certificate as financial assurance, unless the interest is required to satisfy the requirements in R18-13-1703(A).

4. Trust fund. The owner or operator may use a trust fund if the following conditions are met:

a. The trust fund names the Arizona Department of Environmental Quality as beneficiary, and

b. The trust is initially funded in an amount at least equal to:

i. The cost estimate for the items submitted under R18-13-1703(A),

ii. The amount specified in a compliance schedule approved in a CCR facility permit, or

iii. A pro-rata amount if used with another financial assurance mechanism.

5. Letter of credit. The owner or operator may use a letter of credit if the following conditions are met:

a. The financial institution issuing the letter is regulated and examined by a federal or state agency;

b. The letter of credit is irrevocable and issued for at least one year in an amount equal to the cost estimate submitted under R18-13-1703(A) or a pro rata amount if used with another financial assurance mechanism. The letter of credit provides that the expiration date is automatically extended for a period of at least one year unless the issuing institution has canceled the letter of credit by sending notice of cancellation by certified mail to the owner or operator and the Director 90 days in advance of cancellation or expiration. The owner or operator shall provide alternate financial assurance within 60 days of receiving the notice of expiration or cancellation;

c. The financial institution names the Arizona Department of Environmental

Quality as beneficiary for the letter of credit; and

d. The letter is prepared by the financial institution and identifies the letter of credit issue date, expiration date, dollar sum of the credit, the name and address of the Department as the beneficiary, and the name and address of the owner or operator.

6. Insurance policy. The owner or operator may use an insurance policy if the following conditions are met:

a. The insurance is effective before signature of the permit or substitution of insurance for other extant financial assurance instruments posted with the Director;

b. The insurer is authorized to transact the business of insurance in the state and has an AM BEST Rating of at least a B+ or the equivalent;

c. The owner or operator submits a copy of the insurance policy to the Department;

d. The insurance policy guarantees that funds are available to pay costs for all items listed under R18-13-1703(A) without a deductible. The policy also guarantees that once cleanup steps begin that the insurer will pay out funds to the Director or other entity designated by the Director up to an amount equal to the face amount of the policy;

e. The policy guarantees that while closure, post-closure, or corrective action activities are conducted the insurer will pay out funds to the Director or other entity designated by the Director up to an amount equal to the face amount of the policy;

f. The insurance policy is issued for a face amount at least equal to the current cost estimate submitted to the Director for performance of all items listed under R18-13-1703(A) or a pro-rata amount if used with another financial assurance mechanism. Actual payments by the insurer will not change the face amount, although the insurer's future liability is reduced by the amount of the payments, during the policy period;

g. The insurance policy names the Arizona Department of Environmental Quality as additional insured;

h. The policy contains a provision allowing assignment of the policy to a successor owner or operator. The transfer of the policy is conditional upon consent of the insurer and the Department; and

i. The insurance policy provides that the insurer does not cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy, at a minimum, provides the insured with a renewal option at the face amount of the expiring policy. If the owner or operator fails to pay the premium, the insurer may cancel the policy by sending notice of cancellation by certified mail to the owner or operator and to the Director 90 days in advance of the cancellation. If the insurer cancels the policy, the owner or operator shall provide alternate financial assurance within 60 days of receiving the notice of cancellation.

7. Cash deposit. The owner or operator may use a cash deposit if the cash is deposited with the Department to cover the financial assurance obligation under R18-13-1703(A).

8. Guarantees.

a. The owner or operator may use guarantees to cover the financial assurance obligations under R18-13-1703(A) if the following conditions are met:

i. The owner or operator submits to the Department an affidavit certifying that the guarantee arrangement is valid under all applicable federal and state laws. If the owner or operator is a corporation, the owner or operator shall include a certified copy of the corporate resolution authorizing the corporation to enter into an agreement to guarantee the owner or operator's financial assurance obligation;

ii. The owner or operator submits to the Department documentation that explains the substantial business relationship between the guarantor and the owner or operator;

iii. The owner or operator demonstrates that the guarantor meets conditions of the financial mechanism listed in subsection (1). For purposes of applying the criteria in subsection (1) to a guarantor,

substitute "guarantor" for the term "owner or operator" as used in subsection (1);

iv. The guarantee is governed by and complies with state law;

v. The guarantee continues in full force until released by the Director or replaced by another financial assurance mechanism listed under subsection (1);

vi. The guarantee provides that, if the owner or operator fails to perform closure, post-closure care or corrective action of a facility covered by the guarantee, the guarantor shall perform or pay a third party to perform closure, post-closure care or corrective action, as required by the permit, or establish a fully funded trust fund as specified under subsection (4) in the name of the owner or operator; and

vii. The guarantor names the Arizona Department of Environmental Quality as beneficiary of the guarantee.

b. Guarantee reporting. The guarantor shall notify or submit a report to the Department within 30 days of:

i. An increase in financial responsibility during the fiscal year that affects the guarantor's ability to meet the financial demonstration;

ii. Receiving an adverse auditor's notice, opinion, or qualification; or

iii. Receiving a Department notification requesting an update of the guarantor's financial condition.

9. An owner or operator may use a financial assurance mechanism not listed in subsections (1) through (8) if approved by the Director.

B. Loss of coverage. If the Director believes that an owner or operator will lose financial capability under this Section, the owner or operator shall, within 30 days from the date of receipt of the Director's request, submit evidence that the financial demonstration under R18-13-1703 is being met or provide an alternative financial assurance mechanism.

C. Financial assurance mechanism substitution. An owner or operator may substitute one financial assurance mechanism for another if the substitution is approved by the Director through a permit modification or other Department approval.

ECONOMIC, SMALL BUSINESS AND CONSUMER IMPACT STATEMENT

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. SOLID WASTE MANAGEMENT

ADEQ separated the economic, small business, and consumer impacts of these rules into two major categories: 1) Those parts of the rules that would enact into Arizona rules nonprocedural standards that already apply; and 2) Additional requirements that would apply for the first time at some point after these rules are effective.

Existing requirements. These rules enact already existing standards from the United States Environmental Protection Agency (EPA) and the Arizona Dept. of Water Resources (ADWR) into ADEQ rules. ADEQ believes that where these CCR rules match existing standards, they do not have any direct negative impact on the four facilities in Arizona that will require a CCR facility permit. There are two groups of already existing standards:

1) 40 CFR 257, subpart D, for all CCR units. There will be no impact here because this rule is neither more or less stringent than this federal subpart for nonprocedural standards, and the Arizona CCR facilities are already subject to those federal standards.

2) Arizona Dept. of Water Resources (ADWR) rules at 12 A.A.C. 15, Article 12, that apply to CCR surface impoundments. Although these standards are stricter than 40 CFR 257, subpart D, there will be no impact here because surface impoundments at CCR facilities have already been subject to those ADWR rules, including the requirements in R18-13-1010.01 related to getting a license from ADWR.

ADEQ believes that because ADEQ will be replacing other agencies as the enforcing agency for standards that will remain the same, the rules will have a positive impact on the CCR facilities as well as the local community by enabling communication with a single, local agency. As an example, when cycling down and closing CCR units, a month delay can cost hundreds of thousands of dollars. A phone call to a state employee, who is not responsible for facilities in multiple states, and that may have already visited the site, is virtually certain to result in less delay. This advantage for CCR facilities will be offset in part by the permit processing and annual registration fees in this rule.

Additional requirements. Pursuant to statute, these rules create requirements for CCR facilities additional to those already existing in the following areas:

1) Aquifer protection standards developed under ADEQ statutes and rules for non-CCR wastestreams. (see R18-13-1005(B) and (F)). Although these standards are additional to 40 CFR 257, subpart D, there will be little to no impact here because CCR facilities were already subject to these standards under their ADEQ Aquifer Protection Permit (APP) and the final rule limits the stringency of any requirements in this area to what was previously required.

2) New ADEQ permitting requirements. There are currently no permitting requirements for CCR units in Arizona. The requirement that CCR units be covered under an APP was removed in 2022 by Ch. 178 as a consequence of their being regulated under 40 CFR 257, subpart D. ADWR currently requires licenses for CCR surface impoundments because they are classified as dams. The new permitting requirements are contained in R18-13-1010 through R18-13-1021.The ADWR licensing requirement for CCR surface impoundments ends when an impoundment is covered by an ADEQ permit under an EPA approved program. See A.R.S. § 45-1201(1)(f).

Federal law requires that CCR units be eventually covered under either a federally approved state program or the federal permit program. In February, 2020, EPA proposed its permitting program in a new 40 CFR 257, subpart E, but it is currently on an uncertain timetable. There is no federal or state requirement that ADEQ match the federal permitting rules that will be adopted in subpart E. However, ADEQ has made its permitting rules match EPA's proposed rules where possible to avoid unintended extra impact should both apply at the same time when final. This strategy also increases confidence in EPA's evaluation of the Arizona program. In some areas however, ADEQ's own permitting requirements may exceed, or at least be additional to, what will be required under future EPA permitting requirements for non-participating states. These extra requirements may impact Arizona's CCR facilities.

3) Financial assurance. There is no federal requirement that CCR facilities provide financial assurance. However, state authorizing legislation for this rule has required it for Arizona CCR facilities, and it is included in R18-13-1020. ADEQ notes that these facilities were already meeting financial assurance requirements for their CCR units under previous APPs,

and that the legislature has indicated its intent that ADEQ recognize this financial assurance, "in whole or in part." (See A.R.S. § 49-770(D)) Thus, any impacts of the financial assurance requirement will be lessened to some degree. However, ADEQ expects that the impact of financial assurance on CCR facilities may be greater for CCR units than what was required for their APP because of the more detailed closure, post-closure and corrective action requirements that exist in 40 CFR 257, subpart D.

4) Annual registration fees and permit processing fees. These fees are set out in R18-13-1021. Permit processing fees could begin after this rule is effective if any facility opts to apply early, although ADEQ expects most of these impacts to begin after CCR program approval. The annual registration fees for CCR facilities begin after CCR program approval. The annual fees are designed to cover ADEQ's non-permit related costs in administering the state CCR program. EPA proposed no fees in its CCR permit program.

Cost benefit analysis. ADEQ estimated the additional annual cost to implement the CCR permit program at $158,760, separate from the cost of processing permits. ADEQ based the annual registration fees on this estimate. Three additional full-time equivalent employees (FTEs) were estimated to be necessary to implement the CCR program: an inspector, a permit writer, and a geotechnical engineer. All but the permit writer have already been hired. All of the FTE permit writer's time on CCR will be billed processing permits.

Under A.R.S. § 49-104(B)(17), ADEQ fees must "be fairly assessed and impose the least burden and cost to the parties subject to the fees." ADEQ believes its estimate of the annual cost of the program not covered by permit processing fees is the lowest possible and therefore imposes the least burden and cost. Further, the annual registration fees in R18-13-1021(A) are based on the number and complexity of CCR units at each facility. This formula was arrived at after discussion with the affected stakeholders, and it is roughly proportional to the amount of time ADEQ will likely spend relative to each facility. In ADEQ's judgment, it is the best way to fairly assess the annual registration fees.

The hourly rate in R18-13-1021(E)(1) covers "the cost of administrative services and other expenses associated with evaluating" permits. It is based not only on the state's total cost for the employees billing the hours, but also a portion of the operational overhead of the Solid Waste section's employees not directly assigned to CCR facilities full time, such as

supervisors, other engineers, and administrative staff. ADEQ estimated the total number of hours the permit writer would be able to bill annually after comparing its experience processing hazardous waste permits which are similar in length and complexity and factoring in annual leave, sick leave, required training and other types of nonbillable time.

As a consequence of ADEQ setting its annual registration and permit processing fees at a level imposing the least burden on stakeholders, ADEQ had to plan for possible increases in its costs due to inflation. An annual adjustment to these fees based on a regional consumer price index was added at R18-13-1021(E)(4) in order for ADEQ to maintain its obligations under the program while keeping the cost at the least burdensome level.

The overall cost to ADEQ is expected to be balanced by the fees it collects. As explained earlier, there are significant potential benefits to both the local community and CCR facilities to having a single local agency handle all aspects of the federal CCR program. In spite of the fees necessary to cover the cost of the program, Arizona's CCR facilities have supported ADEQ's development of a state permit program as early as 2018, when CCR permitting was planned to be added to the Aquifer Protection Permit in ADEQ's Water Quality Division. ADEQ believes the overall benefits for all parties involved exceed the overall costs.

Phoenix, AZ 85007

RE: Notice of Proposed Rulemaking dated July 12, 2024
Comments on Arizona Coal Combustion Residuals Permit Program

Dear Mr. Lewandowski:

Arizona Electric Power Cooperative, Inc. (AEPCO) appreciates the opportunity to comment on the above-referenced proposed rulemaking for a state CCR program (the Arizona CCR Program or Proposed Rule). As a future permittee, AEPCO has a direct stake in an effective, workable Arizona CCR Program. Thank you for considering AEPCO's perspective on Proposed Rule through our lens of experience complying with the federal coal combustion residuals rule (the CCR Rule).

Introduction

AEPCO is a not-for-profit generation and transmission electric utility cooperative headquartered in Benson, Arizona. AEPCO's purpose is to generate electricity and transmit it to distribution cooperatives that distribute it to end-use member-consumers in southern Arizona, western New Mexico, northwestern Arizona, and California. AEPCO provides wholesale energy and services to six distribution cooperatives through approximately 866 miles of wholly or partially owned transmission lines. AEPCO is owned, operated, and governed by its members who use the energy and services AEPCO provides. The member cooperatives to which AEPCO provides energy serve approximately 420,000 residential, agricultural, and industrial member-consumers. AEPCO is committed to balancing environmental stewardship with the cooperative's mission to provide reliable, affordable electricity to its members. AEPCO appreciates the Arizona Department of Environmental Quality's (ADEQ) past consideration of pricing to make the state program more affordable for a not-for-profit electric cooperative with cost-sensitive, rural end users.

AEPCO owns and operates Apache Generating Station (Apache), located in Cochise, Arizona, about 80 miles east of Tucson and about 25 miles northeast of Benson, Arizona. AEPCO

Arizona Electric Power Cooperative, Inc. • Sierra Southwest Cooperative Services, Inc.
P.O. Box 670 • 1000 S. Highway 80 • Benson, Arizona 85602 • (520) 586-3631 Phone • www.azgt.coop

operates a Combustion Waste Disposal Facility (CWDF) at Apache, which consists of a multi-unit system of four CCR impoundments (Ash Ponds 1-4) and Scrubber Pond 2. Ash Ponds 1-4 and Scrubber Pond 2 are subject to the federal CCR Rule, 40 CFR Part 257 *et seq.* Two separate ponds, Scrubber Pond 1 and an Evaporation Pond are subject to the Arizona Aquifer Protection Permit (APP) Program and are not presently subject to the federal CCR Rule. Ash Ponds 1-4 and Scrubber Pond 2 would be subject to the Arizona CCR Program.

Comments on the Proposed Rule

I. AEPCO Supports Regulation of CCR Through a State Program.

AEPCO continues to support the development of an Arizona CCR Program. We acknowledge ADEQ's efforts to partner with the regulated community, public stakeholders, and U.S. EPA to develop the Program. AEPCO believes that a state program would be the most effective means to regulate CCR facilities in Arizona. Our state has the expertise and knowledge of the unique geologic and hydrology of the arid west. ADEQ has regulated Apache's CCR units and other CCR impoundments in the state for more than 30 years under the APP program. ADEQ is in the best position to navigate issues affecting the program such as declining groundwater levels, irrigation needs, and specialized features such as the Willcox Playa near Apache. Groundwater monitoring wells are often much deeper and may face operational issues due to declining groundwater levels. ADEQ has worked hand-in-hand with utilities to effectively and safely manage CCR. We believe the Arizona CCR Program is an opportunity to continue these collaborative efforts.

II. State Approvals of Certain CCR Activities May Unsettle CCR Rule Compliance.

AEPCO continues to have concerns regarding the implementation of ADEQ approvals of Alternate Source Demonstrations (ASDs). The Proposed Rule includes a process for preparing and submitting an ASD to ADEQ, with the potential for a state disapproval:

> If the owner or operator completes a successful demonstration, as supported by a certification from a qualified professional engineer, within the 90-day period, the owner or operator may continue with a detection monitoring program, **[unless such demonstration is subsequently disapproved by the Director**.] If a successful demonstration was not completed within the 90-day period [**or if the Director disapproves the demonstration**,] the owner or operator shall initiate an assessment monitoring program as required under § 257.95.[1]

At present, the federal ASD process is self-implementing. It does not require an approval by EPA or another party. Importantly, a valid ASD completely changes the course of source compliance. If an ASD is not in place within a defined time period, then a statistically significant

[1] 30 AZ Register, Iss. 28 at 2279, 2291 (discussing and citing R18-13-1005(C) (emphasis added)).

increase (SSI) will cause a transition into Assessment Monitoring. If ADEQ holds disapproval power over an ASD, a belated determination would cause disorder in the designed transitions within the groundwater monitoring and sampling program. ASDs may be "disapproved" at any point - even years after being finalized.

The Proposed Rule summary suggests that since a facility must provide ADEQ a notice within seven days of the decision to prepare an ASD, timing is not an issue for ADEQ to act quickly. 30 AZ Register, Iss. 28 at 2279. We acknowledge that prior notice may help ADEQ plan for a future ASD review; however, the notice would not provide the technical lines of evidence and data that ADEQ must vet. AEPCO does not believe that prior notice remedies its timing concern.

III. A Straightforward Appeal Process for ASDs Is Needed.

The Proposed Rule provides no clear path for appeals of ASDs. R18-13-1013 provides for appeals of a permitting decision. ASDs are not directly addressed. ADEQ should consider clarifying text to indicate that an ASD Disapproval is a final agency action subject to review immediately. A time frame for appeal should be offered, as well as an avenue to request the agency "stay" the ASD denial pending review. Since ASDs have immediate consequences, a clear process would benefit both the permittee and the agency.

IV. Permit Modifications are Unnecessary and Disruptive for Site Maintenance Activities.

AEPCO supports a permit modification program that addresses true programmatic changes. ADEQ and sources should focus resources on the essential compliance and monitoring elements for the CCR program. Routine maintenance and equipment changes should be excluded. AEPCO regularly inspects its regulated units and must swiftly correct any equipment deficiencies to stay on schedule for sampling events and regular inspection requirements. *See* 40 CFR § 257.94 (containing regular sampling requirements). In fact, the federal CCR Rule even imposes direct time pressure on AEPCO in some scenarios. *See, e.g.,* 40 CFR § 257.83(b)(5) ("If a deficiency or release is identified during an inspection, the owner or operator must remedy the deficiency or release *as soon as feasible* and prepare documentation detailing the corrective measures taken" (emphasis added)).

AEPCO continues to have concerns that the text of R18-13-1017(F) (Modification of a CCR Facility Permit) could be interpreted to have a wide-scope. That provision refers to "nonmajor alternations, additions, or changes in the operation or condition of the permitted facility" as minor permit modification. AEPCO specifically suggests revision of section 7 to clarify that pieces of equipment that make-up the monitoring well should not trigger a permit revision: "Replace monitoring equipment, including a well, if the replacement results in equal or greater monitoring effectiveness, **but not including routine maintenance or replacement of well components and related equipment**." R18-13-1017(F)(7) (bolded red font included suggested addition).

Repairs or replacements of normal "wear and tear" items, such as a bladder pump in a monitoring well or a water quality parameter instrument, like a portable pH meter, have no place in a permitting scheme. These items do not impact the core elements of the program. Facilities must have some leeway to expeditiously address routine equipment needs without implicating a permitting change.

V. Pre-State Permit Program Certifications Should Be Preserved.

AEPCO recommends that ADEQ clarify that pre-state program qualified professional engineer (QPE) certifications do not require state approvals. The Proposed Rule recognizes that QPE certifications are used extensively in CCR compliance. It was never AEPCO's understanding that the state program would be retroactive in scope. However, the preamble states that the rule will require "review and approval of those [QPE] certifications by ADEQ." 30 AZ Register, Iss. 28 at 2277. The self-implementing federal CCR program required AEPCO to undertake a substantial body of compliance work to set up the CCR program. Some of these activities began as early as 2015 – almost ten years ago. It would be counterproductive and time intensive for ADEQ and AEPCO to systematically revisit these certifications. It would upend the program. AEPCO requests that ADEQ clarify that ADEQ approvals shall be prospective only.

VI. Public Meeting Requirements Should be Revised.

AEPCO supports the engagement of local communities and stakeholders, although we request that ADEQ reconsider the timing and style of the public meeting in R18-13-1010(C). That regulation requires that the owner or operator of the facility hold a public meeting to inform the community about the permit before the application is submitted for an initial or renewed CCR facility permit. This timing is too early. AEPCO supports shifting the meeting to coincide with the public notice informing the public that the written application has been received by ADEQ. This delay would provide the following advantages: (1) the source and ADEQ will have more time to fully develop the application, work through terms and conditions of the proposed permit, and navigate site-specific issues; (2) the meeting will offer the public more robust content on which to provide feedback, after source and agency coordination; and (3) the public feedback will be more meaningful and applicable to the project at hand. Indeed, meeting before the project is fully defined is likely to create confusion for the community and generate feedback that may not be productive. In addition, AEPCO supports a meeting style in which the regulated entity and ADEQ present the application together. This is consistent with past practices in other permitting frameworks. In summary, AEPCO believes a shared meeting approach, after the permit application is submitted, will promote consistency and coordination between the agency, regulated entity, and the public.

Conclusion

AEPCO appreciates the opportunity to offer suggestions regarding the Arizona CCR Program. We look forward to further coordination and discussion with the agency. Please reach

out to Michelle Freeark at 520-586-5122 or mfreeark@azgt.coop if you have any questions or wish to discuss our recommendations further.

Re: Comments on Proposed Rulemaking - Arizona Coal Combustion Residuals Rule

Dear Mr. Lewandowski:

Arizona Public Service Company ("APS") appreciates the opportunity to submit comments regarding the Arizona Department of Environmental Quality's (ADEQ's) Arizona Coal Combustion Residuals (CCR) Rule, specifically amendments to *Arizona Administrative Code (AAC) Title 18, Chapter 13, Article 10 (Coal Combustion Residuals) and Article 17 (Financial Assurance)* published in an Arizona Administrative Register Notice of Proposed Rulemaking dated July 12, 2024 (the Proposed Rules).

First and foremost, APS continues to be supportive of ADEQ's work towards an EPA-authorized CCR Program in Arizona as well as ADEQ's efforts to synchronize the future Arizona CCR program with the forthcoming federal CCR permit program.

Our remaining comment on the proposed rule is associated with the owner/operator-led public meeting held in advance of submitting an initial or renewal permit application per R18-13-1010.C. APS recommends that ADEQ lead public engagement to ensure that the content of public meetings aligns with the agency's requirements, promotes the community's engagement with an independent mediator in discussions, and allows the public to correspond directly with the authority responsible for regulating the subject compliance activities. Further, APS recommends that the meeting occur after preparation of the draft permit so that the public can be informed of and be provided the opportunity to comment in person on the controls proposed to ensure regulatory compliance.

If you have any questions or would like to discuss the information provided in more detail, please contact Natalie Chrisman Lazarr via email at natalie.chrismanlazarr@aps.com.

Thank you,

Phil Smithers
Director, Environmental, Safety, and HOP

Re: Notice of Rulemaking Docket Opening: 30 A.A.R. 2026, June 7, 2024- State's adoption of proposed coal combustion residuals regulations.

Mr. Lewandowski:

Sierra Club, Western Clean Energy Campaign are submitting these written comments in the above-referenced docket regarding the Arizona Department of Environmental Quality's (ADEQ) proposed adoption of state coal combustion residuals (CCR) regulations that would apply in lieu of the Environmental Protection Agency's (EPA) coal ash regulations at 40 C.F.R. 257, Subpart D, which was published in the Arizona Administrative Register on July 12, 2024, Vol. 30, Issue 28. Please accept the following comments with regard to the proposed state coal ash regulations.

As an overarching matter, ADEQ should not assert primacy over coal ash regulation and enforcement. The Arizona legislation authorizing adoption of coal ash regulations states that "[t]he director ***may*** adopt rules to establish and operate a coal combustion residuals program…" A.R.S. § 49-891(A). Adoption of such rules is discretionary, not mandatory.

ADEQ is already understaffed. Moreover, EPA has begun a significant effort to enforce the federal requirements found in 40 C.F.R. Part 257, Subpart D. To protect public health, ADEQ should abandon its effort to assume primacy over coal ash regulation and enforcement and leave the implementation and enforcement of the CCR program to the federal government.

We also offer the following additional comments.

1. The Legacy Rule amendments of May 8, 2024.

ADEQ's proposed state coal ash regulations state that the proposed rule "would incorporate EPA's 40 CFR 257, Subpart D, revised by EPA as of December 14, 2020." Ariz. Admin. Reg., Vol. 30, No. 28 at 2277. However, A.R.S. § 41-1028(B) requires that any Arizona regulation that incorporates by reference any federal regulation "shall state that the rule does not include any later amendments or editions of the incorporated matter."

On May 8, 2024, EPA amended 40 CFR 257, Subpart D by adopting the CCR "Legacy Rule," which regulates non-operating coal ash units that originally fell outside of the 2015 version of the Subpart D regulations. EPA's recent "Legacy Rule" can be found at 89 Fed. Reg. 38950 (May 8, 2024). The preamble to ADEQ's proposed regulations and the proposed regulations themselves are silent as to the existence of EPA's Legacy Rule. The proposed ADEQ regulations do not specifically state that the rule "does not include any later amendments or editions of the incorporated matter," which would include the Legacy Rule amendments. Although some of ADEQ's proposed regulations refer to Subpart D "as revised December 14, 2020 (and no future editions)," we ask that ADEQ specifically state that the proposed CCR regulations do *not* include matters covered by EPA's 2024 CCR Legacy Rule amendments to Subpart D.

Earthjustice has identified at least two coal ash units in Arizona that may be subject to the CCR Legacy Rule.[1] These coal units appear to be coal ash landfills both located on the Coronado power plant site. Because Arizona's proposed regulations would not incorporate EPA revisions to Subpart D

[1] Earthjustice, Toxic Coal Ash in Arizona: Addressing Coal Plants' Hazardous Legacy (May 3, 2023), available at https://earthjustice.org/feature/coal-ash-states/arizona#unregulated.

after December 14, 2020, it appears Arizona is not seeking to regulate any legacy units and instead such units would remain regulated by EPA's Subpart D regulations. Please confirm that any "legacy units" in Arizona would remain regulated by EPA under the newly revised Subpart D.

2. Un-approvable provisions less stringent than Subpart D.

In several respects, ADEQ's proposed regulations are less stringent than the December 14, 2020 version of Subpart D and thus cannot be approved by EPA. For example, ADEQ's proposed regulations would amend 40 C.F.R. 257.73(a)(4), 40 C.F.R. 257.73 (d)(1)(iv), 40 C.F.R. 257.74(a)(4), and 40 C.F.R 257.74(d)(1)(iv) by deleting the words "not to exceed a height of 6 inches above the slope of the dike." The deletion of this language makes the proposed rule less stringent than the federal rule with regard to structural integrity requirements for existing and lateral expansions of CCR surface impoundments. Because the proposed language is less stringent, it is not approvable by EPA. In the event ADEQ proceeds to promulgate these regulations, please revise the regulations to fully incorporate all requirements of 40 C.F.R. 257.73 and 257.74.

3. The definition of "minor modification" is overly broad.

Section R18-13-1017 F. of the proposed regulations contains an overly broad definition of "minor permit modification" that would deny the public the opportunity to comment on and appeal important changes to a CCR permit. For example, the following significant permit modifications would be considered "minor" under the proposed regulations: changes to Aquifer Water Quality Standards or Maximum Contaminant Levels "which serve as the underlying basis for a permit condition"; changes in the statistical method for evaluating groundwater monitoring data; changes to groundwater sampling and analysis frequency; assessment of corrective measures; changes to approved groundwater monitoring systems; changes to interim or final compliance dates; making "material changes to the corrective action requirements"; and modification of a CCR unit "including physical changes."

By their very definition, these modifications are "material," "major," and/or "serve as the underlying basis for a permit condition." As such, the type of permit modifications identified above must be considered "major modifications" of a CCR permit requiring public notice, public comment, and an opportunity for public challenge.

Finally, in an early budget request for running the program and prior to passage of the authorizing legislation, ADEQ indicated that it hoped to avoid the citizen suit provisions of the Resource Conservation and Recovery Act (RCRA) by assuming control of the program.[2] While ADEQ later backed off on that statement and modified its request, we remain concerned, as Arizona's citizen enforcement provisions (*see* A.R.S. § 49-264) are so weak that they are almost never used. Arizona's citizen enforcement provisions allow the director of ADEQ to prevent a citizen suit from moving forward merely by asserting that no violation occurred. If ADEQ's proposed regulations are finalized, the rules should clarify that the citizen enforcement provisions of RCRA apply to the CCR program. The current lack of clarity about citizen enforcement is one of the reasons we oppose state primacy over the CCR program.

Thank you for the opportunity to comment on these proposed regulations.

Sincerely,

Sandy Bahr

RE: State's adoption of proposed coal combustion residuals regulations
Notice of Rulemaking Docket Opening: 30 A.A.R. 2026, June 7, 2024

Mr. Lewandowski,

It has come to our attention that the Arizona Department of Environmental Quality (ADEQ) is proposing to take over responsibility for the state of Arizona for Coal Combustion Residual (CCR) regulation, rather than maintaining the current practice of the U.S. Environmental Protection Agency (EPA). As you know, EPA is the regulatory agency responsible for ensuring compliance by utilities, and our community is very supportive of continuing to ensure the level of protection EPA regulations provide to our community's safety and health.

Joseph City is considered a Coal Impacted Community as the Cholla Power Plant, and its attendant ponds and coal ash pits are located within two miles from our community border (Figure 1). While the Cholla Power Plant will close in 2025, the CCR or ash will remain in our community forever with the potential to expose our citizens to airborne toxins and water pollutants without adequate monitoring and protections in place.

Therefore, it is in the best interests of our community, its children and citizens that the strongest possible CCR regulations are implemented. Continual, robust monitoring of the ash pond in perpetuity will be necessary to ensure containment issues are not developing for these waste products. For these reasons, we ask that the state not take over the CCR program unless it can assure citizens of this state that Arizona compliance regulations will not be weaker or more permissible in any respect than current federal regulation.

As the ADEQ has historically not had responsibility for designing, implementing and enforcing a CCR program to date, we are concerned that the state may not have the staffing and expertise comparable to the experience and resources of the federal EPA. In addition, the state experiences budget deficits in many years, resulting in budget cuts to state agencies. Given this, how can the ADEQ ensure that adequate funding will be available to administer this program?

Figure 1. Joseph City (dotted line) and Coal Ash Pond (red circle) Geographic Boundaries

We also believe that members of the community should have the right and ability to seek legal remedies if situations arise where utilities are not complying with established regulations. According to a 2021 *Arizona Republic* news article,[1] when the change from federal to state jurisdiction for coal ash laws was first requested by utilities, a provision to allow for citizen lawsuits was not included. As we don't know what may happen in the future with such a significant waste site, it is imperative that the State of Arizona and ADEQ provide an effective and efficient process for citizen concerns to be addressed through a comprehensive and thorough review.

Joseph City and surrounding communities are working to address the impacts of losing the Cholla Power Plant, a significant, regional employer. Economic redevelopment and attraction of new industries and families will be impacted if enforcement of CCR becomes lax or if pollution is allowed to migrate from the site. Our communities have provided the land, water and labor that

[1] State regulators want to run coal ash program after ask from utilities (azcentral.com)

provided electricity to the state for decades. In return, we are due the strongest possible CCR regulation to protect the health and prosperity of our families.

Thank you for considering these comments.

Regards,

Bryan Fields

RE: SRP Comments on ADEQ's Proposed Rulemaking to Establish and Operate a Coal Combustion Residuals Permitting Program for Arizona

Dear Mark Lewandowski,

Salt River Project Agricultural Improvement and Power District (SRP) owns and operates the Coronado Generating Station (CGS), which has three Coal Combustion Residuals (CCR) units covered by the requirements of the U.S Environmental Protection Agency's 2015 CCR rule. The units include an active surface impoundment (Evaporation Pond), an active dry landfill (Ash Disposal Landfill), and a closed surface impoundment (Ash Slurry Settling Ponds). SRP completed closure of the Ash Slurry Settling Ponds in accordance with the CCR rule and Aquifer Protection Permit (APP) program requirements on April 29, 2019. SRP appreciates the opportunity to provide comments on the Arizona Department of Environmental Quality (ADEQ) draft CCR rule language and appreciates the work conducted by the agency to support this rulemaking. This rulemaking will allow ADEQ to establish and operate a CCR permitting program for Arizona. SRP previously submitted comments on draft rule language via ADEQ's comment portal on January 30, 2024. SRP has also reviewed the current rule language dated July 12, 2024, and SRP respectfully offers the following comments.

Permit Application Requirements for CCR Facilities

Section R18-13-1010.B.2 of the draft rule requires submittal of an application for a new CCR unit or lateral expansion of a CCR unit and issuance of a permit (or permit modification) authorizing construction before construction may begin. SRP requests that ADEQ revise this section to allow construction of proposed facilities to proceed at risk while a facility goes through a new facility permitting process. This practice aligns with the agency's APP program regulations and allows companies to proceed with developing new capacity in a shorter time period when needed.

Section R18-13-1010.C of the draft rule requires the owner or operator to hold a public meeting to solicit questions from the community and inform the community of a proposed permit application *prior to* submitting an application for an initial or renewed CCR facility permit. Additionally, the owner or operator must notify ADEQ of this meeting at least 30 days prior to the pre-application public meeting, provide "adequate" public notice for the meeting and submit a summary of the meeting including a list of attendees and any voluntarily submitted addresses to the Department.

SRP supports public participation in the permitting process, however, ADEQ has not provided the legal basis for these requirements, which impose a new regulatory burden on permittees. As ADEQ is aware, CCR permits will only be issued at long-existing facilities that have been under ADEQ oversight for many years. These proposed and novel requirements in section R18-13-1010.C for public involvement before formal agency engagement go beyond the federal regulations applicable to CCR units. In addition, the requirements are a marked departure from the public involvement requirements under other programs administered by ADEQ.

The requirements in R18-13-1010.C also have the potential to create confusion for the public. Public involvement is required when the *agency* proposes to take an action, not an applicant. It is not until an applicant has engaged ADEQ in the pre-application process that ADEQ defines the project permit and facility requirements. Engaging the public before a project is fully defined may cause confusion and extend permitting timelines.

SRP also notes that the draft rule includes opportunities for public participation that will better serve the public through its requirements to share information *after* a project has been defined by ADEQ. Indeed, section R18-13-1018 addressing "Public Notice Requirements for Permit Actions" requires ADEQ to provide public notice of initial or renewed CCR permit applications as well as applications to modify such permits (R18-13-1018.A). For initial or renewed CCR permits and major modifications, ADEQ must provide a notice that: (1) includes a brief summary of the draft document; (2) provides information about the licensing timeframes and explains where further information on the permit action can be obtained; (3) describes when and how comments may be made; (4) provides at least 30 days for comments; and (5) explains how a public hearing may be requested (A.A.C. R18-13-1018.E). In addition, the public may request additional time to comment on a draft permit. These provisions provide ample opportunities for participation for the public, and the additional requirements in section R18-13-1010.C are unwarranted. SRP requests that section R18-13-1010.C be removed.

Modification of a CCR Facility Permit

Section 8-13-1017.F.3.c requires a minor permit modification when there is a change to a groundwater sampling and analysis program, including a demonstration of an alternative source of a statistically significant increase (SSI) over background levels for a groundwater constituent per 40 CFR 257.94(d) or 257.95(c). Alternate source demonstrations (ASDs) for SSIs pertaining to naturally occurring conditions should not require a minor permit modification, as this type of ASD does not lead to a change in a facility's groundwater sampling and analysis program (i.e., the facility remains in detection monitoring, rather than commencing assessment monitoring). SRP requests this requirement be removed.

SRP appreciates the opportunity to provide these comments to ADEQ. If you have any questions, please call or e-mail me at the contact information listed above.

Sincerely,

Andrea Martinez

ADEQ
Waste Programs Division, Solid Waste
Attn: Mark Lewandowski
1110 W. Washington Street
Phoenix, AZ 85007

RE: Proposed Rulemaking – Coal Combustion Residuals Program

Tucson Electric Power Company (TEP or the Company) respectfully submits these comments to the Arizona Department of Environmental Quality (ADEQ or Agency) regarding the Proposed Rulemaking – Coal Combustion Residuals (CCR) Program published in the Arizona Administrative Register on July 12, 2024 (Program or Proposed Rule).

TEP appreciates and supports ADEQ's efforts to develop Arizona-specific regulations regarding CCR management and the development of a state CCR permitting program. The Proposed Rule maintains the requirements of the self-implementing federal CCR rule while additionally incorporating components of the Aquifer Protection Program (APP) that currently apply to our CCR unit at the Springerville Generating Station. This Proposed Rule will allow for a streamlined, singular permit program for our CCR unit that meets all applicable federal and state requirements for CCR management and aquifer protection. TEP recognizes that your extensive knowledge of the unique geologic and hydrogeologic site conditions across Arizona make ADEQ the appropriate regulatory agency to implement the CCR Program. We are grateful for the stakeholder process ADEQ facilitated over the past few years. Thank you for devoting time and resources to the development of this Program.

Engagement in our communities and with our customers is a TEP priority. We are pleased that ADEQ's proposed rulemaking is designed to provide ample opportunities for public participation during the permitting process. We agree that community awareness and participation in the CCR permitting process is important.

Stakeholder engagement is most meaningful when it is informed and timely. The proposed Public Notice Requirements under R18-13-1018 allow for meaningful public participation

in the CCR permitting process through public notices, making application materials available to the public, and allowing for optional public meetings. TEP recommends that the proposed requirement under R18-13-1010.C, for a public meeting without ADEQ's involvement and prior to submitting a permit application, be moved to R18-13-1018.A to coincide with the public notice that an application has been received by ADEQ. TEP also proposes that both the applicant and ADEQ participate in the public meeting.

Moving the public meeting requirements from R18-13-1010.C to R18-13-1018.A will benefit all stakeholders. The community will be better informed of the permit application and permitting process after an application package has been submitted. This timing will provide ample opportunity for community feedback prior to the development of the draft permit.

As noted in R18-13-1018.F, ADEQ will also have the option to schedule a public hearing after public notice of a proposed draft permit "if requested and if the Director determines there is sufficient public interest." This will provide additional opportunities for public hearings, if requested by the community.

Thank you, again, for the opportunity to provide feedback on the Proposed Rule. Please let me know if you have any questions. We look forward to working with you under this Program.

Sincerely,

Megan E. Garvey
Sr. Director, Environmental Services and Sustainability
Tucson Electric Power Company

Steven Estes, TEP

Director of an approved State the following information as it becomes available:

(1) Any location restriction demonstration required under §§ 257.7 through 257.12; and

(2) Any demonstration, certification, finding, monitoring, testing, or analytical data required in §§ 257.21 through 257.28.

(b) The owner/operator must notify the State Director when the documents from paragraph (a) of this section have been placed or added to the operating record, and all information contained in the operating record must be furnished upon request to the State Director or be made available at all reasonable times for inspection by the State Director.

(c) The Director of an approved State can set alternative schedules for recordkeeping and notification requirements as specified in paragraphs (a) and (b) of this section, except for the notification requirements in § 257.25(g)(1)(iii).

(d) The Director of an approved state program may receive electronic documents only if the state program includes the requirements of 40 CFR Part 3—(Electronic reporting).

[44 FR 53460, Sept. 13, 1979, as amended at 70 FR 59888, Oct. 13, 2005]

Subpart C [Reserved]

Subpart D—Standards for the Disposal of Coal Combustion Residuals in Landfills and Surface Impoundments

SOURCE: 80 FR 21468, Apr. 17, 2015, unless otherwise noted.

§ 257.50 Scope and purpose.

(a) This subpart establishes minimum national criteria for purposes of determining which solid waste disposal facilities and solid waste management practices do not pose a reasonable probability of adverse effects on health or the environment under sections 1008(a)(3) and 4004(a) of the Resource Conservation and Recovery Act.

(b) This subpart applies to owners and operators of new and existing landfills and surface impoundments, including any lateral expansions of such units that dispose or otherwise engage in solid waste management of CCR generated from the combustion of coal at electric utilities and independent power producers. Unless otherwise provided in this subpart, these requirements also apply to disposal units located off-site of the electric utility or independent power producer. This subpart also applies to any practice that does not meet the definition of a beneficial use of CCR.

(c) This subpart also applies to inactive CCR surface impoundments at active electric utilities or independent power producers, regardless of the fuel currently used at the facility to produce electricity.

(d) This subpart does not apply to CCR landfills that have ceased receiving CCR prior to October 19, 2015.

(e) This subpart does not apply to electric utilities or independent power producers that have ceased producing electricity prior to October 19, 2015.

(f) This subpart does not apply to wastes, including fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated at facilities that are not part of an electric utility or independent power producer, such as manufacturing facilities, universities, and hospitals. This subpart also does not apply to fly ash, bottom ash, boiler slag, and flue gas desulfurization materials, generated primarily from the combustion of fuels (including other fossil fuels) other than coal, for the purpose of generating electricity unless the fuel burned consists of more than fifty percent (50%) coal on a total heat input or mass input basis, whichever results in the greater mass feed rate of coal.

(g) This subpart does not apply to practices that meet the definition of a beneficial use of CCR.

(h) This subpart does not apply to CCR placement at active or abandoned underground or surface coal mines.

(i) This subpart does not apply to municipal solid waste landfills that receive CCR.

§ 257.51 Effective date of this subpart.

The requirements of this subpart take effect on October 19, 2015.

§ 257.52 Applicability of other regulations.

(a) Compliance with the requirements of this subpart does not affect the need for the owner or operator of a CCR landfill, CCR surface impoundment, or lateral expansion of a CCR unit to comply with all other applicable federal, state, tribal, or local laws or other requirements.

(b) Any CCR landfill, CCR surface impoundment, or lateral expansion of a CCR unit continues to be subject to the requirements in §§ 257.3–1, 257.3–2, and 257.3–3.

§ 257.53 Definitions.

The following definitions apply to this subpart. Terms not defined in this section have the meaning given by RCRA.

Acre foot means the volume of one acre of surface area to a depth of one foot.

Active facility or *active electric utilities or independent power producers* means any facility subject to the requirements of this subpart that is in operation on October 19, 2015. An electric utility or independent power producer is in operation if it is generating electricity that is provided to electric power transmission systems or to electric power distribution systems on or after October 19, 2015. An off-site disposal facility is in operation if it is accepting or managing CCR on or after October 19, 2015.

Active life or *in operation* means the period of operation beginning with the initial placement of CCR in the CCR unit and ending at completion of closure activities in accordance with § 257.102.

Active portion means that part of the CCR unit that has received or is receiving CCR or non-CCR waste and that has not completed closure in accordance with § 257.102.

Aquifer means a geologic formation, group of formations, or portion of a formation capable of yielding usable quantities of groundwater to wells or springs.

Area-capacity curves means graphic curves which readily show the reservoir water surface area, in acres, at different elevations from the bottom of the reservoir to the maximum water surface, and the capacity or volume, in acre-feet, of the water contained in the reservoir at various elevations.

Areas susceptible to mass movement means those areas of influence (*i.e.*, areas characterized as having an active or substantial possibility of mass movement) where, because of natural or human-induced events, the movement of earthen material at, beneath, or adjacent to the CCR unit results in the downslope transport of soil and rock material by means of gravitational influence. Areas of mass movement include, but are not limited to, landslides, avalanches, debris slides and flows, soil fluctuation, block sliding, and rock fall.

Beneficial use of CCR means the CCR meet all of the following conditions:

(1) The CCR must provide a functional benefit;

(2) The CCR must substitute for the use of a virgin material, conserving natural resources that would otherwise need to be obtained through practices, such as extraction;

(3) The use of the CCR must meet relevant product specifications, regulatory standards or design standards when available, and when such standards are not available, the CCR is not used in excess quantities; and

(4) When unencapsulated use of CCR involving placement on the land of 12,400 tons or more in non-roadway applications, the user must demonstrate and keep records, and provide such documentation upon request, that environmental releases to groundwater, surface water, soil and air are comparable to or lower than those from analogous products made without CCR, or that environmental releases to groundwater, surface water, soil and air will be at or below relevant regulatory and health-based benchmarks for human and ecological receptors during use.

Closed means placement of CCR in a CCR unit has ceased, and the owner or operator has completed closure of the CCR unit in accordance with § 257.102 and has initiated post-closure care in accordance with § 257.104.

Coal combustion residuals (CCR) means fly ash, bottom ash, boiler slag, and

flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.

CCR fugitive dust means solid airborne particulate matter that contains or is derived from CCR, emitted from any source other than a stack or chimney.

CCR landfill or landfill means an area of land or an excavation that receives CCR and which is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine, or a cave. For purposes of this subpart, a CCR landfill also includes sand and gravel pits and quarries that receive CCR, CCR piles, and any practice that does not meet the definition of a beneficial use of CCR.

CCR pile or pile means any non-containerized accumulation of solid, non-flowing CCR that is placed on the land. CCR that is beneficially used off-site is not a CCR pile.

CCR surface impoundment or impoundment means a natural topographic depression, man-made excavation, or diked area, which is designed to hold an accumulation of CCR and liquids, and the unit treats, stores, or disposes of CCR.

CCR unit means any CCR landfill, CCR surface impoundment, or lateral expansion of a CCR unit, or a combination of more than one of these units, based on the context of the paragraph(s) in which it is used. This term includes both new and existing units, unless otherwise specified.

Dike means an embankment, berm, or ridge of either natural or man-made materials used to prevent the movement of liquids, sludges, solids, or other materials.

Displacement means the relative movement of any two sides of a fault measured in any direction.

Disposal means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste as defined in section 1004(27) of the Resource Conservation and Recovery Act into or on any land or water so that such solid waste, or constituent thereof, may enter the environment or be emitted into the air or discharged into any waters, including groundwaters. For purposes of this subpart, disposal does not include the storage or the beneficial use of CCR.

Downstream toe means the junction of the downstream slope or face of the CCR surface impoundment with the ground surface.

Eligible unlined CCR surface impoundment means an existing CCR surface impoundment that meets all of the following conditions:

(1) The owner or operator has documented that the CCR unit is in compliance with the location restrictions specified under §§ 257.60 through 257.64;

(2) The owner or operator has documented that the CCR unit is in compliance with the periodic safety factor assessment requirements under § 257.73(e) and (f); and

(3) No constituent listed in Appendix IV to this part has been detected at a statistically significant level exceeding a groundwater protection standard defined under § 257.95(h).

Encapsulated beneficial use means a beneficial use of CCR that binds the CCR into a solid matrix that minimizes its mobilization into the surrounding environment.

Existing CCR landfill means a CCR landfill that receives CCR both before and after October 19, 2015, or for which construction commenced prior to October 19, 2015 and receives CCR on or after October 19, 2015. A CCR landfill has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun prior to October 19, 2015.

Existing CCR surface impoundment means a CCR surface impoundment that receives CCR both before and after October 19, 2015, or for which construction commenced prior to October 19, 2015 and receives CCR on or after October 19, 2015. A CCR surface impoundment has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun prior to October 19, 2015.

Facility means all contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, disposing, or otherwise conducting solid waste management of CCR. A facility may consist of several treatment, storage, or disposal operational units (e.g., one or more landfills, surface impoundments, or combinations of them).

Factor of safety (Safety factor) means the ratio of the forces tending to resist the failure of a structure to the forces tending to cause such failure as determined by accepted engineering practice.

Fault means a fracture or a zone of fractures in any material along which strata on one side have been displaced with respect to that on the other side.

Flood hydrograph means a graph showing, for a given point on a stream, the discharge, height, or other characteristic of a flood as a function of time.

Freeboard means the vertical distance between the lowest point on the crest of the impoundment dike and the surface of the waste contained therein.

Free liquids means liquids that readily separate from the solid portion of a waste under ambient temperature and pressure.

Groundwater means water below the land surface in a zone of saturation.

Hazard potential classification means the possible adverse incremental consequences that result from the release of water or stored contents due to failure of the diked CCR surface impoundment or mis-operation of the diked CCR surface impoundment or its appurtenances. The hazardous potential classifications include high hazard potential CCR surface impoundment, significant hazard potential CCR surface impoundment, and low hazard potential CCR surface impoundment, which terms mean:

(1) *High hazard potential CCR surface impoundment* means a diked surface impoundment where failure or mis-operation will probably cause loss of human life.

(2) *Low hazard potential CCR surface impoundment* means a diked surface impoundment where failure or mis-operation results in no probable loss of human life and low economic and/or environmental losses. Losses are principally limited to the surface impoundment owner's property.

(3) *Significant hazard potential CCR surface impoundment* means a diked surface impoundment where failure or mis-operation results in no probable loss of human life, but can cause economic loss, environmental damage, disruption of lifeline facilities, or impact other concerns.

Height means the vertical measurement from the downstream toe of the CCR surface impoundment at its lowest point to the lowest elevation of the crest of the CCR surface impoundment.

Holocene means the most recent epoch of the Quaternary period, extending from the end of the Pleistocene Epoch, at 11,700 years before present, to present.

Hydraulic conductivity means the rate at which water can move through a permeable medium (*i.e.*, the coefficient of permeability).

Inactive CCR surface impoundment means a CCR surface impoundment that no longer receives CCR on or after October 19, 2015 and still contains both CCR and liquids on or after October 19, 2015.

Incised CCR surface impoundment means a CCR surface impoundment which is constructed by excavating entirely below the natural ground surface, holds an accumulation of CCR entirely below the adjacent natural ground surface, and does not consist of any constructed diked portion.

Indian country or *Indian lands* means:

(1) All land within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running throughout the reservation;

(2) All dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of the State; and

(3) All Indian allotments, the Indian titles to which have not been extinguished, including rights of way running through the same.

Indian Tribe or *Tribe* means any Indian tribe, band, nation, or community

recognized by the Secretary of the Interior and exercising substantial governmental duties and powers on Indian lands.

Inflow design flood means the flood hydrograph that is used in the design or modification of the CCR surface impoundments and its appurtenant works.

In operation means the same as *active life*.

Karst terrain means an area where karst topography, with its characteristic erosional surface and subterranean features, is developed as the result of dissolution of limestone, dolomite, or other soluble rock. Characteristic physiographic features present in karst terranes include, but are not limited to, dolines, collapse shafts (sinkholes), sinking streams, caves, seeps, large springs, and blind valleys.

Lateral expansion means a horizontal expansion of the waste boundaries of an existing CCR landfill or existing CCR surface impoundment made after October 19, 2015.

Liquefaction factor of safety means the factor of safety (safety factor) determined using analysis under liquefaction conditions.

Lithified earth material means all rock, including all naturally occurring and naturally formed aggregates or masses of minerals or small particles of older rock that formed by crystallization of magma or by induration of loose sediments. This term does not include man-made materials, such as fill, concrete, and asphalt, or unconsolidated earth materials, soil, or regolith lying at or near the earth surface.

Maximum horizontal acceleration in lithified earth material means the maximum expected horizontal acceleration at the ground surface as depicted on a seismic hazard map, with a 98% or greater probability that the acceleration will not be exceeded in 50 years, or the maximum expected horizontal acceleration based on a site-specific seismic risk assessment.

New CCR landfill means a CCR landfill or lateral expansion of a CCR landfill that first receives CCR or commences construction after October 19, 2015. A new CCR landfill has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun after October 19, 2015. Overfills are also considered new CCR landfills.

New CCR surface impoundment means a CCR surface impoundment or lateral expansion of an existing or new CCR surface impoundment that first receives CCR or commences construction after October 19, 2015. A new CCR surface impoundment has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun after October 19, 2015.

Nonparticipating State means a State—

(1) For which the Administrator has not approved a State permit program or other system of prior approval and conditions under RCRA section 4005(d)(1)(B);

(2) The Governor of which has not submitted to the Administrator for approval evidence to operate a State permit program or other system of prior approval and conditions under RCRA section 4005(d)(1)(A);

(3) The Governor of which provides notice to the Administrator that, not fewer than 90 days after the date on which the Governor provides the notice to the Administrator, the State will relinquish an approval under RCRA section 4005(d)(1)(B) to operate a permit program or other system of prior approval and conditions; or

(4) For which the Administrator has withdrawn approval for a permit program or other system of prior approval and conditions under RCRA section 4005(d)(1)(E).

Operator means the person(s) responsible for the overall operation of a CCR unit.

Overfill means a new CCR landfill constructed over a closed CCR surface impoundment.

Owner means the person(s) who owns a CCR unit or part of a CCR unit.

Participating State means a state with a state program for control of CCR

that has been approved pursuant to RCRA section 4005(d).

Participating State Director means the chief administrative officer of any state agency operating the CCR permit program in a participating state or the delegated representative of the Participating State Director. If responsibility is divided among two or more state agencies, Participating State Director means the chief administrative officer of the state agency authorized to perform the particular function or procedure to which reference is made.

Poor foundation conditions mean those areas where features exist which indicate that a natural or human-induced event may result in inadequate foundation support for the structural components of an existing or new CCR unit. For example, failure to maintain static and seismic factors of safety as required in §§ 257.73(e) and 257.74(e) would cause a poor foundation condition.

Probable maximum flood means the flood that may be expected from the most severe combination of critical meteorologic and hydrologic conditions that are reasonably possible in the drainage basin.

Qualified person means a person or persons trained to recognize specific appearances of structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit by visual observation and, if applicable, to monitor instrumentation.

Qualified professional engineer means an individual who is licensed by a state as a Professional Engineer to practice one or more disciplines of engineering and who is qualified by education, technical knowledge and experience to make the specific technical certifications required under this subpart. Professional engineers making these certifications must be currently licensed in the state where the CCR unit(s) is located.

Recognized and generally accepted good engineering practices means engineering maintenance or operation activities based on established codes, widely accepted standards, published technical reports, or a practice widely recommended throughout the industry. Such practices generally detail approved ways to perform specific engineering, inspection, or mechanical integrity activities.

Retrofit means to remove all CCR and contaminated soils and sediments from the CCR surface impoundment, and to ensure the unit complies with the requirements in § 257.72

Representative sample means a sample of a universe or whole (e.g., waste pile, lagoon, and groundwater) which can be expected to exhibit the average properties of the universe or whole. See EPA publication SW–846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, Chapter 9 (available at *http://www.epa.gov/epawaste/hazard/testmethods/sw846/online/index.htm*) for a discussion and examples of representative samples.

Run-off means any rainwater, leachate, or other liquid that drains over land from any part of a CCR landfill or lateral expansion of a CCR landfill.

Run-on means any rainwater, leachate, or other liquid that drains over land onto any part of a CCR landfill or lateral expansion of a CCR landfill.

Sand and gravel pit or quarry means an excavation for the extraction of aggregate, minerals or metals. The term sand and gravel pit and/or quarry does not include subsurface or surface coal mines.

Seismic factor of safety means the factor of safety (safety factor) determined using analysis under earthquake conditions using the peak ground acceleration for a seismic event with a 2% probability of exceedance in 50 years, equivalent to a return period of approximately 2,500 years, based on the U.S. Geological Survey (USGS) seismic hazard maps for seismic events with this return period for the region where the CCR surface impoundment is located.

Seismic impact zone means an area having a 2% or greater probability that the maximum expected horizontal acceleration, expressed as a percentage of the earth's gravitational pull (g), will exceed 0.10 g in 50 years.

Slope protection means engineered or non-engineered measures installed on the upstream or downstream slope of the CCR surface impoundment to protect the slope against wave action or erosion, including but not limited to rock riprap, wooden pile, or concrete

revetments, vegetated wave berms, concrete facing, gabions, geotextiles, or fascines.

Solid waste management or management means the systematic administration of the activities which provide for the collection, source separation, storage, transportation, processing, treatment, or disposal of solid waste.

State means any of the fifty States in addition to the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

State Director means the chief administrative officer of the lead state agency responsible for implementing the state program regulating disposal in CCR landfills, CCR surface impoundments, and all lateral expansions of a CCR unit.

Static factor of safety means the factor of safety (safety factor) determined using analysis under the long-term, maximum storage pool loading condition, the maximum surcharge pool loading condition, and under the end-of-construction loading condition.

Structural components mean liners, leachate collection and removal systems, final covers, run-on and run-off systems, inflow design flood control systems, and any other component used in the construction and operation of the CCR unit that is necessary to ensure the integrity of the unit and that the contents of the unit are not released into the environment.

Technically feasible means possible to do in a way that would likely be successful.

Technically infeasible means not possible to do in a way that would likely be successful.

Unstable area means a location that is susceptible to natural or human-induced events or forces capable of impairing the integrity, including structural components of some or all of the CCR unit that are responsible for preventing releases from such unit. Unstable areas can include poor foundation conditions, areas susceptible to mass movements, and karst terrains.

Uppermost aquifer means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary. Upper limit is measured at a point nearest to the natural ground surface to which the aquifer rises during the wet season.

Waste boundary means a vertical surface located at the hydraulically downgradient limit of the CCR unit. The vertical surface extends down into the uppermost aquifer.

[80 FR 21468, Apr. 17, 2015, as amended at 80 FR 37991, July 2, 2015; 83 FR 36451, July 30, 2018; 85 FR 53561, Aug. 28, 2020]

LOCATION RESTRICTIONS

§ 257.60 Placement above the uppermost aquifer.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units must be constructed with a base that is located no less than 1.52 meters (five feet) above the upper limit of the uppermost aquifer, or must demonstrate that there will not be an intermittent, recurring, or sustained hydraulic connection between any portion of the base of the CCR unit and the uppermost aquifer due to normal fluctuations in groundwater elevations (including the seasonal high water table). The owner or operator must demonstrate by the dates specified in paragraph (c) of this section that the CCR unit meets the minimum requirements for placement above the uppermost aquifer.

(b) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration meets the requirements of paragraph (a) of this section.

(c) The owner or operator of the CCR unit must complete the demonstration required by paragraph (a) of this section by the date specified in either paragraph (c)(1) or (2) of this section.

(1) For an existing CCR surface impoundment, the owner or operator must complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or

operator must complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by paragraph (a) of this section when the demonstration is placed in the facility's operating record as required by § 257.105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (a) of this section by the date specified in paragraph (c)(1) of this section is subject to the requirements of § 257.101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of paragraph (a) of this section is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(e), the notification requirements specified in § 257.106(e), and the internet requirements specified in § 257.107(e).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.61 Wetlands.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units must not be located in wetlands, as defined in § 232.2 of this chapter, unless the owner or operator demonstrates by the dates specified in paragraph (c) of this section that the CCR unit meets the requirements of paragraphs (a)(1) through (5) of this section.

(1) Where applicable under section 404 of the Clean Water Act or applicable state wetlands laws, a clear and objective rebuttal of the presumption that an alternative to the CCR unit is reasonably available that does not involve wetlands.

(2) The construction and operation of the CCR unit will not cause or contribute to any of the following:

(i) A violation of any applicable state or federal water quality standard;

(ii) A violation of any applicable toxic effluent standard or prohibition under section 307 of the Clean Water Act;

(iii) Jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of a critical habitat, protected under the Endangered Species Act of 1973; and

(iv) A violation of any requirement under the Marine Protection, Research, and Sanctuaries Act of 1972 for the protection of a marine sanctuary.

(3) The CCR unit will not cause or contribute to significant degradation of wetlands by addressing all of the following factors:

(i) Erosion, stability, and migration potential of native wetland soils, muds and deposits used to support the CCR unit;

(ii) Erosion, stability, and migration potential of dredged and fill materials used to support the CCR unit;

(iii) The volume and chemical nature of the CCR;

(iv) Impacts on fish, wildlife, and other aquatic resources and their habitat from release of CCR;

(v) The potential effects of catastrophic release of CCR to the wetland and the resulting impacts on the environment; and

(vi) Any additional factors, as necessary, to demonstrate that ecological resources in the wetland are sufficiently protected.

(4) To the extent required under section 404 of the Clean Water Act or applicable state wetlands laws, steps have been taken to attempt to achieve no net loss of wetlands (as defined by acreage and function) by first avoiding impacts to wetlands to the maximum extent reasonable as required by paragraphs (a)(1) through (3) of this section, then minimizing unavoidable impacts to the maximum extent reasonable, and finally offsetting remaining unavoidable wetland impacts through all appropriate and reasonable compensatory mitigation actions (e.g., restoration of existing degraded wetlands or creation of man-made wetlands); and

(5) Sufficient information is available to make a reasoned determination with respect to the demonstrations in paragraphs (a)(1) through (4) of this section.

(b) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration meets the requirements of paragraph (a) of this section.

(c) The owner or operator of the CCR unit must complete the demonstrations required by paragraph (a) of this section by the date specified in either paragraph (c)(1) or (2) of this section.

(1) For an existing CCR surface impoundment, the owner or operator must complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator must complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by paragraph (a) of this section when the demonstration is placed in the facility's operating record as required by §257.105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (a) of this section by the date specified in paragraph (c)(1) of this section is subject to the requirements of §257.101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstrations showing compliance with the requirements of paragraph (a) of this section is prohibited from placing CCR in the CCR unit.

(d) The owner or operator must comply with the recordkeeping requirements specified in §257.105(e), the notification requirements specified in §257.106(e), and the Internet requirements specified in §257.107(e).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.62 Fault areas.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units must not be located within 60 meters (200 feet) of the outermost damage zone of a fault that has had displacement in Holocene time unless the owner or operator demonstrates by the dates specified in paragraph (c) of this section that an alternative setback distance of less than 60 meters (200 feet) will prevent damage to the structural integrity of the CCR unit.

(b) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration meets the requirements of paragraph (a) of this section.

(c) The owner or operator of the CCR unit must complete the demonstration required by paragraph (a) of this section by the date specified in either paragraph (c)(1) or (2) of this section.

(1) For an existing CCR surface impoundment, the owner or operator must complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator must complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by paragraph (a) of this section when the demonstration is placed in the facility's operating record as required by §257.105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (a) of this section by the date specified in paragraph (c)(1) of this section is subject to the requirements of §257.101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of paragraph (a) of this section is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in

§ 257.105(e), the notification requirements specified in § 257.106(e), and the Internet requirements specified in § 257.107(e).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.63 Seismic impact zones.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units must not be located in seismic impact zones unless the owner or operator demonstrates by the dates specified in paragraph (c) of this section that all structural components including liners, leachate collection and removal systems, and surface water control systems, are designed to resist the maximum horizontal acceleration in lithified earth material for the site.

(b) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration meets the requirements of paragraph (a) of this section.

(c) The owner or operator of the CCR unit must complete the demonstration required by paragraph (a) of this section by the date specified in either paragraph (c)(1) or (2) of this section.

(1) For an existing CCR surface impoundment, the owner or operator must complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator must complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by paragraph (a) of this section when the demonstration is placed in the facility's operating record as required by § 257.105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (a) of this section by the date specified in paragraph (c)(1) of this section is subject to the requirements of § 257.101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of paragraph (a) of this section is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(e), the notification requirements specified in § 257.106(e), and the Internet requirements specified in § 257.107(e).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.64 Unstable areas.

(a) An existing or new CCR landfill, existing or new CCR surface impoundment, or any lateral expansion of a CCR unit must not be located in an unstable area unless the owner or operator demonstrates by the dates specified in paragraph (d) of this section that recognized and generally accepted good engineering practices have been incorporated into the design of the CCR unit to ensure that the integrity of the structural components of the CCR unit will not be disrupted.

(b) The owner or operator must consider all of the following factors, at a minimum, when determining whether an area is unstable:

(1) On-site or local soil conditions that may result in significant differential settling;

(2) On-site or local geologic or geomorphologic features; and

(3) On-site or local human-made features or events (both surface and subsurface).

(c) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration meets the requirements of paragraph (a) of this section.

(d) The owner or operator of the CCR unit must complete the demonstration required by paragraph (a) of this section by the date specified in either paragraph (d)(1) or (2) of this section.

(1) For an existing CCR landfill or existing CCR surface impoundment, the owner or operator must complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator must complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by paragraph (a) of this section when the demonstration is placed in the facility's operating record as required by § 257.105(e).

(4) An owner or operator of an existing CCR surface impoundment or existing CCR landfill who fails to demonstrate compliance with the requirements of paragraph (a) of this section by the date specified in paragraph (d)(1) of this section is subject to the requirements of § 257.101(b)(1) or (d)(1), respectively.

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of paragraph (a) of this section is prohibited from placing CCR in the CCR unit.

(e) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(e), the notification requirements specified in § 257.106(e), and the Internet requirements specified in § 257.107(e).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

DESIGN CRITERIA

§ 257.70 Design criteria for new CCR landfills and any lateral expansion of a CCR landfill.

(a)(1) New CCR landfills and any lateral expansion of a CCR landfill must be designed, constructed, operated, and maintained with either a composite liner that meets the requirements of paragraph (b) of this section or an alternative composite liner that meets the requirements in paragraph (c) of this section, and a leachate collection and removal system that meets the requirements of paragraph (d) of this section.

(2) Prior to construction of an overfill the underlying surface impoundment must meet the requirements of § 257.102(d).

(b) A *composite liner* must consist of two components; the upper component consisting of, at a minimum, a 30-mil geomembrane liner (GM), and the lower component consisting of at least a two-foot layer of compacted soil with a hydraulic conductivity of no more than 1×10^{-7} centimeters per second (cm/sec). GM components consisting of high density polyethylene (HDPE) must be at least 60-mil thick. The GM or upper liner component must be installed in direct and uniform contact with the compacted soil or lower liner component. The composite liner must be:

(1) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the CCR or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(2) Constructed of materials that provide appropriate shear resistance of the upper and lower component interface to prevent sliding of the upper component including on slopes;

(3) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(4) Installed to cover all surrounding earth likely to be in contact with the CCR or leachate.

(c) If the owner or operator elects to install an alternative composite liner, all of the following requirements must be met:

(1) An *alternative composite liner* must consist of two components; the upper component consisting of, at a minimum, a 30-mil GM, and a lower component, that is not a geomembrane, with a liquid flow rate no greater than the liquid flow rate of two feet of compacted soil with a hydraulic conductivity of no more than 1×10^{-7} cm/sec.

GM components consisting of high density polyethylene (HDPE) must be at least 60-mil thick. If the lower component of the alternative liner is compacted soil, the GM must be installed in direct and uniform contact with the compacted soil.

(2) The owner or operator must obtain certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the liquid flow rate through the lower component of the alternative composite liner is no greater than the liquid flow rate through two feet of compacted soil with a hydraulic conductivity of $1x10^{-7}$ cm/sec. The hydraulic conductivity for the two feet of compacted soil used in the comparison shall be no greater than $1x10^{-7}$ cm/sec. The hydraulic conductivity of any alternative to the two feet of compacted soil must be determined using recognized and generally accepted methods. The liquid flow rate comparison must be made using Equation 1 of this section, which is derived from Darcy's Law for gravity flow through porous media.

(Eq. 1):

$$\frac{Q}{A} = q = k\left(\frac{h}{t} + 1\right)$$

Where:

Q = flow rate (cubic centimeters/second);
A = surface area of the liner (squared centimeters);
q = flow rate per unit area (cubic centimeters/second/squared centimeter);
k = hydraulic conductivity of the liner (centimeters/second);
h = hydraulic head above the liner (centimeters); and
t = thickness of the liner (centimeters).

(3) The alternative composite liner must meet the requirements specified in paragraphs (b)(1) through (4) of this section.

(d) The *leachate collection and removal system* must be designed, constructed, operated, and maintained to collect and remove leachate from the landfill during the active life and post-closure care period. The leachate collection and removal system must be:

(1) Designed and operated to maintain less than a 30-centimeter depth of leachate over the composite liner or alternative composite liner;

(2) Constructed of materials that are chemically resistant to the CCR and any non-CCR waste managed in the CCR unit and the leachate expected to be generated, and of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying waste, waste cover materials, and equipment used at the CCR unit; and

(3) Designed and operated to minimize clogging during the active life and post-closure care period.

(e) Prior to construction of the CCR landfill or any lateral expansion of a CCR landfill, the owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the design of the composite liner (or, if applicable, alternative composite liner) and the leachate collection and removal system meets the requirements of this section.

(f) Upon completion of construction of the CCR landfill or any lateral expansion of a CCR landfill, the owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the design of the composite liner (or, if applicable, alternative composite liner) and the leachate collection and removal system have been constructed in accordance with the requirements of this section.

(g) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(f), the notification requirements specified in §257.106(f), and the

Internet requirements specified in § 257.107(f).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.71 Liner design criteria for existing CCR surface impoundments.

(a)(1) No later than October 17, 2016, the owner or operator of an existing CCR surface impoundment must document whether or not such unit was constructed with any one of the following:

(i) [Reserved]

(ii) A composite liner that meets the requirements of § 257.70(b); or

(iii) An alternative composite liner that meets the requirements of § 257.70(c).

(2) The hydraulic conductivity of the compacted soil must be determined using recognized and generally accepted methods.

(3) An existing CCR surface impoundment is considered to be an existing unlined CCR surface impoundment if either:

(i) The owner or operator of the CCR unit determines that the CCR unit is not constructed with a liner that meets the requirements of paragraph (a)(1)(ii) or (iii) of this section; or

(ii) The owner or operator of the CCR unit fails to document whether the CCR unit was constructed with a liner that meets the requirements of paragraph (a)(1)(ii) or (iii) of this section.

(4) All existing unlined CCR surface impoundments are subject to the requirements of § 257.101(a).

(b) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority attesting that the documentation as to whether a CCR unit meets the requirements of paragraph (a) of this section is accurate.

(c) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(f), the notification requirements specified in § 257.106(f), and the Internet requirements specified in § 257.107(f).

(d) *Alternate Liner Demonstration.* An owner or operator of a CCR surface impoundment constructed without a composite liner or alternate composite liner, as defined in § 257.70(b) or (c), may submit an Alternate Liner Demonstration to the Administrator or the Participating State Director to demonstrate that based on the construction of the unit and surrounding site conditions, that there is no reasonable probability that continued operation of the surface impoundment will result in adverse effects to human health or the environment. The application and demonstration must be submitted to the Administrator or the Participating State Director no later than the relevant deadline in paragraph (d)(2) of this section. The Administrator or the Participating State Director will act on the submissions in accordance with the procedures in paragraph (d)(2) of this section.

(1) *Application and alternative liner demonstration submission requirements.* To obtain approval under this paragraph (d), the owner or operator of the CCR surface impoundment must submit all of the following:

(i) *Application.* The owner or operator of the CCR surface impoundment must submit a letter to the Administrator or the Participating State Director, announcing their intention to submit a demonstration under paragraph (d)(1)(ii) of this section. The application must include the location of the facility and identify the specific CCR surface impoundment for which the demonstration will be made. The letter must include all of the following:

(A) A certification signed by the owner or operator that the CCR unit is in full compliance with this subpart except for § 257.71(a)(1);

(B) Documentation supporting the certification required under paragraph (d)(1)(i)(A) of this section that includes all the following:

(*1*) Documentation that the groundwater monitoring network meets all the requirements of § 257.91. This must include documentation that the existing network of groundwater monitoring wells is sufficient to ensure detection of any groundwater contamination resulting from the impoundment,

based on direction of flow, well location, screening depth and other relevant factors. At a minimum, the documentation must include all of the following:

(*i*) Map(s) of groundwater monitoring well locations in relation to the CCR unit(s) that depict the elevation of the potentiometric surface and the direction(s) of groundwater flow across the site;

(*ii*) Well construction diagrams and drilling logs for all groundwater monitoring wells;

(*iii*) Maps that characterize the direction of groundwater flow accounting for temporal variations; and

(*iv*) Any other data and analyses the owner or operator of the CCR surface impoundment relied upon when determining the design and location of the groundwater monitoring network.

(*2*) Documentation that the CCR surface impoundment remains in detection monitoring pursuant to § 257.94 as a precondition for submitting an application. This includes documentation that the groundwater monitoring program meets the requirements of §§ 257.93 and 257.94. Such documentation includes data of constituent concentrations, summarized in table format, at each groundwater monitoring well monitored during each sampling event, and documentation of the most recent statistical tests conducted, analyses of the tests, and the rationale for the methods used in these comparisons. As part of this rationale, the owner or operator of the CCR surface impoundment must provide all data and analyses relied upon to comply with each of the requirements of this part;

(*3*) Documentation that the unit meets all the location restrictions under §§ 257.60 through 257.64;

(*4*) The most recent structural stability assessment required at § 257.73(d); and

(*5*) The most recent safety factor assessment required at § 257.73(e).

(C) Documentation of the design specifications for any engineered liner components, as well as all data and analyses the owner or operator of the CCR surface impoundment relied on when determining that the materials are suitable for use and that the construction of the liner is of good quality and in-line with proven and accepted engineering practices.

(D) Facilities with CCR surface impoundments located on properties adjacent to a water body must demonstrate that there is no reasonable probability that a complete and direct transport pathway (*i.e.*, not mediated by groundwater) can exist between the impoundment and any nearby water body. If the potential for such a pathway is identified, then the unit would not be eligible to submit a demonstration. If ongoing releases are identified, the owner or operator of the CCR unit must address these releases in accordance with § 257.96(a); and

(E) Upon submission of the application and any supplemental materials submitted in support of the application to the Administrator or the Participating State Director, the owner or operator must place the complete application in the facility's operating record as required by § 257.105(f)(14).

(ii) *Alternate Liner Demonstration Package*. The completed alternate liner demonstration package must be certified by a qualified professional engineer. The package must present evidence to demonstrate that, based on the construction of the unit and surrounding site conditions, there is no reasonable probability that operation of the surface impoundment will result in concentrations of constituents listed in appendix IV to this part in the uppermost aquifer at levels above a groundwater protection standard. For each line of evidence, as well as any other data and assumptions incorporated into the demonstration, the owner or operator of the CCR surface impoundment must include documentation on how the data were collected and why these data and assumptions adequately reflect potential contaminant transport from that specific impoundment. The alternate liner demonstration at a minimum must contain all of the following lines of evidence:

(A) *Characterization of site hydrogeology*. A characterization of the variability of site-specific soil and hydrogeology surrounding the surface impoundment that will control the rate and direction of contaminant transport from the impoundment. The

owner or operator must provide all of the following as part of this line of evidence:

(*1*) Measurements of the hydraulic conductivity in the uppermost aquifer from all monitoring wells associated with the impoundment(s) and discussion of the methods used to obtain these measurements;

(*2*) Measurements of the variability in subsurface soil characteristics collected from around the perimeter of the CCR surface impoundment to identify regions of substantially higher conductivity;

(*3*) Documentation that all sampling methods used are in line with recognized and generally accepted practices that can provide data at a spatial resolution necessary to adequately characterize the variability of subsurface conditions that will control contaminant transport;

(*4*) Explanation of how the specific number and location of samples collected are sufficient to capture subsurface variability if:

(*i*) Samples are advanced to a depth less than the top of the groundwater table or 20 feet beneath the bottom of the nearest water body, whichever is greater, and/or

(*ii*) Samples are spaced further apart than 200 feet around the impoundment perimeter;

(*5*) A narrative description of site geological history; and

(*6*) Conceptual site models with cross-sectional depictions of the site environmental sequence stratigraphy that include, at a minimum:

(*i*) The relative location of the impoundment with depth of ponded water noted;

(*ii*) Monitoring wells with screening depth noted;

(*iii*) Depiction of the location of other samples used in the development of the model;

(*iv*) The upper and lower limits of the uppermost aquifer across the site;

(*v*) The upper and lower limits of the depth to groundwater measured from monitoring wells if the uppermost aquifer is confined; and

(*vi*) Both the location and geometry of any nearby points of groundwater discharge or recharge (*e.g.*, surface water bodies) with potential to influence groundwater depth and flow measured around the unit.

(B) *Potential for infiltration.* A characterization of the potential for infiltration through any soil-based liner components and/or naturally occurring soil that control release and transport of leachate. All samples collected in the field for measurement of saturated hydraulic conductivity must be sent to a certified laboratory for analysis under controlled conditions and analyzed using recognized and generally accepted methodology. Facilities must document how the selected method is designed to simulate on-site conditions. The owner or operator must also provide documentation of the following as part of this line of evidence:

(*1*) The location, number, depth, and spacing of samples relied upon is supported by the data collected in paragraph (d)(1)(ii)(A) of this section and is sufficient to capture the variability of saturated hydraulic conductivity for the soil-based liner components and/or naturally occurring soil;

(*2*) The liquid used to pre-hydrate the samples and measure long-term hydraulic conductivity reflects the pH and major ion composition of the CCR surface impoundment porewater;

(*3*) That samples intended to represent the hydraulic conductivity of naturally occurring soils (*i.e.*, not mechanically compacted) are handled in a manner that will ensure the macrostructure of the soil is not disturbed during collection, transport, or analysis; and

(*4*) Any test for hydraulic conductivity relied upon includes, in addition to other relevant termination criteria specified by the method, criteria that equilibrium has been achieved between the inflow and outflow, within acceptable tolerance limits, for both electrical conductivity and pH.

(C) *Mathematical model to estimate the potential for releases.* Owners or operators must incorporate the data collected for paragraphs (d)(1)(ii)(A) and (d)(1)(ii)(B) of this section into a mathematical model to calculate the potential groundwater concentrations that may result in downgradient wells as a result of the impoundment. Facilities must also, where available, incorporate the national-scale data on constituent

concentrations and behavior provided by the existing risk record. Application of the model must account for the full range of site current and potential future conditions at and around the site to ensure that high-end groundwater concentrations have been effectively characterized. All of the data and assumptions incorporated into the model must be documented and justified.

(*1*) The models relied upon in this paragraph (d)(1)(ii)(C) must be well-established and validated, with documentation that can be made available for public review.

(*2*) The owner or operator must use the models to demonstrate that, for each constituent in appendix IV of this part, there is no reasonable probability that the peak groundwater concentration that may result from releases to groundwater from the CCR surface impoundment throughout its active life will exceed the groundwater protection standard at the waste boundary.

(*3*) The demonstration must include the peak groundwater concentrations modeled for all constituents in appendix IV of this part attributed both to the impoundment in isolation and in addition to background.

(D) Upon submission of the alternative liner demonstration to the Administrator or the Participating State Director, the owner or operator must place the complete demonstration in the facility's operating record as required by § 257.105(f)(15).

(2) *Procedures for adjudicating requests*—(i) *Deadline for application submission.* The owner or operator must submit the application under paragraph (d)(1)(i) of this section to EPA or the Participating State Director for approval no later than November 30, 2020.

(ii) *Deadline for demonstration submission.* If the application is approved the owner or operator must submit the demonstration required under paragraph (d)(1)(ii) of this section to EPA or the Participating State Director for approval no later than November 30, 2021.

(A) *Extension due to analytical limitations.* If the owner or operator cannot meet the demonstration deadline due to analytical limitations related to the measurement of hydraulic conductivity, the owner or operator must submit a request for an extension no later than September 1, 2021 that includes a summary of the data that have been analyzed to date for the samples responsible for the delay and an alternate timeline for completion that has been certified by the laboratory. The extension request must include all of the following:

(*1*) A timeline of fieldwork to confirm that samples were collected expeditiously;

(*2*) A chain of custody documenting when samples were sent to the laboratory;

(*3*) Written certification from the lab identifying how long it is projected for the tests to reach the relevant termination criteria related to solution chemistry, and

(*4*) Documentation of the progression towards all test termination metrics to date.

(B) *Length of extension.* If the extension is granted, the owner or operator will have 45 days beyond the timeframe certified by the laboratory to submit the completed demonstration.

(C) *Extension due to analytical limitations for chemical equilibrium.* If the measured hydraulic conductivity has not stabilized to within acceptable tolerance limits by the time the termination criteria for solution chemistry are met, the owner or operator must submit a preliminary demonstration no later than September 1, 2021 (with or without the one-time extension for analytical limitations).

(*1*) In this preliminary demonstration, the owner or operator must submit a justification of how the bounds of uncertainty applied to the available measurements of hydraulic conductivity ensure that the final value is not underestimated.

(*2*) EPA will review the preliminary demonstration to determine if it is complete and, if so, will propose to deny or to tentatively approve the demonstration. The proposed determination will be posted in the docket on *www.regulations.gov* and will be available for public comment for 30 days. After consideration of the comments, EPA will issue its decision on the application within four months of

receiving a complete preliminary demonstration.

(*3*) Once the final laboratory results are available, the owner or operator must submit a final demonstration that updates only the finalized hydraulic conductivity data to confirm that the model results in the preliminary demonstration are accurate.

(*4*) Until the time that EPA approves this final demonstration, the surface impoundment must remain in detection monitoring or the demonstration will be denied.

(*5*) If EPA tentatively approved the preliminary demonstration, EPA will then take action on the newly submitted final demonstration using the procedures in paragraphs (d)(2)(iv) through (vi) of this section.

(*6*) The public will have 30 days to comment but may comment only on the new information presented in the complete final demonstration or in EPA's tentative decision on the newly submitted demonstration.

(D) Upon submission of a request for an extension to the deadline for the demonstration due to analytical limitations pursuant to paragraph (d)(2)(ii)(A) of this section, the owner or operator must place the alternative liner demonstration extension request in the facility's operating record as required by § 257.105(f)(16).

(E) Upon submission of a preliminary demonstration pursuant to paragraph (d)(2)(ii)(C) of this section, the owner or operator must place the preliminary demonstration in the facility's operating record as required by § 257.105(f)(17).

(iii) *Application review*—(A) EPA will evaluate the application and may request additional information not required as part of the application as necessary to complete its review. Submission of a complete application will toll the facility's deadline to cease receipt of waste until issuance of a final decision under paragraph (d)(2)(iii)(C) of this section. Incomplete submissions will not toll the facility's deadline and will be rejected without further process.

(B) If the application is determined to be incomplete, EPA will notify the facility. The owner or operator must place the notification of an incomplete application in the facility's operating record as required by § 257.105(f)(18).

(C) EPA will publish a proposed decision on complete applications in a docket on *www.regulations.gov* for a 20-day comment period. After consideration of the comments, EPA will issue its decision on the application within sixty days of receiving a complete application.

(D) If the application is approved, the deadline to cease receipt of waste will be tolled until an alternate liner demonstration is determined to be incomplete or a final decision under paragraph (d)(2)(vi) of this section is issued.

(E) If the surface impoundment is determined by EPA to be ineligible to apply for an alternate liner demonstration, and the facility lacks alternative capacity to manage its CCR and/or non-CCR wastestreams, the owner or operator may apply for an alternative closure deadline in accordance with the procedures in § 257.103(f). The owner or operator will be given four months from the date of the ineligibility determination to apply for the alternative closure provisions in either § 257.103(f)(1) or (f)(2), during which time the facility's deadline to cease receipt of waste will be tolled.

(F) Upon receipt of a decision on the application pursuant to paragraph (d)(2)(iii)(C) of this section, the owner or operator must place the decision on the application in the facility's operating record as required by § 257.105(f)(19).

(iv) *Demonstration review*. EPA will evaluate the demonstration package and may request additional information not required as part of the demonstration as necessary to complete its review. Submission of a complete demonstration package will continue to toll the facility's deadline to cease receipt of waste into that CCR surface impoundment until issuance of a final decision under paragraph (d)(2)(vi) of this section. Upon a determination that a demonstration is incomplete the tolling of the facility's deadline will cease and the submission will be rejected without further process.

(v) *Proposed decision on demonstration*. EPA will publish a proposed decision on a complete demonstration package

in a docket on *www.regulations.gov* for a 30-day comment period.

(vi) *Final decision on demonstration.* After consideration of the comments, EPA will issue its decision on the alternate liner demonstration package within four months of receiving a complete demonstration package. Upon approval the facility may continue to operate the impoundment as long as the impoundment remains in detection monitoring. Upon detection of a statistically significant increase over background of a constituent listed on appendix III to this part, the facility must proceed in accordance with the requirements of paragraph (ix) of this section.

(vii) *Facility operating record requirements.* Upon receipt of the final decision on the alternate liner demonstration pursuant to paragraph (vi) of this section, the owner or operator must place the final decision in the facility's operating record as required by §257.105(f)(20).

(viii) *Effect of Demonstration Denial.* If EPA determines that the CCR surface impoundment's alternate liner does not meet the standard for approval in this paragraph (d), the owner or operator must cease receipt of waste and initiate closure as determined in EPA's decision. If the owner or operator needs to obtain alternate capacity, they may do so in accordance with the procedures in §257.103. The owner or operator will have four months from the date of EPA's decision to apply for an alternative closure deadline under either §257.103(f)(1) or (f)(2), during which time the facility's deadline to cease receipt of waste will be tolled.

(ix) *Loss of authorization*–(A) The owner or operator of the CCR unit must comply with all of the following upon determining that there is a statistically significant increase over background levels for one or more constituents listed in appendix III to this part pursuant to §257.94(e):

(*1*) In addition to the requirements specified in this paragraph (d), comply with the groundwater monitoring and corrective action procedures specified in §§257.90 through 257.98;

(*2*) Submit the notification required by §257.94(e)(3) to EPA within 14 days of placing the notification in the facility's operating record as required by §257.105(h)(5);

(*3*) Conduct intra-well analysis on each downgradient well to identify any trends of increasing concentrations as required by paragraph (d)(2)(ix)(B) of this section. The owner and operator must conduct the initial groundwater sampling and analysis for all constituents listed in appendix IV to this part according to the timeframes specified in §257.95(b);

(*4*) The owner or operator may elect to pursue an alternative source demonstration pursuant to §257.94(e)(2) that a source other than the CCR unit caused the contamination, or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality, provided that such alternative source demonstration must be conducted simultaneously with the sampling and analysis required by paragraph (d)(2)(ix)(A)(*3*) of this section. If the owner or operator believes that a successful demonstration has been made, the demonstration must be submitted to EPA for review and approval. The owner or operator must place the demonstration in the facility's operating record within the deadlines specified in §257.94(e)(2) and submit the demonstration to EPA within 14 days of placing the demonstration in the facility's operating record.

(*5*) The alternative source demonstration must be posted to the facility's publicly accessible CCR internet site and submitted to EPA within 14 days of completion. EPA will publish a proposed decision on the alternative source determination on *www.regulations.gov* for a 20-day comment period. After consideration of the comments, EPA will issue its decision. If the alternative source demonstration is approved, the owner or operator may cease conducting the trend analysis and return to detection monitoring. If the alternative source demonstration is denied, the owner or operator must either complete the trend analysis or cease receipt of waste. Upon receipt of the final decision on the alternative source demonstration, the owner or operator must place the final decision in

the facility's operating record as required by § 257.105(f)(22).

(B) *Trend analysis.* (*1*) Except as provided for in § 257.95(c), the owner or operator must collect a minimum of four independent samples from each well (background and downgradient) on a quarterly basis within the first year of triggering assessment monitoring and analyze each sample for all constituents listed in appendix IV to this part. Consistent with 257.95(b), the first samples must be collected within 90 days of triggering assessment monitoring. After the initial year of sampling, the owner or operator must then conduct sampling as prescribed in § 257.95(d)(1). After each sampling event, the owner or operator must update the trend analysis with the new sampling information.

(*2*) The owner or operator of the CCR surface impoundment must apply an appropriate statistical test to identify any trends of increasing concentrations within the monitoring data. For normally distributed datasets, linear regression will be used to identify trends and determine the associated magnitude. For non-normally distributed datasets, the Mann-Kendall test will be used to identify trends and the Theil-Sen trend line will be used to determine the associated magnitude. If a trend is identified, the owner or operator of the CCR surface impoundment will use the upper 95th percentile confidence limit on the trend line to estimate future concentrations. The owner or operator will project this trendline into the future for a duration set to the maximum number of years established in § 257.102 for closure of the surface impoundment.

(*3*) A report of the results of each sampling event, as well as the final trend analysis, must be posted to the facility's publicly accessible CCR internet site and submitted to EPA within 14 days of completion. The trend analysis submitted to EPA must include all data relied upon by the facility to support the analysis. EPA will publish a proposed decision on the trend analysis on *www.regulations.gov* for a 30-day comment period. After consideration of the comments, EPA will issue its decision. If the trend analysis shows the potential for a future exceedance of a groundwater protection standard, before the closure deadlines established in § 257.102, the CCR surface impoundment must cease receipt of waste by the date provided in the notice.

(C) If the trend analysis demonstrates the presence of a statistically significant trend of increasing concentration for one or more constituents listed in appendix IV of this part with potential to result in an exceedance of any groundwater protection standard before closure is complete, or if at any time one or more constituents listed in appendix IV of this part are detected at a statistically significant level above a groundwater protection standard, the authorization will be withdrawn. The provisions at § 257.96(g)(3) do not apply to CCR surface impoundments operating under an alternate liner demonstration. Upon receipt of a decision that the alternate liner demonstration has been withdrawn, the owner or operator must place the decision in the facility's operating record as required by § 257.105(f)(24).

(D) The onus remains on the owner or operator of the CCR surface impoundment at all times to demonstrate that the CCR surface impoundment meets the conditions for authorization under this section. If at any point, any condition for qualification under this section has not been met, EPA or the Participating State Director can without further notice or process deny or revoke the owner or operator's authorization under paragraph (d)(2)(ix) of this section.

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36452, July 30, 2018; 85 FR 53561, Aug. 28, 2020; 85 FR 72539, Nov. 12, 2020]

§ 257.72 Liner design criteria for new CCR surface impoundments and any lateral expansion of a CCR surface impoundment.

(a) New CCR surface impoundments and lateral expansions of existing and new CCR surface impoundments must be designed, constructed, operated, and maintained with either a composite liner or an alternative composite liner that meets the requirements of § 257.70(b) or (c).

(b) Any liner specified in this section must be installed to cover all surrounding earth likely to be in contact with CCR. Dikes shall not be constructed on top of the composite liner.

(c) Prior to construction of the CCR surface impoundment or any lateral expansion of a CCR surface impoundment, the owner or operator must obtain certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the design of the composite liner or, if applicable, the design of an alternative composite liner complies with the requirements of this section.

(d) Upon completion, the owner or operator must obtain certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the composite liner or if applicable, the alternative composite liner has been constructed in accordance with the requirements of this section.

(e) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(f), the notification requirements specified in §257.106(f), and the Internet requirements specified in §257.107(f).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36452, July 30, 2018]

§ 257.73 Structural integrity criteria for existing CCR surface impoundments.

(a) The requirements of paragraphs (a)(1) through (4) of this section apply to all existing CCR surface impoundments, except for those existing CCR surface impoundments that are incised CCR units. If an incised CCR surface impoundment is subsequently modified (e.g., a dike is constructed) such that the CCR unit no longer meets the definition of an incised CCR unit, the CCR unit is subject to the requirements of paragraphs (a)(1) through (4) of this section.

(1) No later than, December 17, 2015, the owner or operator of the CCR unit must place on or immediately adjacent to the CCR unit a permanent identification marker, at least six feet high showing the identification number of the CCR unit, if one has been assigned by the state, the name associated with the CCR unit and the name of the owner or operator of the CCR unit.

(2) *Periodic hazard potential classification assessments.* (i) The owner or operator of the CCR unit must conduct initial and periodic hazard potential classification assessments of the CCR unit according to the timeframes specified in paragraph (f) of this section. The owner or operator must document the hazard potential classification of each CCR unit as either a high hazard potential CCR surface impoundment, a significant hazard potential CCR surface impoundment, or a low hazard potential CCR surface impoundment. The owner or operator must also document the basis for each hazard potential classification.

(ii) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial hazard potential classification and each subsequent periodic classification specified in paragraph (a)(2)(i) of this section was conducted in accordance with the requirements of this section.

(3) *Emergency Action Plan (EAP)*—(i) *Development of the plan.* No later than April 17, 2017, the owner or operator of a CCR unit determined to be either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment under paragraph (a)(2) of this section must prepare and maintain a written EAP. At a minimum, the EAP must:

(A) Define the events or circumstances involving the CCR unit that represent a safety emergency, along with a description of the procedures that will be followed to detect a safety emergency in a timely manner;

(B) Define responsible persons, their respective responsibilities, and notification procedures in the event of a safety emergency involving the CCR unit;

(C) Provide contact information of emergency responders;

(D) Include a map which delineates the downstream area which would be affected in the event of a CCR unit failure and a physical description of the CCR unit; and

(E) Include provisions for an annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders.

(ii) *Amendment of the plan.* (A) The owner or operator of a CCR unit subject to the requirements of paragraph (a)(3)(i) of this section may amend the written EAP at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(f)(6). The owner or operator must amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.

(B) The written EAP must be evaluated, at a minimum, every five years to ensure the information required in paragraph (a)(3)(i) of this section is accurate. As necessary, the EAP must be updated and a revised EAP placed in the facility's operating record as required by § 257.105(f)(6).

(iii) *Changes in hazard potential classification.* (A) If the owner or operator of a CCR unit determines during a periodic hazard potential assessment that the CCR unit is no longer classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit is no longer subject to the requirement to prepare and maintain a written EAP beginning on the date the periodic hazard potential assessment documentation is placed in the facility's operating record as required by § 257.105(f)(5).

(B) If the owner or operator of a CCR unit classified as a low hazard potential CCR surface impoundment subsequently determines that the CCR unit is properly re-classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit must prepare a written EAP for the CCR unit as required by paragraph (a)(3)(i) of this section within six months of completing such periodic hazard potential assessment.

(iv) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the written EAP, and any subsequent amendment of the EAP, meets the requirements of paragraph (a)(3) of this section.

(v) *Activation of the EAP.* The EAP must be implemented once events or circumstances involving the CCR unit that represent a safety emergency are detected, including conditions identified during periodic structural stability assessments, annual inspections, and inspections by a qualified person.

(4) The CCR unit and surrounding areas must be designed, constructed, operated, and maintained with vegetated slopes of dikes not to exceed a height of 6 inches above the slope of the dike, except for slopes which are protected with an alternate form(s) of slope protection.

(b) The requirements of paragraphs (c) through (e) of this section apply to an owner or operator of an existing CCR surface impoundment that either:

(1) Has a height of five feet or more and a storage volume of 20 acre-feet or more; or

(2) Has a height of 20 feet or more.

(c)(1) No later than October 17, 2016, the owner or operator of the CCR unit must compile a history of construction, which shall contain, to the extent feasible, the information specified in paragraphs (c)(1)(i) through (xi) of this section.

(i) The name and address of the person(s) owning or operating the CCR unit; the name associated with the CCR unit; and the identification number of the CCR unit if one has been assigned by the state.

(ii) The location of the CCR unit identified on the most recent U.S. Geological Survey (USGS) 7½ minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(iii) A statement of the purpose for which the CCR unit is being used.

(iv) The name and size in acres of the watershed within which the CCR unit is located.

(v) A description of the physical and engineering properties of the foundation and abutment materials on which the CCR unit is constructed.

(vi) A statement of the type, size, range, and physical and engineering properties of the materials used in constructing each zone or stage of the CCR

unit; the method of site preparation and construction of each zone of the CCR unit; and the approximate dates of construction of each successive stage of construction of the CCR unit.

(vii) At a scale that details engineering structures and appurtenances relevant to the design, construction, operation, and maintenance of the CCR unit, detailed dimensional drawings of the CCR unit, including a plan view and cross sections of the length and width of the CCR unit, showing all zones, foundation improvements, drainage provisions, spillways, diversion ditches, outlets, instrument locations, and slope protection, in addition to the normal operating pool surface elevation and the maximum pool surface elevation following peak discharge from the inflow design flood, the expected maximum depth of CCR within the CCR surface impoundment, and any identifiable natural or manmade features that could adversely affect operation of the CCR unit due to malfunction or mis-operation.

(viii) A description of the type, purpose, and location of existing instrumentation.

(ix) Area-capacity curves for the CCR unit.

(x) A description of each spillway and diversion design features and capacities and calculations used in their determination.

(xi) The construction specifications and provisions for surveillance, maintenance, and repair of the CCR unit.

(xii) Any record or knowledge of structural instability of the CCR unit.

(2) *Changes to the history of construction*. If there is a significant change to any information compiled under paragraph (c)(1) of this section, the owner or operator of the CCR unit must update the relevant information and place it in the facility's operating record as required by § 257.105(f)(9).

(d) *Periodic structural stability assessments*. (1) The owner or operator of the CCR unit must conduct initial and periodic structural stability assessments and document whether the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering practices for the maximum volume of CCR and CCR wastewater which can be impounded therein. The assessment must, at a minimum, document whether the CCR unit has been designed, constructed, operated, and maintained with:

(i) Stable foundations and abutments;

(ii) Adequate slope protection to protect against surface erosion, wave action, and adverse effects of sudden drawdown;

(iii) Dikes mechanically compacted to a density sufficient to withstand the range of loading conditions in the CCR unit;

(iv) Vegetated slopes of dikes and surrounding areas not to exceed a height of six inches above the slope of the dike, except for slopes which have an alternate form or forms of slope protection;

(v) A single spillway or a combination of spillways configured as specified in paragraph (d)(1)(v)(A) of this section. The combined capacity of all spillways must be designed, constructed, operated, and maintained to adequately manage flow during and following the peak discharge from the event specified in paragraph (d)(1)(v)(B) of this section.

(A) All spillways must be either:

(*1*) Of non-erodible construction and designed to carry sustained flows; or

(*2*) Earth- or grass-lined and designed to carry short-term, infrequent flows at non-erosive velocities where sustained flows are not expected.

(B) The combined capacity of all spillways must adequately manage flow during and following the peak discharge from a:

(*1*) Probable maximum flood (PMF) for a high hazard potential CCR surface impoundment; or

(*2*) 1000-year flood for a significant hazard potential CCR surface impoundment; or

(*3*) 100-year flood for a low hazard potential CCR surface impoundment.

(vi) Hydraulic structures underlying the base of the CCR unit or passing through the dike of the CCR unit that maintain structural integrity and are free of significant deterioration, deformation, distortion, bedding deficiencies, sedimentation, and debris which may negatively affect the operation of the hydraulic structure; and

(vii) For CCR units with downstream slopes which can be inundated by the pool of an adjacent water body, such as a river, stream or lake, downstream slopes that maintain structural stability during low pool of the adjacent water body or sudden drawdown of the adjacent water body.

(2) The periodic assessment described in paragraph (d)(1) of this section must identify any structural stability deficiencies associated with the CCR unit in addition to recommending corrective measures. If a deficiency or a release is identified during the periodic assessment, the owner or operator unit must remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(3) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment was conducted in accordance with the requirements of this section.

(e) *Periodic safety factor assessments.* (1) The owner or operator must conduct an initial and periodic safety factor assessments for each CCR unit and document whether the calculated factors of safety for each CCR unit achieve the minimum safety factors specified in paragraphs (e)(1)(i) through (iv) of this section for the critical cross section of the embankment. The critical cross section is the cross section anticipated to be the most susceptible of all cross sections to structural failure based on appropriate engineering considerations, including loading conditions. The safety factor assessments must be supported by appropriate engineering calculations.

(i) The calculated static factor of safety under the long-term, maximum storage pool loading condition must equal or exceed 1.50.

(ii) The calculated static factor of safety under the maximum surcharge pool loading condition must equal or exceed 1.40.

(iii) The calculated seismic factor of safety must equal or exceed 1.00.

(iv) For dikes constructed of soils that have susceptibility to liquefaction, the calculated liquefaction factor of safety must equal or exceed 1.20.

(2) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment specified in paragraph (e)(1) of this section meets the requirements of this section.

(f) *Timeframes for periodic assessments*—(1) *Initial assessments.* Except as provided by paragraph (f)(2) of this section, the owner or operator of the CCR unit must complete the initial assessments required by paragraphs (a)(2), (d), and (e) of this section no later than October 17, 2016. The owner or operator has completed an initial assessment when the owner or operator has placed the assessment required by paragraphs (a)(2), (d), and (e) of this section in the facility's operating record as required by § 257.105(f)(5), (10), and (12).

(2) *Use of a previously completed assessment(s) in lieu of the initial assessment(s).* The owner or operator of the CCR unit may elect to use a previously completed assessment to serve as the initial assessment required by paragraphs (a)(2), (d), and (e) of this section provided that the previously completed assessment(s):

(i) Was completed no earlier than 42 months prior to October 17, 2016; and

(ii) Meets the applicable requirements of paragraphs (a)(2), (d), and (e) of this section.

(3) *Frequency for conducting periodic assessments.* The owner or operator of the CCR unit must conduct and complete the assessments required by paragraphs (a)(2), (d), and (e) of this section every five years. The date of completing the initial assessment is the basis for establishing the deadline to complete the first subsequent assessment. If the owner or operator elects to use a previously completed assessment(s) in lieu of the initial assessment as provided by paragraph (f)(2) of this section, the date of the report for the previously completed assessment is the basis for establishing the deadline to complete the first subsequent assessment. The owner or operator may complete any required assessment prior to the required deadline provided the owner or operator places the completed assessment(s) into the facility's operating record within a reasonable

amount of time. In all cases, the deadline for completing subsequent assessments is based on the date of completing the previous assessment. For purposes of this paragraph (f)(3), the owner or operator has completed an assessment when the relevant assessment(s) required by paragraphs (a)(2), (d), and (e) of this section has been placed in the facility's operating record as required by § 257.105(f)(5), (10), and (12).

(4) *Closure of the CCR unit.* An owner or operator of a CCR unit who either fails to complete a timely safety factor assessment or fails to demonstrate minimum safety factors as required by paragraph (e) of this section is subject to the requirements of § 257.101(b)(2).

(g) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(f), the notification requirements specified in § 257.106(f), and the internet requirements specified in § 257.107(f).

§ 257.74 Structural integrity criteria for new CCR surface impoundments and any lateral expansion of a CCR surface impoundment.

(a) The requirements of paragraphs (a)(1) through (4) of this section apply to all new CCR surface impoundments and any lateral expansion of a CCR surface impoundment, except for those new CCR surface impoundments that are incised CCR units. If an incised CCR surface impoundment is subsequently modified (e.g., a dike is constructed) such that the CCR unit no longer meets the definition of an incised CCR unit, the CCR unit is subject to the requirements of paragraphs (a)(1) through (4) of this section.

(1) No later than the initial receipt of CCR, the owner or operator of the CCR unit must place on or immediately adjacent to the CCR unit a permanent identification marker, at least six feet high showing the identification number of the CCR unit, if one has been assigned by the state, the name associated with the CCR unit and the name of the owner or operator of the CCR unit.

(2) *Periodic hazard potential classification assessments.* (i) The owner or operator of the CCR unit must conduct initial and periodic hazard potential classification assessments of the CCR unit according to the timeframes specified in paragraph (f) of this section. The owner or operator must document the hazard potential classification of each CCR unit as either a high hazard potential CCR surface impoundment, a significant hazard potential CCR surface impoundment, or a low hazard potential CCR surface impoundment. The owner or operator must also document the basis for each hazard potential classification.

(ii) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial hazard potential classification and each subsequent periodic classification specified in paragraph (a)(2)(i) of this section was conducted in accordance with the requirements of this section.

(3) *Emergency Action Plan (EAP)*—(i) *Development of the plan.* Prior to the initial receipt of CCR in the CCR unit, the owner or operator of a CCR unit determined to be either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment under paragraph (a)(2) of this section must prepare and maintain a written EAP. At a minimum, the EAP must:

(A) Define the events or circumstances involving the CCR unit that represent a safety emergency, along with a description of the procedures that will be followed to detect a safety emergency in a timely manner;

(B) Define responsible persons, their respective responsibilities, and notification procedures in the event of a safety emergency involving the CCR unit;

(C) Provide contact information of emergency responders;

(D) Include a map which delineates the downstream area which would be affected in the event of a CCR unit failure and a physical description of the CCR unit; and

(E) Include provisions for an annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders.

(ii) *Amendment of the plan.* (A) The owner or operator of a CCR unit subject to the requirements of paragraph (a)(3)(i) of this section may amend the written EAP at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(f)(6). The owner or operator must amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.

(B) The written EAP must be evaluated, at a minimum, every five years to ensure the information required in paragraph (a)(3)(i) of this section is accurate. As necessary, the EAP must be updated and a revised EAP placed in the facility's operating record as required by § 257.105(f)(6).

(iii) *Changes in hazard potential classification.* (A) If the owner or operator of a CCR unit determines during a periodic hazard potential assessment that the CCR unit is no longer classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit is no longer subject to the requirement to prepare and maintain a written EAP beginning on the date the periodic hazard potential assessment documentation is placed in the facility's operating record as required by § 257.105(f)(5).

(B) If the owner or operator of a CCR unit classified as a low hazard potential CCR surface impoundment subsequently determines that the CCR unit is properly re-classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit must prepare a written EAP for the CCR unit as required by paragraph (a)(3)(i) of this section within six months of completing such periodic hazard potential assessment.

(iv) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the written EAP, and any subsequent amendment of the EAP, meets the requirements of paragraph (a)(3) of this section.

(v) *Activation of the EAP.* The EAP must be implemented once events or circumstances involving the CCR unit that represent a safety emergency are detected, including conditions identified during periodic structural stability assessments, annual inspections, and inspections by a qualified person.

(4) The CCR unit and surrounding areas must be designed, constructed, operated, and maintained with vegetated slopes of dikes not to exceed a height of six inches above the slope of the dike, except for slopes which are protected with an alternate form(s) of slope protection.

(b) The requirements of paragraphs (c) through (e) of this section apply to an owner or operator of a new CCR surface impoundment and any lateral expansion of a CCR surface impoundment that either:

(1) Has a height of five feet or more and a storage volume of 20 acre-feet or more; or

(2) Has a height of 20 feet or more.

(c)(1) No later than the initial receipt of CCR in the CCR unit, the owner or operator unit must compile the design and construction plans for the CCR unit, which must include, to the extent feasible, the information specified in paragraphs (c)(1)(i) through (xi) of this section.

(i) The name and address of the person(s) owning or operating the CCR unit; the name associated with the CCR unit; and the identification number of the CCR unit if one has been assigned by the state.

(ii) The location of the CCR unit identified on the most recent U.S. Geological Survey (USGS) 7½ minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(iii) A statement of the purpose for which the CCR unit is being used.

(iv) The name and size in acres of the watershed within which the CCR unit is located.

(v) A description of the physical and engineering properties of the foundation and abutment materials on which the CCR unit is constructed.

(vi) A statement of the type, size, range, and physical and engineering properties of the materials used in constructing each zone or stage of the CCR unit; the method of site preparation and construction of each zone of the

CCR unit; and the dates of construction of each successive stage of construction of the CCR unit.

(vii) At a scale that details engineering structures and appurtenances relevant to the design, construction, operation, and maintenance of the CCR unit, detailed dimensional drawings of the CCR unit, including a plan view and cross sections of the length and width of the CCR unit, showing all zones, foundation improvements, drainage provisions, spillways, diversion ditches, outlets, instrument locations, and slope protection, in addition to the normal operating pool surface elevation and the maximum pool surface elevation following peak discharge from the inflow design flood, the expected maximum depth of CCR within the CCR surface impoundment, and any identifiable natural or manmade features that could adversely affect operation of the CCR unit due to malfunction or mis-operation.

(viii) A description of the type, purpose, and location of existing instrumentation.

(ix) Area-capacity curves for the CCR unit.

(x) A description of each spillway and diversion design features and capacities and calculations used in their determination.

(xi) The construction specifications and provisions for surveillance, maintenance, and repair of the CCR unit.

(xii) Any record or knowledge of structural instability of the CCR unit.

(2) *Changes in the design and construction*. If there is a significant change to any information compiled under paragraph (c)(1) of this section, the owner or operator of the CCR unit must update the relevant information and place it in the facility's operating record as required by §257.105(f)(13).

(d) *Periodic structural stability assessments*. (1) The owner or operator of the CCR unit must conduct initial and periodic structural stability assessments and document whether the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering practices for the maximum volume of CCR and CCR wastewater which can be impounded therein. The assessment must, at a minimum, document whether the CCR unit has been designed, constructed, operated, and maintained with:

(i) Stable foundations and abutments;

(ii) Adequate slope protection to protect against surface erosion, wave action, and adverse effects of sudden drawdown;

(iii) Dikes mechanically compacted to a density sufficient to withstand the range of loading conditions in the CCR unit;

(iv) Vegetated slopes of dikes and surrounding areas not to exceed a height of six inches above the slope of the dike, except for slopes which have an alternate form or forms of slope protection;

(v) A single spillway or a combination of spillways configured as specified in paragraph (d)(1)(v)(A) of this section. The combined capacity of all spillways must be designed, constructed, operated, and maintained to adequately manage flow during and following the peak discharge from the event specified in paragraph (d)(1)(v)(B) of this section.

(A) All spillways must be either:

(*1*) Of non-erodible construction and designed to carry sustained flows; or

(*2*) Earth- or grass-lined and designed to carry short-term, infrequent flows at non-erosive velocities where sustained flows are not expected.

(B) The combined capacity of all spillways must adequately manage flow during and following the peak discharge from a:

(*1*) Probable maximum flood (PMF) for a high hazard potential CCR surface impoundment; or

(*2*) 1000-year flood for a significant hazard potential CCR surface impoundment; or

(*3*) 100-year flood for a low hazard potential CCR surface impoundment.

(vi) Hydraulic structures underlying the base of the CCR unit or passing through the dike of the CCR unit that maintain structural integrity and are free of significant deterioration, deformation, distortion, bedding deficiencies, sedimentation, and debris which may negatively affect the operation of the hydraulic structure; and

(vii) For CCR units with downstream slopes which can be inundated by the

pool of an adjacent water body, such as a river, stream or lake, downstream slopes that maintain structural stability during low pool of the adjacent water body or sudden drawdown of the adjacent water body.

(2) The periodic assessment described in paragraph (d)(1) of this section must identify any structural stability deficiencies associated with the CCR unit in addition to recommending corrective measures. If a deficiency or a release is identified during the periodic assessment, the owner or operator unit must remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(3) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment was conducted in accordance with the requirements of this section.

(e) *Periodic safety factor assessments*. (1) The owner or operator must conduct an initial and periodic safety factor assessments for each CCR unit and document whether the calculated factors of safety for each CCR unit achieve the minimum safety factors specified in paragraphs (e)(1)(i) through (v) of this section for the critical cross section of the embankment. The critical cross section is the cross section anticipated to be the most susceptible of all cross sections to structural failure based on appropriate engineering considerations, including loading conditions. The safety factor assessments must be supported by appropriate engineering calculations.

(i) The calculated static factor of safety under the end-of-construction loading condition must equal or exceed 1.30. The assessment of this loading condition is only required for the initial safety factor assessment and is not required for subsequent assessments.

(ii) The calculated static factor of safety under the long-term, maximum storage pool loading condition must equal or exceed 1.50.

(iii) The calculated static factor of safety under the maximum surcharge pool loading condition must equal or exceed 1.40.

(iv) The calculated seismic factor of safety must equal or exceed 1.00.

(v) For dikes constructed of soils that have susceptibility to liquefaction, the calculated liquefaction factor of safety must equal or exceed 1.20.

(2) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment specified in paragraph (e)(1) of this section meets the requirements of this section.

(f) *Timeframes for periodic assessments*—(1) *Initial assessments*. Except as provided by paragraph (f)(2) of this section, the owner or operator of the CCR unit must complete the initial assessments required by paragraphs (a)(2), (d), and (e) of this section prior to the initial receipt of CCR in the unit. The owner or operator has completed an initial assessment when the owner or operator has placed the assessment required by paragraphs (a)(2), (d), and (e) of this section in the facility's operating record as required by §257.105(f)(5), (10), and (12).

(2) *Frequency for conducting periodic assessments*. The owner or operator of the CCR unit must conduct and complete the assessments required by paragraphs (a)(2), (d), and (e) of this section every five years. The date of completing the initial assessment is the basis for establishing the deadline to complete the first subsequent assessment. The owner or operator may complete any required assessment prior to the required deadline provided the owner or operator places the completed assessment(s) into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent assessments is based on the date of completing the previous assessment. For purposes of this paragraph (f)(2), the owner or operator has completed an assessment when the relevant assessment(s) required by paragraphs (a)(2), (d), and (e) of this section has been placed in the facility's operating record as required by §257.105(f)(5), (10), and (12).

(3) *Failure to document minimum safety factors during the initial assessment*. Until the date an owner or operator of

a CCR unit documents that the calculated factors of safety achieve the minimum safety factors specified in paragraphs (e)(1)(i) through (v) of this section, the owner or operator is prohibited from placing CCR in such unit.

(4) *Closure of the CCR unit.* An owner or operator of a CCR unit who either fails to complete a timely periodic safety factor assessment or fails to demonstrate minimum safety factors as required by paragraph (e) of this section is subject to the requirements of § 257.101(c).

(g) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(f), the notification requirements specified in § 257.106(f), and the internet requirements specified in § 257.107(f).

OPERATING CRITERIA

§ 257.80 Air criteria.

(a) The owner or operator of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit must adopt measures that will effectively minimize CCR from becoming airborne at the facility, including CCR fugitive dust originating from CCR units, roads, and other CCR management and material handling activities.

(b) *CCR fugitive dust control plan.* The owner or operator of the CCR unit must prepare and operate in accordance with a CCR fugitive dust control plan as specified in paragraphs (b)(1) through (7) of this section. This requirement applies in addition to, not in place of, any applicable standards under the Occupational Safety and Health Act.

(1) The CCR fugitive dust control plan must identify and describe the CCR fugitive dust control measures the owner or operator will use to minimize CCR from becoming airborne at the facility. The owner or operator must select, and include in the CCR fugitive dust control plan, the CCR fugitive dust control measures that are most appropriate for site conditions, along with an explanation of how the measures selected are applicable and appropriate for site conditions. Examples of control measures that may be appropriate include: Locating CCR inside an enclosure or partial enclosure; operating a water spray or fogging system; reducing fall distances at material drop points; using wind barriers, compaction, or vegetative covers; establishing and enforcing reduced vehicle speed limits; paving and sweeping roads; covering trucks transporting CCR; reducing or halting operations during high wind events; or applying a daily cover.

(2) If the owner or operator operates a CCR landfill or any lateral expansion of a CCR landfill, the CCR fugitive dust control plan must include procedures to emplace CCR as conditioned CCR. Conditioned CCR means wetting CCR with water to a moisture content that will prevent wind dispersal, but will not result in free liquids. In lieu of water, CCR conditioning may be accomplished with an appropriate chemical dust suppression agent.

(3) The CCR fugitive dust control plan must include procedures to log citizen complaints received by the owner or operator involving CCR fugitive dust events at the facility.

(4) The CCR fugitive dust control plan must include a description of the procedures the owner or operator will follow to periodically assess the effectiveness of the control plan.

(5) The owner or operator of a CCR unit must prepare an initial CCR fugitive dust control plan for the facility no later than October 19, 2015, or by initial receipt of CCR in any CCR unit at the facility if the owner or operator becomes subject to this subpart after October 19, 2015. The owner or operator has completed the initial CCR fugitive dust control plan when the plan has been placed in the facility's operating record as required by § 257.105(g)(1).

(6) *Amendment of the plan.* The owner or operator of a CCR unit subject to the requirements of this section may amend the written CCR fugitive dust control plan at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(g)(1). The owner or operator must amend the written plan whenever there is a change in conditions that would substantially affect the written plan in effect, such as the construction and operation of a new CCR unit.

(7) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the initial CCR fugitive dust control plan, or any subsequent amendment of it, meets the requirements of this section.

(c) *Annual CCR fugitive dust control report.* The owner or operator of a CCR unit must prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken. The initial annual report must be completed no later than 14 months after placing the initial CCR fugitive dust control plan in the facility's operating record. The deadline for completing a subsequent report is one year after the date of completing the previous report. For purposes of this paragraph (c), the owner or operator has completed the annual CCR fugitive dust control report when the plan has been placed in the facility's operating record as required by § 257.105(g)(2).

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(g), the notification requirements specified in § 257.106(g), and the internet requirements specified in § 257.107(g).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36452, July 30, 2018]

§ 257.81 Run-on and run-off controls for CCR landfills.

(a) The owner or operator of an existing or new CCR landfill or any lateral expansion of a CCR landfill must design, construct, operate, and maintain:

(1) A run-on control system to prevent flow onto the active portion of the CCR unit during the peak discharge from a 24-hour, 25-year storm; and

(2) A run-off control system from the active portion of the CCR unit to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(b) Run-off from the active portion of the CCR unit must be handled in accordance with the surface water requirements under § 257.3–3.

(c) *Run-on and run-off control system plan*—(1) *Content of the plan.* The owner or operator must prepare initial and periodic run-on and run-off control system plans for the CCR unit according to the timeframes specified in paragraphs (c)(3) and (4) of this section. These plans must document how the run-on and run-off control systems have been designed and constructed to meet the applicable requirements of this section. Each plan must be supported by appropriate engineering calculations. The owner or operator has completed the initial run-on and run-off control system plan when the plan has been placed in the facility's operating record as required by § 257.105(g)(3).

(2) *Amendment of the plan.* The owner or operator may amend the written run-on and run-off control system plan at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(g)(3). The owner or operator must amend the written run-on and run-off control system plan whenever there is a change in conditions that would substantially affect the written plan in effect.

(3) *Timeframes for preparing the initial plan*—(i) *Existing CCR landfills.* The owner or operator of the CCR unit must prepare the initial run-on and run-off control system plan no later than October 17, 2016.

(ii) *New CCR landfills and any lateral expansion of a CCR landfill.* The owner or operator must prepare the initial run-on and run-off control system plan no later than the date of initial receipt of CCR in the CCR unit.

(4) *Frequency for revising the plan.* The owner or operator of the CCR unit must prepare periodic run-on and run-off control system plans required by paragraph (c)(1) of this section every five years. The date of completing the initial plan is the basis for establishing the deadline to complete the first subsequent plan. The owner or operator may complete any required plan prior to the required deadline provided the owner or operator places the completed plan into the facility's operating record within a reasonable amount of

time. In all cases, the deadline for completing a subsequent plan is based on the date of completing the previous plan. For purposes of this paragraph (c)(4), the owner or operator has completed a periodic run-on and run-off control system plan when the plan has been placed in the facility's operating record as required by § 257.105(g)(3).

(5) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the initial and periodic run-on and run-off control system plans meet the requirements of this section.

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(g), the notification requirements specified in § 257.106(g), and the internet requirements specified in § 257.107(g).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36452, July 30, 2018]

§ 257.82 Hydrologic and hydraulic capacity requirements for CCR surface impoundments.

(a) The owner or operator of an existing or new CCR surface impoundment or any lateral expansion of a CCR surface impoundment must design, construct, operate, and maintain an inflow design flood control system as specified in paragraphs (a)(1) and (2) of this section.

(1) The inflow design flood control system must adequately manage flow into the CCR unit during and following the peak discharge of the inflow design flood specified in paragraph (a)(3) of this section.

(2) The inflow design flood control system must adequately manage flow from the CCR unit to collect and control the peak discharge resulting from the inflow design flood specified in paragraph (a)(3) of this section.

(3) The inflow design flood is:

(i) For a high hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the probable maximum flood;

(ii) For a significant hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 1,000-year flood;

(iii) For a low hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 100-year flood; or

(iv) For an incised CCR surface impoundment, the 25-year flood.

(b) Discharge from the CCR unit must be handled in accordance with the surface water requirements under § 257.3–3.

(c) *Inflow design flood control system plan*—(1) *Content of the plan.* The owner or operator must prepare initial and periodic inflow design flood control system plans for the CCR unit according to the timeframes specified in paragraphs (c)(3) and (4) of this section. These plans must document how the inflow design flood control system has been designed and constructed to meet the requirements of this section. Each plan must be supported by appropriate engineering calculations. The owner or operator of the CCR unit has completed the inflow design flood control system plan when the plan has been placed in the facility's operating record as required by § 257.105(g)(4).

(2) *Amendment of the plan.* The owner or operator of the CCR unit may amend the written inflow design flood control system plan at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(g)(4). The owner or operator must amend the written inflow design flood control system plan whenever there is a change in conditions that would substantially affect the written plan in effect.

(3) *Timeframes for preparing the initial plan*—(i) *Existing CCR surface impoundments.* The owner or operator of the CCR unit must prepare the initial inflow design flood control system plan no later than October 17, 2016.

(ii) *New CCR surface impoundments and any lateral expansion of a CCR surface impoundment.* The owner or operator must prepare the initial inflow design flood control system plan no later than the date of initial receipt of CCR in the CCR unit.

(4) *Frequency for revising the plan.* The owner or operator must prepare periodic inflow design flood control system plans required by paragraph (c)(1) of

this section every five years. The date of completing the initial plan is the basis for establishing the deadline to complete the first periodic plan. The owner or operator may complete any required plan prior to the required deadline provided the owner or operator places the completed plan into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing a subsequent plan is based on the date of completing the previous plan. For purposes of this paragraph (c)(4), the owner or operator has completed an inflow design flood control system plan when the plan has been placed in the facility's operating record as required by §257.105(g)(4).

(5) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the initial and periodic inflow design flood control system plans meet the requirements of this section.

(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(g), the notification requirements specified in §257.106(g), and the internet requirements specified in §257.107(g).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36451, July 30, 2018]

§ 257.83 Inspection requirements for CCR surface impoundments.

(a) *Inspections by a qualified person.* (1) All CCR surface impoundments and any lateral expansion of a CCR surface impoundment must be examined by a qualified person as follows:

(i) At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit;

(ii) At intervals not exceeding seven days, inspect the discharge of all outlets of hydraulic structures which pass underneath the base of the surface impoundment or through the dike of the CCR unit for abnormal discoloration, flow or discharge of debris or sediment; and

(iii) At intervals not exceeding 30 days, monitor all CCR unit instrumentation.

(iv) The results of the inspection by a qualified person must be recorded in the facility's operating record as required by §257.105(g)(5).

(2) *Timeframes for inspections by a qualified person*—(i) *Existing CCR surface impoundments.* The owner or operator of the CCR unit must initiate the inspections required under paragraph (a) of this section no later than October 19, 2015.

(ii) *New CCR surface impoundments and any lateral expansion of a CCR surface impoundment.* The owner or operator of the CCR unit must initiate the inspections required under paragraph (a) of this section upon initial receipt of CCR by the CCR unit.

(b) Annual i*nspections by a qualified professional engineer.* (1) If the existing or new CCR surface impoundment or any lateral expansion of the CCR surface impoundment is subject to the periodic structural stability assessment requirements under §257.73(d) or §257.74(d), the CCR unit must additionally be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. The inspection must, at a minimum, include:

(i) A review of available information regarding the status and condition of the CCR unit, including, but not limited to, files available in the operating record (e.g., CCR unit design and construction information required by §§257.73(c)(1) and 257.74(c)(1), previous periodic structural stability assessments required under §§257.73(d) and 257.74(d), the results of inspections by a qualified person, and results of previous annual inspections);

(ii) A visual inspection of the CCR unit to identify signs of distress or malfunction of the CCR unit and appurtenant structures; and

(iii) A visual inspection of any hydraulic structures underlying the base of the CCR unit or passing through the

dike of the CCR unit for structural integrity and continued safe and reliable operation.

(2) *Inspection report.* The qualified professional engineer must prepare a report following each inspection that addresses the following:

(i) Any changes in geometry of the impounding structure since the previous annual inspection;

(ii) The location and type of existing instrumentation and the maximum recorded readings of each instrument since the previous annual inspection;

(iii) The approximate minimum, maximum, and present depth and elevation of the impounded water and CCR since the previous annual inspection;

(iv) The storage capacity of the impounding structure at the time of the inspection;

(v) The approximate volume of the impounded water and CCR at the time of the inspection;

(vi) Any appearances of an actual or potential structural weakness of the CCR unit, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR unit and appurtenant structures; and

(vii) Any other change(s) which may have affected the stability or operation of the impounding structure since the previous annual inspection.

(3) *Timeframes for conducting the initial inspection*—(i) *Existing CCR surface impoundments.* The owner or operator of the CCR unit must complete the initial inspection required by paragraphs (b)(1) and (2) of this section no later than January 19, 2016.

(ii) *New CCR surface impoundments and any lateral expansion of a CCR surface impoundment.* The owner or operator of the CCR unit must complete the initial annual inspection required by paragraphs (b)(1) and (2) of this section is completed no later than 14 months following the date of initial receipt of CCR in the CCR unit.

(4) *Frequency of inspections.* (i) Except as provided for in paragraph (b)(4)(ii) of this section, the owner or operator of the CCR unit must conduct the inspection required by paragraphs (b)(1) and (2) of this section on an annual basis. The date of completing the initial inspection report is the basis for establishing the deadline to complete the first subsequent inspection. Any required inspection may be conducted prior to the required deadline provided the owner or operator places the completed inspection report into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent inspection reports is based on the date of completing the previous inspection report. For purposes of this section, the owner or operator has completed an inspection when the inspection report has been placed in the facility's operating record as required by § 257.105(g)(6).

(ii) In any calendar year in which both the periodic inspection by a qualified professional engineer and the quinquennial (occurring every five years) structural stability assessment by a qualified professional engineer required by §§ 257.73(d) and 257.74(d) are required to be completed, the annual inspection is not required, provided the structural stability assessment is completed during the calendar year. If the annual inspection is not conducted in a year as provided by this paragraph (b)(4)(ii), the deadline for completing the next annual inspection is one year from the date of completing the quinquennial structural stability assessment.

(5) If a deficiency or release is identified during an inspection, the owner or operator must remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(c) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(g), the notification requirements specified in § 257.106(g), and the internet requirements specified in § 257.107(g).

[80 FR 21468, Apr. 17, 2015, as amended at 80 FR 37992, July 2, 2015]

§ 257.84 Inspection requirements for CCR landfills.

(a) *Inspections by a qualified person.* (1) All CCR landfills and any lateral expansion of a CCR landfill must be examined by a qualified person as follows:

(i) At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit; and

(ii) The results of the inspection by a qualified person must be recorded in the facility's operating record as required by § 257.105(g)(8).

(2) *Timeframes for inspections by a qualified person*—(i) *Existing CCR landfills.* The owner or operator of the CCR unit must initiate the inspections required under paragraph (a) of this section no later than October 19, 2015.

(ii) *New CCR landfills and any lateral expansion of a CCR landfill.* The owner or operator of the CCR unit must initiate the inspections required under paragraph (a) of this section upon initial receipt of CCR by the CCR unit.

(b) *Annual inspections by a qualified professional engineer.* (1) Existing and new CCR landfills and any lateral expansion of a CCR landfill must be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. The inspection must, at a minimum, include:

(i) A review of available information regarding the status and condition of the CCR unit, including, but not limited to, files available in the operating record (e.g., the results of inspections by a qualified person, and results of previous annual inspections); and

(ii) A visual inspection of the CCR unit to identify signs of distress or malfunction of the CCR unit.

(2) *Inspection report.* The qualified professional engineer must prepare a report following each inspection that addresses the following:

(i) Any changes in geometry of the structure since the previous annual inspection;

(ii) The approximate volume of CCR contained in the unit at the time of the inspection;

(iii) Any appearances of an actual or potential structural weakness of the CCR unit, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR unit; and

(iv) Any other change(s) which may have affected the stability or operation of the CCR unit since the previous annual inspection.

(3) *Timeframes for conducting the initial inspection*—(i) *Existing CCR landfills.* The owner or operator of the CCR unit must complete the initial inspection required by paragraphs (b)(1) and (2) of this section no later than January 19, 2016.

(ii) *New CCR landfills and any lateral expansion of a CCR landfill.* The owner or operator of the CCR unit must complete the initial annual inspection required by paragraphs (b)(1) and (2) of this section no later than 14 months following the date of initial receipt of CCR in the CCR unit.

(4) *Frequency of inspections.* The owner or operator of the CCR unit must conduct the inspection required by paragraphs (b)(1) and (2) of this section on an annual basis. The date of completing the initial inspection report is the basis for establishing the deadline to complete the first subsequent inspection. Any required inspection may be conducted prior to the required deadline provided the owner or operator places the completed inspection report into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent inspection reports is based on the date of completing the previous inspection report. For purposes of this section, the owner or operator has completed an inspection when the inspection report has been placed in the facility's operating record as required by § 257.105(g)(9).

(5) If a deficiency or release is identified during an inspection, the owner or operator must remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(c) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(g), the notification requirements specified in § 257.106(g), and the internet requirements specified in § 257.107(g).

[80 FR 21468, Apr. 17, 2015, as amended at 80 FR 37992, July 2, 2015]

GROUNDWATER MONITORING AND CORRECTIVE ACTION

§ 257.90 Applicability.

(a) All CCR landfills, CCR surface impoundments, and lateral expansions of CCR units are subject to the groundwater monitoring and corrective action requirements under §§ 257.90 through 257.99, except as provided in paragraph (g) of this section.

(b) *Initial timeframes*—(1) *Existing CCR landfills and existing CCR surface impoundments.* No later than October 17, 2017, the owner or operator of the CCR unit must be in compliance with the following groundwater monitoring requirements:

(i) Install the groundwater monitoring system as required by § 257.91;

(ii) Develop the groundwater sampling and analysis program to include selection of the statistical procedures to be used for evaluating groundwater monitoring data as required by § 257.93;

(iii) Initiate the detection monitoring program to include obtaining a minimum of eight independent samples for each background and downgradient well as required by § 257.94(b); and

(iv) Begin evaluating the groundwater monitoring data for statistically significant increases over background levels for the constituents listed in appendix III of this part as required by § 257.94.

(2) *New CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units.* Prior to initial receipt of CCR by the CCR unit, the owner or operator must be in compliance with the groundwater monitoring requirements specified in paragraph (b)(1)(i) and (ii) of this section. In addition, the owner or operator of the CCR unit must initiate the detection monitoring program to include obtaining a minimum of eight independent samples for each background well as required by § 257.94(b).

(c) Once a groundwater monitoring system and groundwater monitoring program has been established at the CCR unit as required by this subpart, the owner or operator must conduct groundwater monitoring and, if necessary, corrective action throughout the active life and post-closure care period of the CCR unit.

(d) In the event of a release from a CCR unit, the owner or operator must immediately take all necessary measures to control the source(s) of releases so as to reduce or eliminate, to the maximum extent feasible, further releases of contaminants into the environment. The owner or operator of the CCR unit must comply with all applicable requirements in §§ 257.96, 257.97, and 257.98.

(e) *Annual groundwater monitoring and corrective action report.* For existing CCR landfills and existing CCR surface impoundments, no later than January 31, 2018, and annually thereafter, the owner or operator must prepare an annual groundwater monitoring and corrective action report. For new CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units, the owner or operator must prepare the initial annual groundwater monitoring and corrective action report no later than January 31 of the year following the calendar year a groundwater monitoring system has been established for such CCR unit as required by this subpart, and annually thereafter. For the preceding calendar year, the annual report must document the status of the groundwater monitoring and corrective action program for the CCR unit, summarize key actions completed, describe any problems encountered, discuss actions to resolve the problems, and project key activities for the upcoming year. For purposes of this section, the owner or operator has prepared the annual report when the report is placed in the facility's operating record as required by § 257.105(h)(1). At a minimum, the annual groundwater monitoring and corrective action report must contain the following information, to the extent available:

(1) A map, aerial image, or diagram showing the CCR unit and all background (or upgradient) and downgradient monitoring wells, to include the well identification numbers, that are part of the groundwater monitoring program for the CCR unit;

(2) Identification of any monitoring wells that were installed or decommissioned during the preceding year, along with a narrative description of why those actions were taken;

(3) In addition to all the monitoring data obtained under §§ 257.90 through 257.98, a summary including the number of groundwater samples that were collected for analysis for each background and downgradient well, the dates the samples were collected, and whether the sample was required by the detection monitoring or assessment monitoring programs;

(4) A narrative discussion of any transition between monitoring programs (e.g., the date and circumstances for transitioning from detection monitoring to assessment monitoring in addition to identifying the constituent(s) detected at a statistically significant increase over background levels); and

(5) Other information required to be included in the annual report as specified in §§ 257.90 through 257.98.

(6) A section at the beginning of the annual report that provides an overview of the current status of groundwater monitoring and corrective action programs for the CCR unit. At a minimum, the summary must specify all of the following:

(i) At the start of the current annual reporting period, whether the CCR unit was operating under the detection monitoring program in § 257.94 or the assessment monitoring program in § 257.95;

(ii) At the end of the current annual reporting period, whether the CCR unit was operating under the detection monitoring program in § 257.94 or the assessment monitoring program in § 257.95;

(iii) If it was determined that there was a statistically significant increase over background for one or more constituents listed in appendix III to this part pursuant to § 257.94(e):

(A) Identify those constituents listed in appendix III to this part and the names of the monitoring wells associated with such an increase; and

(B) Provide the date when the assessment monitoring program was initiated for the CCR unit.

(iv) If it was determined that there was a statistically significant level above the groundwater protection standard for one or more constituents listed in appendix IV to this part pursuant to § 257.95(g) include all of the following:

(A) Identify those constituents listed in appendix IV to this part and the names of the monitoring wells associated with such an increase;

(B) Provide the date when the assessment of corrective measures was initiated for the CCR unit;

(C) Provide the date when the public meeting was held for the assessment of corrective measures for the CCR unit; and

(D) Provide the date when the assessment of corrective measures was completed for the CCR unit.

(v) Whether a remedy was selected pursuant to § 257.97 during the current annual reporting period, and if so, the date of remedy selection; and

(vi) Whether remedial activities were initiated or are ongoing pursuant to § 257.98 during the current annual reporting period.

(f) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(h), the notification requirements specified in § 257.106(h), and the internet requirements specified in § 257.107(h).

(g) *Suspension of groundwater monitoring requirements.* (1) The Participating State Director or EPA where EPA is the permitting authority may suspend the groundwater monitoring requirements under §§ 257.90 through 257.95 for a CCR unit for a period of up to ten years, if the owner or operator provides written documentation that, based on the characteristics of the site in which the CCR unit is located, there is no potential for migration of any of the constituents listed in appendices III and IV to this part from that CCR unit to the uppermost aquifer during the active life of the CCR unit and the post-closure care period. This demonstration must be certified by a qualified professional engineer and approved by the Participating State Director or EPA where EPA is the permitting authority, and must be based upon:

(i) Site-specific field collected measurements, sampling, and analysis of physical, chemical, and biological processes affecting contaminant fate and transport, including at a minimum, the information necessary to evaluate or interpret the effects of the following

properties or processes on contaminant fate and transport:

(A) Aquifer Characteristics, including hydraulic conductivity, hydraulic gradient, effective porosity, aquifer thickness, degree of saturation, stratigraphy, degree of fracturing and secondary porosity of soils and bedrock, aquifer heterogeneity, groundwater discharge, and groundwater recharge areas;

(B) Waste Characteristics, including quantity, type, and origin;

(C) Climatic Conditions, including annual precipitation, leachate generation estimates, and effects on leachate quality;

(D) Leachate Characteristics, including leachate composition, solubility, density, the presence of immiscible constituents, Eh, and pH; and

(E) Engineered Controls, including liners, cover systems, and aquifer controls (*e.g.*, lowering the water table). These must be evaluated under design and failure conditions to estimate their long-term residual performance.

(ii) Contaminant fate and transport predictions that maximize contaminant migration and consider impacts on human health and the environment.

(2) The owner or operator of the CCR unit may renew this suspension for additional ten year periods by submitting written documentation that the site characteristics continue to ensure there will be no potential for migration of any of the constituents listed in Appendices III and IV of this part. The documentation must include, at a minimum, the information specified in paragraphs (g)(1)(i) and (g)(1)(ii) of this section and a certification by a qualified professional engineer and approved by the State Director or EPA where EPA is the permitting authority. The owner or operator must submit the documentation supporting their renewal request for the state's or EPA's review and approval of their extension one year before the groundwater monitoring suspension is due to expire. If the existing groundwater monitoring extension expires or is not approved, the owner or operator must begin groundwater monitoring according to paragraph (a) of this section within 90 days. The owner or operator may continue to renew the suspension for ten-year periods, provided the owner or operator demonstrate that the standard in paragraph (g)(1) of this section continues to be met for the unit. The owner or operator must place each completed demonstration in the facility's operating record.

(3) The owner or operator of the CCR unit must include in the annual groundwater monitoring and corrective action report required by § 257.90(e) or § 257.100(e)(5)(ii) any approved no migration demonstration.

[80 FR 21468, Apr. 17, 2015, as amended at 81 FR 51807, Aug. 5, 2016; 83 FR 36452, July 30, 2018; 85 FR 53561, Aug. 28, 2020]

§ 257.91 Groundwater monitoring systems.

(a) *Performance standard.* The owner or operator of a CCR unit must install a groundwater monitoring system that consists of a sufficient number of wells, installed at appropriate locations and depths, to yield groundwater samples from the uppermost aquifer that:

(1) Accurately represent the quality of background groundwater that has not been affected by leakage from a CCR unit. A determination of background quality may include sampling of wells that are not hydraulically upgradient of the CCR management area where:

(i) Hydrogeologic conditions do not allow the owner or operator of the CCR unit to determine what wells are hydraulically upgradient; or

(ii) Sampling at other wells will provide an indication of background groundwater quality that is as representative or more representative than that provided by the upgradient wells; and

(2) Accurately represent the quality of groundwater passing the waste boundary of the CCR unit. The downgradient monitoring system must be installed at the waste boundary that ensures detection of groundwater contamination in the uppermost aquifer. All potential contaminant pathways must be monitored.

(b) The number, spacing, and depths of monitoring systems shall be determined based upon site-specific technical information that must include thorough characterization of:

(1) Aquifer thickness, groundwater flow rate, groundwater flow direction including seasonal and temporal fluctuations in groundwater flow; and

(2) Saturated and unsaturated geologic units and fill materials overlying the uppermost aquifer, materials comprising the uppermost aquifer, and materials comprising the confining unit defining the lower boundary of the uppermost aquifer, including, but not limited to, thicknesses, stratigraphy, lithology, hydraulic conductivities, porosities and effective porosities.

(c) The groundwater monitoring system must include the minimum number of monitoring wells necessary to meet the performance standards specified in paragraph (a) of this section, based on the site-specific information specified in paragraph (b) of this section. The groundwater monitoring system must contain:

(1) A minimum of one upgradient and three downgradient monitoring wells; and

(2) Additional monitoring wells as necessary to accurately represent the quality of background groundwater that has not been affected by leakage from the CCR unit and the quality of groundwater passing the waste boundary of the CCR unit.

(d) The owner or operator of multiple CCR units may install a multiunit groundwater monitoring system instead of separate groundwater monitoring systems for each CCR unit.

(1) The multiunit groundwater monitoring system must be equally as capable of detecting monitored constituents at the waste boundary of the CCR unit as the individual groundwater monitoring system specified in paragraphs (a) through (c) of this section for each CCR unit based on the following factors:

(i) Number, spacing, and orientation of each CCR unit;

(ii) Hydrogeologic setting;

(iii) Site history; and

(iv) Engineering design of the CCR unit.

(2) [Reserved]

(e) Monitoring wells must be cased in a manner that maintains the integrity of the monitoring well borehole. This casing must be screened or perforated and packed with gravel or sand, where necessary, to enable collection of groundwater samples. The annular space (*i.e.*, the space between the borehole and well casing) above the sampling depth must be sealed to prevent contamination of samples and the groundwater.

(1) The owner or operator of the CCR unit must document and include in the operating record the design, installation, development, and decommissioning of any monitoring wells, piezometers and other measurement, sampling, and analytical devices. The qualified professional engineer must be given access to this documentation when completing the groundwater monitoring system certification required under paragraph (f) of this section.

(2) The monitoring wells, piezometers, and other measurement, sampling, and analytical devices must be operated and maintained so that they perform to the design specifications throughout the life of the monitoring program.

(f) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the groundwater monitoring system has been designed and constructed to meet the requirements of this section. If the groundwater monitoring system includes the minimum number of monitoring wells specified in paragraph (c)(1) of this section, the certification must document the basis supporting this determination.

(g) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(h), the notification requirements specified in §257.106(h), and the internet requirements specified in §257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36453, July 30, 2018; 85 FR 53561, Aug. 28, 2020]

§ 257.92 [Reserved]

§ 257.93 Groundwater sampling and analysis requirements.

(a) The groundwater monitoring program must include consistent sampling

and analysis procedures that are designed to ensure monitoring results that provide an accurate representation of groundwater quality at the background and downgradient wells required by § 257.91. The owner or operator of the CCR unit must develop a sampling and analysis program that includes procedures and techniques for:

(1) Sample collection;

(2) Sample preservation and shipment;

(3) Analytical procedures;

(4) Chain of custody control; and

(5) Quality assurance and quality control.

(b) The groundwater monitoring program must include sampling and analytical methods that are appropriate for groundwater sampling and that accurately measure hazardous constituents and other monitoring parameters in groundwater samples. For purposes of §§ 257.90 through 257.98, the term *constituent* refers to both hazardous constituents and other monitoring parameters listed in either appendix III or IV of this part.

(c) Groundwater elevations must be measured in each well immediately prior to purging, each time groundwater is sampled. The owner or operator of the CCR unit must determine the rate and direction of groundwater flow each time groundwater is sampled. Groundwater elevations in wells which monitor the same CCR management area must be measured within a period of time short enough to avoid temporal variations in groundwater flow which could preclude accurate determination of groundwater flow rate and direction.

(d) The owner or operator of the CCR unit must establish background groundwater quality in a hydraulically upgradient or background well(s) for each of the constituents required in the particular groundwater monitoring program that applies to the CCR unit as determined under § 257.94(a) or § 257.95(a). Background groundwater quality may be established at wells that are not located hydraulically upgradient from the CCR unit if it meets the requirements of § 257.91(a)(1).

(e) The number of samples collected when conducting detection monitoring and assessment monitoring (for both downgradient and background wells) must be consistent with the statistical procedures chosen under paragraph (f) of this section and the performance standards under paragraph (g) of this section. The sampling procedures shall be those specified under § 257.94(b) through (d) for detection monitoring, § 257.95(b) through (d) for assessment monitoring, and § 257.96(b) for corrective action.

(f) The owner or operator of the CCR unit must select one of the statistical methods specified in paragraphs (f)(1) through (5) of this section to be used in evaluating groundwater monitoring data for each specified constituent. The statistical test chosen shall be conducted separately for each constituent in each monitoring well.

(1) A parametric analysis of variance followed by multiple comparison procedures to identify statistically significant evidence of contamination. The method must include estimation and testing of the contrasts between each compliance well's mean and the background mean levels for each constituent.

(2) An analysis of variance based on ranks followed by multiple comparison procedures to identify statistically significant evidence of contamination. The method must include estimation and testing of the contrasts between each compliance well's median and the background median levels for each constituent.

(3) A tolerance or prediction interval procedure, in which an interval for each constituent is established from the distribution of the background data and the level of each constituent in each compliance well is compared to the upper tolerance or prediction limit.

(4) A control chart approach that gives control limits for each constituent.

(5) Another statistical test method that meets the performance standards of paragraph (g) of this section.

(6) The owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the selected statistical method is appropriate for evaluating the groundwater monitoring data for the

CCR management area. The certification must include a narrative description of the statistical method selected to evaluate the groundwater monitoring data.

(g) Any statistical method chosen under paragraph (f) of this section shall comply with the following performance standards, as appropriate, based on the statistical test method used:

(1) The statistical method used to evaluate groundwater monitoring data shall be appropriate for the distribution of constituents. Normal distributions of data values shall use parametric methods. Non-normal distributions shall use non-parametric methods. If the distribution of the constituents is shown by the owner or operator of the CCR unit to be inappropriate for a normal theory test, then the data must be transformed or a distribution-free (non-parametric) theory test must be used. If the distributions for the constituents differ, more than one statistical method may be needed.

(2) If an individual well comparison procedure is used to compare an individual compliance well constituent concentration with background constituent concentrations or a groundwater protection standard, the test shall be done at a Type I error level no less than 0.01 for each testing period. If a multiple comparison procedure is used, the Type I experiment wise error rate for each testing period shall be no less than 0.05; however, the Type I error of no less than 0.01 for individual well comparisons must be maintained. This performance standard does not apply to tolerance intervals, prediction intervals, or control charts.

(3) If a control chart approach is used to evaluate groundwater monitoring data, the specific type of control chart and its associated parameter values shall be such that this approach is at least as effective as any other approach in this section for evaluating groundwater data. The parameter values shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(4) If a tolerance interval or a predictional interval is used to evaluate groundwater monitoring data, the levels of confidence and, for tolerance intervals, the percentage of the population that the interval must contain, shall be such that this approach is at least as effective as any other approach in this section for evaluating groundwater data. These parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(5) The statistical method must account for data below the limit of detection with one or more statistical procedures that shall at least as effective as any other approach in this section for evaluating groundwater data. Any practical quantitation limit that is used in the statistical method shall be the lowest concentration level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions that are available to the facility.

(6) If necessary, the statistical method must include procedures to control or correct for seasonal and spatial variability as well as temporal correlation in the data.

(h) The owner or operator of the CCR unit must determine whether or not there is a statistically significant increase over background values for each constituent required in the particular groundwater monitoring program that applies to the CCR unit, as determined under § 257.94(a) or § 257.95(a).

(1) In determining whether a statistically significant increase has occurred, the owner or operator must compare the groundwater quality of each constituent at each monitoring well designated pursuant to § 257.91(a)(2) or (d)(1) to the background value of that constituent, according to the statistical procedures and performance standards specified under paragraphs (f) and (g) of this section.

(2) Within 90 days after completing sampling and analysis, the owner or operator must determine whether there has been a statistically significant increase over background for any constituent at each monitoring well.

(i) The owner or operator must measure ''total recoverable metals'' concentrations in measuring groundwater

quality. Measurement of total recoverable metals captures both the particulate fraction and dissolved fraction of metals in natural waters. Groundwater samples shall not be field-filtered prior to analysis.

(j) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(h), the notification requirements specified in §257.106(h), and the Internet requirements specified in §257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36453, July 30, 2018]

§ 257.94 Detection monitoring program.

(a) The owner or operator of a CCR unit must conduct detection monitoring at all groundwater monitoring wells consistent with this section. At a minimum, a detection monitoring program must include groundwater monitoring for all constituents listed in appendix III to this part.

(b) Except as provided in paragraph (d) of this section, the monitoring frequency for the constituents listed in appendix III to this part shall be at least semiannual during the active life of the CCR unit and the post-closure period. For existing CCR landfills and existing CCR surface impoundments, a minimum of eight independent samples from each background and downgradient well must be collected and analyzed for the constituents listed in appendix III and IV to this part no later than October 17, 2017. For new CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units, a minimum of eight independent samples for each background well must be collected and analyzed for the constituents listed in appendices III and IV to this part during the first six months of sampling.

(c) The number of samples collected and analyzed for each background well and downgradient well during subsequent semiannual sampling events must be consistent with §257.93(e), and must account for any unique characteristics of the site, but must be at least one sample from each background and downgradient well.

(d) The owner or operator of a CCR unit may demonstrate the need for an alternative monitoring frequency for repeated sampling and analysis for constituents listed in appendix III to this part during the active life and the post-closure care period based on the availability of groundwater. If there is not adequate groundwater flow to sample wells semiannually, the alternative frequency shall be no less than annual. The need to vary monitoring frequency must be evaluated on a site-specific basis. The demonstration must be supported by, at a minimum, the information specified in paragraphs (d)(1) and (2) of this section.

(1) Information documenting that the need for less frequent sampling. The alternative frequency must be based on consideration of the following factors:

(i) Lithology of the aquifer and unsaturated zone;

(ii) Hydraulic conductivity of the aquifer and unsaturated zone; and

(iii) Groundwater flow rates.

(2) Information documenting that the alternative frequency will be no less effective in ensuring that any leakage from the CCR unit will be discovered within a timeframe that will not materially delay establishment of an assessment monitoring program.

(3) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration for an alternative groundwater sampling and analysis frequency meets the requirements of this section. The owner or operator must include the demonstration providing the basis for the alternative monitoring frequency and the certification by a qualified professional engineer or the approval from the Participating State Director or approval from EPA where EPA is the permitting authority in the annual groundwater monitoring and corrective action report required by §257.90(e).

(e) If the owner or operator of the CCR unit determines, pursuant to §257.93(h) that there is a statistically significant increase over background levels for one or more of the constituents listed in appendix III to this part at any monitoring well at the waste

boundary specified under § 257.91(a)(2), the owner or operator must:

(1) Except as provided for in paragraph (e)(2) of this section, within 90 days of detecting a statistically significant increase over background levels for any constituent, establish an assessment monitoring program meeting the requirements of § 257.95.

(2) The owner or operator may demonstrate that a source other than the CCR unit caused the statistically significant increase over background levels for a constituent or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. The owner or operator must complete the written demonstration within 90 days of detecting a statistically significant increase over background levels to include obtaining a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority verifying the accuracy of the information in the report. If a successful demonstration is completed within the 90-day period, the owner or operator of the CCR unit may continue with a detection monitoring program under this section. If a successful demonstration is not completed within the 90-day period, the owner or operator of the CCR unit must initiate an assessment monitoring program as required under § 257.95. The owner or operator must also include the demonstration in the annual groundwater monitoring and corrective action report required by § 257.90(e), in addition to the certification by a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority.

(3) The owner or operator of a CCR unit must prepare a notification stating that an assessment monitoring program has been established. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by § 257.105(h)(5).

(f) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(h), the notification requirements specified in § 257.106(h), and the Internet requirements specified in § 257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36453, July 30, 2018]

§ 257.95 Assessment monitoring program.

(a) Assessment monitoring is required whenever a statistically significant increase over background levels has been detected for one or more of the constituents listed in appendix III to this part.

(b) Within 90 days of triggering an assessment monitoring program, and annually thereafter, the owner or operator of the CCR unit must sample and analyze the groundwater for all constituents listed in appendix IV to this part. The number of samples collected and analyzed for each well during each sampling event must be consistent with § 257.93(e), and must account for any unique characteristics of the site, but must be at least one sample from each well.

(c) The owner or operator of a CCR unit may demonstrate the need for an alternative monitoring frequency for repeated sampling and analysis for constituents listed in appendix IV to this part during the active life and the post-closure care period based on the availability of groundwater. If there is not adequate groundwater flow to sample wells semiannually, the alternative frequency shall be no less than annual. The need to vary monitoring frequency must be evaluated on a site-specific basis. The demonstration must be supported by, at a minimum, the information specified in paragraphs (c)(1) and (2) of this section.

(1) Information documenting that the need for less frequent sampling. The alternative frequency must be based on consideration of the following factors:

(i) Lithology of the aquifer and unsaturated zone;

(ii) Hydraulic conductivity of the aquifer and unsaturated zone; and

(iii) Groundwater flow rates.

(2) Information documenting that the alternative frequency will be no less effective in ensuring that any leakage from the CCR unit will be discovered

within a timeframe that will not materially delay the initiation of any necessary remediation measures.

(3) The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority stating that the demonstration for an alternative groundwater sampling and analysis frequency meets the requirements of this section. The owner or operator must include the demonstration providing the basis for the alternative monitoring frequency and the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority in the annual groundwater monitoring and corrective action report required by §257.90(e).

(d) After obtaining the results from the initial and subsequent sampling events required in paragraph (b) of this section, the owner or operator must:

(1) Within 90 days of obtaining the results, and on at least a semiannual basis thereafter, resample all wells that were installed pursuant to the requirements of §257.91, conduct analyses for all parameters in appendix III to this part and for those constituents in appendix IV to this part that are detected in response to paragraph (b) of this section, and record their concentrations in the facility operating record. The number of samples collected and analyzed for each background well and downgradient well during subsequent semiannual sampling events must be consistent with §257.93(e), and must account for any unique characteristics of the site, but must be at least one sample from each background and downgradient well;

(2) Establish groundwater protection standards for all constituents detected pursuant to paragraph (b) or (d) of this section. The groundwater protection standards must be established in accordance with paragraph (h) of this section; and

(3) Include the recorded concentrations required by paragraph (d)(1) of this section, identify the background concentrations established under §257.94(b), and identify the groundwater protection standards established under paragraph (d)(2) of this section in the annual groundwater monitoring and corrective action report required by §257.90(e).

(e) If the concentrations of all constituents listed in appendices III and IV to this part are shown to be at or below background values, using the statistical procedures in §257.93(g), for two consecutive sampling events, the owner or operator may return to detection monitoring of the CCR unit. The owner or operator must prepare a notification stating that detection monitoring is resuming for the CCR unit. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by §257.105(h)(7).

(f) If the concentrations of any constituent in appendices III and IV to this part are above background values, but all concentrations are below the groundwater protection standard established under paragraph (h) of this section, using the statistical procedures in §257.93(g), the owner or operator must continue assessment monitoring in accordance with this section.

(g) If one or more constituents in appendix IV to this part are detected at statistically significant levels above the groundwater protection standard established under paragraph (h) of this section in any sampling event, the owner or operator must prepare a notification identifying the constituents in appendix IV to this part that have exceeded the groundwater protection standard. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by §257.105(h)(8). The owner or operator of the CCR unit also must:

(1) Characterize the nature and extent of the release and any relevant site conditions that may affect the remedy ultimately selected. The characterization must be sufficient to support a complete and accurate assessment of the corrective measures necessary to effectively clean up all releases from the CCR unit pursuant to §257.96. Characterization of the release includes the following minimum measures:

(i) Install additional monitoring wells necessary to define the contaminant plume(s);

(ii) Collect data on the nature and estimated quantity of material released including specific information on the constituents listed in appendix IV of this part and the levels at which they are present in the material released;

(iii) Install at least one additional monitoring well at the facility boundary in the direction of contaminant migration and sample this well in accordance with paragraph (d)(1) of this section; and

(iv) Sample all wells in accordance with paragraph (d)(1) of this section to characterize the nature and extent of the release.

(2) Notify all persons who own the land or reside on the land that directly overlies any part of the plume of contamination if contaminants have migrated off-site if indicated by sampling of wells in accordance with paragraph (g)(1) of this section. The owner or operator has completed the notifications when they are placed in the facility's operating record as required by § 257.105(h)(8).

(3) Within 90 days of finding that any of the constituents listed in appendix IV to this part have been detected at a statistically significant level exceeding the groundwater protection standards the owner or operator must either:

(i) Initiate an assessment of corrective measures as required by § 257.96; or

(ii) Demonstrate that a source other than the CCR unit caused the contamination, or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. Any such demonstration must be supported by a report that includes the factual or evidentiary basis for any conclusions and must be certified to be accurate by a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority. If a successful demonstration is made, the owner or operator must continue monitoring in accordance with the assessment monitoring program pursuant to this section, and may return to detection monitoring if the constituents in Appendix III and Appendix IV of this part are at or below background as specified in paragraph (e) of this section. The owner or operator must also include the demonstration in the annual groundwater monitoring and corrective action report required by § 257.90(e), in addition to the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority.

(4) If a successful demonstration has not been made at the end of the 90 day period provided by paragraph (g)(3)(ii) of this section, the owner or operator of the CCR unit must initiate the assessment of corrective measures requirements under § 257.96.

(5) The owner or operator must prepare a notification stating that an assessment of corrective measures has been initiated.

(h) The owner or operator of the CCR unit must establish a groundwater protection standard for each constituent in appendix IV to this part detected in the groundwater. The groundwater protection standard shall be:

(1) For constituents for which a maximum contaminant level (MCL) has been established under §§ 141.62 and 141.66 of this title, the MCL for that constituent;

(2) For the following constituents:

(i) Cobalt 6 micrograms per liter (μg/l);

(ii) Lead 15 μg/l;

(iii) Lithium 40 μg/l; and

(iv) Molybdenum 100 μg/l.

(3) For constituents for which the background level is higher than the levels identified under paragraphs (h)(1) and (h)(2) of this section, the background concentration.

(i) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(h), the notification requirements specified in § 257.106(h), and the Internet requirements specified in § 257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36453, July 30, 2018; 85 FR 53561, Aug. 28, 2020]

§ 257.96 Assessment of corrective measures.

(a) Within 90 days of finding that any constituent listed in Appendix IV to this part has been detected at a statistically significant level exceeding the groundwater protection standard defined under § 257.95(h), or immediately upon detection of a release from a CCR unit, the owner or operator must initiate an assessment of corrective measures to prevent further releases, to remediate any releases and to restore affected area to original conditions. The assessment of corrective measures must be completed within 90 days, unless the owner or operator demonstrates the need for additional time to complete the assessment of corrective measures due to site-specific conditions or circumstances. The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority attesting that the demonstration is accurate. The 90-day deadline to complete the assessment of corrective measures may be extended for no longer than 60 days. The owner or operator must also include the demonstration in the annual groundwater monitoring and corrective action report required by § 257.90(e), in addition to the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority.

(b) The owner or operator of the CCR unit must continue to monitor groundwater in accordance with the assessment monitoring program as specified in § 257.95.

(c) The assessment under paragraph (a) of this section must include an analysis of the effectiveness of potential corrective measures in meeting all of the requirements and objectives of the remedy as described under § 257.97 addressing at least the following:

(1) The performance, reliability, ease of implementation, and potential impacts of appropriate potential remedies, including safety impacts, cross-media impacts, and control of exposure to any residual contamination;

(2) The time required to begin and complete the remedy;

(3) The institutional requirements, such as state or local permit requirements or other environmental or public health requirements that may substantially affect implementation of the remedy(s).

(d) The owner or operator must place the completed assessment of corrective measures in the facility's operating record. The assessment has been completed when it is placed in the facility's operating record as required by § 257.105(h)(10).

(e) The owner or operator must discuss the results of the corrective measures assessment at least 30 days prior to the selection of remedy, in a public meeting with interested and affected parties.

(f) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(h), the notification requirements specified in § 257.106(h), and the Internet requirements specified in § 257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36454, July 30, 2018]

§ 257.97 Selection of remedy.

(a) Based on the results of the corrective measures assessment conducted under § 257.96, the owner or operator must, as soon as feasible, select a remedy that, at a minimum, meets the standards listed in paragraph (b) of this section. This requirement applies in addition to, not in place of, any applicable standards under the Occupational Safety and Health Act. The owner or operator must prepare a semiannual report describing the progress in selecting and designing the remedy. Upon selection of a remedy, the owner or operator must prepare a final report describing the selected remedy and how it meets the standards specified in paragraph (b) of this section. The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the remedy selected meets the requirements of this section. The report has been completed when it is

placed in the operating record as required by § 257.105(h)(12).

(b) Remedies must:

(1) Be protective of human health and the environment;

(2) Attain the groundwater protection standard as specified pursuant to § 257.95(h);

(3) Control the source(s) of releases so as to reduce or eliminate, to the maximum extent feasible, further releases of constituents in appendix IV to this part into the environment;

(4) Remove from the environment as much of the contaminated material that was released from the CCR unit as is feasible, taking into account factors such as avoiding inappropriate disturbance of sensitive ecosystems;

(5) Comply with standards for management of wastes as specified in § 257.98(d).

(c) In selecting a remedy that meets the standards of paragraph (b) of this section, the owner or operator of the CCR unit shall consider the following evaluation factors:

(1) The long- and short-term effectiveness and protectiveness of the potential remedy(s), along with the degree of certainty that the remedy will prove successful based on consideration of the following:

(i) Magnitude of reduction of existing risks;

(ii) Magnitude of residual risks in terms of likelihood of further releases due to CCR remaining following implementation of a remedy;

(iii) The type and degree of long-term management required, including monitoring, operation, and maintenance;

(iv) Short-term risks that might be posed to the community or the environment during implementation of such a remedy, including potential threats to human health and the environment associated with excavation, transportation, and re-disposal of contaminant;

(v) Time until full protection is achieved;

(vi) Potential for exposure of humans and environmental receptors to remaining wastes, considering the potential threat to human health and the environment associated with excavation, transportation, re-disposal, or containment;

(vii) Long-term reliability of the engineering and institutional controls; and

(viii) Potential need for replacement of the remedy.

(2) The effectiveness of the remedy in controlling the source to reduce further releases based on consideration of the following factors:

(i) The extent to which containment practices will reduce further releases; and

(ii) The extent to which treatment technologies may be used.

(3) The ease or difficulty of implementing a potential remedy(s) based on consideration of the following types of factors:

(i) Degree of difficulty associated with constructing the technology;

(ii) Expected operational reliability of the technologies;

(iii) Need to coordinate with and obtain necessary approvals and permits from other agencies;

(iv) Availability of necessary equipment and specialists; and

(v) Available capacity and location of needed treatment, storage, and disposal services.

(4) The degree to which community concerns are addressed by a potential remedy(s).

(d) The owner or operator must specify as part of the selected remedy a schedule(s) for implementing and completing remedial activities. Such a schedule must require the completion of remedial activities within a reasonable period of time taking into consideration the factors set forth in paragraphs (d)(1) through (6) of this section. The owner or operator of the CCR unit must consider the following factors in determining the schedule of remedial activities:

(1) Extent and nature of contamination, as determined by the characterization required under § 257.95(g);

(2) Reasonable probabilities of remedial technologies in achieving compliance with the groundwater protection standards established under § 257.95(h) and other objectives of the remedy;

(3) Availability of treatment or disposal capacity for CCR managed during implementation of the remedy;

(4) Potential risks to human health and the environment from exposure to

contamination prior to completion of the remedy;

(5) Resource value of the aquifer including:

(i) Current and future uses;

(ii) Proximity and withdrawal rate of users;

(iii) Groundwater quantity and quality;

(iv) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to CCR constituents;

(v) The hydrogeologic characteristic of the facility and surrounding land; and

(vi) The availability of alternative water supplies; and

(6) Other relevant factors.

(e) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(h), the notification requirements specified in §257.106(h), and the Internet requirements specified in §257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36454, July 30, 2018]

§ 257.98 Implementation of the corrective action program.

(a) Within 90 days of selecting a remedy under §257.97, the owner or operator must initiate remedial activities. Based on the schedule established under §257.97(d) for implementation and completion of remedial activities the owner or operator must:

(1) Establish and implement a corrective action groundwater monitoring program that:

(i) At a minimum, meets the requirements of an assessment monitoring program under §257.95;

(ii) Documents the effectiveness of the corrective action remedy; and

(iii) Demonstrates compliance with the groundwater protection standard pursuant to paragraph (c) of this section.

(2) Implement the corrective action remedy selected under §257.97; and

(3) Take any interim measures necessary to reduce the contaminants leaching from the CCR unit, and/or potential exposures to human or ecological receptors. Interim measures must, to the greatest extent feasible, be consistent with the objectives of and contribute to the performance of any remedy that may be required pursuant to §257.97. The following factors must be considered by an owner or operator in determining whether interim measures are necessary:

(i) Time required to develop and implement a final remedy;

(ii) Actual or potential exposure of nearby populations or environmental receptors to any of the constituents listed in appendix IV of this part;

(iii) Actual or potential contamination of drinking water supplies or sensitive ecosystems;

(iv) Further degradation of the groundwater that may occur if remedial action is not initiated expeditiously;

(v) Weather conditions that may cause any of the constituents listed in appendix IV to this part to migrate or be released;

(vi) Potential for exposure to any of the constituents listed in appendix IV to this part as a result of an accident or failure of a container or handling system; and

(vii) Other situations that may pose threats to human health and the environment.

(b) If an owner or operator of the CCR unit, determines, at any time, that compliance with the requirements of §257.97(b) is not being achieved through the remedy selected, the owner or operator must implement other methods or techniques that could feasibly achieve compliance with the requirements.

(c) Remedies selected pursuant to §257.97 shall be considered complete when:

(1) The owner or operator of the CCR unit demonstrates compliance with the groundwater protection standards established under §257.95(h) has been achieved at all points within the plume of contamination that lie beyond the groundwater monitoring well system established under §257.91.

(2) Compliance with the groundwater protection standards established under §257.95(h) has been achieved by demonstrating that concentrations of constituents listed in appendix IV to this part have not exceeded the groundwater protection standard(s) for a period of three consecutive years using

the statistical procedures and performance standards in § 257.93(f) and (g).

(3) All actions required to complete the remedy have been satisfied.

(d) All CCR that are managed pursuant to a remedy required under § 257.97, or an interim measure required under paragraph (a)(3) of this section, shall be managed in a manner that complies with all applicable RCRA requirements.

(e) Upon completion of the remedy, the owner or operator must prepare a notification stating that the remedy has been completed. The owner or operator must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority attesting that the remedy has been completed in compliance with the requirements of paragraph (c) of this section. The report has been completed when it is placed in the operating record as required by § 257.105(h)(13).

(f) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(h), the notification requirements specified in § 257.106(h), and the internet requirements specified in § 257.107(h).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36454, July 30, 2018]

CLOSURE AND POST-CLOSURE CARE

§ 257.100 Inactive CCR surface impoundments.

(a) Inactive CCR surface impoundments are subject to all of the requirements of this subpart applicable to existing CCR surface impoundments.

(b)–(d) [Reserved]

(e) *Timeframes for certain inactive CCR surface impoundments.* (1) An inactive CCR surface impoundment for which the owner or operator has completed the actions by the deadlines specified in paragraphs (e)(1)(i) through (iii) of this section is eligible for the alternative timeframes specified in paragraphs (e)(2) through (6) of this section. The owner or operator of the CCR unit must comply with the applicable recordkeeping, notification, and internet requirements associated with these provisions. For the inactive CCR surface impoundment:

(i) The owner or operator must have prepared and placed in the facility's operating record by December 17, 2015, a notification of intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.105(i)(1);

(ii) The owner or operator must have provided notification to the State Director and/or appropriate Tribal authority by January 19, 2016, of the intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.106(i)(1); and

(iii) The owner or operator must have placed on its CCR Web site by January 19, 2016, the notification of intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.107(i)(1).

(2) *Location restrictions.* (i) No later than April 16, 2020, the owner or operator of the inactive CCR surface impoundment must:

(A) Complete the demonstration for placement above the uppermost aquifer as set forth by § 257.60(a), (b), and (c)(3);

(B) Complete the demonstration for wetlands as set forth by § 257.61(a), (b), and (c)(3);

(C) Complete the demonstration for fault areas as set forth by § 257.62(a), (b), and (c)(3);

(D) Complete the demonstration for seismic impact zones as set forth by § 257.63(a), (b), and (c)(3); and

(E) Complete the demonstration for unstable areas as set forth by § 257.64(a), (b), (c), and (d)(3).

(ii) An owner or operator of an inactive CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (e)(2)(i) of this section is subject to the closure requirements of § 257.101(b)(1).

(3) *Design criteria.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2018, complete the documentation of liner type as set forth by § 257.71(a) and (b).

(ii) No later than June 16, 2017, place on or immediately adjacent to the CCR unit the permanent identification marker as set forth by § 257.73(a)(1).

(iii) No later than October 16, 2018, prepare and maintain an Emergency

Action Plan as set forth by §257.73(a)(3).

(iv) No later than April 17, 2018, compile a history of construction as set forth by §257.73(b) and (c).

(v) No later than April 17, 2018, complete the initial hazard potential classification, structural stability, and safety factor assessments as set forth by §257.73(a)(2), (b), (d), (e), and (f).

(4) *Operating criteria.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 18, 2017, prepare the initial CCR fugitive dust control plan as set forth in §257.80(b).

(ii) No later than April 17, 2018, prepare the initial inflow design flood control system plan as set forth in §257.82(c).

(iii) No later than April 18, 2017, initiate the inspections by a qualified person as set forth by §257.83(a).

(iv) No later than July 19, 2017, complete the initial annual inspection by a qualified professional engineer as set forth by §257.83(b).

(5) *Groundwater monitoring and corrective action.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2019, comply with groundwater monitoring requirements set forth in §§257.90(b) and 257.94(b); and

(ii) No later than August 1, 2019, prepare the initial groundwater monitoring and corrective action report as set forth in §257.90(e).

(6) *Closure and post-closure care.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2018, prepare an initial written closure plan as set forth in §257.102(b); and

(ii) No later than April 17, 2018, prepare an initial written post-closure care plan as set forth in §257.104(d).

[80 FR 21468, Apr. 17, 2015, as amended at 81 FR 51807, Aug. 5, 2016]

§ 257.101 Closure or retrofit of CCR units.

(a) The owner or operator of an existing unlined CCR surface impoundment, as determined under §257.71(a), is subject to the requirements of paragraph (a)(1) of this section.

(1) Except as provided by paragraph (a)(3) of this section, as soon as technically feasible, but not later than April 11, 2021, an owner or operator of an existing unlined CCR surface impoundment must cease placing CCR and non-CCR wastestreams into such CCR surface impoundment and either retrofit or close the CCR unit in accordance with the requirements of §257.102.

(2) An owner or operator of an existing unlined CCR surface impoundment that closes in accordance with paragraph (a)(1) of this section must include a statement in the notification required under §257.102(g) or (k)(5) that the CCR surface impoundment is closing or retrofitting under the requirements of paragraph (a)(1) of this section.

(3) The timeframe specified in paragraph (a)(1) of this section does not apply if the owner or operator complies with the alternate liner demonstration provisions specified in §257.71(d) or the alternative closure procedures specified in §257.103.

(4) At any time after the initiation of closure under paragraph (a)(1) of this section, the owner or operator may cease closure activities and initiate a retrofit of the CCR unit in accordance with the requirements of §257.102(k).

(b) The owner or operator of an existing CCR surface impoundment is subject to the requirements of paragraph (b)(1) of this section.

(1)(i) *Location standard under § 257.60.* Except as provided by paragraph (b)(4) of this section, the owner or operator of an existing CCR surface impoundment that has not demonstrated compliance with the location standard specified in §257.60(a) must cease placing CCR and non-CCR wastestreams into such CCR unit as soon as technically feasible, but no later than April 11, 2021, and close the CCR unit in accordance with the requirements of §257.102.

(ii) *Location standards under §§ 257.61 through 257.64.* Except as provided by paragraph (b)(4) of this section, within six months of determining that an existing CCR surface impoundment has not demonstrated compliance with any location standard specified in §§257.61(a), 257.62(a), 257.63(a), and

257.64(a), the owner or operator of the CCR surface impoundment must cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of § 257.102.

(2) Within six months of either failing to complete the initial or any subsequent periodic safety factor assessment required by § 257.73(e) by the deadlines specified in § 257.73(f)(1) through (3) or failing to document that the calculated factors of safety for the existing CCR surface impoundment achieve the minimum safety factors specified in § 257.73(e)(1)(i) through (iv), the owner or operator of the CCR surface impoundment must cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of § 257.102.

(3) An owner or operator of an existing CCR surface impoundment that closes in accordance with paragraphs (b)(1) or (2) of this section must include a statement in the notification required under § 257.102(g) that the CCR surface impoundment is closing under the requirements of paragraphs (b)(1) or (2) of this section.

(4) The timeframe specified in paragraph (b)(1) of this section does not apply if the owner or operator complies with the alternative closure procedures specified in § 257.103.

(c) The owner or operator of a new CCR surface impoundment is subject to the requirements of paragraph (c)(1) of this section.

(1) Within six months of either failing to complete the initial or any subsequent periodic safety factor assessment required by § 257.74(e) by the deadlines specified in § 257.74(f)(1) through (3) or failing to document that the calculated factors of safety for the new CCR surface impoundment achieve the minimum safety factors specified in § 257.74(e)(1)(i) through (v), the owner or operator of the CCR surface impoundment must cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of § 257.102.

(2) An owner or operator of an new CCR surface impoundment that closes in accordance with paragraph (c)(1) of this section must include a statement in the notification required under § 257.102(g) that the CCR surface impoundment is closing under the requirements of paragraph (c)(1) of this section.

(d) The owner or operator of an existing CCR landfill is subject to the requirements of paragraph (d)(1) of this section.

(1) Except as provided by paragraph (d)(3) of this section, within six months of determining that an existing CCR landfill has not demonstrated compliance with the location restriction for unstable areas specified in § 257.64(a), the owner or operator of the CCR unit must cease placing CCR and non-CCR waste streams into such CCR landfill and close the CCR unit in accordance with the requirements of § 257.102.

(2) An owner or operator of an existing CCR landfill that closes in accordance with paragraph (d)(1) of this section must include a statement in the notification required under § 257.102(g) that the CCR landfill is closing under the requirements of paragraph (d)(1) of this section.

(3) The timeframe specified in paragraph (d)(1) of this section does not apply if the owner or operator complies with the alternative closure procedures specified in § 257.103.

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36454, July 30, 2018; 85 FR 53561, Aug. 28, 2020; 85 FR 72542, Nov. 12, 2020]

§ 257.102 Criteria for conducting the closure or retrofit of CCR units.

(a) Closure of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit must be completed either by leaving the CCR in place and installing a final cover system or through removal of the CCR and decontamination of the CCR unit, as described in paragraphs (b) through (j) of this section. Retrofit of a CCR surface impoundment must be completed in accordance with the requirements in paragraph (k) of this section.

(b) *Written closure plan*—(1) *Content of the plan.* The owner or operator of a CCR unit must prepare a written closure plan that describes the steps necessary to close the CCR unit at any point during the active life of the CCR unit consistent with recognized and

generally accepted good engineering practices. The written closure plan must include, at a minimum, the information specified in paragraphs (b)(1)(i) through (vi) of this section.

(i) A narrative description of how the CCR unit will be closed in accordance with this section.

(ii) If closure of the CCR unit will be accomplished through removal of CCR from the CCR unit, a description of the procedures to remove the CCR and decontaminate the CCR unit in accordance with paragraph (c) of this section.

(iii) If closure of the CCR unit will be accomplished by leaving CCR in place, a description of the final cover system, designed in accordance with paragraph (d) of this section, and the methods and procedures to be used to install the final cover. The closure plan must also discuss how the final cover system will achieve the performance standards specified in paragraph (d) of this section.

(iv) An estimate of the maximum inventory of CCR ever on-site over the active life of the CCR unit.

(v) An estimate of the largest area of the CCR unit ever requiring a final cover as required by paragraph (d) of this section at any time during the CCR unit's active life.

(vi) A schedule for completing all activities necessary to satisfy the closure criteria in this section, including an estimate of the year in which all closure activities for the CCR unit will be completed. The schedule should provide sufficient information to describe the sequential steps that will be taken to close the CCR unit, including identification of major milestones such as coordinating with and obtaining necessary approvals and permits from other agencies, the dewatering and stabilization phases of CCR surface impoundment closure, or installation of the final cover system, and the estimated timeframes to complete each step or phase of CCR unit closure. When preparing the written closure plan, if the owner or operator of a CCR unit estimates that the time required to complete closure will exceed the timeframes specified in paragraph (f)(1) of this section, the written closure plan must include the site-specific information, factors and considerations that would support any time extension sought under paragraph (f)(2) of this section.

(2) *Timeframes for preparing the initial written closure plan*—(i) *Existing CCR landfills and existing CCR surface impoundments.* No later than October 17, 2016, the owner or operator of the CCR unit must prepare an initial written closure plan consistent with the requirements specified in paragraph (b)(1) of this section.

(ii) *New CCR landfills and new CCR surface impoundments, and any lateral expansion of a CCR unit.* No later than the date of the initial receipt of CCR in the CCR unit, the owner or operator must prepare an initial written closure plan consistent with the requirements specified in paragraph (b)(1) of this section.

(iii) The owner or operator has completed the written closure plan when the plan, including the certification required by paragraph (b)(4) of this section, has been placed in the facility's operating record as required by §257.105(i)(4).

(3) *Amendment of a written closure plan.* (i) The owner or operator may amend the initial or any subsequent written closure plan developed pursuant to paragraph (b)(1) of this section at any time.

(ii) The owner or operator must amend the written closure plan whenever:

(A) There is a change in the operation of the CCR unit that would substantially affect the written closure plan in effect; or

(B) Before or after closure activities have commenced, unanticipated events necessitate a revision of the written closure plan.

(iii) The owner or operator must amend the closure plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the need to revise an existing written closure plan. If a written closure plan is revised after closure activities have commenced for a CCR unit, the owner or operator must amend the current closure plan no later than 30 days following the triggering event.

(4) The owner or operator of the CCR unit must obtain a written certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the initial and any amendment of the written closure plan meets the requirements of this section.

(c) *Closure by removal of CCR*. An owner or operator may elect to close a CCR unit by removing and decontaminating all areas affected by releases from the CCR unit. CCR removal and decontamination of the CCR unit are complete when constituent concentrations throughout the CCR unit and any areas affected by releases from the CCR unit have been removed and groundwater monitoring concentrations do not exceed the groundwater protection standard established pursuant to § 257.95(h) for constituents listed in appendix IV to this part.

(d) *Closure performance standard when leaving CCR in place*—(1) The owner or operator of a CCR unit must ensure that, at a minimum, the CCR unit is closed in a manner that will:

(i) Control, minimize or eliminate, to the maximum extent feasible, post-closure infiltration of liquids into the waste and releases of CCR, leachate, or contaminated run-off to the ground or surface waters or to the atmosphere;

(ii) Preclude the probability of future impoundment of water, sediment, or slurry;

(iii) Include measures that provide for major slope stability to prevent the sloughing or movement of the final cover system during the closure and post-closure care period;

(iv) Minimize the need for further maintenance of the CCR unit; and

(v) Be completed in the shortest amount of time consistent with recognized and generally accepted good engineering practices.

(2) *Drainage and stabilization of CCR surface impoundments*. The owner or operator of a CCR surface impoundment or any lateral expansion of a CCR surface impoundment must meet the requirements of paragraphs (d)(2)(i) and (ii) of this section prior to installing the final cover system required under paragraph (d)(3) of this section.

(i) Free liquids must be eliminated by removing liquid wastes or solidifying the remaining wastes and waste residues.

(ii) Remaining wastes must be stabilized sufficient to support the final cover system.

(3) *Final cover system*. If a CCR unit is closed by leaving CCR in place, the owner or operator must install a final cover system that is designed to minimize infiltration and erosion, and at a minimum, meets the requirements of paragraph (d)(3)(i) of this section, or the requirements of the alternative final cover system specified in paragraph (d)(3)(ii) of this section.

(i) The final cover system must be designed and constructed to meet the criteria in paragraphs (d)(3)(i)(A) through (D) of this section. The design of the final cover system must be included in the written closure plan required by paragraph (b) of this section.

(A) The permeability of the final cover system must be less than or equal to the permeability of any bottom liner system or natural subsoils present, or a permeability no greater than 1×10^{-5} cm/sec, whichever is less.

(B) The infiltration of liquids through the closed CCR unit must be minimized by the use of an infiltration layer that contains a minimum of 18 inches of earthen material.

(C) The erosion of the final cover system must be minimized by the use of an erosion layer that contains a minimum of six inches of earthen material that is capable of sustaining native plant growth.

(D) The disruption of the integrity of the final cover system must be minimized through a design that accommodates settling and subsidence.

(ii) The owner or operator may select an alternative final cover system design, provided the alternative final cover system is designed and constructed to meet the criteria in paragraphs (d)(3)(ii)(A) through (C) of this section. The design of the final cover system must be included in the written closure plan required by paragraph (b) of this section.

(A) The design of the final cover system must include an infiltration layer that achieves an equivalent reduction in infiltration as the infiltration layer

specified in paragraphs (d)(3)(i)(A) and (B) of this section.

(B) The design of the final cover system must include an erosion layer that provides equivalent protection from wind or water erosion as the erosion layer specified in paragraph (d)(3)(i)(C) of this section.

(C) The disruption of the integrity of the final cover system must be minimized through a design that accommodates settling and subsidence.

(iii) The owner or operator of the CCR unit must obtain a written certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority that the design of the final cover system meets the requirements of this section.

(e) *Initiation of closure activities.* Except as provided for in paragraph (e)(4) of this section and § 257.103, the owner or operator of a CCR unit must commence closure of the CCR unit no later than the applicable timeframes specified in either paragraph (e)(1) or (2) of this section.

(1) The owner or operator must commence closure of the CCR unit no later than 30 days after the date on which the CCR unit either:

(i) Receives the known final receipt of waste, either CCR or any non-CCR waste stream; or

(ii) Removes the known final volume of CCR from the CCR unit for the purpose of beneficial use of CCR.

(2)(i) Except as provided by paragraph (e)(2)(ii) of this section, the owner or operator must commence closure of a CCR unit that has not received CCR or any non-CCR waste stream or is no longer removing CCR for the purpose of beneficial use within two years of the last receipt of waste or within two years of the last removal of CCR material for the purpose of beneficial use.

(ii) Notwithstanding paragraph (e)(2)(i) of this section, the owner or operator of the CCR unit may secure an additional two years to initiate closure of the idle unit provided the owner or operator provides written documentation that the CCR unit will continue to accept wastes or will start removing CCR for the purpose of beneficial use. The documentation must be supported by, at a minimum, the information specified in paragraphs (e)(2)(ii)(A) and (B) of this section. The owner or operator may obtain two-year extensions provided the owner or operator continues to be able to demonstrate that there is reasonable likelihood that the CCR unit will accept wastes in the foreseeable future or will remove CCR from the unit for the purpose of beneficial use. The owner or operator must place each completed demonstration, if more than one time extension is sought, in the facility's operating record as required by § 257.105(i)(5) prior to the end of any two-year period.

(A) Information documenting that the CCR unit has remaining storage or disposal capacity or that the CCR unit can have CCR removed for the purpose of beneficial use; and

(B) Information demonstrating that that there is a reasonable likelihood that the CCR unit will resume receiving CCR or non-CCR waste streams in the foreseeable future or that CCR can be removed for the purpose of beneficial use. The narrative must include a best estimate as to when the CCR unit will resume receiving CCR or non-CCR waste streams. The situations listed in paragraphs (e)(2)(ii)(B)(*1*) through (*4*) of this section are examples of situations that would support a determination that the CCR unit will resume receiving CCR or non-CCR waste streams in the foreseeable future.

(*1*) Normal plant operations include periods during which the CCR unit does not receive CCR or non-CCR waste streams, such as the alternating use of two or more CCR units whereby at any point in time one CCR unit is receiving CCR while CCR is being removed from a second CCR unit after its dewatering.

(*2*) The CCR unit is dedicated to a coal-fired boiler unit that is temporarily idled (e.g., CCR is not being generated) and there is a reasonable likelihood that the coal-fired boiler will resume operations in the future.

(*3*) The CCR unit is dedicated to an operating coal-fired boiler (*i.e.*, CCR is being generated); however, no CCR are being placed in the CCR unit because the CCR are being entirely diverted to

beneficial uses, but there is a reasonable likelihood that the CCR unit will again be used in the foreseeable future.

(*4*) The CCR unit currently receives only non-CCR waste streams and those non-CCR waste streams are not generated for an extended period of time, but there is a reasonable likelihood that the CCR unit will again receive non-CCR waste streams in the future.

(iii) In order to obtain additional time extension(s) to initiate closure of a CCR unit beyond the two years provided by paragraph (e)(2)(i) of this section, the owner or operator of the CCR unit must include with the demonstration required by paragraph (e)(2)(ii) of this section the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(3) For purposes of this subpart, closure of the CCR unit has commenced if the owner or operator has ceased placing waste and completes any of the following actions or activities:

(i) Taken any steps necessary to implement the written closure plan required by paragraph (b) of this section;

(ii) Submitted a completed application for any required state or agency permit or permit modification; or

(iii) Taken any steps necessary to comply with any state or other agency standards that are a prerequisite, or are otherwise applicable, to initiating or completing the closure of a CCR unit.

(4) The timeframes specified in paragraphs (e)(1) and (2) of this section do not apply to any of the following owners or operators:

(i) [Reserved]

(ii) An owner or operator of an existing unlined CCR surface impoundment closing the CCR unit as required by §257.101(a);

(iii) An owner or operator of an existing CCR surface impoundment closing the CCR unit as required by §257.101(b);

(iv) An owner or operator of a new CCR surface impoundment closing the CCR unit as required by §257.101(c); or

(v) An owner or operator of an existing CCR landfill closing the CCR unit as required by §257.101(d).

(f) *Completion of closure activities.* (1) Except as provided for in paragraph (f)(2) of this section, the owner or operator must complete closure of the CCR unit:

(i) For existing and new CCR landfills and any lateral expansion of a CCR landfill, within six months of commencing closure activities.

(ii) For existing and new CCR surface impoundments and any lateral expansion of a CCR surface impoundment, within five years of commencing closure activities.

(2)(i) *Extensions of closure timeframes.* The timeframes for completing closure of a CCR unit specified under paragraphs (f)(1) of this section may be extended if the owner or operator can demonstrate that it was not feasible to complete closure of the CCR unit within the required timeframes due to factors beyond the facility's control. If the owner or operator is seeking a time extension beyond the time specified in the written closure plan as required by paragraph (b)(1) of this section, the demonstration must include a narrative discussion providing the basis for additional time beyond that specified in the closure plan. The owner or operator must place each completed demonstration, if more than one time extension is sought, in the facility's operating record as required by §257.105(i)(6) prior to the end of any two-year period. Factors that may support such a demonstration include:

(A) Complications stemming from the climate and weather, such as unusual amounts of precipitation or a significantly shortened construction season;

(B) Time required to dewater a surface impoundment due to the volume of CCR contained in the CCR unit or the characteristics of the CCR in the unit;

(C) The geology and terrain surrounding the CCR unit will affect the

amount of material needed to close the CCR unit; or

(D) Time required or delays caused by the need to coordinate with and obtain necessary approvals and permits from a state or other agency.

(ii) *Maximum time extensions.* (A) CCR surface impoundments of 40 acres or smaller may extend the time to complete closure by no longer than two years.

(B) CCR surface impoundments larger than 40 acres may extend the timeframe to complete closure of the CCR unit multiple times, in two-year increments. For each two-year extension sought, the owner or operator must substantiate the factual circumstances demonstrating the need for the extension. No more than a total of five two-year extensions may be obtained for any CCR surface impoundment.

(C) CCR landfills may extend the timeframe to complete closure of the CCR unit multiple times, in one-year increments. For each one-year extension sought, the owner or operator must substantiate the factual circumstances demonstrating the need for the extension. No more than a total of two one-year extensions may be obtained for any CCR landfill.

(iii) In order to obtain additional time extension(s) to complete closure of a CCR unit beyond the times provided by paragraph (f)(1) of this section, the owner or operator of the CCR unit must include with the demonstration required by paragraph (f)(2)(i) of this section the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(3) Upon completion, the owner or operator of the CCR unit must obtain a certification from a qualified professional engineer or approval from the Participating State Director or approval from EPA where EPA is the permitting authority verifying that closure has been completed in accordance with the closure plan specified in paragraph (b) of this section and the requirements of this section.

(g) No later than the date the owner or operator initiates closure of a CCR unit, the owner or operator must prepare a notification of intent to close a CCR unit. The notification must include the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority for the design of the final cover system as required by § 257.102(d)(3)(iii), if applicable. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by § 257.105(i)(7).

(h) Within 30 days of completion of closure of the CCR unit, the owner or operator must prepare a notification of closure of a CCR unit. The notification must include the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority as required by § 257.102(f)(3). The owner or operator has completed the notification when it has been placed in the facility's operating record as required by § 257.105(i)(8).

(i) *Deed notations.* (1) Except as provided by paragraph (i)(4) of this section, following closure of a CCR unit, the owner or operator must record a notation on the deed to the property, or some other instrument that is normally examined during title search.

(2) The notation on the deed must in perpetuity notify any potential purchaser of the property that:

(i) The land has been used as a CCR unit; and

(ii) Its use is restricted under the post-closure care requirements as provided by § 257.104(d)(1)(iii).

(3) Within 30 days of recording a notation on the deed to the property, the owner or operator must prepare a notification stating that the notation has been recorded. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by § 257.105(i)(9).

(4) An owner or operator that closes a CCR unit in accordance with paragraph (c) of this section is not subject to the requirements of paragraphs (i)(1) through (3) of this section.

(j) The owner or operator of the CCR unit must comply with the closure recordkeeping requirements specified in § 257.105(i), the closure notification requirements specified in § 257.106(i), and the closure Internet requirements specified in § 257.107(i).

(k) *Criteria to retrofit an existing CCR surface impoundment.* (1) To retrofit an existing CCR surface impoundment, the owner or operator must:

(i) First remove all CCR, including any contaminated soils and sediments from the CCR unit; and

(ii) Comply with the requirements in § 257.72.

(iii) A CCR surface impoundment undergoing a retrofit remains subject to all other requirements of this subpart, including the requirement to conduct any necessary corrective action.

(2) *Written retrofit plan*—(i) *Content of the plan.* The owner or operator must prepare a written retrofit plan that describes the steps necessary to retrofit the CCR unit consistent with recognized and generally accepted good engineering practices. The written retrofit plan must include, at a minimum, all of the following information:

(A) A narrative description of the specific measures that will be taken to retrofit the CCR unit in accordance with this section.

(B) A description of the procedures to remove all CCR and contaminated soils and sediments from the CCR unit.

(C) An estimate of the maximum amount of CCR that will be removed as part of the retrofit operation.

(D) An estimate of the largest area of the CCR unit that will be affected by the retrofit operation.

(E) A schedule for completing all activities necessary to satisfy the retrofit criteria in this section, including an estimate of the year in which retrofit activities of the CCR unit will be completed.

(ii) *Timeframes for preparing the initial written retrofit plan.* (A) No later than 60 days prior to date of initiating retrofit activities, the owner or operator must prepare an initial written retrofit plan consistent with the requirements specified in paragraph (k)(2) of this section. For purposes of this subpart, initiation of retrofit activities has commenced if the owner or operator has ceased placing waste in the unit and completes any of the following actions or activities:

(*1*) Taken any steps necessary to implement the written retrofit plan;

(*2*) Submitted a completed application for any required state or agency permit or permit modification; or

(*3*) Taken any steps necessary to comply with any state or other agency standards that are a prerequisite, or are otherwise applicable, to initiating or completing the retrofit of a CCR unit.

(B) The owner or operator has completed the written retrofit plan when the plan, including the certification required by paragraph (k)(2)(iv) of this section, has been placed in the facility's operating record as required by § 257.105(j)(1).

(iii) *Amendment of a written retrofit plan.* (A) The owner or operator may amend the initial or any subsequent written retrofit plan at any time.

(B) The owner or operator must amend the written retrofit plan whenever:

(*1*) There is a change in the operation of the CCR unit that would substantially affect the written retrofit plan in effect; or

(*2*) Before or after retrofit activities have commenced, unanticipated events necessitate a revision of the written retrofit plan.

(C) The owner or operator must amend the retrofit plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the revision of an existing written retrofit plan. If a written retrofit plan is revised after retrofit activities have commenced for a CCR unit, the owner or operator must amend the current retrofit plan no later than 30 days following the triggering event.

(iv) The owner or operator of the CCR unit must obtain a written certification from a qualified professional engineer or an approval from the Participating State Director or an approval

from EPA where EPA is the permitting authority that the activities outlined in the written retrofit plan, including any amendment of the plan, meet the requirements of this section.

(3) *Deadline for completion of activities related to the retrofit of a CCR unit.* Any CCR surface impoundment that is being retrofitted must complete all retrofit activities within the same time frames and procedures specified for the closure of a CCR surface impoundment in § 257.102(f) or, where applicable, § 257.103.

(4) Upon completion, the owner or operator must obtain a written certification from a qualified professional engineer or an approval from the Participating State Director or an approval from EPA where EPA is the permitting authority verifying that the retrofit activities have been completed in accordance with the retrofit plan specified in paragraph (k)(2) of this section and the requirements of this section.

(5) No later than the date the owner or operator initiates the retrofit of a CCR unit, the owner or operator must prepare a notification of intent to retrofit a CCR unit. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by § 257.105(j)(5).

(6) Within 30 days of completing the retrofit activities specified in paragraph (k)(1) of this section, the owner or operator must prepare a notification of completion of retrofit activities. The notification must include the certification from a qualified professional engineer or an approval from the Participating State Director or an approval from EPA where EPA is the permitting authority has is required by paragraph (k)(4) of this section. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by § 257.105(j)(6).

(7) At any time after the initiation of a CCR unit retrofit, the owner or operator may cease the retrofit and initiate closure of the CCR unit in accordance with the requirements of § 257.102.

(8) The owner or operator of the CCR unit must comply with the retrofit recordkeeping requirements specified in § 257.105(j), the retrofit notification requirements specified in § 257.106(j), and the retrofit Internet requirements specified in § 257.107(j).

[80 FR 21468, Apr. 17, 2015, as amended at 81 FR 51808, Aug. 5, 2016; 83 FR 36455, July 30, 2018; 85 FR 72542, Nov. 12, 2020]

§ 257.103 Alternative closure requirements.

The owner or operator of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit that is subject to closure pursuant to § 257.101(a), (b)(1), or (d) may nevertheless continue to receive the wastes specified in either paragraph (a), (b), (f)(1), or (f)(2) of this section in the unit provided the owner or operator meets all of the requirements contained in the respective paragraph.

(a) *CCR landfills*—(1) *No alternative CCR disposal capacity.* Notwithstanding the provisions of § 257.101(d), a CCR landfill may continue to recieve CCR if the owner or operator of the CCR landfill certifies that the CCR must continue to be managed in that CCR landfill due to the absence of alternative disposal capacity both on and off-site of the facility. To qualify under this paragraph, the owner or operator of the CCR landfill must document that all of the following conditions have been met:

(i) No alternative disposal capacity is available on or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under this section;

(ii) The owner or operator has made, and continues to make, efforts to obtain additional capacity. Qualification under this paragraph (a) lasts only as long as no alternative capacity is available. Once alternative capacity is identified, the owner or operator must arrange to use such capacity as soon as feasible;

(iii) The owner or operator must remain in compliance with all other requirements of this subpart, including the requirement to conduct any necessary corrective action; and

(iv) The owner or operator must prepare the annual progress report specified in paragraph (c) of this section

documenting the continued lack of alternative capacity and the progress towards the development of alternative CCR disposal capacity.

(2) Once alternative capacity is available, the CCR landfill must cease receiving CCR and initiate closure following the timeframes in § 257.102(e).

(3) If no alternative capacity is identified within five years after the initial certification, the CCR landfill must cease receiving CCR and close in accordance with the timeframes in § 257.102(e) and (f).

(b) *CCR landfills*—(1) *Permanent cessation of a coal-fired boiler(s) by a date certain*. Notwithstanding the provisions of § 257.101(d), a CCR landfill may continue to receive CCR if the owner or operator certifies that the facility will cease operation of the coal-fired boilers within the timeframe specified in paragraph (b)(4) of this section, but in the interim period (prior to closure of the coal-fired boiler), the facility must continue to use the CCR landfill due to the absence of alternative disposal capacity both on and off-site of the facility. To qualify under this paragraph, the owner or operator of the CCR landfill must document that all of the following conditions have been met:

(i) No alternative disposal capacity is available on or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under this section.

(ii) The owner or operator must remain in compliance with all other requirements of this subpart, including the requirement to conduct any necessary corrective action; and

(iii) The owner or operator must prepare the annual progress report specified in paragraph (c) of this section documenting the continued lack of alternative capacity and the progress towards the closure of the coal-fired boiler.

(2)–(3) [Reserved]

(4) For a CCR landfill, the coal-fired boiler must cease operation, and the CCR landfill must complete closure no later than April 19, 2021.

(c) *Required notices and progress reports for CCR landfills*. An owner or operator of a CCR landfill that closes in accordance with paragraph (a) or (b) of this section must complete the notices and progress reports specified in paragraphs (c)(1) through (3) of this section.

(1) Within six months of becoming subject to closure pursuant to § 257.101(d), the owner or operator must prepare and place in the facility's operating record a notification of intent to comply with the alternative closure requirements of this section. The notification must describe why the CCR landfill qualifies for the alternative closure provisions under either paragraph (a) or (b) of this section, in addition to providing the documentation and certifications required by paragraph (a) or (b) of this section.

(2) The owner or operator must prepare the periodic progress reports required by paragraph (a)(1)(iv) or (b)(1)(iii) of this section, in addition to describing any problems encountered and a description of the actions taken to resolve the problems. The annual progress reports must be completed according to the following schedule:

(i) The first annual progress report must be prepared no later than 13 months after completing the notification of intent to comply with the alternative closure requirements required by paragraph (c)(1) of this section.

(ii) The second annual progress report must be prepared no later than 12 months after completing the first annual progress report. Subsequent annual progress reports must be prepared within 12 months of completing the previous annual progress report.

(iii) The owner or operator has completed the progress reports specified in this paragraph (c)(2) when the reports are placed in the facility's operating record as required by § 257.105(i)(11).

(3) An owner or operator of a CCR landfill must also prepare the notification of intent to close a CCR landfill as required by § 257.102(g).

(d) *CCR landfill recordkeeping*. The owner or operator of the CCR landfill must comply with the recordkeeping requirements specified in § 257.105(i), the notification requirements specified in § 257.106(i), and the internet requirements specified in § 257.107(i).

(e) [Reserved]

(f) *Site-specific alternative deadlines to initiate closure of CCR surface impoundments*. Notwithstanding the provisions of § 257.101(a) and (b)(1), a CCR surface

impoundment may continue to receive the waste specified in paragraph (f)(1) or (2) of this section, provided the owner or operator submits a demonstration that the criteria in either paragraph (f)(1) or (2) of this section have been met. The demonstration must be submitted to the Administrator or the Participating State Director no later than the relevant deadline in paragraph (f)(3) of this section. The Administrator or the Participating State Director will act on the submission in accordance with the procedures in paragraph (f)(3) of this section.

(1) *Development of alternative capacity is technically infeasible.* Notwithstanding the provisions of §257.101(a) and (b)(1), a CCR surface impoundment may continue to receive the waste specified in paragraph (f)(1)(ii)(A) or (B) of this section, provided the owner or operator demonstrates the wastestream(s) must continue to be managed in that CCR surface impoundment because it was technically infeasible to complete the measures necessary to provide alternative disposal capacity on or off-site of the facility by April 11, 2021. To obtain approval under this paragraph all of the following criteria must be met:

(i) No alternative disposal capacity is available on or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under this section;

(ii)(A) For units closing pursuant to §257.101(a) and (b)(1)(i), CCR and/or non-CCR wastestreams must continue to be managed in that CCR surface impoundment because it was technically infeasible to complete the measures necessary to obtain alternative disposal capacity either on or off-site of the facility by April 11, 2021.

(B) For units closing pursuant to §257.101(b)(1)(ii), CCR must continue to be managed in that CCR surface impoundment because it was technically infeasible to complete the measures necessary to obtain alternative disposal capacity either on or off-site of the facility by April 11, 2021.

(iii) The facility is in compliance with all of the requirements of this subpart.

(iv) The owner or operator of the CCR surface impoundment must submit documentation that the criteria in paragraphs (f)(1)(i) through (iii) of this section have been met by submitting to the Administrator or the Participating State Director all of the following:

(A) To demonstrate that the criteria in paragraphs (f)(1)(i) and (ii) of this section have been met the owner or operator must submit a workplan that contains all of the following elements:

(*1*) A written narrative discussing the options considered both on and off-site to obtain alternative capacity for each CCR and/or non-CCR wastestreams, the technical infeasibility of obtaining alternative capacity prior to April 11, 2021, and the option selected and justification for the alternative capacity selected. The narrative must also include all of the following:

(*i*) An in-depth analysis of the site and any site-specific conditions that led to the decision to select the alternative capacity being developed;

(*ii*) An analysis of the adverse impact to plant operations if the CCR surface impoundment in question were to no longer be available for use; and

(*iii*) A detailed explanation and justification for the amount of time being requested and how it is the fastest technically feasible time to complete the development of the alternative capacity;

(*2*) A detailed schedule of the fastest technically feasible time to complete the measures necessary for alternative capacity to be available including a visual timeline representation. The visual timeline must clearly show all of the following:

(*i*) How each phase and the steps within that phase interact with or are dependent on each other and the other phases;

(*ii*) All of the steps and phases that can be completed concurrently;

(*iii*) The total time needed to obtain the alternative capacity and how long each phase and step within each phase will take; and

(*iv*) At a minimum, the following phases: Engineering and design, contractor selection, equipment fabrication and delivery, construction, and start up and implementation.;

(*3*) A narrative discussion of the schedule and visual timeline representation, which must discuss all of the following:

(*i*) Why the length of time for each phase and step is needed and a discussion of the tasks that occur during the specific step;

(*ii*) Why each phase and step shown on the chart must happen in the order it is occurring;

(*iii*) The tasks that occur during each of the steps within the phase; and

(*iv*) Anticipated worker schedules; and

(*4*) A narrative discussion of the progress the owner or operator has made to obtain alternative capacity for the CCR and/or non-CCR wastestreams. The narrative must discuss all the steps taken, starting from when the owner or operator initiated the design phase up to the steps occurring when the demonstration is being compiled. It must discuss where the facility currently is on the timeline and the efforts that are currently being undertaken to develop alternative capacity.

(B) To demonstrate that the criteria in paragraph (f)(1)(iii) of this section have been met, the owner or operator must submit all of the following:

(*1*) A certification signed by the owner or operator that the facility is in compliance with all of the requirements of this subpart;

(*2*) Visual representation of hydrogeologic information at and around the CCR unit(s) that supports the design, construction and installation of the groundwater monitoring system. This includes all of the following:

(*i*) Map(s) of groundwater monitoring well locations in relation to the CCR unit(s);

(*ii*) Well construction diagrams and drilling logs for all groundwater monitoring wells; and

(*iii*) Maps that characterize the direction of groundwater flow accounting for seasonal variations;

(*3*) Constituent concentrations, summarized in table form, at each groundwater monitoring well monitored during each sampling event;

(*4*) A description of site hydrogeology including stratigraphic cross-sections;

(*5*) Any corrective measures assessment conducted as required at § 257.96;

(*6*) Any progress reports on corrective action remedy selection and design and the report of final remedy selection required at § 257.97(a);

(*7*) The most recent structural stability assessment required at § 257.73(d); and

(*8*) The most recent safety factor assessment required at § 257.73(e).

(v) As soon as alternative capacity for any CCR or non-CCR wastestream is available, the CCR surface impoundment must cease receiving that CCR or non-CCR wastestream. Once the CCR surface impoundment ceases receipt of all CCR and/or non-CCR wastestreams, the CCR surface impoundment must initiate closure following the timeframes in § 257.102(e) and (f).

(vi) *Maximum time frames.* All CCR surface impoundments covered by paragraph (f)(1) must cease receiving waste by the deadlines specified in paragraphs (f)(1)(vi)(A) and (B) of this section and close in accordance with the timeframes in § 257.102(e) and (f).

(A) Except as provided by paragraph (f)(1)(vi)(B) of this section, no later than October 15, 2023.

(B) An eligible unlined CCR surface impoundment must cease receiving CCR and/or non-CCR wastestreams no later than October 15, 2024. In order to continue to operate until October 15, 2024, the owner or operator must demonstrate that the unit meets the definition of an eligible unlined CCR surface impoundment.

(vii) An owner or operator may seek additional time beyond the time granted in the initial approval by making the showing in paragraphs (f)(1)(i) through (iv) of this section, provided that no facility may be granted time to operate the impoundment beyond the maximum allowable time frames provided in § 257.103(f)(1)(vi).

(viii) The owner or operator at all times bears responsibility for demonstrating qualification under this section. Failure to remain in compliance with any of the requirements of this subpart will result in the automatic loss of authorization under this section.

(ix) The owner or operator must:

(A) Upon submission of the demonstration to the Administrator or the Participating State Director, prepare and place in the facility's operating record a notification that it has submitted the demonstration, along with a copy of the demonstration. An owner or operator that claims CBI in the demonstration may post a redacted version of the demonstration to its publicly accessible CCR internet site provided that it contains sufficient detail so that the public can meaningfully comment on the demonstration.

(B) Upon receipt of a decision pursuant to paragraph (f)(3) of this section, must prepare and place in the facility's operating record a copy of the decision.

(C) If an extension of an approved deadline pursuant to paragraph (f)(1)(vii) of this section has been requested, place a copy of the request submitted to the Administrator or the Participating State Director in the facility's operating record.

(x) The owner or operator must prepare semi-annual progress reports. The semi-annual progress reports must contain all of the following elements:

(A) Discussion of the progress made to date in obtaining alternative capacity, including:

(*1*) Discussion of the current stage of obtaining the capacity in reference to the timeline required under paragraph (f)(1)(iv)(A) of this section;

(*2*) Discussion of whether the owner or operator is on schedule for obtaining alternative capacity;

(*3*) If the owner or operator is not on or ahead of schedule for obtaining alternative capacity, the following must be included:

(*i*) Discussion of any problems encountered, and a description of the actions taken or planned to resolve the problems and get back on schedule; and

(*ii*) Discussion of the goals for the next six months and major milestones to be achieved for obtaining alternative capacity; and

(B) Discussion of any planned operational changes at the facility.

(xi) The progress reports must be completed according to the following schedule:

(A) The semi-annual progress reports must be prepared no later than April 30 and October 31 of each year for the duration of the alternative cease receipt of waste deadline.

(B) The first semi-annual progress report must be prepared by whichever date, April 30 or October 31, is soonest after receiving approval from the Administrator or the Participating State Director; and

(C) The owner or operator has completed the progress reports specified in paragraph (f)(1)(x) of this section when the reports have been placed in the facility's operating record as required by § 257.105(i)(17).

(xii) The owner or operator must prepare the notification of intent to close a CCR surface impoundment as required by § 257.102(g).

(xiii) The owner or operator must comply with the recordkeeping requirements specified in § 257.105(i), the notification requirements specified in § 257.106(i), and the internet posting requirements in § 257.107(i).

(2) *Permanent cessation of a coal-fired boiler(s) by a date certain*. Notwithstanding the provisions of § 257.101(a), and (b)(1), a CCR surface impoundment may continue to receive CCR and/or non-CCR wastestreams if the facility will cease operation of the coal-fired boiler(s) and complete closure of the impoundment within the timeframes specified in paragraph (f)(2)(iv) of this section, but in the interim period (prior to closure of the coal-fired boiler), the facility must continue to use the CCR surface impoundment due to the absence of alternative disposal capacity both on and off-site of the facility. To qualify under this paragraph all of the following criteria must be met:

(i) No alternative disposal capacity is available on or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under this section.

(ii) Potential risks to human health and the environment from the continued operation of the CCR surface impoundment have been adequately mitigated;

(iii) The facility is in compliance with all other requirements of this subpart, including the requirement to conduct any necessary corrective action; and

(iv) The coal-fired boilers must cease operation and closure of the impoundment must be completed within the following timeframes:

(A) For a CCR surface impoundment that is 40 acres or smaller, the coal-fired boiler(s) must cease operation and the CCR surface impoundment must complete closure no later than October 17, 2023.

(B) For a CCR surface impoundment that is larger than 40 acres, the coal-fired boiler(s) must cease operation, and the CCR surface impoundment must complete closure no later than October 17, 2028.

(v) The owner or operator of the CCR surface impoundment must submit the following documentation that the criteria in paragraphs (f)(2)(i) through (iv) of this section have been met as specified in paragraphs (f)(2)(v)(A) through (D) of this section.

(A) To demonstrate that the criteria in paragraph (f)(2)(i) of this section have been met the owner or operator must submit a narrative that explains the options considered to obtain alternative capacity for CCR and/or non-CCR wastestreams both on and off-site.

(B) To demonstrate that the criteria in paragraph (f)(2)(ii) of this section have been met the owner or operator must submit a risk mitigation plan describing the measures that will be taken to expedite any required corrective action, and that contains all of the following elements:

(*1*) A discussion of any physical or chemical measures a facility can take to limit any future releases to groundwater during operation.

(*2*) A discussion of the surface impoundment's groundwater monitoring data and any found exceedances; the delineation of the plume (if necessary based on the groundwater monitoring data); identification of any nearby receptors that might be exposed to current or future groundwater contamination; and how such exposures could be promptly mitigated.

(*3*) A plan to expedite and maintain the containment of any contaminant plume that is either present or identified during continued operation of the unit.

(C) To demonstrate that the criteria in paragraph (f)(2)(iii) of this section have been met, the owner or operator must submit all of the following:

(*1*) A certification signed by the owner or operator that the facility is in compliance with all of the requirements of this subpart;

(*2*) Visual representation of hydrogeologic information at and around the CCR unit(s) that supports the design, construction and installation of the groundwater monitoring system. This includes all of the following:

(*i*) Map(s) of groundwater monitoring well locations in relation to the CCR unit;

(*ii*) Well construction diagrams and drilling logs for all groundwater monitoring wells; and

(*iii*) Maps that characterize the direction of groundwater flow accounting for seasonal variations;

(*3*) Constituent concentrations, summarized in table form, at each groundwater monitoring well monitored during each sampling event;

(*4*) Description of site hydrogeology including stratigraphic cross-sections;

(*5*) Any corrective measures assessment required at § 257.96;

(*6*) Any progress reports on remedy selection and design and the report of final remedy selection required at § 257.97(a);

(*7*) The most recent structural stability assessment required at § 257.73(d); and

(*8*) The most recent safety factor assessment required at § 257.73(e).

(D) To demonstrate that the criteria in paragraph (f)(2)(iv) of this section have been met, the owner or operator must submit the closure plan required by § 257.102(b) and a narrative that specifies and justifies the date by which they intend to cease receipt of waste into the unit in order to meet the closure deadlines.

(vi) The owner or operator at all times bears responsibility for demonstrating qualification for authorization under this section. Failure to remain in compliance with any of the requirements of this subpart will result in the automatic loss of authorization under this section.

(vii) The owner or operator must comply with the recordkeeping requirements specified in § 257.105(i), the

notification requirements specified in §257.106(i), and the internet posting requirements in §257.107(i).

(viii) Upon submission of the demonstration to the Administrator or the Participating State Director the owner or operator must prepare and place in the facility's operating record and on its publicly accessible CCR internet site a notification that is has submitted a demonstration along with a copy of the demonstration.

(ix) Upon receipt of a decision pursuant to paragraph (f)(3) of this section, the owner or operator must place a copy of the decision in the facility's operating record and on the facility's publicly accessible CCR internet site.

(x) The owner or operator must prepare an annual progress report documenting the continued lack of alternative capacity and the progress towards the closure of the CCR surface impoundment. The owner or operator has completed the progress report when the report has been placed in the facility's operating record as required by §257.105(i)(20).

(3) *Process to Obtain Authorization.* (i) *Deadlines for Submission.* (A) Except as provided by §257.71(d)(2)(iii)(E) and (viii), the owner or operator must submit the demonstration required under paragraph (f)(1)(iv) of this section, for an alternative deadline to cease receipt of waste pursuant to paragraph (f)(1) of this section, to the Administrator or the Participating State Director for approval no later than November 30, 2020.

(B) An owner or operator may seek additional time beyond the time granted in the initial approval, in accordance with paragraph (f)(1)(vii) of this section, by submitting a new demonstration, as required under paragraph (f)(1)(iv) of this section, to the Administrator or the Participating State Director for approval, no later than fourteen days from determining that the cease receipt of waste deadline will not be met.

(C) Except as provided by §257.71(d)(2)(iii)(E) and (viii), the owner or operator must submit the demonstration required under paragraph (f)(2)(v) of this section to the Administrator for approval no later than November 30, 2020.

(ii) EPA will evaluate the demonstration and may request additional information to complete its review. Submission of a complete demonstration will toll the facility's deadline to cease receipt of waste until issuance of a decision under paragraph (f)(3)(iv) of this section. Incomplete submissions will not toll the facility's deadline and will be rejected without further process. All decisions issued under this paragraph or paragraph (f)(3)(iv) of this section will contain the facility's deadline to cease receipt of waste.

(iii) EPA will publish its proposed decision on a complete demonstration in a docket on *www.regulations.gov* for a 15-day comment period. If the demonstration is particularly complex, EPA will provide a comment period of 20 to 30 days.

(iv) After consideration of the comments, EPA will issue its decision on the alternative compliance deadline within four months of receiving a complete demonstration.

(4) *Transferring between site-specific alternatives.* An owner or operator authorized to continue operating a CCR surface impoundment under this section may at any time request authorization to continue operating the impoundment pursuant to another paragraph of subsection (f), by submitting the information in paragraph (f)(4)(i) or (ii) of this section.

(i) *Transfer from §257.103(f)(1) to §257.103(f)(2).* The owner or operator of a surface impoundment authorized to operate pursuant to paragraph (f)(1) of this section may request authorization to instead operate the surface impoundment in accordance with the requirements of paragraph (f)(2) of this section, by submitting a new demonstration that meets the requirements of paragraph (f)(2)(v) of this section to the Administrator or the Participating State Director. EPA will approve the request only upon determining that the criteria at paragraphs (f)(2)(i) through (iv) have been met.

(ii) *Transfer from §257.103(f)(2) to §257.103(f)(1).* The owner or operator of a surface impoundment authorized to operate pursuant to paragraph (f)(2) of this section may request authorization

to instead operate the surface impoundment in accordance with the requirements of paragraph (f)(1) of this section, by submitting a new demonstration that meets the requirements of paragraph (f)(1)(iv) of this section to the Administrator or the Participating State Director. EPA will approve the request only upon determining that the criteria at paragraphs (f)(1)(i) through (iii) and (vi) of this section have been met.

(iii) The procedures in paragraph (f)(3) of this section will apply to all requests for transfer under this paragraph.

[85 FR 53561, Aug. 28, 2020, as amended at 85 FR 72542, Nov. 12, 2020]

§ 257.104 Post-closure care requirements.

(a) *Applicability*. (1) Except as provided by paragraph (a)(2) of this section, § 257.104 applies to the owners or operators of CCR landfills, CCR surface impoundments, and all lateral expansions of CCR units that are subject to the closure criteria under § 257.102.

(2) An owner or operator of a CCR unit that elects to close a CCR unit by removing CCR as provided by § 257.102(c) is not subject to the post-closure care criteria under this section.

(b) *Post-closure care maintenance requirements*. Following closure of the CCR unit, the owner or operator must conduct post-closure care for the CCR unit, which must consist of at least the following:

(1) Maintaining the integrity and effectiveness of the final cover system, including making repairs to the final cover as necessary to correct the effects of settlement, subsidence, erosion, or other events, and preventing run-on and run-off from eroding or otherwise damaging the final cover;

(2) If the CCR unit is subject to the design criteria under § 257.70, maintaining the integrity and effectiveness of the leachate collection and removal system and operating the leachate collection and removal system in accordance with the requirements of § 257.70; and

(3) Maintaining the groundwater monitoring system and monitoring the groundwater in accordance with the requirements of §§ 257.90 through 257.98.

(c) *Post-closure care period*. (1) Except as provided by paragraph (c)(2) of this section, the owner or operator of the CCR unit must conduct post-closure care for 30 years.

(2) If at the end of the post-closure care period the owner or operator of the CCR unit is operating under assessment monitoring in accordance with § 257.95, the owner or operator must continue to conduct post-closure care until the owner or operator returns to detection monitoring in accordance with § 257.95.

(d) *Written post-closure plan*—(1) *Content of the plan*. The owner or operator of a CCR unit must prepare a written post-closure plan that includes, at a minimum, the information specified in paragraphs (d)(1)(i) through (iii) of this section.

(i) A description of the monitoring and maintenance activities required in paragraph (b) of this section for the CCR unit, and the frequency at which these activities will be performed;

(ii) The name, address, telephone number, and email address of the person or office to contact about the facility during the post-closure care period; and

(iii) A description of the planned uses of the property during the post-closure period. Post-closure use of the property shall not disturb the integrity of the final cover, liner(s), or any other component of the containment system, or the function of the monitoring systems unless necessary to comply with the requirements in this subpart. Any other disturbance is allowed if the owner or operator of the CCR unit demonstrates that disturbance of the final cover, liner, or other component of the containment system, including any removal of CCR, will not increase the potential threat to human health or the environment. The demonstration must be certified by a qualified professional engineer or approved by the Participating State Director or approved from EPA where EPA is the permitting authority, and notification shall be provided to the State Director that the demonstration has been placed in the operating record and on the owners or operator's publicly accessible internet site.

(2) *Deadline to prepare the initial written post-closure plan*—(i) *Existing CCR landfills and existing CCR surface impoundments.* No later than October 17, 2016, the owner or operator of the CCR unit must prepare an initial written post-closure plan consistent with the requirements specified in paragraph (d)(1) of this section.

(ii) *New CCR landfills, new CCR surface impoundments, and any lateral expansion of a CCR unit.* No later than the date of the initial receipt of CCR in the CCR unit, the owner or operator must prepare an initial written post-closure plan consistent with the requirements specified in paragraph (d)(1) of this section.

(iii) The owner or operator has completed the written post-closure plan when the plan, including the certification required by paragraph (d)(4) of this section, has been placed in the facility's operating record as required by §257.105(i)(4).

(3) *Amendment of a written post-closure plan.* (i) The owner or operator may amend the initial or any subsequent written post-closure plan developed pursuant to paragraph (d)(1) of this section at any time.

(ii) The owner or operator must amend the written closure plan whenever:

(A) There is a change in the operation of the CCR unit that would substantially affect the written post-closure plan in effect; or

(B) After post-closure activities have commenced, unanticipated events necessitate a revision of the written post-closure plan.

(iii) The owner or operator must amend the written post-closure plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the need to revise an existing written post-closure plan. If a written post-closure plan is revised after post-closure activities have commenced for a CCR unit, the owner or operator must amend the written post-closure plan no later than 30 days following the triggering event.

(4) The owner or operator of the CCR unit must obtain a written certification from a qualified professional engineer or an approval from the Participating State Director or an approval from EPA where EPA is the permitting authority that the initial and any amendment of the written post-closure plan meets the requirements of this section.

(e) *Notification of completion of post-closure care period.* No later than 60 days following the completion of the post-closure care period, the owner or operator of the CCR unit must prepare a notification verifying that post-closure care has been completed. The notification must include the certification by a qualified professional engineer or the approval from the Participating State Director or the approval from EPA where EPA is the permitting authority verifying that post-closure care has been completed in accordance with the closure plan specified in paragraph (d) of this section and the requirements of this section. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by §257.105(i)(13).

(f) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in §257.105(i), the notification requirements specified in §257.106(i), and the Internet requirements specified in §257.107(i).

[80 FR 21468, Apr. 17, 2015, as amended at 81 FR 51808, Aug. 5, 2016; 83 FR 36455, July 30, 2018]

RECORDKEEPING, NOTIFICATION, AND POSTING OF INFORMATION TO THE INTERNET

§ 257.105 Recordkeeping requirements.

(a) Each owner or operator of a CCR unit subject to the requirements of this subpart must maintain files of all information required by this section in a written operating record at their facility.

(b) Unless specified otherwise, each file must be retained for at least five years following the date of each occurrence, measurement, maintenance, corrective action, report, record, or study.

(c) An owner or operator of more than one CCR unit subject to the provisions of this subpart may comply with the requirements of this section in one

recordkeeping system provided the system identifies each file by the name of each CCR unit. The files may be maintained on microfilm, on a computer, on computer disks, on a storage system accessible by a computer, on magnetic tape disks, or on microfiche.

(d) The owner or operator of a CCR unit must submit to the State Director and/or appropriate Tribal authority any demonstration or documentation required by this subpart, if requested, when such information is not otherwise available on the owner or operator's publicly accessible Internet site.

(e) *Location restrictions*. The owner or operator of a CCR unit subject to this subpart must place the demonstrations documenting whether or not the CCR unit is in compliance with the requirements under §§ 257.60(a), 257.61(a), 257.62(a), 257.63(a), and 257.64(a), as it becomes available, in the facility's operating record.

(f) *Design criteria*. The owner or operator of a CCR unit subject to this subpart must place the following information, as it becomes available, in the facility's operating record:

(1) The design and construction certifications as required by § 257.70(e) and (f).

(2) The documentation of liner type as required by § 257.71(a).

(3) The design and construction certifications as required by § 257.72(c) and (d).

(4) Documentation prepared by the owner or operator stating that the permanent identification marker was installed as required by §§ 257.73(a)(1) and 257.74(a)(1).

(5) The initial and periodic hazard potential classification assessments as required by §§ 257.73(a)(2) and 257.74(a)(2).

(6) The emergency action plan (EAP), and any amendment of the EAP, as required by §§ 257.73(a)(3) and 257.74(a)(3), except that only the most recent EAP must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section.

(7) Documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders as required by §§ 257.73(a)(3)(i)(E) and 257.74(a)(3)(i)(E).

(8) Documentation prepared by the owner or operator recording all activations of the emergency action plan as required by §§ 257.73(a)(3)(v) and 257.74(a)(3)(v).

(9) The history of construction, and any revisions of it, as required by § 257.73(c), except that these files must be maintained until the CCR unit completes closure of the unit in accordance with § 257.102.

(10) The initial and periodic structural stability assessments as required by §§ 257.73(d) and 257.74(d).

(11) Documentation detailing the corrective measures taken to remedy the deficiency or release as required by §§ 257.73(d)(2) and 257.74(d)(2).

(12) The initial and periodic safety factor assessments as required by §§ 257.73(e) and 257.74(e).

(13) The design and construction plans, and any revisions of it, as required by § 257.74(c), except that these files must be maintained until the CCR unit completes closure of the unit in accordance with § 257.102.

(14) The application and any supplemental materials submitted in support of the application as required by § 257.71(d)(1)(i)(E).

(15) The alternative liner demonstration as required by § 257.71(d)(1)(ii)(D).

(16) The alternative liner demonstration extension request as required by § 257.71(d)(2)(ii)(D).

(17) The documentation prepared for the preliminary demonstration as required by § 257.71(d)(2)(ii)(E).

(18) The notification of an incomplete application as required by § 257.71(d)(2)(iii)(B).

(19) The decision on the application as required by § 257.71(d)(2)(iii)(F).

(20) The final decision on the alternative liner demonstration as required by § 257.71(d)(2)(vii).

(21) The alternative source demonstration as required under § 257.71(d)(2)(ix)(A)(*4*).

(22) The final decision on the alternative source demonstration as required under § 257.71(d)(2)(ix)(A)(*5*).

(23) The final decision on the trend analysis as required under § 257.71(d)(2)(ix)(B)(*3*).

(24) The decision that the alternative source demonstration has been withdrawn as required under § 257.71(d)(2)(ix)(C).

(g) *Operating criteria*. The owner or operator of a CCR unit subject to this subpart must place the following information, as it becomes available, in the facility's operating record:

(1) The CCR fugitive dust control plan, and any subsequent amendment of the plan, required by § 257.80(b), except that only the most recent control plan must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section.

(2) The annual CCR fugitive dust control report required by § 257.80(c).

(3) The initial and periodic run-on and run-off control system plans as required by § 257.81(c).

(4) The initial and periodic inflow design flood control system plan as required by § 257.82(c).

(5) Documentation recording the results of each inspection and instrumentation monitoring by a qualified person as required by § 257.83(a).

(6) The periodic inspection report as required by § 257.83(b)(2).

(7) Documentation detailing the corrective measures taken to remedy the deficiency or release as required by §§ 257.83(b)(5) and 257.84(b)(5).

(8) Documentation recording the results of the weekly inspection by a qualified person as required by § 257.84(a).

(9) The periodic inspection report as required by § 257.84(b)(2).

(h) *Groundwater monitoring and corrective action*. The owner or operator of a CCR unit subject to this subpart must place the following information, as it becomes available, in the facility's operating record:

(1) The annual groundwater monitoring and corrective action report as required by § 257.90(e).

(2) Documentation of the design, installation, development, and decommissioning of any monitoring wells, piezometers and other measurement, sampling, and analytical devices as required by § 257.91(e)(1).

(3) The groundwater monitoring system certification as required by § 257.91(f).

(4) The selection of a statistical method certification as required by § 257.93(f)(6).

(5) Within 30 days of establishing an assessment monitoring program, the notification as required by § 257.94(e)(3).

(6) The results of appendices III and IV to this part constituent concentrations as required by § 257.95(d)(1).

(7) Within 30 days of returning to a detection monitoring program, the notification as required by § 257.95(e).

(8) Within 30 days of detecting one or more constituents in appendix IV to this part at statistically significant levels above the groundwater protection standard, the notifications as required by § 257.95(g).

(9) Within 30 days of initiating the assessment of corrective measures requirements, the notification as required by § 257.95(g)(5).

(10) The completed assessment of corrective measures as required by § 257.96(d).

(11) Documentation prepared by the owner or operator recording the public meeting for the corrective measures assessment as required by § 257.96(e).

(12) The semiannual report describing the progress in selecting and designing the remedy and the selection of remedy report as required by § 257.97(a), except that the selection of remedy report must be maintained until the remedy has been completed.

(13) Within 30 days of completing the remedy, the notification as required by § 257.98(e).

(14) The demonstration, including long-term performance data, supporting the suspension of groundwater monitoring requirements as required by § 257.90(g).

(i) *Closure and post-closure care*. The owner or operator of a CCR unit subject to this subpart must place the following information, as it becomes available, in the facility's operating record:

(1) The notification of intent to initiate closure of the CCR unit as required by § 257.100(c)(1).

(2) The annual progress reports of closure implementation as required by § 257.100(c)(2)(i) and (ii).

(3) The notification of closure completion as required by § 257.100(c)(3).

(4) The written closure plan, and any amendment of the plan, as required by § 257.102(b), except that only the most recent closure plan must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section.

(5) The written demonstration(s), including the certification required by § 257.102(e)(2)(iii), for a time extension for initiating closure as required by § 257.102(e)(2)(ii).

(6) The written demonstration(s), including the certification required by § 257.102(f)(2)(iii), for a time extension for completing closure as required by § 257.102(f)(2)(i).

(7) The notification of intent to close a CCR unit as required by § 257.102(g).

(8) The notification of completion of closure of a CCR unit as required by § 257.102(h).

(9) The notification recording a notation on the deed as required by § 257.102(i).

(10) The notification of intent to comply with the alternative closure requirements as required by § 257.103(c)(1).

(11) The annual progress reports under the alternative closure requirements as required by § 257.103(c)(2).

(12) The written post-closure plan, and any amendment of the plan, as required by § 257.104(d), except that only the most recent closure plan must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section.

(13) The notification of completion of post-closure care period as required by § 257.104(e).

(14) The notification of intent to comply with the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by § 257.103(f)(1)(ix)(A).

(15) The approved or denied demonstration for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by § 257.103(f)(1)(ix)(B).

(16) The notification for requesting additional time to the alternative cease receipt of waste deadline as required by § 257.103(f)(1)(ix)(C).

(17) The semi-annual progress reports for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by § 257.103(f)(1)(xi).

(18) The notification of intent to comply with the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by § 257.103(f)(2)(viii).

(19) The approved or denied demonstration for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by § 257.103(f)(2)(ix).

(20) The annual progress report for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by § 257.103(f)(2)(x).

(j) *Retrofit criteria.* The owner or operator of a CCR unit subject to this subpart must place the following information, as it becomes available, in the facility's operating record:

(1) The written retrofit plan, and any amendment of the plan, as required by § 257.102(k)(2), except that only the most recent retrofit plan must be maintained in the facility's operating record irrespective of the time requirement specified in paragraph (b) of this section.

(2) The notification of intent that the retrofit activities will proceed in accordance with the alternative procedures in § 257.103.

(3) The annual progress reports required under the alternative requirements as required by § 257.103.

(4) The written demonstration(s), including the certification in § 257.102(f)(2)(iii), for a time extension for completing retrofit activities as required by § 257.102(k)(3).

(5) The notification of intent to initiate retrofit of a CCR unit as required by § 257.102(k)(5).

(6) The notification of completion of retrofit activities as required by § 257.102(k)(6).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36456, July 30, 2018; 85 FR 53565, Aug. 28, 2020; 85 FR 72543, Nov. 12, 2020; 85 FR 80626, Dec. 14, 2020]

§ 257.106 Notification requirements.

(a) The notifications required under paragraphs (e) through (i) of this section must be sent to the relevant State Director and/or appropriate Tribal authority before the close of business on the day the notification is required to be completed. For purposes of this section, *before the close of business* means the notification must be postmarked or sent by electronic mail (email). If a notification deadline falls on a weekend or federal holiday, the notification deadline is automatically extended to the next business day.

(b) If any CCR unit is located in its entirety within Indian Country, the notifications of this section must be sent to the appropriate Tribal authority. If any CCR unit is located in part within Indian Country, the notifications of this section must be sent both to the appropriate State Director and Tribal authority.

(c) Notifications may be combined as long as the deadline requirement for each notification is met.

(d) Unless otherwise required in this section, the notifications specified in this section must be sent to the State Director and/or appropriate Tribal authority within 30 days of placing in the operating record the information required by § 257.105.

(e) *Location restrictions*. The owner or operator of a CCR unit subject to the requirements of this subpart must notify the State Director and/or appropriate Tribal authority that each demonstration specified under § 257.105(e) has been placed in the operating record and on the owner or operator's publicly accessible internet site.

(f) *Design criteria*. The owner or operator of a CCR unit subject to this subpart must notify the State Director and/or appropriate Tribal authority when information has been placed in the operating record and on the owner or operator's publicly accessible internet site. The owner or operator must:

(1) Within 60 days of commencing construction of a new CCR unit, provide notification of the availability of the design certification specified under § 257.105(f)(1) or (3). If the owner or operator of the CCR unit elects to install an alternative composite liner, the owner or operator must also submit to the State Director and/or appropriate Tribal authority a copy of the alternative composite liner design.

(2) No later than the date of initial receipt of CCR by a new CCR unit, provide notification of the availability of the construction certification specified under § 257.105(f)(1) or (3).

(3) Provide notification of the availability of the documentation of liner type specified under § 257.105(f)(2).

(4) Provide notification of the availability of the initial and periodic hazard potential classification assessments specified under § 257.105(f)(5).

(5) Provide notification of the availability of emergency action plan (EAP), and any revisions of the EAP, specified under § 257.105(f)(6).

(6) Provide notification of the availability of documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders specified under § 257.105(f)(7).

(7) Provide notification of documentation prepared by the owner or operator recording all activations of the emergency action plan specified under § 257.105(f)(8).

(8) Provide notification of the availability of the history of construction, and any revision of it, specified under § 257.105(f)(9).

(9) Provide notification of the availability of the initial and periodic structural stability assessments specified under § 257.105(f)(10).

(10) Provide notification of the availability of the documentation detailing the corrective measures taken to remedy the deficiency or release specified under § 257.105(f)(11).

(11) Provide notification of the availability of the initial and periodic safety factor assessments specified under § 257.105(f)(12).

(12) Provide notification of the availability of the design and construction plans, and any revision of them, specified under § 257.105(f)(13).

(13) Provide notification of the availability of the application and any supplemental materials submitted in support of the application specified under § 257.105(f)(14).

(14) Provide notification of the availability of the alternative liner demonstration specified under § 257.105(f)(15).

(15) Provide notification of the availability of the alternative liner demonstration extension request specified under § 257.105(f)(16).

(16) Provide notification of the availability of the documentation prepared for the preliminary demonstration specified under § 257.105(f)(17).

(17) Provide notification of the availability of the notification of an incomplete application specified under § 257.105(f)(18).

(18) Provide notification of the availability of the decision on the application specified under § 257.105(f)(19).

(19) Provide notification of the availability of the final decision on the alternative liner demonstration specified under § 257.105(f)(20).

(20) Provide notification of the availability of the alternative source demonstration specified under § 257.105(f)(21).

(21) Provide notification of the availability of the final decision on the alternative source demonstration specified under § 257.105(f)(22).

(22) Provide notification of the final decision on the trend analysis specified under § 257.105(f)(23).

(23) Provide notification of the decision that the alternative source demonstration has been withdrawn specified under § 257.105(f)(24).

(g) *Operating criteria.* The owner or operator of a CCR unit subject to this subpart must notify the State Director and/or appropriate Tribal authority when information has been placed in the operating record and on the owner or operator's publicly accessible internet site. The owner or operator must:

(1) Provide notification of the availability of the CCR fugitive dust control plan, or any subsequent amendment of the plan, specified under § 257.105(g)(1).

(2) Provide notification of the availability of the annual CCR fugitive dust control report specified under § 257.105(g)(2).

(3) Provide notification of the availability of the initial and periodic run-on and run-off control system plans specified under § 257.105(g)(3).

(4) Provide notification of the availability of the initial and periodic inflow design flood control system plans specified under § 257.105(g)(4).

(5) Provide notification of the availability of the periodic inspection reports specified under § 257.105(g)(6).

(6) Provide notification of the availability of the documentation detailing the corrective measures taken to remedy the deficiency or release specified under § 257.105(g)(7).

(7) Provide notification of the availability of the periodic inspection reports specified under § 257.105(g)(9).

(h) *Groundwater monitoring and corrective action.* The owner or operator of a CCR unit subject to this subpart must notify the State Director and/or appropriate Tribal authority when information has been placed in the operating record and on the owner or operator's publicly accessible internet site. The owner or operator must:

(1) Provide notification of the availability of the annual groundwater monitoring and corrective action report specified under § 257.105(h)(1).

(2) Provide notification of the availability of the groundwater monitoring system certification specified under § 257.105(h)(3).

(3) Provide notification of the availability of the selection of a statistical method certification specified under § 257.105(h)(4).

(4) Provide notification that an assessment monitoring programs has been established specified under § 257.105(h)(5).

(5) Provide notification that the CCR unit is returning to a detection monitoring program specified under § 257.105(h)(7).

(6) Provide notification that one or more constituents in appendix IV to this part have been detected at statistically significant levels above the groundwater protection standard and the notifications to land owners specified under § 257.105(h)(8).

(7) Provide notification that an assessment of corrective measures has been initiated specified under § 257.105(h)(9).

(8) Provide notification of the availability of assessment of corrective measures specified under § 257.105(h)(10).

(9) Provide notification of the availability of the semiannual report describing the progress in selecting and designing the remedy and the selection of remedy report specified under §257.105(h)(12).

(10) Provide notification of the completion of the remedy specified under §257.105(h)(13).

(11) Provide the demonstration supporting the suspension of groundwater monitoring requirements specified under §257.105(h)(14).

(i) *Closure and post-closure care.* The owner or operator of a CCR unit subject to this subpart must notify the State Director and/or appropriate Tribal authority when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator must:

(1) Provide notification of the intent to initiate closure of the CCR unit specified under §257.105(i)(1).

(2) Provide notification of the availability of the annual progress reports of closure implementation specified under §257.105(i)(2).

(3) Provide notification of closure completion specified under §257.105(i)(3).

(4) Provide notification of the availability of the written closure plan, and any amendment of the plan, specified under §257.105(i)(4).

(5) Provide notification of the availability of the demonstration(s) for a time extension for initiating closure specified under §257.105(i)(5).

(6) Provide notification of the availability of the demonstration(s) for a time extension for completing closure specified under §257.105(i)(6).

(7) Provide notification of intent to close a CCR unit specified under §257.105(i)(7).

(8) Provide notification of completion of closure of a CCR unit specified under §257.105(i)(8).

(9) Provide notification of the deed notation as required by §257.105(i)(9).

(10) Provide notification of intent to comply with the alternative closure requirements specified under §257.105(i)(10).

(11) The annual progress reports under the alternative closure requirements as required by §257.105(i)(11).

(12) Provide notification of the availability of the written post-closure plan, and any amendment of the plan, specified under §257.105(i)(12).

(13) Provide notification of completion of post-closure care specified under §257.105(i)(13).

(14) Provide the notification of intent to comply with the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as specified under §257.105(i)(14).

(15) Provide the approved or denied demonstration for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by as specified under §257.105(i)(15).

(16) Provide the notification for requesting additional time to the alternative cease receipt of waste deadline as required by §257.105(i)(16).

(17) The semi-annual progress reports for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as specified under §257.105(i)(17).

(18) Provide the notification of intent to comply with the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as specified under §257.105(i)(18).

(19) Provide the approved or denied demonstration for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by §257.105(i)(19).

(20) The annual progress report for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by §257.105(i)(20).

(j) *Retrofit criteria.* The owner or operator of a CCR unit subject to this subpart must notify the State Director and/or appropriate Tribal authority when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator must:

(1) Provide notification of the availability of the written retrofit plan, and any amendment of the plan, specified under §257.105(j)(1).

(2) Provide notification of intent to comply with the alternative retrofit requirements specified under § 257.105(j)(2).

(3) The annual progress reports under the alternative retrofit requirements as required by § 257.105(j)(3).

(4) Provide notification of the availability of the demonstration(s) for a time extension for completing retrofit activities specified under § 257.105(j)(4).

(5) Provide notification of intent to initiate retrofit of a CCR unit specified under § 257.105(j)(5).

(6) Provide notification of completion of retrofit activities specified under § 257.105(j)(6).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36456, July 30, 2018; 85 FR 53565, Aug. 28, 2020; 85 FR 72543, Nov. 12, 2020]

§ 257.107 Publicly accessible Internet site requirements.

(a) Each owner or operator of a CCR unit subject to the requirements of this subpart must maintain a publicly accessible internet site (CCR website) containing the information specified in this section. The owner or operator's website must be titled "CCR Rule Compliance Data and Information." The website must ensure that all information required to be posted is immediately available to anyone visiting the site, without requiring any prerequisite, such as registration or a requirement to submit a document request. All required information must be clearly identifiable and must be able to be immediately printed and downloaded by anyone accessing the site. If the owner/operator changes the web address (*i.e.*, Uniform Resource Locator (URL)) at any point, they must notify EPA via the "contact us" form on EPA's CCR website and the state director within 14 days of making the change. The facility's CCR website must also have a "contact us" form or a specific email address posted on the website for the public to use to submit questions and issues relating to the availability of information on the website.

(b) An owner or operator of more than one CCR unit subject to the provisions of this subpart may comply with the requirements of this section by using the same Internet site for multiple CCR units provided the CCR Web site clearly delineates information by the name or identification number of each unit.

(c) Unless otherwise required in this section, the information required to be posted to the CCR Web site must be made available to the public for at least five years following the date on which the information was first posted to the CCR Web site.

(d) Unless otherwise required in this section, the information must be posted to the CCR Web site within 30 days of placing the pertinent information required by § 257.105 in the operating record.

(e) *Location restrictions*. The owner or operator of a CCR unit subject to this subpart must place each demonstration specified under § 257.105(e) on the owner or operator's CCR Web site.

(f) *Design criteria*. The owner or operator of a CCR unit subject to this subpart must place the following information on the owner or operator's CCR Web site:

(1) Within 60 days of commencing construction of a new unit, the design certification specified under § 257.105(f)(1) or (3).

(2) No later than the date of initial receipt of CCR by a new CCR unit, the construction certification specified under § 257.105(f)(1) or (3).

(3) The documentation of liner type specified under § 257.105(f)(2).

(4) The initial and periodic hazard potential classification assessments specified under § 257.105(f)(5).

(5) The emergency action plan (EAP) specified under § 257.105(f)(6), except that only the most recent EAP must be maintained on the CCR Web site irrespective of the time requirement specified in paragraph (c) of this section.

(6) Documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders specified under § 257.105(f)(7).

(7) Documentation prepared by the owner or operator recording any activation of the emergency action plan specified under § 257.105(f)(8).

(8) The history of construction, and any revisions of it, specified under § 257.105(f)(9).

(9) The initial and periodic structural stability assessments specified under § 257.105(f)(10).

(10) The documentation detailing the corrective measures taken to remedy the deficiency or release specified under § 257.105(f)(11).

(11) The initial and periodic safety factor assessments specified under § 257.105(f)(12).

(12) The design and construction plans, and any revisions of them, specified under § 257.105(f)(13).

(13) The application and any supplemental materials submitted in support of the application specified under § 257.105(f)(14).

(14) The alternative liner demonstration specified under § 257.105(f)(15).

(15) The alternative liner demonstration specified under § 257.105(f)(16).

(16) The documentation prepared for the preliminary demonstration specified under § 257.105(f)(17).

(17) The notification of an incomplete application specified under § 257.105(f)(18).

(18) The decision on the application specified under § 257.105(f)(19).

(19) The final decision on the alternative liner demonstration specified under § 257.105(f)(20).

(20) The alternative source demonstration specified under § 257.105(f)(21).

(21) The final decision on the alternative source demonstration specified under § 257.105(f)(22).

(22) The final decision on the trend analysis specified under § 257.105(f)(23).

(23) The decision that the alternative source demonstration has been withdrawn specified under § 257.105(f)(24).

(g) *Operating criteria.* The owner or operator of a CCR unit subject to this subpart must place the following information on the owner or operator's CCR Web site:

(1) The CCR fugitive dust control plan, or any subsequent amendment of the plan, specified under § 257.105(g)(1) except that only the most recent plan must be maintained on the CCR Web site irrespective of the time requirement specified in paragraph (c) of this section.

(2) The annual CCR fugitive dust control report specified under § 257.105(g)(2).

(3) The initial and periodic run-on and run-off control system plans specified under § 257.105(g)(3).

(4) The initial and periodic inflow design flood control system plans specified under § 257.105(g)(4).

(5) The periodic inspection reports specified under § 257.105(g)(6).

(6) The documentation detailing the corrective measures taken to remedy the deficiency or release specified under § 257.105(g)(7).

(7) The periodic inspection reports specified under § 257.105(g)(9).

(h) *Groundwater monitoring and corrective action.* The owner or operator of a CCR unit subject to this subpart must place the following information on the owner or operator's CCR Web site:

(1) The annual groundwater monitoring and corrective action report specified under § 257.105(h)(1).

(2) The groundwater monitoring system certification specified under § 257.105(h)(3).

(3) The selection of a statistical method certification specified under § 257.105(h)(4).

(4) The notification that an assessment monitoring programs has been established specified under § 257.105(h)(5).

(5) The notification that the CCR unit is returning to a detection monitoring program specified under § 257.105(h)(7).

(6) The notification that one or more constituents in appendix IV to this part have been detected at statistically significant levels above the groundwater protection standard and the notifications to land owners specified under § 257.105(h)(8).

(7) The notification that an assessment of corrective measures has been initiated specified under § 257.105(h)(9).

(8) The assessment of corrective measures specified under § 257.105(h)(10).

(9) The semiannual reports describing the progress in selecting and designing remedy and the selection of remedy report specified under § 257.105(h)(12), except that the selection of the remedy report must be maintained until the remedy has been completed.

(10) The notification that the remedy has been completed specified under § 257.105(h)(13).

(11) The demonstration supporting the suspension of groundwater monitoring requirements specified under § 257.105(h)(14).

(i) *Closure and post-closure care.* The owner or operator of a CCR unit subject to this subpart must place the following information on the owner or operator's CCR Web site:

(1) The notification of intent to initiate closure of the CCR unit specified under § 257.105(i)(1).

(2) The annual progress reports of closure implementation specified under § 257.105(i)(2).

(3) The notification of closure completion specified under § 257.105(i)(3).

(4) The written closure plan, and any amendment of the plan, specified under § 257.105(i)(4).

(5) The demonstration(s) for a time extension for initiating closure specified under § 257.105(i)(5).

(6) The demonstration(s) for a time extension for completing closure specified under § 257.105(i)(6).

(7) The notification of intent to close a CCR unit specified under § 257.105(i)(7).

(8) The notification of completion of closure of a CCR unit specified under § 257.105(i)(8).

(9) The notification recording a notation on the deed as required by § 257.105(i)(9).

(10) The notification of intent to comply with the alternative closure requirements as required by § 257.105(i)(10).

(11) The annual progress reports under the alternative closure requirements as required by § 257.105(i)(11).

(12) The written post-closure plan, and any amendment of the plan, specified under § 257.105(i)(12).

(13) The notification of completion of post-closure care specified under § 257.105(i)(13).

(14) The notification of intent to comply with the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as specified under § 257.105(i)(14).

(15) The approved or denied demonstration for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by as specified under § 257.105(i)(15).

(16) The notification for requesting additional time to the alternative cease receipt of waste deadline as required by § 257.105(i)(16).

(17) The semi-annual progress reports for the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as specified under § 257.105(i)(17).

(18) The notification of intent to comply with the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as specified under § 257.105(i)(18).

(19) The approved or denied demonstration for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by § 257.105(i)(19).

(20) The annual progress report for the site-specific alternative to initiation of closure due to permanent cessation of a coal-fired boiler(s) by a date certain as required by § 257.105(i)(20).

(j) *Retrofit criteria.* The owner or operator of a CCR unit subject to this subpart must place the following information on the owner or operator's CCR Web site:

(1) The written retrofit plan, and any amendment of the plan, specified under § 257.105(j)(1).

(2) The notification of intent to comply with the alternative retrofit requirements as required by § 257.105(j)(2).

(3) The annual progress reports under the alternative retrofit requirements as required by § 257.105(j)(3).

(4) The demonstration(s) for a time extension for completing retrofit activities specified under § 257.105(j)(4).

(5) The notification of intent to retrofit a CCR unit specified under § 257.105(j)(5).

(6) The notification of completion of retrofit activities specified under § 257.105(j)(6).

[80 FR 21468, Apr. 17, 2015, as amended at 83 FR 36456, July 30, 2018; 85 FR 53566, Aug. 28, 2020; 85 FR 72543, Nov. 12, 2020]

ADEQ CCR rule, authorizing statutes; implementing statutes

49-891. Coal combustion residuals program; rules; incorporation by reference

A. The director may adopt rules to establish and operate a coal combustion residuals program equivalent to or at least as protective as the federal coal combustion residuals program under 40 Code of Federal Regulations part 257, subpart D for the purpose of obtaining approval to operate the federal CCR program. Federal coal combustion residuals regulations may be adopted by reference. Rules adopted pursuant to this subsection shall not be more or less stringent than or conflict with 40 Code of Federal regulations part 257, subpart D for nonprocedural standards, except that the department may adopt aquifer protection standards that are more stringent than 40 Code of Federal regulations part 257, subpart D if these standards are developed pursuant to chapter 2, article 3 of this title.

B. Rules adopted pursuant to subsection A of this section shall not be more or less stringent than or conflict with 40 Code of Federal Regulations part 257, subpart D for nonprocedural standards, except that the department shall adopt those portions of the dam safety standards that are developed pursuant to title 45, chapter 6, article 1, that are in existence for CCR surface impoundments on September 24, 2022 and that are more stringent than 40 Code of Federal Regulations part 257, subpart D.

C. The rules authorized by subsection A of this section shall provide requirements for issuing, denying, suspending or modifying individual CCR permits, including:

1. Requirements for submitting notices, permit applications and any additional information necessary to determine whether a permit should be issued.

2. Recordkeeping, reporting and compliance schedule requirements in the permit.

3. A permit life of ten years, after which the permit shall be renewed.

4. Adequate opportunities for public participation during CCR permit processing.

5. Other terms and conditions as the director deems necessary to ensure compliance with this article.

D. The rules for CCR permits shall include:

1. Permit processing fees from the applicant to cover the cost of administrative services and other expenses associated with evaluating the application and issuing or denying the permit, beginning when an application is submitted.

2. Annual fees for the program approved by the United States environmental protection agency beginning after CCR program approval.

E. The fees authorized by this section shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

F. After the effective date of design and operation rules adopted by the director for coal combustion residuals facilities pursuant to this section, facilities with CCR units may submit to the department a permit application covering each CCR unit at the facility. Facilities with CCR units shall submit to the department a permit application covering each CCR unit at the facility within one hundred eighty days of CCR program approval.

Implementing statutes

49-763.01. Variances

Within ninety days after receipt of a written request for a variance from a solid waste facility owner, operator or management agency, the department may grant a variance from solid waste management rules and standards if the department concludes that no violation of health standards will occur. The department may consider whether an environmental nuisance will result. If the request is denied, the department shall prepare and make available to the management agency or facility owner or operator a written decision including relevant data and a technical analysis supporting the denial. The department shall not grant any variance or temporary authorization to operate under this chapter if the proposed variance conflicts or is inconsistent with the requirements of 40 C.F.R. part 257, subparts A and B, 40 Code of Federal Regulations part 257, subpart D or 40 C.F.R. part 258.

49-769. Agency orders; appeal

Except as provided in section 41-1092.08, subsection H, any final agency order issued pursuant to this article or article 11 of this chapter is subject to judicial review pursuant to title 12, chapter 7, article 6.

49-770. Financial assurance requirements for solid waste facilities

A. Beginning one hundred eighty days after the effective date of the design and operation rules adopted by the director for that type of solid waste facility pursuant to section 49-761 or article 11 of this chapter or after CCR program approval, whichever is later, a solid waste facility may not be operated unless financial responsibility has been demonstrated for the costs of closure, postclosure care, if necessary, and any corrective action as a result of known releases from the facility. Financial assurance for municipal solid waste landfills shall be required pursuant to section 49-761, subsection B. This subsection applies to small municipal solid waste landfills beginning on October 9, 1997. For all other municipal solid waste landfills, this subsection shall apply beginning on September 1, 1997 unless the director establishes

an alternative date pursuant to section 49-761, subsection B on a facility-specific basis.

B. Within one hundred eighty days after the effective date of the design and operation rules adopted by the director for that type of solid waste facility pursuant to section 49-761, existing solid waste facilities shall modify and submit existing facility plans to the department to demonstrate the financial responsibility required by this section. A solid waste facility in operation before the effective date of the design and operation rules adopted by the director for that type of solid waste facility pursuant to section 49-761 may continue to operate while the department reviews the modified plan.

C. Within one hundred eighty days after the effective date of design and operation rules adopted by the director for that type of solid waste facility pursuant to article 11 of this chapter, existing solid waste facilities regulated under article 11 of this chapter may submit to the department the financial responsibility required by this section. Within one hundred eighty days after CCR program approval, existing solid waste facilities regulated under article 11 of this chapter shall submit to the department the financial responsibility required by this section. A solid waste facility in operation before the effective date of CCR program approval may continue to operate while the department reviews the submission.

D. A demonstration of financial responsibility made for a solid waste facility under chapter 2, article 3 of this title shall suffice, in whole or in part, for any demonstration of financial responsibility prescribed by this section. A demonstration of financial assurance or competence required under this section or under chapter 2, article 3 of this title for a solid waste facility shall not be required before completion of construction but shall be required before the department issues approval to operate.

E. The terms and conditions adopted by the director for each financial assurance mechanism shall provide:

1. The amount in current dollars equal to the cost of hiring a third party to complete site closure and, if necessary, continued postclosure monitoring and maintenance consistent with the plan and any factor to be applied for inflation. Amounts shall be updated annually for solid waste landfills and every three years for all other solid waste facilities to adjust for inflation or as necessary to reflect increased costs resulting from changes to the facility plan or facility conditions.

2. The period after closure for which financial assurance is required.

F. The approved financial assurance mechanism shall not be released unless the plan-specified closure and postclosure requirements have been completed or unless new financial assurance has been submitted by a new owner or operator of the solid waste facility and approved by the director. The owner or operator of the solid waste facility:

1. Shall receive any accrued interest on financial assurance instruments retained by the department.

2. May request a reduction in financial assurance requirements on completion of closure or portions of postclosure monitoring and maintenance that are approved by the director.

3. Shall justify any reduction in closure or postclosure cost estimates in the facility plan.

4. Shall assure that the period of coverage of the financial assurance instrument exceeds by a minimum of ninety days the applicable one-year or three-year time period required in subsection E of this section.

5. Shall be released from closure or postclosure financial responsibility on certification by a registered professional engineer or other environmental professional deemed acceptable by the director that the specific activities of closure or postclosure have been completed in accordance with the approved facility plan and placed in the operating record of the facility plan.

G. For a local governmental agency with CCR units, the demonstration required by this section may contain the details of the financial arrangements used to meet the estimated closure and postclosure costs without specifying a specific financial assurance mechanism.

49-781. Compliance orders; appeal; enforcement

A. If the director determines that a person is in violation of any provision of article 3 or 4 of this chapter, a rule adopted pursuant to article 4 or 11 of this chapter or any condition of a coal combustion residuals permit or solid waste facility plan approval issued pursuant to this chapter or is creating an imminent and substantial endangerment to the public health or the environment, the director may issue an order requiring compliance immediately or within a specified period of time.

B. A compliance order shall state with reasonable specificity the nature of the violation, a time for compliance, if applicable, and the right to a hearing.

C. A compliance order shall be transmitted to the alleged violator by certified mail, return receipt requested, or by hand delivery.

D. At the request of the director, the attorney general may file an action in superior court to enforce orders issued pursuant to this section after the order becomes final.

E. This section does not apply to CCR units until after CCR program approval.

49-783. Injunctive relief; civil penalties; costs

A. If the director has reason to believe that a person is in violation of any provision of article 3, 4 or 11 of this chapter, a rule adopted pursuant to article 4 or 11 of this chapter, any condition of a coal combustion residuals permit or an approved solid waste facility plan issued pursuant to article 4 of this chapter or that a person is creating an imminent and substantial endangerment to the public health or the environment, the director through the attorney general may request a temporary restraining order, a preliminary injunction, a permanent injunction or any other relief necessary to protect the public health or the environment, without regard to whether the person has requested a hearing.

B. A person who violates any provision of article 3, 4 or 11 of this chapter, a rule adopted pursuant to article 4 or 11 of this chapter, an order issued pursuant to this article, a coal combustion residuals permit or an approved solid waste facility plan issued pursuant to this chapter is subject to a civil penalty of not more than $1,000 for each day not to exceed $15,000 for each violation. At the request of the director, the attorney general shall file an action in superior court to recover civil penalties as prescribed by this section.

C. This section does not apply to CCR units until after CCR program approval.

49-791. Violation; classification; penalties

A. A person shall not:

1. Practice open burning at a solid waste facility without a variance approval issued by the director.

2. Scavenge at a solid waste facility.

3. Damage or destroy signs posted at a solid waste facility.

4. Dump or dispose of solid waste in violation of this chapter or any applicable rule adopted pursuant to article 4 or 11 of this chapter.

5. Operate a solid waste facility in a manner inconsistent with the solid waste facility plan after it has been approved or any rule adopted pursuant to article 4 or 11 of this chapter.

B. A violation of subsection A of this section is a class 2 misdemeanor.

C. In addition to the penalties prescribed by subsection B of this section or section 13-1603, subsection B, a person who violates this section or section 13-1603 shall be subject to a civil penalty in an amount prescribed by section 49-783.

49-881. Solid waste fee fund; uses; exemption

A. The solid waste fee fund is established. The director shall administer the fund. The fund consists of legislative appropriations, donations, gifts, grants, registration fees

collected pursuant to sections 44-1303 and 44-1304.01, waste tire administrative monies distributed pursuant to section 44-1305, subsection B, paragraph 1, lead acid battery collection and recycling fees collected pursuant to section 44-1322, licensure fees collected pursuant to section 49-104, subsection B, paragraph 14, subdivision (b), solid waste general permit fees collected pursuant to section 49-706, solid waste landfill registration fees from section 49-747, licensure fees collected pursuant to section 49-761, subsection D, paragraphs 2 and 3 and subsections H, J and M, solid waste fees collected pursuant to section 49-762.03, subsection F, section 49-802, subsection B, special waste management plan fees collected pursuant to section 49-857, special waste management fees collected pursuant to section 49-863, private consultants expedited plan review fees collected pursuant to section 49-762.03, subsection G, self-certification filing fees collected pursuant to section 49-762.05, subsection H, solid waste landfill disposal fees collected pursuant to section 49-836, special waste fees collected pursuant to section 49-855, subsection C, paragraph 2 and coal combustion residuals permit processing fees and annual fees collected pursuant to section 49-891.

B. Monies in the fund are subject to legislative appropriation for solid waste control programs established in the funding sources pursuant to subsection A of this section and as determined by the director.

C. On notice from the director, the state treasurer shall invest and divest monies in the fund as provided in section 35-313, and monies earned from investment shall be credited to the fund. Monies deposited in the fund are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

49-891.01. Powers of the director

After CCR program approval, the director may compel production of documents or information from owners and operators of coal combustion residuals units in order to evaluate compliance with applicable statutes, rules and permits.

ADEQ CCR rule; definitions not shown in rule or statutes

49-701. Definitions

In this chapter, unless the context otherwise requires:

1. "Administratively complete plan" means an application for a solid waste facility plan approval that the department has determined contains each of the components required by statute or rule but that has not undergone technical review or public notice by the department.

2. "Administrator" means the administrator of the United States environmental protection agency.

3. "Advanced recycling":

(a) Means a manufacturing process to convert post-use polymers and recovered feedstocks into basic hydrocarbon raw materials, feedstocks, chemicals, monomers, oligomers, plastics, plastics and chemical feedstocks, basic and unfinished chemicals, crude oil, naphtha, liquid transportation fuels and coatings and other products such as waxes and lubricants through processes that include pyrolysis, gasification, depolymerization, catalytic cracking, reforming, hydrogenation, solvolysis and other similar technologies.

(b) Does not include solid waste management, processing, incineration or treatment.

4. "Advanced recycling facility":

(a) Means a facility that receives, stores and converts post-use polymers and recovered feedstocks using advanced recycling.

(b) Includes a manufacturing facility that is subject to applicable provisions of law and department rules for air quality, water quality and waste and land use.

(c) Does not include a solid waste facility, processing facility, treatment facility, materials recovery facility, recycling facility or incinerator.

5. "Beneficial use of CCR" means that all of the following conditions apply:

(a) The CCR provides a functional benefit.

(b) The CCR substitutes for the use of a virgin material, which conserves natural resources that would otherwise need to be obtained through practices such as extraction.

(c) The use of the CCR meets relevant product specifications, regulatory standards or design standards when available, and when those standards are not available, the CCR is not used in excess quantities.

(d) For unencapsulated use of CCR involving placement of twelve thousand four hundred tons or more on the land in nonroadway applications, the user demonstrates, keeps records and provides documentation on request, that environmental releases to groundwater, surface water, soil and air are comparable to or lower than those from analogous products made without CCR, or that environmental releases to groundwater, surface water, soil and air will be at or below relevant regulatory and health-based benchmarks for human and ecological receptors during use.

6. "CCR pile":

(a) Means any noncontainerized accumulation of solid, nonflowing CCR that is placed on the land.

(b) Does not include a CCR that is beneficially used off-site.

7. "CCR program approval" means United States environmental protection agency approval of the Arizona coal combustion residuals program in accordance with 42 United States Code section 6945(d)(1).

8. "CCR surface impoundment" or "impoundment" means a natural topographic depression, man-made excavation or diked area, which is designed to hold an accumulation of CCR and liquids, and the CCR unit treats, stores or disposes of CCR.

9. "Closed solid waste facility" means any of the following:

(a) A solid waste facility other than a CCR unit that ceases storing, treating, processing or receiving for disposal solid waste before the effective date of design and operation rules for that type of facility adopted pursuant to section 49-761.

(b) A public solid waste landfill that meets any of the following criteria:

(i) Ceased receiving solid waste before July 1, 1983.

(ii) Ceased receiving solid waste and received at least two feet of cover material before January 1, 1986.

(iii) Received approval for closure from the department after completing a postclosure care and monitoring plan as required by permit or plan approval.

(c) A public composting plant or a public incinerating facility that closed in accordance with an approved plan.

10. "Coal combustion residuals" or "CCR" means fly ash, bottom ash, boiler slag and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.

11. "Coal combustion residuals landfill" or "CCR landfill":

(a) Means an area of land or an excavation that receives CCR and that is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine or a cave.

(b) Includes sand and gravel pits and quarries that receive CCR or CCR piles and any use of CCR that does not meet the definition of a beneficial use of CCR.

12. "Coal combustion residuals unit" or "CCR unit":

(a) Means any CCR landfill, CCR surface impoundment or lateral expansion of a CCR unit or a combination of more than one of these units.

(b) Includes both new and existing units, unless otherwise specified.

13. "Construction debris" means solid waste derived from the construction, repair or remodeling of buildings or other structures.

14. "County" means:

(a) The board of supervisors in the context of the exercise of powers or duties.

(b) The unincorporated areas in the context of area of jurisdiction.

15. "Demolition debris" means solid waste derived from the demolition of buildings or other structures.

16. "Depolymerization" means a manufacturing process through which post-use polymers are broken into smaller molecules such as monomers and oligomers or raw, intermediate or final products, plastics and chemical feedstocks, basic and unfinished chemicals, crude oil, naphtha, liquid transportation fuels, waxes, lubricants, coatings and other basic hydrocarbons.

17. "Discharge" has the same meaning prescribed in section 49-201.

18. "Existing CCR landfill" means a CCR landfill that receives CCR both before and after October 19, 2015, or for which construction commenced before October 19, 2015 and that receives CCR on or after October 19, 2015. For the purposes of this paragraph, "commenced construction" means the owner or operator of a CCR landfill has obtained the federal, state and local approvals or permits necessary to begin physical construction and a continuous on site, physical construction program had begun before October 19, 2015.

19. "Existing CCR surface impoundment" means a CCR surface impoundment that meets one of the following conditions:

(a) Receives CCR both before and after October 19, 2015.

(b) For which construction commenced before October 19, 2015 and that receives CCR on or after October 19, 2015. For the purposes of this paragraph, "commenced

construction" means the owner or operator of a CCR surface impoundment has obtained the federal, state and local approvals or permits necessary to begin physical construction and a continuous on site, physical construction program had begun before October 19, 2015.

20. "Existing solid waste facility" means a solid waste facility other than a CCR unit that begins construction or is in operation on the effective date of the design and operation rules adopted by the director pursuant to section 49-761 for that type of solid waste facility.

21. "Facility plan" means any design or operating plan for a solid waste facility or group of solid waste facilities other than a permit issued under article 11 of this chapter.

22. "40 C.F.R. part 257, subparts A and B" means 40 Code of Federal Regulations part 257, subparts A and B in effect on May 1, 2004.

23. "40 C.F.R. part 258" means 40 Code of Federal Regulations part 258 in effect on May 1, 2004.

24. "Gasification" means a manufacturing process through which recovered feedstocks are heated and converted into a fuel and gas mixture in an oxygen-deficient atmosphere and the mixture is converted into valuable raw, intermediate and final products, including plastic monomers, chemicals, waxes, lubricants, chemical feedstocks, crude oil, diesel, gasoline, diesel and gasoline blendstocks, home heating oil and other fuels, including ethanol and transportation fuel, that are returned to economic utility in the form of raw materials, products or fuels.

25. "Household hazardous waste" means solid waste as described in 40 Code of Federal Regulations section 261.4(b)(1) as incorporated by reference in the rules adopted pursuant to chapter 5 of this title.

26. "Household waste":

(a) Means any solid waste, including garbage, rubbish and sanitary waste from septic tanks, that is generated from households, including single and multiple-family residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds and day use recreation areas.

(b) Does not include construction debris, landscaping rubble or demolition debris.

27. "Inert material":

(a) Means material that satisfies all of the following conditions:

(i) Is not flammable.

(ii) Will not decompose.

(iii) Will not leach substances in concentrations that exceed applicable aquifer water quality standards prescribed by section 49-201, paragraph 22 when subjected to a water leach test that is designed to approximate natural infiltrating waters.

(b) Includes concrete, asphaltic pavement, brick, rock, gravel, sand, soil and metal, if used as reinforcement in concrete.

(c) Does not include special waste, hazardous waste, glass or other metal.

28. "Land disposal" means placement of solid waste in or on land.

29. "Landscaping rubble" means material that is derived from landscaping or reclamation activities and that may contain inert material and not more than ten percent by volume of vegetative waste.

30. "Lateral expansion" means, for the purposes of the coal combustion residuals program established pursuant to article 11 of this chapter, a horizontal expansion of the waste boundaries of an existing CCR landfill or existing CCR surface impoundment made after October 19, 2015.

31. "Management agency" means any person responsible for the day-to-day operation, maintenance and management of a particular public facility or group of public facilities.

32. "Medical waste":

(a) Means any solid waste that is generated in the diagnosis, treatment or immunization of a human being or animal or in any research relating to that diagnosis, treatment or immunization, or in the production or testing of biologicals.

(b) Includes discarded drugs.

(c) Does not include hazardous waste as defined in section 49-921 other than very small quantity generator waste.

33. "Municipal solid waste landfill" means any solid waste landfill that accepts household waste, household hazardous waste or very small quantity generator waste.

34. "New solid waste facility" means a solid waste facility that begins construction or operation after the effective date of design and operating rules that are adopted pursuant to section 49-761 or article 11 of this chapter for that type of solid waste facility.

35. "On site" means the same or geographically contiguous property that may be divided by public or private right-of-way if the entrance and exit between the properties are at a crossroads intersection and access is by crossing the right-of-way and not by traveling along the right-of-way. Noncontiguous properties that are owned by the same person and connected by a right-of-way that is controlled by that person

and to which the public does not have access are deemed on site property. Noncontiguous properties that are owned or operated by the same person regardless of right-of-way control are also deemed on site property.

36. "Person" means any public or private corporation, company, partnership, firm, association or society of persons, the federal government and any of its departments or agencies, this state or any of its agencies, departments, political subdivisions, counties, towns or municipal corporations, as well as a natural person.

37. "Post-use polymer":

(a) Means a plastic to which all of the following apply:

(i) The plastic is derived from any industrial, commercial, agricultural or domestic activities.

(ii) The plastic is not mixed with solid waste or hazardous waste on site or during processing at the advanced recycling facility.

(iii) The plastic's use or intended use is as a feedstock for manufacturing crude oil, fuels, feedstocks, blendstocks, raw materials or other intermediate products or final products using advanced recycling.

(iv) The plastic has been sorted from solid waste and other regulated waste but may contain residual amounts of solid waste such as organic material and incidental contaminants or impurities such as paper labels and metal rings.

(v) The plastic is processed at an advanced recycling facility or held at an advanced recycling facility before processing.

(b) Does not include solid waste or municipal waste.

38. "Process" or "processing" means the reduction, separation, recovery, conversion or recycling of solid waste.

39. "Public solid waste facility" means a transfer facility and any site owned, operated or used by any person for the storage, processing, treatment or disposal of solid waste that is not generated on site.

40. "Pyrolysis" means a manufacturing process through which post-use polymers are heated in the absence of oxygen until melted, are thermally decomposed and are then cooled, condensed and converted into valuable raw, intermediate and final products, including plastic monomers, chemicals, waxes, lubricants, chemical feedstocks, crude oil, diesel, gasoline, diesel and gasoline blendstocks, home heating oil and other fuels, including ethanol and transportation fuel, that are returned to economic utility in the form of raw materials, products or fuels.

41. "Recovered feedstocks":

(a) Means one or more of the following materials that have been processed so that they may be used as feedstock in an advanced recycling facility:

(i) Post-use polymers.

(ii) Materials for which the United States environmental protection agency has made a nonwaste determination pursuant to 40 Code of Federal Regulations section 241.3(c) or has otherwise determined are feedstocks and not solid waste.

(b) Does not include:

(i) Unprocessed municipal solid waste.

(ii) Materials that are mixed with solid waste or hazardous waste on site or during processing at an advanced recycling facility.

42. "Recycling facility" means a solid waste facility that is owned, operated or used for the storage, treatment or processing of recyclable solid waste.

43. "Salvaging" means the removal of solid waste from a solid waste facility with the permission and in accordance with rules or ordinances of the management agency for purposes of productive reuse.

44. "Scavenging" means the unauthorized removal of solid waste from a solid waste facility.

45. "Solid waste facility" means a transfer facility and any site owned, operated or used by any person for the storage, processing, treatment or disposal of solid waste, very small quantity generator waste or household hazardous waste but does not include the following:

(a) A site at which less than one ton of solid waste that is not household waste, household hazardous waste, very small quantity generator waste, medical waste or special waste and that was generated on site is stored, processed, treated or disposed in compliance with section 49-762.07, subsection F.

(b) A site at which solid waste that was generated on site is stored for ninety days or less.

(c) A site at which nonputrescible solid waste that was generated on site in amounts of less than one thousand kilograms per month per type of nonputrescible solid waste is stored and contained for one hundred eighty days or less.

(d) A site that stores, treats or processes paper, glass, wood, cardboard, household textiles, scrap metal, plastic, vegetative waste, aluminum, steel or other recyclable material and that is not a waste tire facility, a transfer facility or a recycling facility.

(e) A site where sludge from a wastewater treatment facility is applied to the land as a fertilizer or beneficial soil amendment in accordance with sludge application requirements.

(f) A closed solid waste facility.

(g) A solid waste landfill that is performing or has completed postclosure care before July 1, 1996 in accordance with an approved postclosure plan.

(h) A closed solid waste landfill performing a onetime removal of solid waste from the closed solid waste landfill, if the operator provides a written notice that describes the removal project to the department within thirty days after completion of the removal project.

(i) A site where solid waste generated in street sweeping activities is stored, processed or treated before disposal at a solid waste facility authorized under this chapter.

(j) A site where solid waste generated at either a drinking water treatment facility or a wastewater treatment facility is stored, processed, or treated on site before disposal at a solid waste facility authorized under this chapter, and any discharge is regulated pursuant to chapter 2, article 3 of this title.

(k) A closed solid waste landfill where development activities occur on the property or where excavation or removal of solid waste is performed for maintenance and repair if the following conditions are met:

(i) When the project is completed there will not be an increase in leachate that would result in a discharge.

(ii) When the project is completed the concentration of methane gas will not exceed twenty-five percent of the lower explosive limit in on-site structures, or the concentration of methane gas will not exceed the lower explosive limit at the property line.

(iii) Protection has been provided to prevent remaining waste from causing any vector, odor, litter or other environmental nuisance.

(iv) The operator provides a notice to the department containing the information required by section 49-762.07, subsection A, paragraphs 1, 2 and 5 and a brief description of the project.

(l) Agricultural on-site disposal as provided in section 49-766.

(m) The use, storage, treatment or disposal of by-products of regulated agricultural activities as defined in section 49-201 and that are subject to best management practices pursuant to section 49-247 or by-products of livestock, range livestock and

poultry as defined in section 3-1201, pesticide containers that are regulated pursuant to title 3, chapter 2, article 6 or other agricultural crop residues.

(n) Household hazardous waste collection events held at a temporary site for not more than six days in any calendar quarter.

(o) Wastewater treatment facilities as defined in section 49-1201.

(p) An on-site single-family household waste composting facility.

(q) A site at which five hundred or fewer waste tires are stored.

(r) A site at which mining industry off-road waste tires are stored or are disposed of as prescribed by rules in effect on February 1, 1996, until the director by rule determines that on-site recycling methods exist that are technically feasible and economically practical.

(s) A site at which underground piping, conduit, pipe covering or similar structures are abandoned in place in accordance with applicable state and federal laws.

(t) An advanced recycling facility that converts recovered feedstocks to manufacture raw materials and intermediate and final products.

46. "Solid waste landfill":

(a) Means a facility, area of land or excavation in which solid wastes are placed for permanent disposal.

(b) Does not include a land application unit, surface impoundment, injection well, coal combustion residuals landfill, compost pile or waste pile or an area containing ash from the on-site combustion of coal that does not contain household waste, household hazardous waste or very small quantity generator waste.

47. "Solid waste management" means the systematic administration of activities that provide for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid waste in a manner that protects public health and safety and the environment and prevents and abates environmental nuisances.

48. "Solid waste management plan" means the plan that is adopted pursuant to section 49-721 and that provides guidelines for the collection, source separation, storage, transportation, processing, treatment, reclamation and disposal of solid waste in a manner that protects public health and safety and the environment and prevents and abates environmental nuisances.

49. "Solvolysis":

(a) Means a manufacturing process through which post-use polymers are purified with the aid of solvents, allowing additives and contaminants to be removed and producing

polymers capable of being recycled or reused without first being reverted to a monomer.

(b) Includes hydrolysis, aminolysis, ammonoloysis, methanolysis and glycolysis.

50. "Storage" means the holding of solid waste.

51. "Transfer facility":

(a) Means a site that is owned, operated or used by any person for the rehandling or storage for ninety days or less of solid waste that was generated off site for the primary purpose of transporting that solid waste.

(b) Includes those facilities that include significant solid waste transfer activities that warrant the facility's regulation as a transfer facility.

52. "Treatment" means any method, technique or process used to change the physical, chemical or biological character of solid waste so as to render that waste safer for transport, amenable for processing, amenable for storage or reduced in volume.

53. "Vegetative waste":

(a) Means waste derived from plants, including tree limbs and branches, stumps, grass clippings and other waste plant material.

(b) Does not include processed lumber, paper, cardboard and other manufactured products that are derived from plant material.

54. "Very small quantity generator waste" means hazardous waste in quantities as defined by rules adopted pursuant to section 49-922.

55. "Waste pile" means any noncontainerized accumulation of solid, nonflowing waste that is used for treatment or storage.

56. Waste tire does not include tires used for agricultural purposes as bumpers on agricultural equipment or as ballast to maintain covers at an agricultural site, or any tire disposed of using any of the methods in section 44-1304, subsection D, paragraphs 1, 2, 3, 5 through 8 and 11 and means any of the following:

(a) A tire that is no longer suitable for its original intended purpose because of wear, damage or defect.

(b) A tire that is removed from a motor vehicle and is retained for further use.

(c) A tire that has been chopped or shredded.

57. "Waste tire facility" means a solid waste facility at which five thousand or more waste tires are stored outdoors on any day.

ADEQ Supplemental Information – 18 A.A.C. 13 Coal Combustion Residuals (CCR)

ADEQ appreciates the opportunity to provide the following supplemental information as requested by the Council following the November 22, 2024, Study Session on the 18 A.A.C. 13 Coal Combustion Residuals (CCR) rulemaking.

Background

In 2015, EPA adopted self-implementing rules for coal combustion residuals (CCR) in 40 CFR 257, subpart D, under Subtitle D of the Resource Conservation and Recovery Act (RCRA), that require electric utilities and independent power producers generating coal combustion residuals to follow detailed requirements for the management and disposal of CCR as solid waste. EPA's rules established national minimum criteria for existing and new CCR landfills and existing and new CCR surface impoundments (''CCR units'') and all lateral expansions of CCR units.

Based, in part, on significant lobbying efforts by entities regulated by the federal CCR law, the Arizona legislature enacted Chapter 178 in 2022 authorizing ADEQ to develop a state permit program for CCR. Pursuant to that legislation, A.R.S. § 49-891 requires the Arizona program to be neither more or less stringent than federal nonprocedural requirements in 40 CFR 257, subpart D, with two exceptions related to standards already developed in Arizona. First, as provided in A.R.S. § 49-891(B), ADEQ's CCR rules are required to be more stringent than 40 CFR 257, subpart D where existing ADWR dam safety standards are more stringent. Second, ADEQ may opt to be more stringent than EPA to match aquifer protection standards already developed in Arizona. In this category, this final rule is broader than EPA's regulations, with requirements for non-CCR waste streams that may be placed in a CCR unit at R18-13-1005(B). In addition, ADEQ's proposed rule contains financial assurance requirements missing from the federal program and a 10-year permit term in place of lifetime permits.

I. The fees in this rulemaking are in direct response to a legislative mandate to ensure that the CCR permitting program within ADEQ's Solid Waste Programs is a self-funded, fee-based program. The fees comply with A.R.S. § 41-1008.

ADEQ developed fees for the CCR program in response to a legislative mandate to make the program funded by fees collected from the regulated entities. ADEQ believes the fees contained in the proposed rule are sufficient to support the program indefinitely in spite of periodic state budget tightening. Additionally, CCR permit processing fees are consistent with those charged by ADEQ's Aquifer Protection Permit (APP) program.

At the Arizona House Natural Resources Committee hearing on January 25, 2022, the ADEQ Director testified that the CCR program would be fee funded, creating a new revenue source to fund the staff needed to implement the program. When ADEQ was questioned about the program funding by the Senate Natural Resources Committee on March 9, 2022, a Senator expressed concern that ADEQ was seeking enough funding for the CCR program. There was no specific discussion in either hearing about the fact that EPA does not charge fees. Although ADEQ

requested a general fund appropriation for program start-up costs for FY2023, that request was not granted.

The table below shows the permit processing fees pursuant to R18-12-1021(B). The column titled "Estimated Hours" is ADEQ's estimate of the labor hours that may be required by ADEQ staff to process permit applications. A maximum number of hours that can be charged to the applicant based on the "Maximum Fee" and an hourly rate of $244/hour (R18-13-1021(E)):

License Type	Initial Fee	Maximum Fee	Estimated Hours
CCR Facility Permit (new or renewal)	$20,000	$200,000	100-400, maximum 800
Major Modification	$10,000	$100,000	75-200, maximum 400
Minor Modification	$5,000	$50,000	50-100, maximum 200
Administrative Modification	$1,500 flat fee	NA	8-10

- Estimated hours depend on complexity of the application related to unit design, dam safety, groundwater protection and remediation, and potential public involvement
- In all cases, the fee to the applicant will not exceed the maximum shown.

The comparison of these fees to the fees in the three states (see Item III below) that have been approved by EPA for CCR provides little value unless those other state programs are required to recover their costs through fees. No fees or very low fees for those states demonstrates that this is not the case.

Comparing EPA's no-cost implementation of their CCR regulations to ADEQ's fee-based program needs to be done in the context of the significant costs to the four Arizona utilities of managing their coal ash under these regulations, which will run in the millions of dollars. ADEQ's costs are predictable, e.g., a maximum of $200,000 for a ten-year permit. ADEQ's response times, day-to-day presence in the state, and extensive history with these sites has been demonstrated to the utilities during the development of this rule, and for decades already.

The concern that high fees would discourage others from entering the market is countered by the fact that overall U.S. coal-fired capacity is declining with planned unit retirements over the next several years; and as of 2022, there were no new coal-fired power plants planned. The most recent one was opened in 2013 in Texas (see: https://www.eia.gov/todayinenergy/detail.php?id=54559).

Three of Arizona's four coal-fired plants that will be regulated by this program have publicly discussed their plans to stop burning coal within the next 10 years. And, due to national and international marked demands, it is highly unlikely that any new coal burning facilities will be

contemplated in the future. A strong CCR permitting program managed by ADEQ will facilitate decision-making for the closure, long term care, and any remediation of coal ash disposal units.

II. ADEQ’s CCR program, when approved by EPA, will provide permitting services and compliance inspections in a more timely manner than EPA and with local knowledge well-suited to protect Arizona's environment.

ADEQ believes that because ADEQ will be replacing other agencies as the enforcing agency for design and operating standards that are unchanged from current rules, the rules will have a positive impact on the CCR facilities as well as the local community by enabling communication with a single, local agency. As an example, when cycling down and closing CCR units, a month's delay can cost hundreds of thousands of dollars. A phone call to a state employee, who is not responsible for facilities in multiple states, and that may have already visited the site, is virtually certain to result in less delay. This advantage for CCR facilities will be offset in part by the permit processing and annual registration fees in this rule.

The final CCR rule will allow for a single, streamlined permit program for CCR units that meets applicable federal and state requirements for CCR management, aquifer protection, and dam safety. The support for ADEQ’s authorization over the last two administrations recognizes ADEQ’s extensive knowledge of the unique geologic and hydrogeologic site conditions across Arizona.

ADEQ’s implementation of the CCR permit program is more predictable than EPA’s. EPA’s rules for design and operation of CCR units are self-implementing at this time. EPA proposed CCR permitting rules in 2020, but those rules have not been finalized. EPA’s proposed CCR permitting rules include no time frames by which EPA must make a final decision on a permit application. By comparison, ADEQ is required under Arizona law to establish licensing time frames for CCR permits which give applicants certainty as to the overall timing of the processing of their applications. EPA does not have any similar requirement and their permitting activities can go on for years.

For these reasons, ADEQ is the most appropriate regulatory agency to implement the CCR Program.

III. Review of CCR fee structures in other states.

While ADEQ is ultimately guided by its statutory mandate, ADEQ did survey fees in place in other states with approved CCR programs when establishing the fee schedule pursuant to this rule. Only three states have EPA-approved CCR programs: Oklahoma, Georgia, and Texas.

- Oklahoma:
    - CCR permit program approved by EPA effective July 30, 2018.
    - Oklahoma DEQ does not charge permitting or annual fees for CCR facilities because their legislature chose to fund the program using non-fee sources.
- Georgia:
    - CCR permit program approved by EPA effective February 10, 2020.
    - Georgia EPD does not charge permitting or annual fees for CCR facilities because their legislature chose to fund the program using non-fee sources.
- Texas:
    - CCR permit program approved by EPA effective July 28, 2021.
    - Texas CEQ charges a permit application fee of $150; no other permitting or annual fees are charged because their legislature chose to augment funding with non-fee sources.

Amend: R18-13-501, R18-13-702, Fee Tables, R18-13-801, Table, R18-13-1103, R18-13-1117, Article 12, R18-13-1201, R18-13-1211, R18-13-1212, R18-13-1213, Article 13, R18-13-1307, R18-13-1409, Table 1, Table 2, R18-13-1410, R18-13-1606, Article 21, R18-13-2101, R18-13-2102, R18-13-2103

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to add four (4) new Articles, add eleven (11) new Sections, and amend twenty (20) rules and tables in Title 18, Chapter 13 regarding fees related to Solid Waste Management. Specifically, this rulemaking seeks to adjust existing fees and establish new fees throughout Title 18, Chapter 13 as authorized and required by Laws 2024, 2nd Regular Session, Ch. 121 (HB2367). The Department indicates this includes the incorporation of fees currently established under statute. The Department states these fee changes are necessary to address direct and

administrative costs of the Department's relevant duties and regulatory activities for solid waste management. The Department indicates it last set solid waste fees in 2012.

The Department indicates fees set in 2012 were based upon a one-time rulemaking authority from the Legislature pursuant to Laws 2011, 1st regular session, Ch. 220 (HB2705). The Department states any subsequent adjustment, even adjustments for inflation, would have required specific statutory authority from the Legislature. Thus, the Department states, with the passage of HB2367, it was necessary to re-evaluate fees set in 2012. The Department indicates this rulemaking sets fees to levels that accurately reflect current economic conditions, provides for an annual adjustment based upon the Consumer Price Index to ensure fees remain current, and establishes fees more completely throughout all of Title 18, Chapter 13, Solid Waste Management, to ensure overall program health and fairer cost-sharing among regulated facilities and entities. The Department indicates the purpose of this rule is to achieve self-sufficiency of the Solid Waste Programs (SWP).

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Department cites both general and specific statutory authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

This rulemaking both established new fees and increases existing fees related to Solid Waste Management in Title 18, Chapter 13 as authorized by Laws 2024, 2nd Regular Session, Ch. 121 (HB2367).

A.R.S. § 41-1052(E) states, "[t]he [C]ouncil shall verify that a rule with new fees does not violate section 41-1008." A.R.S. § 41-1008(A) states the following:

> "[A]n agency shall not:
>
> 1. Charge or receive a fee or make a rule establishing a fee unless the fee for the specific activity is expressly authorized by statute or tribal state gaming compact.
>
> 2. Make a rule establishing a fee that is solely based on a statute that generally authorizes an agency to recover its costs or to accept gifts or donations.
>
> 3. Increase a fee in an amount that exceeds the percentage of change in the average consumer price index as published by the United States department of labor, bureau of labor statistics between that figure for the latest calendar year and the calendar year in which the last fee increase occurred. An agency may increase a fee in an amount that exceeds the percentage of change in the average consumer price index if either of the following applies:

(a) The agency submits the fee increase to the joint legislative budget committee for review before the fee is increased.

(b) The agency is required to submit an annual report that includes information about the fee to members of the legislature.

The Department indicates the new fees are specifically authorized by the following statutes: A.R.S. §§ 44-1322, 49-761(D)(3), 49-761(H), 49-761(M), 49-802(B), and 49-855(G). Furthermore, as required by A.R.S. § 41-1008(A)(3)(a), for seven fee increases exceeding the CPI, including registration fees for solid waste landfills accepting less than 60,000 tons of waste annually, waste tire sites, including waste tire sites subject to self-certification, used tire sites, transfer stations subject to self-certification, biohazardous medical waste transporters, and septage haulers, the Department submitted them to the Joint Legislative Budget Committee for the Committee's review.

Council staff believes the Department has complied with its requirements under A.R.S. § 41-1008.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Department indicates it did not review any study relevant to this rulemaking.

4. Summary of the agency's economic impact analysis:

The Department states that the purpose of these changes is to both adjust existing fees and establish new fees throughout Solid Waste Management. The Department indicates that this rulemaking also establishes in rule fees that currently only exist in statute. Fees under this rule are categorized into two broad groups. One group being current fees paid by waste facilities and licenses that would be subject to an adjustment under this rulemaking. These facilities and licensees include publicly and privately-owned landfills, used and waste tire facilities, self-certification transfer facilities, biohazardous medical waste transporters, septage haulers, and special waste facilities that receive shredder residue and petroleum contaminated soil (PCS). The second group of fees, according to the Department, are those established under this rulemaking. Facilities and entities subject to a new fee include transfer facilities subject to best management practices, used oil haulers, medical waste facilities that are permitted for storage or treatment, facilities generating or transporting special waste, landfills that enter into post-closure care, and collection and recycling facilities accepting lead acid batteries. The Department states that these rule changes are intended to collect fees to ensure the financial stability of Solid Waste Management programs, not to change the conduct of any regulated facilities or entities.

The Department states the goal in this rulemaking is to adjust and establish fees throughout Solid Waste Management that will sustain critical programs while avoiding disproportionate impact on any one group of stakeholders or regulated entities.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes this rulemaking is the least intrusive and costly means possible to achieve the same objectives. The Department indicates that it engaged with stakeholders to explore methods to reduce the impact of new or increased fees, including among other outreach efforts three stakeholder meetings, and established an implementation schedule for the first calendar year of the fees to impose the least cost. The Department finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

6. What are the economic impacts on stakeholders?

The Department believes this rule sets fees to levels that accurately reflect current economic conditions, provides for an annual adjustment-based upon the Consumer Price Index to ensure fees remain current, and establishes fees more completely throughout all of A.A.C. Title 18, Chapter 13, Solid Waste Management, to ensure overall program health and fairer cost-sharing among regulated facilities and entities. The Department states that the purpose of this rule is to achieve self-sufficiency of the SWP.

The Department states that with fees resulting in a fully-funded SWP, it may engage in greater compliance assistance for regulated facilities and entities. Further, the Department will have more resources to facilitate more expeditious permit review, both for new permits and renewals. This will allow permit applicants to begin facility operations sooner, mitigating administrative burdens associated with permit review time and allowing for faster business development, while still maintaining high regulatory standards for facilities and solid waste operations to endure the protection of human health and the environment.

Further, the Department states, a fully-funded SWP will provide the Department with the resources needed to engage in greater oversight and compliance, ensuring a more level playing field between regulated businesses and entities. With greater enforcement and oversight, the Department may better identify and address pollution, spills, and failures to meet regulatory requirements. This further promotes adherence amongst all facilities, mitigating harm to those facilities and entities that must compete with and operate in the same regulatory space as those facilities and entities that may fail to adhere to minimum standards. Additionally, SWP may engage in more robust partnership with the regulated community through activities and programs designed to promote compliance and assistance. Increased program funding and stability can result in greater collaboration with the regulated community, including greater engagement by SWP sections in outreach that helps facilities understand and comply with regulations.

Probable costs to businesses directly affected by the rulemaking include the new or increased fees privately-owned solid waste facilities and entities will be subject to, as well as increased landfill tonnage and special waste tonnage fees. The Department believes the implementation schedule was designed to impose the least burden possible on all facilities and entities subject to fees under this rule, including small businesses.

Probable costs to political subdivisions from the implementation of this rule are the increased and new fees each political subdivision will be subject to for their county and municipal solid waste facilities and entities, as well as the increased landfill tonnage fees.

7. <u>Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?</u>

The Department indicates it made the following changes to the rule language between the Notice of Proposed Rulemaking published in the Administrative Register on August 16, 2024 and the Notice of Final Rulemaking now before the Council for consideration to reduce the regulatory burden and impact on stakeholders:

- Place a cap of 4% on the annual CPI adjustment for all fees. This involves inserting language stating "except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year" at: R18-13-402(E), R18-13-501(F), R18-13-702(G), R18-13-801(A), R18-13-1103(E), R18-13-1211(C), R18-13-1212(D), R18-13-1212.01(C), R18-13-1306(E), R18-13-1307(H), R18-13-1409(J), R18-13-1410(G), R18-13-1606(F), R18-13-1901(C), R18-13-2002(D), R18-13-2102(D), R18-13-2103(C), and R18-13-2202(D).
- Set back the time of implementation of the adjustment from January to July of each year. This involves striking the word "January" and replacing with "July" at: R18-13-402(E), R18-13-501(F), R18-13-702(G), R18-13-801(A), R18-13-1103(E), R18-13-1211(C), R18-13-1212(D), R18-13-1212.01(C), R18-13-1306(E), R18-13-1307(H), R18-13-1409(J), R18-13-1410(G), R18-13-1606(F), R18-13-1901(C), R18-13-2002(D), R18-13-2102(D), R18-13-2103(C), and R18-13-2202(D).
- Remove the annual CPI adjustment for the solid waste landfill disposal fee. This involves removing, in whole, subsection (H) of R18-13-2104.
- Set back the implementation of the new tire sales fee until April 1, 2025. This involves inserting the language "Beginning April 1, 2025" at the beginning of R18-13-2202(A).

The Department also indicates it made the following additional non-substantive changes to improve clarity and better confirm with official style and form guidance:

- R18-13-501(C). Reformat the numerical list to conform with current rule language.
- R18-13-1103(C)(3). Replace the semicolon at the end of a list with a comma.
- R18-13-1201. Reorder the new definition of "waste tire collection site" to now be in alphabetical order.
- R18-13-1307(F). Reformat the subsection to conform with official Arizona rulemaking publishing style and form. This includes re-lettering current subsection (G) to subsection (F) and establishing subsection (F)(2) as new subsection (H).
- R18-13-1409(I)(4). Correct the subsection reference from subsection (K) to subsection (I).
- R18-13-1606(E). Correct the subsection reference from subsection (B) to subsection (C).
- R18-13-2002(D). Correct the subsection references from subsection (B) and (C) to subsections (A) and (B).

- R18-13-2104(C). Clarify the maximum fee amount is an annual maximum.
- R18-13-2104(F). Delete redundant reference to "other information deemed necessary by the Department."
- R18-13-2202(C). Add the word "Arizona" before "Department of Revenue" to improve clarity and consistency.
- R18-13-2202(D)(2). Add language stating ADEQ shall notify the Arizona Department of Revenue of the annual CPI adjustment to the new tire sale fee as soon as practicable.

Council staff does not believe these changes make the rules substantially different pursuant to A.R.S. § 41-1025.

8. <u>Does the agency adequately address the comments on the proposed rules and any supplemental proposals?</u>

The Department indicates it received fifteen (15) comment letters throughout the formal comment period that ran from August 16, 2024 to September 20, 2024. The Department indicates nine (9) of these comment letters came from cities and towns, including the cities of Glendale, Goodyear, Mesa, Phoenix, Tempe, Tucson, Casa Grande, Scottsdale, and the Town of Gilbert, with the remaining comment letters coming from the League of Arizona Cities and Towns, Graham County, Gila County, the National Waste & Recycling Association's (NWRA-AZ) Arizona Chapter, the County Supervisors Association, and a member of the business community. The Department states it also received several formal oral comments during a public hearing held on September 19, 2024. The comments received by the Department and the Department's responses are summarized in Section 12 of the Preamble to the Notice of Final Rulemaking. Additionally, copies of the public comments received have been included in the final materials for the Council's reference. Council staff believes the Department has adequately responded to public comments related to this rulemaking.

9. <u>Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?</u>

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates the requirements of A.R.S. § 41-1037 are not applicable as the registrations established by these rules do not meet the definition of a "license" found in A.R.S. §

41-1001(13) which is defined as "the whole or part of any agency permit, certificate, approval, registration, charter or similar form of permission required by law, but does not include a license required solely for revenue purposes." The Department indicates the rules establish registration requirements solely for revenue purposes which fall outside this definition.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates there is no corresponding federal law.

11. Conclusion

This regular rulemaking from the Department seeks to add four (4) new Articles, add eleven (11) new Sections, and amend twenty (20) rules and tables in Title 18, Chapter 13 regarding fees related to Solid Waste Management. Specifically, this rulemaking seeks to adjust existing fees and establish new fees throughout Title 18, Chapter 13 as authorized and required by Laws 2024, 2nd Regular Session, Ch. 121 (HB2367). The Department indicates this includes the incorporation of fees currently established under statute. The Department states these fee changes are necessary to address direct and administrative costs of the Department's relevant duties and regulatory activities for solid waste management. The Department indicates it last set solid waste fees in 2012.

The Department is requesting an immediate effective date for these rules pursuant to A.R.S. § 41-1032(A)(1), to preserve public safety and protect human health and the environment by ensuring necessary funding for SWP regulatory activities. The Department indicates this immediate effective date reflects the urgency recognized by the Legislature with the passage of HB2367 pursuant to an emergency clause for immediate enactment. The Department states delaying the effective date would mean that the rule would not be able to take effect until January 2025 or later, seriously jeopardizing the financial viability of the program and putting SWP inspection, enforcement, and services at risk. Council staff believes the Department has provided adequate justification for an immediate effective date pursuant to A.R.S. § 41-1032.

Council staff recommends approval of this rulemaking.

Arizona Department of Environmental Quality

Katie Hobbs
Governor

Karen Peters
Deputy Director

10/22/2024

Jessica Klein, Chairperson
Governor's Regulatory Review Council
100 N. 15th Ave., Suite 302
Phoenix, AZ 85007

Re: Rulemaking for Title 18. Environmental Quality, Chapter 13. Department of Environmental Quality – Solid Waste Management

Dear Chairperson Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits a regular rulemaking proposing changes to Arizona Administrative Code (A.A.C) Title 18, Chapter 13 to the Governor's Regulatory Review Council (GRRC) for its consideration and approval. This rulemaking adjusts existing fees and establishes new fees throughout 18 A.A.C. 13, Solid Waste Management, as authorized and required by Laws 2024, 2nd Regular Session, Ch. 121 (HB2367).

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information Required by A.A.C. R1-6-201(A)(1)

- The public record closed for the rule on September 20, 2024 at 5:00 p.m.
- This regular rulemaking does not relate to a five-year review report.
- This regular rulemaking establishes new fees and contains fee increases. Statutes expressly authorizing the new fees: A.R.S. §§ 44-1322, 49-761(D)(3), 49-761(H), 49-761(M), 49-802(B), and 49-855(G).
- An immediate effective date is requested for the rule pursuant to A.R.S. § 41-1032.
- The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- No new full-time employees are necessary to implement or enforce the rule.
- A list of documents enclosed under A.A.C. R1-6-201(A)(2)-(8), which are attached as electronic copies:
    - The Notice of Final Rulemaking (NFRM), including the preamble, table of contents, and text of the rule.
    - The economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055.

- The written comments and transcript of oral comments received by ADEQ on the Notice of Proposed Rulemaking (NPRM).
- ADEQ received no analysis regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states.
- This rulemaking does not incorporate materials by reference; therefore, no such materials are included.
- One electronic copy of each of the following is enclosed: the general and specific statutes authorizing the rule, including relevant statutory definitions: A.R.S. §§ 44-1301, 44-1302, 44-1303, 44-1304.01, 44-1322, 49-104, 49-701, 49-706, 49-747, 49-761, 49-762.03, 49-762.05, 49-801, 49-802, 49-831, 49-836, 49-851, 49-855, and 49-857.
- Defined terms in A.A.C. R18-13-501, R18-13-701, R18-13- R18-13-1102, R18-13-1201, R18-13-1301, R18-13-1401, R18-13-1601, and R18-13-2101 which are referred to in this rule.

Thank you for your timely review and approval. Please contact myself or Matt Rippentrop, Rule Writer, Waste Programs Division, 602-771-4329 or rippentrop.matt@azdeq.gov, if you have any questions.

Sincerely,

Karen Peters
Deputy Director
Arizona Department of Environmental Quality

3. **<u>Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):</u>**

Authorizing statute: Laws 2024, 2nd Regular Session, Ch. 121

Implementing statute: A.R.S. §§ 44-1302, 44-1303, 44-1304.01, 44-1322, 49-104(B)(14)(b), 49-706, 49-747, 49-761, 49-762.03, 49-762.05, 49-802, 49-836, 49-855, and 49-857

4. **<u>The effective date of the rule:</u>**

This rule shall become effective immediately after a certified original and preamble are filed in the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is (to be filled in by *Register* editor).

a. **<u>If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):</u>**

The effective date of this rule is ________. Pursuant to A.R.S. § 41-1032(A)(1), the reason for the immediate effective date is to preserve public safety and protect human health and the environment by ensuring necessary funding for Solid Waste Programs (SWP) regulatory activities. This immediate effective date reflects the urgency recognized by the Legislature with the passage of HB2367 pursuant to an emergency clause for immediate enactment. Delaying the effective date would mean that the rule would not be able to take effect until January 2025 or later, seriously jeopardizing the financial viability of the program and putting SWP inspection, enforcement, and services at risk.

b. **<u>If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):</u>**

Not applicable.

5. **<u>Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:</u>**

7. **<u>An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:</u>**

<u>Summary:</u> This rule adjusts existing fees and establishes new fees throughout 18 A.A.C. 13, Solid Waste Management, as authorized and required by Laws 2024, 2nd Regular Session, Ch. 121 (HB2367). This includes the incorporation of fees currently established under statute. These fee changes are necessary to address direct and administrative costs of the Arizona Department of Environmental Quality's (ADEQ) relevant duties and regulatory activities for solid waste management. ADEQ last set solid waste fees in

2012. While fees set in 2012 were a critical step towards the ultimate goal of implementing a fee-based funding model for the Solid Waste Program (SWP), more work is now necessary to fully realize this goal. Fees set in 2012 were based upon a one-time rulemaking authority from the Legislature pursuant to Laws 2011, 1st regular session, Ch. 220 (HB2705). Any subsequent adjustment, even adjustments for inflation, would have required specific statutory authority from the Legislature. Thus, with the passage of HB2367, it was necessary to re-evaluate fees set in 2012. This rule sets fees to levels that accurately reflect current economic conditions, provides for annual adjustments based upon the Consumer Price Index to ensure fees remain current, and establishes fees more completely throughout all of A.A.C. Title 18, Chapter 13, Solid Waste Management, to ensure overall program health and fairer cost-sharing among regulated facilities and entities. The purpose of this rule is to achieve self-sufficiency of the SWP.

Description of Solid Waste Management Programs: Solid waste management is a key responsibility of the state. Solid waste management mitigates adverse health and environmental impacts and improves the viability of Arizona. Having a robust and sustainable SWP ensures the proper storage, transportation, and disposal of solid waste to prevent negative impacts to the state in forms of uncontrolled dumping and pollution of our water, land, and air. SWP regulates the management of solid waste from homes and businesses from the point of generation through transportation, and ultimately how it is recycled or disposed of.

There are approximately 2,000 solid waste facilities with different media types subject to ADEQ regulatory compliance and oversight under SWP. The scope and type of these facilities is diverse, with different waste streams, locations, sizes, communities served, facility capacity, and both regulatory and support activities required of ADEQ. These facilities include but are not limited to solid waste transfer facilities of varying size and sophistication, from rural drop-site locations to city facilities, septage hauler licensees, waste tire sites, off-site facilities registered for the treatment, storage, or disposal of Arizona special waste, special waste transporters and generators, biohazardous medical waste management entities, used oil handlers and collectors subject to the federal used oil program, facilities accepting lead acid batteries for collection or recycling, and both municipal and non-municipal landfills. These facilities are located throughout the state, requiring SWP to engage in inspection, management, and oversight in every county.

Regulatory activities for which ADEQ is responsible includes inspections, permitting and licensing programs, public records management, fielding and investigating complaints, and providing compliance assistance. Effective implementation of these regulatory activities for all solid waste facilities is the foundation for furthering the Waste Program Division's mission to protect and enhance public health and the environment by reducing the risk associated with waste management, contaminated sites, and regulated substances.

Background: SWP has long faced budget shortfalls, which have sharply increased in the last five years. Since FY2019, overall SWP's costs have increased by approximately $1,500,000, from $2,000,000 to $3,500,000. In addition to other factors such as the state's rapid population growth, a major contributor to this increasingly steep budget shortfall has been inflation. Since 2012, the Phoenix metro area has experienced inflation of 48.52%. Further, for the last 12 years since fees were last set in 2012, ADEQ has not had the ability to adjust fees to account for a shifting economic landscape due to one-time rulemaking authorities, while experiencing expanded Program responsibility and greater costs related to regulatory and oversight activities. For example, since 2012, the number of regulated solid waste facilities has

increased by 333% from approximately 460 facilities to 2,000 facilities.

Following the steep economic downturn in the late 2000s and resulting severe state budget shortfalls, many state programs lost funding from the Arizona General Fund. SWP is one such program. In response, and pursuant to HB2705, in 2012 ADEQ implemented a fee-based program model for the first time for SWP. While fees set in 2012 were an important step towards the goal of a fully self-funded program, HB2705 granted a one-time authority only for establishing fee levels, inhibiting the ability of ADEQ to make future adjustments as necessary. Further, fees set in 2012 covered only half of SWP statutory mandates, resulting in a large portion of mandated regulatory activities of SWP not having a source of revenue under the fee-based program. As such, SWP was unable to fully cover program costs with the fee levels established in 2012. This has resulted in continued program strain and the need to expend moneys from the Recycling Fund to cover management of solid waste regulatory programs. For the last several fiscal years, approximately half of SWP's costs have been covered by fees, while expenditure from the Recycling Fund was necessary to cover the other half. As fees remain unchanged and costs continue to rise, increasing expenditures from the Recycling Fund have become necessary in recent fiscal years.

Ultimately, while the 2012 fees represent a critical step towards full program stability, more work is necessary to realize the goal of establishing a fully self-funded and sustainable SWP. To this end, the Arizona Legislature passed and the Governor signed HB2367 on April 9, 2024, with an emergency clause for an immediate effective date. HB2367 makes amendments throughout Titles 44 and 49 of the Arizona Revised Statutes to eliminate one-time rulemaking authorities relating to fees, authorized the incorporation into rule of the existing statutory new tire sale and landfill disposal fees, and authorized rulemaking to establish new fees for regulatory services and legislative mandates currently being performed. Establishing new fees for currently regulated facilities and entities is a critical component in establishing a fully sustained fee-based program that is fairly assessed against all regulated parties. While SWP has experienced budget shortfalls for several years, it is only with HB2367 that ADEQ now has the authority and mandate to establish these new fees for currently regulated parties.

This rulemaking is critical to make SWP whole, sustainable, and secure. Further, these fees allow expenditures from the Recycling Fund to be refocused on its important mission. ADEQ intends for revenue in the Recycling Fund be used for the stated purpose of grants and contracts for "research, demonstration projects, new technologies, market development and source reduction studies and implementation of the recommendations or reports prepared." *See* A.R.S. § 49-837(B)(1). As SWP becomes sustainable through a more robust fee-based program, ADEQ is committed to apportioning the greatest portion feasible of the Recycling Fund towards grants and contracts and other stated uses under A.R.S. § 49-837 to further the mission of the Arizona Recycling Program.

<u>Explanation of Fee Methodology:</u> There are two broad groups into which fees under this rulemaking may be categorized. This first group is new fees being established by this rulemaking. These include initial registration and annual fees for transfer facilities subject to best management practices, used oil handlers, medical waste facilities that are permitted for storage or treatment, facilities generating, treating, or transporting special waste, collection and recycling facilities accepting lead acid batteries, and annual fees for landfills that enter into post-closure care and waste tire facilities subject to plan approval. To note, those facilities subject to plan approval fees will not be subject to an initial registration fee, instead only to annual registration fees.

The second group is current fees that are subject to an adjustment under this rulemaking. This group may further be distinguished between those fees being increased by a Consumer Price Index (CPI) adjustment and those fees being increased beyond a CPI adjustment. Those fees subject to a CPI adjustment include disposal fees for petroleum contaminated soil (PCS) and auto-shredder residue, fees for plan review of solid waste facilities subject to plan review under R18-13-702, including modifications to solid waste facility plans and review of financial responsibility plans, solid waste general permit fees, annual registration fees for landfills that accept 225,000 tons or more of waste annually, and two current statutory fees being established in rule: solid waste landfill disposal fees and the fee on the sale of new tires.

Those fees subject to an adjustment beyond CPI are registration fees for solid waste landfills accepting less than 60,000 tons of waste annually, waste tire sites, including waste tire sites subject to self-certification, used tire sites, transfer stations subject to self-certification, biohazardous medical waste transporters, and septage haulers.

In determining new fees throughout Solid Waste Management, ADEQ was guided by its statutory mandates that all fees be based upon the Department's direct and indirect costs associated with regulatory activities for the facility or entity subject to the fee and that all fees be fairly assessed and impose the least burden and cost. *See* A.R.S. § 49-104(B)(17). To this end, ADEQ began by reviewing the actual costs of regulatory activities to the Department for facilities under Solid Waste Management. Relevant costs are based on necessary Agency functions corresponding to regulated activities and include but are not limited to administrative operations, inspections, permitting and licensing, fielding complaints, compliance assistance, data management, and public records management. This review included calculating time and resources expended on these Agency functions to carry out regulated activities for each class of facility. After having a more complete understanding of the actual costs in oversight and enforcement for Solid Waste Management programs, ADEQ was able to develop a comprehensive fee schedule that fairly assessed fees against each class of facility or entity that is representative of the actual costs to ADEQ for carrying out regulatory activities for such facility or entity.

The development of this fee schedule began with CPI adjustments used for all existing fees. With all existing fees being over a decade old, and with those statutory fees dating back to the early 1990s, this initial CPI adjustment was a critical step as current fee levels were no longer representative of current economic conditions or costs to ADEQ. The CPI adjustment methodology for those fees dating back to 2012 utilizes the Consumer Price Index for All Urban Consumers (CPI-U) for the Phoenix-Mesa-Scottsdale, AZ Area (regional CPI). This regional CPI was selected as most representative to the costs of ADEQ, which largely operates out of Phoenix metro area. To note, this regional CPI began being calculated in 2002. For the two fees dating to the early 1990s, the landfill disposal fee and new tire sale fee, the national CPI was used. This adjustment for these fees based on the national CPI was necessary to bring these two fees to current levels as the regional CPI is not available for the full duration of these fees.

By employing these CPI adjustments to make existing fees current and reflective of subsequent inflation following establishment of the fees, ADEQ had a contemporary fee baseline from which new fees and further adjustments could be fairly assessed that would impose the least burden and cost.

Following these CPI adjustments, ADEQ evaluated Agency functions and regulatory costs for each class of facility or entity. Based on these actual costs for each class of facility or entity, ADEQ established new

fees and made further adjustments to existing fees. These fees were established to both be reflective of the actual cost to ADEQ associated with carrying out the Department's regulatory responsibilities for each class of facility or entity as well as take into consideration the relative burden these fees posed.

Each of these fees is presented in the fee tables and discussed in further detail in the section-by-section explanation to follow.

Annual CPI adjustments: This rule implements an annual regional CPI adjustment to ensure fees remain current and adequate to cover rising costs against inflation. The methodology involves multiplying the fee amount within the rule by the regional CPI as of the close of the 12-month period ending on October 30 for the most recent year, and then dividing by the regional CPI as of the close of the 12-month period ending on October 30 for the year 2024 (base year) except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year to ensure predictability and stability for those subject to the fees. The CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor available at: https://data.bls.gov/pdq/SurveyOutputServlet?data_tool=dropmap&series_id=CUURS48ASA0,CUUSS48ASA0. The first adjustment will occur in July 2026 following the publication of the October regional CPI in 2025.

Fee Tables: below are a series of fee tables for all the fees being established, adjusted, or incorporated under this rule.

Facility Category	**Current Fees**	**New Fees**	**Initial**
Landfills under 60,000 tons annually	$2,500	**$5,000**	**Plan Review**
Landfills 60,000 tons to under 225,000 tons annually	$7,500	**$10,000**	**Plan Review**
Landfills 225,000 tons or more annually	$12,500	**$18,565**	**Plan Review**
Tire Site Subject to Plan Review	N/A	**$5,000**	**Plan Review**
Self-certification Tire Site	$250	**$3,000**	**$3,600**
Used Tire Site	$75	**$1,500**	**$1,800**
Waste Tire Site	$75	**$2,000**	**$2,400**
Self-certification Transfer Station	$500	**$3,000**	**$3,600**
Best Management Practice Transfer Stations	N/A	**$1,500**	**$1,800**
Used Oil Processor	N/A	**$7,500**	**$9,000**
Used Oil Burner	N/A	**$12,500**	**$15,000**
Used Oil Transporter	N/A	**$1,500**	**$1,800**
Used Oil Marketer	N/A	**$1,500**	**$1,800**
BMW Transporter	$750	**$1,500**	**$1,800**
BMW Treatment & Disposal	N/A	**$12,500**	**Plan Review**
BMW Storage	N/A	**$7,500**	**Plan Review**
BMW Transfer	N/A	**$3,000**	**Plan Review**
Septage Hauler - county inspection	$75	**$225**	**$270**
Septage Hauler - ADEQ inspection	$75	**$550**	**$660**
Special Waste Generator of Petroleum Contaminated Soil (PCS)	N/A	**$750**	**$900**
Special Waste Generator of Auto Shredder Fluff (ASF)	N/A	**$3,000**	**$3,600**

Special Waste Shipper	N/A	**$1,500**	**$1,800**
Special Waste Disposal, Treatment, or Storage	N/A	**$5,000**	**Plan Review**
Landfills in post-closure care	N/A	**$3,500**	**Plan Review**
Lead Acid Battery Collection Site	N/A	**$675**	**$810**

Fees for Plan Review of New Solid Waste Facilities	**Current Fees**		**New Fees**	
	Initial	**Maximum**	**Initial**	**Maximum**
Solid Waste Landfills	$20,000	$200,000	$20,000	**$297,047**
Non-APP requirements for Non-MSWLFs operating under an APP	$2,000	$50,000	$2,000	**$74,262**
Other Solid Waste Facilities Subject to Plan Approval	$10,000	$100,000	$10,000	**$148,524**
	Current Fees		**New Fees**	
Fees for Modifications to Solid Waste Facility Plans	**Initial**	**Maximum**	**Initial**	**Maximum**
Solid Waste Landfills - Type IV	$1,500	$150,000	$1,500	**$222,786**
Solid Waste Landfills - Type III	$750	$75,000	$750	**$111,393**
Other Solid Waste Facilities Subject to Plan Approval - Type IV	$750	$75,000	$750	**$111,393**
Other Solid Waste Facilities Subject to Plan Approval - Type III	$500	$50,000	$500	**$74,262**
	Current Fees		**New Fees**	
Fees for Review of Financial Responsibility Plans for Facilities	**Initial**	**Maximum**	**Initial**	**Maximum**
Annual Review for Solid Waste Landfills	$600	Flat Fee	**$891**	**Flat Fee**
Other Solid Waste Facilities	$200	$5,000	$200	**$7,426**
	Current Fees		**New Fees**	
Hourly Rate	$122	Per Hr	**$181**	**Per Hr**

Solid Waste General Permits	**Current Fees**		**New Fees**	
Category	Initial Fee	Annual Fee	**Initial Fee**	**Annual Fee**
Collection, Storage and Transfer-Standard	$750	$100	**$1,114**	**$149**
Collection, Storage and Transfer-Complex	$7,500	$1,000	**$11,139**	**$1,485**
Treatment-Standard	$1,000	$100	**$1,485**	**$149**
Treatment-Complex	$10,000	$1,000	**$14,852**	**$1,485**
Disposal	$15,000	N/A	**$22,279**	**N/A**

Solid Waste Disposal Fees	**Current Fees**		**New Fees**	
	Fee	Unit of Measure	**Fee**	**Unit of Measure**
For Each Ton of Solid Waste	$0.25	Per Ton	**$0.58**	**Per Ton**
Six Cubic Yards (CY) of Uncompacted Solid Waste	$0.25	Per CY	**$0.58**	**Per CY**

Three Cubic Yards (CY) of Compacted Solid Waste	$0.25	Per CY	**$0.58**	**Per CY**
Facilities Recycling Solid Waste from Secondary Waste Water	$0.13	Per Ton	**$0.29**	**Per Ton**
Waste Disposed in a Solid Waste Landfill not regulated by ADEQ	$0.25	Per Ton	**$0.58**	**Per Ton**
Local Public Facility - Population of Political Subdivisions	$0.07	x Population Served	**$0.16**	**x Population Served**

Special Waste Disposal	**Current Fees**		**New Fees**	
	Fee	Unit of Measure	**Initial Fee**	**Unit of Measure**
Petroleum Contaminated Soils Disposal Fee	$4.50	Per Ton	**$6.68**	**Per Ton**
Auto Shredder Fluff Disposal Fee	$4.50	Per Ton	**$6.68**	**Per Ton**
Annual Maximum Disposal Fee per Generator Site	$45,000	Annual Maximum	**$68,835.67**	**Annual Maximum**

New Tire Sale	**Current Fees**		**New Fees**	
	Fee	Maximum	**Fee**	**Maximum**
	2% of retail	$2.00/tire	2% of retail	**$4.66/tire**

Implementation Schedule: In furtherance of ADEQ's goal to ensure the fees impose the least burden and cost, ADEQ evaluated the feasibility of an implementation schedule that balances the fiscal health of SWP and the budget practices of the regulated community subject to the fees. Currently, ADEQ sends out invoices for registration fees to correspond with the calendar year. However, a recurring point of discussion throughout the rulemaking was the concern of implementing a new fee or fee increase in the middle of the fiscal year for many counties, municipalities, and other political subdivisions. In response to these concerns and comments, while the rule and fees would become effective as of January 2025, fees will be implemented pursuant to a schedule for CY2025 to accommodate the fiscal needs of counties, municipalities, and other political subdivisions.

To this end, the annual registration fee for CY2025 for increased existing fees will be divided between two separate invoices. The first invoice for this first annual registration fee will reflect current billing, with the invoice at the current fee level to be sent out in January 2025. The second invoice will be delayed until July 2025, to coincide with the fiscal year, and will be for the remaining amount of the annual registration fee, reflecting the amount already paid on the first invoice.

As an example, under R18-13-501(E), the annual registration fee for a self-certification transfer facility is increased from $500 to $3,000 on the effective date of the rule. ADEQ will send the facility an invoice for $500 in January 2025 per the existing billing rate prior to the rule. Subsequently, ADEQ will send a second invoice in July 2025 for $2,500. Thereafter, beginning in 2026, the facility will be invoiced once for $3,000, as adjusted by regional CPI, each January to coincide with the calendar year billing cycle.

For new annual registration fees, the first annual registration fee as established under the rule will be delayed until July 2025 to coincide with the fiscal year. As an example, if a political subdivision operated

a lead acid battery collection facility, a new fee of $675 would be due "within 30 days of invoice receipt", under R18-13-1901(B), so that the invoice will be sent on or after July 1. Following this initial billing to coincide with the fiscal year for the first year of implementation, billing will align to the calendar year billing cycle in January 2026.

In addition to adjusted and new annual registration fees, this implementation schedule includes quarterly landfill disposal and special waste tonnage fees, resulting in the disposal and tonnage fees for the first calendar quarter of 2025 at the new fee rates to coincide with the coming fiscal year, and will be invoiced on or after July 1, 2025. Following this initial billing to coincide with the fiscal year for the first quarter of 2025, quarterly billing for landfill disposal and special waste tonnage fees will return to the calendar year billing cycle.

Below are a series of tables that describe the implementation for each facility type and fee in detail:

Facility Category	Reporting Cycle	Fee	Invoice Timing
All Landfills Tonnage for Solid Waste	Q4 2024	$0.25 per ton	March 2025
Special Waste Receiving Facilities	Q4 2024	$4.50 per ton	March 2025
All Landfills Tonnage for Solid Waste	Q1 2025	$0.58 per ton	July 2025
Special Waste Receiving Facilities	Q1 2025	$6.68 per ton	July 2025
All Landfills Tonnage for Solid Waste	Q2 2025	$0.58 per ton	September 2025
Special Waste Receiving Facilities	Q2 2025	$6.68 per ton	September 2025
Landfills under 60,000 tons annual registration	Cal. Year 2025 Pt. 1	$2,500	January 2025
Landfills under 60,000 tons annual registration	Cal. Year 2025 Pt. 2	$2,500	July 2025
Landfills ≥60,000 and < 225,000 tons annual registration	Cal. Year 2025 Pt. 1	$7,500	January 2025
Landfills ≥60,000 and < 225,000 tons annual registration	Cal. Year 2025 Pt. 2	$2,500	July 2025
Landfills ≥225,000 tons or more annual registration	Cal. Year 2025 Pt. 1	$12,500	January 2025
Landfills ≥225,000 tons or more annual registration	Cal. Year 2025 Pt. 2	$6,065	July 2025
Landfills in post-closure care (New)	Calendar Year 2025	$3,500	July 2025
Tire Site Subject to Plan Review (New)	Calendar Year 2025	$5,000	July 2025
Self-certification Tire Site	Cal. Year 2025 Pt. 1	$250	January 2025
Self-certification Tire Site	Cal. Year 2025 Pt. 2	$2,750	July 2025
Used Tire Site	Cal. Year 2025 Pt. 1	$75	January 2025
Used Tire Site	Cal. Year 2025 Pt. 2	$1,425	July 2025
Waste Tire Site	Cal. Year 2025 Pt. 1	$75	January 2025
Waste Tire Site	Cal. Year 2025 Pt. 2	$1,925	July 2025
Self-certification Transfer Station	Cal. Year 2025 Pt. 1	$500	January 2025
Self-certification Transfer Station	Cal. Year 2025 Pt. 2	$2,500	July 2025
Best Management Practice Transfer Stations (New)	Calendar Year 2025	$1,500	July 2025
Used Oil Processor (New)	Calendar Year 2025	$7,500	July 2025
Used Oil Burner (New)	Calendar Year 2025	$12,500	July 2025

Used Oil Transporter (New)	Calendar Year 2025	$1,500	July 2025
Used Oil Marketer (New)	Calendar Year 2025	$1,500	July 2025
Biohazardous Medical Waste (BMW) Transporter	Cal. Year 2025 Pt. 1	$750	January 2025
BMW Transporter	Cal. Year 2025 Pt. 2	$750	July 2025
BMW Treatment & Disposal (New)	Calendar Year 2025	$12,500	July 2025
BMW Storage (New)	Calendar Year 2025	$7,500	July 2025
BMW Transfer (New)	Calendar Year 2025	$3,000	July 2025
Septage Hauler - county inspection	Cal. Year 2025 Pt. 1	$75	January 2025
Septage Hauler - county inspection	Cal. Year 2025 Pt. 2	$150	July 2025
Septage Hauler - ADEQ inspection (New)	Calendar Year 2025	$550	July 2025
Special Waste Generator of Petroleum Contaminated Soil (PCS) (New)	Calendar Year 2025	$750	July 2025
Special Waste Generator of Auto Shredder Fluff (ASF) (New)	Calendar Year 2025	$3,000	July 2025
Special Waste Shipper (New)	Calendar Year 2025	$1,500	July 2025
Special Waste Disposal, Treatment, or Storage Facility (New)	Calendar Year 2025	$5,000	July 2025
Lead Acid Battery Collection Site (New)	Calendar Year 2025	$675	July 2025

	New Fees		Invoice Timing	
Fees for Plan Review of New Solid Waste Facilities	**Initial**	**Maximum**	**Reporting Cycle**	**Invoice Date**
Solid Waste Landfills	$20,000	$297,047	Jan 2025 - June 2025	At time of issuance
Non-APP requirements for Non-MSWLFs operating under an APP	$2,000	$74,262	Jan 2025 - June 2025	At time of issuance
Other Solid Waste Facilities Subject to Plan Approval	$10,000	$148,524	Jan 2025 - June 2025	At time of issuance
	New Fees		**Invoice Timing**	
Fees for Modifications to Solid Waste Facility Plans	**Initial**	**Maximum**	**Reporting Cycle**	**Invoice Date**
Solid Waste Landfills - Type IV	$1,500	$222,786	Jan 2025 - June 2025	At time of issuance
Solid Waste Landfills - Type III	$750	$111,393	Jan 2025 - June 2025	At time of issuance
Other Solid Waste Facilities Subject to Plan Approval - Type IV	$750	$111,393	Jan 2025 - June 2025	At time of issuance
Other Solid Waste Facilities Subject to Plan Approval - Type III	$500	$74,262	Jan 2025 - June 2025	At time of issuance
	New Fees		**Invoice Timing**	
Fees for Review of Financial Responsibility Plans for Facilities	**Initial**	**Maximum**	**Reporting Cycle**	**Invoice Date**
Annual Review for Solid Waste Landfills	$891	Flat Fee	Jan 2025 - June 2025	At time of submittal
Other Solid Waste Facilities	$200	$7,426	Jan 2025 - June 2025	At time of submittal
All Plan Reviews	**New Fees**		**Invoice Timing**	

Hourly Rate	$181	Per Hour	Jan 2025 - June 2025	At time of submittal

Solid Waste Disposal Fees	**New Fees**		**Invoice Timing**	
	Fee	Unit of Measure	**Reporting Cycle**	**Invoice Date**
For Each Ton of Solid Waste	$0.58	Per Ton	Q1 2025	July 2025
Six Cubic Yards (CY) of Uncompacted Solid Waste	$0.58	Per CY	Q1 2025	July 2025
Three Cubic Yards (CY) of Compacted Solid Waste	$0.58	Per CY	Q1 2025	July 2025
Facilities Recycling Solid Waste from Secondary Waste Water	$0.29	Per Ton	Q1 2025	July 2025
Waste Disposed in a Solid Waste Landfill not regulated by ADEQ	$0.58	Per Ton	Q1 2025	July 2025
Local Public Facility - Population of Political Subdivisions	$0.16	x Population Served	Q1 2025	July 2025

Solid Waste General Permits	**New Fees**		**Invoice Timing**	
Category	Initial Fee	Annual Fee	**Reporting Cycle**	**Invoice Date**
Collection, Storage and Transfer-Standard	$1,114	$149	Calendar Year 2025	At time of submittal
Collection, Storage and Transfer-Complex	$11,139	$1,485	Calendar Year 2025	At time of submittal
Treatment-Standard	$1,485	$149	Calendar Year 2025	At time of submittal
Treatment-Complex	$14,852	$1,485	Calendar Year 2025	At time of submittal
Disposal	$22,279	N/A	Calendar Year 2025	At time of submittal

Petroleum Contaminated Soils Disposal Fee	$6.68	Per Ton	Q1 2025	July 2025
Auto Shredder Fluff Disposal Fee	$6.68	Per Ton	Q1 2025	July 2025
Annual Maximum Special Waste Disposal Fee per Generator Site	$68,835.67	Annual Maximum	Q1 2025	July 2025

	New Fees		**Reporting Date**	
	Fee	Maximum	**Reporting Cycle**	**Reporting Date**
New Tire Sales	2% of retail	$4.66/tire	Q2 2025	July 2025

Submission of Fee Increases Exceeding CPI to Joint Legislative Budget Committee: A.R.S. § 41-1008(A)(3) provides that "an agency may increase a fee in an amount that exceeds the percentage of change in the average consumer price index" if the "agency submits the fee increase to the joint legislative budget committee for review before the fee is increased." Under this rule, seven fees are increased beyond

CPI. These fees include registration fees for solid waste landfills accepting less than 60,000 tons of waste annually, waste tire sites, including waste tire sites subject to self-certification, used tire sites, transfer stations subject to self-certification, biohazardous medical waste transporters, and septage haulers.

Pursuant to this statutory requirement, ADEQ submitted these seven fees increased beyond CPI to the Joint Legislative Budget Committee for the Committee's review.

Informal Comment: ADEQ actively facilitated informal comments and feedback from the public and stakeholders, including three stakeholder meetings held on May 30, 2024, June 20, 2024, and July 18, 2024. In these meetings ADEQ presented all new and adjusted fee amounts proposed, presented and explained draft rule text, explained the need and methodology for the annual regional CPI adjustment, and addressed and answered questions and concerns raised throughout the stakeholder engagement process, including:

- The purpose and need for post-closure care landfill fees. ADEQ explained that after a landfill closes it still requires monitoring for a period of 30 years after closure, commonly referred to as the post closure care period. During this time, the landfill must be monitored for ground water and methane levels as well as maintenance of the cap. ADEQ still has a responsibility of oversight of these activities to ensure those are being conducted. This oversight includes inspections and record management conducted by ADEQ. The annual fee during this duration is necessary for cost-recovery to ADEQ for regulatory activities conducted during this period.
- Whether used oil collection centers will be subject to fees. ADEQ responded that used oil collection centers will not be subject to fees under this rule. This rule incorporates registration requirements as they currently exist in statute into rule. Only handlers of used oil that are classified as transporters, marketers, processors, and burners are subject to these new fees.
- With the incorporation of the landfill disposal fee into rule, impact to the Recycling Fund and recycling grant program. ADEQ stated the per ton disposal fee will continue to be deposited into the Recycling Fund as it currently is. This rulemaking does not change or eliminate the Recycling Fund or recycling grant program.
- Reasoning for municipal and non-municipal landfills now being subject to the same annual registration fee under the proposed rule. ADEQ explained the fees are based on the cost to ADEQ for performing inspections, issuing permits, administrative costs, costs associated with data management, as well rule development and implementation. While the regulations can vary between operations, the costs are based on the time it takes to inspect and perform activities required of ADEQ for these sites which compare equally in Department cost.

This engagement with the public and stakeholders was a critical element in developing a fee program that is fairly assessed and presents the least burden and cost to the regulated community. For example, from discussion with stakeholders, ADEQ made the determination that lowering the annual fee for biohazardous medical waste transfer facilities from $7,500 to $3,000 was appropriate to mirror the fee for other types of transfer facilities engaged in activity subject to similar regulatory oversight to ensure this facility type is not subject to an unduly burdensome or disproportional fee. Another example was the decision to not adjust the initial registration fee for plan review or subject it to an annual CPI adjustment to improve clarity and ease of initial application for facilities subject to plan review. A final example is the decision to remove registration fees, both initial and annual, for composting facilities. After discussions and feedback from the regulated community, it was determined that fees at this time for composting

facilities are premature and more work to develop and facilitate composting in the state is needed prior to implementing related facility fees.

A recurring point of discussion during the informal comment period was the concern of implementing a fee increase in the middle of the fiscal year for many counties, municipalities, and other political subdivisions. In response, ADEQ created an implementation schedule more compatible with the fiscal year, as discussed above.

Section by Section Explanation of Proposed Rule: Below is an explanation of the substantive provisions of each section of the rule. Underlined text in the article or section title indicates new rule language. Struck through text indicates deletion of existing rule language. Italicized Article or Section titles indicates a new article or section.

ARTICLE 4. SOLID WASTE FACILITIES SUBJECT TO BEST MANAGEMENT PRACTICES

R18-13-401. Definitions. Adds definition clarifying "Department" means the Arizona Department of Environmental Quality and definitions for "material recovery facility" and "recyclable solid waste" as those terms are used in the exemption for transfer facilities subject to best management practices in new R18-13-402.

R18-13-402. Solid Waste Facilities Subject to Best Management Practices; Fees. Establishes a new initial registration fee of $1,800 and annual renewal fee of $1,500 for transfer facilities with a daily throughput of 180 cubic yards or less, but not including material recovery facilities, as defined, that are currently exempted from self-certification transfer facilities under Article 5, and for waste tire sites that are subject to best management practices pursuant to A.R.S. § 49-762.02. Includes a provision that registration under R18-13-1211 as a waste tire collection site satisfies registration and fee requirements under this section for waste tire sites. Inclusion of waste tire sites under this section reflects the dual regulation of these tire sites under both Title 44 and Title 49 of the Arizona Revised Statutes.

Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 5. REQUIREMENTS FOR SOLID WASTE FACILITIES SUBJECT TO SELF-CERTIFICATION

R18-13-501. Solid Waste Facilities Requiring Self-Certification; Registration Fees. Removes outdated language referencing previous 2012 fee provisions. Standardizes and increases the existing initial registration and annual registration fees for transfer facilities, waste tire sites, and waste tire shredding and processing facilities subject to self-certification pursuant to A.R.S. § 49-762.01 to $3,600 and $3,000, respectively. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 7. SOLID WASTE FACILITY PLAN REVIEW FEES

R18-13-702. Solid Waste Facility Plan Review Fees. Removes outdated language referencing previous 2012 fee provisions. Increases the maximum fee amounts in the Fee Tables for maximum fees relating to plan review, but excluding the initial fee, by the regional CPI adjustment. Increases the hourly billing rate for plan review and the annual review for solid waste landfills flat fee by the regional CPI adjustment. Eliminates the fee for modifications to solid waste facility plans for the Solid Waste Landfills – Type IV – RD&D category as ADEQ does not currently have authority to facilitate this type of plan modification.

Includes language for an annual adjustment to the maximum fees and hourly rate based on the regional CPI. The annual adjustment applies to the maximum fee amounts in the Fee Tables, the annual review for solid waste landfills flat fee, and the hourly billing rate, but does not apply to the initial plan review fees.

ARTICLE 8. GENERAL PERMITS

R18-13-801. General Permit Fees. Increases the fees for all existing general permit fees, including initial and annual, by the regional CPI adjustment. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 11. COLLECTION, TRANSPORTATION, AND DISPOSAL OF HUMAN EXCRETA

R18-13-1103. General Requirements; License Fees. Removes outdated language referencing previous 2012 fee provisions. Establishes a new tiered fee structure for septage hauler license fees. New initial license fee of $660 and annual license fee of $550 for septage haulers whose vehicles are subject to an inspection conducted by ADEQ. Increased initial license fee of $270 and annual license fee of $225 for septage haulers whose vehicles are subject to an inspection conducted by a county pursuant to a delegation agreement with ADEQ. This new fee structure shall be applicable to those licensees who renew their license after the effective date of the rule. To coincide with the implementation schedule, for CY2025 the first payment of the increased fee for those septage haulers whose vehicles are inspected by the counties shall be for the current fee amount of $75 payable through the myDEQ online portal. The second payment of this increased fee for CY2025 shall be made pursuant to an invoice sent in July 2025 to coincide with the fiscal year. The payment of the new fee for those septage haulers whose vehicles are inspected by ADEQ shall be invoiced in July 2025 in accordance with the implementation schedule for new fees.

A fee for those inspected by the county and a separate fee for those inspected by ADEQ is a two-tier system that reflects that fees be fairly assessed as there is a higher cost to ADEQ associated with conducting inspections throughout the state. This higher tier of fees is needed for proper cost-recovery to ADEQ.

Further adds new language clarifying inspections may be required for vehicle license renewal. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1107. Reinstatement. New subsection (B) stating that an expired or lapsed septage hauler license may be renewed by payment of the appropriate lower annual license fee instead of the higher initial license fee.

ARTICLE 12. WASTE TIRES; USED TIRES

R18-13-1201. Definitions. Adds a new definition of “waste tire collection site” as that term is defined in A.R.S. § 44-1301.

R18-13-1211. Registration of New Waste Tire Collection Sites; Fee. Removes outdated language referencing previous 2012 fee provisions. Increases the existing initial registration fee and annual registration fee for waste tire collection sites to $2,400 and $2,000, respectively. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1212. Registration of Outdoor Used Tire Sites; Fee. Removes outdated language referencing previous 2012 fee provisions. Increases the existing initial registration fee and annual registration fee for

outdoor used tire sites to $1,800 and $1,500, respectively. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1212.01 Waste Tire Collection Site Subject to Plan Approval; Fees. Establishes a new annual registration fee of $5,000 for waste tire collection sites that are required to obtain plan approval pursuant to A.R.S. § 49-762(A)(7). Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1213. Facilities Subject to More Than One Tire Site Registration; Single Fee. This section provides that a tire facility subject to registration under more than one section is only required to pay the registration fees for the section with the highest registration fees. This rule adds to this single-fee provision waste tire collection sites subject to plan approval under new R18-13-1212.01.

ARTICLE 13. SPECIAL WASTE AND BEST MANAGEMENT PRACTICES FOR SHREDDER RESIDUE

R18-13-1306. ~~Reserved~~ Fees. New applicants for special waste identification numbers shall submit a new initial registration fee for each special waste operation, excluding special waste receiving facilities subject to plan approval: $3,600 for a generator of shredder residue and $1,800 for a special waste shipper. There shall be billed an annual registration fee for each class of operation: $3,000 for a generator of shredder residue, $5,000 for a special waste receiving facility, defined in rule as an off-site location to which special waste is sent to be treated, recycled, stored, or disposed, and $1,500 for a special waste shipper. Solid waste landfills are exempt from these fees. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1307. Best Management Practices for Waste from Shredding Motor Vehicles; Fees. Increases the existing tonnage fee for shredder residue that is transported to a facility regulated by the ADEQ for treatment, storage, or disposal by the regional CPI adjustment to $6.68. Deletes unnecessary language referring to a calculation of shredder residue received based on compacted or uncompacted cubic yard amounts as this is not a receiving calculation that is used. Instead, preserves the tonnage calculation. Increases the existing fee cap by the regional CPI adjustment to $66,835.67. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 14. BIOHAZARDOUS MEDICAL WASTE AND DISCARDED DRUGS

R18-13-1409. Transporter License; Fees; Transportation. Eliminates the current biohazardous medical waste (BMW) transporter license fee structure of hourly billing and replaces with new flat fees. Further eliminates now-obsolete provisions relating to an appeal process concerning billing amounts. The new fee structure includes an increased initial application fee of $1,800, an increased annual fee of $1,500, an amendment fee of $350, and a reduced quinquennial renewal fee from $2,000 to now match the annual fee of $1,500. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-1410. Storage, Transfer, Treatment, and Disposal Facilities; Facility Plan Approval; Fees. Establishes new annual registration fees for BMW storage, disposal, treatment, and transfer facilities. The annual registration fee for disposal and treatment facilities is $12,500, for storage facilities is $7,500, and for transfer facilities is $3,000. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 16. BEST MANAGEMENT PRACTICES FOR PETROLEUM CONTAMINATED SOIL

R18-13-1606. Fees. Increases the existing tonnage fee for the treatment, storage, or disposal facility that first receives a shipment of PCS by the regional CPI adjustment from $4.50 to $6.68. Increases the existing fee cap by the regional CPI adjustment to $66,835.67. Establishes a new registration fee of $900 and annual registration fee of $750 for a generator of PCS. Establishes a new annual registration fee of $5,000 for special waste receiving facilities, defined for Article 16 as a treatment, storage, or disposal waste facility that has an approved special waste management plan pursuant to A.R.S. § 49-857. Solid waste landfills are exempt from this fee. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 19. LEAD ACID BATTERY RECYCLING

R18-13-1901. Collection or Recycling Facility of Lead Acid Batteries; Registration; Fees. Establishes a new registration fee of $810 and new annual fee of $675 for collection or recycling facilities that accept lead acid batteries. Currently existing collection or recycling facilities that accept lead acid batteries have until March 1, 2025 to register with the Department. For purposes of this section, "lead acid battery" is defined as a battery with a core of elemental lead and a capacity of six or more volts that is suitable for use in a vehicle or a boat. Includes language for an annual adjustment to these fees based on the regional CPI.

ARTICLE 20. USED OIL

The federal used oil program, 40 CFR 279, as amended on January 1, 1997, is adopted by reference for the state of Arizona pursuant to A.R.S. 49-801, *et al.* For this purpose, this rule proposes new Article 20 to reflect this incorporation. While full incorporation of the federal program as currently administered by ADEQ pursuant to statute into rule is outside the scope of this rulemaking at this time, this rule proposes new Article 20 to reflect this incorporation as appropriate for the purpose of establishing necessary fees.

R18-13-2001. Definitions. Adds definitions based on incorporation of the federal program and 40 CFR 279. Includes defining "40 CFR 279" to refer to 40 CFR part 279, as amended on January 1, 1997, and no future editions or later amendments. Incorporates federal used oil program definitions for used oil handlers and the federal used oil program definition for used oil as modified by A.R.S. § 49-801.

R18-13-2002. Used Oil Handler Registration; Fee. Establishes a new registration fee for used oil handlers, as defined, required to obtain an EPA identification number as follows: for a used oil processor, $9,000, for a used oil burner, $15,000, for a used oil transporter, $1,800, and for a used oil fuel marketer, $1,800. Establishes new annual registration fees for used oil handlers as follows: for a used oil processor, $7,500, for a used oil burner, $12,500, for a used oil transporter, $1,500, and for a used oil fuel marketer, $1,500. Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-2003. Used Oil Collection Center Identification Number; Requirements. Codifies in rule current registration requirements for used oil collection centers, as defined. This involves requesting a used oil collection center identification number pursuant to A.R.S. § 49-802(C). To note, there are no fees for used oil collection centers contemplated in this rulemaking.

ARTICLE 21. SOLID WASTE LANDFILL REGISTRATION AND DISPOSAL FEES

R18-13-2101. Definitions. Deletes the definition of "full quarter" as now obsolete given new fee structure discussed in R18-13-2102 below. Adds new definitions of "local public facility" and "recycling residue" as used within the solid waste landfill disposal fee that is incorporated from statute in R18-13-2104.

R18-13-2102. Solid Waste Landfill Registration; Annual Registration Fee ~~for an Existing Solid Waste Landfill~~. Eliminates the current units of reported waste calculation methodology for municipal solid waste landfills that accept waste for only a portion of the "defined time period", as defined. Now the amount of waste received shall be determined solely by the reported tons of solid waste received on the disposal invoice over the defined time period. Eliminates the one-time initial registration fee.

Currently there are four different tiers of fees for municipal solid waste landfills based on size as follows: for a municipal solid waste landfill receiving less than 12,000 tons during the defined time period, an annual fee of $1,250; for the same receiving at least 12,000 tons but less than 60,000 tons, an annual fee of $2,500; for the same receiving at least 60,000 tons but less than 225,000 tons, an annual fee of $7,500; and for the same receiving at least 225,000 tons, an annual fee of $12,500. Non-municipal solid waste landfills pay an annual flat fee of $3,750 regardless of size. This rule proposes to eliminate the distinction between municipal and non-municipal for purposes of the annual registration fee under this Section and consolidate to three different tiers of fees based on size as follows: for a solid waste landfill receiving less than 60,000 tons, an annual fee of $5,000; for the same receiving at least 60,000 tons but less than 225,000 tons, an annual fee of $10,000; and for the same receiving at least 225,000 tons, an annual fee of $18,565.

Currently a solid waste landfill is subject to an annual fee of $1,250 from the time the landfill stops accepting waste until released from its obligation to provide financial assurance for closure. This rule proposes to increase this fee to $3,500 and extend this fee period from the time the landfill stops accepting waste now until the landfill has completed closure and is released from its obligation for post-closure care. The fees during post-closure care are necessary as there are ongoing obligations and oversight that occurs during this post-closure period. This includes inspections and record management conducted by ADEQ. The annual fee is necessary for cost-recovery to ADEQ for regulatory activities conducted during this period.

Includes language for an annual adjustment to these fees based on the regional CPI.

R18-13-2104. Solid Waste Landfill Disposal Fee; Exemptions. This is the first of two fees incorporated from statute. The landfill disposal fee is currently under A.R.S. § 49-836. This proposed rule incorporates the landfill disposal fee as currently implemented under statute into rule, including reporting, calculation, and exemptions, with each component of the fee adjusted based on a national CPI adjustment. This adjustment includes increasing the solid waste landfill tonnage disposal fee from $0.25 to $0.58; the waste from recycling residue from $0.13 to $0.29 and associated maximum from $15,000 to $34,942.20; and the population-based disposal fee for local public facilities, as defined, from $0.07 to $0.16. To note: the solid waste landfill disposal fee will not be subject to an annual adjustment based on the regional CPI.

ARTICLE 22. NEW TIRE SELLERS

This is the second fee incorporated from statute. The new tire seller fee is currently under A.R.S. § 44-1302. In the same way as the landfill disposal fee, this proposed rule is intended to incorporate the new tire seller fee as currently implemented into rule, subject to a specific CPI adjustment.

R18-13-2201. Definitions. Adds definitions for "motor vehicle" and "tire seller" to define those terms as they are used and applied under the new tire seller fee in statute.

R18-13-2202. New Tire Sellers; Fee. This proposed rule incorporates the 2% fee on the sale of new tires as currently implemented under statute into rule, with fee components adjusted based on a national CPI

adjustment. This fee has an implementation date of April 1, 2025 to ensure the Department of Revenue has the necessary time to prepare for the increase. This adjustment results in the increase of maximum fee per tire from $2 to $4.66, and from $1 to $2.33 for the sale by a manufacturer to a wholesaler or retailer of motor vehicles with a gross weight of under 10,000 pounds. This proposed rule preserves the $0.10 credit per tire a seller may claim for accounting and reporting related to the fee. Further maintains as currently provided in statute that the fee shall be remitted to the Department of Revenue. Includes language for an annual adjustment to these fees based on the regional CPI.

Fees are Fairly Assessed and Impose the Least Burden and Cost: Pursuant to A.R.S. § 49-104(B)(17), ADEQ is charged with ensuring all fees "be fairly assessed and impose the least burden and cost to the parties subject to the fees" based upon an evaluation of "the direct and indirect costs of the Department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses." This statutory mandate is reinforced by HB2367, which states in Section 17, Legislative Intent, that fees established pursuant to the bill be based upon "direct and indirect costs associated with the type of activity or facility that is assessed a fee."

To fulfill this statutory mandate, ADEQ reviewed actual costs to the Agency in conducting inspections and regulatory oversight for each class of facility and established fee amounts to ensure fees are reflective of those costs relating to the Department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses associated with the type of activity or facility that is assessed a fee. This review and analysis were strengthened by engagement with and feedback from the regulated community and stakeholders. ADEQ's assessment and examples are discussed further below in Part 10, "Economic, Small Business, and Consumer Impact".

Immediate Effective Date: Pursuant to A.R.S. § 41-1032(A)(1), and as stated in Part 4 of the Preamble, "Effective Date of the Rule", ADEQ seeks an immediate effective date for these rules in order to preserve public safety and protect human health and the environment by ensuring necessary funding for SWP regulatory activities. This immediate effective date reflects the urgency recognized by the Legislature with the passage of HB2367 pursuant to an emergency clause for immediate enactment. Delaying the effective date would mean that the rule would not be able to take effect in calendar year 2024, seriously jeopardizing the financial viability of the program and putting SWP inspection, enforcement, and services at risk.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

ADEQ did not reference any study for this proposed rule.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. A summary of the economic, small business, and consumer impact:

The following discussion addresses each of the elements required for an economic, small business and consumer impact statement under A.R.S. § 41-1055.

Identification of the rulemaking: This rulemaking makes a number of changes to 18 A.A.C. 13, Solid Waste Management, including amendments to Articles 5, 7, 8, 11, 12, 13, 14, 16, and 21; amending Sections R18-13-501, R18-13-702, R18-13-801, R18-13-1103, R18-13-1211, R18-13-1212, R18-13-1307, R18-13-1409, R18-13-1410, R18-13-1606, R18-13-2102, and R18-13-2103, and their respective tables. Additionally, this rulemaking establishes new articles and sections, including Articles 4, 19, 20, and 22 and their respective sections, and new sections in existing Articles, including R18-13-1212.01, R18-13-1306, and R18-13-2104. The purpose of these changes is to both adjust existing fees and establish new fees throughout Solid Waste Management. This rulemaking also establishes in rule fees that currently only exist in statute.

Fees under this rulemaking can be categorized into two broad groups. One group being current fees paid by waste facilities and licensees that would be subject to an adjustment under this rulemaking. These facilities and licensees include publicly and privately-owned landfills, used and waste tire facilities, self-certification transfer facilities, biohazardous medical waste transporters, septage haulers, and special waste facilities that receive shredder residue and petroleum contaminated soil (PCS). The second group of fees are those established under this rulemaking for the first time. Facilities and entities subject to a new fee include transfer facilities subject to best management practices, used oil handlers, medical waste facilities that are permitted for storage or treatment, facilities generating or transporting special waste, landfills that enter into post-closure care, and collection and recycling facilities accepting lead acid batteries.

These rule changes are intended to collect fees to ensure the financial stability of Solid Waste Management programs, not to change the conduct of any regulated facilities or entities. The last time ADEQ undertook any substantive review and adjustments of fees within Solid Waste Management was in 2012. While fees established in 2012 represented a critical step towards the goal of full program sufficiency and stability, further work is necessary to realize this goal. Indeed, to date only half of all regulated facilities under Solid Waste Management are subject to fees for registration, inspection, and oversight notwithstanding ongoing statutory mandates.

Experience over the last several years has demonstrated the need for a comprehensive approach to fees throughout Solid Waste Management, one that promotes equal cost distribution amongst all regulated facilities and entities and ensures the financial health of Solid Waste Management as a whole for the effective and efficient carrying out of the Program's mission.

ADEQ's goal in this rulemaking is to adjust and establish fees throughout Solid Waste Management that will sustain critical programs while avoiding disproportionate impact on any one group of stakeholders or regulated entities. Currently, ADEQ's annual costs to administer all solid waste programs are estimated to total $3.5 million per year. However, current annual registration fee revenue is estimated at roughly $500,000. Other revenue sources include the 3.5% of the Waste Tire Fund allocated to the Solid Waste Fee Fund based upon the number of tires sold and the special waste tonnage tipping fee based upon the amount of special waste disposed within the state. While variable, these other revenue sources are critical, representing approximately half of revenues into the Solid Waste Fee Fund. ADEQ continues to operate with total revenues that are insufficient to cover costs. The increases in existing fees and newly established fees in this rulemaking are now projected to contribute and ultimately result in approximately $2.1 million in additional fee revenue for the Solid Waste Fee Fund.

Regulatory Objective: The Waste Program Division within ADEQ preserves and protects public health and the environment by reducing the risk associated with waste management, contaminated sites, and regulated substances. To fulfill this objective, ADEQ carries out a number of Agency functions corresponding to regulatory and oversight activities for the approximately 2,000 different facilities and entities that fall under Solid Waste Program (SWP) regulation, including: administrative operations; inspections, including pre- and post-inspection activity encompassing historic data and permit review, case closure, and necessary filing; permitting and licensing; public records management; complaint response; and compliance assistance. It is critical that ADEQ has the ability to fully perform all necessary Agency functions to continue to carry out its mission to ensure the continued health of our solid waste ecosystem to preserve and promote public health and the environment.

Least Burden and Cost: A.R.S. § 41-1052(D)(3) requires ADEQ to demonstrate it has selected the alternative with the least burden and cost necessary to achieve the underlying regulatory objective. Similarly, pursuant to A.R.S. § 49-104(B)(17), ADEQ is charged with ensuring all fees "be fairly assessed and impose the least burden and cost to the parties subject to the fees" based upon an evaluation of "the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses." This statutory mandate is reinforced by HB2367, which states in Section 17, Legislative Intent, that fees established pursuant to the bill be based upon "direct and indirect costs associated with the type of activity or facility that is assessed a fee."

In the context of this solid waste fees rule, ADEQ has interpreted this requirement to mean collecting fee amounts necessary to ensure a self-funded and sustainable SWP to satisfy ADEQ's detailed requirements to protect and enhance public health and the environment as specified in A.R.S. Title 49, Chapter 4, Solid Waste Management.

Based on ADEQ's interpretation of the statutory mandate that the rule impose the least burden and cost, ADEQ evaluated costs for regulating each type of facility and entity and set fees accordingly. ADEQ continued throughout the rulemaking process to adjust the fee proposal to impose the least burden and cost while still ensuring overall fee levels necessary to ensure a self-funded and sustainable SWP. Examples include:

- Establishing separate registration fee amounts in R18-13-1103 for septage haulers based on whether ADEQ is tasked with conducting annual inspections or such inspections are handled by counties to be reflective of actual costs to ADEQ.
- Setting an annual registration fee in R18-13-1410 specifically for biohazardous medical waste transfer facilities to ensure fees are commensurate with ADEQ's related regulatory costs and corresponds to other transfer facility fees.
- Leaving initial fees for solid waste plan review at their current levels in R18-13-702 to improve clarity and ease of initial application for facilities subject to plan review while still ensuring necessary cash flow to ADEQ to facilitate commencing facility plan reviews.
- Adjusting the annual registration fee for the largest class of landfills, those that annually receive 225,000 or more tons of waste, by the regional CPI instead of the initial, higher annual registration fee proposed in the NPRM.
- Changing the first annual registration fee of increased fees so that payment of the fee will occur over two invoices as well as delaying payment of new annual registration fees and first quarter landfill

disposal and special waste tonnage until July 2025 to correspond with the fiscal year. Following any initial invoicing or other change for the first year of implementation, billing for facilities and entities will return to a single invoice for all new and adjusted annual registration fees for the calendar year billing cycle in January 2026.

- Setting back the annual CPI adjustment to July instead of January, coinciding with the fiscal year. This affords stakeholders more time in preparing budgets aligned with the fiscal year.
- Setting an annual cap of 4% on the CPI adjustment of the fee amount of the preceding year. This CPI cap will promote stability and predictability year-on-year for stakeholders during budgeting and cost forecasting.

Fairly Assessed: To ensure the fees adjusted and established under this rulemaking be fairly assessed against each member of the regulated community subject to them, ADEQ conducted extensive stakeholder engagement, including three rounds of stakeholder meetings to present all proposed fee levels, explain the basis for the fees, provide detail on the need for and methodology of the annual CPI adjustments, and present rule language. ADEQ was able to solicit productive feedback from the regulated community. This feedback guided ADEQ in assessing and adjusting proposed fee levels and implementation to impose the least burden on members of the regulated community to the fullest extent possible.

In addition to engagement with and feedback from the regulated community, ADEQ reviewed costs associated with Agency functions in carrying out regulated activities, with costs identified and distinguished by facility type. Based upon these costs, ADEQ employed the fee methodology discussed in Part 7 of the Preamble, "Explanation of Fee Methodology", that set fees for each class of facility or entity.

Implementation Schedule: In furtherance of ADEQ's goal to ensure the proposed fees impose the least burden and cost, ADEQ evaluated the feasibility of an implementation schedule that balances the fiscal health of SWP and the budget constraints of the regulated community subject to the fees. Currently, ADEQ sends out invoices for registration fees to correspond with the calendar year. However, a recurring point of discussion throughout the rulemaking process was the concern of implementing a new fee or fee increase in the middle of the fiscal year for many counties, municipalities, and other political subdivisions. As such, while the rule and fees would become effective as of January 2025, fees will be implemented pursuant to a schedule for CY2025 to accommodate the fiscal needs of counties, municipalities, and other political sub-divisions.

This implementation schedule is discussed in greater detail and presented in a series of tables in Part 7 of the Preamble, "Implementation Schedule".

Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the proposed rulemaking: Stakeholders directly affected by this rulemaking include all 15 counties within the state, local municipalities, and the approximately 2,000 solid waste facilities and entities with different media types subject to ADEQ regulatory compliance and oversight under Solid Waste Management, as well as the general public. These facilities may be categorized as government and privately owned. Approximately 13% of all solid waste facilities and entities are owned by a political subdivision of the state, with the remaining being privately owned and operated, ranging from individual licensees to large, multistate businesses. These facilities and entities include solid waste transfer facilities of varying size and sophistication, from rural drop-site locations to city facilities, septage hauler licensees, waste tire

sites, off-site facilities registered for the treatment, storage, or disposal of auto-shredder residue, special waste transporters and generators, biohazardous medical waste transport companies, used oil handlers and collectors, facilities accepting lead acid batteries for collection or recycling, and both public and privately-owned landfills.

These facilities and entities are discussed in greater detail in the "Cost/Benefit Analysis" to follow.

Cost/Benefit Analysis: The estimated total impact for this rule is $12 million, which is the approximate total amount of increased fees across all programs. This estimated impact is subject to annual adjustment pursuant to the regional CPI adjustment. Approximately $1.8 million in increased fees will be collected pursuant to the proposed new and adjusted fees, including the special waste tonnage tipping fee, for regulated facilities and entities to be deposited into the Solid Waste Fee Fund. $6.7 million of increased fees will be collected through the fee on the sale of new tires as incorporated, with this cost borne by sellers and purchasers of new tires throughout the state. Of this $6.7 million, 3.5% or approximately $237,000 will be deposited to the Solid Waste Fee Fund pursuant to A.R.S. § 44-1305(B)(1), resulting in the total increased revenues to the Solid Waste Fee Fund of approximately $2.1 million. The remaining revenues from the fee on the sale of new tires are apportioned to the counties as provided in law. Finally, approximately $3.5 million in increased fees will be collected pursuant to the landfill disposal fee as incorporated to be deposited into the Recycling Fund pursuant to A.R.S. § 49-836.

ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs, as discussed in further detail below.

Probable benefits include:

- Allow the Recycling Fund to be more fully utilized for its intended purpose. Since the loss of General Fund revenues and the establishment of the fee-based program model in 2012, it has been necessary to expend from the Recycling Fund to cover management of solid waste regulatory programs. By ensuring full cost-recovery and program funding through this proposed rulemaking, expenditures from the Recycling Fund to cover solid waste management may be addressed, allowing appropriations under the Recycling Fund to be used for the stated purpose of that fund. ADEQ is committed to expenditures from the Recycling Fund being used for the stated purpose of grants and contracts for "research, demonstration projects, new technologies, market development and source reduction studies and implementation of the recommendations or reports prepared." *See* A.R.S. § 49-837(B)(1).
- Minimize public health risks from solid waste activities. Fee levels ensuring full cost-recovery to ADEQ for regulatory activities and program stability are critical to allow ADEQ to adequately perform all its duties relating to its mission to enhance public health and the environment, including inspections, monitoring, public education, compliance, and permitting.
- Ability to address the obligations cited in the 2021 Auditor General's Report. The Auditor General's September 2021 Performance Audit and Sunset Review Report noted ADEQ has not yet adopted all statutorily required rules. Specifically, the Report notes A.R.S. § 49-761 requires the Department to adopt various rules for solid waste facilities, such as requirements for storing, processing, treating, and disposing of solid waste; best management practices for these facilities; and financial assurance requirements for facility closure. The Report ultimately recommends such rules should be adopted as required by statute. By ensuring appropriate funding levels and future

programs security, ADEQ will be better positioned to undertake further rulemakings to address this recommendation of the Auditor General.

- Ability to address regulatory vacuum to protect public health and the environment as well as promote business development. With adequate and sustainable funding, SWP may increase inspection and enforcement activities to address and mitigate any regulatory vacuum within the solid waste universe. A greater ability to engage in regulatory activities provides a stronger deterrence to behavior that is harmful to the environment and public health, mitigates any unlevel playing field between competing facilities, and provides certainty for current and prospective businesses in estimating and planning for standards and operation requirements that must be adhered to.
- Ensure fee revenues continue to match increasing costs to ADEQ through annual regional CPI adjustments. The annual adjustments in the proposed rule will allow SWP to maintain fee levels commensurate with rising costs due to inflation to facilitate cost-recovery year over year and continued program stability.

This cost/benefit analysis includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(3):

- Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to ADEQ by the implementation of this rule include ensuring that SWP becomes sustainable, secure, and self-sufficient as a fully fee-based program. Additionally, benefits include allowing the Recycling Fund to be more fully utilized for its intended purpose, minimizing public health risks from solid waste activities, allowing ADEQ to address obligations cited in the 2021 Auditor General's Report, and to maintain fee levels commensurate with rising costs due to inflation to facilitate cost-recovery year on year and continued program stability. Probable benefits to ADEQ are discussed in greater detail in Part 7 of the Preamble. A probable cost to ADEQ in the implementation of this rulemaking is the administrative costs associated with administering these fees, including in accordance with the proposed implementation schedule and updating the fees annually pursuant to the regional CPI adjustment. No new full-time employees are necessary to implement or enforce this rule.

  The Arizona Department of Revenue is charged with the collection of the new tire sales fee, 2% of the sale price of a new tire capped at $2.00, pursuant to A.R.S. § 44-1302. This rulemaking incorporates this existing fee into rule at R18-13-2202, with an adjustment to the fee cap based upon CPI as well as a continuing annual regional CPI adjustment to the cap. As such, it will be necessary for the Department of Revenue to update each year the quarterly Motor Vehicle Waste Tire Fee return form to reflect the new fee cap. This will present a new administrative cost to the Department of Revenue in the timely updating and dissemination of the return form.

- Probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to political subdivisions by the implementation of this rule include the increased fee revenues of approximately $6.5 million apportioned to the counties based on registered motor vehicles for the administration of each county's waste tire program pursuant to the incorporation and adjustment of the new tire sales fee. ADEQ has heard that costs for running these waste tire programs have increased, creating additional strains on counties attempting to fully administer their respective programs as required by

A.R.S. § 44-1305. Increased fee revenues to be apportioned to the county waste tire programs will provide more money for each county to administer its required waste tire program. Additionally, increased fee revenues ensuring overall program health and self-sufficiency for SWP will strengthen the capacity for ADEQ to partner with counties and other political subdivisions to address key waste issues, such as wildcat, or illegal, dumping of waste, including increased enforcement activity and clean-up efforts.

Probable costs to political subdivisions from the implementation of this rule are the increased and new fees each political subdivision will be subject to for their county and municipal solid waste facilities and entities, as well as the increased landfill tonnage fees. Of the total approximately 2,000 solid waste facilities and entities regulated by ADEQ, the Agency estimates 13% are owned and operated by political subdivisions. This total includes approximately 26 active municipal landfills as well as 19 landfills currently in post-closure care.

Other facilities owned and operated by political subdivisions include:

- Used and waste tire sites. These include sites storing 100 or more used tires outdoors, as well as waste tire sites subject to self-certification and best management practices. Used and waste tire sites are often operated by and for counties under county waste tire collection programs. There are approximately 30 publicly operated used and waste tire sites.
- Transfer facilities subject to both self-certification and best management practices. To note, exempted from the definition of transfer facilities for purposes of registration fees are material recovery facilities where the incoming materials are primarily source separated recyclables and community or neighborhood recycling bins including drop boxes, roll off containers, plastic containers used to collect residential, business, or governmental recyclable solid waste. There are approximately 80 publicly operated transfer facilities maintained by counties and municipalities throughout the state.
- Septage haulers. While the majority of licensed septage hauler vehicles are privately owned and operated, some political subdivisions maintain licensed septage vehicles for purposes of sanitation and public departments. There are approximately 40 septage hauler licensed vehicles maintained by political subdivisions.
- Collection or recycling facility that accepts lead-acid batteries. Counties and municipalities often maintain registered household hazardous waste sites that accept lead-acid batteries. There are approximately 30 such registered facilities throughout the state.

- <u>Probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking:</u> With fees resulting in a fully-funded SWP, ADEQ may engage in greater compliance assistance for regulated facilities and entities. Further, ADEQ will have more resources to facilitate more expeditious permit review, both for new permits and renewals. This will allow permit applicants to begin facility operations sooner, mitigating administrative burdens associated with permit review time and allowing for faster business development, while still maintaining high regulatory standards for facilities and solid waste operations to ensure the protection of human health and the environment.

  Further, a fully-funded SWP will provide ADEQ with the resources needed to engage in greater oversight and compliance, ensuring a more level playing field between regulated businesses and

entities. With greater enforcement and oversight, ADEQ may better identify and address pollution, spills, and failures to meet regulatory requirements. This further promotes adherence to regulation amongst all facilities, mitigating the harm to those facilities and entities that must compete with and operate in the same regulatory space as those facilities and entities that may fail to adhere to minimum standards. Additionally, SWP may engage in more robust partnership with the regulated community through activities and programs designed to promote compliance and assistance. Increased program funding and stability can result in greater collaboration with the regulated community, including greater engagement by SWP sections in outreach that help facilities understand and comply with applicable regulations.

Probable costs to businesses directly affected by the rulemaking include the new or increased fees privately-owned solid waste facilities and entities will be subject to, as well as increased landfill tonnage and special waste tonnage fees.

There are approximately 27 active landfills and 7 landfills in post-closure care that are privately owned and operated subject to regulation by ADEQ.

Privately-owned regulated facilities and entities also include those described below:

- Transfer facilities subject to self-certification or best management practices. These facilities are located throughout the state and range in size and sophistication. Self-certification transfer facilities are those that handle a daily throughput of more than 180 cubic yards of solid waste, while transfer facilities subject to best management practices are those that handle a daily throughput of 180 cubic yards or less of solid waste. To note, mirroring public transfer facilities, exempted from the definition of transfer facilities for purposes of registration fees are material recovery facilities where the incoming materials are primarily source separated recyclables and community or neighborhood recycling bins including drop boxes, roll off containers, plastic containers used to collect residential, business, or governmental recyclable solid waste. There are approximately 80 privately-owned transfer facilities throughout the state.
- Used oil handlers. Used oil handlers are defined as used oil processors, burners, transporters, and marketers required to obtain an EPA identification number pursuant to 40 CFR 279. The majority of the used oil handlers are transporters and marketers, representing 85% of registered used oil handlers. Used oil transporters are anyone that collects or accepts used oil from regulated handlers and transports that used oil to another facility while used oil marketers are anyone who markets used oil or first claims that used oil meets the used oil fuel specifications. There are approximately 230 used oil handlers throughout the state.
- Biohazardous medical waste (BMW) facilities and entities. BMW facilities and entities include BMW transporters, BMW treatment facilities, and BMW storage facilities. There are approximately 50 BMW transporters engaged in moving biohazardous medical waste, as defined in R18-13-1401(4), to an approved disposal facility. There are approximately 20 BMW treatment and storage facilities accepting biohazardous medical waste for proper treatment, storage, and disposal pursuant to regulation.
- Septage haulers. There are over 500 registered privately owned and operated septage hauler licenses throughout the state engaged in the transportation of sewage or human waste that is removed from septic tanks or other onsite wastewater treatment facilities.

- Special waste facilities. Special waste facilities include generators, transporters, and receiving facilities of special waste, defined as solid waste other than hazardous waste requiring special handling and management. Currently petroleum contaminated soils and auto-shredder fluff from shredding motor vehicles are designated special wastes in Arizona. There are approximately 80 special waste transporters, 70 special waste generators, and 16 special waste receiving facilities throughout the state engaged in the transportation, treatment, storage and disposal of special waste.
- Collection or recycling facility that accepts lead-acid batteries. There are approximately 200 registered facilities with ADEQ authorized for the collection and recycling of lead-acid batteries throughout the state.

For the reasons discussed above, ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

General description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the proposed rulemaking: ADEQ estimates this rulemaking will not have an impact on public or private employment.

Probable impact of the proposed rulemaking on small businesses: Arizona law defines "small business" for the purpose of this analysis as a "concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year." *See* A.R.S. § 41-1001(23). The probable impact on small businesses includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(5):

Identification of the small businesses subject to the rulemaking: ADEQ has reviewed its records of solid waste facilities subject to new or adjusted fees affected by this rule to determine which ones are small businesses. An important criterion is that the business must be independently owned and operated. Based on this review and applicable definition, it appears likely that many septage haulers are independently owned and operated and not likely to exceed the revenue and employee limits in the statutory definition of small business. Additionally, it appears likely that a number of used outdoor tire sites storing more than 100 used tires, biohazardous medical waste transporters, certain transfer facilities subject to best management practices, as well as certain used oil handlers would qualify as small businesses for purposes of this rulemaking and collection and recycling facilities accepting lead acid batteries.

Administrative and other costs required for compliance with the proposed rulemaking: ADEQ does not anticipate appreciable administrative or other costs associated with compliance with the rulemaking. While this rule imposes a financial obligation corresponding with registration of certain facility types, compliance with the requirements of registration has long been a component of SWP. Registration under this rulemaking is administrative, with no additional substantive licensing or approval procedures or requirements compared to those that may already exist for regulated facilities.

Reduction of Impact on Small Businesses: A.R.S. § 41-1035 requires state agencies to reduce the impact of a rulemaking on small businesses, if any of the following methods are legal and feasible in meeting the statutory objectives which are the basis of the rule making:

1. Establish less stringent compliance or reporting requirements in the rule for small businesses.

2. Establish less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses.

3. Consolidate or simplify the rule's compliance or reporting requirements for small businesses.

4. Establish performance standards for small businesses to replace design or operational standards in the rule.

5. Exempt small businesses from any or all requirements of the rule.

The listed methods are not generally relevant to a rule establishing fees. *See* A.R.S. § 49-104(B)(17). However, in developing fee amounts for different categories of facilities and entities, ADEQ was guided by its statutory mandate that all fees be fairly assessed and impose the least burden and cost to the parties subject to the fees. Further, the implementation schedule discussed in greater detail in Part 7 of the Preamble was designed to impose the least burden possible on all facilities and entities subject to fees under this rule, including small businesses.

<u>Probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking:</u> Adequate and sustainable funding for SWP further enables ADEQ to more fully perform its duties relating to its mission to enhance public health and the environment. Benefits to private persons and consumers includes greater enforcement and compliance activities that can be carried out by ADEQ. With adequate funding levels, SWP may conduct more regular inspections of regulated facilities and entities, leading to greater oversight, identification of violations, and corrective actions, resulting in greater minimization of public health risks from solid waste activities. Additionally, adequate funding for SWP will result in sustained and improved Agency response to citizen complaints. Robust engagement with the public is a critical component of ADEQ's mission. SWP receives approximately 80 solid waste complaints from the public annually. The ability to ensure that each complaint is efficiently and effectively fielded, managed, and resolved will be strengthened through adequate funding for SWP.

Further benefits include greater public outreach and education efforts. For example, the Recycling Program educates and encourages Arizonans to reduce, reuse, recycle, and buy recycled products as an alternative to solid waste disposal in landfills. The program assists communities and organizations in developing recycling programs, accessing markets for recycled materials, and educating people about the benefits of recycling. Providing information to the public regarding proper residential and commercial disposal of solid waste is another important component of ADEQ's mission.

Probable costs to private persons and consumers include the increase in the fee cap on the sale of new tires. This rulemaking incorporates into rule the statutory new tire sale fee under A.R.S. § 44-1302 of 2% on the purchase price of each tire sold and raises the per tire cap from $2.00 to $4.66. This is anticipated to result in increased revenues of $6.7 million. This fee is to be collected by the seller of tires and vehicles and often operates as a passthrough fee to be borne by the consumer. The maximum increased cost an individual consumer may be subject to is $10.64 per vehicle purchase or $2.66 per tire replacement, assuming the purchase is of a four-wheel vehicle.

An additional probable cost to private persons and consumers is the potential for increased solid waste disposal costs due to the increase to the landfill disposal fee. The landfill disposal tonnage fee is often a passthrough to residential customers. With the landfill disposal fee being increased based on a CPI adjustment, landfills, both public and privately-owned, may elect to raise rates for residents and customers to offset this increase.

Probable effect on state revenues: ADEQ estimates that fees from this rulemaking will directly affect state revenues by increasing overall annual fee revenue generated across programs and funds by approximately $12 million.

Description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking: This rulemaking is the least intrusive and costly means possible to achieve the same objectives. ADEQ engaged with stakeholders to explore methods to reduce the impact of new or increased fees, including among other outreach efforts three stakeholder meetings, and established an implementation schedule for the first calendar year of the fees to impose the least burden and cost, as discussed in detail in Part 7 of the Preamble.

Description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data: Any data or reasoning which this rulemaking is based on is identified in the "Rule Scope and Explanation" portion of the Notice of Final Rulemaking located in Part 7. Generally, no new data was introduced or reviewed to make these rule changes.

Based on the foregoing, ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Changes were made to the rule to reduce the regulatory burden and impact to stakeholders. These changes include:

1. Place a cap of 4% on the annual CPI adjustment for all fees. This involves inserting language stating "except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year" at: R18-13-402(E), R18-13-501(F), R18-13-702(G), R18-13-801(A), R18-13-1103(E), R18-13-1211(C), R18-13-1212(D), R18-13-1212.01(C), R18-13-1306(E), R18-13-1307(H), R18-13-1409(J), R18-13-1410(G), R18-13-1606(F), R18-13-1901(C), R18-13-2002(D), R18-13-2102(D), R18-13-2103(C), and R18-13-2202(D).
2. Set back the time of implementation of the adjustment from January to July of each year. This involves striking the word "January" and replacing with "July" at: R18-13-402(E), R18-13-501(F), R18-13-702(G), R18-13-801(A), R18-13-1103(E), R18-13-1211(C), R18-13-1212(D), R18-13-1212.01(C), R18-13-1306(E), R18-13-1307(H), R18-13-1409(J), R18-13-1410(G), R18-13-1606(F), R18-13-1901(C), R18-13-2002(D), R18-13-2102(D), R18-13-2103(C), and R18-13-2202(D).
3. Remove the annual CPI adjustment for the solid waste landfill disposal fee. This involves removing in whole subsection (H) of R18-13-2104.

4. Set back the implementation of the new tire sales fee until April 1, 2025. This involves inserting the language "Beginning April 1, 2025" at the beginning of R18-13-2202(A).

Additional non-substantive changes were made to improve clarity of the rule and better conform with official style and form guidance. These changes include:

5. R18-13-501(C). Reformat the numerical list to conform with current rule language.
6. R18-13-1103(C)(3). Replace the semicolon at the end of a list with a comma.
7. R18-13-1201. Reorder the new definition of "waste tire collection site" to now be in alphabetical order.
8. R18-13-1307(F). Reformat the subsection to conform with official Arizona rulemaking publishing style and form. This includes re-lettering current subsection (G) to subsection (F) and establishing subsection (F)(2) as new subsection (H).
9. R18-13-1409(I)(4). Correct the subsection reference from subsection (K) to subsection (I).
10. R18-13-1606(E). Correct the subsection reference from subsection (B) to subsection (C).
11. R18-13-2002(D). Correct the subsection references from subsection (B) and (C) to subsections (A) and (B).
12. R18-13-2104(C). Clarify the maximum fee amount is an annual maximum.
13. R18-13-2104(F). Delete redundant reference to "other information deemed necessary by the Department."
14. R18-13-2202(C). Add the word "Arizona" before "Department of Revenue" to improve clarity and consistency.
15. R18-13-2201(B). Insert the words "to a" before "political subdivision" to improve clarity.
16. R18-13-2202(A). Strike the words "sales tax" and replace with "transaction privilege tax" to more accurately use the applicable Arizona state tax terminology. Insert the word "tire" before the word "seller" to improve consistency.
17. R18-13-2202(D)(2). Add language stating ADEQ shall both notify the Arizona Department of Revenue of the annual CPI adjustment to the new tire sale fee and post such amount on its website as soon as practicable.

12. <u>An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:</u>

ADEQ received 15 comment letters throughout the formal comment period that ran from August 16, 2024 to September 20, 2024. Nine of these comment letters came from cities and towns, including the cities of Glendale, Goodyear, Mesa, Phoenix, Tempe, Tucson, Casa Grande, Scottsdale, and the Town of Gilbert, with the remaining comment letters coming from the League of Arizona Cities and Towns, Graham County, Gila County, the National Waste & Recycling Association's (NWRA-AZ) Arizona Chapter, the County Supervisors Association, and a member of the business community. ADEQ also received several formal oral comments during a public hearing held on September 19, 2024.

Throughout the comment letters and formal comments during the public hearing certain comments were consistently raised. Each of these comments is addressed and responded to below:

<u>Impact of substantial fee increases.</u> Comment letters state proposed fee increases are substantial. Commenters including the City of Phoenix and Graham County notes several fees are increased by 100%

or more, with three fees increased more than 1,000% compared to current levels. This impact will not only be felt by solid waste facilities such as landfills and transfer facility operators but also residents and local businesses that will experience direct and pass-through costs. The City of Phoenix notes this can present a challenge for cities and towns as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.

Agency Response: ADEQ responds that SWP has been mandated to operating under a fee-based model since 2012. ADEQ recognizes that some fee increases are significant; however, for the last 12 years SWP has performed unfunded regulatory mandates for approximately half of its solid waste universe. Further, fees established in 2012 were established at levels far below actual cost to the Agency. Accordingly, this rulemaking establishes fees more universally throughout the solid waste universe with each fee established at a level reflective of actual costs to the Agency in carrying out relevant regulatory activities.

Fee implementation timing. Several comment letters note budget constraints faced by political subdivisions and the anticipated strain of having fee implementation coincide with the calendar year. Counties and municipalities have expressed that this situation creates challenges in budgeting and forecasting, particularly in preparing their budgets to accommodate fee payments and increases that become effective in January. Commenters request that fee implementation be delayed until July 1, 2025 and that future billing by the agency coincide with the fiscal year, with all future billing coming due pursuant to invoices sent in July.

Agency Response: ADEQ recognizes budget constraints faced by political subdivisions. Accordingly, ADEQ split the implementation of fees for calendar year 2025 between two invoice periods, as described in greater detail in Part 7 of the Preamble, "Implementation Schedule". Following the initial implementation, ADEQ has determined it is necessary for SWP to maintain the calendar year billing cycle to ensure continued program stability.

Continuing CPI Adjustments. Commenters raise concern that CPI adjustments under the rule are perpetual. Commenters note this may result in under or over cost recovery. Commenters request ADEQ make the following changes to the CPI adjustment methodology.

- ADEQ makes the CPI adjustments sunset after a period of five years.
- Each annual CPI adjustment is capped, such as at a maximum of a 5% increase per year.
- CPI adjustments should be implemented in July based on the CPI as published in January of each year.

Agency Response: ADEQ appreciates concerns raised by stakeholders concerning implementation of the CPI adjustment methodology, including the request for a sunset, cap to annual maximum adjustment, and aligning the adjustment with the fiscal year. ADEQ believes CPI is a reasonable tool to approximate year-to-year increased costs to the Agency. The annual CPI adjustment is representative of the cost of living for ADEQ employees, which ADEQ must hire and retain. CPI is a proven method for budgeting stability both in the public and private sectors. Within ADEQ, CPI has been utilized within the Air Quality Division for over a decade, and has been implemented in recent rulemakings for hazardous waste and water quality fees. Placing a cap on the maximum annual adjustment could result in a misalignment between program revenues and true costs to the program. ADEQ established fees at levels to cover program costs while imposing the least cost and burden to those subject to the fees. As CPI adjustments

are based on costs to the Agency, to cap these adjustments below changes to Agency costs would result in under-recovery by ADEQ.

ADEQ is committed to continued oversight and accountability for its programs. Program leadership analyzes the effectiveness of programs annually and reports to the Director on all aspects of the programs, including costs and revenues. Through this, ADEQ programs are regularly reviewed to ensure the Agency is able to meet its statutory mandates, including that all fees be fairly assessed and impose the least burden and cost. *See* A.R.S. § 49-104(B)(17). Accordingly, future adjustments to programs are considered to ensure continued alignment with those statutory mandates. As such, ADEQ does not believe a sunset on annual CPI adjustments is necessary.

However, while ADEQ determined that it is necessary for SWP to maintain the calendar year billing cycle to ensure continued program stability, to allow for adequate time to budget for annual adjustments based upon CPI, the rules have been changed so that adjustments will now align with the fiscal year. Further, to promote stability and predictability year-on-year, adjustments are capped at 4% of the fee amount of the preceding year.

Financial strain on political subdivisions due to legislative reduction of the flat tax and repeal of the rental tax. In comment letters political subdivisions consistently state the strain towns and cities are currently facing due to the recent implementation of the state reduced flat tax as well as the elimination of the rental tax. Towns and cities are concerned with the additional impact posed by fees under this rulemaking.

Agency Response: ADEQ recognizes that political subdivisions including cities and towns face certain economic constraints from recent legislative changes. In accordance with ADEQ's mandate for a fee-based program and pursuant to A.R.S. § 49-104(B)(17), ADEQ established fees to be "fairly assessed and impose the least burden and cost to the parties subject to the fees" based upon an evaluation of "the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses."

In response to current and projected economic constraints felt by cities and towns and the residents who ultimately pay for solid waste services, these rules have been changed to eliminate the annual CPI adjustment for the solid waste landfill disposal fee. This will allow for political subdivisions that operate landfills to better project anticipated costs.

Assurance that the fees will support the solid waste fund and recycling grants and not be swept to cover other state budget shortfalls. Commenters raise concern that revenues to the Recycling Fund from landfill disposal fees will be used to support other state budget needs.

Agency Response: ADEQ appreciates these concerns. ADEQ is committed to using the greatest portion feasible of the Recycling Fund towards grants and contracts and other stated uses under A.R.S. § 49-837 to further the mission of the Arizona Recycling Program. Appropriation authority rests solely with the state legislature.

Additional comments specific to each commenter are addressed below:

City of Glendale. The City of Glendale states the City has Intergovernmental Agreements (IGAs) with the cities of Peoria, Goodyear, and Avondale for use of its landfill. These IGAs do not reflect the increase in fees and this cost will be absorbed by the City of Glendale. The City of Glendale requests the rulemaking be paused and ADEQ adjust its approach to reduce the impact on cities.

Agency Response: ADEQ responds that, as demonstrated through a series of stakeholder meetings and presented materials, to carry out the Agency's legislative mandates, the Agency has borne costs far exceeding revenues due to inflation and from insufficient fees under a fee-for-service program since 2012. These fee increases are necessary to ensure program stability for the Agency to fulfill its statutory mandates to protect human health and the environment.

The Legislature passed HB2367 pursuant to an emergency clause for immediate enactment. Delaying the rulemaking and final implementation of the fees would jeopardize the financial stability of SWP.

National Waste & Recycling Association's – Arizona Chapter. The NWRA-AZ comment letter includes the following: (1) requests ADEQ update an Agency calendar reflecting the adoption of the new rule, (2) formalize rules for the Recycling Grant Program, (3) asks if there exists a proforma report projecting total revenues in this program and as a result of these increases and how they relate to program costs ensuring that the program is not over funded, (4) questions the application of fees, if any, to closed landfills to ensure that post-closure plans are accurate and if none are applied, written statement in the Rules regarding absence of fee assessment to closed landfills and (5) NWRA-AZ requests feedback on if submitted comments are available for review and if they will be available through the ADEQ website.

Agency Response: ADEQ responds to the request for an Agency calendar by stating ADEQ intends to update the regulated community annually following implementation of the fees and for subsequent CPI adjustments. In the third stakeholder meeting held July 18, 2024, ADEQ explained how the Agency plans to publish on the ADEQ website the fee table and fee updates for all fees affected by the rulemaking. Further, ADEQ intends to send out notice to regulated facilities subject to the fees announcing fee adjustment and updates. This is based upon current practice for hazardous waste fees that are similarly subject to annual CPI adjustments.

The Agency recognizes and appreciates the importance of recycling grant funding and the Recycling Grant Program for stakeholders and the public. However, it is outside the authority or mandate of this rulemaking for ADEQ to implement any rules for the Recycling Program.

Post-closure plans are reviewed as part of the approval process. Further, ADEQ has responsibility for regulatory oversight of landfills for the full duration of post-closure care. This oversight includes inspections, data review, and records management. The annual fee for post-closure care will cover costs to the Agency for this regulatory oversight.

Concerning the question if submitted comments are available for review, ADEQ responds that the agency acts in accordance with its statutory mandate to summarize comments and publish responses in this Notice of Final Rulemaking. Public comments are available through the ADEQ Records Management Center via a public records request under A.R.S. §§ 39-101 through 39-161.

City of Phoenix. The City of Phoenix requests additional clarification on proposed fee increases. City of

Phoenix notes in the Notice of Proposed Rulemaking (NPRM) that ADEQ states "currently regulatory costs across all solid waste programs for ADEQ are estimated to total $3.5M per year; however, current fees generated are estimated at roughly $500,000." The City of Phoenix requests clarity on how much of the current generated fee revenue is in the recycling fund versus the solid waste fund and please provide the estimated revenue by fund with the proposed fee increases and how the total contribution of the fee on the sale of new tires into the solid waste fee fund of $665,000 was derived. The City of Phoenix also believes that the NPRM statement the post-closure care fee is new is inconsistent with the strike-through language in R18-13-2103 on page 2598 that states the annual landfill registration is $1,250. The City of Phoenix requests clarity if the closed landfill fees are new or increases on existing fees.

The City of Phoenix recommends ADEQ limit the subsequent CPI increases and provide ongoing and thorough transparency and justification for the fee increases.

Agency Response: ADEQ clarifies that the stated approximately $500,000 of fee revenue deposited into the Solid Waste Fees Fund comes from annual registration fees for facilities and entities. As noted by the commenter, all revenues generated from the landfill disposal fee are deposited into the Recycling Fund pursuant to A.R.S. 49-836.

Following this rulemaking, revenues to the Solid Waste Fee Fund, which include annual registration fees, special waste tonnage fees, and the 3.5% apportioned from the new tire sale fee, are estimated to be approximately $3.4 million (an increase of $2.1 million) depending on total tonnage disposed of, active amount of facility registrations, and the sale amount of new tires; revenues to the Recycling Fund, which include the landfill tonnage disposal fee, are estimated to be approximately $6.2 million (an increase of $3.5 million), with future expenditure levels contingent on legislative appropriation; and revenues generated from the new tire sales fee, contingent on the number of tires sold, are estimated to be approximately $19 million (an increase of $6.7 million). The determination of total contribution of the new tire sales fee estimated at approximately $665,000 is based upon 3.5% of the total approximate revenue from the new tire sales fee.

ADEQ clarifies that the current annual registration fee of $1,250 is only applicable through completion of landfill closure. However, it does not apply to landfills still regulated in post-closure care. This has been the historic application of this fee provision based upon interpretation of prior statutory authority. Subsequent clarity to this statutory authority through amendment to the definition of a "closed solid waste facility" made during the 2024 legislative session pursuant to HB2628 provided the directive for the collection of the fee during the full period of post-closure care as established in the rule. The Amendment to R18-13-2103 establishes that this fee, increased to $3,500, is for the full duration of post-closure care, approximately 30 years, for the reasons stated in the Preamble. As this fee will now be applicable for a different duration of time and obligations, ADEQ characterizes this as a new fee.

Concerning City of Phoenix's request to limit the subsequent CPI increases and provide ongoing and thorough transparency and justification for the fee increases, ADEQ believes CPI is a reasonable tool to approximate year-to-year increased costs to the Agency. The annual CPI adjustment is representative of the cost of living for ADEQ employees, which ADEQ must hire and retain. CPI is a proven method for budgeting stability both in the public and private sectors. At ADEQ, CPI has been utilized within the Air Quality Division for over a decade, and has been implemented in recent rulemakings for hazardous waste and water quality fees. Further, ADEQ is committed to continual program oversight and accountability.

Program leadership analyzes the effectiveness of programs annually and reports to the Director on program revenues and costs as necessary to meet ADEQ's statutory mandates.

While ADEQ recognizes CPI as a reasonable tool to approximate year-to-year increased costs to the Agency, ADEQ acknowledges concerns raised by the regulated community. As such, to promote stability and predictability year-on-year, the rules have been changed so that all CPI adjustments are capped at 4% of the fee amount of the preceding year.

City of Tucson. The City of Tucson recommends that ADEQ consider the implementation of these proposed fees in phases pursuant to an implementation schedule over a period of three-to-five years.

Agency Response: ADEQ responds that SWP has been experiencing budget shortfalls for years that continues to be compounded by growing costs without corresponding revenue increases. It is due to the urgency with which SWP needs increased fee revenues to ensure proper cost-recovery and a self-funded program that the Legislature passed HB2367 pursuant to an emergency clause for immediate enactment. Delaying implementation of the fees pursuant to a delayed implementation schedule over the course of several years would jeopardize the financial stability of SWP.

County Supervisors Association of Arizona. The County Supervisors Association expresses support received from counties for the adjustment by CPI for the cap on the new tire sales fee from $2.00 to $4.66 as proposed in the rule that will further fund county obligations to collect and contract for the disposal of waste tires.

The Association expresses concern increased costs may incentivize illegal dumping. The Association requests that notice of fee increases be sufficient to allow stakeholders to address costs in future budgets, that fee increases align with existing budget timelines, and that proposed fee increases are justified with annual cost estimates by ADEQ.

Agency Response: ADEQ recognizes that illegal dumping is an ongoing challenge throughout the state. However, ADEQ finds that increased fee revenues ensuring overall program health and self-sufficiency for SWP will strengthen the capacity for ADEQ to partner with counties and other political subdivisions to address key waste issues, such as wildcat, or illegal, dumping of waste.

In response to the Association's request that notice of fee increases be sufficient, ADEQ intends to update the regulated community annually following implementation of the fees and for subsequent CPI adjustments. As stated above, the Agency plans to publish on the ADEQ website the fee table and fee updates for all fees affected by the rulemaking. Further, ADEQ intends to send out notice to regulated facilities subject to the fees announcing any fee adjustment and updates. This is based upon current practice for hazardous waste fees that are similarly subject to annual CPI adjustments.

ADEQ selected CPI as the adjustment methodology because ADEQ believes CPI is a reasonable tool to approximate year-to-year increased costs to the Agency. The annual CPI adjustment is representative of the cost of living for ADEQ employees, which ADEQ must hire and retain. CPI is a proven method for budgeting stability both in the public and private sectors. At ADEQ, CPI has been utilized within the Air Quality Division for over a decade, and has been implemented in recent rulemakings for hazardous waste and water quality fees. Program leadership analyzes the effectiveness of programs annually and reports to

the Director on program revenues and costs as necessary to meet ADEQ's statutory mandates.

ADEQ recognizes budget constraints faced by stakeholders. Accordingly, ADEQ split the implementation of fees for calendar year 2025 between two invoice periods, as described in greater detail in Part 7 of the Preamble, "Implementation Schedule". After continued review, following the initial implementation, ADEQ determined it is necessary for SWP to maintain the calendar year billing cycle to ensure continued program stability.

However, to ensure adequate time to budget for annual adjustments based upon CPI, these adjustments will now align with the fiscal year. Further, to promote stability and predictability year-on-year, the rules have been changed so that all CPI adjustments are capped at 4% of the fee amount of the preceding year.

Graham County. Graham County characterizes and raises concern with the new and adjusted fees pursuant to this rulemaking as an "across the board" method based not on the cost to ADEQ of each activity but on the need to raise operational revenue. Graham County states that the emergency legislation of HB2367 enacts fees on July 1. The timing imposes fees that Graham County and other government agencies haven't budgeted for.

Graham County states the landfill disposal fee increase is substantial and rural counties will be unable to cope with the increase. Further, the landfill disposal fee and septage hauler annual registration fee increase will be borne by customers, presenting a challenge for rural counties and municipalities struggling with "wildcat dumping" to avoid landfill costs. Graham County requests fees be increased incrementally over a period of years rather than immediately to lessen "sticker shock" felt by permittees and customers.

Agency Response: ADEQ asserts that each fee was established pursuant to the statutory mandate requiring each fee be based upon an evaluation of "the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses." *See* A.R.S. § 49-104(B)(17). Fees were established under this rulemaking to ensure a fully self-funded program. To ensure ADEQ fulfilled this statutory mandate, the Agency reviewed actual costs in conducting inspections and regulatory oversight for each class of facility and established fee amounts to ensure fees are reflective of those costs relating to the Department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel, and other necessary operational expenses associated with the type of activity or facility that is assessed a fee. ADEQ states, as demonstrated through a series of stakeholder meetings and presented materials, to maintain the Agency's legislative mandates the Agency has borne costs far exceeding revenues due to inflation and from insufficient fees under a fee-for-service program since 2012. These fee increases are necessary to ensure program stability for the Agency to fulfill its statutory mandates to protect human health and the environment.

ADEQ recognizes based on stakeholder feedback that fee increases pose budget difficulties and that certain fees, such as the landfill disposal fee and septage hauler annual registration fee, are costs that may be passed on to customers. Accordingly, ADEQ split the implementation of fees for calendar year 2025 between two invoice periods, as described in greater detail in Part 7 of the Preamble, "Implementation Schedule".

ADEQ finds that increased fee revenues ensuring overall program health and self-sufficiency for SWP

will strengthen the capacity for ADEQ to partner with counties and other political subdivisions to address key waste issues, such as wildcat, or illegal, dumping of waste. ADEQ recognizes the county's concern with "sticker shock" associated with these fee increases. ADEQ responds as stated above to comments from the City of Tucson that SWP has been experiencing budget shortfalls for years that continues to be compounded by growing costs without corresponding revenue increases. It is due to the urgency with which SWP needs increased fee revenues to ensure proper cost-recovery and a self-funded program that the Legislature passed HB2367 pursuant to an emergency clause for immediate enactment. Delaying implementation of the fees pursuant to a delayed implementation schedule over the course of several years would jeopardize the financial stability of SWP.

City of Scottsdale. The City of Scottsdale requests the tonnage disposal fee not be swept to cover other state budget shortfalls. The City of Scottsdale expresses opposition to perpetual CPI adjustments and instead recommends more frequent rulemakings to adjust fees. Additionally, and in the alternative, the City of Scottsdale requests continuing CPI adjustments be made in July instead of January to coincide with the fiscal year. The City of Scottsdale further raises a series of questions:

- Did the Solid Waste Management program FY 24/25 budget include revenue from the January 1 rate increase? And if yes, what is the total amount of forecasted revenue?
- To achieve the goal of a fully self-funded program, why did ADEQ choose the method of annual CPI adjustments to recover costs instead of reviewing previous fiscal year costs then seeking a corresponding rate increase?
- What will happen if costs are either over recovered or under recovered through annual CPI adjustments?

Agency Response: ADEQ responds that while the rule will be effective in January 2025, the increased portions of the fees would not take effect until July 2025 pursuant to the implementation schedule and thus would not affect the FY2025 budget. ADEQ selected CPI as the methodology because CPI is a proven method for budgeting stability both in the public and private sectors. Within ADEQ, CPI has been utilized within the Air Quality Division for over a decade, and has been implemented in recent rulemakings for hazardous waste and water quality fees. ADEQ is committed to continual program oversight and accountability. Program leadership analyzes the effectiveness of programs annually and reports to the Director on program revenues and costs as necessary to meet ADEQ's statutory mandates.

Further, to ensure adequate time to budget for annual adjustments based upon CPI, the rules have been changed so that adjustments will now align with the fiscal year. Additionally, to promote stability and predictability year-on-year, CPI adjustments are capped at 4% of the fee amount of the preceding year.

Agency rulemakings represent a great cost in time and resources to the agency. The cost to ADEQ to undertake annual rulemaking would require the allocation of resources in personnel and time that would hinder the agency's ability to fulfill its mission and statutory mandates.

Town of Gilbert. The Solid Waste Collections Superintendent representing the Town of Gilbert asked during the public hearing if the formal comment period may be extended.

Agency Response: ADEQ is committed to engagement with stakeholder and the public throughout the rulemaking process. However, it is critical that this rule be effective by January 2025 to ensure program

stability. The program is currently experiencing budget shortfalls. Any delay to the implementation of fees will further impact the ability for SWP to fulfill its statutory mandates. An extension of the public comment period is not possible as it would result in a delay of submission of the final rule to the Governor's Regulatory Review Council, resulting in an effective date of the rule after January 2025.

Gila County, District 3 Supervisor Woody Cline. Supervisor Cline objects to the proposed fees, stating the fees will place a financial burden on the county's landfills and that financial burden will be passed on to the county's constituents. Supervise Cline states the county has worked diligently to combat blight on public lands and this increase in fees will definitely have a negative effect on the progress made.

Agency Response: ADEQ responds that, as demonstrated through a series of stakeholder meetings and presented materials, to maintain the Agency's legislative mandates the Agency has borne costs far exceeding revenues due to inflation and from insufficient fees under a fee-for-service program since 2012. These fee increases are necessary to ensure program stability for the Agency to fulfill its statutory mandates to protect human health and the environment.

Tank's Green Stuff. The CEO of Tank's Green Stuff protests the increase in fees for composting operations and construction waste landfills citing soaring operating costs, including equipment, labor, energy costs, and breaks in the supply chain. Tank's Green Stuff states fees should instead be reduced to assist businesses in recovering from recent economic hardships.

Agency Response: ADEQ responds that, as demonstrated through a series of stakeholder meetings and presented materials, to maintain the Agency's legislative mandates the Agency has borne costs far exceeding revenues due to inflation and from insufficient fees under a fee-for-service program since 2012. These fee increases are necessary to ensure program stability for the Agency to fulfill its statutory mandates to protect human health and the environment. ADEQ further states that registration fees for composting facilities have been removed from the rulemaking following discussion and feedback from stakeholders to ensure composting may be more prudently addressed in a future rulemaking.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

Not applicable.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

Not applicable. These rules establish registration requirements solely for revenue purposes. *See* A.R.S. § 41-1001(13).

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Not applicable.

c. Whether a person submitted an analysis to the agency that compares the rule's impact on the competitiveness of business in this state to the impact on business in other states:

No such analysis was submitted.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rules follows:

ARTICLE 4. SOLID WASTE FACILITIES SUBJECT TO BEST MANAGEMENT PRACTICES

R18-13-401. Definitions

A. "Department" means the Arizona Department of Environmental Quality.

B. "Material recovery facility" means a transfer facility that collects, compacts, repackages, sorts, or processes commingled recyclable solid waste generated offsite for the purpose of recycling and transport, or where source separated recyclable solid waste is processed for sale to various markets, and where the incoming materials are predominantly recyclable solid waste.

C. "Recyclable solid waste" means a product or material described in subsection (C)(1) or (2), and for which subsection (C)(3) is true:

1. A product with no useful life remaining for the purposes for which it was produced, or if useful life remains, the product will not, due to location, quantity, or owner choice, remain in use or be reused for a purpose for which it was produced.
2. A material that is a result of a process or activity whose purpose was to produce something else.
3. The product or material retains some economic value, with or without further processing, as a raw material or feedstock in some process other than incineration or combustion.

R18-13-402. Solid Waste Facilities Subject to Best Management Practices; Fees

A. The following solid waste facilities subject to best management practices under A.R.S. § 49-762.02 shall register with the Department and pay registration fees as provided in this Section:

1. A transfer facility, as defined in A.R.S. § 49-701, with a daily throughput of 180 cubic yards or less, but not including:
   a. A material recovery facility where the incoming materials are primarily source separated recyclables; or
   b. Community or neighborhood recycling bins including drop boxes, roll off containers, and plastic containers used to collect residential, business, or governmental recyclable solid waste.
2. A site at which more than 500 and fewer than 5,000 waste tires are stored on any day that is not required to obtain plan approval pursuant to A.R.S. § 49-762.

B. Initial registration. A new solid waste facility listed in subsection (A) shall not begin operation until the owner or operator registers with the Department on a form approved by the Department. The owner or operator of a new solid waste facility listed in subsection (A) shall submit an initial registration fee of $1,800 at the time of registration under this subsection.

C. Annual registration fee. The Department shall bill an annual registration fee of $1,500 to a registered solid waste facility listed in subsection (A) that has not filed a notice of termination of registration with

the Department. The owner or operator of a registered solid waste facility listed in subsection (A) shall pay the annual registration fee within 30 days of invoice receipt.

D. Registration as a waste tire collection site under R18-13-1211 shall satisfy registration and fee requirements pursuant to this Section for a site under subsection (A)(2) of this Section.

E. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (B) and (C) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (E)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

ARTICLE 5. REQUIREMENTS FOR SOLID WASTE FACILITIES SUBJECT TO SELF-CERTIFICATION

R18-13-501. Solid Waste Facilities Requiring Self-Certification; Registration Fees

A. The following solid waste facilities requiring self-certification under A.R.S. § 49-762.01 shall register with the Department and pay annual registration fees as provided in this Section ~~by September 30, 2012, and annually thereafter by September 30th~~:

1. A transfer facility, as defined in A.R.S. § 49-701, with a daily throughput of more than 180 cubic yards, including a material recovery facility, but not including:
   a. A material recovery facility where the incoming materials are primarily source separated recyclables; or
   b. Community or neighborhood recycling bins including drop boxes, roll off containers, and plastic containers used to collect residential, business, ~~and/~~or governmental recyclable solid waste.
2. A facility storing 5,000 or more waste tires on any one day and not required to obtain plan approval.
3. A waste tire shredding and processing facility.

B. Initial registration for a new facility. The owner or operator of a planned new facility identified in subsection (A) of this Section shall submit the following information to the Department before beginning construction:

1. The name of the solid waste facility.

2. The name, mailing address and telephone number of each owner and operator of the solid waste facility.
3. The physical location of the solid waste facility by physical address, latitude and longitude, or legal description. If none of these are practical, by driving directions from the nearest city or town.
4. A brief description of operations, including waste management methods, types and volumes of waste handled, waste storage and treatment equipment, and the length of time the waste remains onsite.
5. A diagram of the property showing its approximate size and the planned location of the solid waste facility or facilities.
6. Documentation that the facility will comply with local zoning laws or, if the owner is an agency or political subdivision of this state, with A.R.S. § 49-767.
7. Documentation that the facility has any other environmental permit that is required by statute.
8. A copy of the public notice in a newspaper of general circulation in the area where the facility will be located stating the intent to construct and operate a new solid waste facility pursuant to A.R.S. § 49-762.05.

C. Initial and annual registration for an existing facility. The owner or operator of an existing facility identified in subsection (A) of this Section shall submit the following information to the Department annually on a form approved by the Department and note any changes since the last registration:

1. The name of the solid waste facility.
2. The name, address and telephone number of each owner and operator of the solid waste facility.
3. The physical location of the solid waste facility by physical address, latitude and longitude, or legal description. If none of these are practical, by driving directions from the nearest city or town.
4. A brief description of operations, including waste management methods, types and volumes of waste handled, waste storage and treatment equipment, and the length of time the waste remains onsite.
5. A diagram of the property showing its approximate size and the location of the solid waste facility or facilities.
6. Documentation that the facility remains in compliance with the most current local zoning laws or with A.R.S. § 49-767, as applicable.
8. Documentation that the facility continues to hold any other environmental permit that is required by statute.

D. Self-certification. With each registration under subsection (B) or (C) of this Section, the owner or operator shall certify that the information submitted is true, accurate, and complete to the best of the person's knowledge and belief.

E. Registration fees. The owner or operator of a ~~transfer~~ solid waste facility under subsection (A)~~(1)~~ shall pay the Department ~~$1,000~~ $3,600 for the initial registration of a new ~~or existing~~ facility, and ~~$500~~ $3,000 for each annual registration thereafter. The Department shall bill the annual registration fee to a solid waste facility under subsection (A) that has not filed a notice of termination of registration with the Department and the solid waste facility shall pay within 30 days of invoice receipt. ~~The owner or operator of a tire facility under subsection (A)(2) or (3) shall pay the Department $1,000 for the initial registration of a new or existing facility, and $250 for each annual registration thereafter.~~

F. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (E) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (F)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

~~F.~~ G. As used in this Section:

1. "Department" means the Arizona Department of Environmental Quality.
2. "Material recovery facility" means a transfer facility that collects, compacts, repackages, sorts, or processes commingled recyclable solid waste generated offsite for the purpose of recycling and transport, or where source separated recyclable solid waste is processed for sale to various markets, and where the incoming materials are predominantly recyclable solid waste.
3. "Recyclable solid waste" means a product or material described in subsection ~~(F)~~(G)(3)(a) or (b), and for which subsection ~~(F)~~(G)(3)(c) is true:
   a. A product with no useful life remaining for the purposes for which it was produced, or if useful life remains, the product will not, due to location, quantity, or owner choice, remain in use or be reused for a purpose for which it was produced.
   b. A material that is a result of a process or activity whose purpose was to produce something else.
   c. The product or material retains some economic value, with or without further processing, as a raw material or feedstock in some process other than incineration or combustion.

ARTICLE 7. SOLID WASTE FACILITY PLAN REVIEW FEES

R18-13-702. Solid Waste Facility Plan Review Fees

A. With each application submitted for approval pursuant to A.R.S. § 49-762.03, the applicant shall remit an initial fee in accordance with one of the fee tables in this subsection, unless otherwise provided in subsection (B) of this Section. This subsection also lists the maximum fees that the Department will bill the applicant. All fees paid shall be payable to the state of Arizona. The Department shall deposit the fees paid into the Solid Waste Fee Fund established pursuant to A.R.S. § 49-881, unless otherwise authorized or required by law.

Fee Tables

Fees for Plan Review of New Solid Waste Facilities		
	Initial	Maximum
Solid Waste Landfills	$20,000	~~$200,000~~ $297,047
Non-APP requirements for Non-MSWLFs operating under an APP	$2,000	~~$50,000~~ $74,262
Other Solid Waste Facilities Subject to Plan Approval	$10,000	~~$100,000~~ $148,524

Fees for Modifications to Solid Waste Facility Plans		
	Initial	Maximum
Solid Waste Landfills – Type IV	$1,500	~~$150,000~~ $222,786
~~Solid Waste Landfills – Type IV – RD&D~~	~~$15,000~~	~~$150,000~~
Solid Waste Landfills – Type III	$750	~~$75,000~~ $111,393
Other Solid Waste Facilities Subject to Plan Approval - Type IV	$750	~~$75,000~~ $111,393

Other Solid Waste Facilities Subject to Plan Approval - Type III	$500	~~$50,000~~ $74,262

Fees for Review of Financial Responsibility Plans for Solid Waste Facilities		
	Initial	Maximum
Annual Review for Solid Waste Landfills	~~$600~~ $891 Flat Fee	N/A
Other Solid Waste Facilities	$200	~~$5,000~~ $7,426

ARTICLE 11. COLLECTION, TRANSPORTATION, AND DISPOSAL OF HUMAN EXCRETA

R18-13-1103. General Requirements; License Fees

A. Any person owning or operating a vehicle or appurtenant equipment used to store, collect, transport, or dispose of sewage or human excreta that is removed from a septic tank or other onsite wastewater treatment facility; earth pit privy, pail or can type privy, or other type of privy; sewage vault; or fixed or transportable chemical toilet shall obtain a license for each vehicle from the Department. The person shall apply~~, in writing,~~ on a ~~forms~~ form ~~furnished~~ approved by the Department and shall demonstrate that each vehicle is designed and constructed to meet the requirements of this Article.

B. No change

C. License terms.

1. For each ~~vehicle~~ newly licensed vehicle:

   a. subject to inspection conducted by the Department pursuant to this Article ~~after June 30, 2012~~, the initial license fee shall be ~~$250~~ $660, ~~and shall~~ to be submitted with the license application, and the annual license fee shall be $550; or

   b. subject to inspection conducted by a county pursuant to a delegation agreement with the Department, the initial license fee shall be $270, to be submitted with the license application, and the annual license fee shall be $225.

2. After initial licensure of a vehicle, the Department will renew the license annually after payment of ~~a $75~~ the annual fee according to subsection (C)(3). The licensee shall ~~submit~~ renew by completing a ~~the Department approved~~ renewal form approved by the Department and submitting the annual license fee to the Department no later than 30 days before expiration.

~~2.~~ ~~For those vehicles licensed before July 1, 2012, the initial license fee shall be $75 and shall be paid within 30 days of receipt of an invoice from the Department. The license shall be valid for one year. The licensee shall submit the Department approved renewal form and the annual license fee of $75 to the Department no later than 30 days before expiration.~~

3. Each vehicle license may be renewed if:

   a. The annual license fee is paid,

   b. The owner or operator is in compliance with subsection (D) of this Section,

   c. The vehicle is operated by the same person for the same purpose, ~~and~~

   d. The vehicle has been inspected within the last 12 months pursuant to any inspection required under this Article and found in compliance with this Article, and

   ~~d.~~ e. The vehicle is maintained according to this Article.

D. No change

E. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (C) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (E)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-1117. Reinstatement

A. Upon request of the vehicle owner, the Department may reinstate a suspended or revoked vehicle license following a Department reinspection and based on an evaluation of compliance with the requirements of this Article.

B. Upon request of a vehicle owner that fails to complete a renewal form approved by the Department and submit the annual license fee to the Department no later than 30 days before expiration, the Department may reinstate an expired vehicle license after completion of a renewal form, submitting the appropriate annual license fee, and following a Department determination of compliance with the requirements of this Article.

ARTICLE 12. WASTE TIRES; USED TIRES

R18-13-1201. Definitions

In addition to the definitions provided in A.R.S. § 44-1301, the following definitions apply in this Article:

1. "Aquifer protection permit" means an authorization issued by the Department under A.R.S. § 49-241 et seq.
2. "Burial cell" means an area where mining waste tires are placed in or on the land for burial.
3. "Mining" means activities dedicated to the exploration, extraction, beneficiation, and processing, including smelting and refining, of metallic ores.
4. "Mining facility" means any land, building, installation, structure, equipment, device, conveyance, or area dedicated to mining.
5. "Mining waste tire" means an off-road tire that is greater than three feet in outside diameter that was used in mining.
6. "Operator" means an owner, part owner, management agency, or lessee of a mining facility, a person responsible for the overall operation or control of a mining facility, or an authorized representative of the operator.
7. "Person" is defined in A.R.S. § 49-201.
8. "Waste tire collection site" is defined in A.R.S. § 44-1301.

9. “Waste tire cover” means waste tires that are chopped or shredded into pieces that do not exceed four inches in diameter used for cover at a solid waste landfill.

R18-13-1211. Registration of New Waste Tire Collection Sites; Fee

A. A new waste tire collection site shall not begin operation ~~after July 20, 2011,~~ until the owner or operator registers with the Department. The owner or operator shall register on a form approved by the Department that includes a statement that the site is in compliance with A.R.S. § 49-762.07(F) and A.R.S. Title 44, Chapter 9, Article 8, as applicable. The owner or operator of a new waste tire collection site ~~that begins operation after July 20, 2011,~~ shall pay an initial registration fee of ~~$500~~ $2,400 within 30 days of invoice receipt. ~~For purposes of this Section, “new waste tire collection site” means a waste tire collection site as defined in A.R.S. § 44-1301 that did not operate as a collection site on or before July 20, 2011.~~

B. The owner or operator shall pay a ~~$75~~ $2,000 registration fee annually thereafter within 30 days of invoice receipt.

C. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A) and (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (C)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-1212. Registration of Outdoor Used Tire Sites; Fee

A. A person shall not store 100 or more used tires outdoors until the person registers with the Department. A person that stores 100 or more used tires outdoors ~~after July 20, 2011,~~ shall pay an initial registration fee of ~~$500~~ $1,800 within 30 days of invoice receipt. The person shall register on a form approved by the Department that includes a statement that the site is in compliance with A.R.S. § 49-762.07(F) and A.R.S. Title 44, Chapter 9, Article 8, as applicable.

B. A ~~$75~~ $1,500 registration fee shall be paid annually thereafter within 30 days of invoice receipt.

C. For the purposes of this Section:

1. “Used tire” means any tire which has been used for more than one day on a motor vehicle.
2. “Outdoors” means other than inside a building with a weatherproof roof.

D. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A) and (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (D)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-1212.01 Waste Tire Collection Site Subject to Plan Approval; Fees

A. Initial registration. A waste tire collection site that is required to obtain plan approval under A.R.S. § 49-762(A)(7) shall not begin operation until the owner or operator registers with the Department on a form approved by the Department.

B. Annual registration fee. The Department shall bill an annual registration fee of $5,000 to a registered waste tire collection site that is required to obtain plan approval under A.R.S. § 49-762(A)(7) that has not filed a notice of termination of registration with the Department. The owner or operator of the waste tire collection site that is required to obtain plan approval under A.R.S. § 49-762(A)(7) shall pay the annual registration fee within 30 days of invoice receipt.

C. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (C)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-1213. Facilities Subject to More Than One Tire Site Registration; Single Fee

A person who is required to register a tire facility under more than one of the Sections listed in subsections (1) through ~~(3)~~ (4) shall register and follow procedures under each Section, but is only required to pay the registration fees under the Section with the highest fees.

1. R18-13-1211.
2. R18-13-1212.

3. R18-13-1212.01.

~~3.~~ 4. R18-13-501.

ARTICLE 13. SPECIAL WASTE AND BEST MANAGEMENT PRACTICES FOR SHREDDER RESIDUE

R18-13-1306. ~~Reserved~~ Fees

A. Initial registration fee. Upon making a request for a special waste identification number on a form as provided by the Director, and shown as Appendix A to this Article, an applicant shall submit to the Department an initial registration fee for each operation as follows:

1. For a generator of shredder residue, $3,600; and
2. For a special waste shipper, $1,800.

B. Annual registration fee. The Department shall bill an annual registration to a generator of shredder residue, a special waste receiving facility, and a special waste shipper that that has a special waste identification number that has not filed a notice of termination of registration with the Department for each operation as follows:

1. For a generator of shredder residue, $3,000;
2. For a special waste receiving facility, $5,000; and
3. For a special waste shipper, $1,500.

C. A generator of shredder residue, special waste receiving facility, or special waste shipper shall pay the annual registration fee within 30 days of invoice receipt.

D. In accordance with A.R.S. § 49-855(G), a solid waste landfill that pays registration fees under A.R.S. § 49-747 is exempt from the fees under subsections (A) and (B) of this Section.

E. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A) and (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (E)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

ARTICLE 14. BIOHAZARDOUS MEDICAL WASTE AND DISCARDED DRUGS

R18-13-1409. Transporter License; Fees; Transportation

A. A transporter shall obtain a transporter license from the Department as provided under subsections (B) and (C) of this Section in addition to possessing a permit, license, or approval if required by a local health department, environmental agency, or other governmental agency with jurisdiction.

B. A transporter license is valid for five years after issuance. To renew the license, the licensee shall submit an application ~~under subsection (B)(1)~~ no later than 60 days prior to the license's expiration, and shall pay the license renewal fee, as provided in subsection ~~(B)(2)~~ (B)(1). With each application submitted for approval, the applicant shall remit an initial transporter license application fee ~~in accordance with Table 1. Fee Table - Transporter License Fees; Frequency of Application for Transporter License. This Table also lists the maximum fees that the Department will bill the applicant.~~ as provided in subsection (B)(1). All fees paid shall be payable to the state of Arizona. The Department shall deposit the fees paid into the Solid Waste Fee Fund established pursuant to A.R.S. § 49-881, unless otherwise authorized or required by law.

1. To apply for or to renew a transporter license, an applicant shall submit all of the following in a Department-approved format:
   a. The name, address, and telephone number of the transportation company or entity.
   b. All owners' names, addresses, and telephone numbers.
   c. All names, addresses, and telephone numbers of any agents authorized to act on behalf of the owner.
   d. A copy of either the certificate of disclosure required by A.R.S. § 49-109 or a written acknowledgment that this disclosure is not required.
   e. Photocopies or other evidence of the issuance of a permit, license, or approval if required by a local health department, environmental agency, or other governmental agency with jurisdiction.
   f. A copy of the transportation management plan as defined in R18-13-1401.
   g. A list identifying each dedicated vehicle.
   h. ~~The~~ For an initial transporter ~~application~~ license application, a fee ~~indicated in Table 1. Fee Table - Transporter License Fees; Frequency of Application for Transporter License.~~ of $1,800, and for a license renewal, a fee of $1,500.

~~2.~~ ~~The new or renewal application license fee shall be calculated by multiplying the hourly rate of $122 by the number of personnel hours involved in inspecting each transporting vehicle, evaluating the application, and approving the license, which amount shall be subtracted from the initial application license fee on deposit. Any remaining surplus of the initial application license fee on deposit shall be returned to the applicant. Any cost that exceeds the initial application license fee on deposit shall be billed to the applicant, but shall not exceed the maximum.~~

~~3.~~ 2. The Department may only issue a transporter license, including a renewal, if all of the items in subsection (B)(1)(a) through (h) have been received and determined to be correct and complete, and a Department inspection of each transporting vehicle shows that the vehicle is in compliance with this Article.

C. Transporters shall pay by the invoice due date an annual fee of ~~$750~~ $1,500 for each calendar year following payment of the new or renewal application license fee and subsequent years in which a renewal application license fee is not charged and paid, ~~such as~~ indicated in Table 2. Fee Table, Transporters Annual Fee.

D. Amendments. After issuance, the licensee shall submit to the Department any change to the information listed in subsections (B)(1)(a) through ~~(h)~~ (g) of this Section within 30 days of its occurrence. Vehicles may only be added to the license after a Department inspection shows that the vehicle is in compliance with this Article. Amendments adding vehicles to the license shall be processed after payment of

inspection fees and other expenses ~~at the rate listed in subsection (B)(2)~~, except that the application fee shall be ~~$100 and the maximum fee $5,000~~ $350.

~~**E.**~~ ~~An applicant who disagrees with the final bill received from the Department for the amendment, issuance, renewal or denial of a transporter license or vehicle inspections may make a written request to the Director for a review of the bill and may pay the bill under protest. The request for review shall specify the matters in dispute and shall be received by the Department within 10 working days of the date of receipt of the final bill.~~

~~**F.**~~ ~~Unless the Department and applicant agree otherwise, the review shall take place within 30 days of receipt by the Department of the request. The Director shall make a final decision as to whether the time and costs billed are correct and reasonable. The final decision shall be mailed to the applicant within 10 working days after the date of the review and is subject to appeal pursuant to A.R.S. §§ 41-1092 through 1092.12.~~

R18-13-1410. Storage, Transfer, Treatment, and Disposal Facilities; Facility Plan Approval; Fees

A. A person shall obtain solid waste facility plan approval from the Department as prescribed in A.R.S. § 49-762.04 and pursuant to R18-13-702 to construct any facility that will be used to store, transfer, treat, or dispose of biohazardous medical waste that was generated off site. Plan approval shall be obtained before starting construction of the medical waste treatment or disposal facility. This requirement also

applies to solid waste facilities for which an operator self-certifies under A.R.S. § 49-762.05, if the facility also will receive biohazardous medical waste.

B. No change

C. No change

D. Annual registration fee. The Department shall bill an annual registration fee to a biohazardous medical waste facility described in subsection (A) of this Section as follows:

1. For a disposal or treatment facility, $12,500;
2. For a storage facility, $7,500; and
3. For a transfer facility, $3,000.

E. A facility subject to more than one fee under subsection (D) of this Section shall only pay the highest fee amount.

F. The biohazardous medical waste facility shall pay the annual registration fee within 30 days of invoice receipt.

G. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (D) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (G)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

ARTICLE 16. BEST MANAGEMENT PRACTICES FOR PETROLEUM CONTAMINATED SOIL

R18-13-1606. Fees

A. In accordance with A.R.S. §§ 49-855(C)(2) and 49-863, the treatment, storage, or disposal facility in this state that first receives a shipment of PCS shall remit to the Department a fee of ~~$4.50~~ $6.68 per ton but not more than ~~$45,000~~ $66,835.67 per generator site per year for PCS that is transported to the facility.

B. Initial registration fee. Upon making a request for a special waste identification number on a form as provided by the Director pursuant to Article 13, A generator of PCS shall submit to the Department an initial registration fee of $900.

C. Annual registration fee. The Department shall bill an annual registration fee to a generator of PCS or special waste receiving facility that has received facility approval under R18-13-1607 that has not filed a notice of termination of registration with the Department as follows:

1. For a generator of PCS, $750; and
2. For a special waste receiving facility, $5,000.

D. The generator of PCS or special waste receiving facility shall pay the annual registration fee within 30 days of invoice receipt.

E. In accordance with A.R.S. § 49-855(G), a solid waste landfill that pays registration fees under A.R.S. § 49-747 is exempt from the annual registration fee under subsection (C) of this Section.

F. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A), (B), and (C) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (F)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

ARTICLE 19. LEAD ACID BATTERY RECYCLING

R18-13-1901. Collection or Recycling Facility of Lead Acid Batteries; Registration; Fees

A. Initial registration. The owner or operator of an existing collection or recycling facility that accepts lead acid batteries as of the effective date of this Section shall register with the Department by March 1, 2025, on a form approved by the Department. A collection or recycling facility shall not begin operation to accept lead acid batteries until the owner or operator registers with the Department on a form approved by the Department that includes a statement that the facility is in compliance with A.R.S. § 44-1322. The owner or operator of a new collection or recycling facility of lead acid batteries shall submit an initial registration fee of $810 at the time of registration under this subsection.

B. Annual registration fee. The Department shall bill an annual registration fee of $675 to a registered collection or recycling facility that has not filed a notice of termination of registration with the Department. The owner or operator of a registered collection or recycling facility shall pay the annual registration fee within 30 days of invoice receipt.

C. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A) and (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban

Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.

2. Round the result from subsection (C)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

D. For purposes of this Section, "lead acid battery" means a battery with a core of elemental lead and a capacity of six or more volts that is suitable for use in a vehicle or a boat.

ARTICLE 20. USED OIL

R18-13-2001. Definitions

A. "40 CFR 279", and any section therein, refers to 40 CFR part 279, as amended on January 1, 1997, and no future editions or later amendments. Copies of 40 CFR 279 are available at https://www.govinfo.gov/app/collection/cfr/. Copies are on file with the Department.

B. "CFR" means the Code of Federal Regulations.

C. "Department" means the Arizona Department of Environmental Quality.

D. "Used oil" means the same as defined in 40 CFR 279.1 and includes oil that has been contaminated as a result of handling, transportation, or storage.

E. "Used oil collection center" means the same as defined in 40 CFR 279.1.

F. "Used oil burner" means the same as defined in 40 CFR 279.1.

G. "Used oil fuel marketer" means the same as defined in 40 CFR 279.1.

H. "Used oil handler" means a used oil burner, used oil marketer, used oil transporter, or used oil processor.

I. "Used oil processor" means the same as defined in 40 CFR 279.1.

J. "Used oil transporter" means the same as defined in 40 CFR 279.1.

R18-13-2002. Used Oil Handler Registration; Fee

A. Initial registration. A new used oil handler that has received, or is required to obtain, an EPA identification number pursuant to 40 CFR 279 shall not begin operation until the owner or operator registers with the Department on a form approved by the Department. A new used oil handler shall submit an initial registration fee at the time of registration under this subsection as follows:

1. For a used oil processor, $9,000;
2. For a used oil burner, $15,000;
3. For a used oil transporter, $1,800; and
4. For a used oil fuel marketer, $1,800.

B. Annual registration fee. The Department shall bill an annual registration fee to a used oil handler that has received, or is required to obtain, an EPA identification number pursuant to 40 CFR 279 that has not filed a notice of termination of registration with the Department as follows:

1. For a used oil processor, $7,500;
2. For a used oil burner, $12,500;
3. For a used oil transporter, $1,500; and
4. For a used oil fuel marketer, $1,500.

C. The registered used oil handler shall pay the annual registration fee within 30 days of invoice receipt.

D. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsections (A) and (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (D)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-2003. Used Oil Collection Center Identification Number; Requirements

A. A used oil collection center shall request a used oil collection center identification number on a form provided by the Director pursuant to A.R.S. § 49-802(C) that contains all of the following:

1. The company name;
2. The name of the owner of the company;
3. The mailing address and telephone number of the company;
4. The location of the collection center; and
5. A description of the type of used oil activity at the company.

B. Within 30 days of receiving the completed form, the Director shall issue the identification number to the used oil collection center.

ARTICLE 21. SOLID WASTE LANDFILL REGISTRATION AND DISPOSAL FEES

R18-13-2101. Definitions

In addition to the definitions in A.R.S. §§ 49-701 and 49-701.01, for the purpose of this Article, the terms used in this Article have the following meanings:

1. "Defined time period" means the 12-month period that begins on July 1 of a calendar year and ends on June 30 of the following calendar year and consists of the actual number of calendar days in that 12-month period.
2. "Disposal fee invoice" means the quarterly landfill disposal fee invoice the Department mails to a landfill operator, on which the landfill operator indicates the amount of waste received and the amount of the disposal fees owed to the Department as required under A.R.S. § 49-836.
~~3. "Full quarter" means any of the standard fiscal quarters of the defined time period for which a municipal solid waste landfill accepted waste on or before the first day of the quarter and on or after the last day of that quarter.~~
3. "Local public facility" means a facility operated pursuant to A.R.S. § 49-741.
4. "Recycling residue" means waste generated from recycling:
   a. solid waste; or
   b. effluent from a secondary wastewater treatment plant or wastewaters.

R18-13-2102. Solid Waste Landfill Registration; Annual Registration Fee ~~for an Existing Solid Waste Landfill~~

A. An operator of a new solid waste landfill shall register the solid waste landfill with the Department on a form approved by the Department.

B. An existing solid waste landfill~~, except those described in subsection (C),~~ shall pay an annual registration fee within 30 days of receipt of an invoice from the Department according to the following:
1. For ~~municipal~~ solid waste landfills that received less than ~~12,000~~ 60,000 tons during the defined time period, ~~$1,250~~ $5,000.
2. For ~~municipal~~ solid waste landfills that received at least ~~12,000~~ 60,000 tons but less than ~~60,000~~ 225,000 tons during the defined time period, ~~$2,500~~ $10,000.
3. For ~~municipal~~ solid waste landfills that received ~~at least 60,000 tons but less than~~ 225,000 tons or more during the defined time period, ~~$7,500~~ $18,565.
~~4. For municipal solid waste landfills that received 225,000 tons or more during the defined time period, $12,500.~~
~~5. Non-municipal solid waste landfills shall pay a flat fee of $3,750.~~
~~6. Solid waste landfills that are closed to the public and that accept nonhazardous waste only shall pay a flat fee of $3,750.~~

~~**B.**~~ **C.** The Department shall determine the amount of waste received by a ~~municipal~~ solid waste landfill by one of the following methods:
~~1. For a municipal solid waste landfill that accepted waste over the entire defined time period:~~

~~a.~~ 1. As the reported tons of solid waste received on the disposal fee ~~invoice~~ invoices over the defined time period; or

~~b.~~ 2. As the reported units of compacted or uncompacted solid waste received on the disposal fee ~~invoice~~ invoices and reported under ~~A.R.S. § 49-836(A)(1); or~~ R18-13-2104 over the defined time period.

~~2. For a municipal solid waste landfill that accepted waste for only a portion of the defined time period, but no less than a full quarter, the Department shall project the total amount of waste that would have been received by the landfill over the entire defined time period, using one of the following methods:~~

~~a. For a municipal solid waste landfill that reported receiving waste for at least a full three quarters but less than the entire defined period, the amount of waste for the remaining quarter is the total amount of the waste reported for the full three quarters divided by three;~~

~~b. For a municipal solid waste landfill that reported receiving waste for at least a full two quarters but less than three quarters, the amount of waste for the remaining two quarters is the same as the total amount of waste reported for the two full quarters; or~~

~~c. For a municipal solid waste landfill that reported receiving waste for at least one full quarter but less than two quarters, the amount of waste for the remaining three quarters is the total of the amount of the waste reported for the full quarter multiplied by three.~~

~~**C.** For a municipal solid waste landfill that accepted waste for less than a full quarter, the annual landfill registration fee is $1,250.~~

D. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.

2. Round the result from subsection (C)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-2103. ~~Annual Landfill Registration: Due Date and Fees~~ Landfill Closure and Post-Closure Care Obligations; Fees

~~**A.** An operator of a new solid waste landfill shall register the solid waste landfill and pay the landfill registration fee as follows:~~

~~1. The operator shall pay the initial landfill registration fee within 30 days of the date that the Department approves the facility plan. The initial landfill registration fee is $1,250.~~

~~2. Registration is valid for one year, except if the landfill is initially registered during October, November, or December of a calendar year, the next landfill registration due date is December 31 of the following calendar year and each calendar year thereafter unless released from the annual landfill registration requirement as specified in subsection (C).~~

~~3. The annual registration fee remains $1,250 until the first annual registration period after the first full quarter of the defined time period.~~

~~B.~~ A. ~~After the first full quarter, the Department shall calculate the annual registration fee according to R18-13-2102, and specify the fee on the Department's annual landfill registration invoice for the solid waste landfill.~~ The Department shall calculate and the solid waste landfill shall pay the annual landfill registration fee until the first ~~registration~~ defined time period after the solid waste landfill stops accepting waste ~~during a fiscal quarter of the defined time period~~.

~~C.~~ B. From the time a solid waste landfill stops accepting waste as specified in subsection ~~(B)~~ (A), until the owner or operator of the solid waste landfill ~~is released from its obligation to provide financial assurance for closure~~ has completed closure and is released from its obligation for post-closure care as required by A.R.S. §§ 49-761 or 49-770, the annual registration fee is ~~$1,250~~ $3,500.

C. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (B) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (C)(1) to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

R18-13-2104. Solid Waste Landfill Disposal Fee; Exemptions

A. The operator of a solid waste landfill shall pay to the Department the disposal fee required by A.R.S. § 49-836 as follows:

1. $.58 for each six cubic yards of uncompacted solid waste;
2. $.58 for each three cubic yards of compacted solid waste; or
3. $.58 per ton of solid waste.

B. A solid waste landfill that receives only waste generated on site shall compute the fee in subsection (A) of this Section by one of the following methods:

1. By actual volume or weight; or
2. By estimate based on landfill capacity use, volume or number of waste loads or any other reasonable means for approximating the volume or weight of disposed waste.

C. Facilities that generate recycling residue shall pay the disposal fee required by A.R.S. § 49-836 as follows, to an annual maximum of $34,942.20, for on-site disposal:

1. $.29 for the dry weight or volume of the recycling residue generated; or
2. $.29 for the dewatered weight or volume of the recycling residue generated.

D. A person who for a fee disposes of waste in a solid waste landfill that is not regulated by the Department shall keep accurate records of the waste disposed of in those landfills and shall pay to the Department the disposal fee as prescribed in subsection (A) of this Section.

E. The operator of a local public facility that does not have on-site operators or scales shall pay to the Department a fee that shall be calculated by multiplying the population of the political subdivision served by the local public facility by $.16.

F. A person who is subject to fees under this Section shall sign and submit a form prepared by the Department with each fee payment. The form shall state the total volume or weight of solid waste disposed of at that landfill during the payment period.

G. The following are exempt from the requirements of this Section:

1. Persons disposing of a load containing less than six cubic yards of uncompacted solid waste or three cubic yards of compacted solid waste.
2. A site used solely for the reclamation of land through the introduction of landscaping rubble or inert material.
3. Material produced in connection with a mining or metallurgical operation.

ARTICLE 22. NEW TIRE SELLERS

R18-13-2201. Definitions

A. "Motor vehicle" means any automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination or other vehicle operated on the roads of this state, used to transport persons or property and propelled by power other than muscular power, but motor vehicle does not include traction engines, vehicles that run only on a track, bicycles or mopeds.

B. "Tire seller" means a retail seller of motor vehicle tires or a wholesale seller of motor vehicle tires who sells tires to the state, to a political subdivision of the state, or to a private entity not for resale, and includes a person whose retail sales of new motor vehicle tires are not in the ordinary course of business.

R18-13-2202. New Tire Sellers; Fee

A. Beginning April 1, 2025, a tire seller of new motor vehicle tires shall collect a fee of 2% of the retail sales price, not including transaction privilege tax, of each tire to a maximum of $4.66 per tire. For the sale of a new motor vehicle with a gross weight of under 10,000 pounds by a manufacturer to a wholesaler or retailer, if the sales price of the tires is not specified by the manufacturer, the tire seller shall collect a fee of $2.33 per tire.

B. A seller required to collect a fee under subsection (A) of this Section may credit $.10 per tire against the fee for expenses incurred by the seller for accounting and reporting related to the fee.

C. A seller who collects a fee under subsection (A) of this Section shall remit the fee to the Arizona Department of Revenue for deposit on a quarterly basis in the waste tire fund established pursuant to section A.R.S. § 44-1305.

D. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (A) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:

1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at www.bls.gov/cpi/regional-resources.htm, for October of that year.
2. Round the result from subsection (D)(1) to the nearest cent. ADEQ shall notify the Arizona Department of Revenue of the adjusted fee amounts and post the new amounts on its webpage as soon as practicable.

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY

SOLID WASTE MANAGEMENT

Economic, Small Business, and Consumer Impact Statement

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

Identification of the rulemaking: This rulemaking makes a number of changes to 18 A.A.C. 13, Solid Waste Management, including amendments to Articles 5, 7, 8, 11, 12, 13, 14, 16, and 21; amending Sections R18-13-501, R18-13-702, R18-13-801, R18-13-1103, R18-13-1211, R18-13-1212, R18-13-1307, R18-13-1409, R18-13-1410, R18-13-1606, R18-13-2102, and R18-13-2103, and their respective tables. Additionally, this rulemaking establishes new articles and sections, including Articles 4, 19, 20, and 22 and their respective sections, and new sections in existing Articles, including R18-13-1212.01, R18-13-1306, and R18-13-2104. The purpose of these changes is to both adjust existing fees and establish new fees throughout Solid Waste Management. This rulemaking also establishes in rule fees that currently only exist in statute.

Fees under this rulemaking can be categorized into two broad groups. One group being current fees paid by waste facilities and licensees that would be subject to an adjustment under this rulemaking. These facilities and licensees include publicly and privately-owned landfills, used and waste tire facilities, self-certification transfer facilities, biohazardous medical waste transporters, septage haulers, and special waste facilities that receive shredder residue and petroleum contaminated soil (PCS). The second group of fees are those established under this rulemaking. Facilities and entities subject to a new fee include transfer facilities subject to best management practices, used oil handlers, medical waste facilities that are permitted for storage or treatment, facilities generating or transporting special waste, landfills that enter into post-closure care, and collection and recycling facilities accepting lead acid batteries.

These rule changes are intended to collect fees to ensure the financial stability of Solid Waste Management programs, not to change the conduct of any regulated facilities or entities. The last time ADEQ undertook any substantive review and adjustments of fees within Solid Waste Management was in 2012. While fees established in 2012 represented a critical step towards the goal of full program

sufficiency and stability, further work is necessary to realize this goal. Indeed, to date only half of all regulated facilities under Solid Waste Management are subject to fees for registration, inspection, and oversight notwithstanding ongoing statutory mandates.

Experience over the last several years has demonstrated the need for a comprehensive approach to fees throughout Solid Waste Management, one that promotes equal cost distribution amongst all regulated facilities and entities and ensures the financial health of Solid Waste Management as a whole for the effective and efficient carrying out of the Program's mission.

ADEQ's goal in this rulemaking is to adjust and establish fees throughout Solid Waste Management that will sustain critical programs while avoiding disproportionate impact on any one group of stakeholders or regulated entities. Currently, ADEQ's annual costs to administer all solid waste programs are estimated to total \$3.5 million per year. However, current annual registration fee revenue is estimated at roughly \$500,000. Other revenue sources include the 3.5% of the Waste Tire Fund allocated to the Solid Waste Fee Fund based upon the number of tires sold and the special waste tonnage tipping fee based upon the amount of special waste disposed within the state. While variable, these other revenue sources are critical, representing approximately half of revenues into the Solid Waste Fee Fund. ADEQ continues to operate with total revenues that are insufficient to cover costs. The adjusted and newly established fees in this rulemaking are now projected to contribute and ultimately result in approximately \$2.1 million in additional fee revenue for the Solid Waste Fee Fund.

<u>Regulatory Objective:</u> The Waste Program Division within ADEQ preserves and protects public health and the environment by reducing the risk associated with waste management, contaminated sites, and regulated substances. To fulfill this objective, ADEQ carries out a number of Agency functions corresponding to regulatory and oversight activities for the approximately 2,000 different facilities and entities that fall under Solid Waste Program (SWP) regulation, including: administrative operations; inspections, including pre- and post-inspection activity encompassing historic data and permit review, case closure, and necessary filing; permitting and licensing; public records management; complaint response; and compliance assistance. It is critical that ADEQ has the ability to fully perform all necessary Agency functions to continue to carry out its mission to ensure the continued health of our solid waste ecosystem.

<u>Least Burden and Cost:</u> A.R.S. § 41-1052(D)(3) requires ADEQ to demonstrate it has selected the alternative with the least burden and cost necessary to achieve the underlying regulatory objective. Similarly, pursuant to A.R.S. § 49-104(B)(17), ADEQ is charged with ensuring all fees "be fairly assessed

and impose the least burden and cost to the parties subject to the fees" based upon an evaluation of "the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses." This statutory mandate is reinforced by HB2367, which states in Section 17, Legislative Intent, that fees established pursuant to the bill be based upon "direct and indirect costs associated with the type of activity or facility that is assessed a fee."

In the context of this solid waste fees rule, ADEQ has interpreted this requirement to mean collecting fee amounts necessary to ensure a self-funded and sustainable SWP to satisfy ADEQ's detailed requirements to protect and enhance public health and the environment as specified in A.R.S. Title 49, Chapter 4, Solid Waste Management.

Based on ADEQ's interpretation of the statutory mandate that the rule impose the least burden and cost, ADEQ evaluated costs for regulating each type of facility and entity and set fees accordingly. ADEQ continued throughout the rulemaking process to adjust the fee proposal to impose the least burden and cost while still ensuring overall fee levels necessary to ensure a self-funded and sustainable SWP. Examples include:

- Establishing separate registration fee amounts in R18-13-1103 for septage haulers based on whether ADEQ is tasked with conducting annual inspections or such inspections are handled by counties to be reflective of actual costs to ADEQ.
- Setting an annual registration fee in R18-13-1410 specifically for biohazardous medical waste transfer facilities to ensure fees are commensurate with ADEQ's related regulatory costs and corresponds to other transfer facility fees.
- Leaving initial fees for solid waste plan review at their current levels in R18-13-702 to improve clarity and ease of initial application for facilities subject to plan review while still ensuring necessary cash flow to ADEQ to facilitate commencing facility plan reviews.
- Adjusting the annual registration fee for the largest class of landfills, those that annually receive 225,000 or more tons of waste, by the regional CPI instead of the initial, higher annual registration fee proposed in the NPRM.
- Changing the first annual registration fee of increased fees so that payment of the fee will occur over two invoices as well as delaying payment of new annual registration fees and first quarter landfill disposal and special waste tonnage until July 2025 to correspond with the fiscal year. Following any initial invoicing or other change for the first year of implementation, billing for

facilities and entities will return to a single invoice for all new and adjusted annual registration fees for the calendar year billing cycle in January 2026.

- Setting back the annual CPI adjustment to July instead of January, coinciding with the fiscal year. This affords stakeholders more time in preparing budgets aligned with the fiscal year.
- Setting an annual cap of 4% on the CPI adjustment of the fee amount of the preceding year. This CPI cap will promote stability and predictability year-on-year for stakeholders during budgeting and cost forecasting.

Fairly Assessed: To ensure the fees adjusted and established under this rulemaking be fairly assessed against each member of the regulated community subject to them, ADEQ conducted extensive stakeholder engagement, including three rounds of stakeholder meetings to present all proposed fee levels, explain the basis for the fees, provide detail on the need for and methodology of the annual CPI adjustments, and present rule language. ADEQ was able to solicit productive feedback from the regulated community. This feedback guided ADEQ in assessing and adjusting proposed fee levels and implementation to impose the least burden on members of the regulated community to the fullest extent possible.

In addition to engagement with and feedback from the regulated community, ADEQ reviewed costs associated with Agency functions in carrying out regulated activities, with costs identified and distinguished by facility type. Based upon these costs, ADEQ employed the fee methodology discussed in Part 7 of the Preamble, "Explanation of Fee Methodology", that set fees for each class of facility or entity.

Implementation Schedule: In furtherance of ADEQ's goal to ensure the proposed fees impose the least burden and cost, ADEQ evaluated the feasibility of an implementation schedule that balances the fiscal health of SWP and the budget constraints of the regulated community subject to the fees. Currently, ADEQ sends out invoices for registration fees to correspond with the calendar year. However, a recurring point of discussion throughout the rulemaking process was the concern of implementing a new fee or fee increase in the middle of the fiscal year for many counties, municipalities, and other political subdivisions. As such, while the rule and fees would become effective as of January 2025, fees will be implemented pursuant to a schedule for CY2025 to accommodate the fiscal needs of counties, municipalities, and other political sub-divisions.

This implementation schedule is discussed in greater detail and presented in a series of tables in Part 7 of the Preamble, "Implementation Schedule".

Identification of the persons who will be directly affected by, bear the costs of, or directly benefit from the proposed rulemaking: Stakeholders directly affected by this rulemaking include all 15 counties within the state, local municipalities, and the approximately 2,000 solid waste facilities and entities with different media types subject to ADEQ regulatory compliance and oversight under Solid Waste Management, as well as the general public. These facilities may be categorized as government and privately owned. Approximately 13% of all solid waste facilities and entities are owned by a political subdivision of the state, with the remaining being privately owned and operated, ranging from individual licensees to large, multistate businesses. These facilities and entities include solid waste transfer facilities of varying size and sophistication, from rural drop-site locations to city facilities, septage hauler licensees, waste tire sites, off-site facilities registered for the treatment, storage, or disposal of auto-shredder residue, special waste transporters and generators, biohazardous medical waste transport companies, used oil handlers and collectors, facilities accepting lead acid batteries for collection or recycling, and both public and privately-owned landfills.

These facilities and entities are discussed in greater detail in the "Cost/Benefit Analysis" to follow.

Cost/Benefit Analysis: The estimated total impact for this rule is $12 million, which is the approximate total amount of increased fees proposed across all programs. This estimated impact is subject to annual adjustment pursuant to the proposed regional CPI adjustment. Approximately $1.8 million in increased fees would be collected pursuant to the proposed new and adjusted fees, including the special waste tonnage tipping fee, for regulated facilities and entities to be deposited into the Solid Waste Fee Fund. $6.7 million of increased fees would be collected through the fee on the sale of new tires as incorporated, with this cost borne by sellers and purchasers of new tires throughout the state. Of this $6.7 million, 3.5% or approximately $237,000 would be deposited to the Solid Waste Fee Fund pursuant to A.R.S. § 44-1305(B)(1), resulting in the total proposed increased revenues to the Solid Waste Fee Fund of approximately $2.1 million. The remaining revenues from the fee on the sale of new tires are apportioned to the counties as provided in law. Finally, approximately $3.5 million in increased fees would be collected pursuant to the landfill disposal fee as incorporated to be deposited into the Recycling Fund pursuant to A.R.S. § 49-836.

ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs, as discussed in further detail below.

Probable benefits include:

- Allow the Recycling Fund to be more fully utilized for its intended purpose. Since the loss of General Fund revenues and the establishment of the fee-based program model in 2012, it has been necessary to expend from the Recycling Fund to cover management of solid waste regulatory programs. By ensuring full cost-recovery and program funding through this proposed rulemaking, expenditures from the Recycling Fund to cover solid waste management may be addressed, allowing appropriations under the Recycling Fund to be used for the stated purpose of that fund. ADEQ is committed to expenditures from the Recycling Fund being used for the stated purpose of grants and contracts for "research, demonstration projects, new technologies, market development and source reduction studies and implementation of the recommendations or reports prepared." *See* A.R.S. § 49-837(B)(1).
- Minimize public health risks from solid waste activities. Fee levels ensuring full cost-recovery to ADEQ for regulatory activities and program stability are critical to allow ADEQ to adequately perform all its duties relating to its mission to enhance public health and the environment, including inspections, monitoring, public education, compliance, and permitting.
- Ability to address the obligations cited in the 2021 Auditor General's Report. The Auditor General's September 2021 Performance Audit and Sunset Review Report noted ADEQ has not yet adopted all statutorily required rules. Specifically, the Report notes A.R.S. § 49-761 requires the Department to adopt various rules for solid waste facilities, such as requirements for storing, processing, treating, and disposing of solid waste; best management practices for these facilities; and financial assurance requirements for facility closure. The Report ultimately recommends such rules should be adopted as required by statute. By ensuring appropriate funding levels and future programs security, ADEQ will be better positioned to undertake further rulemakings to address this recommendation of the Auditor General.
- Ability to address regulatory vacuum to protect public health and the environment as well as promote business development. With adequate and sustainable funding, SWP may increase inspection and enforcement activities to address and mitigate any regulatory vacuum within the solid waste universe. A greater ability to engage in regulatory activities provides a stronger deterrence to behavior that is harmful to the environment and public health, mitigates any unlevel playing field between competing facilities, and provides certainty for prospective business in estimating and planning for standards and operation requirements that must be adhered to.
- Ensure fee revenues continue to match increasing costs to ADEQ through regional CPI adjustment. The annual adjustments in the proposed rule will allow SWP to maintain fee levels commensurate with rising costs due to inflation to facilitate cost-recovery year over year and continued program stability.

This cost/benefit analysis includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(3):

- Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to ADEQ by the implementation of this rule include ensuring that SWP becomes sustainable, secure, and self-sufficient as a fully fee-based program. Additionally, benefits include allowing the Recycling Fund to be more fully utilized for its intended purpose, minimizing public health risks from solid waste activities, allowing ADEQ to address obligations cited in the 2021 Auditor General's Report, and to maintain fee levels commensurate with rising costs due to inflation to facilitate cost-recovery year on year and continued program stability. Probable benefits to ADEQ are discussed in greater detail in Part 7 of the Preamble. A probable cost to ADEQ in the implementation of this rulemaking is the administrative costs associated with administering these fees, including in accordance with the proposed implementation schedule and updating the fees annually pursuant to the regional CPI adjustment. No new full-time employees are necessary to implement or enforce this rule.

  The Arizona Department of Revenue is charged with the collection of the new tire sales fee, 2% of the sale price of a new tire capped at $2.00, pursuant to A.R.S. § 44-1302. This rulemaking incorporates this existing fee into rule at R18-13-2202, with an adjustment to the fee cap based upon CPI as well as a continuing annual regional CPI adjustment to the cap. As such, it will be necessary for the Department of Revenue to update each year the quarterly Motor Vehicle Waste Tire Fee return form to reflect the new fee cap. This will present a new administrative cost to the Department of Revenue in the timely updating and dissemination of the return form.

  Probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking: probable benefits to political subdivisions by the implementation of this rule include the increased fee revenues of approximately $6.5 million apportioned to the counties based on registered motor vehicles for the administration of each county's waste tire program pursuant to the incorporation and adjustment of the new tire sales fee. ADEQ has heard that costs for running these waste tire programs have increased, creating additional strains on counties attempting to fully administer their respective programs as required by A.R.S. § 44-1305. Increased fee revenues to be apportioned to the county waste tire programs will provide more money for each county to administer its required waste tire program. Additionally, increased fee revenues ensuring overall program health and

self-sufficiency for SWP will strengthen the capacity for ADEQ to partner with counties and other political subdivisions to address key waste issues, such as wildcat, or illegal, dumping of waste, including increased enforcement activity and clean-up efforts.

Probable costs to political subdivisions from the implementation of this rule are the increased and new fees each political subdivision will be subject to for their county and municipal solid waste facilities and entities, as well as the increased landfill tonnage fees. Of the total approximately 2,000 solid waste facilities and entities regulated by ADEQ, the Agency estimates 13% are owned and operated by political subdivisions. This total includes approximately 26 active municipal landfills as well as 19 landfills currently in post-closure care.

Other facilities owned and operated by political subdivisions include:

- Used and waste tire sites. These include sites storing 100 or more used tires outdoors, as well as waste tire sites subject to self-certification and best management practices. Used and waste tire sites are often operated by and for counties under county waste tire collection programs. There are approximately 30 publicly operated used and waste tire sites.
- Transfer facilities subject to both self-certification and best management practices. To note, exempted from the definition of transfer facilities for purposes of registration fees are material recovery facilities where the incoming materials are primarily source separated recyclables and community or neighborhood recycling bins including drop boxes, roll off containers, plastic containers used to collect residential, business, or governmental recyclable solid waste. There are approximately 80 publicly operated transfer facilities maintained by counties and municipalities throughout the state.
- Septage haulers. While the majority of licensed septage hauler vehicles are privately owned and operated, some political subdivisions maintain licensed septage vehicles for purposes of sanitation and public departments. There are approximately 40 septage hauler licensed vehicles maintained by political subdivisions.
- Collection or recycling facility that accepts lead-acid batteries. Counties and municipalities often maintain registered household hazardous waste sites that accept lead-acid batteries. There are approximately 30 such registered facilities throughout the state.

- Probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking: With fees resulting in a fully-funded SWP, ADEQ may engage in greater compliance assistance for regulated facilities and entities. Further, ADEQ will have more resources to facilitate more expeditious permit review, both for new permits and renewals. This will allow permit applicants to begin facility operations sooner, mitigating administrative burdens associated with permit review time and allowing for faster business development, while still maintaining high regulatory standards for facilities and solid waste operations to ensure the protection of human health and the environment.

  Further, a fully-funded SWP will provide ADEQ with the resources needed to engage in greater oversight and compliance, ensuring a more level playing field between regulated businesses and entities. With greater enforcement and oversight, ADEQ may better identify and address pollution, spills, and failures to meet regulatory requirements. This further promotes adherence to regulation amongst all facilities, mitigating the harm to those facilities and entities that must compete with and operate in the same regulatory space as those facilities and entities that may fail to adhere to minimum standards. Additionally, SWP may engage in more robust partnership with the regulated community through activities and programs designed to promote compliance and assistance. Increased program funding and stability can result in greater collaboration with the regulated community, including greater engagement by SWP sections in outreach that help facilities understand and comply with applicable regulations.

  Probable costs to businesses directly affected by the rulemaking include the new or increased fees privately-owned solid waste facilities and entities will be subject to, as well as increased landfill tonnage and special waste tonnage fees.

  There are approximately 27 active landfills and 7 landfills in post-closure care that are privately owned and operated subject to regulation by ADEQ.

  Privately-owned regulated facilities and entities also include those described below:

  - Transfer facilities subject to self-certification or best management practices. These facilities are located throughout the state and range in size and sophistication. Self-certification transfer facilities are those that handle a daily throughput of more than 180 cubic yards of solid waste, while transfer facilities subject to best management practices are those that handle a daily throughput of 180 cubic yards or less of solid

waste. To note, mirroring public transfer facilities, exempted from the definition of transfer facilities for purposes of registration fees are material recovery facilities where the incoming materials are primarily source separated recyclables and community or neighborhood recycling bins including drop boxes, roll off containers, plastic containers used to collect residential, business, or governmental recyclable solid waste. There are approximately 80 privately-owned transfer facilities throughout the state.

- Used oil handlers. Used oil handlers are defined as used oil processors, burners, transporters, and marketers required to obtain an EPA identification number pursuant to 40 CFR 279. The majority of the used oil handlers are transporters and marketers, representing 85% of registered used oil handlers. Used oil transporters are anyone that collects or accepts used oil from regulated handlers and transports that used oil to another facility while used oil marketers are anyone who markets used oil or first claims that used oil meets the used oil fuel specifications. Common generators of used oil include car repair shops, service stations, quick lube shops, grocery stores, and facilities and entities involved in the metal working industry. There are approximately 230 used oil handlers throughout the state.
- Biohazardous medical waste (BMW) facilities and entities. BMW facilities and entities include BMW transporters, BMW treatment facilities, and BMW storage facilities. There are approximately 50 BMW transporters engaged in moving biohazardous medical waste, as defined in R18-13-1401(4), to an approved disposal facility. There are approximately 20 BMW treatment and storage facilities accepting biohazardous medical waste for proper treatment, storage, and disposal pursuant to regulation.
- Septage haulers. There are over 500 registered privately owned and operated septage hauler licenses throughout the state engaged in the transportation of sewage or human waste that is removed from septic tanks or other onsite wastewater treatment facilities.
- Special waste facilities. Special waste facilities include generators, transporters, and receiving facilities of special waste, defined as solid waste other than hazardous waste requiring special handling and management. Currently petroleum contaminated soils and auto-shredder fluff from shredding motor vehicles are designated special wastes in Arizona. There are approximately 80 special waste transporters, 70 special waste generators, and 16 special waste receiving facilities throughout the state engaged in the transportation, treatment, storage and disposal of special waste.

- Collection or recycling facility that accepts lead-acid batteries. There are approximately 200 registered facilities with ADEQ authorized for the collection and recycling of lead-acid batteries throughout the state.

For the reasons discussed above, ADEQ finds that the benefits associated with this rule change outweigh any foreseen or anticipated costs.

General description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the proposed rulemaking: ADEQ estimates this rulemaking will not have an impact on public or private employment.

Probable impact of the proposed rulemaking on small businesses: Arizona law defines "small business" for the purpose of this analysis as a "concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year." *See* A.R.S. § 41-1001(23). The probable impact on small businesses includes an analysis of the following elements pursuant to A.R.S. § 41-1055(B)(5):

- Identification of the small businesses subject to the rulemaking: ADEQ has reviewed its records of solid waste facilities subject to new or adjusted fees affected by this rule to determine which ones are small businesses. An important criterion is that the business must be independently owned and operated. Based on this review and applicable definition, it appears likely that many septage haulers are independently owned and operated and not likely to exceed the revenue and employee limits in the statutory definition of small business. Additionally, it appears likely that a number of used outdoor tire sites storing more than 100 used tires, biohazardous medical waste transporters, certain transfer facilities subject to best management practices, as well as certain used oil handlers would qualify as small businesses for purposes of this rulemaking and collection and recycling facilities accepting lead acid batteries.
- Administrative and other costs required for compliance with the proposed rulemaking: ADEQ does not anticipate appreciable administrative or other costs associated with compliance with the rulemaking. While this rule imposes a financial obligation corresponding with registration of certain facility types, compliance with the requirements of registration has long been a component of SWP. Registration under this rulemaking is administrative, with no additional substantive licensing or approval procedures or requirements compared to those that may already exist for regulated facilities.

- Reduction of Impact on Small Businesses: A.R.S. § 41-1035 requires state agencies to reduce the impact of a rulemaking on small businesses, if any of the following methods are legal and feasible in meeting the statutory objectives which are the basis of the rule making:

    1. Establish less stringent compliance or reporting requirements in the rule for small businesses.
    2. Establish less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses.
    3. Consolidate or simplify the rule's compliance or reporting requirements for small businesses.
    4. Establish performance standards for small businesses to replace design or operational standards in the rule.
    5. Exempt small businesses from any or all requirements of the rule.

The listed methods are not generally relevant to a rule establishing fees. *See* A.R.S. § 49-104(B)(17). However, in developing fee amounts for different categories of facilities and entities, ADEQ was guided by its statutory mandate that all fees be fairly assessed and impose the least burden and cost to the parties subject to the fees. Further, the implementation schedule discussed in greater detail in Part 7 of the Preamble was designed to impose the least burden possible on all facilities and entities subject to fees under this rule, including small businesses.

- Probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking: Adequate and sustainable funding for SWP further enables ADEQ to more fully perform its duties relating to its mission to enhance public health and the environment. Benefits to private persons and consumers includes greater enforcement and compliance activities that can be carried out by ADEQ. With adequate funding levels, SWP may conduct more regular inspections of regulated facilities and entities, leading to greater oversight, identification of violations, and corrective actions, resulting in greater minimization of public health risks from solid waste activities. Additionally, adequate funding for SWP will result in sustained and improved Agency response to citizen complaints. Robust engagement with the public is a critical component of ADEQ's mission. SWP receives approximately 80 solid waste complaints from the public annually. The ability to ensure that each complaint is efficiently and effectively fielded, managed, and resolved will be strengthened through adequate funding for SWP.

  Further benefits include greater public outreach and education efforts. For example, the Recycling Program educates and encourages Arizonans to reduce, reuse, recycle, and buy recycled products

as an alternative to solid waste disposal in landfills. The program assists communities and organizations in developing recycling programs, accessing markets for recycled materials, and educating people about the benefits of recycling. Providing information to the public regarding proper residential and commercial disposal of solid waste is another important component of ADEQ's mission.

Probable costs to private persons and consumers includes the increase in the fee cap on the sale of new tires. This rulemaking incorporates into rule the statutory new tire sale fee under A.R.S. § 44-1302 of 2% on the purchase price of each tire sold and raises the per tire cap from $2.00 to $4.66. This is anticipated to result in increased revenues of $6.7 million. This fee is to be collected by the seller of tires and vehicles and often operates as a passthrough fee to be borne by the consumer. The maximum increased cost an individual consumer may be subject to is $10.64 per vehicle purchase or $2.66 per tire replacement, assuming the purchase is of a four-wheel vehicle.

An additional probable cost to private persons and consumers is the potential for increased solid waste disposal costs due to the increase to the landfill disposal fee. The landfill disposal tonnage fee is often a passthrough to residential customers. With the landfill disposal fee being increased based on a CPI adjustment, landfills, both public and privately-owned, may elect to raise rates for residents and customers to offset this increase.

Probable effect on state revenues: ADEQ estimates that fees from this rulemaking will directly affect state revenues by increasing overall annual fee revenue generated across programs and funds by approximately $12 million. This estimate is subject to annual adjustment pursuant to the proposed regional CPI adjustment.

Description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking: This rulemaking is the least intrusive and costly means possible to achieve the same objectives. ADEQ engaged with stakeholders to explore methods to reduce the impact of new or increased fees, including among other outreach efforts three stakeholder meetings, and established an implementation schedule for the first calendar year of the fees to impose the least burden and cost, as discussed in detail in Part 7 of the Preamble.

Description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data: Any data or reasoning which this rulemaking is based on is identified

in the “Rule Scope and Explanation” portion of the Notice of Final Rulemaking located in Part 7. Generally, no new data was introduced or reviewed to make these rule changes.

Subject: 2014 HB367
To: SolidWastePermits@azdeq.gov <SolidWastePermits@azdeq.gov>

On behalf of Gila County District 3 Supervisor Woody Cline, I am providing the following statement:

I object to the proposed fees contained in the above referenced bill. This bill will place a financial burden on the county's landfills and that financial burden will be passed on to our constituents. We have worked diligently to combat blight on our public lands and this increase in fees will definitely have a negative effect on the progress that we have made.

Please reconsider the fee structure or extend the time for public comment. I can be reached at 928-402-4401 or by email at wcline@gilacountyaz.gov.

Karen Peters
Chief Executive Officer
Arizona Department of Environmental Quality
1110 W. Washington St., Suite 160
Phoenix, AZ 85007

Dear Mrs. Peters,

Thank you for the opportunity to participate in the Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. While observing the Stakeholder meetings on May 30, 2024, June 20, 2024, and July 18, 2024, we were informed by ADEQ of their intent to address a current budget shortfall of approximately two million dollars to operate the solid waste program. The City of Glendale shares the same budgetary constraints caused by the Arizona Legislature and we recognize the important role of ADEQ to ensure public health and protection of the environment and the need to properly fund those services. However, we have concerns with the proposed rule for the following reasons:

1. All proposed fee increases are significant, and many are well over 100% increases compared to the current fees. These substantial fee increases will impact not only landfill and transfer station operators but also the City of Glendale's residents and local businesses that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste. This is a significant challenge for the Glendale City Council and our community as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.

2. Another concern that we do not believe was mentioned is other municipal use of the City of Glendale's landfill. Currently, Glendale has Intergovernmental Agreements (IGAs) with the cities of Peoria, Goodyear and Avondale. Any increase in ADEQ fees are not reflected in current IGAs and will be absorbed by Glendale directly. Thus, once again, placing a financial burden on Glendale rate and taxpayers.

3. Any cost increase absorbed by the City that was not accounted for in IGAs or in our City budget will create additional constraints on the budget that has already been approved by the City Council, all while we are currently facing significant impacts to our budget from the State's reduction of the flat tax and repeal of the rental tax.

We understand that the current fees assessed by ADEQ may not be adequate to fund the department and the City of Glendale welcomes further discussions on ADEQ's desire to implement sustainable funding practices. We ask that ADEQ pause any plans to implement fee increases until July 1, 2025, to align with the Fiscal Year timeline and provide as much notification as possible to stakeholders for their budget planning. For these reasons, the City of Glendale respectfully requests ADEQ to pause the rulemaking process and adjust its approach to reduce the impacts on cities.

Respectfully,

Jamsheed Mehta
Assistant City Manager

RE: NWRA Arizona Chapter – Solid Waste Program Fees Update Feedback

Dear Ms. Riemenschneider,

I submit this letter to you today on behalf of the National Waste & Recycling Association's (NWRA) Arizona Chapter. We represent private solid waste companies offering waste collection, recycling, and disposal services to communities, local governments, commercial and residential customers throughout the state of Arizona. Since NWRA members are closely affected by HB 2367 and the solid waste fee rule changes, after careful evaluation, the chapter would appreciate consideration of the following comments:

- **Timeline**
  - We join in the comments of other agencies requesting a start date at the beginning of the next fiscal year with an implementation date of July 1, 2025.
  - The new rule should include a requirement for review of all fees every 5 years to ensure revenues are not exceeding program costs and to evaluate the necessity of continued CPI increases.
  - Update agency calendar reflecting the adoption of the new rule.

- **Funding**
  - Formalize rules for the Recycling Grant Program, ensuring ongoing funding and support for important waste diversion programs. This grant demonstrates the state's commitment to sustainability through equitable funding for recycling and waste reduction efforts.
  - Is there a proforma report projecting total revenues in this program and as a result of these increases and how they relate to program costs ensuring that the program is not over funded?

- **General**
  - Application of fees, if any, to closed landfills to ensure that post-closure plans are accurate. If none are applied, written statement in the Rules regarding absence of fee assessment to closed landfills.

The NWRA Arizona Chapter and its members appreciate the opportunity to comment on the proposed changes and would be happy to clarify any of the above-listed comments. We also request feedback on when/if submitted comments are available for review and if they will be available through the ADEQ website. Additionally, we would welcome continued engagement throughout this process, as we fully understand the impacts the fee and rule changes will have on collection and processing services throughout Arizona.

Sincerely,

Rachel Hering, NWRA
Vice President of Chapter Relations

September 18, 2024

Arizona Department of Environmental Quality
Waste Programs Division, Solid Waste
Attn: Matt Rippentrop
1110 W. Washington St
Phoenix, AZ 85007

Dear Mr. Rippentrop,

The City of Mesa has been participating in the Solid Waste Fee Rulemaking process and has reviewed the Notice of Proposed Rulemaking to update and establish solid waste fees throughout Arizona Administrative Code (A.A.C.) Title 18, Chapter 13, Solid Waste Management. As presented during the meetings, and in Notice of Proposed Rulemaking the fee rule is being designed to add new fees and increase existing fees for the purpose of generating revenue to cover the Arizona Department of Environmental Quality's (ADEQ) costs for administering the solid waste program. As a municipality, Mesa recognizes we have a shared value of protecting public health and the environment, while ensuring a clean and welcoming community for our residents and visitors. The City of Mesa offers the following comments on the proposed rule:

1. The new fees are proposed to be effective January of 2025, but these fees will not be billed until after July 1, 2025. ADEQ is proposing this billing delay in response to comments about aligning new fees with fiscal year calendars of impacted organizations. This approach will, however, require a substantially higher impact in fiscal year 2025, whereby expenses from both fiscal years will be assessed. The City of Mesa recommends the new fees be implemented starting July 1, 2025, rather than requiring these retroactive payments. This is particularly important for the increase to solid waste landfill disposal fees. The City of Mesa does appreciate the effort by ADEQ to better align the timing of these fees.

2. The Rulemaking proposes fee increases that are substantial. ADEQ estimates a total of $12 million in additional annual revenue. $6.7 million is revue generated from the sale of new tires in support of the waste tire program. The Notice of Proposed Rulemaking indicates that $2.4 million in new annual revenue will be placed into the Solid Waste Fee Fund and $3.5 million in new annual revenue will be placed in the Recycling Fund. Recognizing that annual tonnage fluctuates, total revenues deposited in the Recycling Fund are expected to exceed $6 million annually. That is 6 times higher than the $1 million in recycling program grants recently administered. Does ADEQ intend to increase the recycling grant program to award this larger sum of money, or will these funds be used for other operating expenses?

3. The Rulemaking proposes a perpetual consumer price index (CPI) increase each year after implementation. The City of Mesa opposes the inclusion of an ongoing CPI adjustment. As ADEQ experiences cost increases to provide services, it should retain the obligation to present these in future proposed rulemaking to ensure full stakeholder engagement and transparency. This is of

particular concern as it related to the solid waste disposal fee, which is deposited into the Recycling Fund. CPI adjustments to this fee do not correlate with increased expenses, rather it correlates with how large of a recycling grant program ADEQ intends to administer. Furthermore, the CPI, which includes an analysis of things such as housing, food, and energy prices – does not appear to be a reasonable approximation of ADEQ costs.

The City of Mesa appreciates the opportunity to participate in this process and share our concerns with you. If you have any additional questions or concerns, please do not hesitate to contact me via email at sheri.collins@mesaaz.gov or by telephone at 480-644-3144.

Respectfully,

Sheri Collins

Sheri Collins
City of Mesa Solid Waste Director

September 17, 2024

Mrs. Karen Peters
Deputy Director
Arizona Department of Environmental Quality
1110 West Washington Street, Suite 160
Phoenix, Arizona 85007

Dear Mrs. Peters,

On July 23, 2024, the City of Phoenix (Phoenix) submitted a letter to you regarding the concerns verbally communicated by Phoenix and other stakeholders during ADEQ's July 18 stakeholder meeting on the proposed solid waste fee increases. Despite the comments shared during the stakeholder meeting and subsequent letter, ADEQ moved forward with the formal rulemaking. Like the stakeholder meetings on May 30, June 20, and July 18, the Notice of Proposed Rulemaking posted on August 16, 2024, contains new information that stakeholders must evaluate and respond to within a quick turnaround. Additionally, this is the first-time stakeholders can review the complete proposed rule language. Although Phoenix recognizes the important role of ADEQ in ensuring public health and protection of the environment and the need to properly fund those services, Phoenix urges ADEQ to resolve the following issues with the proposed rule before it is finalized and becomes effective.

Implementation Schedule

In the proposed rule, ADEQ acknowledged stakeholder concerns on the proposed timeline to implement the new fees beginning January 1, 2025, which was communicated during the stakeholder meetings. To address this, ADEQ is proposing that the new fees be implemented on January 1, 2025, but would provide a one-time adjustment to the timing of invoicing with some of the new fees until July 1, 2025. After this one-time adjustment, the invoices would revert back to calendar year billing cycles with the implementation of the proposed perpetual CPI increases beginning January 1, 2026. Given the ongoing budget impact on cities and counties with annual CPI increases, Phoenix urges ADEQ to make the Fiscal Year billing cycle permanent with invoicing after July 1, 2025.

Perpetual CPI Increase

Despite stakeholder concerns communicated during the July 18 stakeholder meeting, the perpetual annual CPI increases on the fees after the initial proposed increases remain in the proposed rule. Furthermore, the rule allows for the CPI adjustments to fluctuate significantly based on the inflation and deflation market conditions, making it difficult for cities, counties, and ADEQ to plan our budgets accordingly. Additionally, there are no transparency requirements for ADEQ to provide ongoing justification to stakeholders for the need to continue CPI increases. To address these issues, Phoenix urges ADEQ to cap the CPI to a maximum of five years and a maximum of 5% per year. During each year the annual CPI is in place, Phoenix recommends annual financial reporting by ADEQ, including the annual revenues and expenditures in the solid waste and recycling funds and reassurances that the revenues only support the solid waste and recycling programs and no other state budget shortfalls. Before an extension of a CPI is considered beyond five years, a formal rulemaking process including stakeholder comment and formal justification for the need for a continued CPI is also requested. This recommended approach also aligns with the processes and transparency municipal and county solid waste utilities must follow with the reporting to their elected officials and residents.

Additional Clarifications Needed on Proposed Fee Increases

In addition to the transparency and reporting requested with the proposed CPI increases, additional clarification is also requested in the current notice of proposed rulemaking to better understand ADEQ's financial need for the fee increases. ADEQ communicates that the revenue from the recycling fund has been used to cover the ongoing budget shortfall in the solid waste fund and on page 2584, ADEQ states, "Currently regulatory costs across all solid waste programs for ADEQ are estimated to total $3.5M per year; however, current fees generated are estimated at roughly $500,000." Please clarify how much of the current generated fee revenue is in the recycling fund versus the solid waste fund and please provide the estimated revenue by fund with the proposed fee increases. Since ARS 49-836 stipulates the fee revenue that must be deposited in the recycle fund, this breakdown will help stakeholders compare the current and projected conditions of both the recycle and solid waste funds. Also, please clarify how the total contribution of the fee on the sale of new tires into the solid waste fee fund of $665,000 was derived. Having complete transparency of the current and projected solid waste and recycle funds is essential for stakeholders to understand how our current and projected fees will be used.

Landfills in Post-Closure Care

In the fee chart on page 2579, landfills in post-closure care are listed as having no current fee and a proposed annual fee of $3,500. This aligns with the statement on page 2584 "Those facilities and entities that would be subject to a new fee for the first time include landfills that enter into post-closure care". However, this is inconsistent with the strike-through language in R18-13-2103 on page 2598 that states the annual landfill registration is $1,250. Please provide clarification if the closed landfill fees are new or increases on existing fees.

Proposed Initial Fee Increases

Phoenix's budget is currently being significantly impacted by the State's reduction of the flat tax and the $90 million impact from the repeal of the rental tax. ADEQ's proposed fee increases are yet another impact on our budget imposed by the State. All of the proposed fee increases are significant, and many are well over 100% increases compared to the current fees. These fee increases combined will result in an estimated increase of 154% to Phoenix compared to the current solid waste fees we pay assuming a 5% CPI increase beginning FY25-26. These substantial fee increases will impact not only landfill and transfer station operators but also the cities, towns, counties, residents, local businesses, and customers that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste. This can present a challenge for cities and towns as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.

Given these impacts, Phoenix urges ADEQ to reconsider the approach with the proposed rule and adjust the implementation schedule, limit the subsequent CPI increases, provide ongoing and thorough transparency and justification for the fee increases, and provide assurances that the revenue from the fees will only be used for solid waste and recycling programs and never used to cover other State budget shortfalls. Phoenix opposes this rule as it is currently proposed and urges ADEQ to incorporate the recommendations outlined in this letter.

Respectfully,

Felipe Moreno

Karen Peters
Director
Arizona Department of Environmental Quality
1110 W. Washington St., Suite 160
Phoenix, AZ 85007

Dear Director Peters,

Thank you for the opportunity to participate in the Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. During the Stakeholder meetings on May 30, 2024, June 20, 2024, and July 18, 2024, ADEQ announced that the intent of the current rule-making process is to address a current budget shortfall of approximately two million dollars to operate the solid waste program.

Although City of Goodyear recognizes the important role of ADEQ to ensure public health and protection of the environment and the need to properly fund those services, we have concerns with the proposed rule for the following reasons.

1. All proposed fee increases are significant, and many are well over 100% increases compared to the current fees.
    - These substantial fee increases will impact not only landfill and transfer station operators but also the cities, towns, counties, residents, local businesses, and customers that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste.
    - This is a significant challenge for cities and towns as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.

2. The City of Goodyear is currently facing significant impacts to our budget from the State's reduction of the flat tax and repeal of the rental tax.

3. The City of Goodyear would appreciate assurances that the fees will support the solid waste fund and recycling grants and not be swept to cover other state budget shortfalls.

4. The City of Goodyear opposes the proposed perpetual inflationary (CPI) adjustments to the fees and recommends more frequent public rule-making processes to adjust future fees.

5. The City of Goodyear recommends that ADEQ update the implementation timeline to be no earlier than July 1, 2025.
    - This would help to align any fee increases with the City's fiscal year timeline and provide as much notification as possible to stakeholders for appropriate budget planning.

For these reasons, the City of Goodyear urges ADEQ to pause the rulemaking process and adjust its approach to reduce the impacts on cities. If you have any questions or require additional information, please contact me at my cell phone number (623) 687-8402 or email address sumeet.mohan@goodyearaz.gov.

Deputy Public Works Director

September 19, 2024

Matt Rippentrop
Program Manager, Solid Waste Fees Rulemaking Process
Arizona Department of Environmental Quality
1110 W. Washington Street
Phoenix, AZ 85007

Dear Mrs. Peters,

On behalf of the City of Tucson, enclosed please find our input and feedback on the 2024 Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. Similarly to your agency, we are also faced with budget shortfalls that have significant impacts on our solid waste operations and services.

The City of Tucson recognizes the role of ADEQ in protecting public health and the environment and the need to have the adequate resources to provide these services.

We respectfully submit for your review and consideration the following concerns:

1. The proposed fees are either new or significant in nature ranging in increases from 33% all the way up to 2,567% as compared to the current fees. These substantial fee increases will impact not only landfill, residents/rate payers, local businesses, and customers that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste. This is a significant challenge for the City of Tucson as service fee increases require advanced notification to residents and City Council approval.
2. The City of Tucson is and will continue to be significantly financially impacted by the State's reduction of the flat tax and repeal of the rental tax.
3. The City of Tucson understand the needs to adjust fees to cover the cost of service but also wants to ensure that these proposed fees be used to support the solid waste fund and recycling grants and not be used to cover other state general fund financial obligations.
4. The City of Tucson recommends that fees be reviewed and adjusted periodically using a cost-of-service model through a public rule-making processes and not by instituting a perpetual CPI adjustment.
5. The City of Tucson recommends that ADEQ update the implementation timeline aligns with most Arizona cities and towns fiscal year budgeting process.
6. The City of Tucson recommends that ADEQ consider the implementation of these proposed fees in phases, not only from the perspective of which fees need to be

adjusted first and other that may be implemented later, but also from a fee implementation schedule over a period of 3-5 years.

We thank you in advance for considering our concerns.

Respectfully Submitted,

Carlos A. De La Torre, P.E.
Director

County Supervisors Association of Arizona

September 20, 2024

Karen Peters
Cabinet Executive Officer
Arizona Department of Environmental Quality
1110 W. Washington St.
Phoenix, AZ 85007

Cabinet Executive Officer Peters,

The County Supervisors Association has appreciated its inclusion in the Department's stakeholder process relating to a potential increase in solid waste fees. Further, the Association – representing counties whose supervisors have long expressed concerns with unfunded statutory mandates – well understands the Department's need for revenues sufficient to fund mandated functions.

As counties play various roles in waste processes, the impacts of the proposed changes to rule on counties are multifaceted:

- The Association has received feedback from counties indicating support for additional funding for waste tire collection and disposal. Increasing the $2.00 cap on the waste tire fees – which produces revenues distributed to counties and the Department via a statutory mechanism - will further fund county obligations to collect and contract for the disposal of waste tires.
- Counties have noted that some of the projected fee increases, such as those for post-closure landfills, transfer stations, and tire yards, could cost county taxpayers tens of thousands of dollars and increase costs to local businesses. Further, counties have expressed concern that increased costs could incentivize illegal dumping.
- Finally, as the contemplated changes to fees are scheduled to become effective in January – and the county fiscal year runs from July 1st of one year to June 30th of the next - counties would not have adequate time to budget for these fees.

Taking the need to fund these services together with existing county budget processes, as well as the intended usage of fees as cost-recovery, the Association would respectfully request your consideration of the following:

- That notice of fee increases be sufficient to allow stakeholders to address costs in future budgets, and that fee increases align with existing budget timelines.
- That proposed increases are justified with cost estimates by the Department on an annual basis.

Thank you, again, for including our Association in your stakeholder process. We look forward to working with the Department on this, and other, issues.

Sincerely and respectfully,

Jacob Emnett
Legislative Director
County Supervisors Association

CITY OF CASA GRANDE | STRONGER UNITED

Public Works Department 3181 N. Lear Avenue, Casa Grande, Arizona 85122
www.CasaGrandeAZ.Gov

September 19, 2024

Matt Rippentrop
Arizona Department of Environmental Quality
1110 W. Washington St.
Phoenix, AZ 85007

Dear Mr. Rippentrop,

Thank you for the opportunity to participate in the Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. During the Stakeholder meetings on May 30, 2024, June 20, 2024, and July 18, 2024, ADEQ announced that the intent of the current rule-making process is to address a current budget shortfall of approximately two million dollars to operate the solid waste program. Although the City of Casa Grande recognizes the important role of ADEQ to ensure public health and protection of the environment and the need to properly fund those services, we have concerns with the proposed rule for the following reasons.

1. All proposed fee increases are significant, and many are well over 100% increases compared to the current fees. These substantial fee increases will impact not only landfill and transfer station operators but also the cities, towns, counties, residents, local businesses, and customers that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste. This is a significant challenge for cities and towns as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.
2. The City of Casa Grande would appreciate assurances that the fees will support the solid waste fund and recycling grants and not be swept to cover other state budget shortfalls.
3. The City of Casa Grande opposes the proposed perpetual CPI adjustments to the fees and recommends more frequent public rule-making processes to adjust future fees.
4. The City of Casa Grande recommends that ADEQ update the implementation timeline for July 1, 2025, to align with the Fiscal Year timeline and provide as much notification as possible to stakeholders for their budget planning.

For these reasons, the City of Casa Grande urges ADEQ to pause the rulemaking process and adjust its approach to reduce the impacts on cities.

Respectfully,

Ronald Rouse
Sanitation Superintendent
City of Casa Grande

Paul R. David - Graham Coiunty Board Of Supervisors Dist. 1

Graham County continues to be concerned with ADEQ's proposed solid waste fees, the accelerated implementation schedule as well as the consequences to public taxpayers. Our comments follow:

1. While HB2367 fully authorizes the ADEQ to unilaterally set fees without review by the legislature or the JLBC the rationale for raising both new permit, permit renewal and oversight across the board does not appear to be based on the cost to ADEQ of each activity but on the need to raise operational revenue. This "across the board" method while effective is not good practice.

2. This emergency legislation enacts fees on July 1, 2025 instead of July 2025. The timing imposes fees that Graham County and other government agencies haven't budgeted for.

3. By raising the per ton disposal cost of solid waste as well as permit fees for the haulers these costs will be borne ultimately by consumers. Our county as well as other rural counties and municipalities are already struggling with "wildcat dumping" to avoid landfill costs. This incremental increase will exacerbate the economics that create this problem.

4. Three of the existing proposed cost increases are more than 1000% with five at 100% or more. Of course fees on previously no cost permit activities cannot be quantified with percentages. I would request that ADEQ increase their costs incrementally over a period of years rather than immediately. This will ease the "sticker shock" by permittees and consumers. The timing of these sudden increases couldn't be worse as it occurs during a period of national, regional and local inflation.

Respectfully -Paul R. David

September 16, 2024

Karen Peters
Deputy Director
Arizona Department of Environmental Quality
1110 W. Washington St., Suite 160
Phoenix, AZ 85007

Karen,

On behalf of the League of Arizona Cities and Towns, I write to reiterate the concerns raised by our membership regarding the proposed solid waste rulemaking and increases to associated fees.

We understand and value the role that the Department of Environmental Quality has to protect the environment for the citizens of Arizona, and cities and towns often partner with the agency to successfully carry out its mission. We also understand sustainable funding and resources are needed to achieve your mission. However, we hope you will consider the extraordinary financial circumstances cities and towns are experiencing and understand the challenges they will face in absorbing in their limited budgets the large increases in fees proposed by the agency. Many of the proposed fees will increase by 100%, which not only will strain municipal budgets, but will impact the businesses and residents we serve. Additionally, adjusting fee increases to the Consumer Price Index will worsen the budgetary impact on municipalities and will make planning for future budgetary needs increasingly challenging.

Some of our impacted members offered suggestions in their public comments to mitigate these challenges. We feel that if these suggestions are included in the final rules, your agency will still achieve the goal of aligning fees to the actual costs to carry out its mission. This includes, among others, reducing the initial proposed fees, capping the CPI adjustments at five years with a 5% limitation, and aligning the invoicing cycles with the fiscal year.

We urge you to examine and incorporate these suggestions into the final rule so that all impacted stakeholders can successfully implement it without unintended consequences and negative budgetary impacts.

Sincerely,

C. Thomas Belshe

Karen Peters

Chief Executive Officer

Arizona Department of Environmental Quality

1110 W. Washington St., Suite 160

Phoenix, AZ 85007

Dear Mrs. Peters,

Thank you again for the opportunity to participate in the Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. Listed below are the concerns, requests, and questions I raised at today's public hearing and past stakeholder meetings on behalf of the 85,000 plus rate payers I report to:

1. The City of Scottsdale is currently facing significant impacts to our budget from the State's reduction of the flat tax and repeal of the rental tax.
2. The City of Scottsdale requests that the tonnage disposal fee supports the solid waste fund and recycling grants and not be swept to cover other state budget shortfalls.
3. The City of Scottsdale opposes the proposed perpetual CPI adjustments to the fees and recommends more frequent public rule-making processes to adjust future fees.
4. The City of Scottsdale requests that ADEQ implement the proposed rate increases on July 1, 2025. This will better align with our Fiscal Year 26 timeline and budget planning processes.
5. If ADEQ decides to move forward with the annual CPI adjustment, the City of Scottsdale asks that ADEQ provide the CPI adjustment percentage on or before January 1st, and the rate adjustments taking effect on July 1 of each year going forward.
6. Did the Solid Waste Management program FY 24/25 budget include revenue from the January 1 rate increases? If yes, what is the total amount of revenue the program is forecasted to receive?
7. If the goal of the Solid Waste Management program is to be a "fully self-funded program", why did they choose the method of an annual CPI adjustment to recover costs, rather than review the previous fiscal years actuals (revenue and expenses), and then seek the appropriate rate increases needed?
8. What will happen if this program is under or over recovering its costs through the annual CPI adjustment?

Respectfully,

Dave Bennett

Director of Solid Waste Services

City of Scottsdale – Public Works

Mailing Address: 9191 E San Salvador Drive. Scottsdale, AZ. 85258

Tank's Green Stuff

I formally protest the increase in fees for composting operations and construction waste landfills. Small composting operations are already struggling with the soaring cost of operating their facilities. Equipment, labor, and energy costs have skyrocketed over the past 4 years due to covid and breaks in the supply chain. Labor costs. Both construction waste recycling and composting facilities are very labor intensive and are already and having a very difficult time making a profit. Commodity prices for plastics, metals, and recycled wood waste have plummeted. To increase the annual fees is an insult to injury. If anything the fees should reduced in order to help these businesses recover from covid and the lack of available labor. Recycling/composting operations need more help from ADEQ not more financial pain.

Shaping a new tomorrow, today.

Matt Rippentrop
Arizona Department of Environmental Quality
1110 W. Washington St., Suite 160
Phoenix, AZ 85007

09/20/2024

Dear Mr Rippentrop,

Thank you for the opportunity to participate in the Arizona Department of Environmental Quality (ADEQ) Solid Waste Fee rulemaking process. During the Stakeholder meetings on May 30, 2024, June 20, 2024, and July 18, 2024, ADEQ announced that the intent of the current rule-making process is to address a current budget shortfall of approximately two million dollars to operate the solid waste program. Although the Town of Gilbert recognizes the important role of ADEQ to ensure public health and protection of the environment and the need to properly fund those services, we have concerns with the proposed rule for the following reasons.

1. All proposed fee increases are significant, and many are well over 100% increases compared to the current fees. These substantial fee increases will impact not only landfill and transfer station operators but also the cities, towns, counties, residents, local businesses, and customers that will experience increased direct and pass-through costs for proper collection and disposal of their solid waste. This is a significant challenge for cities and towns as service fee increases are politically sensitive, requiring advanced notification to residents and City Council approval.
2. The Town of Gilbert is currently facing significant impacts to our budget from the State's reduction of the flat tax and repeal of the rental tax.
3. The Town of Gilbert would appreciate assurances that the fees will support the solid waste fund and recycling grants and not be swept to cover other state budget shortfalls.
4. The Town of Gilbert opposes the proposed perpetual CPI adjustments to the fees and recommends more frequent public rule-making processes to adjust future fees.
    a. Should the CPI move to implementation, the Town of Gilbert proposes ADEQ share the regional CPI by January 1 of each year, with an effective date the following July 1 of each year.
5. The Town of Gilbert recommends that ADEQ update the implementation timeline for July 1, 2025, to align with the Fiscal Year timeline and provide as much notification as possible to stakeholders for their budget planning.

For these reasons, the Town of Gilbert urges ADEQ to pause the rulemaking process and adjust its approach to reduce the impacts on cities.

0:05
Hello everyone, and thank you for attending today's public hearing for Solid Waste Fees Rulemaking.

0:11
My name is Angela Kane.

0:12
I'm a Community Outreach Coordinator here at ADEQ.

0:15
We're going to give it just a couple of minutes to make sure everybody can have time to get into the hearing.

0:26
And if you're having any troubles either seeing what's up on the screen, the presentation slides, or hearing the speaker, we recommend that you log out, power cycle your device, and log back in.

1:12
All right, looks like we still have some people joining us, so we're going to give it just one more minute.

1:43
All right, looks like we still have a few more coming in, but it is 2.32, so I am actually going to hand this over to Mark Lewandowski.

1:58
The recording is on, so good afternoon, everyone, and welcome to this hearing, also called an proceeding on ADEQ's proposed rule for solid waste fees to update solid waste fees. I'm Mark Lewandowski.

2:14
I've been appointed by the director to preside at this hearing as I have been from time to time.

2:20
The time is 2.32 Arizona time.

2:27
The hearing is being held pursuant to Arizona Revised Statute, Section 41-1023, and it's being held virtually only through a go-to webinar, a software application, and as I mentioned, it's being recorded.

2:45
This hearing was publicized in the August 16, 2024, Arizona Administrative Register separately on the ADEQ website.

2:56
ADEQ also held three public stakeholder meetings to discuss solid waste fees and outlined the plans for this rule.

3:05
There's a number of ADEQ employees that are attending this and will be able to answer questions as we get into that part of this oral proceeding.

3:17
Samantha Robert is manager for waste programs, hazardous and solid waste section.

3:24
Robin Thomas, senior engineer. Terry Bayer, the senior scientist in that section.

3:32
Angela Kane, our community outreach coordinator.

3:36
Matt Rippentrop is one of the waste program attorneys who is the main contact for this rule and who helps us with the administrative rule process.

3:45
And Also here is Julie Reimann-Schneider, who is the Director of the Waste Programs Division.

3:52
Under that statutory section that I mentioned, 41.1023, the purposes of this oral proceeding are to provide the public an opportunity to hear about the substance of the proposed solid waste fees rule, to ask any questions about the proposed rule, and to present oral argument, data and views regarding the proposed rule in the form of oral comments on the records. So how do you do that?

4:22
Go-to webinar is not my specialty at all so I have asked outreach coordinator Angela Kane to explain how you can do that and also to help us out as we go through this hearing.

4:35
So Angela you can show the slide and explain. All right thank you Mark.

4:43
So if you're not sure how to use the control panel we're going to go through that really quickly.

4:47
Your control panel should be located on the right hand side of your screen.

4:51
If you're not seeing it click on this little orange or red arrow and that should either open or close your control panel.

5:01
Please stay muted while in this meeting and while speaking.

5:05
And if you would like to put questions in the question tool, feel free to do that as they

come to you.

5:11
There will be instructions that follow on when to do that. And to note again, this hearing is being recorded.

5:19
And also you're going to need to make sure you know where that little button is to raise your hand. It is also located here on the control panel.

5:28
So, okay, with that I'm going to hand this back over to Mark.

5:45
Oh, Mark, we don't have your audio.

5:56
I'm learning how to use that control panel on the side of the screen as well.

6:01
You can see the agenda on your screen.

6:04
This hearing is organized.

6:05
Two ways to get your comment on the record.

6:09
And you can't really see that from this screen, but I want to emphasize there's two ways to get your comment on the record.

6:15
Number one is orally today.

6:16
and number two is in writing before 5 p.m. tomorrow.

6:21
So no matter what happens today you always have an email tomorrow.

6:26
So today we're going to have questions regarding the proposed rule before we have the opportunity to comment on the record and before either of those there's going to be a presentation of the proposed rule which may help you with your questions.

6:44
So orally or written comments or email.

6:49
Just to note how to make sure your oral comment today is on the records, I'm going to very plainly announce when that time for oral comments on the record starts.

7:02

After the presentation of the proposed rule, there'll be that question and answer period.

7:07
Many things that happen in the question and answer period are not easily identifiable as a formal comment on the rule.

7:13
so that's one of the reasons we have this separate part of the hearing.

7:19
So even if you think you've made a comment in the questions and answers sheet which it's suggested, you make sure you include that in your oral comment or at least in writing.

7:29
Also when you make an oral comment today, please try to state your name and who you're with at the start.

7:38
ADEQ is required by law to answer or to consider all comments and they will summarize their responses to these comments both today and in writing in the notice of final rulemaking.

7:51
Let's see it looks like we have 61 people here attending if I'm reading that right.

7:58
You need to have registered for this hearing in order to speak.

8:02
Those of you who attend by phone or have listened only, I'm not sure if we have any attending by through 5 p.m.

8:11
tomorrow, you'll be able to email your comments to waste rulemaking at EZDEQ.gov or to the legal contact for this rulemaking, Matt Ripentrop. And can we go to the next slide?

8:31
So two of these things, the first part has already happened, so we're fairly sure about those dates, but we're expecting to get the final rule drafted before maybe the 22nd of next month, sometime in October, when there's a deadline to get it to GERC.

8:54
We expect to try to get it to GERC at the December meeting.

8:58
The December meeting has a late November study session.

9:01
Those of you who are familiar with GERC, GERC has two meetings to consider all rules.

9:07
And if it's proved at GERC, it'll be effective as an Arizona rule because we're acting for

an immediate effective date.

9:15
It will be effective somewhere around December 5th.

9:22
That's an approximate date obviously, but I wanted to make sure everybody knew that these are all approximate dates.

9:30
And so now we're going to enter the question and answer period of this hearing. And Terry will tell us about the proposed rule and maybe work the slides as well.

9:44
Terry Bayer. Thank you, Mark. Okay. Is my audio coming through okay? Thank you, sir.

9:55
So again, thank you, Mark.

9:57
I also want to thank all of those that have attended today, as well as those that have followed this rulemaking thus far.

10:03
Following several rounds of stakeholder engagement, I The Solid Waste Program has a lot of mandates for protection of the public and the environment.

10:12
In 2012, when the department changed to a fee-based model for funding rather than that of the previous decades, it engaged stakeholders on setting those fees in 2012.

10:23
Since then, the department has seen that those fees were not sufficient for sustaining the program.

10:28
This was attributed to below-market fees set in 2012, lack of legislative authority to some fees for our mandates, as well as inflation in the tune of 48.5% over the last 12 years.

10:42
So this rulemaking was to hopefully address each of those aspects that we've presented on that have led to DEQ's developed new rule as published in the NPRM. Next slide.

10:58
So some key rule elements that we do want to make sure that folks understand that was in the NPRM is the first bullet here.

11:06
If you're a new facility that seeks a license or a registration, such as either accepted chawler or transfer station as an example, after the rule takes effect, the new facility rate would apply at the time of the application.

11:21

So it's key for folks to understand that this has an immediate effectiveness, which is important for that timeline that Mark just laid out.

11:32
Again, this was an element per HB 2367 due to the needs of the program.

11:39
So moving into the next bullet there for calendar year 2025, based on feedback that we had heard from stakeholders thus far, while the rate will be effective immediately, we've decided to split the billing into two separate intervals.

11:56
The rate that you have paid to this rulemaking or prior to this rulemaking will be the same rate that when you renew your registration.

12:05
The increased portion of the rate would not be billed until July of 2025 to coincide with the new state fiscal year.

12:13
The final bullet there is that all tonnage rates subject to the increase will take effect for the new calendar year 2025, but those invoices would be delayed to go inside with the state fiscal year for 2025, July of 2025.

12:28
So just to make note for all those that are attending today, a good example would be like Q2 invoicing.

12:36
Those tonnage rates end at the end of June, and so typically those happen thereafter.

12:43
So Q2 invoicing would approximately about two months later, so you would see that invoice sometime due September. Next slide. So these are the rates that were published in the NPRM.

13:00
So I won't go over each individual rate, but this definitely offers a high-level view of the current fees that were in place.

13:10
You can see the ones that obviously have zeros are new fees from the new legislative authority, and then the proposed annual is what is in the NPRM.

13:20
You can see that there is a note to the applicable.

13:24
So, for example, the initial fee is for a new operator or facility that is coming in.

13:31
In this example, let's say you're a used oil processor, you would have an initial rate which

is slightly higher than the annual rate for that one-time setup.

13:43
There are asterisks on this slide to indicate to just that aspect of those that would have the initial fee application.

13:51
The other asterisk, obviously, is for tire subject plan review, which currently is allowed.

13:59
That is for a tire site to store tires beyond a year, although currently we do not have any that are in the universe.

14:07
Next slide.

14:12
The next slide here moves into the – I don't think it advanced.

14:18
Okay, there we go.

14:20
The next slide here is for the other proposed fees.

14:24
uh this is for the the landfills registration along with tires um no why is this not advancing i apologize uh angela can you go back yeah i think i think my screen froze okay my apologies this was our first so this was the first one that is correct uh so yeah this is for landfills and the tire sites, as well as the used oil example that I gave.

14:55
Sorry folks.

14:56
Next slide.

14:57
Okay.

14:58
There we go.

14:59
Okay.

14:59
There.

15:01
The next categories here you can see are for those that are BMW.

15:08
The BMW ranges from our transportation to our treatment, storage, and transfer facilities,

the septic haulers, as well as special waste, and as well as some of the final categories there on the bottom. There are some key acronyms that we want to make sure that folks understood.

15:23
In state government, we love to use our acronyms and obviously know that sometimes not everyone understands those.

15:30
So there is a legend there at the bottom to help explain some of the acronyms. Same thing as the previous slide.

15:36
You can see the per current rate versus proposed, as well as those that are subject to initial or those that may be subject to plan review.

15:45
Next slide.

15:55
All right. Did it switch for you? No, I'm still seeing the same thing.

16:01
Okay, it's showing slide 10 on mine, so give me one second.

16:03
I'm going to advance one more and then go back. Okay, it should be on slide 10 right now.

16:24
Okay, there we go, slide number 11. Yes, okay. Thank you. I apologize, it's having troubles.

16:31
Yeah, you know, technology never ceases to surprise us.

16:36
Okay, the next slide here is obviously the various, those that pay the tonnage fees, particularly for landfill, as we've discussed in previous stakeholder meetings, this is done in a number of factors from either based on cubic yards, whether compacted or uncompacted, or by ton, or for those that represent really small political subdivisions based on the population.

17:00
So again, shows the initial rate, which is the current rate that applies today, and then the proposed rate for the rulemaking.

17:12
Next slide.

17:18
So these are the plan review.

17:20
So as you saw in the previous slides, there are certain aspects of the fees that are subject to plan review.

17:26
Plan reviews obviously come with an initial as well as a maximum.

17:32
I do apologize, I think there is an error on this slide.

17:36
The initial is not changing.

17:39
It is only the maximum that is changing.

17:41
And that's because the initial is – think of it as like a deposit.

17:45
And then you're billed at an hourly rate, which is the rate they're listed at the bottom.

17:50
So that is the hourly rate that is increasing up to the maximum.

17:54
The maximum is the only thing that is increasing, and that will be increasing by CPI.

18:00
Next slide.

18:05
This is our category of general permits.

18:07
Again, this is another fee that was set in 2012.

18:12
This one is also being increased by CPI.

18:16
This currently only applies to those mining tire burial sites that we currently have under the rules. Next slide.

18:28
With that I will turn it back over to Mark. Thanks Terry.

18:35
So what you just heard is a summary of the proposed rule and I want to clarify what I maybe said previously that we're not only going to or the department is not only going to respond to the comments but They also have the option, and that's why they have this hearing, to change things in the text of the rule and anything that's in the explanation of the rule as well.

19:05
And so what you just heard was a summary of the proposed rule, which was published on August 16th.

19:15
So, at this time now, it's time for questions, and so now this is where you use the question tool or raise your hand and you can ask questions.

19:28
And I believe Angela is going to call on you and also read out the questions that are in the question tool.

19:37
Okay.

19:38
We don't have any questions in the question tool yet, but the first person to call on is Dave Bennett.

19:45
Dave, can you unmute yourself?

19:50
Sure, thank you.

19:51
Again, yeah, my name is Dave Bennett.

19:54
I'm the Solid Waste Services Director for the City of Scottsdale, represent 85 ,000 rate payers.

20:01
And let me just, I was trying to put something in the notes, but let me get to my questions.

20:07
And again, I wanna thank Mark, you, Julie, Terry, Angela, uh your whole team for uh for all the meetings and and listening to us.

20:18
We really appreciate it and also Krista Osterberg the legislative liaison.

20:24
So uh my first question and I'll I'll try to figure out how to put it in the copy and paste it and put it in there is if the solid waste management program goal is to be a fully let me restate that if the solid waste management program goal is to be a fully self-funded program.

20:45
Why do they choose the method of an annual CPI adjustment to recover costs rather than review the previous fiscal year's actuals, which is revenue and expenses, and then seek

the appropriate rate increase?

21:02
I have two other questions. Do you want me to keep going or stop with that one?

21:09
You might want to stop.

21:11
That was kind of a long question, so it'd probably be easiest to go ahead, Terry.

21:17
Yeah, so thank you, Dave.

21:19
Appreciate the feedback and everything that you have given.

21:23
So the CPI is something that the legislature has set out to, is I think an approved method for the organization to use.

21:35
It's been used by air quality for a number of years.

21:40
Additionally, we started adopting both in the recent rule makings and has waste in water as well.

21:47
So it's the standard that the department has found to be effective and obviously aligns with what the legislature expects.

22:00
Okay.

22:00
Just a follow-up, Terry, on that.

22:02
What will happen when the program is either under-recovering costs or over-recovering costs through using the CPI adjustment method?

22:13
Another good question.

22:15
So we do review, obviously, our financials every single year and evaluate.

22:20
And obviously, this is what led to this rulemaking is that, as we showed, I think, in the earlier stakeholder meetings, the department saw for years that the fees were not sufficient.

22:33

And we finally had to kind of reach a tipping point in which something had to be addressed.

22:39
That still continues to happen.

22:40
And so every year, leadership expects the program to evaluate the effectiveness of the program and then to communicate to leadership if something may be necessary, whether that be engaging in a subsequent rulemaking or if there is potential legislative needs to address those aspects.

23:02
Okay.

23:02
Thanks, Terry.

23:02
My – I have two more, and I'll leave it to the rest of the group.

23:07
Will the program director consider the following?

23:11
Implementing the proposed rate increases on July 1st, 2025 – I'll keep going, I have other ones. On or before January 1st, ADEQ, will they provide cities and towns the regional CPI?

23:28
So I'll go through this here.

23:31
So what we're asking for, not only Scott, so I'm sure you're going to hear from everybody else, is that implementing these rating increases in July 1st, 2025, I understand you and appreciate you guys delaying it, but it really doesn't do us a lot of good uh, in doing that.

23:49
Um, but going forward, if, if, if you, if you guys were to do that, we would still want, um, an annual CPI adjustment to be noted, all the cities and towns to be notified on or before January 1st of that regional CPI adjustment.

24:09
And then the adjustment then taking effect on July 1st of each year going forward.

24:14
So everybody is, you know, operating on the same, you know, budget.

24:19
As far as I know, not only you, but all the other cities and towns, their fiscal year starts on July 1st and ends June 30th.

24:28

So I'm hoping the program director would consider those.

24:33
Those are great comments, Dave, and definitely happy to have those conversations and appreciate you really attending the hearing today to share those.

24:44
and obviously I can't commit that that is up to the director but I think that you make a good argument and really appreciate you going on the record with it.

24:55
All right and my this I promise is my last one I apologize everyone listening because I have do some interviews here in like 20 minutes but my last one was and and this is item contention that I heard from some of our council members that are that are really progressive that want to see us doing more in the recycling uh the the the the tonnage f from 25 cents to 58 cents is it's I don't know if i have not been receiving w are for that recycling gr last year.

25:34
But this year, are being swept.

25:37
So it's tax to everyone if they 'r to constantly be those funds being swept, we would rather not pay it.

25:46
We'd rather have it go into the intent that it has, that it's supposed to be, and that's for, you know, for grants and for research projects.

25:56
So that was my last, I guess, statement there, Terry, so I appreciate it.

26:01
Hey, Terry.

26:02
Yeah, go ahead.

26:03
Yeah.

26:04
Just for the benefit of everyone listening, that's a great example of questions that sound lot like comments, but that we are not obligated, that the agency is not obligated to consider us comments unless they're made in the oral comment period of the, now I understand Mr.

26:24
Bennett has to go do some interviews, and so this is a good example of why you want to get your oral comments in the oral comment portion of the hearing, or even a better idea is to write them all down and email them to us. Thank you, Mark. Thanks,

everyone. Thank you, Mark.

26:45
Yeah, great clarification.

26:46
Yeah, because we do want to make sure that these are getting on the official record since we were in the kind of question-comment period or question-answer. So, Dave, I completely understand the concern.

26:58
You know, DEQ is extremely passionate about recycling grants as well and really wish that we never saw the program go away. I mean, we think that it does a lot of benefit for the state.

27:12
With that said, you know, this rulemaking was originally planned for last year.

27:19
And so, as we kind of talked off in the beginning, the whole goal of making the program sustainable was to continue to sustain those type of research and grant programs that we know are desperately of an economic benefit to the state as well as municipalities.

27:40
So that is the primary goal of us trying to make the program sustainable is so that way we can push for that.

27:48
Obviously there are limitations and what the department can do but needless to say that is our intent.

27:56
We want to make sure that that program continues to be both a part of current generations as well as future generations and would really appreciate that you know that comment going on the official record.

28:13
Okay so um so Dave if you don't have another question at this time if you can try to lower your hand that would be great.

28:25
Our next question that we have is coming out of the question tool and it is from Andrew Linton and the question is were there any new activities or processes considered in calculating the new fees? If yes, are they mandated in statute or rule?

28:42
And I can step in and try to answer that question assuming I'm interpreting that question correctly.

28:49
No, these fees are based on current costs to ADEQ for our current regulatory mandates.

28:56
So not not contemplating future or additional potential activities or processes.

29:02
I would just add to that, Matt, a good example is currently the program is seeking authorization on another solid waste element, and that whole element has its own proposed fees.

29:16
And so it is the goal of the department for any future new activity to evaluate fees for that aspect so that way that they're applicable only to those facilities.

29:28
All right.

29:34
And our next question is, if the Solid Waste Management Program goal is to be a fully self-funded program, why did they choose the method of an annual CPI adjustment to recover costs rather than review the previous fiscal year's actual revenue and expenses and then seek the appropriate rate increases needed?

29:56
If you don't mind, I just restated my things in the comments.

30:02
Oh, I see that.

30:02
the record.

30:08
So just to just to for clarity and Mark please correct me if I misstate something but Dave I know you have to run for an interview so please make sure that either your staff or yourself send that to the Waste Rule Making mailbox or to Matt Rippentrop so that because if it's captured here this is still the Q &A and so it wouldn't be captured as the official public record.

30:31
Will do. Thanks. Thanks, Terry.

30:34
Yes, sir. And just so you guys know, the Waste Rulemaking inbox is literally wasterulemakingatazdeq.gov.

30:44
And Matt's email, you can see his name up here right now. It's ripandtrop.mattatazdeq.gov.

30:56
So at this time, I am not seeing any other, any other hands raised.

31:02

I have not seen any other questions come in.

31:12
Okay then let's go on to the formal comment period of this hearing.

31:18
That's the kind of the main reason we're having this is to present oral arguments and so on and so forth.

31:25
A second opportunity exists with the written comments that can be emailed but I'm now going to open the oral comment period and we use the same method of attempting, but raising your hand or putting, if you put your comment in the chat, it's not going to work.

31:45
You have to actually raise your hand and do the oral comments orally.

31:51
So let's open the oral comment period right now.

32:16
All right.

32:18
Dave Bennett, I see your hand raised again.

32:22
Yeah, it will.

32:22
So, can you just real quick, Mark, can you tell me the difference between the two, the one, what we were just doing previously and now as far as the record?

32:35
Yeah.

32:36
When you were making your questions in the question period, it started out as a question and then it kind of went into some argument and why didn't you do it this way?

32:50
And so, it's difficult for an agency to determine when a particular question becomes a comment or when it's just a question.

33:02
And a lot of times you have questions in the question part, for example, how long is it going to take the agency to respond to my comments or if the agency does not get an immediate effective date, what happens then?

33:18
Your questions sounded a lot like comments and I understand the reason was that you had to leave quick and so Well, do you mind if I go ahead and reiterate my my comments

then I don't mind I if you can go ahead and let's do it as quickly as possible.

33:38
So you can keep on schedule Yeah, no worries.

33:42
And thank you again as I mentioned Dave Bennett City of Scottsdale representing 85 ,000 rate payers, the city is not in favor of the annual CPI adjustment and we're not in favor of the rates being implemented on July 1st of 2025, rather the city is in favor of having these fees take an effect on July 1st of 2025.

34:18
And then subsequent to that, any CPI adjustments would then take a fit.

34:23
Or ADEQ would notify all the cities and towns of their annual CPI adjustment on or before January 1st of each year.

34:33
And then also, any rates that adjustment would the adjustment of the rate would then be take effect in the following July 1st of each subsequent year.

34:47
And my other comment was again about the recycling fund, the additional tonnage fee, the 25 cents going up to 58 cents, not in favor of that.

35:00
Not not necessarily the fee going up, but it's it hasn't intent uh use for its intentions uh we want to if if if that fee is going to go up we want to be used for the intentions of recycling uh grants and uh further research projects to where it's intended to uh have a material that was intended landfill go be reused and be recycled so those are my and I thank you. Thanks, Mark. Thank you.

35:36
So we're still in the formal comment period and we're ready to take more comments.

35:44
Okay, the next hand that we have raised is Julie Rodriguez. Julie, can you unmute yourself? Okay.

35:56
Hi, my name is Julie Rodriguez. I'm with Graham County and I just have a couple comments.

36:01
The first one, and I had talked to Terry about this individually, but I understand what trying to do by being nice and not billing until July of 25, but every accountant and every entity will tell you that doesn't change the fact that the costs belong in the prior year and we're going to have to move it into the prior year.

36:18
So while that's a nice gesture on your part, it doesn't help anybody. It actually makes the

accounting more difficult.

36:24
So I would echo the sentiments of the gentleman from Scottsdale that the fees should be implemented on 7-125, not be billed on 7-125.

36:35
and I also think that a hundred and thirty two percent increase on the tonnage from 25 cents to 58 cents is an unbelievable increase for one time period and I think in rural Arizona it's we live in a different world we don't have those kind of funds sitting around and while you guys can raise your fees to cover your costs we have nobody else to pass these fees on to we certainly can't raise our transfer site fees from you know fifteen dollars a truck to a hundred dollars a truck or we're gonna have wildcat dumping which is what we try to avoid with our transfer fees. Thank you. Okay thank you.

37:20
Any more comments? Hey I'm not seeing, oh we do have another raised hand now.

37:29
Chris can you unmute yourself? Chris Welch.

37:33
I'm the collection superintendent for the town of Likewise, representing about 85 ,000 households and rate payers.

37:42
We would echo the comments from Dave Bennett, not in favor of a CPI adjustment.

37:50
We have to be accountable to our rate payers, justifying all of our costs and making sure that we're passing those on fairly and equitably through rate increases.

38:01
and by adjustment is something that kind of again we'd like to explore something other than a CPI.

38:13
Did I hear correctly that she her audio maybe went out for about five seconds near the end? Yes it did sound like it went out.

38:22
If you'd like to say that last portion again we would appreciate it.

38:27
Just like to explore something other than a CPI so that we could accurately and fully incorporate those into our rate setting processes and our budget cycle.

38:41
Okay, that came through.

38:42
Thank you.

38:46
Okay.

38:47
The next raised hand is Sherry Collins.

38:52
Hi, thank you.

38:53
Can you hear me?

38:55
Okay.

38:56
My name is Sherry Collins and I am the Solid Waste Director for City of Mesa and I represent about 155 ,000 residential rate payers in our city and so just echoing really what Dave that the city of Mesa is not in favor of implementing the per ton fee from 25 cents to 58 cents prior to July 1st of 2025.

39:31
Nor we recommend, we would, yeah, we're not in favor of that.

39:36
We're in favor of implementing on July 1st of 2025.

39:39
And then addition to that with the fees that are being increased and collected, we would like to see a larger portion of that go towards recycling programs.

39:51
And then lastly, City of Mesa is also not in favor of the CPI increase into perpetuity. We would like a different method, use something more along the lines of the actual money that needs to be recovered for operations, not just a standard CPI.

40:14
Thank you.

40:19
We're just getting warmed up, so feel free to think about what you're going to say and put it on the record or at least write it down and send it to the agency tomorrow.

40:43
All right, Sherry, I see that your hand is still raised. I'm not sure if you have another comment or if you don't, if you could just try to lower that hand for us.

40:54
I actually didn't have another comment, but can I clarify?

40:59
If we make comments on here, then we can also send written to the Waste Rulemaking at

azdeq.gov.

41:11
Yes, you can.

41:12
And actually, that's preferred.

41:15
In the many hearings I've done, I've often asked people if you have a set of written comments, could you hand them to me, the hearing officer, right now after you're done reading them?

41:26
Because then we make sure we get all the spelling right.

41:29
We get everything you wanted to say correctly.

41:32
So that would be preferable.

41:34
Go ahead and send them in twice, so to speak.

41:37
Once orally and once in writing.

41:40
Okay.

41:40
Thank you.

41:52
Okay.

41:52
I am not seeing any other hands.

41:54
Are you guys okay if I move to the next slide with Matt's contact information while we're waiting?

42:01
Yeah.

42:01
Go ahead.

42:07
Mark.

42:09

Go ahead.

42:11
Yeah, it looks like there was a question that was put into the thing.

42:17
Are we able to go back to that or do we, since we've already kind of moved up beyond that, do we have to address that afterwards?

42:27
Is it is it identifiable from a particular person? It is from a particular person, yes.

42:35
And it says it's It was put in the question tool, but it sounds like a comment.

42:40
It's not a comment.

42:42
It's actually more of a question.

42:44
Looks like this is their first public hearing attendance, and looks like they're from the university and would like to understand more.

42:54
So is that appropriate to be addressed offline then?

42:57
No, let's do this.

42:59
I will temporarily end the formal comment period, and you can go ahead and answer that as if it came during the question and answer period and then after you're done we'll go back into the formal comment period in case based on that question and your answer people have other comments.

43:19
So right now I'm going to end the temporary pause the formal comment period and let Terry restate that question and answer it or whoever wants to answer it.

43:31
All right Terry do you want to read it or do you want me to? Go ahead Angela.

43:34
Okay. So here it is. Hi, my name is Lisa Tran.

43:40
I am a graduate student in pharmacology and toxicology at the University of Arizona.

43:45
She has some questions since this is her first time attending a hearing like this.

43:50

The first question is, will these fees cover the cost of actual cleanup of hazardous chemicals, biohazardous waste?

43:59
So yeah, great question, Lisa.

44:02
So these fees are designed to cover the department's cost associated with doing our legislative mandates.

44:11
And so those include things such as inspecting a facility, as well as permitting a facility, and if necessary, if we have to enforce against a facility.

44:23
So that's what the fees are designed for.

44:25
Typically, the cleanup aspect of it is leveraged against the facility, and that can sometimes take place through enforcement, whether voluntary or involuntary, to make sure that we're achieving the proper environmental protection.

44:48
All right.

44:48
And then there's a second part to the question.

44:50
Has the state of Arizona dealt with issues with waste disposal due to limited landfill space? And if so, how will waste disposal fees deal with this?

45:05
So I'm not sure that we've encountered limited landfill space in Arizona.

45:14
There are landfills all across the state, ranging from the most rural areas to the most populated dense areas.

45:24
And its space has usually not been a problem for those facilities.

45:30
The state has experienced what we call wildcat dumping.

45:35
And so wildcat dumping, we do take enforcement action as necessary whenever someone can commit that type of activity to make sure that it doesn't happen subsequently thereafter.

45:51
All right, she expressed her gratitude, so that was the end of her question.

45:58
And as long as we're still in the second extended question and answer period, let's open it again temporarily to more questions if necessary for a minute or two.

46:16
Great discussions, by the way, I retired from the department a number of years back and get to work on limited issues in a limited amount of time and so I'm happy to hear all of the great issues being brought up as DEQ tries to move its solid waste activities into the the next century and beyond. It's very gratifying.

46:50
Okay I'm not seeing any other questions coming in the question tool and I am not seeing any raised hands.

46:56
Okay, well, just officially then, go ahead.

47:00
I apologize.

47:01
We just got a raised hand.

47:03
It's Ernest Ruiz.

47:05
I'm not sure if he has a question or if he wants to comment formally.

47:09
So I'm going to unmute you, Ernest.

47:11
Can you unmute yourself?

47:13
Yes, it's a formal comment and just wanted to go on the record.

47:18
Hold on, Ernest.

47:19
I'm just going to formally open the formal comment period one last time.

47:23
I shouldn't say one last time, but to allow this comment period to be or to allow your comment to be on the record. Go ahead. Understood. Yeah, Ernest Reed City Glendale Superintendent for the Landfill.

47:37
Just want to go on the record again, along with the other two municipalities that commented Scottsdale and Mesa I believe it was that we are also in uh in agreement with starting the fees up in july of 2025 allowing those uh fees to catch up in the budget and

then ongoing forward just making sure that they align with the budget um that will allow us to recoup those fees in that fiscal year and uh make it streamlined understanding that you guys have come up with a formula for your for your fees um you know we the letter in July of 2024, so we'd like to have that letter taken into consideration as you guys go through this formal process. That is all. Thank you, Ernest.

48:32
We're still in the formal comment period of this hearing on solid waste fees. Okay, we got a question about the comment period.

48:52
The question is, can the comment period be extended? The deadline of tomorrow at 5 p.m.

48:57
does not allow for coordination internally as many of our offices are closed on Friday.

49:07
I believe that's a decision that has to be made by the agency leadership.

49:17
If he or she is asking, can it be done, can the comment period be extended, in my experience, It occasionally is, but it kind of kills the rule in its present trajectory, and the present trajectory, as I understand it, is the agency wants the immediate effective date.

49:46
So can it be done?

49:48
I believe it legally can be done, but if that's the request, then that should be a formal And as it's a question, this is the confusing part.

50:02
That's why we say, please send it in writing.

50:05
You want comment period extended, not are you asking, is it possible?

50:11
That's a confusing question to answer.

50:26
Okay.

50:27
Well, thank you for the question that sounded like a comment.

50:31
And lots of times the agency will mix comments and questions as they respond because they see the interest, but only once they have to respond to are the ones that are formally comments that they can identify as a comment.

50:50

Go ahead if there's, I hear more bells going off, I don't know if that's somebody raising their hand.

50:56
Hey Mark, quick clarifying question for you.

51:02
If someone has previously submitted something in writing, is that allowed to be included in the record or does that need to be resubmitted by Close of Business Tomorrow as part of the formal comment period?

51:18
If they submitted it after it was published, which is, what, August 16th.

51:25
If it was submitted to us after August 16th, then it's a formal comment.

51:30
If it was submitted to us during some of the stakeholder meetings, then it's not a comment because the proposed rule had not yet been published.

51:43
So the agency can't determine that it was, in fact, a comment on the proposed rule rather than a general comment on the discussions that took place as the proposed rule was being developed.

51:53
So to be on the safe side, resubmit that comment and make sure that it applies to the rule as published on August 16th.

52:03
Thank you, Mark.

52:07
Okay, and it looks like we have another raised hand.

52:12
Ernest, do you have another comment for us?

52:16
Yeah, Ernest, Reese, I just wanna thank Terry for clarifying that because I was gonna ask that question Because we submitted our letter in July.

52:23
So thank you very much for clarifying that we will be resubmitting our letter Great great And feel free to redraft it in case you want to add things and Say it in a different way Yeah, I am NOT seeing any more raised hands And nothing in the question tool.

53:01
Well, this has been an interesting Hearing the formal comment period is still open for a minute or so.

53:07

I make these closing comments There's been a lot of discussion.

53:13
There's been a little bit of mixed questions and comments, but I think it's been educational for everyone here.

53:23
We got, the agency got a number of comments, but pretty much in the same areas.

53:31
I think both the commenters and the listeners learned a lot from what each other was saying.

53:42
And so, unlike many hearings where nobody comments, but a lot of people attend to see what anybody else is going to say, this oral proceeding was very beneficial for everyone.

53:57
Just a reminder, through 5 p.m.

54:01
tomorrow, we'll be accepting email comments at that Waste Rulemaking inbox.

54:07
Yeah, well, you see it on your screen now, or through Matt, who is the, what we call the rule writer on this particular rulemaking.

54:19
And so, it's 324, if there's nobody, are there any other hands raised, Angela?

54:28
There are no hands raised.

54:30
Okay, we're going to close this hearing formally then, and thank you all for attending.

54:35
I still see 64 attendees, so a lot of people were listening.

54:39
That's great.

54:41
Thank you, everyone.

54:43
Have a good day.

54:44
Thank you.

The release of this Chapter in Supp. 21-4 replaces Supp. 21-1, 1-41 pages

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES
The definition for a rule is provided for under A.R.S. § 41-1001. *"'Rule' means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency."*

THE ADMINISTRATIVE CODE
The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The "R" stands for "rule" with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2021 is cited as Supp. 21-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY
Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS
The Office began to authenticate Chapters of the Code in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document's content has been compromised.

HOW TO USE THE CODE
Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES
The Arizona Revised Statutes (A.R.S.) are available online at the Legislature's website, www.azleg.gov. An agency's authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES
Arizona Session Law references in a Chapter can be found at the Secretary of State's website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA
It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency's exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor's notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE
This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

Authority: A.R.S. §§ 41-1003 and 49-104

Supp. 21-4

Editor's Note: The Office of the Secretary of State publishes all Chapters on white paper (Supp. 01-2).

Editor's Note: This Chapter contains rules which were adopted under an exemption from the provisions of the Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to A.R.S. § 49-701.01(C)(1) and (2). Exemption from A.R.S. Title 41, Chapter 6 means that the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department did not submit notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; and the Department was not required to hold public hearings on these rules.

CHAPTER TABLE OF CONTENTS

ARTICLE 1. RESERVED

ARTICLE 2. SOLID WASTE DEFINITIONS; EXEMPTIONS

Article 2, consisting of Section R18-13-201, adopted effective July 27, 1998, under an exemption from the provisions of A.R.S. Title 41, Chapter 6 (Supp. 98-3).

Section
R18-13-201. Land Application of Biosolids Exemption 4
R18-13-202. Coal Slurry Discharges from Pipeline Leaks Exemption 4

ARTICLE 3. REFUSE AND OTHER OBJECTIONABLE WASTES

Title 18, Chapter 13, Article 3, consisting of Sections R18-13-301 through R18-13-312, recodified from Title 18, Chapter 8, Article 5, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

ARTICLE 1. RESERVED

Editor's Note: Article 2, consisting of Section R18-13-201, was adopted under an exemption from the provisions of A.R.S. Title 41, Chapter 6, pursuant to A.R.S. § 49-701.01(C)(1) and (2). Exemption from A.R.S. Title 41, Chapter 6 means the Department did not submit notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; the Department did not submit the rules to the Governor's Regulatory Review Council for review; and the Department was not required to hold public hearings on this Section (Supp. 98-3).

ARTICLE 2. SOLID WASTE DEFINITIONS; EXEMPTIONS

Editor's Note: The following Section was adopted under an exemption from the provisions of the Administrative Procedure Act which means that these rules were not reviewed by the Governor's Regulatory Review Council; the agency did not submit notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; and the agency was not required to hold public hearings on these rules (Supp. 98-3).

R18-13-201. Land Application of Biosolids Exemption

A. This Section applies only to biosolids as defined in R18-9-1001. The land application of biosolids, when placed on or applied to the land in full conformity with 18 A.A.C. 9, Article 10 and A.R.S. § 49-761(F), and if the site of land application has ceased to receive application of biosolids and all applicable site restrictions set by A.A.C. Title 18 Environmental Quality have been satisfied, is exempt statewide from the definition of solid waste found at A.R.S. § 49-701.01(A). This exemption applies only when the biosolids and the soil to which it has been applied remain at the site of the application.

B. This exemption does not alter or set any new standard for the soil remediation standards found at 18 A.A.C. 7, Article 2.

Historical Note

Adopted under and exemption from A.R.S. Title 41, Chapter 6, pursuant to A.R.S. § 49-701.01(C)(1) and (2), effective July 27, 1998 (Supp. 98-3). Amended by exempt rulemaking at 5 A.A.R. 4004, effective September 17, 1999 (Supp. 99-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-202. Coal Slurry Discharges from Pipeline Leaks Exemption

This Section applies only to coal slurry discharges onto the ground from pipeline leaks. Coal slurry discharges onto the ground from pipeline leaks are exempt statewide from the definition of solid waste prescribed in A.R.S. § 49-701.01(A) if both of the following conditions are met:

1. The discharge was the result of an accidental pipeline leak.
2. The thickness of the layer of coal slurry on the ground that resulted from the discharge is 3 inches or less.

Historical Note

New Section adopted by exempt rulemaking at 5 A.A.R. 4004, effective September 17, 1999 (Supp. 99-3).

ARTICLE 3. REFUSE AND OTHER OBJECTIONABLE WASTES

R18-13-301. Reserved

R18-13-302. Definitions

A. "Approved" means acceptable to the Department.

B. "Ashes" means residue from the burning of any combustible material.

C. "Department" means the Department of Environmental Quality or a local health department designated by the Department of Environmental Quality.

D. "Garbage" means all animal and vegetable wastes resulting from the processing, handling, preparation, cooking, and serving of food or food materials.

E. "Manure" means animal excreta, including cleanings from barns, stables, corrals, pens, or conveyances used for stabling, transporting, or penning of animals or fowls.

F. "Person" means the state, a municipality, district or other political subdivision, a cooperative, institution, corporation, company, firm, partnership or individual.

G. "Refuse" means all putrescible and nonputrescible solid and semisolid wastes, except human excreta, but including garbage, rubbish, ashes, manure, street cleanings, dead animals, abandoned automobiles, and industrial wastes.

H. "Rubbish" means nonputrescible solid wastes, excluding ashes, consisting of both combustible and noncombustible wastes, such as paper, cardboard, waste metal, tin cans, yard clippings, wood, glass, bedding, crockery and similar materials.

Historical Note

Section recodified from A.A.C. R18-8-502, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-303. Responsibility

A. The owner, agent, or the occupant of any premises, business establishment, or industry shall be responsible for the sanitary condition of said premises, business establishment, or industry. No person shall place, deposit, or allow to be placed or deposited on his premises or on any public street, road, or alley any refuse or other objectionable waste, except in a manner described in these rules.

B. The owner, agent, or the occupant of any premises, business establishment, or industry shall be responsible for the storage and disposal of all refuse accumulated, by a method or methods described in these rules.

C. The collection and disposal of all refuse not acceptable for collection by a collection agency is the responsibility of each occupant, business establishment, or industry where such refuse accumulates, and all such refuse shall be stored, collected, and disposed of in a manner approved by the Department.

D. All dangerous materials and substances shall, where necessary, be rendered harmless prior to collection and disposal.

Historical Note

Section recodified from A.A.C. R18-8-503, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-304. Inspection

Representatives of the Department shall make such inspections of any premises, container, process, equipment, or vehicle used for collection, storage, transportation, disposal, or reclamation or refuse as are necessary to ensure compliance with these rules.

Historical Note

Section recodified from A.A.C. R18-8-504, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-305. Collection Required

A. Where refuse collection service is available, the following refuse shall be required to be collected: Garbage, ashes, rubbish, and small dead animals which do not exceed 75 pounds in weight.

B. The following refuse is not considered acceptable for collection but may be collected at the discretion of the collection agency where special facilities or equipment required for the collection and disposal of such wastes are provided:
1. Dangerous materials or substances, such as poisons, acids, caustics, infected materials, radioactive materials, and explosives.
2. Materials resulting from the repair, excavation, or construction of buildings and structures.
3. Solid wastes resulting from industrial processes.
4. Animals exceeding 75 pounds in weight, condemned animals, animals from a slaughterhouse, or other animals normally considered industrial waste.
5. Manure.

Historical Note

Section recodified from A.A.C. R18-8-505, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-306. Notices

A. All collection agencies shall provide each householder, or business establishment served, with a copy of the requirements governing the storage and collection of refuse which shall cover at least the following items:
1. Definitions.
2. Places to be served.
3. Places not to be served.
4. Scheduled day or days of collection.
5. Materials acceptable for collection.
6. Materials not acceptable for collection.
7. Preparation of refuse for collection.
8. Types and size of containers permitted.
9. Points from which collections will be made.
10. Necessary safeguards for collectors.

B. All such notices governing storage and collection shall conform to these rules.

Historical Note

Section recodified from A.A.C. R18-8-506, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-307. Storage

A. All refuse shall be stored in accordance with the requirements of this Section. The owner, agent, or occupant of every dwelling, business establishment, or other premises where refuse accumulates shall provide a sufficient number of suitable and approved containers for receiving and storing of refuse, and shall keep all refuse therein, except as otherwise provided by this Chapter.

B. Garbage shall be stored in durable, rust resistant, nonabsorbent, watertight, and easily cleanable containers, with close fitting covers and having adequate handles or bails to facilitate handling. The size of the container shall be determined by the collection agency.

C. Rubbish and ashes shall be stored in durable containers. Bulky rubbish such as tree trimmings, newspapers, weeds, and large cardboard boxes shall be handled as directed by the collection agency. Where garbage separation is not required, containers for the storage of mixed rubbish and garbage shall meet the requirements specified in subsection (B).

D. Containers for the storage of refuse shall be maintained in such a manner as to prevent the creation of a nuisance or a menace to public health. Containers that are broken or otherwise fail to meet the requirements of the rules shall be replaced, by the owner of said containers, with approved containers.

E. Manure and droppings shall be removed from pens, stables, yards, cages, conveyances, and other enclosures as often as necessary to prevent a health hazard or the creation of a nuisance. All material removed shall be handled and stored in a manner that will maintain the premises nuisance free.

Historical Note

Section recodified from A.A.C. R18-8-507, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-308. Frequency of Collection

A. The frequency of collection shall be in accordance with rules of the collection agency but not less than that shown in the following schedules:
1. Garbage only -- twice weekly.
2. Refuse with garbage -- twice weekly.
3. Rubbish and ashes -- as often as necessary to prevent nuisances and fly breeding.

B. A variance from the required frequency rate may be granted to allow for the collection of garbage once weekly. The variance may be granted by the Department of Environmental Quality upon submission of an acceptable plan approved by the local health department demonstrating that no public health hazards or nuisances will exist and that fly breeding will be controlled by either biological, chemical, or mechanical means. The variance may be revoked whenever the Department of Environmental Quality determines that the circumstances warranting the variance no longer exist.

Historical Note

Section recodified from A.A.C. R18-8-508, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-309. Place of Collection

A. All refuse shall be properly placed on the premises for convenient collection as designated by the collection agency.

B. Where alleys are provided, collection shall be made on the alley side of the premises.

Historical Note

Section recodified from A.A.C. R18-8-509, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-310. Vehicles

A. Vehicles used for collection and transportation of garbage, or refuse containing garbage, shall have covered, watertight, metal bodies of easily cleanable construction, shall be cleaned frequently to prevent a nuisance or insect breeding, and shall be maintained in good repair.

B. Vehicles used for collection and transportation of refuse shall be loaded and moved in such a manner that the contents, including ashes, will not fall, leak, or spill therefrom. Where spillage does occur, it shall be picked up immediately by the collector and returned to the vehicle or container.

C. Vehicles used for collection and transportation of rubbish or manure shall be of such construction as to prevent leakage or spillage, and shall provide a cover to prevent blowing of materials or creating a nuisance.

Historical Note

Section recodified from A.A.C. R18-8-510, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-311. Disposal; General

A. All refuse shall be disposed of by a method or methods included in these rules and shall include rodent, insect, and

nuisance control at the place or places of disposal. Approval must be obtained from the Department for all new disposal sites and may change in the method of disposal prior to use.

B. Carcasses of large dead animals shall be buried or cremated, unless satisfactory arrangements have been made for disposal by rendering or other approved methods.

C. All public "dumping grounds", provided in compliance with A.R.S. § 9-441, shall be maintained and operated in accordance with the requirements of these rules.

D. Manure shall be disposed of by sanitary landfill, composting, incineration, or used as fertilizer in such a manner as not to create insect breeding or a nuisance.

Historical Note

Section recodified from A.A.C. R18-8-511, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-312. Methods of Disposal

Approval must be obtained from the Department for any method or methods used for the disposal of refuse prior to the start of operations, and shall be accomplished by one or more of the methods listed below:

1. Sanitary landfill -- Consists of the disposal of refuse on land and the daily compaction and covering of the refuse with 6 to 12 inches of earth so as to prevent a health hazard or nuisance. The final compacted earth cover shall be a minimum of 2 feet in depth. Where sanitary landfill operations are proposed, the Department will require the following:
   a. The landfill shall be located so that seepage will not create a health hazard, nuisance, or cause pollution of any watercourse or water bearing strata.
   b. Adequate and proper surface drainage shall be provided to prevent ponding or erosion by rainwater of the finished fill.
   c. Provision shall be made for the control of insects, rodents, wind blown refuse, and accidental fire.
   d. Burning of refuse is prohibited.
   e. An all weather access road is required.
   f. Suitable equipment and operating personnel shall be provided.
   g. Salvaging, if permitted, shall be rigidly controlled.
   h. A variance from the daily compaction and covering requirement may be granted for sites serving less than 2,000 people by the Department of Environmental Quality upon submission of an acceptable plan approved by the local health department demonstrating that no public health hazards or nuisances will exist. The variance will allow for compaction and cover every two weeks at sites serving less than 500 people; weekly compaction and cover for sites serving from 500 to 1,000 people; and twice weekly compaction and cover for sites serving from 1,000 to 2,000 people. The variance may be revoked whenever the Department of Environmental Quality determines that the circumstances warranting the variance no longer exist.
2. Incineration -- Where incineration is to be employed, the plans and specifications, along with any other information necessary to evaluate the project, shall be submitted to the Department and approval received prior to construction. In addition, an approved method for the disposal of non-combustible refuse is required. Where incineration is proposed, the following items shall be provided.
   a. The capacity of the incinerator shall be sufficient for the maximum production of refuse expected.
   b. Noncombustible refuse shall be disposed of by methods approved by the Department.
   c. Skilled personnel to assure the proper operation and maintenance of the facilities in a nuisance-free manner.
3. Composting -- This method of disposal is acceptable to the Department under the following conditions:
   a. That plans and specifications and other information necessary to evaluate the project are submitted to the Department and approval received prior to start of construction.
   b. That provisions are made for the proper disposal of all refuse not considered suitable for composting.
   c. Skilled personnel shall be provided to assure the proper operation and maintenance of the facilities in a nuisance-free manner.
4. Garbage grinding -- This method, involving the separate collection and disposal of garbage into a community sewerage system through commercial type grinders or mandatory community-wide installation of individual household grinders, will be acceptable to the Department provided that suitable means shall be provided for the disposal of all remaining refuse.
5. Hog feeding -- This method of disposal will only be approved under the following conditions:
   a. The garbage is collected and stored in suitable containers.
   b. Only approved type vehicles are used for collection.
   c. All garbage is effectively heat-treated in accordance with Title 24, Chapter 7, Article 3 (A.R.S. §§ 24-941 through 24-949).
   d. All remaining refuse, including nonedible garbage, is collected and disposed of separately by methods approved by the Department.
6. Manure disposal -- Manure shall be disposed of by sanitary landfill, composting, incinerating, or used as a fertilizer in such a manner as not to create insect breeding or a nuisance.

Section recodified from A.A.C. R18-8-512, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

ARTICLE 4. RESERVED

ARTICLE 5. REQUIREMENTS FOR SOLID WASTE FACILITIES SUBJECT TO SELF-CERTIFICATION

R18-13-501. Solid Waste Facilities Requiring Self-Certification; Registration Fees

A. The following solid waste facilities requiring self-certification under A.R.S. § 49-762.01 shall register with the Department and pay registration fees as provided in this Section by September 30, 2012, and annually thereafter by September 30th:

1. A transfer facility with a daily throughput of more than 180 cubic yards, including a material recovery facility, but not including:
   a. A material recovery facility where the incoming materials are primarily source separated recyclables; or
   b. Community or neighborhood recycling bins including drop boxes, roll off containers, plastic containers used to collect residential, business, and/or governmental recyclable solid waste.
2. A facility storing 5,000 or more waste tires on any one day and not required to obtain plan approval.

3. A waste tire shredding and processing facility.

B. Initial registration for a new facility. The owner or operator of a planned new facility identified in subsection (A) shall submit the following information to the Department before beginning construction:
1. The name of the solid waste facility.
2. The name, mailing address and telephone number of each owner and operator of the solid waste facility.
3. The physical location of the solid waste facility by physical address, latitude and longitude, or legal description. If none of these are practical, by driving directions from the nearest city or town.
4. A brief description of operations, including waste management methods, types and volumes of waste handled, waste storage and treatment equipment, and the length of time the waste remains onsite.
5. A diagram of the property showing its approximate size and the planned location of the solid waste facility or facilities.
6. Documentation that the facility will comply with local zoning laws or, if the owner is an agency or political subdivision of this state, with A.R.S. § 49-767.
7. Documentation that the facility has any other environmental permit that is required by statute.
8. A copy of the public notice in a newspaper of general circulation in the area where the facility will be located stating the intent to construct and operate a new solid waste facility pursuant to A.R.S. § 49-762.05.

C. Initial and annual registration for an existing facility. The owner or operator of an existing facility shall submit the following information to the Department annually on a form approved by the Department and note any changes since the last registration:
1. The name of the solid waste facility.
2. The name, address and telephone number of each owner and operator of the solid waste facility.
3. The physical location of the solid waste facility by physical address, latitude and longitude, or legal description. If none of these are practical, by driving directions from the nearest city or town.
4. A brief description of operations, including waste management methods, types and volumes of waste handled, waste storage and treatment equipment, and the length of time the waste remains onsite.
5. A diagram of the property showing its approximate size and the location of the solid waste facility or facilities.
6. Documentation that the facility remains in compliance with the most current local zoning laws or with A.R.S. § 49-767, as applicable.
7. Documentation that the facility continues to hold any other environmental permit that is required by statute.

D. Self-certification. With each registration under subsection (B) or (C), the owner or operator shall certify that the information submitted is true, accurate, and complete to the best of the person's knowledge and belief.

E. Registration fees. The owner or operator of a transfer facility under subsection (A)(1) shall pay the Department $1,000 for the initial registration of a new or existing facility, and $500 for each annual registration thereafter. The owner or operator of a tire facility under subsection (A)(2) or (3) shall pay the Department $1,000 for the initial registration of a new or existing facility, and $250 for each annual registration thereafter.

F. As used in this Section:
1. "Department" means the Arizona Department of Environmental Quality.
2. "Material recovery facility" means a transfer facility that collects, compacts, repackages, sorts, or processes commingled recyclable solid waste generated offsite for the purpose of recycling and transport, or where source separated recyclable solid waste is processed for sale to various markets, and where the incoming materials are predominantly recyclable solid waste.
3. "Recyclable solid waste" means a product or material described in subsection (F)(3)(a) or (b), and for which subsection (F)(3)(c) is true:
   a. A product with no useful life remaining for the purposes for which it was produced, or if useful life remains, the product will not, due to location, quantity, or owner choice, remain in use or be reused for a purpose for which it was produced.
   b. A material that is a result of a process or activity whose purpose was to produce something else.
   c. The product or material retains some economic value, with or without further processing, as a raw material or feedstock in some process other than incineration or combustion.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

ARTICLE 6. RESERVED

ARTICLE 7. SOLID WASTE FACILITY PLAN REVIEW FEES

R18-13-701. Definitions

In addition to the definitions provided in A.R.S. §§ 49-701, 49-701.01, and 49-851, and 18 A.A.C. 13, the following definitions apply in this Article:
1. "Aquifer Protection Permit" or "APP" means the permit that is required pursuant to A.R.S. § 49-241.
2. "MSWLF" means a municipal solid waste landfill as defined in A.R.S. § 49-701.
3. "Non-APP requirements for Non-MSWLFs" means 40 CFR 257 requirements and the restrictive covenant and location restrictions required in A.R.S. Title 49, Chapter 4.
4. "Non-MSWLF" means a landfill that is not a municipal solid waste landfill as defined in A.R.S. § 49-701.
5. "RD&D" means research, development, and demonstration.
6. "Review hours" means the hours or portions of hours that the Department's staff spends on a request for a plan review. Review hours include the time spent by the project manager and technical review team members, and if requested by the applicant, the supervisor or unit manager.
7. "Review-related costs" means any of the following costs applicable to a specific plan review:
   a. Presiding officer services for public hearings on a plan review decision,
   b. Court reporter services for public hearings on a plan review decision,
   c. Facility rentals for public hearings on a plan review decision,
   d. Charges for laboratory analyses performed during the plan review,
   e. Other reasonable and necessary review-related expenses documented in writing by the Department and agreed to by an applicant.
8. "Solid waste facility plan" means a plan or the individual components of a plan, such as the design, operational, closure, or post-closure plan, or the demonstration of

financial responsibility as required by A.R.S. § 49-770, submitted to the Department for review and plan approval.

Historical Note

Adopted effective July 1, 1996; filed in the Office of the Secretary of State December 1, 1995 (Supp. 95-4). Amended effective May 15, 1997 (Supp. 97-2). Amended by exempt rulemaking at 8 A.A.R. 3747, effective November 1, 2002 (Supp. 02-3). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-702. Solid Waste Facility Plan Review Fees

A. With each application submitted for approval pursuant to A.R.S. § 49-762.03, the applicant shall remit an initial fee in accordance with one of the fee tables in this subsection, unless otherwise provided in subsection (B). This subsection also lists the maximum fees that the Department will bill the applicant. All fees paid shall be payable to the state of Arizona. The Department shall deposit the fees paid into the Solid Waste Fee Fund established pursuant to A.R.S. § 49-881, unless otherwise authorized or required by law.

Fee Tables

Fees for Plan Review of New Solid Waste Facilities		
	Initial	Maximum
Solid Waste Landfills	$20,000	$200,000
Non-APP requirements for Non-MSWLFs operating under an APP	$2,000	$50,000
Other Solid Waste Facilities Subject to Plan Approval	$10,000	$100,000

Fees for Modifications to Solid Waste Facility Plans		
	Initial	Maximum
Solid Waste Landfills - Type IV	$1,500	$150,000
Solid Waste Landfills - Type IV - RD&D	$15,000	$150,000
Solid Waste Landfills - Type III	$750	$75,000
Other Solid Waste Facilities Subject to Plan Approval - Type IV	$750	$75,000
Other Solid Waste Facilities Subject to Plan Approval - Type III	$500	$50,000

Fees for Review of Financial Responsibility Plans for Solid Waste Facilities		
	Initial	Maximum
Annual Review for Solid Waste Landfills	$600 Flat Fee	N/A
Other Solid Waste Facilities	$200	$5,000

B. The Department shall bill an applicant for plan review services, subject to an hourly rate, no more than monthly, but at least semi-annually. The following information shall be included in each bill:
1. The dates of the billing period;
2. After January 1, 2013, the date and number of review hours performed during the billing period itemized by employee name, position type and specifically describing:
   a. Each review task performed,
   b. The facility and operational unit involved, and
   c. The hourly rate;
3. A description and amount of any other reasonable review-related cost; and
4. The total fees paid to date, the total fees due for the billing period, the date when the fees are due, and the maximum fee for the project.

C. Within 30 days after the Department makes a final determination whether to approve or disapprove of the facility plan, or when an applicant withdraws or closes the application for review, the Department shall prepare and issue a final itemized bill of its review. If the Department determines that the actual cost of reviewing the plan is less than the initial fee and any interim fees paid, the Department shall refund the difference to the applicant within 30 days after the issuance of the approval or disapproval of the application. If the Department determines that the actual cost of plan review is greater than the corresponding amount listed, the Department shall list the amount that the applicant owes on the final itemized bill, except that the final itemized bill shall not exceed the applicable maximum fee specified in subsection (A). The applicant shall pay in full the amount due within 30 days of receipt of the final itemized bill.

D. If the final bill is not paid within the 30 days, the Department shall mail a second notice to the applicant. Failure to pay the amount due within 60 days of receipt of the notice shall result in the Department initiation of proceedings for suspension of the approval, in accordance with A.R.S. § 49-782. The suspension shall continue until full payment is received at the Department. If full payment is not received at the Department within 365 days of the date of the approval, the approval shall be revoked in accordance with A.R.S. § 49-782. The Department shall not review any further plans for an entity which has not paid all fees due for a previous review of a solid waste facility plan.

E. When determining actual cost under subsection (C), the Department shall use an hourly billing rate for all review hours spent working on the review of a plan, and add review-related costs which were incurred but are not included in the hourly billing rate.

F. The hourly rate is $122.00, beginning July 1, 2012, and shall remain in effect until it is either changed or repealed.

Historical Note

Adopted effective July 1, 1996; filed in the Office of the Secretary of State December 1, 1995 (Supp. 95-4). Corrected typographical error "facilities" in Schedules A, B, and C, to reflect Section filed in the Office of the Secretary of State December 1, 1995. Section amended effective May 15, 1997; except for special waste management plan component fees listed in Schedules A, B, and C, which become effective July 1, 1997 (Supp. 97-2). Amended by exempt rulemaking at 5 A.A.R. 3869, effective October 1, 1999 (Supp. 99-3). Amended by exempt rulemaking at 8 A.A.R. 3747, effective November 1, 2002 (Supp. 02-3). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-703. Review of Bill

A. An applicant who disagrees with the final bill received from the Department for plan review and issuance or denial of a solid waste facility plan approval under this Article may make a written request to the Director for a review of the bill and may pay the bill under protest. The request for review shall specify the matters in dispute and shall be received by the Department within 10 working days of the date of receipt of the final bill.

B. Unless the Department and applicant agree otherwise, the review shall take place within 30 days of receipt by the

Department of the request. The Director shall make a final decision as to whether the time and costs billed are correct and reasonable. The final decision shall be mailed to the applicant within 10 working days after the date of the review and is subject to appeal pursuant to A.R.S. §§ 41-1092 through 1092.12.

Historical Note

Adopted effective July 1, 1996; filed in the Office of the Secretary of State December 1, 1995 (Supp. 95-4). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-704. Repealed

Historical Note

New Section made by exempt rulemaking at 8 A.A.R. 3747, effective November 1, 2002 (Supp. 02-3). Section repealed by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-705. Repealed

Historical Note

New Section made by exempt rulemaking at 8 A.A.R. 3747, effective November 1, 2002 (Supp. 02-3). Section repealed by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-706. Repealed

Historical Note

New Section made by exempt rulemaking at 8 A.A.R. 3747, effective November 1, 2002 (Supp. 02-3). Section repealed by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

ARTICLE 8. GENERAL PERMITS

R18-13-801. General Permit Fees

A. The Department shall assess annual fees for operation under a general permit established in rule as described in the Table below.

B. In addition to the technical requirements proposed for any general permit to be included in this Article, the Department shall propose the category to be assigned to the permit according to the Table below.

C. An applicant shall pay the initial fee when approval to operate is requested. The Department shall bill an annual fee to facilities that have not notified the Department that they are no longer operating and have met the closure requirements of this Chapter.

D. For the purpose of this Article, "complex" has the meaning in A.A.C. R18-1-501. "Standard" is any facility that is not complex.

Solid Waste General Permits

Category	Initial Fee	Annual Fee
Collection, Storage and Transfer-Standard	$750	$100
Collection, Storage and Transfer-Complex	$7,500	$1,000
Treatment-Standard	$1,000	$100
Treatment-Complex	$10,000	$1,000
Disposal	$15,000	N/A

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-802. Disposal General Permit: Non-Municipal Solid Waste Landfills at Mining Operations

A. This general permit is adopted pursuant to A.R.S. § 49-706 as an alternative to plan approvals for facilities identified in A.R.S. § 49-762(A)(1). This general permit authorizes disposal of solid waste in a landfill at a mining operation if the landfill meets one of the following criteria:
1. The landfill is identified as a discharging facility in an area-wide aquifer protection permit and is located within the pollutant management area developed for that permit; or
2. The landfill is located within the pollutant management area of an area-wide aquifer protection permit but is exempt from the permit requirement because it contains only inert material as defined in A.R.S. § 49-201; or
3. The landfill is located at a site qualifying as a groundwater protection permit facility as defined in A.R.S. § 49-241.01(C) and the site has submitted an administratively complete application for an aquifer protection permit that has not been denied. Landfills that are located at mining operations and that are subject to best management practices under A.R.S. § 49-762.02(6) are required to comply with those practices and do not require coverage under this general permit.

B. Authorized and prohibited materials.
1. Disposal of the following is allowed under this general permit:
   a. Solid waste generated at the mining operation where the landfill is located; and
   b. Incidental amounts of putrescible waste generated at the mining operation where the landfill is located. For the purposes of this Section, "putrescible waste" means solid waste which contains organic matter capable of being decomposed by microorganisms and of such a character and proportion as to be capable of attracting or providing food for birds.
2. Disposal of the following is prohibited under this general permit:
   a. Used oil as defined in A.R.S. § 49-801(3).
   b. Human excreta as defined in R18-13-1102.
   c. Special waste as defined in A.R.S. § 49-851(A)(5).
   d. Biohazardous medical waste as defined in R18-13-1401.
   e. Radioactive waste material regulated for disposal pursuant to Title 12, Chapter 1 of the Arizona Administrative Code.
   f. Hazardous waste as defined in A.R.S. § 49-921(5), including hazardous waste generated by a conditionally exempt small quantity generator.
   g. Bulk or noncontainerized liquid waste.
   h. Waste containing polychlorinated biphenyls regulated for disposal pursuant to 40 CFR 761.

C. A person may operate a landfill at a mining operation under this general permit if:
1. Operation of the landfill complies with the requirements of this Section;
2. The person files a Notice of Intent to Operate that complies with subsections (D) and (E);
3. The person satisfies any requests for additional information from the Department regarding the Notice of Intent to Operate landfill operation and receives a written Authorization to Operate from the Director; and

4. The person submits the applicable fee established in R18-13-801 for the Disposal category.

D. Notice of Intent to Operate. An applicant shall submit to the Department a Notice of Intent to Operate under this general permit. The Notice shall contain:
1. The name, address, and telephone number of the applicant;
2. The name, address, and telephone number of a contact person familiar with the operation of the facility;
3. The legal description of the landfill area, latitude and longitude coordinates, a detailed figure(s) showing both the existing landfill boundary and the anticipated future waste footprint of the landfill at the time of closure, and a map showing the location of the landfill within the mining operation;
4. A description of how the applicant will meet the public access restrictions in subsection (H)(3);
5. A description of how the applicant will meet the cover requirements in subsection (H)(4);
6. A description of how the applicant will meet the methane requirements in subsection (H)(5). For landfills that have accepted waste prior to the effective date of this Section only, the applicant shall include recent methane monitoring sampling results from either:
   a. One (1) measurement per acre of landfill waste footprint; or
   b. A minimum of four (4) monitoring probes installed to the depth of refuse around the perimeter of the landfill and measured quarterly for the presence of methane gas for a period of one (1) year;
7. A narrative description of the landfill, including whether the landfill is existing or planned, the acreage of the current and planned waste footprint, estimated disposal capacity in cubic yards, expected lifespan, projected rate of waste disposal in tons per day or per week, and sources of solid waste generation;
8. A listing of any other federal or state environmental permits issued for or needed by the landfill, including any individual plan approval, APP, Groundwater Quality Protection Permit, or Notice of Disposal; and
9. A signature on the Notice of Intent to Operate certifying that the applicant agrees to comply with all terms of this general permit.

E. Existing facility application deadline. Existing facilities that qualify for coverage under subsections (A)(1), (A)(2), or (A)(3) on the effective date of this rule shall submit a Notice of Intent to Operate within 2 years of the effective date of this rule to obtain coverage. The Director may extend this date in individual cases if the facility could not have submitted an administratively complete Notice in time with reasonable diligence.

F. Authorization review.
1. Inspection. The Department may inspect the facility to determine that the applicable terms of this general permit are being met.
2. Authority to Operate issuance.
   a. If the Department determines, based on its review and an inspection, if conducted, that the facility conforms to the requirements of this general permit, the Director shall issue an Authority to Operate.
   b. The Authority to Operate authorizes the person to operate the landfill under the terms of this general permit.
3. Authority to Operate denial. If the Department determines, based on its review and an inspection, if conducted, that the facility does not conform to the requirements of this general permit, the Director shall notify the person of the decision not to issue the Authority to Operate and the person shall not operate the landfill under this general permit. The notification shall inform the person of:
   a. The reason for the denial with reference to the statute or rule on which the denial is based;
   b. The person's right to appeal the denial, including the number of days the applicant has to file a protest challenging the denial and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
   c. The person's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

G. Statutory requirements. The landfill shall be:
1. Located according to the applicable location restrictions in A.R.S. § 49-772; and
2. Subject to a restrictive covenant recorded pursuant to A.R.S. § 49-771.

H. Operational requirements.
1. Inspect the landfill at least quarterly and after large storm events for overall integrity and condition of the facility, including stormwater diversions, and conduct maintenance and repairs as needed. For the purposes of this Section, a "large storm event" is defined as one-half inch of precipitation in any 24-hour period.
2. Direct storm water runoff from surrounding areas away from the landfill.
3. Restrict public access to the landfill or to the mining operation site by signs or physical barriers, including natural barriers.
4. Apply cover at such frequencies and in such a manner as to control windblown dispersion of waste, reduce the risk of fire and impede disease vectors' access to the waste, taking into account the types and volumes of waste placed in the landfill, the frequency of disposal, and other relevant considerations. The Department may allow other techniques that are demonstrated to be equally protective as applying cover material.
5. Concentrations of methane gas shall not exceed 25% of the lower explosive limit in facility structures within 100 feet of the landfill boundary and shall not exceed the lower explosive limit beyond the landfill boundary.
6. Methane monitoring.
   a. For landfills that have accepted waste prior to the effective date of this Section only, the applicant shall include recent methane monitoring data as described in subsection (D)(6) with the Notice of Intent to Operate.
      i. If the data demonstrate that concentrations of methane gas do not exceed 25% of the lower explosive limit, then no methane monitoring is required in order to operate under this permit.
      ii. If the data demonstrate that concentrations of methane gas exceed 25% of the lower explosive limit, then annual methane monitoring using one of the data gathering methods described in subsection (D)(6) is required in order to operate under this permit. Results of such annual methane monitoring shall be submitted to the Department.
         (1) A person operating a landfill subject to annual methane monitoring may reduce monitoring to once every five years if the results of three consecutive annual sam-

pling events demonstrate that concentrations of methane gas do not exceed 25% of the lower explosive limit.
(2) A person operating a landfill subject to annual methane monitoring may request the Department to reduce or eliminate such monitoring based on any other methods approved by the Department, including consideration of the potential for methane gas to be present in facility structures within 100 feet of the landfill boundary at concentrations exceeding 25% of the lower explosive limit.
b. For landfills that have not accepted waste prior to the effective date of this Section, no methane monitoring is required in order to obtain coverage or operate under this permit.
7. Maintain an operating record that documents compliance with the conditions in this permit.

I. Recordkeeping. A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
1. Landfill construction drawings and as-built plans, if available;
2. The operating record required by subsection (H)(7); and
3. Methane monitoring results, if any, obtained under subsection (H)(6).

J. Reporting requirements. A permittee shall report the following to the Department:
1. Methane monitoring concentrations that exceed those listed in subsection (H)(5) within 7 days of the determination.
2. A change in ownership or expansion of the planned waste footprint as soon as practicable. These events shall require the filing of a new Notice of Intent to Operate.

K. General applicability. Landfills covered under this general permit:
1. Are not subject to rules adopted by the Department under A.R.S. § 49-761.
2. Are exempt from the solid waste facility plan requirements in A.R.S. §§ 49-762.03 and 49-762.04 as provided in A.R.S. § 49-762(B).

L. For the purposes of this Section, "mining" has the definition at A.R.S. § 27-301.

Historical Note

New Section made by final rulemaking at 20 A.A.R. 2679, effective November 9, 2014 (Supp. 14-3).

ARTICLE 9. SOLID WASTE MANAGEMENT PLANNING

R18-13-901. Reserved

R18-13-902. Expired

Historical Note

Section recodified from A.A.C. R18-8-402, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Section expired under A.R.S. § 41-1056(J) at 22 A.A.R. 2983, effective September 15, 2016 (Supp. 16-3).

ARTICLE 10. RESERVED

ARTICLE 11. COLLECTION, TRANSPORTATION, AND DISPOSAL OF HUMAN EXCRETA

Article 11 recodified from existing Sections in 18 A.A.C. 8, Article 6 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4).

R18-13-1101. Reserved

R18-13-1102. Definitions

A. "Chemical toilet" means a toilet with a watertight, impervious pail or tank that contains a chemical solution placed directly under the seat and a pipe or conduit that connects the riser to the tank.

B. "Department" means the Department of Environmental Quality or a local health department designated by the Department.

C. "Earth-pit privy" means a device for disposal of human excreta in a pit in the earth.

D. "Human excreta" means human fecal and urinary discharges and includes any waste that contains this material.

E. "License" means a stamp, seal, or numbered certificate issued by the Department.

F. "Pail or can type privy" means a privy equipped with a watertight container, located directly under the seat for receiving deposits of human excreta, that provides for removal of a waste receptacle that can be emptied and cleaned.

G. "Person" means the state, a municipality, district or other political subdivision, a cooperative, institution, corporation, company, firm, partnership, or individual.

H. "Sewage" means the waste from toilets, baths, sinks, lavatories, laundries, and other plumbing fixtures in residences, institutions, public and business buildings, mobile homes, and other places of human habitation, employment, or recreation.

Historical Note

Recodified from R18-8-602 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1103. General Requirements; License Fees

A. Any person owning or operating a vehicle or appurtenant equipment used to store, collect, transport, or dispose of sewage or human excreta that is removed from a septic tank or other onsite wastewater treatment facility; earth pit privy, pail or can type privy, or other type of privy; sewage vault; or fixed or transportable chemical toilet shall obtain a license for each vehicle from the Department. The person shall apply, in writing, on forms furnished by the Department and shall demonstrate that each vehicle is designed and constructed to meet the requirements of this Article.

B. A person shall operate and maintain the vehicle and equipment so that a health hazard, environmental nuisance, or violation of a water quality standard established under 18 A.A.C. 11 is not created.

C. License terms.
1. For each vehicle newly licensed after June 30, 2012, the initial license fee shall be $250 and shall be submitted with the license application. After initial licensure of a vehicle, the Department will renew the license annually after payment of a $75 fee according to subsection (C)(3). The licensee shall submit the Department approved renewal form and annual license fee to the Department no later than 30 days before expiration.
2. For those vehicles licensed before July 1, 2012, the initial license fee shall be $75 and shall be paid within 30 days of receipt of an invoice from the Department. The license shall be valid for one year. The licensee shall submit the Department approved renewal form and the annual license fee of $75 to the Department no later than 30 days before expiration.
3. Each vehicle license may be renewed if:
a. The annual license fee is paid,

b. The owner or operator is in compliance with subsection (D),
c. The vehicle is operated by the same person for the same purpose, and
d. The vehicle is maintained according to this Article.
4. The license is not transferable either from person to person or from vehicle to vehicle.
5. The license holder shall ensure that the license number is plainly and durably inscribed in contrasting colors on the side door panels of the vehicle and the rear face of the tank in figures not less than 3 inches high, and that the numbers are legible at all times.

D. Any person owning or operating a vehicle or appurtenant equipment used to collect, store, transport, or dispose of sewage or human excreta shall obtain any required permit from the local county authority in each county in which the person proposes to operate.

Historical Note

Recodified from R18-8-603 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed; new Section made by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-1104. Repealed

R18-13-1112. Sanitary Requirements

A. A person owning or operating a vehicle or appurtenant equipment to collect, store, transport, or dispose of sewage or human excreta shall ensure that:
1. Sewage and human excreta is collected, stored, transported, and disposed of in a sanitary manner and does not endanger the public health or create an environmental nuisance;
2. The vehicle is equipped with a leak-proof and fly-tight container that has a capacity of at least 750 gallons and all portable containers, pumps, hoses, tools, and other implements are stored within a covered and fly-tight enclosure when not in use;
3. Contents intended for removal are transferred as quickly as possible by means of a portable fly-tight container or suction pump and hose to the transportation container.
4. The transportation container is tightly closed and made fly-tight immediately after the contents have been transferred,
5. Portable containers are kept fly-tight while being transported to and from the vehicle,
6. Any waste dropped or spilled in the process of collection is cleaned up immediately and the area disinfected;
7. The vehicle, tools, and equipment are maintained in good repair at all times and, at the end of each day's work, all portable containers, transportation containers, suction pumps, hose, and other tools are cleaned and disinfected; and
8. All wastes collected are disposed of according to the recommendations of the local county health department and that no change in the recommended method of disposal is made without its prior approval. The local county health department shall recommend disposal by one of the following methods:
   a. At a designated point into a sewage treatment facility or sewage collection system with the approval of the owner or operator of the facility or system,
   b. By burying all wastes from chemical toilets in an area approved by the local county health department, or
   c. Into a sanitary landfill with approval of the owner or operator of the landfill and following any precautions designated by the owner and operator to protect the health of the workers and the public.

B. Open dumping is prohibited except in designated areas approved by the local county health department.

Historical Note

Recodified from R18-8-612 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1113. Repealed

Historical Note

Recodified from R18-8-613 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1114. Repealed

Historical Note

Recodified from R18-8-614 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1115. Repealed

Historical Note

Recodified from R18-8-615 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1116. Suspension and Revocation

A. If a Department inspection indicates that a licensed vehicle is not maintained and operated or work cannot be performed

according to this Article, the Department shall notify the owner in writing of all violations noted.

B. The Department shall give the owner a reasonable period of time to correct the violations and comply with the provisions of this Article. If the owner fails to comply within the time limit specified, the Department may suspend or revoke the vehicle license based on the number and severity of violations. The Department shall follow the provisions of A.R.S. Title 41, Chapter, Article 10 in any suspension or revocation proceeding.

C. The Department shall consider the revocation or suspension of a permit by a local health department for violation of this Article as grounds for revocation of the vehicle license. The local health department shall immediately suspend both the vehicle license and the permit issued by the local health department for gross violation of this Article if in the opinion of the local health department a serious health hazard or environmental nuisance exists.

D. The owner of the vehicle whose license is suspended or revoked may appeal the final administrative decision as permitted under A.R.S. § 41-1092.08.

Historical Note

Recodified from R18-8-616 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1117. Reinstatement

Upon request of the vehicle owner, the Department may reinstate a suspended or revoked vehicle license following a Department reinspection and based on an evaluation of compliance with the requirements of this Article.

Historical Note

Recodified from R18-8-617 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Amended by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1118. Repealed

Historical Note

Recodified from R18-8-618 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1119. Repealed

Historical Note

Recodified from R18-8-619 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

R18-13-1120. Repealed

Historical Note

Recodified from R18-8-620 at 8 A.A.R. 5172, effective November 27, 2002 (Supp. 02-4). Section repealed by final rulemaking at 9 A.A.R. 1356, effective June 7, 2003 (Supp. 03-2).

ARTICLE 12. WASTE TIRES

R18-13-1201. Definitions

In addition to the definitions provided in A.R.S. § 44-1301, the following definitions apply in this Article:

"Aquifer protection permit" means an authorization issued by the Department under A.R.S. § 49-241 et seq.

"Burial cell" means an area where mining waste tires are placed in or on the land for burial.

"Mining" means activities dedicated to the exploration, extraction, beneficiation, and processing, including smelting and refining, of metallic ores.

"Mining facility" means any land, building, installation, structure, equipment, device, conveyance, or area dedicated to mining.

"Mining waste tire" means an off-road tire that is greater than three feet in outside diameter that was used in mining.

"Operator" means an owner, part owner, management agency, or lessee of a mining facility, a person responsible for the overall operation or control of a mining facility, or an authorized representative of the operator.

"Person" is defined in A.R.S. § 49-201.

"Waste tire cover" means waste tires that are chopped or shredded into pieces that do not exceed four inches in diameter used for cover at a solid waste landfill.

Historical Note

Section recodified from A.A.C. R18-8-701, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final rulemaking at 7 A.A.R. 5695, effective November 27, 2001 (Supp. 01-4).

R18-13-1202. Burial of Mining Waste Tires

A. The operator shall file with the Director a one-time notice within 24 hours after commencement of burial of mining waste tires consisting of a map of the mining facility that clearly identifies the locations and dimensions of each burial cell and the estimated number of mining waste tires that will be buried in each cell. The operator shall identify each burial cell using an alphabetical or numeric identifier. If a mining facility uses a new burial cell not included in the commencement of burial notice, the operator shall notify the Department within 24 hours after commencement of burial in that cell.

B. An operator shall only permit burial of mining waste tires in areas that are, or will be, included in an aquifer protection permit issued for the mining facility. An operator shall not permit burial of mining waste tires in leach areas unless prior to burial the Department issues an aquifer protection permit covering the leach area.

C. An operator shall not permit a burial cell to be located within 10 feet of another burial cell.

D. An operator shall not permit the burial of mining waste tires unless the tires are waste generated at the mining facility or another mining facility of the same owner.

Historical Note

Section recodified from A.A.C. R18-8-702, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final rulemaking at 7 A.A.R. 5695, effective November 27, 2001 (Supp. 01-4).

R18-13-1203. Cover Requirements

A. The operator shall cover all mining industry off-road motor vehicle waste tires buried pursuant to this Article with a minimum of 6 inches of earthen material within 50 days of placement, or sooner if necessary, to prevent vector breeding or fire.

B. The operator shall place final cover over the off-road motor vehicle waste tires within 180 days after placement of the last tire which will be buried in a cell. The final cover shall consist of earthen material which is at least 3 feet deep or which complies with the requirements of the aquifer protection permit for the area where the burial cell is located.

C. The operator shall maintain final cover in compliance with this Section for as long as the mining industry off-road motor vehicle waste tires remain in the burial cell.

Historical Note

Section recodified from A.A.C. R18-8-703, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1204. Annual Report

By March 30 of each year, until a burial cell closure certification is filed with the Department, the operator of the mining facility shall file an annual report with the Director which documents the location of each burial cell established during the preceding calendar year, the alphabetical or numerical identifier of each burial cell, and the number of off-road motor vehicle waste tires which were placed in each burial cell for burial during the preceding calendar year. If no tires were placed in the burial cell for burial during the preceding year, the annual report shall so indicate.

Historical Note

Section recodified from A.A.C. R18-8-704, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1205. Burial Cell Closure Certification

An operator shall file with the Director a burial cell closure certification within 30 days after placing final cover over the mining waste tires under R18-13-1203(B). The certificate shall contain a statement by the operator that no additional tires will be buried in the burial cell and a statement by an Arizona registered engineer certifying that the cover requirements of R18-13-1203 have been met.

Historical Note

Section recodified from A.A.C. R18-8-705, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final rulemaking at 7 A.A.R. 5695, effective November 27, 2001 (Supp. 01-4).

R18-13-1206. Storage

At no time shall more than 500 mining industry off-road motor vehicle waste tires be stored at the mining facility outside of a burial cell unless the mining facility has Department approval to operate a waste tire collection facility, pursuant to A.R.S. §§ 44-1304 and 49-762.

Historical Note

Section recodified from A.A.C. R18-8-706, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1207. Maintenance of Records

For at least three years after the burial cell closure certification is filed with the Department, the mining facility operator shall maintain, at the mining facility, records which document the number of tires buried in each cell.

Historical Note

Section recodified from A.A.C. R18-8-707, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1208. Inspections

The Department may inspect a mining facility, during regular operating hours, to determine whether mining industry off-road motor vehicle waste tire burial is in compliance with this Article.

Historical Note

Section recodified from A.A.C. R18-8-708, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1209. Repealed

Historical Note

Section recodified from A.A.C. R18-8-709, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Section repealed by final rulemaking at 7 A.A.R. 5695, effective November 27, 2001 (Supp. 01-4).

R18-13-1210. Waste Tire Cover

Waste tires used as cover at a solid waste landfill shall be used according to the solid waste facility plan required by A.R.S. § 49-762. An operator shall not permit mining waste tires to be used as cover at a solid waste landfill for more than two consecutive days at a time.

Historical Note

Section recodified from A.A.C. R18-8-710, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final rulemaking at 7 A.A.R. 5695, effective November 27, 2001 (Supp. 01-4).

R18-13-1211. Registration of New Waste Tire Collection Sites; Fee

A. A new waste tire collection site shall not begin operation after July 20, 2011, until the owner or operator registers with the Department. The owner or operator shall register on a form approved by the Department that includes a statement that the site is in compliance with A.R.S. § 49-762.07(F) and A.R.S. Title 44, Chapter 9, Article 8, as applicable. The owner or operator of a new waste tire collection site that begins operation after July 20, 2011, shall pay an initial registration fee of $500 within 30 days of invoice receipt. For purposes of this Section, "new waste tire collection site" means a waste tire collection site as defined in A.R.S. § 44-1301 that did not operate as a collection site on or before July 20, 2011.

B. The owner or operator shall pay a $75 registration fee annually thereafter within 30 days of invoice receipt.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-1212. Registration of Outdoor Used Tire Sites; Fee

A. A person shall not store 100 or more used tires outdoors until the person registers with the Department. A person that stores 100 or more used tires outdoors after July 20, 2011, shall pay an initial registration fee of $500 within 30 days of invoice receipt. The person shall register on a form approved by the Department that includes a statement that the site is in compliance with A.R.S. § 49-762.07(F) and A.R.S. Title 44, Chapter 9, Article 8, as applicable.

B. A $75 registration fee shall be paid annually thereafter within 30 days of invoice receipt.

C. For the purposes of this Section:

1. "Used tire" means any tire which has been used for more than one day on a motor vehicle.
2. "Outdoors" means other than inside a building with a weatherproof roof.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

R18-13-1213. Facilities Subject to More Than One Tire Site Registration; Single Fee

A person who is required to register a tire facility under more than one of the Sections listed in subsections (1) through (3) shall register and follow procedures under each Section, but is only required to pay the registration fees under the Section with the highest fees.

1. R18-13-1211.
2. R18-13-1212.
3. R18-13-501.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

ARTICLE 13. SPECIAL WASTE

R18-13-1301. Definitions

In addition to the terms prescribed in A.R.S. § 49-851, the terms in this Article shall have the following meanings:

1. "Disposal" means discharging, depositing, injecting, dumping, spilling, leaking, or placing special waste into or on land or water so that the special waste or any constituent of the special waste may enter the environment, be emitted into the air, or discharged into any waters, including groundwater.
2. "Exception report" means a report that a generator shall submit to the Director which notifies the Director that the generator has not received a copy of the special waste manifest from the primary or alternate special waste receiving facility to which the special waste was sent pursuant to the generator's instructions on the special waste manifest, or from any special waste receiving facility to which special waste was sent.
3. "Generator" means a person whose act or process onsite produces a special waste listed in, or designated pursuant to, A.R.S. §§ 49-852, 49-854, and 49-855, or whose act or process first causes such special waste to be subject to regulation.
4. "Identification number" means an alphanumeric identifier issued by the Department to each generator, special shipper, and special waste receiving facility to be used on documents, as required pursuant to this Article, in conjunction with shipment of special waste.
5. "Off-site consignment" means a generator's delivery of materials or wastes for transport off-site to a special waste receiving facility within Arizona for treatment, storage, recycling, or disposal.
6. "Off-site" means any property located within Arizona that is not onsite as defined in A.R.S. § 49-851(3).
7. "Operator" means a person who owns and controls all or part of a special waste receiving facility, or who leases, operates, or controls such facility, a person responsible for the overall operation of such a facility, a management agency, or an authorized representative.
8. "Recycling" means recycling as defined in A.R.S. § 49-831(21).
9. "Shredder residue" means waste from the shredding of motor vehicles.
10. "Significant manifest discrepancy" means a difference of more than 10% by weight for bulk shipments, any variation in a piece count for a batch delivery, or any difference in the type of special waste received as compared to the type of special waste listed on the manifest.
11. "Special waste receiving facility" means an off-site location to which special waste is sent to be treated, recycled, stored, or disposed.
12. "Special waste manifest" means a form provided by the Department, shown as Appendix B to this Article, and used to identify the origin, quantity, composition, routing, and destination of special waste during its transportation from a generator's facility to a special waste receiving facility.
13. "Special waste shipper" means a person who transports special waste for off-site treatment, recycling, storage, or disposal.
14. "Treatment" means any method, technique, or process designed to change the physical, chemical, or biological character or composition of special waste.

Historical Note

Section recodified from A.A.C. R18-8-301, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1302. Special Waste Generator Manifesting Requirements

A. A generator shall request a generator identification number on a form provided by the Director, and shown as Appendix A to this Article, prior to shipping special waste. Within 30 days of receiving the completed form, the Director shall issue the identification number to the generator.

B. Prior to off-site consignment of special waste, the generator shall do all of the following:

1. Complete and sign the "Generator" section of a special waste manifest.
2. Obtain the handwritten signature of the special waste shipper on the special waste manifest.
3. Retain the generator's copy of the special waste manifest.
4. Give the special waste manifest and the remaining attached copies to the special waste shipper or forward it to the receiving facility.

C. Within 14 days after shipment was accepted by a special waste shipper for off-site consignment, the generator shall submit to the Director one legible copy of each special waste manifest with the generator's section completed and containing signatures of the generator and special waste shipper.

D. If, within 35 days after the date the waste was accepted by the initial special waste shipper, the generator does not receive a completed copy of this special waste manifest with the handwritten signature of the special waste receiving facility operator, the generator shall contact the special waste shipper and the special waste receiving facility operator to determine the status of the special waste.

E. The generator shall submit an exception report to the Director if the generator does not receive a completed, signed, legible copy of the special waste manifest within 45 days of the date the waste was accepted by the initial special waste shipper for off-site consignment. The exception report shall contain both of the following:

1. A cover letter, signed by the generator, which explains the efforts made to locate the special waste and the results of those efforts.
2. A legible copy of the special waste manifest which was signed by the generator and the special waste shipper and retained by the generator.

F. The generator shall retain a legible copy of each signed special waste manifest for at least three years from the date of acceptance of a shipment of special waste for off-site consignment.

G. If a person is required to have a manifest, shipping paper or shipping record under federal law for the special waste, the federal manifest, shipping paper, or shipping record may be used in lieu of the Arizona special waste manifest form so long as the federal manifest, shipping paper, or shipping record includes all the information required on the Arizona special waste manifest form.

Historical Note

Section recodified from A.A.C. R18-8-302, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1303. Special Waste Shipper Manifesting Requirements

A. A special waste shipper who receives special waste in Arizona for transport to a special waste receiving facility in Arizona shall request a special waste shipper identification number on a form provided by the Director and shown as Appendix A to this Article. The Director shall issue an identification number within 30 days of receipt of the completed form.

B. A special waste shipper shall:
1. Accept special waste for intrastate shipment to a special waste receiving facility only if the waste is accompanied by a special waste manifest which is completed and signed in accordance with the provisions of R18-13-1302.
2. Deliver the entire shipment of special waste to a special waste receiving facility as designated on the special waste manifest. If unable to deliver the special waste to the primary or alternate special waste receiving facility designated on the special waste manifest:
   a. Return the special waste to the generator, or
   b. Contact the generator and obtain instructions for an alternate special waste receiving facility and deliver the waste accordingly.

C. Shipments of special waste between facilities owned by the same generator shall be exempt from the requirements of rules adopted pursuant to A.R.S. § 49-856.

Historical Note

Section recodified from A.A.C. R18-8-303, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1304. Special Waste Receiving Facility Manifesting Requirements

A. A special waste receiving facility shall request an identification number on a form provided by the Director, and shown as Appendix A to this Article, and obtain the number prior to receiving special waste. The Department shall issue the identification number within 30 days of receipt of the completed form.

B. A special waste receiving facility shall receive only special waste for which it has a special waste manifest signed and dated by the generator and special waste shipper. In the "Facility" section of the special waste manifest, the operator of the special waste receiving facility shall do all of the following:
1. Enter the identification number.
2. Sign and date each copy of a special waste manifest to certify that the type and amount of special waste, as stated on the special waste manifest, was received.
3. Indicate on the special waste manifest any significant discrepancies between the description, volume, or weight of the special waste as stated on the special waste manifest and the special waste received.

C. After completing the "Facility" portion of the special waste manifest, the operator of the special waste receiving facility shall send one legible copy each of the signed special waste manifest to the Director and the generator within 30 days of the delivery of the special waste.

D. Upon discovery of a significant manifest discrepancy in the special waste manifest and the special waste received, the operator of the special waste receiving facility shall:
1. Contact the generator and special waste shipper to attempt to reconcile the discrepancy.
2. If the discrepancy cannot be resolved within 15 days after receiving the waste, submit a letter to the Director, along with the special waste manifest within five days. The letter shall describe the significant manifest discrepancy and all attempts to reconcile it.

Historical Note

Section recodified from A.A.C. R18-8-304, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final expedited rulemaking at 27 A.A.R. 57, with an immediate effective date of January 5, 2021 (Supp. 21-1).

R18-13-1305. Records

All records required by this Article shall be retained for at least three years. If notification of an enforcement action by the Department has been received, the records shall be retained until a final determination has been made in the matter or in accordance with the final determination.

Historical Note

Section recodified from A.A.C. R18-8-305, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

R18-13-1306. Reserved

R18-13-1307. Best Management Practices for Waste from Shredding Motor Vehicles

A. A generator of shredder residue shall follow sampling protocol as follows or submit to the Department for review and approval, at least two weeks prior to the sampling event, an alternative written sampling plan which is consistent with requirements set forth in "Test Methods for Evaluating Solid Waste," EPA SW-846, 3rd Edition, Volume II, Chapter Nine, Sampling Plan, Physical/Chemical Method, EPA, Office of Solid Waste and Emergency Response, Washington, D.C., September 1986, and updated November 1990, and no future editions or amendments, ("EPA Sampling Plan"), herein incorporated by reference and on file with the Department and the Office of the Secretary of State:
1. Sample collection shall be done in accordance with one of the following:
   a. Sampling procedure 1, consisting of both of the following steps:
      i. The generator shall collect samples from a shredder residue sampling pile which shall consist of the average amount of shredder residue from eight hours of operation of the shredder. The shredder residue sampling pile shall be formed into a square shape for sampling purposes. Refer to Exhibit 1.
      ii. One 2,000-gram sample shall be collected from each sample point as indicated in Exhibit 1. Samples from sample points A-1, B-1, and C-1 shall be collected from the top of the pile. Samples from sample points A-2, B-2, and C-2 shall be collected from the base of the pile. A sample from sample point C-3 shall be collected at the vertical midpoint at the center of the pile. The seven 2,000-gram samples shall be numbered consecutively. Three of the seven 2,000-gram samples shall then be chosen at random by selecting numbers from a calculator pro-

grammed to generate random numbers. The samples shall be analyzed for the constituents and at the frequencies listed in Table A of this Section.

b. Sampling procedure 2, consisting of both of the following steps:
   i. The generator shall collect seven 2,000-gram samples during or immediately following the normal generation of shredder residue. For each sample, shredder residue shall be collected for 8 to 12 minutes, during which a minimum of 500 pounds shall be generated. This process shall be performed seven times to create seven 500-pound amounts. Each 500-pound amount shall be formed into a square shape for sampling purposes. Refer to Exhibit 1.
   ii. Twenty 100-gram samples shall be collected from throughout each of the seven 500-pound piles generated. Upon completion of collection, all 20 samples from each of the seven 500-pound piles shall be combined together into seven separate 2,000-gram samples and numbered consecutively. Three of the seven 2,000-gram samples shall then be chosen at random by selecting numbers from a calculator programmed to generate random numbers. The samples shall be analyzed for the constituents and at the frequencies listed in Table A of this Section.

2. Each 2,000 grams of shredder residue collected shall include both large and small particles, in proportion to shredder residue generated. The generator shall use a container which is large enough to hold the entire amount of shredder residue collected from each sample point.
3. The generator shall comply with requirements for sample preservation, temperature, and holding times, as set forth in the EPA Sampling Plan.
4. Each one of the three 2,000-gram samples selected at random shall be divided into four equal 500-gram portions and a 200-gram subsample shall be taken from each of the four equal 500-gram portions. Each subsample shall then be passed through a 9.5mm screen. All particles which do not pass through the 9.5mm screen shall be hand cut until small enough to pass through the screen. All four 200-gram subsamples shall then be remixed together and redivided into four equal 200-gram portions. The following amounts shall be taken for constituent sampling:
   a. 10-15 grams per 200-gram subsample for a total of 40-60 grams per 2,000-gram sample for Polychlorinated Biphenyls (PCB) analysis as set forth in subsection (A)(10).
   b. 25 grams per 200-gram subsample for a total of 100 grams per sample for toxicity characteristic leaching procedure extractions for contaminants as set forth in 40 CFR 261.24, Table 1 (incorporated by reference in R18-8-261(A)), as set forth in subsection (A)(7).
   c. 1.25 grams per 200-gram subsample for a total of 5 grams per 2,000-gram sample for extraction fluid determination.
5. Each constituent sample shall be put into a container. Container labeling and chain-of-custody documentation shall be consistent with the requirements in the EPA Sampling Plan.
6. The constituent samples shall be analyzed by a laboratory licensed by the Arizona Department of Health Services in accordance with A.R.S. § 36-495.
7. Of the three samples selected at random, one sample amount required by subsection (A)(4)(b) shall be analyzed for the extractable heavy metals arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver, as set forth in 40 CFR 261.24, Table 1. The remaining two samples shall each be analyzed for extractable cadmium and lead.
8. If the results of all three of the analyses for any extractable heavy metal in subsection (A)(7) are below the Regulatory Level of the Maximum Concentration of Contaminants for the Toxicity Characteristic as set forth in 40 CFR 261.24, Table 1, the simple arithmetic mean of the extractable cadmium and lead and the single analysis for the remaining six extractable heavy metals shall be used to determine if the sampled shredder residue will be classified as hazardous waste.
9. If the analyses of any one of three selected samples exceeds the regulatory level as set forth in 40 CFR 261.24, Table 1, an additional subsample from the sample in question shall be subjected to confirmation analysis. If the confirmation sample analysis totals are in excess of the regulatory level as set forth in 40 CFR 261.24, Table 1, the remaining four of the original seven samples shall be analyzed for those extractable heavy metals which exceed the regulatory level as set forth in 40 CFR 261.24, Table 1. The simple arithmetic mean of the results of all seven samples shall be used to determine if the sampled shredder residue will be classified as hazardous waste.
10. The three samples selected at random shall be analyzed for PCB concentration in the amounts required by subsection (A)(4)(a). If the samples contain concentrations of PCB less than 50 mg/kg, the simple arithmetic mean of the three samples shall be used for reporting to the Director. If any one of the three samples contains concentrations of PCB greater than 50 mg/kg, an additional subsample from the sample in question shall be subjected to confirmation analysis. If the PCB concentration for that sample exceeds 50 mg/kg, the remaining four of the original seven samples shall be analyzed for PCB, in amounts required by subsection (A)(4)(a), and the simple arithmetic mean of all the samples shall be used to determine if the sampled shredder residue will be classified as hazardous waste.

B. Shredder residue determined to be hazardous waste shall be managed in accordance with A.R.S. § 49-921 et seq. and R18-8-260 et seq.

C. The generator shall do all of the following:
1. Secure the facility to prevent unauthorized entry;
2. Cover or otherwise manage the shredder residue pile to prevent wind dispersal;
3. Place the shredder residue pile on a surface with a permeability coefficient equal to or less than 1×10^{-7} cm/s;
4. Design, construct, operate, and maintain a run-on control system capable of preventing flow onto the waste pile during peak discharge from, at a minimum, a 25-year storm;
5. Design, construct, operate, and maintain a run-off management system to collect and control at a minimum, the water volume resulting from a 24-hour, 25-year storm;
6. Provide collection and holding facilities for run-on and run-off control systems, which shall have a permeability coefficient equal to or less than 1×10^{-7} cm/s;
7. Record the date accumulation of shredder residue begins.

D. Shredder residue shall be treated, recycled, sorted, stored, or disposed at a Department-approved special waste facility approved in accordance with A.R.S. § 49-857. A facility which seeks to become a special waste facility shall submit a special waste management plan to the Department to ensure compliance with subsection (C).

E. A generator shall not store shredder residue for longer than 90 days. A special waste facility shall not store shredder residue for longer than one year.

F. The owner or operator of a special waste facility shall pay, to the Department, the fees required by A.R.S. §§ 49-855(C)(2) and 49-863 as follows:

1. $1.49 per cubic yard of uncompacted shredder residue; or
2. $3.38 per cubic yard of compacted shredder residue received; or
3. $4.50 per ton; and
4. Not more than $45,000 per generator site per year for shredder residue that is transported to a facility regulated by the Department for treatment, storage or disposal.

G. Shredder residue which has been determined to be nonhazardous pursuant to this Section shall be transported in accordance with the requirements for transportation of garbage as set forth in R18-13-310.

Historical Note

Section recodified from A.A.C. R18-8-307, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2).

Table A. Target Analyses and Sampling Frequency

Constituents	Frequency
* TCLP Metals	Quarterly
* TCLP Volatiles	Annually
* TCLP Semi-volatiles	Annually
Polychlorinated Biphenyls (PCB)	Quarterly

* Toxicity Characteristic Leaching Procedure (TCLP)

Appendix A. Application for Arizona Special Waste Identification Number

Please refer to the instructions on the accompanying page before completing this form.	**ADEQ**	Application for Arizona Special Waste Identification Number	Date Received: (Do not write here official use only)

1. Mark Appropriate Box:

☐ Generator ☐ Shipper ☐ Receiving Facility ☐ Multiple

2. Company/Agency Name

3. Company/Agency Address (Physical Address, not P.O. Box or Route Number).

4. Company/Agency Mailing Address (If different than above).

5. Company/Agency Contact (Person to contact regarding special waste activities).
Name:

Job Title: Phone Number: ( )

6. Company/Agency Contact Address.

7. Name and Address of Company's/Agency's Legal Owner.

Phone Number: ( )

Certification: I certify under penalty of law that I have personally examined and am familiar with the information submitted in this form and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of civil penalties.

8. Signature: 9. Name and Official Title: (Type or Print) 10. Date Signed:

11. Please list special wastes generated, transported, stored, or received by applicant.

Instructions for the Completion of the ADEQ Application for the Arizona Special Waste Identification Number.

1. Place an "X" in the appropriate box indicating which type of operation you will be performing.
2. Enter the complete company/agency name.
3. Enter the complete address. Do not use P.O. Box or Route Number.
4. Enter the complete address if it is different than the address listed in item 3.
5. Enter the name, job title, and complete phone number of the person who will act as the company/agency contact.
6. Enter the complete address of the company/agency contact listed in item 5.
7. Enter the name, complete address, and phone number of the company's/agency's legal owner.
8. Enter the signature of the person who will assume the responsibility of completion of this form and its contents.
9. Enter the name and title of the responsible person listed in item 8.
10. Enter the date that the responsible person signed the document.
11. List all special wastes that the applicant generates, transports, stores, or receives.

Historical Note

Appendix A recodified from 18 A.A.C. 8, Article 3, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

Appendix B. Special Waste Manifest

ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY

SPECIAL WASTE MANIFEST

Generator

1. Generator's AZ ID No.		Emergency Response Notification Phone Number			
3. Generator's Name and Mailing Address Generator's Phone Number and Area Code					
4. Transporter 1 Company Name and Mailing Address		Transporter's AZ ID No. Transporter's Phone No.			
5. Transporter 2 Company Name and Mailing Address		Transporter's AZ ID No. Transporter's Phone No.			
6. Primary Receiving Facility Name and Address (physical site location, if different)		Facility's AZ ID No. Facility's Phone No.			
7. Alternate Receiving Facility Name and Address (physical site location, if different)		Facility's AZ ID No. Facility's Phone No.			
8. U.S. DOT description, (if applicable) (Non-DOT regulated materials enter shipping name, physical state and description of all contents of waste	Containers No.		Total Quantity	Unit Wt/Vol	
	Mark "X" if Haz Mat				
9. Additional information on transportation, treatment, storage, or disposal					
10. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled and are in all respects in proper condition for transport by highway according to applicable international and governmental regulations.					Date
Printed/Typed Name	Signature				

Transport

11. Transporter 1 Acknowledgment of Receipt of Materials		Date
Printed/Typed Name	Signature	
12. Transporter 2 Acknowledgment of Receipt of Materials		Date
Printed/Typed Name	Signature	

Facility

13. Discrepancy Indication Space		
14. Facility Owner or Operator: Certification of receipt of special waste materials covered by this manifest except as noted in above item.		Date
Printed/Typed Name	Signature	

Instructions for the Completion of the ADEQ Special Waste Manifest

1. Enter the generator's Arizona Identification Number in box 1.
2. Enter the Emergency Response Notification Phone Number in box 2.
3. Enter the generator's name and complete mailing address, including city, state, and zip code, along with the generator's phone number, including the area code, in box 3.
4. Enter the transporter's name, transporter's Arizona identification number, and telephone number, including the area code, in box 4.
5. Complete this box if a second transporter is to be used to transport the special waste to the receiving facility, following the instructions outlined in number 4 in box 5.
6. Enter the name, address, and physical site location of the primary special waste receiving facility. In the appropriate spaces, include the facility's Arizona identification number and the telephone number, including the area code, in box 6.
7. Enter the name, address, and physical site location of the alternate special waste receiving facility. In the appropriate spaces, include the facility's Arizona identification number and the telephone number, including the area code, in box 7.
8. Enter United States Department of Transportation description (Including proper shipping name, hazard class, and identification number, if applicable) (For all non-Department of Transportation-regulated materials, enter the proper name, physical state, and description of all contents of the waste).

   Mark an "X" in this column if waste is classified as a hazardous material.

   Container Number
   Enter the number of containers being shipped for each waste.

   Total Quantity
   Numerical value representing the number of containers multiplied by the container size. Answer will be listed in pounds, gallons, or cubic yards.

   Unit weight or volume
   P - Pounds
   G - Gallons
   Y - Cubic Yards
9. Use this space to indicate special transportation, treatment, storage, or disposal information. Emergency response telephone numbers or similar information may be included here in box 9.
10. Print or type the generator's name followed by their signature and date in box 10.
11. Print or type the primary transporter's name followed by their signature and date in box 11.
12. Print or type the secondary transporter's name followed by their signature and date in box 12.
13. Indicate significant discrepancies in this box. Significant manifest discrepancy is defined as "a difference of more than 10% by weight for bulk shipments, any variation in a piece count for batch deliveries, or an obvious difference in a special waste type is discovered by inspection or analysis between the type or amount of a special waste designated in a special waste manifest, and the type or amount received by a special waste receiving facility" in box 13.
14. Print or type the receiving facility's owner or operator name followed by their signature and date in box 14.

Historical Note

Appendix B recodified from 18 A.A.C. 8, Article 3, filed in the Office of the Secretary of State September 29, 2000 (Supp. 00-3).

ARTICLE 14. BIOHAZARDOUS MEDICAL WASTE AND DISCARDED DRUGS

R18-13-1401. Definitions

In addition to the definitions in A.R.S. § 49-701, the following definitions apply in this Article:

1. "Alternative treatment technology" means a treatment method other than autoclaving or incineration that achieves the treatment standards described in R18-13-1415.
2. "Approved medical waste facility plan" means the document that has been approved by the Department under A.R.S. § 49-762.04, and that authorizes the operator to accept biohazardous medical waste at its solid waste facility.
3. "Autoclaving," means using a combination of heat, steam, pressure, and time to achieve sterile conditions.
4. "Biohazardous medical waste" is composed of one or more of the following:
   a. Cultures and stocks: Discarded cultures and stocks generated in the diagnosis, treatment or immunization of a human being or animal or in any research relating to that diagnosis, treatment or immunization, or in the production or testing of biologicals.
   b. Human blood and blood products: Discarded products and materials that are saturated and/or dripping with human blood or caked with dried human blood, including items that would release blood in a liquid or semi-liquid form if compressed or broken, and items that contain serum, plasma, and other blood components. An item would be considered caked if it could release flakes or particles when handled.
   c. Human pathological wastes: Discarded organs, tissues, and body parts, including cerebrospinal fluid, synovial fluid, pleural fluid, peritoneal fluid, pericardial fluid and amniotic fluid, removed during surgery or other medical procedures, including autopsy,

obstetrics, or emergency care. Human pathological wastes do not include the head, spinal column, hair, nails, or teeth.

d. Medical sharps: Discarded sharps that pose a stick hazard that have come into contact with blood, blood products, or pathological waste. Examples include hypodermic needles; scalpel blades; and needles attached to tubing or syringes.

e. Research animal wastes: Animal carcasses, body parts, and bedding of animals that have been infected with agents that produce, or may produce, human infection.

f. Tattoo and body modification waste: any waste generated during the course of physically altering a human being, including tattooing, ear piercing, or any other process where a foreign object is used to cut or pierce the skin.

g. Trauma scene waste: any crime scene, accident, or trauma clean-up wastes generated by individuals or commercial entities hired to clean crime scenes or accidents, such as sharps and materials that contain human blood and blood products.

5. "Biologicals" means preparations made from living organisms or their products, including vaccines, cultures, or other biological products intended for use in diagnosing, immunizing, or treating humans or animals or in research pertaining to these activities.
6. "Biological indicator" means a representative microorganism used to evaluate treatment efficacy.
7. "CFR" means the Code of Federal Regulations.
8. "Chemotherapy waste" means any discarded material that has come in contact with an agent that kills or prevents the reproduction of malignant cells.
   a. Trace contaminated chemotherapy waste includes: masks, empty drug vials, gloves, gowns, IV tubing, empty IV bags/bottles, and spill clean-up materials.
   b. Bulk chemotherapy waste, such as full expired vials of chemotherapy drugs, is not biohazardous medical waste. Bulk chemotherapy waste may be considered hazardous wastes and must be handled according to the hazardous waste regulations if deemed a hazardous waste by the generator.
9. "Dedicated vehicle" means a motor vehicle or trailer that is pulled by a motor vehicle used by a transporter for the purpose of transporting biohazardous medical waste in conjunction with other compatible waste according to the USDOT requirements, listed at 49 CFR 177.848, revised as of October 1, 2020, and no future editions or later amendments, is incorporated by reference in this Section and on file with ADEQ.
10. "Department-approved facility" means a storage, transfer, treatment, or disposal facility that has undergone plan approval as described in R18-13-1410.
11. "Discarded drug" means any prescription medicine or over-the-counter medicine used in the diagnosis, treatment, or immunization of a human being or animal, that the generator intends to abandon. The term does not include hazardous waste or controlled substances regulated by the United States Drug Enforcement Agency.
12. "Disposal facility" means a municipal solid waste landfill that has been approved by the Department under A.R.S. § 49-762.04 to accept untreated biohazardous medical waste for disposal.
13. "Emergency situations" include those situations where following location restrictions may result in an imminent threat to human health and the environment.
14. "Facility plan" has the meaning given to it in A.R.S. § 49-701.
15. "Generator" means a person whose act or process produces biohazardous medical waste, or a discarded drug, or whose act first causes medical waste or a discarded drug to become subject to regulation.
16. "Hazardous waste" has the meaning prescribed in A.R.S. § 49-921.
17. "Health care worker" means, with respect to R18-13-1403(B)(5), a person who provides health care services at an off-site location that is none of the following: a residence, a facility where health care is normally provided, or a facility licensed by the Arizona Department of Health Services.
18. "Improper disposal of biohazardous medical waste" means the disposal by a person of untreated or inadequately treated biohazardous medical waste at any place that is not approved to accept untreated biohazardous medical waste.
19. "Independent testing laboratory" means a testing laboratory independent of oversight activities by a provider of alternative treatment technology.
20. "Medical sharps container" means a vessel that is rigid, puncture resistant, leak proof, and equipped with a cap capable of being securely closed.
21. "Medical waste," as defined in A.R.S. § 49-701, means "*any solid waste which is generated in the diagnosis, treatment or immunization of a human being or animal or in any research relating to that diagnosis, treatment or immunization, or in the production or testing of biologicals, and includes discarded drugs but does not include hazardous waste as defined in A.R.S. § 49-921 other than conditionally exempt small quantity generator waste.*"
22. "Medical waste treatment facility" or "treatment facility" means a solid waste facility approved by the Department under A.R.S. § 49-762.04 to accept and treat biohazardous medical waste from off-site generators.
23. "Multi-purpose vehicle" means any motor vehicle operated by a health care worker in the course of providing health care services, where the general purpose is the non-commercial transporting of people and the hauling of goods and supplies, but not solid waste. A multi-purpose vehicle is limited to hauling biohazardous medical waste generated at a location other than a hospital or clinic.
24. "Off site" means a location that does not fall within the definition of "on site" contained in A.R.S. § 49-701.
25. "Packaging" or "properly packaged" means the use of a container or a practice under R18-13-1407.
26. "Putrescible waste" means waste materials capable of being decomposed rapidly by microorganisms.
27. "Radioactive material" has the meaning under A.R.S. § 30-651.
28. "Secure" means to lock out or otherwise restrict access to unauthorized personnel.
29. "Spill" means either of the following:
   a. Any release of biohazardous medical waste from its package while in the generator's storage area.
   b. Any release of biohazardous medical waste from its package or the release of packaged biohazardous medical waste by the transporter at a place or site that is not a medical waste treatment or disposal facility.
30. "Store" or "storage" means, in addition to the meaning under A.R.S. § 49-701, either of the following:
   a. The temporary holding of properly packaged biohazardous medical waste by a generator in a desig-

nated accumulation area awaiting collection by a transporter.
b. The temporary holding of properly packaged biohazardous medical waste by a transporter or a treater at an approved medical waste storage facility or treatment facility.
31. "Technology provider" means a person that manufactures or a vendor who supplies alternative medical waste treatment technology.
32. "Tracking document" means the written instrument that signifies acceptance of biohazardous medical waste by a transporter, or a transfer, storage, treatment, or disposal facility operator.
33. "Transportation management plan" means the transporter's written plan consisting of both of the following:
a. The procedures used by the transporter to minimize the exposure to employees and the general public to biohazardous medical waste throughout the process of collecting, transporting, and handling.
b. The emergency procedures used by the transporter for handling spills or accidents.
34. "Transporter" means a person engaged in the business of hauling of biohazardous medical waste from the point of generation to a Department-approved storage facility or to a Department-approved treatment or disposal facility.
35. "Treat" or "treatment" means, with respect to the methods used to render biohazardous medical waste less infectious: incinerating, autoclaving, or using the alternative treatment technologies prescribed in this Article.
36. "Treated medical waste" means biohazardous medical waste that has been treated and that meets the treatment standards of R18-13-1415. Treated medical waste that requires no further processing is considered solid waste.
37. "Treater" means a person, also known as an operator, who receives solid waste facility plan approval for the purpose of operating a medical waste treatment facility to treat biohazardous medical waste that is generated off site.
38. "Treatment certification statement" means the written document provided by either a generator who treats biohazardous medical waste on site or by a treater to inform a solid waste disposal or recycling facility that biohazardous medical waste has been treated as prescribed in this Article, and therefore is no longer subject to regulation under this Article.
39. "Treatment standards" mean the levels of microbial inactivation, prescribed in R18-13-1415, to be achieved for a specific type of biohazardous medical waste.
40. "USDOT" means the United States Department of Transportation.
41. "Universal biohazard symbol" or "biohazard symbol" means a representation that conforms to the design shown in 29 CFR 1910.145(f)(8)(ii) (Office of the Federal Register, National Archives and Records Administration, July 1, 1998) and which is incorporated by reference in this rule. This incorporation does not include any later amendments or editions. Copies of the incorporated material are available for inspection at the Department of Environmental Quality and the Office of the Secretary of State.
42. "Vehicle not dedicated to the transportation of biohazardous medical waste but which is engaged in commerce" means a motor vehicle or a trailer pulled by a motor vehicle whose primary purpose is the transporting of goods that are not solid waste or biohazardous medical waste and that is used by a transporter for the temporary transportation of biohazardous medical waste.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1402. Applicability

A. This Article applies to the following:
1. A generator who treats biohazardous medical waste on site, before disposing of it as treated medical waste, and to any equipment used for that purpose. Specific requirements for a generator who treats on site are prescribed in R18-13-1405.
2. A generator who contracts with a medical waste treatment facility for the purpose of treating biohazardous medical waste. Specific requirements for such a generator are prescribed in R18-13-1406.
3. A person who transports biohazardous medical waste and any motor vehicle used for that purpose.
4. A medical waste treatment facility operator, a medical waste treatment facility, and any equipment used for medical waste treatment.
5. A person who provides alternative medical waste treatment technology for the purpose of treatment, and to any technology used for treatment.
6. A person in possession of biohazardous medical waste if the waste does not meet the treatment standards in R18-13-1415.
7. An operator of a Department-approved disposal facility who accepts untreated biohazardous medical waste.
8. A person who generates medical sharps in the preparation of human remains.
9. A person who generates medical sharps in the treatment of humans or animals.
10. A generator of discarded drugs not returned to the manufacturer.

B. The requirements for biohazardous medical waste set out for collection do not apply to the manner in which the generator collects or handles material prior to that material becoming biohazardous medical waste.

C. Provisions in this Article requiring placement in Department-approved facilities do not restrict the right to place materials in facilities that are out of state or in Indian Country.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1403. Exemptions; Partial Exemptions

A. The following persons are exempt from the requirements of this Article:
1. Law enforcement personnel handling biohazardous medical waste for law enforcement purposes.
2. A person in possession of medical waste that is regulated by a state or federal agency due to its radioactive nature.
3. A person who returns unused medical sharps to the manufacturer.
4. A household generator residing in a private, public, or semi-public residence who generates biohazardous medical waste in the administration of self care or the agent of the household generator who administers the medical

care. This exemption does not apply to the facility in which the person resides if that facility is licensed by the Arizona Department of Health Services.
5. A generator that separates medical devices from the medical waste stream that are sent out for re-processing and returned to the generator.
6. A person in possession of human bodies regulated by A.R.S. Title 36.

B. The following are conditionally exempt from the requirements of this Article:
1. A person who prepares human corpses, remains, and anatomical parts that are intended for interment or cremation. However, medical sharps must be disposed of as prescribed by this Article.
2. A person who operates an emergency rescue vehicle, an ambulance, or a blood service collection vehicle in the course of providing medical services if the biohazardous medical waste is returned to the home facility for disposal. This facility is considered to be the point of generation for packaging, treatment, and disposal.
3. A person who discharges liquid and semi-liquid biohazardous medical wastes, excluding cultures and stocks, to the sanitary sewer system if the operator of the wastewater sewer system and treatment facility allows, permits, authorizes, or otherwise approves of the discharges.
4. Hazardous waste regulated by A.R.S. Title 49, Chapter 5.
5. A health care worker who uses a multi-purpose vehicle in the conduct of routine health care business other than transporting waste is exempt from the requirements of R18-13-1409 if the health care worker complies with all of the following:
   a. Packages the biohazardous medical waste according to R18-13-1407.
   b. Secures the packaged biohazardous medical waste within the vehicle so as to minimize spills.
   c. Transports the biohazardous medical waste to the place of business or to a medical waste treatment or disposal facility.
   d. Cleans the vehicle when it shows visible signs of contamination.
   e. Secures the vehicle to prevent unauthorized contact with the biohazardous medical waste.
6. A person who transports biohazardous medical waste between multiple properties separated by a public thoroughfare and which is owned or operated by the same owner or governmental entity is exempt from the requirements of R18-13-1409 if the person complies with R18-13-1403(B)(5)(a) through (e).
7. A hospital that chooses to accept medical sharps from staff physicians who generate medical sharps in a private practice is exempt from the requirement to obtain facility plan approval as long as the hospital collects medical sharps for off-site treatment or disposal.

C. The following are exempt from some of the requirements of this Article:
1. A generator who treats biohazardous medical waste on site and who accepts for treatment medical waste described in R18-13-1403(A)(4) is exempt from the requirement to obtain solid waste facility plan approval prescribed in R18-13-1410.
2. A generator who self-hauls biohazardous medical waste to a Department-approved medical waste treatment, storage, transfer, or disposal facility is exempt from the requirements of R18-13-1409 if the generator complies with R18-13-1403(B)(5)(a) through (e).

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1404. Repealed

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Repealed by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1405. Biohazardous Medical Waste Treated On Site

A. A person who treats biohazardous medical waste on site shall use incineration, autoclaving, or an alternative medical waste treatment method that meets the treatment standards prescribed in R18-13-1415.

B. A generator who uses:
1. Incineration shall follow the requirements of subsections (C), (F), (G), and (H),
2. Autoclaving shall follow the requirements of subsections (D), (F), (G) and (H), or
3. An alternative treatment method shall follow the requirements of subsections (E), (F), (G), and (H).

C. A generator who incinerates biohazardous medical waste on site shall comply with all of the following requirements:
1. Obtain a permit if required by the local or state air quality agency having jurisdiction.
2. Reduce the biohazardous medical waste, excluding metallic items, into carbonized or mineralized ash.
3. Determine whether incinerator ash is hazardous waste as required by hazardous waste rules promulgated under A.R.S. Title 49, Chapter 5.
4. Dispose of the non-hazardous waste incinerator ash at a Department-approved municipal solid waste landfill.

D. A generator who autoclaves biohazardous medical waste on site shall comply with all of the following requirements:
1. Further process by grinding, shredding, or any other process, any recognizable animals and human tissue, organs, or body parts, to render such waste non-recognizable and ensure effective treatment.
2. Operate the autoclave at the manufacturer's specifications appropriate for the quantity and density of the load.
3. Keep records of operational performance levels for six months after each treatment cycle. Operational performance level recordkeeping includes all of the following:
   a. Duration of time for each treatment cycle.
   b. The temperature and pressure maintained in the treatment unit during each cycle.
   c. The method used to determine treatment parameters in the manufacturer's specifications.
   d. The method in manufacturer's specifications used to confirm microbial inactivation and the test results.
   e. Any other operating parameters in the manufacturer's specifications for each treatment cycle.
4. Keep records of equipment maintenance for the duration of equipment use that include the date and result of all equipment calibration and maintenance.

E. A generator who uses an alternative treatment method on site shall comply with all of the following requirements:
1. Use only alternative treatment methods registered under R18-13-1414.
2. Further process by grinding, shredding, or any other process, any recognizable animals and human tissue, organs,

or body parts, to render this waste non-recognizable and ensure effective treatment.
3. Follow the manufacturer's specifications for equipment operation.
4. Supply upon request all of the following:
   a. The Departmental registration number for the alternative medical waste treatment technology and the type of biohazardous medical waste that the equipment is registered to treat.
   b. The equipment specifications that include all of the following:
      i. The operating procedures for the equipment that enable the treater to comply with the treatment standards described in this Article for the type of waste treated.
      ii. The instructions for equipment maintenance, testing, and calibration that enable the treater to comply with the treatment standards described in this Article for the type of waste treated.
5. Maintain a training manual regarding the proper operation of the equipment.
6. Maintain a treatment record consisting of a log of the volume of medical waste treated and a schedule of calibration and maintenance performed under the manufacturer's specifications.
7. Maintain treatment records for six months after the treatment date for each load treated.
8. Maintain the equipment specifications for the duration of equipment use.

F. A generator shall do all of the following:
1. Package the treated medical waste according to the waste collection agency's requirements;
2. Attach to the package or container a label, placard, or tag with the following words: "This medical waste has been treated as required by the Arizona Department of Environmental Quality standards" before placing the treated medical waste out for collection as a general solid waste. The generator shall ensure that the treated medical waste meets the standards of R18-13-1415.
3. Upon request of the solid waste collection agency or municipal solid waste landfill, provide a certification that the treated medical waste meets the standards of R18-13-1415.
4. Make treatment records available for Departmental inspection upon request.

G. A generator of medical sharps shall handle medical sharps as prescribed in R18-13-1419.

H. A generator of chemotherapy waste, cultures and stocks, or animal waste shall handle that waste as prescribed in R18-13-1420.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3).

R18-13-1406. Biohazardous Medical Waste Transported Off Site for Treatment

A. A generator of biohazardous medical waste shall cause the waste to first be packaged as prescribed in this Article and shall subsequently either self-haul or store the waste as provided under R18-13-1408 and set the waste out for collection by a properly licensed transporter under R18-13-1409.

B. A generator shall obtain a copy of the tracking document signed by the transporter signifying acceptance of the biohazardous medical waste. A generator shall keep a copy of the tracking document for the period required under the USDOT requirements, as listed in 49 CFR 172.201, revised as of October 1, 2020, and no future editions or later amendments, is incorporated by reference in this Section and on file with ADEQ. The tracking document shall contain all of the following information:
1. Name and address of the generator, transporter, and medical waste treatment, storage, transfer, or disposal facility, as applicable.
2. Quantity of biohazardous medical waste collected by weight, volume, or number of containers.
3. Identification number attached to bags or containers, as specified as by the USDOT requirements, as listed in 49 CFR 172.300 through 172.338, revised as of October 1, 2020, and no future editions or later amendments, is incorporated by reference in this Section and on file with ADEQ.
4. Date the biohazardous medical waste is collected.

C. A generator of chemotherapy waste, cultures and stocks, or animal waste shall handle the waste as prescribed in R18-13-1420.

D. A generator of medical sharps shall handle the waste as prescribed in R18-13-1419.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1407. Non-Sharps Packaging

A. A generator who sets biohazardous medical waste that does not include sharps out for collection for off-site treatment or disposal shall package the biohazardous medical waste in either of the following:
1. A red disposable plastic bag that is:
   a. Leak resistant,
   b. Impervious to moisture,
   c. Of sufficient strength to prevent tearing or bursting under normal conditions of use and handling,
   d. Sealed to prevent leakage during transport, and
   e. Placed in a secondary container. This container shall be constructed of materials that will prevent breakage of the bag in storage and handling during collection and transportation and bear the universal biohazard symbol. The secondary container may be either disposable or reusable.
2. A reusable container that bears the universal biohazard symbol and that is:
   a. Leak-proof on all sides and bottom, closed with a fitted lid, and constructed of smooth, easily cleanable materials that are impervious to liquids and resistant to corrosion by disinfection agents and hot water, and
   b. Used for the storage or transport of biohazardous medical waste and cleaned after each use unless the inner surfaces of the container have been protected by disposable liners, bags, or other devices removed with the waste. "Cleaning" means agitation to remove visible particles combined with one of the following:
      i. Exposure to hot water at a temperature of at least 180° F for a minimum of 15 seconds.
      ii. Exposure to an EPA-approved chemical disinfectant used under established protocols and regulations.
      iii. Any other method that the Department determines is acceptable, if the determination of

acceptability is made in advance of the cleaning.

B. A generator shall handle any container used for the storage or transport of biohazardous medical waste that is not capable of being cleaned as described in subsection (A)(2)(b), or that is disposable packaging, as biohazardous medical waste.

C. A generator shall not use reusable containers described in subsection (A)(2) for any purpose other than the storage of biohazardous medical waste.

D. A generator shall not reuse disposable packaging and liners and shall manage such items as biohazardous medical waste.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1408. Storage

A. A generator may place a container of biohazardous medical waste alongside a container of solid waste if the biohazardous medical waste is identified and not allowed to co-mingle with the solid waste. The storage area shall not be used to store substances for human consumption or for medical supplies.

B. Once biohazardous medical waste has been packaged for shipment off site, a generator shall provide a storage area for biohazardous medical waste until the waste is collected and shall comply with both of the following requirements:

1. Secure the storage area in a manner that restricts access to, or contact with the biohazardous medical waste to authorized persons.
2. Display the universal biohazard symbol and post warning signs worded as follows for medical waste storage areas: (in English) "CAUTION -- BIOHAZARDOUS MEDICAL WASTE STORAGE AREA -- UNAUTHORIZED PERSONS KEEP OUT" and (in Spanish) "PRECAUCION -- ZONA DE ALMACENAMIENTO DE DESPERDICIOS BIOLOGICOS PELIGROSOS -- PROHIBIDA LA ENTRADA A PERSONAS NO AUTORIZADAS."

C. Beginning at the time the waste is set out for collection, a generator who stores biohazardous medical waste shall comply with all of the following requirements:

1. Putrescible biohazardous medical waste may be kept unrefrigerated up to 72 hours if it would not otherwise cause odor detectable beyond the property line or attract vermin.
2. Refrigerate at 40° F or less from hour 72 through day 90 putrescible biohazardous medical waste kept for up to 90 days.
3. Nonputrescible biohazardous medical waste may be kept unrefrigerated for up to 90 days.
4. Store biohazardous medical waste for 90 days or less unless the generator has obtained facility plan approval under A.R.S. § 49-762.04 and is in compliance with the design and operational requirements prescribed in R18-13-1412.
5. Keep the storage area free of visible contamination.
6. Protect biohazardous medical waste from contact with water, precipitation, wind, or animals. A generator shall ensure that the waste does not provide a breeding place or a food source for insects or rodents.
7. Handle spills by re-packaging the biohazardous medical waste, re-labeling the containers and cleaning any soiled surface as prescribed in R18-13-1407(A)(2)(b).
8. Notwithstanding subsections (C)(1) and (2), a generator shall minimize the off-site migration of odors and the presence of vermin. If the Department determines that a generator has not acted or adequately addressed odors or vermin, the Department shall require the waste to be removed or refrigerated at 40° F or less.

D. Trace chemotherapy waste shall be clearly identified as such by its label.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1409. Transporter License; Fees; Transportation

A. A transporter shall obtain a transporter license from the Department as provided under subsections (B) and (C) in addition to possessing a permit, license, or approval if required by a local health department, environmental agency, or other governmental agency with jurisdiction.

B. A transporter license is valid for five years after issuance. To renew the license, the licensee shall submit an application under subsection (B)(1) no later than 60 days prior to the license's expiration and shall pay the fee provided in subsection (B)(2). With each application submitted for approval, the applicant shall remit an initial transporter license application fee in accordance with Table 1. Fee Table - Transporter License Fees; Frequency of Application for Transporter License. This Table also lists the maximum fees that the Department will bill the applicant. All fees paid shall be payable to the state of Arizona. The Department shall deposit the fees paid into the Solid Waste Fee Fund established pursuant to A.R.S. § 49-881, unless otherwise authorized or required by law.

1. To apply for or to renew a transporter license, an applicant shall submit all of the following in a Department-approved format:
   a. The name, address, and telephone number of the transportation company or entity.
   b. All owners' names, addresses, and telephone numbers.
   c. All names, addresses, and telephone numbers of any agents authorized to act on behalf of the owner.
   d. A copy of either the certificate of disclosure required by A.R.S. § 49-109 or a written acknowledgment that this disclosure is not required.
   e. Photocopies or other evidence of the issuance of a permit, license, or approval if required by a local health department, environmental agency, or other governmental agency with jurisdiction.
   f. A copy of the transportation management plan as defined in R18-13-1401.
   g. A list identifying each dedicated vehicle.
   h. The initial transporter application license fee indicated in Table 1. Fee Table - Transporter License Fees; Frequency of Application for Transporter License.
2. The new or renewal application license fee shall be calculated by multiplying the hourly rate of $122 by the number of personnel hours involved in inspecting each transporting vehicle, evaluating the application, and approving the license, which amount shall be subtracted from the initial application license fee on deposit. Any remaining surplus of the initial application license fee on deposit shall be returned to the applicant. Any cost that

exceeds the initial application license fee on deposit shall be billed to the applicant, but shall not exceed the maximum.

3. The Department may only issue a transporter license, including a renewal, if all of the items in subsection (B)(1)(a) through (h) have been received and determined to be correct and complete, and a Department inspection of each transporting vehicle shows that the vehicle is in compliance with this Article.

C. Transporters shall pay by the invoice due date an annual fee of $750 for each calendar year following payment of the new or renewal application license fee and subsequent years in which a renewal application license fee is not charged and paid, such as in Table 2. Fee Table, Transporters Annual Fee.

D. Amendments. After issuance, the licensee shall submit to the Department any change to the information listed in subsections (B)(1)(a) through (h) within 30 days of its occurrence. Vehicles may only be added to the license after a Department inspection shows that the vehicle is in compliance with this Article. Amendments adding vehicles to the license shall be processed after payment of inspection fees and other expenses at the rate listed in subsection (B)(2), except that the application fee shall be $100 and the maximum fee $5,000.

E. An applicant who disagrees with the final bill received from the Department for the amendment, issuance, renewal or denial of a transporter license or vehicle inspections may make a written request to the Director for a review of the bill and may pay the bill under protest. The request for review shall specify the matters in dispute and shall be received by the Department within 10 working days of the date of receipt of the final bill.

F. Unless the Department and applicant agree otherwise, the review shall take place within 30 days of receipt by the Department of the request. The Director shall make a final decision as to whether the time and costs billed are correct and reasonable. The final decision shall be mailed to the applicant within 10 working days after the date of the review and is subject to appeal pursuant to A.R.S. §§ 41-1092 through 1092.12.

G. A person who transports biohazardous medical waste shall maintain in each transporting vehicle at all times a transportation management plan.

H. A transporter who accepts biohazardous medical waste from a generator shall transmit electronically or leave a physical copy of the tracking document described in R18-13-1406(B) with the person from whom the waste is accepted. A transporter shall ensure that a copy of the tracking document accompanies the person who has physical possession of the biohazardous medical waste. Upon delivery to a Department-approved transfer, storage, treatment, or disposal facility, the transporter shall obtain a copy of the tracking document, signed by a person representing the receiving facility, signifying acceptance of the biohazardous medical waste.

I. A transporter who transports biohazardous medical waste in a dedicated vehicle shall ensure that the cargo box, trailer, or compartment can be secured to limit access to authorized persons at all times except during loading and unloading. In addition, the cargo box, trailer, or compartment shall be constructed in compliance with one of the following:

1. Have a fully enclosed, leak-proof cargo compartment consisting of a floor, sides, and a roof that are made of a non-porous material impervious to biohazardous medical waste and physically separated from the driver's compartment.
2. Haul a fully enclosed, leak-proof cargo box made of a non-porous material impervious to biohazardous medical waste.
3. Tow a fully enclosed leak-proof trailer made of a non-porous material impervious to biohazardous medical waste.

J. A person who transports biohazardous medical waste in a vehicle not dedicated to the transportation of biohazardous medical waste, but that is used at least once weekly for a month shall comply with the following:

1. Subsections (A) and (G) through (K).
2. Clean the vehicle as prescribed in R18-13-1407(A)(2)(b) before it is used for another purpose.

K. A transporter of biohazardous medical waste shall comply with all of the following:

1. Accept only biohazardous medical waste packaged as prescribed in R18-13-1407.
2. Accept biohazardous medical waste only after providing the generator with a signed tracking document as prescribed in R18-13-1406(B), and keep a copy of the tracking document for the period required under the USDOT requirements, as listed in 49 CFR 172.201.
3. Deliver biohazardous medical waste to a Department-approved biohazardous medical waste storage, transfer, treatment, or disposal facility within the following timeframes:
   a. 72 hours of collection, if putrescible and unrefrigerated; or
   b. 90 days of collection, if putrescible and refrigerated at 40° F or less from hour 72 through day 90; or
   c. 90 days of collection, if nonputrescible and unrefrigerated.
4. Not hold biohazardous medical waste longer than specified under subsection (K)(3) unless the vehicle is parked at a Department-approved facility.
5. Except in emergency situations, not unload, reload, or transfer the biohazardous medical waste to another vehicle in any location other than a Department-approved facility. Combination vehicles or trailers may be uncoupled and coupled to another cargo vehicle or truck trailer as long as the biohazardous medical waste is not removed from the cargo compartment.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1217, effective July 1, 2012 (Supp. 12-2). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

Table 1. Fee Table - Transporter License Fees; Frequency of Application for Transporter License

Transporter License Fees

	Initial	Maximum
New Application	$2,000	$20,000
Renewal Application	$2,000	$20,000
Amendment Application	$100	$5,000

Frequency of Application for Transporter License

Year	Type of Application	Frequency
1	New	Once
6, 11, 16, etc.	Renewal	Every 5th Year

R18-13-1410. Storage, Transfer, Treatment, and Disposal Facilities; Facility Plan Approval

A. A person shall obtain solid waste facility plan approval from the Department as prescribed in A.R.S. § 49-762.04 to construct any facility that will be used to store, transfer, treat, or dispose of biohazardous medical waste that was generated off site. Plan approval shall be obtained before starting construction of the medical waste treatment or disposal facility. This requirement also applies to solid waste facilities for which an operator self-certifies under A.R.S. § 49-762.05, if the facility also will receive biohazardous medical waste.

B. If an air quality permit is required for the facility under A.R.S. Title 49, Chapter 3, the person shall include evidence of that air quality permit, or evidence of an air quality permit application with the application for solid waste facility plan approval.

C. A person applying for facility plan approval shall ensure that the plan contains information demonstrating how the plan will comply with this Article.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3).

R18-13-1411. Storage and Transfer Facilities; Design and Operation

An operator of a storage facility or transfer facility shall comply with all of the following design and operation requirements:

1. Design the facility so that biohazardous medical waste is always handled and stored separately from other types of solid waste if accepted at the facility.
2. Display prominently the universal biohazard symbol as prescribed in R18-13-1401.
3. Construct the storage area from smooth, easily cleanable non-porous material that is impervious to liquids and resistant to corrosion by disinfecting agents and hot water.
4. Protect biohazardous medical waste from contact with water, precipitation, wind, or animals.
5. Specify in the application for facility plan approval the maximum storage time that biohazardous medical waste will remain at the facility. If putrescible biohazardous medical waste will be stored for more than 72 hours, the operator shall equip the facility with a refrigerator to refrigerate putrescible biohazardous medical waste. The operator of the facility shall maintain the temperature in the refrigerator at 40° F or less.
6. Accept biohazardous medical waste only if it is accompanied by the tracking document. The operator shall sign the tracking document and keep a copy of the acceptance documentation for the period required under the USDOT requirements, as listed in 49 CFR 172.201.
7. Accept biohazardous medical waste if it is packaged as described in R18-13-1407. If a biohazardous medical waste container is damaged or leaking, improperly labeled, or otherwise unacceptable, a transfer facility operator shall do one of the following:
   a. Reject the waste and return it to the transporter or self-hauling generator.
   b. Accept the waste and immediately repackage it as prescribed in R18-13-1407(A).
8. Clean the storage area daily. "Clean" means to remove visible particles combined with one of the following:
   a. Exposure to hot water at a temperature of at least 180° F for a minimum of 15 seconds.
   b. Exposure to an EPA-approved chemical disinfectant used under established protocols and regulations.
   c. Any other method that the Department determines is acceptable, if the determination of acceptability is made in advance of the cleaning.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1412. Treatment Facilities; Application Requirements; Design and Operation

A. An operator who applies for facility plan approval shall comply with subsections (A)(1) and (2) as well as all of the requirements in subsections (B)(1) through (11):

1. Submit to the Department the following documentation:
   a. Equipment specifications that identify the proper type of medical waste to be treated in the equipment and any design or equipment restrictions.
   b. Manufacturer's specifications and operating procedures for the equipment that describe the type and volume of waste to be treated, monitoring data of the treatment process, and calibration and testing of the equipment, providing specific details about the capability of the equipment to achieve the treatment standards prescribed in R18-13-1415.
   c. Instructions for equipment maintenance, testing, and calibration that ensure the equipment achieves the treatment standards prescribed in R18-13-1415.
   d. Training manual for the equipment.
   e. Written certification from the manufacturer stating that the equipment, when operated properly, is capable of achieving the treatment standards prescribed in R18-13-1415.

2. Submit to the Department and have readily available at the facility, an operations procedure manual describing how the waste will be handled from the time it is accepted by the treater through the treatment process and final disposition of the treated waste. The operations procedure manual shall include all of the following:
   a. Provisions for treating biohazardous medical waste within 72 hours of receipt or refrigerating at 40° F or less upon determination that treatment or disposal will not occur within 72 hours. Nonputrescible biohazardous medical waste that is not immediately treated may be stored for up to 90 days unrefrigerated.
   b. A contingency plan if the treatment equipment is out of service for an extended period of time. The plan shall address the manner and length of time for storage of the waste. An operator shall not store biohazardous medical waste more than 90 days. The plan shall be based on the capacity of the treatment equipment to treat all waste at the facility, including any backlog of stored waste and any new waste intake. If the 90-day time-frame will be exceeded, the operator shall either stop accepting waste until the backlog is treated, or contract with another treatment facility for treating the waste.
   c. Procedures for handling hazardous chemicals, radioactive waste, and chemotherapy waste. The plan shall provide for scanning biohazardous medical waste with a Geiger counter and handling waste that measures above background level in a manner that complies with state and federal law.

B. An operator of a Department-approved facility shall comply with all of the following:
1. Have readily accessible written procedures stating that biohazardous medical waste is to be accepted from a transporter only if the waste is accompanied by a tracking document, and written procedures that require compliance with both of the following:
   a. The treater or the treater's authorized agent shall sign the tracking document and keep a copy of the acceptance documentation for the period required under the USDOT requirements, as listed in 49 CFR 172.201.
   b. If a biohazardous medical waste container is damaged or leaking, improperly labeled, or otherwise unacceptable, a treater shall do one of the following:
      i. Reject the waste and return it to the transporter or self-hauling generator.
      ii. Accept the waste and transfer it directly from the transporting vehicle to the treatment processing unit.
      iii. If the waste will not be treated immediately, repackage the waste for storage.
2. Assure that the facility is designed to meet both of the following requirements:
   a. Any floor or wall surface in the processing area of the facility which may come into contact with biohazardous medical waste is constructed of a smooth, easily cleanable non-porous material that is impervious to liquids.
   b. The floor surface in the treatment and storage area either has a curb of sufficient height to contain spills or slopes to a drain that connects to an approved sanitary sewage system, septic tank system, or collection device.
3. Store biohazardous medical waste as required in R18-13-1408.
4. Comply with all of the following if the treatment method is incineration:
   a. Reduce the incinerated medical waste, excluding metallic items, into carbonized or mineralized ash by incineration.
   b. Determine whether the ash is hazardous waste as required under R18-8-262.
5. Conduct any autoclaving according to the manufacturer's specifications for the unit.
6. Use only alternative medical waste treatment methods that achieve the treatment standards in R18-13-1415(A).
7. Treat animal waste, chemotherapy waste, and cultures and stocks as prescribed in R18-13-1420.
8. Render medical sharps incapable of creating a stick hazard by using an encapsulation agent or any other process that prevents a stick hazard.
9. Keep records of equipment maintenance and operational performance levels for three years. The records shall include the date and result of all equipment calibration and maintenance. Operational performance level records shall indicate the duration of time for each treatment cycle and:
   a. For steam treatment and microwaving treatment records, both the temperature and pressure maintained in the treatment unit during each cycle and the method used for confirmation of temperature and pressure.
   b. For chemical treatment, a description of the solution used.
   c. For incineration, the temperature is maintained in the treatment unit during operation.
   d. Any other operating parameters in the manufacturer's specifications.
   e. A description of the treatment method used and a copy of the maintenance test results.
10. Not open a sealed biohazardous medical waste container prior to treatment unless opening the container is required to treat the contents. Transfer of the entire contents, when performed as part of the treatment process, is permitted.
11. Clean the storage and treatment areas as necessary to protect the public health and employee health and safety.

C. The treater shall make treatment records available for Departmental inspection upon request.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1413. Changes to Approved Medical Waste Facility Plans

A. As required by A.R.S. § 49-762.06, before making any change to an approved facility plan, a facility owner or operator shall submit a notice to the Department stating the type of change requested, including but not limited to:
1. A Type I change to an approved medical waste facility plan is a change not described in subsections (A)(2), (3), or (4).
2. A Type II change to an approved medical waste facility plan is a change in which treatment equipment is replaced with equal or like equipment, resulting in either no increase to treatment capacity or the addition of equipment that is not directly used in the treatment process.

3. A Type III change to an approved medical waste facility plan is a change described by one of the following:
   a. Treatment equipment is added, resulting in less than a 25% increase in treatment capacity.
   b. The storage area is enlarged resulting in less than a 25% increase in storage capacity.
   c. Treatment technology is changed.
4. A Type IV change to an approved medical waste facility plan is a change described by one of the following:
   a. Treatment equipment is added, resulting in a 25% or more increase in treatment capacity.
   b. The storage area is enlarged resulting in a 25% or more increase in storage capacity.
   c. Treatment equipment is added that requires an environmental permit.
   d. An expansion of the treatment facility onto land not previously described in the approved plan.

B. As required by A.R.S. § 49-762.06, a treatment facility operator who has identified a change under subsection (A) shall comply with one of the following:
1. For a Type I change, make the change without notice to, or approval by the Department.
2. For a Type II change, before making any change, provide written notification that describes the change to the Department. The addition of refrigeration units only for compliance with this Article is a Type II change for which no Departmental approval is required.
3. For a Type III or Type IV change, submit an amended plan to the Department for approval before making any change. Departmental approval is required prior to making any change.

C. An owner or operator of an existing municipal solid waste landfill who intends to accept untreated biohazardous medical waste shall submit a notice of a Type III change and an amended facility plan.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1414. Alternative Medical Waste Treatment Methods: Registration and Equipment Specifications

A. A manufacturer or its agent who applies for alternative medical waste treatment method registration shall submit to the Department all of the following:
1. The manufacturer or company name and address.
2. The name, address, and telephone number of the person who submits the application.
3. A description of the alternative medical waste treatment method.
4. A list of any other states in which the treatment method is used, including a copy of any state approvals.
5. A description of by-products generated as result of the alternative treatment method.
6. A certification statement that the contents of the application are true and accurate to the knowledge and belief of the applicant.
7. Written documentation demonstrating that the alternative medical waste treatment method is capable of compliance with the treatment standards in this Article for the type of waste treated. The manufacturer shall employ a laboratory independent of any oversight activities by the manufacturer to provide this analysis.
8. The manufacturer's equipment specifications for the alternative medical waste treatment method being registered, including all of the following:
   a. Unit model number, or serial number.
   b. Equipment specifications that identify the proper type of biohazardous medical waste to be treated by the equipment and any design or equipment restrictions.
   c. Operating procedures for the equipment that ensure the equipment complies with the treatment standards prescribed in this Article for the type of waste treated.
   d. Instructions for equipment maintenance, testing, and calibration that ensure the equipment complies with the treatment standards prescribed in this Article for the type of waste treated.
9. Written documentation of registration if required by A.R.S. § 3-351.

B. The Department shall make a determination whether to approve the registration application. If the Department approves the application, it shall issue to the applicant a certification of registration containing an alternative medical waste treatment method registration number. Only an alternative technology method with a valid Department issued registration number meets the requirements of this Article.

C. If documentation of Departmental registration is not on file with a generator utilizing alternative medical waste treatment technology, the Department shall classify biohazardous medical waste treated using the unregistered alternative treatment technology as untreated biohazardous medical waste.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3776, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 27 A.A.R. 2801 (December 3, 2021), effective January 4, 2022 (Supp. 21-4).

R18-13-1415. Treatment Standards, Quantification of Microbial Inactivation and Efficacy Testing Protocols

A. A treater using an alternative treatment technology shall ensure that treatment achieves either of the following treatment standards:
1. A 6 $\log_{10}$ inactivation in the concentration of vegetative microorganisms.
2. A 4 $\log_{10}$ inactivation in the concentration of *Bacillus stearothermophilus* or *Bacillus subtilis* as is appropriate to the technology.

B. A treater utilizing an alternative treatment method shall conduct efficacy studies to demonstrate that the treatment mechanisms are capable of achieving the standards in subsection (A) through either of the following:
1. Mycobacterial species used as indicators of vegetative microorganisms:
   a. *Mycobacterium phlei*, or
   b. *Mycobacterium bovis* (BOG) (ATCC 35743)
2. Spore suspensions of one of the following two bacterial species, as appropriate to the technology, used as biological indicators in efficacy tests of thermal, chemical, and irradiation treatment systems. Studies shall demonstrate a 4 $\log_{10}$ reduction in the concentration of viable spores, through the use of an initial inoculum suspension of 5 $\log_{10}$ or greater of:
   a. *Bacillus stearothermophilus* (ATCC 7953), or
   b. *Bacillus subtilis* (ATCC 19659).

C. A treater utilizing an alternative treatment method shall quantify microbial inactivation as follows:

1. Microbial inactivation, or "kill" efficacy is equated to "Log_{10} Kill" that is defined as the difference between the logarithms of the number of viable test microorganisms before and after treatment. This definition is stated as:
   $Log_{10}Kill = Log_{10}(cfu/g \text{ "I"}) - Log_{10}(cfu/g \text{ "R"})$
   where:
   $Log_{10}Kill$ is equivalent to the term Log_{10} reduction,
   "I" is the number of viable test microorganisms introduced into the treatment unit,
   "R" is the number of viable test microorganisms recovered from the treatment unit, and
   "cfu/g" are colony forming units per gram of waste solids.
2. For those treatment processes that can maintain the integrity of the biological indicator carrier of the desired microbiological test strain, biological indicators of the required strain and concentration may be used to demonstrate microbial inactivation. Quantification is evaluated by growth or no growth of the cultured biological indicator.
3. For those treatment mechanisms that cannot ensure or provide integrity of the biological indicator, quantitative measurement of microbial inactivation requires a two-step approach: Step 1 "Control" and Step 2 "Test". The purpose of Step 1 is to account for the reduction of test microorganisms due to loss by dilution or physical entrapment.
   a. Step 1:
      i. Use microbial cultures of a predetermined concentration necessary to ensure a sufficient microbial recovery at the end of this step.
      ii. Add suspension to a standardized medical waste load that is to be processed under normal operating conditions without the addition of the treatment agent (that is, heat, chemicals).
      iii. Collect and wash waste samples after processing to recover the biological indicator organisms in the sample.
      iv. Plate the recovered microorganism suspensions to quantify microbial recovery. The number of viable microorganisms recovered serves as a baseline quantity for comparison to the number of recovered microorganisms from wastes processed with the treatment agent.
      v. The required number of recovered viable indicator microorganisms from Step 1 must be equal to or greater than the number of microorganisms required to demonstrate the prescribed Log reduction, either a 6 Log_{10} reduction for vegetative microorganisms or a 4 Log_{10} reduction for bacterial spores. This can be defined by the following equation:
         $Log_{10}RC = Log_{10}IC - Log_{10}NR$
         or
         $Log_{10}NR = Log_{10}IC - Log_{10}RC$
         where:
         $Log_{10}RC$ is greater than 6 for vegetative microorganisms and greater than 4 for bacterial spores and where:
         $Log_{10}RC$ is the number of viable "control" microorganisms in colony forming units per gram of waste solids recovered in the non-treated, processed waste residue;
         $Log_{10}IC$ is the number of viable "control" microorganisms in colony forming units per gram of waste solids introduced into the treatment unit;
         $Log_{10}NR$ is the number of "control" microorganisms in colony forming units per gram of waste solids which were not recovered in the non-treated, processed waste residue. $Log_{10}NR$ represents an accountability factor for microbial loss.
   b. Step 2:
      i. Use microbial cultures of the same concentration as in Step 1.
      ii. Add suspension to the standardized medical waste load that is to be processed under normal operating conditions with the addition of the treatment agent.
      iii. Collect and wash waste samples after processing to recover the biological indicator organisms in the sample.
      iv. Plate recovered microorganism suspensions to quantify microbial recovery.
      v. From data collected from Step 1 and Step 2, the level of microbial inactivation, "Log_{10} Kill", is calculated by employing the following equation:
         $Log_{10}Kill = Log_{10}IT - Log_{10}NR - Log_{10}RT$
         where:
         $Log_{10}Kill$ is equivalent to the term Log_{10} reduction;
         $Log_{10}IT$ is the number of viable "Test" microorganisms in colony forming units per gram of waste solids introduced into the treatment unit. $Log_{10}IT = Log_{10}IC$;
